UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the 13 weeks ended September 24, 2016

OR

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the Transition period from _____ to _____

Commission file number 1-11657

TUPPERWARE BRANDS CORPORATION

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

36-4062333

(I.R.S. Employer
Identification No.)

14901 South Orange Blossom Trail, Orlando, Florida 32837

(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (407) 826-5050

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of October 20, 2016, 50,561,384 shares of the common stock, \$0.01 par value, of the registrant were outstanding.

Table of Contents

TUPPERWARE BRANDS CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1: Summary of Significant Accounting Policies

Basis of Presentation: The condensed consolidated financial statements include the accounts of Tupperware Brands Corporation and its subsidiaries, collectively “Tupperware” or the “Company”, with all intercompany transactions and balances having been eliminated. These condensed consolidated financial statements and related notes should be read in conjunction with the audited 2015 financial statements included in the Company's Annual Report on Form 10-K for the year ended December 26, 2015.

Certain prior year amounts have been reclassified to conform with current year presentation.

These condensed consolidated financial statements are unaudited and have been prepared following the rules and regulations of the United States Securities and Exchange Commission and, in the Company's opinion, reflect all adjustments, including normal recurring items that are necessary for a fair presentation of the results for the interim periods. Certain information and note disclosures normally included in the balance sheet, statements of income, comprehensive income and cash flows prepared in conformity with accounting principles generally accepted in the United States of America have been condensed or omitted as permitted by such rules and regulations. Operating results of any interim period presented herein are not necessarily indicative of the results that may be expected for a full fiscal year.

The Company's fiscal year ends on the last Saturday of December. As a result, the 2016 fiscal year will include 53 weeks, as compared with 52 weeks for fiscal 2015, and the fourth quarter of 2016 will include 14 weeks.

Use of Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from these estimates.

Note 2: Shipping and Handling Costs

The cost of products sold line item includes costs related to the purchase and manufacture of goods sold by the Company. Among these costs are inbound freight charges, duties, purchasing and receiving costs, inspection costs, depreciation expense, internal transfer costs and warehousing costs of raw material, work in process and packing materials. The warehousing and distribution costs of finished goods are included in delivery, sales and administrative expense (“DS&A”). Distribution costs are comprised of outbound freight and associated labor costs. Fees billed to customers associated with the distribution of products are classified as revenue. The distribution costs included in DS&A expense for the third quarters of 2016 and 2015 were \$32.6 million and \$32.7 million, respectively, and for the year-to-date periods ended September 24, 2016 and September 26, 2015 were \$99.1 million and \$103.2 million, respectively.

Note 3: Promotional Costs

The Company frequently makes promotional offers to members of its independent sales force to encourage them to fulfill specific goals or targets for sales levels, party attendance, addition of new sales force members or other business-critical functions. The awards offered are in the form of product awards, special prizes or trips.

The Company accrues for the costs of these awards during the period over which the sales force qualifies for the award and reports these costs primarily as a component of DS&A expense. These accruals require estimates as to the cost of the awards, based upon estimates of achievement and actual cost to be incurred. During the qualification period, actual results are monitored, and changes to the original estimates are made when known. Promotional and other sales force compensation expenses included in DS&A expense totaled \$89.5 million and \$88.2 million for the third quarters of 2016 and 2015, respectively, and \$281.2 million and \$288.0 million for the year-to-date periods ended September 24, 2016 and September 26, 2015, respectively.

Raw materials and supplies	32.8	30.4
Total inventories	\$ 275.0	\$ 254.6

Note 5: Net Income Per Common Share

Basic per share information is calculated by dividing net income by the weighted average number of shares outstanding. Diluted per share information is calculated by also considering the impact of potential common stock on both net income and the weighted average number of shares outstanding.

The elements of the earnings per share computations were as follows:

(In millions, except per share amounts)	13 weeks ended September 26, 2016		39 weeks ended September 26, 2015	
Net income	\$48.8	\$ 36.2	\$144.6	\$ 127.7
Weighted-average shares of common stock outstanding	50.5	49.9	50.5	49.8
Common equivalent shares:				
Assumed exercise of dilutive options, restricted shares, restricted stock units and performance share units	0.3	0.4	0.2	0.5
Weighted-average common and common equivalent shares outstanding	50.8	50.3	50.7	50.3
Basic earnings per share	\$0.97	\$ 0.72	\$2.86	\$ 2.56
Diluted earnings per share	\$0.96	\$ 0.72	\$2.85	\$ 2.54
Shares excluded from the determination of potential common stock because inclusion would have been anti-dilutive	0.9	1.1	1.4	0.8

Note 6: Accumulated Other Comprehensive Loss

(In millions, net of tax)	Foreign Currency Items	Cash Flow Hedges	Pension and Other Post-retirement Items	Total
Balance at December 26, 2015	\$(490.6)	\$ 4.3	\$ (35.7)	\$(522.0)
Other comprehensive income (loss) before reclassifications	(20.2)	0.2	(0.7)	(20.7)
Amounts reclassified from accumulated other comprehensive loss	—	(3.1)	1.5	(1.6)
Net current-period other comprehensive income (loss)	(20.2)	(2.9)	0.8	(22.3)
Balance at September 24, 2016	\$(510.8)	\$ 1.4	\$ (34.9)	\$(544.3)

(In millions, net of tax)	Foreign Currency Items	Cash Flow Hedges	Pension and Other Post-retirement Items	Total
Balance at December 27, 2014	\$(368.3)	\$ 7.8	\$ (48.2)	\$(408.7)
Other comprehensive income (loss) before reclassifications	(110.1)	10.3	2.2	(97.6)
Amounts reclassified from accumulated other comprehensive loss	—	(10.8)	2.0	(8.8)
Net current-period other comprehensive income (loss)	(110.1)	(0.5)	4.2	(106.4)
Balance at September 26, 2015	\$(478.4)	\$ 7.3	\$ (44.0)	\$(515.1)

Pretax amounts reclassified from accumulated other comprehensive loss that related to cash flow hedges consisted of net gains of \$4.3 million and \$14.1 million for the year-to-date periods ended September 24, 2016 and September 26, 2015, respectively. Associated with these items were tax provisions of \$1.2 million and \$3.3 million, respectively. See Note 11 for further discussion of derivatives.

For the year-to-date periods ended September 24, 2016 and September 26, 2015, pretax amounts reclassified from accumulated other comprehensive loss related to pension and other post-retirement items consisted of prior service benefits of \$1.1 million and \$1.0 million, respectively, pension settlement costs of \$1.5 million and \$0.5 million, respectively, and actuarial losses of \$1.3 million and \$3.2 million, respectively. The tax benefits associated with these items were \$0.2 million and \$0.7 million, respectively. See Note 13 for further discussion of pension and other post-retirement benefit costs.

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Note 7: Re-engineering and Impairment Costs

The Company recorded \$2.4 million and \$0.3 million in re-engineering charges during the third quarters of 2016 and 2015, respectively, and \$5.4 million and \$4.5 million for the year-to-date periods ended September 24, 2016 and September 26, 2015, respectively.

In both years, these charges were primarily related to severance costs incurred for headcount reductions in several of the Company's operations in connection with changes in its management and organizational structures.

The balances included in accrued liabilities related to re-engineering and impairment charges as of September 24, 2016 and December 26, 2015 were as follows:

(In millions)	September 24, December 26,	
	2016	2015
Beginning of the year balance	\$ 1.7	\$ 2.4
Provision	5.4	6.8
Non-cash charges	(0.1)	(0.2)
Cash expenditures:		
Severance	(4.4)	(5.8)
Other	(1.0)	(1.5)
End of period balance	\$ 1.6	\$ 1.7

The accrual balance as of September 24, 2016, related primarily to severance payments to be made by the end of the 2016.

Included in the re-engineering and impairment caption on the Company's consolidated statement of income in the year-to-date period of 2015 was \$13.5 million in long-term fixed asset impairments in Venezuela.

Note 8: Goodwill and Intangible Assets

The Company's goodwill and intangible assets relate primarily to the December 2005 acquisition of the direct-to-consumer businesses of Sara Lee Corporation.

In the third quarters of 2016 and 2015, the Company completed the annual assessments for all of its reporting units and indefinite-lived intangible assets, concluding there were no impairments. The Company only considers the goodwill balances of \$77 million and \$28 million associated with the Fuller Mexico and NaturCare Japan reporting units, respectively, to be significant relative to total equity.

These assessments included a step 1 impairment evaluation for the goodwill associated with the Fuller Mexico reporting unit as prescribed under ASC 350, Intangibles - Goodwill and Other. The fair value analysis for Fuller Mexico was completed using a combination of the income and market approach with a 75 percent weighting on the income approach. The significant assumptions used in the income approach included estimates regarding future operations and the ability to generate cash flows, including projections of revenue, costs, utilization of assets and capital requirements. The income approach, or discounted cash flow approach, also requires an estimate as to the appropriate discount rate to be used for each entity. The most sensitive estimate in this valuation is the projection of operating cash flows, as these provide the basis for the estimate of fair market value. The Company's cash flow model used a forecast period of 10 years and a terminal value. The growth rates were determined by reviewing historical results of the operating unit and the historical results of the Company's other similar business units, along with the expected contribution from growth strategies being implemented. The market approach relies on an analysis of publicly-traded companies similar to Tupperware and deriving a range of revenue and profit multiples. The publicly-traded companies used in the market approach were selected based on their having similar product lines of consumer goods, beauty products and/or companies using a direct-to-consumer distribution method. The resulting multiples were then applied to the reporting unit to determine fair value.

