The information in this prospectus is not complete and may be changed. We and the selling stockholders may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

SUBJECT TO COMPLETION, DATED _____, 2010

Shares

Douglas Dynamics, Inc.

Common Stock

This is the initial public offering of our common stock. We are selling _____ shares of common stock and the selling stockholders are selling _____ shares of common stock. We will not receive any proceeds from the sale of shares of common stock by the selling stockholders. Prior to this offering there has been no public market for our common stock. The initial public offering price of our common stock is expected to be between \$ _____ and \$ _____ per share. We have applied to list our common stock on the New York Stock Exchange under the symbol "PLOW."

The underwriters have a 30-day option to purchase on a pro rata basis an aggregate of _____ additional outstanding shares from the selling stockholders to cover over-allotments of shares.

Investing in our common stock involves risks. See "Risk Factors" beginning on page 14.

PROSPECTUS SUMMARY

The following summary should be read together with, and is qualified in its entirety by, the more detailed information and financial statements and related notes included elsewhere in this prospectus. The following summary does not contain all of the information you should consider before investing in our common stock. For a more complete understanding of this offering, we encourage you to read this entire prospectus, including the "Risk Factors" section, before making an investment in our common stock.

In this prospectus, unless the context indicates otherwise: "Douglas Dynamics," the "Company," "we," "our," "ours" or "us" refer to Douglas Dynamics, Inc. (formerly known as Douglas Dynamics Holdings, Inc.) and its subsidiaries and "Douglas Holdings" refers to Douglas Dynamics, Inc. exclusive of its subsidiaries. Douglas Dynamics, Inc. is a Delaware corporation and the issuer of the common stock offered hereby.

Our Company

We are the North American leader in the design, manufacture and sale of snow and ice control equipment for light trucks, which consists of snowplows and sand and salt spreaders, and related parts and accessories. We sell our products under the WESTERN®, FISHER® and BLIZZARD® brands which are among the most established and recognized in the industry. We believe that in 2009 our share of the light truck snow and ice control equipment market was greater than 50%. In 2009, we generated net sales, Adjusted EBITDA (as defined in " Summary Historical Consolidated Financial and Operating Data") and net income of \$174.3 million, \$45.2 million and \$9.8 million, respectively, as compared to net sales, Adjusted EBITDA and net income of \$180.1 million, \$47.7 million and \$11.5 million, respectively, for 2008. See " Summary Historical Consolidated Financial and Operating Data" for a discussion of why management uses Adjusted EBITDA to measure our financial performance, and a reconciliation of net income to Adjusted EBITDA.

We offer the broadest and most complete product line of snowplows and sand and salt spreaders for light trucks in the U.S. and Canadian markets. We also provide a full range of related parts and accessories, which generates an ancillary revenue stream throughout the lifecycle of our snow and ice control equipment. For the year ended December 31, 2009, 85% of our net sales were generated from sales of snow and ice control equipment, and 15% of our net sales were generated from sales of parts and accessories.

We sell our products through a distributor network primarily to professional snowplowers who are contracted to remove snow and ice from commercial, municipal and residential areas. Over the last 50 years, we have engendered exceptional customer loyalty for our products because of our ability to satisfy the stringent demands of our customers for a high degree of quality, reliability and service. As a result, we believe our installed base is the largest in the industry with over 500,000 snowplows and sand and salt spreaders in service. Because sales of snowplows and sand and salt spreaders are primarily driven by the need of our core end-user base to replace worn existing equipment, we believe our substantial installed base provides us with a high degree of predictable sales over any extended period of time.

We believe we have the industry's most extensive North American distributor network, which primarily consists of over 720 truck equipment distributors who purchase directly from us and are located throughout the snowbelt regions in North America (primarily the Midwest, East and Northeast regions of the United States as well as all provinces of Canada). Beginning in 2005, we began to extend our reach to international markets, establishing distribution relationships in Northern Europe and Asia, where we believe meaningful growth opportunities exist.

We believe we are the industry's most operationally efficient manufacturer due to our vertical integration, highly variable cost structure and intense focus on lean manufacturing. We continually seek to use lean principles to reduce costs and increase the efficiency of our manufacturing operations. Our manufacturing efficiencies have contributed to the increase of our gross profit per unit by

Table of Contents

approximately 3.0% per annum, compounded annually, from 2000 to 2009. While we currently manufacture our products in three facilities that we own in Milwaukee, Wisconsin, Rockland, Maine and Johnson City, Tennessee, we have improved our manufacturing efficiency to the point that we will be closing our Johnson City, Tennessee facility effective mid-2010. We expect that the closing of this facility will yield estimated cost savings of approximately \$4 million annually, with no anticipated reduction in production capacity. Furthermore, our manufacturing efficiency allows us to deliver desired products quickly to our customers during times of sudden and unpredictable snowfall events when our customers need our products immediately.

Our Industry

The light truck snow and ice control equipment industry in North America consists predominantly of domestic participants that manufacture their products in North America. The annual demand for snow and ice control equipment is driven primarily by the replacement cycle of the existing installed base, which is predominantly a function of the average life of a snowplow or spreader and is driven by usage and maintenance practices of the end-user. We believe actively-used snowplows are typically replaced, on average, every 7 to 8 years.

The primary factor influencing the replacement cycle for snow and ice control equipment is the level, timing and location of snowfall. Sales of snow and ice control equipment in any given year and region are most heavily influenced by local snowfall levels in the prior snow season. Heavy snowfall during a given winter causes equipment usage to increase, resulting in greater wear and tear and shortened life cycles, thereby creating a need for replacement equipment and additional parts and accessories.

While snowfall levels vary within a given year and from year-to-year, snowfall, and the corresponding replacement cycle of snow and ice control equipment, is relatively consistent over multi-year periods. The following chart depicts aggregate annual and eight-year (based on the typical life of our snowplows) rolling average of the aggregate snowfall levels in 66 cities in 26 snowbelt states across the Northeast, East, Midwest and Western United States where we monitor snowfall levels) from 1980 to 2009. As the chart indicates, since 1982 aggregate snowfall levels in any given rolling eight-year period have been fairly consistent, ranging from 2,742 to 3,295 inches.

Snowfall in Snowbelt States (inches)
(for October 1 through March 31)

Note:
The 8-year rolling average snowfall is not presented prior to 1982 for purposes of the calculation due to lack of snowfall data prior to 1975. Snowfall data in this chart is not adjusted for snowfall outside of the 66 cities in the 26 states reflected.

Source: National Oceanic and Atmospheric Administration's National Weather Service.

The demand for snow and ice control equipment can also be influenced by general economic conditions in the United States, as well as local economic conditions in the snowbelt regions in North America. In stronger economic conditions, our end-users may choose to replace or upgrade existing equipment before its useful life has ended, while in weak economic conditions, our end-users may seek to extend the useful life of equipment, thereby increasing the sales of parts and accessories. However,

Table of Contents

since snow and ice control management is a non-discretionary service necessary to ensure public safety and continued personal and commercial mobility in populated areas that receive snowfall, end-users cannot extend the useful life of snow and ice control equipment indefinitely and must replace equipment that has become too worn, unsafe or unreliable, regardless of economic conditions.

Sales of parts and accessories for 2008 and 2009, respectively, were approximately 85.8% and 58.3% higher than average annual parts and accessories sales over the preceding ten years, which management believes is largely a result of the deferral of new equipment purchases due to the recent economic downturn. Although sales of snow and ice control units increased in 2008 and 2009 as compared to 2007, management believes that absent the recent economic downturn, equipment sales in 2008 and 2009 would have been considerably higher due to the high levels of snowfall during these years, as equipment unit sales in 2008 and 2009 remained below the ten-year average, while snowfall levels in 2008 and 2009 were considerably above the ten-year average. Management believes this deferral of new equipment purchases could result in an elevated multi-year replacement cycle as the economy recovers.

Long-term growth in the overall snow and ice control equipment market also results from geographic expansion of developed areas in the snowbelt regions of North America, as well as consumer demand for technological enhancements in snow and ice control equipment and related parts and accessories that improves efficiency and reliability. Continued construction in the snowbelt regions in North America increases the aggregate area requiring snow and ice removal, thereby growing the market for snow and ice control equipment. In addition, the development and sale of more reliable, more efficient and more sophisticated products have contributed to an approximate 2% to 4% average unit price increase in each of the past five years.

Our Competitive Strengths

We compete solely with other North American manufacturers who do not benefit from our extensive distributor network, manufacturing efficiencies and depth and breadth of products. As the market leader in snow and ice control equipment for light trucks, we enjoy a set of competitive advantages versus smaller, more regionally-focused equipment providers, which allows us to generate robust cash flows in all snowfall environments and to support continued investment in our products, distribution capabilities and brand regardless of annual volume fluctuations. We believe these advantages are rooted in the following competitive strengths and reinforces our industry leadership over time.

Exceptional Customer Loyalty and Brand Equity. Our brands enjoy exceptional customer loyalty and brand equity in the snow and ice control equipment industry with both end-users and distributors which have been developed through over 50 years of superior innovation, productivity, reliability and support, consistently delivered season after season. We believe past brand experience, rather than price, is the key factor impacting snowplow purchasing decisions.

Broadest and Most Innovative Product Offering. We provide the industry's broadest product offering with a full range of snowplows, sand and salt spreaders and related parts and accessories. We believe we maintain the industry's largest and most advanced in-house new product development program, historically introducing several new and redesigned products each year. Our broad product offering and commitment to new product development is essential to maintaining and growing our leading market share position as well as continuing to increase the profitability of our business.

Extensive North American Distributor Network. With over 720 direct distributors, we benefit from having the most extensive North American direct distributor network in the industry, providing a significant competitive advantage over our peers. Our distributors function not only as sales and support agents (providing access to parts and service), but also as industry partners providing real-time

Table of Contents

end-user information, such as retail inventory levels, changing consumer preferences or desired functionality enhancements, which we use as the basis for our product development efforts.

Leader in Operational Efficiency. We believe we are a leader in operational efficiency in our industry, resulting from our application of lean manufacturing principles and a highly variable cost structure. By utilizing lean principles, we are able to adjust production levels easily to meet fluctuating demand, while controlling costs in slower periods. This operational efficiency is supplemented by our highly variable cost structure, driven in part by our access to a sizable temporary workforce (comprising approximately 10-15% of our total workforce), which we can quickly adjust, as needed. These manufacturing efficiencies enable us to respond rapidly to urgent customer demand during times of sudden and unpredictable snowfalls, allowing us to provide exceptional service to our existing customer base and capture new customers from competitors that we believe cannot service their customers' needs with the same speed and reliability.

