UNIVERSAL CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. BASIS OF PRESENTATION

Universal Corporation, with its subsidiaries (“Universal” or the “Company”), is the leading global leaf tobacco merchant and processor. Because of the seasonal nature of the Company’s business, the results of operations for any fiscal quarter will not necessarily be indicative of results to be expected for other quarters or a full fiscal year. All adjustments necessary to state fairly the results for the period have been included and were of a normal recurring nature. Certain amounts in prior year statements have been reclassified to conform to the current year presentation. This Form 10-Q should be read in conjunction with the financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the fiscal year ended March 31, 2013.

NOTE 2. ACCOUNTING PRONOUNCEMENTS

Effective April 1, 2013, Universal adopted Financial Accounting Standards Board Accounting Standards Update 2013-02, “Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income.” The new guidance required companies to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income unless the amounts are not reclassified in their entirety to net income. For amounts that are not reclassified in their entirety to net income in the same reporting period, entities are required to cross-reference other disclosures that provide additional detail about those amounts. Since the new guidance requires additional disclosures only, it did not have any impact on the Company's results of operations, cash flows, or financial position.

NOTE 3. GUARANTEES, OTHER CONTINGENT LIABILITIES, AND OTHER MATTERS

Guarantees and Other Contingent Liabilities

Guarantees of Bank Loans and Other Contingent Liabilities

Guarantees of bank loans to tobacco growers for crop financing and construction of curing barns or other tobacco producing assets have long been industry practice in Brazil and support the farmers’ production of tobacco there. More recently, similar arrangements were established in Malawi in connection with a shift from auction market sourcing to direct procurement in that country. At September 30, 2013, the Company’s total exposure under guarantees issued by its operating subsidiaries for banking facilities of farmers in Brazil and Malawi was approximately \$42 million (\$46 million face amount including unpaid accrued interest less \$4 million recorded for the fair value of the guarantees). All of the outstanding guarantees expire within one year. The subsidiaries withhold payments due to the farmers on delivery of tobacco and forward those payments to the third-party banks. Failure of farmers to deliver sufficient quantities of tobacco to the subsidiaries to cover their obligations to the third-party banks could result in a liability for the subsidiaries under the related guarantees; however, in that case, the subsidiaries would have recourse against the farmers. The maximum potential amount of future payments that the Company’s subsidiaries could be required to make at September 30, 2013, was the face amount, \$46 million including unpaid accrued interest (\$16 million at September 30, 2012, and \$20 million at March 31, 2013). The fair value of the guarantees was a liability of approximately \$4 million at September 30, 2013 (\$2 million at September 30, 2012, and \$4 million at March 31, 2013). In addition to these guarantees, the Company has other contingent liabilities totaling approximately \$3 million at September 30, 2013.

European Commission Fines in Italy

In 2002, the Company reported that it was aware that the European Commission (the "Commission") was investigating certain aspects of the leaf tobacco markets in Italy. One of the Company's subsidiaries, Deltafina, S.p.A. ("Deltafina"), buys and processes tobacco in Italy. The Company reported that it did not believe that the Commission investigation in Italy would result in penalties being assessed against it or its subsidiaries that would be material to the Company's earnings. The reason the Company held this belief was that it had received conditional immunity from the Commission because Deltafina had voluntarily informed the Commission of the activities that were the basis of the investigation.

On December 28, 2004, the Company received a preliminary indication that the Commission intended to revoke Deltafina's immunity for disclosing in April 2002 that it had applied for immunity. Neither the Commission's Leniency Notice of February 19, 2002, nor Deltafina's letter of provisional immunity, contains a specific requirement of confidentiality. The potential for such disclosure was discussed with the Commission in March 2002, and the Commission never told Deltafina that disclosure would affect Deltafina's immunity. On November 15, 2005, the Company received notification from the Commission that the Commission had imposed fines totaling €30 million on Deltafina and the Company jointly for infringing European Union antitrust law in connection with the purchase and processing of tobacco in the Italian raw tobacco market. In January 2006, the Company and Deltafina each

filed appeals in the General Court of the European Union ("General Court"). Deltafina's appeal was held on September 28, 2010. For strategic reasons related to the defense of the Deltafina appeal, Universal withdrew its appeal. On September 9, 2011, the General Court issued its decision, in which it rejected Deltafina's application to reinstate immunity. Deltafina appealed the decision of the General Court to the European Court of Justice, and a hearing was held in November 2012. Effective with the September 9, 2011 General Court decision, the Company recorded a charge for the full amount of the fine (€30 million) plus accumulated interest (€5.9 million). The charge totaled \$49.1 million at the exchange rate in effect on the date of the General Court decision. Deltafina maintains a bank guarantee in favor of the Commission in the amount of the fine plus accumulated interest in order to stay execution during the appeals process, and the Company has collateralized that guarantee with a bank deposit totaling \$52 million at September 30, 2013. At September 30, 2013, the accrued liability for the fine and interest was reported in other current liabilities, and the deposit was recorded in other current assets. The Company expects the appeal to be decided during fiscal year 2014. Any fine and interest Deltafina may ultimately be required to pay would not be due until the European Court of Justice issues its decision.

Other Legal and Tax Matters

In addition to the above-mentioned matter, various subsidiaries of the Company are involved in other litigation and tax examinations incidental to their business activities. While the outcome of these matters cannot be predicted with certainty, management is vigorously defending the matters and does not currently expect that any of them will have a material adverse effect on the Company's business or financial position. However, should one or more of these matters be resolved in a manner adverse to management's current expectation, the effect on the Company's results of operations for a particular fiscal reporting period could be material.

Favorable Outcome of IPI Tax Credit Case in Brazil

During the quarter ended June 30, 2013, a longstanding lawsuit related to IPI tax credits filed by the Company's operating subsidiary in Brazil was concluded in the subsidiary's favor with a decision by the Brazilian Superior Court of Justice on the final appeal filed by the Brazilian federal government. Although additional appeals by the government were expected in the case, the time period to file those appeals expired before the end of the quarter, and the decision and overall outcome of the case have been confirmed.

IPI tax credits were established under Brazilian tax laws to allow recovery of a portion of the excise taxes paid on manufactured products when those products are sold in export markets. In prior years, the subsidiary paid excise taxes on the component cost of unprocessed tobacco purchased from growers, as well as the cost of electricity, packing materials, and other inputs used in its manufacturing process. Under the law, the subsidiary believed it was entitled to use IPI tax credits to recover excise taxes on the processed tobacco it exported. However, specific regulations issued by the Brazilian tax authorities did not permit the subsidiary to claim those credits. The suit filed by the subsidiary challenged the denial of the tax credits based on the law. Several decisions in lower courts were decided in the subsidiary's favor for a portion of the tax credits claimed in the suit, but those decisions were appealed on various grounds by both the government and the subsidiary. The expiration of the latest appeal period ended the matter in the courts.

The final court decision entitles the subsidiary to approximately \$104 million of IPI tax credits (based on the exchange rate at September 30, 2013), which it can use to offset future payments of other Brazilian federal taxes for a period of up to five years. This amount includes the tax credits generated over the period granted by the courts, as well as interest calculated from the date those credits should have been available to the subsidiary. As noted, the ability to use the tax credits to offset other Brazilian federal tax payments expires in five years, and utilization of the credits is also subject to audit by the tax authorities. Based on current estimates of the tax credits that are probable of being realized, the subsidiary has recorded an allowance, reducing the net book value of the credits to approximately \$90 million. After deducting related legal fees and Brazilian social contribution taxes assessed on the interest portion of the total

IPI tax credits received, the subsidiary recorded a net gain of \$81.6 million (\$53.1 million after tax, or \$1.96 per diluted share) during the quarter ended June 30, 2013, as a result of the favorable outcome of the case. The gain is reported in Other Income in the consolidated statement of income. Management of the Company and the subsidiary regularly review the estimates and assumptions used in determining the total amount of the tax credits likely to be realized and, accordingly, it is reasonably possible that the valuation allowance could be adjusted in future reporting periods.

Advances to Suppliers

In many sourcing origins where the Company operates, it provides agronomy services and seasonal advances of seed, fertilizer, and other supplies to tobacco farmers for crop production, or makes seasonal cash advances to farmers for the procurement of those inputs. These advances are short term, are repaid upon delivery of tobacco to the Company, and are reported in advances to suppliers in the consolidated balance sheets. In several origins, the Company has made long-term advances to tobacco farmers to finance curing barns and other farm infrastructure. In some years, due to low crop yields and other factors, individual farmers

may not deliver sufficient volumes of tobacco to fully repay their seasonal advances, and the Company may extend repayment of those advances into the following crop year. The long-term portion of advances is included in other noncurrent assets in the consolidated balance sheets. Both the current and the long-term portions of advances to suppliers are reported net of allowances recorded when the Company determines that amounts outstanding are not likely to be collected. Short-term and long-term advances to suppliers totaled \$110 million at September 30, 2013, \$152 million at September 30, 2012, and \$199 million at March 31, 2013. The related valuation allowances totaled \$42 million at September 30, 2013, \$63 million at September 30, 2012, and \$54 million at March 31, 2013, and were estimated based on the Company's historical loss information and crop projections. The allowances were increased by provisions for estimated uncollectible amounts of approximately \$4 million in each of the six-month periods ended September 30, 2013 and 2012, respectively. These provisions are included in selling, general, and administrative expenses in the consolidated statements of income. Interest on advances is recognized in earnings upon the farmers' delivery of tobacco in payment of principal and interest. Accrual of interest is discontinued when an advance is not expected to be fully collected.