The significant assumptions for the Fuller Mexico step 1 analysis included annual revenue growth rates ranging from 1 percent to 5 percent with an average growth rate of 4 percent, including a 3 percent growth rate used in calculating the terminal value. The discount rate used for Fuller Mexico was 14.8 percent.

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

The amount by which the estimated fair value of the Fuller Mexico reporting unit exceeded its carrying value, at 20 percent, was more in the third quarter of 2016 than in the 2015 assessment, primarily due to an increase in the estimated fair market value in connection with improved market pricing metrics and other observable market conditions, as well as a lower carrying value in 2016, reflecting the amortization of the definite-lived Fuller tradename. Though the estimated fair value of the reporting unit exceeded its carrying value in the annual assessment, a smaller sales force size and/or operating performance significantly below current expectations, including changes in projected future revenue, profitability and cash flow, as well as higher working capital, interest rates or cost of capital, could have a negative effect on the fair value of the reporting unit and therefore reduce the fair value below the carrying value. This could result in recording an impairment charge to the goodwill of Fuller Mexico.

Also in the third quarter of 2016, the Company performed a qualitative assessment for the goodwill associated with the NaturCare reporting unit and concluded it was more likely than not that the fair value of the reporting unit was greater than its carrying amount. The estimated fair value of the NaturCare reporting unit exceeded the carrying value by 130 percent, as of September 2015, the date of the reporting unit's most recent step 1 analysis. Based on the Company's evaluation of the assumptions and sensitivities associated with the step 1 analysis for NaturCare, the Company concluded that the fair value substantially exceeded its carrying value as of September 2015.

Other than for the Fuller Mexico reporting unit, management has concluded there is no significant foreseeable risk of failing a future step 1 impairment test, nor is there significant foreseeable risk of the fair value of the indefinite-lived intangible assets falling below their respective carrying values. Given the sensitivity of fair value valuations to changes in cash flow or market multiples, the Company may be required to recognize an impairment of goodwill or indefinite-lived intangible assets in the future due to changes in market conditions or other factors related to the Company's performance. Actual results below forecasted results or a decrease in the forecasted future results of the Company's business plans or changes in discount rates could also result in an impairment charge, as could changes in market characteristics including declines in valuation multiples of comparable publicly-traded companies. Impairment charges would have an adverse impact on the Company's net income and shareholders' equity.

Note 9: Segment Information

The Company manufactures and distributes a broad portfolio of products, primarily through independent direct sales consultants. Certain operating segments have been aggregated based upon consistency of economic substance, geography, products, production process, class of customers and distribution method.

Effective from the first quarter of 2016, the Nutrimetics business in France, previously reported in the Asia Pacific segment, is being reported in the Europe segment. Comparable information from prior periods has been reclassified to conform with the new presentation. In full year 2015, Nutrimetics France generated less than one half percent of total sales.

The Company's reportable segments include the following:

Europe	Primarily design-centric preparation, storage and serving solutions for the kitchen and home
Asia Pacific	through the Tupperware® brand. Europe also includes Avroy Shlain® in South Africa and Nutrimetics® in France, which sell beauty and personal care products. Some units in Asia
Tupperware	Pacific also sell beauty and personal care products under the NaturCare®, Nutrimetics® and
North America	Fuller® brands.
Beauty North America	Premium cosmetics, skin care and personal care products marketed under the BeautiControl® brand in the United States, Canada and Puerto Rico and Fuller
	Cosmetics® brands in Mexico and Central America.
South America	Both housewares and beauty products under the Fuller®, Nutrimetics®, Nuvo® and
	Tupperware® brands.

Worldwide sales of beauty and personal care products totaled \$87.2 million and \$96.7 million in the third quarters of 2016 and 2015, respectively, and \$272.1 million and \$325.0 million in the respective year-to-date periods.

(a) \$193.3 million and \$153.7 million denominated in euros as of September 24, 2016 and December 26, 2015, respectively.

Credit Agreement

As of September 24, 2016, the Company had a weighted average interest rate on outstanding LIBOR based borrowings of 1.50 percent under the Credit Agreement.

At September 24, 2016, the Company had \$659.3 million of unused lines of credit, including \$400.9 million under the committed, secured Credit Agreement, and \$258.4 million available under various uncommitted lines around the world.

The Credit Agreement has customary financial covenants related to interest coverage and leverage. These restrictions are not expected to impact the Company's operations. As of September 24, 2016, and currently, the Company had considerable cushion under its financial covenants.

Note 11: Derivative Instruments and Hedging Activities

The Company is exposed to fluctuations in foreign currency exchange rates on the earnings, cash flows and financial position of its international operations. Although this currency risk is partially mitigated by the natural hedge arising from the Company's local manufacturing in many markets, a strengthening U.S. dollar generally has a negative impact on the Company. In response to these fluctuations, the Company uses financial instruments to hedge certain of its exposures and to manage the foreign exchange impact to its financial statements. At its inception, a derivative financial instrument is designated as a fair value, cash flow or net equity hedge.

Fair value hedges are entered into with financial instruments such as forward contracts, with the objective of limiting exposure to certain foreign exchange risks primarily associated with accounts payable and non-permanent intercompany transactions. For derivative instruments that are designated and qualify as fair value hedges, the gain or loss on the derivative, as well as the offsetting gain or loss on the hedged item attributable to the hedged risk, are recognized in current earnings. In assessing hedge effectiveness, the Company excludes forward points, which are considered to be a component of interest expense. The forward points on fair value hedges resulted in pretax gains of \$3.4 million and \$2.6 million in the third quarters of 2016 and 2015, respectively, and \$11.2 million and \$9.0 million for the respective year-to-date periods.

The Company also uses derivative financial instruments to hedge foreign currency exposures resulting from certain forecasted purchases and classifies these as cash flow hedges. At initiation, the Company's cash flow hedge contracts are generally for periods ranging from one to fifteen months. The effective portion of the gain or loss on the hedging instrument is recorded in other comprehensive income and is reclassified into earnings as the transactions being hedged are recorded. As such, the balance at the end of the current reporting period in other comprehensive income, related to cash flow hedges, will generally be reclassified into earnings within the next twelve months. The associated asset or liability on the open hedges is recorded in other current assets or accrued liabilities, as applicable. In assessing hedge effectiveness, the Company excludes forward points, which are included as a component of interest expense.

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

The Company also uses financial instruments, such as forward contracts and certain euro denominated borrowings under the Company's Credit Agreement, to hedge a portion of its net equity investment in international operations and classifies these as net equity hedges. Changes in the value of these financial instruments, excluding any ineffective portion of the hedges, are included in foreign currency translation adjustments within accumulated other comprehensive loss. The Company recorded, net of tax, in other comprehensive income a net gain of \$6.5 million and \$9.9 million associated with these hedges in the third quarter and year-to-date periods of 2016, respectively, and a net gain of \$27.7 million and \$54.1 million associated with such hedges for the respective periods of 2015. Due to the permanent nature of the investments, the Company does not anticipate reclassifying any portion of these amounts to the income statement in the next twelve months. In assessing hedge effectiveness, the Company excludes forward points, which are included as a component of interest expense.

While the forward contracts used for net equity and fair value hedges of non-permanent intercompany balances mitigate its exposure to foreign exchange gains or losses, they result in an impact to operating cash flows as they are settled, whereas the hedged items do not generate offsetting cash flows. The net cash flow impact of these currency hedges for the year-to-date periods ended September 24, 2016 and September 26, 2015 were outflows of \$5.6 million and \$21.1 million, respectively.

The Company considers the total notional value of its forward contracts as the best measure of the volume of derivative transactions. As of September 24, 2016 and December 26, 2015, the notional amounts of outstanding forward contracts to purchase currencies were \$118.1 million and \$141.9 million, respectively, and the notional amounts of outstanding forward contracts to sell currencies were \$118.1 million and \$137.4 million, respectively. As of September 24, 2016, the notional values of the largest positions outstanding were to purchase euro \$108.4 million and to sell Indonesian rupiah \$21.7 million.

