

PERVASIP CORP
Form 10-K
December 15, 2016

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended: **November 30, 2015**

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 000-04465

PERVASIP CORP.
(Exact name of registrant as specified in its charter)

New York 13-2511270
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

430 North Street

White Plains, NY 10605
(Address of Principal Executive Offices)

Edgar Filing: PERVASIP CORP - Form 10-K

(914) 750-9339

(Registrant's telephone number, including area code)

Securities registered under Section 12(b) of the Exchange Act: **None**

Securities registered under Section 12(g) of the Exchange Act:

Common Stock, par value \$0.00001 per share

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by checkmark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definition of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act:

Large accelerated filer	Non-accelerated filer
Accelerated filer	Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of registrant’s voting and non-voting common equity held by non-affiliates (as defined by Rule 12b-2 of the Exchange Act) computed by reference to the average bid and asked price of such common equity on May 31, 2015, was \$4,777,985.

As of November 30, 2016, the registrant has one class of common equity, and the number of shares outstanding of such common equity was 3,778,005,709.

Documents Incorporated By Reference: None.

Special Note Regarding Forward-Looking Statements

Included in this Form 10-K are “forward-looking” statements, as well as historical information. Although we believe that the expectations reflected in these forward-looking statements are reasonable, we cannot assure you that the expectations reflected in these forward-looking statements will prove to be correct. Our actual results could differ materially from those anticipated in forward-looking statements as a result of certain factors, including matters described in the section titled “Risk Factors.” Forward-looking statements include those that use forward-looking terminology, such as the words “anticipate,” “believe,” “estimate,” “expect,” “intend,” “may,” “project,” “plan,” “will,” “shall,” similar expressions, including when used in the negative. Although we believe that the expectations reflected in these forward-looking statements are reasonable and achievable, these statements involve risks and uncertainties and we cannot assure you that actual results will be consistent with these forward-looking statements. Important factors that could cause our actual results, performance or achievements to differ from these forward-looking statements include the following:

- The availability of additional funds to successfully pursue our business plan;
- The cooperation of our lenders;
- The cooperation of industry service partners that have signed agreements with us;
- Our ability to market our services to current and new customers and generate customer demand for our products and services in the geographical areas in which we operate;
- The impact of changes in federal and state laws impacting the industries in which we operate;
- Our ability to comply with provisions of our financing agreements;
- The highly competitive nature of cloud-based products;
- The acceptance of cloud-based technologies by mainstream consumers;
- Our ability to retain key personnel;
- Our ability to maintain adequate customer care and manage our churn rate;
- The impact of adverse tax or regulatory rulings or actions affecting our operations, including the imposition of taxes, fees and penalties;
- Our ability to maintain, attract and integrate internal management, technical information and management information systems;
- Our ability to manage rapid growth while maintaining adequate controls and procedures;
- The availability and maintenance of suitable vendor relationships, in a timely manner, at reasonable cost;
- The decrease in prices to consumers brought about by intense competition in cloud-based products; and
- General economic conditions.

These forward-looking statements are subject to numerous assumptions, risks and uncertainties that may cause our actual results to be materially different from any future results expressed or implied by us in those statements.

These risk factors should be considered in connection with any subsequent written or oral forward-looking statements that we or persons acting on our behalf may issue. All written and oral forward-looking statements made in connection with this Report that are attributable to us or persons acting on our behalf are expressly qualified in their

entirety by these cautionary statements. Given these uncertainties, we caution investors not to unduly rely on our forward-looking statements. We do not undertake any obligation to review or confirm analysts' expectations or estimates or to release publicly any revisions to any forward-looking statements to reflect events or circumstances after the date of this document or to reflect the occurrence of unanticipated events. Further, the statements about our intentions contained in this document are statements of our intentions as of the date of this document and are based upon, among other things, the existing regulatory environment, industry conditions, market conditions and prices, the economy in general and our assumptions as of such date. We may change our intentions, at any time and without notice, based upon any changes in such factors, in our assumptions or otherwise.

PART I

In this Annual Report on Form 10-K, we will refer to Pervasip Corp., a New York corporation, as “our company,” “we,” “us” and “our.”

Item 1. Business.

Overview

Our company was incorporated in the State of New York in 1964. From 1999 to 2015 we were involved exclusively in the telecommunications business, both as a reseller of telephone services and, after 2004, through our own IP telephone network. In December 2007, we changed our name to Pervasip Corp. The word Pervasip is a contraction of the phrase “Pervasive IP” to signify a pervasive Internet Protocol (“IP”) company with cloud-based technology that possessed a ubiquitous global presence.

During fiscal 2015 we transitioned from our cloud-based telecommunications business to pursue a cloud-based business focused on the emerging cannabis industry. We purchased Canalytix LLC, which is developing a cloud-based application to monitor and control greenhouse facilities, providing real-time data on energy usage, HVAC systems, lighting and costs. On July 1, 2015, we purchased Plaid Canary Corporation (“PCC”), a special purpose consolidation company organized to acquire companies and technologies in emerging agricultural markets. On July 6, 2015, PCC acquired 60% of the membership units of Grow Big Supply LLC (“Grow Big”), which operated a retail supply store in Denver, Colorado targeted at those involved in growing cannabis.

We planned to use part of the Grow Big facility to provide laboratory testing and oil extraction services. The facility, however, was in a warehouse district and it was too difficult to maintain the cleanliness required for laboratory work. In February 2016, we were provided significant financial incentives from Grow Big’s landlord to close our Grow Big store and move it to another location. We laid off our staff at the store, except for our Chief Science Officer and Chief Operating Officer, and we moved our inventory to temporary storage while we searched for a location that would allow us to perform scientific work and sell off our remaining inventory. In November 2016, we secured a verbal agreement with a licensed grower and dispensary and we moved inventory from storage into its warehouse. When our

existing inventory is sold, we do not plan to continue the sale of gardening products. We believe there is more value in providing scientific analysis and extraction services to entities that are operating under a cannabis license.

We have developed scientific methods for the analysis of cannabinoids in flowers, concentrates, and edibles through the use of available instruments. As our operations expand, we plan to assist medical marijuana specialty production facilities in order to better regulate, calculate proper dosage, and improve consistency in the product.

Available Information

We maintain a corporate website with the address www.canalytix.com. We have not incorporated by reference into this Report on Form 10-K the information on any of our websites and you should not consider any of such information to be a part of this document. Our website addresses are included in this document for reference only.

We make available free of charge through our corporate website our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K, and amendments to these reports through a link to the EDGAR database as soon as reasonably practicable after we electronically file such material with, or furnish such material to, the U.S. Securities and Exchange Commission (the "SEC"). You can also read and copy any materials we file with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549. You can obtain additional information about the operation of the Public Reference Room by calling the SEC at 1.800.SEC.0330. In addition, the SEC maintains a website (www.sec.gov) that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC, including all of our filings.

The Industry

Marijuana, a derivative of the cannabis plant, is classified as a Schedule I controlled substance under the U.S. Controlled Substances Act. A Schedule I controlled substance is defined as a substance that has no currently accepted medical use in the United States, a lack of safety for use under medical supervision, and a high potential for abuse. The Department of Justice defines Schedule I controlled substances as “the most dangerous drugs of all the drug schedules with potentially severe psychological or physical dependence.” Possession of marijuana is illegal under federal law. Possession with an intent to distribute marijuana is a felony under federal law, potentially punishable by fines up to \$50 million and terms of imprisonment up to life.

Nevertheless, commencing with California in 1996, a succession of states have decriminalized the use of marijuana for medical purposes. Although the medical uses of marijuana deemed acceptable vary from state to state, decriminalization of use for relief of nausea during chemotherapy, to induce appetite among cancer and AIDs patients, and to relieve chronic pain and muscle spasms is common. At present, 27 states and the District of Columbia had decriminalized some or all medical uses of marijuana. In December 2015 Congress directed the U.S. Justice Department that it may not interfere with the medical use of marijuana in states where such use is authorized. The number of Americans living in states in which recreational marijuana is legal more than tripled as a result of the November 2016 elections. Seven states have legalized recreational marijuana, and a recent Gallup poll suggests that almost 60% of Americans support the idea.

Our Business Plan

Our business plan is to expand our product and service offerings to meet the full panoply of requirements for marijuana production, and expand our geographic scope as the criminal proscription of commercial marijuana recedes. Our Chief Science Officer, Dr. Kenneth Hughes, is leading our research and development activities directed towards development of technologies that will yield products and services useful to the cannabis industry. Dr. Hughes is a specialist in the realization of products for agricultural and cleantech applications based on complex technology. Dr. Hughes is exploring technologies currently used by our affiliates for extraction of corn oil during the production of ethanol, and is adapting that know-how to enable the cost-effective extraction of oil from the cannabis plant. Success in that endeavor would provide us a leading-edge position in the expanding marijuana production industry, as the extraction technology could be marketed to the larger scale producers that are likely to emerge as the industry expands and matures.

Once we have established our position as a known source for leading edge technologies in the cannabis industry, we intend to build on that position by accumulating a portfolio of technologies and services that will enable us to offer clients a resolution for any technical issue in growing cannabis they may encounter.

Software and Analytics

Early in 2015 we acquired 90% of Canalytix LLC. Canalytix was organized to market a software solution for the cannabis growing industry - specifically a cloud-based method of offsite monitoring of an indoor growing facility. Our plan is to use that platform as our entry into a position as a known "think-tank" for the cannabis growing industry, offering a full complement of technologies and services that will enhance the profitability of our client growers.

The core Canalytix software enables growers, both commercial or hobbyist, to monitor and control greenhouse facilities through a system of sensors that transfer to the cloud real-time data regarding energy usage, efficiency of HVAC systems, lighting and related expense items. The systems also permit the growers to measure, test and properly extract and rate their product to allow users to know the potency of the product they consume. We can also assist medical marijuana specialty production facilities in order to better regulate, calculate proper dosage, and maintain consistency in their product.

Our staff is currently working on developing laboratory bench top equipment for the analysis of compounds that are important to the cannabis industry, including cannabinoids and terpenes. We are also engaged in developing field portable equipment to allow on-site analytics.

Going forward, we plan to offer consumers the data/analytics from laboratory testing services to assist consumers in finding the cannabis product that meets their needs. We also plan to use the data/analytics to assist with formulation projects for our customers or other companies requiring that capability.

Implementation of advanced instrumentation is a major key to efficient operations where plant yields are maximized, costs are reduced, and impacts on the environment are minimized. We have identified several areas where tremendous opportunity exists for portable chemical sensing instrumentation.

Plant chemical signals (released to the atmosphere) are important in understanding plant stage of lifecycle, production of valuable plant components including cannabinoids, and terpenes, and indicating when pests are present. We believe we can both “tune” and organize a chemical sensing system to detect and monitor these chemicals to provide guidance on when to harvest plants, and when to provide nutrient and pesticide treatment. Currently, plant harvesting is determined by visual information and destructive analysis. The use of non-destructive high sensitivity instrumentation could yield hundreds of thousands of dollars to the bottom-line of large growing operations.

Greenhouse and warehouse optimization reduces costs and increases product yields. Precise and accurate control of environmental conditions allows for greater optimization. We have the ability to perform advanced environmental monitoring through a range of third-party licensed advanced technology sensing instrumentation and software monitoring tools. The combination of this technology and in-house technical expertise will allow grow facility managers as well as Canalytix personnel to monitor growing operations remotely, identify problems immediately, minimize energy use, and reduce environmental impacts.

Marketing

Our marketing approach is focused on working with industry participants to create awareness of the services and products we provide. Word-of-mouth has proven to be our most valuable form of marketing. We also post information on websites to attract potential customers within the geographical area that we serve.

Our target market segments include Home Growers of organic vegetable and fruit Growers (small farms, home garden growers, restaurants growers, farmer markets), the Do-it Yourselfers (home flower and plant growers/ mass market and growers in the cannabis related market (Dispensaries, Cultivators, Caregivers).