Recoverable Value-Added Tax Credits

In many foreign countries, the Company's local operating subsidiaries pay significant amounts of value-added tax ("VAT") on purchases of unprocessed and processed tobacco, crop inputs, packing materials, and various other goods and services. In some countries, VAT is a national tax, and in other countries it is assessed at the state level. Items subject to VAT vary from jurisdiction to jurisdiction, as do the rates at which the tax is assessed. When tobacco is sold to customers in the country of origin, the operating subsidiaries generally collect VAT on those sales. The subsidiaries are normally permitted to offset their VAT payments against the collections and remit only the incremental VAT collections to the tax authorities. When tobacco is sold for export, VAT is normally not assessed. In countries where tobacco sales are predominately for export markets, VAT collections generated on downstream sales are often not sufficient to fully offset the subsidiaries' VAT payments. In those situations, unused VAT credits can accumulate. Some jurisdictions have procedures that allow companies to apply for refunds of unused VAT credits from the tax authorities, but the refund process often takes an extended period of time and it is not uncommon for refund applications to be challenged or rejected in part on technical grounds. Other jurisdictions may permit companies to sell or transfer unused VAT credits to third parties in private transactions, although approval for such transactions must normally be obtained from the tax authorities, limits on the amounts that can be transferred are usually imposed, and the proceeds realized may be heavily discounted from the face value of the credits. Due to these factors, local operating subsidiaries in some countries can accumulate significant balances of VAT credits over time. The Company reviews these balances on a regular basis and records valuation allowances on the credits to reflect amounts that are not expected to be recovered, as well as discounts anticipated on credits that are expected to be sold or transferred. At September 30, 2013, the aggregate balance of recoverable tax credits held by the Company's subsidiaries totaled approximately \$70 million (\$81 million at September 30, 2012, and \$73 million at March 31, 2013), and the related valuation allowances totaled approximately \$27 million (\$26 million at September 30, 2012, and \$26 million at March 31, 2013). The net balances are reported in other current assets and other noncurrent assets in the consolidated balance sheets.

In June 2011, tax authorities in Brazil completed an audit of inter-state VAT filings by the Company's operating subsidiary there and issued assessments for tax, penalties, and interest for tax periods from 2006 through 2009 totaling approximately \$21 million based on the exchange rate for the Brazilian currency at September 30, 2013. Management of the operating subsidiary and outside counsel believe that errors were made by the tax authorities in determining portions of the assessment and that various defenses support the subsidiary's positions. Accordingly, the subsidiary took steps to contest the full amount of the assessment. As of September 30, 2013, a portion of the subsidiary's arguments had been accepted, and the outstanding assessments had been reduced to approximately \$16 million (at the September 30, 2013 exchange rate). The subsidiary is continuing to contest the full remaining amount of the assessment. While the range of reasonably possible loss is zero up to the full \$16 million remaining assessment, based on the strength of the subsidiary's defenses, no loss within that range is considered probable at this time and no

liability has been recorded at September 30, 2013.

NOTE 4. RESTRUCTURING COSTS

Universal continually reviews its business for opportunities to realize efficiencies, reduce costs, and realign its operations in response to business changes. In July 2013, the Company's subsidiary in Brazil announced plans to close a factory and centralize all tobacco processing activities in its primary facility. In connection with this initiative, the Company recorded restructuring costs totaling \$0.8 million during the quarter ended September 30, 2013, which included employee termination costs, as well as costs to relocate personnel and equipment to the main facility. In addition, during the quarter ended September 30, 2013, the Company recorded \$0.5 million of restructuring costs associated with other actions taken in various areas of its worldwide operations. The Company anticipates that all of the restructuring costs will be paid before the end of the current fiscal year. During the first six months of fiscal year 2013, the Company recorded restructuring costs totaling \$3.7 million, primarily related to workforce reductions in one of the Company's operations in Africa. Substantially all of the restructuring costs incurred in both fiscal years 2014 and 2013 relate to operations that are part of the Other Regions reportable segment of the Company's flue-cured and burley leaf tobacco operations.

NOTE 5. EARNINGS PER SHARE

The following table sets forth the computation of basic and diluted earnings per share:

(in thousands, except per share data)	Three Months Ended September 30,		Six Months Ended September 30,

Numerator for basic earnings per share				
Net income attributable to Universal Corporation	\$25,444	\$47,981	\$83,753	\$71,106
Less: Dividends on convertible perpetual preferred stock	(3,713)	(3,713)	(7,425)	(7,425)
Earnings available to Universal Corporation common shareholders for calculation of basic earnings per share	21,731	44,268	76,328	63,681
Denominator for basic earnings per share				
Weighted average shares outstanding	23,207	23,379	23,262	23,338
Basic earnings per share	\$0.94	\$1.89	\$3.28	\$2.73
Diluted Earnings Per Share				
Numerator for diluted earnings per share				
Earnings available to Universal Corporation common shareholders	\$21,731	\$44,268	\$76,328	\$63,681
Add: Dividends on convertible perpetual preferred stock (if conversion assumed)	3,713	3,713	7,425	7,425
Earnings available to Universal Corporation common shareholders for calculation of diluted earnings per share	25,444	47,981	83,753	71,106
Denominator for diluted earnings per share				
Weighted average shares outstanding	23,207	23,379	23,262	23,338
Effect of dilutive securities (if conversion or exercise assumed)				
Convertible perpetual preferred stock	4,818	4,794	4,815	4,791
Employee share-based awards	311	328	324	317
Denominator for diluted earnings per share	28,336	28,501	28,401	28,446
Diluted earnings per share	\$0.90	\$1.68	\$2.95	\$2.50

For the six months ended September 30, 2013 and 2012, the Company had the following potentially dilutive securities (stock appreciation rights and/or stock options) outstanding that were not included in the computation of diluted earnings per share because their effect would have been antidilutive:

	Six Months Ended September 30,	
	2013	2012
Potentially dilutive securities (shares in thousands)	169	318
Weighted-average exercise price	\$62.66	\$57.61

NOTE 6. INCOME TAXES

The Company is subject to the tax laws of many jurisdictions. Changes in tax laws or the interpretation of tax laws can affect the Company's earnings, as can the resolution of pending and contested tax issues. The consolidated income tax rate is affected by a number of factors, including the mix of domestic and foreign earnings and investments, local tax rates of subsidiaries, repatriation of foreign earnings, the effect of exchange rate changes on deferred taxes, and the Company's ability to utilize foreign tax credits.

The consolidated effective income tax rate on pretax earnings was approximately 29% and 28% for the quarters ended September 30, 2013 and 2012, respectively, and approximately 33% and 30% for the six months ended September 30, 2013 and 2012, respectively. The effective rate for each of the reporting periods was lower than the 35% U.S. federal statutory rate primarily due to the effect of changes in exchange rates on deferred income tax assets and liabilities of foreign subsidiaries and a lower net effective tax rate on dividend income from unconsolidated operations.

NOTE 7. DERIVATIVES AND HEDGING ACTIVITIES

Universal is exposed to various risks in its worldwide operations and uses derivative financial instruments to manage two specific types of risks – interest rate risk and foreign currency exchange rate risk. Interest rate risk is managed by entering into interest rate swap agreements, and foreign currency exchange rate risk is managed by entering into forward foreign currency exchange contracts. However, the Company's policy also permits other types of derivative instruments. In addition, foreign currency exchange rate risk is also managed through strategies that do not involve derivative instruments, such as using local borrowings and other approaches to minimize net monetary positions in non-functional currencies. The disclosures below provide additional information about the Company's hedging strategies, the derivative instruments used, and the effects of these activities on the consolidated statements of income and the consolidated balance sheets. In the consolidated statements of cash flows, the cash flows associated with all of these activities are reported in net cash provided by operating activities.

Hedging Strategy for Interest Rate Risk

The Company has receive-floating/pay-fixed interest rate swap agreements that were designated and qualify as hedges of the exposure to changes in interest payment cash flows created by fluctuations in variable interest rates on its outstanding amortizing bank term loan. Although no significant ineffectiveness is expected with this hedging strategy, the effectiveness of the interest rate swaps is evaluated on a quarterly basis. The aggregate notional amount of the interest rate swaps is being reduced over a five-year period as payments are made on the loan. At September 30, 2013, the total notional amount of the swaps was approximately \$88 million, which corresponded with the outstanding balance of the loan.

Cash Flow Hedging Strategy for Foreign Currency Exchange Rate Risk Related to Forecast Purchases of Tobacco and Related Processing Costs

The majority of the tobacco production in most countries outside the United States where Universal operates is sold in export markets at prices denominated in U.S. dollars. However, purchases of tobacco from farmers and most processing costs (such as labor and energy) in those countries are usually denominated in the local currency. Changes in exchange rates between the U.S. dollar and the local currencies where tobacco is grown and processed affect the ultimate U.S. dollar cost of the processed tobacco. From time to time, the Company enters into forward contracts to sell U.S. dollars and buy the local currency at future dates that coincide with the expected timing of a portion of the tobacco purchases and processing costs. This strategy offsets the variability of future U.S. dollar cash flows for tobacco purchases and processing costs for the foreign currency notional amount hedged. This hedging strategy has been used mainly for tobacco purchases and processing costs in Brazil.

Edgar Filing: UNIVERSAL CORP /VA/ - Form 10-Q

The aggregate U.S. dollar notional amount of forward contracts entered for these purposes during the first six months of fiscal years 2014 and 2013, was as follows:

(in millions of dollars)	Six Months Ended September 30,	
	2013	2012
Tobacco purchases	\$82.8	\$64.3
Processing costs	18.5	13.7
Total	\$101.3	\$78.0

All contracts related to tobacco purchases were designated and qualify as hedges of the future cash flows associated with the forecast purchases of tobacco. As a result, except for amounts related to any ineffective portion of the hedging strategy, changes in fair values of the forward contracts have been recognized in comprehensive income as they occurred, but only recognized in earnings upon sale of the related tobacco to third-party customers. Forward contracts related to processing costs have not been designated as hedges, and gains and losses on those contracts have been recognized in earnings on a mark-to-market basis.