Strong Cash Flow Generation. We are able to generate significant cash flow as a result of relatively consistent high profitability (Adjusted EBITDA Margins averaged 25.4% from 2007 to 2009), low capital spending requirements and predictable timing of our working capital requirements. Our cash flow results will also benefit substantially from approximately \$18 million of annual tax-deductible intangible and goodwill expense over the next ten years, which has the impact of reducing our corporate taxes owed by approximately \$6.7 million on an annual basis during this period, in the event we have sufficient taxable income to utilize such benefit. Our significant cash flow has allowed us to reinvest in our business, reduce long term debt by 20% over the past 6 years and pay substantial dividends on a pro rata basis to our stockholders, although no such dividends have been declared since 2006.

Experienced Management Team. We believe our business benefits from an exceptional management team that is responsible for establishing our leadership in the snow and ice control equipment industry for light trucks. Our senior management team, consisting of four officers, has an average of approximately 19 years of weather-related industry experience and an average of over nine years with our company. James Janik, our President and Chief Executive Officer, has been with us for over 16 years and in his current role since 2000, and through his strategic vision, we have been able to expand our distributor network and grow our market leading position. Certain of our executive officers will sell a portion of their shares of common stock (including shares underlying options that they will exercise) in this offering and may also be entitled to payments under our Liquidity Bonus Plan. See "Principal and Selling Stockholders" and "Executive Compensation Compensation Discussion and Analysis Severance and Change of Control Arrangements." Additionally, our Chief Executive Officer holds deferred stock units that will convert into an equivalent number of shares of our common stock upon expiration of the lock-up agreement entered into by him. See "Executive Compensation Potential Payments upon Termination or Change of Control."

Our Business Strategy

Our business strategy is to capitalize on our competitive strengths to maximize cash flow to pay dividends, reduce indebtedness and reinvest in our business to create stockholder value. The building blocks of our strategy are:

Continuous Product Innovation. We believe new product innovation is critical to maintaining and growing our market-leading position in the snow and ice control equipment industry. We will continue to focus on developing innovative solutions to increase productivity, ease of use, reliability, durability and serviceability of our products and on incorporating lean manufacturing concepts into our product development process, which has allowed us to reduce the overall cost of development and, more importantly, to reduce our time-to-market by nearly one-half. As a result of these efforts, approximately

Table of Contents

\$73.0 million or 50% of our 2009 equipment sales came from products introduced or redesigned in the last five years.

Distributor Network Optimization. Over the last ten years, we have grown our network by over 250 distributors. We will continually seek opportunities to continue to expand our extensive distribution network by adding high-quality, well-capitalized distributors in select geographic areas and by cross-selling our industry-leading brands within our distribution network to ensure we maximize our ability to generate revenue while protecting our industry leading reputation, customer loyalty and brands. We will also focus on optimizing this network by providing in-depth training, valuable distributor support and attractive promotional and incentive opportunities. As a result of these efforts, we believe a majority of our distributors choose to sell our products exclusively. We believe this sizable high quality network is unique in the industry, providing us with valuable insight into purchasing trends and customer preferences, and would be very difficult to replicate.

Aggressive Asset Management and Profit Focus. We will continue to aggressively manage our assets in order to maximize our cash flow generation despite seasonal and annual variability in snowfall levels. We believe our ability is unique in our industry and enables us to achieve attractive margins in all snowfall environments. Key elements of our asset management and profit focus strategies include:

employment of a highly variable cost structure, which allows us to quickly adjust costs in response to real-time changes in demand;

use of enterprise-wide lean principles, which allow us to easily adjust production levels up or down to meet demand;

implementation of a pre-season order program, which incentivizes distributors to place orders prior to the retail selling season and thereby enables us to more efficiently utilize our assets; and

development of a vertically integrated business model, which we believe provides us cost advantages over our competition.

Additionally, although modest, our capital expenditure requirements and operating expenses can be temporarily reduced in response to anticipated or actual lower sales in a particular year to maximize cash flow.

Flexible, Lean Enterprise Platform. We will continue to utilize lean principles to maximize the flexibility, efficiency and productivity of our manufacturing operations while reducing the associated costs, enabling us to increase distributor and end-user satisfaction. For example, in an environment where shorter lead times and near-perfect order fulfillment are important to our distributors, we believe our lean processes have helped us to improve our shipping performance and build a reputation for providing industry leading shipping performance. In 2009, we fulfilled 98.2% of our orders on or before the requested ship date, without error in content, packaging or delivery as compared to 71.0% in 2005.

Our cost reduction efforts also include the rationalization of our supply base and implementation of a global sourcing strategy, resulting in approximately \$2.6 million of cumulative annualized cost savings from 2006 to 2009. In January 2009, we opened a sourcing office in China, which will become our central focus for specific component purchases and will provide a majority of our procurement cost savings in the future.

Our Growth Opportunities

Increase Our Industry Leading Market Share. We plan to leverage our industry leading position, distribution network and new product innovation capabilities to capture market share in the North American snow and ice control equipment market, focusing our primary efforts on increasing

Table of Contents

penetration in those North American markets where we believe our overall market share is less than 50%. We also plan to continue growing our presence in the snow and ice control equipment market outside of North America, particularly in Asia and Europe, which we believe could provide significant growth opportunities in the future.

Opportunistically Seek New Products and New Markets. We will consider external growth opportunities within the snow and ice control industry and other equipment or component markets. We plan to continue to evaluate acquisition opportunities within our industry that can help us expand our distribution reach, enhance our technology and as a consequence improve the breadth and depth of our product lines. We also consider diversification opportunities in adjacent markets that complement our business model and could offer us the ability to leverage our core competencies to create stockholder value.

Summary Risk Factors

An investment in our common stock involves a high degree of risk. You should carefully consider the risks summarized below, the risks described under "Risk Factors" beginning on page 14 and the other information contained in this prospectus, including our consolidated financial statements and the related notes, before deciding to purchase any shares of our common stock:

our results of operations depend primarily on the level, timing and location of snowfall in the regions in which we offer our products;

the seasonality and year-to-year variability of our business can cause our results of operations and financial condition to be materially different from quarter-to-quarter and from year-to-year;

if economic conditions in the United States continue to remain weak or deteriorate further, our results of operations and ability to pay dividends may be adversely affected;

our failure to maintain good relationships with our distributors, the loss or consolidation of our distributor base or the actions or inactions of our distributors could have an adverse effect on our results of operations and ability to pay dividends;

if we are unable to develop new products or improve upon our existing products on a timely basis, our business and financial condition could be adversely affected;

if our costs of labor or the price of steel or other components of our products increase, our gross margins could decline;

you may not receive the level of dividends provided for in the dividend policy that our Board of Directors will adopt or any dividends at all; and

satisfying our debt service obligations and paying dividends may leave us with insufficient cash to fund unexpected cash needs and growth.

Contemplated Financing Transactions in Connection with this Offering

In connection with this offering, we intend to increase our existing term loan facility by \$ million. We plan to use the proceeds from this offering together with an increase in our term loan facility to redeem the outstanding 7³/₄% Senior Notes due 2012, which we refer to in this prospectus as our senior notes, issued by our direct wholly-owned subsidiaries, Douglas Dynamics, L.L.C. which we refer to in this prospectus as Douglas LLC, and Douglas Dynamics Finance Company, which we refer to in this prospectus as Douglas Finance. The total redemption amount is expected to be approximately \$ million, which amount includes accrued and unpaid interest and the associated redemption premium. Concurrent with the consummation of this offering, we also intend to amend our existing senior credit facilities to permit the

redemption of our senior notes.

Table of Contents

Company Information

Douglas Holdings is a holding corporation that was formed and capitalized by Aurora Equity Partners II L.P., a Delaware limited partnership, and Aurora Overseas Equity Partners II, L.P., a Cayman Islands exempt limited partnership, which we collectively refer to in this prospectus as the "Aurora Entities." The Aurora Entities, together with certain of our directors, officers and other stockholders, will sell a portion of their shares of our common stock in this offering. See "Principal and Selling Stockholders." In addition, Aurora Management Partners LLC, an affiliate of the Aurora Entities, together with ACOF Management, L.P., an affiliate of Ares Corporate Opportunities Fund, L.P., which we refer to as "Ares" in this prospectus, will receive an aggregate payment of approximately \$5.8 million in connection with the amendment and restatement of our Management Services Agreement. See "Certain Relationships and Related Party Transactions Management Services Agreement."

Douglas Holdings was formed for the purpose of effectuating the acquisition of our business in March 2004 from AK Steel Corporation, which we refer to in this prospectus as the Acquisition. Douglas Holdings owns all of the issued and outstanding limited liability company interests of Douglas LLC, our operating company, together with its subsidiaries.

We maintain our principal executive offices at 7777 North 73rd Street, Milwaukee, Wisconsin 53223, and our telephone number is (414) 354-2310. We maintain a website at www.DouglasDynamics.com. Information contained on our website is not a part of, and is not incorporated by reference into, this prospectus.

"WESTERN," "FISHER" and "BLIZZARD" and their respective logos are trademarks. Solely for convenience, from time to time we refer to our trademarks in this prospectus without the ® symbols, but such references are not intended to indicate that we will not assert, to the fullest extent under applicable law, our rights to our trademarks.

Table of Contents**The Offering**

Issuer	Douglas Dynamics, Inc.
Common stock offered by us	shares
Common stock offered by the selling stockholders	shares
Over-allotment option	The selling stockholders have granted the underwriters a 30-day option to purchase up to additional outstanding shares of common stock from the selling stockholders at the initial public offering price less underwriting discounts and commissions. The option may be exercised only to cover any over-allotments.
Common stock outstanding after this offering	shares.
Use of proceeds	We intend to use the net proceeds from this offering together with an increase in our term loan facility to redeem our senior notes, including accrued and unpaid interest and the related redemption premium, for an estimated total of \$ million. We will not receive any proceeds from the sale of shares by the selling stockholders, including any shares sold pursuant to the underwriters' over-allotment option. See "Use of Proceeds."
Dividend policy	Our Board of Directors will adopt a dividend policy, effective upon the consummation of this offering, that reflects an intention to distribute to our stockholders a regular quarterly cash dividend, commencing with the first full fiscal quarter following the consummation of this offering, at an initial quarterly rate of \$ per share. The declaration and payment of these dividends will be at the discretion of our Board of Directors and will depend upon many factors, including our financial condition and earnings, legal requirements, taxes, the terms of our indebtedness and other factors our Board of Directors may deem to be relevant. See "Dividend Policy and Restrictions."
Risk factors	See "Risk Factors" beginning on page 14 of this prospectus for a discussion of factors you should carefully consider before deciding to invest in our common stock.
Proposed NYSE symbol	PLOW

Table of Contents

Unless otherwise noted, all information in this prospectus assumes:

no exercise of the underwriters' over-allotment option;

the repurchase, after the consummation of this offering, of all of our senior notes, including accrued and unpaid interest through the anticipated redemption date (30 days following the consummation of this offering) and the associated redemption premium for a total of approximately \$ million;

a -for-one stock split of our common stock that will occur prior to the consummation of this offering; and

a public offering price of \$ per share of our common stock, which is the mid-point of the range set forth on the front cover of this prospectus.