Indoor growing techniques have primarily been used to cultivate plant-based medicines. Plant-based medicines often require high-degree of regulation and controls including government compliance, security, and crop consistency, making indoor growing techniques a preferred method. Cultivators of plant-based medicines often make a significant investment to design and build-out their facilities. They look to work with companies such as ours that understand their specific needs and can help mitigate risks that could jeopardize their crops. Plant-based medicines are believed to

be among the fastest-growing market in the U.S. and several industry pundits believe that plant-based medicines may even displace prescription pain medication by providing patients with a safer, more affordable alternative.

Competition

All of the Company's planned distribution channels will compete for customers and sales with many different companies and products that are competitive today and likely to be even more competitive in the future. Accordingly, we believe it is essential that the Company continues to develop, improve, and refine the value propositions that are offered to its customers.

Competition in the legal cannabis industry is significant, as competing companies continually open, and medical dispensaries search for a consistent source for oil products. With regard to competition in the California, Colorado, Oregon and Washington markets, there are numerous extraction facilities that we believe will compete with us for business.

The Company's size relative to its competition is difficult to gauge as most of our competition is privately held and does not publicly report their earnings. We do know of several competitors who have been in operations longer than us, but they are privately held and, therefore, we are unable to determine their size in terms of annual revenue.

We also face competition from other public companies that offer equipment and expendables. Moreover, as the negative stigma associated with some types of urban gardening such as legal cannabis plants diminishes, it is very possible that other better capitalized public and private companies may enter the market and may effectively challenge the value proposition offered by the Pervasip subsidiaries. These competitors may be able to attract customers more easily because of their financial resources. Our larger competitors can also devote substantially more resources to business development and may adopt more aggressive pricing policies. We plan to compete on the strength of multiple product offerings, controlled production and scientific analysis to ensure high-quality and consistency in the products that we plan to offer.

Government Regulation

Twenty-seven states and the District of Columbia currently have laws legalizing marijuana in some form. Seven states and the District of Columbia have adopted more expansive laws legalizing marijuana for recreational use. Most recently, California, Massachusetts and Nevada all passed measures in November 2016 legalizing recreational marijuana. California's Prop. 64 measure allows adults 21 and older to now possess up to one ounce of marijuana and grow up to six plants in their homes. Other tax and licensing provisions of the law will not take effect until January 2018. In Nevada, adults will be able to legally possess up to one ounce of marijuana beginning January 1, 2017. A similar ballot measure in Massachusetts allows for possession of marijuana starting on December 15, 2016.

A number of states have also decriminalized the possession of small amounts of marijuana. Other states have passed medical marijuana laws allowing for limited use of cannabis. Some medical marijuana laws are broader than others, with types of medical conditions that allow for treatment varying from state to state. Others states have passed laws allowing residents to possess cannabis oil if they suffer from certain medical illnesses.

The state laws are in conflict with the federal Controlled Substances Act, which makes marijuana use and possession illegal on a national level. The Obama administration stated that it is not an efficient use of resources to direct federal law enforcement agencies to prosecute those lawfully abiding by state-designated laws allowing the use and distribution of medical marijuana, and the U.S. Congress concurred. However, there is no guarantee that the Trump administration which comes to office in 2017 will not change federal policy regarding the enforcement of the Controlled Substances Act. Any change to more strict enforcement of current federal laws could cause significant financial damage to Pervasip and its shareholders. While Pervasip and its subsidiaries do not intend to harvest, distribute or sell cannabis, more strict enforcement of federal law would be likely to reduce the demand for our products and services.

Employees

As of November 30, 2016 we have 3 full-time employees. We are not subject to any collective bargaining agreement and we believe our relationship with our employees is good. We plan to operate with a small number of employees until our revenues increase further or until we are able to attract additional financing that has money earmarked for sales and marketing expense.

Item 1A. Risk Factors

You should carefully consider the risks below, as well as all of the other information contained in this Annual Report on Form 10-K and our financial statements and the related notes included elsewhere in this Annual Report on Form 10-K, in evaluating our company and our business. Any of these risks could materially adversely affect our business, financial condition and results of operations and the trading price of our common stock.

I. Risks Related To Our Financial Condition

Our business will not be viable unless we obtain significant amounts of additional capital.

At November 30, 2015 we had \$8,978 in cash and \$7,183 in accounts receivable, balanced against \$1,622,649 in accounts payable and many millions in debt. It is unlikely that we can sustain current operations, and it is impossible that we can expand current operation, unless we obtain additional capital. Because of our poor financial condition, it will be very difficult to obtain additional capital. If we fail to do so, it is likely that our business will fail and our shareholders will lose most or all of their investment in our company.

Our negative net worth will make it unlikely that we can obtain conventional financing for our business during the foreseeable future.

Conventional financing generally consists of debt secured by assets or of equity financing. At the present time, we have secured debt outstanding in amounts that far exceed the book value of our assets. We also have a shareholders' deficit that is approximately 19 times the book value of our assets - which means that our company has no equity. For those reasons, we will not be able to obtain conventional financing unless and until these conditions are substantially alleviated, which is unlikely to happen in the near future. Until then, the only financing that will be available to us will involve the sale of securities convertible into common stock at floating rates, so that our investors can liquidate their investment by selling into the market for our common stock. Our ability to obtain such financing will depend on the continued liquidity of the market for our common stock. If the trading volume in the market for our common stock diminishes, we may be unable to attract investors of any kind, in which case our business would be likely to fail for want of capital resources.

The \$3,832,659 in debt that we owe to our lenders will add high interest expenses to our statement of operations, which will make it difficult for us to report profits.

During the year ended November 30, 2015 we recorded \$1,414,029 in interest expense, or 234% of our revenues in that period. During the year ended November 30, 2014, we recorded \$1,838,375 in interest expense, or 374% of our revenues for the year. At November 30, 2015 we had \$3,832,659 in debt on our balance sheet, before taking into consideration any debt discounts. That debt, until it is satisfied, will result in interest expense in amounts that far exceed our current revenue level. This situation will make it difficult for us to realize net income in the coming periods (except for net income that may occasionally result from changes in the value of our outstanding derivative liabilities). And, in turn, our inability to report net income will make it difficult for us to obtain capital financing that might replace the high interest debt on our balance sheet.

The debt agreements governing our financing contain restrictions that may limit our flexibility in operating our business

In October 2015 we entered into a Securities Purchase Agreement with TCA Global Credit Master Fund, LP, which is the Selling Security Holder in this offering. Under the terms of the Securities Purchase Agreement, we sold to TCA a secured convertible debenture in the principal amount of \$500,000. The Securities Purchase Agreement contains covenants that limit our ability to enter into specified types of transactions. These covenants will prevent us from undertaking, without the consent of TCA, transactions of the following nature:

- merger or consolidation;
- grant of liens on our assets;
- sale or disposal of assets outside the ordinary course of business;
- consummation of acquisitions;

investments; or
payment of dividends or other distributions.

These covenants may prevent us from taking actions that we consider to be in the Company's best interests and in the interest of its shareholders, but that TCA does not perceive to be in its own interest. In addition, we are in default of our lending agreement with TCA.

We do not expect to pay dividends and investors should not buy our common stock expecting to receive dividends.

We have not paid any dividends on our common stock in the past, and do not anticipate that we will declare or pay any dividends in the foreseeable future. Consequently, investors will only realize an economic gain on their investment in our common stock if the price appreciates. Investors should not purchase our common stock expecting to receive cash dividends. Because we do not pay dividends, and there may be limited trading, investors may not have any manner to liquidate or receive any payment on their investment. Therefore, our failure to pay dividends may cause investors to not see any return on investment even if we are successful in our business operations. In addition, because we do not pay dividends we may have trouble raising additional funds, which could affect our ability to expand our business operations.

II. Risks Related To Our Business Operations

We have a limited operating history and operate in a new industry, and we may not succeed.

We have a limited operating history in our current line of business. We are subject to all risks inherent in a developing business enterprise. Our likelihood of success must be considered in light of the problems, expenses, difficulties, complications, and delays frequently encountered in the competitive and regulatory environment in which we operate. For example, the recreational and medical marijuana industry is a new industry that as a whole may not succeed, particularly should the Federal government change course and decide to prosecute those dealing in medical and recreational marijuana in violation of Federal law. If that happens, the market for our products and services would be likely to disappear.

Since we participate in a new industry, there are no established entities whose business model we can follow or build on the success of. Similarly, there is limited information about comparable companies available for potential investors to review in making a decision about whether to invest in Pervasip. Further, as the medical and recreational marijuana industry is a new market, it is ripe for technological advancements that could limit or eliminate the need for our services and products.

You should consider, among other factors, the risks and uncertainties encountered by companies that, like Pervasip, are in their early stages. For example, unanticipated expenses, problems, and technical difficulties may occur and they may result in material delays in the operation of our business, in particular with respect to our services and products. We may not successfully address these risks and uncertainties or successfully implement our operating strategies. If we fail to do so, it could materially harm our business to the point of having to cease operations and could impair the value of our capital stock to the point investors may lose their entire investment.

The long term success of our business will depend on our ability to develop new technologies for the cannabis industry.

Pervasip will only be successful as a vehicle for public investment if we are able to achieve a market position that generates substantial profits. Our plan to achieve that market position is based on our ambition to develop technologies that will enhance the profitability of our clients in the cannabis industry. We are active in developing those technologies; but the success of our development efforts is by no means assured. Moreover, any new products or services that we develop and offer to the industry may be subject to significant competition from offerings by new and existing competitors in the legal cannabis industry. In addition, new products, services and enhancements may pose a variety of technical challenges and require us to attract additional qualified employees. The failure to successfully develop and market these new products, services or enhancements could prevent Pervasip from becoming profitable.

Our computer systems and operations may be vulnerable to security breaches.

We expect that the cloud-based monitoring systems offered by our subsidiary, Canalytix, to the cannabis industry will be an important foundation for establishing our company as a leading source of technology for that industry. For that reason, among others, the safety of our network and our secure transmission of confidential information over the Internet will be essential to our operations and our services. Although we have developed systems and processes that are designed to protect our network and the consumer information stored on our network, our network and our computer infrastructure are potentially vulnerable to physical breaches or to the introduction of computer viruses, abuse of use and similar disruptive problems and security breaches that could cause loss (both economic and otherwise), interruptions, delays or loss of services to our users. We rely on licensed encryption and authentication technology to effect secure transmission of confidential information, including credit card numbers. It is possible, however, that advances in computer capabilities or new technologies could result in a compromise or breach of the technology we use to protect user transaction data. A party that is able to circumvent our security systems could misappropriate proprietary information, cause interruptions in our operations or utilize our network without authorization. Security breaches also could damage our reputation and expose us to a risk of loss, litigation and possible liability. While we have experienced isolated instances of unauthorized use of our network, and have responded to such events by taking steps to increase our network security, we cannot guarantee you that our security measures will prevent future security breaches.

Third parties might infringe upon our technology.

We cannot assure you that the steps we have taken to protect our property rights will prevent misappropriation of our technology. To protect our rights to our intellectual property, we rely on a combination of trade secrets, confidentiality agreements and other contractual arrangements with our employees, affiliates, strategic partners and others. However, we may be unable to detect inappropriate use of our technology. Moreover, in the event of misappropriation, we may lack the financial resources necessary to successfully prosecute an enforcement action. Failure to adequately protect our intellectual property could materially harm our brand, devalue our proprietary content and adversely affect our ability to compete effectively. Further, defending our technology rights could result in significant financial expenses and managerial resources.

Third parties may claim that our services infringe upon their intellectual property rights.

Third parties may assert claims that we have violated a patent or infringed a copyright, trademark or other proprietary right belonging to them and subject us to expensive and disruptive litigation. We incorporate licensed technology in some of our products and services. In these license agreements, the licensors have agreed to indemnify us with respect to any claim by a third party that the licensed software infringes any patent or other proprietary right so long as we have not made changes to the licensed software. We cannot assure you that these provisions will be adequate to protect us from infringement claims. Any infringement claims and lawsuits, even if not meritorious, could be expensive and time consuming to defend; divert management's attention and resources; require us to redesign our products and services, if feasible; require us to pay royalties or enter into licensing agreements in order to obtain the right to use necessary technologies; and/or may materially disrupt the conduct of our business.

