PRIVATE SECURITIES LITIGATION REFORM ACT SAFE HARBOR STATEMENT

This Annual Report on Form 10-K contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that may be identified by the use of such words as may , could , should , will , would , believe , expect , anticipate , intend , plan , assume or similar expressions. Examples of forward-looking statements include, but are not limited to, estimates with respect to the Company s financial condition, results of operations and business that are subject to various factors which could cause actual results to differ materially from those estimates. The following factors, among others, could cause the Company s actual performance to differ materially from the expectations, forecasts and projections expressed in the forward-looking statements: general and local economic conditions, changes in interest rates, demand for loans, real estate values, deposit flows, regulatory considerations, competition, technological developments, retention and recruitment of qualified personnel, and market acceptance of the Company s pricing, products and services.

PART I

Item 1. Business

General

Brookline Bancorp, Inc. (the Company) was organized in November 1997 for the purpose of acquiring all of the capital stock of Brookline Savings Bank (Brookline or the Bank) upon completion of the reorganization of Brookline from a mutual savings bank into a mutual holding company structure. In January 2003, Brookline Savings Bank changed its name to Brookline Bank. Brookline was established as a savings bank in 1871. Brookline Bancorp, MHC (the MHC), a mutual holding company, owned 15,420,350 of the Company s shares of outstanding common stock through July 9, 2002.

In June 2000, the Company commenced operations of Lighthouse Bank (Lighthouse) as New England s first-chartered internet-only bank. On July 17, 2001, Lighthouse was merged into Brookline.

The Company, the MHC, Brookline and Lighthouse converted from state to federal charters on July 16, 2001. As a result, each of these entities became subject to regulation by the Office of Thrift Supervision (OTS).

On July 9, 2002, the Boards of Directors of the MHC, the Company and Brookline completed a Plan of Conversion and Reorganization. As of that date, the 15,420,350 shares owned by the MHC were retired and the Company sold 33,723,750 shares of common stock for $10.00 per share. After taking into consideration related expenses of $4.5 million, net proceeds from the stock offering amounted to $332.7 million. An additional 24,888,478 shares were issued to existing stockholders based on an exchange rate of 2.186964 new shares of common stock for each existing share, resulting in 58,612,228 total new shares outstanding. Cash was paid in lieu of fractional shares.

Upon completion of the Plan of Conversion and Reorganization, (a) Brookline Bancorp, Inc. became a Delaware corporation and the holding company parent of the Bank, (b) the MHC ceased to exist and (c) the net assets of the MHC, $8.5 million, were transferred into Brookline.

On January 7, 2005, the Company completed the acquisition of Mystic Financial, Inc. (Mystic) for approximately $69.1 million. That amount consisted of $27.7 million in cash (including approximately $3.9 million for the cancellation of Mystic stock options), issuance of 2,516,525 shares of the Company s common stock, $1.6 million in income tax benefits related to cancellation of the Mystic stock options , $4.7 million of direct acquisition costs, net of related tax benefits, and a credit of $1.1 million for 70,312 shares of Company common stock obtained and placed in treasury resulting from termination of Mystic s employee stock option plan and Company common stock owned by Mystic.

Mystic was the parent of Medford Co-operative Bank, a bank headquartered in Medford, Massachusetts with seven banking offices serving customers primarily in Middlesex County in Massachusetts. The acquisition of Mystic has provided expanded commercial and retail banking opportunities in that market and enabled the Company to deploy some of its excess capital. For additional information about the acquisition, see note 2 to the consolidated financial statements in the Company s Annual Report to Stockholders for the year ended December 31, 2005 which is incorporated herein by reference.

On February 28, 2006, the Company signed a merger agreement to increase its ownership interest in Eastern Funding LLC (Eastern) from approximately 29% to 86% through a cash payment of approximately $16.2 million, excluding related transaction costs. Eastern, which had total assets of approximately $106 million at December 31, 2005, specializes primarily in the financing of coin-operated laundry and dry cleaning equipment in the greater metropolitan New York area and selected other locations in the Northeast. The acquisition, which is subject to the approval of Eastern investors and the

Company s regulators, is expected to be completed in the second quarter of 2006 and to be modestly accretive to earnings immediately thereafter.

