(Name, Telephone, E-mail and / or Facsimile number and Address of Company Contact Person)

Securities registered or to be registered pursuant to Section 12(b) of the Act.

**American Depositary Shares, evidenced by  
American Depositary Receipts, each representing  
1 Ordinary Share  
Ordinary Shares, par value R1.00 per Share\***  
(Title of each class)

**New York Stock Exchange**  
(Name of each exchange on which registered)

Securities registered or to be registered pursuant to Section 12(g) of the Act.

**None**

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.

**None**

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

**541,446,223 Ordinary Shares**

**19,961,476 "A" Ordinary Shares**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

**YES**       **NO**

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

**YES**       **NO**

Note Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

**YES**       **NO**

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files.)

**YES**       **NO**

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

**Large accelerated filer**

**Accelerated filer**

**Non-accelerated filer**

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

**U.S GAAP**

**International Financial Reporting Standards as issued by the International Accounting Standards Board**

**Other**

If "Other" has been checked in response to the previous question, indicate by check mark which financial statements item the registrant has elected to follow.

**ITEM 17**

**ITEM 18**

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

**YES**       **NO**

(APPLICABLE ONLY TO ISSUERS INVOLVED IN BANKRUPTCY PROCEEDINGS DURING THE PAST FIVE YEARS)

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Sections 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court.

**YES**       **NO**

\*

Not for trading but only in connection with the registration of the American Depositary Shares, pursuant to the requirements of the Securities and Exchange Commission.

Table of Contents

**OUR USE OF TERMS AND CONVENTIONS IN THIS ANNUAL REPORT**

Unless otherwise specified or the context requires otherwise in this Annual Report on Form 20-F ("Annual Report"):

References to "Sappi", "Sappi Group", "Sappi group", "group", "we", "us" and "our" are to Sappi Limited together with its subsidiaries;

References to the "Acquired Business" and the "Acquisition" are to the coated graphic paper business and certain related uncoated graphic paper business activities of M-real Corporation (now known as Metsä Board) and their acquisition by us on December 31, 2008;

References to the "2009 Refinancing" are to the refinancing that we implemented in August 2009 which was comprised of the following transactions: (a) the issuance of the 2014 Notes; (b) the refinancing of a bank syndicated loan of €400 million which was replaced by a €400 million OeKB Term Loan Facility (which has since been repaid in full); and (c) the refinancing of a €600 million revolving credit facility which was replaced by a €209 million Revolving Credit Facility;

References to the "2011 Refinancing" are to the refinancing that we implemented in April 2011 which was comprised of the following transactions (a) the issuance of the 2018 and 2021 Notes (b) the redemption of the remaining US\$350 million 2012 Notes, (c) the repayment of €200 million of the outstanding borrowings under our OeKB Term Loan Facility and (d) the increase of our revolving credit facility from €209 million to €350 million and extension of maturity from 2012 to 2016;

References to the "2012 Refinancing" are to the refinancing that we implemented in 2012 which was comprised of the following transactions (a) the issuance of the 2017 and 2019 Notes and (b) the repurchase and redemption of the equivalent of US\$700 million of the 2014 Notes;

References to the "2012 Notes" are to our US\$500 million 6.75% unsecured guaranteed notes due 2012, the remaining amount of which were redeemed in connection with the 2011 Refinancing;

References to the "2014 Notes" are to our €350 million 11.75% and US\$300 million 12.00% senior secured notes due 2014, issued in connection with the 2009 Refinancing;

References to the "2017 Notes" are to our US\$400 million 7.75% senior secured notes due 2017, issued in connection with the 2012 Refinancing;

References to the "2018 Notes" are to our €250 million 6.625% senior secured notes due 2018, issued in connection with the 2011 Refinancing;

References to the "2019 Notes" are to our US\$300 million 8.375% senior secured notes due 2019, issued in connection with the 2012 Refinancing;

References to the "2021 Notes" are to our US\$350 million 6.625% senior secured notes due 2021, issued in connection with the 2011 Refinancing;

## Edgar Filing: SAPPI LTD - Form 20-F

References to the "2032 Notes" are to our US\$250 million 7.50% unsecured guaranteed notes due 2032;

References to the "Revolving Credit Facility" are to our €350 million Revolving Credit Facility maturing in 2016, as amended and restated in the 2011 Refinancing;

References to the "OeKB Term Loan Facility" are to the €400 million term loan facility entered into in connection with the 2009 Refinancing, for which the remaining outstanding amount was repaid in fiscal 2011;

## Edgar Filing: SAPPI LTD - Form 20-F

### Table of Contents

References to the "OeKB Facility" are to the €136 million term loan facility entered into in July 2012;

References to "BEE" are to Broad-Based Black Economic Empowerment, or Black Economic Empowerment, which arises as a result of the following South African legislation: the Employment Equity Act (No. 55 of 1998); the Skills Development Act (No. 97 of 1998); the Preferential Procurement Policy Framework Act (No. 5 of 2000); and the Broad Based Black Economic Empowerment Act (No. 53 of 2003).

References to "IFRS" are to the International Financial Reporting Standards, as issued by the International Accounting Standards Board ("IASB");

References to "southern Africa" are to the Republic of South Africa, the Kingdom of Swaziland, the Kingdom of Lesotho, the Republic of Namibia and the Republic of Botswana;

References to "North America" are to the United States, Canada and the Caribbean;

References to "Latin America" are to the countries located on the continent of South America and Mexico;

References to "Rand", "ZAR" and "R" are to South African Rand, the currency of South Africa, and references to "SA cents" are to South African cents;

References to "US dollar(s)", "dollar(s)", "US\$", "\$" and "US cents" are to United States dollars and cents, the currency of the United States;

References to "euro", "EUR", "Euro" and "€" are to the currency of those countries in the European Union that form part of the common currency of the euro;

References to "UK pounds sterling", "GBP" and "£" are to United Kingdom pounds sterling, the currency of the United Kingdom;

References to "m<sup>2</sup>" are to square meters and references to "hectares" or "ha" are to a land area of 10,000 square meters or approximately 2.47 acres;

References to "tons" are to metric tons (approximately 2,204.6 pounds or 1.1 short tons);

References to "market share" are based upon sales volumes in a specified geographic region during the fiscal year ended September 30, 2012. Certain market share information and other statements presented herein regarding our position relative to our competitors with respect to the manufacture or distribution of particular products are not based on published statistical data or information obtained from independent third parties, but reflects our best estimates. We have based these estimates upon information obtained from our customers, trade and business organizations and associations and other contacts in our industries;

References to "dissolving wood pulp" relates to a highly purified chemical pulp derived from wood intended primarily for conversion into chemical derivatives of cellulose and used mainly in the manufacture of viscose staple fibre, solvent spin

## Edgar Filing: SAPPI LTD - Form 20-F

fibre and filament. Also called chemical cellulose;

References to "NBSK" are to northern bleached softwood kraft pulp frequently used as a pricing benchmark for pulp;

References to "groundwood" or to "mechanical" are to pulp manufactured using a mechanical process, or where applicable to paper, made using a high proportion of such pulp;

References to "woodfree paper" are to paper made from chemical pulp, which is pulp made from wood fiber that has been produced in a chemical process;

Table of Contents

References to "PM" are to individual paper machines; and

References to "Employees" are to full-time equivalent employees. Full-time equivalent employees is the ratio of the number of total hours worked divided by the maximum number of compensable hours in a full-time schedule as defined by law.

Except as otherwise indicated, in this Annual Report the amounts of "capacity" or "production capacity" of our facilities or machines are based upon our best estimates of production capacity at the date of filing of this Annual Report. Actual production by machines may differ from production capacity as a result of products produced, variations in product mix and other factors.

Unless otherwise provided in this Annual Report, trademarks identified by ® are registered trademarks of Sappi Limited or our subsidiaries.

**ACCOUNTING PERIODS AND PRINCIPLES**

Our financial year end is on the Sunday closest to the last day of September. Accordingly the last three financial years were as follows:

03 October 2011 to 30 September 2012 (52 weeks)

27 September 2010 to 02 October 2011 (53 weeks)

28 September 2009 to 26 September 2010 (52 weeks)

Unless otherwise specified, all references in this Annual Report to a "fiscal year", "year ended", "fiscal 2012", "fiscal 2011", and "fiscal 2010", or "the year ended September 2012", "the year ended September 2011" or "the year ended September 2010" of Sappi Limited refer to the fiscal periods as above.

Our group Annual Financial Statements as of September 2012 and 2011 and for each of the three years in the period ended September 2012 are hereinafter referred to as the group Annual Financial Statements and have been included elsewhere in this Annual Report. Our group Annual Financial Statements have been prepared in conformity with IFRS.

**CURRENCY OF PRESENTATION AND EXCHANGE RATES**

We publish our group Annual Financial Statements and all financial data presented in this Annual Report in US dollars on a nominal (non-inflation adjusted) basis. For information regarding the conversion of certain financial information to US dollars in fiscal 2012, 2011 and 2010, see note 2 to our group Annual Financial Statements included elsewhere in this Annual Report and "Item 5 Operating and Financial Review and Prospects Principal Factors Impacting our Group Results".

**FORWARD-LOOKING STATEMENTS**

In order to utilize the "Safe Harbor" provisions of the United States Private Securities Litigation Reform Act of 1995 (the "Reform Act"), we are providing the following cautionary statement. Except for historical information contained herein, statements contained in this Annual Report may constitute "forward-looking statements" within the meaning of the Reform Act.

The words "believe", "anticipate", "expect", "intend", "estimate", "plan", "assume", "positioned", "will", "may", "should", "risk" and other similar expressions, which are predictions of or indicate future events and future trends, which do not relate to historical matters, identify forward looking statements. In addition, this document includes forward looking statements relating to our potential exposure to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity price risk. You should not rely on forward looking statements because they involve known and unknown risks, uncertainties and other factors which are in some cases beyond our control and may cause our

actual

vi

---

Table of Contents

results, performance or achievements to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements (and from past results, performance or achievements). Certain factors that may cause such differences include but are not limited to:

the highly cyclical nature of the pulp and paper industry (and the factors that contribute to such cyclicity, such as levels of demand, production capacity, production, input costs including raw material, energy and employee costs, and pricing);

the impact on our business of the global economic downturn;

unanticipated production disruptions (including as a result of planned or unexpected power outages);

changes in environmental, tax and other laws and regulations;

adverse changes in the markets for our products;

the emergence of new technologies and changes in consumer trends including increased preferences for digital media;

consequences of our leverage, including as a result of adverse changes in credit markets that affect our ability to raise capital when needed;

adverse changes in the political situation and economy in the countries in which we operate or the effect of governmental efforts to address present or future economic or social problems;

the impact of restructurings, investments, acquisitions, dispositions and other strategic initiatives (including related financing), any delays, unexpected costs or other problems experienced in connection with dispositions or with integrating acquisitions or implementing restructurings or other strategic initiatives, and achieving expected savings and synergies; and

currency fluctuations.

These factors are fully discussed in this Annual Report. For further discussion on these factors, see "Item 3 Key Information Selected Financial Data", "Item 3 Key Information Risk Factors", "Item 4 Information on the Company", "Item 5 Operating and Financial Review and Prospects", "Item 10 Additional Information Exchange Controls" and note 29.2 to our group Annual Financial Statements included elsewhere in this Annual Report. You are cautioned not to place undue reliance on these forward-looking statements. These forward-looking statements are made as of the date of the filing of this Annual Report and are not intended to give any assurance as to future results. We undertake no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new information or future events or circumstances or otherwise.

Table of Contents**PART I****ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISERS**

Not applicable.

**ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE**

Not applicable.

**ITEM 3. KEY INFORMATION****Selected Financial Data**

The selected financial data set forth below as of September 2012 and September 2011 has been derived from our group Annual Financial Statements and the notes thereto, which are included elsewhere in this Annual Report. The selected financial data set forth below as of September 2010, 2009 and 2008, has been derived from our group Annual Financial Statements for such periods which are not presented herein.

	Year Ended September				
	2012	2011	2010	2009	2008
	<b>(US\$ million, except per share data)</b>				
<b>Group Income Statement Data:</b>					
Sales <sup>(1)</sup>	6,347	7,286	6,572	5,369	5,863
Operating profit (loss)	421	86	341	(73)	314
Profit (loss) for the year	104	(232)	66	(177)	102

Diluted earnings (loss) per share (US cents)	20	(45)	13	(37)	28
Dividends per share (US cents)					16

	Year Ended September				
	2012	2011	2010	2009	2008
	<b>(US\$ million)</b>				
<b>Group Balance Sheet Data:</b>					
Total assets	6,168	6,308	7,184	7,297	6,109
Net assets	1,525	1,478	1,896	1,794	1,605
Total long-term interest-bearing borrowings	2,358	2,289	2,317	2,726	1,832
Shareholders' equity	1,525	1,478	1,896	1,794	1,605

	Year Ended September						
	2012	2011	2010	2009	2008		
	<b>(US\$ million, except number of shares data)</b>						
<b>Other Information:</b>							
Operating profit excluding special items <sup>(3)</sup>			403	404	339	33	366
EBITDA excluding special items <sup>(3)</sup>			772	821	752	431	740
Weighted average number of ordinary shares in issue (in million) <sup>(2)</sup>			520.8	519.9	516.7	482.6	362.2
Number of ordinary shares in issue at fiscal year end (in million) <sup>(2)</sup>			520.8	520.5	519.5	515.7	229.2

(1)

Sales are defined in note 2.2.11 to our group Annual Financial Statements included elsewhere in this Annual Report.

(2)

Net of Treasury shares, which include "A" ordinary shares, as described in note 17 to our group Annual Financial Statements included elsewhere in this Annual Report.

(3)

In compliance with the U.S. Securities Exchange Commission ("SEC") rules relating to "Conditions for Use of Non-GAAP Financial Measures", we have reconciled operating profit excluding special items to (loss) profit for the year and EBITDA excluding special items rather than operating profit and EBITDA excluding special items to (loss) profit for the year.

Table of Contents

Operating profit excluding special items represents profit (loss) for the year before taxation charge (benefit), net finance costs, and special items. EBITDA excluding special items represents profit (loss) for the year before taxation charge (benefit), net finance costs, depreciation and amortization, and special items.

Net finance costs include: finance costs, finance revenue, net foreign exchange gains and net fair value gain or loss on financial instruments. See the group Income Statements, included elsewhere in this Annual Report, for an explanation of the computation of net finance costs.

Special items represent those items which management believe are material by nature or amount to the operating results and require separate disclosure. Such items would generally include profit or loss on disposal of property, plant and equipment, investments and businesses, asset and investment impairments and reversals, restructuring provisions, integration costs related to acquisitions, insurance recoveries, fires, flood, storm and related events, plantation price fair value adjustment, alternative fuel mixture tax credits and the BEE transaction charge.

We use operating profit excluding special items and EBITDA excluding special items as internal measures of performance to benchmark and compare performance, both between our own operations and as against other companies. Operating profit excluding special items and EBITDA excluding special items are used as measures by the group, together with measures of performance under IFRS, to compare the relative performance of operations in planning, budgeting and reviewing the performances of various businesses. We believe operating profit excluding special items and EBITDA excluding special items are useful measures of financial performance in addition to net profit, operating profit and other profitability measures under IFRS because they facilitate operating performance comparisons from period to period and company to company. For these reasons, we believe operating profit excluding special items, EBITDA excluding special items and similar measures are regularly used by the investment community as a means of comparison of companies in our industry.

Different companies and analysts may calculate operating profit excluding special items and EBITDA excluding special items differently, so making comparisons among companies on this basis should be done very carefully. Operating profit excluding special items and EBITDA excluding special items are not measures of performance under IFRS and should not be considered in isolation or construed as a substitute for operating profit or net profit as an indicator of the group's operations in accordance with IFRS.

The following table reconciles operating profit excluding special items and EBITDA excluding special items to (loss) profit for the year.

	<b>Year Ended September</b>				
	<b>2012</b>	<b>2011</b>	<b>2010</b>	<b>2009</b>	<b>2008</b>
	(US\$ million)				
<b>Profit (loss) for the year</b>	<b>104</b>	<b>(232)</b>	<b>66</b>	<b>(177)</b>	<b>102</b>
Taxation charge (benefit)	34	11	20	(41)	86

---

(i) See "Item 5 Operating and Financial Review and Prospects Operating Results" for a discussion of special items.

(ii) Represents the non-cash change in the fair value of our Plantations. For further information, see notes 2.3.5 and 10 of our group Annual Financial Statements included elsewhere in this Annual Report. In the third quarter of fiscal 2010, our group revised its methodology for recording the fair value of all immature and mature timber which resulted in a positive change in profit of US\$28 million.

(iii) In fiscal 2010, our group entered into a BEE transaction resulting in a US\$23 million charge to profit. For further information, see note 28 of our group Annual Financial Statements included elsewhere in this Annual Report.

Table of Contents

**Risk Factors**

*In addition to other information contained in this Annual Report, you should carefully consider the following factors before deciding to invest in our ordinary shares and American Depository Shares ("ADSs"). However, the risks and uncertainties our Company faces are not limited to those described below. There may be additional risks that we do not currently know of, or that we currently deem immaterial based on information available to us, which may also adversely affect our business. Our business, financial condition and results of operations could be materially adversely affected by any of these risks, resulting in a decline in the trading price of our ordinary shares and ADSs.*

**Risks Related to Our Industry**

*We operate in a cyclical industry, which has in the past resulted in substantial fluctuations in our results.*

The markets for our pulp and paper products are commodity markets to a significant extent and are affected by changes in industry capacity and output levels and by cyclical changes in the world economy. As a result of periodic supply and demand imbalances in the pulp and paper industry, these markets historically have been highly cyclical, with volatile pulp and paper prices.

In addition, turmoil in the capital and credit markets, coupled with uncertainty created by the European sovereign debt crises, has led to the decreased availability of credit, which is having an adverse effect on the world economy and consequently has already affected, and may continue to adversely affect the markets for our products through either a decrease in demand and/or a decrease in achievable selling prices. The timing and magnitude of demand and price increases or decreases in the pulp and paper market have generally varied by region and by type of pulp and paper.

Despite a relatively high level of economic pulp integration on a group-wide basis, a significant increase in the prices for pulp or pulpwood could adversely affect our non-integrated and partially integrated operations if they are unable to raise paper prices sufficiently to offset the effects of increased costs. Other input cost increases including (but not limited to) energy and chemicals may affect our operations if we are unable to raise paper prices sufficiently.

The majority of our woodfree paper sales consist of sales to merchants. However, the pricing of products for merchant sales can generally be changed with 30 to 90 days' advance notice to the merchant. Sales to converters may be subject to longer notice periods for price changes. Such notice periods generally would not exceed 6 to 12 months. In southern Africa, we have entered into longer-term fixed-price agreements of between 6 to 12 months duration primarily for packaging paper and newsprint sales with domestic customers. Such agreements accounted for approximately 5% of consolidated sales during fiscal 2012.

Most of our dissolving wood pulp sales contracts are multi-year contracts. However, the pricing is generally based on a formula linked to the NBSK price and reset on a quarterly basis.

As a result of the short-term duration of paper and dissolving wood pulp pricing arrangements, we are subject to cyclical decreases in market prices for these products. A downturn in paper or dissolving wood pulp prices could have a material adverse effect on our business, results of operations and financial condition.

For further information, see "Item 4 Information on the Company Business Overview".

*The markets for pulp and paper products are highly competitive, and some of our competitors have advantages that may adversely affect our ability to compete with them.*

We compete against a large number of pulp and paper producers located around the world. A recent trend towards consolidation in the pulp and paper industry has created larger, more focused pulp

Table of Contents

and paper companies. Some of these companies benefit from greater financial resources or operate mills that produce pulp and paper products at a lower cost than our mills, or are government subsidized. Some of our competitors have advantages over us, including lower raw material, energy and labor costs and fewer environmental and governmental regulations to comply with. As a result, we cannot assure you that each of our mills will remain competitive. Furthermore, we cannot assure you that we will be able to take advantage of consolidation opportunities which may arise, or that any failure to exploit opportunities for growth would not make us less competitive. Increased competition, including a decrease in import duties in accordance with the terms of free trade agreements, could cause us to lose market share, increase expenditures or reduce pricing, any of which could have a material adverse effect on the results of our operations. In addition, competition may result from our inability to increase the selling prices of our products sufficiently or in time to offset the effects of increased costs which could lead to a loss in market share and aggressive pricing by competitors may force us to decrease prices in an attempt to maintain market share.

***Global economic conditions could adversely affect our business, results of operations and financial condition.***

During the latter half of fiscal 2008 and during fiscal 2009, demand for our paper products declined and pulp prices and demand decreased due to the effects of a global economic recession. This recession was due to the subprime mortgage crisis, which originated in the United States of America, and led to slower economic activity, inflation and deflation concerns, reduced corporate profits, reduced or cancelled capital spending, adverse business conditions and liquidity concerns resulting in significant recessionary pressures, increased unemployment and lower business and consumer confidence. These trends negatively impacted our results of operations during fiscal 2009. Despite the aggressive measures taken by governments and central banks thus far, the economic recovery has been extremely slow. Certain countries have fallen back into recession and a significant risk remains that the measures taken may not prevent the global economy from falling back into recession or even a depression. In addition, the current turmoil in the sovereign debt markets as a result of the European debt crisis has resulted in market uncertainty generally and in worsening economic conditions particularly in Europe.

Even though our operational results improved during fiscal 2011 and continued to improve during fiscal 2012, we are still negatively impacted by the slow recovery of the world economies, and the results of our European business have been adversely affected by the worsening economic conditions in Europe in the last two quarters of fiscal 2011 and fiscal 2012. Furthermore, we are unable to predict the timing or rate of any recovery. Finally, we cannot predict the timing or duration of any other downturn in the economy that may occur in the future.

***The availability and cost of insurance cover can vary considerably from year to year as a result of events beyond our control, and this can result in us paying higher premiums and periodically being unable to maintain appropriate levels or types of insurance.***

The insurance market remains cyclical and catastrophic events can change the state of the insurance market, leading to sudden and unexpected increases in premiums and deductibles and unavailability of coverage due to reasons totally unconnected with our business. In addition, recent turmoil and volatility in the global financial markets may adversely affect the insurance market. This may result in some of the insurers in our insurance portfolio failing and being unable to pay their share of claims.

We have successfully negotiated the renewal of our 2012 asset and business interruption insurance cover at more favorable rates to those of 2011. Maximum self-insured retention for any one property damage occurrence is €20.5 million, with an annual aggregate of €33 million. We are unable to predict whether past or future events will result in more or less favorable terms for 2013. For property damage and business interruption, there generally does not seem to be cost effective cover available to full value.

Table of Contents

From fiscal 2011, our property damage insurance policy is euro denominated as most of our assets are based in euro denominated jurisdictions.

We place the insurance for our plantations on a stand-alone basis into international insurance markets. While the impact of fires on our plantations in fiscal 2011 and fiscal 2012 was substantially less than that in fiscal years 2007 through 2010, we are unable to assure you that this will remain so for the foreseeable future.

While we believe our insurance policies provide adequate coverage for reasonably foreseeable losses, we continue working to improve risk management to lower the risk of incurring losses from uncontrolled incidents. We are unable to assure you that actual losses will not exceed our insurance coverage or that such excess will not be material.

***New technologies or changes in consumer preferences may affect our ability to compete successfully.***

We believe that new technologies or novel processes may emerge and that existing technologies may be further developed in the fields in which we operate. These technologies or processes could have an impact on production methods or on product quality in these fields. Unexpected rapid changes in employed technologies or the development of novel processes that affect our operations and product range could render the technologies we utilize or the products we produce obsolete or less competitive in the future. Difficulties in assessing new technologies may impede us from implementing them and competitive pressures may force us to implement these new technologies at a substantial cost. Any such development could materially and adversely impact our results of operations.

Consumer preferences may change as a result of the availability of alternative products or of services including less expensive product grades, or as a result of environmental activist pressure from consumers. In addition, trends in advertising, electronic data transmission and storage and the internet could have adverse effects on traditional print media and other paper applications, including our products and those of our customers. Over the last ten to fifteen years, the pulp and paper industry has encountered a growing transformation in consumer preference. During this time, readership and circulation of newspapers and magazines has been declining, and accessibility to, and use of, the internet has increased. As a result, advertising expenditure has gradually shifted away from the more traditional forms of advertising, such as newspapers, magazines, radio and television, which tend to be more expensive, toward a greater use of electronic and digital forms of advertising, on the internet, mobile phones and other electronic devices, which tend to be less expensive. During the latter half of calendar 2011 and continuing into calendar 2012, competition from electronic media adversely affected demand for many of our products. While neither the exact timing nor the extent of those trends can be predicted with certainty, competition from electronic media, for example, has led to weaker demand for certain of our products in some of our markets. Any such changes in consumer preferences or other trends could negatively impact the consumption of our products and consequently, could have a material and adverse impact on our results of operations.

***The cost of complying with environmental, health and safety laws may be significant to our business.***

Our operations are subject to a wide range of environmental, health and safety laws in the various jurisdictions in which we operate. Such laws govern, among other things, the control of emissions and discharges, the management and disposal of hazardous substances and wastes, the cleanup of contamination, the purchase and use of safety equipment, workplace safety training and the monitoring of workplace hazards.

Although we actively strive to ensure that our facilities comply with all applicable environmental laws and permits required for our operations, we have in the past been, and may in the future be, subject to

Table of Contents

governmental enforcement actions for failure to comply with environmental requirements. Impacts from historical operations, including the land disposal of waste materials, or our own activities may require costly investigation and cleanup. In addition, we could become subject to environmental liabilities resulting from personal injury, property damage or natural resources damage. Expenditures to comply with future environmental requirements and the costs related to any potential environmental liabilities and claims could have a material adverse effect on our business and financial condition.

We expect to continue to incur significant expenditures and may face operational constraints to maintain compliance with applicable environmental laws, to upgrade pollution control equipment at our mills and to meet new regulatory requirements, including those in the United States, southern Africa and Europe. For example, under new benchmarks for the allocation of emissions rights pursuant to European Union regulations governing the reduction of greenhouse gas emissions we expect to fall short of emission rights during the trading period beginning in 2013. We currently estimate the cost to purchase extra emission rights to be €4 million for 2013.

For further information, see "Item 4 Information on the Company Environmental and Safety Matters".

**Risks Related to Our Business**

***Our significant indebtedness may impair our financial and operating flexibility.***

Our significant level of indebtedness and the terms of our indebtedness could negatively impact our business and liquidity. As of September 2012, our net interest bearing debt (long-term and short-term interest bearing debt plus overdraft, less cash on hand) was US\$1,979 million. While reduction of our indebtedness is one of our priorities, opportunities to grow within our businesses will continue to be evaluated, and the financing of any future acquisition or capital investment may include the incurrence of additional indebtedness.

The level of our debt may have significant consequences for our business, including:

limiting our ability to obtain additional financing, which could restrict, among other things, our ability to exploit growth opportunities;

diverting a substantial portion of our cash flow from operations to meet debt service obligations;

exposing us to increases in interest rates because a portion of our debt bears interest at variable rates;

placing us at a competitive disadvantage to certain of our competitors with lower levels of indebtedness;

increasing our vulnerability to economic downturns and adverse changes in our business;

limiting our ability to withstand competitive pressure; and

restricting the activities of certain group companies under the covenants and conditions contained in certain of our financing arrangements.

Our ability to refinance our debt, incur additional debt, the terms of our existing and additional debt and our liquidity could be affected by a number of adverse developments. In the third quarter of fiscal 2008, the global debt markets were subject to significant pressure triggered by the collapse of the sub-prime mortgage market in the U.S. This liquidity crunch continued through calendar 2009, leading to unprecedented volatility in the financial markets, an acute contraction in the availability of credit, including in interbank lending, and the failure of a number of leading financial institutions. Although conditions improved somewhat during the 2010, 2011 and 2012 fiscal years, there is no assurance that conditions will not deteriorate in the future, including as a result of continued or renewed turmoil in the

Table of Contents

European sovereign debt markets, which could result in tight credit restrictions and credit being available only at premium.

Since 2006, the group's credit ratings have been downgraded to sub-investment grade by Standard & Poor's (S&P) and Moody's. Adverse developments in our credit rating and financial markets, including as a result of turmoil in the European sovereign debt markets and renewed deterioration of general economic conditions, may negatively impact our ability to issue additional debt as well as the amount and terms of the debt we are able to issue. Our liquidity will be adversely affected if we must repay all or a portion of our maturing debt from available cash or through use of our existing liquidity facilities. In addition, our results of operations will be adversely impacted to the extent the terms of the debt we are able to issue are less favorable than the terms of the debt being refinanced. We may also need to agree to stricter covenants that place additional restrictions on our business.

We are subject to South African exchange controls, which may restrict the transfer of funds directly or indirectly between our subsidiaries or between the parent company and our subsidiaries and can restrict activities of our subsidiaries. See "Item 10 Additional Information Exchange Controls". We may also incur tax costs in connection with these transfers of funds. These exchange controls have affected the geographic distribution of our debt. As a result, acquisitions in the United States and Europe were typically financed with indebtedness incurred by companies in those regions. As a consequence, our ability or the ability of any of our subsidiaries to make scheduled payments on debt will depend on financial and operating performance, which will depend on various factors beyond our control, such as prevailing economic and competitive conditions. If we, or any of our subsidiaries, are unable to achieve operating results or otherwise obtain access to funds sufficient to enable us to meet our debt service obligations, we could face substantial liquidity problems. As a result, we might need to delay investments or dispose of material assets or operations. The timing of and the proceeds to be realized from any such disposition would depend upon circumstances at the time.

***We require a significant amount of financing to fund our business and our ability to generate sufficient cash depends on many factors, some of which are beyond our control.***

Our ability to fund our working capital, capital expenditure and research and development requirements, to engage in future acquisitions, to make payments on our debt, to fund post-retirement benefit programs and to pay dividends depends upon our future operating performance. Our principal sources of liquidity are cash generated from operations and availability under our credit facilities and other debt arrangements. For example, we are primarily financing current capital expenditures to expand our dissolving wood pulp capacity in South Africa and North America through internally generated funds and our OeKB facility. Our ability to generate cash depends, to some extent, on general economic, financial, competitive, market, regulatory and other factors, many of which are beyond our control. Our cash flow from operations may be adversely impacted by a downturn in worldwide economic conditions, which would result in a decline in global demand for our products, such as the current decline in demand in Europe, and a softening of prices for some of our products.

Our business may not generate sufficient cash flow from operations and additional debt and equity financing may not be available to us in a sufficient amount to enable us to meet our liquidity needs. If our future cash flows from operations and other capital resources are insufficient to fund our liquidity needs, we may be required to obtain additional debt or equity financing, refinance our indebtedness, reduce or delay our capital expenditures and research and development. We may not be able to accomplish these alternatives on a timely basis or on satisfactory terms. The failure to do so could have an adverse effect on our business, results of operations and financial condition.

Table of Contents

***We may not be successful in implementing, or may not realize all the expected benefits from, our strategic initiatives.***

As part of our overall business strategy, we are implementing strategic initiatives to improve profitability, including mill closures and other cost saving projects, measures to enhance productivity and an expansion of our dissolving wood pulp capacity and other higher margin speciality businesses. Any future growth, cost savings or productivity enhancements that we realize from such efforts may differ materially from our estimates, or we may not be able to successfully implement part or all of our initiatives. The benefit of cost savings or productivity enhancements that we realize may be offset, in whole or in part, by reductions in pricing or volume, or through increases in other expenses, including raw material, energy or personnel, or the demand for dissolving wood pulp may decline. With respect to our investments in additional dissolving wood pulp capacity, a number of our competitors have also recently announced additional production capacities, and total announced supply capacity currently significantly outstrips announced demand capacity for dissolving wood pulp, which may adversely affect the price of dissolving wood pulp. We cannot assure you that these initiatives will be completed as anticipated or that the benefits we expect will be achieved on a timely basis or at all.

***Continued volatility in equity markets and declining yields or defaults in the bond markets could adversely affect the funded status and funding needs of our post-employment defined benefit funds.***

Several global economic factors currently make the general outlook for the forthcoming fiscal years uncertain. The equity and bond markets (including sovereign debt markets) may remain volatile and move in uncertain and unusual ways in the forthcoming fiscal years leading to significant swings in the value of the assets and liabilities of our funded and unfunded defined benefit schemes.

Generally, but not always, rising corporate bond yields reduce our net balance sheet liabilities whereas falling bond yields increase our net balance sheet liabilities. We estimate the funded status of our post-employment benefit arrangements has deteriorated slightly since the end of fiscal 2011. There is a risk that equity markets will deteriorate and bond yields will remain low in North America and Europe if the global economic climate worsens, which could negatively affect the funded status of our post-employment defined benefit arrangements. In addition, volatility in our net balance sheet liabilities resulting from the relative change in the value of assets and liabilities may be further enhanced by investment strategies resulting in exposure to various classes of assets.

Existing and potential changes in statutory minimum requirements may also affect the amount and timing of funding to be paid by us. Most funding requirements consider yields on assets such as government bonds or interbank interest rate swap curves, depending on the basis. Although recent statutory easements in the pace of funding on these bases have provided some contribution relief to us, as long as yields on these asset classes remain low, we expect to have to pay additional contributions to meet onerous minimum funding targets, which could adversely affect our financial position and results of operations.

In addition, our pension and post-retirement funds hold various sovereign bonds as part of their fund assets, including Italian index-linked treasuries and sovereign bonds issued by Austria, Belgium, France, Germany, South Africa, the United Kingdom and the United States of America. Any significant decline in value or default of such securities, including in the context of the current European sovereign debt crisis, could negatively affect the funded status of our post-employment defined benefit arrangements.

***Fluctuations in the value of currencies, particularly the Rand and the euro in relation to the US dollar, have in the past had, and could in the future have, a significant impact on our earnings in these currencies.***

Exchange rate fluctuations have in the past, and may in the future, affect the competitiveness of our products in relation to the products of pulp and paper companies based in other countries.

Table of Contents

Fluctuations in the exchange rate between currencies, particularly the Rand and euro in relation to the US dollar, have in the past and could in the future significantly affect, *inter alia*, our earnings, the competitiveness of our exports, the prices of imported competitors' products, and the costs of our raw materials.

Since the adoption of the euro by the European Union on January 01, 1999 (when the euro was trading at approximately US\$1.18 per euro), it has fluctuated against the US dollar, reaching a low of approximately US\$0.83 per euro in October 2000 before trading at approximately US\$1.29, US\$1.34 and US\$1.35 per euro at the end of fiscal 2012, 2011 and 2010, respectively.

In recent years, the value of the Rand against the US dollar has fluctuated considerably, moving against the US dollar from a low of approximately R13.90 per US dollar in December 2001 to approximately R8.31, R8.10 and R7.02 per US dollar at the end of fiscal 2012, 2011 and 2010, respectively.

For further information, see notes 2 and 29.2 to our group Annual Financial Statements included elsewhere in this Annual Report and "Item 5 Operating and Financial Review and Prospects Principal Factors Impacting our Group Results".

***There are risks relating to the countries in which we operate that could impact our earnings or affect your investment in our Company.***

We own manufacturing operations in five countries in Europe, two states in the United States and in South Africa and own plantations in South Africa and Swaziland. As a result, our operations are subject to various economic, fiscal, monetary, regulatory, operational and political conditions. Our presence in these countries exposes us to risks such as material changes in laws and regulations, political, financial and social changes and instabilities, exchange controls, risks related to relationships with local partners and potential inconsistencies between commercial practices, regulations and business models in different countries. The occurrence of such events could adversely affect our business, results of operations and financial condition.

For further information see "Item 5 Operating and Financial Review and Prospects South African Economic and Political Environment" and "Item 10 Additional Information Exchange Controls".

***The inability to recover increasing input costs through increased prices of our products has had, and may continue to have, an adverse impact on our profitability.***

The selling prices of the majority of the products we manufacture and the purchase prices of many of the raw materials we use generally fluctuate in correlation with global commodity cycles. We have in the past experienced, and may in the future experience, increasing costs of a number of raw materials due to global trends beyond our control.

Electricity generation companies are competing for the same raw materials, namely wood and wood chips, in the same markets as us, driving prices upwards, especially during winter in the Northern hemisphere. Although oil prices have decreased from the historical highs of 2008, they could return to high levels in the foreseeable future because of, among other things, political instability in the oil-producing regions of the world. This impacts the oil-based commodities required by our business in the areas of energy (including electricity), transport and chemicals.

As occurred in previous years, a major potential consequence of the increase in the price of input commodities is our inability to counter this effect through increased selling prices, resulting in reduced operating profit, and negatively impacting business planning.

While we continue to implement procedures to reduce our cost of commodity inputs, other than maintaining a high level of economic pulp integration, the hedging techniques we apply on our raw

Table of Contents

materials and products are on a small scale and short-term in nature. Moreover, in the event of significant increases in the prices of pulp, our non-integrated and partially integrated operations could be adversely affected if they are unable to raise paper prices by amounts sufficient to maintain margins.

*If we are unable to obtain energy or raw materials at reasonable prices, or at all, it could adversely affect our operations.*

We require substantial amounts of oil-based chemicals, fuels and other raw materials for our production activities and transport of our timber products. We rely partly upon third parties for our supply of the energy resources and, to a certain extent, timber, which are consumed in our operations. The prices for and availability of these energy supplies and raw materials may be subject to change or curtailment, respectively, due to, among other things, new laws or regulations, imposition of new taxes or tariffs, interruptions in production by suppliers, worldwide price levels and market conditions. For example, energy costs for our southern African operations have risen sharply in recent years which has significantly impacted profitability in the region.

Environmental litigation aimed at protecting forests and species habitats, as well as regulatory restrictions, may in the future cause significant reductions in the amount of timber available for commercial harvest. In addition, future claims and regulations concerning the promotion of forest health and the response to and prevention of wildfires could affect timber supplies in the jurisdictions in which we operate. The availability of harvested timber may further be limited by factors such as fire, insect infestation, disease, ice and wind storms, droughts, floods and other nature and man-made causes, thereby reducing supply and increasing prices.

The prices of various sources of energy supplies and raw materials have significantly increased in the past, and may in the future further increase significantly from current levels. An increase in energy and raw material prices could materially adversely affect our results of operations, plantation valuation and financial condition.

*A limited number of customers account for a significant amount of our revenues.*

We sell a significant portion of our products to several significant customers, including Antalis, Birla, Igepa, Lenzing, Lindenmeyr, PaperlinX and Xpedx . During fiscal 2012 and 2011, no single customer individually represented more than 10% of our total sales. As a significant portion of our sales revenue is generated through sales to a limited number of customers, any adverse development affecting our significant customers or our relationships with such customers could have an adverse effect on our credit risk profile, our business and results of operations.

In February 2012, our credit insurer withdrew credit insurance for a major customer of Sappi Fine Paper Europe due to concerns over the customer's lower than expected profitability. Our average monthly exposure to this customer for the 2012 calendar year has been approximately €40 million and our exposure to this customer at the end of September 2012 was €24 million. Approximately half of our exposure to this customer was credit insured prior to the withdrawal of credit insurance by the insurer. While this customer has continued to meet its payment obligations to us and has embarked on a significant restructuring program, further deterioration of this customer's financial condition may result in its inability to make payments to us which will increase our bad debt provision and reduce our revenues in the future.

For further information see "Item 4 Information on the Company Sappi Fine Paper Marketing and Distribution Customers" and "Item 4 Information on the Company Sappi Southern Africa Marketing and Distribution Customers".

Table of Contents

***The recent global liquidity and credit crises could have a negative impact on our significant customers, which in turn could materially adversely affect our results of operations and financial position.***

The global liquidity and credit crises continue to have a negative impact on businesses around the world. The impact of these crises on our significant customers cannot be predicted and may be severe. A disruption in the ability of our significant customers to access sources of liquidity could cause serious disruptions or an overall deterioration of their businesses, which could lead to a significant reduction in their future orders of our products and the inability or failure on their part to meet their payment obligations to us, any of which could have a material adverse effect on our results of operations and financial position.

***Because of the nature of our business and workforce, we may face challenges in the retention of staff and the employment of skilled people that could adversely affect our business.***

We are facing an aging demographic work profile among our staff due to the mature nature of our industry and the rural and often remote location of our mills, together with generally long tenure of employees at the mills. As a result, we are likely to experience groups of employees leaving the company within a relatively short space of time of one another and may have difficulty attracting qualified replacements. The potential risks we face are a loss of institutional memory, skills, experience and management capabilities. We may be unable to attract and retain sufficient qualified replacements when and where necessary to avoid an adverse impact on our business.

***A large percentage of our employees are unionized and wage increases or work stoppages by our unionized employees may have a material adverse effect on our business.***

A large percentage of our employees are represented by labor unions under collective bargaining agreements, which need to be renewed from time to time. In addition, we have in the past and may in the future seek, or be obligated to seek, agreements with our employees regarding workforce reductions, closures and other restructurings. We may not be able to negotiate acceptable new collective bargaining agreements or future restructuring agreements, which could result in labor disputes. Also, we may become subject to material cost increases or additional work rules imposed by agreements with labor unions. This could increase expenses in absolute terms and/or as a percentage of net sales. Although we believe we have good relations with our employees, work stoppages or other labor disturbances may occur in the future which could adversely impact our business.

For example, during the 2011 wage negotiations with the southern African labor unions, most of our unionized employees participated in a strike action which affected a number of industries, including (but not limited to) the pulp and paper, chemical and transport industry. The strike action lasted for approximately three weeks and impacted our production and shipment capabilities, culminating in a loss of turnover. Furthermore, the settlement as agreed with the labor unions and our employees will require us to incur above inflation salary and wage increases for all unionized employees.

Any further strike actions or other labor disruptions, or any related negotiations that result in onerous terms for us may have an adverse effect on our business and profitability.

***The prevalence of HIV/AIDS, specifically in Africa, exposes us to certain risks which may have an adverse effect on our southern African operations.***

The southern African region has one of the highest infection rates of HIV/AIDS in the world. Although we initiated in the early 1990's a comprehensive HIV/AIDS management program to address the effects of the disease and its impact on our employees and our business, our operations, and in specific our southern African operations, continue to be exposed to certain risks related to the HIV/AIDS pandemic. We incur and will continue to incur costs related to the prevention, detection and treatment of the

Table of Contents

disease. Also, we cannot guarantee that any current or future management program will be successful in preventing or reducing the infection rate amongst our employees and any potential effect thereof on the mortality rate. We may be exposed to lost workers' time associated with the disease and a potential loss of skill which may adversely affect our operations.

For further information, see "Item 5 Operating and Financial Review and Prospects South African Economic and Political Environment".

***Catastrophic events affecting our plantations, such as fires, may adversely impact our ability to supply our southern African mills with timber from the region.***

The southern African landscape is prone to, and ecologically adapted to, frequent fires. The risk of uncontrolled fires entering and burning significant areas of plantation is high, but under normal weather conditions this risk is managed through comprehensive fire prevention and protection plans. In 2007 and 2008, southern Africa experienced a number of abnormal weather events (hot, dry conditions fanned by extremely strong winds), which resulted in disastrous plantation fires across vast areas of eastern South Africa and Swaziland affecting 14,000 hectares and 26,000 hectares, respectively, of our plantations. These abnormal weather conditions might be more frequent as a result of climate change. In addition, because the transformation of land ownership and management in southern Africa has been moving ownership and management of plantations to independent growers, we have less ability to directly manage fire risk, as well as risks of other catastrophic events, such as pathogen and pest infestations. As a consequence, the risk of plantation fires or other catastrophic events remains high and may be increasing. Continued or increased losses of our wood source could jeopardize our ability to supply our mills with timber from the region.

***Concerns about the effects of climate change may have an impact on our business.***

Concerns about global warming and carbon footprints, as well as legal and financial incentives favoring alternative fuels, are causing the increased use of sustainable, non-fossil fuel sources for electricity generation.

The increased emphasis on water footprint in southern Africa is causing increased focus on the use of water by our operational units, on the quality of water released back into the water systems and on the control of effluent. The costs of water used also have a direct bearing on our input costs and operating profit.

Climate change could also cause the spread of disease and pestilence into our plantations and fiber sources, far beyond their traditional geographic spreads, increasing the risk that wood supply necessary to our operations may be negatively impacted.

***Our ability to utilize our net operating tax loss carry forwards generated by our United States operations could be substantially limited if we experience a Company ownership change as defined under the United States Internal Revenue Code, which may adversely affect our results of operations and financial condition.***

As a result of Sappi Fine Paper North America's past financial performance, we have net operating tax loss carry forwards generated by our United States operations. Section 382 of the Internal Revenue Code of 1986, as amended (the "Code"), contains rules that limit the ability of a company that undergoes an ownership change, at the Sappi Limited company level, to utilize its net operating tax loss carry forwards in years after the ownership change. An "ownership change" for purposes of Section 382 of the Code generally refers to any change in ownership of more than 50% of the company's shares over a three-year period. These rules generally operate by focusing on ownership changes among shareholders owning, directly or indirectly, 5% or more of the share capital of a company or any change in ownership arising from a new issuance of the company's shares.

Table of Contents

If we undergo an ownership change for purposes of Section 382 as a result of future transactions involving our share capital, including purchases or sales of shares between our greater than 5% shareholders, our ability to use our net operating tax loss carry forwards generated by our United States operations would be subject to the limitations of Section 382. Depending on the resulting limitations, a portion of our United States net operating tax loss carry forwards could expire before we would be able to use them. Our inability to utilize our United States net operating tax loss carry forwards could have an adverse effect on our financial condition and results of operations.

**Risks Related to Our Shares**

*Your ability to trade a substantial number of ordinary shares may be restricted by the limited liquidity of shares traded on the JSE Limited and our ADSs traded on the New York Stock Exchange.*

The principal trading market for our ordinary shares is on the exchange operated by the JSE Limited ("JSE") (formerly known as the Johannesburg Stock Exchange). Historically, trading volumes and liquidity of shares listed on the JSE have been low in comparison with other major international markets. In fiscal 2012, 365 million of our ordinary shares were traded on the JSE and 3 million ADSs were traded on the New York Stock Exchange. The relatively low liquidity of shares traded on the JSE Limited and the New York Stock Exchange could affect your ability to sell ordinary shares.

For further information, see "Item 7 Major Shareholders and Related Party Transactions Major Shareholders", "Item 9 The Offer and Listing Offer and Listing Details" and "Item 9 The Offer and Listing Markets".

*Significant shareholders may be able to influence the affairs of our Company.*

Although our investigation of beneficial ownership of our shares identified only one beneficial owner of more than 5% of our ordinary shares, holding approximately 12.06%, as shown in our shareholders' register on September 28, 2012, the four largest shareholders of record, all of which are nominees that hold shares for a multitude of beneficial owners, owned approximately 83.9% of our ordinary shares as of September 28, 2012. These significant potential voting blocks of nominee registered shareholders may have the power to influence voting decisions for the shares they hold.

See "Item 7 Major Shareholders and Related Party Transactions Major Shareholders".

**Risks Related to Our Indebtedness**

*To service our indebtedness, we will require a significant amount of cash, and our ability to generate cash will depend on many factors beyond our control.*

Our ability to make payments on our indebtedness, and to refinance our indebtedness, and to fund planned capital expenditures and working capital requirements will partly depend on our ability to generate cash in the future. This ability is, to a certain extent, subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. See "Risks Related to Our Industry" and "Risks Related to Our Business".

We cannot assure you that we will generate sufficient cash flow from operations, that we will realize operating improvements on schedule or that future borrowings will be available to us in an amount sufficient to enable us to service and repay our indebtedness or to fund our other liquidity needs. If we are unable to satisfy our debt obligations, we may have to undertake alternative financing plans, such as refinancing or restructuring our indebtedness, selling assets, reducing or delaying capital investments or seeking to raise additional capital. We cannot assure you that any refinancing or debt restructuring would be possible, that any assets could be sold or that, if sold, the timing of the sales and the amount of proceeds realized from those sales, or that additional financing could be obtained on acceptable terms.

Table of Contents

*If we default under our debt covenants, we may not be able to meet our payment obligations.*

Some of our credit facilities contain covenants that restrict some of our corporate activities, including our ability to:

make acquisitions or investments;

make loans or otherwise extend credit to others;

incur indebtedness or issue guarantees;

create security;

sell, lease, transfer or dispose of assets;

merge or consolidate with other companies; and

make a substantial change to the general nature of our business.

In addition, certain of our credit facilities require us to comply with certain covenants and specified financial covenants and ratios. Our ability to comply with these covenants and restrictions may be affected by events beyond our control, including prevailing economic, financial and industry conditions. If we breach any of these covenants or restrictions, we could be in default under the credit facilities and other indebtedness. This would permit the lending banks under our credit facilities or our bondholders to take certain actions, including declaring all amounts that we have borrowed under the credit facilities and other indebtedness to be due and payable, together with accrued and unpaid interest. Any acceleration of our credit facilities would cause a cross-acceleration of our 2018 Notes and 2021 Notes. This would also result in an event of default under some of our debt instruments. The lending banks could also refuse to extend further credit under their facilities. If we are unable to repay our debt to the lending banks and or the bondholders, they could proceed against any collateral that secures the debt under the credit facilities and our bonds. If we are unable to make payments on time or refinance our indebtedness, or if our debt or any other material financing arrangement that we enter into were to be accelerated, this could have a material adverse effect on our business and financial condition.

Table of Contents

**ITEM 4. INFORMATION ON THE COMPANY**

**HISTORY AND DEVELOPMENT OF THE COMPANY**

Sappi Limited is a public company incorporated in the Republic of South Africa. Our principal executive offices are located at 48 Ameshoff Street, Braamfontein, Johannesburg, 2001, Republic of South Africa, our telephone number is +27-11-407-8111 and our web address is www.sappi.com. We currently have our primary listing on the JSE Limited ("JSE"), formerly the Johannesburg Stock Exchange, and have a secondary listing on the New York Stock Exchange. Sappi Limited was founded and incorporated in 1936 in South Africa and is a corporation organized under the Companies Act No.71 of 2008, as amended, of the Republic of South Africa.

Until 1990, we primarily expanded our operations within southern Africa. Since 1990, we have grown through acquisitions outside of southern Africa. In the mid 1990's we acquired S.D. Warren Company, a market leader in the United States in coated woodfree paper and a major producer of other speciality paper products. It now conducts business as Sappi Fine Paper North America. In the late 1990's we acquired KNP Leykam, a leading European producer of coated woodfree paper. KNP Leykam now conducts business as Sappi Fine Paper Europe. In 2002 we acquired Potlatch Corporation's coated woodfree paper business and have integrated it in Sappi Fine Paper North America. In 2008 we acquired the coated graphic paper business of M-real Corporation (now known as Metsä Board) and have integrated it in Sappi Fine Paper Europe.

On January 31, 2010 we closed our production facilities at the Usutu Mill in Swaziland due to market conditions and forest fire damage. Forestry operations will however continue at Usutu.

During January 2010 we permanently ceased operations at the Kangas Mill in Finland. Products produced at the Kangas Mill were moved to and supplied from the Lanaken Mill in Belgium and our Kirknemi Mill in Finland. On March 24, 2010, we announced a BEE transaction involving the issuance of 24.3 million Sappi shares (approximately 4.5% of Sappi Limited). The transaction empowers our South African employees, our strategic empowerment partner, Lereko Investments (Pty) Ltd, and the South African communities in which we operate. On April 19, 2010, we announced the acquisition of 14,500 ha of forestry land in Mpumalanga, South Africa.

During the second half of fiscal 2011, we ceased operations at our Adamas Mill in South Africa and Biberist Mill in Switzerland. We also announced significant restructuring and cost reduction programs in the European and southern African paper businesses.

To address a long-term declining trend in coated graphic paper demand in our major markets, we are in the process of repositioning the group in an effort to generate 60% or more of operating profit from higher margin products such as dissolving wood pulp and speciality casting release paper. As part of this plan we announced in fiscal 2011, an investment to convert Ngodwana Mill's bleached pulp production facility to produce 210,000 tons of dissolving wood pulp and the conversion of our Cloquet Mill's bleached pulp production facility to produce 330,000 tons of dissolving wood pulp. These conversions are planned to be completed in our 2013 fiscal year.

In fiscal 2012 we sold our 34% shareholding in Jiangxi Chenming Paper Company Limited, situated in the People's Republic of China, to the majority shareholder and co-founding joint venture partner for US\$42 million. The proceeds for the sale were received on November 06, 2012.

On October 12, 2012 we announced the decision to mothball the 80,000 ton per annum sackkraft machine, at the Tugela Mill. During fiscal 2012 we also announced the closure of the 10,000 ton per annum paper machine at the Tugela Mill. During fiscal 2012 we announced the closure of the pulp line at our Enstra Mill as well as the closure of the Kraft Continuous Digester ("KCD") at our Tugela Mill.

Table of Contents

For information on our principal investments and capital expenditures, see the description of our business in " Business Overview" and "Item 5 Operating and Financial Review and Prospects Liquidity and Capital Resources".

**BUSINESS OVERVIEW**

**Our Business**

Sappi is a global pulp, paper and dissolving wood pulp solutions group. We are a leading producer of coated woodfree and coated mechanical paper widely used in books, brochures, magazines, catalogues and many other print applications. We are also a leading producer of dissolving wood pulp, used primarily in the manufacture of viscose fiber, acetate tow, and consumer and pharmaceutical products. In addition, we produce newsprint, uncoated graphic and business papers, premium quality packaging papers, a range of coated speciality papers and a range of paper grade pulp.

**Business strategy**

We endeavor to be a growing and profitable leader in paper and dissolving wood pulp, providing value for our shareholders and customers by leveraging our resources effectively to create wealth. In order to achieve this goal we have identified specific themes and actions.

During the course of the year Sappi has refined its strategy to the following three themes, namely: growing our Specialised Cellulose business, further optimizing and improving the profitability of our paper businesses, strengthening our balance sheet and reducing debt.

**Growing our Specialised Cellulose business**

Already being a global leader in dissolving wood pulp production, which is a fast growing and high margin business serving the textiles, consumer goods, foodstuffs and pharmaceutical industries. We decided in May 2011 to invest US\$340 million in the Ngodwana Mill in order to grow our dissolving wood pulp production capacity by 210,000 tons per year. During November 2011 we announced an additional investment of US\$170 million in our Cloquet Mill pulp production facilities which will enable the mill to produce 330,000 tons of dissolving wood pulp. This is expected to increase our total dissolving wood pulp production capacity to approximately 1.3 million tons per year. Both projects have been initiated and are scheduled to be commissioned during the 2013 fiscal year.