The following table summarizes the Company's derivative positions, which are the only assets and liabilities recorded at fair value on a recurring basis, and the impact they had on the Company's financial position as of September 24, 2016 and December 26, 2015. Fair values were determined based on third party quotations (Level 2 fair value measurement):

Derivatives designated as hedging instruments (in millions)	Asset derivatives		Liability derivatives			
	Balance sheet location	Fair value		Balance sheet location	Fair value	
		Sep 24 2016	Dec 26, 2015		Sep 24 2016	Dec 26, 2015
Foreign exchange contracts	Non-trade amounts receivable	\$30.9	\$21.5	Accrued liabilities	\$28.4	\$14.6

The following table summarizes the impact of the Company's fair value hedging positions on the results of operations for the third quarters of 2016 and 2015:

Derivatives designated as fair value hedges (in millions)	Location of gain or (loss) recognized in income on derivatives	Amount of gain or (loss) recognized in income on derivatives		Location of gain or (loss) recognized in income on related hedged items	Amount of gain or (loss) recognized in income on related hedged items	
		2016	2015		2016	2015
		Foreign exchange contracts	Other expense		\$ (11.7)	\$ (44.3)

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Note 12: Fair Value Measurements

Due to their short maturities or their insignificance, the carrying amounts of cash and cash equivalents, accounts and notes receivable, accounts payable, accrued liabilities and short-term borrowings approximated their fair values at September 24, 2016 and December 26, 2015. The Company estimates that, based on current market conditions, the value of its 4.75%, 2021 senior notes was \$651.3 million at September 24, 2016, compared with the carrying value of \$599.4 million. The higher fair value resulted from changes, since issuance, in the corporate debt markets and investor preferences. The fair value of debt is classified as a Level 2 liability, and is estimated using quoted market prices as provided in secondary markets that consider the Company's credit risk and market related conditions. See Note 11 to the Consolidated Financial Statements for discussion of the Company's derivative instruments and related fair value measurements.

Note 13: Retirement Benefit Plans

Components of net periodic benefit cost for the third quarter and year-to-date periods ended September 24, 2016 and September 26, 2015 were as follows:

	Third Quarter				Year-to-Date			
	Pension benefits		Post-retirement benefits		Pension benefits		Post-retirement benefits	
(In millions)	2016	2015	2016	2015	2016	2015	2016	2015
Service cost	\$2.7	\$2.6	\$0.1	\$0.1	\$8.1	\$8.1	\$0.1	\$0.1
Interest cost	1.6	1.8	0.2	0.1	4.8	5.3	0.6	0.5
Expected return on plan assets	(1.3)	(1.4)	—	—	(4.0)	(4.2)	—	—
Settlement/curtailment	0.9	0.1	—	—	1.5	0.5	—	—
Net amortization	0.4	1.0	(0.3)	(0.3)	1.2	3.1	(1.0)	(0.9)
Net periodic benefit cost	\$4.3	\$4.1	\$—	\$(0.1)	\$11.6	\$12.8	\$(0.3)	\$(0.3)

During the year-to-date periods ending September 24, 2016 and September 26, 2015, approximately \$1.7 million and \$2.7 million, respectively, of pretax expenses were reclassified from other comprehensive income to a component of net periodic benefit cost. As they relate to non-U.S. plans, the Company uses current exchange rates to make these reclassifications. The impact of exchange rate fluctuations is included on the net amortization line of the table above.

Note 14: Income Taxes

The effective tax rates for the third quarter and year-to-date periods of 2016 were 38.4 percent and 30.4 percent compared with 28.5 percent and 28.4 percent, respectively, for the comparable 2015 periods. The 2016 rates were higher primarily due to a gain from the land transactions near the Company's headquarters during the third quarter, which was subject to an effective U.S. federal and state tax rate of 38.5 percent. The 2016 year-to-date effective tax rate is below the U.S. statutory rate primarily due to lower foreign effective tax rates.

As of September 24, 2016 and December 26, 2015, the Company's gross unrecognized tax benefit was \$20.7 million and \$21.8 million, respectively. The Company estimates that as of September 24, 2016, approximately \$19.2 million of the unrecognized tax benefits, if recognized, would impact the effective tax rate. Interest and penalties related to uncertain tax positions in the Company's global operations are recorded as a component of the provision for income taxes. Accrued interest and penalties were \$6.8 million and \$6.0 million as of the periods ended September 24, 2016 and December 26, 2015.

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

The Company estimates that it may settle one or more foreign audits in the next twelve months that may result in a decrease in the amount of accrual for uncertain tax positions of up to \$1.0 million. For the remaining balance as of September 24, 2016, the Company is not able to reliably estimate the timing or ultimate settlement amount. While the Company does not currently expect material changes, it is possible that the amount of unrecognized benefit with respect to the uncertain tax positions will significantly increase or decrease related to audits in various foreign jurisdictions that may conclude during that period or new developments that could also, in turn, impact the Company's assessment relative to the establishment of valuation allowances against certain existing deferred tax assets. These valuation allowances relate to tax assets in jurisdictions where it is management's best estimate that there is not a greater than 50 percent probability that the benefit of the assets will be realized in the associated tax returns. The likelihood of realizing the benefit of deferred tax assets is assessed on an ongoing basis. This assessment requires estimates as to future operating results, as well as an evaluation of the effectiveness of the Company's tax planning strategies. At this time, the Company is not able to make a reasonable estimate of the range of impact on the balance of unrecognized tax benefits or the impact on the effective tax rate related to these items.

Note 15: Statement of Cash Flow Supplemental Disclosure

Under the Company's stock incentive programs, employees are allowed to use shares retained by the Company to satisfy minimum statutorily required withholding taxes in certain jurisdictions. In the year-to-date periods ended September 24, 2016 and September 26, 2015, 21,189 and 12,847 shares, respectively, were retained to fund withholding taxes, with values totaling \$1.1 million and \$0.9 million, respectively, which were included as stock repurchases in the Consolidated Statements of Cash Flows.

Note 16: Stock Based Compensation

Stock option activity for 2016 is summarized in the following table:

	Shares subject to option	Weighted average exercise price per share	Aggregate intrinsic value (in millions)
Outstanding at December 26, 2015	2,100,478	\$ 56.92	
Expired / Forfeited	(8,673)	61.48	
Exercised	(25,292)	23.20	
Outstanding at September 24, 2016	2,066,513	\$ 57.32	\$ 18.8
Exercisable at September 24, 2016	1,260,367	\$ 55.43	\$ 14.1

The intrinsic value of options exercised totaled \$0.2 million and \$4.7 million in the third quarters of 2016 and 2015, respectively, and \$0.9 million and \$7.3 million in the respective year-to-date periods.

The Company also has time-vested, performance-vested and market-vested share awards. The activity for such awards in 2016 is summarized in the following table:

	Shares outstanding	Weighted average grant date fair value
December 26, 2015	550,467	\$ 69.71
Time-vested shares granted	45,752	56.56
Market-vested shares granted	30,019	49.55
Performance shares granted	89,321	49.95
Performance share adjustments	12,934	59.23
Vested	(134,192)	77.80
Forfeited	(22,185)	72.32
September 24, 2016	572,116	\$ 62.05

Compensation expense related to the Company's stock based compensation for the third quarter and year-to-date periods ended September 24, 2016 and September 26, 2015 were as follows:

(In millions)	Third Quarter		Year-to-Date	
	2016	2015	2016	2015
Stock options	\$0.6	\$0.4	\$ 1.9	\$ 1.5
Time, performance and market vested share awards	4.2	3.2	11.1	10.3

As of September 24, 2016, total unrecognized stock based compensation expense related to all stock based awards was \$20.9 million, which is expected to be recognized over a weighted average period of 1.7 years.

Table of ContentsTUPPERWARE BRANDS CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Unaudited)

Note 17: Allowance for Long-Term Receivables

As of September 24, 2016, \$10.5 million of long-term receivables from both active and inactive customers were considered past due, the majority of which were reserved through the Company's allowance for uncollectible accounts. The balance of the allowance for long-term receivables as of September 24, 2016 was as follows:

(In millions)

Balance at December 26, 2015	\$11.2
Write-offs	(1.6)
Provision and reclassifications	1.9
Currency translation adjustment	0.4
Balance at September 24, 2016	\$11.9

Note 18: Guarantor Information

The Company's payment obligations under its senior notes due in 2021 are fully and unconditionally guaranteed, on a senior secured basis, by Dart Industries Inc. (the "Guarantor"). The guarantee is secured by certain "Tupperware" trademarks and service marks owned by the Guarantor.

Condensed consolidated financial information as of September 24, 2016 and December 26, 2015 and for the quarter-to-date periods ended September 24, 2016 and September 26, 2015 for Tupperware Brands Corporation (the "Parent"), the Guarantor and all other subsidiaries (the "Non-Guarantors") is as follows.

Each entity in the consolidating financial information follows the same accounting policies as described in the consolidated financial statements, except for the use by the Parent and Guarantor of the equity method of accounting to reflect ownership interests in subsidiaries that are eliminated upon consolidation. The Guarantor is 100% owned by the Parent, and there are certain entities within the Non-Guarantors classification that the Parent owns directly. There are no significant restrictions on the ability of either the Parent or the Guarantor to obtain adequate funds from their respective subsidiaries by dividend or loan that should interfere with their ability to meet their operating needs or debt repayment obligations.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Note 19: New Accounting Pronouncements

In August 2016, the FASB issued an amendment to existing guidance on presentation and classification of certain cash receipts and cash payments in the Statement of Cash Flows. This guidance is intended to reduce diversity in the classification of transactions related to debt prepayment or debt extinguishment costs, zero-coupon debt instruments settlement, contingent consideration payments made after a business combination, insurance claims settlement and corporate-owned life insurance settlement, distributions from equity method investments and beneficial interests in securitization transactions. This guidance is effective for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted. The Company does not expect adoption of this amendment to have an impact on its Consolidated Financial Statements.

