AMMEX GOLD MINING CORP.

(An Exploration Stage Mining Company)

NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2007

(Stated in US Dollars)

(Unaudited)

Note 1

Basis of Presentation

The Company, incorporated under the laws of the State of Nevada, is a natural resource company engaged in the acquisition, exploration and development of silver, gold and precious metal properties. The Consolidated financial statements of Ammex Gold Mining Corp. include the accounts of its wholly owned subsidiary. In the opinion of management, these consolidated financial statements reflect all adjustments necessary to present fairly the Company's consolidated financial position at March 31, 2007 and the consolidated results of operations and consolidated statements of cash flows for the three months ended March 31, 2007. The results of operations for the three months and nine months ended March 31, 2007, are not necessarily indicative of the results to be expected for the entire fiscal year.

Note 2

Principal Accounting Policies

The consolidated financial statements are prepared by management in accordance with generally accepted accounting principles of the United States of America. The principal accounting policies followed by the Company are as follows:

Cash and cash equivalents

Cash and cash equivalents include cash and highly liquid investments with an original maturity of three months or less.

Fair Value of Financial Instruments

The following disclosure of the estimated fair value of financial instruments is made in accordance with the requirements of SFAS No. 107 Disclosures about Fair Value of Financial Instruments. The estimated fair value amounts have been determined by the Company, using available market information and appropriate valuation methodologies. The fair value of financial instruments classified as current assets including cash approximate carrying value due to the short-term maturity of the instruments.

Fixed Assets

Fixed Assets are capitalized at cost. Amortization is recorded on a declining balance basis at a rate between 20% and 30% per annum.

Mineral Property Exploration Costs

The company expenses all costs related to the maintenance and exploration of mineral claims in which it has secured exploration rights prior to establishment of proven and probable reserves. To date, the Company has not established the commercial feasibility of its exploration prospects; therefore, all exploration costs are being expensed.

SEE ACCOMPANYING NOTES

Note 2

Principal Accounting Policies (Continued)

Income Taxes

Potential benefits of income tax losses are not recognized in the accounts until realization is more likely than not. The company has adopted SFAS No. 109 as of its inception. Pursuant to SFAS No. 109 the company is required to compute tax asset benefits for net operating losses carried forward. Potential benefits of net operating losses have not been recognized in these financial statements because the company cannot be assured it is more likely than not it will utilize the net operating losses carried forward in future year; and accordingly is offset by a valuation allowance.

Foreign Currency Translation

The Company's functional currency is the U.S. dollar. Translation gains and losses that arise from exchange rates fluctuations on transactions denominated in a currency other than the functional currency are included in the results of operations as incurred. Transactions in foreign currency are translated into U.S dollars as follows:

-

Monetary items at the rate prevailing at the balance sheet date;

-

Non-monetary items at the historical exchange rate;

-

Revenue and expenses that are monetary items are valued at the average rate in effect during the applicable accounting period.

Asset Retirement Obligation

The Company has adopted Statement of Financial Accounting Standards No. 143 (SFAS 143), Accounting for Asset Retirement Obligations , which requires that an asset retirement obligation (ARO) associated with the retirement of a tangible long-lived asset be recognized as a liability in the period in which it is incurred and becomes determinable, with an offsetting increase in the carrying amount of the associated asset. The cost of the tangible asset, including the initially recognized ARO, is depleted, such that the cost of the ARO is recognized over the useful life of the asset. The ARO is recorded at fair value, and accretion expense is recognizable over time as the discounted liability is accreted to its expected settlement value. The fair value of the ARO is measured using expected future cash flow, discounted at the Company s credit-adjusted-risk-free interest rate. To date, no material asset retirement obligation exists due to the early stage of the Company s mineral exploration. Accordingly, no liability has been recorded.