Table of Contents**SUMMARY HISTORICAL CONSOLIDATED FINANCIAL AND OPERATING DATA**

The following summary consolidated financial information as of and for the years ended December 31, 2007, 2008 and 2009 are derived from our audited consolidated financial statements which are included elsewhere in this prospectus.

The results indicated below and elsewhere in this prospectus are not necessarily indicative of our future performance. You should read this information together with "Selected Consolidated Financial Data," "Capitalization," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated financial statements and related notes included elsewhere in this prospectus.

Discussion of Adjusted EBITDA

In addition to our results under United States generally accepted accounting principles, which we refer to in this prospectus as GAAP, we also use Adjusted EBITDA and Adjusted EBITDA Margin, non-GAAP financial measures, which we consider to be important and supplemental measures of our performance. Adjusted EBITDA represents net income before interest, taxes, depreciation and amortization, as further adjusted for certain non-recurring charges related to the closure of our Johnson City, Tennessee manufacturing facility, certain unrelated legal expenses and a one-time stock option repurchase, as well as management fees paid by us to Aurora Management Partners LLC, a Delaware limited liability company and an affiliate of the Aurora Entities, and ACOF Management, L.P., a Delaware limited partnership and an affiliate of Ares. Adjusted EBITDA Margin is defined as Adjusted EBITDA as a percentage of net sales. We use, and we believe our investors, and in particular, the Aurora Entities and Ares, which we collectively refer to as our principal stockholders in this prospectus, benefit from the presentation of Adjusted EBITDA and Adjusted EBITDA Margin in evaluating our operating performance because they provide us and our investors with additional tools to compare our operating performance on a consistent basis by removing the impact of certain items that management believes do not directly reflect our core operations. In addition, we believe that Adjusted EBITDA and Adjusted EBITDA Margin are useful to investors and other external users of our consolidated financial statements in evaluating our operating performance as compared to that of other companies, because they allow them to measure a company's operating performance without regard to items such as interest expense, taxes, depreciation and depletion, and amortization and accretion, which can vary substantially from company to company depending upon accounting methods and book value of assets and liabilities, capital structure and the method by which assets were acquired. Our management also uses Adjusted EBITDA and Adjusted EBITDA Margin for planning purposes, including the preparation of our annual operating budget and financial projections and believes Adjusted EBITDA Margin is useful in assessing the profitability of our core businesses. Management also uses Adjusted EBITDA to evaluate our ability to make certain payments, including dividends, in compliance with our senior credit facilities, which is determined based on a calculation of "Consolidated Adjusted EBITDA" that is substantially similar to Adjusted EBITDA. The definition of Consolidated Adjusted EBITDA under our senior credit facilities differs from our definition of Adjusted EBITDA in this prospectus primarily because the definition in our senior credit facilities excludes additional non-cash charges and non-recurring expenses, which we have not incurred during the periods presented. Specifically, Consolidated Adjusted EBITDA under our senior credit facilities is comprised of net income before interest, taxes, depreciation and amortization as further adjusted to exclude the effect of:

expenses for management fees paid by us pursuant to our Management Services Agreement;

non-cash items resulting in an increase in net income for such period that are unusual or otherwise non-recurring items;

certain non-cash charges including:

non-cash impairment charges;

non-cash expenses resulting from the grant of stock and stock options and other compensation to our management pursuant to a written incentive plan or agreement;

other non-cash items that are unusual or otherwise non-recurring items;

certain non-recurring expenses including:

any extraordinary losses and non-recurring charges during any period (including severance, relocation costs, one-time compensation charges and losses or charges associated with interest rate agreements);

restructuring charges or reserves (including costs related to closure of facilities);

Table of Contents

any transaction costs incurred in connection with the issuance of securities or any refinancing transaction, in each case whether or not such transaction is consummated;

any fees and expensed related to certain acquisitions permitted under by our senior credit facilities;

and to include as a deduction in calculating Consolidated Adjusted EBITDA:

certain cash payments made during the applicable period reducing reserves or liabilities for accruals made in prior periods but only to the extent such reserves or accruals were excluded from Consolidated Adjusted EBITDA in a prior period; and

restricted payments made during such period to Douglas Holdings to pay its general administrative costs and expenses.

Adjusted EBITDA and Adjusted EBITDA Margin have limitations as analytical tools. As a result, you should not consider them in isolation, or as substitutes for net income, operating income, operating income margin, cash flow from operating activities or any other measure of financial performance or liquidity presented in accordance with GAAP. Some of these limitations are:

Adjusted EBITDA and Adjusted EBITDA Margin do not reflect our cash expenditures or future requirements for capital expenditures or contractual commitments;

Adjusted EBITDA and Adjusted EBITDA Margin do not reflect changes in, or cash requirements for, our working capital needs;

Adjusted EBITDA and Adjusted EBITDA Margin do not reflect the interest expense, or the cash requirements necessary to service interest or principal payments, on our indebtedness;

Although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future, and Adjusted EBITDA and Adjusted EBITDA Margin do not reflect any cash requirements for such replacements;

Other companies, including other companies in our industry, may calculate Adjusted EBITDA and Adjusted EBITDA Margin differently than we do, limiting their usefulness as comparative measures; and

Adjusted EBITDA and Adjusted EBITDA Margin do not reflect tax obligations whether current or deferred.

The Securities and Exchange Commission, which we refer to in this prospectus as the SEC, has adopted rules to regulate the use in filings with the SEC and public disclosures and press releases of non-GAAP financial measures, such as Adjusted EBITDA and Adjusted EBITDA Margin, that are derived on the basis of methodologies other than in accordance with GAAP. These rules require, among other things:

a presentation with equal or greater prominence of the most comparable financial measure or measures calculated and presented in accordance with GAAP; and

a statement disclosing the purposes for which our management uses the non-GAAP financial measure.

The rules prohibit, among other things:

exclusion of charges or liabilities that require cash settlement or would have required cash settlement absent an ability to settle in another manner, from non-GAAP liquidity measures;

Table of Contents

adjustment of a non-GAAP performance measure to eliminate or smooth items identified as non-recurring, infrequent or unusual, when the nature of the charge or gain is such that it is reasonably likely to recur; and

presentation of non-GAAP financial measures on the face of any financial information.

The following table presents a reconciliation of net income (loss), the most comparable GAAP financial measure, to Adjusted EBITDA as well as the resulting calculation of Adjusted EBITDA Margin, for each of the periods indicated:

	For the year ended December 31,		
	2007	2008	2009
	(in thousands)		
Net income (loss)	\$ (1,057)	\$ 11,471	\$ 9,843
Interest expense net	19,622	17,299	15,520
Loss on extinguishment of debt	2,733		
Income taxes	(749)	6,793	3,986
Depreciation expense	4,632	4,650	5,797
Amortization	6,164	6,160	6,161
EBITDA	31,345	46,373	\$ 41,307
Management fees	1,400	1,369	1,393
Stock option repurchase			732(1)
Other non-recurring charges			1,748(2)
Adjusted EBITDA	\$ 32,745	\$ 47,742	\$ 45,180
Adjusted EBITDA Margin(3)	23.4%	26.5%	25.9%

(1) Reflects the non-cash expense associated with the repurchase of stock options from certain of our executives.

(2) Reflects severance expenses and one-time, non-recurring expenses for facility preparation and moving costs related to the closure of our Johnson City, Tennessee facility of \$1,054 and certain unrelated legal expenses of \$694.

(3) Adjusted EBITDA Margin is defined as Adjusted EBITDA as a percentage of net sales.

Table of Contents

RISK FACTORS

An investment in our common stock involves a high degree of risk. You should carefully consider the risks described below and all of the other information contained in this prospectus before deciding whether to purchase our common stock. Our business, prospects, financial condition and operating results could be materially adversely affected by any of these risks, as well as other risks not currently known to us or that we currently consider immaterial. The trading price of our common stock could decline due to any of these risks, and you may lose all or part of your investment. In assessing the risks described below, you should also refer to the other information contained in this prospectus, including our consolidated financial statements and the related notes, before deciding to purchase any shares of our common stock.

Risks Related to Our Business and Industry

Our results of operations depend primarily on the level, timing and location of snowfall. As a result, a decline in snowfall levels in multiple regions for an extended time could cause our results of operations to decline and adversely affect our ability to pay dividends.

As a manufacturer of snow and ice control equipment for light trucks, and related parts and accessories, our sales depend primarily on the level, timing and location of snowfall in the regions in which we offer our products. A low level or lack of snowfall in any given year in any of the snowbelt regions in North America (primarily the Midwest, East and Northeast regions of the United States as well as all provinces of Canada) will likely cause sales of our products to decline in such year as well as the subsequent year, which in turn may adversely affect our results of operations and ability to pay dividends. See "Management's Discussion and Analysis of Financial Condition and Results of Operations Seasonality and Year-to-Year Variability." A sustained period of reduced snowfall events in one or more of the geographic regions in which we offer our products could cause our results of operations to decline and adversely affect our ability to pay dividends.

The year-to-year variability of our business can cause our results of operations and financial condition to be materially different from year-to-year; whereas the seasonality of our business can cause our results of operations and financial condition to be materially different from quarter-to-quarter.

Because our business depends on the level, timing and location of snowfall, our results of operations vary from year-to-year. Additionally, because the annual snow season typically only runs from October 1 through March 31, our distributors typically purchase our products during the second and third quarters. As a result, we operate in a seasonal business. We not only experience seasonality in our sales, but also experience seasonality in our working capital needs. Consequently, our results of operations and financial condition can vary from year-to-year, as well from quarter-to-quarter, which could affect our ability to pay dividends. If we are unable to effectively manage the seasonality and year-to-year variability of our business, our results of operations, financial condition and ability to pay dividends may suffer.

If economic conditions in the United States continue to remain weak or deteriorate further, our results of operations, financial condition and ability to pay dividends may be adversely affected.

Historically, demand for snow and ice control equipment for light trucks has been influenced by general economic conditions in the United States, as well as local economic conditions in the snowbelt regions in North America. During the last few years, economic conditions throughout the United States have been extremely weak, and may not improve in the foreseeable future. Weakened economic conditions may cause our end-users to delay purchases of replacement snow and ice control equipment and instead repair their existing equipment, leading to a decrease in our sales of new equipment. Weakened economic conditions may also cause our end-users to delay their purchases of new light trucks. Because our end-users tend to purchase new snow and ice control equipment concurrent with their purchase of new light trucks, their delay in purchasing new light trucks can also result in the

Table of Contents

deferral of their purchases of new snow and ice control equipment. The deferral of new equipment purchases during periods of weak economic conditions may negatively affect our results of operations, financial condition and ability to pay dividends.