Market Area and Credit Risk Concentration

As of December 31, 2005, Brookline operated fifteen full-service banking offices in Brookline, Medford and adjacent communities in Middlesex County and Norfolk County in Massachusetts.

Brookline s deposits are gathered from the general public primarily in the communities in which its banking offices are located. Brookline s lending activities are concentrated primarily in the greater Boston metropolitan area and eastern Massachusetts. The greater Boston metropolitan area benefits from the presence of numerous institutions of higher learning, medical care and research centers and the corporate headquarters of several significant mutual fund investment companies. Eastern Massachusetts also has many high technology companies employing personnel with specialized skills. It should be noted, however, that Massachusetts is the only state in the United States that has lost population for two years in a row. These factors affect the demand for residential homes, multi-family apartments, office buildings, shopping centers, industrial warehouses and other commercial properties.

Brookline s urban and suburban market area is characterized by a large number of apartment buildings, condominiums and office buildings. As a result, for many years, Brookline has emphasized multi-family and commercial real estate mortgage lending. These types of loans typically generate higher yields, but also involve greater credit risk than one-to four-family mortgage loans. Many of Brookline s borrowers have more than one multi-family or commercial real estate loan outstanding with Brookline. Moreover, the loans are concentrated in the market area described in the preceding paragraph.

In the first quarter of 2003, the Company commenced originating indirect automobile loans. In general, the success of lending in this business segment depends on many factors, the more significant of which include the policies established for loan underwriting, the monitoring of portfolio performance, and the effect of economic conditions on consumers and the automobile industry. For regulatory purposes, the Company s loan portfolio is not classified as subprime lending . Most of the Company s loans are originated through automobile dealerships in Massachusetts.

In February 2006, Brookline hired a senior officer with 34 years of experience to be responsible for commercial loans to businesses for working capital and other business-related purposes. It is contemplated that such lending will be to companies located primarily in Massachusetts. As with commercial real estate mortgage loans, commercial business loans involve greater credit risk. Success of lending in this segment likewise depends on many factors including the policies established for loan underwriting, the monitoring of borrower performance, competitive factors affecting a borrower s business and the state of the economy.

Economic Conditions and Governmental Policies

The earnings and business of the Company are affected by external influences such as general economic conditions and the policies of governmental authorities, including the Federal Reserve Board. The Federal Reserve Board regulates the supply of money and bank credit to influence general economic conditions throughout the United States. The instruments of monetary policy employed by the Federal Reserve Board affect interest rates earned on investment securities and loans and interest rates paid on deposits and borrowed funds.

Repayment of multi-family and commercial real estate loans made by the Company generally is dependent on sufficient income from the properties to cover operating expenses and debt service. Repayment of commercial loans generally is dependent on the demand for the borrowers products or services and the ability of the borrower to compete and operate on a profitable basis. Repayment of indirect automobile loans generally is dependent on the financial well-being of the borrowers and their capacity to service their debt levels. The asset quality of the Company s loan portfolio, therefore, is greatly affected by the economy in the Company s market area.

Since June 2004, the Federal Reserve Board has increased the federal funds rate for overnight borrowings between banks fourteen times resulting in a rate of 4.50% as of the end of February 2006, the highest level in the past four and one-half years. As a result of these rate setting actions, a flat yield curve has evolved that has put pressure on the Company s net interest margin. The rate increases also prompted some of the Company s borrowers to refinance existing loans and seek new loans at fixed rates of interest for extended periods of time. If further rate increases are approved by the Federal Reserve Board, the ability of borrowers to service their debt could be adversely affected as well as the value of properties and assets pledged as collateral for loans.

Competition

The Company faces significant competition both in making loans and in attracting deposits. The Boston metropolitan area has a high density of financial institutions, many of which are branches of significantly larger institutions which have greater financial resources than the Company, and all of which are competitors of the Company to varying degrees. The Company s competition for loans comes principally from commercial banks, savings banks, savings and loan associations, mortgage banking companies, credit unions, insurance companies and other financial service companies. Its most direct competition for deposits has historically come from commercial banks, savings banks, savings and loan associations and credit unions. The Company faces additional competition for deposits from non-depository competitors such as the mutual fund industry, securities and brokerage firms and insurance companies.

Competition for loans and deposits intensified greatly in 2005. As a result, rates paid for deposits increased more rapidly than the increases in rates set by the Federal Reserve Board for borrowings between banks. Rates offered on new loans, however, did not increase at the same price needed to sustain historic levels of profit margin.