Note 2

Principal Accounting Policies (Continued)

Environmental Protection and Reclamation Costs

The operations of the Company have been, and may in the future be affected from time to time in varying degrees by changes in environmental regulations, including those for future removal and site restoration costs. Both the likelihood of new regulations and their overall effect upon the Company may vary from region to region and are not predictable.

Environmental expenditures that relate to ongoing environmental and reclamation programs are charged against statements of operations as incurred or capitalized and amortized depending upon their future economic benefits. The Company does not anticipate any material capital expenditures for environmental control facilities.

Basic and Diluted Net Loss Per Share

The Company computes net income (loss) per share in accordance with SFAS No. 128, Earnings per Share . SFAS No. 128 requires presentation of both basic and diluted earnings per share (EPS) on the face of the income statement. Basic EPS is computed by dividing net income (loss) available to common shareholders (numerator) by the weighted average number of shares outstanding (denominator) during the period. Diluted EPS give effect to all dilutive potential common shares outstanding during the period using the treasury stock method. In computing Diluted EPS, the average stock price for the period is used in determining the number of shares assumed to be purchased from the exercise of stock options or warrants. Diluted EPS excludes all dilutive potential shares if their effect is anti dilutive.

Note 3

Business Combination

By a conditional sale purchase contract dated July 25, 2006, the Company acquired 100% of Minera Jeronimo S.A. de C.V. (Jeronimo), a Mexican corporation, by the issuance of 1,455,000 restricted common shares at \$1.63 per share for a total consideration of \$2,371,650. Jeronimo has the option to acquire a 65% interest in six mining concessions located in NW Sonora, Mexico, subject to \$400,000 in exploration work commitments. The acquisition was accounted for by the purchase method, however, there were no identifiable assets acquired other than the rights to six mining concessions in Mexico.

Note 4

Related Party Transactions Note 10

The Company incurred the following expenses in respect to directors of the Company:

	Three months ended March 31,		November 20, 2002 (Date of Inception) to March 31,
	<u>2007</u>	<u>2006</u>	<u>2006</u>
Consulting fees	\$	\$	\$
	-	10,000	175,339
Employment compensation	18,493	-	176,147
Mineral properties - geological fees	-	-	29,915
Rent	<u>11,489</u>	=	<u>29,965</u>
	\$	\$	\$
	<u>29,982</u>	<u>10,000</u>	<u>411,366</u>

During the three months period ended March 31, 2007, a Company's director contributed consulting services having a fair value of \$Nil (2006: \$10,000).

Included in accounts payable at March 31, 2007 is \$56,147 (June 30, 2006: \$Nil) due to directors of the Company for unpaid fees.

By an agreement dated June 28, 2006, the Company agreed to issue 3,000,000 restricted common shares and agreed to pay an annual compensation of \$75,000 to an employee/director of the Company. The agreement commenced on June 30, 2006 and will continue until June 30, 2007 and shall automatically renew for successive twelve month periods.

Note 5

Non-cash Transactions

Investing and financing activities that do not have a direct impact on current cash flows are excluded from the statements of cash flows. The following transactions have been excluded from the statement of cash flows:

a)

During the nine months ended March 31, 2007 the company acquired Minera Jeronimo S.A. de C.V. for 1,455,000 common shares at \$1.63 per share for consideration of \$2,371,650.

b)

During the three months ended March 31, 2007, the Company issued 190,000 common shares valued at \$76,750 for services. At March 31, 2007, \$16,094 has been charged to expenses and \$60,656 has been included in prepaid expenses.

Note 7

Share Capital

a)

On July 28, 2006, the Company entered into a private placement share subscription agreement for the issuance of 750,000 shares of restricted common stock at \$2.00 per share and 750,000 share purchase warrants. The warrants are exercisable into one common share for each warrant held at \$3.50 per warrant until January 31, 2007.

b)

During the nine months ended March 31, 2007, the Company cancelled and returned to treasury 57,600,000 restricted common shares held by a former director of the Company and 4,454,000 common shares held by a shareholder of the Company, all for no consideration.

c)

During the three months ended March 31, 2007, the Company issued 190,000 common shares valued at \$76,750 pursuant to agreements for various parties to perform services for the Company. At March 31, 2007, \$60,656 is included in prepaid expenses.

d)

Subsequent to March 31, 2007, the Company issued 75,000 common shares for services.