In anticipation of the growth in production of dissolving wood pulp, we have entered into various long-term supply agreements with existing and new customers in order to secure a market for our new production capacity.

In addition, and in line with our strategy to secure a stable fiber supply for our southern African operations, we entered into long-term supply agreements with forestry companies.

**Further optimizing and improving the profitability of our paper businesses**

Despite a long-term declining demand trend for graphic paper in our major markets, we believe that our graphic paper businesses will continue to be able to generate reasonable net profits and strong cash flows for the foreseeable future.

We have initiated actions to ensure that we continuously optimize our paper business in all three regions in which we produce paper.

A cost reduction process was implemented in Europe during 2012 which has achieved fixed and variable cost savings in excess of €100 million. Part of these actions included a decision to establish a Shared Service center in Cracow, Poland. Further, during the course of 2012 we sold various non-essential assets, including the recently closed Biberist Mill property.

Table of Contents

As a further means to improve the profitability of our paper business in Europe we have decided to convert our existing coated fine paper machine at our Alfeld Mill in Germany to produce speciality paper. This investment will result in a reduction in our capacity to manufacture coated fine paper in Europe (by 150,000 tons p.a.) in a currently over supplied market and, at the same time, increase our capacity (by 135,000 tons p.a.) to produce a more profitable speciality paper from this mill. Production is expected to start in the first quarter of fiscal 2014.

In addition to the above, we continuously evaluate our current capacity relative to demand in order to adjust capacity pro-actively.

During 2012 the southern African business underwent a restructuring exercise which resulted in both administrative and production staff being retrenched in order to optimize and improve the profitability of the southern African paper business. Sappi Southern Africa also closed two pulp lines at the Enstra and Tugela Mills, respectively. On October 12, 2012 we announced the decision to mothball the 80,000 ton per annum sackkraft machine, at the Tugela Mill due to poor market conditions.

**Strengthening our balance sheet and reducing debt**

The group has made a concerted effort to reduce debt by introducing various initiatives to reduce cost and increase efficiencies and sell non-essential assets. Such disposals included our properties upon which our Adamas and Biberist Mills operated, as well as the disposal of our 34% shareholding in Jiangxi Chenming Paper Company, a lightweight coated paper mill in China, to the majority shareholder and co-founding joint venture partner.

Furthermore, during 2012, we raised US\$700 million, the proceeds of which were used to repay bonds maturing in 2014 and which had higher interest rates. The refinancing initiative resulted in an improved maturity profile and an annual cash interest saving of US\$30 million.

We intend to grow our Specialised Cellulose business through the investments at our Cloquet Mill and Ngodwana Mill within the constraints of the group's balance sheet and liquidity position. We will continue to carefully manage the group's level of indebtedness and to retain our focus on maintaining a good liquidity position during the implementation of our growth strategy.

**Investment Highlights**

*Leading market positions*

We believe we are one of the largest producers of coated woodfree paper in the world with an estimated global market share of 11% based on production capacity. On a regional basis, we have an estimated market share based on production capacity in Europe and North America of 24% and 28%, respectively. We believe we are also a global leader in the dissolving wood pulp market, through our Specialised Cellulose business. Dissolving wood pulp is a fast growing and high margin business serving the textiles, consumer goods, foodstuffs and pharmaceutical industries. We have achieved leading positions in our core products, in particular in the coated woodfree paper business, by building a portfolio of premium international brands. Our leading market positions place us in an advantageous position as the global economic conditions continue to improve. We believe that the expansion of our dissolving wood pulp production capacity in southern Africa and North America, that we are currently implementing, will favorably reposition us to generate additional benefits from any growth in this market.

*High level of economic pulp integration*

Our group, as a whole, purchases slightly more pulp than it has the capacity to produce (including dissolving wood pulp) and is therefore generally neutral to pulp price changes. From a regional perspective, Sappi Southern Africa and Sappi Fine Paper North America are net sellers of pulp. Sappi Southern Africa has an economic capacity based pulp integration of approximately 175%. Sappi Fine

Table of Contents

Paper North America and Sappi Fine Paper Europe, which are net buyers of pulp, have capacity based pulp integration of approximately 119% and 56%, respectively.

***Efficient asset base***

We own and operate what we believe are some of the lowest cost and most efficient assets in the coated woodfree paper and dissolving wood pulp sectors in the world. A significant portion of our past capital expenditure was used to increase production capacity at efficient facilities, reduce costs and improve product quality. We continually evaluate the performance of our assets by maintaining a focus on profitability and we actively manage our asset base, including by divesting or closing non-performing assets and by pursuing an investment policy that is focused on high-return projects. We have very strict criteria for the profitability and cash flow generation of our assets, and we constantly review our portfolio. During fiscal 2012, no mills were closed, but we closed the pulp line at our Enstra Mill as well as the closure of the Kraft Continuous Digester ("KCD") at our Tugela Mill in South Africa. Sappi Southern Africa also shut two pulp lines at the Enstra and Tugela Mills respectively and a decision was taken on October 12, 2012 to mothball the 80,000 ton per annum sackkraft machine, at the Tugela Mill due to poor market conditions. We will continue to align our production capacity with market demand, which may require us to impair operating assets, sell assets or initiate further capacity reductions.

***Global presence***

We believe that our 17 pulp and paper mills across Europe, North America and southern Africa enable us to take greater advantage of opportunities where markets are strong and reduce risk where they are weak. Our geographic diversity assists us in offsetting the effects of volatile movements of major currencies as we can benefit from imbalances in demand and relative strengths of currencies. In fiscal 2012, our operations in North America, Europe and southern Africa accounted for 23%, 53% and 24% of our sales, respectively.

***Long-standing customer relationships supported by product innovation and customer service***

We sell our paper products to a large number of customers, including merchants such as Antalis, IGEPA, Lindenmeyr, Papyrus and Xpedx, a division of International Paper Company, converters such as Amcor Flexibles and Novelis, and other direct consumers such as The CTP Group and Media 24, many of whom have long-standing relationships with us. We support these customer relationships through our portfolio of premium international operating brands, as well as through the quality of our products, our customer service and our reliability. We are continually improving service and reliability through innovation, and we believe that our research and development centers in Europe, North America and South Africa enhance our ability to design and improve value added products and services and to bring them to market with increased efficiency. With respect to dissolving wood pulp, we sell to a variety of customers including Lenzing and Birla and other Asian customers operating particularly in Europe, Indonesia, Thailand, India and China which generally use our product in the manufacturing of viscose staple fiber.

***Experienced management team and strong track record of integrating acquisitions***

Our management team has substantial experience in the global paper industry. In addition, we have been a key player in the consolidation process of the coated paper market, with a strong track record of successfully executing and integrating acquisitions. These acquisitions included S.D. Warren Company, a market leader in the United States in coated woodfree paper and a major producer of other speciality paper products that is now Sappi Fine Paper North America, KNP Leykam, a leading European producer of coated woodfree paper that is now Sappi Fine Paper Europe, Potlatch Corporation's coated woodfree paper business that is now part of Sappi Fine Paper North America and, most recently, the coated paper business of M-real (now known as Metsä Board) that is now part of Sappi Fine Paper Europe.

Table of Contents

**The Pulp and Paper Industry**

*Overview*

The paper industry is generally divided into the graphics paper business (consisting of woodfree paper, mechanical paper and newsprint) and the packaging business (consisting of label papers, sackkraft, boxboard and containerboard).

Over the long-term, paper and packaging consumption has grown in line with overall economic growth, but consumption patterns are also influenced by short-term economic developments and other factors. Pricing is largely influenced by the supply/demand balance for individual products, which is partially dependent on capacity and inventory levels in the industry. The ability to adapt capacity changes in response to shorter-term fluctuations in demand is limited, as large amounts of capital are required for the construction or upgrade of production facilities and as lead times are long between the planning and completion of new facilities. Industry-wide over-investment in new production capacity has in the past led to situations of significant oversupply, which have caused product prices to decrease. This has been exacerbated by inventory speculation, as purchasers have sought to benefit from the price trend. As a result, our financial performance has deteriorated during periods of significant oversupply and improved when demand has increased to levels that support the implementation of price increases. Paper consumption patterns have recently been impacted by changes in consumer preferences for digital media over traditional print media.

While readership and circulation of newspapers and magazines declined in the past decade, and accessibility and use of the internet has increased, advertising expenditure has gradually shifted away from the more traditional and expensive forms of advertising, such as newspapers, magazines, radio and television, toward a greater use of electronic and digital forms of advertising, on the internet, mobile phones and other electronic devices. Competition from digital media has led to weaker demand for certain of our paper.

In addition, the pulp and paper industry, as many other industries, experienced significant recessionary pressures and lower business and consumer confidence as a result of the global economic downturn during the latter half of fiscal 2008 and fiscal 2009. As global economic conditions improved during fiscal 2010, demand for pulp and paper products improved, and market prices increased in most of our major markets. Market prices for pulp increased significantly in fiscal 2010 due to higher demand and a major earthquake in February 2010, which resulted in a disruption of supply of market pulp from Chile. During the first three quarters of fiscal 2011, pricing and demand for pulp and paper products continued to improve, with NBSK reaching a record high of US\$1,023 in June 2011, mainly driven by demand from Asia. However, the global economic recovery was negatively impacted during the latter half of calendar 2011 and the first quarter of 2012 as concerns mounted over the European sovereign debt crisis, which led to a reduction in the demand, and consequently undermined our ability to successfully implement price increases for pulp and paper products in our major markets.

In recent years, the industry experienced significant strategic changes. The high costs associated with building new paper mills and establishing and growing market share led to companies focusing on acquisitions, rather than construction of new capacity. As a result, the regional market shares of leading producers have increased significantly over the past decade. Another important emerging trend for leading industry producers is to focus on fewer paper grades as a result of divesting non-core assets that are not part of the industry, or which have been considered not consistent with long-term strategies. Increased grade focus is more advanced in the North American paper industry when compared to Europe, where the two largest producers, Stora Enso and UPM Kymmene, still retain extensive operations across a broad range of grades.

Significant developments have also taken place in China, where rapid economic growth and government incentives have spurred investment in the pulp and paper industry. In recent years, China's

Table of Contents

paper and packaging capacity, and in particular its woodfree paper capacity, increased considerably, allowing China to change from a net importer to a net exporter of coated woodfree paper, mainly to Asian markets and to the United States. To ensure that local industries are not negatively affected by low cost substitutes from China, both the United States and the European Union imposed import duties and tariffs on certain coated paper products manufactured in China during the first half of fiscal 2011. In addition, while the coated graphic paper market is characterized by a declining demand trend in developed countries, there is a growing demand trend in China and many other emerging and developing countries.

The following table shows a breakdown and description of the major product categories we participate in, the products in these categories and the typical uses for such products. We have produced and sold each of these products in each of our last three fiscal years.

**Major Product Categories**

**Description and Typical Uses**

***Woodfree paper:***

Coated paper

Higher level of smoothness than uncoated paper, achieved by applying a coating (typically pigment based) on the surface of the paper. As a result, higher reprographic quality and printability is achieved. Uses include marketing promotions and brochures, catalogues, corporate communications materials, direct mail, textbooks and magazines.

Uncoated paper

Uses typically include business forms, business stationery, tissue, photocopy paper as well as cut-size, preprint and office paper. Certain brands are used for books, brochures and magazines.

Speciality paper

Can be either coated or uncoated. Uses include bags, labels, flexible and rigid packaging and release paper for casting innovative surface textures (e.g. artificial leather and decorative laminates) for use in the textile, automotive, furniture and engineering film markets.

***Packaging products:***

Packaging paper

Heavy and lightweight grades of paper and board primarily used for primary and secondary packaging of fast moving consumer goods, agricultural and industrial products. Products include containerboard (corrugated boxes), sackkraft (multi-walled sacks) and machine glazed kraft (grocery bags). Can be coated to enhance barrier and aesthetics properties.

***Mechanical paper:***

Newsprint

Manufactured from mechanical and bleached chemical pulp. Uses include advertising inserts and newspapers.

Coated mechanical/magazine paper

Coated mechanical fiber based paper, primarily used for magazines, catalogues and advertising material. Manufactured from mechanical pulp.

Table of Contents**Major Product Categories****Pulp:**

Dissolving wood pulp

**Description and Typical Uses**

Manufactured by a similar process to paper grade pulp, but purified further to leave virtually pure cellulose fibers. Dissolving wood pulp is used in the manufacture of a variety of cellulose textile and non-woven fiber products, including viscose staple fiber (rayon), solvent spun fiber (lyocell) and filament. It is also used in various other cellulose-based applications in the food, film, cigarette, chemical and pharmaceutical industries. These include the manufacture of acetate flake, microcrystalline cellulose, cellophane, ethers and molding powders. The various grades of dissolving wood pulp are manufactured in accordance with the specific requirements of customers in different market segments. The purity of the dissolving wood pulp is one of the key determinants of its suitability for particular applications with the purer grades of dissolving wood pulps generally supplied into the speciality segments.

Paper pulp

Main raw material used in production of printing, writing and packaging paper. Pulp is the generic term that describes the cellulose fiber derived from wood. These cellulose fibers may be separated by mechanical, thermo-mechanical or chemical processes. The chemical processes involve removing the glues (lignins) which bind the wood fibers to leave cellulose fibers. Paper made from chemical pulp is generally termed "woodfree". Uses include paper, paperboard and tissue.

**Timber products:**

Sawn timber for construction and furniture manufacturing purposes.

The following table sets forth selected pulp and paper prices in certain markets for the periods presented.

	Year ended September					
	2012		2011		2010	
	High	Low	High	Low	High	Low
<b>Coated Woodfree Paper</b>

- (5) Northern Bleached Softwood Kraft Pulp CIF Western Europe, RISI.

**Woodfree Paper**

Our woodfree paper activities are divided into coated and uncoated woodfree paper and speciality paper grades.

*Coated Woodfree Paper:* Major end uses of coated woodfree paper include high-end magazines, catalogues, brochures, annual reports and commercial printing. Coated woodfree paper is made from chemical pulp and is coated on one or both sides for use where high reprographic quality is required. The majority of coated woodfree paper production is coated on two sides, permitting quality printing on both sides of the paper. Paper that is coated on one side is used in special applications such as consumer product and mailing label applications.

Our North American sheet volume is largely influenced by brochure and general commercial printing activities using mainly sheet-fed offset lithographic printing processes, which are not particularly seasonal. Reels volume is heavily influenced by catalogue and magazine activity, which is strongest in the third and fourth calendar quarters, text book activity, which is strongest in the second and third calendar quarters, and publication printer activity, which is not particularly seasonal. These printers principally use heat-set web offset printing processes.

Due to the diversity in languages in the European market, the print editions of brochure and general commercial printing activities are considerably smaller than in the US market. This translates into a significantly higher volume in sheets. The seasonal patterns of both sheets and reels are mostly influenced by the catalogue business. This business has its highest seasonal activity in the spring, when the fashion catalogues come out, and the autumn, when the Christmas catalogues and holiday brochures are printed. Commercial print and publishing business provide a more steady demand in this market.

*Uncoated Woodfree Paper:* Uncoated woodfree paper represents the largest industry woodfree paper grade in terms of both global capacity and consumption. Uncoated woodfree paper is used for bond/writing and offset printing papers, photocopy papers, writing tablets (e.g. legal pads), speciality lightweight printing paper (e.g. bibles) and thin paper. The market for uncoated paper products generally follows cyclical trends, which do not necessarily coincide with cycles for coated paper but are impacted by capacity changes in uncoated woodfree paper output levels.

*Speciality Paper:* The high value-added speciality paper markets, in which Sappi Fine Paper operates, generally follow trends in the respective end use sectors in addition to changes in production capacity, output levels and cyclical changes in the world economy. Largely due to the highly specialized nature of speciality paper, price fluctuations have historically tended to lag and be less precipitous than price changes in the uncoated woodfree paper market.

**Mechanical Paper Products**

*Coated Mechanical Paper:* Coated mechanical paper has similar end-uses as coated woodfree paper and is used mainly for magazines and, among other things, for brochures, catalogues, advertising materials and promotional products. Depending on quality requirements and price levels, substitution between coated woodfree paper and coated mechanical paper is possible. Coated mechanical paper is made mainly from mechanical pulp and typically has glossy finishes on both sides.

Table of Contents

*Newsprint:* The Ngodwana Mill, situated in South Africa, produces newsprint. The worldwide market for newsprint is a negative growth sector in the paper industry and is adversely affected by the growing use of electronic media.

***Paper Packaging Products***

We are one of the major suppliers of paper packaging solutions in southern Africa, which we produce locally at our Cape Kraft, Tugela and Ngodwana Mills. These products are sold predominantly to customers in southern Africa with some products destined for export markets.

*Paper Packaging:* We provide a wide range of packaging solutions to the industrial, agricultural and fast moving consumer goods industries. This includes containerboard products and multi-walled sacks for use in the transport of goods (e.g. cement) as well as grocery bags for use by the end consumer. The market for packaging papers is therefore affected by changes in the world economy, local economic growth, retail sales and by changes in production capacity, demand and inventory levels.

***Pulp***

We produce dissolving wood pulp, as well as a wide range of paper pulp grades, including mechanical pulp used in newsprint, bleached kraft pulp and bleached sulphite pulp.

*Dissolving Wood Pulp:* The viscose staple fiber ("VSF") industry, which manufactures textile and non-woven fibers, is the largest market segment for dissolving wood pulp. Most of our VSF grade dissolving wood pulp production is sold on contract to long-standing customers at prices that tend to follow the European PIX NBSK price. The remaining VSF grade dissolving wood pulp production is sold on the spot market at prices that tend to follow the international price of cotton, as VSF can be used as a substitute for cotton. The PIX NBSK linked prices decreased during 2012 as demand for paper pulp decreased alongside demand for printing and writing paper. European PIX NBSK prices in US dollars reached a high point of US\$1,023 per metric ton in June 2011 before retreating steadily to reach a low of US\$762 per metric ton by the end of September 2012. Spot prices for dissolving pulp reached record highs at the beginning of calendar 2011 but have since steadily declined as new supply capacity has begun entering the market. Prices of the higher purity dissolving wood pulp used in applications other than for VSF products tend to be more stable and are largely unrelated to the price of NBSK and cotton. The market price for these dissolving wood pulp products is set by competitive forces within those specific markets.

*Paper Pulp:* The paper pulp industry is highly competitive and is sensitive to changes in industry capacity, producer inventories, demand for paper, exchange rates and cyclical changes in the world economy. The market price of NBSK pulp per ton, a pulp principally used to manufacture woodfree paper, is a benchmark widely used in the industry for comparative purposes.

NBSK prices are cyclical and can change rapidly due to changes in the dynamics of the supply/demand balance. NBSK pulp prices reached a record high of US\$1,023 in June 2011 but have eased and were trading at US\$958 at the end of fiscal 2011. As demand for printing and writing paper decreased throughout fiscal 2012, demand for market pulp fell, along with the PIX NBSK price. For fiscal 2012, the average PIX NBSK pulp price was approximately 14% lower than that of fiscal 2011.

For further information, see "Item 5 Operating and Financial Review and Prospects Markets".

***Timber Products***

Our timber products operations are concentrated in South Africa and consist of sawn timber for the building industry and components for the furniture and packaging industry.

Table of Contents

**Business Review**

Our group has three reportable segments, Sappi Fine Paper North America, Sappi Fine Paper Europe, and Sappi Southern Africa. Sappi Fine Paper comprises the reporting segments Sappi Fine Paper North America and Sappi Fine Paper Europe. We operate 17 pulp and paper mills, with an aggregate annual paper, pulp and dissolving wood pulp production capacity of approximately 6 million tons, approximately 2.9 million tons and approximately 0.8 million tons, respectively. We also operate a trading network, called Sappi Trading, for the international marketing and distribution of our products in areas outside our core operating segments of Sappi Fine Paper North America, Sappi Fine Paper Europe and Sappi Southern Africa.

***Sappi Fine Paper***

Sappi Fine Paper, comprises our Sappi Fine Paper North America and Sappi Fine Paper Europe reportable segments, is our largest operating business, accounting for approximately 64% of our sales volume in fiscal 2012. Sappi Fine Paper has an aggregate annual paper and pulp production capacity of approximately 4.9 million tons and 2.2 million tons respectively, at 11 paper and related paper pulp mills in North America and Europe.

*Sappi Fine Paper North America:* Sappi Fine Paper North America is a leading producer and supplier of coated woodfree paper, coated speciality paper and from time to time, uncoated woodfree paper in the United States. Headquartered in Boston, Massachusetts, the segment operates three paper mills in the United States with an aggregate annual production capacity of approximately 1.2 million tons of paper and approximately 1 million tons of paper pulp, which represents approximately 119% of Sappi Fine Paper North America's pulp requirements. This significantly reduces Sappi Fine Paper North America's exposure to fluctuations in the price of market pulp that are not driven by fluctuations in wood or other major raw material prices. Sappi Fine Paper North America accounted for US\$1,438 million or 23% of our sales in fiscal 2012.

*Sappi Fine Paper Europe:* Sappi Fine Paper Europe is a leading producer and supplier of coated and uncoated woodfree paper, coated and uncoated speciality paper and coated mechanical paper in Europe. Headquartered in Brussels, Belgium, the segment operates eight paper mills in five countries with an aggregate annual production capacity of approximately 3.8 million tons of paper and 1.2 million tons of related paper pulp, which represents approximately 56% of Sappi Fine Paper Europe's pulp requirements. As Sappi Fine Paper Europe is not fully integrated from a pulp perspective, the segment is exposed to fluctuations in the price of market pulp. Sappi Fine Paper Europe accounted for US\$3,350 million or 53% of our sales in fiscal 2012.

***Sappi Southern Africa***

Sappi Southern Africa, headquartered in Johannesburg, South Africa, is an integrated pulp, packaging paper, coated paper, uncoated paper, speciality paper, tissue wadding and timber products producer. Sappi Southern Africa operates five paper and paper packaging mills, one dissolving wood pulp mill and one sawmill. The segment is managed in three divisions: Sappi Paper and Paper Packaging, Sappi Specialised Cellulose and Sappi Forests. Sappi Southern Africa is a major pulp and paper producer in Africa, with a production capacity of 580,000 tons of paper packaging products, 140,000 tons of newsprint, 310,000 tons of coated, uncoated and tissue paper products, 800,000 tons of dissolving wood pulp and 780,000 tons of paper pulp per annum. It is also a major timber grower and manages directly and indirectly approximately 554,000 hectares of forestland. Currently, we have access to approximately 400,000 hectares of plantable forestland; however, due to forest fires and timing differences between felling and planting activities, approximately 378,000 hectares is planted with primarily pine and eucalyptus. Approximately 70% of our southern African timber requirements are from our managed, owned and leased plantations. The term "directly manages" relates to plantations in

Table of Contents

southern Africa established on land that we either own or lease from a third party. The term "indirectly manages" relates to plantations in southern Africa established on land held by independent commercial farmers, where we provide technical assistance in the form of advice on the growing and tending of trees. Sappi Southern Africa accounted for US\$1,559 million or 24% of our sales in fiscal 2012.

***Sappi Trading***

Our trading network, Sappi Trading, coordinates the international marketing and distribution of our woodfree and mechanical paper products in areas outside our core operating segments of Sappi Fine Paper North America, Sappi Fine Paper Europe and Sappi Southern Africa. Sappi Trading is also responsible for the international marketing and distribution of dissolving wood pulp and market pulp throughout the world. Sappi Trading operates in Hong Kong (China), Sydney (Australia), Sao Paulo (Brazil), Shanghai (China), Bogotá (Colombia), Konstanz (Germany), Nairobi (Kenya), Mexico City (Mexico), Singapore, Johannesburg and Durban (South Africa), Taipei (Taiwan) and New York (United States). It manages a network of agents around the world, handling exports to over 60 countries. All sales and costs associated with Sappi Trading are allocated to our three reportable segments.

For further information, see "Item 5 Operating and Financial Review and Prospects Principal Factors Impacting on our Group Results", "Item 5 Operating and Financial Review and Prospects Markets" and " Business Overview".

As of fiscal 2010, our southern African fine paper operations, which had previously been part of our Sappi Fine Paper business, have been incorporated with our former Sappi Forest Products business to form our Sappi Southern Africa segment.

The chart below represents our operational rather than the legal or ownership structure as of September 2012. Units shown are not necessarily legal entities.

Table of Contents

**SAPPI FINE PAPER**

*Overview*

Sappi Fine Paper contributed approximately 76% and 75% of our sales in fiscal 2012 and fiscal 2011 respectively. Sappi Fine Paper comprises two reportable segments: Sappi Fine Paper North America and Sappi Fine Paper Europe.

The following chart sets forth certain information with respect to the mills and principal products of Sappi Fine Paper as of September 2012:

---

- (1) As of fiscal 2010, Sappi Fine Paper South Africa has been integrated with our former Sappi Forest Products business to form our Sappi Southern Africa segment.
- (2) We ceased production at our Biberist Mill in August 2011.
- (3) During November 2011 we announced the conversion of our Cloquet Mill pulp production facilities to produce 330,000 tons of dissolving wood pulp per annum.

Table of Contents

The following table sets out the approximate annual production capacity of Sappi Fine Paper's products as of September 2012.

<b>Annual Production Capacity</b>			
<b>North</b>			
<b>America</b>	<b>Europe</b>	<b>Total</b>	
<b>(tons '000)</b>			
<b>Production capacity:</b>			
<b>Woodfree paper</b>			
Coated <sup>(1)(2)</sup>	1,160	3,555	4,715
Uncoated		215	215
<b>Total<sup>(3)</sup></b>	<b>1,160</b>	<b>3,770</b>	<b>4,930</b>
<b>Paper pulp</b>	<b>980</b>	<b>1,165</b>	<b>2,145</b>

- (1) Includes coated woodfree paper, coated mechanical paper and coated speciality papers.
- (2) Excludes 500,000 tons for the Biberist Mill which ceased production during August 2011 (430,000 coated and 70,000 tons uncoated).
- (3) Excludes Chinese joint venture tons.

**Facilities and Operations*****Sappi Fine Paper North America***

Coated paper sales accounted for approximately 76% and 74% of Sappi Fine Paper North America's sales in fiscal 2012 and fiscal 2011 respectively. Speciality paper and pulp accounted for the remaining 24% and 26% of our sales in fiscal 2012 and fiscal 2011 respectively.

The following table sets forth sales by product for our North American operations.

<b>Year ended September</b>			
	<b>2012</b>	<b>2011</b>	<b>2010</b>
<b>(US\$ million)</b>			
<b>Sales:</b>			
Coated woodfree paper	1,095	1,122	1,024
Speciality paper and other <sup>(1)</sup>	343	398	349
<b>Total</b>	<b>1,438</b>	<b>1,520</b>	<b>1,373</b>

- (1) Other consists primarily of market pulp.

For fiscal 2012, Sappi Fine Paper North America sold approximately 1.4 million tons of paper and pulp products. The following table sets forth the annual production capacity, number of paper machines and products at each of our mills in North America:

**Products**

<b>Mill</b>	<b>Production capacity ('000 tons) Paper</b>	<b>Number of paper machines</b>	<b>Paper</b>	<b>Market pulp</b>
Cloquet	330	2	Coated woodfree paper	Bleached kraft pulp
Somerset	795	3	Coated woodfree paper	Bleached kraft pulp
Westbrook	35	1	Casting release paper	

*Cloquet:* The Cloquet Mill has two paper machines and an offline coater, producing premium coated paper. The newest paper machine and coater were installed in 1988 and 1989, respectively. The pulp mill was started up by the previous owner in 2000 at a total cost of US\$525 million. The Cloquet

Table of Contents

paper machines have a production capacity of 330,000 tons of coated paper per annum, and the state of the art pulp mill has a production capacity of 455,000 tons per annum. In November 2011, we announced an investment of approximately US\$170 million in the mill for the production of 330,000 tons of dissolving wood pulp per annum and spent US\$20 million on this conversion during fiscal 2012. We expect to commission the project during fiscal 2013.

*Somerset:* The Somerset Mill is a low-cost producer and has a production capacity of 795,000 tons of paper and 525,000 tons of pulp per annum. Each of the three paper machines at the Somerset facility employs Sappi Fine Paper North America's patented on-line finishing technology. This technology combines the three phases (paper making, coating and finishing) in the manufacture of coated paper into one continuous process. This technology is well suited for the lighter weight coated woodfree papers produced at Somerset, as it allows for the production of high gloss, consistent quality products at high speeds.

*Westbrook:* Westbrook is Sappi Fine Paper North America's original mill, with origins dating back to 1854. The mill is primarily a speciality paper production facility with a capacity of 35,000 tons of coated and uncoated casting release paper per annum. Its paper machine primarily produces base paper, which is coated off-line. Westbrook Mill has six speciality coaters. This process uses an electron beam to cure the coating against a finely engraved steel roll, resulting in a virtually exact replication of the roll pattern. Sappi Fine Paper North America also has a research and development facility at Westbrook.

Sappi Fine Paper North America also operates a coated paper sheeting and distribution facility in Allentown, Pennsylvania, which was completed in 1994, with a sheeting capacity of approximately 100,000 tons per annum.

***Sappi Fine Paper Europe***

Coated paper accounted for approximately 87% and 85% of Sappi Fine Paper Europe's sales in fiscal 2012 and fiscal 2011 respectively. Uncoated paper and speciality paper accounted for the remaining 13% and 15% of our sales in fiscal 2012 and fiscal 2011, respectively.

The following table sets forth sales by product for our Sappi Fine Paper Europe operations:

	<b>Year ended September</b>		
	<b>2012</b>	<b>2011</b>	<b>2010</b>
	<b>(US\$ million)</b>		
<b>Sales:</b>			
Coated paper <sup>(1)(2)</sup>	2,870	3,373	3,167
Uncoated woodfree paper <sup>(2)</sup>	215	303	265
Speciality coated paper and other	265	290	206
<b>Total</b>	<b>3,350</b>	<b>3,966</b>	<b>3,638</b>

(1) Includes coated mechanical paper produced at the Lanaken, Kirkniemi and Kangas Mills. During January 2010 we permanently ceased operations at the Kangas Mill in Finland.

(2) We ceased production at the Biberist Mill in August 2011 and continue to serve our customers from other group mills.

Table of Contents

For fiscal 2012, Sappi Fine Paper Europe sold approximately 3.5 million tons of paper and pulp products. The following table sets forth the annual production capacity, number of paper machines and products for fiscal 2012 at each of Sappi Fine Paper Europe's mills in Europe.

<b>Mill</b>	<b>Mill Locations</b>	<b>Production capacity ('000 tons) Paper</b>	<b>Number of paper machines</b>	<b>Products</b>
Alfeld	Germany	330	5	Coated and Uncoated woodfree paper, coated speciality paper
Ehingen	Germany	285	1	Coated woodfree paper
Gratkorn	Austria	990	2	Coated woodfree paper
Kirkniemi	Finland	735	3	Coated mechanical paper
Lanaken	Belgium	470	2	Coated mechanical paper and coated woodfree paper
Maastricht	Netherlands	280	1	Coated woodfree paper
Nijmegen	Netherlands	240	1	Coated woodfree paper
Stockstadt	Germany	440	2	Coated woodfree paper and uncoated woodfree paper

*Alfeld:* The Alfeld Mill is located to the south of Hannover, Germany, and was originally commissioned in 1706. It has a paper production capacity of 330,000 tons and a pulp production capacity of 120,000 tons per annum. It produces coated and uncoated woodfree and speciality paper products with a variety of finishes. In 1995, a major rebuild of Alfeld's PM 3 was completed, enhancing the production of low substance flexible packaging papers. Alfeld's PM 3 employs a fully integrated on-line coating and calendaring system. The Alfeld Mill produces totally chlorine-free ("TCF") bleached sulphite pulp for its own use. In early 2002, a €50 million rebuild of Alfeld's PM 2 was completed. We plan to convert the PM 2 at the Alfeld Mill from 150,000 tons of coated fine paper to 135,000 tons of speciality paper per annum. This conversion is not only expected to increase our capacity in a specialized, growing and higher margin business, but also to improve our cost position in coated woodfree graphic paper and further reduce our graphic paper capacity. The conversion is scheduled to commence at the end of fiscal 2013.

*Ehingen:* The Ehingen Mill is located to the southeast of Stuttgart, Germany and was acquired by Hannover Papier, predecessor entity to Sappi Alfeld, in 1987. A paper machine with a capacity of 180,000 tons of coated woodfree paper per annum was commissioned in July 1991, expanding Ehingen from a market pulp mill into an integrated pulp and paper mill. During 1994, the construction of a high-rack warehouse was completed. As a result of upgrades during 1994 and 1996, Ehingen's total paper capacity was increased to 235,000 tons per annum. During June and July 2006 the paper machine was rebuilt and started up, together with a new coater, allowing a significant quality upgrade from single coated to triple coated woodfree paper with capacity of 250,000 tons per annum. The pulp mill's capacity is currently 135,000 tons per annum of TCF bleached sulphite pulp. The pulp is produced mainly for internal use, but is also sold to third party customers when market conditions are favorable.

*Gratkorn:* Paper has been produced at the Gratkorn, Austria site for more than four centuries. Following a major expansion and renovation project, the Gratkorn Mill has been transformed from an ageing five-machine mill into a state of the art two-machine mill. As a result of this project, Gratkorn currently has the capacity to produce 990,000 tons of triple-coated woodfree paper on just two paper machines and 250,000 tons of TCF chemical pulp per annum. The machines at Gratkorn are among the largest and most efficient paper machines in the world. After the extension of Gratkorn's sheeting plant, it also has a sheet finishing capacity of 800,000 tons per annum.

Table of Contents

*Kirkniemi:* We acquired the assets comprising the Kirkniemi Mill, located 70 kilometers west of Helsinki, Finland from M-real Corporation (now known as Metsä Board) in 2008. The mill was built in 1966 and has a production capacity of 735,000 tons of paper and 330,000 tons of mechanical pulp per annum. The Kirkniemi Mill produces Galerie Lite (coated ultra-lightweight paper with high bulk and opacity), Galerie Brite (coated lightweight paper with high bulk, soft gloss and improved brightness) and Galerie Fine (coated mechanical paper with high brightness, smoothness and improved opacity).

*Lanaken:* The Lanaken Mill, situated in Lanaken, Belgium, began commercial operations in 1966. It produces coated mechanical paper and lower weight wood-containing coated paper for offset printing. Coated mechanical paper for web offset presses is used primarily in the production of advertising materials and magazines. Lanaken's two paper machines have a total capacity of 470,000 tons per annum. One machine principally produces coated mechanical paper and was completely overhauled in 1992. An additional off-line coater was also installed during the upgrade to provide triple coating capability. The second paper machine produces lower-weight wood-containing paper. Its capacity was increased to 305,000 tons per annum as a result of an optimization process during the mid-1990s. The Lanaken Mill also produces chemi-thermo-mechanical pulp ("CTMP") in an integrated plant which has a production capacity of 180,000 tons per annum. This enables the mill to supply approximately 60% of its own fiber requirements for paper production.

*Maastricht:* The Maastricht Mill is situated on the Maas River in Maastricht, The Netherlands and was originally commissioned in 1852. The mill has a production capacity of 280,000 tons of coated woodfree paper per annum from a single paper machine, PM 6. This machine was installed in 1962, was rebuilt in 1977 and underwent an extensive €102 million refurbishment and upgrade in 1996. The Maastricht Mill specializes in high basis-weight triple-coated woodfree paper for graphics applications.

*Nijmegen:* The Nijmegen Mill, situated in the town of Nijmegen, The Netherlands, began operations in 1955 and operates a single paper machine. The mill specializes in the production of coated woodfree paper in reel form for web offset printing. It also produces special coated woodfree paper for use in digital printing. The Nijmegen Mill was upgraded in 2001, which increased its capacity by 40,000 tons per annum. The mill currently has the capacity to produce 240,000 tons of coated woodfree paper per annum and is one of Europe's largest suppliers of coated woodfree web offset paper. Web offset paper is used for commercial printing and publishing.

*Stockstadt:* As part of the Acquisition, we acquired the shares of M-real Stockstadt GmbH, which holds the Stockstadt Mill located in Stockstadt, Germany during 2008. The mill was established in 1898 and has a production capacity of 440,000 tons of coated and uncoated woodfree paper as well as 150,000 tons of bleached chemical pulp per annum. The pulp is produced mainly for internal use, but is also sold to third party customers when market conditions are favorable.

**Marketing and Distribution**

*Overview*

The further integration of our international marketing and distribution systems is one of our main strategic objectives. In order to attain this objective, we have adopted a system whereby the marketing and distribution of our woodfree and mechanical paper products is performed by our operating business in the respective region, supplemented by Sappi Trading network outside these core regions.

We sell the vast majority of our woodfree and mechanical paper products through merchants. We also sell paper directly to converters. We generally deliver products sold to converters from the mill or via a distribution warehouse. Electronic business-to-business interaction has become more important to us, and we will continue to focus on increasing service and efficiency through business-to-business interaction. Systems and structures have been put in place to actively continue these efforts.

Table of Contents

Merchants are authorized to distribute Sappi Fine Paper's products by geographic area and to carry competitors' product lines to cover all segments of the market. Merchants perform numerous functions, including holding inventory, sales promotion and marketing, taking credit risk on sales and delivery, and distribution of the products. Merchants buy paper from Sappi Fine Paper, add a mark up to the purchase price and on-sell it to the end customer. A merchant may either deliver to the customer from its own warehouse or arrange for delivery directly from the mill or one of the Sappi Fine Paper distribution warehouses.

***Sappi Fine Paper North America***

Sappi Fine Paper North America's coated paper sales structure is organized in multiple regions with sales representatives located in all major market areas. In addition, several technical representatives are located in different regions in North America to support the sales effort.

Approximately 7% and 6%, respectively, of Sappi Fine Paper North America's sales for fiscal 2012 and 2011 were outside North America. Sappi Fine Paper North America's sales outside North America are handled in southern Africa by Sappi Southern Africa, in Europe by Sappi Fine Paper Europe and outside those regions by Sappi Trading.

In fiscal 2012 and 2011, the Sappi Fine Paper North America sales force sold coated woodfree paper exclusively through merchant distribution with locations covering the United States and Canada. By selling exclusively through merchant channels, Sappi Fine Paper North America believes it has created a loyal group of merchant customers. Rather than competing with merchant distributors, the Sappi Fine Paper North American sales force focuses on generating demand with key printers, publishers and end users, which are then serviced by the merchant distributors.

Sappi Fine Paper North America's coated speciality papers are sold directly to customers in North America through a dedicated speciality paper sales team and outside of North America through a direct sales force, agents and distributors.

***Sappi Fine Paper Europe***

The sales and marketing operations of Sappi Fine Paper Europe are organized into graphic papers (which comprise printing and writing paper) and speciality papers (which comprise paper for labeling, packaging and other speciality uses).

The sales and marketing operations of Sappi Fine Paper Europe are responsible for all sales of woodfree papers, mechanical papers as well as speciality papers in Europe. An export sales office manages exports to markets outside Europe through Sappi Trading, Sappi Fine Paper North America and Sappi Southern Africa.

Sappi Fine Paper Europe's centralized logistics department was formed in early 1998. It is responsible for the development and optimization of the logistics function for the graphic and speciality papers business units as well as the re-engineering of the supply chain.

Under distribution agreements entered into as part of the acquisition of the coated graphic paper business of M-real Corporation (now known as Metsä Board) in 2008, M-real Corporation granted us the exclusive right to market and sell the products of certain coated paper machines at M-real Corporation's Husum Mill and Äänekoski Mill for a period of five years, with a minimum duration of 27 months or, if earlier, until Metsä Board sells the relevant mill. We are entitled to a commission on these sales while the agreements are in effect. The coated paper machines subject to the distribution agreements are described below:

Husum PM 8: We entered into a distribution agreement in respect of PM 8 at M-real Corporation's (now known as Metsä Board) Husum Mill in Sweden. PM 8 is the only asset producing coated woodfree

Table of Contents

paper at Husum Mill and has an annual production capacity of 285,000 tons of Galerie Fine, a coated woodfree paper with high brightness, smoothness and improved opacity.

Äänekoski PM2: We entered into a distribution agreement in respect of PM 2 at M-real Corporation's (now known as Metsä Board) Äänekoski Mill in Finland. Äänekoski's PM 2 produces triple blade coated wood-free art paper on one paper machine that is marketed under the brand name Galerie Art. The machine has a production capacity of 200,000 tons per annum. During November 2011, the M-real Corporation (Metsä Board) announced that it was entering into a consultation process with the employees of Äänekoski Mill to negotiate the possible closure of the facility. However, in an agreement reached with us, the M-real Corporation (Metsä Board) confirmed the uninterrupted supply of Galerie Art from the Husum Mill in Sweden. Production was transferred as of January 2012.

**Customers**

Sappi Fine Paper sells its products to a large number of customers, many of whom have long-standing relationships with us. These customers include merchants, converters and other direct consumers.

The most significant merchant customers, based on sales during fiscal 2012 include:

*North America:* Xpedx (a division of International Paper Company), Lindenmeyr (owned by Central National Gottesman Inc.), Midland Paper (a privately owned paper merchant company), Domtar Corporation Inc and a select number of regionally strong merchants.

*Europe:* Igepa Group, Antalis (owned by Sequana Capital), PaperlinX, Papyrus, and Inapa. Two of these merchants, Igepa Group and Antalis, represented collectively approximately 20% of Sappi Fine Paper Europe's total sales during fiscal 2012.

Sappi Fine Paper's converter customers include both multinational and regional converters. The most significant converter customers, based on sales during fiscal 2012 include: Orafol, Constantia, Eurofoil (formerly Novelis), Clondalkin, Mayr-Melnhof, and Amcor. These customers use our products in the production of pressure sensitive products and flexible packaging, as well as NWS labels. No converter customer, however, represented more than 10% of our total sales during fiscal 2012.

Merchant sales constitute the majority of our woodfree and mechanical paper sales. Pricing of coated paper products is generally subject to change upon notice of 30 days with longer notice periods (typically 3 to 6 months) for some large end-use customers. Sales to converters may be subject to longer notice periods, which would generally not exceed 12 months. We have long-standing relationships with most of our customers, with volume and pricing generally agreed on a quarterly basis.

**Competition**

*Overview*

Although the markets for pulp and paper have regional characteristics, they are highly competitive international markets involving a large number of producers located around the world.

Historically pulp and paper products were subject to relatively low tariff protection in major markets, with existing tariff protections being further reduced under the World Trade Organization ("WTO"). However, with ever increasing amounts of low cost substitutes emerging from Asia, particularly from China, both the United States and Europe imposed import duties and tariffs on certain coated paper products from China and Indonesia in November 2010, with the duties effective for a period of five years.

Competition in markets for our products is primarily based on price, quality, service, breadth of product line, product innovation and sales and distribution support. The speciality paper market places greater emphasis on product innovation, quality and technical considerations.

Table of Contents

The North American and western European printing and writing paper sector, comprising coated and uncoated woodfree and mechanical products, implemented the closure of just under 11 million tons of annual production capacity between 2008 and 2012.

***North America***

The major domestic coated woodfree paper producers which compete with Sappi Fine Paper in North America are NewPage, which is undergoing a reorganization under Chapter 11, and Verso Paper. In addition, approximately 18% of United States consumption is supplied by foreign producers, primarily Asian and European.

***Europe***

The market leaders in coated woodfree paper production in Europe are Sappi, Stora Enso, Burgo-Marchi Group, UPM-Kymmene and Lecta (which is owned by an affiliate of CVC Partners).

**SAPPI SOUTHERN AFRICA**

**Overview**

Sappi Southern Africa contributed approximately 24% and 25%, respectively, of our sales in fiscal 2012 and fiscal 2011. The Sappi Southern Africa segment comprises three separate divisions: Sappi Specialised Cellulose, Sappi Paper and Paper Packaging and Sappi Forests.

Table of Contents

The following chart sets forth certain information with respect to the mills and principal products of Sappi Southern Africa as of September 2012:

- 
- (1) During fiscal 2012 we announced the closure of the pulp line at our Enstra Mill.
  - (2) During May 2011 we announced the conversion of the Ngodwana Mill pulp production facilities to produce 210,000 tons of dissolving wood pulp per annum.
  - (3)

During fiscal 2011 we announced the closure of the 60,000 ton containerboard machine at our Tugela Mill. On October 12, 2012 we announced the decision to mothball the 80,000 ton per annum sackkraft machine, at the Tugela Mill. During fiscal 2012 we also announced the closure of the 10,000 ton per annum paper machine and the Kraft Continuous Digester ("KCD") pulp line at our Tugela Mill.

Table of Contents

The following table sets forth sales by product for Sappi Southern Africa's operations:

	<b>Year ended September</b>		
	<b>2012</b>	<b>2011</b>	<b>2010</b>
	<b>(US\$ million)</b>		
<b>Sales:</b>			
Commodity paper products <sup>(1)</sup>	457	540	462
Dissolving wood pulp	685	796	604
Woodfree and speciality papers	312	359	380
Paper pulp	27	26	42
Timber and timber products	84	80	73
<b>Total</b>	<b>1,559</b>	<b>1,801</b>	<b>1,561</b>

(1)

Includes newsprint and packaging products.

For the fiscal years 2012 and 2011, Sappi Southern Africa sold approximately 2.8 million tons and 2.6 million tons respectively, of paper, pulp and forest products.

The following table sets forth annual production capacity with respect to Sappi Southern Africa's products:

Production capacity: ('000 tons)	
<b>Paper products</b>	
Packaging paper	580
Newsprint	140
Coated woodfree paper and tissue wadding	110
Uncoated	200
<b>Total</b>	<b>1,030</b>
<b>Pulp</b>	
Dissolving wood pulp	800
Paper pulp	780
<b>Total</b>	<b>1,580</b>
Timber products <sup>(1)</sup>	43

(1)

Represents 85,000 cubic meters.

**Facilities and Operations****Sappi Specialised Cellulose**

Saiccor was established in 1951 and was acquired by us in 1988. It is the world's largest single producer of dissolving wood pulp. In 1995, we completed an approximately US\$221 million expansion project to increase capacity by one third to 600,000 tons per annum. Capital expenditures during the period from October 2005 to the end of September 2010 were approximately US\$615 million. Included in this period were a modernization project to de-bottleneck production at Saiccor at a cost of US\$40 million and an amount of US\$551 million spent on an expansion project to increase Saiccor's dissolving wood pulp capacity to 800,000 tons per annum. Construction on the expansion project

## Edgar Filing: SAPPI LTD - Form 20-F

commenced in August 2006 and was originally scheduled for completion in the first half of calendar 2008. Unfortunately the project was subject to delays and cost increases, with the increased capacity only coming on line in September 2008 and achieving full operational efficiency only in April 2009. As a result of the rapid decline in demand for dissolving wood pulp that was experienced in the first half of fiscal 2009, we did not utilize all of the additional capacity initially and curtailed production in certain

Table of Contents

elements of the old plant while utilizing the new plant to improve efficiencies. Demand came back strongly in the latter half of fiscal 2009, fiscal 2010 and fiscal 2011 and the plant operated at full capacity, except for the three week strike in July 2011. Demand growth in the dissolving wood pulp market in the first half of 2012 has accelerated and for fiscal 2012 the plant operated at full capacity.

Saiccor's dissolving wood pulp production is exported from South Africa and marketed and distributed internationally by Sappi Trading. The pulp principally produced is the type used in the manufacture of a variety of cellulose products, including viscose staple fibers or rayon, solvent spun fibers (lyocell) and viscose filament yarns. Both viscose and lyocell fibers are used in the manufacture of fashion and decorating textiles which have a soft, natural feel and excellent breathing properties. Given their particularly high absorbency properties, these fibers are also used in non-woven applications in the healthcare, industrial and disposable product markets. Dissolving wood pulp is also used in the manufacture of acetate flake, which is used in products such as filter tow for cigarette filters, high quality yarns and fabrics, and LCD screens. It is also used to manufacture microcrystalline cellulose, which is used as a rheological modifier in the food industry, as excipients for pharmaceuticals, and in various ethers for the chemical industry. It is also used to manufacture cellophane film for use in a variety of packaging applications.

The mill's timber consumption is comprised primarily of eucalyptus hardwoods. These relatively fast growing trees are grown in relatively close proximity to the mill, which contributes to Saiccor's position as a low cost producer of dissolving wood pulp.

**Sappi Paper and Paper Packaging**

The following table sets forth the annual paper and paper packaging production capacity, number of machines, and products at each of Sappi Paper and Paper Packaging's mills in South Africa:

<b>Mill Locations in South Africa</b>	<b>Production capacity ('000 tons)</b>	<b>Number of paper machines</b>	<b>Products</b>
Cape Kraft	60	1	Linerboard, corrugating medium and coated products
Enstra	200	3	Uncoated woodfree paper
Ngodwana	380	2	Kraft linerboard, white top linerboard, newsprint, plasterboard and bleached and unbleached market pulp
Stanger	110	2	Coated woodfree paper, coated label paper and tissue
Tugela	280	2	Kraft linerboard, corrugating medium and sackkraft

*Cape Kraft:* The Cape Kraft Mill was built during 1980, commissioned in 1981 and upgraded in 1995. The mill presently has a capacity to produce 60,000 tons of linerboard and corrugating medium per annum, which it sells principally to the corrugating industry in the Western Cape. The mill uses approximately 67,000 tons of waste paper to produce 60,000 tons of packaging paper per annum. The fact that the mill's product is produced from 100% recycled paper provides a competitive advantage in our markets, which are becoming increasingly environmentally aware.

*Enstra:* The Enstra Mill is an uncoated paper mill, with a capacity of 200,000 tons of elemental chlorine-free uncoated woodfree paper products per annum. In 1996, the Enstra Mill completed a US\$96 million capital expenditure program. This program increased capacity by 50,000 tons per annum and resulted in improved production efficiencies and product quality. The product range at the Enstra Mill caters to the business forms, scholastic, office, envelope and general printing industries. At the end of February 2012, the 105,000 tons bleached hardwood pulp mill at Enstra was closed.

*Ngodwana:* The Ngodwana Mill was expanded between 1981 and 1985 from an unbleached kraft mill with a capacity of 100,000 tons per annum to a modern integrated mill with a capacity of approximately 240,000 tons of linerboard and white top liner as well as 140,000 tons of newsprint per

Table of Contents

annum. The mill produces nearly 410,000 tons of bleached and unbleached pulp and 100,000 tons of mechanical pulp per annum. The mill markets paper, paper packaging and pulp products locally and internationally. The mill is a large consumer of waste paper, which is used in the production of packaging paper. In 1995, the mill commissioned the world's first ozone bleaching plant, thus eliminating the use of elemental chlorine and significantly reducing mill effluent. In May 2011, we announced the approximately US\$340 million investment of the mill to change its product portfolio to include expected annual production of 210,000 tons of dissolving wood pulp per annum. The capital expenditure on the conversion project to date has been US\$152 million, of which US\$136 million was spent in fiscal 2012. The total cost of the project is expected to be US\$340 million and its commission is expected for fiscal 2013.

*Stanger:* The Stanger Mill commenced operations in 1976, and is the only producer of coated woodfree paper in South Africa. It is unique in South Africa as it uses bagasse (the fibrous residue of sugar cane) as its basic raw material to produce high quality matt and gloss coated art papers and tissue wadding. Art paper is used for high quality books and magazines, brochures, annual reports and labels. A US\$26 million upgrade of the mill's paper machine was completed in August 2001, increasing the coated paper capacity to 80,000 tons per annum. The mill also produces 30,000 tons of tissue wadding and 60,000 tons of bleached bagasse pulp per annum. We also completed an elemental chlorine free bleach plant upgrade during 2006 at a cost of US\$11 million and installed a tissue converting line during September 2011 at a cost of US\$7 million.

*Tugela:* The Tugela Mill is our largest integrated unbleached kraft mill, with a capacity of 280,000 tons of packaging paper per annum. The mill has the capacity to supply kraft linerboard, corrugating medium and most of South Africa's requirements for sackkraft, which is used in the production of multiwall sacks. The Kraft Linerboard machine was upgraded in 1996 at a cost of approximately US\$81 million and the Sackkraft machine and components of the pulp plant were upgraded in 2003 and 2004 at a cost of approximately US\$50 million. It is the only mill in South Africa to offer high performance containerboard packaging and extensible sackkraft. During fiscal 2011, we announced the permanent suspension of production from the 60,000 ton containerboard machine at the Tugela Mill. During March 2012 we shut down a 10,000 ton per annum paper machine and the Kraft Continuous Digester pulp line as part of our restructuring programme. On October 12, 2012 we announced the decision to mothball the 80,000 ton per annum sackkraft machine, at the Tugela Mill due to poor market conditions.

*Sappi ReFibre:* Sappi Paper and Paper Packaging also manage Sappi ReFibre (formerly Sappi Waste Paper) which collected approximately 210,000 tons of waste paper during fiscal 2011 and 2012. Most of the waste paper is supplied to our mills as it represents approximately 30% of the fiber requirements of our packaging grades.

**Sappi Forests**

Sappi Forests, (which includes Usutu Forests), supplies or procures all of Sappi Southern Africa's domestic pulpwood requirements of approximately 5.3 million tons per annum. 89% of the pulpwood comes from owned or contracted sources. Together they directly or indirectly manage or control, about 554,000 hectares of land situated in: Mpumalanga (47%), KwaZulu-Natal (41%) and Swaziland (12%).

	<b>Hectares</b>
Owned by us in South Africa	383,000
Leased by us or managed directly in South Africa	8,000
Projects in South Africa (owned and managed by farmers that we indirectly manage through technical advice and support)	96,000
Leased by us in Swaziland	67,000
<b>Total</b>	<b>554,000</b>

Table of Contents

Securing raw material for the future is a vital element in the long-term planning of Sappi Southern Africa's business. Currently, we have access to approximately 400,000 hectares of plantable forestland; of which approximately 378,000 hectares is planted with primarily pine and eucalyptus. Our plantations provide approximately 70% of the wood requirements for our southern Africa mills. Sappi Forests has an extensive research operation which concentrates on programs to improve the yield per hectare of forestland used. Significant progress has been made in developing faster-growing trees with enhanced fiber yields. Sophisticated nurseries have been developed to accommodate the seedling requirements of Sappi Southern Africa's operations. Approximately 47 million seedlings are grown annually at Sappi Forests nurseries, and by contract growers in both South Africa and Swaziland. In addition, during fiscal 2011, we announced a joint proposal with Accelerated and Shared Growth Initiative for South Africa ("AsgiSA") to accelerate the establishment and management of 30,000 hectares of commercial tree plantations by 2020 in the Eastern Cape province of South Africa.