Weakened economic conditions may also cause our end-users to consider price more carefully in selecting new snow and ice control equipment. Historically, considerations of quality and service have outweighed considerations of price, but in a weak economy, price may become a more important factor. Any refocus away from quality in favor of cheaper equipment could cause end-users to shift away from our products to less expensive products, which in turn would adversely affect our results of operations and our ability to pay dividends.

Our failure to maintain good relationships with our distributors, the loss or consolidation of our distributor base or the actions or inactions of our distributors could have an adverse effect on our results of operations and our ability to pay dividends.

We depend on a network of truck equipment distributors to sell, install and service our products. Nearly all of these sales and service relationships are at will, and less than 1% of our distributors have agreed not to offer products that compete with our products. As a result, almost all of our distributors could discontinue the sale and service of our products at any time, and those distributors that primarily sell our products may choose to sell competing products at any time. Further, difficult economic or other circumstances could cause any of our distributors to discontinue their businesses. Moreover, if our distributor base were to consolidate or if any of our distributors were to discontinue their business, competition for the business of fewer distributors would intensify. If we do not maintain good relationships with our distributors, or if we do not provide product offerings and pricing that meet the needs of our distributors, we could lose a substantial amount of our distributor base. A loss of a substantial portion of our distributor base could cause our sales to decline significantly, which would have an adverse effect on our results of operations and ability to pay dividends.

In addition, our distributors may not provide timely or adequate service to our end-users. If this occurs, our brand identity and reputation may be damaged, which would have an adverse effect on our results of operations and ability to pay dividends.

Lack of available financing options for our end-users or distributors may adversely affect our sales volumes.

Our end-user base is highly concentrated among professional snowplowers, who comprise over 50% of our end-users, many of whom are individual landscapers who remove snow during the winter and landscape during the rest of the year, rather than large, well-capitalized corporations. These end-users often depend upon credit to purchase our products. If credit is unavailable on favorable terms or at all, our end-users may not be able to purchase our products from our distributors, which would in turn reduce sales and adversely affect our results of operations and ability to pay dividends.

In addition, because our distributors, like our end-users, rely on credit to purchase our products, if our distributors are not able to obtain credit, or access credit on favorable terms, we may experience delays in payment or nonpayment for delivered products. Further, if our distributors are unable to obtain credit or access credit on favorable terms, they could experience financial difficulties or bankruptcy and cease purchases of our products altogether. Thus, if financing is unavailable on favorable terms or at all, our results of operations and ability to pay dividends would be adversely affected.

The price of steel, a commodity necessary to manufacture our products, is highly variable. If the price of steel increases, our gross margins could decline.

Steel is a significant raw material used to manufacture our products. During 2007, 2008 and 2009, our steel purchases were approximately 12%, 15% and 18% of our revenue, respectively. The steel

Table of Contents

industry is highly cyclical in nature, and steel prices have been volatile in recent years and may remain volatile in the future. Steel prices are influenced by numerous factors beyond our control, including general economic conditions domestically and internationally, the availability of raw materials, competition, labor costs, freight and transportation costs, production costs, import duties and other trade restrictions. After experiencing a downward trend in steel prices throughout most of 2009, steel prices may increase as a result of increased demand from the automobile and consumer durable sectors. If the price of steel increases, our variable costs may increase. We may not be able to mitigate these increased costs through the implementation of permanent price increases or temporary invoice surcharges, especially if economic conditions remain weak and our distributors and end-users become more price sensitive. If we are unable to successfully mitigate such cost increases in the future, our gross margins could decline.

We depend on outside suppliers who may be unable to meet our volume and quality requirements, and we may be unable to obtain alternative sources.

We purchase certain components essential to our snowplows and sand and salt spreaders from outside suppliers, including off-shore sources. Most of our key supply arrangements can be discontinued at any time. A supplier may encounter delays in the production and delivery of such products and components or may supply us with products and components that do not meet our quality, quantity or cost requirements. Additionally, a supplier may be forced to discontinue operations. Any discontinuation or interruption in the availability of quality products and components from one or more of our suppliers may result in increased production costs, delays in the delivery of our products and lost end-user sales, which could have an adverse effect on our business and financial condition.

In addition, we have begun to increase the number of our off-shore suppliers. Our increased reliance on off-shore sourcing may cause our business to be more susceptible to the impact of natural disasters, war and other factors that may disrupt the transportation systems or shipping lines used by our suppliers, a weakening of the dollar over an extended period of time and other uncontrollable factors such as changes in foreign regulation or economic conditions. In addition, reliance on off-shore suppliers may make it more difficult for us to respond to sudden changes in demand because of the longer lead time to obtain components from off-shore sources. We may be unable to mitigate this risk by stocking sufficient materials to satisfy any sudden or prolonged surges in demand for our products. If we cannot satisfy demand for our products in a timely manner, our sales could suffer as distributors can cancel purchase orders without penalty until shipment.

We do not sell our products under long-term purchase contracts, and sales of our products are significantly impacted by factors outside of our control; therefore, our ability to estimate demand is limited.

We do not enter into long-term purchase contracts with our distributors and the purchase orders we receive may be cancelled without penalty until shipment. Therefore, our ability to accurately predict future demand for our products is limited. Nonetheless, we attempt to estimate demand for our products for purposes of planning our annual production levels and our long-term product development and new product introductions. We base our estimates of demand on our own market assessment, snowfall figures, quarterly field inventory surveys and regular communications with our distributors. Because wide fluctuations in the level, timing and location of snowfall, economic conditions and other factors may occur, each of which is out of our control, our estimates of demand may not be accurate. Underestimating demand could result in procuring an insufficient amount of materials necessary for the production of our products, which may result in increased production costs, delays in product delivery, missed sale opportunities and a decrease in customer satisfaction. Overestimating demand could result in the procurement of excessive supplies, which could result in increased inventory and associated carrying costs.

Table of Contents

If we are unable to enforce, maintain or continue to build our intellectual property portfolio, or if others invalidate our intellectual property rights, our competitive position may be harmed.

We rely on a combination of patents, trade secrets and trademarks to protect certain of the proprietary aspects of our business and technology. We hold approximately 20 U.S. registered trademarks (including the trademarks WESTERN®, FISHER® and BLIZZARD®), 5 Canadian registered trademarks, 28 U.S. issued and pending patents and patent applications and 15 Canadian patents. Although we work diligently to protect our intellectual property rights, monitoring the unauthorized use of our intellectual property is difficult, and the steps we have taken may not prevent unauthorized use by others. In addition, in the event a third party challenges the validity of our intellectual property rights, a court may determine that our intellectual property rights may not be valid or enforceable. An adverse determination with respect to our intellectual property rights may harm our business prospects and reputation. Third parties may design around our patents or may independently develop technology similar to our trade secrets. The failure to adequately build, maintain and enforce our intellectual property portfolio could impair the strength of our technology and our brands, and harm our competitive position. Although the Company has no reason to believe that its intellectual property rights are vulnerable, previously undiscovered intellectual property could be used to invalidate our rights.

If we are unable to develop new products or improve upon our existing products on a timely basis, it could have an adverse effect on our business and financial condition.

We believe that our future success depends, in part, on our ability to develop on a timely basis new technologically advanced products or improve upon our existing products in innovative ways that meet or exceed our competitors' product offerings. Continuous product innovation ensures that our consumers have access to the latest products and features when they consider buying snow and ice control equipment. Maintaining our market position will require us to continue to invest in research and development and sales and marketing. Product development requires significant financial, technological and other resources. We may be unsuccessful in making the technological advances necessary to develop new products or improve our existing products to maintain our market position. Industry standards, end-user expectations or other products may emerge that could render one or more of our products less desirable or obsolete. If any of these events occur, it could cause decreases in sales, a failure to realize premium pricing and an adverse effect on our business and financial condition.

We face competition from other companies in our industry, and if we are unable to compete effectively with these companies, it could have an adverse effect on our sales and profitability.

We primarily compete with regional manufacturers of snow and ice control equipment for light trucks. While we are the most geographically diverse company in our industry, we may face increasing competition in the markets in which we operate. Moreover, some of our competitors may develop superior service and may have or may develop greater financial resources, lower costs, superior technology or more favorable operating conditions than we maintain. As a result, competitive pressures we face may cause price reductions for our products, which would affect our profitability or result in decreased sales and operating income.

We are subject to complex laws and regulations, including environmental and safety regulations, that can adversely affect the cost, manner or feasibility of doing business.

Our operations are subject to certain federal, state and local laws and regulations relating to, among other things, the generation, storage, handling, emission, transportation, disposal and discharge of hazardous and non-hazardous substances and materials into the environment, the manufacturing of motor vehicle accessories and employee health and safety. We cannot be certain that existing and

Table of Contents

future laws and regulations and their interpretations will not harm our business or financial condition. We currently make and may be required to make large and unanticipated capital expenditures to comply with environmental and other regulations, such as:

applicable motor vehicle safety standards established by the National Highway Traffic Safety Administration;

reclamation and remediation and other environmental protection; and

standards for workplace safety established by the Occupational Safety and Health Administration.

While we monitor our compliance with applicable laws and regulations and attempt to budget for anticipated costs associated with compliance, we cannot predict the future cost of such compliance. During 2009 we expended approximately \$450,000 related to compliance with such regulations and could expend similar or greater amounts in the future in the event of future legislation changes or unforeseen events, such as a workplace accident or environmental discharge, or if we otherwise discover we are in non-compliance with an applicable regulation. In addition, under these laws and regulations, we could be liable for:

product liability claims;

personal injuries;

investigation and remediation of environmental contamination and other governmental sanctions such as fines and penalties; and

other environmental damages.

Our operations could be significantly delayed or curtailed and our costs of operations could significantly increase as a result of regulatory requirements, restrictions or claims. We are unable to predict the ultimate cost of compliance with these requirements or their effect on our operations.

Financial market conditions have had a negative impact on the return on plan assets for our pension plans, which may require additional funding and negatively impact our cash flows.

Our pension expense and required contributions to our pension plan are directly affected by the value of plan assets, the projected rate of return on plan assets, the actual rate of return on plan assets and the actuarial assumptions we use to measure the defined benefit pension plan obligations. Due to the significant financial market downturn during 2008, the funded status of our pension plans has declined. As of December 31, 2009, our pension plans were underfunded by approximately \$9.0 million. In 2009, contributions to our defined benefit pension plans were approximately \$1.4 million. If plan assets continue to perform below expectations, future pension expense and funding obligations will increase, which would have a negative impact on our cash flows. Moreover, under the Pension Protection Act of 2006, it is possible that continued losses of asset values may necessitate accelerated funding of our pension plans in the future to meet minimum federal government requirements.