SEE ACCOMPANYING NOTES

Note 8

Mineral Properties

a)

Austin, Nevada

By a Letter of Intent dated July 12, 2006, the Company has the right to earn a 100% interest in 29 unpatented mining claims situated near Austin, Nevada in consideration for minimum advance royalty payments totalling \$145,141 over a six year period and \$35,000 every year thereafter as follows:

-

\$10,141 upon signing of agreement (paid);

-

\$10,000 by July 12, 2007;

-

\$15,000 by July 12, 2008;

-

\$20,000 by July 12, 2009;

-

\$25,000 by July 12, 2010;

-

\$30,000 by July 12, 2011;

-

\$35,000 by July 12, 2012 and on each anniversary date thereafter.

In addition, an annual work commitment of \$25,000 per year commencing from July 12, 2007 and costs to keep the property in good standing are required. In addition, the property vendor is entitled to a 2% net smelter return royalty (NSR) on any production up to a maximum of \$10,000,000. The Company will have the right to purchase 1% of the NSR for \$1,000,000.

The term of the contract is 25 years and renewable for another 25 years.

b)

Jerónimo, Mexico

The Company's subsidiary, Minera Jerónimo S.A. de C.V. has the option to acquire a 65% interest in six mining concessions located in NW Sonora, Mexico, subject to \$400,000 in exploration work commitments.

SEE ACCOMPANYING NOTES

Note 8

Mineral Properties (cont d)

c)

Elko, Nevada

By an option agreement dated August 1, 2006, the Company has the right to earn an 80% interest in 24 unpatented mining claims situated in Elko County, Nevada in consideration for the payment of \$25,000 (paid) and incurring expenditures of \$4,000,000 within a three-year period as follows:

-

\$1,000,000 on or before August 1, 2007;

-

\$1,500,000 on or before August 1, 2008; and

-

\$1,500,000 on or before August 1, 2009.

These expenditures include minimum advance royalties of US\$30,000 per year due on October 20th of each year.

This agreement is subject to a 3% NSR upon commencement of commercial production. The Company has the right to purchase each 1% of the NSR for \$1,000,000.

Note 9

Commitments

Edgar Filing: Ammex Gold Mining Corp. - Form 10QSB/A

By a lease agreement dated July 6, 2006, with a company having a director in common with a director of the Company, the Company agreed to lease office premises for three years commencing August 1, 2006 for the following consideration:

2007	\$
	21,725
2008	25,831
2009	28,157
2010	<u>2,362</u>
	\$
	<u>78,075</u>

By letter agreements dated July 10, 2006, the Company engaged three consultants to provide investor relations services to the Company in consideration for a total of \$5,000 per month for three months and 150,000 common shares.

SEE ACCOMPANYING NOTES

Note 10

Discontinued Operations

By a special resolution of the shareholders of the Company dated December 19, 2006, the Company has dissolved its wholly owned subsidiary Oasis. The only asset of Oasis as at June 30, 2006, was amount receivable totaling \$334 this asset was written-off in the period ended September 30, 2006. Also on the books of Oasis was accumulated deficit totaling \$4,734 and accumulated other comprehensive loss of \$4,400.

The consolidated balance sheet includes the following amounts related to the discontinued operations of the subsidiary:

Item 1A.