Investment Securities

The investment policy of the Company is reviewed and approved by the Board of Directors on an annual basis. The current policy states that investments should generally be of high quality and credit risk should be limited through diversification. Investment decisions are made based on the safety of the investment, expected earnings in relation to investment risk, the liquidity needs of the Company, the interest rate risk profile of the Company, and economic and market trends.

Generally, debt securities must be rated A or better by at least one nationally-recognized rating agency at the time of purchase. Debt securities rated BBB at the time of purchase are allowed provided the security has a scheduled maturity of no more than two years and the purchase is authorized by the chief executive officer of the Company. The carrying value of all debt securities in the Company s investment portfolio that are not rated or rated BBB or lower are not to exceed 10.0% of stockholders equity, excluding unrealized gains on securities available for sale (core capital). At December 31, 2005, $1.5 million of debt securities were rated BBB or lower, an amount equal to 0.3% of core capital.

U.S. Government-Sponsored Enterprises

The Company invests in debt securities issued by U.S. Government-sponsored enterprises. Such investments include debt securities issued by the Federal Home Loan Banks, Fannie Mae, Ginnie Mae and the Federal Farm Credit Bank. None of those obligations is backed by the full faith and credit of the U.S. Government. The aggregate carrying value of such debt securities are not to exceed 60% of the Company s stockholders equity and the aggregate carrying value of debt securities issued by the Federal Home Loan Banks and any other U.S. Government-sponsored enterprise should be no more than 50% and 25%, respectively, of the Company's total investments in debt securities issued by U.S. Government-sponsored enterprises.

In 2005, most of the Company s investment purchases were debt securities issued by U.S. Government-sponsored enterprises with maturities primarily in the eighteen month to two year range. The Company concentrated on acquiring debt securities with short maturities to reduce interest rate risk during a period of rising interest rates. The aggregate carrying value of debt securities issued by U.S. Government-sponsored

enterprises of $293.5 million at December 31, 2005 equalled 48.7% of the Company s stockholders equity at that date. Of that total, $151.2 million, or 51.5%, was invested in debt securities issued by the Federal Home Loan Banks and $74.2 million, or 25.3%, was invested in debt securities issued by Fannie Mae. These percentages slightly exceeded the Company s policy limits of 50% and 25%, respectively. All of such debt securities were rated AAA except for one debt security with a carrying value of $2.0 million that was rated AA .

Corporate Obligations

Regarding investments in corporate obligations, no more than $5.0 million of any debt security should mature beyond one year at the time of purchase, no investment of more than $3.0 million in any debt security can be made without the prior approval of the chief executive officer of the Company and no investment of over $8.0 million can be made without the prior approval of the Executive Committee of the Board of Directors. To maintain diversification in the portfolio, the aggregate carrying value of debt securities issued by one company (excluding short-term investments) must not exceed $15.0 million and the aggregate carrying value of debt securities issued by companies considered to be in the same industry must not exceed $75.0 million. The latter limit is allowed provided the aggregate value of investments rated less than AA does not exceed $50.0 million. At December 31, 2005, the total of corporate obligations was $8.5 million and the total amount of debt securities issued by corporate entities in the same industry was $3.0 million.

Mortgage Securities

The Company also invests in mortgage related securities, including collateralized mortgage obligations (CMOs). These securities are considered attractive investments because they (a) generate positive yields with minimal administrative expense, (b) impose minimal credit risk as a result of the guarantees usually provided, (c) can be utilized as collateral for borrowings, (d) generate cash flows useful for liquidity management and (e) are qualified thrift investments for purposes

of the thrift lender test that the Company is obliged to meet for regulatory purposes.

Mortgage related securities are created by the pooling of mortgages and the issuance of a security with an interest rate that is less than the average interest rate on the underlying mortgages. Mortgage related securities purchased by the Company generally are comprised of a pool of single-family mortgages. The issuers of such securities are generally U.S. Government-sponsored enterprises such as Fannie Mae, Freddie Mac and Ginnie Mae who pool and resell participation interests in the form of securities to investors and guarantee the payment of principal and interest to the investors. Occasionally, the Company purchases mortgage related securities that are not issued by U.S. Government-sponsored enterprises. Such purchases are usually made for community reinvestment (CRA) purposes. Mortgage related securities generally yield less than the loans that underlie such securities because of the cost of payment guarantees and credit enhancements.