We may face difficulties related to entry into joint ventures or the future acquisition or integration of additional businesses, which could harm our growth or operating results

Because we have entered into an industry that is rapidly developing, it is crucial to our future success that we keep pace with the growth. Toward that end, we will be aggressively pursuing opportunities to enter into joint venture arrangements with other industry participants or to acquire additional businesses or assets. Any such events will require substantial management time and resources, which may distract from our core operations to their detriment. In addition, acquisitions of existing businesses involve substantial risks, including the risk that we may not be able to integrate the operations, personnel, services, or technologies, the potential disruption of our ongoing businesses, the diversion of management attention, the maximization of financial and strategic opportunities, the difficulty in developing or maintaining controls and procedures, and the dilution to our existing stockholders from the issuance of additional shares of common stock. As a result of these and other risks, we may not produce anticipated revenue, profitability, or synergies.

Because of our limited financial resources, acquisitions will likely require us to issue equity securities. Such transactions often result in significant expenses, such as the amortization of intangibles, write-down of goodwill, and write-off of acquisition-related expenses. If we are unable to successfully integrate any acquired businesses or assets we may not receive the intended benefits of such acquisition. In addition, we cannot predict market reactions to any acquisitions we may make.

While we conduct due diligence in connection with acquisition and joint venture opportunities, there will be a risk that such due diligence efforts fail to discover undisclosed liabilities or that we inadequately assess known liabilities. The discovery of material liabilities associated with acquisitions or joint venture opportunities, economic risks faced by joint venture partners, or any failure of joint venture partners to perform their obligations could adversely affect our business, results of operations, and financial condition.

If we are able to expand our operations, we may be unable to successfully manage our future growth.

Even if we are successful in expanding our operations in the United States, as planned, we may experience periods of rapid growth, which will require additional resources. Any such growth could place increased strain on our management, operational, financial and other resources, and we will need to train, motivate, and manage employees, as well as attract management, sales, finance and accounting, international, technical, and other professionals. In addition, we will need to expand the scope of our infrastructure and our physical resources. Any failure to expand these areas and implement appropriate procedures and controls in an efficient manner and at a pace consistent with our business objectives could have a material adverse effect on our business and results of operations.

III. Risks Relating To Our Industry

Our success will be dependent on additional states legalizing medical and recreational marijuana.

Continued development of the medical and recreational marijuana market is dependent upon continued legislative authorization of marijuana at the state level. Any number of factors could slow or halt the progress. Further, progress is not assured and the process can be expected to encounter set-backs. Even in states where there is public support for a legislative proposal, key support must be created in the relevant legislative committee or a bill may never advance to a vote. Numerous factors can interfere with success in the legislative process. Any one of these factors could slow or halt the progress and adoption of marijuana for recreational and medical purposes, which would limit the market for our products and negatively impact our business and revenues.

Marijuana remains illegal under federal law. Even in those jurisdictions in which the use of medical marijuana has been legalized at the state level, its use and prescription are violations of federal law, which may disrupt the on going business of Pervasip.

Possession and distribution of marijuana remain illegal under federal law. Marijuana is a schedule-I controlled substance. Even in those jurisdictions in which the use of medical and recreational marijuana have been legalized at the state level, its possession, prescription or distributions remains a violation of federal law. The United States Supreme Court has ruled in United States v. Oakland Cannabis Buyers' Coop. and Gonzales v. Raich that the federal government has the right to regulate and criminalize cannabis, even for medical and recreational purposes, notwithstanding state or local de-regulation. Therefore, federal law criminalizing the use of marijuana trumps state laws that legalize its use for medicinal purposes. At present, certain states are decriminalizing possession of marijuana, either for medical use or in general. This may be because the Obama administration made a policy decision to allow states to implement these laws and not prosecute anyone operating in accordance with applicable state law. However, we faced another presidential election cycle in 2016, and a new administration could introduce a less favorable policy. A change in the federal attitude towards enforcement could cripple the industry. The legal cannabis industry is our target market, and if this industry is unable to operate, we would lose the majority of our potential clients, which would have a negative impact on our business, operations and financial condition.

Our subsidiaries may have difficulty accessing the service of banks, which may make it difficult to conduct our business operations.

As discussed above, the distribution of marijuana is illegal under federal law. Therefore, there is a compelling argument that banks cannot accept for deposit funds from the legal cannabis industry, and therefore cannot do business with the Company. While efforts are underway in the U.S. Congress to amend banking regulations and laws

in order to allow banks to transact business with state-authorized medical and recreational marijuana businesses, there can be no assurance these legislative efforts will be successful, that banks will agree to do business with medical marijuana and recreational marijuana industry participants, or that in the absence of legislation state and federal banking regulators will not strictly enforce current prohibitions on banks handling funds generated from an activity that is illegal under federal law. If we are unable to open accounts and otherwise use the service of banks, the result could be a material adverse effect on our business operations.

Pervasip may be unable to respond to the rapid technological change in its industry, and such change may increase costs and competition that may adversely affect our business.

Rapidly changing technologies, frequent new product and service introductions and evolving industry standards characterize the Company's market. The continued growth of the Internet and intense competition in the Company's industry exacerbate these market characteristics. The Company's future success will depend on its ability to adapt to rapidly changing technologies by continually improving the performance features and reliability of its products and services. The Company may experience difficulties that could delay or prevent the successful development, introduction or marketing of its products and services. In addition, any new enhancements must meet the requirements of its current and prospective users and must achieve significant market acceptance. The Company could also incur substantial costs if it needs to modify its products and services or infrastructures to adapt to these changes.

The Company also expects that new competitors may introduce products, systems or services that are directly or indirectly competitive with the Company. These competitors may succeed in developing, products, systems and services that have greater functionality or are less costly than the Company's products, systems and services, and may be more successful in marketing such products, systems and services. Technological changes have lowered the cost of operating communications and computer systems and purchasing software. These changes reduce the Company's cost of providing services but also facilitate increased competition by reducing competitors' costs in providing similar services. This competition could increase price competition and reduce anticipated profit margins.

The cannabis industry is highly competitive and we have less capital and resources than many of our competitors, which may give them an advantage in developing and marketing products similar to ours or make our products obsolete.

We are involved in a highly competitive industry where we will compete with numerous other companies that offer alternative methods or approaches, that may have far greater resources, more experience, and personnel perhaps more qualified than we do. Such resources may give our competitors an advantage in developing and marketing products similar to ours or products that make our products obsolete. There can be no assurance that we will be able to successfully compete against these other entities.

IV. Risks Related To Our Management

Our Series E preferred shareholder has voting control of our company and has the ability to exercise control over all matters submitted to a stockholder vote.

Our Chief Executive Officer, Paul Riss, currently owns 10 shares of our Series E Preferred Stock, which gives him 51% of the voting power at any meeting of our shareholders or if shareholder consents are collected. He is therefore able to control the outcome of any matter submitted to the shareholders for approval, which would include the election of directors, recapitalizations, mergers or other significant corporate transactions.

TCA may obtain voting control of the Company and exercise it for its own purposes.

In October 2015 the Company sold a \$500,000 promissory note to TCA Global Credit Master Fund, LP. The Note matures in April 2017 and bears interest at 18% per annum. In connection with the sale of the Note, the Company issued to TCA Series J Preferred Stock. The certificate that created the Series J Preferred Stock provides that, if the Company incurs a default under the terms of the Note, TCA may declare its rights as a holder of Series J Preferred Stock effective. Those rights include the right to exercise voting control of the Company. The Company has defaulted under the Note, and accordingly, TCA could take control of the Company. It is possible that TCA would use that control to protect its investment in the Company in ways that may not be in the best interests of the other shareholders of the Company.

Because we are not subject to compliance with rules requiring the adoption of certain corporate governance measures, our shareholders have limited protections against interested director transactions, conflicts of interest and similar matters.

The Sarbanes-Oxley Act of 2002, as well as rule changes proposed and enacted by the SEC, the New York Stock Exchange and the Nasdaq Stock Market as a result of Sarbanes-Oxley, require the implementation of various measures relating to corporate governance. These measures are designed to enhance the integrity of corporate management and the securities markets and apply to securities which are listed on the New York Stock Exchanges or the Nasdaq Stock Market. Because we are not presently required to comply with many of the corporate governance provisions and because we chose to avoid incurring the substantial additional costs associated with such compliance any sooner than necessary, we have not yet adopted these measures.

Because none of our directors is independent, we do not currently have independent audit or compensation committees. This situation means that the Board will determine the direction of our company with only limited contribution of insights from outside observers with an objective perspective. This may limit the quality of the decisions that are made. In addition, the members of our board who are also officers have the ability, among other things, to determine their own levels of compensation. Until we comply with such corporate governance measures, regardless of whether such compliance is required, the absence of such standards of corporate governance may leave our shareholders without protections against interested director transactions, conflicts of interest and similar matters and investors may be reluctant to provide us with funds necessary to expand our operations.

We depend upon key personnel, the loss of which could seriously harm our business.

Our operating performance is substantially dependent on the continued services of our executive officers and key employees. In particular, Dr. Kenneth Hughes, our Chief Science Officer, possesses valuable knowledge about and experience in extraction technologies and patent applications. We have not entered into an employment agreement with Dr. Hughes and, although we are considering doing so, have not acquired key-person life insurance on him or any of our executive officers. The unexpected loss of the services of Dr. Hughes could have a material adverse effect on our business, operations, financial condition and operating results, as well as the value of our common stock.

The Company's failure to attract, train, or retain highly qualified personnel could harm the Company's business.

The Company's success also depends on the Company's ability to attract, train, and retain qualified personnel, specifically those with management and product development skills. In particular, the Company must hire additional skilled personnel to further the Company's research and development efforts. Competition for such personnel is intense. If the Company does not succeed in attracting new personnel or retaining and motivating the Company's current personnel, the Company's business could be harmed.

If we fail to establish and maintain an effective system of internal controls, we may not be able to report our financial results accurately or to prevent fraud. Any inability to report and file our financial results accurately and timely could harm our reputation and adversely impact the trading price of our common stock.

Effective internal controls are necessary for us to provide reliable financial reports and prevent fraud. If we cannot provide reliable financial reports or prevent fraud, we will not be able to manage our business as effectively as we would if an effective control environment existed, and our business and reputation with investors may be harmed. As a result, our small size and any current internal control deficiencies may adversely affect our financial condition, results of operation and access to capital.

We currently have insufficient written policies and procedures for accounting and financial reporting with respect to the requirements and application of US GAAP and SEC disclosure requirements. Additionally, there is a lack of formal process and timeline for closing the books and records at the end of each reporting period. Such weaknesses restrict the Company's ability to timely gather, analyze and report information relative to the financial statements.

Because of the Company's limited resources, there are limited controls over information processing. There is inadequate segregation of duties consistent with control objectives. Our Company's management is composed of a small number of individuals resulting in a situation where limitations on segregation of duties exist. In order to remedy this situation we would need to hire additional staff. Currently, the Company is unable to hire additional staff to facilitate greater segregation of duties but will continue to reassess its capabilities as it gains access to additional capital.

V. Risks Related To Ownership Of Our Common Stock

The market price of our common stock has been and will continue to be adversely affected by our outstanding convertible debentures.

Several third-party investors currently hold convertible debentures issued by the Company that allow them to convert principal and interest into shares of our common stock at conversion prices that approximate a 30% to 60% discount to the trading price of our common stock. At November 30, 2015, the balance of the convertible debentures outstanding payable to such convertible debenture holders amounted to \$3,470,211. If those debentures were converted in full, the shares that would be issued would far exceed the number of shares of our common stock currently outstanding. When those debentures are converted, the shares that are issued are usually immediately sold by the debenture holders into the public market. These sales, and the anticipation of such sales in the future, exerts a downward pressure on our stock price. When a lender converts the debt into shares of our common stock and resells those shares into the market, the result is often a reduction in the market price of our common stock. Until we are able to replace the convertible debentures with debt or equity financing that does not exert a continuing pressure on the market price of our common stock, the market price will continue to be volatile, and investors in our stock will bear a significant risk of reductions in the market value of our common stock.