Purchases of the 2013 crop were completed in August 2013, and all forward contracts to hedge those purchases matured and settled by that time. For substantially all hedge gains and losses recorded in accumulated other comprehensive loss at September 30, 2013, the Company expects to complete the sale of the tobacco and recognize the amounts in earnings during fiscal year 2014.

Hedging Strategy for Foreign Currency Exchange Rate Risk Related to Net Local Currency Monetary Assets and Liabilities of Foreign Subsidiaries

Most of the Company's foreign subsidiaries transact the majority of their sales in U.S. dollars and finance the majority of their operating requirements with U.S. dollar borrowings, and therefore use the U.S. dollar as their functional currency. These subsidiaries normally have certain monetary assets and liabilities on their balance sheets that are denominated in the local currency. Those assets and liabilities can include cash and cash equivalents, accounts receivable and accounts payable, advances to farmers and suppliers, deferred income tax assets and liabilities, recoverable value-added taxes, and other items. Net monetary assets and liabilities denominated in the local currency are remeasured into U.S. dollars each reporting period, generating gains and losses that the Company records in earnings as a component of selling, general, and administrative expenses. The level of net monetary assets or liabilities denominated in the local currency normally fluctuates throughout the year based on the operating cycle, but it is most common for monetary assets to exceed monetary liabilities, sometimes by a significant amount. When this situation exists and the local currency weakens against the U.S. dollar, remeasurement losses are generated. Conversely, remeasurement gains are generated on a net monetary asset position when the local currency strengthens against the U.S. dollar. To further mitigate currency remeasurement exposure, the Company's foreign subsidiaries may utilize short-term local currency financing during certain periods. This strategy, while not involving the use of derivative instruments, is intended to minimize the subsidiary's net monetary position by financing a portion of the local currency monetary assets with local currency monetary liabilities, thus hedging a portion of the overall position. To manage a portion of its exposure to currency remeasurement gains and losses in Brazil during fiscal year 2014, the Company entered into forward contracts to sell the Brazilian currency and buy U.S. dollars at future dates coinciding with expected changes in the overall net local currency monetary asset position of the subsidiary. Gains and losses on the forward contracts were recorded in earnings as a component of selling, general, and administrative expenses as they occurred, and thus directly offset the related remeasurement losses or gains in the consolidated statements of income for the notional amount hedged. Accordingly, the Company did not designate these contracts as hedges for accounting purposes. The notional amount of the contracts totaled approximately \$50 million in U.S. dollars (based on the exchange rate at September 30, 2013). No forward contracts were entered for this purpose in fiscal year 2013.

Several of the Company's foreign subsidiaries transact the majority of their sales and finance the majority of their operating requirements in their local currency, and therefore use their respective local currencies as the functional currency for reporting purposes. From time to time, these subsidiaries sell tobacco to customers in transactions that are not denominated in the functional currency. In those situations, the subsidiaries routinely enter into forward exchange contracts to offset currency risk for the period of time that a fixed-price order and the related trade account receivable are outstanding with the customer. The contracts are not designated as hedges for accounting purposes.

Effect of Derivative Financial Instruments on the Consolidated Statements of Income

The table below outlines the effects of the Company's use of derivative financial instruments on the consolidated statements of income for the three- and six-month periods ended September 30, 2013 and 2012:

(in thousands of dollars)	Three Months Ended September 30,		Six Months Ended September 30,	
	2013	2012	2013	2012
Cash Flow Hedges - Interest Rate Swap Agreements				
Derivative				
Effective Portion of Hedge				
Gain (loss) recorded in accumulated other comprehensive loss	\$(482)\$ (564)\$ (172)\$ (1,453
Gain (loss) reclassified from accumulated other comprehensive loss into earnings	\$(454)\$ (226)\$ (681)\$ (455
Location of gain (loss) reclassified from accumulated other comprehensive loss into earnings	Interest expense			
Ineffective Portion of Hedge				
Gain (loss) recognized in earnings	\$—	\$—	\$—	\$—
Location of gain (loss) recognized in earnings	Selling, general and administrative expenses			
Hedged Item				
Description of hedged item	Floating rate interest payments on term loan			
Cash Flow Hedges - Forward Foreign Currency Exchange Contracts				
Derivative				
Effective Portion of Hedge				
Gain (loss) recorded in accumulated other comprehensive loss	\$(20)\$ 29)\$ (3,352)\$ (7,900
Gain (loss) reclassified from accumulated other comprehensive loss into earnings	\$(2,362)\$ (5,157)\$ (2,437)\$ (5,744
Location of gain (loss) reclassified from accumulated other comprehensive loss into earnings	Cost of goods sold			
Ineffective Portion and Early De-designation of Hedges				
Gain (loss) recognized in earnings	\$(71)\$ 92)\$ (1,839)\$ (1,325
Location of gain (loss) recognized in earnings	Selling, general and administrative expenses			
Hedged Item				
Description of hedged item	Forecast purchases of tobacco in Brazil			
Derivatives Not Designated as Hedges - Forward Foreign Currency Exchange Contracts				
Gain (loss) recognized in earnings	\$(4,282)\$ 310)\$ (5,705)\$ (1,959
Location of gain (loss) recognized in earnings	Selling, general and administrative expenses			

For the forward foreign currency exchange contracts designated as cash flow hedges of tobacco purchases in Brazil, a net hedge loss of approximately \$1.7 million remained in accumulated other comprehensive loss at September 30, 2013. That balance reflects net losses on settled contracts related to the 2013 crop, less the amount reclassified to earnings related to tobacco sold through September 30, 2013. The majority of the balance in the accumulated other

comprehensive loss will be recognized in earnings as a component of cost of goods sold in fiscal year 2014, as the remaining 2013 Brazilian crop tobacco is sold to customers. Based on the hedging strategy, as the gain or loss is recognized in earnings, it is expected to be offset by a change in the direct cost for the tobacco or by a change in sales prices if the strategy has been mandated by the customer. Generally, margins on the sale of the tobacco will not be significantly affected.

Effect of Derivative Financial Instruments on the Consolidated Balance Sheets

The table below outlines the effects of the Company's derivative financial instruments on the consolidated balance sheets at September 30, 2013 and 2012, and March 31, 2013:

(in thousands of dollars)	Derivatives in a Fair Value Asset Position			Derivatives in a Fair Value Liability Position				
	Balance Sheet Location	Fair Value as of Sept. 30, 2013	Fair Value as of Sept. 30, 2012	Fair Value as of March 31, 2013	Balance Sheet Location	Fair Value as of Sept. 30, 2013	Fair Value as of Sept. 30, 2012	Fair Value as of March 31, 2013
Derivatives Designated as Hedging Instruments								
Interest rate swap agreements designated as cash flow hedges	Other non-current assets	\$—	\$—	\$—	Other long-term liabilities	\$1,170	\$2,117	\$1,679
Forward foreign currency exchange contracts	Other current assets	—	—	—	Accounts payable and accrued expenses	—	—	810
Total		\$—	\$—	\$—		\$1,170	\$2,117	\$2,489
Derivatives Not Designated as Hedging Instruments								
Forward foreign currency exchange contracts	Other current assets	\$8	\$230	\$—	Accounts payable and accrued expenses	\$4,511	\$43	\$331
Total		\$8	\$230	\$—		\$4,511	\$43	\$331

Substantially all of the Company's forward foreign exchange contracts are subject to master netting arrangements, whereby the right to offset occurs in the event of default by a participating party. The Company has elected to present these contracts on a gross basis in the consolidated balance sheets.

NOTE 8. FAIR VALUE MEASUREMENTS

Universal measures certain financial and nonfinancial assets and liabilities at fair value based on applicable accounting guidance. The financial assets and liabilities measured at fair value include money market funds, trading securities associated with deferred compensation plans, interest rate swap agreements, forward foreign currency exchange contracts, and guarantees of bank loans to tobacco growers. The application of the fair value guidance to nonfinancial assets and liabilities primarily includes assessments of goodwill and long-lived assets for potential impairment.

Under the accounting guidance, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The framework for measuring fair value is based on a fair value hierarchy that distinguishes between observable inputs (i.e., inputs that

are based on market data obtained from independent sources) and unobservable inputs (i.e., inputs that require the Company to make its own assumptions about market participant assumptions because little or no market data exists). There are three levels within the fair value hierarchy:

Level Description

- 1 quoted prices in active markets for identical assets or liabilities that the Company has the ability to access as of the reporting date;
- 2 quoted prices in active markets for similar assets or liabilities, or quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs other than quoted prices that are observable for the asset or liability; and
- 3 unobservable inputs for the asset or liability.

14

In measuring the fair value of liabilities, the Company considers the risk of non-performance in determining fair value.