Investments in mortgage related securities generally do not entail significant credit risk. Such investments, however, are susceptible to significant interest rate and cash flow risks when actual cash flows from the investments differ from cash flows estimated at the time of purchase. Additionally, the market value of such securities can be affected adversely by market changes in interest rates. Prepayments that are faster than anticipated may shorten the life of a security and result in the accelerated expensing of any premiums paid, thereby reducing the net yield earned on the security. Although prepayments of underlying mortgages depend on many factors, the difference between the interest rates on the underlying mortgages and prevailing mortgage interest rates generally is the most significant determinant of the rate of prepayments. During periods of declining interest rates, refinancing generally increases and accelerates the prepayment of underlying mortgages and the related security. Such an occurrence can also create reinvestment risk because of the unavailability of other investments with a comparable rate of return in relation to the nature and maturity of the alternative investment. Conversely, in a rising interest rate environment, prepayments may decline, thereby extending the estimated life of the security and depriving the Company of the ability to reinvest cash flows at the higher market rates of interest.

CMOs are a type of debt security issued by a special purpose entity that aggregates pools of mortgages and mortgage related securities and creates different classes of CMO securities with varying maturities and amortization schedules as well as residual interest with each class possessing different risk characteristics. The cash flows from the underlying collateral are generally divided into tranches , or classes, whereby tranches have descending priorities with respect to the distribution of principal and interest repayment of the underlying mortgages and mortgage related securities, as opposed to pass through mortgage-backed securities where cash flows are distributed pro rata to all security holders. In contrast to mortgage-backed securities from which cash flow is received pro rata by all security holders (and hence, prepayment risk is shared), the cash flow from the mortgages or mortgage related securities underlying CMOs is paid in accordance with predetermined priority to investors holding various tranches of such securities. A particular tranche of a CMO may therefore carry prepayment risk that differs from that of both the underlying collateral and other tranches.

An analysis is performed of the characteristics of a mortgage related security under consideration prior to its purchase. The purchase of any mortgage related security with high price sensitivity (price decline of more than 10% under an adverse parallel change in interest rates) must be approved by the chief executive officer of the Company.

Generally, the Company has purchased the first tranche of CMOs so as to keep the expected maturities of its investments relatively short and to reduce the exposure to prepayment and reinvestment risks. The first tranche of CMOs are commonly classified as PAC-1-1 securities. No purchase of any mortgage related security in excess of $5.0 million or involving payment of a premium of 2.0% or more or having an expected average life of more than three years can be made without the approval of the chief executive officer of the Company. Purchases of all mortgage related securities not classified as PAC-1-1 securities or issued by other than U.S. Government-sponsored enterprises also require approval of the chief executive officer. It is the Company s policy that aggregate unamortized premiums on all mortgage related securities in the Company s portfolio must not exceed $5.0 million. At December 31, 2005, aggregate unamortized premiums on all mortgage related securities in the portfolio amounted to $174,000.

In the second half of 2002 and the first quarter of 2003, the Company invested a substantial part of the proceeds from the 2002 stock offering in CMO and pass-through mortgage-backed securities (collectively mortgage securities) with expected maturities in the two to three year range for CMOs and in the four to five year range for mortgage-backed securities. Because of the declining interest rate environment, the securities were purchased at a premium.

The Company s investment in mortgage securities increased from $109 million at June 30, 2002 to $315 million at March 31, 2003. From that date, the mortgage securities portfolio declined to $137 million at December 31, 2003, $71 million at December 31, 2004 and $49 million at December 31, 2005. While the Company did not purchase any mortgage securities in 2005, it obtained $38.7 million of mortgage-backed securities in connection with the Mystic acquisition.

Unprecedented prepayment of loans underlying the mortgage securities subsequent to their purchase caused the rapid decrease in the portfolio and shortened the estimated life of the securities significantly. This necessitated the accelerated expensing of part of the premiums paid to purchase the securities. Total accelerated premium amortization was $2.4 million in 2003, $266,000 in 2004 and $25,000 in 2005.

