UNITED ECOENERGY CORP AND SUBSIDIARY COMPANY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Organization and Basis of Preparation

United EcoEnergy Corp. (“United” or the “Company”) was a closed-end management investment company which in February 2006 elected to be treated as a business development company (BDC) under the Investment Company Act of 1940, (the “1940 Act”). The Company was originally formed in February 1997 as MNS Eagle Equity Group III, Inc.; however, it conducted no operations until electing to be a BDC through which it provided capital and other assistance to start-up and micro-cap companies. During this time, United acquired and established its initial interest in the medical, pharmaceutical and healthcare industry by acquiring intellectual property rights and created Epic Wound Care, Inc., the Company’s wholly-own subsidiary which will eventually become the Company’s operating platform company in this industry. The Company also completed two minority equity investments in companies that we believed will not be strategic to our healthcare strategy.

Effective as of December 31, 2009, the Board of Directors and the holders of a majority of the Company’s outstanding shares of common stocks authorized the Company’s management to withdraw the above mentioned election to be regulated as a BDC. This decision was in part prompted by the actuality that the majority of the Company’s resources were allocated to managing the operating activities of its holdings and, in addition, management found that the Company may not have been in compliance with certain BDC provisions of the 1940 Act. Among other things, the Company had issued rights to purchase securities and issued shares for services or property other than for cash; issued warrants in connection with debt offerings with conversion rights below the then market value and without shareholder approval; and failed to establish a majority of independent directors. The Company also failed to obtain a fidelity bond in an amount required under the 1940 Act. The Company intends to file a Notice to withdraw its election to be regulated as a BDC by May 30, 2010 with an effective date as of December 31, 2009.

As a result of the withdrawal of the Company’s election to be treated as a BDC and becoming an operating company, the fundamental nature of the Company’s business from that of investing in a portfolio of securities, with the goal of achieving gains on appreciation and dividend income, to that of being actively engaged in the ownership and management of an holding company, with the goal of generating income from the operations of those businesses. The withdrawal of the Company’s election as a BDC under the 1940 Act resulted in a significant change in the Company’s method of accounting. The Company formerly utilized the BDC financial statement presentation and that accounting utilized the value method of accounting used by investment companies, which allows BDCs to recognize income and value their investments at market value as opposed to historical cost. As an operating company, the Company adopted the financial statement presentation and accounting for securities held which provides for either fair value or historical cost methods of accounting, depending on the classification of the investment and the Company’s intent with respect to the period of time it intends to hold the investment. Change in the Company’s method of accounting could reduce the market value of its investments in privately held companies by eliminating the Company’s ability to report an increase in value of its holdings as the increase occurs. Also, as an operating company, the Company also now consolidates its financial statements with controlled subsidiaries, thus eliminating the portfolio company reporting benefits available to BDCs.

The accompanying financial statements have been prepared in conformity with generally accepted accounting principles, which contemplate the continuation of the Company as a going concern. This basis of accounting contemplates the recovery of the Company’s assets and the satisfaction of liabilities in the normal course of business. The Company since its formation has not generated any significant revenues. The Company has not as yet

attained a level of operations which allows it to meet its current overhead and may not attain profitable operations within its first few business operating cycles, nor is there any assurance that such an operating level can ever be achieved. The Company is dependent upon obtaining additional financing adequate to fund its operations. While the Company has funded its initial operations with private placements and secured loans from a related party, there can be no assurance that adequate financing will continue to be available to the Company and, if available, on terms that are favorable to the Company. The Company's ability to continue as a going concern is also dependent on many events outside of its direct control, including, among other things improvement in the economic climate. The financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the outcome of this uncertainty.

Interim financial statements are prepared in accordance with GAAP for interim financial information and pursuant to the requirements for reporting on Form 10-Q and Article 6 or 10 of Regulation S-X, as appropriate. In the opinion of management, all adjustments, which are of a normal recurring nature, considered necessary for the fair presentation of financial statements for the interim period, have been included.

Operating results for the interim periods presented are not necessarily indicative of the results to be expected for a full year.