In May 2014, the FASB issued an amendment to existing guidance regarding revenue from contracts with customers. The amendment outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. In August 2015, the FASB issued an amendment to defer the effective date by one year to December 15, 2017 for annual reporting periods beginning after that date. The August 2015 amendment also allows early adoption of the revenue standard, but not before the original effective date of December 15, 2016. In March and April 2016, the FASB issued amendments to provide clarification on implementation guidance. In May 2016, the FASB issued amendments to provide clarification on assessment of collectibility criteria, presentation of sales taxes and measurement of noncash consideration. In addition, the amendment provided clarification and included simplification to transition guidance on contract modifications and completed contracts at transition. The Company is currently evaluating the impact of the adoption of this amendment on its Consolidated Financial Statements.

In March 2016, the FASB issued an amendment to existing guidance regarding employee share-based payments. Under the amendment, all excess tax benefits and tax deficits will be recognized in the income statement. Regardless of the impact on taxes payable, the tax benefits will be recognized in the current period and excess tax benefits will be classified as an element of cash flow operating activities. In addition, the amendment included simplification to existing guidance on forfeitures, intrinsic value and the withholding of shares for participants' personal income taxes. This guidance is effective for fiscal years beginning after December 15, 2016. Early adoption is permitted. There will be an impact of adopting this standard on the consolidated financial statements that likely will lead to increased volatility of the Company's tax rate that will be dependent on the timing and intrinsic value of future share-based compensation award exercises.

In February 2016, the FASB issued an amendment to existing guidance on lease accounting that requires the assets and liabilities arising from operating leases be presented in the balance sheet. This guidance is effective for fiscal years beginning after December 15, 2018. Early adoption is permitted. The Company is currently evaluating the impact of the adoption of this amendment on its Consolidated Financial Statements.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following is a discussion of the results of operations for the 13 and 39 weeks ended September 24, 2016, compared with the 13 and 39 weeks ended September 26, 2015, and changes in financial condition during the 39 weeks ended September 24, 2016. The Company's fiscal year ends on the last Saturday of December. As a result, the 2016 fiscal year will include 53 weeks, as compared with 52 weeks for fiscal 2015, and the fourth quarter of 2016 will include 14 weeks.

The Company's primary means of distributing its products is through independent sales organizations and individuals, which in many cases are also its customers. The vast majority of the Company's products are, in turn, sold to end customers who are not members of its sales force. The Company is largely dependent upon these independent sales organizations and individuals to reach end consumers, and any significant disruption of this distribution network would have a negative financial impact on the Company and its ability to generate sales, earnings and operating cash flows. The Company's primary business drivers are the size, activity, diversity and productivity of its independent sales organizations.

As the impacts of foreign currency translation are an important factor in understanding period-to-period comparisons, the Company believes the presentation of results on a local currency basis, as a supplement to reported results, helps improve readers' ability to understand the Company's operating results and evaluate performance in comparison with prior periods. The Company presents local currency information that compares results between periods as if current period exchange rates had been used to translate results in the prior period. The Company uses results on a local currency basis as one measure to evaluate performance. The Company generally refers to such amounts as calculated on a "local currency" basis, or "excluding the impact of foreign currency." These results should be considered in addition to, not as a substitute for, results reported in accordance with generally accepted accounting principles in the United States ("GAAP"). Results on a local currency basis may not be comparable to similarly titled measures used by other companies.

Effective from the first quarter of 2016, the Nutrimetics business in France, previously reported in the Asia Pacific segment, is being reported in the Europe segment. Comparable information from prior periods has been reclassified to conform with the new presentation. In full year 2015, Nutrimetics France generated less than one half percent of total sales.

pppercentage points

Reported sales were even compared with the third quarter of 2015. Excluding the impact of changes in foreign currency exchange rates, sales increased 2 percent. The Company defines established market economies as those in Western Europe (including Scandinavia), Australia, Canada, Japan, New Zealand, and the United States. All other countries are classified as having emerging market economies. The Company's businesses operating in emerging market economies had a 5 percent increase in local currency sales, primarily in the Tupperware North America and South America segments. Local currency sales in the Company's businesses that operate in established economy markets, as a group, decreased 5 percent compared with 2015.

Operating and net income increased 48 percent and 35 percent, respectively, in the third quarter. Excluding the translation impact of changes in foreign currency exchange rates, operating and net income increased 51 percent and 39 percent, respectively, primarily reflecting \$22.2 million higher pretax gains from land transactions and increased segment profit in Asia Pacific, Tupperware North America and South America, including \$1.7 million lower impact related to bolivar denominated assets in connection with the devaluation of the Venezuelan bolivar, and from lower unallocated corporate costs. These were partially offset by lower segment profit in Beauty North America and Europe. Reported sales for the year-to-date period decreased 5 percent. Excluding the impact of changes in foreign currency exchange rates, sales increased 2 percent. The Company's emerging markets increased 5 percent in local currency sales, while local currency sales in the established markets decreased 4 percent. Net income for the year to date period primarily reflects \$11.7 million more in pretax income from land transactions and increased segment profit in Asia Pacific, Tupperware North America and South America. This was partially offset by lower segment profit in Beauty North America and Europe. Also impacting the comparison, was a \$13.5 million impairment of long-term fixed assets in Venezuela during the first quarter 2015. The impact related to bolivar denominated assets in connection with the devaluation of the Venezuelan bolivar in the year-to-date periods of 2016 and 2015 was \$4.2 million and \$13.1 million, respectively.

Net cash provided by operating activities for the periods ending September 24, 2016 and September 26, 2015 was \$92.3 million and \$72.2 million, respectively. The favorable comparison primarily reflected a lower cash outflow than in 2015 from the Company's hedging activities, lower cash tax payments, and better management of inventory. The net impact of these items was partially offset by an increase in outflows of cash related to other net working capital items, particularly payables due to the timing of payments at year-end.

Table of Contents

Net Sales

Reported sales were even in the third quarter. Excluding the impact of changes in foreign currency exchange rates, sales increased 2 percent. The average impact of higher prices was 3 percent.

The Company's emerging market units accounted for 71 percent and 70 percent of the Company's reported sales in the third quarters of 2016 and 2015, respectively. Reported sales in these units increased \$6.2 million, or 2 percent, which included a negative \$11.5 million impact from weaker foreign currency exchange rates. Excluding the impact of changes in foreign currency exchange rates, the sales of these units increased 5 percent most significantly in Argentina, related to inflationary driven pricing, along with some increased volume, in Brazil, due to a larger, more active sales force, in China, from growth in the number of experience studios (physical selling locations) and higher productivity including from digital marketing initiatives, in Tupperware Mexico and Tupperware South Africa from larger sales forces. The sales growth in these units was partially offset by a decrease in Egypt from curtailed shipments in light of currency controls, in Fuller Mexico from a smaller sales force, and in Indonesia and Turkey from smaller, less active sales forces. The average impact of higher prices in the emerging market units was 4 percent. Reported sales in the established market units decreased \$5.4 million, or 3 percent. Excluding the impact of changes in foreign currency exchange rates, sales in these units were down 5 percent. Among these units, the most significant local currency decreases were in Austria from a less active and productive sales force, in Australia/New Zealand from a less active sales force, in BeautiControl, due to a less productive sales force, and in Scandinavia from a less active and productive sales force. The average price increase in the established market units was 1 percent.

On a year-to-date basis, emerging markets accounted for 67 percent and 68 percent of total Company sales in 2016 and 2015, respectively. Total sales on a reported basis in the emerging markets decreased \$60.3 million, including a negative \$112.6 million impact from changes in foreign currency exchange rates. Excluding the impact of changes in foreign currency exchange rates, sales increased in these units by 5 percent. Total sales for the established markets decreased \$19.2 million, or 4 percent, for the year-to-date period of 2016, compared with the same period of 2015, which included a negative \$0.4 million impact from changes in foreign currency exchange rates. The sources of the year-to-date fluctuations largely followed those of the third quarter comparison except for a larger impact on the comparison from the sales decrease in France for the year-to-date period.

A more detailed discussion of the sales results by reporting segment is included in the segment results section below. As discussed in Note 3 to the Consolidated Financial Statements, the Company includes promotional costs in delivery, sales and administrative expense (DS&A). As a result, the Company's net sales may not be comparable with other companies that treat these costs as a reduction of revenue.

Gross Margin

Gross margin as a percentage of sales was 67.7 percent and 66.9 percent in the third quarters of 2016 and 2015, respectively. The increase of 0.8 percentage points ("pp") primarily reflected a favorable mix of products sold (0.4 pp) and lower manufacturing costs (0.2 pp), as well as less of an impact than last year of inventory in Venezuela being included in cost of goods sold at the stronger, historical exchange rate when it was procured and produced rather than the rate used to translate sales in the quarter (0.1 pp). This was partially offset by higher resin costs (0.1 pp).

For the year-to-date periods, gross margin as a percentage of sales was 67.9 percent in 2016, compared with 67.3 percent for the same period of 2015. The factors leading to the 0.6 percentage point increase primarily reflected the benefit of mix of products sold (0.4), lower resin costs (0.2 pp) and lower obsolescence expense (0.2 pp). This was partially offset by the mix impact from relatively higher sales in certain units with lower than average gross margins (0.4 pp).