Our common stock is quoted on the OTC Pink Market, which may increase the volatility of our stock and make it harder to sell shares of our stock.

Our common stock is quoted on the OTC Pink Market, which is the lower tier of the markets maintained by OTC Markets. There is a greater chance of market volatility for securities that trade on the OTC Pink (as opposed to a national exchange or quotation system), as a result of which stockholders may experience wide fluctuations and a depressed price in the market price of our securities. Thus, stockholders may be required to either sell our securities at a market price which is lower than their purchase price or to hold our securities for a longer period of time than they planned. Because our common stock falls under the definition of “penny stock,” trading in our common stock may be limited because broker-dealers are required to provide their customers with disclosure documents prior to allowing them to participate in transactions involving our common stock. These rules impose additional sales practice requirements on broker-dealers that sell low-priced securities to persons other than established customers and institutional accredited investors; and require the delivery of a disclosure schedule explaining the nature and risks of the penny stock market. As a result, the ability or willingness of broker-dealers to sell or make a market in our common stock may be limited, and stockholders could find it more difficult to sell their stock.

There is limited trading of our common stock, and there can be no assurance that there will be an active market for our shares of common stock either now or in the future.

Our shares of common stock have limited trading, and the price if traded may not reflect the value of our Company. There can be no assurance that there will be an active market for shares of our common stock either now or in the future. The market liquidity will be dependent on the perception of our operating business and any steps that our management might take to bring us to the awareness of investors. There can be no assurance given that there will be any awareness generated. Consequently, investors may not be able to liquidate their investment or liquidate it at a price that reflects the value of the business. If a more active market should develop, the price may be highly volatile. Because there may be a low price for our shares of common stock or because we are involved in the legal cannabis industry, many brokerage firms may not be willing to effect transactions in the securities. Even if an investor finds a broker willing to effect a transaction in the shares of our common stock, the combination of brokerage commissions, transfer fees, taxes, if any, and any other selling costs may exceed the selling price. Further, many lending institutions will not permit the use of such shares of common stock as collateral for any loans.

You may experience dilution of your ownership interest because of the future issuance of additional shares of our common stock and our preferred stock.

In the future, we may issue our authorized but previously unissued equity securities, resulting in the dilution of the ownership interests of our present stockholders. We are currently authorized to issue an aggregate of 9,000,000,000 shares of capital stock consisting of 8,978,999,990 shares of common stock, par value \$0.00001 per share and 21,000,010 shares of blank check preferred stock, par value \$0.00001 per share.

We may also issue additional shares of our common stock or other securities that are convertible into or exercisable for common stock in connection with hiring or retaining employees or consultants, future acquisitions, future sales of our securities for capital raising purposes, or for other business purposes. The future issuance of any such additional shares of our common stock or other securities may create downward pressure on the trading price of our common stock. There can be no assurance that we will not be required to issue additional shares, warrants or other convertible securities in the future in conjunction with hiring or retaining employees or consultants, future acquisitions, future sales of our securities for capital raising purposes or for other business purposes, including at a price (or exercise prices) below the price at which shares of our common stock are trading.

Item 1B. Unresolved Staff Comments.

Not applicable.

Item 2. Properties.

The following table sets forth pertinent facts concerning our office leases as of March 15, 2016

Location	Use	Approximate Square Feet	Annual Rent
430 North Street White Plains, NY 10605	Office	650	\$8,700

The lease for our office space in White Plains, NY is \$725 per month and is renewable annually. We maintain one employee at this location. In addition to office space we rent a server room and storage space at this facility.

Item 3. Legal Proceedings.

We are currently not involved in any litigation that we believe could have a materially adverse effect on our financial condition or results of operations. There is no action, suit, proceeding, inquiry or investigation before or by any court, public board, government agency, self-regulatory organization or body pending or, to the knowledge of the executive officers of our company or any of our subsidiaries, threatened against or affecting our company, our common stock, any of our subsidiaries or of our company's or our company's subsidiaries' officers or directors in their capacities as such, in which an adverse decision could have a material adverse effect.

Item 4. Mine Safety Disclosures.

Not applicable.

PART II**Item 5. Market for Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.***(a) Market Information*

Our common stock is currently quoted on the OTC Pink marketplace under the symbol PVSP. Until May 1, 2014, it was listed for quotation on the OTCQB. The high and low quoted closing price for each quarterly period of our last two fiscal years are listed below:

The following table sets forth the high and low trade information for our common stock for each quarter during the past two fiscal years. The prices reflect inter-dealer quotations, do not include retail mark-ups, markdowns or commissions and do not necessarily reflect actual transactions.

Quarter ended	High Price	Low Price
1st Quarter 2014	\$0.0024	\$0.0008
2nd Quarter 2014	\$0.0016	\$0.0006
3rd Quarter 2014	\$0.0008	\$0.0002
4th Quarter 2014	\$0.0003	\$0.0001
1st Quarter 2015	\$0.0004	\$0.0001
2nd Quarter 2015	\$0.0035	\$0.0002
3rd Quarter 2015	\$0.0023	\$0.0003
4th Quarter 2015	\$0.0005	\$0.0002

Recent Issuances of Unregistered Securities

None

(b) Holders

As of November 30, 2015 a total of 3,652,005,709 shares of the Company's common stock were outstanding, held by 363 shareholders of record.

Transfer Agent and Registrar

The transfer agent and registrar for our common stock is Worldwide Stock Transfer, LLC with its business address at One University Plaza, Suite 505, Hackensack, NJ 07601.

(c) Dividends

We have not declared or paid any dividends on our common stock and intend to retain any future earnings to fund the development and growth of our business. Therefore, we do not anticipate paying dividends on our common stock for the foreseeable future. Our secured term loans with our primary lender prohibit us from paying dividends to stockholders.

(d) Securities Authorized for Issuance under Equity Compensation Plans

The following table provides information as of November 30, 2015, with respect to shares of our common stock that are issuable under equity compensation plans.

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available to future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders:			
1996 Restricted Stock Plan(1)	—		40,000
2007 Equity Incentive Plan (2)	—		152,500
2010 Equity Incentive Plan (2)	—		24,650,253
Subtotal	—		24,842,753
Equity compensation plans not approved by security holders:			
2009 Equity Incentive Plan (2)	—		171,000
2011 Equity Incentive Plan (2)	4,000,000	\$.01	16,000,000
Subtotal	4,000,000		16,171,000
Total	4,000,000		41,013,753

(1) Our Restricted Stock Plan provides for the issuance of restricted share grants to officers and non-officer employees.

(2) Our 2007, 2009, 2010 and 2011 Equity Incentive Plans allow for the granting of share options to members of our board of directors, officers, non-officer employees and consultants.

Item 6. Selected Financial Data.

We are a smaller reporting company as defined by Rule 12b-2 of the Exchange Act and are not required to provide information under this item.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

THE FOLLOWING DISCUSSION OF OUR PLAN OF OPERATION AND RESULTS OF OPERATIONS SHOULD BE READ IN CONJUNCTION WITH THE FINANCIAL STATEMENTS AND RELATED NOTES TO THE FINANCIAL STATEMENTS INCLUDED ELSEWHERE IN THIS ANNUAL REPORT. THIS DISCUSSION CONTAINS FORWARD-LOOKING STATEMENTS THAT RELATE TO FUTURE EVENTS OR OUR FUTURE FINANCIAL PERFORMANCE. THESE STATEMENTS INVOLVE KNOWN AND UNKNOWN RISKS, UNCERTAINTIES AND OTHER FACTORS THAT MAY CAUSE OUR ACTUAL RESULTS, LEVELS OF ACTIVITY, PERFORMANCE OR ACHIEVEMENTS TO BE MATERIALLY DIFFERENT FROM ANY FUTURE RESULTS, LEVELS OF ACTIVITY, PERFORMANCE OR ACHIEVEMENTS EXPRESSED OR IMPLIED BY THESE FORWARD-LOOKING STATEMENTS.

Overview

The financial statements for the year ended November 30, 2015 include the accounts of Pervasip Corp. and the activities of its various wholly-owned subsidiaries, its 90% owned subsidiary, Canalytix LLC (Canalytix), and its 60% owned subsidiary, Grow Big Supply LLC (“Grow Big Supply”). The results of the operations of the Company include Canalytix since March 25, 2015, and Grow Big since July 6, 2015, the dates on which Pervasip acquired its ownership interest in those subsidiaries. Any significant inter-company balances and transactions have been eliminated.

To the extent that the financial statements included in this report reflect operations occurring prior to the dates on which we acquired Canalytix and Grow Big Supply, those are the operations of the Company's telecommunications business. The telecommunications business was terminated on May 31, 2015

Results of Operations

Our revenues for fiscal 2015 increased by \$113,634, or 23%, to \$604,953 as compared to \$491,319 reported for fiscal 2014. The increase in revenues was due to the sale of the bulk of our telecommunications business on September 30, 2014, after ten months of operations, compared to 5 months of operations of our hydroponics business, which we acquired in July 2015. We discontinued our hydroponics business in fiscal 2016 and anticipate that we will become a scientific analysis agricultural-products company in fiscal 2017.

Our gross profit for fiscal 2015 decreased by \$56,544 to \$147,747 from a gross profit of \$204,291 reported in fiscal 2013, and our gross profit percentage was 24% in fiscal 2014 as compared to 42% in fiscal 2014. Our telecommunications business regularly ran on gross margins in excess of 40%. However, in 2015, our hydroponics store faced significant retail competition and kept its prices low to attract customers, which resulted in a gross margin of 24%.

Selling, general and administrative expenses decreased by \$281,761, or 27%, to \$773,106 for fiscal 2015 from \$1,054,867 reported in the prior year fiscal period. The decrease is attributable to lower overhead costs in 2015, when we had full operations for a ten-month period, compared to a five-month period in fiscal 2015.

As a result of the reduction in our selling, general and administrative expenses, our loss from operations for fiscal year 2015 was \$225,217 less than our loss from operations in fiscal 2014. Additionally, we reported non-operating income of \$902,685 in fiscal 2015, and increase of \$510,907 from \$391,778 in fiscal 2014. These changes are:

Interest expense decreased by \$424,346 to \$1,414,029 for the year ended November 30, 2015 as compared to \$1,838,375 for the prior fiscal year. The decrease in interest expense was primarily due lower debt levels in fiscal 2015.

There were no debt settlement agreements in fiscal 2014, as compared to troubled debt restructuring gain in fiscal 2015 of \$3,868,321. The gains in fiscal 2015 were the result of one-time transactions negotiated with two lenders.

For the year ended November 30, 2015, we recorded a gain on the sale of a Canadian subsidiary of \$2,571. For the year ended November 30, 2014, we recorded a gain on the sale of a telecommunications subsidiary of \$640,621.

For the year ended November 30, 2015, we recorded impairment expense of \$1,393,690 to write-off intangible assets and \$220,000 to recognize impairment of an other than temporary decline in the value of an investment. No impairment expenses were recognized in fiscal 2014.

For the year ended November 30, 2015, we recorded a gain on the settlement of liabilities of \$2,328,876 as compared to a gain of \$213,961 in the prior fiscal period. Each instance of a liability settlement is contingent upon the terms that we can negotiate for a particular transaction.

For the year ended November 30, 2015, we recorded the amortization of deferred financing costs of \$5,305 as compared to \$83,714 in the prior fiscal period. Each financing and the costs related to a financing, are contingent upon the terms that we can negotiate for a particular transaction.

For the year ended November 30, 2015, we had a non-cash gain on derivative liabilities of \$2,264,449, as compared to a loss of \$1,337,886 in fiscal 2014. The gain in 2015 is due to the lower market value of embedded derivatives in our debt instruments, at the end of the fiscal year, in comparison with the market value when the debt originated.

For the year ended November 30, 2015, we owned 90 percent of a subsidiary and 60% of another subsidiary. The aggregate losses of these subsidiaries that was attributable to the noncontrolling owners amounted to \$208,396. No such loss was attributable to others in fiscal 2014 because in 2014 we owned 100% of all our subsidiaries.