At September 30, 2013 and 2012, and at March 31, 2013, the Company had certain financial assets and financial liabilities that were required to be measured and reported at fair value on a recurring basis. These assets and liabilities are listed in the tables below and are classified based on how their values were determined under the fair value hierarchy:

(in thousands of dollars)	September 30, 2013			Total
	Level 1	Level 2	Level 3	
Assets				
Money market funds	\$—	\$1,526	\$—	\$1,526
Trading securities associated with deferred compensation plans	19,174	—	—	19,174
Forward foreign currency exchange contracts	—	8	—	8
Total financial assets measured and reported at fair value	\$19,174	\$1,534	\$—	\$20,708
Liabilities				
Guarantees of bank loans to tobacco growers	\$—	\$—	\$4,454	\$4,454
Interest rate swap agreements	—	1,170	—	1,170
Forward foreign currency exchange contracts	—	4,511	—	4,511
Total financial liabilities measured and reported at fair value	\$—	\$5,681	\$4,454	\$10,135

(in thousands of dollars)	September 30, 2012			Total
	Level 1	Level 2	Level 3	
Assets				
Money market funds	\$—	\$1,525	\$—	\$1,525
Trading securities associated with deferred compensation plans	18,881	—	—	18,881
Forward foreign currency exchange contracts	—	230	—	230
Total financial assets measured and reported at fair value	\$18,881	\$1,755	\$—	\$20,636
Liabilities				
Guarantees of bank loans to tobacco growers	\$—	\$—	\$2,327	\$2,327
Interest rate swap agreements	—	2,117	—	2,117
Forward foreign currency exchange contracts	—	43	—	43
Total financial liabilities measured and reported at fair value	\$—	\$2,160	\$2,327	\$4,487

(in thousands of dollars)	March 31, 2013			Total
	Level 1	Level 2	Level 3	
Assets				
Money market funds	\$—	\$174,551	\$—	\$174,551
Trading securities associated with deferred compensation plans	19,168	—	—	19,168
Total financial assets measured and reported at fair value	\$19,168	\$174,551	\$—	\$193,719
Liabilities				
Guarantees of bank loans to tobacco growers	\$—	\$—	\$4,235	\$4,235
Interest rate swap agreements	—	1,679	—	1,679
Forward foreign currency exchange contracts	—	1,141	—	1,141
Total financial liabilities measured and reported at fair value	\$—	\$2,820	\$4,235	\$7,055

Money market funds

The fair value of money market funds, which are reported in cash and cash equivalents in the consolidated balance sheets, is based on net asset value, which is computed based on amortized cost (Level 2). The fair values of these investments approximate cost due to the short-term maturities and the high credit quality of the issuers of the underlying securities.

Trading securities associated with deferred compensation plans

Trading securities represent mutual fund investments that are matched to employee deferred compensation obligations. These investments are bought and sold as employees defer compensation, receive distributions, or make changes in the funds underlying their accounts. Quoted market prices (Level 1) are used to determine the fair values of the mutual funds.

Interest rate swap agreements

The fair values of interest rate swap agreements are determined based on dealer quotes using a discounted cash flow model matched to the contractual terms of each instrument. Since inputs to the model are observable and significant judgment is not required in determining the fair values, interest rate swaps are classified within Level 2 of the fair value hierarchy.

Forward foreign currency exchange contracts

The fair values of forward foreign currency exchange contracts are also determined based on dealer quotes using a discounted cash flow model matched to the contractual terms of each instrument. Since inputs to the model are observable and significant judgment is not required in determining the fair values, forward foreign currency exchange contracts are classified within Level 2 of the fair value hierarchy.

Guarantees of bank loans to tobacco growers

The Company guarantees bank loans to tobacco growers in Brazil and Malawi for crop financing and/or construction of curing barns or other tobacco producing assets. In the event that the farmers default on their payments to the banks, the Company would be required to perform under the guarantees. The Company regularly evaluates the likelihood of farmer defaults based on an expected loss analysis and records the fair value of its guarantees as an obligation in its consolidated financial statements. The fair value of the guarantees is determined using the expected loss data for all

loans outstanding at each measurement date. The present value of the cash flows associated with the estimated losses is then calculated at a risk-adjusted interest rate that is aligned with the expected duration of the liability and includes an adjustment for nonperformance risk. This approach is sometimes referred to as the “contingent claims valuation method.” Although historical loss data is an observable input, significant judgment is required in applying this information to the portfolio of guaranteed loans outstanding at each measurement date and in selecting a risk-adjusted interest rate. Significant increases or decreases in the risk-adjusted interest rate may result in a significantly higher or lower fair value measurement. The guarantees of bank loans to tobacco growers are therefore classified within Level 3 of the fair value hierarchy.

A reconciliation of the change in the balance of the financial liability for guarantees of bank loans to tobacco growers (Level 3) for the six months ended September 30, 2013 and 2012 is provided below.

(in thousands of dollars)	Six Months Ended September 30,	
	2013	2012
Balance at beginning of year	\$4,235	\$5,932
Payments under the guarantees and transfers to allowance for loss on direct loans to farmers (removal of prior crop year loans from portfolio)	(5,202)	(5,651)
Provision for loss or transfers from allowance for loss on direct loans to farmers (addition of current crop year loans)	5,498	2,197
Change in discount rate and estimated collection period	25	37
Currency remeasurement	(102)	(188)
Balance at end of period	\$4,454	\$2,327

Universal has not elected to report at fair value any financial instruments or any other assets or liabilities that are not required to be reported at fair value under current accounting guidance.

Long-term Obligations

The fair value of the Company's long-term obligations, including the current portion, was approximately \$393 million at September 30, 2013, \$412 million at September 30, 2012, and \$404 million at March 31, 2013. The Company estimates the fair value of its long-term obligations using Level 2 inputs which are based upon quoted market prices for the same or similar issues or on the current interest rates available to the Company for debt of similar terms and maturities.

NOTE 9. PENSION AND OTHER POSTRETIREMENT BENEFIT PLANS

The Company sponsors several defined benefit pension plans covering U.S. salaried employees and certain foreign and other employee groups. These plans provide retirement benefits based primarily on employee compensation and years of service. The Company also sponsors defined benefits plans that provide postretirement health and life insurance benefits for eligible U.S. employees attaining specific age and service levels.

The components of the Company's net periodic benefit cost were as follows:

(in thousands of dollars)	Pension Benefits		Other Postretirement Benefits	
	Three Months Ended September 30,		Three Months Ended September 30,	
	2013	2012	2013	2012
Service cost	\$1,197	\$1,046	\$131	\$146
Interest cost	2,865	3,153	508	569
Expected return on plan assets	(3,543)	(3,197)	(30)	(31)
Settlement costs	—	1,329	—	—
Net amortization and deferral	2,447	2,846	(17)	48
Net periodic benefit cost	\$2,966	\$5,177	\$592	\$732

(in thousands of dollars)	Pension Benefits		Other Postretirement Benefits	
	Six Months Ended September 30,		Six Months Ended September 30,	
	2013	2012	2013	2012
Service cost	\$2,392	\$2,270	\$269	\$294
Interest cost	5,722	6,319	1,040	1,145
Expected return on plan assets	(7,085) (6,694) (60) (62
Settlement costs	—	1,329	—	—
Net amortization and deferral	4,894	5,364	(34) 100
Net periodic benefit cost	\$5,923	\$8,588	\$1,215	\$1,477

During the six months ended September 30, 2013, the Company made contributions of approximately \$7.3 million to its pension plans. Additional contributions of approximately \$5.7 million are expected during the remaining six months of fiscal year 2014, including \$5.1 million to the Company's ERISA-regulated U.S. plan and \$0.6 million to its non-ERISA regulated and other plans.

During the quarter ended September 30, 2013, the Company amended its ERISA-regulated and non-regulated pension plans in the U.S. to change the benefit formula that will be applied to service periods beginning January 1, 2014, to modify early retirement benefit factors, and to cover on a prospective basis certain employees who did not previously participate in the plans. Due to the significance of the amendments on the benefit obligation for the plans, the Company remeasured the plan's assets and liabilities during the quarter using actuarial assumptions that were updated as of the valuation date. The updated actuarial assumptions included an increase in the discount rate used to calculate the benefit liability, reflecting a general rise in market interest rates since March 31, 2013. The remeasurement resulted in a prior service credit of approximately \$19 million. That item, together with other actuarial gains as of the remeasurement date, reduced the aggregate underfunded status of the Company's pension plans by approximately \$40 million, which was recorded through comprehensive income under the applicable accounting guidance.

After the remeasurement, the projected benefit obligation ("PBO") and the funded status of the Company's defined benefit pension plans at September 30, 2013, compared to the March 31, 2013 fiscal year end, were as follows:

(in thousands of dollars)	Pension Benefits	
	September 30, 2013	March 31, 2013
Projected benefit obligation	\$260,689	\$299,161
Funded status	(52,484) (93,219

The effect of the plan amendments on net periodic benefit cost for the second half of the current fiscal year is not expected to be material to the Company's results of operations.

NOTE 10. STOCK-BASED COMPENSATION

Universal's shareholders have approved Executive Stock Plans ("Plans") under which officers, directors, and employees of the Company may receive grants and awards of common stock, restricted stock, restricted stock units ("RSUs"), performance share awards ("PSAs"), stock appreciation rights ("SARs"), incentive stock options, and non-qualified stock options. The Company's practice is to award grants of stock-based compensation to officers on an annual basis at the first regularly-scheduled meeting of the Executive Compensation, Nominating and Corporate Governance Committee of the Board of Directors (the "Compensation Committee") in the fiscal year following the public release of the Company's financial results for the prior year. The Compensation Committee administers the Company's Plans consistently, following previously defined guidelines. Awards of restricted stock, RSUs, PSAs, SARs, and non-qualified stock options are currently outstanding under the Plans. The non-qualified stock options and SARs have an exercise price equal to the closing price of a share of the Company's common stock on the grant date. All stock options currently outstanding are fully vested and exercisable, and they expire ten years after the grant date. The SARs are settled in shares of common stock, vest in equal one-third tranches one, two, and three years after the grant date, and expire ten years after the grant date, except that SARs granted after fiscal year 2007 expire on the earlier of three years after the grantee's retirement date or ten years after the grant date. The RSUs vest five years from the grant date and are then paid out in shares of common stock. Under the terms of the RSU awards, grantees receive dividend equivalents in the form of additional RSUs that vest and are paid out on the same date as the original RSU grant. The PSAs vest three years from the grant date, are paid out in shares of common stock at the vesting date, and do not carry rights to dividends or dividend equivalents prior to vesting. Shares ultimately paid out under PSA grants are dependent on the achievement of predetermined performance measures established by the Compensation Committee and can range from zero to 150% of the stated award. The Company's outside directors automatically receive restricted stock units or shares of restricted stock following each annual meeting of shareholders. RSUs awarded to outside directors vest three years after the grant date, and restricted shares vest upon the individual's retirement from service as a director.