RISK FACTORS

There have been no material changes in our risk factors from those disclosed in our Annual Report on Form 10-KSB for the period ended June 30, 2006.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation

THE FOLLOWING DISCUSSION OF THE RESULTS OF OUR OPERATIONS AND FINANCIAL CONDITION SHOULD

BE READ IN CONJUNCTION WITH OUR FINANCIAL STATEMENTS AND THE NOTES THERETO INCLUDED ELSEWHERE IN THIS REPORT.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

Certain statements in this quarterly report on Form 10-QSB contain or may contain forward-looking statements that are subject to known and unknown risks, uncertainties and other factors which may cause actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. These forward-looking statements were based on various factors and were derived utilizing numerous assumptions and other factors that could cause our actual results to differ materially from those in the forward-looking statements. These factors include, but are not limited to, economic, political and market conditions and fluctuations, government and industry regulation, interest rate risk, U.S. and global competition, and other factors. Most of these factors are difficult to predict accurately and are generally beyond our control. You should consider the areas of risk described in connection with any forward-looking statements that may be made herein. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this report. Readers should carefully review this quarterly report in its entirety, including but not limited to our financial statements and the notes thereto. Except for our ongoing obligations to disclose material information under the Federal securities laws, we undertake no obligation to release publicly any revisions to any forward-looking statements, to report events or to report the occurrence of unanticipated events. For any forward-looking statements contained in any document, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

Background

Ammex Gold Mining Corp. ("Ammex the company the corporation "we" or "us") is an exploration stage mining company with no ore reserves or mining operations. Our activities to date have been, and our current activities are, limited to searching for material from which we may be able to extract precious minerals and designing a process for profitable extraction. There is no assurance that commercially viable mineral deposits exist on any property we own or may acquire. Any further exploration will be required before a final evaluation as to the economic and legal feasibility of our plans can be made.

We were incorporated on November 20, 2002 under the laws of the state of Nevada as Reese Corp. On August 18, 2006, we amended our certificate of incorporation with the state of Nevada to change our name to Ammex Gold Mining Corp. We believe that the name change more accurately reflects our new corporate direction as a precious

metals mining exploration company. Our chief executive officer is Christopher Crupi, a former Vice President of PricewaterhouseCoopers. Mr. Crupi oversees the administrative and operational activities. In addition to his duties at AmMex Gold Mining Corp., Mr. Crupi is also President and CFO of Paramount Gold Mining Corp., a publicly traded mining exploration company with property interests in South America and Mexico.

Properties

El Tiliche Mining Concessions, Sonora, Mexico

On July 25, 2006 the corporation acquired 100% of Minera Jeronimo S.A. de C.V. The key asset in Minera Jeronimo is the El Tiliche project, located in NW Sonora, Mexico, approximately 50 kilometers NE of the Penoles-Newmont Herradura Gold Mine, within the gold belt that stretches from southern California to central Sonora. The corporation acquired Minera Jeronimo by issuing 1,455,000 restricted common shares, and must maintain the concessions in good standing. Minera Jeronimo can earn a 65% interest in the El Tiliche project by spending US\$400,000 on exploration during the next 12 months.

The Mesquite mine and the Picacho mine are among other large gold producers in this belt. Minera Jeronimo controls a very strategically located and large 14,300 hectares of mineral rights in 6 contiguous mining concessions. El Tiliche has been advanced over the past 2 years with a number of exploration programs and now boasts at least 6 drill-ready targets. Numerous surface samples have yielded over 5 grams gold per ton and over 100 grams silver per ton, which compares very well with early results at other producing mines in this belt.

The El Tiliche concessions are located at the intersection of a series of NE-SW high angle structures that pass through the Herradura gold deposit, and NW trending transform faults that makeup part of the Sonora-Mojave Megashear. Gold and silver mineralization associated with low angle faulting, as well as with higher angle structures, has been recognized in a number of areas within the concession block. Numerous small mine workings and prospects were mapped and sampled during a recently completed detailed reconnaissance of the property.