Our net result for the year fiscal 2015 was net income of \$277,326 as compared to a net loss of \$458,798 recorded in fiscal 2014. Over the past two fiscal years our net results were impacted by 1) the gain we realized when creditors wrote down our debt, 2) an unrealized gain on the change in market value of derivative liabilities and 3) the sale of a subsidiary.

Liquidity and Capital Resources

At November 30, 2015, we had cash and cash equivalents of \$8,978 and negative working capital of \$8,711,742 as compared to cash and cash equivalents of \$1,832 and negative working capital of \$9,407,911 at November 30, 2014.

Net cash used in operating activities aggregated \$591,596 and \$265,005 in fiscal 2015 and 2014, respectively. In fiscal 2015 our operations consumed cash, despite our net income recorded for the year, because net income was the result of gains realized on restructuring of debt of \$3,868,321 and a gain on the settlement of liabilities of \$2,328,876. These non-cash income items were offset by non-cash impairment expenses of \$1,613,690 and an increase in the fair market value of derivative liabilities of \$2,264,449 in fiscal 2015. Similarly, in fiscal 2014, we reported a gain on the change in value of derivative liabilities of \$1,337,886 that was partially offset by the amortization of debt discount of \$1,199,625.

We financed the cash used in operating activities by obtaining net cash provided by financing activities: \$642,727 and \$249,595 in fiscal 2015 and 2014, respectively. The source of cash from financing activities in fiscal 2015 were net proceeds from short-term borrowings of \$768,010. Uses of cash consisted of payments of debt of \$125,283. The source of cash from financing activities in fiscal 2014 were net proceeds from short-term borrowings of \$417,575. Uses of cash consisted of payments of debt of \$167,980.

In fiscal 2015 cash flows used in investing activities amounted to \$43,985, as a result of the purchase of two subsidiaries and an increase in restricted cash. In fiscal 2015 and 2014, there were no expenditures for capital assets.

The accompanying financial statements have been prepared in conformity with generally accepted accounting principles, which contemplate continuation of our company as a going concern. However, we have sustained net losses from operations during the last several years, and we have very limited liquidity. Our operating losses have been funded through the issuance of equity securities and borrowings. Management anticipates that we will be dependent, for the near future, on our ability to obtain additional capital to fund our operating expenses and anticipated growth. The report of our independent registered public accounting firm expresses doubt about our ability to continue as a going concern. Our operating losses have been funded through the issuance of equity securities and borrowings.

Although we have improved our balance sheet with transactions to settle our debt, we continue to have liabilities in excess of our assets. We are working to settle our remaining liabilities and to raise cash to support our operating loss, and we continually consider a variety of possible sources. We are in default of our senior debt and our subordinated debt. In the current economic environment, the procurement of outside funding is extremely difficult and there can be no assurance that such financing will be available, or, if available, that such financing will be at a price that will be acceptable to us. If we are unable to generate sufficient revenues or raise additional capital, our operations will terminate.

New Accounting Standards

The new accounting pronouncements in Note 1 to our consolidated financial statements, which are included in this Report, are incorporated herein by reference thereto.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition or results of operations.

Critical Accounting Policies and Estimates

Use of Estimates

In preparing financial statements in conformity with generally accepted accounting principles, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The most significant estimates relate to the allowance for doubtful accounts receivable, income tax valuation allowance, and the derivative liabilities. On a continual basis, management reviews its estimates, utilizing currently available information, changes in facts and circumstances, historical experience and reasonable assumptions. After such reviews, and if deemed appropriate, those estimates are adjusted accordingly. Actual results could differ from those estimates.

Revenue Recognition

Revenue on product sales is recognized upon delivery or shipment. Customer deposits/layaway sales are not reported as income until final payment is received and the merchandise is delivered. Revenues from voice, data and other applications and services are recognized in the period in which subscribers use the related services. Services billed in advanced, such as line fees, bundled monthly plans or prepaid calling cards, are deferred until they are earned. Services billed in arrears, such as international usage and wholesale usage, are accrued for in the month the usage occurred. Equipment sales are recognized when the equipment is shipped.

Costs of Goods Sold

Costs of goods sold is the cost of the merchandise that was sold to customers. Costs of goods sold are measured on the average cost method. Products are supplies to the hydroponic and gardening industry, including medium (i.e., farming soil), industry-leading hydroponic equipment, power-efficient lighting, plant nutrients, and thousands of additional products used by professional growers and specialty cultivation operations.

Share-based Payments

The Company utilizes the Black-Scholes option pricing model to estimate the fair value of employee stock option awards at the date of grant, which requires the input of highly subjective assumptions, including expected volatility and expected life. Changes in these inputs and assumptions can materially affect the measure of estimated fair value of share-based compensation. These assumptions are subjective and generally require significant analysis and judgment to develop. When estimating fair value, some of the assumptions will be based on, or determined from, external data and other assumptions may be derived from historical experience with stock-based payment arrangements. The appropriate weight to place on historical experience is a matter of judgment, based on relevant facts and circumstances.

The Company estimates volatility by considering the historical stock volatility. The Company has opted to use the simplified method for estimating expected term, which is generally equal to the midpoint between the vesting period and the contractual term.

Derivatives

The Company evaluates and accounts for conversion options embedded in convertible instruments in accordance with ASC 815 “Derivatives and Hedging Activities”.

Accounting standards require companies to bifurcate conversion options from their host instruments and account for them as free standing derivative financial instruments according to certain criteria. The Company accounts for convertible instruments (when we have determined that the embedded conversion options should not be bifurcated from their host instruments) as follows: We record when necessary, discounts to convertible notes for the intrinsic value of conversion options embedded in debt instruments based upon the differences between the fair value of the underlying common stock at the commitment date of the note transaction and the effective conversion price embedded in the note. Debt discounts under these arrangements are amortized over the term of the related debt to their stated date of redemption.

The Company accounts for the conversion of the underlying derivative of a convertible debt instrument as a gain or loss. The decrease in debt that results from a debt conversion is calculated and compared to the then-current fair value of shares issued with any difference recorded as a gain or loss.

Income Taxes

The Company accounts for income taxes under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income and the reversal of deferred tax liabilities during the period in which related temporary differences become deductible. A valuation allowance has been established to eliminate the Company's deferred tax assets as it is more likely than not that any of the deferred tax assets will be realized.

The Company recognizes the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position are measured based on the largest benefit that has a greater than fifty percent likelihood of being realized upon settlement with the tax authorities. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs. The Company records interest related to unrecognized tax benefits in interest expense and penalties in income tax expense. The Company has determined that it had no significant uncertain tax positions requiring recognition or disclosure.

We continually evaluate our accounting policies and the estimates we use to prepare our consolidated financial statements. In general, the estimates are based on historical experience, on information from third party professionals and on various other sources and assumptions that are believed to be reasonable under the facts and circumstances at the time such estimates are made. Management considers an accounting estimate to be critical if:

it requires assumptions to be made that were uncertain at the time the estimate was made; and changes in the estimate, or the use of different estimating methods, could have a material impact on our consolidated results of operations or financial condition.

Actual results could differ from those estimates. Significant accounting policies are described in Note 1 to our consolidated financial statements, which are included in this Report. In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP. There are also areas in which management's judgment in selecting any available alternative would not produce a materially different result.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

We are a smaller reporting company as defined by Rule 12b-2 of the Exchange Act and are not required to provide information under this item.

Item 8. Financial Statements and Supplementary Data.

Our Consolidated Financial Statements required by this Item are included herein, commencing on page F-1.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

Not applicable.

Item 9A. Controls and Procedures.

(a) Evaluation of Disclosure Controls and Procedures

The Company's management, with the participation of the Chief Executive Officer / Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in SEC Rule 13a-15(e)) as of November 30, 2015. That evaluation revealed the three material weaknesses identified below (under *(b) Management's Assessment of Internal Control over Financial Reporting*). Based on that evaluation, the Company's Chief Executive Officer / Chief Financial Officer concluded that, as of November 30, 2015, such controls and procedures were not effective.

(b) Management's Assessment of Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in the Exchange Act Rules 13a-15(f). A system of internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Under the supervision and with the participation of management, including the PEO, the Company's management has evaluated the effectiveness of its internal control over financial reporting as of November 30, 2015 based on the criteria established in a report entitled "Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992)" and the interpretive guidance issued by the Commission in Release No. 34-55929. Based on this evaluation, the Company's management has evaluated and concluded that the Company's internal control over financial reporting was ineffective as of November 30, 2015, and identified the following material weaknesses:

There is a lack of accounting personnel with the requisite knowledge of Generally Accepted Accounting Principles in the US ("GAAP") and the financial reporting requirements of the SEC;

There are insufficient written policies and procedures to insure the correct application of accounting and financial reporting with respect to the current requirements of GAAP and SEC disclosure requirements; and

There is a lack of segregation of duties, in that we only had one person performing all accounting-related duties.

The Company will continue its assessment on a quarterly basis. We plan to hire personnel and resources to address these material weaknesses. We believe these issues can be solved with hiring in-house accounting support and plan to do so as soon as we have funds available for this purpose.

This annual report does not include an attestation report of the Company's independent registered public accounting firm regarding internal control over financial reporting. The Company's registered public accounting firm was not required to issue an attestation on its internal controls over financial reporting pursuant to the rules of the SEC. The Company will continue to evaluate the effectiveness of internal controls and procedures on an on-going basis.

(c) Changes in Internal Control over Financial Reporting

There have been no changes in our internal controls over financial reporting (as such term is defined in Rule 13a-15(f) and 15d-15(f) under the Securities Exchange Act) during the quarter ended November 30, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information.

On March 19, 2015 the Company filed Articles of Amendment to its Certificate of Incorporation. The Amendment designated 800,000 shares of Series H preferred stock from the Company's previously authorized preferred stock with a par value per share of \$0.00001. Shares of Series H Preferred Stock have conversion rights into shares of Common Stock. The number of shares of Common Stock to which a holder of Series H Preferred Stock shall be entitled upon a Conversion shall equal the product obtained by (a) multiplying the number of fully-diluted Common Shares by four (4), then (b) multiplying the result by a fraction, the numerator of which will be the number of shares of Series H Preferred Stock being converted and the denominator of which will be the number of authorized shares of Series H Preferred Stock.

On September 24, 2015, the Company filed an Amendment to its certificate of incorporation to designate 55,000 shares of preferred stock as Series I Preferred Stock (the "Series I Preferred"). Each share of Series I Preferred has a stated value equal to ten dollars (\$10.00) (the "Stated Value"). The relative rights, preferences and limitations of the Series I Preferred Stock shall be as follows:

Each share of Series I Preferred Stock shall entitle the holder thereof, on all matters submitted to a vote of the stockholders of the Company, to that number of votes as shall be equal to the aggregate number of shares of Common Stock into which such holder's shares of Series I Preferred Stock are convertible on the record date for the stockholder action without taking into account potential conversions of any other convertible securities issued by the Company.

The Company's Board of Directors shall not declare a dividend payable to holders of any class of stock other than Series I Preferred Stock until the Company shall have declared and paid dividends to the holders of Series I Preferred Stock equal in aggregate to the Stated Value of the outstanding shares of Series I Preferred Stock.

Upon the liquidation, dissolution and winding up of the Company, the holders of the Series I Preferred Stock shall be entitled to receive in cash out of the net assets of the Company, whether from capital or from earnings available for distribution to its stockholders, before any amount shall be paid to the holders of common stock or to the holders of any other class or series of equity stock, an amount equal to (a) the Stated Value of the outstanding shares of Series I Preferred Stock on the record date for the distribution less (b) the amount of any dividends previously paid to the holders of the Series I Preferred Stock.

The number of shares of Common Stock to which a holder of Series I Preferred Stock shall be entitled upon a conversion shall equal the quotient determined by dividing (x) the Stated Value of the shares of Series I Preferred Stock recited in the conversion notice by (y) the conversion price. The conversion price is one hundred percent (100%) of the average of the five (5) lowest closing bid prices for the Common Stock during the ten (10) consecutive trading days immediately preceding the conversion date or other date of determination, as quoted by Bloomberg, LP

The Company shall not effect any conversions of the Series I Preferred Stock and the holder shall not have the right to convert any shares of Series I Preferred Stock to the extent that after giving effect to such conversion, the holder, together with any affiliate thereof, would beneficially own (as determined in accordance with Section 13(d) of the Securities Exchange Act of 1934 and the rules promulgated thereunder) in excess of 4.99% of the number of shares of Common Stock outstanding immediately after giving effect to such conversion.