Municipal Obligations

The total of municipal obligations owned by the Company, resulting either from purchase or through the Mystic acquisition, increased from $2.7 million at December 31, 2004 to $8.5 million at December 31, 2005. Of the total, $7.8 million will mature within three years. Obligations owned at December 31, 2005 were issued by municipalities located throughout the United States and were rated AAA at that date, except for obligations with a carrying value of $1.4 million that were rated AA . At December 31, 2005, the Company also owned $12.8 million of auction rate municipal bonds. These bonds are variable rate securities with long-term maturities whose interest rates are set periodically through an auction process. The auction rate period for the bonds outstanding at December 31, 2005 ranged from 28 days to 35 days.

Preferred Stock and Marketable Equity Securities

At December 31, 2005, the Company owned marketable equity securities with a market value of $3.5 million, including net unrealized gains of $662,000, and no auction rate preferred stocks. Auction rate preferred stocks are securities issued by national companies that generally are called after 49 days from the date of issuance or are offered in a new auction. Most of the marketable equity securities include stocks of banks and utility companies. The Company s policy limits the aggregate cost of marketable equity securities issued by one company to no more than $10.0 million without prior approval of the Executive Committee of the Board of Directors. The aggregate cost of marketable equity securities issued by companies considered to be in the same industry must not exceed $30.0 million and the aggregate cost of the entire marketable equity securities portfolio must not exceed $50.0 million. The Company purchases marketable equity securities as long-term investments that can provide the opportunity for capital appreciation and dividend income that is taxed on a more favorable basis than operating income. There can be no assurance that investment in marketable equity securities will achieve appreciation in value and, therefore, such investments involve higher risk.

The following table sets forth the composition of the Company s debt and equity securities portfolios at the dates indicated:

	At December 31,					
	2005		2004		2003	
	Amount	Percent of total	Amount	Percent of total	Amount	Percent of total

The Company s loan portfolio consists primarily of first mortgage loans secured by multi-family, commercial and one-to-four family residential real estate properties located in the Company s primary lending area and indirect automobile loans. The Company also provides financing for construction and development projects, commercial lines of credit primarily to business entities and condominium associations, home equity and second mortgage loans, and other consumer loans. The Company also purchases participations in commercial loans to national companies and organizations originated and serviced primarily by money center banks. Generally, the participations mature between one day and three months and are viewed by the Company as an alternative short-term investment for liquidity management purposes rather than as traditional commercial loans.

The Company relies on community contacts as well as referrals from existing customers, attorneys and other real estate professionals to generate business within its lending area. In addition, existing borrowers are an important source of business since many of its multi-family and commercial real estate customers have more than one loan outstanding with the Company. Three commissioned loan originators on the staff of the Company are also used to generate residential mortgage loan business. The Company s ability to originate loans depends on the strength of the economy, trends in interest rates, customer demands and competition.

Many of the Company s borrowers have done business with the Company for years and have more than one mortgage loan outstanding. It is the Company s current policy that the aggregate amount of loans outstanding to any one borrower or related entities may not exceed $25.0 million. At December 31, 2005, the Company s largest borrower had a commercial loan outstanding of $20.0 million collateralized by marketable securities. Including this borrower, there were 34 borrowers each with aggregate loans outstanding of $5.0 million or greater at December 31, 2005. The cumulative total of those loans was $297.0 million, or 18% of loans outstanding. Most of this cumulative amount is comprised of multi-family and commercial real estate mortgage loans.

The Company has written underwriting policies to control the inherent risks in origination of mortgage loans. The policies address approval limits, loan-to-value ratios, appraisal requirements, debt service coverage ratios, loan concentration limits and other matters relevant to loan underwriting.

Multi-Family and Commercial Real Estate Mortgage Loans

A number of factors are considered in originating multi-family and commercial real estate mortgage loans. The qualifications and financial condition of the borrower (including credit history), profitability and expertise, as well as the value and condition of the underlying property, are evaluated. When evaluating the qualifications of the borrower, the Company considers the financial resources of the borrower, the borrower s experience in owning or managing similar property and the borrower s payment history with the Company and other financial institutions. Factors considered in evaluating the underlying property include the net operating income of the mortgaged premises before debt service and depreciation, the debt service coverage ratio (the ratio of net operating income to debt service) and the ratio of the loan amount to the appraised value.