The statements regarding our industry, market positions and market share in this prospectus are based on our management's estimates and assumptions. While we believe such statements are reasonable, such statements have not been independently verified.

Information contained in this prospectus concerning the snow and ice control equipment industry for light trucks, our general expectations concerning this industry and our market positions and other market share data regarding the industry are based on estimates our management prepared using end-user surveys, anecdotal data from our distributors and distributors that carry our competitors' products, our results of operations and management's past experience, and on assumptions made, based on our management's knowledge of this industry, all of which we believe to be reasonable. These

Table of Contents

estimates and assumptions are inherently subject to uncertainties, especially given the year-to-year variability of snowfall and the difficulty of obtaining precise information about our competitors, and may prove to be inaccurate. In addition, we have not independently verified the information from any third-party source and thus cannot guarantee its accuracy or completeness, although management also believes such information to be reasonable. Our actual operating results may vary significantly if our estimates and outlook concerning the industry, snowfall patterns, our market positions or our market shares turn out to be incorrect.

We are subject to product liability claims, product quality issues, and other litigation from time to time that could adversely affect our operating results or financial condition.

The manufacture, sale and usage of our products expose us to a risk of product liability claims. If our products are defective or used incorrectly by our end-users, injury may result, giving rise to product liability claims against us. If a product liability claim or series of claims is brought against us for uninsured liabilities or in excess of our insurance coverage, and it is ultimately determined that we are liable, our business and financial condition could suffer. Any losses that we may suffer from any liability claims, and the effect that any product liability litigation may have upon the reputation and marketability of our products, may divert management's attention from other matters and may have a negative impact on our business and operating results. Additionally, we could experience a material design or manufacturing failure in our products, a quality system failure or other safety issues, or heightened regulatory scrutiny that could warrant a recall of some of our products. A recall of some of our products could also result in increased product liability claims. Any of these issues could also result in loss of market share, reduced sales, and higher warranty expense.

We are heavily dependent on our Chief Executive Officer and management team.

Our continued success depends on the retention, recruitment and continued contributions of key management, finance, sale and marketing personnel, some of whom could be difficult to replace. Our success is largely dependent upon our senior management team, led by our Chief Executive Officer and other key managers. The loss of any one or more of such persons could have an adverse effect on our business and financial condition.

Our indebtedness could adversely affect our operations, including our ability to perform our obligations and pay dividends.

As of _____, as adjusted to give effect to this offering and the application of the proceeds therefrom (including the redemption of our senior notes), we would have had approximately \$ _____ million of senior secured indebtedness and \$ _____ million of available borrowings under our revolving credit facility. We may also be able to incur substantial indebtedness in the future, including senior indebtedness, which may or may not be secured. For example, concurrent with this offering, we intend to increase our existing term loan facility by \$ _____ million. Further, if this offering is completed and all our senior notes are redeemed, our revolving credit facility and term loan facility will mature in May 2012 and May 2013, respectively. See "Description of Indebtedness Senior Credit Facilities."

Our indebtedness could have important consequences to you, including the following:

we could have difficulty satisfying our debt obligations, and if we fail to comply with these requirements, an event of default could result;

we may be required to dedicate a substantial portion of our cash flow from operations to required payments on indebtedness, thereby reducing the cash flow available to pay dividends or fund working capital, capital expenditures and other general corporate activities;

Table of Contents

covenants relating to our indebtedness may restrict our ability to make distributions to our stockholders;

covenants relating to our indebtedness may limit our ability to obtain additional financing for working capital, capital expenditures and other general corporate activities, which may limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate;

we may be more vulnerable to general adverse economic and industry conditions;

we may be placed at a competitive disadvantage compared to our competitors with less debt; and

we may have difficulty repaying or refinancing our obligations under our senior credit facilities on their respective maturity dates.

If any of these consequences occur, our financial condition, results of operations and ability to pay dividends could be adversely affected. This, in turn, could negatively affect the market price of our common stock, and we may need to undertake alternative financing plans, such as refinancing or restructuring our debt, selling assets, reducing or delaying capital investments or seeking to raise additional capital. We cannot assure you that any refinancing would be possible, that any assets could be sold, or, if sold, of the timing of the sales and the amount of proceeds that may be realized from those sales, or that additional financing could be obtained on acceptable terms, if at all.

Our variable rate indebtedness subjects us to interest rate risk, which could cause our debt service obligations to increase significantly and could impose adverse consequences.

Certain of our borrowings, including our term loan and any revolving borrowings under our senior credit facilities, are at variable rates of interest and expose us to interest rate risk. In addition, the interest rate on any revolving borrowings is subject to an increase in the interest rate if the average daily availability under our revolving credit facility falls below a certain threshold. If interest rates increase, our debt service obligations on the variable rate indebtedness would increase even though the amount borrowed remained the same, and our net income and cash flows would correspondingly decrease.

Our senior credit facilities impose restrictions on us, which may also prevent us from capitalizing on business opportunities and taking certain corporate actions. One of these facilities also includes minimum availability requirements, which if unsatisfied, could result in liquidity events that may jeopardize our business.

Our senior credit facilities contain, and future debt instruments to which we may become subject may contain, covenants that limit our ability to engage in activities that could otherwise benefit our company, including restrictions on our ability to:

incur, assume or permit to exist additional indebtedness or contingent obligations;

incur liens and engage in sale and leaseback transactions;

make capital expenditures above agreed upon annual limits;

make loans and investments in excess of agreed upon amounts;

declare dividends, make payments or redeem or repurchase capital stock in excess of agreed upon amounts and subject to certain other limitations;

engage in mergers, acquisitions and other business combinations;

prepay, redeem or purchase certain indebtedness or amend or alter the terms of our indebtedness;

Table of Contents

sell assets;

transact with affiliates or our stockholders; and

alter the business that we conduct.

Our revolving credit facility also includes limitations on capital expenditures and requires us to maintain at least \$6.0 million of borrowing availability. Failure to maintain such availability would constitute a "liquidity event" under our revolving credit facility, and as a result we would be required to comply with a fixed charge coverage ratio test. In addition, if such a liquidity event (or an event of default) occurs and is continuing, subject to certain limited cure rights, all proceeds of our accounts receivable and other collateral will be applied to reduce obligations under our revolving credit facility, jeopardizing our ability to meet other obligations. Our ability to comply with the covenants contained in our senior credit facilities or in the agreements governing our future indebtedness, and our ability to avoid liquidity events, may be affected by events, or our future performance, which are subject to factors beyond our control, including prevailing economic, financial, industry and weather conditions, such as the level, timing and location of snowfall and general economic conditions in the snowbelt regions of North America. A failure to comply with these covenants could result in a default under our senior credit facilities, which could prevent us from paying dividends, borrowing additional amounts and using proceeds of our inventory and accounts receivable, and also permit the lenders to accelerate the payment of such debt. If any of our debt is accelerated or if a liquidity event (or event of default) occurs that results in collateral proceeds being applied to reduce such debt, we may not have sufficient funds available to repay such debt and our other obligations, in which case, our business could be halted and such lenders could proceed against any collateral securing that debt. Further, if the lenders accelerate the payment of the indebtedness under our senior credit facilities, our assets may not be sufficient to repay in full the indebtedness under our senior credit facilities and our other indebtedness, if any. We cannot assure you that these covenants will not adversely affect our ability to finance our future operations or capital needs to pursue available business opportunities or react to changes in our business and the industry in which we operate.

The closure of our Johnson City, Tennessee manufacturing facility may entail risks to our business.

As part of our lean manufacturing strategy to lower our fixed costs, we plan to close our Johnson City, Tennessee manufacturing facility in mid 2010, and thereby reduce our manufacturing facilities from three to two. In connection with this closure, we plan to relocate our Johnson City operations and equipment into our remaining two facilities. We cannot assure you that we will realize contemplated cost savings from the closure of this facility. In addition, there may be risks associated with this closure for which we are unprepared, such as labor and employment litigation, difficulties implementing a smooth transition and the possibility that this closure leaves us with insufficient manufacturing capacity. It is therefore possible that our business could be negatively affected by the closure of this facility.

Risks Related to this Offering of Our Common Stock

An active, liquid and orderly trading market for our common stock may not develop or be maintained, which could limit your ability to sell shares of our common stock.

Prior to the consummation of this offering, there has not have been a public market for our common stock. Although we have applied to list our common stock on The New York Stock Exchange, which we refer to in this prospectus as the NYSE, an active public market for our shares may not develop or be sustained after this offering. The initial public offering price for our shares will be determined by negotiations between us and representatives of the underwriters, and may not be indicative of the market price at which shares of our common stock will trade after this offering. In particular, we cannot assure you that you will be able to resell your shares of our common stock at or above the initial public offering price.

Table of Contents

The market price of our common stock may be volatile, which could cause the value of your investment to decline or could subject us to securities class action litigation.

Even if a trading market develops, the market price of shares of our common stock could be subject to wide fluctuations in response to the many risk factors listed in this section and others beyond our control, including:

variations in our quarterly operating results;

our announcement of actual results for a fiscal period that are higher or lower than projected or expected results or our announcement of revenue or earnings guidance that is higher or lower than expected;

unfavorable commentary from securities analysts or the failure of securities analysts to cover our common stock after this offering;

sales of our common stock by our principal stockholders;

changes in our dividend payment policy or failure to execute our existing policy;

actions of competitors;

changes in applicable government and environmental regulations; or

general economic and market conditions.

Furthermore, the stock markets recently have experienced extreme price and volume fluctuations that have affected and continue to affect the market prices of equity securities of many companies. These fluctuations often have been unrelated or disproportionate to the operating performance of those companies. These broad market and industry fluctuations, as well as general economic, political and market conditions such as recessions or interest rate changes may cause the market price of shares of our common stock to decline. If the market price of a share of our common stock after this offering does not exceed the initial public offering price, you may not realize any return on your investment in us and may lose some or all of your investment.

In addition, in the past, companies that have experienced volatility in the market price of their stock have been subject to securities class action litigation. We may be the target of this type of litigation in the future. Securities litigation against us could result in substantial costs and divert our management's attention from other business concerns, which could seriously harm our business.

If securities or industry analysts do not publish research or reports about our business, or if they change their recommendations regarding our stock adversely, our stock price and trading volume could decline.

The trading market for our common stock will be influenced by the research and other reports that industry or securities analysts publish about us or our business. We do not currently have any and may never obtain research coverage by industry or financial analysts. If no or few analysts commence coverage of us, the trading price of our stock would likely decrease. Even if we do obtain analyst coverage, if one or more of the analysts who cover us downgrade our stock, our stock price would likely decline. If one or more of these analysts cease coverage of our company or fail to regularly publish reports on us, we could lose visibility in the financial markets, which in turn could cause our stock price or trading volume to decline.