The condensed consolidated balance sheet at December 31, 2009 has been derived from the audited consolidated financial statements at that date but does not include all the information and footnotes required by generally accepted accounting principles for complete financial statements.

These interim condensed financial statements should be read in conjunction with the Company's audited financial statements and notes for the period ended December 31, 2009 filed with the Securities and Exchange Commission on Form 10-K on April 16, 2010.

Note Significant Accounting Policies

2.

Consolidation

The accompanying consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, Epic Wound Care, Inc. as of the dates and for the fiscal years indicated. All intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires the Company's management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reported period. Changes in the economic environment, financial markets, as well as in the healthcare industry and any other parameters used in determining these estimates could cause actual results to differ.

Concentration of Credit Risk

The Company may place its cash with various financial institutions and, at times, cash held in depository accounts at such institutions may exceed the Federal Deposit Insurance Corporation insured limit.

Equity and Cost Method Investments in Affiliated Companies

The Company uses the equity method of accounting for its investments in entities in which it has significant influence; generally, this represents an ownership interest of between 20% and 50%. The Company uses the cost method of accounting for investments in equity securities in which it has a less than 20% equity interest and virtually no influence over the investee's operations.

Application of the cost method requires the Company to periodically review this investment in order to determine whether to maintain the current carrying value or to write off some or all of the investment. While the Company uses some objective measurements in its review, the review process involves a number of judgments on the part of the Company's management. These judgments include assessments of the likelihood of the investments to obtain additional financing, to achieve future milestones, make sales and to compete effectively in its markets. In making these judgments the Company must also attempt to anticipate trends in the industries as well as in the general economy. There can be no guarantee that the Company will be accurate in its assessments and judgments. To the extent that the Company is not correct in its conclusion it may decide to write down all or part of the investment.

Income Taxes

The Company accounts for income taxes using a method that requires recognition of deferred tax assets and liabilities for expected future tax consequences of temporary differences that currently exist between tax bases and financial reporting bases of the Company's assets and liabilities (commonly known as the asset and liability method). In assessing the ability to realize deferred tax assets, the Company considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized.

The Company evaluates its tax positions taken or expected to be taken in the course of preparing the Company's tax returns to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. Tax positions not deemed to meet the "more-likely-than-not" threshold are recorded as an expense in the applicable year. The Company does not have a liability for any unrecognized tax benefits. Management's evaluation of uncertain tax positions may be subject to review and adjustment at a later date based upon factors including, but not limited to, an on-going analysis of tax laws, regulations and interpretations thereof.

As of December 31, 2009, the Company has approximately \$1.3 million of net operating loss carry-forwards available to affect future taxable income and has established a valuation allowance equal to the tax benefit of the net operating loss carry forwards and temporary differences as realization of the asset is not assured.

Revenue Recognition

The Company recognizes revenues when persuasive evidence of an arrangement exists, product has been delivered or services have been rendered, the price is fixed or determinable and collectability is reasonably assured. Revenue is recognized net of estimated sales returns and allowances.

Revenues are attributable to the sale of medical products through distributor agreements. The principal terms of the agreements provide that the distributor orders be accompanied by partial payment in advance which at least equals 50% of total manufactured cost, as defined, for orders for distributor inventory and, in addition, an agreed portion of the distributor's gross profit on special orders. The balance of the manufactured cost is due from the distributor at the time of shipment. The Company is also entitled to an agreed percentage of the distributor's profit on receipt by the distributor. The Company defers all amounts received in advance of shipment and recognizes as revenue the aggregate of amounts invoiced in advance and an estimate of the Company's portion of distributor's profit at the time of shipment.

Per Share Information

Basic earnings per share are calculated using the weighted average number of common shares outstanding for the period presented. Diluted loss per share is the same as basic loss per share, as the effect of potentially dilutive securities (warrants to acquire 1,449,321 shares of common stock and 281,641 shares issuable at March 31, 2010) are anti-dilutive.

Recent Accounting Pronouncements

From time to time, new accounting pronouncements are issued by the FASB or other standards setting bodies that are adopted by the Company as of the specified effective date. Unless otherwise discussed, the Company believes that the impact of recently issued standards that are not yet effective will not have a material impact on its financial statements upon adoption.