Frequently, multi-family and commercial real estate mortgage loans are made for five to ten year terms, with an amortization period of twenty to twenty-five years, and are priced on an adjustable-rate basis with the borrower s option to fix the interest rate at the time of origination or later during the term of the loan. Generally, a yield maintenance fee and other fees are collected when a fixed-rate loan is paid off prior to its maturity.

For the past several years, a stable and then declining interest rate environment prompted many multi-family and commercial real estate borrowers to exercise their options to convert loans from an adjustable-rate to a fixed-rate basis. Additionally, many new loans originated during that time have been priced at inception on a fixed-rate basis generally for periods ranging from two to seven years. When interest rates increase during the fixed-rate phase of these loans, the Company s net interest income is negatively affected. Occasionally, the Company has partially funded loans originated on or converted to a fixed-rate basis by borrowing funds from the FHLB on a fixed-rate basis for periods that approximate the fixed-rate terms of the loans.

One-to-Four Family Mortgage Loans

The Company offers both fixed-rate and adjustable-rate mortgage loans secured by one-to-four family residences. Generally, fixed-rate residential mortgage loans with maturities beyond ten years are not maintained in the Company s loan portfolio.

The increase in one-to-four family mortgage loans from $136.0 million at December 31, 2004 to $287.4 million at December 31, 2005 resulted primarily from the inclusion of loans resulting from the Mystic acquisition. Shortly after completion of the acquisition, the Company sold $30 million of residential mortgage loans with 15 to 30 year maturities to eliminate the interest rate risk associated with holding such long-term assets in a rising interest rate environment.

Construction and Development Loans

At December 31, 2005, construction and development loans amounted to $36.0 million, $6.5 million of which had not been advanced as of that date. The $36.0 million is comprised of $6.3 million pertaining to construction of multi-family properties, $6.8 million pertaining to construction of commercial properties, $21.6 million pertaining to construction of one-to-four family residential homes and $1.3 million pertaining to land loans. Different criteria are applied in underwriting construction loans for which the primary source of repayment is the sale of the property than in underwriting construction loans for which the primary source of repayment is the stabilized cash flow from the completed project. For those

loans where the primary source of repayment is from resale of the property, in addition to the normal credit analysis performed for other loans, the Company also analyzes project costs, the attractiveness of the property in relation to the market in which it is located and demand within the market area. For those construction loans where the source of repayment is the stabilized cash flow from the completed project, the Company analyzes not only project costs but also how long it might take to achieve satisfactory occupancy and the reasonableness of projected rental rates in relation to market rental rates.

Construction and development financing is generally considered to involve a higher degree of risk than long-term financing on improved, occupied real estate. Risk of loss on a construction loan is largely dependent upon the accuracy of the initial estimate of construction costs, the estimated time to sell or rent the completed property at an adequate price or rate of occupancy, and market conditions. If the estimates and projections prove to be inaccurate, the Company may be confronted with a project which, upon completion, has a value that is insufficient to assure full loan repayment.

Commercial Loans

Commercial loans, which amounted to $105.4 million at December 31, 2005, compared to $75.3 million at December 31, 2004, included loans to condominium associations of $56.7 million and $53.1 million, respectively. Typically, such loans are for the purpose of funding capital improvements, are made for five to ten year terms and are secured by a general assignment of the revenue of the condominium association. Among the factors considered in the underwriting of such loans

are the level of owner occupancy, the financial condition and history of the condominium association, the attractiveness of the property in relation to the market in which it is located and the reasonableness of estimates of the cost of capital improvements to be made. Depending on loan size, funds are advanced as capital improvements are made and, in more complex situations, after completion of engineering inspections.

The Company also provides commercial banking services to small businesses in its market area. Product offerings include lines of credit for working capital as well as financing for capital expenditures and owner-occupied mortgage financing. Interest rates on these loans typically are tied to the prime rate and adjust when changes occur in that benchmark.

This type of commercial lending commenced with the acquisition of Mystic in January 2005. In February 2006, the Company hired a senior vice president with 34 years of loan experience to be in charge of commercial lending. The Company expects to grow its commercial lending business in a measured way by focusing on credit fundamentals and service to established business concerns. At December 31, 2005, commercial business loans amounted to $48.7 million, including $7.8 million in standby letters of credit. This part of the portfolio included a $20.0 million loan fully collateralized by marketable securities that was mentioned on the second preceding page.