During the six-month periods ended September 30, 2013 and 2012, Universal issued the following stock-based awards, representing the regular annual grants to officers and outside directors of the Company:

	Six Months Ended September 30,	
	2013	2012
RSUs:		
Number granted	61,600	75,950
Grant date fair value	\$60.12	\$44.39
PSAs:		
Number granted	52,400	60,850
Grant date fair value	\$53.56	\$38.14

As indicated in the table above, the Compensation Committee awarded only grants of RSUs and PSAs in both the current and prior fiscal years, and did not award any other types of stock-based compensation.

Fair value expense for stock-based compensation is recognized ratably over the period from grant date to the earlier of: (1) the vesting date of the award, or (2) the date the grantee is eligible to retire without forfeiting the award. For employees who are already eligible to retire at the date an award is granted, the total fair value of all non-forfeitable awards is recognized as expense at the date of grant. As a result, Universal typically incurs higher stock compensation expense in the first quarter of each fiscal year when grants are awarded to officers than in the other three quarters. For PSAs, the Company generally recognizes fair value expense ratably over the performance and vesting period based on management's judgment of the ultimate award that is likely to be paid out based on the achievement of the predetermined performance measures. For the six-month periods ended September 30, 2013 and 2012, the Company

recorded total stock-based compensation expense of approximately \$3.9 million and \$3.4 million, respectively. The Company expects to recognize stock-based compensation expense of approximately \$2.2 million during the remaining six months of fiscal year 2014.

NOTE 11. OPERATING SEGMENTS

The principal approach used by management to evaluate the Company's performance is by geographic region, although the dark air-cured and oriental tobacco businesses are each evaluated on the basis of their worldwide operations. The Company evaluates the performance of its segments based on operating income after allocated overhead expenses (excluding significant non-recurring charges or credits), plus equity in the pretax earnings of unconsolidated affiliates.

Operating results for the Company's reportable segments for each period presented in the consolidated statements of income were as follows:

(in thousands of dollars)	Three Months Ended September 30,		Six Months Ended September 30,	
	2013	2012	2013	2012
SALES AND OTHER OPERATING REVENUES				
Flue-cured and burley leaf tobacco operations:				
North America	\$80,967	\$59,370	\$145,118	\$119,856
Other regions ⁽¹⁾	530,610	571,981	826,870	909,514
Subtotal	611,577	631,351	971,988	1,029,370
Other tobacco operations ⁽²⁾	39,292	43,836	112,409	107,208
Consolidated sales and other operating revenues	\$650,869	\$675,187	\$1,084,397	\$1,136,578
OPERATING INCOME				
Flue-cured and burley leaf tobacco operations:				
North America	\$8,539	\$3,551	\$10,894	\$4,529
Other regions ⁽¹⁾	42,454	73,935	37,270	108,776
Subtotal	50,993	77,486	48,164	113,305
Other tobacco operations ⁽²⁾	(1,699)	968	7,508	9,345

Consolidated operating income	\$49,549	\$75,087	\$136,017	\$117,914

⁽¹⁾ Includes South America, Africa, Europe, and Asia regions, as well as inter-region eliminations.

Includes Dark Air-Cured, Special Services, and Oriental, as well as inter-company eliminations. Sales and other

⁽²⁾ operating revenues for this reportable segment include limited amounts for Oriental because its financial results consist principally of equity in the pretax earnings of an unconsolidated affiliate.

⁽³⁾ Item is included in segment operating income, but is not included in consolidated operating income.

⁽⁴⁾ Item is not included in segment operating income, but is included in consolidated operating income.

NOTE 12. ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

The following table summarizes the changes in the accumulated balances for each component of accumulated other comprehensive income attributable to the Company for the six months ended September 30, 2013 and 2012:

(in thousands of dollars)	Six Months Ended September 30,	
	2013	2012
Foreign currency translation:		
Balance at beginning of year	\$(15,555)	\$(11,850)
Other comprehensive income (loss) attributable to Universal Corporation:		
Net gain (loss) on foreign currency translation (net of tax (expense) benefit of \$(3,007) and \$1,595)	5,582	(2,962)
Less: Net loss (gain) on foreign currency translation attributable to noncontrolling interests	337	(191)
Other comprehensive income (loss) attributable to Universal Corporation, net of income taxes	5,919	(3,153)
Balance at end of period	\$(9,636)	\$(15,003)
Foreign currency hedge:		
Balance at beginning of year	\$(855)	\$(942)
Other comprehensive income (loss) attributable to Universal Corporation:		
Net gain (loss) on derivative instruments (net of tax benefit of \$339 and \$3,203)	(631)	(5,950)
Reclassification to earnings (net of tax benefit of \$859 and \$2,103) ⁽¹⁾	1,596	3,906
Other comprehensive income (loss) attributable to Universal Corporation, net of income taxes	965	(2,044)
Balance at end of period	\$110	\$(2,986)
Interest rate hedge:		
Balance at beginning of year	\$(1,091)	\$(727)
Other comprehensive income (loss) attributable to Universal Corporation:		
Net gain (loss) on derivative instruments (net of tax benefit of \$60 and \$509)	(112)	(945)
Reclassification to earnings (net of tax benefit of \$238 and \$159) ⁽²⁾	443	296
Other comprehensive income (loss) attributable to Universal Corporation, net of income taxes	331	(649)
Balance at end of period	\$(760)	\$(1,376)
Pension and other postretirement benefit plan:		
Balance at beginning of year	\$(58,039)	\$(66,842)
Other comprehensive income (loss) attributable to Universal Corporation:		
Gains arising during the period (net of taxes of \$5,600) ⁽³⁾	10,400	—
Prior service credit arising during the period (net of taxes of \$6,809) ⁽³⁾	12,646	—
Amortization included in earnings (net of tax benefit of \$1,493 and \$2,312) ⁽⁴⁾	2,774	4,294
Other comprehensive income (loss) attributable to Universal Corporation, net of income taxes	25,820	4,294
Balance at end of period	\$(32,219)	\$(62,548)
Total accumulated other comprehensive income (loss) at end of period	\$(42,505)	\$(81,913)

⁽¹⁾ Gain (loss) on foreign currency cash flow hedges is reclassified from accumulated other comprehensive income (loss) to cost of goods sold when the related tobacco is sold to customers. See Note 7 for additional information.

⁽²⁾ Gain (loss) on interest rate cash flow hedges is reclassified from accumulated other comprehensive income (loss) to interest expense when the related interest payments are made on the debt. See Note 7 for additional information.

⁽³⁾ The Company remeasured the assets and liabilities of its U.S. pension plans during the quarter ended September 30, 2013 to reflect the impact of the plan amendments adopted during the quarter. These items arise from the plan remeasurement. See Note 9 for additional information.

⁽⁴⁾ This accumulated other comprehensive income (loss) component is included in the computation of net periodic benefit cost. See Note 9 for additional information.

NOTE 13. CHANGES IN SHAREHOLDERS' EQUITY AND NONCONTROLLING INTERESTS IN SUBSIDIARIES

A reconciliation of the changes in Universal Corporation shareholders' equity and noncontrolling interests in subsidiaries for the six months ended September 30, 2013 and 2012 is as follows:

(in thousands of dollars)	Six Months Ended September 30, 2013			Six Months Ended September 30, 2012		
	Universal Corporation	Non-controlling Interests	Total	Universal Corporation	Non-controlling Interests	Total
Balance at beginning of year	\$1,258,571	\$ 29,086	\$1,287,657	\$1,183,451	\$ 22,539	\$1,205,990

NOTE 14. SUBSEQUENT EVENTS

Repayment of Medium Term Notes and Completion of New Bank Term Loan Agreement

On October 15, 2013, the Company repaid at maturity \$200 million principal amount of 5.2% medium term notes. Subsequently, on October 28, 2013, the Company entered into a \$175 million senior term loan agreement with a group of banks. The loan is unsecured, matures in five years, and provides for incremental term loans in an amount up to \$75 million at the Company's option, subject to customary conditions. Loans outstanding under the agreement currently bear interest at LIBOR plus 1.50% (1.69% on October 28, 2013) and may be prepaid at any time without premium or

penalty. The financial covenants under the new facility are substantially similar to those of the Company's committed revolving credit facility, which require a minimum level of tangible net worth and contain limits on debt levels.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Quarterly Report on Form 10-Q and the following "Management's Discussion and Analysis of Financial Condition and Results of Operations" contain "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Among other things, these statements relate to the Company's financial condition, results of operation, and future business plans, operations, opportunities, and prospects. In addition, the Company and its representatives may from time to time make written or oral forward-looking statements, including statements contained in other filings with the Securities and Exchange Commission and in reports to shareholders. These forward-looking statements are generally identified by the use of words such as we "expect," "believe," "anticipate," "could," "should," "may," "plan," "will," "predict," "estimate," and similar or words of similar import. These forward-looking statements are based upon management's current knowledge and assumptions about future events and involve risks and uncertainties that could cause actual results, performance, or achievements to be materially different from any anticipated results, prospects, performance, or achievements expressed or implied by such forward-looking statements. Such risks and uncertainties include, but are not limited to, anticipated levels of demand for and supply of our products and services; costs incurred in providing these products and services; timing of shipments to customers; changes in market structure; government regulation; product taxation; industry consolidation and evolution; changes in exchange rates and interest rates; regulation and litigation impacts on our customers; and general economic, political, market, and weather conditions. For a further description of factors that may cause actual results to differ materially from such forward-looking statements, see Item 1A, "Risk Factors" of our Annual Report on Form 10-K for the fiscal year ended March 31, 2013. We caution investors not to place undue reliance on any forward-looking statements as these statements speak only as of the date when made, and we undertake no obligation to update any forward-looking statements made in this report. This Form 10-Q should be read in conjunction with our Annual Report on Form 10-K for the fiscal year ended March 31, 2013.