Sappi Forests have spent approximately US\$245 million in maintaining, acquiring and expanding plantations and other capital expenditure projects in the period from October 2009 to September 2012.

The sawmill division operates one mill, Lomati sawmill, with a total production capacity of 85,000 cubic meters per annum of structural timber for the building industry and components for the furniture and packaging industry.

## **Marketing and Distribution**

### *Overview*

Each of Sappi Southern Africa's divisions, with major South African markets, has its own marketing, sales and technical support teams based in three major centers in South Africa. Sappi Trading manages the exports of Sappi Southern Africa's products, in particular the marketing and distribution of dissolving wood pulp produced at the Saiccor Mill.

### *Customers*

Sappi Paper and Paper Packaging's coated and uncoated paper products are distributed in southern Africa primarily through a combination of merchants and direct sales. In addition, some large volume graphic orders and speciality grades are sold directly to printers and converters respectively. Its most significant fine paper customers include the CTP Group, Paarl Media, Antalis SA (Pty) Limited and Peters Papers.

Sappi Paper and Paper Packaging's most significant packaging paper customers, based on sales in fiscal 2012, are Mpact, APL (Pty) Ltd, Nampak, Houers Co-operative and New Era Packaging. The most significant Newsprint customer remains CTP Limited.

A number of the major viscose staple fiber manufacturers around the world purchase dissolving wood pulp from our Specialised Cellulose division. This includes large groups such as the Aditya Birla Group and the Lenzing Group. Most of our dissolving wood pulp sales contracts are multi-year contracts with pricing generally based on a formula linked to the NBSK price, which resets on a quarterly basis.

During fiscal 2012, approximately 49% of the total sales volume (excluding Forestry sales volume) of Sappi Southern Africa was destined for the export market.

### **Competition**

The Mondi Paper Company Limited and Mpact Limited are significant competitors of Sappi Southern Africa in the southern African market, but more specifically in the uncoated woodfree, newsprint and packaging paper sectors.

Table of Contents

Coated woodfree paper imports, primarily from Europe and Asia where there is currently significant over capacity, have gained an increasing share of the southern African woodfree paper market as a direct result of declining import duties which were removed in 2006. However, a portion of the imports originate from Sappi Fine Paper's European mills.

In recent years, the regional recycled containerboard capacity has increased by approximately 120,000 tons. Due to exchange rate fluctuations and the lack of local import duties, a number of offshore containerboard suppliers have also entered the southern African packaging market.

In respect of dissolving wood pulp, competitors include Borregaard ChemCell, Bahia Pulp, Tembec Inc, Sateri Holdings Limited, Hunan Juntai Paper and Pulp, Sun Paper, Fortess Specialty Cellulose, Sodra, Weyerhaeuser, Western Pulp Inc., Buckeye Technologies Inc. and Rayonier Inc.

## SUPPLY REQUIREMENTS

### Overview

The principal supply requirements for the manufacture of our products are wood, water, pulp, energy and chemicals. We believe that we have adequate sources of these and other raw materials and supplies for the foreseeable future. However, global warming and carbon footprint imperatives are causing an increase in the use of sustainable, non-fossil fuel sources for electricity generation. Consequently, electricity generating companies are competing for the same raw material, namely wood, in the same markets as us, thereby driving prices upwards.

For further information on regulation affecting our supplies, please see " Environmental and Safety Matters Environmental Matters South Africa". For further information on other factors affecting the availability of our supplies, please see "Item 5 Operating and Financial review and Prospects Principal Factors Impacting our Group Results Cyclical Nature of the Industry and Movement in Market Prices, Raw Materials and Input Costs".

### North America

#### *Wood*

In connection with the 1998 sale of our US timberlands to Plum Creek Timber Company L.P., Sappi Fine Paper North America and Plum Creek are parties to a fiber supply agreement with an initial term expiring in December 2023 and with three, five-year renewal options. Under the supply agreement, Sappi Fine Paper North America is required to purchase from Plum Creek, and Plum Creek is required to sell to Sappi Fine Paper North America, a guaranteed annual minimum of 318,000 tons of hardwood pulpwood, or approximately 11% of Sappi Fine Paper North America's annual pulpwood requirements, at prices calculated based on a formula linked to market prices. Sappi Fine Paper North America has the option to purchase additional quantities of hardwood pulpwood, harvested from these timberlands, at prices generally higher than the ones paid for the guaranteed quantities. The remainder of Sappi Fine Paper North America's pulpwood requirements is met through market purchases.

#### *Pulp*

Sappi Fine Paper North America's mills, taken together, are fully integrated on an economic basis with respect to hardwood pulp usage. Mills that are not fully integrated make market purchases, and mills that produce more pulp than they utilize make market sales.

Sappi Fine Paper North America's coated fine paper mills have achieved certification according to the chain of custody standards of the Forest Stewardship Council ("FSC"), The Sustainable Forestry Initiative ("SFI") and the Programme for the Endorsement of Forest Certification ("PEFC") and our wood procurement group is certified to SFI's Fibre Sourcing standard. The mills also use post-consumer waste

Table of Contents

and offer products containing up to 30% recycled content in addition to using reprocessed fiber recovered from its existing operations.

Sappi Fine Paper North America manufactures, in aggregate, pulp and fiber equivalent to approximately 119% of its own pulp requirements. This vertical integration reduces its exposure to fluctuations in the market price for pulp.

***Energy Requirements***

Sappi Fine Paper North America's energy requirements are satisfied through wood and by-products derived from the pulping process, coal, fuel oils, purchased electricity, steam, natural gas, biomass and other sources.

A substantial majority of Sappi Fine Paper North America's electricity requirements are satisfied through its own electricity generation or co-generation agreements. During 2012, Sappi Fine Paper North America entered into a new two-year contract for retail supply of net load for the Somerset Mill with Constellation Energy Commodities Group Maine, LLC ("Constellation"). Under this agreement, Constellation will provide the mill's electrical power requirements. In addition, Sappi Fine Paper North America entered into a new three-year large generator interconnection agreement with Central Maine Power ("CMP") that establishes the terms and conditions under which Sappi will remain interconnected to the CMP transmission system. Both new agreements were negotiated to replace expiring agreements with Constellation and CMP respectively.

The Westbrook Mill sells excess electricity which is co-generated through a number of hydroelectric facilities, in addition to its power boiler.

The Cloquet Mill is partly supplied with internally generated electricity. The facility includes a hydroelectric plant that is licensed by the Federal Energy Regulatory Commission. In addition to generating a portion of its own power, the Cloquet Mill has entered into a take-or-pay agreement to purchase a portion of its power from Minnesota Power. We may terminate this agreement at any time subject to a four-year notice period.

***Alternative Fuel Mixture Tax Credits Black Liquor***

The U.S. Internal Revenue Code allowed an excise tax credit to taxpayers for the use of alternative fuel mixtures. In 2009 we began to use an alternative fuel mixture containing diesel fuel and "black liquor", a by-product of pulp production, at our Somerset and Cloquet Mills. During the second calendar quarter of 2009, we were approved by the IRS as an alternative fuel producer. This tax credit expired on December 31, 2009.

During fiscal 2010 and 2009, the Company filed claims for alternative fuel mixture credits covering eligible periods subsequent to February 2009 totaling US\$51 million and US\$87 million, net of fees and expenses, respectively and has reflected such amounts in the group income statements in "Other operating expenses (income)". Cash received, net of fees and expenses paid by the Company during fiscal 2010 and 2009 totaled US\$73 million and US\$65 million, respectively. No receivables related to alternative fuel mixture credits were outstanding at the end of fiscal 2010. The Company considers the tax credits earned in fiscal 2010 and 2009 as fully taxable and treated them as such in the calculation of its tax provision in the consolidated group Annual Financial Statements.

On October 15, 2010, the IRS issued additional guidance on this topic, indicating that a taxpayer who received cash refunds under the alternative fuel tax program can also receive the tax credit under the Cellulosic Biofuel Producer Credit ("CBPC") on those black liquor volumes for which it had not previously collected the cash refund. The Company can make this election to file for the CBPC tax credits through December 2012, with respect to eligible biofuels produced in 2009.

Table of Contents

**Chemicals**

Major chemicals used by Sappi Fine Paper North America include clays, carbonates, latexes and plastic pigments, titanium dioxide, caustic soda, other pulping and bleaching chemicals and chemicals for the speciality business. Sappi Fine Paper North America purchases these chemicals from a variety of suppliers. Most of these chemicals are subject to price fluctuations based on a number of factors, including energy and crude oil prices, the availability of feedstocks, transportation costs and the specific market supply and demand dynamics.

**Europe**

**Wood**

Sappi Fine Paper Europe purchases approximately 3.7 million cubic meters of pulpwood per annum for its pulp mills. The wood is purchased both on contract and in the open market. Wood supply contracts are fixed for one year in terms of volumes. Price agreements range in the majority of cases from three months to one year.

Logwood and wood chips used in the Gratkorn TCF pulp mill are purchased through the Papierholz Austria GmbH joint venture arrangement amongst Sappi, the Norske Skog Bruck mill *Zellstoff Pöls*, and the Frantschach Group. We hold a 42.5% ownership interest in Papierholz.

The wood chips used in the Lanaken Chemithermomechanical Pulp ("CTMP") plant are purchased through Sapin S.A. ("Sapin"), a 50% joint venture company which we operate together with Norske Skog. Sapin was initially formed on November 25, 1986, pursuant to a joint venture agreement between the predecessors of Sappi Lanaken and Norske Skog. Under the agreement, as amended in September 2003, the parties agree to utilize Sapin exclusively to furnish the entire wood requirements of the joint venture partners' affiliated mills.

Under a wood supply agreement, Mestä Board's parent company (Metsäliitto Group) will supply us with up to 704,000 cubic meters of wood annually, substantially all of which is sourced in southern Finland, to the Kirkniemi Mill for a minimum period of 12 years from 2009 at market rates.

**Pulp**

Sappi Fine Paper Europe has the capacity to produce approximately 56% of its pulp requirements. The remainder is mostly supplied through open market contracts, the biggest supplier being Metsä Board Corporation which supplies up to 340,000 tons of pulp per annum, for contracted periods of between 1 and 6 years.

**Energy Requirements**

Sappi Fine Paper Europe's energy requirements are generally met by the internal generation of energy and external purchases of electricity, natural gas, biomass, and to a lesser extent, hard coal and oil. The delivery of electricity, natural gas, oil, coal and biomass is covered by various mid-term supply agreements.

Since July 2007, Gratkorn has operated a combined heat and power plant ("CHP plant") on site and has become an exporter of about 10 MW of electricity. The mill's additional energy requirements are met through the usage of biomass and mineral coal fuels.

Substantially all of the electricity requirements of the Maastricht Mill are satisfied by a 60 MW CHP plant, which was operated as a 50% joint venture (VOF WarmteKracht Maastricht Mill) between Sappi Fine Paper Europe and Essent until January 01, 2010. On this date, we acquired the remaining shareholding from Essent. The plant utilizes natural gas, which is procured from a Dutch supplier at market prices. All surplus electrical energy generated is supplied to the national grid.

Table of Contents

The Nijmegen Mill's electricity requirements are largely satisfied by its co-generation power plant. The Nijmegen Mill purchases natural gas from a Dutch gas supplier and a small amount of electricity from the public grid.

The Lanaken Mill's energy requirements are generally met by purchases of natural gas, electricity and steam. Certain of the energy requirements of the mill are furnished by a CHP plant, constructed and operated pursuant to the Albertcentrale N.V. joint venture arrangement between Sappi, the Belgian power company Electrabel and Rabo Energie. We hold a 49% ownership interest in the Albertcentrale facility and are obligated to purchase steam from the joint venture facility under a long-term (15 year) supply agreement. The facility commenced operations in April 1997. Lanaken Mill's electricity requirements are satisfied by a long term contract with national utility company Electrabel for about one third of the demand, the balance is being covered by a mid-term electricity supply contract with Electrabel. The long-term supply agreement with Electrabel was renewed on July 01, 2012 and will be in force for a period of ten years. The contract may be terminated by Sappi after a period of five years, with a two year prior notice period.

Alfeld and Ehingen generate about 50% of their power needs from renewable resources and the remainder is purchased from an Austrian power company.

To a great extent, the electricity and steam requirements of the Kirkniemi Mill are covered under a long-term supply agreement with Fortum Heat & Power, a large Finnish utility company. The energy is generated on site by a 100 MW CHP plant which is owned and operated by the utility company. The long-term supply agreement matured in October 2012, following which Sappi Fine Paper Europe took ownership of the plant and continues to operate the site. The large amount of natural gas required to operate the CHP plant is delivered by Gasum, the national gas supplier. The balance of the mill's power requirements is met through purchases of electricity from the public grid. Biomass and natural gas are purchased for the generation of additional steam.

Stockstadt generates about 50% of their power needs from renewable resources and the remainder is purchased from an Austrian power company. The mill's steam requirements are met through the usage of biomass and mineral coal as fuels.

***Chemicals***

Major chemicals used by Sappi Fine Paper Europe include clays, carbonates, latexes, starches and chemicals for the speciality business. Sappi Fine Paper Europe purchases most of these chemicals from a portfolio of suppliers, and in only one case is Sappi Fine Paper Europe dependent on a sole source of supply. There are generally adequate sources of supply in the market. Most of these chemicals are subject to price fluctuations based upon a number of factors, including energy and crude oil prices, the availability of feedstocks, transportation costs and the specific market supply and demand dynamics.

**Southern Africa**

***Wood***

Sappi Southern Africa manages directly or indirectly approximately 554,000 hectares of forestland in southern Africa. Approximately 400,000 hectares are plantable forestland, which produce approximately 70% of the timber required for this reporting segment's operations. Sappi Forests owns approximately 383,000 hectares and manages the majority of the remainder. Usutu Forests cultivates 50,000 hectares of pine and eucalyptus on 67,000 hectares of land that is leased from the Swazi nation under a long-term lease agreement which is extendable to 2089. Sappi Forests presently has supply contracts for the timber from approximately 96,000 hectares of plantations planted by small growers with our technical and financial support. The remaining timber requirements are met through a number of significant medium-term contracts and open market purchases.

Table of Contents

***Pulp***

Following the closure of the pulp line at our Enstra Mill and the closure of the Kraft Continuous Digester ("KCD") at our Tugela Mill in fiscal 2012, Sappi Southern Africa has an economic, capacity based pulp integration of approximately 175%. Although Sappi Southern Africa is long on pulp from an economic sense, it does buy pulp on the open market, which is supplied through both local and international open market contracts, for contracted periods of between 3 and 5 years.

***Energy Requirements***

Our energy requirements in southern Africa are principally met through the purchases of coal and electricity, supplemented by purchases of fuel, oil and natural gas. Coal, both for steam generation and electricity production, and oil are purchased on contract. Much of the energy demand is met by utilizing internally generated biomass and spent liquors from the pulping process. Electricity is supplied by Eskom, the state-owned electricity company, or generated internally. During the course of 2009, we commissioned a new electricity generating turbine unit at our Saiccor Mill, and we now generate in excess of 50% of the total electricity requirements of the mill. This electricity is generated from bio-fuel and represents an increase of 30% in our internal generation capacity.

Energy costs for our southern African operations have risen sharply in recent years, which has had a significant impact on profitability in the region. In addition, in February 2010, NERSA, the National Energy Regulator of South Africa, announced that it had approved substantial annual tariff increases for electricity in South Africa for the years 2010 to 2012. In fiscal 2011 and 2012, electricity purchased from Eskom amounted to approximately 20% and 21% respectively, of the variable costs in the southern African operations.

Sappi Southern Africa has contractually agreed to sell up to 35MW of electricity generated from the Saiccor and Ngodwana mills to Eskom under the Medium Term Power Purchase Program. Furthermore, Sappi Southern Africa is currently pursuing a number of renewable and co-generation energy projects in order to further increase its electricity self-sufficiency and thus to reduce the impact of higher than inflation electricity increases that are expected over the forthcoming few years.

***Chemicals***

Major chemicals used by Sappi Southern Africa include caustic soda, calcium carbonates, latexes, starches, sulphur and sulphuric acid. Sappi Southern Africa purchases these chemicals from a variety of South African and overseas suppliers. There are generally adequate sources of supply, and in only one case are we dependent upon a sole source of supply. Most of these chemicals are subject to price and foreign currency fluctuations based upon a number of factors, including energy and crude oil prices, the availability of feedstock, transportation costs and the specific market supply and demand dynamics.

**ENVIRONMENTAL AND SAFETY MATTERS**

**Environmental Matters**

We are subject to a wide range of environmental laws and regulations in the various jurisdictions in which we operate and these have tended to become more stringent over time. Violations of environmental laws could lead to substantial costs and liabilities, including civil and criminal fines and penalties. Environmental compliance is an increasingly important consideration in our businesses, and we expect to continue to incur significant capital expenditures and operational and maintenance costs for environmental compliance, including costs related to reductions in air emissions such as carbon dioxide ("CO<sub>2</sub>") and other greenhouse gases ("GHG"), wastewater discharges and solid and hazardous wastes. We closely monitor the potential for changes in pollution control laws and take actions with respect to our operations accordingly.

Table of Contents

*North America*

Sappi Fine Paper North America is subject to stringent environmental laws in the United States. These laws include the Federal Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act, the Comprehensive Environmental Response, Compensation and Liability Act and their respective state counterparts and implementing regulations.

On June 29, 2009, the Commissioner of the Department of Inland Fisheries and Wildlife, State of Maine (the "Commissioner"), issued a decision requiring Sappi Fine Paper North America to install a fish passage at the Cumberland Mills dam associated with the Westbrook Mill, the most downriver dam on the Presumpscot River. Pursuant to a final order issued by the Commissioner, construction of the fish passage must be completed by May 01, 2013. Costs associated with construction and related engineering of this fish passage are estimated to be approximately US\$4 million to US\$5 million. The fish passage at the next dam upstream, the Saccarappa hydrofacility, must be operational two years after the Cumberland Mills dam fish passage is completed (i.e., during the spring of 2015). Installation of the Cumberland Mills dam fish passage may also trigger, over a period of approximately ten years, the obligation to install fish passages for at least some of Sappi Fine Paper North America's other upstream hydrofacilities in order to allow natural fish migration and thus promote the restoration of native species to the river. The total cost of all fish passages associated with Sappi Fine Paper North America's dams along the Presumpscot River is estimated to be in the range of approximately US\$18 million to US\$28 million. This estimate includes costs expected to be incurred in the next several years for the fish passage on the Cumberland Mills dam and Saccarappa hydrofacility as well as estimated costs for the upstream fish passages which may be incurred in the future. As the construction of additional fish passages depends on several future contingencies, including the results of data gathering on fish populations in the river, Sappi Fine Paper North America does not know the precise timing for incurring the related future costs, assuming such obligations are triggered.

We closely monitor state, regional and federal GHG initiatives and other regulatory developments in anticipation of any potential effects on our operations. Although the United States has not ratified the Kyoto Protocol, and has not yet adopted a federal program for regulating GHG emissions, Congress has considered comprehensive federal legislation regarding climate change and various regional initiatives regarding emissions associated with climate change that are either in effect or proposed. In addition, the US Environmental Protection Agency ("USEPA") has finalized or proposed several rules relating to emissions reporting and emissions reductions, including rules issued in March 2011 known as "Boiler MACT" which would establish new standards for emissions of hazardous air pollutants from commercial and industrial boilers. In May 2011, the USEPA stayed the Boiler MACT rules until such time as the USEPA completes its reconsideration process or the various court proceedings are completed, whichever comes first. While a recent court decision has vacated the USEPA's stay of the rules, the USEPA has since issued a no action letter, indicating that it will not enforce technical violations of the Boiler MACT rule deadlines, at least until the earlier of December 31, 2012 or the effective date of the final reconsidered rules. It is not clear what the timing will be for completion or implementation of a revised rule. Capital expenditures, currently estimated to range between US\$10 million and US\$15 million, could be required for emissions control equipment at Sappi Fine Paper North America's mills in order to comply with the rules as proposed in March 2011, although the anticipated impact of the rules and the related costs may be subject to revision in the future, particularly in light of the on-going reconsideration process and litigation. The nature, scope and timing of any proposed legislation, including climate change legislation and other proposed rules regulating GHGs is highly uncertain and, currently, we do not know what precise effect, if any, such legislation will have on our financial condition and operations.

*Europe*

Our European facilities are subject to extensive environmental regulation in the various countries in which we operate. The air emissions, water discharges and pollution control requirements of the permits

Table of Contents

of our mill operations in the European Union are based on Best Available Techniques ("BAT"). These are defined in the BAT reference documents ("BREFs") of the Integrated Pollution Prevention and Control directive ("IPPC"). These documents are currently being revised but this exercise is taking longer than initially expected. The revised documents are expected to be adopted in early 2013.

Other laws and regulations that apply to all our facilities in the European Union include:

The national European laws that regulate the waste disposal framework and place restrictions on land filling materials in order to reduce contaminated leachate and methane emissions. Prevention, re-use and recycling (material or thermal) are the preferred waste management methods. Consequently most of the waste material generated at our facilities is recycled. The small share of waste material that is still placed in landfills is inert material (ash or building rubble).

The EU Chemicals Regulation REACH (1907/2006/EC) intended to harmonize existing European and national regulations to provide better protection of human health and the environment is not directly applicable to the pulp and paper industry. It does, however, apply to a number of raw materials that we source. We also registered some intermediate substances in our pulp production processes.

A timber and timber product regulation adopted by the European Commission, the obligations, of which, will also apply to our European operations. The requirements apply as from March 03, 2013. We believe that we are well prepared for these new requirements as we have an effective certification and risk assessment system in place which allows us to trace wood and timber material back to its source.

An agreement with the national government in The Netherlands which we, together with other paper manufacturers, have signed to improve environmental management and further limit emissions.

The countries within which Sappi operates in Europe have all ratified the Kyoto Protocol and Sappi Fine Paper Europe has developed a GHG strategy to comply with applicable GHG restrictions and to manage emission reductions cost effectively.

***South Africa***

In southern Africa, the environmental regulatory legal framework is still evolving, as is the enforcement process. We work with government authorities in striving to find a balance between economic development and social and environmental considerations.

The primary South African environmental laws affecting our operations are:

The National Water Act addresses the water shortages in South Africa and relates to both, our manufacturing and our forestry operations. Abstraction of water, discharge of effluent and management of forests are all regulated under a license system in which first allocations go to, among other things, human consumption, before allocations are made to agriculture, industry and forestry. All water use is subject to a charge.

The National Environmental Management Act provides for the integration of environmental considerations into all stages of any development process, and in particular, provides for the issuance of environmental authorizations and imposes a duty of care regarding environmental harm. The Act includes a number of significant principles, such as prosecution of companies in the interest of the protection of the environment.

The National Environmental Management: Air Quality Act was promulgated at the beginning of 2005 and has now replaced the 1965 Atmospheric Pollution Prevention Act. The new Act will impose more stringent compliance standards on our operations in 2015 and then again in 2020.

Table of Contents

The National Environmental Management: Waste Act was enacted on July 01, 2009. The Waste Act regulates the use, re-use, recycling and disposal of waste and regulates waste management by way of a licensing system.

The Kyoto Protocol: South Africa has ratified the Kyoto Protocol, which obligates signatory countries to take measures to reduce their greenhouse gas emissions through the initial commitment period. South Africa as a developing country does not presently have targets and timetable commitments. Obligations under the Kyoto Protocol have been extended by the member parties through a second commitment period which runs from 2013 until at least 2017.

The requirements under these statutes and commitments, predominantly with respect to air emissions from our mills, will result in additional capital and operating expenditures, some of which may be significant. Newly enacted legislation in South Africa typically provides for a phase-in period for new standards. As a result, the impact on our mills of new standards contained in the Air Quality Act and the Waste Act is expected to be distributed over the next three to eight years. We are in frequent contact with regulatory authorities during the phasing in of these requirements, in an attempt to manage the transition period.

Environmental liability assessments were done on a number of Sappi Southern Africa's mills. It was concluded that there was no material environmental liability exposure for Sappi Southern Africa with regard to present operations. The landfill sites at the Enstra and Tugela Mills could incur rehabilitation and remediation costs should Sappi Southern Africa decide to close these sites. We believe that these sites will continue to operate into the foreseeable future. Landfill sites in South Africa are regarded as assets for continued operations and for commercial on-sale due to the scarcity of available air space as the Government is reluctant to approve the development of new landfill sites. Our Enstra Mill is located in a contaminant catchment area currently being investigated by the relevant authorities as to possibly allocate responsibilities to different industries in respect of contributing to the remediation of this specific catchment. This is not expected to materialize within the next five years.

**Safety Matters**

The forestry, timber and pulp and paper industries involve inherently hazardous activities including, among other things, the operation of heavy machinery. All countries in which we have significant manufacturing operations, including South Africa, the United States and European countries, regulate health and safety in the workplace. We actively seek to reduce the frequency of accidents in our workplaces and to improve health and safety conditions by extensive training and educational programs.

Our global safety improvement initiative, Project Zero, sets out the goal of no injuries. It involves implementing behavior-based safety programs throughout our group and focusing on those activities which have in the past resulted in injuries or fatalities.

In the United States, Sappi Fine Paper North America must comply with a number of Federal and state laws regarding health and safety in the workplace. The most important of these laws is the Federal Occupational Safety and Health Act.

In Europe, we participate in various governmental worker accident and occupational health insurance programs. In Belgium and The Netherlands, these programs are funded by mandatory contributions by employers and employees. In Germany, we participate in a similar mandatory contribution scheme controlled by the employers' liability insurance association, which permits employer and employee participation in its administration. In Austria, employee liability insurance is funded by the employer. In Finland, employment accident insurance is funded by the employer while occupational health insurance is funded partly by employees. The safety and health issues are integrated into the management systems and all mills of Sappi Fine Paper Europe comply with health

Table of Contents

and safety legislation and are OHSAS 18001 certified. In respect of environmental management systems all our mills are ISO 14001 certified.

In South Africa, we must comply with a number of laws regulating workers' compensation for injuries and health and safety within the workplace, the most important of which is the Occupational Health and Safety Act (No. 85 of 1993), the Compensation for Occupational Injuries and Diseases Act (Act 130 of 1993) and related regulations. The COID Act regulates insurance for employees against injuries and diseases contracted in the workplace. During any project involving construction, such as the dissolving wood pulp expansion project at Ngodwana, we are also required to comply with the "Construction Regulations". Our South African businesses are audited every two years to evaluate compliance with this legislation. All Pulp and Paper mills, as well as Sappi Forests Plantations, are OHSAS 18001:2007, FSC and ISO 14001:2004 certified for health and safety management systems and environmental management systems, respectively.

Table of Contents**ORGANIZATIONAL STRUCTURE**

Sappi Limited is the ultimate holding company of the Sappi group. The following table sets forth significant subsidiaries and joint ventures owned directly or indirectly by Sappi Limited at September 2012.

<b>Name</b>	<b>Trading Name</b>	<b>% Held*</b>	<b>Country of Incorporation</b>	<b>Nature of Business</b>
<b><i>Southern Africa</i></b>				
Sappi Southern Africa (Pty) Ltd	Sappi Southern Africa or Sappi Paper and Paper Packaging or Sappi Chemical Cellulose or Specialised Cellulose or Sappi Forests or Sappi ReFibre	100	South Africa	Pulp and paper manufacturer and forestry operations

Table of Contents**ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS**

*You should read the following discussion and analysis together with our group Annual Financial Statements, included elsewhere in this Annual Report. Certain information contained in the discussion and analysis set forth below and elsewhere in this Annual Report includes forward-looking statements that involve risk and uncertainties. See "Forward-Looking Statements", "Item 3 Key Information Selected Financial Data", "Item 3 Key Information Risk Factors", "Item 4 Information on the Company", "Item 10 Additional Information Exchange Controls" and our group Annual Financial Statements included elsewhere in this Annual Report for a discussion of important factors that could cause actual results to differ materially from the results described in or implied by the forward-looking statements contained in this Annual Report.*

The group Annual Financial Statements contained herein, have been prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB").

Our fiscal years operate on a 52 accounting week cycle, except every 6th fiscal year which includes an additional accounting week. Fiscal 2011 operated on a 53 accounting week cycle while fiscal 2012 and 2010 operated on a 52 accounting week cycle.

**Company and Business Overview**

We are a global company, which through acquisitions in the 1990s, was transformed into one of the global market leaders in the coated woodfree paper sector. Two acquisitions were pivotal in establishing us as a global company, namely the acquisition in 1994 of S.D. Warren Company, now known as Sappi Fine Paper North America, and the acquisition in 1997 of KNP Leykam, now integrated into Sappi Fine Paper Europe. Also on December 31, 2008 we acquired the coated paper business of M-real Corporation (now known as Metsä Board), which is now integrated into Sappi Fine Paper Europe. Further opportunities to grow within our core businesses will continue to be evaluated.

The group has three reportable segments, namely Sappi Fine Paper North America, Sappi Fine Paper Europe and Sappi Southern Africa. For reporting purposes, we also present information for Sappi Fine Paper which comprises the reporting segments Sappi Fine Paper North America and Sappi Fine Paper Europe. We also operate a trading network, called Sappi Trading, for the international marketing and distribution of dissolving wood pulp and market pulp throughout the world and for our other products in areas outside our core operating segments of Sappi Fine Paper North America, Sappi Fine Paper Europe and Sappi Southern Africa. All sales and costs associated with Sappi Trading are allocated to the three reportable segments.

Sales by source and destination for fiscal 2012, fiscal 2011 and fiscal 2010 were as follows:

	Sales by Source			Sales by Destination		
	2012	2011	2010	2012	2011	2010
	%					
North America	23	21	21	23	22	22
Europe	53	54	55	45	46	48
Southern Africa	24	25	24	13	13	13
Asia and other				19	19	17
<b>Total</b>	<b>100</b>	<b>100</b>	<b>100</b>	<b>100</b>	<b>100</b>	<b>100</b>

Table of Contents**Beneficial Shareholding by Region**

On November 05, 1998, our American Depositary Receipts commenced trading on the New York Stock Exchange. Based on available information, as of September 30, 2012 we believe our beneficial shareholding by region to be as follows:

	<b>September</b>		
	<b>2012</b>	<b>2011</b>	<b>2010</b>
	%		
North America	16	18	16
Europe and elsewhere	9	11	13
Southern Africa	75	71	71
	100	100	100

**Principal Factors Impacting our Group Results**

Our results of operations are affected by numerous factors. Given the high fixed cost base of pulp and paper manufacturers, industry profitability is highly sensitive to changes in sales volumes and prices. Sales volumes and prices are significantly affected by demand for our products, changes in industry capacity and output levels and customer inventory levels. Demand levels are highly dependent on cyclical and structural changes in the world economy. Industry profitability is also influenced by factors such as the level of raw material inventory, energy, chemicals, wood and other input costs, currency exchange rates, and operational efficiency.

The principal factors that have impacted the business during the fiscal periods presented in the following discussion and analysis and that are likely to continue to impact the business are:

- (a) Cyclical nature of the industry and movement in market prices, raw materials and input costs;
- (b) Sensitivity to currency movements and inflation rates;
- (c) The additional week in the first quarter of fiscal 2011; and
- (d) New acquisitions, expansions, restructurings, cost-reduction initiatives, capacity closures, our ability to maintain and continuously improve operational efficiencies and performance and other significant factors impacting costs.

Because many of these factors are beyond our control and certain of these factors have historically been volatile, past performance is not necessarily indicative of future performance and it is difficult to predict future performance with any degree of certainty.

***Cyclical Nature of the Industry and Movement in Market Prices, Raw Materials and Input Costs:***

The markets for pulp and paper products are cyclical, with sales prices significantly affected by factors such as changes in industry capacity and output levels, customer inventory levels and changes in the world economy. The pulp and paper industry has often been characterized by periods of imbalances between supply and demand, causing prices to be volatile. Prices also vary significantly by geographic region and product. Coated woodfree paper, our core product used for many types of publications, is susceptible to the highly cyclical advertising market, a major driver in our business, and other factors such as increasing consumer preferences for digital media over print media. See " Markets" for a further discussion of the cyclical nature of the pulp and paper industry and movements in market prices. In addition, the purchase prices of many of the raw materials we use fluctuate in

Table of Contents

correlation with global commodity cycles. Other input costs, such as energy and fuel costs, vary depending on various factors, including local and global demand and seasonality. Worldwide economic conditions experienced a significant downturn during the latter half of 2008, continuing in fiscal 2009 and into fiscal 2010, resulting in significant recessionary pressures and lower business and consumer confidence. As worldwide economic conditions improved throughout 2010, demand for our products improved, and market prices increased in our major markets. Market prices for pulp increased significantly in fiscal 2010 and continued to do so during calendar 2011 due to higher worldwide-demand, specifically demand from Asia. However, with the emergence of the sovereign debt crises in the European Union during the latter half of calendar 2011 and continuing during fiscal 2012, the global economic recovery slowed which, together with competition from electronic media, caused pulp prices and demand for many of our major products to decline. Sales prices consequently decreased.

**Currency Fluctuations**

The principal currencies in which our subsidiaries conduct business are the US dollar (US\$), the euro (€) and the South African Rand (ZAR). Although our reporting currency is the US dollar, a significant portion of the group's sales and purchases are made in currencies other than the US dollar. In Europe and North America, sales and expenses are generally denominated in euro and US dollars, respectively; however, pulp purchases in Europe are primarily denominated in US dollars. In southern Africa, costs incurred are generally denominated in Rand, as are local sales. Exports from the South African businesses, which in local currency represented approximately 48% of net sales of Sappi Southern Africa in fiscal 2012 (fiscal 2011: 49%; fiscal 2010: 47%), are denominated primarily in US dollar.

The appreciation of the Rand or the euro against the US dollar diminishes the value of exports from South Africa and Europe in local currencies, while depreciation of these currencies against the US dollar has the opposite impact. Since expenses are generally denominated in local currencies, the depreciation of the US dollar has a negative effect on gross margins of exports sales as well as those domestic sales which are priced relative to international US dollar prices. The appreciation of the US dollar has the opposite impact. In North America, the depreciation of the US dollar against the euro or Asian currencies has a positive effect on sales volumes and margins, due to high levels of imports of coated woodfree paper in the market, which are adversely affected by such depreciation, and the favorable impact on exports of coated woodfree paper and release paper. The group's consolidated financial position, results of operations and cash flows may be materially affected by movements in the exchange rate between the US dollar and the respective local currencies to which subsidiaries are exposed. The principal currencies in which subsidiaries conduct business that are subject to the risks described in this paragraph are the euro and Rand. The following table depicts the average and year end exchange rates for the Rand and euro against the US dollar used in the preparation of our group Annual Financial Statements in fiscal 2012, fiscal 2011 and fiscal 2010:

Exchange rates	Average rates			Closing rates		
	2012	2011	2010	2012	2011	2010
ZAR to one US\$	8.0531	6.9578	7.4917	8.3096	8.0963	7.0190
US\$ to one EUR	1.2988	1.3947	1.3658	1.2859	1.3386	1.3491

The profitability of certain of our South African operations is directly dependent on the Rand proceeds of their US dollar exports. Selling prices in the local South African market are significantly influenced by the pricing of competing imported products. The weakening of the Rand against the US dollar leads to increased pressure from imports. This factor was evident in our 2012 fiscal year.

The translation of our annual results into our reporting currency (US dollar) from local currencies tends to distort comparisons between fiscal periods due to the volatility of currency exchange rates. On average, the euro weakened by 7% against the US dollar in fiscal 2012 compared to fiscal 2011. The Rand weakened in fiscal 2012 to an average level against the US dollar of ZAR8.05, 16% weaker than

Table of Contents

fiscal 2011 average levels, and weakened to a closing rate of ZAR8.31/US\$ at the end of fiscal 2012, approximately 2% weaker than the closing rate of fiscal 2011. The impact, compared to the respective prior fiscal year, of currency movements on reported sales in US dollars was to decrease fiscal 2012 reported sales by US\$494 million, to increase fiscal 2011 reported sales by US\$210 million and to decrease fiscal 2010 reported sales by US\$263 million.

The impact of currency translation effects on our results of operations is described below in "Operating Results Sales" and " Operating Results Operating Expenses".

***Inflation and Interest Rates***

The graph below summarizes the South African inflation and interest rates (3 month JIBAR), as well as the South African Reserve Bank lending rate (repo rate) at the end of the relevant periods.

---

Source:

Reuters, South African Reserve Bank

The group is exposed to interest rate risk as it borrows funds at both fixed and floating interest rates. The group monitors market conditions and may utilize approved interest rate derivatives to alter the existing balance between fixed and variable interest rate loans in response to changes in the interest rate environment. As at September 2012, one fixed to floating interest rate swap was in place which swaps the fixed interest rate on the US\$350 million 2021 Notes issued in April 2011 into a floating interest rate. In April 2012, Sappi Southern Africa entered into a new interest rate swap converting the floating rate on the new three-year ZAR750 million (US\$98 million) bond into a fixed rate of 7.78%.

The group has a policy of not hedging translation risks. The southern African and European operations use the Rand and the euro as their respective functional currencies. Any translation of the value of these operations into US dollars results in foreign exchange translation differences as the Rand and the euro exchange rates move against the US dollar. These differences are recognized within other comprehensive income of the group. Borrowings in a currency other than the functional currency of the borrowing entity are specifically hedged with financial instruments, such as currency swaps and forward exchange contracts. The group has two interest rate and currency swaps which swap the principal of the US\$400 million 2017 Notes and the US\$300 million 2019 Notes into euros and the fixed US\$ interest rate on these Notes into a fixed euro interest rate.

Table of Contents

***Additional week in fiscal 2011:***

Our normal reporting cycle comprises four quarters, each consisting of thirteen seven-day weeks, which is equal to 364 days per year. As a result, after six years we have effectively "lost" a week (including the leap year). Accordingly, every six years we add an additional week to one of our quarters, which we did in the first quarter of fiscal 2011 thus fiscal 2011 consists of 53 weeks of operations instead of the usual 52 weeks. The main impact of the additional week in fiscal 2011 was an increase in Operating Profit excluding Special Items of approximately US\$8 million (assuming a pro-rata accumulation of operating profit over the period).

***Acquisitions, Expansions, Restructurings and Cost-reduction Initiatives:***

We continually evaluate the performance of our assets by maintaining a focus on profitability and we actively manage our asset base on a regional basis, including closing non-performing assets and pursuing an investment policy that is focused on high-return projects. Some of these recent developments include the following:

***Kangas Mill closure:*** Due to a reduction in the European consumption of coated magazine paper arising from the global recession, our Kangas Mill in Finland had experienced a substantial amount of commercial downtime since the beginning of 2009. We announced the closure of the mill in January 2010. All our affected customers are now served from our other European operations. On July 07, 2010, we sold the Kangas Mill land and buildings to M-real (now known as Metsä Board) for €13 million.

***Usutu Mill closure:*** The Usutu Mill was closed on January 31, 2010 in response to adverse market conditions in the pulp sector, as well as the cumulative severe impact of fire damage during August 2008, which destroyed 40% of the mill's timber crop. As a result, the mill was no longer self-sufficient with respect to timber supplies.

***Biberist Mill closure:*** On March 31, 2011 we announced, that due to the persistent overcapacity in the European coated and uncoated fine paper market, we would be entering into a consultation process with employee representatives and social partners at our Biberist Mill in Switzerland. Despite the combined efforts of mill employees and management, we were unable to identify a viable alternative to ensure the future existence of the mill. On July 20, 2011, we announced the closure of the Biberist Mill and ceased operations in the mill during August 2011. As a result of this closure, we reduced our annual production capacity by 500,000 tons of coated and uncoated fine paper in the European market. We are servicing most of our affected customers from our other European mills.

***Adamas Mill closure:*** We announced the possible closure of our Adamas Mill in South Africa on May 23, 2011 and entered into a consultation process with employee representatives soon thereafter. Unable to find a viable alternative for the mill, we announced the final closure of the mill on August 03, 2011. We ceased operations at the mill later in August 2011 and transferred all products produced at the facility to other Sappi mills in South Africa to ensure an un-interrupted supply of products to our customers.

***Expansion of dissolving wood pulp capacity:*** In May 2011, we announced the US\$340 million investment in our Ngodwana Mill in South Africa. The expansion will change the product portfolio of the mill to include the annual production of 210,000 tons of dissolving wood pulp. During November 2011, we also announced an additional investment of US\$170 million in our Cloquet Mill in the United States, which will enable the facility to produce 330,000 tons of dissolving wood pulp per annum. Together with our Saiccor Mill in South Africa, these investments will increase our total annual dissolving wood pulp production capacity to approximately 1.3 million tons. Both projects have been initiated, are progressing well and we plan to commission both projects during 2013.

Table of Contents

*Forestry investment:* In line with our strategy to secure a stable fiber supply for our southern African operations, we acquired 14,500 hectares of developed softwood plantations near Ngodwana Mill during 2010. During fiscal 2011, we announced a joint proposal with AsgiSA ("Accelerated and Shared Growth Initiative for South Africa") to accelerate the establishment and management of 30,000 hectares of commercial tree plantations by 2020 in the Eastern Cape province of South Africa.

*European and southern African restructuring initiatives:* During fiscal 2011, we embarked on restructuring initiatives in our European and southern African operations in an effort to streamline our operations further, to adapt to the changing needs of our customers and to match our assets to profitable markets for future growth. We realized the targeted cost-saving benefits from these initiatives in Europe and in southern Africa in fiscal 2012.

*Enstra and Tugela Mills closure of KCD lines and PM3:* During fiscal 2012 we announced the closure of the 10,000 ton per annum paper machine (PM3) at our Tugela Mill. During fiscal 2012 we also announced the closure of the pulp line at our Enstra Mill and the closure of the Kraft Continuous Digester ("KCD") at our Tugela Mill.

*Tugela Mill mothballing of PM4:* On October 12, 2012 we announced the decision to mothball PM4, a sackkraft and containerboard machine, at the Tugela Mill from January 01, 2013. We are currently in a consultation process with employees at the mill regarding potential retrenchments. The asset impairment charge related to the mothballing of the machine of ZAR76 million was taken in the fourth quarter of fiscal 2012 and is included in special items.

*Alfeld Mill Conversion:* During the fourth quarter of fiscal 2012 we announced the planned conversion of PM2 at the Alfeld Mill from 150,000 tons of coated fine paper to 135,000 tons of speciality paper per annum. This conversion will not only increase our capacity in a growing and higher margin specialised business, but will also improve our cost position in coated woodfree graphic paper and further reduce our graphic paper capacity in line with our strategy.

**Markets**

The markets for our products are cyclical, with demand and pricing significantly affected by supply and demand dynamics, customer inventory levels and changes in the world economy. Prices also vary significantly by geographic region and product. Coated woodfree paper, our core product used for many types of publications, is susceptible to the highly cyclical advertising market, a major driver in our business.

***Coated Woodfree Paper***

Demand for coated woodfree paper is heavily dependent on global economic growth. The slowdown in the global economy at the end of 2008 through most of 2010 meant demand for our products was lower than in previous years, where the global economy enjoyed stable growth. During calendar 2011 and 2012, demand for coated woodfree paper declined in mature markets, but grew in emerging markets, which we believe, also reflects longer-term demand trends. Overall, there was an increase in global demand of 0.8% when compared to the previous year.

The global demand to capacity ratio for coated woodfree paper averaged 94% through fiscal 2008, but declined to approximately 82% in fiscal 2009 due to the slowdown in the global economy. The demand to capacity ratio rose to approximately 90% in 2010 as global economic conditions improved in our major markets and capacity curtailments were implemented. No increases in industry capacity in Europe and North America were discernible during this period, with companies reluctant to undertake major new capital projects in these regions due to the poor returns being achieved. Despite global overcapacity, high Asian demand and growth rates and availability of funding led to significant coated woodfree paper capacity additions between fiscal 2000 and fiscal 2011 in Asia, particularly in China.

Table of Contents

Over 1 million tons of coated woodfree capacity was added in 2011, and another 1 million tons was added in 2012. The effect of this additional capacity was only partially mitigated by coated woodfree capacity closures around the world, particularly in Europe. The additional capacity, coupled with flat demand, led the demand to capacity ratio to decline to approximately 87% in fiscal 2012.

Apparent consumption is consumption as indicated by mill sales volumes, which ignores the impact of customer inventory and the reclassification of imports. The sales volume to customers is used as the indicator of demand, with the difference between apparent and real demand being the movement in inventories.

United States shipments by domestic producers grew by 15% in fiscal 2010 from the low levels experienced in the previous year brought on by the global economic recession. However, with the emergence of the sovereign debt crisis, growth rates declined in 2011 and shipments shrunk by 3% during fiscal 2011 compared to fiscal 2010. Shipments for coated woodfree paper declined in North America during fiscal 2012 compared to the previous financial year by approximately 2%. Average coated woodfree paper prices in North America fell by US\$5 per ton during fiscal 2012 compared to fiscal 2011 in the grade that represents the largest end use of coated woodfree paper (No. 3 60lb rolls).

Demand in Europe for coated woodfree paper grew 1% during fiscal 2010 compared to fiscal 2009. During fiscal 2011, demand fell 6% when compared to fiscal 2010 as a result of sovereign debt issues combined with competition for advertising spend with electronic media. Due to global overcapacity and low demand for coated woodfree paper, manufacturers announced closures of approximately 1.7 million tons of coated woodfree paper capacity in 2008 and 2009. In 2011, a major producer announced the closure of 1.3 million tons of coated paper in Europe, including approximately 800,000 tons of coated paper. In addition during fiscal 2012, approximately 600,000 tons of coated paper capacity was closed. Declines in capacity have kept the supply to demand balance in Europe at approximately 90% over the last two fiscal years.

The graph below reflects apparent consumption for the United States and Europe.

Table of Contents

The price history for benchmark coated woodfree grades in the United States and Europe is shown in the following chart:

---

Source:

RISI (Resource Information System Inc)

Prices are list prices. Actual transaction prices could differ.

*Coated Woodfree Paper North America:*

The average sales prices achieved by Sappi Fine Paper North America fell by approximately 3% in fiscal 2012 when compared to fiscal 2011. Average prices achieved for coated paper decreased by 2% compared to the last fiscal year, whereas average prices achieved for market pulp were down approximately 13% from fiscal 2011.

In October 2010, the US International Trade Commission determined that imports of coated paper from China and Indonesia threatened material injury to US producers and workers. The decision allowed the US Department of Commerce to impose duties on coated paper arriving in the US from China, ranging from 27.1% to 338.7% and for imports arriving from Indonesia, at 38%. These duties are expected to remain in effect for five years from November 2010, although due to various administrative reviews and appeals, there can be no guarantee that the duties will not be eliminated or reduced prior to that time.

*Coated Woodfree Paper Europe:*

In fiscal 2012, the average price realized for our European products decreased by €4 per ton compared to fiscal 2011. Prices for coated woodfree paper in Europe fell in the early part of the fiscal year and stayed at these levels for the remainder of the fiscal year. Sales prices in Europe are impacted by the movement in the US\$ / euro exchange rate, as explained in detail in the analysis of sales by region contained in "Operating Results - Sales".

Table of Contents

*Coated Mechanical Paper Europe:*

The average price realized for our coated mechanical products in fiscal 2012 was 2% higher than the average price realized during the 2011 financial year due to capacity cuts by other coated mechanical paper producers. Although prices were up from last year, European shipments of coated mechanical paper were down approximately 6% from fiscal 2011.

Sales prices in Europe are impacted by the movement in the US\$ / euro exchange rate, as explained in detail in the analysis of sales development by region contained in " Operating Results Sales".

***Pulp***

NBSK pulp prices peaked in June 2011 but began falling as worldwide economic conditions became increasingly uncertain due to the European Union sovereign debt crisis. Average PIX NBSK prices fell by approximately US\$140 per ton, or 14%, during fiscal 2012 due to lower demand for printing and writing papers around the world.

Since we sell roughly as much pulp as we purchase, fluctuations in market pulp prices have a marginal direct impact on our overall profitability. However, at a divisional level, pulp prices do affect the profitability of our divisions as Sappi Fine Paper Europe is a net buyer of pulp and Sappi Southern Africa and Sappi Fine Paper North America are net sellers of pulp.

The price of NBSK and Bleached Hardwood Kraft Pulp (BHKP) is depicted in the following chart:

---

Source:

PIX (Index from FOEX Indexes Ltd)

Dissolving wood pulp accounts for the majority of our third-party pulp sales. The dissolving wood pulp produced at our Saiccor Mill in South Africa is used principally as an input in the production of various textile fibers, non-woven fibers, microcrystalline cellulose for the food and pharmaceutical industries, film, ethers and Cellulose Microcrystalline's ("CMC") for a range of household as well as mining products, and a

number of other application areas. Sappi is not currently active in the acetate

Table of Contents

segment primarily due to production constraints at the Saiccor Mill, coupled with strong demand from its other segments.

In fiscal 2011, we announced the conversion of the pulp mills at our Cloquet Mill and our Ngodwana Mill to manufacture dissolving wood pulp instead of paper pulp. We plan to sell these volumes primarily into the commodity VSF and Lyocell production markets as a significant portion of the expected output is being contracted with key customers in those segments.

The price of dissolving wood pulp grades made by Sappi is linked to the price of NBSK. The higher technical grade specification of dissolving wood pulp allows dissolving wood pulp to trade at a premium to the listed NBSK price.

European NBSK prices in US dollar terms reached a high point of US\$1,023 per metric ton in June 2011 before retreating steadily to reach a low of US\$762 per metric ton by the end of September 2012. Spot prices for dissolving pulp reached record highs at the beginning of calendar 2011 but have since steadily declined as new supply entered the market.

Demand growth for dissolving wood pulps continues to be strong. After showing demand growth of approximately 6% in 2011, demand for dissolving wood pulp is forecast to show growth of 9% for the 2012 calendar year. Some impetus to growth is expected to be provided by the demand stimulus from significantly lower viscose staple fiber (VSF) prices.

The buoyant market conditions since 2010 and the concerns about shortages of cellulose fibers resulted in a spate of new capacity announcements both on the demand side (mainly VSF) as well as on the supply side (dissolving pulp). The capacity announcements on the supply side outstrip capacity announcements on the demand side by a significant margin. Approximately 700,000 tons per annum of new dissolving pulp capacity (excluding about 300,000 tons per annum of paper grade "extender" pulps) entered the market in calendar 2011 and was followed by a further approximately 1 million tons per annum in calendar 2012 with a further approximately 1 million tons per annum expected in 2013. Some of the most recent dissolving wood pulp capacity projects, excluding the Sappi mills, that have started up or which are about to start up include Cosmo Speciality Fibres (140,000 tons per annum), Fortress Paper (200,000 tons per annum), Sun Paper (200,000 tons per annum), Fujian (2 mills at 145,000 tons per annum), Södra (170,000 tons per annum), StoraEnso (160,000 tons per annum), Vida (30,000 tons per annum), Lee and Man (140,000 tons per annum), Paskov Biocel (240,000 tons per annum) and Hunan Juntai (300,000 tons per annum).

The Saiccor Mill operated at full capacity during the second half of fiscal 2009, and throughout the full 2010, 2011 (except for a three-week strike during July 2011) and fiscal 2012 years. Towards the end of calendar 2011, a number of viscose staple fiber producers, largely those purchasing dissolving wood pulp on a non-contract basis, began reducing their dissolving wood pulp order quantities as a result of weakening VSF demand, the introduction of new viscose capacity and the expectation that dissolving wood pulp prices would decrease as a result of the newly announced dissolving wood pulp capacity. However, Saiccor's order book remains full.

### **South African Economic and Political Environment**

Sappi Limited is a public company incorporated in South Africa. We have significant operations in South Africa, which accounted for 24% of our net sales in fiscal 2012, 25% of our net sales in fiscal 2011 and 24% of our net sales in fiscal 2010. See " Operating Results" for the proportion of South African operating profit to total profit.

South Africa features a highly developed, sophisticated "first world" infrastructure at the core of its economy. The South African economy grew by 3.1% in 2011. Econometrix, a provider of economic analysis and forecasting for the South African economy, forecasts the South African GDP to grow by 2.7% in calendar year 2012. South Africa's long-term foreign currency investment ratings have remained

Table of Contents

constant over the last calendar year. However, the outlook on South Africa's credit rating on its long-term debt was downgraded by Fitch credit rating agency in January 2012, from BBB+ to BBB, and in March 2012, Standard and Poor's credit rating agency put South African government debt on a "negative" credit watch from BBB+ to BBB. At the end of September 2012, Moody's downgraded the credit rating on South African government bonds from A3 to Baa1. This downgrade was deemed attributable in part to the turmoil on South African mines and the resultant implications for lower economic growth and associated growth in government revenues.

South Africa's long-term foreign currency investment ratings have remained constant over the last year. For information on South Africa's exchange control regime, see "Item 10 Additional Information Exchange Controls".

South Africa continues to face challenges in overcoming substantial differences in levels of economic and social development among its people. Access to land, poverty, unemployment, crime and a growing prevalence of HIV/AIDS are some of the social and economic factors that affect businesses operating in this country.

The Restitution of Land Rights Act (Act 22 of 1994), as amended, provides for the restoration of rights in land or other equitable redress to persons or communities dispossessed of their land rights after June 19, 1913 as a result of old laws or practices discriminating on the basis of race. The legislation empowers the Minister of Land Affairs to expropriate land in order to restore it to a successful claimant provided that there is just and equitable compensation to the owner of the land. Claims under the Act were required to be filed on or before December 31, 1998 and are presently being processed by the Commission on Restitution of Land Rights and adjudicated upon by the Land Court. This process is uncertain. As one of the largest land owners in South Africa, we anticipate that a substantial number of claims may affect land we own. The process of determining the extent of claims filed in respect of our land and the potential impact of these claims on our South African operations continues. There are currently 60 open land claims against us, of which 42 are in the province of Mpumalanga and 18 are in the province of KwaZulu-Natal. So far 23, of the claims in KwaZulu-Natal have been withdrawn as have 2 in Mpumalanga. Another 9 claims in KwaZulu-Natal are in the process of being settled. In addition, we have made an offer for the settlement of 4 further claims in KwaZulu-Natal and 21 claims in Mpumalanga. These settlements involve the sale of the portions of the land subject to the respective claims at prices to be agreed with the Commissioner on Restitution of Land Rights, alternatively the claimants have opted for payment of compensation from the Government in lieu of land. The remaining claims have not been finalized and are still under investigation by the Regional Land Claims Commissioner.