Intrusive and volcanic rocks of Jurassic age outcrop over a wide area in numerous low hills that are separated by areas of thin alluvial cover, and mineralized zones often project under this alluvial cover. During the recently completed detailed reconnaissance of the area, 584 rock chip samples were collected and sent to ALS Chemex Laboratories for analysis. The results of the sampling program are summarized below:

Summary of Results

Gold in grams/ton		Total # of	Silver in grams/ton		Total # of
From	To	Samples	From	To	Samples
> 5.00		32	> 100		12
1.00	4.99	77	50	99	19
0.50	0.99	33	30	49	23
0.20	0.49	65	20	29	30
0.10	0.19	58	10	19	69
< 0.10		319	< 10		431

Total number of samples collected 584

During the quarter we reported the first set of drill results from the project. The drill program tested multiple targets and the results represent approximately 4,200 meters of the 5,427 meter reverse-circulation drill program in 46 holes completed to date. Drill highlights are as follows:

In the La Muralla area drill holes TRC-001 to TRC-004 and TRC-011, TRC-012 hit anomalous gold values with low grade silver over intersects of one to eight meters. The best intersect was 1 meter in TRC-002 from 60 to 61 meters that intersected 0.36 g/t gold with 39.2 g/t silver.

Drill holes in the Karina area had no significant intersects.

In the La Cima area 3 drill holes TRC-013 to TRC-015 intersected anomalous gold values and low grade silver over lengths of 1 to 5 meters.

In the Hawaii area, 6 drill holes TRC-016 to TRC-018, TRC-030, TRC-032, TRC-033 contained several intersects of anomalous gold values and low grade silver over lengths of 1 to 21 meters. The best intersect was 2 meters in TRC-016 from 54 to 56 meters that intersected 1.81 g/t gold with 34.2 g/t silver.

In the Karla area 3 drill holes TRC-019 to TRC-021 intersected anomalous gold values and low grade silver over lengths of 1 meter. The best intersect was 1 meter in TRC-020 from 12 to 13 meters that intersected 2.34 g/t gold with 0.2 g/t silver.

In the Tiliche area 4 drill holes TRC-022 to TRC-026 intersected anomalous gold values and low grade silver over lengths of 1 to 5 meters. The best intersect was 1 meter in TRC-024 from 80 to 81 meters that intersected 1.42 g/t gold with 0.1 g/t silver.

In the Las Compana assays are complete for 1 drill hole, TRC-028. This hole had several intersects of anomalous gold values and low grade silver over lengths of 1 to 9 meters. The best intersects were:

3 meters from 53 to 56 meters of 1.32 g/t gold with 0.9 g/t silver; and
1 meter from 115 to 116 meters of 1.56 g/t gold with 0.3 g/t silver.

Bailey Hills (Carlin Trend), Nevada, USA

On July 31, 2006 we entered into an option agreement to earn an 80% interest from Consolidated Global Minerals Ltd. in the Bailey Hills property located along the Carlin Trend within the Great Basin of Nevada. Under the terms of the option agreement, we can earn a 80% interest in the property from Consolidated Global Minerals Ltd. with an upfront cash payment of US\$25,000; and expenditures of US\$4,000,000 within a three-year period, payable as follows: US\$1,000,000 in year one, US\$1,500,000 in year two and US\$1,500,000 in year three. The upfront cash payment has been made. We have also advanced \$200,000 towards our first year work commitment and set aside another \$277,000 for this purpose. The Bailey Hills project covers approximately 4.5 square miles (approx. 3,000 acres) and consists of 150 mining claims within the southernmost part of the Carlin Trend, along a prospective northwest structural zone which hosts numerous world-class gold deposits.

The structural and lithologic setting at Bailey Hills, both on a regional and property scale, is a direct analog to that at the 1.5 million ounce gold Rain / Emigrant deposits (Newmont), located 43 miles north-northwest of the Bailey Hills project. Underlying the Bailey Hills property are the same units which host gold at Rain, and proximal intrusions are noted at both. Recognition of these intrusive bodies at Bailey Hills was previously hampered by post-mineralization volcanic cover rocks, but geophysical surveys have identified intrusive rocks and numerous high angle faults underlying the claim area.