As discussed in Note 2 to the Consolidated Financial Statements, the Company includes costs related to the distribution of its products in DS&A. As a result, the Company's gross margin may not be comparable with other companies that include these costs in costs of products sold.

Table of Contents

Costs and Expenses

DS&A as a percentage of sales was 54.5 percent in the third quarter of 2016, compared with 55.4 percent in 2015. The comparison reflected lower unallocated corporate and group costs (0.6 pp), lower promotional costs primarily in Asia Pacific (0.3 pp), and lower marketing costs, mainly in Tupperware North America (0.2 pp), partially offset by a negative impact from the translation effect of changes in foreign currency exchange rates, including the high share of dollar denominated costs as a ratio of sales in light of weaker foreign exchange rates (0.1 pp).

For the year-to-date periods, DS&A as a percentage of sales increased to 54.0 percent from 53.9 percent in 2015, primarily reflecting the unfavorable translation effect of changes in foreign currency exchange rates (0.6 pp).

Excluding this impact, the improvement was primarily related to lower unallocated corporate and group costs (0.6 pp) and lower marketing costs mainly in Asia Pacific (0.2 pp). This was partially offset by an unfavorable comparison from lower operating costs in 2015, primarily in Europe (0.3 pp).

Specific segment impacts are discussed in the segment results section.

Re-engineering Costs

Refer to Note 7 to the Consolidated Financial Statements for a discussion of re-engineering activities and related accruals.

The Company recorded \$2.4 million and \$0.3 million in re-engineering charges during the third quarters of 2016 and 2015, respectively, and \$5.4 million and \$4.5 million for the respective year-to-date periods. In both years, these charges were primarily related to severance costs incurred for headcount reductions in several of the Company's operations in connection with changes in its management and organizational structures.

For the remainder of 2016, the Company expects to incur approximately \$4 million of such costs.

Included in the re-engineering and impairment caption on the Company's consolidated statement of income in the year-to-date period of 2015 was \$13.5 million in long-term fixed asset impairments in Venezuela.

Goodwill and Indefinite-lived Intangible Assets

In the third quarters of 2016, the Company completed the annual assessments for all of its reporting units and indefinite-lived intangible assets, concluding there were no impairments. The Company only considers the goodwill balances of \$77.0 million and \$28.0 million associated with the Fuller Mexico and NaturCare Japan reporting units, respectively, to be significant relative to total equity.

Table of Contents

These assessments included a step 1 analysis related to Fuller Mexico, for which the significant assumptions included annual revenue increases ranging from 1 percent to 5 percent with an average growth rate of 4 percent, including a 3 percent growth rate used in calculating the terminal value. The discount rate used for Fuller Mexico was 14.8 percent. The amount by which the estimated fair value of the Fuller Mexico reporting unit exceeded its carrying value, at 20 percent, was more in the third quarter of 2016 than in the 2015 assessment, primarily due to an increase in the estimated fair market value in connection with improved market pricing metrics and other observable market conditions, as well as a lower carrying value in 2016, reflecting the amortization of the definite-lived Fuller tradename. Local currency sales in Fuller Mexico and operating profit have been declining since 2011 at which time the fair value of Fuller Mexico exceeded the carrying value by 77 percent. Since 2011, local currency sales declined 9 percent in 2012, 7 percent in 2013, 3 percent in 2014 and 2 percent in 2015. Local currency sales have declined 7 percent in the 2016 year-to-date period. Over this same time period, operating profit as a percentage of sales declined from the mid teens in 2012 to a low-double digit in 2016. This operating performance, over time, has led to a lower estimated fair value. This lower estimated fair value has been partially offset by lower discount rates and a lower entity carrying value from amortization of the definite-lived Fuller tradename asset, as well as a net asset position that has otherwise, over time, been reduced in light of the smaller scope of the business. Fuller Mexico continues to carry a total sales force size and field manager deficit as of the end of September, despite new programs aimed at higher rates of sales force additions and retention, though productivity is higher. Certain programs in place are aimed at creating a pipeline to identify strong candidates within the sales force who can be trained and motivated for promotion to field manager, a critical component of growth going forward. Despite these factors, the fair value exceeded the carrying value as of the end of the third quarter of 2016. Though the estimated fair value of the reporting unit exceeded its carrying value in the annual assessment, a smaller sales force size and/or operating performance significantly below current expectations, including changes in projected future revenue, profitability and cash flow, as well as higher working capital, interest rates or cost of capital, could have a negative effect on the fair value of the reporting unit and therefore reduce the fair value below the carrying value. This could result in recording an impairment to the goodwill of Fuller Mexico, including prior to the 2017 annual assessment.

Also in the third quarter of 2016, the Company performed a qualitative assessment for the goodwill associated with the NaturCare reporting unit and concluded it was more likely than not that the fair value of the reporting unit was greater than its carrying amount. The estimated fair value of the NaturCare reporting unit exceeded the carrying value by 130 percent, as of September 2015, the date of the reporting unit's most recent step 1 analysis. Based on the Company's evaluation of the assumptions and sensitivities associated with the step 1 analysis for NaturCare, the Company concluded that the fair value substantially exceeded its carrying value as of September 2015.

Other than for the Fuller Mexico reporting unit, management has concluded there is no significant foreseeable risk of failing a future step 1 impairment test, nor is there significant foreseeable risk of the fair value of the indefinite-lived intangible assets falling below their respective carrying values. Given the sensitivity of fair value valuations to changes in cash flow or market multiples, the Company may be required to recognize an impairment of goodwill or indefinite-lived intangible assets in the future due to changes in market conditions or other factors related to the Company's performance. Actual results below forecasted results or a decrease in the forecasted future results of the Company's business plans or changes in discount rates could also result in an impairment charge, as could changes in market characteristics including declines in valuation multiples of comparable publicly-traded companies. Impairment charges would have an adverse impact on the Company's net income and shareholders' equity.

Gains on Disposal of Assets

In 2014 and 2015, the Company entered into two joint ventures with a real estate development partner to develop land near the Company's Orlando headquarters. During the third quarter of 2016, the Company recorded gains of \$24.2 million in connection with the sale of the joint ventures. Total cash proceeds from the sale were \$30.0 million, including \$0.9 million related to the operation of the joint ventures during development. The income from the joint venture operations was recorded in other income on the Company's consolidated statement of income. The joint ventures had been recorded under short-term other assets using the equity method.

Table of Contents

Net Interest Expense

Net interest expense was \$12.0 million in the third quarter of 2016, compared with \$10.8 million in 2015. In the year-to-date periods, net interest expense was \$33.8 million in 2016, compared with \$35.1 million in 2015. The changes in net interest expense in the year-over-year comparisons was primarily due to the timing of recognition of forward points related to the Company's forward currency contracts.

Tax Rate

The effective tax rates for the third quarter and year-to-date periods of 2016 were 38.4 percent and 30.4 percent compared with 28.5 percent and 28.4 percent, respectively, for the comparable 2015 periods. The 2016 rates were higher primarily due to a gain from the land transactions near the Company's headquarters during the third quarter, which was subject to an effective U.S. federal and state tax rate of 38.5 percent. The 2016 year-to-date effective tax rate is below the U.S. statutory rate primarily due to lower foreign effective tax rates.

As discussed in Note 14 to the Consolidated Financial Statements, the Company's uncertain tax positions increase the potential for volatility in its tax rate. As such, it is reasonably possible that the effective tax rates in any individual quarter will vary from the full year expectation. At this time, the Company is unable to estimate what impact that may have on any individual quarter.

Net Income

Reported net income in the third quarter of 2016 increased \$12.6 million compared with 2015. Compared with 2015, net income was negatively impacted by \$1.0 million from changes in foreign currency exchange rates. Excluding the impact of changes in foreign currency exchange rates, net income increased 39 percent in the third quarter of 2016, primarily reflecting \$22.2 million higher pretax gains from land transactions and increased segment profit in Asia Pacific, in Tupperware North America, in South America, and from lower unallocated corporate costs. This was partially offset by lower segment profit in Beauty North America and Europe.

Net income for the year-to-date period increased \$16.9 million compared with last year, including a negative \$17.9 million translation impact from changes in foreign currency exchange rates. The increase in net income in local currency primarily reflects \$11.7 million from higher pretax gains from land surrounding the Orlando, Florida headquarters and increased segment profit in Asia Pacific from improved gross margins, and in Tupperware North and South America from higher sales volume.

International operations generated 91 percent of sales and 100 percent of the Company's net segment profit in the third quarters and the year to date periods of 2016 and 2015.

The sale of beauty products generated 17 percent of sales in the third quarter and year-to-date periods of 2016 and 19 percent in the third quarter and year-to-date periods of 2015.

pp percentage points

Reported sales decreased 10 percent compared with the third quarter of 2015. Excluding the impact of changes in foreign currency exchange rates, sales decreased 7 percent mainly from lower volume. Overall, prices in the segment increased 2 percent.

Emerging markets accounted for \$43.6 million and \$49.9 million, or 41 and 42 percent, of the reported sales in the segment in the third quarters of 2016 and 2015, respectively. On a local currency basis, the emerging market units' sales decreased by 7 percent, primarily reflecting a significant decrease in Egypt, due to curtailed shipments in response to the imposition of stricter currency controls, and in Turkey, from a smaller, less active sales force due to the external environment and response to the Company's programs. This was partially offset by an increase in Tupperware South Africa due to a larger sales force.