One October 14, 2015, the Company filed an Amendment to its certificate of incorporation to designate 51 shares of preferred stock as Series J Preferred Stock (the "Series J Preferred"). Each share of Series J Preferred has a stated value equal to \$0.00001. The relative rights, preferences and limitations of the Series J Preferred Stock shall be as follows:

There are no Liquidation Rights associated with the Series J Preferred Stock. No conversion of the Series J Preferred Stock is permitted.

All shares of the Series J Preferred Stock shall rank (i) senior to the Company's common stock, par value \$0.00001 per share ("Common Stock"), and any other class or series of capital stock of the Company hereafter created, except as otherwise provided in clauses (ii) and (iii) of this Article V, (ii) *pari passu* with any class or series of capital stock of the Company hereafter created and specifically ranking, by its terms, on par with the Series J Preferred Stock and (iii) junior to any class or series of capital stock of the Company hereafter created specifically ranking, by its terms, senior to the Series J Preferred Stock, in each case as to distribution of assets upon liquidation, dissolution or winding up of the Company, whether voluntary or involuntary.

Upon the Company's receipt of notice of a default or an event of default under or pursuant to any document or agreement executed by the Company and TCA Global Credit Master Fund, LP ("TCA"), each one (1) share of the Series J Preferred Stock shall have voting rights equal to (x) 0.019607 *multiplied by* the total issued and outstanding Common Stock and Preferred Stock eligible to vote at the time of the respective vote (the "Numerator"), *divided by* (y) 0.49, *minus* (z) the Numerator. For the avoidance of doubt, if the total issued and outstanding Common Stock eligible to vote at the time of the respective vote is 5,000,000, the voting rights of one share of the Series J Preferred Stock shall be equal to 102,036 (e.g. $((0.019607 \times 5,000,000) / 0.49) - (0.019607 \times 5,000,000) = 102,036$). The issuance of 51 shares of Series J Preferred to TCA gives TCA voting control of the Company if the Company receives a default notice from TCA, under any agreement between the two entities..

So long as any shares of Series J Preferred Stock are outstanding, the Company shall not, without first obtaining the unanimous written consent of the holders of Series J Preferred Stock, alter or change the rights, preferences or privileges of the Series J Preferred so as to affect adversely the holders of Series J Preferred Stock.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

Directors and Executive Officers

The following table and biographical summaries set forth information, including principal occupation and business experience, about the sole director and executive officer of Pervasip.

Name	Age	Position
Paul H. Riss	61	Chief Executive Officer, Chief Financial Officer, Secretary and Chairman

Our Amended and Restated Certificate of Incorporation provides that a director shall hold office until the annual meeting for the year in which his or her term expires except in the case of elections to fill vacancies or newly created directorships. While each director is typically elected for a one-year term, we did not have an annual stockholders meeting for the election of directors in 2015. The Company's officers serve at the discretion of the Company's board of directors, until their death, or until they resign or have been removed from office.

Paul H. Riss has served as a director since 1995; Chairman of our board of directors since March 2005; our Chief Executive Officer since August 1999 and our Chief Financial Officer and Treasurer since November 1996. He has served on the board of four telecom companies and has more than 30 years of entrepreneurial business and management experience including the engineering of his own leveraged buyout in 1987 and the audit of numerous public companies at Ernst & Young. He is a CPA in New York State and earned an MBA with distinction from the Stern School of Business at New York University and a magna cum laude BA with distinction from Carleton College. We believe Mr. Riss's qualifications to serve as a director include his tenure as our Chief Executive Officer and as a member of our Board, and his more than 20 years of service to us with extensive experience in financings, contract negotiations, acquisitions, budgeting, external reporting and accounting.

Board Meetings and Committees; Management Matters

Our amended certificate of incorporation provides that the number of members of our board of directors shall be not less than one and not more than five. Because of the resignation of our three independent directors in 2014, who served on the board without any cash compensation, and the resignation on September 15, 2014 of our Chief Information Officer, who also served as a board member, there is currently one director on the Board. At each annual meeting of stockholders, directors are elected to hold office for a term of one year and until their respective successors are elected and qualified.

Our board of directors took actions by unanimous consent on 4 occasions during the fiscal year ended November 30, 2015. No formal meetings were held. No fees are paid to directors for attendance at meetings or for agreeing to a unanimous consent or the board of directors.

Compensation Committee

We formerly had a compensation committee of two independent board members. Currently, there is no compensation committee.

Nominating Committee

Our board of directors does not have a nominating committee. Our entire board of directors is responsible for this function. Due to the relatively small size of our company and the resulting efficiency of a board of directors that is also limited in size, our board of directors determined that it is not necessary or appropriate at this time to establish a separate nominating committee.

Audit Committee

A written charter approved by our board of directors and attached as Annex A to our 2007 proxy statement, which was filed with the SEC on May 15, 2007, governs the audit committee. All of the members of the audit committee resigned from the board of directors in 2014.

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Exchange Act of 1934, requires our directors and executive officers, and persons who own more than ten percent of a registered class of our equity securities (“10% Shareholders”), to file with the Commission initial reports of ownership and reports of changes in ownership of our common stock and other equity securities. Officers, directors and 10% Shareholders are required by Commission regulation to furnish us with copies of all Section 16(a) forms they file.

Based solely on our review of the copies of such reports received by us, we believe that for the fiscal year ended November 30, 2015, all Section 16(a) filing requirements applicable to our officers, directors and 10% shareholders were complied with.

Code of Ethics

We have adopted a code of business conduct and ethics for our directors, officers and employees, including our chief executive officer and chief financial officer. In addition, we have adopted a supplemental code of ethics for our financial executives and all employees in our accounting department. The text of our codes are posted on our Internet website at www.canalytix.com.

Item 11. Executive Compensation.

Summary Compensation Table

The following table sets forth, for the fiscal years indicated, all compensation awarded to, earned by or paid to Mr. Paul H. Riss, our Chairman, Chief Executive Officer and Chief Financial Officer, and Mr. Mark Richards, our former Chief Information Officer (collectively, the “Named Executives”). We have no other executive officers.

Fiscal 2015 Summary Compensation Table

Name and Principal Position	Year	Salary	Bonus	Option	Change	All	Total
		(\$)	(\$)	Stock Awards	Non-equity Incentive Awards	Other Compensation	(\$)
		(1)	(1)	Awards	Pension	(\$)	(1)

		(2)	(3)	Plan	Value	Compensation	Non-Qualified	Deferred	Comp	Earnings
		(2)	(3)	(\$)	(\$)	(\$)	(\$)	(\$)	(\$)	(\$)
Paul H. Riss, Chairman, Chief Executive Officer and Chief Financial Officer	2015	\$ 175,000	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0	175,000
	2014	131,250	0	0	0	0	0	0	0	\$131,250
	2013	175,000	0	0	0	0	0	0	0	184,190
Mark Richards Chief Information Officer	2015	0	0	0	0	0	0	0	0	0
	2014	135,000	0	0	0	0	0	0	0	135,000
	2013	180,000	0	0	61,330	0	0	0	0	241,330

(1) Amounts in this column include unpaid salary to Mr. Riss and Mr. Richards of \$439,608 and \$77,250, respectively, at November 30, 2015. Actual cash payments for salary for 2015, 2014 and 2013 amounted to \$11,542, \$100 and \$30,000 for Mr. Riss and \$0, \$68,750 and \$169,000 for Mr. Richards. Mr. Richards ended his employment in September 2014.

(2) Amounts in this column reflect the expense recognized for financial reporting purposes for the indicated fiscal year, in accordance with FASB authoritative guidance, with respect to awards of restricted shares of common stock, which may include awards made during earlier years as well as the indicated year.

(3) Amounts in this column reflect the expense recognized for financial reporting purposes for the indicated fiscal year, in accordance with FASB authoritative guidance, with respect to awards of options to purchase common stock, which may include awards made during earlier years as well as the indicated year.

Outstanding Equity Awards at Fiscal Year End

The following table sets forth certain information with respect to stock options outstanding as of November 30, 2015, for each of the named executive officers. The Named Executives did not exercise any options in Fiscal 2015.

Option Awards

Name	Number of Securities Underlying Unexercised Options (#) Exercisable	Number of Securities Underlying Unexercised Options (#) Unexercisable	Equity Incentive Plan Awards (1): Number of Securities Underlying Unexercised Unearned Options (#)	Option Exercise Price	Option Expiration Date
Paul H. Riss	4,000,000	-	-	\$ 0.01	11/21/2016

Stock Option Grants

There were no stock option grants or exercises in fiscal 2015 for Named Executives.

Board of Directors Compensation

We do not currently compensate directors in cash for service on our board of directors. We maintain a Non-Employee Director Stock Option Plan (the "Director Option Plan"). Under the Director Option Plan, each non-employee director is granted a non-statutory option to purchase 1,000 shares of our common stock on the date on which he or she is elected, re-elected or appointed to our board of directors. Options granted pursuant to the Director Option Plan will vest in full on the one-year anniversary of the grant date, provided the non-employee director is still our director at that time. The exercise price granted under the Director Option Plan is 100% of the fair market value per share of the common stock on the date of the grant as reported on the OTC Marketplace.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

As of November 30, 2015 there were 3,652,005,709 shares of our common stock issued and outstanding. Each share of common stock entitles the holder thereof to one vote with respect to each item to be voted on by holders of the shares of common stock. We have 10 shares of Series E Preferred stock outstanding, held by our Chief Executive Officer, as detailed in the chart below. The Series E Preferred stock controls at least 51% of the Company's voting power, because it has voting rights equal to 4 times the value of the total number of shares of common stock issued and outstanding at the time of voting, including votes attributable to other shareholders who hold preferred stock.

The following table sets forth information with respect to the beneficial ownership of shares of our common stock as of November 30, 2015, by:

Each person whom we know beneficially owns more than 5% of any class of equity security;
each of our directors individually;
each of our named executive officers individually; and
all of our current directors and executive officers as a group

Unless otherwise indicated, to our knowledge, all persons listed below have sole voting and investment power with respect to their shares of common stock. Each person listed below disclaims beneficial ownership of their shares, except to the extent of their pecuniary interests therein. Shares of common stock that an individual or group has the right to acquire within 60 days of November 30, 2015, pursuant to the exercise of options or restricted stock are deemed to be outstanding for the purpose of computing the percentage ownership of such person or group, but are not deemed outstanding for the purpose of calculating the percentage owned by any other person listed.

Edgar Filing: PERVASIP CORP - Form 10-K

Name and Address	Number of Shares of Common Stock Beneficially Owned	Percent of Shares of Common Stock Beneficially Owned	Number of Shares of Series D Preferred Stock Beneficially Owned (3)	Percent of Shares of Series D Preferred Stock Beneficially Owned	Number of Shares of Series E, F and G Preferred Stock Beneficially Owned (4)	Percent of Shares of Series E, F and G Preferred Stock Beneficially Owned	Number of Shares of Series H Preferred Stock Beneficially Owned (5)	Percent of Shares of Series H Preferred Stock Beneficially Owned

All directors and executive officers as a group (one individual)	54,882,533	0.49%	48	94.12%	20,000,010	100.00%

(1) Includes 7,422,770 shares of common stock subject to a convertible debenture that is presently exercisable or exercisable within 60 days after November 30, 2015.

(2) Includes 33,850,000 shares of common stock subject to warrants and options that are presently exercisable or exercisable within 60 days after November 30, 2015.

(3) Each one share of Series D Preferred has voting rights equal to 1% of the total number of shares of common stock issued and outstanding at the time of voting.