Substantial future sales of our common stock in the public market could cause our stock price to fall.

Edgar Filing: DOUGLAS DYNAMICS, INC - Form S-1/A

Additional sales of our common stock in the public market after the consummation of this offering, or the perception that these sales could occur, could cause the market price of our common stock to decline. Upon consummation of this offering, we will have _____ shares of common stock

Table of Contents

outstanding. The _____ shares of our common stock sold in this offering, as well as any shares disposed of upon exercise of the underwriters' over-allotment option, will be freely transferable without restriction or additional registration under the Securities Act of 1933, as amended, which we refer to in this prospectus as the Securities Act. The remaining _____ shares of common stock outstanding after this offering will be available for sale subject to, and in accordance with, the provisions of the Securities Act and the rules and regulations promulgated thereunder and to the extent applicable, any lock-up agreements that we, our officers, directors, employees and stockholders enter into. As any resale restrictions end, the market price of our common stock could decline if the holders of those shares sell them or are perceived by the market as intending to sell them. In addition, pursuant to certain provisions of our securityholders agreement that will remain in effect after the consummation of this offering, all securityholders who are parties to the securityholders agreement are entitled to certain "piggy-back" registration rights with respect to shares of our common stock, and certain securityholders are entitled to demand registration of their shares. See "Certain Relationships and Related Party Transactions Securityholders Agreement." Registration of any such shares under the Securities Act would result in such shares becoming freely tradable without restriction under the Securities Act immediately upon the effectiveness of the registration.

As a new investor, you will experience immediate and substantial dilution.

Purchasers in this offering will immediately experience substantial dilution in net tangible book value of the shares they purchase. Because our common stock was originally sold at prices substantially lower than the initial public offering price that you will pay, you will suffer immediate dilution of \$ _____ per share in net tangible book value. The exercise of outstanding options, _____ of which are outstanding and exercisable as of _____, 2010, may result in further dilution. See "Dilution."

Since no proceeds from this offering will be used to grow our business or develop new products, the value of your investment in our common stock could be negatively impacted.

We intend to use the net proceeds of this offering together with an increase in our term loan facility to redeem our senior notes (including accrued and unpaid interest and the related redemption premium). We will not receive any proceeds from the sale of our common stock by the selling stockholders. See "Use of Proceeds." We do not intend to use any of the proceeds from this offering to grow our business or develop new products, which could negatively impact the value of your investment in our common stock.

Our principal stockholders will hold a significant portion of our common stock and may have different interests than us or you in the future.

Immediately after the consummation of this offering our principal stockholders will have the right to vote or direct the vote of approximately _____ % (or _____ % if the underwriters exercise their over-allotment option in full) of our voting power. Consequently, our principal stockholders will, and will for the foreseeable future continue to, be able to influence the election and removal of our directors and influence our corporate and management policies, including virtually all matters requiring stockholder approval, such as potential mergers or acquisitions, asset sales and other significant corporate transactions. This concentration of ownership may delay or deter possible changes in control of our company, which may reduce the value of your investment. We cannot assure you that the interests of our principal stockholders will coincide with the interests of our other holders of common stock. See "Certain Relationships and Related Party Transactions Securityholders Agreement."

Table of Contents

Provisions of Delaware law and our charter documents could delay or prevent an acquisition of us, even if the acquisition would be beneficial to you.

Provisions in our certificate of incorporation and bylaws that we intend to adopt prior to the consummation of this offering may have the effect of delaying or preventing a change of control or changes in our management. These provisions include:

the absence of cumulative voting in the election of our directors, which means that the holders of a majority of our common stock may elect all of the directors standing for election;

the ability of our Board of Directors to issue preferred stock with voting rights or with rights senior to those of our common stock without any further vote or action by the holders of our common stock;

the division of our Board of Directors into three separate classes serving staggered three-year terms;

the ability of our stockholders to remove our directors is limited to cause and only by the vote of at least 66²/₃% of the outstanding shares of our common stock;

the prohibition on our stockholders from acting by written consent and calling special meetings;

the requirement that our stockholders provide advance notice when nominating our directors or proposing business to be considered by the stockholders at an annual meeting of stockholders; and

the requirement that our stockholders must obtain a 66²/₃% vote to amend or repeal certain provisions of our certificate of incorporation.

We are also subject to Section 203 of the Delaware General Corporation Law, which, subject to certain exceptions, prohibits us from engaging in any business combination with any interested stockholder, as defined in that section, for a period of three years following the date on which that stockholder became an interested stockholder. Since the respective affiliates of Aurora Capital Group and Ares Management that are common stockholders became interested stockholders of our company more than three years ago, we are not constrained by this provision with respect to business combinations with these stockholders. See "Description of Capital Stock." This provision, together with the provisions discussed above, could also make it more difficult for you and our other stockholders to elect directors and take other corporate actions, and could limit the price that investors might be willing to pay in the future for shares of our common stock.

If we are unable to assess favorably the effectiveness of our internal control over financial reporting, or if our independent registered public accounting firm is unable to provide an unqualified attestation report on our internal controls, our stock price could be adversely affected.

Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002 and the related rules adopted by the SEC and the Public Company Accounting Oversight Board, beginning with our Annual Report on Form 10-K for the year ending 2011, our management will be required to report on, and our independent registered public accounting firm to attest to, the effectiveness of our internal control over financial reporting. We may encounter problems or delays in completing the implementation of any changes necessary to make a favorable assessment of our internal control over financial reporting. In addition, in connection with the attestation process by our independent registered public accounting firm, we may encounter problems or delays in completing the implementation of any requested improvements and receiving a favorable attestation. If we cannot timely and favorably assess the effectiveness of our internal control over financial reporting, or if our independent registered public accounting firm is unable to provide an unqualified attestation report on our internal control over financial reporting, investor confidence and our stock price could decline.

Table of Contents

Risks Relating to Our Dividend Policy

You may not receive the level of dividends provided for in the dividend policy our Board of Directors will adopt or any dividends at all.

We are not obligated to pay dividends on our common stock. Our Board of Directors will adopt a dividend policy, effective upon the consummation of this offering, that reflects an intention to distribute to our stockholders a regular quarterly cash dividend. However, the declaration and payment of all future dividends to holders of our common stock are subject to the discretion of our Board of Directors, which may amend, revoke or suspend our dividend policy at any time and for any reason, including, our financial condition and earnings, legal requirements, taxes and other factors our Board of Directors may deem relevant. The terms of our indebtedness may also restrict us from paying cash dividends on our common stock under certain circumstances.

Over time, our capital and other cash needs may change significantly from our current needs, which could affect whether we pay dividends and the level of any dividends we may pay in the future. If we were to use borrowings under our senior credit facilities to fund our payment of dividends, we would have less cash and/or borrowing capacity available for future dividends and other purposes, which could negatively affect our financial condition, our results of operations, our liquidity and our ability to maintain and expand our business. Accordingly, you may not receive dividends in the intended amounts, or at all. Any reduction or elimination of dividends may negatively affect the market price of our common stock.

Our ability to pay dividends will be restricted by agreements governing our debt, including our senior credit facilities, and by Delaware law.

Our senior credit facilities restrict our ability to pay dividends. See "Description of Indebtedness Senior Credit Facilities" and "Dividend Policy and Restrictions," where we describe the terms of our indebtedness, including provisions limiting our ability to declare and pay dividends. In addition, as a result of general economic conditions, conditions in the lending markets, the results of our business or for any other reason, we may elect or be required to amend or refinance our senior credit facilities, at or prior to maturity, or enter into additional agreements for indebtedness. Any such amendment, refinancing or additional agreement may contain covenants which could limit in a significant manner or entirely our ability to pay dividends to you.

Additionally, under the Delaware General Corporation Law, which we refer to in this prospectus as the DGCL, our Board of Directors may not authorize payment of a dividend unless it is either paid out of surplus, as calculated in accordance with the DGCL, or if we do not have a surplus, it is paid out of net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year. See "Dividend Policy and Restrictions."

If, as a result of these restrictions, we are required to reduce or eliminate the payment of dividends, a decline in the market price or liquidity, or both, of our common stock could result. This may in turn result in losses by you.

Douglas Holdings, the issuer of the common stock being offered hereby, is a holding company with no operations of its own and depends on its subsidiaries for cash.

The terms of our senior credit facilities significantly restrict our subsidiaries from paying dividends and otherwise transferring assets to Douglas Holdings. In addition, the terms of our revolving credit facility specifically restricts Douglas Holdings' subsidiaries from paying dividends to Douglas Holdings if we do not maintain minimum availability under our revolving credit facility, and both our senior credit facilities restrict subsidiaries from paying dividends to Douglas Holdings if a default or event of default has occurred and is continuing under our senior credit facilities. As of _____, we had the necessary

Table of Contents

availability to pay dividends at the level currently anticipated under our dividend policy, assuming the redemption of our senior notes. We cannot assure you that we will maintain this availability. For a description of our dividend policy and the limitations on the payment of dividends contained in our senior credit facilities, see "Description of Indebtedness" and "Dividend Policy and Restrictions."

Our dividend policy may limit our ability to pursue growth opportunities.

If we pay dividends at the level currently anticipated under our dividend policy, we may not retain a sufficient amount of cash to finance growth opportunities, meet any large unanticipated liquidity requirements or fund our operations in the event of a significant business downturn. In addition, because a significant portion of cash available will be distributed to holders of our common stock under our dividend policy, our ability to pursue any material expansion of our business, including through acquisitions, increased capital spending or other increases of our expenditures, will depend more than it otherwise would on our ability to obtain third party financing. We cannot assure you that such financing will be available to us at all, or at an acceptable cost. If we are unable to take timely advantage of growth opportunities, our future financial condition and competitive position may be harmed, which in turn may adversely affect the market price of our common stock.

Market interest rates may have an effect on the trading value of our shares.

One of the factors that investors may consider in deciding whether to buy or sell our shares is our dividend rate as a percentage of our shares price relative to market interest rates. If market interest rates increase, prospective investors may demand a higher dividend yield on our shares or seek alternative investments paying higher dividends or interest. As a result, interest rate fluctuations and capital market conditions can affect the market value of our shares. For instance, if interest rates rise, it is likely that the market price of our shares will decrease as market rates on interest-bearing securities, such as bonds, increase.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This prospectus includes forward-looking statements. These forward-looking statements are identified by terms and phrases such as "anticipate," "believe," "intend," "estimate," "expect," "continue," "should," "could," "may," "plan," "project," "predict," "will" and similar expressions and include references to assumptions and relate to our future prospects, developments and business strategies. Factors that could cause our actual results to differ materially from those expressed or implied in such forward-looking statements include, but are not limited to:

weather conditions, particularly lack of or reduced levels of snowfall;

a significant decline in economic conditions;

our inability to maintain good relationships with our distributors;

lack of available or favorable financing options for our end-users or distributors;

increases in the price of steel or other materials necessary for the production of our products that cannot be passed on to our distributors;

the inability of our suppliers to meet our volume or quality requirements;

our inability to protect or continue to build our intellectual property portfolio;

our inability to develop new products or improve upon existing products in response to end-user needs;

losses due to lawsuits arising out of personal injuries associated with our products; and

our inability to compete effectively against competition.