The southern African region has one of the highest infection rates of HIV/AIDS in the world. In 1992, we started a program to address the effects of HIV/AIDS and its impact on our employees and our business. Our aim is to ensure that our program prevents new infections and to treat the HIV/AIDS positive employees. The program places special emphasis on testing and counseling to ensure that staff are informed with regard to their HIV/AIDS status to enable them to make informed decisions as to their life choices. Since August 2002, our medical care for employees has included treatment to prevent mother to child transmission. Anti-retroviral treatment has been offered to HIV-infected permanent employees from the beginning of 2003. We have also extended our voluntary counseling and testing ("VCT") programs, and are offering a HIV test to every employee who visits the clinics for a medical examination.

The key components of Sappi's HIV/AIDS management program include health risk assessments and counseling services. The health risk assessment mechanism assesses the health risk levels among our employees, and channels the high risk individuals into various managed programs. Sappi has now reached a position where more than 50% of our southern African employees check their HIV status every year. Regular voluntary counseling and testing ("VCT") ensures that we achieve early diagnosis of HIV infection and timely access to care.

Table of Contents

The fifth anonymous voluntary prevalence comprehensive HIV study was conducted during 2012 in all of our southern African operations. Based on a participation rate of greater than 80%, at the locations tested, we estimate that the overall infection rate in our southern African operations has stabilized at approximately 14.9%, which compares favorably with the national average (19.2%). In response to these surveillance results, renewed focus has been placed on the HIV/AIDS management program so as to further contribute to the containment of the infection rate. We estimate that approximately 63% of our employees that are HIV/AIDS positive participate in our HIV/AIDS managed care programs, which is marginally less than the prior year's participation rate (64%). Furthermore, the impact of HIV/AIDS on a company is generally reflected in the mortality rate of its employees. Sappi Southern Africa's mortality rate has halved from a high of 1.12% in 2005 to a rate of 0.68% in fiscal 2012.

Each Sappi operation in southern Africa has also identified the relevant role players in their geographical area and is working with them on the implementation of a comprehensive HIV/AIDS program, eliminating duplication and making optimum use of relevant resources through private-public partnerships.

The government and organized business have taken a number of steps in recent years to increase the participation of Black people in the South African economy. To this end, the Employment Equity Act (No. 55 of 1998), the Skills Development Act (No. 97 of 1998) and the Preferential Procurement Policy Framework Act (No. 5 of 2000) were promulgated. The Broad-Based Black Economic Empowerment Act (No. 53 of 2003) ("BEE") has formalized the country's approach to distributing skills, employment and wealth more equitably between races and genders. BEE focuses on increasing equity ownership, management and control of businesses by Black people, and improving Black representation in all levels of employment. It also promotes the development of skills within a business, the nurturing of Black entrepreneurship through preferential procurement and enterprise development, and the uplifting of communities through social investment.

In February 2007, the BEE scorecard as set out in the Codes of Good Practice published by the Department of Trade and Industry was streamlined and simplified without affecting their intended objectives. Our South African businesses were evaluated by Empowerdex, an independent BEE certification agency, against the Department of Trade and Industry's generic BEE scorecard and we achieved a score of 41 points with an overall BEE status of a "level seven contributor" (B rating) and a preferential procurement recognition level of 50%. Preferential procurement is used to drive transformation throughout the South African economy in that many customers will only buy from high BEE scorecard suppliers to boost their own BEE scorecard ratings. In July 2009, Empowerdex undertook the second verification of our South African businesses' BEE scorecard, and we improved our rating to a score of 54 points and an overall BEE status of a "level six contributor" (BB rating) and a preferential procurement recognition level of 60%. The Forest Sector Charter was published in the Government Gazette in June 2009 as the "Forest Sector Code". This Charter applies to all enterprises involved with commercial forestry and the first level processing of wood products. Our South African businesses are signatories to this charter via their membership of both Forestry South Africa ("FSA") and the Paper Making Association of South Africa ("PAMSA"). This charter sets the objectives and principles for BEE, and includes the scorecard and targets to be applied within the industry, as well as certain undertakings by the government and the private sector (or South African forestry companies) to assist the forestry industry to achieve its BEE targets. With effect from calendar 2010, our South African businesses were evaluated against the Forest Sector's BEE scorecard.

In June 2010, Sappi completed a BEE transaction whereby ordinary and "A" ordinary shares equivalent to 4.5% of Sappi Limited were issued to its strategic empowerment partners, and to various trusts for the benefit of its black managers, its employees and growers/communities in the geographic areas where Sappi's South African businesses have operations. The value of the BEE transaction (approximately ZAR814 million, US\$115 million) corresponds to an effective 30% interest in Sappi Southern Africa, which meets the requirements of Forest Sector Charter and BEE legislation in general.

Table of Contents

For further information on the BEE transaction, see "Item 7 Major Shareholders and Related Party Transactions Related Party Transactions".

In September 2010, Empowerdex verified the South African businesses against the Forestry Sector's BEE scorecard for the first time, and we achieved a score of 75.2 points with an overall BEE status of a "level three contributor" and a preferential procurement recognition level of 110%. The latest Empowerdex verification of the South African businesses against the Forestry Sector's BEE scorecard was in October 2011. We achieved a score of 74.5 which was marginally lower than the 2010 score, with an overall BEE status of a "level four contributor" and a preferential procurement recognition level of 100%. As a result, 100% of the value of all purchases from our South African businesses qualify as preferential procurement spend in a customer's BEE scorecard.

The representation of Black people, particularly Black women, in management and all levels of employment within the company is a focus within the organization, driven by employment equity targets set in each occupational category. Skills development initiatives, particularly programs aimed at improving management and leadership skills, are geared to meet these targets. Where practical, we purchase goods and services from Black-owned businesses and seek opportunities to develop future Black vendors. We are committed to the support of our Project Grow, which is an initiative with local communities using their land for plantations while training them in the core principles of forestry management. This is achieved through financial and technical input, as well as by providing a secure market during the start-up phase of these small tree farming enterprises. This initiative has been extended to encourage aspirant tree farmers who wish to undertake forestry activities on a larger scale consistent with the government's strategy of promoting forestry as a means of sustainable livelihood in rural areas. We have a number of enterprise development initiatives and have established programs to train new entrepreneurs. These initiatives involve the transfer of business skills, technical assistance, financial support and preferential payment terms to assist new enterprises to enter the market. We have a history of investment in the communities in which we operate. Initiatives to promote education, health and welfare, arts and culture, and rural and community development, amongst others, are regularly undertaken.

The South African constitution guarantees ownership rights of assets, and it is the stated intent of the constitution that transfer of ownership will occur at market prices. It should be noted that BEE equity participation need not necessarily occur at the corporate level, and can be effected at divisional, business unit or lower levels. Because the BEE Act sets forth a framework for plans rather than specific requirements or goals, it is not possible to predict whether or how our business or assets may be impacted.

For further information, see "Item 4 Information on the Company History and Development of the Company" and "Item 3 Key Information Risk Factors".

**Environmental Matters**

We operate in an industry subject to extensive environmental regulations. Typically, we do not separately account for environmental operating expenses. We do not anticipate any material expenditures related to environmental matters in the future. We separately account for environmental capital expenditures. See note 32 to our group Annual Financial Statements included elsewhere in this Annual Report for a discussion of these matters.

For further information, see "Item 4 Information on the Company Environmental and Safety Matters".

Table of Contents

**Operating Results**

**Financial Condition and Results of Operations**

The operations of the group are organized into the following three reportable segments: (for a more detailed description of the operations of the group, see "Item 4 Information on the Company Business Overview"):

Sappi Fine Paper North America

Sappi Fine Paper Europe

Sappi Southern Africa

The Sappi Fine Paper business comprises the two reportable segments, Sappi Fine Paper North America and Sappi Fine Paper Europe.

The Sappi Southern Africa reportable segment includes the following divisions: Sappi Paper and Paper Packaging, Sappi Specialised Cellulose (previously known as Sappi Chemical Cellulose), and Sappi Forests. Sappi Paper and Paper Packaging consists of two fine paper mills, three packaging paper mills and the Sappi ReFibre operation. The volume, revenue and cost relationship within the Sappi Forests business is substantially different to that of the paper and dissolving wood pulp businesses which form a part of this segment.

Profit or losses from investments in equity accounted associates and joint ventures not accounted for in our reportable segments and costs related to our Corporate Head Office, the group's treasury operations and non-manufacturing entities which form part of the Sappi group are not included in the reportable segments mentioned above, and are disclosed as Unallocated and eliminations in our segmental reporting.

The analysis and discussion which follows should be read in conjunction with our group Annual Financial Statements included elsewhere in this Annual Report.

The key indicators of the group's operating performance include sales, operating profit and operating profit excluding special items. Operating profit represents sales after operating expenses, which are comprised of cost of sales, selling, general and administrative expenses, other operating expenses or income and share of profit or loss from associates and joint ventures. As described in more detail in the discussion and analysis which follows, the key components of the group's operating expenses can be characterized as variable costs (primarily variable manufacturing costs) or fixed costs (the fixed cost components of cost of sales and selling, general and administrative expenses).

*Cost of sales* is comprised of:

variable costs, which include raw materials and other direct input costs, including:

wood;

energy;

chemicals;

pulp;

delivery charges; and

other variable costs;

fixed costs, which include:

employment costs allocated to cost of sales;

depreciation expense allocated to cost of sales;

maintenance;

Table of Contents

fair value adjustment on plantations, representing an accounting fair value adjustment of the timber assets of the Sappi Forests operation, which is mainly impacted by timber selling prices, costs associated with standing timber values, costs of harvesting and delivery, the estimated growth rate or annual volume changes in the plantations and discount rates applied; and

other overheads.

*Selling, general and administrative expenses* are comprised of:

employment costs not allocated to cost of sales;

depreciation expense not allocated to cost of sales;

marketing and selling expenses; and

administrative and general expenses.

*Other operating expenses (income)* are comprised of:

net asset impairments and (reversals);

(profit) loss on sale and write-off of non-current assets;

BEE charges;

restructuring provisions raised (released) and closure costs; and

alternative fuel mixture tax credits in the United States.

***Overview***

This overview of the group's operating results is intended to provide context to the discussion and analysis which follow. General trends are being highlighted here, with a detailed discussion and analysis in separate sections below.

Comparisons between our results for fiscal 2012 and fiscal 2011 are affected by the fact that our 2011 fiscal year consisted of 53 accounting weeks compared to our 2012 fiscal year, which consisted of 52 accounting weeks. Our normal financial year has 364 days which causes this "lost accounting week" to build up over a period of six years. The net impact of the additional week in fiscal 2011 on operating profit excluding special items was a positive US\$8 million (assuming a pro-rata accumulation of operating profit excluding special items over the relevant period).

The key indicators of the group's operating performance are:

**Key figures**

**2012    2011    2010**  
**US\$ million (except for**  
**share amounts)**

**Special items for the group in fiscal 2012, fiscal 2011 and fiscal 2010 are generally summarized below:**

**Plantation price fair value adjustment loss (gain):** This relates to International Accounting Standard 41 (IAS 41) fair value adjustment of the timber assets of Sappi Forests and Usutu Forests. This fair value adjustment is mainly impacted by timber selling prices, cost associated with standing timber values and harvesting and delivery, and discount rates as applied in valuing plantation assets. The parameters applied are all market related. The impact on operating profit was a negative US\$15 million in fiscal 2012, a negative US\$16 million in fiscal 2011 and a positive US\$31 million in fiscal 2010. For further information see "Critical Accounting Policies and Estimates".

**Restructuring provisions (reversed) raised:** In fiscal 2012 operating profit was positively impacted by the release of net restructuring charges of US\$2 million as a result of restructuring charges of US\$5 million in Europe offset by the release of US\$7 million from a restructuring provision held in South Africa. In fiscal 2011 operating profit was negatively affected by restructuring charges of US\$135 million related to mill closures and other restructuring actions mainly in our European business (US\$89 million) and our southern African business (US\$45 million). In fiscal 2010 operating profit was negatively impacted by restructuring charges of US\$46 million, which related to the closure of the Usutu Mill in southern Africa and the Kangas Mill in Europe.

**Impairments (reversals) of assets and investments:** In fiscal 2012 operating profit was negatively impacted by asset impairments of US\$10 million comprised of US\$9 million related to the mothballing of the sackkraft paper machine at our Tugela Mill in South Africa and US\$1 million related to the Stockstadt Mill in Europe. In fiscal 2011 operating profit was negatively impacted by asset and investment impairments of US\$167 million which included US\$56 million related to the closure of our Biberist Mill in Europe, US\$10 million related to the closure of our Adamas Mill in South Africa, US\$58 million related to asset impairments in our southern African Paper and Paper Packaging business, where production was curtailed, and US\$45 million impairment of part of our investment in equity accounted associates and joint ventures. In fiscal 2010 operating profit was positively impacted by asset impairment reversals of US\$10 million, which comprised the reversal of a portion of the fiscal 2009 impairment of the coated mechanical paper business in Europe that had negatively impacted operating profit in that year by US\$74 million.

**Alternative fuel mixture tax credits:** The U.S. Internal Revenue Code allowed an excise tax credit to taxpayers for the use of alternative fuel mixtures. In 2009 we began to use an alternative fuel mixture containing diesel fuel and "black liquor", a by-product of pulp production, at our Somerset and Cloquet

Table of Contents

Mills. During the second calendar quarter of 2009, we were approved by the IRS as an alternative fuel producer. The tax credit expired on December 31, 2009.

The Company filed claims for alternative fuel mixture credits covering eligible periods subsequent to February 2009 totaling US\$51 million and US\$87 million in fiscal 2009 and 2010 respectively, net of fees and expenses and has reflected such amounts in the accompanying group income statement in "Other operating expenses (income)". Cash received, net of fees and expenses paid by the company during fiscal 2010 totaled US\$73 million. No receivables related to alternative fuel mixture credits were outstanding at the end of fiscal 2010. The Company considers the tax credits earned in fiscal 2010 as fully taxable and treated them as such in the calculation of its tax provision in the group Annual Financial Statements.

On October 15, 2010, the IRS issued additional guidance on this topic, indicating that a taxpayer who received cash refunds under the alternative fuel tax program, can also receive the tax credit under the Cellulosic Biofuel Producer Credit ("CBPC") on those black liquor volumes for which it had not previously collected the cash refund. The company can make this election to file for the CBPC tax credits through fiscal 2013.

**BEE transaction charges:** Charges related to a BEE transaction completed during fiscal 2010 amounted to US\$3 million in fiscal 2012, US\$5 million in fiscal 2011 and US\$23 million in fiscal 2010. This transaction is explained in more detail in the section titled " South African Economic and Political Environment" above and in Item 7 " Major Shareholders and Related Party Transactions".

**Fire, flood, storm and related events:** Fiscal 2012 operating profit was negatively impacted by fire and flood damage to the amount of US\$19 million, comprised of fire damage at the Nijmegen Mill and the Usutu plantations of US\$4 million each and flood damage at the Cloquet Mill of US\$9 million. During fiscal 2011 operating profit was positively impacted by an insurance recovery of US\$10 million related to the fire in the Stockstadt Mill in Europe which occurred during fiscal 2010. The insurance recovery was offset by costs incurred in fiscal 2011 related to the same fire.

During fiscal 2010 operating profit was negatively impacted by a fire in our Stockstadt Mill in Europe (US\$21 million) and storm damage to various southern African business units (US\$5 million).

**Profit on disposal of associates and joint ventures:** In fiscal 2012 operating profit was positively impacted by profit of US\$11 million on disposal of our 34% stake in the Jiangxi Joint Venture (including the impact of releasing a foreign currency translation reserve).

**Profit on disposal of non-current assets:** In fiscal 2012 operating profit was positively impacted by profit on disposal of non-current assets of US\$52 million. The profit realized on the sale of the Biberist Mill assets was US\$45 million and a US\$7 million profit realized on the sale of various smaller assets by our European and southern African businesses. The US\$1 million profit realized on the sale of assets in fiscal 2011 was the net result of asset sales throughout the group. The US\$5 million profit realized on the sale of assets in fiscal 2010 was the net result of asset sales by our European and North American businesses.

**Group**

*Comparing fiscal 2012 with fiscal 2011*

Operating profit increased to US\$421 million in fiscal 2012 from US\$86 million in fiscal 2011.

Operating profit in fiscal 2012 was positively affected by net special items of US\$18 million compared to a negative impact of net special items in fiscal 2011 of US\$318 million. The major special items in fiscal 2012 were an unfavorable plantation fair value price adjustment (US\$15 million), profit

Table of Contents

realized on the sale of non-current assets (US\$52 million), profit on the sale of an investment (US\$11 million), asset impairments (US\$10 million) and fire and flood damage (US\$19 million).

Operating profit excluding special items decreased slightly in fiscal 2012 to US\$403 million from US\$404 million during fiscal 2011.

*Comparing fiscal 2011 with fiscal 2010*

Operating profit declined to US\$86 million in fiscal 2011 from US\$341 million in fiscal 2010.

Operating profit in fiscal 2011 was negatively affected by net special items of US\$318 million compared to a positive impact of net special items in fiscal 2010 of US\$2 million. The major special items in fiscal 2011 consisted of an unfavorable plantation fair value price adjustment (US\$16 million), restructuring charges (US\$135 million) and asset impairments (US\$167 million).

Operating profit excluding special items increased in fiscal 2011 to US\$404 million from US\$339 million in fiscal 2010. This significant improvement was mainly due to increased demand in sales volumes and increased average selling prices for some of our major products.

<b>Segment operating profit excluding special items</b>	<b>94</b>	<b>129</b>	<b>124</b>

*Comparing fiscal 2012 with fiscal 2011*

Operating profit decreased from US\$136 million in fiscal 2011 to US\$87 million in fiscal 2012.

The operating profit for fiscal 2012 included unfavorable special items of US\$7 million as shown in the table above, which included flood damage at the Cloquet Mill of US\$9 million.

Operating profit excluding special items decreased to US\$94 million in fiscal 2012 from US\$129 million in fiscal 2011. This decrease was mainly due to decreased average pulp selling prices and lower sales of specialties products.

*Comparing fiscal 2011 with fiscal 2010*

Operating profit decreased from US\$180 million in fiscal 2010 to US\$136 million in fiscal 2011.

The operating profit for fiscal 2011 included favorable special items of US\$7 million as shown in the table above.

Operating profit excluding special items improved to US\$129 million in fiscal 2011 from US\$124 million in fiscal 2010. This improvement was mainly due to increased sales volumes and increased average selling prices partially offset by increased manufacturing costs.

Table of Contents*Sappi Fine Paper Europe**Key figures:*

	2012	2011	2010
	(US\$ million)		
Segment operating profit (loss)	178	(71)	72

*Comparing fiscal 2012 with fiscal 2011*

Operating profit improved from a loss of US\$71 million in fiscal 2011 to an operating profit of US\$178 million in fiscal 2012.

The operating profit for fiscal 2012 included favorable special items of US\$45 million which was comprised mainly of the profit on the sale of the Biberist Mill property.

Operating profit excluding special items increased to US\$133 million in fiscal 2012 from an operating profit excluding special items in fiscal 2011 of US\$68 million. This improvement was mainly due to a reduction in raw material input prices, compared to fiscal 2011, and successful cost savings initiatives.

*Comparing fiscal 2011 with fiscal 2010*

Operating profit declined from a profit of US\$72 million in fiscal 2010 to an operating loss of US\$71 million in fiscal 2011.

The operating loss for fiscal 2011 included unfavorable special items of US\$139 million which included asset impairments related to the closure of the Biberist Mill and restructuring charges (US\$89 million) partially offset by insurance recoveries (US\$11 million).

Operating profit excluding special items decreased to US\$68 million in fiscal 2011 from an operating profit excluding special items in fiscal 2010 of US\$76 million. This decline was due to increased input cost pressure and competition in all our major markets.

*Sappi Southern Africa**Key figures:*

	2012	2011	2010

<b>Segment operating profit excluding special items</b>	<b>178</b>	<b>199</b>	<b>134</b>

Table of Contents

*Comparing fiscal 2012 with fiscal 2011*

Operating profit increased from US\$63 million in fiscal 2011 to US\$153 million in fiscal 2012.

The operating profit for fiscal 2012 included unfavorable special items of US\$25 million which consisted mainly of an unfavorable plantation price fair value adjustment (US\$15 million), asset impairment (US\$9 million), fire, flood and storm related events (US\$6 million) partially offset by a release of restructuring provision of US\$7 million. The asset impairment of US\$9 million related to the mothballing of a machine at our Tugela Mill.

Operating profit excluding special items increased to US\$178 million in fiscal 2012 from an operating profit excluding special items in fiscal 2011 of US\$199 million. This decrease was mainly due to decreased selling prices in our dissolving wood pulp business partially offset by the weakening of the exchange rate of the ZAR against the US dollar in fiscal 2012 and decreased fixed costs compared to fiscal 2011. In fiscal 2012, all of the operating profits excluding special items of Sappi Southern Africa were generated by our Saiccor Mill, with the paper and paper packaging business making a loss.

*Comparing fiscal 2011 with fiscal 2010*

Operating profit decreased from a profit of US\$112 million in fiscal 2010 to an operating profit of US\$63 million in fiscal 2011.

The operating profit for fiscal 2011 included unfavorable net special items of US\$136 million which consisted mainly of an unfavorable plantation price fair value adjustment (US\$16 million), asset impairments (US\$68 million) and restructuring charges (US\$45 million). The asset impairments included US\$10 million related to the closure of our Adamas Mill and US\$49 million related to impairments of assets in our paper and paper packaging business where we have decided to cease production of certain products. The restructuring charges relate to our revised strategy for our South African paper and paper packaging business.

Operating profit excluding special items improved to US\$199 million in fiscal 2011 from an operating profit excluding special items in fiscal 2010 of US\$134 million. This significant improvement was mainly due to increased sales volumes and average selling prices in our Specialised Cellulose Business partially offset by increased variable input cost per ton and increased fixed costs for the southern African business as a whole. In fiscal 2011, all of the operating profits excluding special items of Sappi Southern Africa were generated by our Saiccor Mill, with the paper and paper packaging business making a loss.

Table of Contents

Movements in the sales, variable cost and fixed cost components of operating profit are explained below.

*Sales**Group*

An analysis of sales movements in fiscal 2012 and 2011 is presented below:

Sales Volume	2012	Change	2011	Change	2010	2010

The main factors impacting sales are volume, price, product sales mix and currency exchange rate movements. The South African and European businesses transact in ZAR and euro respectively, but the results of their operations are translated into US dollars for reporting purposes. The movement in the exchange rate from local currency to US dollars during the periods of high volatility significantly impacts reported results from one period to the next. Movements in exchange rates impacted sales negatively by US\$494 million in fiscal 2012 and positively by US\$210 million in fiscal 2011. An analysis of the drivers of sales movements is presented below:

Sales Value Variance Analysis	2012 vs.	2011 vs.
	2011	2010
(US\$ million)		
Exchange rate effects	(494)	210
Volume change effects	(178)	3
Price and product mix effects	(267)	501
<b>Total</b>	<b>(939)</b>	<b>714</b>

Table of Contents

*Exchange rate effects*

The translation of our annual results into our reporting currency (US dollar) from local currencies tends to distort comparisons between fiscal periods due to the volatility of currency exchange rates. On average, the euro weakened by 7% against the US dollar in fiscal 2012 compared to fiscal 2011. The Rand weakened in fiscal 2012 to an average level against the US dollar of ZAR8.05, 16% weaker than fiscal 2011 average levels, and weakened to a closing rate of ZAR8.31/US\$ at the end of fiscal 2012, approximately 2% weaker than the closing rate of fiscal 2011. The impact, compared to the respective prior fiscal year, of currency movements on reported sales in US dollars was to decrease fiscal 2012 reported sales by US\$494 million, to increase fiscal 2011 reported sales by US\$210 million and to decrease fiscal 2010 reported sales by US\$263 million.

*Comparing fiscal 2012 sales with fiscal 2011 sales*

Sales for fiscal 2012 were US\$6,347 million, a decrease of 13% compared to fiscal 2011. This decrease was primarily driven by exchange rate effects, decreased average selling prices in US dollar terms and reduced sales volumes.

Average selling prices realized by the group in fiscal 2012 were 11% lower in US dollar terms than the average selling prices realized in fiscal 2011, as a result of a decrease in pulp selling prices and decreased average coated paper selling prices in our European and North American businesses. The average world benchmark NBSK pulp price, which sets the base for our dissolving wood pulp selling prices, decreased by 14% in fiscal 2012 compared to fiscal 2011.

In fiscal 2012, sales volume for the group was 2% lower than the sales volume achieved in fiscal 2011.

*Comparing fiscal 2011 sales with fiscal 2010 sales*

Sales for fiscal 2011 were US\$7,286 million, an increase of 11% compared to fiscal 2010. This increase was primarily driven by increased average selling prices and improved product sales mix in the paper and pulp businesses. Sales in fiscal 2011 also included a positive currency translation impact of US\$210 million.

Average selling prices realized by the group in fiscal 2011 were 11% higher in US dollar terms than the average selling prices realized in fiscal 2010, as a result of an increase in pulp selling prices and increased average coated paper prices in our European and North American businesses. The average world benchmark NBSK pulp price increased by 11% in fiscal 2011 compared to fiscal 2010.

In fiscal 2011, sales volume for the group was almost equal to the sales volume in fiscal 2010.

***Sappi Fine Paper North America***

*Comparing fiscal 2012 sales with fiscal 2011 sales*

Sales decreased by 5% from US\$1,520 million in fiscal 2011 to US\$1,438 million in fiscal 2012. Sappi Fine Paper North America's sales volumes decreased by 3% when compared to fiscal 2011 mainly as a result of weaker demand for market pulp and specialties paper. Average selling prices realized in fiscal 2012 of US\$1,027/ton were 3% lower than the US\$1,058/ton achieved in fiscal 2011 mainly due to a 13% decrease in the average selling prices of market pulp.

*Comparing fiscal 2011 sales with fiscal 2010 sales*

Sales increased by 11% from US\$1,373 million in fiscal 2010 to US\$1,520 million in fiscal 2011. Sappi Fine Paper North America's sales volumes increased by 6% when compared to fiscal 2010 as a result of improved demand for market pulp and increased coated paper sales, despite a weaker demand in that market. Average selling prices realized in fiscal 2011 of US\$1,058/ton were 4% higher than the US\$1,014/ton achieved in fiscal 2010.

Table of Contents

***Sappi Fine Paper Europe***

*Comparing fiscal 2012 sales with fiscal 2011 sales*

Sappi Fine Paper Europe experienced difficult market conditions during fiscal 2012 exacerbated by a deteriorating economic environment which had a negative impact on volumes and sales prices. Sales volumes decreased by 9% from fiscal 2011 due to lower sales of all our major products and the closure of our Biberist Mill in August 2011.

Our average selling prices realized in euro terms decreased by 1% from €739 per ton in fiscal 2011 to €735 per ton in fiscal 2012. Average selling prices per ton realized in US dollar terms decreased, from US\$1,031 in fiscal 2011 to US\$955 in fiscal 2012.

*Comparing fiscal 2011 sales with fiscal 2010 sales*

Sappi Fine Paper Europe experienced strengthening market conditions during the first half of fiscal 2011. The second half of fiscal 2011 was however affected by a deteriorating economic environment which had a negative impact on volumes and sales prices. Overall sales volumes ended fiscal 2011 in-line with fiscal 2010.

Although our average selling prices realized in euro and US dollar terms increased from €702 (US\$958) per ton in fiscal 2010 to €739 (US\$1,031) per ton in fiscal 2011, average selling prices realized during the last fiscal quarter of 2011 were below the average for fiscal 2011.

***Sappi Southern Africa***

*Comparing fiscal 2012 sales with fiscal 2011 sales*

Sales from the southern African pulp and paper operations (consisting of the Specialised Cellulose and Paper and Paper Packaging Businesses) decreased by 14% in US dollar terms or 1% in Rand terms in fiscal 2012 (US\$1,475 million; ZAR11,878 million) compared to fiscal 2011 (US\$1,721 million; ZAR11,974 million). The larger decrease in sales in US dollar terms was due to the difference in average exchange rates used to translate Rand sales to US dollar in fiscal 2011 (ZAR/US\$: 6.96) and 2012 (ZAR/US\$: 8.05).

Demand for dissolving wood pulp was strong in fiscal 2012 resulting in a 2% increase in the sales volume of the Sappi Specialised Cellulose business compared to fiscal 2011. The sales volumes for the Sappi Paper and Paper Packaging business declined by 4% compared to fiscal 2011, due to weak market conditions for packaging and graphic paper products exacerbated by strong competition from imported products.

A major determinant of sales pricing in the Specialised Cellulose Business is the NBSK pulp market price. During fiscal 2012, the average NBSK pulp price decreased by 14% from an average of US\$978/ton in fiscal 2011 to an average of US\$838/ton in fiscal 2012. During fiscal 2012, our average dissolving wood pulp selling prices in US dollar terms decreased by 15% compared to fiscal 2011, but decreased by only 2% in Rand terms due to the weakening of the Rand against the US dollar during fiscal 2012.

Average selling prices realized in fiscal 2012 in the Sappi Paper and Paper Packaging business increased by 2% in Rand terms and, due to the weakening of the Rand against the US dollar, decreased by 12% in US dollar terms compared to fiscal 2011. The increase in Rand selling prices resulted from a combination of an improved sales mix of higher priced products and price increases achieved for certain major products.

Sales of our Sappi Forests business increased by 5% in US dollar terms or 22% in Rand terms in fiscal 2012 (US\$84 million; ZAR676 million) compared to fiscal 2011 (US\$80 million; ZAR557 million).

Table of Contents

The sales volumes of the Sappi Forests business increased by 22% in fiscal 2012 compared to fiscal 2011 due to higher sawlog sales and additional local sales contracts coming into force during the 2012 fiscal year.

*Comparing fiscal 2011 sales with fiscal 2010 sales*

Sales from the southern African pulp and paper operations (consisting of the Specialised Cellulose and Paper and Paper Packaging Businesses) increased by 16% in US dollar terms or 7% in Rand terms in fiscal 2011 (US\$1,721 million; ZAR11,974 million) compared to fiscal 2010 (US\$1,488 million; ZAR11,148 million). The higher increase in sales in US dollar terms was largely due to the difference in average exchange rates used to translate Rand sales to US dollar in fiscal 2010 (ZAR/US\$: 7.49) and 2011 (ZAR/US\$: 6.96).

Sales volumes for the southern African pulp and paper operations decreased by 3% in fiscal 2011 compared to fiscal 2010. Demand for dissolving wood pulp was extremely strong in fiscal 2011 as reflected in the sales volume for the Sappi Specialised Cellulose business which increased by 9% compared to fiscal 2010. The sales volumes for the Sappi Paper and Paper Packaging business declined by 10% compared to fiscal 2010, due to weak market conditions and strong competition from imported products due to the strengthening of the Rand against the US dollar during fiscal 2011.

A major determinant of sales pricing in our Specialised Cellulose Business is the NBSK pulp market price. During fiscal 2011, the average NBSK pulp price increased by 11% from an average of US\$885/ton in fiscal 2010 to an average of US\$978/ton in fiscal 2011. During fiscal 2011, our average dissolving wood pulp selling prices in US dollar terms increased by 21% compared to fiscal 2010, but increased by only 12% in Rand terms due to the strengthening of the Rand against the US dollar during fiscal 2011.

Average selling prices realized in the Sappi Paper and Paper Packaging business increased by 14% in US dollar terms and by 6% in Rand terms compared to fiscal 2010.

Sales of our Sappi Forests business increased by 10% in US dollar terms or 2% in Rand terms in fiscal 2011 (US\$80 million; ZAR557 million) compared to fiscal 2010 (US\$73 million; ZAR547 million). The sales volumes of the Sappi Forests business decreased by 8% in fiscal 2011 compared to fiscal 2010. Average selling prices of timber, in Rand terms, increased by 9% in fiscal 2011 compared to fiscal 2010 due to decreased timber availability.

**Operating expenses**

In the analyses which follow, cost per ton has been based on sales tons. An analysis of the group operating expenses is as follows:

Operating Expenses	2012	Change	Change	2011	2010
		2012 vs.	2011 vs.		
		2011	2010		
	(US\$ million)				
<b>Variable costs</b>					
Delivery	526	(71)	597	50	547
Manufacturing	3,393	(569)	3,962	501	3,461
<b>Total variable costs</b>	<b>3,919</b>	<b>(640)</b>	<b>4,559</b>	<b>551</b>	<b>4,008</b>

<b>Total</b>	<b>5,926</b>	<b>(1,274)</b>	<b>7,200</b>	<b>969</b>	<b>6,231</b>

See " Operating Results" for a discussion on special items.

Table of Contents

Variable and fixed costs are analyzed in more detail below.

***Variable manufacturing costs*****Group**

The table below sets out the major components of the group's variable manufacturing costs.

Variable manufacturing costs	2012		2011		2010			
	Costs	Change 2012 US\$/ Ton	vs. 2011	Costs	Change 2011 US\$/ Ton	vs. 2010	Costs	US\$/ Ton
	(US\$ million)							
Wood	723	94	(50)	773	98	149	624	79
Energy	565	73	(105)	670	85	59	611	77
Pulp <sup>(1)</sup>	753	98	(234)	987	125	80	907	115
Chemicals	1,028	133	(89)	1,117	141	92	1,025	130
Other costs	324	42	(91)	415	53	121	294	37
<b>Total</b>	<b>3,393</b>	<b>440</b>	<b>(569)</b>	<b>3,962</b>	<b>502</b>	<b>501</b>	<b>3,461</b>	<b>438</b>

(1)

Pulp includes only bought-in fully bleached hardwood and softwood.

Variable manufacturing costs relate to costs of inputs which vary directly with output. The line "Other costs" in the table above relates to inputs such as water, fillers, bought-in pulp (other than fully bleached hardwood and softwood) and consumables. The group's variable costs are impacted by sales volume, exchange rate impacts on translation of our European and South African businesses into US dollars, and the underlying costs of inputs. The major contributors to variable cost movements at a group level have been the impact of the exchange rates on translation of the European and the South African operations into the US dollar presentation currency and actual input cost escalations. See "Principal Factors Impacting our Group Results Currency Fluctuations" for a discussion of exchange rate movements. Cost increases are largely driven by international commodity price increases.

Cost management is a major focus area for the group. The company has engaged in a number of cost reduction initiatives aimed at offsetting the impact of increases in input costs. These initiatives are aimed at improved procurement strategies, improvement of production processes and product re-engineering initiatives to reduce raw material input costs through substitution of high cost raw materials with low cost raw materials. Product design and raw material inputs are constantly reviewed to ensure that product attributes and quality meet market specifications.

***Sappi Fine Paper North America****Comparing fiscal 2012 operating expenses with fiscal 2011 operating expenses*

During fiscal 2012, our average variable manufacturing costs per ton was US\$526 compared to the cost per ton in fiscal 2011 of US\$527. Increases in wood and chemical input prices were offset by lower priced purchased pulp. Improved manufacturing processes and successful procurement initiatives have helped mitigate the input cost increases.

*Comparing fiscal 2011 operating expenses with fiscal 2010 operating expenses*

During fiscal 2011, variable manufacturing costs per ton increased by 9% from US\$482 per ton to US\$527 per ton in fiscal 2011. Wood, energy, pulp and chemical input prices were higher in fiscal 2011 compared to fiscal 2010, however many procurement and manufacturing initiatives have helped mitigate the input cost increases.

Table of Contents

***Sappi Fine Paper Europe***

*Comparing fiscal 2012 operating expenses with fiscal 2011 operating expenses*

Prices of all major raw materials, particularly pulp decreased compared to fiscal 2011. The average input prices of hardwood and softwood pulp, compared to fiscal 2011, decreased by 11% and 9% respectively. The business managed to keep energy costs per ton in-line with fiscal 2011 despite prices of energy increasing during the year, this was achieved by numerous small cost savings projects. Variable manufacturing costs per ton, in Euro terms, decreased by 6% from an average in fiscal 2011 of €449 to an average of €424 per ton in fiscal 2012. In addition to the benefit of reduced raw material prices, this significant reduction in variable manufacturing costs per ton can also be attributed to the cost reduction programme initiated during fiscal 2011. In US Dollar terms, variable manufacturing costs per ton decreased by 12% from fiscal 2011 to fiscal 2012 due to the weakening of the Euro to the US dollar during fiscal 2012.

*Comparing fiscal 2011 operating expenses with fiscal 2010 operating expenses*

Sappi Fine Paper Europe experienced significant variable manufacturing cost pressure during fiscal 2011. Variable manufacturing costs per ton in euro terms in fiscal 2011 increased from €410 to €449 or by 10% from fiscal 2010, mainly due to the increases in wood costs and the cost of fillers and consumables, including machine clothing. In US Dollar terms the increase in variable manufacturing costs per ton from fiscal 2010 to fiscal 2011 was 12%.

***Sappi Southern Africa***

The discussion below is focused on the variable manufacturing costs of the Sappi Southern African pulp and paper business and excludes sales volumes and variable costs of our Forestry business. The cost structure our Forestry business is significantly different from the pulp and paper manufacturing operations.

*Comparing fiscal 2012 operating expenses with fiscal 2011 operating expenses*

During fiscal 2012, variable manufacturing costs per ton in Rand terms increased by 7% compared to fiscal 2011. Compared to fiscal 2011, the pulp and paper business experienced sharp increases in the prices of raw materials and input costs, particularly for pulping chemicals and energy. Purchased electricity prices increased by approximately 15% compared to fiscal 2011. In US Dollar terms the variable manufacturing costs per ton decreased by 8% which reflects the different average exchange rates used for translation in fiscal 2012 (ZAR/US\$: 8.05) and in fiscal 2011 (ZAR/US\$: 6.96).

*Comparing fiscal 2011 operating expenses with fiscal 2010 operating expenses*

During fiscal 2011, variable manufacturing costs per ton in Rand terms increased by 12% compared to fiscal 2010 due to increases in the prices for all raw materials and energy, driven by increases in international commodity prices. In addition to increased input material prices, production costs were also negatively impacted by a three week industry-wide strike during the year. The 20% increase in US Dollar terms in input costs per ton reflects the different average exchange rates used for translation in fiscal 2011 (ZAR/US\$: 6.96) and in fiscal 2010 (ZAR/US\$: 7.49).

Table of Contents**Fixed costs****Group**

A summary of the group's major fixed cost components is as follows:

Fixed costs	2012	Change	2011	Change	2010
		2012 vs. 2011		2011 vs. 2010	
		(US\$ million)			
Personnel	1,098	(140)	1,238	62	1,176
Maintenance	253	(47)	300	25	275
Depreciation	367	(47)	414	3	411
Other	274	(70)	344	48	296
<b>Total</b>	<b>1,992</b>	<b>(304)</b>	<b>2,296</b>	<b>138</b>	<b>2,158</b>

The regional analysis which follows includes corporate fixed costs and consolidation adjustments which are reallocated to the regions and are not material.

***Sappi Fine Paper North America****Comparing fiscal 2012 fixed costs with fiscal 2011 fixed costs*

Fixed costs in fiscal 2012 decreased by US\$24 million or 5% from fiscal 2011 largely due to a reduction in personnel costs. Personnel costs decreased mainly due to a reduction in headcount and the fact that Sappi Fine Paper North America did not qualify for bonus payments in respect of fiscal 2012. Cash fixed costs decreased by US\$27 million from US\$416 million in fiscal 2011 to US\$389 million in fiscal 2012. Depreciation increased from US\$73 million in fiscal 2011 to US\$76 million in fiscal 2012.

*Comparing fiscal 2011 fixed costs with fiscal 2010 fixed costs*

Fixed costs in fiscal 2011 increased by US\$32 million or 7% from fiscal 2010 with increased personnel costs being the largest contributor. The reduction in our inventories from fiscal 2010 had a negative impact on fixed costs of US\$11 million compared to fiscal 2010, as the fixed cost component of the inventory reduction was charged to fixed costs in fiscal 2011.

***Sappi Fine Paper Europe****Comparing fiscal 2012 fixed costs with fiscal 2011 fixed costs*

Fixed costs in euro terms compared to fiscal 2011 decreased by 8% or €67 million. This large reduction in the fixed cost base represents the results of our cost reduction programme, which included the closure of the Biberist Mill in August 2011. Cash fixed costs in euro terms decreased by 8% from €676 million in fiscal 2011 to €624 million in fiscal 2012. Depreciation in euro terms decreased from €162 million in fiscal 2011 to €147 million in fiscal 2012. Although no major cost reduction programme is currently in place, variable and fixed cost control remains a priority in our business.

*Comparing fiscal 2011 fixed costs with fiscal 2010 fixed costs*

In fiscal 2011, fixed costs remained well controlled and increased by €9 million or 1% compared to fiscal 2010. The fixed costs increase in US dollar terms of US\$36 million largely reflects the different average exchange rates used for translation in fiscal 2011 (US\$/Euro: 1.40) and in fiscal 2010 (US\$/Euro: 1.37). We implemented fixed cost reduction programs in our European business, including the closure of our Biberist Mill in fiscal 2011.

Table of Contents**Sappi Southern Africa***Comparing fiscal 2012 fixed costs with fiscal 2011 fixed costs*

Fixed costs for the southern African business, in Rand terms, decreased by 4% compared to fiscal 2011, consisting of a decrease in cash fixed costs of 5% and a decrease in depreciation of 3%. The decrease in fixed costs was a direct result of the restructuring actions initiated during fiscal 2011. We expect to see more benefits from our restructuring initiatives during our 2013 fiscal year.

However, personnel cost, the largest component of fixed costs, remains under pressure in South Africa due to a high inflation environment and the impact of a skills shortage on labor rates, particularly in skilled technical functions.

*Comparing fiscal 2011 fixed costs with fiscal 2010 fixed costs*

Fixed costs increased, in Rand terms, by 4% from ZAR4,311 million to ZAR4,485 million, in fiscal 2011 compared to fiscal 2010. This increase was mainly due to a 9% increase in maintenance costs and an 8% increase in personnel costs. The additional maintenance related to the restarting of manufacturing equipment in fiscal 2011 that had been mothballed in fiscal 2010.

**Net Finance Costs**

Annual finance costs may be analyzed as follows:

<b>Finance Costs</b>	<b>2012</b>	<b>2011</b>	<b>2010</b>
	<b>(US\$ million)</b>		
Finance costs	311	348	309
Finance revenue	(12)	(12)	(16)
<b>Net interest paid</b>	<b>299</b>	<b>336</b>	<b>293</b>
Finance costs capitalized	(6)		
Net foreign exchange gains	(5)	(13)	(17)
Net fair value gain on financial instruments	(5)	(16)	(21)
<b>Net finance costs</b>	<b>283</b>	<b>307</b>	<b>255</b>

Net interest paid (finance costs less finance revenue) in fiscal 2012 was US\$299 million compared to US\$336 million in fiscal 2011 and US\$293 million in fiscal 2010. The decrease in net interest paid in fiscal 2012 compared to fiscal 2011 was largely due to lower finance costs as a result of our refinancing in the year and favorable exchange rate effects in translation of Euro and Rand finance costs to US dollar, partially offset by higher once-off refinancing costs in fiscal 2012 compared to fiscal 2011.

The US\$5 million and US\$13 million net foreign exchange gains in fiscal 2012 and fiscal 2011, respectively, were mainly due to the forward points that accrued on US Dollar/ZAR forward cover taken on export sales from our southern African business. The group's policy is to identify foreign exchange risks immediately when they arise and to cover these risks to the functional currency of the operation where the risk lies. The majority of the group's foreign exchange exposures are covered centrally by the group Treasury which nets the internal exposures and hedges the residual exposure with third party banks.

The net fair value movement on financial instruments relates to the net impact of currency and interest rate movements, under hedge accounting for certain interest rate and currency swaps the group entered into, in order to manage the interest and currency exposure on internal and external loans. During fiscal 2012, the interest rate and currency swaps in respect of the US\$300 million 2014 Notes were terminated upon repayment of the Notes. This resulted in a gain to financial instruments of US\$2 million. The closure of these swaps stopped the hedging relationship with the underlying debt and

Table of Contents

therefore the difference between the carrying amount and the notional amount of the debt has been being amortized over the original life of the swaps. This has resulted in a gain to financial instruments of US\$3 million, US\$16 million and US\$21 million for fiscal 2012, fiscal 2011 and fiscal 2010, respectively.

**Taxation**

	<b>2012</b>	<b>2011</b>	<b>2010</b>
	<b>(US\$ million)</b>		
<b>Profit (loss) before taxation</b>	138	(221)	86
Taxation at the average statutory tax rates	47	(49)	35
Net exempt income and non-tax deductible expenditure	(41)	(10)	(10)
Effect of tax rate changes	(2)		
Deferred tax asset not recognized	58	110	65
Utilization of previously unrecognized tax assets	(26)	(41)	(54)
Prior year adjustments	(6)	(5)	(20)
Other taxes	4	6	4
<b>Taxation charge</b>	<b>34</b>	<b>11</b>	<b>20</b>
<b>Effective tax rate</b>	<b>25%</b>	<b>(5%)</b>	<b>23%</b>

Our effective tax rate for fiscal years 2012, 2011, and 2010, was positive 25%, negative 5% and positive 23%, respectively. Our tax rate is a factor of the tax rates and the taxable income in certain jurisdictions, which we expect to be fairly consistent in the near term. It is also affected by discrete items that may occur in any given year, but are not consistent from year to year. The main factors accounting for differences between our statutory income tax rate of 34% and our effective tax rate are explained below:

*2012*

Our tax charge for the year was US\$34 million, based on a profit before taxation for the group of US\$138 million.

In Europe, despite a US\$66 million loss before tax, we did not obtain any tax relief. This situation arose as a result of certain of our companies in Europe not booking tax relief on pre-tax losses as, in our judgment, there is not sufficient certainty that we will generate sufficient profits in those countries to recover these losses in the near future. In other countries we did generate taxable profits which resulted in a negligible taxation in the region as a whole. We have substantial unrecognized tax losses in Austria, Finland and Belgium which will substantially shield any profits earned in those countries in the future.

A US\$11 million charge in North America relates mainly to US Federal Alternative Minimum Tax and taxes paid in certain of the States where we operate. At the Federal level we have substantial tax losses which shielded most of the pre-tax profits of the business. North America also reassessed its non-valued deferred tax assets and recognized deferred tax assets previously not recognized the majority being US\$101 million which was accounted for directly against equity. As a result, during the last fiscal quarter of 2012, the North American entity began to recognize taxes at its statutory federal and state tax rate.

Southern Africa benefited from the utilization of tax losses brought forward in South Africa. Also, no tax was charged on profits from our Swaziland forestry business due to the availability of tax losses carried forward.

*2011*

Our tax charge for the year was US\$11 million, despite incurring a loss before taxation for the group of US\$221 million (which arose mainly as a result of the special items charge).

Table of Contents

In Europe, despite a US\$318 million loss before tax, we incurred a small tax charge of US\$4 million. This situation arose as a result of certain of our companies in Europe not booking tax relief on pre-tax losses and impairments for the same reason as explained for fiscal 2012. In other countries we did incur taxable profits which resulted in the small charge for taxation in the region as a whole.

A US\$8 million charge in North America relates mainly to US Federal Alternative Minimum Tax and taxes paid in certain of the States where we operate. At the Federal level we have substantial unrecognized tax losses which shielded most of the pre-tax profits of the business.

Southern Africa benefited from the utilization of tax losses brought forward in South Africa. Also, no tax was charged on profits from our Swaziland forestry business due to the availability of tax losses carried forward.

*2010*

Our tax charge for fiscal 2010 was US\$20 million which was lower than taxation at the average statutory tax rates. In Europe, despite the US\$150 million loss before tax, we were only able to receive tax relief of US\$6 million, as certain countries in Europe did not generate sufficient pre-tax profits to recover these losses.

The US\$6 million in North America related mainly to US Federal Alternative Minimum Tax and taxes paid in certain of the States in which we operate. At the Federal level we had substantial unrecognized tax losses which, in 2010, largely shielded the profits of our North American business and are expected to continue to shield them for some years to come.

The effective tax rate in southern Africa was lower than the statutory rate of 28%. Although there was no tax relief on the Broad-based Black Economic Empowerment transaction and on the Usutu Pulp Mill closure costs, profits on exports benefited from lower taxes in certain countries.

***Profit (loss) for fiscal 2012***

The company recorded a profit for the period of US\$104 million for fiscal 2012 compared to a loss for the period of US\$232 million in fiscal 2011 and a profit of US\$66 million for fiscal 2010. The main reason for the improvement in the fiscal 2012 profit compared to fiscal 2011 was the adverse impact on fiscal 2011 profit of the unfavorable special items of US\$318 million in that year. Special items were favorable to the amount of US\$18 million for the 2012 fiscal year. For further information, see " Overview".

In fiscal 2012 earnings per share was negatively impacted by certain significant items, including a plantation fair value price adjustment (US\$15 million), impact of fires and flood (US\$19 million), profit on disposal of non-current assets and investments (US\$63 million) and asset impairments (US\$10 million).

In fiscal 2011 earnings per share was negatively impacted by certain significant items, including a plantation fair value price adjustment (US\$16 million), restructuring charges (US\$135 million) and asset and investment impairments (US\$167 million).

**Liquidity and Capital Resources**

Our principal sources of liquidity are cash and cash equivalents, cash generated from operations and availability under our credit facilities and other debt arrangements. Our liquidity requirements arise primarily from the need to fund capital expenditures in order to maintain our assets, to expand our business whether organically or through acquisitions, to fund our working capital requirements, to service our debt and to make dividend payments. Short-term debt as of September 2012 was US\$266 million and included a ZAR1 billion (US\$120 million) public bond in South Africa due in June 2013. The remainder of the short-term debt consisted of additional short-term portions of long-term debt

Table of Contents

(US\$67 million) and short-term facilities which we expect to be able to roll on a quarterly basis (US\$79 million). Based on our current level of operations we believe our cash flow from operations, available borrowings under our credit facilities, and cash and cash equivalents will be adequate to meet our liquidity needs for at least the next twelve months.

Our liquidity resources are subject to change as market and general economic conditions evolve. Decreases in liquidity could result from a lower than expected cash flow from operations, including decreases caused by lower demand for our products, weaker selling prices for our products, or higher input costs. In addition, any potential acquisitions in which all or a portion of the consideration would be payable in cash, could have a significant effect on our liquidity resources. Our liquidity could also be impacted by any limitations on the availability of our existing debt and our ability to refinance existing debt or raise additional debt and the associated terms of such debt. However, at the end of fiscal 2012 we had substantial cash and cash equivalents of US\$645 million.

One of our targeted liquidity requirements is usually the payment of annual dividends to shareholders. Considering among others the macroeconomic and global financial market conditions and our performance in fiscal 2012, as well as our priority to reduce indebtedness and preserve liquidity, the Board of Directors decided in November 2012 not to declare a dividend for fiscal 2012. For further information see "Item 8 Financial Information Dividends" and "Item 10 Additional Information Exchange Controls".

**Cash Flow**

In fiscal 2012, we retained our emphasis on cash generation despite our investments in the conversions to dissolving wood pulp production at the Cloquet and Ngodwana Mills. The group generated cash of US\$127 million in fiscal 2012 without compromising our high levels of maintenance activities. Our focus on managing working capital remained strong, particularly in relation to inventory levels and receivables, keeping our level of working capital in line with the level of trading activity.

<b>Cash flow summary</b>	<b>2012</b>	<b>2011</b>	<b>2010</b>
	<b>(US\$ million)</b>		
<b>Cash generated from operations<sup>(1)</sup></b>	<b>728</b>	<b>798</b>	<b>737</b>

<b>Cash and cash equivalents at end of year</b>	<b>645</b>	<b>639</b>	<b>792</b>

(1)

Cash generated from operations is calculated by adding to the profit (loss) for the period, net finance costs, taxation and various non-cash items as set out in the table below. For further information, see note 23 to our group Annual Financial Statements included elsewhere in this Annual Report.

Table of Contents

Total non-cash items (as set out in the table below) in fiscal 2012 amounted to US\$369 million, compared to US\$782 million in fiscal 2011 and compared to US\$469 million in fiscal 2010.

<b>Non-cash items</b>	<b>2012</b>	<b>2011</b>	<b>2010</b>
	<b>(US\$ million)</b>		
Depreciation	367	414	411
Fellings	73	82	71

Plantation fair value growth adjustment	(83)	(81)	(67)
Restructuring provisions and closure costs (reversed) raised	(2)	135	46
Profit on disposal of investment	(11)		
Profit on disposal of non-current assets	(52)	(1)	(5)
BEE charge	3	5	23
Other non-cash items	47	42	39
<b>Total</b>	<b>369</b>	<b>782</b>	<b>469</b>

*Cash generated from operations*

Cash generated from operations decreased to US\$728 million in fiscal 2012 compared to US\$798 million in fiscal 2011 mainly due to a decrease in sales revenue and cash profits compared to fiscal 2011.

Cash generated from operations increased to US\$798 million in fiscal 2011 compared to US\$737 million in fiscal 2010 mainly due to an increase in sales revenue and cash profits compared to fiscal 2010.

*Working capital*

The movement in components of net working capital is as shown in the table below.

<b>Working capital movement</b>	<b>2012</b>	<b>2011</b>	<b>2010</b>
	<b>(US\$ million)</b>		
Inventories	726	750	836
% sales	11.4%	10.3%	12.7%
Receivables	807	831	888
% sales	12.7%	11.4%	13.5%
Payables	(1,023)	(1,172)	(1,304)
% Cost of goods sold	18.4%	18.2%	22.5%
<b>Net working capital<sup>(1)</sup></b>	<b>510</b>	<b>409</b>	<b>420</b>
Ratio of net working capital to sales	8.0%	5.6%	6.4%

(1)

Net working capital includes provisions.

Optimizing the levels of our working capital remained a key management focus area during fiscal 2012. Managing the average monthly level of net working capital is a large element of the management incentive scheme for all our businesses.