The established market units' reported sales decreased 8 percent. Excluding the impact of foreign currency, these markets decreased 7 percent, reflecting a decrease in volume, primarily due to less active and productive sales forces in Austria and Scandinavia.

Reported segment profit decreased \$7.2 million, in the third quarter of 2016 versus 2015, and excluding the impact of foreign currency, decreased \$6.5 million. The decrease was primarily due to lower sales in Austria, Egypt, and Scandinavia along with increased promotional spending in France.

On a year-to-date basis, reported sales and segment profit decreased 11 percent and 37 percent, respectively, compared with 2015. Excluding the impact of changes in foreign currency exchange rates, sales in 2016 were down 7 percent compared with 2015. The variances largely mirror the quarter with the exception of a larger negative impact in the year-to-date comparison in France than in the third quarter and less of an impact from Scandinavia in the year-to-date period. Excluding the impact of changes in foreign currency exchange rates, segment profit was down 32 percent on a year-to-date basis. The factors impacting the segment profit comparisons are largely the same as those impacting the quarterly comparison along with more impact on the comparison from lower profit in France and Turkey, mainly from lower sales, as well as lower group administrative costs.

Table of Contents

The Russian ruble, South African rand, and the Turkish lire were the main currencies that impacted the year-over-year sales comparison, while the South African rand was the currency that most significantly impacted the profit comparison.

The Company's business in Egypt declined in the fourth quarter of 2015 and more significantly in the first through third quarters of 2016, from curtailed shipments related to currency controls. Prior to the fourth quarter of 2015, Egypt had performed well, generating meaningful sales and profit increases and generating cash in Egyptian pounds. Product for this business is sourced primarily from the Company's manufacturing facilities in Europe, and due to the imposition of the stricter currency controls beginning in 2015, the intercompany amount owed by the Egyptian business for the product and related costs totaled \$8.0 million as of September 24, 2016, notwithstanding that the Egyptian subsidiary held \$9.3 million worth of Egyptian pounds at that date. In light of the currency restrictions, the Company does not expect its operations in Egypt to improve significantly.

Asia Pacific

pppercentage points

Reported sales decreased 1 percent compared with the third quarter of 2015. Excluding the impact of foreign currency exchange rates, sales decreased 4 percent. The sales decrease was due to lower volume, partially offset by an average price increase of 1 percent.

Emerging markets accounted for \$160.3 million and \$163.0 million, or 85 percent of the reported sales in the segment in the third quarters of 2016 and 2015. Compared with 2015, sales in emerging markets in 2016 were positively impacted by \$1.6 million from changes in foreign currency rates. Excluding the impact of changes in foreign currency rates, sales in these units decreased 3 percent. The most significant decreases were in Indonesia from a smaller, less active sales force, in Korea, largely due to lower business-to-business sales compared with the third quarter of 2015 and in the Philippines, due to lower volume related to the exit of the fashion category. These were partially offset by China, primarily related to growth in the number of experience studios and better productivity, including from digital marketing initiatives.

The established market units' reported sales were even compared with third quarter 2015. Excluding the impact of foreign currency, these markets decreased 9 percent, reflecting a decrease in volume, primarily due to a less active sales force in Tupperware Australia/New Zealand.

Table of Contents

Segment profit increased 7 percent compared with the third quarter of 2015. Excluding the impact of changes in foreign currency exchange rates, segment profit increased 5 percent, primarily due to the higher sales in China, a benefit from favorable resin costs, and reduced promotional expense.

On a year-to-date basis, reported sales decreased 3 percent compared with the same period of 2015. Excluding the impact of foreign currency exchange rates, sales decreased 1 percent. The decrease in local currency sales is primarily related to smaller sales forces in India and Indonesia, in Korea due to lower business to business sales compared with 2015, and the Philippines due to lower volume related to the exit of the fashion category. This was partially offset by an increase in experience studios in China along with better productivity and from a larger sales force in Malaysia and Singapore. On a year-to-date basis, the increase in segment profit was related to the higher sales volume in China and in Malaysia and Singapore. This was partially offset by Indonesia from lower sales volume and in the Philippines related to lower sales volume and higher operating expenses.

In terms of foreign currencies, the change in the value of the Chinese renminbi versus the U.S. dollar had the most significant impact on the year-over-year sales and profit comparisons in the third quarter and year-to-date periods, although the Malaysian ringgit also had a meaningful impact on the year-to-date sales and profit comparisons.

Tupperware North America

pppercentage points

Reported sales in the third quarter of 2016 increased 4 percent compared with the third quarter of 2015. Excluding the impact of foreign currency exchange rates, sales increased 9 percent. Mexico increased sales volume through a larger sales force and the United States and Canada increased sales through a more active and productive sales force.

Volume in the segment grew 7 percent and the average price increase was 2 percent compared with the third quarter of 2015.

Reported segment profit increased 13 percent in the third quarter of 2016. Excluding the impact of foreign currency exchange rates, profit increased by 24 percent, reflecting higher sales and lower operating expenses.

Reported sales and segment profit increased 2 percent and 6 percent, respectively, on a year-to-date basis. Excluding the impact of foreign currency, sales and segment profit increased 10 percent and 18 percent, respectively. The local currency sales and segment profit largely mirror the quarter, although profitability in Mexico improved more significantly on a year-to-date basis than in the third quarter.

Table of Contents

The Mexican peso was the main foreign currency that impacted the year-over-year comparisons.

pp percentage points

Reported sales for the segment decreased 19 percent in the third quarter of 2016. Excluding the impact of changes in foreign currency exchange rates, sales decreased 11 percent, reflecting lower sales by BeautiControl from a less productive sales force and by Fuller Mexico from a smaller sales force. The average price increase in this segment was 3 percent.

Reported segment profit decreased by \$2.2 million in the third quarter of 2016. Excluding the impact of changes in foreign currency exchange rates, segment profit decreased \$1.7 million, primarily at BeautiControl from lower sales and in Fuller Mexico from lower sales and higher product costs.

The year-to-date sales and segment profit variances largely mirrored those of the quarter.

The Mexican peso was the main currency that impacted the year-over-year sales comparisons.

+ change is greater than 100%

Reported sales for the segment increased 30 percent in the third quarter of 2016. Excluding the impact of changes in foreign currency exchange rates, sales increased 33 percent. Of the 33 percent increase in local currency sales, approximately one third of the increase reflected the impact of higher prices in the segment, mainly due to inflation in Argentina and Venezuela.

The most significant increase in local currency sales was in Brazil, the largest unit in South America, from higher volume of products sold. The volume improvement reflected a highly active sales force driven by strong sales force additions. The sales in Argentina and Venezuela increased primarily from higher prices mainly in light of significant inflation, though about one-fourth of the increase in Argentina was related to volume.

Reported segment profit increased \$11.0 million in the third quarter of 2016. Excluding the impact of changes in foreign currency exchange rates, segment profit increased \$10.1 million, primarily in Brazil from the higher sales and lower product costs and in Venezuela from \$1.7 million less of an impact than last year of inventory being included in cost of goods sold at the stronger, historical exchange rate when it was procured and produced rather than the rate used to translate sales in the quarter and the transaction impact on net monetary assets from the weakening of the Venezuelan bolivar.

The year-to-date sales comparisons largely mirrored the quarter. The segment profit variance for the year-to-date period was largely the result of the increase in sales and lower warehousing expenses in Brazil and from \$8.9 million less of an impact in connection with the Venezuelan items, which were \$4.2 million and \$13.1 million, in 2016 and 2015, respectively.

The Argentine peso and the Brazilian real had the most significant translation impacts on the year-over-year sales comparisons, while the Brazilian real was the currency that most significantly impacted the profit comparison.

Table of Contents

Financial Condition

Liquidity and Capital Resources: The Company's net working capital position increased by \$36.7 million compared with the end of 2015. Excluding the impact of changes in foreign currency exchange rates, working capital increased \$18.0 million, primarily reflecting a \$35.4 million net decrease in accounts payable and accrued liabilities due to the timing of payments around year-end and the payout of management incentives, and a \$17.4 million increase in inventory, related to expectations for future sales being higher in the fourth quarter than the first quarter of each year. These local currency increases were partially offset by a \$37.3 million increase in short-term borrowings, net of cash and cash equivalents.

The Company continues to carry debt in connection with the \$600 million in senior notes due in 2021.

As of September 24, 2016, the Company had total borrowings of \$197.8 million outstanding under its Credit Agreement, including \$193.3 million denominated in euro.

Loans taken under the Credit Agreement bear interest under a formula that includes, at the Company's option, one of three different base rates, plus an applicable spread. The Company normally chooses LIBOR as its base rate. Although the Company's euro LIBOR base rate was below zero throughout the first nine months of 2016 and currently, under the Credit Agreement the base rate cannot be below zero. As of September 24, 2016, the Credit Agreement dictated a spread of 150 basis points, which gave the Company a weighted average interest rate on LIBOR based borrowings of 1.50 percent under the Credit Agreement.