Liquidity and Capital Resources

Overview

The first half of the year is generally a period of significant working capital investment in both Africa and South America as crops are delivered by farmers. We funded our working capital needs for the six months ended September 30, 2013, using a combination of cash on hand, short-term borrowings, customer advances, and operating cash flows. Larger crops and higher green prices for tobacco in many origins have increased our working capital needs this year. Our liquidity and capital resource requirements are predominantly short term in nature and relate to working capital for tobacco crop purchases. Working capital needs are seasonal within each geographic region. The geographic dispersion and the timing of working capital needs permit us to predict our general level of cash requirements, although crop sizes, prices paid to farmers, shipment and delivery timing, and currency fluctuations affect requirements each year. Peak working capital requirements are generally reached during the first and second fiscal quarters. Each geographic area follows a cycle of buying, processing, and shipping, although in many regions, we also provide agricultural materials to farmers during the growing season. The timing of the elements of each cycle is influenced by such factors as local weather conditions and individual customer shipping requirements, which may change the level or the duration of crop financing. Despite a predominance of short-term needs, we maintain a relatively large portion of our total debt as long-term to reduce liquidity risk. We also periodically have large cash balances that we utilize to meet our working capital requirements.

Operating Activities

We used \$307.1 million in net cash flows to fund our operating activities during the six months ended September 30, 2013. That amount was \$252.4 million higher than the level we required during the same period last fiscal year, primarily due to higher working capital needs in the current year. Tobacco inventory increased by \$413.9 million from March 31, 2013 levels to \$1.0 billion at September 30, 2013 on seasonal leaf purchases. Tobacco inventory levels

were \$136.2 million higher than September 30, 2012 levels principally due to larger crops, particularly in Africa, and higher green leaf prices in most origins. Inventory is usually financed with a mix of cash, notes payable, and customer deposits, depending on our available cash balances, borrowing capabilities, interest rates, and exchange rates, as well as those of our customers.

We generally do not purchase material quantities of tobacco on a speculative basis. The majority of our inventories are not considered to be at risk as they are committed for sale to customers. At September 30, 2013, our uncommitted inventories were \$134.2 million, or about 13% of total tobacco inventory, compared to \$117.0 million, or about 19% of our March 31, 2013 inventory, and \$93.5 million, or about 10% of our September 30, 2012 inventory. The percentages of uncommitted inventories at September 30, 2013, and at September 30, 2012, were below the normal range for our business and reflect leaf sales in fiscal years 2013 and 2012 that depleted uncommitted inventories.

Our balance sheet accounts reflected our normal seasonal patterns in the six months ended September 30, 2013, on deliveries of crops by farmers in both South America and Africa. Cash and cash equivalent balances decreased by \$293.2 million from March 31, 2013 levels as we used cash to fund seasonal working capital needs. Accounts receivable decreased by \$36.0 million compared to March 31, 2013, reflecting collections on prior shipments, net of new current crop receivables. Advances to suppliers were \$62.0 million at September 30, 2013, a reduction of \$70.1 million from March 31, 2013, as crops were delivered in payment of those balances. Conversely, accounts receivable from unconsolidated affiliates and customer advances and deposits were up \$69.6 million and \$68.0 million, respectively, from March 31, 2013 levels, reflecting normal seasonal patterns.

Compared to the same six-month period last fiscal year, cash and cash equivalent balances are down \$41.1 million in part due to higher working capital needs. In the quarter ended March 31, 2013, we also cash collateralized our guarantee for the E.U. fine under appeal, which decreased cash and cash equivalent balances and increased other current assets. Accounts payable and accrued expenses increased by \$34.3 million mainly due to the reclassification of the liability for our E.U. fine under appeal from a long-term to a current liability. Customer advances and deposits increased by \$45.1 million compared to September 30, 2012, due to larger crops and slower shipments in this fiscal year.

Investing Activities

During the six months ended September 30, 2013 and 2012, we invested about \$19.8 million and \$19.5 million, respectively, in our property, plant, and equipment. Depreciation expense was approximately \$20.0 million and \$21.6 million, respectively, for the six months ended September 30, 2013 and 2012. Our intent is to limit routine capital spending to a level below depreciation expense in order to maintain strong cash flow. However, from time to time, we identify opportunities that may require significant capital investment to improve efficiencies, add value for our customers, and position us for future growth. We have recently approved a total of approximately \$50 million for several new capital projects involving infrastructure expansion which we expect to complete over the next two fiscal years. The largest project is in Mozambique, where we are expanding tobacco production and processing capabilities to meet strong customer demand. The rest of these projects involve efficiency improvements and expanded services to meet the needs of our customers.

Financing Activities

We consider the sum of notes payable and overdrafts, long-term debt (including the current portion), and customer advances and deposits, less cash, cash equivalents, and short-term investments on our balance sheet to be our net debt. We also consider our net debt plus shareholders' equity to be our net capitalization. Net debt increased by about \$445.1 million to \$600.0 million during the six months ended September 30, 2013, primarily due to seasonal working capital requirements. Net debt as a percentage of net capitalization of approximately 31% at September 30, 2013, was up from the September 30, 2012 level of approximately 25%, and reflected higher working capital requirements this fiscal year due to larger crops and higher green prices. It was also up from about 11% at March 31, 2013. As of September 30, 2013, we were in compliance with all covenants of our debt agreements, which require us to maintain certain levels of tangible net worth and observe restrictions on debt levels. We had \$370.0 million available under a committed revolving credit facility that will mature in November 2016 and \$74.6 million in cash and cash equivalents. Our short-term debt totaled \$194.3 million, and we had \$213.8 million of current maturities of long-term debt. In addition, we had about \$304.6 million in unused, uncommitted credit lines. In October 2013, we repaid our \$200 million 5.2% medium term note that matured on October 15, 2013, and we entered into a new bank credit agreement that established a funded \$175 million five-year unsecured term loan facility. The new facility matures in October 2018. Loans outstanding under the new facility currently bear interest at LIBOR plus 1.50% (1.6875% on October 28, 2013) and may be prepaid at any time without premium or penalty. The financial covenants under the new facility are substantially similar to those of our committed revolving credit facility and require that we maintain a minimum level of tangible net worth and observe limits on debt levels.

Our seasonal working capital requirements typically increase significantly between March and September and decline after mid-year. Available capital resources from our cash balances, committed credit facility, and uncommitted credit

lines exceed our normal working capital needs, current maturities of long-term debt, and currently anticipated capital expenditure requirements over the next twelve months.

In November 2011, our Board of Directors approved a \$100 million share repurchase program that was replaced in November 2013. The purchases under this program were carried out from time to time on the open market. During the six months ended September 30, 2013, we purchased 238,486 shares of common stock at an aggregate cost of \$14.1 million (average price per share of \$59.31), based on trading dates. On November 5, 2013, we announced that our Board of Directors had approved a new authorization for the purchase of up to \$100 million of equity securities through November 15, 2015. The purchases may be carried out from time to time on the open market or in privately negotiated transactions at prices not exceeding prevailing market rates. In determining our level of common share repurchase activity, our intent is to use only cash available after meeting our capital investment, dividend, and working capital requirements. Repurchases of shares under the repurchase program may vary based on management discretion,

as well as changes in cash flow generation and availability. As of September 30, 2013, we had approximately 23.2 million common shares outstanding.

Derivatives

From time to time, we use interest rate swap agreements to manage our exposure to changes in interest rates. At September 30, 2013, the fair value of our outstanding interest rate swap agreements was a liability of about \$1.2 million, and the notional amount swapped was approximately \$88 million. These agreements were entered into to eliminate the variability of cash flows in the interest payments on our variable-rate amortizing term loan. Under the swap agreements we receive variable rate interest and pay fixed rate interest. The swaps are accounted for as cash flow hedges.

We also enter forward contracts from time to time to hedge certain foreign currency exposures, primarily related to forecast purchases of tobacco and related processing costs in Brazil, as well as our net monetary asset exposure in local currency there. We generally account for our hedges of forecast tobacco purchases as cash flow hedges. At September 30, 2013, we had no open hedge contracts for those purposes. We had other forward contracts outstanding that were not designated as hedges, and the fair value of those contracts was a liability of about \$4.5 million at September 30, 2013.

Results of Operations

Amounts described as net income and earnings per diluted share in the following discussion are attributable to Universal Corporation and exclude earnings related to non-controlling interests in subsidiaries.

Net income for the first half of fiscal year 2014, which ended on September 30, 2013, was \$83.8 million, or \$2.95 per diluted share, compared with \$71.1 million, or \$2.50 per diluted share for the same period last year. The current year's results included a gain in the first fiscal quarter of \$81.6 million before tax (\$53.1 million after tax, or \$1.96 per diluted share), which resulted from the favorable outcome of litigation by our operating subsidiary in Brazil related to previous years' excise tax credits. Excluding that gain, net income for the six months decreased \$40.4 million compared to the same period last year. For the second fiscal quarter ended September 30, 2013, net income of \$25.4 million, or \$0.90 per diluted share, compared with net income for the prior year's second quarter of \$48.0 million, or \$1.68 per diluted share.