A substantial database of geological, geochemical and geophysical data has been obtained for the project from previous operators. Results from surface exploration, geophysics and initial drilling compare well with the lithology, geochemistry and structure of several known mines on the Carlin Trend. A CSAMT (resistivity) geophysical survey has just been completed for the corporation and is currently being interpreted.

A controlled source audio-magnetotelluric (CSAMT) survey was completed during the fall of 2006 over a portion of the Bailey Hills property. Objective of the survey was to detail horsts and horst boundaries prior to drill testing. The horst complex had previously been defined by gravity surveys and drilling completed in 1997 by Newmont Mining Corp. The target model is based upon the Rain mine analogy, where gold mineralization is contained in breccia at the Devils Gate Limestone (Ddg) Webb (Mw) contact. However, the gold on the contact is confined to a limited portion immediately adjacent to feeder structures. Mineralization is generally found only within 60 to 100m of the feeder. Thus, it is imperative the drill targeting be directed at the Ddg / Mw contact proximal to the feeder structure.

The CSAMT survey delineated the horst in sufficient detail as to permit drill testing for a Rain type target. A total of fifteen (15) holes are proposed with thirteen (13) to test the Devils Gate - Webb contact proximal to feeder structures

and two intended to test a sub-parallel structure bounding an interpreted Eocene intrusion.

Further details regarding the CSAMT survey can be found on our website: www.ammexgoldmining.com.

During the quarter, drilling commenced at the project. The first drill hole at drill site (P7) at their Bailey Hills project, located 35 miles SE of Carlin, Nevada, intersected the Devils Gate formation at a depth of 980 feet, which is very close to that predicted by the CSAMT study, ending at a total depth of 1260 feet. Drilling is ongoing and is currently at a depth of 970 feet at hole #2 at drill site (P1).

Ox Creek Property, Callaghan district, Nevada, USA

On July 17, 2006 we signed a Letter of Intent to acquire a 100% interest in 29 claims, located 13 miles northeast of Austin, Nevada (Callaghan Property). The property consists of 29 claims covering approximately 560 acres, where surface samples have shown gold grades of up to 31 grams per tonne over a width of 3 feet. Geologically, it is located within and adjacent to the Callaghan Mountain structural window through the Roberts Mountains Thrust, in an area of strong hydrothermal alteration and highly anomalous geochemistry. These are associated with high angle faulting as well as the low angle thrust zones.

Available data from prior exploration in the area confirms in detail the presence of highly anomalous concentrations of gold, arsenic, antimony, mercury, zinc and silver in soils, rock chips and drill cuttings, with associated decalcification of silty limestones and locally intense silicification. There have been narrow drill intercepts and surface rock samples with gold contents up to 0.10 ounces per ton. Lithologic units very favorable to mineralization are thinly overlain by thrust plates of less favorable host rocks.

An exploration target is located on the southern extension of the poorly defined Cottonwood Spring resource of 50,000 - 75,000 ounces of gold, apparently controlled by faulting and favorable lithologies. Our technical personnel are currently compiling a large amount of data produced by earlier exploration groups to better define additional structural, geochemical and lithological exploration targets. We are currently conducting work planning on this property.

Under the terms of the agreement, the Company has the right to earn a 100% interest in 29 unpatented mining claims situated near Austin, Nevada in consideration for minimum advance royalty payments totalling \$145,141 over a six year period and \$35,000 every year thereafter, an annual work commitment of \$25,000 per year commencing from July 12, 2007 and costs to keep the property in good standing. In addition, the property vendor is entitled to a 2% NSR on any production up to a maximum of \$10,000,000. The Company will have the right to purchase 1% of the

NSR for \$1,000,000.

The term of the contract is 25 years and renewable for another 25 years.