In October 2009, the FASB issued ASU 2009-13, Multiple-Deliverable Revenue Arrangements, (amendments to FASB ASC Topic 605, Revenue Recognition) ("ASU 2009-13"). ASU 2009-13 requires entities to allocate revenue in an arrangement using estimated selling prices of the delivered goods and services based on a selling price hierarchy. The amendments eliminate the residual method of revenue allocation and require revenue to be allocated using the relative selling price method. ASU 2009-13 should be applied on a prospective basis for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010, with early adoption permitted. The Company does not expect adoption of ASU 2009-13 to have a material impact on the Company's results of operations or financial condition.

In April 2010, the FASB issue ASU 2010-17, Revenue Recognition – Milestone Method ("ASU 2010-17"). ASU 2010-17 provides guidance on the criteria that should be met for determining whether the milestone method of revenue recognition is appropriate. A vendor can recognize consideration that is contingent upon achievement of a milestone in its entirety as revenue in the period in which the milestone is achieved only if the milestone meets all criteria to be considered substantive. The following criteria must be met for a milestone to be considered substantive. The consideration earned by achieving the milestone should:

1. Be commensurate with either the level of effort required to achieve the milestone or the enhancement of the value of the item delivered as a result of a specific outcome resulting from the vendor's performance to achieve the milestone.

2. Related solely to past performance.
3. Be reasonable relative to all deliverables and payment terms in the arrangement. No bifurcation of an individual milestone is allowed and there can be more than one milestone in an arrangement.

Accordingly, an arrangement may contain both substantive and nonsubstantive milestones. ASU 2010-17 is effective on a prospective basis for milestones achieved in fiscal years, and interim periods within those years, beginning on or after June 15, 2010

Note 3. Related Party Transactions

During the three months ended March 31, 2010, the Company borrowed \$20,874 from LeadDog Capital LP through issuances of notes payable for one year periods from the date of the borrowings with interest payable at 16% per year. LeadDog Capital LP and its affiliates are shareholders and warrant holders however the group is restricted from becoming a beneficial owner (as such term is defined under Section 13(d) and Rule 13d-3 of the Securities Exchange Act of 1934, as amended, (the 1934 Act)), of the Company's common stock which would exceed 9.5% of the number of shares of common stock outstanding.

Note 4. Notes Payable

The Company borrowed \$25,000 in June 2009 under terms which provided that the borrower could convert the indebtedness including unpaid interest at \$.25 per share through the due date in October 2009. The debt holder had a pro-rata interest in the security interest the Company has in connection with the Company's loan to one of its investees. In January 2010, the Company and the lender agreed to the conversion of the note into 131,641 shares of the Company's common stock. The shares have not been issued and are included in the liability for unissued shares at its fair value which resulted in noncash charge for the period ended March 31, 2010 of \$8,750.

Note 5. Subsequent Events

Subsequent to March 31, 2010, the Company borrowed \$7,000 from LeadDog Capital LP with interest payable at 16% per year.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

You should read the following discussion and analysis of our financial condition and results of operations together with our condensed consolidated financial statements and related notes appearing elsewhere in this quarterly report on Form 10-Q. This discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. The actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, including, but not limited to, those set forth under 'Risk Factors' in our annual report on Form 10-K, filed with SEC April 16, 2010.

OVERVIEW

United EcoEnergy Corp. ("United" or the "Company") was a closed-end management investment company which in February 2006 elected to be treated as a business development company (BDC) under the Investment Company Act of 1940, (the "1940 Act"). The Company was originally formed in February 1997 as MNS Eagle Equity Group III, Inc.; however, it conducted no operations until electing to be a BDC through which it provided capital and other assistance to start-up and micro-cap companies. During this time, United acquired and established its initial interest in the medical, pharmaceutical and healthcare industry by acquiring intellectual property rights and created Epic Wound Care, Inc., the Company's wholly-own subsidiary which will eventually become the Company's operating platform company in this industry. The Company also completed two minority equity investments in companies that we believed will not be strategic to our healthcare strategy.