Each one share of Series E Preferred has voting rights equal to 4 times the value of the total number of shares of common stock issued and outstanding at the time of voting, including votes attributable to other shareholders who hold preferred stock. Mr. Paul Riss owns 10 shares, or 100% of Series E Preferred Stock, which currently gives him more than 51% of the Company's total voting power. The Series F Preferred has voting rights equal to 100 million common shares. The Series G Preferred has voting rights equal to 10 million common shares

(5) 600,000 shares of Series H Preferred Stock are equivalent to 60% of the Company's total voting power.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

Certain Relationships and Related Transactions

At November 30, 2015 and 2014, the total amount due to our chief executive officer, including loans, unpaid salary, interest and expenses amounted to \$1,380,000 and \$1,194,021, respectively.

At November 30, 2015, we owed \$222,918 to a company that is controlled by the entity that owns 10% of our voting control, via ownership of our Series H preferred stock.

At November 30, 2014 the amount of unpaid salary owed to our former chief information officer amounted to \$20,000.

We paid fees to a software consulting firm (“Consultant”) of \$126,500 in fiscal 2014. All such work performed by the Consultant became the property of the Company, and was sold on September 30, 2014, as noted below. Our former chief information officer performed work for the Consultant, including disbursement services, in which funds that were remitted by the Company to a company controlled by the officer were subsequently distributed for the Consultant to appropriate vendors. For services rendered to the Consultant, our chief information officer was paid \$6,000 in fiscal 2014.

On September 30, 2014, a wholly-owned subsidiary of the Company entered into a contract of sale to transfer certain assets and liabilities, including a copy of internally developed mobile content delivery software to Vaxstar LLC (the “Buyer”). The Buyer simultaneously assigned the contract of sale to Valuesetters, Inc. (the “Assignee”). The Buyer agreed to pay the Company 40,000,000 shares of common stock, par value \$0.001, of the Assignee, which are included in Marketable Securities at November 30, 2015 and 2014. Although we had negotiated the details of the transaction with the Buyer before our chief information officer resigned from our Company, our former chief information officer signed the purchase agreement as the Buyer’s chief executive officer. We calculated a gain from the contract of sale amounting to \$779,645, and recorded this gain as an addition to paid-in capital because of the related-party nature of the transaction.

Director Independence

Our common stock is currently quoted on the OTC Pink market and is not listed on the Nasdaq Stock Market or any other national securities exchange. Accordingly, we are not currently subject to the Nasdaq continued listing requirements or the requirements of any other national securities exchange. Nevertheless, in determining whether a director or nominee for director should be considered “independent” the board utilizes the definition of independence set forth in Rule 4200(a)(15) of the Nasdaq Marketplace Rules. Pursuant to that definition, we do not have an independent member of our Board of Directors.

Item 14. Principal Accounting Fees and Services.

Edgar Filing: PERVASIP CORP - Form 10-K

The following table presents fees for professional audit services rendered by the principal independent accountant for Pervasip Corp. Rosenberg Rich Baker Berman & Company for the audit of our annual financial statements for the years ended November 30, 2015 and 2014.

	2015	2014
Audit fees	\$60,000	\$60,000
Audit related fees		
Tax fees		
All other fees		
Total	\$60,000	\$60,000

Policy on Audit Committee Pre-Approval of Audit and Permissible Non-Audit Services of Independent Auditors

Consistent with SEC policies regarding auditor independence, the Audit Committee has responsibility for appointing, setting compensation and overseeing the work of the independent auditor. In recognition of this responsibility, the Audit Committee has established a policy to pre-approve all audit and permissible non-audit services provided by the independent auditor.

Prior to engagement of the independent auditor for the next year's audit, management will submit an aggregate of services expected to be rendered during that year for each of four categories of services to the Audit Committee for approval.

1. **Audit** services include audit work performed in the preparation of financial statements, as well as work that generally only the independent auditor can reasonably be expected to provide, including comfort letters and reviews of our financial statements included in our Quarterly Reports on Form 10-Q.

2. **Audit-Related** services are for assurance and related services that are traditionally performed by the independent auditor, including due diligence related to mergers and acquisitions, employee benefit plan audits, and special procedures required to meet certain regulatory requirements.

3. **Tax** services include all services performed by the independent auditor's tax personnel except those services specifically related to the audit of the financial statements, and includes fees in the areas of tax compliance, tax planning, and tax advice.

4. **Other** services are those associated with services not captured in the other categories. We generally do not request such services from the independent auditor.

Prior to engagement, the Audit Committee pre-approves these services by category of service. The Audit Committee may delegate pre-approval authority to one or more of its members. The member to whom such authority is delegated must report, for informational purposes only, any pre-approval decisions to the Audit Committee at its next scheduled meeting.

With the resignation in 2014 of the members of the Audit Committee, the responsibilities of the Audit Committee described above have been assumed by the Board of Directors.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and

Stockholders of Pervasip Corp. & Subsidiaries

We have audited the accompanying balance sheets of Pervasip Corporation & Subsidiaries as of November 30, 2015 and 2014, and the related statements of income, comprehensive income, stockholders' equity, and cash flows for each of the years in the two-year period ended November 30, 2015. Pervasip Corporation's management is responsible for these financial statements. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Pervasip Corporation & Subsidiaries as of November 30, 2015 and 2014, and the results of its operations and its cash flows for each of the years in the two-year period ended November 30, 2015, in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As more fully discussed in Note 2 to the financial statements, the Company has sustained recurring substantial losses from its continuing operations, and has negative working capital and a significant stockholders' deficit as of November 30, 2015. In addition, the Company is unable to meet its obligations as they become due to

sustain its operations. These conditions raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 2. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

F-6

PERVASIP CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

AS OF AND FOR THE YEARS ENDED NOVEMBER 30, 2015 AND 2014

1. Description of Business and Summary of Accounting Policies

Description of Business

Pervasip Corp. (“Pervasip”, or the “Company”) is engaged in the business of owning and operating a retail hydroponic store in Denver, Colorado, through a wholly owned subsidiary. Until May 31, 2015, it also operated as an application-based Internet company, providing low-cost telephone services, connecting people through cloud-connected devices worldwide.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned and partially owned subsidiaries after elimination of significant intercompany balances and transactions. The operations of a 90% owned subsidiary, Canalytix LLC, is included beginning on March 25, 2015, and the operations of a 60% owned subsidiary, Grow Big Supply, LLC is included beginning on July 6, 2015.

Use of Estimates

In preparing financial statements in conformity with generally accepted accounting principles, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The most significant estimates relate to the derivative liabilities, income tax valuation allowance, and the allowance for doubtful accounts receivable. On a continual basis, management reviews its estimates, utilizing currently available information, changes in facts and circumstances, historical experience and reasonable assumptions. After such reviews, and if deemed appropriate, those estimates are adjusted accordingly. Actual results could differ from those estimates.

Cash and Cash Equivalents

The Company considers all highly liquid investments purchased with original maturities of three months or less to be cash equivalents. The Company did not have any cash equivalents during 2015 and 2014. At November 30, 2015, it had restricted cash of \$60,000, held in an escrow fund to be designated for uses approved by its secured lender.

Advertising Costs

Advertising costs are presented as a part of selling, general and administrative costs. Advertising costs are expensed as incurred and amounted to \$8,256 in fiscal 2015 and \$0 in fiscal 2014.

Marketable securities

The Company classifies investments in equity securities bought and held primarily to be sold in the short term that have readily determinable fair values, as trading securities. Unrealized holding gains and losses for trading securities are included in earnings. Any unrealized holding gains and losses from available-for-sale securities are excluded from earnings and are recorded in comprehensive income until a gain or loss has been realized, unless an impairment in value is determined. The Company recognized an investment impairment loss in fiscal 2015 of \$820,000, for which \$600,000 had previously been recognized in other comprehensive income, and \$220,000 is recorded as a loss in the statement of operations for fiscal 2015.

Collectibility of Accounts Receivable

Trade receivables potentially subject the Company to credit risk. Accounts receivable are stated at the amount the Company expects to collect from balances outstanding at year-end. Based on the Company's assessment of the credit history with customers having outstanding balances and current relationships with them.

At November 30, 2014, all customers were on a prepay basis. Consumers that used the Company's mobile Voice over Internet Protocol ("VoIP") application, were required to prepay for all mobile telephone services via a credit card or an online payment service, such as Paypal. Before September 30, 2014, the Company had wholesale customers, which typically provided a security deposit and paid for their services each month, in arrears.

In order to record the Company's accounts receivable at their net realizable value, the Company must assess their collectibility. A considerable amount of judgment is required in order to make this assessment, including an analysis of historical bad debts and other adjustments, a review of the aging of the Company's receivables, and the current creditworthiness of the Company's customers. Generally, when a customer account reached a certain level of delinquency, the Company discontinues credit sales to the customer and provides an allowance for the related amount receivable from the customer. At November 30, 2015, the Company has recorded an allowance of \$98,739 for receivables that it considered uncollectible, including amounts for the resolution of potential credit and other collection issues, such as disputed invoices and pricing discrepancies. However, depending on how such potential issues are resolved, or if the financial condition of any of the Company's customers was to deteriorate and its ability to make required payments became impaired, increases in these allowances may be required. The Company writes off the accounts receivable balance from a customer and the related allowance established when it believes it has exhausted all reasonable collection efforts.

Revenue Recognition

Revenue on product sales is recognized upon delivery or shipment. Customer deposits/layaway sales are not reported as income until final payment is received and the merchandise is delivered. Revenues from voice, data and other applications and services are recognized in the period in which subscribers use the related services. Services billed in advanced, such as line fees, bundled monthly plans or prepaid calling cards, are deferred until they are earned. Services billed in arrears, such as international usage and wholesale usage, are accrued for in the month the usage occurred. Equipment sales are recognized when the equipment is shipped.

Costs of Goods Sold

Costs of products sold are measured on the average cost method. Products are supplies to the hydroponic and gardening industry, including medium (i.e., farming soil), industry-leading hydroponic equipment, power-efficient lighting, plant nutrients, and thousands of additional products used by professional growers and specialty cultivation operations. Cost of services sold consist primarily of direct costs that we paid to third parties in order to provide telephone services. These costs include access and interconnection charges that we paid to other telephone companies to terminate domestic and international phone calls on the public switched telephone network. These costs do not include indirect costs such as depreciation and amortization, payroll, and facilities costs.

Inventory

Inventory consists primarily of gardening supplies and materials and is recorded at the lower of cost (average cost method) or market. All inventory consists of finished goods.

Property and Equipment

Property and equipment are stated at cost. Depreciation is computed primarily using the straight-line method over the estimated useful lives of the assets, which range from 3 to 5 years. Leasehold improvements are amortized over the shorter of the useful life of the related assets or the lease term. Expenditures for repairs and maintenance are charged to expense as incurred. For assets sold or otherwise disposed of, the cost and related accumulated depreciation are removed from the accounts, and any related gain or loss is reflected in income for the period. All of the Company's property and equipment was acquired on July 6, 2015. At November 30, 2015, it consisted of the following:

Furniture and fixtures	\$2,002
Leasehold improvements	14,503
Computer equipment	9,011
Subtotal	\$25,516
Less accumulated depreciation	(6,699)
Total	\$18,817

Depreciation expense for the year ended November 30, 2015 was \$6,699.

Share-based Payments

The Company utilizes the Black-Scholes option pricing model to estimate the fair value of employee stock option awards at the date of grant, which requires the input of highly subjective assumptions, including expected volatility and expected life. Changes in these inputs and assumptions can materially affect the measure of estimated fair value of share-based compensation. These assumptions are subjective and generally require significant analysis and judgment to develop. When estimating fair value, some of the assumptions will be based on, or determined from, external data and other assumptions may be derived from historical experience with stock-based payment arrangements. The appropriate weight to place on historical experience is a matter of judgment, based on relevant facts and circumstances.

The Company estimates volatility by considering the historical stock volatility. The Company has opted to use the simplified method for estimating expected term, which is generally equal to the midpoint between the vesting period and the contractual term.

Income Taxes

The Company accounts for income taxes under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income and the reversal of deferred tax liabilities during the period in which related temporary differences become deductible. A valuation allowance has been established to eliminate the Company's deferred tax assets as it is more likely than not that any of the deferred tax assets will be realized.