Regulation and Licensing

Our exploration activities will be subject to various laws and regulations governing prospecting, taxes, labor standards, occupational safety and health, waste disposal, protection and reclamation of the environment, protection of endangered and protected species, toxic substances and other matters. We may in the future be subject to clean up liability under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 and other federal and state rules that establish cleanup liability for the release of hazardous substances. Further amendments to current laws and regulations governing operations and activities of companies involved in mineral exploration are actively considered from time to time and could have a material adverse impact on us. We may also be subject to environmental and employment regulations at the state level. We do not expect to incur a material expense in complying with state requirements, unless or until we advance to the development or production stage.

We will be required to obtain necessary permits or exemptions for exploration work to commence. Once we commence exploratory activities, we may experience material adverse economic effects as a result of complying with applicable laws relating to the protection of the environment. If and when we are able to commence exploration or production, such issues will become more complex and costly to deal with.

Environmental and other laws and regulations change periodically. We cannot determine the impact of future changes in such laws and regulations on our operations or future financial position. We believe the Company is currently in substantial compliance with all applicable environmental laws and regulations. If we are not in compliance with any such law or regulation, we may be subject to fines, clean-up orders, restrictions on operations, or other penalties.

Competition

The business of mineral exploration is highly competitive and tends to be dominated by a limited number of major mining companies. Although we do not compete directly against any particular firms for sales or market share, many of the human and physical resources we may require - such as engineering professionals, geologists, skilled equipment operators, and managers, as well as extractive and metallurgical processes and equipment -- are also sought by companies with substantially greater financial means than we possess, which places us at a competitive disadvantage in obtaining such resources. Accordingly, we cannot be certain that we will be able to obtain the human and physical resources we may need from time to time or to obtain them at an affordable cost.

Market Description

Gold and Silver

We are a precious metals exploration and development company. The gold and silver markets have been strong since 2001, where gold and silver has increased from \$268 per ounce to its current price of \$657 per ounce and silver has increased from \$4.58 per ounce to its current price of \$12.84 per ounce. Management believes that both the gold and silver markets will remain strong for the foreseeable future. Management believes that for so long as gold remains above \$300 per ounce, the properties under exploration remain commercially viable if geological results prove positive.

Comparison of Operating Results for the Three and Nine Months Ended March 31, 2007 to the Three and Nine Months Ended March 31, 2006.

Revenues and Expenses

As the Company is at the exploration stage there are no revenues during the quarter.

During the three and nine months ended March 31, 2007 exploration expenses were \$270,018 and \$827,567 respectively. There were no exploration expenditures in the comparable periods in 2006. Geologist expenses were \$35,289 and \$245,373 during the three and nine months ended March 31, 2007 respectively. Mineral property costs were \$nil and \$2,645,543 in the three and nine months ended March 31, 2007. Mineral costs represent the acquisition of El Tiliche properties.

Liquidity and Capital Resources

Net working capital as at March 31, 2007 is \$84. We are currently considering financing options including the private placement of common stock.

Assets and Liabilities

Current assets are \$283,577 and current liabilities are \$283,493 as at March 31, 2007. The Demand Note will be converted to equity subsequent to period end.

Critical Accounting Policies

Financial Reporting Release No. 60, which was released by the Securities and Exchange Commission (the "SEC"), encourages all companies to include a discussion of critical accounting policies or methods used in the preparation of financial statements. The Company's consolidated financial statements include a summary of the significant accounting policies and methods used in the preparation of the consolidated financial statements. Management believes the following critical accounting policies affect the significant judgments and estimates used in the preparation of the financial statements.

Exploration Stage Company

The Company complies with Financial Accounting Standard Board Statement No. 7 and The Securities and Exchange Commission Exchange Act Guide 7 for its characterization of the Company as pre-exploration stage.