Effective as of December 31, 2009, the Board of Directors and the holders of a majority of the Company's outstanding shares of common stocks authorized the Company's management to withdraw the above mentioned election to be regulated as a BDC. This decision was in part prompted by the actuality that the majority of the Company's resources were allocated to managing the operating activities of its holdings and, in addition, management found that the Company may not have been in compliance with certain BDC provisions of the 1940 Act. Among other things, the Company had issued rights to purchase securities and issued shares for services or property other than for cash; issued warrants in connection with debt offerings with conversion rights below the then market value and without shareholder approval; and failed to establish a majority of independent directors. The Company also failed to obtain a fidelity bond in an amount required under the 1940 Act. The Company intends to file a Notice to withdraw its election to be regulated as a BDC by May 31, 2010 with an effective date as of December 31, 2009.

As a result of the withdrawal of the Company's election to be treated as a BDC and becoming an operating company, the fundamental nature of the Company's business is changing from that of investing in a portfolio of securities, with the goal of achieving gains on appreciation and dividend income, to that of being actively engaged in the ownership and management of a holding company, with the goal of generating income from the operations of those businesses. The withdrawal of the Company's election as a BDC under the 1940 Act resulted in a significant change in the Company's method of accounting. The Company formerly utilized the BDC financial statement presentation and that accounting utilized the value method of accounting used by investment companies, which allows BDCs to recognize income and value their investments at market value as opposed to historical cost. As an operating company, the Company adopted the financial statement presentation and accounting for securities held which provides for either fair value or historical cost methods of accounting, depending on the classification of the investment and the Company's intent with respect to the period of time it intends to hold the investment. Change in the Company's method of accounting could reduce the market value of its investments in privately held companies by eliminating the Company's ability to report an increase in value of its holdings as the increase occurs. Also, as an operating company, the Company also now consolidates its financial statements with controlled subsidiaries, thus eliminating the portfolio company reporting benefits available to BDCs.

Our financial statements have been prepared in conformity with generally accepted accounting principles, which contemplate the continuation of the Company as a going concern. This basis of accounting contemplates the recovery of the Company's assets and the satisfaction of liabilities in the normal course of business. We have not yet attained a level of operations which allows it to meet its current overhead and may not attain profitable operations within next few business operating cycles, nor is there any assurance that such an operating level can ever be achieved. We are dependent upon obtaining additional financing adequate to fund our operations.. The report of our auditors on our financial statements includes a reference to going concern risks. While the Company has funded its initial operations with private placements, became a publicly owned entity and secured loans from a related party, there can be no assurance that adequate financing will continue to be available to the Company and, if available, on terms that are favorable to the Company. Our ability to continue as a going concern is also dependent on many events outside of our direct control, including, among other things, improvement in the economic climate. The financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the outcome of this uncertainty.

The preparation of our financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ materially from these estimates under different assumptions or conditions..

Business Plan

United EcoEnergy Corp (UEEC) develops, manufactures and markets products and technologies in the healthcare sector. UEEC's principal operating subsidiary is Epic Wound Care, Inc. which produces homeostatic gauze, a collagen-like natural substance created from chemically treated cellulose that is designed to address severe bleeding in wound care applications. The Company is focused on identifying additional emerging healthcare products and technologies, principally homeostatic, for strategic partnership or acquisition.

We have very limited funds and we may not be able to execute our current business plan and fund business operations long enough to achieve profitability. Our ultimate success may depend upon our ability to raise additional capital. There can be no assurance that additional funds will be available when needed from any source or, if available, will be available on terms that are acceptable to us.

Current Economic Environment

The U.S. economy is currently in a recession, which could be long-term. Consumer confidence continued to deteriorate and unemployment figures continued to increase during the first half of 2009. However, in recent months, certain economic indicators have shown modest improvements. The generally deteriorating economic situation, together with the limited availability of debt and equity capital, including through bank financing, will likely have a disproportionate impact on the micro-cap companies we intend to target for investment. As a result, we may experience a reduction in attractive investment opportunities in prospective portfolio companies that fit our investment criteria. In addition, micro-cap companies in which we ultimately invest may be unable to pay us the interest or dividends on their convertible securities or repay their debt obligations to us, and the common stock which we may receive upon conversion of the convertible securities may have little or no value, resulting in the loss of all or substantially all of our investment in such micro-cap companies.