Net working capital expressed as a percentage of sales was higher at the end of fiscal 2012 than fiscal 2011 despite the reduced revenues and costs we recorded in fiscal 2012 compared to fiscal 2011. These factors would normally be expected to result in a lower level of working capital. Inventories and receivables balances decreased from fiscal 2011 in-line with the decrease in trading activity, but the

Table of Contents

payables balance decreased proportionally more than the decrease in trading activity due to a reduction, during fiscal 2012, of US\$78 million in restructuring provisions. Net working capital was more stable than during fiscal 2011, ending the first quarter at US\$568 million and remaining more or less at that level throughout the year, peaking at US\$605 million at the end of our third fiscal quarter. The net working capital balance reduced from our third fiscal quarter to US\$510 million at our fiscal year-end due to a reduction in inventories of US\$47 million and to increases in receivables and payables of US\$25 million and US\$73 million, respectively. We believe that working capital in fiscal 2012 remained, for most part, well controlled and in-line with the levels of trade in all our businesses.

Net working capital expressed as a percentage of sales was lower at the end of fiscal 2011 than fiscal 2010. Net working capital was extremely volatile during fiscal 2011. The opening net working capital balance for the year was US\$420 million, increasing to a peak of US\$756 million in the first quarter, remaining at above US\$700 million in the second and third quarters and then reducing significantly in the last quarter to US\$409 million. The initial increase in the first quarter was mainly due to the accounting cut-off effect on payables as our accounting cut-off was after the calendar end of our first quarter and we paid our creditors on the calendar quarter end. The high level of net working capital in the second and third quarters was due to a material increase in inventories in Europe and southern Africa. In the fourth fiscal quarter both inventories and receivables reduced (particularly in Europe and southern Africa) by US\$329 million combined. In fiscal 2011, compared to fiscal 2010 the combined increase in restructuring provisions was US\$76 million.

*Capital expenditure*

Cash utilized in investing activities for the period from fiscal 2010 to fiscal 2012 is as set out in the table below:

<b>Investing activities</b>	<b>2012</b>	<b>2011</b>	<b>2010</b>
	<b>(US\$ million)</b>		
Capital expenditure to maintain and expand operations	358	262	211
Proceeds on disposals of non-current assets	(71)	(6)	(21)
Decrease in other non-current assets	(3)	(13)	(2)
<b>Total</b>	<b>284</b>	<b>243</b>	<b>188</b>

Capital expenditure by region is as follows:

<b>Capital expenditure by region</b>	<b>2012</b>	<b>2011</b>	<b>2010</b>
	<b>(US\$ million)</b>		
Sappi Fine Paper North America	63	56	42
Sappi Fine Paper Europe	96	111	95
Sappi Southern Africa	199	93	72
Other	2	2	
<b>Total</b>	<b>358</b>	<b>262</b>	<b>211</b>

Our capital expenditure program varies from year to year, and expenditure in one year is not necessarily indicative of future capital expenditure. We operate in an industry that requires high capital expenditures and, as a result, we need to devote a significant part of our cash flow to capital expenditure programs, including investments relating to maintaining operations. Capital spending for investment relating to maintaining operations during fiscal 2012, fiscal 2011 and fiscal 2010 amounted to approximately US\$177 million, US\$213 million and US\$173 million, respectively. Capital spending for expanding or improving our operations during fiscal 2012, fiscal 2011 and fiscal 2010 amounted to approximately US\$181 million, US\$49 million and US\$38 million, respectively.

Table of Contents

In May 2011, we announced the US\$340 million investment at our Ngodwana Mill which is expected to change the product portfolio of the mill to include the annual production of 210,000 tons of dissolving wood pulp. During November 2011, we announced an additional investment of US\$170 million in our Cloquet Mill in the United States, which is expected to enable the facility to produce 330,000 tons of dissolving wood pulp per annum. Together with our Saiccor Mill in South Africa, these investments will increase our total annual dissolving wood pulp production capacity to approximately 1.3 million tons. Both projects have been initiated, are progressing well and we plan to commission both projects during the 2013 calendar year.

During fiscal 2012, our capital expenditure was US\$358 million, compared to US\$262 million during fiscal 2011. Our investment to expand operations increased significantly from fiscal 2011 due to expenditure of US\$156 million on the dissolving wood pulp conversions at our Cloquet and Ngodwana Mills. The investment to maintain operations in fiscal 2012 decreased by US\$36 million from fiscal 2011 mainly due to the closure of production facilities.

During fiscal 2011, our capital expenditure was US\$262 million, compared to US\$211 million during fiscal 2010. As part of our cash management efforts we managed capital expenditure to a strategic target without compromising the maintenance of our asset base. Capital expenditure to expand or improve operations in fiscal 2011 included production process improvements across all three of our operating regions and also included expenditure of US\$16 million on the dissolving wood pulp project at our Ngodwana Mill.

During fiscal 2010, our capital expenditure, including US\$9 million of plantation land purchases, was US\$211 million, compared to US\$176 million during fiscal 2009, which included US\$1 million of plantation land purchases.

Capital expenditure to expand operations in the fiscal year 2010 primarily consisted of investments to improve production processes.

For further details about our capital commitments, see note 25 to our group Annual Financial Statements included elsewhere in this Annual Report.

*Cash generated*

Cash generated in fiscal 2012 was US\$127 million compared to cash generated of US\$163 million in fiscal 2011. The cash flow in fiscal 2012 compared to fiscal 2011 was negatively impacted by lower cash generated from operations, higher capital expenditure and positively impacted by lower finance costs. See " Financing Cash Flows Summary of Certain Debt Arrangements".

Cash generated in fiscal 2011 was US\$163 million compared to cash generated of US\$341 million in fiscal 2010. The cash flow in fiscal 2011 compared to fiscal 2010 was negatively impacted by higher working capital, capital expenditure and finance costs. See " Financing Cash Flows Summary of Certain Debt Arrangements".

***Financing cash flows (Cash effect of financing activities)***

Net financing cash outflows of US\$103 million during fiscal 2012 relate mainly to voluntary debt repayments.

Net financing cash outflows of US\$296 million during fiscal 2011 relate mainly to both planned and additional voluntary debt repayments.

Net financing cash outflows of US\$256 million during fiscal 2010 represent the continuous nature of our various revolving securitization programs, revolving credit facilities and other interest bearing borrowings. In fiscal 2010, cash resources were used to repay approximately US\$316 million of long-term interest bearing liabilities.

Table of Contents

See " Financing" for a more detailed discussion on financing transactions, other cash inflows and cash outflows and the application of funds received from these transactions.

**Financing***General*

Debt is a major source of funding for the group.

<b>Gross Debt</b>	<b>2012</b>	<b>2011</b>	<b>2010</b>
	<b>(US\$ million)</b>		
Long-term interest bearing liabilities	2,358	2,289	2,317
Short-term interest bearing liabilities	261	449	691
Bank overdraft	5	1	5
<b>Gross interest bearing liabilities</b>	<b>2,624</b>	<b>2,739</b>	<b>3,013</b>

<b>Cash Position</b>	<b>2012</b>	<b>2011</b>	<b>2010</b>
	<b>(US\$ million)</b>		
Cash and cash equivalents	645	639	792

Approximately 47% of total assets as of September 2012 are funded by gross debt as is shown in the table below:

<b>Total Assets Excluding Cash Equivalents</b>	<b>2012</b>	<b>2011</b>	<b>2010</b>
	<b>(US\$ million)</b>		
Gross interest bearing liabilities	2,624	2,739	3,013

## Edgar Filing: SAPPI LTD - Form 20-F

We continued to focus on managing the level of our debt and repaid US\$1,062 million of gross debt during fiscal 2012. These repayments included the ZAR1 billion (US\$124 million) Public Bond in South Africa, the US\$300 million 2014 Dollar Notes, a €319 million portion of the 2014 Euro Notes and the

Table of Contents

€100 million drawing under the Revolving Credit Facility. The debt raised in fiscal 2012 consists mainly of the 2017 Notes, the 2019 Notes, notes issued under the Domestic Medium Term Note Program in South Africa and a €136 million new OeKB term loan facility.

The repayment of the 2014 Notes was made using both cash resources and the funds received from the offering of the 2017 Notes and the 2019 Notes. A portion of the remaining 2014 Euro Notes was repurchased in November 2012, and the remaining outstanding 2014 Euro Notes will be repurchased or redeemed before the end of calendar 2012. Of the US\$115 million decrease in gross debt in fiscal 2012, US\$23 million was due to the impact of translating our European and South African debt into US dollars and other fair value adjustments.

*Debt profile*

Our debt is comprised of a variety of debt instruments, including committed credit facilities, local bank overdraft facilities and lines of credit, debt securities issued in the global and South African capital markets, a commercial paper program, receivables securitization programs and finance leases. See note 20 to our group Annual Financial Statements contained elsewhere in this Annual Report.

The make-up of our gross debt for the various periods is set out in the table below:

<b>Debt Profile</b>	<b>2012</b>	<b>2011</b>	<b>2010</b>
	<b>(US\$ million)</b>		
Long-term debt	2,358	2,289	2,317
Short-term debt	261	449	691
Bank overdraft	5	1	5
<b>Gross interest-bearing liabilities</b>	<b>2,624</b>	<b>2,739</b>	<b>3,013</b>

Short-term debt of US\$261 million includes the ZAR1 billion (US\$120 million) Public Bond in South Africa due in June 2013. The remainder of the short-term borrowings consists of the short-term portion of long-term debt and short-term facilities which are rolled quarterly. Short-term debt of US\$449 million in fiscal 2011 included an amount of €100 million (US\$134 million) drawn under the €350 million Revolving Credit Facility in July 2011, as well as the ZAR1 billion (US\$124 million) public bond in South Africa which was settled from cash resources in October 2011. These cash resources included the proceeds of the ZAR500 million (US\$62 million) public bond in South Africa issued on June 28, 2011 and held as cash and cash equivalents at September 2011. Short-term debt of US\$691 million in fiscal 2010 included an amount of US\$447 million of securitized receivables funding under various short-term revolving securitization programs. These short-term programs were replaced with a single long-term program in fiscal 2011 and therefore securitization receivables funding of US\$380 million (fiscal 2011: US\$368 million) is included within long-term debt in fiscal 2012.

Table of Contents

The average maturity of our long-term debt as at September 2012 is 5.8 years with the profile as shown below (principal values only, excluding IFRS adjustments for upfront costs):

**Gross debt maturity profile (US\$ million)**

As at September 2012, short-term debt and overdraft funding was US\$266 million and cash and cash equivalents was US\$645 million.

At September 2012 the group had unutilized uncommitted borrowing facilities of approximately US\$42 million and available cash and cash equivalents of US\$645 million. At September 2011 the unutilized uncommitted borrowing facilities were approximately US\$43 million and the available cash and cash equivalents was US\$639 million. The committed unutilized facilities at the end of fiscal 2012 of US\$556 million and include the undrawn €350 million (US\$450 million) Revolving Credit Facility. A portion of these committed facilities includes the unutilized portion of the long-term securitized trade receivables funding program established in August 2011. The unutilized portion is the difference between the total €330 million committed facility and the funded amount and is subject to additional eligible receivables being available for sale. As at September 2012 and September 2011, the unutilized portion was US\$45 million and US\$74 million, respectively.

US\$380 million of the long-term debt at September 2012 and US\$368 million of the long-term debt at the fiscal 2011 year end was in the form of securitized trade receivables funding under the three year program. For further information on group borrowing facilities secured by trade receivables, refer to note 20 to our group Annual Financial Statements contained elsewhere in this Annual Report.

In fiscal 2012, our financing activities concentrated on reducing gross debt by utilizing our cash resources to repay certain debt and improving our debt maturity profile by arranging longer term and lower cost debt to refinance a portion of our high-cost, near-term maturities. This was achieved by the issuance of the US\$400 million 2017 Notes and the US\$300 million 2019 Notes to repay the entire US\$300 million 2014 Dollar Notes and a €319 million portion of the 2014 Euro Notes. In fiscal 2011, our financing activities concentrated on utilizing our cash resources to repay certain long-term debt, improving our debt maturity profile by arranging longer term debt to refinance a portion of our shorter term debt and replacing our short-term securitization program with a long-term program and improving our liquidity position by increasing and extending our revolving credit facility.

Table of Contents

The make-up of our gross debt by currency is shown in the following table:

<b>Debt by currency ratio</b>	<b>2012</b>	<b>2011</b>	<b>2010</b>
US\$	26.5%	23.0%	24.5%
EUR	59.8%	59.7%	57.7%
ZAR	13.7%	17.3%	17.8%

Included in the euro denominated debt are the US\$400 million 2017 Notes and the US\$300 million 2019 Notes which have been swapped into euro.

*Interest on Borrowings*

Raising new debt and refinancing existing debt in the third quarter of fiscal 2012 improved the interest payable on borrowings. This, together with the impact of translating our European and South African interest payable into US dollars, are the main reasons for the improved interest cost in the fiscal year ended September 2012, compared to fiscal 2011. The refinancing did, however, result in once-off breakage costs of approximately US\$86 million recorded as interest paid in fiscal 2012.

The refinancing in the third quarter of fiscal 2011 resulted in once-off breakage costs of approximately US\$43 million. Excluding these once-off breakage costs in fiscal 2011, our interest payable on borrowings in fiscal 2011 is comparable with that of fiscal 2010.

*Interest Rate Risk*

The group has a policy of maintaining a balance between fixed and variable rate loans which enables it to minimize the impact of borrowing costs on reported earnings. Exceptions are made when fixed rates can be obtained at attractive rates, as this strategy locks in acceptable interest rates for the life of the borrowing instrument. Hedging activities in relation to borrowings are restricted to interest rate swaps and where appropriate, cross-currency swaps.

Upon issuing the US\$350 million 2021 Notes, the fixed interest rate was, in April 2011, swapped into a floating interest rate using an interest rate swap. Upon issuing the US\$400 million 2017 Notes and the US\$300 million 2019 Notes, such notes were swapped from fixed USD interest rates into fixed euro interest rates using an interest rate and currency swap. At the end of fiscal 2012, the ratio of gross debt at fixed and floating interest rates, after the impact of the interest rate swaps, was 62:38 compared to 65:35 at the end of fiscal 2011.

*Short-term borrowings*

The group's short-term borrowings' position improved during fiscal 2012 with the repayment of the ZAR1 billion (US\$124 million) public bond in South Africa from cash resources in October 2011. The group's short-term borrowings' position also improved during fiscal 2011 with the implementation of a long-term trade receivables securitization program to replace the previous short-term program.

The €100 million Revolving Credit Facility drawing was repaid in August 2012. Excluding this drawing, the short-term borrowings were largely consistent throughout fiscal 2012. The group issued no commercial paper during fiscal 2012, 2011 or 2010 and relies on cash on hand and, where necessary, the Revolving Credit Facility for short-term liquidity requirements.

*Summary of Certain Debt Arrangements*

Set forth below is a summary of certain key terms of some of our significant debt arrangements. Reference should also be made to those debt arrangements which are filed as, or incorporated by reference as, exhibits to this Annual Report. See Note 20 to our group Annual Financial Statements

Table of Contents

contained elsewhere in this Annual Report "Item 10 Additional Information Material Contracts" and " Off-Balance Sheet Arrangements".

*Revolving Credit Facility.* On April 28, 2011, we amended and restated our existing revolving credit facility dated August 27, 2009. The amended and restated revolving credit facility provides for up to €350 million of borrowing availability in euro, US dollars and certain other currencies (the "Revolving Credit Facility"). As of September 2012, the Revolving Credit Facility was undrawn. The commitments under the Revolving Credit Facility terminate on March 28, 2016 and the annual interest rate on borrowings is calculated based on LIBOR or EURIBOR plus a funding margin varying between 1.65% and 4.75% depending on the credit rating assigned to the senior secured debt of Sappi Limited, plus certain costs. Borrowings may be made by certain subsidiaries of Sappi Limited and the Revolving Credit Facility is jointly and severally guaranteed on a senior basis by Sappi Limited, Sappi Papier Holding GmbH ("SPH") and certain other subsidiaries of Sappi Limited, as well as secured, together with certain of our other indebtedness, by first-priority security interests over certain assets of Sappi Limited, SPH and the other subsidiary guarantors. The Revolving Credit Facility contains an EBITDA to consolidated net interest expense covenant, a consolidated net debt to EBITDA covenant and a consolidated net debt to total capitalization covenant, in each case measured at the Sappi Limited consolidated level and set at various levels in line with the long term forecast of Sappi's results. The Revolving Credit Facility contains certain customary negative covenants and restrictions, including (among others) restrictions on dividend distributions, the granting of security, incurrence of indebtedness, the provision of loans and guarantees, a change of business of the group, acquisitions or participations in joint ventures and mergers and disposals. As of September 2012, we were in compliance with these covenants. For further information, see "Item 10 Additional Information Material Contracts", "Item 19 Exhibits", and note 20 to our group Annual Financial Statements included elsewhere in this Annual Report.

*2018 and 2021 Secured Notes.* On April 14, 2011, Sappi Papier Holding GmbH ("SPH"), issued €250 million 6.625% Senior Secured Notes due 2018 (the "2018 Notes") and US\$350 million 6.625% Senior Secured Notes due 2021 (the "2021 Notes"). The interest on the 2018 Notes and the 2021 Notes is payable semi-annually on April 15 and October 15 of each year, commencing on October 15, 2011. The 2018 Notes and the 2021 Notes mature on April 15, 2018 and April 15, 2021, respectively. The 2018 Notes and the 2021 Notes are jointly and severally guaranteed on a senior basis by Sappi Limited and certain other subsidiaries of Sappi Limited that guarantee, and are secured by substantially the same collateral that secures, the obligations under the Revolving Credit Facility, the 2014 Euro Notes, the 2017 Notes and the 2019 Notes (as defined below). Sappi has agreed to observe certain covenants with respect to the 2018 Notes and the 2021 Notes, including limitations on dividend distributions and other payments, indebtedness, asset sales, liens, guarantees and on mergers and consolidations. For further information, see "Item 10 Additional Information Material Contracts", "Item 19 Exhibits", and note 20 to our group Annual Financial Statements included elsewhere in this Annual Report.

*2017 and 2019 Secured Notes.* On July 05, 2012, SPH issued US\$400 million 7.750% Senior Secured Notes due 2017 (the "2017 Notes") and US\$300 million 8.375% Senior Secured Notes due 2019 (the "2019 Notes"). The interest on the 2017 Notes is payable semi-annually on January 15 and July 15 of each year, commencing on January 15, 2013 and the interest payable on the 2019 Notes is payable semi-annually on June 15 and December 15 of each year, commencing on December 15, 2012. The 2017 Notes and the 2019 Notes mature on July 15, 2017 and June 15, 2019, respectively. The 2017 Notes and the 2019 Notes are jointly and severally guaranteed on a senior basis by Sappi Limited and certain other subsidiaries of Sappi Limited that guarantee, and are secured by substantially the same collateral that secures, the obligations under the Revolving Credit Facility, the 2014 Euro Notes, the 2018 Notes and the 2021 Notes. Sappi has agreed to observe certain covenants with respect to the 2017 Notes and the 2019 Notes, including limitations on dividend distributions and other payments, indebtedness, asset sales, liens, guarantees and on mergers and consolidations. For further

Table of Contents

information, see "Item 19 Exhibits" and note 20 to our group Annual Financial Statements included elsewhere in this Annual Report.

*OeKB Term Loan Facility.* In April 2011, we used a portion of the net proceeds from the issuance of the 2018 Notes and the 2021 Notes to repay €200 million of our previous OeKB Term Loan Facility. We repaid the remaining €120 million of our previous OeKB Term Loan balance from cash on hand in June 2011. For further information, see "Item 10 Additional Information Material Contracts", "Item 19 Exhibits", and note 20 to our group Annual Financial Statements included elsewhere in this Annual Report.

*OeKB Facility.* On July 10, 2012, SPH entered into a new OeKB Facility. The commitments under the new OeKB Facility are for €136 million and the facility was fully drawn on August 30, 2012. The annual interest rate on borrowings is calculated based on the OeKB financing rate plus a margin varying between 2.00% and 4.75%, depending on the credit rating assigned to the senior secured debt of Sappi Limited, plus certain costs. The margin at the date of filing this Annual Report was 2.75% per annum. The new OeKB Facility is guaranteed by Sappi Limited and the same subsidiaries that are guarantors (other than SPH) under the Revolving Credit Facility. The obligations under the new OeKB Facility are unsecured. The other material terms of the new OeKB Facility, including the financial covenants, the undertakings and the events of default are substantially the same as the terms of the Revolving Credit Facility. For further information, see "Item 10 Additional Information Material Contracts", "Item 19 Exhibits", and note 20 to our group Annual Financial Statements included elsewhere in this Annual Report.

*2014 Secured Notes.* On July 29, 2009, PE Paper Escrow GmbH (the "Issuer"), a special purpose limited liability company wholly owned by SPH, issued €350 million 11.75% Senior Secured Notes due 2014 (the "2014 Euro Notes") and US\$300 million 12.00% Senior Secured Notes due 2014 (the "2014 Dollar Notes" and together with the 2014 Euro Notes, the "2014 Notes"). Interest on the 2014 Notes is payable semi-annually, commencing on February 01, 2010, and the 2014 Notes mature on August 01, 2014. The 2014 Notes are jointly and severally guaranteed on a senior basis by Sappi Limited, SPH and certain other subsidiaries of Sappi Limited that guarantee, and are secured by substantially the same collateral that secures, the obligations under the Revolving Credit Facility, the 2017 Notes, the 2018 Notes, the 2019 Notes and the 2021 Notes. On July 06, 2012, we purchased for cash US\$167.3 million principal amount of our outstanding 2014 Dollar Notes for an aggregate consideration of US\$187.3 million (which included accrued interest thereon of US\$8.6 million) with proceeds of the issuance of the 2017 Notes and the 2019 Notes and cash on hand. On July 19, 2012, we purchased for cash €179 million principal amount of our outstanding 2014 Euro Notes for an aggregate consideration of €200.7 million (which included accrued interest thereon of €9.9 million) with proceeds of the issuance of the 2017 and 2019 Notes and cash on hand. On August 06, 2012, the remaining outstanding principal amount of our 2014 Dollar Notes and €140 million principal amount of our outstanding 2014 Euro Notes were redeemed with proceeds of the issuance of the 2017 Notes and the 2019 Notes and cash on hand. Following this redemption, there were no remaining outstanding 2014 Dollar Notes and the remaining outstanding principal amount of our 2014 Euro Notes was approximately €31 million. A portion of the remaining 2014 Euro Notes was repurchased in November 2012, and the remaining outstanding 2014 Euro Notes will be repurchased or redeemed before the end of 2012. In addition, all of the restrictive covenants and certain events of default and related provisions in respect of the 2014 Notes were substantially modified or eliminated in connection with the November 2012 repurchase. For further information, see "Item 19 Exhibits" and note 20 to our group Annual Financial Statements included elsewhere in this Annual Report.

*Domestic Medium Term Note Program.* On June 27, 2006, Sappi Southern Africa issued ZAR1 billion (US\$146 million) senior unsecured fixed rate notes (the "First Tranche") under its Domestic Medium Term Note Program (the "DMTN Program") at a fixed interest rate of 9.34% payable

Table of Contents

semi-annually on December 27, and June 27, of each year, commencing on June 27, 2006. The securities issued under the First Tranche mature on June 27, 2013. On September 25, 2007, Sappi Southern Africa issued a second tranche of ZAR1 billion (US\$146 million) senior unsecured fixed rate notes (the "Second Tranche") under the DMTN Program at a fixed interest rate of 10.64%. The interest on the securities issued under the Second Tranche is payable semi-annually on April 14 and October 14 of each year, commencing on April 14, 2008. The securities issued under the Second Tranche matured on October 14, 2011 and were repaid using the issuance proceeds of the Fourth Tranche and cash on hand. On June 30, 2009, Sappi Southern Africa issued ZAR325 million (US\$41 million) and on July 13, 2009, issued ZAR175 million (US\$21 million) senior unsecured fixed rate notes (collectively the "Third Tranche") under the DMTN Program at a fixed interest rate of 12.13%, payable semi-annually on June 30 and December 30 of each year, commencing on June 30, 2009. The securities issued under the Third Tranche mature on June 30, 2012. On June 28, 2011, Sappi Southern Africa issued ZAR500 million (US\$62 million) senior unsecured fixed rate notes (the "Fourth Tranche") under the DMTN Program at a fixed interest rate of 9.63%, payable semi-annually on June 28 and December 28 of each year. The securities issued under the Fourth Tranche mature on June 28, 2016. The proceeds of the Fourth Tranche were used to partially refinance the securities issued under the Second Tranche that matured on October 14, 2011. On April 20, 2012, Sappi Southern Africa issued ZAR750 million (US\$98 million) Senior Unsecured Floating Rate Notes (the "Fifth Tranche") under the DMTN Program at a floating rate of the 3 month JIBAR (Johannesburg Interbank Agreed Rate) plus 144 basis points, payable quarterly on January 20, April 20, July 20 and October 20 of each year commencing on July 20, 2012. The securities issued under the Fifth Tranche mature on April 20, 2015. The proceeds were used to redeem the ZAR500 million (US\$62 million) securities issued under the Third Tranche maturing on June 30, 2012 and for other debt repayments. Sappi Southern Africa has agreed to observe certain undertakings with respect to the securities including limitations on encumbrances (other than permitted encumbrances) over its assets. For further information, see note 20 to our group Annual Financial Statements included elsewhere in this Annual Report.

*Trade Receivables Securitization Program.* In August 2011, Sappi Trading, Sappi Fine Paper Europe and Sappi Fine Paper North America entered a new, three-year, €360 million trade receivables securitization program to replace their prior trade receivables securitization program. Under the new program, eligible receivables are sold on a non-recourse basis by the Issuer, Sappi Lanaken NV, Sappi Deutschland GmbH, and Sappi NA Finance LLC to Elektra Purchase No. 29 Limited (the "Purchaser") and Sappi entities act as servicers to administer, collect and enforce the receivables purchased. The sellers have agreed to observe certain covenants, including a limitation on creating liens on any receivables. The Issuer has guaranteed the performance by the sellers of their respective obligations under the receivables purchase agreements and the performance by the Sappi entities acting as servicers of their respective obligations under the servicing agreements pursuant to a performance guarantee with the Purchaser. The trade receivables securitization program matures in August 2014, unless it is terminated earlier. The program could be terminated in the event of certain change of control events, certain credit rating downgrades occur for Sappi Limited or if Sappi Limited fails to maintain certain financial ratios, including ratios for consolidated net debt to EBITDA, EBITDA to consolidated net interest expense, and net debt to total capitalization. As of September 2012, the external securitization funding under the trade receivables program was US\$380 million.

*2012 and 2032 Guaranteed Notes.* In June 2002, Sappi Papier Holding GmbH (then organized as an AG) issued US\$500 million 6.75% unsecured guaranteed notes due 2012 (the "2012 Notes") and US\$250 million 7.50% unsecured guaranteed notes due 2032 (the "2032 Notes"), guaranteed by Sappi Limited and Sappi International S.A. On March 15, 2011, we purchased for cash US\$150 million principal amount of our outstanding US\$500 million 2012 Notes for an aggregate consideration of approximately US\$160.3 million (which included accrued interest thereon of approximately US\$2.5 million). Following the repurchase, the remaining outstanding principal amount of our 2012 Notes was US\$350 million, which was redeemed in April 2011 with a portion of the proceeds of the issuance of the 2018 Notes and

Table of Contents

the 2021 Notes. Interest on the 2032 Notes is payable semi-annually. The indenture governing the 2032 Notes provides for an optional redemption of the 2032 Notes, in whole or in part, at any time at a redemption price of the greater of (i) the principal amount of the notes to be redeemed and (ii) the sum of the present values of the applicable remaining scheduled payments discounted at a rate as determined under the indentures, together with, in each case, accrued interest. The indenture governing the 2032 Notes contains events of default customary for investment grade debt, including failure to pay principal or interest, a default in any other indebtedness, certain enforcement actions against our property and certain bankruptcy events. The indenture also contains certain customary covenants, which restrict our ability to create liens, to enter into sale and leaseback transactions and to undertake mergers or consolidations. For further information, see "Item 19 Exhibits" and note 20 to our group Annual Financial Statements included elsewhere in this Annual Report.

*Covenants*

Financial Covenants apply to the €350 million Revolving Credit Facility, the €136 million OeKB Facility and our Securitization borrowings.

Separate covenants apply to certain debt in our southern African businesses.

Our financial covenants require that:

- (i) At the end of each quarter the mean average of the ratios of EBITDA to consolidated net interest expense for that quarter and each of the three preceding quarters be not less than 2.00:1 for all quarters ending from March 2011 to December 2013, 2.25:1 for all quarters ending from March 2014 to June 2014 and 2.50:1 for quarters ending September 2014 to March 2016;
- (ii) The ratio of net debt to EBITDA be not greater than 4.50:1 for all quarters ending March 2011 to December 2013, 4.25:1 for all quarters ending from March 2014 to June 2014, 4.00:1 for all quarters ending September 2014 to December 2014 and 3.75:1 for all quarters ending March 2015 to March 2016;
- (iii) The percentage of net debt to total capitalization as at the end of each quarter until March 2016, shall not exceed 65%; and
- (iv) With regard to Sappi Southern Africa (Pty) Ltd and its subsidiaries only, at the end of any fiscal quarter, the percentage of net debt to equity must not exceed 65%, and at the end of each fiscal year, the ratio of EBITDA (before special items) to net interest paid must not be less than 3.00:1.

The table below shows that as at September 2012 we were in compliance with these covenants. With regards to our financial covenants, EBITDA is defined under the relevant agreements and net debt is calculated using average exchange rates for fiscal 2012.

	<b>Fiscal 2012 Covenants (US\$ million)</b>	
<i>Group Covenants</i>		
Net Debt to EBITDA	2.55	<4.5
EBITDA to Net Interest	3.92	>2.0
Net Debt to Total Capitalization	56.4%	<65%
<i>Sappi Southern Africa Covenants</i>		
Net Debt to Equity	22.8%	<65%
EBITDA to Net Interest	9.6	>3.0

The group financial covenants also apply to our securitization program, with outstanding balances of US\$380 million at the end of September 2012. No Sappi Limited guarantee has been provided for these facilities.

Table of Contents*Gearing*

Gross debt to capitalization for each of the past three years was as set out below:

	2012	2011	2010
	(US\$ million)		
Gross debt	2,624	2,739	3,013
Gross debt and equity	4,149	4,217	4,909
<b>Gross debt to capitalization ratio</b>	<b>63%</b>	<b>65%</b>	<b>61%</b>

Management monitors the group's indebtedness in the context of the complex trade-offs associated with determining an appropriate level of debt finance, namely financial risk, credit rating, the cost of debt and the expected return that can be earned on that debt. In regard to our debt level we also monitor cash flow to net interest cover. We recognize that we operate in a mature industry that normally generates substantial and reasonably reliable cash flows and that management has some flexibility to delay or minimize capital expenditure (which is a major use of cash) in difficult times to reduce financial risk. As previously described in this "Liquidity and Capital Resources", in view of the continuing difficulties in the world financial markets and macro-economic conditions, focusing on cash generation remains a priority. We are also aware that with uncertainty in financial markets, refinancing existing or raising additional debt and the associated terms are likely to be more challenging. The refinancing activities of 2011 and 2012 have contributed greatly to extending the group's debt maturity profile and lowering the group's average cost of debt.

**Off-Balance Sheet Arrangements**

*Letters of credit discounting.* To improve the group working capital, the group sells certain Letters of Credit to The Royal Bank of Scotland (Hong Kong) and DBS Bank (London) every fiscal month-end on a non-recourse basis.

*"Scheckwechsel".* The Scheckwechsel is a financial guarantee supplied by Sappi to the bank of a customer who wishes to obtain a loan to finance early payment of specified trade receivables owed to us (thereby benefiting from an early settlement discount). By signing the Scheckwechsel, Sappi provides a financial guarantee to the bank of the customer.

This financial guarantee contract is initially recognized at fair value. At inception the risk for Sappi having to reimburse the bank is nil because there is no evidence that the customer will not reimburse its loan to the bank. There is also no guarantee fee due by the bank and the Scheckwechsel is a short term instrument (maximum 90 days). Therefore, the fair value at inception is zero. Subsequently, the financial guarantee contract is measured at the higher of:

- (i) the amount determined in accordance with IAS 37 '*Provisions, Contingent Liabilities and Contingent Assets*'; and
- (ii) the amount initially recognized less any cumulative amortization.

As no default event has occurred, no provision is set up and the fair value at the end of fiscal 2012 remains zero. However, according to IAS 37 a contingent liability of US\$29 million (2011: US\$32 million) has been disclosed in this respect.

*Sappi Southern Africa securitization facility.* Sappi sells the majority of its ZAR receivables to Rand Merchant Bank Limited, which issues commercial paper to finance the purchase of such receivables. Sappi does not guarantee the recoverability of any amounts, but shares proportionately with Rand Merchant Bank Limited the credit risk of each underlying receivable, after all recoveries, including insurance recoveries, with Sappi bearing 15% of such risk (and Rand Merchant Bank Limited the remainder). Sappi administers the collection of all amounts processed on behalf of the bank that are due

Table of Contents

from the customer. The purchase price of these receivables is adjusted dependent on the timing of the payment received from the client. The rate of discounting that is charged on the receivables is JIBAR (Johannesburg Inter Bank Agreed Rate) plus a spread. This structure is currently treated as an off balance sheet arrangement.

The total amount of trade receivables sold at the end of September 2012 amounted to US\$126 million (2011: US\$121 million). Details of the securitization program at the end of fiscal 2012 and 2011 are disclosed in the tables below.

If this securitization facility was to be terminated, we would discontinue further sales of trade receivables and would not incur any losses in respect of receivables previously sold in excess of the 15% credit risk described above. There are a number of events which may trigger termination of the facility, amongst others, an amount of defaults above a specified level; terms and conditions of the agreement not being met; or breaches of various credit insurance ratios. The impact on liquidity varies according to the terms of the agreement; generally however, future trade receivables would be recorded on balance sheet until a replacement agreement was entered into.

Details of the securitization facility at September 2012 and 2011 are set out below:

<b>Bank</b>	<b>Currency</b>	<b>Value</b>	<b>Facility</b>	<b>Discount charges</b>
<b>September 2012</b>				
Rand Merchant Bank	ZAR	ZAR1,044 million	Unlimited*	Linked to 3 month JIBAR
<b>September 2011</b>				
Rand Merchant Bank	ZAR	ZAR979 million	Unlimited*	Linked to 3 month JIBAR

\*

The facility in respect of the securitization facility is unlimited, but subject to the sale of qualifying receivables to the bank.

Details of the on-balance sheet securitization facilities that are applicable to our non-South African businesses being Sappi Trading, Sappi Fine Paper North America and Sappi Fine Paper Europe are described in notes 16 and 20 of our group Annual Financial Statements contained elsewhere in this Annual Report.

For details of operating leases please refer to note 25 of our group Annual Financial Statements contained elsewhere in this Annual Report.

**Contractual Obligations**

We have various obligations and commitments to make future cash payments under contracts, such as debt instruments, lease arrangements, supply agreements and other contracts. The following table includes information contained within the group Annual Financial Statements included elsewhere

Table of Contents

in this Annual Report, as well as information regarding purchase obligations. The tables reflect those contractual obligations at the end of fiscal 2012 that could be quantified.

	<b>Payments Due by Period</b>				
	<b>Total</b>	<b>Less than 1 year</b>	<b>1-3 years</b>	<b>3-5 years</b>	<b>More than 5 years</b>
<b>(US\$ millions)</b>					
<b><i>On-Balance Sheet</i></b>					
Long-Term Debt Obligations <sup>(1)</sup>	3,763	417	848	880	1,618
Capital Finance Lease Obligations <sup>(1)</sup>	24	13	11		
Other Long-Term Liabilities reflected on the Balance Sheet <sup>(4)</sup>	605				
<b><i>Off-Balance Sheet</i></b>					
Operating Lease Obligations <sup>(2)</sup>	104	27	29	12	36
Purchase Obligations <sup>(3)</sup>	111	71	39	1	
Capital Commitments <sup>(5)</sup>	267	264	3		
<b>Group Total</b>	<b>4,874</b>	<b>792</b>	<b>930</b>	<b>893</b>	<b>1,654</b>

- 
- (1) Includes interest obligations to maturity to service the debt using interest rates prevailing at September 2012. The principal debt is US\$2,619 million.
- (2) Operating leases are future minimum obligations under operating leases. Refer to note 25 of our group Annual Financial Statements included elsewhere in this Annual Report.
- (3) Unconditional Purchase Obligations are obligations to transfer funds in the future for fixed or minimum amounts or quantities of goods or services at fixed or minimum prices (for example, as in take-or-pay contracts or throughput contracts, relating to, among others, timber and power).
- (4) The Other Long-Term Liabilities of US\$605 million (2011: US\$553 million) on-balance sheet, relate mainly to post-employment benefits, post-retirement benefits other than pension obligations, workmen's compensation, and other items which do not have a payment profile. Refer to note 21 of our group Annual Financial Statements included elsewhere in this Annual Report.
- (5) Capital commitments are commitments for which contracts have been entered into. Refer to note 25 of our group Annual Financial Statements included elsewhere in this Annual Report.

**Research and Development, Patents and Licenses**

Strategically Sappi's Research and Development (R&D) focuses on two broadly defined areas. The first targets Sappi's core businesses where the drive is to improve current products and processes, as well as to bring new product innovation to market, thereby serving our current markets through differentiation on cost and/or quality. The second area concentrates on opening up new markets for Sappi, through the development of distinctly new products and processes with the intent to maximize Sappi's opportunities as a processor and producer from a renewable resource base.

## Edgar Filing: SAPPI LTD - Form 20-F

R&D is managed at a number of regional technology centers. These "centers of excellence" liaise globally to leverage a unique set of skills to both improve processes and reduce costs, and to provide customer-focused product development. In fiscal 2012 our R&D expenditure was US\$33 million, a decrease from the fiscal 2011 expenditure of approximately US\$38 million and fiscal 2010 of approximately US\$35 million. This reduced R&D expenditure occurred mainly in the R&D center in South Africa and Europe and is concomitant with the mill shuts that have occurred in both these regions in the past year. During fiscal 2012, the expenditure, both actual and proportionate, directed at developing products for new business and markets (in response to the gradual decline in demand that is evident in Sappi's graphic and fine paper markets) was US\$4.4 million and 13% of total expenditure, respectively.

Table of Contents

***North America***

Sappi Fine Paper North America's R&D activities are centered at Westbrook. This center has a proud history of product and process innovation; for example, it developed the first machine coated and calendared one-sided and two-sided coated paper as well as the first high bulk coated paper.

In addition, Sappi Fine Paper North America has a number of proprietary technologies, including the on-line finishing technology and its Ultracast electron-beam technology. Sappi Fine Paper North America's on-line finishing technology is used in production of coated paper at Somerset and drove a new quality standard for lightweight coated publishing papers. Our Ultracast technology is utilized in speciality papers such as release papers used in the production of high fidelity synthetic leather and other decorative surfaces.

Research and development efforts are focused on next generation product design for margin improvement and customer features and benefits in both the release and graphic papers businesses. We have recently developed a unique textured synthetic leather offering with positive customer response. Current technology platform development centers on innovative materials research which has resulted in a more eco-friendly and cost effective binding technology. Lastly, a strong emphasis remains on expanding the use of our unique Ultracast Technology into new growth markets.

***Europe***

R&D in Sappi Fine Paper Europe has focused predominantly on the development of digital grades, alternative raw materials and on innovative ways to substantially lower manufacturing costs.

After the introduction of the toner-based grade, Digital TOP, in fiscal 2011 the effort has now shifted to the inkjet market where two grades, a coated grade and a pigmented grade were launched in 2012.

In today's paper manufacturing process, many raw materials used are either mineral-oil based or obtained from mining operations. Sappi Fine Paper Europe's R&D is developing processes that enable use of raw materials that result from primary processes as a waste or byproduct in order to further boost the level of sustainability of coated paper. As has been developed in Sappi Fine Paper North America, new binder technology that is more eco friendly and cost effective has been introduced into the European products. In both North America and Europe Sappi has developed a set of alternative binder techniques that are expected to provide a buffer against the impact of increasing oil prices on latex prices.

Using R&D's adapted coating application technology, Sappi Fine Paper Europe has been able to significantly reduce manufacturing costs. In addition, the further adaptation of paper-architecture of coated paper allows the use of cheaper raw materials, thus lowering manufacturing costs significantly at various mills.

***Southern Africa***

Building on our history of development in South Africa, which includes the development of the Sapoxal oxygen bleaching process, applied research is conducted over the full value chain of papermaking from fiber to pulping, bleaching, stock preparation as well as product development and the environment. Highlights for fiscal 2012 include the successful introduction of enzymes to reduce the energy consumption during refining and improve pulp properties into two further mills, the scaling up of the pilot process for producing dissolving pulp from the commercial wood species in the regions using the pre-hydrolysis kraft process into the Ngodwana Mill expansion, and the identification and implementation of opportunities to reduce refining energy at the Kirkniemi Mill in Europe.

At our forest research center in KwaZulu-Natal, we focus on the genetic improvement of trees planted in Sappi's plantation forests to maximize the yield of high quality pulp obtained per hectare. This

Table of Contents

includes breeding and selecting trees with fiber properties that enhance the characteristics of our end products, as well as, breeding for pest and disease resistance to ensure a sustainable supply of timber. Investigating new molecular genetic breeding tools which can increase the speed and efficiency of the current tree improvement processes, forms part of the research. The recent adoption of DNA fingerprinting tools to ensure the correct identity of individuals in the breeding populations and production seed orchards, marks the first operational adoption of the molecular genetic tools.

At the Saiccor Mill, there is a research group dedicated to the production of dissolving wood pulp. The focus is largely on product development to provide more product options and expand the value added product range from Saiccor, and meet the needs of Sappi's global customers.

**Share Buy Backs**

Through a wholly-owned subsidiary, the Sappi group has in previous fiscal years acquired approximately 21.4 million Sappi Limited ordinary shares (treasury shares) on the open market of the JSE Limited. No shares were acquired during fiscal 2012 and fiscal 2011. Some of these treasury shares have been, and will continue to be, utilized to meet the requirements of the Sappi Limited Share Incentive Trust and the Sappi Limited Performance Share Incentive Trust from time to time. See notes 17 and 28 to our group Annual Financial Statements included elsewhere in this Annual Report for additional details relating to treasury shares.

Considering that it is the group's stated intention to reduce debt, it is unlikely that the group will seek approval for the purchase of Sappi shares in the foreseeable future.

In terms of the listing requirements of the JSE a company may not repurchase its shares during a closed period, which is defined as the period between the end of a fiscal reporting period and the publication of the results for that period and any period during which the company is trading under a cautionary announcement.

**Dividends**

Our policy is to consider dividends on an annual basis and to declare cash dividends in US dollars. Taking into account the macroeconomic and global financial market conditions, our performance in fiscal 2012 as well as our priority to reduce indebtedness and preserve liquidity, the Board of Directors decided in November 2012 not to declare a dividend for fiscal 2012.

Our ability to pay dividends is restricted by the terms of the Refinancing. See "Item 8 Financial Information Dividends" for a listing of the most restrictive conditions for declaring cash dividends.

**Mill Closures, Acquisitions, Dispositions, Impairment, Joint Venture and Broad-Based Black Economic Empowerment**

*Forestry investment.* In line with our strategy to secure a stable fiber supply for our southern African operations, we acquired 14,500 hectares of developed softwood plantations near Ngodwana Mill during 2010. During fiscal 2011, we announced a joint proposal with AsgiSA ("Accelerated and Shared Growth Initiative for South Africa") to accelerate the establishment and management of 30,000 hectares of commercial tree plantations by 2020 in the Eastern Cape province of South Africa.

*Adamas Mill closure.* We announced the possible closure of our Adamas Mill in South Africa on May 23, 2011 and entered into a consultation process with employee representatives soon thereafter. Unable to find a viable alternative for the mill, we announced the final closure of the mill on August 03, 2011. We ceased operations at the mill later in August 2011 and transferred all products produced at the facility to other Sappi mills in South Africa to ensure an uninterrupted supply of products to our end customers.

Table of Contents

*Biberist Mill closure.* On March 31, 2011 we announced, that due to the persistent overcapacity in the European coated and uncoated fine paper market, we would be entering into a consultation process with employee representatives and social partners at our Biberist Mill in Switzerland. Despite the combined efforts of mill employees and management, we were unable to identify a viable alternative to ensure the future existence of the mill. On July 20, 2011, we announced the closure of the Biberist Mill and ceased operations at the mill during August 2011. As a result of this closure, we reduced our annual production capacity by 500,000 tons of coated and uncoated fine paper in the European market. All of our affected customers are now served from our other European mills.

*Broad-Based Black Economic Empowerment deal ("BEE").* In 2006, we implemented the Lereko Property Consortium (Lereko) BEE deal. However, this transaction did not meet our undertakings under the Forestry Charter gazetted in June 2009 (which sets the objectives and principles for BEE in the forestry industry and includes the BEE scorecard and targets to be applied, as well as certain undertakings by government and South African forestry companies to assist the forestry industry to achieve its BEE targets). Accordingly, we decided to unwind the 2006 deal, which resided at a South African subsidiary level, to implement a new sustainable transaction of equivalent value at the holding company level by making use of our listed securities.

In June 2010, we completed a BEE transaction whereby ordinary and "A" ordinary shares equivalent to 4.5% of Sappi Limited were issued to our strategic empowerment partners, and to various trusts for the benefit of our black managers, our employees and growers/communities in the geographic areas where our South African business has operations. The value of the BEE transaction (approximately ZAR814 million, US\$115 million) corresponds to an effective 30% interest in Sappi Southern Africa, which meets the requirements of the Forest Sector Charter and BEE legislation in general. For further information on the BEE transaction, see "Item 7 Major Shareholders and Related Party Transactions Related Party Transactions" and " South African Economic and Political Environment", and note 28 of our group Annual Financial Statements contained elsewhere in this Annual Report.

*Usutu Mill impairment and closure.* The Usutu Mill was closed on January 31, 2010 in response to adverse market conditions, as well as the cumulative severe impact of fire damage over the past few years. In particular, fires in August 2008 destroyed 40% of the Usutu timber crop. As a result, Usutu Mill was no longer sustainable.

*Kangas Mill closure.* Due to a reduction in the European consumption of coated magazine paper arising from the global recession, our Kangas Mill in Finland had experienced a substantial amount of commercial downtime since the beginning of 2009. We announced the closure of the mill in January 2010. All our affected customers are now served from our other European operations. On July 07, 2010, we sold the Kangas Mill land and buildings to M-real (now known as Metsä Board) for €13 million.

*Muskegon Mill impairment and closure.* In light of significantly lower global demand for coated woodfree paper products, operations at Muskegon Mill were temporarily suspended on April 01, 2009. We announced the permanent closure of the Muskegon Mill on August 26, 2009 and during August 2011 we sold the Muskegon Mill site for US\$2.2 million to a third party.

In 2004 we acquired 34% of Jiangxi Chenming Paper Company Limited, a company incorporated in the People's Republic of China. The joint venture commissioned a coated mechanical paper machine with a capacity of 350,000 tons per annum, a mechanical pulp mill with a capacity of 187,000 tons per annum and a de-inked pulp mill with a capacity of 136,000 tons per annum during 2005. During the latter part of fiscal 2012 we sold our 34% stake of Jiangxi Chenming Paper Company Limited.

*Impairment of assets.* The group has reviewed the carrying value of all its non-current assets in fiscal 2012 and has determined that the impairment provision, as provided in the group Annual Financial Statements, was sufficient to record all necessary impairment of non-current assets.

Table of Contents

*Closure of the Enstra Mill pulp line and the Tugela Mill closure of the KCD line and PM3.* During fiscal 2012 we announced the closure of the pulp line at our Enstra Mill and the closure of the Kraft Continuous Digester ("KCD") at our Tugela Mill in South Africa. During fiscal 2012 we also announced the closure of the 10,000 ton per annum paper machine (PM3) at our Tugela Mill.

*Tugela Mill mothballing of PM4.* On October 12, 2012 we announced the decision to mothball PM4, a sackkraft and containerboard machine, at the Tugela Mill from January 01, 2013. We are currently in a consultation process with employees at the mill regarding potential retrenchments. The asset impairment charge related to the mothballing of the machine of ZAR76 million was taken in the fourth quarter of fiscal 2012 and is included in special items.

*Alfeld Mill Conversion.* During the fourth quarter of fiscal 2012 we announced the planned conversion of PM2 at the Alfeld Mill from 150,000 tons of coated fine paper to 135,000 tons of speciality paper per annum. This conversion will not only increase our capacity in a growing and higher margin specialised business, but will also improve our cost position in coated woodfree graphic paper and further reduce our graphic paper capacity in line with our strategy.

**Pensions and Post-retirement Benefits Other than Pensions**

The group provides various defined benefit post-retirement benefits to its active and retired employees worldwide, including pension, post-retirement health and other employee benefits. The group also provides various defined contribution schemes in all regions to eligible employees.

For defined contribution schemes, the group is only obligated to pay contributions according to contribution scales applicable in each scheme. Contributions are expensed for the period in which they fall due. No actuarial risk exists for the company with respect to these schemes.

Our funded defined benefit pension schemes generally hold a broad range of assets including a significant portion of bonds, in line with an investment strategy to preserve funded status and balance risk and return.

Over the first three fiscal quarters bond yields fell gradually and consistently in all regions except South Africa, which, in isolation to other factors caused gross liabilities of the group's plans in those regions to steadily increase. Over the same period, assets in the group's funded plans made sufficient gains (favorably contributed from all asset classes) to offset the rise in gross liabilities. However, in the final fiscal quarter, bond yields fell more significantly compared to earlier periods in all regions, including South Africa but investment gains in the funded plans over the same period were insufficient to match the rise in gross liabilities. Corresponding increases in liabilities from the group's unfunded plans led to an overall increase in the consolidated net balance sheet liability.

We continue to believe both equity and bond markets will remain volatile in the short-term causing similar volatility in the group's defined benefit net balance sheet liabilities, and that this volatility will continue to be driven extensively by political influences alongside investment fundamentals until sovereign debt crises are resolved. Whilst investment returns were very favorable to assets in the group's funded plans over the last fiscal year, low discount rates adopted (due to persistent low bond yields in markets where our plans are located) will sustain upward pressure on gross liabilities. Of all the influencing factors on the net balance sheet liability, we believe that bond yields will need to lift from the low levels experienced in recent years in order to book significant reductions in the consolidated net balance sheet liability. Sustained global economic growth, a market-perceived favorable resolution to government debt crises and investor sentiment shifting demand towards growth assets and away from high-quality bonds in the US, the UK and Western Europe are examples of favorable factors that are expected to reduce the consolidated net balance sheet liability significantly.

Table of Contents

Specifically, it is the interaction of these factors that will determine the extent to which the pension schemes balance sheet liabilities will change. Listed below are further examples of situations that could affect the balance sheet position of our pension schemes:

Falls in equity markets coupled with corresponding falls in bond markets (rising bond yields) will most likely have a broadly neutral effect on balance sheet liability.

If the prospect of deflationary economic scenarios emerges, then, if coupled with very low discount rates, this would increase liabilities in our schemes, particularly due to the fact that pensions cannot reduce.

Recoveries in equity markets coupled with rising bond yields e.g. a general shift to 'riskier' investor sentiment will most likely result in cuts in balance sheet deficits.

Rising bond markets (falling bond yields) possibly as a result of increased investor demand coupled with underperforming equities will increase balance sheet deficits.

Rising inflation rates will, in isolation, increase benefit costs and liabilities (such as post retirement pension increases or salary growth).

Where rising inflation is coupled with rising nominal bond yields, this will most likely cut liabilities in schemes providing fixed (non-inflationary increasing) benefits.

Slower expected growth manifested for example as lower bond and equity yields will likely lead to higher net balance sheet liabilities and higher contributions.

Statutory minimum funding requirements affect the pace of funding our defined benefit schemes. Most take account of yields on assets such as government bonds or interbank interest rate swap curves. While yields on these asset classes in some markets remain low, we expect the prospect of paying additional contributions to meet onerous minimum funding targets. However recent statutory easements in the pace of funding on these bases have provided contribution relief to the group.

The balance sheet liability of the group's pension schemes increased by US\$50 million from a deficit of US\$268 million as of September 2011 to a deficit of US\$318 million as of September 2012. However, US\$145 million of this liability relates to unfunded schemes (mainly in Europe). With these unfunded liabilities stripped out, the group has a deficit of US\$173 million in our funded schemes. Post-retirement benefit liabilities (other than pensions) increased by US\$10 million from a deficit of US\$182 million as of September 2011 to a deficit of US\$192 million as at September 2012.

Benefit obligations and fair value of plan assets are as follows:

	<b>September 2012</b>		<b>September 2011</b>		<b>September 2010</b>	
	<b>Fair value</b>		<b>Fair value</b>		<b>Fair value</b>	
	<b>Benefit of plan</b>	<b>Obligation Assets</b>	<b>Benefit of plan</b>	<b>Obligation Assets</b>	<b>Benefit of plan</b>	<b>Obligation Assets</b>
	<b>(US\$ million)</b>					
<b>Pensions</b>	2,007	1,689	1,827	1,559	2,069	1,808
<b>Post-retirement benefits other than pensions</b>	192		182		185	

Actual investment returns from the assets of the various regional funded pension schemes during 2012 were positive and higher than actuarial projections in all regions. Collectively this contributed to increased asset values but also to an actuarial gain as at September 2012.

## Edgar Filing: SAPPI LTD - Form 20-F

Overall, investment returns were +15.4% or US\$240 million over the fiscal year including an actuarial gain of US\$140 million.

Discount rates reduced in all regions, reflecting corresponding changes to average yields on corporate bonds (as prescribed in the accounting standard) of similar duration to the liabilities. For the

Table of Contents

pension schemes the net effect from different regions contributed to an overall increase in liabilities shown as actuarial losses of US\$221 million. Experience adjustments (i.e. changes in membership or benefits) were modestly favorable, contributing to an actuarial gain of US\$2 million. Contributions paid to the schemes were a major beneficial factor, contributing a reduction in net balance sheet liabilities of US\$48 million.

For post-retirement benefit liabilities (other than pensions), falling discount rates were also the main factor, contributing an actuarial loss of US\$14 million. Experience adjustments (i.e. changes in membership or benefits) were modestly favorable, contributing an actuarial gain of US\$5 million. Being unfunded, contributions are used to pay benefits directly, which therefore extinguish corresponding liabilities. Over the year contributions settled liabilities of US\$10 million. Currency effects were minimal leading to a small gain of US\$1 million in the net balance sheet liability.