Segment operating income, which excludes the gain discussed above, was \$55.7 million, a decrease of 55%, for the six-month period and \$49.3 million, a decrease of 37%, for the quarter ended September 30, 2013. Those declines resulted from reduced volumes shipped due to the prior year's significant sales of carryover crop and previously uncommitted inventories, the later timing of shipments for the current year's larger crops, margin pressures from higher green leaf costs, and increased selling general and administrative costs primarily caused by foreign currency losses compared to gains in the previous fiscal year in several origins. Consolidated revenues decreased by 5% to \$1.1 billion for the first half of fiscal year 2014, and by 4% to \$650.9 million for the three months ended September 30, 2013, compared to the same periods in the prior year, mostly as a result of the lower volumes, offset in part by higher green leaf prices in most regions.

Flue-cured and Burley Leaf Tobacco Operations

Six Months

Operating income for the flue-cured and burley tobacco operations, which comprise the North America and Other Regions segments, was \$48.2 million for the first half of fiscal year 2014, compared to \$113.3 million in the first half of the prior fiscal year, reflecting significant declines in the Other Regions segment, partly offset by improved results for the North America segment. Revenues of \$972.0 million were down about 6% compared with the previous year. Earnings for the Other Regions segment were \$37.3 million, a decrease of \$71.5 million from last fiscal year's first half earnings of \$108.8 million. The reduction was driven primarily by lower sales volumes in South America and Africa, mainly as a result of the significant drop in carryover shipments in Africa noted last quarter and also in Brazil

in the second quarter, along with delayed shipment timing in some origins and margin pressures in South America caused by the rapid increase in green leaf prices there. Those results were partly offset by improved earnings in Asia on stronger volumes. Selling, general, and administrative expenses for the segment were also substantially higher, primarily due to unfavorable net foreign currency remeasurement and exchange comparisons, as current year losses compared to gains in the prior year, mostly in Africa, South America, and Asia. Revenues for this segment were down by about 9% to \$826.9 million, reflecting those lower volumes, partly offset by higher average green leaf prices in nearly every origin.

In the North America segment, operating income of \$10.9 million increased by \$6.4 million for the first half of fiscal year 2014 compared with the previous year on improved sales volumes and lower processing overheads. The volume increases were partly due to earlier shipment timing in Central America. Revenues for the segment were up by 21% to \$145.1 million on those higher volumes.

Second Quarter

In the second quarter of fiscal year 2014, operating income for flue-cured and burley operations decreased by \$26.5 million to \$51.0 million, compared to the same period last fiscal year. Revenues for the group at \$611.6 million were down about 3%, on lower volumes at higher average green leaf prices. Operating income for the Other Regions segment was down by 43% to \$42.5 million compared with the prior year. The reduction was heavily influenced by lower volumes and margins in South America largely from fewer sales of previous year's crops, margin pressures from the rapid increase of green leaf prices, and later timing of shipments of current crops versus the previous year. Results in the Africa region were also affected by reduced volumes in the quarter due to delayed timing of some shipments, customer mix, and fewer carryover crop sales. Those declines were partly mitigated by improved results in Asia, where trading volumes improved, including some earlier shipment timing. Higher selling, general, and administrative expenses for the segment also contributed to the lower earnings in the quarter, reflecting the unfavorable currency remeasurement and exchange comparisons in South America, Africa, and Asia to the same period last year. Revenues for the Other Regions segment declined by 7% to \$530.6 million compared with the prior year, mainly as a result of the reduced volumes, partly mitigated by higher overall green leaf costs.

Operating income for the North America segment of \$8.5 million was up by \$5.0 million, on higher sales, lower processing overheads, a more favorable product mix, and earlier shipment timing in Central America compared with the previous year. Those volume improvements also buoyed second quarter revenues, which increased by 36% to \$81.0 million for the segment.

Other Tobacco Operations

The Other Tobacco Operations segment operating income declined by \$1.8 million to \$7.5 million for the six months ended September 30, 2013, compared with the same period for the previous fiscal year. Results for the dark tobacco business were lower for the first half of fiscal year 2014, as benefits from stronger carryover sales and a more favorable product mix were outweighed by higher selling, general, and administrative costs from foreign currency remeasurement and exchange losses, primarily in Indonesia. The oriental joint venture similarly faced negative effects from currency devaluation mainly in Turkey, despite higher sales for the six month period ended September 30, 2013. For the second quarter of fiscal year 2014, the segment had an operating loss of \$1.7 million, which was a decrease of \$2.7 million compared with the prior year, driven by the currency-related losses. Revenues for the Other Tobacco Operations segment were up about 5% to \$112.4 million for the first half of fiscal year 2014, primarily attributable to a more favorable product mix in the dark tobacco operations and the timing of shipments of oriental tobaccos into the United States. Revenues for this segment were down for the second quarter of fiscal year 2014 by about 10%, to \$39.3 million, mostly related to lower volumes from old crop wrapper compared with the prior year.

Other Information

Cost of goods sold decreased by about 1% to \$531.6 million for the second quarter, and to \$893.6 million for the first half of fiscal year 2014. The reductions in both periods reflect lower sales volumes, offset in part by higher green leaf costs. Selling, general, and administrative costs increased by \$26.6 million and by \$9.2 million in the first half and second quarter of fiscal year 2014, respectively. In both periods, the increases were chiefly due to unfavorable comparisons from currency remeasurement and exchange losses amounting to \$14.4 million and \$9.0 million for the first half and second fiscal quarter, mainly in Asia, Africa, and South America, compared with gains of \$9.9 million and \$2.8 million in the first half and second fiscal quarter of the prior year.

The consolidated effective income tax rates for the quarter and six months ended September 30, 2013, were approximately 29% and 33%, respectively, while the comparable rates for the quarter and six months ended September 30, 2012, were approximately 28% and 30%. The rates for all periods were lower than the 35% federal statutory rate because of changes in exchange rates on deferred income tax assets and liabilities as well as lower

effective rates on income from certain foreign subsidiaries.

In the first fiscal quarter of 2014, we recorded an \$81.6 million gain resulting from the favorable conclusion during the quarter of a longstanding lawsuit challenging the Brazilian government's denial of our rights to claim certain excise tax credits generated in previous years. The outcome of the case entitles us to the previously denied excise tax credits, as well as additional credits for interest from the dates the tax credits should have been available (approximately \$104 million at the September 30, 2013 exchange rate). All avenues of appeal by either party were exhausted, and we are now permitted to utilize the total amount of the credits to offset future federal tax obligations for a period of up to five years. The amount of the gain, which is reported in Other Income, reflects our current estimate of the actual tax credits that are likely to be realized in current and future periods.

On October 15, 2013, we repaid at maturity \$200 million principal amount of 5.2% medium term notes. Subsequently, we entered into a \$175 million senior term loan agreement with a group of banks. The loan is unsecured and matures in five years. Loans outstanding under the agreement currently bear interest at LIBOR plus 1.50% (1.6875% on October 28, 2013) and may be prepaid at any time without premium or penalty. The financial covenants under the new term loan agreement are substantially similar to those of our \$450 million senior unsecured committed revolving credit facility, including maintaining a minimum level of tangible net worth and observing limits on debt levels.

General Overview

Our comparative results for the first half of this fiscal year continue to be skewed by large sales of carryover crops and earlier shipment timing in the prior year. Although production of flue-cured and burley tobaccos outside of China is higher this year, our leaf volumes shipped in the first half of the fiscal year were significantly lower than last year's levels. At the same time, foreign currency remeasurement and exchange losses and continuing margin pressures in Brazil from volatile leaf prices there, have dampened our results. Looking forward, we expect the second half comparisons to normalize with shipment volumes meeting or exceeding those of last year.

Although we are facing some hurdles, the leaf markets continue to be strong. As the leading global leaf supplier, we work closely with our customers to assure their ongoing requirements for quality, compliant leaf are met around the world. To that end, we are pleased to have recently announced that we have launched a program to expand our leaf production and processing capacity in Mozambique. Similarly, other smaller-scale projects are concurrently in development in several other origins to enhance local processing and leaf services to bring additional value and services to our customers. We expect to incur incremental capital expenditures of approximately \$50 million for these projects beyond our normal maintenance spending, but the investments will be spread over a two-year period. We have continued to prudently manage our balance sheet, including recent further reductions in long-term debt, and we are well-positioned to fund projects such as these to enhance our capabilities and offerings. We expect to begin to see the benefits from these projects during fiscal year 2015.

In addition, our financial strength enables us to continue rewarding our shareholders, as we have done once again, with our 43rd consecutive annual dividend increase announced today.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rates

After inventory is purchased, interest rate risk is limited in our business because customers usually pre-finance purchases or pay market rates of interest for inventory purchased for their accounts. We bill our customers interest on tobacco purchased for their order at certain points in the inventory cycle. That interest is paid at rates based on current markets for variable rate debt. If we fund our committed tobacco inventory with fixed-rate debt, we might not be able to recover interest at that fixed rate if current market interest rates were to fall. As of September 30, 2013, tobacco inventory of \$1.037 billion included \$903 million in inventory that was committed for sale to customers and \$134 million that was not committed. Committed inventory, after deducting about \$93 million in customer deposits, represents our potential net exposure of about \$810 million. We normally maintain a portion of our debt at variable interest rates in order to mitigate such interest rate risk related to carrying fixed-rate debt. We also periodically have large cash balances that we use to fund seasonal purchases of tobacco. These cash balances reduce our financing needs. Debt carried at variable interest rates was approximately \$194 million at September 30, 2013. Although a hypothetical 1% change in short-term interest rates would result in a change in annual interest expense of approximately \$2 million, that amount would be at least partially mitigated by changes in charges to customers. Our policy is to work toward a level of floating-rate liabilities, including customer deposits, that reflects our average committed inventory levels over time.