The Company routinely increases its revolver borrowings under the Credit Agreement and uncommitted lines during each quarter to fund operating, investing and financing activities and uses cash available at the end of each quarter to reduce borrowing levels. As a result, the Company incurs more interest expense and has higher foreign exchange exposure on the value of its cash during each quarter than would relate solely to the quarter end cash and debt balances.

The Credit Agreement contains customary covenants, including financial covenants requiring a minimum level of interest coverage and allowing a maximum amount of leverage. As of September 24, 2016, and currently, the Company had considerable cushion under its financial covenants. However, economic conditions, adverse changes in foreign exchange rates, lower than foreseen sales, profit and/or cash flow generation, the payment of dividends, share repurchases or the occurrence of other events discussed under "Forward Looking Statements" and elsewhere could cause noncompliance.

At September 24, 2016, the Company had \$659.3 million of unused lines of credit, including \$400.9 million under the committed, secured Credit Agreement, and \$258.4 million available under various uncommitted lines around the world. If necessary, with the agreement of its lenders, the Company is permitted to increase its borrowing capacity under the Credit Agreement by a total of up to \$200.0 million.

See Note 10 to the Consolidated Financial Statements for further details regarding the Company's debt.

The Company monitors the third-party depository institutions that hold its cash and cash equivalents and diversifies its cash and cash equivalents among counterparties, which minimizes exposure to any one of these entities. Furthermore, the Company is exposed to financial market risk resulting from changes in interest rates, foreign currency rates and the possible liquidity and credit risks of its counterparties. The Company believes that it has sufficient liquidity to fund its working capital and capital spending needs, and its current dividend. This liquidity includes to the extent that it is accessible, its cash and cash equivalents, which totaled \$98.5 million as of September 24, 2016, cash flows from operating activities, and access to its Credit Agreement, as well as access to other various uncommitted lines of credit around the world. The Company has not experienced any limitations on its ability to access its committed facility.

Table of Contents

Cash and cash equivalents (“cash”) totaled \$98.5 million as of September 24, 2016. Of this amount, \$95.8 million was held by foreign subsidiaries. Of the cash held outside of the United States, approximately 30 percent was not eligible for repatriation due to the level of past statutory earnings by the foreign units in which the cash was held or other local restrictions. An additional 40 percent of cash was held by foreign subsidiaries in which the Company's current intent is to indefinitely reinvest the cash, as it is needed for working capital and to otherwise fund on-going operations. In the event circumstances change, leading to the conclusion that these funds will not be indefinitely reinvested, the Company would need to provide at that time for the income taxes that would be triggered upon their repatriation. The remaining cash is subject to repatriation tax effects.

The Company's most significant foreign currency exposures are to the Brazilian real, Chinese renminbi, euro, Indonesian rupiah and the Mexican peso. Business units in which the Company generated at least \$100 million of sales in 2015 included Brazil, China, Germany, Indonesia, Fuller Mexico, Tupperware Mexico and Tupperware United States and Canada. Of these units, sales by Brazil and Indonesia exceeded \$200 million. Downturns in the Company's business in these units, including but not limited to, difficulties in making additions to, retention and activity of the Company's independent sales force or the success of new products and/or promotional programs, could adversely impact the Company's ability to generate operating cash flows.

Operating Activities: Net cash provided by operating activities for the periods ended September 24, 2016 and September 26, 2015 was \$92.3 million and \$72.2 million, respectively. The favorable comparison primarily reflected a lower cash outflow than in 2015 from the Company's hedging activities, lower cash tax payments, and better management of inventory. The net impact of these items was partially offset by an increase in outflows of cash related to other net working capital items, particularly payables due to the timing of payments at year-end.

Investing Activities: During the year-to-date periods of 2016 and 2015, the Company had \$38.2 million and \$42.4 million, respectively, of capital expenditures. In both 2016 and 2015, the most significant capital expenditures were related to molds. In 2016 and 2015, capital expenditures included \$9.0 million and \$8.8 million, respectively, related to manufacturing and supply chain capabilities excluding molds. Partially offsetting the capital spending were proceeds from the sale of long-term assets of \$31.8 million and \$17.5 million in 2016 and 2015, respectively, primarily reflecting transactions associated with land near the Company's Orlando, Florida headquarters.

Financing Activities: Dividends paid to shareholders were \$104.0 million and \$103.6 million in the first nine months 2016 and 2015, respectively. Proceeds received from the exercise of stock options were \$0.6 million and \$7.6 million in the year-to-date periods of 2016 and 2015, respectively. The Company also increased revolver borrowings through its Credit Agreement by \$33.0 million for the funding of investing and financing activities in excess of cash flow generated by operating activities and in light of a higher cash balance in September 2016 than at the end of 2015.

Open market share repurchases by the Company are permitted under an authorization that runs until February 1, 2017 and allows up to \$2.0 billion to be spent. There were no share repurchases under this program during the first nine months of 2016 or 2015. Since 2007, the Company had spent \$1.29 billion to repurchase 21.3 million shares under this program. Going forward, in setting share repurchase amounts, the Company expects to target over time a debt-to-EBITDA ratio of 1.75 times (as defined in the Company's Credit Agreement). The Company does not currently plan to make open market share repurchases.

Repurchases under the Company's stock incentive programs are made when employees use shares to satisfy the minimum statutorily required withholding taxes. In the year-to-date periods of 2016 and 2015, 21,189 and 12,847 shares were retained to fund withholding taxes, totaling \$1.1 million and \$0.9 million, respectively.

New Pronouncements

Refer to Note 19 to the Consolidated Financial Statements for a discussion of new pronouncements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

One of the Company's market risks is its exposure to the impact of interest rate changes on its borrowings. The Company has elected to manage this risk through the maturity structure of its borrowings and the currencies in which it borrows.

Table of Contents

Loans taken under the Credit Agreement are of a short duration and bear interest under a formula that includes, at the Company's option, one of three different base rates, plus an applicable spread. The Company generally selects the London interbank offered rate ("LIBOR"). Although the Company's euro LIBOR base rate was below zero throughout the first nine months of 2016 and currently, under the Credit Agreement, the base rate cannot be below zero. As of September 24, 2016, the Credit Agreement dictated a spread of 150 basis points, which gave the Company a weighted average interest rate on its U.S. dollar and euro denominated LIBOR based borrowings under the Credit Agreement of 1.50 percent.

As of September 24, 2016, the Company had total borrowings of \$197.8 million outstanding under its Credit Agreement, with \$193.3 million denominated in euro. If short-term interest rates varied by 10 percent, which in the Company's case would mean short duration U.S. dollar and euro LIBOR, with all other variables remaining constant, the Company's annual interest expense would not be significantly impacted.

The Company routinely increases its revolver borrowings under the Credit Agreement and uncommitted lines during each quarter to fund operating, investing and financing activities and uses cash available at the end of each quarter to reduce borrowing levels. As a result, the Company incurs more interest expense and has higher foreign exchange exposure on the value of its cash during each quarter than would relate solely to the quarter end cash and debt balances.

A significant portion of the Company's sales and profit come from its international operations. Although these operations are geographically dispersed, which partially mitigates the risks associated with operating in particular countries, the Company is subject to the usual risks associated with international operations. These risks include local political and economic environments and relations between foreign and U.S. governments.

Another economic risk of the Company is exposure to changes in foreign currency exchange rates on the earnings, cash flows and financial position of its international operations. The Company is not able to project, in any meaningful way, the effect of these possible fluctuations on translated amounts or future earnings. This is due to the Company's constantly changing exposure to various currencies, the fact that all foreign currencies do not react in the same manner in relation to the U.S. dollar and the large number of currencies involved, although the Company's most significant income and cash flow exposures are to the Brazilian real, Chinese renminbi, euro, Indonesian rupiah and Mexican peso.

Although this currency risk is partially mitigated by the natural hedge arising from the Company's local product sourcing in many countries, a strengthening U.S. dollar generally has a negative impact on the Company. In response to this fact, the Company uses financial instruments, such as forward contracts, to hedge its exposure to certain foreign exchange risks associated with a portion of its investment in international operations. In addition to hedging against the balance sheet impact of changes in exchange rates, the hedge of investments in international operations also has the effect of hedging a portion of cash flows from those operations. The Company also hedges, with these instruments, certain other exposures to various currencies arising from amounts payable and receivable, non-permanent intercompany transactions and a portion of purchases forecasted for generally up to the following 15 months. The Company does not seek to hedge the impact of currency fluctuations on the translated value of the sales, profit or cash flow generated by its operations.

While the Company's derivatives that hedge a portion of its equity in its foreign subsidiaries and its fair value hedges of balance sheet risks all work together to mitigate its exposure to foreign exchange gains or losses, they result in an impact to operating cash flows as they are settled. For the year-to-date periods ended September 24, 2016 and September 26, 2015, the cash flow impact of these currency hedges were outflows of \$5.6 million and \$21.1 million, respectively.

The U.S. dollar equivalent of the Company's most significant net open forward contracts as of September 24, 2016 were to buy euro worth \$108.4 million and to sell \$21.7 million in Indonesian rupiah. In agreements to sell foreign currencies in exchange for U.S. dollars, for example, an appreciating dollar versus the opposing currency would generate a cash inflow for the Company at settlement, with the opposite result in agreements to buy foreign currencies for U.S. dollars. The notional amounts change based upon changes in the Company's outstanding currency exposures. Based on rates existing as of September 24, 2016, the Company was in a net receivable position of approximately \$2.5 million related to its currency hedges under forward contracts, which upon settlement, could have a significant impact

on the Company's cash flow. The Company records the impact of forward points in net interest expense.