Indirect Automobile Loans

The Company commenced originating indirect automobile loans in the first quarter of 2003. Such loans amounted to $459.2 million at December 31, 2005 compared to $369.0 million at December 31, 2004. Indirect automobile loans are loans for automobiles (both new and used) and light duty trucks primarily to individuals, but also to corporations and other organizations.

Indirect automobile loans are originated through dealerships and assigned to the Company. The senior vice president responsible for indirect automobile lending must approve the application of any dealer with whom the Company does business. The Company does business with approximately 175 dealerships located primarily in eastern Massachusetts. Dealer relationships are reviewed monthly for application quality, the ratio of loans approved to applications submitted and loan performance.

Loan applications are generated by approved dealers and data is entered into an application processing system. Two types of scorecard models are used in the underwriting process - credit bureau scorecard models and a custom scorecard model. Credit bureau scorecard models are based on data accumulated by nationally recognized credit bureaus. The models are risk assessment tools that analyze an individual s credit history and assign a numeric credit score. The models meet the requirements of the Equal Credit Opportunity Act. The custom scorecard model is a judgmentally derived scoring model that includes features selected for analysis by the Company. It does not contain any factors prohibited by the Equal Credit Opportunity Act. Management generates reports periodically to track and monitor scorecards in use and the consistency of application processing.

The indirect automobile loan policy limits the aggregate number of loans with credit scores of less than 660 to 15% of loans outstanding. At December 31, 2005, loans with credit scores below 660 were less than 10% of loans outstanding. The average credit score of loans in the portfolio at that date was 731.

The application processing system statistically grades each application according to score ranges. Depending on the data received, an application is either approved automatically or submitted to a credit underwriter for review. Credit underwriters may override system-designated approvals.

Loans approved by the underwriters must meet criteria guidelines established in the Company s loan policy. Credit profile measurements such as debt to income ratios, payment to income ratios and loan to value ratios are utilized in the underwriting process and to monitor the performance of loans falling within specified ratio ranges. Regarding loan to value ratios, the Company considers automobile loans to be essentially unsecured credits that are partially collateralized. When borrowers cease to make required payments, repossession and sale of the vehicle financed usually results in insufficient funds to fully pay the remaining loan balance.

Indirect automobile loans are assigned a particular tier based on the credit score determined by the credit bureau. The tier is used for pricing purposes only so as to assure consistency in loan pricing. Tier rates can be modified if certain conditions exist as outlined in the Company s loan policy. The rate paid by a borrower usually differs with the buy rate earned by the Company. A significant part of the difference between the two rates is retained by the dealer in accordance with terms agreed to between the dealer and the Company. The difference is commonly referred to as the spread . Most of the spread is paid after the end of the month in which the loan is made and is comprised of the agreed-upon rate differential multiplied by the expected average balance of the loan over its scheduled maturity. If a loan is repaid in entirety within 120 days of the loan origination date, the dealer must pay a proportionate part of the spread to the Company. If a loan is repaid after ninety days, the dealer is not obliged to repay any part of the spread amount previously received. Spread payments to dealers are amortized as a reduction of interest received from borrowers over the life of the related loans. When loans are prepaid, any remaining unamortized balance is charged to expense at that time.

Various reports are generated to monitor receipt of required loan documents, adherence to loan policy parameters, dealer performance, loan delinquencies and loan charge-offs. Summary reports are submitted to the chief executive officer, the risk management officer and the board of directors on a monthly basis.

The following table shows the contractual maturity and repricing dates of the Company s gross loans, net of unadvanced funds, at December 31, 2005. The table does not include prepayments or scheduled principal amortization.

	At December 31, 2005

Non-Performing Assets and Allowance for Loan Losses

For information about the Company s non-performing assets and allowance for loan losses, see pages 9 through 12 of the Management s Discussion and Analysis of Financial Condition and Results of Operations section of the Company s 2005 Annual Report to Stockholders which is incorporated herein by reference.

Deposits

Historically, deposits have been the Company s primary source of funds. The Company offers a variety of deposit accounts with a range of interest rates and terms. The Company s deposit accounts consist of non-interest-bearing checking accounts and interest-bearing NOW accounts, savings accounts and money market savings accounts (referred to in the aggregate as transaction deposit accounts) and certificate of deposit accounts. The Company offers individual retirement accounts (IRAs) and other qualified plan accounts.