We undertake no obligation to revise the forward-looking statements included in this prospectus to reflect any future events or circumstances. Our actual results, performance or achievements could differ materially from the results expressed in, or implied by, these forward-looking statements. Factors that could cause or contribute to such differences are discussed in this prospectus under the caption "Risk Factors" as well as elsewhere in this prospectus.

INDUSTRY INFORMATION

Information contained in this prospectus concerning the snow and ice control equipment industry for pickup trucks and sport utility vehicles, which we refer to as light trucks in this prospectus, our general expectations concerning this industry and our market positions and other market share data regarding this industry including, without limitation, statements with respect to the relative size of our installed base, our distribution network, operational efficiency, customer service and responsiveness, and shipping performance, are based on our general knowledge of our industry and competitors. This general knowledge is derived from estimates our management prepared using end-user surveys, anecdotal data from our distributors and distributors that carry our competitors' products, our results of operations and management's past experience, and on assumptions made by our management, based on its knowledge of this industry, all of which we believe to be reasonable. These estimates and assumptions are inherently subject to uncertainties and may prove to be inaccurate. In addition, we have not independently verified the information contained in any independent third-party source, although management also believes such information to be reasonable.

Table of Contents**USE OF PROCEEDS**

We estimate that we will receive net proceeds from this offering (after deducting underwriting discounts and commissions and our estimated offering expenses) of approximately \$ million. We will not receive any proceeds from the sale of our common stock by the selling stockholders in this offering. We will use the net proceeds to us from this offering, together with the \$ million increase in our term loan facility, as follows, assuming a closing date of , 2010 (in millions of dollars):

Sources

Gross offering proceeds to us	\$
Increase in term loan facility	
Cash	

Total sources	\$
---------------	----

Uses

Redemption of senior notes(1)	\$
Estimated fees, expenses and other(2)	

Total uses	\$
------------	----

(1) Includes the estimated related redemption premium on our senior notes and accrued interest through the anticipated redemption date (30 days following the expected consummation date of this offering). Our senior notes bear interest at a rate of 7³/₄% per annum and are scheduled to mature on January 15, 2012.

(2) Includes an aggregate of \$5.8 million paid to Aurora Management Partners, LLC and ACOF Management, LP in connection with the amendment and restatement of our Amended and Restated Joint Management Services Agreement, which we refer to in its current form in this prospectus as the Management Services Agreement. See "Certain Relationships and Related Party Transactions Management Services Agreement." Also includes \$2,000, which will be paid to Aurora Equity Partners II L.P. and Ares in connection with our redemption of the one share of Series B preferred stock and one share of Series C preferred stock held by Aurora Equity Partners II L.P. and Ares, respectively.

Table of Contents

DIVIDEND POLICY AND RESTRICTIONS

General

During 2008 and 2009, we did not declare or pay any cash dividends on our common stock. Our Board of Directors will, however, adopt a dividend policy, effective upon the consummation of this offering, that reflects an intention to distribute to our stockholders a regular quarterly cash dividend. This policy reflects our present judgment that it is in the best interest of our stockholders to distribute to them a significant portion of the cash generated by our business. We believe our dividend policy will limit, but not preclude, our ability to pursue growth opportunities. This limitation could be significant, for example, with respect to large acquisitions and growth opportunities that require cash investments in amounts greater than our available cash or external financing resources.

In accordance with this dividend policy and based upon our Board of Directors' review of our historical results of operations and the restrictions in our debt instruments, we currently intend to pay a quarterly dividend on our common stock, commencing with the first full fiscal quarter following the consummation of this offering, at an initial quarterly rate of \$ per share, on or about , 2010, to holders of record on , 2010.

There can be no assurance that we will declare or pay any cash dividends. The declaration and payment of these dividends to holders of our common stock will be at the discretion of our Board of Directors and will depend upon many factors, including our financial condition or earnings, legal requirements, taxes and other factors our Board of Directors may deem to be relevant. The terms of our indebtedness may also prevent us from paying cash dividends on our common stock under certain circumstances. See "Risk Factors Our ability to pay dividends will be restricted by agreements governing our debt, including our senior credit facilities, and by Delaware law," " Restrictions on Payment of Dividends" and "Description of Indebtedness." Over time, our capital and other cash needs may change significantly from our current needs, which could affect whether we pay dividends and the level of any dividends we may pay in the future. Moreover, our Board of Directors may amend, revoke or suspend our dividend policy at any time and for any reason. Accordingly, you may not receive dividends in the intended amounts, or at all.

Restrictions on Payment of Dividends

Our ability to pay dividends will be restricted by current and future agreements governing our debt, including our senior credit facilities and by Delaware law.

Senior Credit Facilities

Our senior credit facilities, which are comprised of a \$60.0 million senior secured revolving credit facility, which we refer to in this prospectus as our revolving credit facility, and an \$85.0 million senior secured term loan facility, which we refer to in this prospectus as our term loan facility, impose limitations on our ability to pay dividends. Under the restricted payments covenants for each of our senior credit facilities, we generally are restricted from paying dividends on our common stock other than dividends solely in shares of common stock to holders of that class. However, so long as no default or event of default and, in the case of our revolving credit facility only, no "liquidity event," has occurred and is continuing or would result from the payment, (a) we can make restricted payments, including dividends, in an amount equal to the Restricted Payment Amount described below, and (b) we can make an additional \$10.0 million in dividends or other restricted payments. Our payment of dividends under clause (a) above is also currently subject to satisfaction of certain conditions set forth in the indenture governing our senior notes and incorporated into our senior credit facilities, which we intend to eliminate in our senior credit facilities prior to the consummation of this offering. In addition, the occurrence of a liquidity event is subject to certain cure rights under our revolving credit facility. The amount available for dividends pursuant to the Restricted Payment Amount and the additional

Table of Contents

\$10.0 million may also be used for restricted payments other than dividends (including certain payments of indebtedness, redemptions of stock, payments to retire options and warrants and payment of certain management fees), certain investments and certain payments of debt. To the extent that these amounts are used for a payment other than dividends, the amount available to be used for the payment of dividends would be reduced accordingly.

A "liquidity event" would occur if our availability under our revolving credit facility is less than \$6.0 million (or if additional revolving commitments are made under our revolving credit facility, \$6.0 million plus 10 percent of the aggregate amount of such increased commitments).

"Restricted Payment Amount" is generally defined under our senior credit facilities to mean, as of any date of determination, an amount equal to (a) the difference (but not less than zero) between (i) "Restricted Payment EBITDA" and (ii) the product of 2.0 multiplied by our cumulative interest expense (determined, in each case, for the period commencing on the first day of the first full fiscal quarter after May 21, 2007 through and including the last full fiscal quarter (taken as one accounting period) preceding such date of determination), *plus* (b) the net cash proceeds received by us from a capital contribution or sale of capital stock after May 21, 2007 subject to certain adjustments for investments and other restricted payments. Due to restrictions under the indenture governing our senior notes which are incorporated into our senior credit facilities, as of December 31, 2008, no Restricted Payment Amounts were available for dividends and as of December 31, 2009, \$7.86 million in Restricted Payment Amounts were available for dividends.

"Restricted Payment EBITDA" under our senior credit facilities is a measurement of cash flow defined in our senior credit facilities reflecting our Consolidated Adjusted EBITDA as further adjusted for purposes of the dividend and restricted payments covenant by:

excluding the effect of:

all non-recurring gains and losses,

interest attributable to indebtedness under sale and leaseback transactions, and

dividends accrued and payable on preferred stock (other than dividends accrued and payable solely in certain of our capital stock), and

including in the calculation of Restricted Payment EBITDA all cash interest income to the extent reducing Consolidated Adjusted EBITDA.

Our senior credit facilities preclude us from declaring any dividends if a default or event of default under our senior credit facilities or in the case of our revolving credit facility, a liquidity event, has occurred and is continuing.

The foregoing is a summary of the actual provisions that are included in our senior credit facilities, copies of which have been or will be filed with the SEC as exhibits to this registration statement. For a description of additional terms relating to our senior credit facilities, see "Description of Indebtedness Senior Credit Facilities."

Delaware Law

Under Delaware law, our Board of Directors may not authorize payment of a dividend unless either it is paid out of our "surplus" (which is defined as total assets at fair market value minus total liabilities (including contingent liabilities) minus statutory capital), or if we do not have a surplus, it is paid out of our net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year. The value of a corporation's assets can be measured in a number of ways and may not necessarily equal their book value. The value of our capital may be adjusted from time to time by our Board of Directors. Our Board of Directors may base this determination on our financial statements, a

Table of Contents

fair valuation of our assets or another reasonable method. Although we believe we will be permitted to pay dividends at the anticipated levels in compliance with Delaware law, our Board of Directors will periodically seek to assure itself that the statutory requirements will be met before actually declaring dividends. In future periods, our Board of Directors may seek opinions from outside valuation firms to the effect that our solvency or assets are sufficient to allow payment of dividends, and such opinions may not be forthcoming. If we sought and were not able to obtain such an opinion, we likely would not be able to pay dividends. Douglas Holdings, the issuer of the common stock offered hereby, is a holding company and conducts all of its operations through its subsidiaries. As a result, Douglas Holdings will rely principally on distributions from its subsidiaries to have funds available for the payment of dividends. Each of our subsidiaries was formed in Delaware. As a result, they are also subject to the similar considerations and limitations under Delaware law on distributions.

Table of Contents

CAPITALIZATION

The following table sets forth as of December 31, 2009, our capitalization:

on an actual basis;

on an as adjusted basis to give effect to:

the filing of our fourth amended and restated certificate of incorporation, which will occur prior to the consummation of this offering, and that will provide for, among other things, the authorization of shares of common stock and shares of preferred stock and a for-one stock split;

the fee payable pursuant to the amendment and restatement of our Management Services Agreement;

the receipt of net proceeds from the sale of shares of common stock by us in this offering at an assumed initial public offering price of \$ per share, after deducting estimated underwriting discounts and commissions and estimated offering expenses payable by us;

the redemption of our senior notes, including the accrued and unpaid interest thereon through the anticipated redemption date (30 days following the consummation of this offering), and the associated redemption premium for a total of approximately \$ million;

the redemption of our Series B preferred stock and Series C preferred stock for a total of \$2,000; and

borrowing an additional \$ million under our increased term loan facility.