The Company recognizes the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position are measured based on the largest benefit that has a greater than fifty percent likelihood of being realized upon settlement with the tax authorities. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs. The Company records interest related to unrecognized tax benefits in interest expense and penalties in income tax expense. The Company has determined that it had no significant uncertain tax positions requiring recognition or disclosure.

Convertible Instruments

The Company evaluates and accounts for conversion options embedded in convertible instruments in accordance with ASC 815 "Derivatives and Hedging Activities".

Accounting standards require companies to bifurcate conversion options from their host instruments and account for them as free standing derivative financial instruments according to certain criteria. The Company accounts for convertible instruments (when we have determined that the embedded conversion options should not be bifurcated from their host instruments) as follows: We record when necessary, discounts to convertible notes for the intrinsic value of conversion options embedded in debt instruments based upon the differences between the fair value of the underlying common stock at the commitment date of the note transaction and the effective conversion price embedded in the note. Debt discounts under these arrangements are amortized over the term of the related debt to their stated date of redemption.

The Company accounts for the conversion of the underlying derivative of a convertible debt instrument as a gain or loss. The decrease in debt that results from a debt conversion is calculated and compared to the then-current fair value of shares issued with any difference recorded as a gain or loss.

Earnings Per Share

Basic earnings per share is computed by dividing net income by the weighted-average number of shares outstanding. To the extent that stock options and warrants are anti-dilutive, they are excluded from the calculation of diluted earnings per share. Diluted earnings per share includes the dilutive effect of stock options and warrants.

Concentrations

As of November 30, 2015, one customer accounted for 12% of the gross amount of accounts receivable, and such amount was fully reserved. For the year ended November 30, 2015, no one customer accounted for more than 10% of the Company's revenues. Two customers that accounted for 27% and 24% of our revenues in fiscal 2014. These two customers were part of the assets we sold on September 30, 2014.

The Company is dependent on the availability and functionality of three large suppliers, and the loss of any two of these entities as vendors would be disruptive to our operations and ability to sell products.

Comprehensive Income (Loss)

Comprehensive income (loss) is defined as all changes in stockholders' equity (deficit), exclusive of transactions with owners, such as capital investments. Comprehensive income includes net income or loss, changes in certain assets and liabilities that are reported directly in equity such as translation adjustments on investments in foreign subsidiaries and unrealized gains (losses) on available-for-sale securities.

Recent Accounting Pronouncements

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers which modifies how all entities recognize revenue and various other revenue accounting standards for specialized transactions and industries. This update is a comprehensive new revenue recognition model that requires a company to recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In August 2015, the FASB issued ASU 2015-14, which deferred the effective date of the ASU to fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. We are currently evaluating the possible impact of ASU 2014-09, but we do not anticipate that it will have a material impact on the Company's consolidated results of operations, financial position or cash flows.

In August 2014, the Financial Accounting Standards Board (the "FASB") issued Accounting Standards Update ("ASU") ASU No. 2014-15, Presentation of Financial Statements-Going Concern-Disclosures of Uncertainties about an entity's Ability to Continue as a Going Concern. ASU 2014-15 provides new guidance related to management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern by incorporating and expanding upon certain principles that are currently in U.S. auditing standards and to provide related footnote disclosures. This new guidance is effective for the annual period ending after December 15, 2016, and for annual periods and interim periods thereafter. We do not expect the adoption of ASU 2014-15 to have a significant impact on the Company's consolidated results of operations, financial position or cash flows.

In April 2015, the FASB issued ASU 2015-03, "Simplifying the Presentation of Debt Issuance Costs." ASU 2015-03 requires debt issuance costs to be presented in the balance sheet as a direct deduction from the associated debt liability. ASU 2015-03 is effective for interim and annual reporting periods beginning after December 15, 2015. The new guidance will be applied on a retrospective basis and early adoption is permitted. The Company chose early adoption of the new guidance, which resulted in an additional debt discount at November 30, 2015 of \$258,065, due to financing fees.

In November 2015, the FASB issued ASU 2015-17, "Income Taxes (Topic 740) – Balance Sheet Classification of Deferred Taxes." To simplify the presentation of deferred income taxes, the amendments in this Update require that deferred tax liabilities and assets be classified as noncurrent in a classified statement of financial position. The amendments in this Update apply to all entities that present a classified statement of financial position. The current requirement that deferred tax liabilities and assets of a tax-paying component of an entity be offset and presented as a single amount is not affected by the amendments in this Update. For public business entities, the amendments in this Update are effective for financial statements issued for annual periods beginning after December 15, 2016, and interim periods within those annual periods. For all other entities, the amendments in this Update are effective for financial statements issued for annual periods beginning after December 15, 2017, and interim periods within annual periods beginning after December 15, 2018. Earlier application is permitted for all entities as of the beginning of an interim or annual reporting period. The amendments in this Update may be applied either prospectively to all deferred tax liabilities and assets or retrospectively to all periods presented. If an entity applies the guidance prospectively, the entity should disclose in the first interim and first annual period of change, the nature of and reason for the change in accounting principle and a statement that prior periods were not retrospectively adjusted. If an entity applies the guidance retrospectively, the entity should disclose in the first interim and first annual period of change the nature of

and reason for the change in accounting principle and quantitative information about the effects of the accounting change on prior periods. We do not expect the adoption of ASU 2015-17 to have a significant impact on our consolidated results of operations, financial position or cash flows.

In January 2016, the FASB issued ASU 2016-01 – “Financial Instruments – Overall (Subtopic 825-10) – Recognition and Measurement of Financial Assets and Financial Liabilities.” ASU 2016-01, among other changes, requires equity investments (except those accounted for under the equity method of accounting or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income. This Update also simplifies the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment. The amendments in ASU 2016-01 will become effective for public business entities for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. We are currently evaluating the effect of the adoption of ASU 2016-01 will have on our consolidated results of operations, financial position or cash flows.

In February 2016, the FASB issued ASU 2016-02 – “Leases (Topic 842).” Under ASU 2016-02, entities will be required to recognize lease asset and lease liabilities by lessees for those leases classified as operating leases. Among other changes in accounting for leases, a lessee should recognize in the statement of financial position a liability to make lease payments (the lease liability) and a right-of-use asset representing its right to use the underlying asset for the lease term. When measuring assets and liabilities arising from a lease, a lessee (and a lessor) should include payments to be made in optional periods only if the lessee is reasonably certain to exercise an option to extend the lease or not to exercise an option to terminate the lease. Similarly, optional payments to purchase the underlying asset should be included in the measurement of lease assets and lease liabilities only if the lessee is reasonably certain to exercise that purchase option. The amendments in ASU 2016-02 will become effective for fiscal years beginning after December 15, 2018, including interim periods with those fiscal years, for public business entities. We are currently evaluating the effect of the adoption of ASU 2016-02 will have on our consolidated results of operations, financial position or cash flows.

In March 2016, the FASB issued ASC 2016-09 – “Compensation – Stock Compensation (Topic 718) – Improvements to Employee Share-based Payment Accounting.” The areas for simplification in this Update involve several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. In addition to these simplifications, the amendments eliminate the guidance in Topic 718 that was indefinitely deferred shortly after the issuance of FASB Statement No. 123 (revised 2004), Share-Based Payment. The amendments in ASC 2016-09 will become effective for fiscal years beginning after December 15, 2016, and interim periods within those annual periods. Early adoption is permitted for any entity in any interim or annual period. If an entity early adopts the amendments in an interim period, any adjustments should be reflected as of the beginning of the fiscal year that includes that interim period. An entity that elects early adoption must adopt all of the amendments in the same period. We are currently evaluating the effect of the adoption of ASU 2016-09 will have on our consolidated results of operations, financial position or cash flows.

In August 2016, the FASB issued ASU 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipt and Cash Payments. The new guidance addresses certain classification issues related to the statement of cash flows which will eliminate the diversity of practice in how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The guidance is effective for fiscal years beginning after December 2017. Early adoption is permitted. We are currently evaluating the possible impact of ASU 2016-15, but do not anticipate that it will have a material impact on the Company's consolidated results of operations, financial position or cash flows.

In October 2016, the FASB issued ASU 2016-17, Consolidation (Topic 810): Interests Held through Related Parties That Are under Common Control. The new guidance amends the consolidation guidance on how a reporting entity that is the single decision maker of a VIE should treat indirect interests in the entity held through related parties that are under common control with the reporting entity when determining whether it is the primary beneficiary of that VIE. The guidance is effective for fiscal years beginning after December 2016. Early adoption is permitted. We are currently evaluating the possible impact of ASU 2016-17, but do not anticipate that it will have a material impact on the Company's consolidated results of operations, financial position or cash flows.

2. Going Concern Matters and Realization of Assets

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the ordinary course of business. However, the Company has sustained recurring substantial losses from its continuing operations and as of November 30, 2015 has negative working capital of \$8,771,742 and a stockholders' deficit of \$9,103,249. In addition, the Company is unable to meet its obligations as they become due and sustain its operations. The Company believes that its existing cash resources are not sufficient to fund its continuing operating losses, capital expenditures, lease and debt payments and working capital requirements.

The Company may not be able to raise sufficient additional debt, equity or other cash on acceptable terms, if at all. Failure to generate sufficient revenues, achieve certain other business plan objectives or raise additional funds could have a material adverse effect on the Company's results of operations, cash flows and financial position, including its ability to continue as a going concern, and may require it to significantly reduce, reorganize, discontinue or shut down its operations.

In view of the matters described above, recoverability of a major portion of the recorded asset amounts shown in the accompanying balance sheet is dependent upon continued operations of the Company which, in turn, is dependent upon the Company's ability to meet its financing requirements on a continuing basis, and to succeed in its future operations. The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or amounts and classification of liabilities that might be necessary should the Company be unable to continue in its existence. Management's plans include efforts to preserve current revenue sources, develop new revenue sources and negotiate further debt reductions with creditors.

There can be no assurance that the Company will be able to achieve its business plan objectives or be able to achieve or maintain cash-flow-positive operating results. If the Company is unable to generate adequate funds from operations or raise sufficient additional funds, the Company may not be able to repay its existing debt, continue to operate its network, respond to competitive pressures or fund its operations. As a result, the Company may be required to significantly reduce, reorganize, discontinue or shut down its operations. The financial statements do not include any adjustments that might result from this uncertainty. Management plans to resolve the Company's working capital deficit by increasing revenue, reducing debt and exploring new financing options.

3. Accounts Payable and Accrued Expenses

	2015	2014
Trade payables	\$941,923	\$611,799
Payable from sale of subsidiaries	—	796,499
Other, individually less than 5% of current liabilities	680,726	514,450
	\$1,622,649	\$1,922,748

When the Company sold certain subsidiaries in December 2006, the Company agreed to reimburse the purchaser for certain disputed claims on the books of the subsidiaries if the sold subsidiaries were required to pay such claims. At November 30, 2015 and 2014, the Company recorded a payable of \$0 and \$796,499, respectively, in conjunction with the sale of the subsidiaries. The former subsidiaries filed for bankruptcy, and on September 25, 2015, the Trustee's Final Account for the bankruptcy case noted that no payments were made to the vendor in question. Consequently, the Company removed the liability in its fourth fiscal quarter and recorded other income of \$796,499.

4. Debt

The following table summarizes components of debt as of November 30, 2015 and 2014:

	2015	2014
Debt due to Laurus	\$—	\$2,266,186
Senior secured convertible redeemable debenture due to TCA	600,000	—
Convertible subordinated debt	2,687,461	1,935,190
Convertible debt due to various lenders	320,750	448,520
Other short-term debt due to various lenders	224,448	170,496
Total debt	3,832,659	4,820,392
Less: current portion of long-term debt	(2,932,018)	(4,631,122)
Less: discount on debt	(491,027)	(189,270)
Total long-term debt, net of discounts	\$409,614	\$—

At November 30, 2015, future payments under long-term debt obligations over each of the next five years and thereafter were as follows:

Edgar Filing: PERVASIP CORP - Form 10-K

Twelve months ended November 30:

2016	\$3,423,045
2017	—
2018	—
2019	—
2020	409,614