Defined benefit schemes remain open to mill employees in North America and continental Europe. Defined benefit schemes in southern Africa, Austria and some in Germany are closed. Plans in the United Kingdom and one in North America are closed to future accrual.

Whilst the group accounts in its annual reporting the effects from various financial and demographic factors, a change in the prescribed valuation method in the accounting standard presents a rare but otherwise further consideration to the group. The group is currently evaluating the impact that the adoption of this revised standard will have on the group Annual Financial Statements. The group will be adopting the new Standard during fiscal year beginning October 2013. For further information on reporting under IAS 19, see note 27 in our group Annual Financial Statements and elsewhere in this Annual Report.

**Insurance**

The group has an active program of risk management in each of its geographical operating regions to address and to reduce exposure to property damage and business interruption. All production and distribution units are subjected to regular risk assessments, the results of which receive the attention of senior management. The risk assessment and mitigation programs are coordinated at group level in order to achieve a harmonization of methodology and standardization of approach.

Sappi follows a practice of insuring its assets against unavoidable loss arising from catastrophic events. These events include fire, flood, explosion, earthquake and machinery breakdown. Our insurance also covers the business interruption costs which may result from such events. Specific environmental risks are also insured. In line with previous years, the Board decided not to take separate cover for losses from acts of terrorism, which is consistent with current practice in the paper manufacturing industry. This insurance cover excludes insurance for our plantations, which is placed separately.

Sappi has a global insurance structure and the bulk of its insurance is placed with its own captive insurance company, Sappisure Försäkrings AB, domiciled in Stockholm, Sweden, which re-insures most of the risks in the insurance market.

Sappi successfully negotiated the renewal of its 2012 asset and business interruption insurance cover at more favorable rates to those of 2011. Maximum self-insured retention for any one property damage occurrence is €20.5 million, with an annual aggregate of €33 million for all claims exceeding €4 million. For property damage and business interruption insurance, cost-effective cover to full value is not readily available. However, we believe that the loss limit cover of €700 million should be adequate for what we have determined as the maximum reasonably foreseeable loss for any single claim. From fiscal 2011 our property damage insurance policy is euro denominated as most of our assets are based in euro denominated jurisdictions.

Table of Contents

Insurance cover for credit risks currently applies on a regional basis to Sappi's Northern American, European and South African domestic trade receivables subject to a US\$5 million group aggregate first loss.

Sappi has placed the insurance for its plantations on a stand-alone basis into international insurance markets. The insurance renewal process for the year ending April 30, 2013 has been successfully concluded.

**Critical Accounting Policies and Estimates**

Management of the group makes estimates and assumptions concerning the future in applying its accounting policies. The estimates may not equal the related actual results. The group believes that the following accounting policies are critical due to the degree of management judgment and estimation required and/or the potential material impact they may have on the group's financial position and performance.

*Impairment of assets other than goodwill and financial instruments.* The group assesses all assets (other than goodwill and intangible assets not yet available for use) at each balance sheet date for indications of impairment or the reversal of a previously recognized impairment.

Intangible assets not yet available for use are tested at least annually for impairment.

In assessing assets for impairment, the group estimates the asset's useful life, discounted future cash flows, including appropriate bases for future product pricing in the appropriate markets, raw material and energy costs, volumes of product sold, the planned use of machinery or equipment or closing of facilities. The pre-tax discount rate (impairment discount factor) is another sensitive input to the calculation. For an asset whose cash flows are largely dependent on those of other assets, the recoverable amount is determined for the cash-generating unit ("CGU") to which the asset belongs. Additionally assets are also assessed against their fair value less costs to sell.

Where impairment exists, the losses are recognized in other operating expenses in profit or loss for the period.

A previously recognized impairment loss will be reversed through profit or loss if the recoverable amount increases as a result of a change in the estimates used previously to determine the recoverable amount, but not to an amount higher than the carrying amount that would have been determined, net of depreciation or amortization, had no impairment loss been recognized in prior periods.

Refer to note 9 to our group Annual Financial Statements, included elsewhere in this Annual Report for the assumptions and inputs used in assessing assets for impairment or impairment reversals.

*Property, plant and equipment.* Items of property, plant and equipment are stated at cost less accumulated depreciation and impairment losses. Cost includes the estimated cost of dismantling and removing the assets, where specifically required in terms of legislative requirements or a constructive obligation exists, professional fees and, for qualifying assets, borrowing costs capitalized in accordance with the group's accounting policy.

Expenditure incurred to replace a component of an item of owner-occupied property or equipment is capitalized to the cost of the item of owner-occupied property and equipment and the part replaced is derecognized.

Depreciation which commences when the assets are ready for their intended use, is charged to write off the depreciable amount of the assets, other than land, over their estimated useful lives to estimated residual values, using a method that reflects the pattern in which the asset's future economic benefits are expected to be consumed by the entity.

Table of Contents

Management judgment and assumptions are necessary in estimating the methods of depreciation, useful lives and residual values. The residual value for the majority of items of plant and equipment has been deemed to be zero by management due to the underlying nature of the equipment.

The following methods and rates are used to depreciate property, plant and equipment to estimated residual values:

Buildings	straight-line 20 to 40 years
Plant	straight-line 5 to 20 years
Vehicles	straight-line 5 to 10 years
Furniture and equipment	straight-line 3 to 6 years

*Taxation.* Taxation on the profit or loss for the year comprises current and deferred taxation. Taxation is recognized in profit or loss except to the extent that it relates to items recognized directly in other comprehensive income, in which case, it is also recognized in other comprehensive income.

(i)  
Current taxation

Current taxation is the expected taxation payable on the taxable income, which is based on the results for the period after taking into account necessary adjustments, using taxation rates enacted or substantively enacted at the balance sheet date, and any adjustment to taxation payable in respect of previous years.

The group estimates its income taxes in each of the jurisdictions in which it operates. This process involves estimating its current tax liability together with assessing temporary differences resulting from differing treatment of items for tax and accounting purposes.

Secondary Tax on Companies ("STC") is a South African income tax that arises from the distribution of dividends and is recognized in the current tax charge of the income statement at the time the dividend is declared. STC was replaced with dividends withholding tax in South Africa for dividends declared after April 01, 2012.

(ii)  
Deferred taxation

Deferred taxation is provided using the balance sheet liability method, based on temporary differences. The amount of deferred taxation provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities using taxation rates enacted or substantively enacted at the balance sheet date. Such assets and liabilities are not recognized if the temporary difference arises from the initial recognition of goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the group intends to settle its current tax assets and liabilities on a net basis. Before recognizing a deferred tax asset the group assesses the likelihood that the deferred tax assets will be recovered from future taxable income and, to the extent recovery is not probable, a deferred tax asset is not recognized. In recognizing deferred tax assets, the group considers profit forecasts, including the effect of exchange rate fluctuations on sales, external market conditions and restructuring plans.

Table of Contents

(iii) Dividend withholding tax

Dividend withholding tax is payable on dividends distributed to shareholders. This tax is not attributable to the company paying the dividend but is collected by the company and paid to the tax authorities on behalf of the shareholder. On receipt of a dividend, the dividend withholding tax is recognized as part of the current tax charge in the income statement in the period in which the dividend is received.

*Derivatives and hedge accounting.*

(i) Fair value hedges

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recognized in profit or loss immediately, together with any changes in the fair value of the hedged item that are attributable to the hedged risk. The change in the fair value of the hedging instrument is recognized in the same line of profit or loss as the change in the hedged item.

(ii) Cash flow hedges

In relation to cash flow hedges, which meet the conditions for hedge accounting, the portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognized in other comprehensive income and the ineffective portion is recognized in profit or loss.

The gains or losses, which are recognized in other comprehensive income, are transferred to profit or loss in the same period in which the hedged transaction affects profit or loss.

If the forecasted transaction results in the recognition of a non-financial asset or non-financial liability, the associated cumulative gain or loss is transferred from other comprehensive income to the underlying asset or liability on the transaction date.

(iii) Hedge of a net investment in a foreign operation

The effective portion of the gain or loss on the hedging instrument is recognized in other comprehensive income and is only reclassified to profit or loss on the disposal or partial disposal of the foreign operation.

(iv) Discontinuance of hedge accounting

Hedge accounting is discontinued on a prospective basis when the hedge no longer meets the hedge accounting criteria (including when it becomes ineffective), when the hedge instrument is sold, terminated or exercised when, for cash flow hedges, the designation is revoked and the forecast transaction is no longer expected to occur. Where a forecasted transaction is no longer expected to occur, the cumulative gain or loss deferred in other comprehensive income is transferred to profit or loss.

The financial instruments that are used in hedging transactions are assessed both at inception and quarterly thereafter to ensure they are effective in offsetting changes in either the fair value or cash flows of the related underlying exposures. Hedge ineffectiveness is recognized immediately in profit or loss.

Refer to note 29.2 to our group Annual Financial Statements, included elsewhere in this Annual Report for details of the fair value hedging relationships as well as the impact of the hedge on the pre-tax profit or loss for the period.

*Plantations.* Plantations are stated at fair value less estimated cost to sell at the harvesting stage.

In arriving at plantation fair values, the key assumptions are estimated prices less cost of delivery, discount rates, and volume and growth estimations. All changes in fair value are recognized in the period in which they arise.

Table of Contents

The impact of changes in estimate prices, discount rates and, volume and growth assumptions may have on the calculated fair value and other key financial information on plantations is disclosed in note 10 to our group Annual Financial Statements, included elsewhere in this Annual Report.

Estimated prices less cost of delivery

The group uses a 12 quarter rolling historical average price to estimate the fair value of all immature timber and mature timber that is to be felled in more than 12 months from the reporting date. A period of 12 quarters is considered to be a reasonable period of time after taking the length of the growth cycle of the plantations into account. Expected future price trends and recent market transactions involving comparable plantations are also considered in estimating fair value.

Mature timber that is expected be felled within 12 months from the end of the reporting period are valued using unadjusted current market prices. Such timber is expected to be used in the short term and consequently, current market prices are considered an appropriate reflection of fair value.

The fair value is derived by using the prices as explained above reduced by the estimated cost of delivery. Cost of delivery includes all costs associated with getting the harvested agricultural produce to the market, including harvesting, loading, transport and allocated fixed overheads.

Discount rate

The discount rate used is the applicable pre-tax weighted average cost of capital of the business unit.

Volume and growth estimations and cost assumptions

The group focuses on good husbandry techniques which include ensuring that the rotation of plantations is met with adequate planting activities for future harvesting. The age threshold used for quantifying immature timber is dependent on the rotation period of the specific timber genus which varies between 8 and 18 years. In the southern African region, softwood less than eight years and hardwood less than five years is classified as immature timber.

Trees are generally felled at the optimum age when ready for intended use. At the time the tree is felled it is taken out of plantations and accounted for under inventory and reported as depletion cost (fellings).

Depletion costs include the fair value of timber felled, which is determined on the average method, plus amounts written off against standing timber to cover loss or damage caused by fire, disease and stunted growth. These costs are accounted for on a cost per metric ton allocation method multiplied by unadjusted current market prices. Tons are calculated using the projected growth to rotation age and are extrapolated to current age on a straight-line basis.

The group has projected growth estimation over a period of 8 to 18 years per rotation. In deriving this estimate, the group established a long-term sample plot network which is representative of the species and sites on which trees are grown and the measured data from these permanent sample plots were used as input into the group's growth estimation. Periodic adjustments are made to existing models for new genetic material.

The group directly manages plantations established on land that is either owned or leased from third parties. Indirectly managed plantations represent plantations established on land held by independent commercial farmers where Sappi provides technical advice on the growing and tendering of trees. The associated costs for managing plantations are recognized as silviculture costs in cost of sales (see note 4 to our group Annual Financial Statements, included elsewhere in this Annual Report).

Table of Contents

*Pension plans and other post-retirement benefits.* Defined-benefit and defined-contribution plans have been established for eligible employees of the group, with the assets held in separate trustee-administered funds.

The present value of the defined benefit obligations and related current service costs are calculated annually by independent actuaries using the projected unit credit method. These actuarial models use an attribution approach that generally spread individual events over the service lives of the employees in the plan. Examples of 'events' are changes in actuarial assumptions such as discount rate, expected long-term rate of return on plan assets, and rate of compensation increases.

Estimates and assumptions used in the actuarial models include the discount rate, return on assets, salary increases, healthcare cost trends, longevity and service lives of employees. The group's policy is to recognize actuarial gains and losses, which can arise from differences between expected and actual outcomes or changes in actuarial assumptions, in other comprehensive income. Any increase in the present value of plan liabilities expected to arise due to current service costs is charged to profit or loss.

Gains or losses on the curtailment or settlement of a defined benefit plan are recognized in profit or loss when the group is demonstrably committed to the curtailment or settlement. Past service costs or credits are recognized immediately to the extent that the benefits are already vested, and otherwise are amortized on a straight-line basis over the vesting period of those benefits.

The net liability recognized in the balance sheet represents the present value of the defined benefit obligation adjusted for unrecognized past service costs, reduced by the fair value of the plan assets. Where the calculation results in a benefit to the group, the recognized asset is limited to the net total of unrecognized past service costs and the present value of any future refunds from the plan or reductions in future contributions to the plan.

Refer to note 27 to our group Annual Financial Statements, included elsewhere in this Annual Report for the key estimates, assumptions and other information on post-employment benefits applicable as at the end of September 2012.

*Provisions.* Provisions are recognized when the group has a legal or constructive obligation arising from past events that will probably be settled and can be measured reliably. Where the effect of discounting (time value) is material, provisions are discounted and the discount rate used is a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

The establishment and review of the provisions requires significant judgment by management as to whether or not there is a probable obligation and as to whether or not a reliable estimate can be made of the amount of the obligation.

Environmental accruals are recorded based on current interpretation of environmental laws and regulations.

Restructuring provisions are recognized when the group has developed a detailed formal plan for restructuring and has raised a valid expectation that it will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it.

The measurement of a restructuring provision includes only the direct expenditures arising from the restructuring and is recorded in other operating expenses in profit or loss.

*Environmental restoration and decommissioning obligations* The group initially recognizes a liability for management's best present value estimate of costs expected to be incurred in the dismantling and removal of non-current assets where a legal or constructive obligation exists. The liability changes over time and actual costs incurred in future periods could differ materially from

Table of Contents

estimates. Additionally, future changes to environmental laws and regulations, life-of-operation estimates and discount rates could affect the carrying amount of this liability.

Due to the uncertainty in the timing of the closure of the group's facilities, some of these obligations have an indeterminate settlement date, and the group believes that adequate information does not exist to apply an expected-present-value technique to estimate any such potential obligations. Accordingly, the group does not record a liability for such remediation until a decision is made that allows reasonable estimation of the timing of such remediation.

**Adoption of accounting standards in the current year**

The following standards, interpretations and significant amendments or revisions to standards have been adopted by the group in the current year:

*Standards, interpretations and amendments to standards*

The group adopted the following standards, interpretations and amendments to standards during the current year, all of which had no material impact on the group's reported results or financial position:

IAS 24 *Related Party Disclosures* Revised definition of related parties;

IFRS 7 *Financial Instruments: Disclosures* Transfers of financial assets;

IFRIC 14 *IAS 19 The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction*; and

Various improvements to IFRSs.

**Accounting standards, interpretations and amendments to existing standards that are not yet effective**

The group has not yet adopted certain new standards, amendments and interpretations to existing standards, which have been published but are only effective for the group's accounting periods beginning on or after October 2012 or later periods. The group is currently evaluating the impact that the adoption of these IFRSs will have on its consolidated financial statements when they are adopted in the respective periods indicated.

These new standards and their effective dates for the group's annual accounting periods are listed below:

IAS 19 (Revised) *Employee Benefits* IAS 19 (Revised) requires the recognition of changes in the defined benefit obligation and in plan assets when those changes occur eliminating the corridor approach and accelerating the recognition of past service costs. Net interest is calculated by using high quality corporate bond yields September 2014;

IFRS 13 *Fair Value Measurements* establishes a single source of guidance for fair value measurements under IFRS September 2014;

IAS 28 *Investments in Associates and Joint Ventures* amendment to conform changes based on the issuance of IFRS 10 and IFRS 11 September 2014; and

IFRS 9 Financial Instruments IFRS 9 introduces new requirements for classifying and measuring financial assets and liabilities September 2016.

Table of Contents

Amendments, revisions or issues of the following standards or interpretations which will only become mandatory for the group's consolidated financial statements on the dates indicated are not expected to have a material impact on the group's results or financial position:

IAS 1 *Presentation of Financial Statements* Other Comprehensive Income September 2013;

IAS 12 *Deferred Tax* Investment property measured at fair value September 2013;

IFRS 7 *Financial Instruments: Disclosures* Offsetting Financial Assets and Financial Liabilities September 2014;

IFRS 10 *Consolidated Financial Statements* IFRS 10 specifies control as a single basis for consolidation for all entities, regardless of the nature of the investee September 2014;

IFRS 11 *Joint Arrangements* classifies joint arrangements as either joint operations or joint ventures and requires different treatment for these September 2014;

IFRS 12 *Disclosure of Interests in Other Entities* September 2014;

IAS 32 *Financial Instruments: Presentation* Offsetting Financial Assets and Financial Liabilities September 2015;

IAS 27 *Separate Financial Statements* amended for the issuance of IFRS 10 but retains the current guidance for separate financial statements September 2014; and

Various improvements to IFRSs.

Table of Contents

**ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES**

**Directors and Senior Management**

The Articles of Association of Sappi Limited provide that the Board of Directors (the "Board") must consist of not less than four nor more than twenty Directors at any time. The Board currently consists of fourteen Directors.

The business address for all of the Directors is 48 Ameshoff Street, Braamfontein, Johannesburg 2001, Republic of South Africa. The Directors are South African citizens except for Godefridus Beurskens (a Dutch citizen), Prof. Meyer Feldberg and Karen Osar (United States citizens), Michael Fallon, Sir Nigel Rudd and Steve Binnie (British citizens) and Dr Rudolf Thummer (an Austrian citizen).

Following the retirement of David Charles Brink and Dr Franklin Abraham Sonn effective on December 31, 2009, we appointed Nkateko Peter Mageza and Dr Rudolf Thummer as non-executive directors of the Board of Sappi Limited effective January 01, 2010 and February 01, 2010 respectively. Mohammed Valli Moosa was appointed as a non-executive director of the Sappi Limited Board during August 2010, while Helmut Claus-Jürgen Mamsch retired on December 31, 2010. Michael Fallon was appointed to the Board on September 01, 2011 and Godefridus Beurskens appointment became effective on October 01, 2011 while James Healey retired on December 31, 2011. With the retirement of Mark Thompson on August 31, 2012, Steve Binnie was appointed as an executive director of the Sappi Limited Board on September 01, 2012.

*Non-executive directors*

**Daniël (Danie) Christiaan Cronjé**

*(Independent Chairman)*

**Age:** 66

**Qualifications:** BCom (Hons), MCom, DCom

**Nationality:** South African

**Appointed:** January 2008

**Sappi board committee memberships**

Nomination and Governance Committee (chairman)

(Attends Audit Committee meetings, Human Resources and Compensation Committee meetings and Social, Ethics, Transformation and Sustainability Committee Meetings Ex Officio)

**Other board and organization memberships**

Die Dagbreek Trust (chairman)

**Skills, expertise and experience**

Dr Cronjé retired in July 2007 as chairman of both ABSA Group Limited and ABSA Bank Limited (a leading South African banking organization in which Barclays plc obtained a majority share in 2005). Dr Cronjé had been with ABSA Group since 1975 and held various executive positions including group chief executive for four years and chairman for ten years. Prior to that Dr Cronjé was lecturer in Money and Banking at Potchefstroom University.

Table of Contents

**Godefridus (Frits) Peter Franciscus**

**Beurskens**

*(Independent)*

**Age:** 65

**Qualifications:** BSc Mechanical Engineering, MSc Industrial Engineering and Management Science

**Nationality:** Dutch

**Appointed:** October 2011

**Sappi board committee memberships**

Audit Committee

**Other board and organization memberships**

Smurfit Kappa Group

A number of supervisory boards of companies

**Skills, expertise and experience**

The Smurfit Kappa group is a leader in paper-based packaging with annual sales of more than €7 billion globally. As president and chief executive officer of Kappa Packaging, prior to its merger with the Smurfit group, he oversaw the establishment of Kappa Packaging as a top performer and one of Europe's largest companies operating in the production, development and sale of containerboard, corrugated board, solid board packaging, graphic board and speciality board. He is a past chairman of CEPI (the Confederation of European Print Industries) and of ICCA (the International Corrugated Case Association). In December 2007, he was appointed by the Dutch Queen as officer in the Order of Oranje Nassau (Knighthood).

**Michael (Mike) Anthony Fallon**

*(Independent)*

**Age:** 54

**Qualifications:** BSc Hons (First Class)

**Nationality:** British

**Appointed:** September 2011

**Sappi board committee memberships**

Audit Committee

**Other board and organization memberships**

Nippon Sheet Glass Company Limited (NSG Group) (executive director retired June 30, 2012)

**Skills, expertise and experience**

Prior to retirement, Mr Fallon was President of NSG's global automotive division. With annual sales of around €6 billion the NSG group is one of the world's largest manufacturers of glass and glazing products for the building, automotive and specialty glass sectors. His management and leadership experience extends across a wide range of functions from plant management, sales and marketing and supply chain to general management, including M&A experience. He has been a director and chairman of companies in the United Kingdom, New Zealand and Finland.

Heathrow Airport Holdings Limited (Chairman)

Barclays Wealth (Chairman of the UK & Ireland Private Bank Advisory Board)

Business Growth Fund (Chairman)

Cyden Limited (Chairman)

Invensys plc (Chairman)

**Skills, expertise and experience**

Sir Nigel Rudd has held various senior management and board positions in a career spanning more than 35 years. He founded Williams plc in 1982 and the company went on to become one of the largest industrial holding companies in the United Kingdom. He was knighted by the Queen for services to the manufacturing industry in the UK in 1996 and holds honorary doctorates from Loughborough and Derby Universities. In 1995, he was awarded the Founding Societies Centenary Award by the Institute of Chartered Accountants. He is a Deputy Lieutenant of Derbyshire and a Freeman of the City of London.

Table of Contents

**Rudolf Thummer**

*(Independent)*

**Age:** 65

**Qualifications:** Dr Techn, Dipl-Ing

**Nationality:** Austrian

**Appointed:** February 2010

**Sappi board committee memberships**

Social, Ethics, Transformation and Sustainability Committee

**Skills, expertise and experience**

Dr Thummer joined the Sappi board after having served many years in the pulp and paper industry. He joined Hannover Papier in 1979 (later purchased by Sappi) as manager of Research and Development. In 1982, he became the paper mill manager at Alfeld Mill and in 1990 he was appointed technical director of this mill. In 1992, Dr Thummer became an Executive Board Member of the Hannover Papier Group, responsible for Manufacturing at the Alfeld and Ehingen Mills. In 1998, he moved to Sappi Fine Paper Europe based in Brussels as Technical Director and Executive Board Member. He served as Group Head Technology of Sappi Limited from January 2006 up to his retirement at the end of December 2007.

*Executive directors*

**Roeloff (Ralph) Jacobus Boëttger**

**Chief Executive Officer**

**Age:** 51

**Qualifications:** BAcc Hons, CA(SA)

**Nationality:** South African

**Appointed:** July 2007

**Sappi board committee memberships**

Social, Ethics, Transformation and Sustainability Committee.

Attends meetings of all other board committees by invitation.

**Skills, expertise and experience**

At the age of 34 he was appointed chief executive officer of Safair and the next year appointed to the executive committee of Safmarine Limited. From 1998 until July 2007, he was with Imperial Holdings when Imperial acquired Safair. From 2002, he was an executive director of Imperial Holdings with responsibility for their local and international logistics operations, the aviation division and the heavy commercial vehicle distribution operations. His field of responsibility encompassed businesses operating in southern Africa, numerous European countries, the Middle East and Asia. He is well versed in managing an operation with diverse cultures.

**Stephen (Steve) Robert Binnie\*\*\***

**Chief Financial Officer**

**Age:** 45

**Qualifications:** BComm, BAcc, CA(SA), MBA

**Nationality:** British

**Appointment:** September 2012

**Sappi board committee memberships**

Expected to attend Audit Committee meetings by invitation.

**Skills, expertise and experience**

Mr Binnie joined Sappi in July 2012 as Chief Financial Officer designate and was appointed Chief Financial Officer and executive director from September 01, 2012. Prior to joining Sappi, he held various senior finance roles and was most recently Chief Financial Officer of Edcon (Pty) Limited for ten years after having been financial manager at Investec Bank Limited for four years.

\*\*\* Mr Binnie joined Sappi as CFO-designate on July 09, 2012, and on the retirement of Mark Thompson, became CFO and joined the Sappi Limited board as an executive director on September 01, 2012.

Table of Contents

**Senior Management**

*Mark Gardner* (56) BSc (Industrial Technology), President and Chief Executive Officer of Sappi Fine Paper North America

Mr Gardner was named President and Chief Executive Officer of Sappi Fine Paper North America (SFPNA) in 2007 and is responsible for leading all Sappi operations in the region. That same year, he was also appointed to the SFPNA board. He joined Sappi in 1981 and his experience includes serving as the Vice President of Manufacturing and Vice President of Supply Chain, prior to which he worked in a variety of production management roles at Sappi, including Production Manager at the Westbrook Mill, Paper Mill Manager at the Somerset Mill, Managing Director at the Muskegon Mill and Director of Engineering and Manufacturing Technology at the regional head office in Boston.

In 2009, Mr Gardner received the TAPPI (Technical Association of the Pulp and Paper Industry)/PIMA (Paper Industry Management Association) Executive of the Year Award. The award is the highest recognition for leadership and management given by PIMA. He currently serves on the board of directors of the American Forest and Paper Association. In September 2012, he was appointed to the Board of Trustees for the University of Maine.

*Alexander van Coller Thiel* (51) BSc Mechanical Engineering, MBA (Financial Management and IT), Chief Executive Officer of Sappi Southern Africa

Mr Thiel joined Sappi in December 1989 as the executive assistant to the executive chairman in Johannesburg. In April 1993, as part of Sappi's expansion into Europe, he moved to Brussels as the administration manager reporting to the managing director of Sappi Europe. With the creation of Sappi Fine Paper Europe he was appointed in February 1998 as manager marketing intelligence, reporting to the sales and marketing director.

In January 2003, he became the director logistics, reporting to the chief executive officer of Sappi Fine Paper Europe. He was appointed as group head procurement, Sappi Limited in January 2008 and integration executive, in charge of the integration of the acquired business into Sappi's operations, in September 2008. He led a project to redefine and implement Sappi's 'go-to-market' strategy in Europe from October 2009. Mr Thiel was appointed chief executive officer of Sappi Southern Africa with effect from December 01, 2010.

*Berend (Berry) John Wiersum* (57) MA (Medieval and Modern History), Chief Executive Officer of Sappi Fine Paper Europe

Mr Wiersum joined Sappi in January 2007 as chief executive officer Sappi Fine Paper Europe. Prior to joining Sappi, Mr Wiersum was a freelance mergers and acquisitions consultant for one year. He previously was managing director of Kappa Packaging and member of the management board in Eindhoven (The Netherlands) where he was responsible for overseeing over 90 packaging plants across Europe, Russia, the Middle East and North Africa. Mr Wiersum was chairman of Cepi (Confederation of European Paper Industries) from 2011 to 2012.

*Andrea Rossi* (59) BSc Eng (Hons), C Eng, Group Head Technology

Mr Rossi joined Sappi in 1989. Prior to becoming group head technology, Mr Rossi held numerous roles in the company including project director Sappi Saiccor 'Amakhulu' expansion project, Sappi Kraft manufacturing director, managing director Sappi Forests, general manager Enstra Mill, and engineering services manager for Sappi Management Services.

*Lucia Adele Swartz* (55) BA, Dip HR, Group Head Human Resources

Ms Swartz joined Sappi in May 2002 in her current position. Prior to joining Sappi she worked for the Seagram Spirits and Wine Group as human resources director, Global Functions based in New York.

## Edgar Filing: SAPPI LTD - Form 20-F

### Table of Contents

*Maarten van Hoven* (39) BProc, LLM (International Business Law), Group Head Strategy and Legal

Mr van Hoven joined Sappi in December 2011. He is an admitted attorney of the High Court in South Africa and has held various positions at the South African Competition Commission, most recently as Divisional Manager: Mergers & Acquisitions. As well as being on the group Executive Committee he has joined the boards of Sappi Fine Paper Europe, Sappi Fine Paper North America and Sappi Southern Africa.

### **Executive Officers**

The executive directors and the people listed as senior leadership above are the executive officers of Sappi.

### **Compensation**

The non-executive directors' fees are proposed by the Executive Committee and agreed by the Compensation Committee and approved by the Board, subject to final approval by shareholders.

See notes 33 to 35 to our group Annual Financial Statements contained elsewhere in this Annual Report for details, by director, on Directors' and Senior Management remuneration, Directors' service contracts, Directors' interests and Directors' participation in the Sappi Limited Share Incentive Trust and Sappi Limited Performance Share Incentive Trust.

### **Board Practices**

At every annual general meeting, as near as possible to, but not less than, one third of the directors (excluding any director appointed after the conclusion of the preceding annual general meeting, the Chief Executive Officer and the Managing Director) are required to retire from office but are eligible for re-election. The directors to retire are those who have been longest in office since their last election, or as between directors who have been in office for an equal length of time since their last election, in the absence of agreement, determined by lot. In addition, the appointment of any director appointed since the last annual general meeting will be required to be confirmed. Any director so appointed will also retire at the meeting and be eligible for re-election.

The following table sets forth the terms of office of the Directors.

<b>Name</b>	<b>Start of term</b>	<b>Latest date of end of term</b>
Godefridus Peter Franciscus Beurskens	2012	2015
Stephen Robert Binnie <sup>(1)</sup>	2012	2013
Roeloff Jacobus Boöttger	2008	*
Daniël Christiaan Cronjé	2011	2014
Michael Anthony Fallon	2012	2015
Meyer Feldberg <sup>(2)</sup>	2011	2012

\*

In terms of the existing memorandum of incorporation (articles of association) as reflected above, any Chief Executive Officer and Managing Director are not required to retire by rotation.

- (1) Mr Binnie joined the board with effect from September 01, 2012.
- (2) Professor Feldberg will retire from the board at the end of December 2012.

Table of Contents

No retirement or other benefits arise from the retirement of Directors by rotation or on termination for any other reason.

***Audit Committee***

An Audit Committee of the Board was established in 1984 and assists the Board in discharging its responsibilities to safeguard the group's assets, maintain adequate accounting records and develop and maintain effective systems of internal financial control. It also oversees the financial reporting process and is concerned with compliance with accounting policies, group policies, legal requirements and internal controls within the group. It interacts with and evaluates the effectiveness of the external and internal audit process and reviews compliance with the group's code of ethics.

The Audit Committee is appointed by shareholders at the annual general meeting each year and consists of five independent non-executive directors of the Board (Deenadayalen Konar (Chairman), Godefridus (Frits) Peter Franciscus Beurskens, Michael Anthony Fallon, Nkateko Peter Mageza and Karen Rohn Osar) and is directed by a specific mandate from the Board. The adequacy of the mandate is reviewed and reassessed annually. The Chairman of the group attends Committee meetings ex-officio. The Audit Committee meets with senior management, which includes the Chief Executive Officer and the Chief Financial Officer, at least four times a year. The external and internal auditors attend these meetings and have unrestricted access to the Committee and its Chairman. The Audit Committee also meets at least once per year with the management Disclosure Committee. The external and internal auditors meet privately with the Audit Committee Chairman on a regular basis. The Audit Committee Chairman attends the annual general meeting. Deenadayalen Konar has been designated as the Audit Committee's financial expert. The Chief Executive Officer and the Chief Financial Officer attend meetings by invitation together with various management representatives.

Regional audit committees exist in the three major regions and are chaired by independent non-executive directors. These committees have a mandate from the group's audit committee, to whom they report on a regular basis, and they meet at least four times per year.

***Nomination and Governance Committee***

The Nomination and Governance Committee of the Board consists of four independent non-executive directors (Daniël Christiaan Cronjé, the chairman of the group and of the Committee, Meyer Feldberg, Deenadayalen Konar and Sir Anthony Nigel Russell Rudd). The Committee considers the composition of the Board, retirements and appointments of additional and replacement non-executive directors and makes appropriate recommendations to the Board. The Chief Executive Officer attends meetings by invitation.

***Human Resources and Compensation Committee***

The Human Resources and Compensation Committee of the Board consists of four independent non-executive directors (Meyer Feldberg, the Chairman of the Committee, Nkateko Peter Mageza, John David McKenzie and Sir Anthony Nigel Russell Rudd). The responsibilities of the Committee are, among other things, to determine human resource policy and strategy, and regarding compensation, mainly to determine the remuneration and incentives in respect of the Chief Executive Officer and those executives reporting directly to the Chief Executive Officer. The Chairman of the group attends meetings of the committee ex officio. The Chief Executive Officer and the Group Head Human Resources attend meetings by invitation.

***Social, Ethics, Transformation and Sustainability Committee***

The Social, Ethics, Transformation and Sustainability Committee of the Board consists of 3 independent non-executive directors, John "Jock" David McKenzie (Chairman), Bridgette Radebe, and

## Edgar Filing: SAPPI LTD - Form 20-F

### Table of Contents

Dr. Rudolf Thummer, as well as one non-executive director Mohammed Valli Moosa and the Chief Executive Officer, Mr. Roeloff "Ralph" Jacobus Boëttger. The Committee is constituted as a statutory committee of the Board of Sappi Limited in terms of section 72(4) of the Companies Act no 71 of 2008 read with regulation 43 of the Companies Regulations, 2011 ("the Regulations") and as a committee of the Board in respect of all other duties assigned to it by the Board.

The role of the Committee is to assist the board with the oversight of Sappi and to provide guidance to management's work in fulfilling its duties in the fields of social, ethics, transformation (relevant to South Africa) and sustainability. The Chairman of the group attends meetings of the committee ex officio. Various executives and senior managers attend meetings by invitation.

### **Corporate Governance**

The New York Stock Exchange (NYSE) requires compliance with its corporate governance rules. The application of these NYSE rules is restricted for foreign companies, recognizing that such companies have to comply with domestic requirements. As a foreign private issuer, Sappi must comply with four NYSE corporate governance rules:

Satisfy the audit committee requirements of the Securities and Exchange Commission (SEC);

Chief Executive Officer must promptly notify the NYSE in writing after any executive officer of the listed company becomes aware of any material non-compliance with any applicable provisions of Section 303(A) of the Sarbanes-Oxley Act of 2002;

Provide a brief description of any significant difference between its corporate governance practices and those followed by United States companies under the NYSE listing standards, and

Maintain a publicly accessible website that includes a printable version of its audit committee charter and the description of significant differences in corporate governance practices mentioned above. In accordance with new NYSE rules, Sappi continues to make available on its website its Annual Reports on Form 20-F.

As Sappi is listed on the JSE Limited in Johannesburg, Sappi is required to comply with the King III Report on Corporate Governance for South Africa (King Report). Although there are differences between the King Report and the NYSE corporate governance rules, Sappi applies the principles of the King Report and has voluntarily adopted corporate governance practices that do not differ in any significant ways from the requirements of the NYSE corporate governance rules.

### **Employees**

The following table sets forth the number of full-time equivalent employees as at the close of each fiscal year ended September.

	<b>2012</b>	<b>2011</b>	<b>2010</b>
Sappi Fine Paper North America	2,185	2,224	2,247
Sappi Fine Paper Europe	5,765	6,025	6,659
Sappi Southern Africa	5,856	6,378	6,446
Sappi Trading	145	149	148
Other	88	86	86
<b>Total</b>	<b>14,039</b>	<b>14,862</b>	<b>15,586</b>

### ***Sappi Fine Paper North America***

Approximately 65% of employees are represented by eleven collective bargaining agreements with seven different unions. The majority of Sappi Fine Paper North America's hourly employees are

Table of Contents

represented by the United Steelworkers (USW) union. The labor contract with the Cloquet USW union expired in May 2012 and is operating pursuant to an extension while the parties continue to negotiate. The labor contracts with the Somerset and Westbrook USW unions expire in August 2013 and August 2014, respectively.

Sappi Fine Paper North America has experienced no work stoppage in the past twenty one years and believes that its relationship with its employees is satisfactory. In maintaining this relationship, we hope to reach agreements with our unions as contracts expire. In the event that an agreement cannot be reached with any of the unions and a prolonged work stoppage ensues, curtailment of output could negatively impact our business.

***Sappi Fine Paper Europe***

A substantial number of Sappi Fine Paper Europe employees are represented by trade unions.

Sappi Fine Paper Europe is subject to industry-wide collective agreements that are in place with trade unions in Germany, Finland, Austria and Belgium and which relate to its employees in each of the relevant mills. At our mills in The Netherlands, Sappi Fine Paper Europe has entered into shop-floor agreements with the respective trade unions. Although we have in the past and may in the future experience work stoppages and other labor conflicts, overall labor relations have been stable in Europe.

In addition to trade unions, Sappi Fine Paper Europe also consults with various local, national and European works councils. These works councils primarily serve in an advisory role. Sappi Fine Paper Europe is required, under certain circumstances, to keep the works councils informed of activities that affect the workforce and to consult with one or more of the works councils before proceeding with a course of action. This is especially relevant for any major reorganization.

During fiscal 2012, we announced and started implementing the transfer and outsourcing of some central administrative functions from various Sappi Fine Paper Europe locations to Cracow, Poland. The transfer of approximately 60 positions is expected to be completed by March 2013. In addition we implemented approximately 70% of the fixed cost reduction (about 330 positions, announced in the summer of 2011) across all our manufacturing sites.

There were no work stoppages across our European organization except in Lanaken for one full day in the context of a nation-wide strike in Belgium against planned reduction of state social security and other benefits.

***Southern Africa***

In our southern African operations 46% of employees are represented by four trade unions. Our wage negotiations with recognized trade unions take place at the Pulp and Paper Bargaining Council and Saw Milling Chamber in South Africa, and our agreements are generally annual. Most of the union members in this region are blue collar workers and artisans. The 2012 wage negotiations were successfully concluded in August 2012 without any disruption to production due to industrial actions. We agreed wage increases for our pulp and paper operations at 7.5% and for our sawmills at 7%.

The southern African region has one of the highest infection rates of HIV/AIDS in the world. The HIV/AIDS programme is aimed at addressing the effects of HIV/AIDS on our employees and its impact on our business. Strategic interventions to manage the pandemic and prevent new infections were initiated in 1992. The key elements of the HIV/AIDS management programme include health risk assessments and counseling services. The health risk assessment mechanism assesses the health risk levels among our employees, and channels the high risk individuals into various managed programs. Sappi Southern Africa has now reached a position where more than 56.3% of our southern African employees check their HIV status every year. Regular voluntary counseling and testing ("VCT") ensures that we achieve early diagnosis of HIV infection to ensure timely access to care.

Table of Contents

Following the first anonymous voluntary prevalence tests in 2003, a fourth comprehensive voluntary study was conducted during 2012 in all of our southern African operations. Based on a participation rate of greater than 80%, at the locations tested, we estimate that the overall infection rate in our southern African operations has stabilized at approximately 14.9%, which compares favorably with the national average (19.2%). In response to these surveillance results, renewed focus has been placed on the HIV/AIDS management programme so as to further contribute to the effective containment of the pandemic. We estimate that approximately 63% of our employees that are HIV/AIDS positive participate in our HIV/AIDS managed care programs. Furthermore, the impact of HIV/AIDS on a company is generally reflected in the mortality rate of its employees. Sappi Southern Africa's mortality rate has more than halved from a high level of 1.12% in 2005 to a rate of 0.68% in fiscal 2012.

Each Sappi operation in southern Africa has also identified the relevant role players in their geographical area and is working with them on the implementation of a comprehensive HIV/AIDS programme, thereby eliminating duplication and making optimum use of relevant resources through private-public sectors partnerships.

The Employment Equity Act which was promulgated in 1998 (No. 55 of 1998) requires certain employers to implement affirmative action measures designed to ensure that suitably qualified persons from previously disadvantaged groups (Blacks, Coloreds and Indians) have equal opportunities and are equitably represented in all occupational categories and levels in the workforce. In addition, the amended Act requires a ballot process prior to commencing with any labor strike. In complying with the Act, Sappi Southern Africa has developed the Transformation Charter, which is a strategy document aimed at driving organizational transformation and that supports the Employment Equity initiatives. A Transformation Committee comprising executive managers has been established to lead and oversee the company's compliance with the Transformation Charter, Employment Equity and BBBEE commitments. All South African companies who by law have to comply with the Act, have to report annual progress on Employment Equity to the Department of Labour. The 2013 Employment Equity report will be submitted in January 2013 as per the Department of Labour schedule.

The Skills Development Act (No. 97 of 1998), Skills Development Levies Act (No. 9 of 1999) and the National Qualifications Framework Act (67 of 2008) were promulgated to address skills shortage. This has been cited as a major obstacle to economic growth, social development and sustainable employment growth in South Africa. There has been significant attention given to comply with these Acts, through the Employment Equity forum. A mandatory company skills levy of 1% of total payroll, specified in accordance with the Skills Development Levies Act, was paid to the Fibre Processing and Manufacturing Sectorial Education Authority ("FPM SETA"). The percentage of this skills levy is claimable as a discretionary grant, based on the company's implementation of the learning and development programs.

A priority and focus of Sappi Southern Africa is to improve the business competitiveness and profitability. We identified certain improvement plans including restructuring the business through managing and better aligning overheads to our business strategy. Restructuring within Sappi Southern Africa commenced in July 2011, where approximately 1,000 employees were affected, of which 694 employees were retrenched in fiscal 2012. The Adamas Mill was closed and 174 employees were retrenched by August 2011. Other restructuring processes took place within support services and operations. A hub functional structure for support services was adopted with the aim of reducing duplication of activities, inefficiencies and high overheads as well as increasing economies of scale. Further restructuring commenced during October 2012 with the mothballing of Paper Machine 4 at our Tugela Mill, which will result in approximately 300 employees being retrenched or redeployed and this process is expected to be finalized during December 2012.

Table of Contents

**Share Ownership**

***The Sappi Limited Share Incentive Trust ("Scheme")***

We have offered a share purchase scheme to eligible officers and employees since 1979. During March 1997, The Sappi Limited Share Incentive Trust, as amended from time to time (the "Share Incentive Scheme"), was adopted at the Annual General Meeting of Sappi Limited. Under the Share Incentive Scheme, Officers or other employees of Sappi, its subsidiaries and other entities controlled or jointly controlled by Sappi selected by the Sappi Board of Directors are offered the opportunity to acquire shares ("Scheme Shares"), options to acquire shares ("Share Options") or rights and options to enter into agreements with the Sappi Limited Share Incentive Trust to acquire shares ("Allocation Shares"). Participants have only been offered Share Options in recent years.

The JSE Limited (Johannesburg Stock Exchange) amended Schedule 14 of its Listings Requirements in its entirety. As a result the Sappi Limited Share Incentive Trust revised its rules in fiscal 2009 to comply with the new Schedule 14. The main change for the Scheme is the limitation of Trustees and Sappi Limited Board of Directors' discretionary powers relating to prospective Scheme share issues to its participants. Other minor amendments to the rules were also made to comply with the new requirements. The JSE has approved the revised Sappi Limited Share Incentive Trust rules. The revised rules became effective in January 2011. See "Item 19 Exhibits Exhibit 4.1" for the Sappi Limited Share Incentive Trust rules as approved by the Company and the JSE.

***The Sappi Limited Performance Share Incentive Trust ("Plan")***

From the 2005 fiscal year we have also offered a performance share incentive plan to eligible officers and employees. Under the Sappi Limited Performance Share Incentive Trust (the "Performance Share Incentive Plan"), officers or other employees of Sappi, its subsidiaries and other entities controlled or jointly controlled by Sappi selected by the Sappi Board of Directors are offered Conditional Contracts to acquire Shares for no cash consideration. If the performance criteria from time to time determined by the Human Resources Committee or Compensation Committee of the Board ("Performance Criteria") applicable to each Conditional Contract are met or exceeded, then Participants are entitled to receive such number of shares as specified in the Conditional Contract for no cash consideration after the fourth anniversary of the date on which the board resolves to award a Conditional Contract to that Participant. The Performance Criteria entails a benchmarking of the company's performance against an appropriate peer group of companies.

The JSE Limited (Johannesburg Stock Exchange) amended Schedule 14 of its Listings Requirements in its entirety. As a result the Sappi Limited Performance Share Incentive Trust revised its rules in fiscal 2009 to comply with the new Schedule 14. The main change for the Plan is the limitation of Trustees and Sappi Limited Board of Directors' discretionary powers relating to prospective plan conditional share awards to its participants. Other minor amendments to the rules were also made to comply with the new requirements. The JSE has approved the revised Sappi Limited Performance Share Incentive Trust rules. The revised rules became effective in January 2011. See "Item 19 Exhibits Exhibit 4.14" for the Sappi Limited Performance Share Incentive Trust rules as approved by the Company and the JSE.

For a detailed description of the Sappi Limited Share Incentive Trust and the Sappi Limited Performance Share Incentive Trust see Note 28 to our group Annual Financial Statements included elsewhere in this Annual Report.

***Black Economic Empowerment Trusts ("BEE Trusts")***

In June 2010, Sappi completed a BEE deal to comply with South African legislation to increase the participation of Historically Disadvantaged South Africans in the South African economy. The BEE deal

Table of Contents

resulted in the BEE Trusts and certain strategic partners holding, collectively, Ordinary and "A" Ordinary Shares equivalent to 4.5% of Sappi Limited, which corresponded to an effective 30% interest in Sappi's South African business post the deal. The 30% is in terms of the Forestry Charter and BEE legislation in general.

Under the deal "A" Ordinary shares were issued to the BEE Trusts. These "A" Ordinary shares were financed by notional loans from Sappi Limited to the BEE Trusts. The loans are repayable on August 30, 2019 when the shares convert to ordinary shares based on a conversion formula. The BEE Trusts consist of three trusts, the ESOP Trust for the benefit of certain employees of Sappi's South African business, the MSOP Trust for the benefit of Black Managers of Sappi's South African business and the Sappi Foundation for the benefit of certain local communities in South Africa.

For a detailed description of the BEE Trusts see Note 28 to our group Annual Financial Statements included elsewhere in this Annual Report and see "Item 7 Major Shareholders and Related Party Transactions Related Party Transactions".

***Directors and Senior Management***

At the end of fiscal 2012, certain Directors and Senior Management of Sappi had been granted an aggregate of 165,220 Share Options and 3,078,000 Performance Shares. None of the Directors and Senior Management of Sappi holds more than 1% of our issued share capital. See notes 33 to 35 to our group Annual Financial Statements contained elsewhere in this Annual Report for details individually by director and for senior management, of participation in the Sappi Limited Share Incentive Trust and the Sappi Limited Performance Share Incentive Trust.

The director Mr M V Moosa is the Deputy Chairman of Lereko Investments (Pty) Ltd and holds 31.8% of Lereko Investments. Lereko Investments holds 1,971,693 Sappi Limited shares as part of the BEE transaction.

Table of Contents**ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS****Major Shareholders**

The following table sets forth certain information with respect to the ownership of the ordinary shares, R1.00 par value, of Sappi Limited by the shareholders of record of Sappi Limited as of September 28, 2012, holding 5% or more of the outstanding ordinary shares. There have been no significant changes in percentage of ownership by any major shareholder during fiscal 2012, 2011 and 2010.

Name of Registered Holder	Number of Shares	Percentage
Nedcor Bank Nominees Limited <sup>(1)</sup>	156,731,527	30.1
Standard Bank Nominees (Transvaal) (Pty) Limited <sup>(1)(2)</sup>	134,104,113	25.7
First National Nominees (Pty) Limited <sup>(1)</sup>	98,060,202	18.8
ABSA Nominees (Pty) Limited <sup>(1)</sup>	65,760,529	12.6
Public Investment Commissioner (PIC)	54,428,941	10.5
All Directors and Executive Officers as a Group	930,287	0.18

(1)

The registered holders have advised us that they hold shares for numerous clients.

(2)

Includes all the ADS shares which are held through the Standard Bank Nominees (Transvaal) (Pty) Limited.

The authorized share capital of Sappi Limited which consisted of 325,000,000 Ordinary Shares as of September 28, 2008, was increased to 1,325,000,000 on November 04, 2008, and was subsequently reduced to 725,000,000 on March 02, 2009. On April 29, 2010, the authorized share capital was increased by 19,961,476 "A" Ordinary Shares with a par value of ZAR1.00 per "A" Ordinary Share. The "A" Ordinary Shares rank *pari passu* with the ordinary shares in all respects except for dividend entitlements where the "A" Ordinary Shares are entitled to 50% of the dividends payable on the ordinary shares.

On June 11, 2010 Sappi issued 4,328,359 Ordinary Shares and 19,961,476 "A" Ordinary Shares, as part of the BEE transaction. See " Related Party Transactions" and Notes 17 and 28 of our group Annual Financial Statements contained elsewhere in this Annual Report for details relating to the BEE transaction.

As of September 30, 2012, the issued Ordinary Share capital consisted of 541,446,223 Ordinary Shares, of which 20,601,761 Ordinary Shares are held in treasury. The remaining 520,844,462 issued Ordinary Shares have full voting rights. The issued "A" Ordinary Share capital consisted of 19,961,476 "A" Ordinary Shares, issued as part of the BEE transaction. The issued "A" Ordinary Shares are treated as treasury shares as the share trusts owning such shares are considered special purpose entities under IFRS. The "A" Ordinary treasury shares differ from the 20,601,761 Ordinary Shares held in treasury, in that the "A" Ordinary treasury shares have full voting rights. The Ordinary Shares are listed shares, whilst the "A" Ordinary shares are unlisted shares. The "A" Ordinary Shares have the potential to convert into Ordinary Shares in 2019. See " Related Party Transactions" for a summary of the conversion into Ordinary Shares.

It is common in South Africa for shares to be held through nominees. As of September 28, 2012, the four largest ordinary share, shareholders of record (all of which are nominees) owned approximately 89.3% of the shares. We believe that, as of September 28, 2012, based on registered addresses and disclosure by nominee companies, 16% of our shares were held beneficially in North America, 75% of our shares were held beneficially in South Africa and 9% of our shares were held beneficially in Europe and elsewhere, excluding the shares owned by our subsidiaries.

On September 28, 2012, there were 35 registered holders of ADSs holding 7,985,332 ADSs, representing 1.5% of our issued share capital.

Table of Contents

Pursuant to the Companies Amendment Act Number 37 of 1999, where securities of an issuer are registered in the name of a person and that person is not the holder of the beneficial interest in all of the securities held by the registered shareholder, the registered shareholder is obliged, at the end of every three-month period to disclose to the issuer the identity of each person on whose behalf the registered holder holds securities and the number and price of securities issued by that issuer held on behalf of each such person. We have authorized JP Morgan Cazenove to conduct a monthly investigation into the beneficial ownership of Sappi Limited shares including those in nominee holdings. All beneficial holdings are investigated to determine whether there are any shareholders who hold 5% or more of our shares and these investigations have as of September 28, 2012, revealed the following beneficial holders of more than 5% of the issued share capital of Sappi Limited:

<b>Name of Shareholder</b>	<b>Number of Shares</b>	<b>Percentage</b>
Public Investment Commissioner (South Africa)	54,428,941	10.5

Further, as a result of these investigations, we have ascertained that some of the shares registered in the names of the nominee holders are managed by various fund managers and that, as of September 28, 2012, the following fund managers were responsible for 5% or more of the issued share capital of Sappi Limited.

<b>Name of Fund Manager</b>	<b>Number of Shares Managed</b>	<b>Percentage</b>
Allan Gray Investment Council (South Africa)	111,124,997	21.4
Investec Asset Management (South Africa)	78,606,338	15.1
Coronation Fund Managers (South Africa)	53,977,823	10.4

Under South African law, there is no obligation on the part of our shareholders to disclose to us arrangements or understandings that may exist between or amongst them with respect to the holding or voting of shares unless such arrangement or understanding constitutes an affected transaction under the South African Companies Act, No. 71 of 2008. An "affected transaction" in respect of a company includes a transaction or series of transactions amounting to the disposal of all or the greater part of the assets or undertaking of the company, an amalgamation or merger involving the company, a scheme of arrangement between a company and its shareholders, the acquisition of, or announced intention to acquire, a beneficial interest in voting securities of the company, the announced intention to acquire a beneficial interest in the remaining voting securities of the company not already held by a person or persons acting in concert, a mandatory offer for the company's voting securities and a compulsory acquisition of the company's voting securities.

In November and December 2008, Sappi conducted a renounceable rights offer of 286,886,270 new ordinary shares of ZAR1.00 each to qualifying Sappi shareholders recorded in the shareholders register at the close of business on Friday November 21, 2008, at a subscription price of ZAR20.27 per rights offer share in the ratio of 6 rights offer shares for every 5 Sappi shares held. The rights offer was fully subscribed and the shareholders received their shares on December 15, 2008. The rights offer raised ZAR5,815,184,693 (approximately US\$575 million) which was used to partially finance the acquisition of the coated graphic paper business of M-real Corporation (now known as Metsä Board) and related costs.

On December 31, 2008, a €32 million equivalent in ZAR portion of the acquisition consideration was funded through the issue of 11,159,702 ordinary shares of Sappi Limited to M-real Corporation (now known as Metsä Board) (the "Consideration Shares"), with the actual number of such Consideration Shares having been determined based on the average weighted closing price of the shares and certain adjustments in respect of the rights offering and other anti-dilutive protections.

Table of Contents

**Related Party Transactions**

For information on related party transactions, see note 30 to our group Annual Financial Statements contained elsewhere in this Annual Report.

In June 2010, Sappi completed a Broad Based Black Economic Empowerment ("BEE") transaction (the "BEE Transaction"). The South African government has through the years promulgated various pieces of legislation to increase the participation of Historically Disadvantaged South Africans ("HDSAs") in the South African economy and, through BEE legislation, formalized the country's approach in this regard. See "Item 5 Operating and Financial Review and Prospects South African Economic and Political Environment".

