Additionally, fourth quarter results should also be positively affected by a stronger-than-usual order book for Building Products in the Southeast, due to the aftermath of the severe hurricane season this year."

We believe that EBITDA is commonly used as a measure of performance for companies in our industry and is frequently used by analysts, investors, lenders and other interested parties to evaluate a company's financial performance and its ability to incur and service debt. EBITDA should not be considered as a measure of financial performance under accounting principles generally accepted in the United States. The items excluded from EBITDA are significant components in understanding and assessing financial performance. EBITDA should not be considered in isolation or as an alternative to net income, cash flows generated by operating, investing or financing activities or other financial statement data presented in the consolidated financial statements as an indicator of operating performance or as a measure of liquidity.