Capitalization of Mineral Claim Costs

Cost of acquisition, exploration, carrying and retaining unproven properties are expensed as incurred until such time as reserves are proven. Costs incurred in proving and developing a property ready for production are capitalized and amortized over the life of the mineral deposit or over a shorter period if the property is shown to have an impairment

in value. Expenditures for mining equipment are capitalized and depreciated over their useful life.

Foreign Currency Translation

The Company's former subsidiary, Oasis, translated amounts from its functional currency, Canadian dollars, to the reporting currency, United States dollars, in accordance with the Statement of Financial Accounting Standards (SFAS) No. 52, Foreign Currency Translation . At cash balance sheet date, recorded balances that are denominated in a currency other than US dollars are adjusted to reflect the current exchange rate which may give rise to a foreign currency translation adjustment accounted for as a separate component of stockholders' deficiency and included in comprehensive loss.

Monetary assets and liabilities are translated into the reporting currency at the exchange rate in effect at the end of the year. Non-monetary assets and liabilities are translated at the exchange rate prevailing when the assets were acquired or the liabilities assumed. Revenues and expenses are translated at the rate approximating the rate of exchange on the transaction date. All exchange gains and losses are included in the determination of net income (loss) for the year.

Income Taxes

The Company uses the asset and liability method of accounting for income taxes pursuant to SFAS No. 109 Accounting for Income Taxes . Under the assets and liability method of SFAS 109, deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statements carrying amounts of existing assets and liabilities and loss carryforwards and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled.

Basic Loss Per Share

The Company reports basic loss per share in accordance with SFAS No. 128, Earnings Per Share . Basic loss per share is computed using the weighted average number of shares outstanding during the year.

Fair Value of Financial Instruments

The carrying values of the Company's financial instruments, consisting of amounts receivable, accounts payable and accrued liabilities approximate their fair values due to the short-term maturity of such instruments. Due to related parties also approximates its fair value. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from these financial instruments.

Comprehensive Loss

The Company has adopted SFAS No. 130 Reporting Comprehensive Income. Comprehensive loss is comprised of net loss and foreign currency translation adjustments.

New Accounting Standards

In December 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 123R, Share Based Payment, that addresses the accounting transactions in which a company exchanges its equity instruments for goods or services. SFAS No. 123R requires that such transactions be accounted for using a fair value based method. Adoption of SFAS No. 123R is effective for fiscal periods beginning after December 15, 2005.

Item 3. Controls and Procedures.

As of the end of the period covered by this Report, the Company's chief executive officer and its principal financial officer (the Certifying Officers), evaluated the effectiveness of the Company's "disclosure controls and procedures," as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934. Based on that evaluation, the Certifying Officers concluded that, as of the date of their evaluation, the Company's disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed in the Company's periodic filings under the Securities Exchange Act of 1934 is accumulated and communicated to management, including these officers, to allow timely decisions regarding required disclosure.

The Certifying Officer has also indicated that there were no significant changes in our internal controls or other factors that could significantly affect such controls subsequent to the date of their evaluation and there were no corrective actions with regard to significant deficiencies and material weaknesses.

Our management, including the Certifying Officer, does not expect that our disclosure controls or our internal controls will prevent all errors and fraud. A control system, no matter how well conceived and operated, can provide only

reasonable, not absolute, assurance that the objectives of the control system are met. In addition, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people or by management override of the control. The design of any systems of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Because of these inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

PART II. OTHER INFORMATION

Item 1.

Legal Proceedings.

None.

Item 2.

Unregistered Sales of Equity Securities,

None.

Item 3.

Defaults upon senior securities.

None.

Item 4. Submission of matters to a vote of security holders.

There were no matters submitted during the quarter ended March 31, 2007 to a vote of the Company's securities holders.

Item 5. Other Information

Not applicable

Item 6. Exhibits and Report on Form 8-K

There were two reports filed on Form 8-K during the quarter ended March 31, 2007 regarding the appointment of auditors.