Table of Contents

This table should be read together with "Use of Proceeds," "Selected Consolidated Financial Data," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated financial statements and related notes included elsewhere in this prospectus.

	December 31, 2009	
	Actual	As Adjusted
	(in thousands, except share data)

Revolving loan	\$	\$
Term loan	82,663	
7 ³ / ₄ % senior notes due 2012	150,000	
Other indebtedness		
Total indebtedness	232,663	
Redeemable preferred stock, Series A, par value \$0.01 per share, 65,000 shares authorized, no shares outstanding		
Redeemable preferred stock, Series B, par value \$0.01 per share, 1 share authorized, 1 share outstanding	1	
Redeemable preferred stock, Series C, par value \$0.01 per share, 1 share authorized, 1 share outstanding	1	
Stockholders' equity		
Common stock, par value \$0.01 per share, 1,000,000 shares authorized, 607,231 shares outstanding	6	
Stockholders' notes receivable	(1,013)	
Additional paid-in capital	60,111	
Accumulated other comprehensive loss	(3,937)	
Retained earnings	53,055	
Total stockholders' equity	108,222	
Total capitalization	\$ 340,887	\$

Table of Contents**DILUTION**

If you purchase shares of our common stock, you will experience immediate and substantial dilution. Dilution is the amount by which the offering price paid by the purchasers of our common stock to be sold in this offering will exceed the net tangible book value per share of our common stock after the offering. Net tangible book value per share represents the amount of total tangible assets (total assets less intangible assets) less total liabilities, divided by shares of our common stock outstanding, as of that date. The net tangible book value per share presented below is equal to the amount of our total tangible assets (total assets less intangible assets) less total liabilities, as adjusted to give effect to the for-one stock split effected prior to the consummation of this offering, the redemption of our senior notes, \$ million in additional borrowings pursuant to our increased term loan facility, the redemption of our Series B preferred stock and Series C preferred stock and the fee payable pursuant to the amendment and restatement of our Management Services Agreement, divided by the number of shares of our common stock outstanding as of December 31, 2009. After giving effect to the foregoing and this offering, our as adjusted net tangible book value as of December 31, 2009 would have been \$, or \$ per share of common stock. This represents an immediate increase in net tangible book value of \$ per share to the existing stockholders and an immediate dilution in net tangible book value of \$ per share to new investors.

The following table illustrates this dilution on a per share basis:

Assumed initial public offering price per share	\$
Net tangible book value per share at December 31, 2009	\$
Increase in net tangible book value per share attributable to new investors	\$
Adjusted net tangible book value per share	\$
Dilution per share to new investors	\$

A \$1.00 increase or decrease in the assumed initial public offering price of \$ per share would increase or decrease our net tangible book value by \$, the net tangible book value per share after the consummation of this offering by \$ and the dilution per share to new investors by \$, assuming the number of shares offered by us, as set forth on the cover page of this prospectus, remains the same, and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us. Similarly, any increase or decrease in the number of shares that we (but not the selling stockholders) sell in this offering will increase or decrease our net proceeds by such increase or decrease, as applicable, multiplied by the offering price per share, less underwriting discounts and commissions and offering expenses. Any exercise by the underwriters of their over-allotment option, whether in full or part, will not impact our adjusted net tangible book value and corresponding dilution per share to new investors as all such proceeds will be received by the selling stockholders.

The following table summarizes, on the same as adjusted basis as of December 31, 2009, the total number of shares of common stock purchased from us or from the selling stockholders, the total consideration paid and the average price per share paid by the existing stockholders and by new investors purchasing shares in this offering:

	Shares Purchased		Total Consideration		Average Price per Share
	Number	Percent	Amount	Percent	
Existing stockholders		%	\$		% \$
New Investors					
Total		100%	\$		100%

Table of Contents

If the underwriters' over-allotment option is exercised in full, the number of shares held by the existing stockholders after the consummation of this offering would be reduced to _____ % of the total number of shares of our common stock outstanding after consummation of this offering, and the number of shares held by new investors would increase to _____, or _____ % of the total number of shares of our common stock outstanding after this offering.

If all our outstanding stock options and deferred stock units had been exercised or converted to common stock as of December 31, 2009, assuming the treasury stock method, our adjusted net tangible book value as of December 31, 2009 would have been approximately \$ _____ million, or \$ _____ per share of our common stock, and our adjusted net tangible book value after giving effect to this offering would have been \$ _____ per share, representing dilution in our adjusted net tangible book value per share to new investors of \$ _____.

Table of Contents**SELECTED CONSOLIDATED FINANCIAL DATA**

The following table sets forth our selected historical consolidated financial data for the periods and at the dates indicated. The selected historical consolidated financial data as of December 31, 2007, 2008 and 2009 and for the three years in the period ended December 31, 2009 are derived from our audited consolidated financial statements included elsewhere in this prospectus.

The selected historical consolidated financial data for the years ended December 31, 2005 and 2006 are derived from our historical financial statements not included in this prospectus.

You should read the selected consolidated financial data presented on the following pages in conjunction with our consolidated financial statements and related notes appearing elsewhere in this prospectus as well as our "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations."

	As of December 31,

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion and analysis of our financial condition and results of operations for the years ended December 31, 2007, 2008 and 2009 should be read together with our audited and unaudited consolidated financial statements and related notes included elsewhere in this prospectus. Some of the information contained in this discussion and analysis or set forth elsewhere in this prospectus, including information with respect to our plans and strategies for our business, includes forward-looking statements that involve risks and uncertainties. You should review the "Risk Factors" section of this prospectus for a discussion of important factors that could cause actual results to differ materially from the results described in, or implied by, the forward-looking statements contained in this prospectus.

Overview

Our Business

We are the North American leader in the design, manufacture and sale of snow and ice control equipment for light trucks, which consists of snowplows and sand and salt spreaders, and related parts and accessories. We sell our products under the WESTERN®, FISHER® and BLIZZARD® brands which are among the most established and recognized in the industry. We believe that in 2009 our share of the light truck snow and ice control equipment market was greater than 50%. We sell our products exclusively through what we believe is the industry's most extensive North American distributor network, which primarily consists of over 720 truck equipment distributors who purchase directly from us and are located throughout the snowbelt regions in North America (primarily the Midwest, East and Northeast regions of the United States as well as all provinces of Canada). We have longstanding relationships with many of our distributors, with an average tenure of approximately 15 years. We continually seek to grow and optimize our network by opportunistically adding high-quality, well-capitalized distributors in select geographic areas and by cross-selling our industry-leading brands within our distribution network. Beginning in 2005, we began to extend our reach to international markets, establishing distribution relationships in Northern Europe and Asia, where we believe meaningful growth opportunities exist.

The annual demand for snow and ice control equipment is driven primarily by the replacement cycle of the existing installed base, which is predominantly a function of the average life of a snowplow or spreader and is driven by usage and maintenance practices of the end-user. We believe actively-used snowplows are typically replaced, on average, every 7 to 8 years. The primary factor influencing the replacement cycle for snow and ice control equipment is the level, timing and location of snowfall.

Accordingly, our sales depend primarily on the level, timing and location of snowfall. Sales of our products in any given year and region are most heavily influenced by local snowfall levels in the prior snow season. Heavy snowfall during a given winter causes usage of our equipment to increase, resulting in greater wear and tear and shortened life cycles, thereby creating a need for replacement equipment and additional parts and accessories. In addition, when there is a heavy snowfall in a given winter, the increased income our professional snowplowers generate from their professional snowplow activities provides them with increased purchasing power to purchase replacement snow and ice control equipment prior to the following winter. Moreover, in our experience, the timing of snowfall in a given winter also influences our end-users' decision-making process. Because an early snowfall can be viewed as a sign of a heavy upcoming snow season, our end-users may respond to an early snowfall by purchasing replacement snow and ice control equipment earlier than they might otherwise have. Alternatively, light snowfall during a given winter season may cause equipment usage to decrease, thereby extending its useful life and delaying replacement equipment purchases. Because the level, timing and location of snowfall are critical drivers of our sales, our results of operations vary from year-to-year and from season to season as snow fall varies from year to year. See " Seasonality and

Table of Contents

Year-to-Year Variability" and "Risk Factors The year-to-year variability of our business can cause our results of operations and financial condition to be materially different from year-to-year; whereas the seasonality of our business can cause our results of operations and financial condition to be materially different from quarter-to-quarter."

The demand for our snow and ice control equipment can also be influenced by general economic conditions in the United States, as well as local economic conditions in the snowbelt regions in North America. In stronger economic conditions, our end-users may choose to replace or upgrade existing equipment before its useful life has ended, while in weak economic conditions, our end-users may seek to extend the useful life of equipment, thereby increasing the sales of parts and accessories. While our parts and accessories yield slightly higher gross margins than our snow and ice control equipment, they yield significantly lower revenue than equipment sales, which adversely affects our results of operations. However, since snow and ice control management is a non-discretionary service necessary to ensure public safety and continued personal and commercial mobility in populated areas that receive snowfall, end-users cannot extend the useful life of snow and ice control equipment indefinitely and must replace equipment that has become too worn, unsafe or unreliable, regardless of economic conditions.

Costs of Sales and Selling, General and Administrative Expense

Our costs of sales consist primarily of variable costs, including labor, materials and manufacturing overhead, which average approximately 81% to 84% of our total costs of sales each year. Our selling, general and administrative expenses consist primarily of our expenses for general administration, sales, marketing, advertising, administration, incentive plans and intangible amortization. Because of our highly variable cost structure, we are able to easily reduce our costs of sales during periods following a year in which snowfall levels were low and during periods in which sales are lower. Our selling, general and administrative expenses can also be reduced temporarily in such periods to maximize cash flow.

Although steel is a significant component of our cost of sales, we attempt to mitigate increases in the price of steel by implementing corollary price increases for our products in the form of a permanent price increase (in circumstances in which we believe the increase in the price of steel will be permanent) or temporary surcharges (in circumstances in which we believe the increase in the price of steel will be temporary).

Specifically, our cost of sales increased in 2008 and remained high in 2009 due in large part to elevated steel costs but also due to increased sales. Through the implementation of a permanent price increase and temporary invoice surcharge commencing in the fourth quarter of 2008 and extending such price increase through the twelve months ended December 31, 2009 and the invoice surcharge through January 31, 2009, we were successful in insulating our gross profit from the effect of steel price increases on our 2008 purchases. Though we continued to mitigate the effect of elevated steel costs throughout 2009, our gross profit in that period declined relative to the correspon