Currency

The international leaf tobacco trade generally is conducted in U.S. dollars, thereby limiting foreign exchange risk to that which is related to leaf purchase and production costs, overhead, and income taxes in the source country. We also provide farmer advances that are directly related to leaf purchases and are denominated in the local currency. Any currency gains or losses on those advances are usually offset by decreases or increases in the cost of tobacco, which is priced in the local currency. However, the effect of the offset may not occur until a subsequent quarter or fiscal year. Most of our tobacco operations are accounted for using the U.S. dollar as the functional currency. Because there are no forward foreign exchange markets in many of our major countries of tobacco origin, we often manage our foreign exchange risk by matching funding for inventory purchases with the currency of sale, which is usually the U.S. dollar, and by minimizing our net local currency monetary position in individual countries. We are vulnerable to currency remeasurement gains and losses to the extent that monetary assets and liabilities denominated in local currency do not offset each other. In addition to foreign exchange gains and losses, we are exposed to changes in the cost of tobacco due to changes in the value of the local currency in relation to the U.S. dollar. We routinely enter forward currency exchange contracts to hedge against the effects of currency movements on purchases of tobacco to reduce the volatility of costs. In addition, from time-to-time we enter forward contracts to hedge balance sheet exposures.

In certain tobacco markets that are primarily domestic, we use the local currency as the functional currency. Examples of these markets are Hungary, Poland, and the Philippines. In other markets, such as Western Europe, where export sales have been primarily in local currencies, we also use the local currency as the functional currency. In each case, reported earnings are affected by the translation of the local currency into the U.S. dollar.

Derivatives Policies

Hedging interest rate exposure using swaps and hedging foreign exchange exposure using forward contracts are specifically contemplated to manage risk in keeping with management's policies. We may use derivative instruments, such as swaps, forwards, or futures, which are based directly or indirectly upon interest rates and currencies to manage and reduce the risks inherent in interest rate and currency fluctuations. When we use foreign currency derivatives to mitigate our exposure to exchange rate fluctuations, we may choose not to designate them as hedges for accounting purposes, which may result in the effects of the derivatives being recognized in our earnings in periods different from

the items that created the exposure.

We do not utilize derivatives for speculative purposes, and we do not enter into market risk-sensitive instruments for trading purposes. Derivatives are transaction specific so that a specific debt instrument, forecast purchase, contract, or invoice determines the amount, maturity, and other specifics of the hedge. We routinely review counterparty risk as part of our derivative program.

ITEM 4. CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in reports we file under the Securities Exchange Act of 1934 (the “Exchange Act”), as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. Our Chief Executive Officer and Chief Financial Officer evaluated, with the participation of other members of management, the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)), as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on this evaluation, management concluded that our disclosure controls and procedures were effective. There were no changes in our internal controls over financial reporting identified in connection with this evaluation that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

European Commission Fines in Italy

In 2002, we reported that we were aware that the European Commission (the "Commission") was investigating certain aspects of the leaf tobacco markets in Italy. One of our subsidiaries, Deltafina, S.p.A. ("Deltafina"), buys and processes tobacco in Italy. We reported that we did not believe that the Commission investigation in Italy would result in penalties being assessed against us or our subsidiaries that would be material to our earnings. The reason we held this belief was that we had received conditional immunity from the Commission because Deltafina had voluntarily informed the Commission of the activities that were the basis of the investigation.

On December 28, 2004, we received a preliminary indication that the Commission intended to revoke Deltafina's immunity for disclosing in April 2002 that it had applied for immunity. Neither the Commission's Leniency Notice of February 19, 2002, nor Deltafina's letter of provisional immunity, contains a specific requirement of confidentiality. The potential for such disclosure was discussed with the Commission in March 2002, and the Commission never told Deltafina that the disclosure would affect Deltafina's immunity. On November 15, 2005, we received notification from the Commission that the Commission had imposed fines totaling €30 million on Deltafina and Universal Corporation jointly for infringing European Union antitrust law in connection with the purchase and processing of tobacco in the Italian raw tobacco market. In January 2006, Universal Corporation and Deltafina each filed appeals in the General Court ("General Court"). Deltafina's appeal was held on September 28, 2010. For strategic reasons related to the defense of the Deltafina appeal, we withdrew our appeal. On September 9, 2011, the General Court issued its decision, in which it rejected Deltafina's application to reinstate immunity. Deltafina has appealed the decision of the General Court to the European Court of Justice, and a hearing was held in November 2012. Effective with the September 9, 2011 General Court decision, we recorded a charge for the full amount of the fine (€30 million) plus accumulated interest (€5.9 million). The charge totaled \$49.1 million at the exchange rate in effect on the date of the General Court decision. Deltafina maintains a bank guarantee in favor of the Commission in the amount of the fine plus accumulated interest in order to stay execution during the appeals process. We expect the appeal to be decided during fiscal year 2014. Any fine and interest Deltafina may ultimately be required to pay would not be due until the European Court of Justice issues its decision.

U.S. Foreign Corrupt Practices Act

On August 6, 2010, we finalized settlement agreements with the United States Department of Justice ("DOJ") and U.S. Securities and Exchange Commission ("SEC") resolving those agencies' investigations into matters involving the U.S. Foreign Corrupt Practices Act ("FCPA"). Information regarding such settlement agreements was provided previously in our Current Report on Form 8-K filed with the SEC on August 6, 2010. Pursuant to the settlement agreements, we retained an independent corporate monitor for a period of three years to review our compliance, bookkeeping, and internal control standards and procedures relating to the FCPA. The three-year term of the monitorship began on October 5, 2010. On October 4, 2013, the monitor certified to the SEC and DOJ that our compliance program, including our policies and procedures, is appropriately designed and implemented to prevent and detect violations of the FCPA and other applicable anti-corruption laws. With the timely completion of the monitorship, we have fulfilled our obligations under the settlement agreements with the DOJ and SEC.

Other Legal Matters

In addition to the above-mentioned matter, some of our subsidiaries are involved in other litigation or legal matters incidental to their business activities. While the outcome of these matters cannot be predicted with certainty, we are vigorously defending them and do not currently expect that any of them will have a material adverse effect on our

business or financial position. However, should one or more of these matters be resolved in a manner adverse to our current expectation, the effect on our results of operations for a particular fiscal reporting period could be material.

ITEM 1A. RISK FACTORS

As of the date of this report, there are no material changes to the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended March 31, 2013. In evaluating our risks, readers should carefully consider the risk factors discussed in our Annual Report on Form 10-K, which could materially affect our business, financial condition or operating results, in addition to the other information set forth in this report and in our other filings with the Securities and Exchange Commission.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

As indicated in the following table, we did not repurchase shares of our common stock during the three-month period ended September 30, 2013:

Period ⁽¹⁾	Total Number of Shares Repurchased	Average Price Paid Per Share ⁽²⁾	Total Number of Shares Repurchased as Part of Publicly Announced Plans or Programs ⁽³⁾	Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs ⁽³⁾
July 1, 2013 to July 31, 2013	—	\$—	—	\$77,224,251
August 1, 2013 to August 31, 2013	—	—	—	—
September 1, 2013 to September 30, 2013	—	—	—	—
Total	—	\$—	—	\$77,224,251

⁽¹⁾ Repurchases are based on the date the shares were traded. This presentation differs from the consolidated statement of cash flows, where the cost of share repurchases is based on the date the transactions were settled.

⁽²⁾ Amounts listed for average price paid per share include broker commissions paid in the transactions.

A stock repurchase plan, which was authorized by our Board of Directors, became effective and was publicly announced on November 8, 2011. This stock repurchase plan authorizes the purchase of up to \$100 million in ⁽³⁾ common stock in open market or privately negotiated transactions, subject to market conditions and other factors. This stock repurchase program will expire on the earlier of November 15, 2013, or when we have exhausted the funds authorized for the program.

ITEM 6. EXHIBITS

- 12 Ratio of Earnings to Fixed Charges, and Ratio of Earnings to Combined Fixed Charges and Preference Dividends.
- 31.1 Certification of Chief Executive Officer Pursuant to Section 302 of Sarbanes-Oxley Act of 2002.
- 31.2 Certification of Chief Financial Officer Pursuant to Section 302 of Sarbanes-Oxley Act of 2002.
- 32.1 Certification of Chief Executive Officer Pursuant to 18 U.S.C. Section 1350.
- 32.2 Certification of Chief Financial Officer Pursuant to 18 U.S.C. Section 1350.
- 101.0 Interactive Data File (Quarterly Report on Form 10-Q, for the quarterly period ended September 30, 2013, formatted in XBRL (eXtensible Business Reporting Language)).

Attached as Exhibit 101 to this report are the following documents formatted in XBRL: (i) the Consolidated Statements of Income and Comprehensive Income for the three and six months ended September 30, 2013 and 2012, (ii) the Consolidated Balance Sheets at September 30, 2013, September 30, 2012 and March 31, 2013, (iii) the Consolidated Statements of Cash Flows for the six months ended September 30, 2013 and 2012 and (iv) the Notes to Consolidated Financial Statements. Users of this data are advised pursuant to Rule 406T of Regulation S-T that this interactive data file is deemed not filed or part of a registration statement or prospectus for purposes of sections 11 or 12 of the Securities Act of 1933, as amended, is deemed not filed for purposes of Section 18 of the Securities and Exchange Act of 1934, as amended, and otherwise is not subject to liability under these sections.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