In April 2006 Sappi announced a BEE transaction (the "Plantation BEE Transaction") with Lereko Property Company (Pty) Limited ("LPC"), a BEE company set up to house a consortium consisting of Lereko Investments (Pty) Limited, AMB Capital Limited and Malibongwe Women Development Trust (collectively, the "Strategic Partners"), pursuant to which LPC acquired a 25% undivided share in Sappi's South African plantation land, excluding the value of the plantations, owned by Sappi and/or Sappi Southern Africa (Pty) Ltd (previously Sappi Manufacturing), coupled with the right to develop the land not utilized for forestry operations. Sappi Southern Africa retained the right of use over all the land under the underlying arrangements. As part of the Plantation BEE Transaction, 30% of LPC was set aside for the benefit of certain categories of Sappi's South African employees, who did not participate in any Sappi share incentive scheme. The balance of the shareholding in LPC was held by Lereko Investments (46.19%), Malibongwe (10.14%) and AMB Capital (13.67%).

However, the Plantation BEE Transaction did not meet Sappi's undertakings under the Forestry Charter gazetted in June 2009 (which sets the objectives and principles for BEE in the forestry industry and includes the BEE scorecard and targets to be applied, as well as certain undertakings by government and South African forestry companies to assist the forestry industry to achieve its BEE targets). Accordingly, Sappi decided to unwind the Plantation BEE Transaction, which resided at a South African subsidiary level, and to implement the BEE Transaction, a new sustainable transaction of equivalent value at the holding company level using its listed securities.

Sappi views BEE as a key requirement for sustainable growth and social development in South Africa. The BEE Transaction enabled Sappi to meet its BEE targets in respect of BEE equity ownership.

Table of Contents

The BEE Transaction, comprised two distinct parts. The first part entailed the issue of ordinary shares to the Strategic Partners and the Sappi employees who were to be participants in the Plantation BEE Transaction, as part of the unwinding of the rights from that transaction. The second part consisted of the creation and issuance of a new class of unlisted equity shares referred to as "A" Ordinary shares. The "A" Ordinary shares were issued at their par value of ZAR1.00 to a trust for the benefit of certain Sappi employees including HDSAs (the "ESOP Trust"), a trust for the benefit of certain Sappi managers that are HDSAs (the "MSOP Trust") and a trust for the benefit of tree growers and communities surrounding the major mills and/or plantations operated by Sappi in South Africa (the "Sappi Foundation Trust", and together with the ESOP Trust and the MSOP Trust, the "BEE Trusts"). The issuance of the "A" Ordinary shares was financed through notional non-interest bearing loans extended by Sappi to the BEE Trusts. The BEE Transaction resulted in the BEE Trusts and the Strategic Partners holding, collectively, ordinary and "A" Ordinary shares equivalent to 4.5% of the share capital of Sappi Limited, which corresponds to an effective 30% interest in Sappi's South African business under the Forestry Charter and BEE legislation in general.

The total value of the BEE Transaction, based on the 30 day volume weighted average price ("VWAP") of Sappi's ordinary shares as at Friday February 05, 2010 of ZAR33.50 amounted to approximately ZAR814 million (US\$115 million). As part of the BEE transaction, Sappi issued an aggregate of approximately 24.3 million shares, comprising approximately 4.3 million Ordinary shares and approximately 20 million "A" Ordinary shares. The value of their shareholding in LPC attributable to the Strategic Partners is ZAR102.1 million and the value of the South African employees' 30% entitlement in LPC, which will be held through the ESOP Trust, is ZAR42.9 million.

The "A" Ordinary shares rank *pari passu* with and have the same rights and obligations attached as the ordinary shares in all respects except for dividend entitlements where the "A" Ordinary shares are entitled to 50% of the dividends payable on the ordinary shares. The "A" Ordinary shares have the same voting rights as ordinary shares but are not listed on the JSE.

Sappi will have the option to repurchase a number of "A" Ordinary Shares at the end of the Transaction in August 2019. The number of "A" Ordinary Shares Sappi may be entitled to repurchase will be calculated according to a repurchase formula set forth in Article No. 38 of Sappi's Articles of Association. The number of any "A" Ordinary Shares that Sappi may elect to buy back in August 2019 will depend on the price performance of the Ordinary Shares over the period of the Transaction with the remaining "A" Ordinary Shares being distributed to the beneficiaries of the BEE Trusts (or, in the case of the Sappi Foundation Trust, continued to be held by such trust) and converted into Ordinary Shares. See "Item 10 Additional Information Memorandum and Articles of Association Share Capital" for a description of the "A" ordinary shares.

For financial reporting purposes the "A" Ordinary Shares are treated as treasury shares, as the BEE Trusts owning such shares are considered special purpose entities under IFRS.

The BEE deal involved the specific issue for cash of Ordinary Shares at full market value and "A" Ordinary Shares at par value. For further information on the resolution authorizing the change in the Company's Articles of Association relating to the "A" Ordinary Shares and the repurchase formula for the "A" Ordinary Shares, see "Item 19 Exhibits 1.1 and 1.3".

**ITEM 8. FINANCIAL INFORMATION**

**Consolidated Statements and Other Financial Information**

See the group Annual Financial Statements contained in this Annual Report for the Report of the Independent Auditors.

**Legal Proceedings**

We become involved from time to time in various claims and lawsuits incidental to the ordinary course of our business. We are not currently involved in any such claims or lawsuits which, individually or in the aggregate, are expected to have a material adverse effect on our business, assets or properties (see note 26 to the group annual financial statements contained elsewhere in this report).

***North America***

*Westbrook Mill and the Department of Inland Fisheries and Wildlife State of Maine.* On June 29, 2009, the Commissioner of the Department of Inland Fisheries and Wildlife, State of Maine (the "Commissioner"), issued a decision requiring Sappi Fine Paper North America to install a fish passage at the Cumberland Mills dam associated with the Westbrook Mill, the most downriver dam on the Presumpscot River. Pursuant to a final order issued by the Commissioner, construction of the fish passage must be completed by May 01, 2013. Costs associated with construction and related engineering of this fish passage are estimated to be approximately US\$4 million to US\$5 million. Fish passage at the next dam upstream, the Saccarappa hydrofacility, must be operational two years after the Cumberland Mills dam fish passage is completed (i.e., during the spring of 2015). Installation of the Cumberland Mills dam fish passage may also trigger, over a period of approximately ten years, the obligation to install fish passages for at least some of Sappi Fine Paper North America's other upstream hydrofacilities as well, to allow natural fish migration and thus promote the restoration of native species to the river. The total cost of all fish passages associated with Sappi Fine Paper North America's dams along the Presumpscot River is estimated to be in the range of approximately US\$18 million to US\$28 million, which includes costs expected to be incurred in the next several years for the fish passage on the Cumberland Mills dam and Saccarappa hydrofacility as well as estimated costs for upstream fish passages which may be incurred in the future. Because construction of additional fish passages depends on several future contingencies, including the results of data gathering on fish populations in the river, Sappi Fine Paper North America does not know the precise timing for incurring related future costs, assuming such obligations are triggered.

***South Africa***

The Restitution of Land Rights Act (Act 22 of 1994), as amended, provides for the restoration of rights in land or other equitable redress to persons or communities dispossessed of their land rights after June 19, 1913 as a result of old laws or practices discriminating on the basis of race. The legislation empowers the Minister of Land Affairs to expropriate land in order to restore it to a successful claimant provided that there is just and equitable compensation to the owner of the land. Claims under the Act were required to be filed on or before December 31, 1998 and are presently being processed by the Commission on Restitution of Land Rights and adjudicated upon by the Land Court. This process is expected to continue for many years. As one of the largest land owners in South Africa, we anticipate that a substantial number of claims may affect land we own. The process of determining the extent of claims filed in respect of our land and the potential impact of these claims on our South African operations continues. There are currently 60 open land claims against us, of which 42 are in the province of Mpumalanga and 18 are in the province of KwaZulu-Natal. So far, 23 of the claims in KwaZulu-Natal have been withdrawn as have 2 in Mpumalanga. Another 9 claims in KwaZulu-Natal are in the process of being settled. In addition, we have made an offer for the settlement of 4 further claims in KwaZulu-Natal

Table of Contents

and 21 claims in Mpumalanga. These settlements involve the sale of the portions of the land subject to the respective claims at prices to be agreed with the Commissioner on Restitution of Land Rights, alternatively the claimants have opted for payment of compensation from the Government in lieu of land. The remaining claims have not been finalized and are still under investigation by the Regional Land Claims Commissioner.

In September 2012, the Competition Commission of South Africa notified Sappi that it has initiated an investigation into alleged anti-competitive behaviour between Sappi and a competitor in the South African pulp and paper market. We understand that the investigation is at an early stage.

**Dividends**

We consider the payment of dividends on an annual basis. Taking into account the global financial market conditions, our investments in dissolving wood pulp, and our priority to reduce indebtedness and preserve liquidity, the Board of Directors decided not to declare a dividend for fiscal 2012. No dividend was paid in fiscal 2011 and 2010 respectively.

Our ability to pay dividends is restricted by the terms of the Revolving Credit Facility and the 2017 Notes, 2018 Notes, 2019 Notes and 2021 Notes. Under the Revolving Credit Facility and the OeKB Facility, we cannot declare or pay any cash dividends in, among others, the following circumstances:

- (a) an event of default has occurred and is continuing;
- (b) the aggregate amount of such dividends would exceed 100% of the net aggregate profits of the group (after adjusting for special items and the tax effects thereon);
- (c) the ratio of net debt to EBITDA calculated on a pro-forma basis exceeds 4.00:1.

Under the 2017 Notes, 2018 Notes, 2019 Notes and 2021 Notes, we are restricted from making restricted payments (which term includes cash dividend payments) except if:

- (a) no event of default has occurred and is continuing (or would occur as a result of such payment); and
- (b) after giving *pro forma* effect to the payment and certain other transactions, the ratio of consolidated EBITDA to fixed charges (net finance costs) is greater than 2.00:1; and
- (c) the aggregate amount of restricted payments (including the contemplated restricted payment) since July 29, 2009 is less than the sum of 50% of consolidated net income (or if a deficit, 100% of such deficit) from such date to the end of the most recent quarterly reporting period, 100% of cash equity contributions and certain other amounts since such date.

The restrictions summarized above are subject to various exceptions, certain of which are significant. Terms used above have the meaning ascribed to them in the relevant agreements. For the full terms of the restrictions on dividend distributions and exceptions thereto, see "Item 19 Exhibits Exhibit 4.10, Exhibit 4.12, Exhibit 4.18, Exhibit 4.19, Exhibit 4.20, Exhibit 4.21, Exhibit 4.23, Exhibit 4.24 and Exhibit 4.25".

Under the South African Companies Act any distribution, including dividends, is subject to the Company meeting the solvency and liquidity requirements of the Act. Holders of American Depositary Receipts ("ADRs") on the relevant record date will be entitled to receive any dividends payable in respect of the shares underlying the ADSs, subject to the terms of the Deposit Agreement among us, The Bank of New York Mellon and the ADR holders (the "Deposit Agreement"). There is no restriction under South African exchange control regulations on the free transferability of cash dividends to non-resident shareholders or ADS holders (provided the necessary endorsements are obtained). See "Item 10 Additional Information Exchange Controls".

Table of Contents

South African companies paid Secondary Tax on Companies ("STC") until March 31, 2012 at a flat rate of 10% in respect of the amount of dividends declared by the company less certain dividends which accrue to the company during its relevant "dividend cycle". STC has been replaced with a dividend withholding tax ("DWT") with effect from April 01, 2012. The DWT is imposed on the shareholder and not on the company and is levied on the shareholder at a rate of 15%, subject to a reduction in terms of an applicable Double Taxation Agreement. In contrast to STC, the new DWT is a tax on the shareholder, although it is collected as a withholding tax by the company paying a dividend, which implies that Sappi Limited incurs the obligation to withhold the DWT.

**Significant Changes**

Except as otherwise disclosed in this Annual Report, no significant change has occurred in our financial position since September 30, 2012.

Table of Contents**ITEM 9. THE OFFER AND LISTING****Offer and Listing Details**

The table below sets forth, for the periods indicated, the high and low prices of trading activity in the shares on the JSE Limited ("JSE"), as reported by the JSE and adjusted for the dilution effects of the rights issue discussed below; and the high and low prices of trading activity in the ADSs on the New York Stock Exchange ("NYSE"), as reported by the NYSE and adjusted for the dilution effects of the rights issue discussed below.

In November and December 2008, Sappi conducted a renounceable rights offer of 286,886,270 new ordinary shares of ZAR1.00 each to qualifying Sappi shareholders recorded in the shareholders register at the close of business on Friday November 21, 2008, at a subscription price of ZAR20.27 per rights offer share in the ratio of 6 rights offer shares for every 5 Sappi shares held. The rights offer was fully subscribed and the shareholders received their shares on December 15, 2008. The rights offer raised ZAR5,815,184,693 (approximately US\$575 million) which was used to partly finance the acquisition of the coated graphic paper business of M-real Corporation (now known as Metsä Board) and related costs.

(1)

Historical share prices relating to December 2008 shown in the table above have been adjusted where applicable by 1.58 (an adjustment factor) for the effect of the issuance of 286,886,270 new ordinary shares of ZAR1.00 each, at a subscription price of ZAR20.27 per rights offer share in the ratio of 6 rights offer shares for every 5 Sappi shares held. The adjustment factor applied to historical share prices was based on the theoretical ex-rights price ("TERP") calculation explained below.

TERP is the [(Number of new shares multiplied by the Subscription price) plus the (Number of shares held multiplied by the Ex-dividend share price)] all divided by the (Number of new shares plus the number of shares held prior to the rights offer).

The adjustment factor of 1.58 is calculated using the Pre-announcement price divided by the TERP.

Table of Contents

On November 27, 2012, the closing price for our shares on the JSE was 2,822 SA cents per share and the closing price of the ADSs on the NYSE was US\$3.18 per ADS.

**Markets**

The principal market for the ordinary shares of Sappi Limited is the JSE. The ordinary shares of Sappi Limited were also listed on the London Stock Exchange until November 02, 2009, at which time the shares were delisted from the London Stock Exchange. On November 05, 1998, ADRs evidencing ADSs of Sappi Limited commenced trading on the NYSE under the symbol "SPP". The Bank of New York serves as depositary ("the Depositary") with respect to the ADSs. Prior to the commencement of trading of the ADSs on the NYSE, our ordinary shares were traded in the United States in the over-the-counter market pursuant to a sponsored unrestricted American Depositary Receipt facility established in 1994. Price data relating to that trading is not considered meaningful and has not been included in this Annual Report.

On October 26, 1999, Sappi and The Bank of New York amended the Deposit Agreement to change, with effect from October 27, 1999, the number of ordinary shares represented by each ADS from 10 ordinary shares per ADS to one ordinary share per ADS.

***The JSE Limited***

The JSE Limited ("JSE") was formed in 1887 and provides facilities for the buying and selling of a wide range of securities, including equity, corporate debt securities, warrants in respect of securities, as well as Krugerrands. The JSE is a self-regulatory organization operating under the supervision of the South African Ministry of Finance, through the Financial Services Board and its representative, the Registrar of Stock Exchanges.

The market capitalization of South African equity securities was ZAR6,893.2 billion as at October 02, 2012. The actual float available for public trading is significantly smaller than the aggregate market capitalization because of the large number of long-term holdings by listed holding companies in listed subsidiaries and associates, the existence of listed pyramid companies and cross holdings between listed companies. Liquidity on the JSE (measured by reference to the total market value of securities traded as a percentage of the total market capitalization at the end of the period) was 47% for the 12 months ended October 02, 2012. As of the end of October 2012, there were 419 listed companies on the JSE.

Following the introduction of the FTSE/JSE free float indices, the FTSE/JSE All Share Index includes those companies that qualify under rules 4.1 4.4 of the FTSE/JSE Africa Index Series ground rules. The three main sectors in the market are Resources, Financials and Industrials. As of October 02, 2012, the All Share Index included 162 companies. The Resources Index, Industrials Index and Financials Index included 21, 91 and 50 companies respectively, and accounted for approximately 25%, 55% and 20% respectively, of the total market capitalization of the JSE.

The JSE settles securities trades electronically through STRATE ("Share Transactions Totally Electronic"). All trades are downloaded from the JSE SETS automated trading system to the JSE's Broker Deal Accounting ("BDA") system, which manages the settlement status of every trade. The BDA system interfaces with STRATE's system which in turn interfaces with those of the custodian banks. The JSE's Settlement Authority monitors all trades from time of execution to settlement to ensure performance.

Shares may not be traded on the JSE unless they have been dematerialized through STRATE. Contractual, rolling settlement has been introduced by the JSE in order to increase the speed, certainty and efficiency of the settlement mechanism and to fall into line with international practices. While settlement on the JSE is currently made five days after each trade (T+5), the JSE in conjunction with STRATE is exploring with the industry how best to reduce the settlement period further (to T+3) without introducing undue risk.

Table of Contents

**ITEM 10. ADDITIONAL INFORMATION**

**Memorandum and Articles of Association**

The following description is a summary of various provisions of the Memorandum ("Memorandum") and Articles of Association ("Articles") of Sappi Limited, the South African Companies Act No. 71 of 2008, as amended, (the "Companies Act") and the listings requirements of the JSE, which does not purport to be complete and is qualified in its entirety by reference to all of the provisions of those sources. The Companies Act came into effect on May 01, 2011. Sappi Limited is a public company incorporated in South Africa with registration number 1936/008963/06.

***Purpose of the Company***

Paragraph 3 of the Memorandum states that Sappi Limited is established, among other things, to manufacture, produce, buy, sell and deal in pulp, timber, paper, cardboard and other stated products.

***Directors***

In terms of the Articles:

At every annual general meeting of Sappi Limited, as near as possible to, but not less than one third of the Directors (excluding any Director appointed after the conclusion of the preceding annual general meeting, the Executive Chairman, the Chief Executive Officer and the Managing Director) are required to retire from office but are eligible for re-election. The Directors to retire are those who have been longest in office since their last election or, as between Directors who have been in office for an equal length of time since their last election and, in the absence of agreement, those determined by lot. Any Director who has held office for three years since his last election is also required to retire at such annual general meeting. In addition, the appointment of any Director appointed after the conclusion of the preceding annual general meeting will require to be confirmed at the next annual general meeting, failing which the appointment will cease.

Except as set out in the following paragraph, a Director may not vote in respect of any contract or arrangement or any other proposal in which he has any material interest other than by virtue of his interest in ordinary shares or debentures or other securities of or otherwise in or through Sappi Limited. A Director will not be counted in the quorum at a meeting in relation to any resolution on which he is barred from voting.

A Director shall be entitled to vote and be counted in the quorum in respect of any resolution concerning any of the following matters:

the giving of any security or indemnity to him in respect of money lent or obligations incurred by him at the request of or for the benefit of Sappi Limited or any of its subsidiaries;

the giving of any security or indemnity to a third party in respect of a debt or obligation of Sappi Limited or any of its subsidiaries for which he himself has assumed responsibility in whole or in part under a guarantee or indemnity or by the giving of security;

any proposal concerning an offer of shares or debentures or other securities of or by Sappi Limited or any of its subsidiaries for subscription or purchase in which offer he is or is to be interested as a participant in the underwriting or sub-underwriting of these securities;

any proposal concerning any other company in which he is interested directly or indirectly and whether as an officer, shareholder or otherwise; provided that he is not the holder of or beneficially interested in 1% or more of any class of the equity share capital of that company or of the voting rights available to shareholders of that company; and

any proposal concerning the adoption, modification or operation of a superannuation fund or retirement benefits scheme under which he may benefit and which has been approved by or is

Table of Contents

subject to and conditional upon approval of the Commissioner of Inland Revenue for taxation purposes.

The remuneration of the Directors for their services as such shall be determined from time to time by a general meeting, save that in the discretion of the Board, there may in each year be paid out of the funds of Sappi Limited to, and divided among, the Directors who have held office during the year in respect of which the remuneration is to be paid, a sum, by way of remuneration for their services as Directors, not exceeding US\$500,000, which remuneration shall be paid in such proportions as shall be determined by the Directors or a majority of them. If any Director is required to perform extra services or reside abroad or is otherwise specially occupied about Sappi Limited's business, he is entitled to receive remuneration to be fixed by the Directors (either in addition to, or in substitution for, the aforementioned remuneration). The Directors shall be paid all their traveling and other expenses properly and necessarily expended by them in and about the business of Sappi Limited. In terms of the Companies Act a company may pay remuneration to its directors for their service as directors only in accordance with a special resolution approved by the shareholders within the previous two years.

The Directors may exercise all the powers of Sappi Limited to borrow money and to mortgage or charge its undertaking and property or any part thereof and to issue debentures, which may be issued at par, at a discount or at a premium, and other securities. The borrowings will be restricted so that, except with the previous sanction of an ordinary resolution of Sappi Limited in general meeting, the aggregate principal amount outstanding of all moneys borrowed by Sappi Limited and/or any of its subsidiaries will not at any time exceed an amount equal to 2.5 times the aggregate of the nominal amount of the issued share capital of Sappi Limited and the total of the amounts standing to the credit of the combined capital and revenue reserve accounts of Sappi Limited and its subsidiaries (including any share premium account, capital redemption reserve fund and retained surplus after deducting the amounts of any debit balance in the income statement but excluding sums set aside for taxation and amounts attributable to outside shareholders in subsidiaries), as shown in the latest consolidated balance sheet, adjusted as may be necessary in respect of any variation in the share premium account of Sappi Limited since the date of the latest audited balance sheet. The Companies Act provides that the board may authorize the company to provide direct or indirect financial assistance (which includes lending money, guaranteeing a loan or other obligation in securing a new debt or obligation) to a related or inter-related company or corporation, provided that such authorization shall be made pursuant to a special resolution of the shareholders adopted within the previous two years.

The Articles do not stipulate a retirement age for the directors but the Board has set a rule that Non-Executive Directors should retire at the end of the calendar year in which they turn 70. The retirement age of Executive Directors would depend on the terms of their particular conditions of employment.

The Articles do not require that Directors need to hold any shares in Sappi Limited to qualify as Directors of Sappi Limited.

***Secretary***

The Companies Act requires the directors of each public company to appoint a secretary who is permanently resident in South Africa, and who, in the opinion of the directors, has the requisite knowledge and experience to carry out the duties of a secretary of a public company. In terms of the Companies Act a juristic person (legal entity) or partnership may be appointed to hold office of the company secretary, provided that no employee of that juristic person who provides company secretary services must be disqualified in terms of the Companies Act to be a director and at least one employee of that juristic person satisfies the requirements of the Companies Act in regard to having the requisite knowledge and experience in relevant law and permanent residency of South Africa.

The company secretary of Sappi is Sappi Southern Africa (Pty) Limited. (In accordance with rule 3.59 of the Listings Requirements of the JSE Limited, on November 08, 2010 Sappi Southern Africa

Table of Contents

(Pty) Limited, a wholly owned subsidiary of Sappi Limited, has been appointed Company Secretary of Sappi Limited replacing Sappi Management Services (Pty) Limited which has become a dormant company).

***Disclosure of Interest in Shares***

The Companies Act requires the disclosure of beneficial interests in the outstanding shares of a company. The Companies Act obliges the registered shareholder to disclose the identity of the person on whose behalf that security is held and the identity of each person with a beneficial interest in the security so held, the number and class of securities held for each such person with beneficial interest and the extent of each such beneficial interest, within 5 (five) business days of the end of every month during which any change to such information has occurred. Moreover, an issuer of securities may, by notice in writing, require a person who is a registered shareholder of, or whom the issuer knows or has reasonable cause to believe to have a beneficial interest in, a security issued by the issuer, to confirm or deny whether or not such person holds that beneficial interest and, if the security is held for another person, the person to whom the request is made is obliged to disclose to the issuer the identity of the person on whose behalf a security is held. The addressee of the notice may also be required to give particulars of the extent of the beneficial interest held during the three years preceding the date of the notice. All issuers of securities are obliged to establish and maintain a register of the disclosures described above and to publish in their annual financial statements a list of the persons who hold beneficial interests equal to or in excess of 5% of the total number of securities of that class issued by the issuer together with the extent of those beneficial interests.

***Register of Shareholders***

Sappi Limited keeps a register of Shareholders in South Africa. Sappi Limited may keep a branch share register in any foreign country, subject to the approval of the South African Reserve Bank.

***Share Capital***

As at September 2012 the authorized and issued share capital of Sappi was as follows:

Authorized:

725,000,000 ordinary shares of ZAR1.00 each and 19,961,476 "A" Ordinary shares of ZAR1.00 each for an authorized share capital of ZAR744,961,476.

Issued:

541,446,223 ordinary shares of ZAR1.00 each and 19,961,476 "A" Ordinary shares for an issued share capital of US\$68 million.

Share premium US\$1,328 million.

The authorized ordinary share capital was increased during fiscal 2010 by 19,961,476 "A" ordinary shares with a par value of ZAR1.00 per share as part of Sappi's 2010 BEE Transaction. The issued ordinary share capital increased during fiscal 2010 to its current numbers with the issue of 4,328,359 ordinary shares and 19,961,476 "A" ordinary shares as part of Sappi's 2010 BEE Transaction. All our ordinary shares in issue rank *pari passu* with each other and are fully paid and not subject to calls for additional payments of any kind. Trading in our ordinary shares has been dematerialized under the terms of the STRATE initiative of the JSE, and the provisions of sections 52 and 53 of the Companies Act relating to uncertificated securities apply in respect of those shares which have been dematerialized.

The "A" Ordinary Shares rank *pari passu* with the Ordinary Shares in all respects except for dividend entitlements where the "A" Ordinary Shares are entitled to and will receive 50% of the dividends payable on the Ordinary Shares. The "A" Ordinary Shares have the same voting rights as Ordinary Shares but are not and will not be listed on the JSE. The "A" Ordinary Shares were issued to the BEE

Table of Contents

Trusts in connection with the BEE Transaction and may not be disposed of by the BEE Trusts until August 2019 when Sappi will have the option to repurchase a number of "A" Ordinary Shares. The number of "A" Ordinary Shares Sappi may be entitled to repurchase will be calculated according to a repurchase formula set forth in Article No. 38 of Sappi's existing Memorandum of Incorporation. The number of any "A" Ordinary Shares that Sappi may elect to buy back in August 2019 will depend on the price performance of the Ordinary Shares over the period of the Transaction with the remaining "A" Ordinary Shares being distributed to the beneficiaries of the BEE Trusts (or in the case of the Sappi Foundation Trust, continued to be held by such trust) and converted into Ordinary Shares.

For financial reporting purposes the "A" Ordinary Shares are treated as treasury shares, as to the BEE Trusts owning such shares. These are considered special purpose entities under IFRS and therefore will not be included in the calculation of the Company's salient financial ratios such as basic earnings per share.

For further details of the BEE Transaction see "Item 7 Major Shareholders and Related Party Transactions Related Party Transactions" and for further information on the resolution authorizing the change in the Company's Articles of Association relating to the "A" Ordinary Shares and the repurchase formula for the "A" Ordinary Shares, see "Item 19 Exhibits 1.1 and 1.3".

The ADSs trade on the NYSE. The rights of holders of ADSs are governed by the Deposit Agreement pursuant to which the ADSs are issued and such rights differ in certain respects from the rights of holders of ordinary shares.

***Dividends***

In terms of the Articles, Sappi Limited in a general meeting or the Board may, from time to time, declare a dividend to be paid to the registered holders of shares (the "Shareholders") in proportion to the number of ordinary shares held by them. No dividend on ordinary shares will bear interest. Dividends are declared payable to Shareholders registered as such on a date subsequent to the date of the declaration of the dividend as determined by the Board. This date may not be less than 14 days after the date of the publication of the announcement of the declaration of the dividend.

"A" ordinary shares are entitled to and will receive 50% of the dividend payable on ordinary shares.

Sappi Limited in a general meeting may not declare a dividend in excess of the amount recommended by the Board. All unclaimed dividends may be retained by Sappi Limited, invested or otherwise utilized by the Board for the benefit of Sappi Limited until claimed; provided that dividends unclaimed after a period of twelve years may be declared forfeited by the Board. Forfeited dividends revert to Sappi Limited and may be dealt with by the Directors as they deem fit.

Any dividend or other amount payable to a Shareholder may be transmitted by electronic bank transfer or ordinary post to the address of the Shareholder recorded in the register or any other address the Shareholder may previously have given to Sappi Limited in writing. Sappi Limited will not be responsible for any loss in transmission.

Any dividend may be paid and satisfied, either wholly or in part, by the distribution of specific assets as the Board may at the time of declaring the dividend determine and direct.

In terms of the Companies Act any distribution to shareholders must be authorized by a resolution of the board of the company. In addition no distribution may be made unless it reasonably appears that the company will satisfy the "solvency and liquidity test" immediately after completing the proposed distribution and the board of the company, by resolution, has acknowledged that it has applied the solvency and liquidity test as set out in section 4 of the Companies Act and reasonably concluded that the company will satisfy the solvency and liquidity test immediately after completing the proposed distribution.

Table of Contents

It is our policy to declare dividends in US dollars and the Board may at the time of declaring a dividend make such regulations as it may think fit in regard to the payment in any currency and rate of exchange. For further information on our dividend policy, see "Item 8 Financial Information Dividends".

Holders of ADSs on the relevant record date will be entitled to receive any dividends payable in respect of the ordinary shares underlying the ADSs, subject to the terms of the Deposit Agreement. Cash dividends will be paid by the Depositary to holders of ADSs in accordance with the Deposit Agreement.

Our ability to pay dividends is restricted by the terms of the Refinancing. See "Item 8 Financial Information Dividends" for a listing of the most restrictive conditions for declaring cash dividends.

***Voting Rights***

Subject to any rights or restrictions attached to any class of shares, every Shareholder present in person, by authorized representative or by proxy, will have, on a show of hands, one vote only and, in the case of a poll, every Shareholder present in person, by authorized representative or by proxy, will have that proportion of the total votes in Sappi Limited which the aggregate amount of the nominal value of the shares held by that Shareholder bears to the aggregate of the nominal value of all the shares issued by Sappi Limited and, accordingly, since there is currently only one class of issued shares, one vote for every share held by him.

***Issue of Additional Shares and Pre-emption Rights***

Subject to the provisions of the Companies Act and the listings requirements of the JSE, the Board may issue unissued shares.

Holders of shares have no pre-emptive rights under the Articles. Under the listings requirements of the JSE, however, any unissued shares of Sappi Limited must first be offered to existing Shareholders pro rata to their holdings of shares unless these shares are issued for the acquisition of assets or a specific or general approval is granted to the Directors at any general meeting authorizing the issue of shares for cash. Whenever Sappi Limited wishes to sell for cash shares held as treasury stock by a subsidiary of Sappi Limited, such use must comply with the listings requirements as if such use was a new issue of shares for cash.

Sappi Limited in a general meeting may upon the recommendation of the Board resolve to capitalize all or any part of the amount of the undivided profits, reserves resulting from a sale or revaluation of assets of Sappi Limited or premium created on the issue of any shares or debentures and may apply such sums in paying up unissued shares of Sappi Limited to be issued as fully paid capitalization shares to Shareholders.

***Variation of Rights***

Whenever the capital of Sappi Limited is divided into different classes of shares, the rights or restrictions attached to any class of shares in issue may be amended, varied, modified or cancelled by general meeting of Sappi Limited; provided that the consent in writing of the holders of at least three fourths of the issued shares of that class or of a special resolution passed at a separate general meeting of the holders of such shares is required if the amendment, variation, modification or cancellation will directly or indirectly adversely affect those rights or restrictions.

The rights or restrictions attached to any class of shares will not, unless otherwise expressly provided by the conditions of issue of such shares, be deemed to be directly or indirectly adversely affected by the creation or issue of other shares ranking equally with them.

In terms of the Companies Act, despite anything to the contrary in a company's Memorandum of Incorporation every share issued by a company has associated with it an irrevocable right of the

Table of Contents

shareholder to vote on any proposal to amend the preferences, rights, limitations and other terms associated with that share. If the Memorandum of Incorporation of a company has been amended to materially and adversely alter the preferences, rights, limitations or other terms of a class of shares, any holder of those shares has an appraisal right and is entitled to the relief in terms of section 164 of the Companies Act if that shareholder notified the company in advance of the intention to oppose the resolution to amend the Memorandum of Incorporation and was present at the meeting and voted against that resolution.

***Distribution of Assets on Liquidation***

If Sappi Limited is liquidated, the assets remaining after the payment of all the liabilities of Sappi Limited and the costs of winding-up shall be distributed among the Shareholders in proportion to the numbers of shares respectively held by them, subject to the rights of any Shareholders to whom shares have been issued on special conditions and subject to Sappi Limited's right to apply set-off against the liability, if any, of Shareholders for unpaid capital or premium. Furthermore, the liquidator, with the authority of a special resolution, may divide among the Shareholders, in specie or kind, the whole or any part of the assets, whether or not those assets consist of property of one kind or different kinds.

***Share Repurchases and Capital Reductions***

Subject to the provisions of the Companies Act and the listings requirements of the JSE, Sappi Limited may with the prior approval of a special resolution of its shareholders in general meeting:

acquire any shares issued by Sappi Limited on the basis that all or a portion of the price payable on such acquisition may be paid out of any funds of or available to Sappi Limited whether or not such payment results in a reduction of the issued share capital, share premium, reserves (including statutory non-distributable reserves), stated capital or any capital or redemption reserve fund of Sappi Limited;

authorize any subsidiary of Sappi Limited to acquire shares in Sappi Limited.

Subject to the provisions of the Companies Act and the listings requirements of the JSE, Sappi Limited may reduce its issued share capital, share premium, stated capital, reserves (including statutory non-distributable reserves) and/or capital redemption reserve fund by way of an ordinary resolution of shareholders in general meeting and a resolution of directors. Similarly, subject to the provisions of the Companies Act and the requirements of the JSE, Sappi Limited may by way of an ordinary resolution of shareholders in general meeting and a resolution of directors make payments to its shareholders, whether or not such payments result in a reduction of the issued share capital, share premium, stated capital, reserves (including statutory non-distributable reserves) and/or any capital redemption reserve fund. An ordinary resolution of shareholders is not, however, required for the payment of dividends.

***Changes in Capital or Objects and Powers of Sappi Limited***

Subject to the provisions of the Companies Act, Sappi Limited may from time to time:

increase, consolidate, sub-divide or cancel all or any part of its capital;

convert any of its shares, whether issued or not, into shares of another class;

convert all or any of its paid-up shares into stock and re-convert such stock into paid-up shares; or

convert any shares having a par value into shares having no par value and vice versa.

***Rights of Non-controlling Interest Shareholders and Fiduciary Duties***

Majority shareholders of South African companies have no fiduciary obligations under South African common law to minority shareholders. However, under the Companies Act, a shareholder may, under certain circumstances, seek relief from the court if he has been unfairly prejudiced by the

Table of Contents

company. The provisions in the Companies Act are designed to provide relief for oppressed shareholders without necessarily overruling the majority's decision. The Companies Act affords a dissenting shareholder, who objects to certain proposed corporate action, the right to demand payment by the company of the "fair value" of the shares held by that shareholder. However, this right must be exercised in compliance with the various procedural requirements set out in the Companies Act. There may also be common law personal actions available to a shareholder of a company. The fiduciary obligations of Directors may differ from those in the United States and certain other countries. In South Africa, the common law imposes on Directors a duty to act with care and skill and a fiduciary duty to conduct the company's affairs in the best interests of the company. The Companies Act has to a large extent codified the common law duties of Directors by setting out standards against which the conduct of Directors must be assessed and in some instances has developed these duties. The Companies Act also introduces the so-called "business judgment rule" which provides a Director with a defense in relation to an alleged breach of his statutory duties. While Directors owe their duties to the company, the Companies Act provides a mechanism by which any person may claim for any loss or damage suffered as a result of a contravention of any provision of the Companies Act by any other person (such as a Director).

***General Meetings of Shareholders***

Sappi Limited is obliged to hold an annual general meeting once every calendar year and within fifteen months after the date of the last preceding annual general meeting of Sappi Limited. The Board may, whenever it thinks fit, convene a general meeting and must do so on the request of Shareholders holding at the date of request not less than 10% of the voting rights entitled to be exercised in relation to the matter proposed to be considered at the meeting.

Sappi Limited is required by law to deliver a notice of each shareholders meeting in the prescribed manner and form to all of the shareholders of the Company at least 15 business days before the meeting is to begin.

Notice under the Articles must be given or served on any Shareholder or Director, as the case may be, either by delivery, electronic mail, facsimile or by sending it through the post. Any notice to Shareholders must simultaneously be given to the secretary or other suitable official of any recognized stock exchange on which the shares of Sappi Limited are listed in accordance with the requirements of that stock exchange. Every such notice shall be deemed, unless the contrary is proved, to have been received, if it is delivered, on the date on which it is so delivered, if it is sent by post, on the day on which it is posted, if it is sent by electronic mail, on the day it was sent or, if it is sent by facsimile, on the day on which it was successfully transmitted.

No business may be transacted at any general meeting unless the requisite quorum is present when the meeting proceeds to business. The quorum for the passing of resolutions is Shareholders holding in the aggregate at least 25% of all voting rights entitled to vote at the meeting, present in person or by proxy. In addition three Shareholders must be present in person for a meeting to begin. If within ten minutes from the time appointed for the meeting a quorum is not present, the meeting, if convened upon the requisition of Shareholders, will be dissolved and, in all other cases, will stand adjourned to the same day in the next week, or if that be a public holiday, the next business day, at the same time and place. At the adjourned meeting, those Shareholders who are present or represented thereat shall constitute a quorum.

At a general meeting, a resolution put to the vote will be decided by a show of hands unless a poll is demanded by (1) the chairman, (2) not less than five Shareholders having the right to vote at such meeting, (3) a Shareholder or Shareholders representing not less than one tenth of the total voting rights of all Shareholders having the right to vote at the meeting or (4) in accordance with the Companies Act.

Resolutions will be carried by a majority of the votes recorded at the meeting except in the case of a special resolution which must be passed either, on a show of hands, by not less than 75% of the number

Table of Contents

of Shareholders entitled to vote who are present in person or by proxy or, where a poll has been demanded, by not less than 75% of the total votes to which the Shareholders present in person or by proxy are entitled. In the event of a tie, the chairman has the deciding vote if he is a Shareholder.

***Annual Report and Accounts***

The Board is required to keep such accounting records and books of account as are prescribed by the Companies Act. Generally, no Shareholder (other than a Director) has any right to inspect any accounting record book, account or document of Sappi Limited.

The Board is required, in respect of every fiscal year of Sappi Limited, to prepare annual consolidated financial statements of Sappi Limited and present them before the annual general meeting required to be held in that year.

The annual consolidated financial statements of Sappi Limited must, in conformity with International Financial Reporting Standards, fairly present the state of affairs and business of Sappi Limited and all its consolidated subsidiaries at the end of the fiscal year concerned and the profit or loss of Sappi Limited and all its consolidated subsidiaries for that fiscal year.

***Transfer of Shares***

All ordinary shares are free from any restriction under the Articles on the right to transfer. A Shareholder who holds his shares in dematerialized form will have an account with a Central Securities Depository Participant. Transfer of ownership of such shares will be effected by debiting the account from which transfer is effected and crediting the account to which transfer is effected. The transferor will be deemed to remain the holder of the shares until the name of the transferee is entered in the share register or relevant sub register of Sappi Limited in respect of these shares. Only Shareholders that have handed in their paper share certificates have an account with a Central Securities Depository Participant. Under the rules of the JSE, Shareholders cannot sell their shares on the JSE until the shares have been dematerialized.

***Rights of Shareholders***

There are no limitations in the Memorandum or Articles and general limitations under South African law on the right of Shareholders to hold or exercise voting rights attaching to any ordinary shares in Sappi Limited.

***Changes in Control***

Any person acquiring shares of Sappi will (in addition to any regulatory and legal requirements outside South Africa) need to comply with the following to the extent applicable. Various transactions including, without limitation, those which result in a person or a group of persons acting in concert holding shares entitling the holder or holders to exercise or cause to be exercised 35% or more of the voting rights at meetings of Sappi Shareholders and those transactions entailing a disposal of the whole or substantially the whole of the undertaking of Sappi Limited or the whole or the greater part of its assets will be subject to the Takeover Regulations which are regulated by the Takeover Regulation Panel. The Takeover Regulations impose various obligations in such circumstances including the requirement of an offer to minority shareholders. A transaction will be subject to the approval of the competition authorities under the Competition Act No. 89 of 1998, as amended (the "Competition Act") if it results in the acquisition of "control", as defined in the Competition Act, and otherwise falls within the scope of the Competition Act. The Competition Act prevents a transaction falling within its scope from being implemented without the required approvals. To the extent applicable, the transaction will be subject to the listings requirements of the JSE.

Table of Contents

***Amendment of Memorandum or Articles***

The Memorandum or Articles may only be amended by way of a special resolution, proposed at a general meeting of Shareholders at which Shareholders holding at least 25% of the total votes of all Shareholders entitled to vote thereat are present in person or by proxy, which is passed, on a show of hands, by not less than 75% of those present in person or by proxy or, on a poll, by not less than 75% of the total votes to which Shareholders present in person or by proxy are entitled.

***Adoption of a new Memorandum of Incorporation***

At its next Annual General Meeting to be held on February 06, 2013, Sappi Limited ("Sappi") intends to adopt a new Memorandum of Incorporation ("MOI") which is consistent with the provisions of the Companies Act. In terms of the Transitional Arrangements to the Companies Act, companies have been given a two-year period until April 30, 2013 to bring their MOI's in harmony with the Companies Act. After this two-year period, any provision of a pre-existing MOI that is inconsistent with the Companies Act is void and unenforceable to the extent of the inconsistency.

The approach that has been adopted by Sappi in drafting the MOI is to allow the provisions of the Companies Act to govern Sappi's affairs; save for those specific instances where there is a need to alter an alterable provision of the Companies Act, or where an alteration is required by the JSE Listings Requirements. The salient features of the MOI are summarised below:

*Introduction*

The introductory paragraphs of the MOI provide that the prescribed MOI contemplated in the Companies Act does not apply to Sappi. Furthermore, the MOI provides that as a public company, Sappi is not prohibited from offering its securities to the public and that the transfer of such securities is unrestricted save for what is provided for in the MOI.

*General provisions*

Paragraph 3 of the MOI deals with general matters and provides, *inter alia*, that the powers of Sappi are not restricted and that the Board does not have the power to make, amend or repeal any rules relating to the governance of Sappi. In addition, this part of the MOI also provides for the authority of the Board to authorize Sappi to provide direct or indirect financial assistance to any person contemplated in section 45 of the Companies Act, and that the solvency and liquidity test as set out in section 4 of the Companies Act applies without amendment.

*Securities of the Company*

Paragraph 4 of the MOI deals with the securities of Sappi and provides that all securities of each class rank *pari passu* in all respects. Furthermore, provision is made for the authorization of shares and the restriction on the issue of shares in line with the provisions of the Companies Act and the JSE Listings Requirements. In addition, the MOI sets out the instances where shareholders, by special resolution, must approve certain amendments to Sappi's share capital.

In regard to financial assistance for the subscription or purchase of shares, capitalization shares, share buy-backs and debt instruments, the MOI does not limit, restrict or qualify the authority of the board to take these actions, subject to compliance with the requirements of the Companies Act and the JSE Listings Requirements. Provision is also made for various matters relating to the registration of beneficial interests, commission, authority to sign transfer deeds and limitation of voting rights, all in accordance with the JSE Listings Requirements.

Table of Contents

*Shareholder Rights and Proxy Forms*

Paragraph 5 of the MOI deals, *inter alia*, with shareholder rights and proxy forms. This part of the MOI provides that proxy forms must be delivered not less than 48 hours before the time appointed for the holding of the meeting and confirms shareholders' entitlement to appoint proxies. As required by the JSE Listings Requirements, this part of the MOI deals with the record date for meetings and confirms that such record date must be determined in accordance with the Companies Act and the JSE Listings Requirements.

*Shareholders Meetings*

Paragraph 6 of the MOI deals with shareholders' meetings. This paragraph details the convening of shareholders' meetings, shareholders' rights to requisition meetings, the location of shareholders' meetings, and notice of shareholders' meetings, all in accordance with the Companies Act and the JSE Listings Requirements. This part of the MOI also stipulates the quorum for shareholders' meetings as provided for in the Companies Act and the JSE Listings Requirements and deals with the adjournment of shareholders' meetings and the approval of shareholders' resolutions in accordance with the requirements of the Companies Act and the JSE Listings Requirements.

*Directors and Officers*

Paragraph 7 of the MOI deals with the composition of the board of directors and specifies 4 as the minimum number as prescribed by the JSE Listings Requirements. This paragraph deals with the election and appointment of directors and specifically provides for a direct appointment right by the chairman of the board, subject to the written approval of the majority of the Directors, provided that such appointment must be approved by the shareholders at the next shareholders' meeting or Annual General Meeting. Paragraph 7 also deals with the qualification and eligibility requirements in respect of Directors and stipulates the retirement of the Directors by rotation. The paragraph goes on to deal with vacancies and with the authority of the board and its powers to fill those vacancies on a temporary basis. Directors' meetings, directors' compensation, financial assistance to directors and their indemnification are also detailed here.

*General Provisions*

Paragraph 8 of the MOI deals with the amendment of class, preferences, rights, limitations and other terms in respect of shares in Sappi. Provision is also made here for the rights and conditions attaching to the "A" ordinary shares in the issued share capital of Sappi. Finally, the MOI deals with unclaimed dividends by providing that Sappi will hold all monies due to shareholders for their benefit, provided that the board may cause any monies unclaimed for a period of three years from the due date for payment to be forfeited for the benefit of Sappi.

*Schedule 1 Authorized Shares*

Schedule 1 to the MOI sets out the authorized shares of Sappi and also sets out the preferences, rights, limitations and other terms applicable to the shares.

**South African Companies Act, 2008**

A new Companies Act, the Companies Act 71 of 2008, as amended, (the "Act"), was promulgated in April 2009 and became effective on May 01, 2011. The Act replaced the previous Companies Act, 1973 (as amended), in its entirety.

The aims and purposes of the Act, are to provide for, *inter alia*, the incorporation, registration, capitalization, organization and management of profit, and not-for-profit, companies; to define the

Table of Contents

relationships between companies and their respective shareholders or members and directors; to provide for equitable and efficient mergers, amalgamations and takeovers of companies, and for efficient rescue of financially distressed companies; to provide appropriate legal redress for investors and third parties with respect to companies; to establish a commission and a takeover regulation panel to administer the requirements of the Act with respect to companies, and a Companies Tribunal to facilitate alternative dispute resolution and to review decisions of the commission and the takeover regulation panel, and a Financial Reporting Standards Council ("FRSC") to advise on requirements for financial record keeping and reporting by companies and to repeal the existing Companies Act and to provide for incidental matters.

The Act introduced a number of new requirements that public companies, such as Sappi, need to comply with. In addition to the accountability requirements applicable to all companies, as set out in the Act, public companies are required to comply with additional and more onerous accountability requirements. These include *inter alia*:

- (a) the appointment of a company secretary, who must have the requisite knowledge of, or experience with, relevant laws and who must be a permanent resident of South Africa;
- (b) the appointment, at its annual general meeting, of an auditor who must, in the opinion of the company's audit committee, be 'independent' of the company. The same individual is prohibited, from serving as the auditor (or designated auditor, as the case may be) for more than five consecutive years. An individual who has served as designate auditor and whose appointment endures for two or more consecutive years and then terminates are prohibited from being appointed as the auditors of that company again for a period of at least two further fiscal years;
- (c) the appointment, at every annual general meeting of an audit committee, which must comprise of at least three members who are independent directors of the company and who will be required to comply with minimum qualification requirements as prescribed by the Minister of Trade and Industry, from time to time. The main functions of the audit committee are, *inter alia*, to: nominate for appointment the auditor of the company, who in the opinion of the committee, is 'independent' of the company; determine the auditor's fees and terms of engagement and to make submissions to the company's Board concerning the company's accounting policies, financial control, records and reporting;
- (d) the appointment of a social and ethics committee, which must comprise at least three directors or prescribed officers, at least one of whom must be a non-executive director. The functions of the social and ethics committee include: to monitor the company's activities with regard to social and economic development, good corporate citizenship and the environment.

***Financial Statements***

The Act provides that all financial statements provided by a company, (including annual financial statements) must, *inter alia*, comply with the standards prescribed by the Minister of Trade and Industry, after consultation with the FRSC, a body established in terms of the Act. The Act stipulates that the financial statements of public companies must comply with IFRS. Financial reporting standards, applicable to public companies, may be issued by the Minister of Trade and Industry by publication in the Government Gazette from time to time on the advice of the FRSC. The FRSC must ensure that financial reporting standards accord with IFRS and promote issued and consistent accounting practices.

Under the Act, a public company and each of its directors or officers who knowingly is a party to the preparation, approval, dissemination or publication of any financial statements (including annual financial statements) which are materially false or misleading or which fail in a material way to comply

Table of Contents

with the requirements set out in the Act, will be guilty of an offence. It is also an offence for any person to be a party to the preparation, approval, publication, issue or supply of a financial report that is false or misleading in a material respect if such person knows or ought reasonably to suspect that it is false or misleading.

**Material Contracts**

On April 14, 2011, Sappi Papier Holding GmbH ("SPH"), issued €250 million 6.625% Senior Secured Notes due 2018 (the "2018 Notes") and US\$350 million 6.625% Senior Secured Notes due 2021 (the "2021 Notes", and together with the 2018 Notes, the "2018/2021 Notes"). The interest on the 2018/2021 Notes is payable semi-annually on April 15 and October 15 of each year, commencing on October 15, 2011. The 2018 Notes and the 2021 Notes mature on April 15, 2018 and April 15, 2021, respectively. SPH may on any one or more occasions redeem all or part of the 2018 Notes and/or 2021 Notes, as the case may be, at a redemption price varying based on the period during which the redemption occurs (prior to April 15, 2015, on or after April 15, 2015, on or after April 15, 2017 with respect to the 2018 Notes and prior to April 15, 2016, on or after April 15, 2016, on or after April 15, 2019 with respect to the 2021 Notes), plus accrued and unpaid interest, if any, to the date of redemption, subject to the rights of holders of the applicable notes on the relevant record date to receive interest due on the relevant interest payment date. Sappi has agreed to pay certain additional amounts in respect of any withholdings or deductions for certain types of taxes in certain jurisdictions on payments to holders of the 2018/2021 Notes. The 2018/2021 Notes are jointly and severally guaranteed on a senior basis by Sappi Limited and certain other subsidiaries of Sappi Limited. The 2018/2021 Notes are secured, together with certain other indebtedness of the group, by first-priority security interests, subject to permitted collateral liens, over certain assets of SPH, Sappi Limited and the other subsidiary guarantors. The security interests are subject to limitations under applicable laws and may be released under certain circumstances. SPH has also agreed to observe certain covenants with respect to the 2018/2021 Notes including limitations on dividend distributions and other payments, indebtedness, asset sales, liens, guarantees and on mergers and consolidations. In case of a change of control (including, among others, if all or substantially all of the properties or assets of Sappi Limited and certain of its subsidiaries taken as a whole are sold, transferred or otherwise disposed of, or if any person acquires the majority of voting power of Sappi Limited), holders of the 2018/2021 Notes have the right to require the Issuer to repurchase all or any part of their notes in cash for a value equal to 101% of the aggregate principal amount of notes repurchased, plus accrued and unpaid interest, if any, on the notes repurchased to the date of purchase, subject to the rights of holders of the applicable notes on the relevant record date to receive interest due on the relevant interest payment date. The offering of the 2018/2021 Notes, which are listed on the Luxembourg Stock Exchange, was not registered under the Securities Act or any United States state securities laws. The 2018/2021 Notes were offered and sold within the United States only to qualified institutional buyers as defined in Rule 144A under the Securities Act and to non-United States persons outside the United States in reliance on Regulation S under the Securities Act. For further information, see note 20 to our group Annual Financial Statements included elsewhere in this Annual Report; "Item 5 Operating and Financial Review and Prospects"; and "Item 19 Exhibits".

On April 28, 2011, SPH and Sappi International S.A., as borrowers, amended and restated the existing revolving credit facility dated August 27, 2009. The amended and restated revolving credit facility is an amount of €350 million of borrowing availability in euro, US dollars or any other currency which is readily available and freely convertible into euro and has been approved by the lenders. The commitments under the amended and restated Revolving Credit Facility terminate on March 28, 2016. This facility was arranged by J.P. Morgan Limited, Citibank, N.A. London Branch, Credit Agricole Corporate and Investment Bank, The Royal Bank of Scotland NV (Belgium) Branch, UniCredit Bank Austria AG, and KBC Bank NV with J.P. Morgan Europe Limited acting as agent and security agent for a syndicate of financial institutions. The amended and restated revolving credit facility is guaranteed by Sappi Limited, SPH, Sappi International S.A. and certain other subsidiaries of SPH, and is secured,

Table of Contents

together with certain other indebtedness of the group, by first-priority security interests over certain assets of Sappi Limited, SPH and the other subsidiary guarantors. The funding margin is determined by a rating grid (1.65% at BBB/Baa2 or above, 1.95% at BBB-/Baa3, 2.25% at BB+/Ba1, 2.875% at BB/Ba2, 3.75% at BB-/Ba3 and 4.75% at B+/B1 or lower) and, based on the current credit rating, provides for a margin of 2.875% per annum over Euribor or Libor, depending on the currency of the loan and the level of utilization. The borrowers are also obligated to pay a commitment fee equal to 40% of the then applicable margin on the undrawn and uncanceled amount of the amended and restated revolving credit facility and a utilization fee of 0.25% per annum (if the utilization is between 25% and 50%) or 0.50% per annum (if the utilization is greater than 50%) on the amount of the amended and restated revolving credit facility that is used. This facility is to be used for general corporate purposes and was undrawn at the end of September 2012. The amended and restated revolving credit facility contains (i) an EBITDA to Consolidated Net Interest Expense covenant (2.00 to 1 for all quarters ending from March 2011 to December 2013, 2.25 to 1 for all quarters ending from March 2014 to June 2014 and 2.50 to 1 for quarters ending September 2014 to June 2016) (ii) a consolidated Net Debt to EBITDA covenant (4.50 to 1 for all quarters ending March 2011 to December 2013, 4.25 to 1 for all quarters ending from March 2014 to June 2014, 4.00 to 1 for all quarters ending September 2014 to December 2014 and 3.75 to 1 for all quarters ending March 2015 to June 2016) and (iii) a covenant with respect to the percentage of net debt to total capitalization (65%), in each case measured at the Sappi Limited consolidated level. Subject in each case to certain customary exceptions and materiality thresholds, the amended and restated revolving credit facility contains customary negative covenants and restrictions, including (among others) restrictions on dividend distributions, the granting of security, incurrence of indebtedness, the provision of loans and guarantees, a change of business of the group, acquisitions or participations in joint ventures and mergers and disposals. In addition, in case any person acquires more than 35% of the voting rights of Sappi Limited or in case of a sale of all or substantially all of the assets of the group, the commitments of the lenders under the amended and restated revolving credit facility will be cancelled and all outstanding borrowings, together with accrued interest and all other amounts accrued, immediately become due and payable. For further information, see note 20 to our group Annual Financial Statements included elsewhere in this Annual Report; "Item 5 Operating and Financial Review and Prospects"; and "Item 19 Exhibits".