40

Table of Contents

A precise calculation of the impact of currency fluctuations is not practical since some of the contracts are between non-U.S. dollar currencies. The Company continuously monitors its foreign currency exposure and expects to enter into additional contracts to hedge exposure in the future. See further discussion regarding the Company's hedging activities for foreign currency in Note 11 to the Consolidated Financial Statements.

The Company is subject to credit risks relating to the ability of counterparties of hedging transactions to meet their contractual payment obligations. The risks related to creditworthiness and non performance have been considered in the determination of fair value for the Company's foreign currency forward exchange contracts. The Company continues to closely monitor its counterparties and will take action, as appropriate and possible, to further manage its counterparty credit risk.

The Company is also exposed to rising material prices in its manufacturing operations and, in particular, the cost of oil and natural gas-based resins, including the fact that in some cases resin prices are actually in, or are based on, currencies other than that of the unit buying the resin, which introduces a currency exposure that is incremental to the exposure to changing market prices. Resins are the primary material used in production of most Tupperware® products, and the Company estimates that 2016 cost of sales will include approximately \$134 million for the cost of resin in the Tupperware® brand products it produces and has contract manufactured. The Company uses many different kinds of resins in its products. About three-fourths of its resins are “polyolefins” (simple chemical structure, easily refined from oil), and as such, the price of these is typically strongly affected by the underlying price of oil and natural gas. The remaining one-fourth of its resins is more highly engineered, where the price of oil and natural gas plays a less direct role in determining price. With a comparable product mix and exchange rates, a 10 percent fluctuation in the cost of resin would impact the Company's annual cost of sales by approximately \$13 million compared with the prior year. In the third quarter of 2016, the Company estimates there was a \$0.7 million negative impact on its gross margin related to sales of the Tupperware® products it produced and had contract manufactured due to resin cost changes, as compared with 2015. For full year 2016, the estimated impact of resin cost changes, on a local currency basis, on the Company's gross margin related to sales of the Tupperware® products it produces and has contract manufactured is a benefit of approximately \$1.5 million, as compared with 2015. In addition to the impact of the price of oil and natural gas, the price the Company pays for its resins is also impacted by the relative changes in supply and demand. The Company partially manages its risk associated with rising resin costs by utilizing a centralized procurement function that is able to take advantage of bulk discounts while maintaining multiple suppliers and also enters into short-term pricing arrangements. It also manages its margin through cash flow hedges in some cases when it purchases resin in currencies, or effectively in currencies, other than that of the purchasing unit, through the pricing of its products, with price increases on its product offerings generally in line with consumer inflation in each market, and its mix of sales through its promotional programs and promotionally priced offers. It also, on occasion, makes advance material purchases to take advantage of current favorable pricing. At this point in time, the Company has determined that entering into forward contracts for resin is not practical or cost beneficial and has no such contracts in place. However, should circumstances warrant, the Company may consider such contracts in the future.

The Company has a program to sell land held for development around its Orlando, Florida headquarters (“Orlando Land”). This program is exposed to the risks inherent in the real estate development process. Included among these risks is the ability to obtain all necessary government approvals, the success of attracting tenants for commercial or residential developments in the Orlando real estate market, obtaining financing and general economic conditions, such as interest rate increases. Based on the variety of factors that impact the Company's ability to close sales transactions, it cannot predict when the program will be completed.

Forward-Looking Statements

Certain written and oral statements made or incorporated by reference from time to time by the Company or its representatives in this report, other reports, filings with the Securities and Exchange Commission, press releases, conferences or otherwise are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Statements in this report or elsewhere that are not based on historical facts or information are forward-looking statements. Such forward-looking statements involve risks and uncertainties that may cause actual results to differ materially from those projected in forward-looking statements. Such risks and uncertainties include,

among others, the following:

•successful recruitment, retention and productivity levels of the Company's independent sales forces;

41

Table of Contents

disruptions caused by the introduction of new or revised distributor operating models or sales force compensation systems or allegations by equity analysts, former distributors or sales force members, government agencies or others as to the legality or viability of the Company's business model, particularly in India;

success of new products and promotional programs;

the ability to implement appropriate product mix and pricing strategies;

governmental regulation of materials used in products coming into contact with food (e.g. polycarbonate), as well as beauty, personal care and nutritional products;

- the ability to procure and pay for at reasonable economic cost, sufficient raw materials and/or finished goods to meet current and future consumer demands at reasonable suggested retail pricing levels in certain markets, particularly Argentina, Ecuador, Egypt and Venezuela due to government regulations and restrictions;

the impact of changes in consumer spending patterns and preferences, particularly given the global nature of the Company's business;

the value of long-term assets, particularly goodwill and indefinite and definite lived intangibles associated with acquisitions, and the realizability of the value of recognized tax assets;

changes in plastic resin prices, other raw materials and packaging components, the cost of converting such items into finished goods and procured finished products and the cost of delivering products to customers;

the introduction of Company operations in new markets outside the United States;

general social, economic and political conditions in markets, such as in Argentina, Brazil, Ecuador, Egypt, Greece, Kazakhstan, Russia, Turkey, Ukraine and Venezuela and other countries impacted by such events;

issues arising out of the sovereign debt in the countries in which the Company operates, such as in Argentina and those in the Euro zone, resulting in potential economic and operational challenges for the Company's supply chains, heightened counterparty credit risk due to adverse effects on customers and suppliers, exchange controls (such as in Argentina, Egypt, and Venezuela) and translation risks due to potential impairments of investments in affected markets and the potential for banks with which the Company maintains lines of credit to be unable to fulfill their commitments;

disruptions resulting from either internal or external labor strikes, work stoppages, or similar difficulties;

changes in cash flow resulting from changes in operating results, including from changes in foreign exchange rates, working capital management, debt payments, share repurchases and hedge settlements;

the impact of currency fluctuations on the value of the Company's operating results, assets, liabilities and commitments of foreign operations generally, including their cash balances during and at the end of quarterly reporting periods, the results of those operations, the cost of sourcing products across geographies and the success of foreign hedging and risk management strategies;

the impact of natural disasters, terrorist activities and epidemic or pandemic disease outbreaks;

the ability to repatriate, or otherwise make available, cash in the United States and to do so at a favorable foreign exchange rate and with favorable tax ramifications, particularly from Argentina, Brazil, China, Egypt, India, Indonesia, and Mexico;

the ability to obtain all government approvals on, and to control the cost of infrastructure obligations associated with, property, plant and equipment;

the ability to timely and effectively implement, transition, maintain and protect necessary information technology systems and infrastructure;

the ability to attract and retain certain executive officers and key management personnel;

the success of land buyers in attracting tenants for commercial and residential development and obtaining financing;

Table of Contents

the costs and covenant restrictions associated with the Company's credit arrangements;

integration of non-traditional product lines into Company operations;

the effect of legal, regulatory and tax proceedings, as well as restrictions imposed on the Company's operations or Company representatives by foreign governments, including exposure to tax responsibilities imposed on the sales force and their potential impact on the sales force's value chain and resulting disruption to the business and actions taken by governments to set or restrict the freedom of the Company to set its own prices or its suggested retail prices for product sales by its sales force to end consumers and actions taken by governments to restrict the ability to convert local currency to other currencies in order to satisfy obligations outside the country generally, and in particular Argentina, Egypt and Venezuela;

the effect of competitive forces in the markets in which the Company operates, particularly related to sales of beauty, personal care and nutritional products, where there are a greater number of competitors;

the impact of counterfeit and knocked-off products in the markets in which the Company operates and the effect this can have on the confidence of the Company's sales force members;

the impact of changes, changes in interpretation of or challenges to positions taken by the Company with respect to U.S. federal, state and foreign tax or other laws, including with respect to non-income taxes issues in India and the Philippines;

the Company's access to, and the costs of, financing; and

other risks discussed in Item 1A, Risk Factors, of the Company's 2015 Annual Report on Form 10-K, as well as the Company's Consolidated Financial Statements, Notes, other financial information appearing elsewhere in this report and the Company's other filings with the United States Securities and Exchange Commission.

Other than updating for changes in foreign currency exchange rates through its monthly website updates, the Company does not intend to update forward-looking information, except through its quarterly earnings releases, unless it expects diluted earnings per share for the current quarter, excluding items impacting comparability and changes versus its guidance of the impact of changes in foreign exchange rates, to be significantly below its previous guidance.

Investors should also be aware that while the Company does, from time to time, communicate with securities analysts, it is against the Company's policy to disclose to them any material non-public information or other confidential commercial information. Accordingly, it should not be assumed that the Company agrees with any statement or report issued by any analyst irrespective of the content of the confirming financial forecasts or projections issued by others.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15(d)-15(e)) that are designed to ensure that information required to be disclosed in the Company's reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to the Company's management, including the Chief Executive Officer and the Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

As of the end of the period covered by this report, management, under the supervision of the Company's Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the design and operation of the disclosure controls and procedures were effective.