Going Concern

The accompanying financial statements have been prepared in conformity with generally accepted accounting principles, which contemplate the continuation of the Company as a going concern. This basis of accounting contemplates the recovery of the Company's assets and the satisfaction of liabilities in the normal course of business. The Company since its formation has not generated any significant revenues. The Company has not as yet attained a level of operations which allows it to meet its current overhead and may not attain profitable operations within its first few business operating cycles, nor is there any assurance that such an operating level can ever be achieved. The Company is dependent upon obtaining additional financing adequate to fund its operations. While the Company has funded its initial operations with private placements and secured loans from a related party, there can be no assurance that adequate financing will continue to be available to the Company and, if available, on terms that are favorable to the Company. The Company's ability to continue as a going concern is also dependent on many events outside of its direct control, including, among other things improvement in the economic climate. The financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the outcome of this uncertainty.

Results of Operations

Three months ended March 31, 2010 versus three months ended March 31, 2009

Prior to December 31, 2009, the Company made considerable efforts to carry out its business plan as a Business Development Company. These efforts included both business development and financing activities. During the three months ended March 31, 2010 the Company incurred general and administrative expenses of \$100,000 versus \$82,000 in the prior year period. The principal expenses incurred were related to expanding the distribution base for Epic Wound Care, Inc. our principal operating subsidiary as well as restructuring the Company to end its BDC status. The prior year period general and administrative costs were related to identifying and negotiating transactions with potential portfolio acquisitions.

Epic's principal distributor during the 2010 quarter continued to develop its customer base for the Epic gauze product designed for the wound care market and the margins achieved should be reflective of the margins we intend to achieve, although there can be no assurance. Operating expenses in the 2010 period also includes a non-cash charge for amortization of the intellectual property rights related to the Epic technology.

Other expenses includes non-cash accounting charges aggregating \$11,000 in connection with our financing activities.

Financial Condition, Liquidity and Capital Resources

As of March 31, 2010, the Company had a negative working capital of \$579,000 and stockholders' deficiency of \$69,000. Since inception, we generated net cash proceeds of \$1 million from equity placements and borrowed \$249,000 principally from related parties. The Company has not as yet attained a level of operations which allows it to meet its current overhead and may not attain profitable operations within the next few business operating cycles, nor is there any assurance that such an operating level can ever be achieved. The report of our auditors on our 2009 financial statements includes a reference to going concern risks. While the Company has funded its initial operations with private placements, and secured loans from related parties, there can be no assurance that adequate financing will continue to be available to the Company and, if available, on terms that are favorable to the Company. Our ability to continue as a going concern is also dependent on many events outside of our direct control, including, among other things, our ability to achieve our business goals and objectives, as well as improvement in the economic climate.

Cash Flows

The Company's cash on hand at March 31, 2010 and December 31, 2009 was \$106 and \$8,000, respectively.

Operating cash flows: We continue the initial sales process for our gauze product which was begun late in 2009 with limited sales to our sales distributor. We had no operating sources of cash in the 2009 period.

Net cash used in operating activities for the quarter ended March 31, 2010 was \$29,000 as compared to \$5,000 in the prior year. The increase in the cash used in operating activities was principally the result of the activity to create new business plan to operate a medical products company rather than be a passive investor.

Financing cash flows: Net cash generated from financing of \$21,000 and \$25,000 in 2010 and 2009, respectively, are the proceeds of loans from a related party.

Off-Balance Sheet Arrangements

As of March 31, 2010, we have no off-balance sheet arrangements.

Related Parties

Information concerning related party transactions is included in the financial statements and related notes, appearing elsewhere in this quarterly report on Form 10-Q.

Critical Accounting Policies

The preparation of financial statements and related disclosures in conformity with generally accepted accounting principles in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and revenues and expenses during the periods reported. Actual results could materially differ from those estimates. We have identified the following items as critical accounting policies.

Revenue Recognition

The Company recognizes revenues when persuasive evidence of an arrangement exists, product has been delivered or services have been rendered, the price is fixed or determinable and collectability is reasonably assured. Revenue is recognized net of estimated sales returns and allowances.