On August 25, 2011, Sappi Trading, Sappi Fine Paper Europe and Sappi Fine Paper North America entered a new, three-year, €360 million trade receivables securitization program arranged by UniCredit Bank and funded through UniCredit Bank's Arabella Finance Limited conduit to replace their prior trade receivables securitization program. Under the new program, eligible receivables are sold on a non-recourse basis by SPH (the "Austrian USD Seller"), Sappi Lanaken NV (the "Belgian Seller"), Sappi Deutschland GmbH (the "German USD Seller"), and Sappi NA Finance LLC (the "U.S. Seller") to Elektra Purchase No. 29 Limited (the "Purchaser") under various purchase agreements. Pursuant to corresponding servicing agreements, Sappi entities act as servicers to administer, collect and enforce the receivables purchased under the various purchase agreements. The Austrian USD Receivables Purchase Agreement among, *inter alia*, the Austrian USD Seller, the Purchaser, and Sappi International S.A. (the "Master Servicer"); the Belgian Receivables Purchase Agreement among, *inter alia*, the Belgian Seller, the Purchaser, and the Master Servicer; the German USD Receivables Purchase Agreement among, *inter alia*, the German USD Seller, the Purchaser and the Master Servicer; the US Purchase and Contribution Agreement among S.D. Warren Company and the US Seller; and the US Receivables Purchase Agreement among, *inter alia*, the US Seller, S.D. Warren Company, the Purchaser and the Master Servicer, were all entered on August 12, 2011 and set forth the terms pursuant to which receivables are sold on a non-recourse basis to the Purchaser. Under the purchase agreements, the sellers have agreed to observe certain covenants, including a limitation on creating liens on any receivables. The Austrian USD Servicing Agreement among, *inter alia*, Sappi Trading Hong Kong Limited, the Austrian Seller, the Purchaser, and the Master Servicer; the Belgian Servicing Agreement among, *inter alia*, the Belgian Seller, the Purchaser, and the Master Servicer; the German USD Servicing

Table of Contents

Agreement among, *inter alia*, the German USD Seller, Sappi Trading Hong Kong Limited, the Purchaser and the Master Servicer; and the US Servicing Agreement among, *inter alia*, the US Seller, S.D. Warren Company, the Purchaser and the Master Servicer, were all entered on August 12, 2011 and govern how the receivables are administered, collected and enforced under the facility. The Incorporated Terms Memorandum provides defined terms and other various schedules for the transaction documents under the receivables securitization facility, including the purchase agreements and servicing agreements. SPH has guaranteed the performance by the sellers of their respective obligations under the receivables purchase agreements and the performance by the servicers and the Master Servicer of their respective obligations under the servicing agreements, pursuant to the Performance Guarantee entered on August 12, 2011 with the Purchaser. The trade receivables securitization program matures on August 24, 2014, unless it is terminated earlier. In case of a change of control (which occurs upon the failure of Sappi Limited and its wholly owned subsidiaries to beneficially own at least 65% of the capital stock of or control all sellers, servicers, the Master Servicer and SPH or the failure of S.D. Warren Company to own 100% of or control the US Seller), the facility could be terminated. A termination event could also occur if certain credit rating downgrades occur for Sappi Limited or if Sappi Limited fails to maintain certain financial ratios, including ratios for consolidated Net Debt to EBITDA, EBITDA to Consolidated Net Interest Expense, and Net Debt to Total Capitalization. For further information, see notes 16 and 20 to our group Annual Financial Statements included elsewhere in this Annual Report; "Item 5 Operating and Financial Review and Prospects"; and "Item 19 Exhibits".

On July 05, 2012, SPH issued US\$400 million 7.750% Senior Secured Notes due 2017 (the "2017 Notes") and US\$300 million 8.375% Senior Secured Notes due 2019 (the "2019 Notes", and together with the 2017 Notes, the "2017/2019 Notes"). The interest on the 2017 Notes is payable semi-annually on January 15 and July 15 of each year, commencing on January 15, 2013 and the interest payable on the 2019 Notes is payable semi-annually on June 15 and December 15 of each year, commencing on December 15, 2012. The 2017 Notes and the 2019 Notes mature on July 15, 2017 and June 15, 2019, respectively. SPH may on any one or more occasions redeem all or part of the 2017 Notes and/or 2019 Notes, as the case may be, at a redemption price varying based on the period during which the redemption occurs (prior to April 15, 2017, on or after April 15, 2017 with respect to the 2017 Notes and prior to June 15, 2015, on or after June 15, 2015, on or after June 15, 2018 with respect to the 2019 Notes), plus accrued and unpaid interest, if any, to the date of redemption, subject to the rights of holders of the applicable notes on the relevant record date to receive interest due on the relevant interest payment date. Sappi has agreed to pay certain additional amounts in respect of any withholdings or deductions for certain types of taxes in certain jurisdictions on payments to holders of the 2017/2019 Notes. The 2017/2019 Notes are jointly and severally guaranteed on a senior basis by Sappi Limited and certain other subsidiaries of Sappi Limited. The 2017/2019 Notes are secured, together with certain other indebtedness of the group, by first-priority security interests, subject to permitted collateral liens, over certain assets of SPH, Sappi Limited and the other subsidiary guarantors. The security interests are subject to limitations under applicable laws and may be released under certain circumstances. SPH has also agreed to observe certain covenants with respect to the 2017/2019 Notes including limitations on dividend distributions and other payments, indebtedness, asset sales, liens, guarantees and on mergers and consolidations. In case of a change of control (including, among others, if all or substantially all of the properties or assets of Sappi Limited and certain of its subsidiaries taken as a whole are sold, transferred or otherwise disposed of, or if any person acquires the majority of voting power of Sappi Limited), holders of the 2017/2019 Notes have the right to require the Issuer to repurchase all or any part of their notes in cash for a value equal to 101% of the aggregate principal amount of notes repurchased, plus accrued and unpaid interest, if any, on the notes repurchased to the date of purchase, subject to the rights of holders of the applicable notes on the relevant record date to receive interest due on the relevant interest payment date. The offering of the 2017/2019 Notes, which are listed on the Luxembourg Stock Exchange, was not registered under the Securities Act or any United States state securities laws. The 2017/2019 Notes were offered and sold within the United States only to qualified institutional buyers

Table of Contents

as defined in Rule 144A under the Securities Act and to non-United States persons outside the United States in reliance on Regulation S under the Securities Act. For further information, see note 20 to our group Annual Financial Statements included elsewhere in this Annual Report; "Item 5 Operating and Financial Review and Prospects"; and "Item 19 Exhibits".

On July 10, 2012, SPH entered into a new OeKB term loan facility arranged by UniCredit Bank Austria AG to finance the expansion of Sappi's pulp production facilities at Cloquet Mill. The commitments under the new OeKB term loan facility are for €136 million and the facility was fully drawn on August 30, 2012. The new OeKB term loan facility is supported by UniCredit Bank Austria AG and a syndicate of financial institutions ("the lenders") and the lenders under the new OeKB term loan facility refinanced their commitments with financing provided by the Österreichische Kontrollbank Aktiengesellschaft ("OeKB"), an Austrian bank providing financial services. SPH is the borrower under the new OeKB term loan facility and UniCredit Bank Austria AG is acting as agent on behalf of the lenders. The new OeKB term loan facility is guaranteed by Sappi Limited and the same subsidiaries that are guarantors under the 2014 Notes, the amended and restated revolving credit facility, the 2018/2021 Notes and the 2017/2019 Notes. The annual interest rate on borrowings is calculated based on the interest rate under the export rate financing scheme of the OeKB plus a margin depending on the credit rating assigned to the senior secured debt of Sappi Limited (2.00% at BB+/Ba1 or higher, 2.50% at BB/Ba2, 2.75% at BB-/Ba3, 3.25% at B+/B1 and 4.75% at B/B2 or lower), plus certain mandatory costs. Initially, the margin is 2.75% per annum. SPH is required to repay the new OeKB term loan facility in annual repayments based on a percentage of total commitments (13% at September 30, 2014, 13% at September 30, 2015, 14% at September 30, 2016 and 60% at June 30, 2017). The other material terms of the new OeKB term loan facility, including the financial covenants, the undertakings and the events of default are substantially the same as the terms of the amended and restated revolving credit facility. For further information, see note 20 to our group Annual Financial Statements included elsewhere in this Annual Report; "Item 5 Operating and Financial Review and Prospects"; and "Item 19 Exhibits".

## Exchange Controls

### Introduction

South African residents are subject to exchange controls in terms of the Exchange Control Regulations, issued under the Currency and Exchanges Act, 1933 (the "Regulations").

The Financial Surveillance Department ("FSD") of the South African Reserve Bank (previously known as the Exchange Control Department) is responsible for the day-to-day administration of exchange controls.

Most South African commercial banks have been appointed to act as authorized dealers in foreign exchange ("Authorized Dealers"). Authorized Dealers may buy and sell foreign exchange, subject to conditions and within limits prescribed by the FSD. From time to time, the FSD issues Exchange Control Rulings to Authorized Dealers, which set out the conditions, permissions and limits applicable to the transactions in foreign exchange which may be undertaken by Authorized Dealers.

The FSD from time to time also issues Circulars to provide further guidelines regarding the implementation of exchange controls. The Regulations, Rulings and Circulars are hereinafter collectively referred to as "Excon Rules".

The South African government remains committed to the gradual relaxation of exchange controls, but the existing exchange controls are strictly enforced, particularly in the current uncertain financial environment. Steps to liberalize exchange controls are announced from time to time in Budget Speeches and Medium-Term Budget Policy Statements issued by the Minister of Finance.

The purpose of exchange controls is, *inter alia*, to regulate inflows and outflows of capital from South Africa. South African residents are not permitted to export capital from South Africa except as

Table of Contents

provided for in the Excon Rules. No South African resident is thus entitled to enter into any transaction in terms of which capital (whether in the form of funds or otherwise) or any right to capital is directly or indirectly exported from South Africa without the approval of either the FSD or, in certain cases, by an Authorized Dealer.

Exchange controls do not apply to non-residents, but they may be impacted indirectly as acquisitions of South African assets and transactions with a resident may require Excon approval.

Transactions between residents (including corporations) of the Common Monetary Area ("CMA") (comprising the Republic of South Africa, the Republic of Namibia and the Kingdoms of Lesotho and Swaziland) on the one hand and non-residents of the CMA on the other hand, are subject to exchange controls.

Some of the more salient exchange control rules regarding South African corporations are as follows:

South African companies with a satisfactory business track record may in terms of the foreign direct investment dispensation expand their business offshore under certain conditions. Authorized Dealers may consider and approve an application for such a foreign investment up to an amount of ZAR500 million per calendar year. The criteria in this regard were relaxed in 2011, by *inter alia*:

allowing South African companies to make bona fide new outward foreign direct investments outside the current line of business of the applicant company;

withdrawing the prohibition on the transfer of additional working capital funding in respect of investments below ZAR500 million per applicant company per calendar year; and

relaxing the so-called "loop structure" provisions for South African companies, by allowing South African companies to acquire from 10% to 20% equity and/or voting rights in a foreign target entity, which may hold investments and/or make loans into any CMA country.

Applications for larger investments must be referred to the FSD. There is no limit to the amount of funds which may be approved by the FSD.

With regard to larger foreign investments the FSD may require capital outflows to be staggered in order to manage the potential impact on the foreign exchange market. In the past, the FSD required the South African investor to exercise control (namely 50% plus one share) over the foreign investment but this has been relaxed to the effect that the South African investor must hold at least 10% of the voting rights.

South African corporations which have been granted approval to transfer funds abroad for purposes of acquiring an approved foreign investment are entitled to retain abroad foreign dividends which relate to the operation of the approved foreign investment. Any foreign dividend which may have been repatriated to South Africa after October 26, 2004 may thereafter be transferred abroad again, at any time and for any purpose other than for purposes of a non-resident (which is directly or indirectly controlled by a South African resident) using such funds to reinvest into the CMA.

Controls on current account transactions, with the exception of certain discretionary expenses, have been abolished and are dealt with by Authorized Dealers in terms of the Exchange Control Rulings.

Authorized dealers in foreign exchange may, against the production of suitable documentary evidence, provide forward cover to South African residents in respect of fixed and ascertained foreign exchange commitments covering the movement of goods.

Although the stated intention of the South African Government is to gradually relax exchange controls, there are currently no indications that the remaining exchange controls will be abolished by the South African Government in the near future.

Table of Contents

***Sales of Shares***

While a non-resident is no longer subject to any exchange control restrictions in respect of the acquisition or disposal of South African securities, control is still exercised in respect of the transfer of South African securities to a non-resident by placing the endorsement "non-resident" on all securities acquired by non-residents or in which non-residents acquire an interest. The reason and effect of this endorsement is to serve as evidence of the introduction of the funds by a non-resident to ensure that in the event of a disposal by the non-resident of the interest, the payment may be transferred abroad or credited to a non-resident account. An Authorized Dealer is required to endorse the shares, allow the transfer of the funds and cancel the endorsement once the shares are transferred back to a South African resident. Dematerialized, listed shares are not required to be endorsed by an Authorized Dealer, but a non-resident annotation will be recorded in the share register.

Since non-residents are not subject to the exchange control rules, the Sappi Limited ordinary shares and ADSs are freely transferable outside the CMA between non-residents of the CMA. In addition, the proceeds from the sale of shares on the JSE on behalf of shareholders who are not residents of the CMA are freely remittable to such shareholders (other than former residents of South Africa), provided that there has been compliance with the formalities referred to in the previous paragraph.

***Dividends***

There are no restrictions under South African exchange control rules on the free transferability of cash dividends to shareholders or ADR holders provided that there has been compliance with the formalities referred to above. Dividends declared to an emigrant from South Africa out of capital gains, or out of income earned from normal trading activities prior to the date of emigration, must be placed to the credit of a blocked account with an Authorized Dealer. Dividends declared out of income earned from normal trading activities subsequent to the date of emigration are, however, remittable. Permission may be requested from the FSD to export such blocked assets subject to an exit charge of 10%. The FSD has the discretion to also stipulate an exiting schedule to stagger the outflow of capital.

It is our policy to declare cash dividends, if any, in US dollars. South African shareholders are paid the ZAR equivalent of the US dollar denominated declaration. ADR holders are paid in US dollars. Holders of ADRs on the relevant record date are entitled to receive any dividends payable in respect of the shares underlying the ADRs, subject to the terms of the Deposit Agreement. Subject to exceptions provided in the Deposit Agreement, cash dividends are paid by the Depository to holders of ADRs in accordance with the Deposit Agreement. The Depository charges holders of ADRs, to the extent applicable, taxes and other governmental charges and specified fees and other expenses, for any cash distributions made pursuant to the Deposit Agreement, other than distributions of cash dividends.

Our ability to pay dividends is restricted by the terms of the recent Refinancing. See "Item 8 Financial Information Dividends" for a listing of the most restrictive conditions for declaring cash dividends.

Subject to exceptions relating to former residents of South Africa, shareholders who are not residents of the CMA who are in receipt of script dividends and who elect to dispose of the relevant shares may remit the proceeds arising from the sale of the relevant shares.

**Taxation**

Prospective investors should consult their professional advisers on the possible tax consequences of buying, holding or selling any Securities under the laws of their country of citizenship, residence or domicile. The discussions that follow for each jurisdiction are based upon the applicable laws and interpretations thereof as in effect as of the date hereof, all of which laws and interpretations are subject to change or differing interpretations, which changes or differing interpretations could apply retroactively.

Table of Contents

*South Africa*

*General*

The discussion below summarizes the pertinent South African tax consequences for shareholders of Sappi Limited as well as for holders of American Depository Receipts ADRs listed on the New York Stock Exchange.

Shareholders of a South African company could be subject to the following types of taxes:

income tax imposed in terms of the Income Tax Act No. 58 of 1962 ("the ITA"); or

capital gains tax ("CGT") imposed in terms of the Eighth Schedule to the ITA ("the Eighth Schedule"); and

Securities Transfer Tax ("STT") as provided for in the Securities Transfer Tax Act No. 25 of 2007.

A further tax which may have been relevant to a shareholder is Secondary Tax on Companies ("STC"), which was imposed in terms of the ITA on a company in respect of dividends declared. STC has been replaced with a dividends tax ("Dividends Tax") with effect from April 01, 2012.

*Basis of Taxation*

South Africa applies a residence basis of taxation in terms of which residents are subject to income tax on their worldwide income and CGT on their worldwide capital gains. Non-residents are taxed on their South African source income. Certain categories of income and activities are exempt from taxation.

The concept of "source" is not defined but has been interpreted in case law to refer not to whether payment is made from South Africa or elsewhere, but where the originating cause of the payment is situated.

New source rules were introduced with effect from January 01, 2012, with the view of providing more certainty regarding the source concept. In the context of disposal of assets by a non-resident, it is now expressly provided that amounts received or accrued in respect of the disposal of the asset will be from a South African source only if the asset constitutes South African immovable property or an interest therein, or if the asset is attributable to a permanent establishment ("PE") of the non-resident in South Africa and if the proceeds of such disposal are not subject to income tax in another country.

A non-resident shareholder will have an interest in immovable property if the shareholder (alone or together with any connected persons) hold more than 20% of the issued equity share capital of a South African company, where more than 80% of the net asset value of that company was attributable to immovable property situated in South Africa.

South African tax residents are thus exposed to South African tax in respect of the profits from the disposal of their worldwide assets. Non-residents are generally only exposed to South African tax in respect of the sale of an asset either if the asset constitutes South African immovable property or an interest in immovable property, or if the asset is attributable to a PE of the non-resident.

The shares issued by a South African resident company would generally be regarded as South African assets, even if the shares may be listed on a foreign stock exchange. However, the sale of such an asset would only generate South African source income in the circumstances set out above.

The CGT position is similar, as non-residents are not subject to CGT on the sale of capital assets held in South Africa except in respect of immovable property situated in South Africa (or any interest or right in such immovable property) and any assets attributable to a PE of that non-resident in South Africa. For CGT purposes, an asset is widely defined to include assets that are movable, immovable, corporeal or incorporeal and rights or interests in such property, but excludes certain limited items.

Table of Contents

In the case of a natural person, residence is established either when the person can be regarded as "ordinarily resident" in South Africa (in accordance with case law tests) or when the person satisfies a physical presence test in terms of which he/she becomes resident by virtue of his/her physical presence in South Africa for a certain prescribed period of time.

In the case of a legal person, residence is established by virtue of incorporation or formation, or by having a place of effective management, in South Africa. Excluded from the definition of "resident" are persons or entities which are, in terms of a double taxation agreement ("DTA") entered into by South Africa, deemed to be exclusively a resident of another country.

A non-resident may be protected by the provisions of a DTA from an exposure to South African tax.

South Africa and the United States concluded a DTA in 1997 ("the US DTA"). In terms of the US DTA, an individual may become a South African resident if he or she became ordinarily resident in South Africa, subject to the tie-breaker rules under Article 4 of the US DTA. A company may be resident in South Africa if it was incorporated or effectively managed in South Africa, subject to the tie-breaker rule. In terms of the tie-breaker rule of the US DTA, a company that is a resident of both South Africa and the United States will be deemed to be a resident of the country in which it is incorporated.

*STC*

Secondary Tax on Companies ("STC") was imposed on South African resident companies at a flat rate of 10% in respect of the net amount of dividends declared by such company. As mentioned above, STC has been replaced by Dividends Tax on April 01, 2012.

For STC purposes, the net amount of dividends declared was calculated as dividends declared by the company in question less all dividends which accrued to that company (but subject to certain exclusions) during its relevant "dividend cycle". Such accrued dividends were referred to as STC credits. "Dividend cycle" meant the period commencing immediately after the previous dividend cycle and ending on the date on which the dividend in question accrues to the shareholder concerned. Any excess dividends which accrued to a company in a dividend cycle could have been carried forward to the subsequent dividend cycle as STC credits in that period. Foreign dividends did not qualify as STC credits.

The Dividends Tax legislation contains a grandfather clause which provides for the utilization of STC credits against the Dividends Tax for a period of three years from the date of replacement of STC.

The imposition of STC effectively meant that a dual corporate tax system existed in South Africa, comprising of normal income tax and STC. The combination of income tax and STC increased the effective tax rate of a resident company which distributes all of its profits by way of dividends, from 28% (the normal corporate income tax rate) to 34.545%.

Liability for STC was determined independently from normal income tax. Accordingly, a company without a normal tax liability may have had a liability for STC, and vice versa, or may have been liable for both normal tax and STC.

The award of certain capitalization shares to shareholders, that is, the issue of shares which are funded by transferring reserves or undistributed profits to the company's share capital, would not be regarded as a dividend and would thus not be subject to STC, provided the shares issued constituted equity share capital of the company. Listed South African companies may offer capitalization shares, constituting equity share capital of the company, in lieu of cash dividends. The capitalization shares must carry the right to participate to an unlimited extent in the dividends or capital of the company in order to constitute equity share capital. However, on a subsequent partial reduction or redemption of capital, or upon reconstruction or liquidation of the company, the amount so transferred from reserves or undistributed profits to the equity share capital of a company will, subject to certain exceptions, be

Table of Contents

deemed to be a dividend subject to Dividends Tax. Capitalization shares issued from such reserves or profits which do not qualify as equity shares are regarded as dividends and, as such, attract Dividends Tax.

*Withholding Tax on Dividends*

Sappi Limited is obliged to withhold Dividends Tax on dividends paid to shareholders, subject to certain exclusions, reductions and exemptions. Until STC was replaced by Dividends Tax as mentioned above, Sappi was required to pay STC. Dividends Tax is levied on shareholders at a rate of 15%.

In contrast to STC, Dividends Tax (except in the case of dividends *in specie*) is a tax on the beneficial owner of the dividend, although it is collected as a withholding tax by the company paying a dividend, which implies that Sappi Limited will incur the obligation to withhold Dividends Tax.

Unlike STC, Dividends Tax rate may be reduced in terms of the provisions of a DTA, if applicable. A number of DTAs until recently provided for the reduction of tax on dividends to 0%. The Government has been renegotiating the relevant articles of these DTAs over the last few years. Therefore, all the renegotiated DTAs should provide for a reduction to 5%, typically if a company resident in the other contracting state holds at least 10% of the capital of the South African company.

The US DTA limits the Dividends Tax rate to 5% of the gross amount of the dividends if the beneficial owner of the shares is a US company holding directly at least 10% of the voting stock of the South African company paying the dividends.

The Dividends Tax will be imposed on dividends declared by a resident company and by non-resident companies listed on the Johannesburg Stock Exchange in South Africa. However, several shareholders will be exempt from the withholding tax, *inter alia* a resident company and a pension fund.

For purposes of the Dividends Tax, a "dividend" will essentially constitute any amount transferred to a shareholder in relation to a share to the extent that it does not constitute a reduction of "contributed tax capital". The term "contributed tax capital" is defined to comprise the stated capital or share capital and share premium of a company immediately before January 01, 2011, excluding certain amounts that constitute capitalized profits that did not give rise to a dividend, plus the consideration received by or accrued to the company on the issues of shares on or after January 01, 2011.

In those instances where an exemption from the Dividends Tax is available, e.g. where the beneficial owner of the shares is a resident company, the beneficial owner will be required to submit to the company a written declaration that he/she is exempt from the Dividends Tax and an undertaking to advise the company should the beneficial owner cease to be the beneficial owner, failing which the company will be required to withhold the Dividends Tax. Similarly, where the beneficial owner is subject to the Dividends Tax at a reduced rate as a result of the application of a DTA, the shareholder will be required to submit such a declaration and an undertaking to the company declaring the dividend.

*Income Tax on Dividends*

Dividends received by or accruing to persons from South African tax resident companies are generally exempt from income tax, subject to certain exceptions.

*Income Tax and Capital Gains Tax*

Profits derived from the sale or redemption of shares in a resident company may be subject to either income tax or CGT, depending on whether the shares were held as trading stock or as a capital investment. The profits would only be subject to income tax if the seller carried on business as a share dealer, i.e. if it held the shares as trading stock and if the shares were either attributable to a PE of the non-resident or constituted an interest in immovable property. If the seller is a resident company, the

Table of Contents

profits will be subject to income tax at the corporate rate of 28%, and in the case of an individual, at the marginal individual rate, which reaches a maximum of 40% on a progressive scale. Until March 31, 2012, the taxable income of a non-resident company was subject to income tax at a rate of 33% unless the profits were protected by an applicable DTA, but this tax rate has been decreased to 28% with effect from April 01, 2012. There is no tax on the distribution of profits by the branch of a non-resident company to its parent.

Profits derived by a resident from the sale or redemption of shares which were held as capital investments are subject to CGT as opposed to income tax. A portion of the net capital gain of a taxpayer is included in its taxable income, referred to as the "inclusion rate". Until February 28, 2012, the inclusion rates for companies and trusts were 50%, while the inclusion rate for individuals was 25%. However, the inclusion rates have now been increased to 66.67% and 33.33% respectively. As a result, the effective CGT rate applicable to resident or non-resident companies has been increased from 14% to 18.67% (66.67% of 28%) with effect from March 01, 2012. Resident natural persons were liable to CGT on 25% of the net capital gain, which resulted in a maximum effective CGT rate of 10%. As a result of the increased inclusion rate, at a maximum marginal rate of 40%, the maximum effective CGT rate for individuals is now 13.33%.

Any gain realized on the disposal of shares held by non-residents in a South African company as capital investments are generally not subject to CGT, unless the shares were attributable to a PE of the non-resident in South Africa, or if the shares constituted an interest in immovable property. Should a non-resident company be subject to CGT on the disposal of shares held as capital assets, the applicable CGT rate will now be 18.67%, being 66.67% of the 28% income tax rate applicable to non-resident companies.

An ADR in respect of a share in a South African resident company is regarded as an equity share for the purpose of the ITA. Therefore, the sale of such ADRs could potentially generate South African sourced income or gains, subject to the relevant facts and circumstances. However, as indicated above, a non-resident would only be exposed to South African tax in respect of such sourced income or gains if they were held via a PE of that non-resident in South Africa or if the South African company qualified as an immovable property company.

A "safe harbor" provision is contained under section 9C of the ITA, in terms whereof the gain from the sale of shares will be deemed to be of a capital nature if the seller held the shares for a period of at least three years. However, there are several conditions for and exclusions from the safe harbor rule.

If an exposure should arise for a non-resident shareholder, an applicable DTA may protect that shareholder from such exposure. For example, the US DTA prohibits, subject to exceptions, the imposition of South African tax on gains of a United States resident seller from the sale of shares, unless such shares form part of the business property of a PE which the seller has in South Africa, whether the gains are of a speculative or capital nature.

*Duty on the Shares*

STT is payable at a rate of 0.25% of the consideration payable on the transfer of beneficial ownership of any security issued by a South African incorporated company, or by a foreign company listed on the Johannesburg Stock Exchange.

"Securities" is defined to include any share or depository receipt in a company, i.e. STT will be payable on the transfer of the shares and/or on the ADRs.

"Transfer" includes the sale, assignment, cession, disposal of a security as well as the cancellation or redemption of that security, but does not include any event that does not result in a change in beneficial ownership.

Table of Contents

STT is payable regardless of whether the transfer is executed within or outside South Africa. In respect of the shares of a listed company, STT is payable by the person to whom the security is transferred.

***United States***

*Introduction*

This section, which represents the views of Cravath, Swaine & Moore LLP, our United States counsel, summarizes the material United States Federal income tax consequences to holders of our ordinary shares and ADSs as of the date of this Annual Report. The summary applies to you only if you hold our ordinary shares or ADSs, as applicable, as a capital asset for tax purposes (that is, for investment purposes). The summary does not cover United States' state or local or non-United States law. This summary is based in part upon representations of the Depository made to Sappi and the assumption that each obligation in the Deposit Agreement and any related agreements will be performed in accordance with its terms. In addition, this summary does not apply to you if you are a member of a class of holders subject to special rules, such as:

a dealer in securities or currencies;

a trader in securities that elects to use a mark-to-market method of accounting for your securities holdings;

a bank;

a life insurance company;

a tax-exempt organization;

a person that holds our ordinary shares or ADSs as part of a straddle or a hedging, integrated, constructive sale or conversion transaction for tax purposes;

a United States holder (as defined below) whose functional currency for tax purposes is not the US dollar;

a person liable for alternative minimum tax; or

a person that owns, or is treated as owning, 10% or more of any class of our ordinary shares or ADSs.

For purposes of the discussion below, you are a "United States holder" if you are a beneficial owner of our ordinary shares or ADSs who or which is:

an individual United States citizen or resident alien;

a corporation, or entity taxable as a corporation, that was created under United States law (federal or state); or

an estate or trust whose worldwide income is subject to United States Federal income tax.

## Edgar Filing: SAPPI LTD - Form 20-F

If you are not a United States holder, you are a "non-United States holder" and the discussion below titled "United States Federal Income Tax Consequences to non-United States Holders" will apply to you.

If a partnership holds our ordinary shares or ADSs, the tax treatment of a partner will generally depend upon the status of the partner and upon the activities of the partnership. If you are a partner of a partnership holding our ordinary shares or ADSs, you should consult your tax advisor.

Table of Contents

*United States Federal Income Tax Consequences to United States Holders*

*ADSs.* In general, for United States Federal income tax purposes, United States Holders of ADSs will be treated as the beneficial owners of the ordinary shares underlying those ADSs.

*Distributions.* Subject to the discussion of "passive foreign investment companies" below, the gross amount of any distribution (other than in liquidation), including the fair market value of all distributions of ordinary shares whenever a holder may elect to receive cash distributions in lieu of ordinary share distributions, that you receive with respect to our ordinary shares or ADSs (before reduction for South African income tax, if any, withheld from such distributions) generally will be included in your gross income on the day on which you, in the case where you own ordinary shares, or the Depositary, in the case where you own ADSs, receive the distribution. This distribution will be taxed to you as a dividend (that is, ordinary income) to the extent such distribution does not exceed our current or accumulated earnings and profits, as calculated for United States Federal income tax purposes ("E&P"). Dividends received by an individual United States holder during taxable years before 2013 should be considered "qualified dividend income" and will generally be taxed at a maximum rate of 15%, provided certain holding period requirements and other conditions are satisfied. Dividends received by an individual United States holder for taxable years after 2012 will be subject to tax at ordinary income rates, absent legislative action fixing a different rate. To the extent any distribution exceeds our E&P, the distribution will first be treated as a tax-free return of capital to the extent of your adjusted tax basis in our ordinary shares or ADSs, as applicable, and will be applied against and reduce such basis dollar-for-dollar (thereby increasing the amount of gain and decreasing the amount of loss recognized on a subsequent disposition of such ordinary shares or ADSs). To the extent that such distribution exceeds your adjusted tax basis, the distribution will be taxed as gain recognized on a sale or exchange of our ordinary shares or ADSs, as applicable. See "Sale or Other Disposition of Company Ordinary Shares and ADSs", below. Because we are not a United States corporation, no dividends-received deduction will be allowed to a corporate United States holder with respect to dividends paid by us.

Distributions on the ordinary shares and ADSs are expected to be made by us in US dollars. In the event that distributions on the ordinary shares and ADSs are made by us in Rand, any dividends paid in Rand generally will be included in your gross income in a US dollar amount calculated by reference to the exchange rate in effect on the day you, in the case of ordinary shares, or the Depositary, in the case of ADSs, receive the dividend. It is anticipated that the Depositary will, in the ordinary course, convert Rand received by it as distributions on the ADSs into US dollars. To the extent that the Depositary does not convert the Rand into US dollars at the time that you are required to take the distribution into your gross income for United States Federal income tax purposes, you may recognize foreign currency gain or loss, taxable as ordinary income or loss, on the later conversion of the Rand into US dollars. The gain or loss recognized will generally be based upon the difference between the exchange rate in effect when the Rand are actually converted and the "spot" exchange rate in effect at the time the distribution is taken into account and any such gain or loss will generally be treated as United States source income for United States foreign tax credit purposes.

Dividends paid by us will generally be treated as foreign source income for United States foreign tax credit limitation purposes. Subject to certain limitations, United States holders may elect to claim a foreign tax credit against their United States Federal income tax liability for South African tax withheld (if any) from dividends received in respect of our ordinary shares or ADSs, as applicable. The limitation on foreign taxes eligible for credit is calculated separately with respect to specific classes of income. For this purpose, dividends paid by us in respect of our ordinary shares or ADSs, as applicable, generally will be "passive income" or, in the case of certain types of United States holders, "general income", and therefore any United States tax imposed on these dividends cannot be offset by excess foreign tax credits that you may have from foreign source income not qualifying as "passive income" or "general income", respectively. Additional limitations on the credit apply to individual United States holders receiving dividends if the dividends are eligible for the 15% maximum tax rate on dividends described

Table of Contents

above. United States holders that do not elect to claim a foreign tax credit generally may instead claim a deduction for South African tax withheld (if any).

*Sale or Other Disposition of Company Ordinary Shares and ADSs.* Subject to the discussion of "passive foreign investment companies" below, generally speaking, in connection with the sale or other taxable disposition of our ordinary shares or ADSs, as applicable:

you will recognize gain or loss equal to the difference (if any) between:

the US dollar value of the amount realized on such sale or other taxable disposition; and

your adjusted tax basis in such ordinary shares or ADSs;

any gain or loss will be capital gain or loss and will be long-term capital gain or loss if your holding period for our ordinary shares or ADSs, as applicable, is more than one year at the time of such sale or other taxable disposition;

long-term capital gains recognized by individual United States holders during taxable years before 2013 will generally be taxed at a maximum rate of 15%;

any gain or loss will generally be treated as having a United States source for United States foreign tax credit purposes; and

your ability to deduct capital losses (if any) is subject to limitations.

If you are a cash basis United States holder who receives foreign currency (e.g. Rand) in connection with a sale or other taxable disposition of our ordinary shares or ADSs, as applicable, the amount realized will be based on the US dollar value of the foreign currency received with respect to such ordinary shares or ADSs, as determined on the settlement date of such sale or other taxable disposition.

If you are an accrual basis United States holder, you may elect the same treatment required of cash basis taxpayers with respect to a sale or other taxable disposition of our ordinary shares or ADSs, as applicable, provided that the election is applied consistently from year to year. Such election may not be changed without the consent of the Internal Revenue Service. If you are an accrual basis United States holder and do not elect to be treated as a cash basis taxpayer (pursuant to the Treasury Regulations applicable to foreign currency transactions) for this purpose, you may have a foreign currency gain or loss for United States Federal income tax purposes because of differences between the US dollar value of the foreign currency received prevailing on the date of the sale or other taxable disposition of our ordinary shares or ADSs, as applicable, and the date of payment. Any such currency gain or loss generally will be treated as ordinary income or loss and would be in addition to gain or loss, if any, that you recognized on the sale or other taxable disposition of our ordinary shares or ADSs, as applicable.

South African securities transfer tax will be payable on a subsequent registration of transfer of ordinary shares. See "- South Africa Duty on the Shares". STT will not be a creditable tax for United States foreign tax credit purposes, but will generally be deductible. In the case of an individual United States holder, such deduction will be subject to specified limits on the deductibility of investment expenses.

*Passive Foreign Investment Company.* United States holders (who are not tax-exempt) would be subject to a special, adverse tax regime (that would differ in certain respects from that described above) if we were or were to become a passive foreign investment company for United States Federal income tax purposes. Although the determination of whether a corporation is a passive foreign investment company is made annually, and thus may be subject to change, we do not believe that we are, nor do we expect to become, a passive foreign investment company. Notwithstanding the foregoing, we urge you to consult your own United States tax advisor regarding the adverse United States Federal income tax consequences of owning the stock of a passive foreign investment company and of making certain elections designed to lessen those adverse consequences.

Table of Contents

*Tax Reporting.* Recently-adopted legislation imposes new U.S. return disclosure obligations (and related penalties for failure to disclose) on U.S. individuals that hold any interest in a "specified foreign financial asset" if the aggregate value of all such assets exceeds \$50,000. The definition of "specified foreign financial asset" generally includes an equity interest in a foreign corporation if not held in an account maintained by a U.S. financial institution. In accordance with this legislation, you may be required to file IRS Form 8938 with your U.S. federal income tax returns. We urge you to consult your own United States tax advisor regarding this legislation and the filing of IRS Form 8938.

*United States Federal Income Tax Consequences to non-United States Holders*

*Distributions.* If you are a non-United States holder, you generally will not be subject to United States Federal income tax on distributions made on our ordinary shares or ADSs unless:

you conduct a trade or business in the United States; and

the distributions are effectively connected with the conduct of that trade or business (and, if an applicable income tax treaty so requires as a condition for you to be subject to United States Federal income tax on a net income basis in respect of income from our ordinary shares or ADSs, as applicable, such distributions are attributable to a permanent establishment that you maintain in the United States).

If you fail the above test, you generally will be subject to tax in respect of such distributions in the same manner as a United States holder, as described above, except as altered by applicable income tax treaty. In addition, any effectively connected distributions received by a non-United States corporation may also, under certain circumstances, be subject to an additional "branch profits tax" at a 30% rate or such lower rate as may be specified by an applicable income tax treaty.

*Sale or Other Disposition of Company Ordinary Shares and ADSs.* If you are a non-United States holder, you will not be subject to United States Federal income tax, including withholding tax, in respect of a gain recognized on a sale or other taxable disposition of our ordinary shares or ADSs, as applicable, unless:

your gain is effectively connected with a trade or business that you conduct in the United States (and, if an applicable income tax treaty so requires as a condition for you to be subject to United States Federal income tax on a net income basis in respect of gain from the sale or other disposition of our ordinary shares or ADSs, as applicable, such gain is attributable to a permanent establishment maintained by you in the United States); or

you are an individual and are present in the United States for at least 183 days in the taxable year of the sale or other disposition, and either:

your gain is attributable to an office or other fixed place of business that you maintain in the United States; or

you have a tax home in the United States.

Gain that is effectively connected with your conduct of a trade or business in the United States generally will be subject to tax in the same manner as it would be if recognized by a United States holder, as described above, except as altered by an applicable income tax treaty. Effectively connected gains realized by a non-United States corporation may also, under certain circumstances, be subject to an additional "branch profits tax" at a rate of 30% or such lower rate as may be specified by an applicable income tax treaty. If you are an individual who is present in the United States for at least 183 days in the taxable year of the sale or disposition and certain other conditions are met, you generally will be subject to tax at a rate of 30% on the gain realized, net of U.S. source capital losses realized during the same taxable year.

Table of Contents

*Backup Withholding and Information Reporting*

Payments and sale proceeds in respect of our ordinary shares or ADSs, as applicable, which are made in the United States or by a United States related financial intermediary may be subject to United States information reporting rules. You will not be subject to "backup" withholding of United States Federal income tax provided that:

you are an exempt recipient; or

you provide a taxpayer identification number (which, in the case of an individual, is his or her social security number) and meet other information reporting and certification requirements.

If you are a non-United States holder, you generally are not subject to information reporting and backup withholding, but you may be required to provide a certification of your non-United States status in order to establish that you are exempt. You may be subject to information reporting and backup withholding if you sell your ordinary shares or ADSs through a United States broker and you are not eligible for an exemption. You may be subject to information reporting, but not backup withholding if you sell your shares or ADSs through a broker with certain connections with the United States and you are not eligible for an exemption.

Amounts withheld under the backup withholding rules may be credited against your United States Federal income tax liability, and you may obtain a refund of any excess amounts withheld under the backup withholding rules by filing the appropriate claim for refund with the Internal Revenue Service.

**Documents on Display**

Sappi Limited files periodic reports and other information with the SEC. You may read and copy any document that Sappi Limited files with the SEC on the SEC's website, [www.sec.gov](http://www.sec.gov), or at the SEC's public reference room at 100 F Street, N.E., Washington, D.C. 20549. Please call the SEC at 1-800-732-0330 (in the United States) or at +1 202 942 8088 (outside the United States) for further information on the operation of its public reference room.

The documents concerning Sappi Limited referred to in this Annual Report may also be inspected at the registered office of Sappi Limited at 48 Ameshoff Street, Braamfontein, Johannesburg, Republic of South Africa.

Table of Contents

**ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

The principal quantitative and qualitative disclosures about market risks (which are the risk of loss arising from adverse changes in market rates and prices) to which Sappi is exposed are:

**Market Risk**

Interest rate risk. We are exposed to interest rate risk as we borrow funds at both fixed and floating interest rates.

Currency risk. We are exposed to economic, transaction and translation currency risks.

Commodity price risk. We are exposed to commodity price risk from price volatility and threats to security of our raw material supply and other inputs to the production process.

See note 29.2 to our group Annual Financial Statements included elsewhere in this Annual Report.

**Credit Risk**

Credit risk. We are exposed to credit risk in relation to trade receivables, cash deposits and financial investments.

See note 29.2 to our group Annual Financial Statements included elsewhere in this Annual Report.

**Liquidity Risk**

Liquidity risk. We are exposed to liquidity risk in that we may be unable to meet our current and future financial obligations as they fall due.

See note 29.2 to our group Annual Financial Statements included elsewhere in this Annual Report.

**Other Risks**

Plantation risk. We are exposed to fair value fluctuations on plantations, as well as to fire, hazardous weather, disease and other damages to our plantations. See "Item 5 Operating and Financial Review and Prospects Critical Accounting Policies and Estimates"

Discount rates. We are exposed to the discount rate fluctuations in the calculation of post-employment benefit liabilities. See "Item 5 Operating and Financial Review and Prospects Critical Accounting Policies and Estimates".

For additional descriptions of these risks, see notes 2, 10, 16, 20, 27 to our group Annual Financial Statements included elsewhere in this Annual Report.

**Commodity Price Risk**

The selling prices of the majority of products manufactured and purchase prices of many raw materials used generally fluctuate in line with commodity cycles. Prices of dissolving wood pulp generally follow those of paper pulp, although the cycle is generally less volatile. As a result, the sale of dissolving wood pulp also tends to act as a natural hedge for paper pulp. Our group, as a whole, purchases slightly more pulp than it has the capacity to produce (including dissolving wood pulp) and is therefore generally neutral to pulp price changes. From a regional perspective, Sappi Southern Africa and Sappi Fine Paper North America are net sellers of pulp. Sappi Southern Africa has an economic, capacity based pulp integration of approximately 175%. Sappi Fine Paper North America and Sappi Fine Paper Europe, which is a net buyer of pulp,

have capacity based pulp integration of approximately 119% and 56%, respectively. However, there are differences between the types of pulp required in our paper making operations and the grades of pulp we produce, as well as regional differences. We are therefore

Table of Contents

a buyer as well as a seller of paper pulp. For a description of our level of pulp integration, see "Item 4 Information on the Company Business Overview" and "Item 4 Information on the Company Sappi Fine Paper and Sappi Southern Africa". Despite our present relatively high level of pulp integration on a group-wide basis, in the event of significant increases in the prices of pulp on a group-wide basis, our non-integrated and partially integrated operations could be adversely affected if they are unable to raise paper prices by amounts sufficient to maintain margins. For a description of our markets see "Item 5 Operating and Financial Review and Prospects Markets"

We are exposed to commodity price risk from price volatility and threats to security of supply of our raw materials and other inputs to the production process. A combination of contract and spot deals are used to manage price volatility and contain supply costs. Contracts are limited to the group's own use requirements. For details on commodity price deals see note 29 to our group Annual Financial Statements included elsewhere in this Annual Report; and for a description of our supply requirements see "Item 4 Information on the Company Supply Requirements".

Table of Contents**ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES****American Depositary Shares****Fees and Charges Payable by Holders of American Depositary Receipts**

The Bank of New York Mellon serves as the depository for our American Depositary Shares ("ADSs"), evidenced by American Depositary Receipts ("ADRs"). Holders of ADRs are required to pay various fees and charges to the depository.

ADR holders are required to pay the depository amounts in respect of expenses incurred by the depository on behalf of ADR holders, including expenses arising from taxes or other governmental charges, cable, telex and facsimile transmission, or conversion of foreign currency into US dollars.

ADR holders are also required to pay additional fees for certain services provided by the depository, as set forth in the table below:

<b>Depository service</b>	<b>Fee payable by ADR holders</b>
Execution and delivery of ADRs, including in connection with share distributions	Up to US\$5.00 per 100 ADSs (or portion thereof)
Surrender of ADRs and withdrawal of shares underlying ADSs	Up to US\$5.00 per 100 ADSs (or portion thereof)
Cash distributions other than distributions of cash dividends	Not in excess of US\$0.02 per ADS (or portion thereof)
Registration for the transfer of shares	Registration or transfer fees that may from time to time be in effect

In addition, holders are required to pay a fee for the distribution of proceeds from sales of securities or rights. Such fee (which may be deducted from such proceeds) will be in an amount equal to the lesser of (i) the fee for the issuance of ADRs referred to above which would have been charged if the securities were treated as deposited shares and (ii) the amount of such proceeds.

The depository collects fees for delivery and surrender of ADRs directly from investors depositing shares or surrendering ADRs' for the purpose of withdrawal or from intermediaries acting for them. The depository may seek payment of fees and charges in connection with distributions by deducting relevant amounts from cash dividends or other cash distributions to holders.

**Direct and Indirect Payments by the Depository to us**

The depository has agreed to reimburse us annually for certain expenses we incur in connection with the administration and maintenance of our ADR facility, including, but not limited to, investor relations expenses, the annual NYSE listing fees or any other program related expenses. The depository has also agreed to waive certain depository fees that would otherwise be payable by us, including its basic administration charge for the ADR facility and its fees for certain other services available to us or ADR holders, and to pay all its standard out-of-pocket administrative, maintenance and shareholder services expenses for providing services to ADR holders. The amount of expenses for which the depository will reimburse us is subject to an annual cap agreed between us and the depository. In fiscal 2011, we received a payment of US\$353,272 (fiscal 2010: US\$712,712 for the period from August 2007 to July 2009) from the depository as reimbursement for our expenses incurred in connection with the ADR facility. To date no reimbursement has been received for fiscal 2012.

Table of Contents

**PART II**

**ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES**

Not applicable.

**ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS**

For information on our dividend policy see "Item 8 Financial Information Dividends".

**ITEM 15. CONTROLS AND PROCEDURES**

**(a) Disclosure Controls and Procedures**

As of the end of the period covered by this report (the "Evaluation Date") Sappi's management (with the participation of its Chief Executive Officer and Chief Financial Officer), conducted an evaluation pursuant to Rule 13a-15 promulgated under the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act"), of the effectiveness of the design and operation of its disclosure controls and procedures. Based on this evaluation, Sappi's Chief Executive Officer and Chief Financial Officer concluded that, as of the Evaluation Date, such disclosure controls and procedures (which include, without limitation, controls and procedures designed to ensure that information required to be disclosed by Sappi in the reports it files or submits under the Exchange Act is accumulated and communicated to Sappi's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure) were effective to provide reasonable assurance that information required to be disclosed by Sappi in reports it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission.

**(b) Management's Annual Report on Internal Control over Financial Reporting**

Management of Sappi, together with its consolidated subsidiaries, is responsible for establishing and maintaining adequate internal control over financial reporting. Sappi's internal control over financial reporting is a process designed under the supervision of the Chief Executive Officer and Chief Financial Officer to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Sappi's group Annual Financial Statements for external reporting purposes in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board.

As of September 2012, we conducted an assessment of the effectiveness of Sappi's internal control over financial reporting based on the framework established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO").

Based on this assessment, we determined that Sappi's internal control over financial reporting as of September 2012 is effective. We also determined that there were no material weaknesses as of this date.

The registered public accounting firm that audited the group Annual Financial Statements has issued an attestation report on the effectiveness of Sappi's internal control over financial reporting. This report appears below.

**(c) Attestation Report of the Independent Registered Public Accounting Firm**

**To the Board of Directors and Shareholders of Sappi Limited:**

We have audited the internal controls over financial reporting of Sappi Limited and subsidiaries (the "Group") as of September 30, 2012 based on criteria established in *Internal Control Integrated*

Table of Contents

*Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Group's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on the Group's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Group maintained, in all material respects, effective internal control over financial reporting as of September 30, 2012, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the group annual financial statements as of and for the year ended September 2012 of the Company and our report dated December 10, 2012 expressed an unqualified opinion on those financial statements.

/s/ Deloitte & Touche  
December 10, 2012  
Johannesburg, South Africa

**(d) Changes in Internal Control over Financial Reporting**

There were no changes in our internal control over financial reports that occurred during the reporting period that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT**

The Board has determined that Dr Deenadayalen Konar qualifies as an independent audit committee financial expert on the Audit Committee of Sappi Limited. The Board determined that Dr Konar acquired the required attributes by way of education, practical experience, practice as a registered accountant and auditor, and participation as a member of the audit committees of significant entities that have applied International Financial Reporting Standards. See "Item 6 Directors, Senior Management and Employees Directors and Senior Management" for a description of Dr Konar's background and relevant experience. Dr Konar is an independent Non-Executive Director of Sappi.

**ITEM 16B. CODE OF ETHICS**

We have adopted a code of ethics (the "code") that applies to all directors and employees of Sappi worldwide. We believe the code constitutes a "code of ethics" as defined in Item 16B of Form 20F. Following a review during the course of fiscal 2012 of the wording and scope of the code, we are currently in the process of adopting an updated code.

The current code is, and the revised code will be, available on the Sappi Limited website, at [www.sappi.com](http://www.sappi.com). Hard copies are available on written request. The information on our website does not form part of this Annual Report and is not incorporated by reference herein.

**ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES**

Principal independent auditor fees paid for fiscal 2012 and 2011 were as follows:

	<b>2012</b>	<b>2011</b>
	<b>(US\$ million)</b>	
Audit Fees <sup>(1)</sup>	6	6
Tax Fees <sup>(2)</sup>	2	1
<i>Other</i>		
Refinancing related services		1
	<b>8</b>	<b>8</b>

(1) Audit fees consist of fees related to the audit or review of the group's Annual Financial Statements.

(2) Tax services are fees for professional services performed with respect to tax compliance, tax advice and tax planning. This includes advice on tax aspects of group acquisitions, disposals, reorganizations, and financing, as well as analysis of the impact on the group for changes to tax laws in various countries.

**Audit Committee Pre-Approval Policy**

In accordance with our audit committee pre-approval policy, all audit and non-audit services performed for us by our independent accountants were pre-approved by the audit committee of our board of directors, which concluded that the provision of such services by the independent accountants was compatible with the maintenance of that firm's independence in the conduct of its auditing functions.

The pre-approval policy provides for specific audit committee pre-approval, prior to engagement, of any services, other than audit services covered by the annual engagement letter. In addition, services to be provided by the independent accountants that are not within the category of pre-approved services must be approved by the audit committee prior to engagement, regardless of the service being requested and the amount.

Requests or applications for services that require specific separate approval by the audit committee must include a detailed description of the services to be provided and a joint statement confirming that

Table of Contents

the provision of the proposed services does not impair the independence of the independent accountants.

Pre-approval may be granted either by the audit committee or its chairman or any member of the audit committee to whom this authority has been delegated by the audit committee. Where pre-approval is granted by an individual member of the audit committee, the matter is tabled for noting at the next meeting of the full Sappi Limited audit committee.

The pre-approval requirements for taxation services obliges the auditor to (a) describe the proposed tax services engagements in writing, (b) discuss with the audit committee the potential effects of the services on the auditor's independence, and (c) document the substance of that discussion.

**ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES**

Not applicable.

**ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS**

During fiscal 2012 no Sappi Limited share repurchases were made.

Sappi stated its intention, on November 09, 2000, to acquire Sappi shares through a wholly owned Sappi subsidiary, subject to applicable stock exchange and legal limitations. In prior years up to the meeting held on March 03, 2008, Sappi was given approval at its annual general meetings of shareholders, to purchase its shares up to a maximum of 10% of the issued ordinary share capital in any one fiscal year. The general authority was subject to the Listings Requirements of the JSE Limited and the Companies Act of South Africa, as amended, and was granted until the next annual general meeting. Since 2008 no authority to purchase shares was sought from shareholders. Some of the repurchased shares, have been, and will continue to be, utilized to meet the requirements of the Sappi Limited Share Incentive Trust and the Sappi Limited Performance Share Incentive Trust from time to time. Sappi is unlikely to seek shareholder approval to repurchase shares in the near future.

**ITEM 16F. CHANGE IN REGISTRANT'S CERTIFYING ACCOUNTANT.**

Not applicable.

**ITEM 16G. CORPORATE GOVERNANCE**

As Sappi is listed on the JSE Limited in Johannesburg, Sappi is required to comply with the King III Report on Corporate Governance for South Africa ("King Report"). Although there are differences between the King Report and the NYSE corporate governance rules, Sappi applies the principles of the King Report and has voluntarily adopted corporate governance practices that do not differ in any significant ways from the requirements of the NYSE corporate governance rules. See "Item 6 Directors, Senior Management and Employees Corporate Governance".

**REPORT OF THE INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

**To the Board of Directors and Shareholders of Sappi Limited:**

We have audited the accompanying group balance sheets of Sappi Limited and subsidiaries (the "Group") as of September 2012 and 2011 and the related group income statements, group statements of comprehensive income, group statements of changes in equity and group statements of cash flows for each of the three years in the period ended September 2012. These group annual financial statements are the responsibility of the Group's management. Our responsibility is to express an opinion on these group annual financial statements based on our audits.

We conducted our audits in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such group annual financial statements present fairly, in all material respects, the financial position of Sappi Limited and its subsidiaries as of September 2012 and 2011 and the results of their operations and cash flows for each of the three years in the period ended September 2012 in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Group's internal control over financial reporting as of September 30, 2012, based on the criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated December 10, 2012 expressed an unqualified opinion on the Group's internal control over financial reporting.