Revenues are attributable to the sale of medical products through distributor agreements. The principal terms of the agreements provide that the distributor orders be accompanied by partial payment in advance which at least equals 50% of total manufactured cost, as defined, for orders for distributor inventory and, in addition, an agreed portion of the distributor's gross profit on special orders. The balance of the manufactured cost is due from the distributor at the time of shipment. The Company is also entitled to an agreed percentage of the distributor's profit on receipt by the distributor. The Company defers all amounts received in advance of shipment and recognizes as revenue the aggregate of amounts invoiced in advance and an estimate of the Company's portion of distributor's profit at the time of shipment.

Federal Income Taxes

Because federal income tax regulations differ from accounting principles generally accepted in the United States, distributions in accordance with tax regulations may differ from net investment income and realized gains recognized for financial reporting purposes. Differences may be permanent or temporary. Permanent differences are reclassified among capital accounts in the financial statements to reflect their tax character. Temporary differences arise when certain items of income, expense, gain or loss are recognized at some time in the future. Differences in classification may also result from the treatment of short-term gains as ordinary income for tax purposes.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

We are subject to financial market risks, including changes in interest rates. During the three months ended March 31, 2010, we did not engage in interest rate hedging.

Item 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

The Company is in the process of implementing disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 (the "Exchange Act"), that are designed to ensure that information required to be disclosed in the Company's Exchange Act reports are recorded, processed, summarized, and reported within the time periods specified in rules and forms of the Securities and Exchange Commission, and that such information is accumulated and communicated to our Chief Executive Officer to allow timely decisions regarding required disclosure.

As of March 31, 2010, the Chief Executive Officer and Chief Financial Officer carried out an assessment, of the effectiveness of the design and operation of our disclosure controls and procedure and concluded that the Company's disclosure controls and procedures were not effective as of March 31, 2010, because of the material weakness described below.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis.

The material weakness identified during management's assessment was the lack of sufficient resources with SEC, generally accepted accounting principles (GAAP) and tax accounting expertise. This control deficiency did not result in adjustments to the Company's interim financial statements. However, this control deficiency could result in a material misstatement of significant accounts or disclosures that would result in a material misstatement to the Company's interim or annual financial statements that would not be prevented or detected. Accordingly, management has determined that this control deficiency constitutes a material weakness.

The Chief Executive Officer and Chief Financial Officer performed additional accounting and financial analyses and other post-closing procedures including detailed validation work with regard to balance sheet account balances, additional analysis on income statement amounts and managerial review of all significant account balances and disclosures in the Quarterly Report on Form 10-Q, to ensure that the Company's Quarterly Report and the financial statements forming part thereof are in accordance with accounting principles generally accepted in the United States of America. Accordingly, management believes that the financial statements included in this Quarterly Report fairly present, in all material respects, the Company's financial condition, results of operations, and cash flows for the periods presented.

Changes in Internal Control over Financial Reporting

During the three months ended March 31, 2010 there were no changes in our system of internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

We are not currently subject to any material pending legal proceedings.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2009, which could materially affect our business, financial condition and/or operating results. The risks described in our Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially and adversely affect our business, financial condition and/or operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Submission of Matters to a Vote of Security Holders

On February 5, 2010 the Company filed an Information Statement with the SEC providing notice of shareholder action in lieu of an Meeting of Shareholders, taken pursuant to the written consent of certain shareholders, referred to as the consenting shareholders. Specifically, the consenting shareholders approved the decision of the Audit Committee of the Board of Directors of the Company to appoint Rosenberg Rich Baker Berman & Co. as the independent auditors for the Company for the year ended December 31, 2009. The consenting shareholders held shares of common stock and are entitled to cast a number of votes equal to 53.33 % of the total voting capital stock on all matters submitted to the shareholders for approval.

Item 5. Other Information

None.

Item 6. Exhibits

(a) Exhibits

31.1	Certification of Chief Executive Officer
31.2	Certification of Chief Financial Officer
32.1	Section 1350 Certification of Chief Executive Officer and Chief Financial Officer

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized on May 14, 2010.