The flow of deposits is influenced significantly by general economic conditions, changes in money market rates, prevailing interest rates and the relative attractiveness of competing deposit and investment alternatives. Brookline s deposits are obtained predominantly from customers in the communities in which its banking offices are located. Deposits are also gathered via the internet. The Company relies primarily on competitive pricing of its deposit products, customer service and long-standing relationships with customers to attract and retain deposits. Market interest rates and rates offered by competing financial institutions significantly affect the Company s ability to attract and retain deposits. The Company does not use brokers to obtain deposits.

The following table presents the deposit activity of the Company for the years indicated.

	Year ended December 31,		
	2005	2004	2003
	(Dollars in thousands)		
Net deposits	$ 371,186	$ 82,328	$ 18,303
Interest credited on deposit accounts	23,163	11,709	12,293
Total increase in deposit accounts	$ 394,349	$ 94,037	$ 30,596

In 2003, transaction deposit accounts increased $47.1 million, or 12.4%, and certificates of deposit declined $16.5 million, or 6.1%. The increase in transaction deposits was attributable in part to marketing initiatives. The decline in certificates of deposit was due to the low interest rate environment which prompted some depositors to place their funds in higher yielding non-bank financial instruments or in transaction deposit accounts with no maturities.

In 2004, transaction deposit accounts increased $29.5 million, or 6.9%, and certificates of deposit increased $64.5 million, or 25.5%. The increases were due to the opening of new branches in the fall of 2004 and 2003, marketing initiatives and a rise in interest rates in the second half of 2004 which prompted some customers to place funds in higher yielding deposit accounts.

In 2005, transaction deposit accounts increased $65.1 million, or 14.3%, and certificates of deposit increased $329.2 million, or 103.8%. Of the total increase in deposits, $332 million resulted from the acquisition of Mystic. The rise in interest rates during 2005 added to the increase in certificate of deposit accounts.

The following table sets forth the distribution of the Company s average deposit accounts for the years indicated and the weighted average interest rates on each category of deposits presented. Averages for the years presented utilize average daily balances.

	Year ended December 31, 2005			Year ended December 31, 2004		
	Average balance	Percent of total average deposits	Weighted average rate	Average balance	Percent of total average deposits	Weighted average rate
	(Dollars in thousands)

At December 31, 2005, the Company had outstanding $232.2 million in certificate of deposit accounts of $100,000 or more, maturing as follows:

Maturity Period	Amount	Weighted average rate
	(Dollars in thousands)	
Three months or less	$ 58,964	3.47%
Over three months through six months	54,548	3.82
Over six months through 12 months	76,892	3.70
Over 12 months	41,767	4.23
	$ 232,171	3.77

Borrowed Funds

The Company utilizes advances from the FHLB to fund part of its loan growth and in connection with its management of the interest rate sensitivity of its assets and liabilities. The advances are secured by a blanket security agreement which requires the Bank to maintain as collateral certain qualifying assets, principally mortgage loans and securities in an aggregate amount at least equal to outstanding advances. The maximum amount that the FHLB will advance to member institutions, including the Company, fluctuates from time to time in accordance with the policies of the FHLB. At December 31, 2005, the Company had $411.5 million in outstanding advances from the FHLB and had the capacity to increase that amount to $578.3 million.

The following table sets forth certain information regarding borrowed funds for the dates indicated:

Year ended December 31,		
2005	2004	2003

		(Dollars in thousands)	
Advances from the FHLB:

Balance outstanding at end of year	411,507	320,171	220,519
Weighted average interest rate during the year	3.67%	3.35%	4.23%
Weighted average interest rate at end of year	4.16%	3.23%	3.52%

Return on Equity and Assets

Return on equity and assets for the years presented is as follows:

	Year ended December 31,		
	2005	2004	2003
Return on assets (net income divided by average total assets)	1.01%	1.10%	1.00%
Return on equity (net income divided by average stockholders equity)	3.61%	2.99%	2.36%
Dividend payout ratio (dividends declared per share divided by net income per share)	200.00%	238.71%	216.00%
Equity to assets ratio (average stockholders equity divided by average total assets)	27.89%	36.86%	42.57%

Subsidiary Activities

Brookline is a wholly-owned subsidiary of the Company. Information as to when it was established and its activities is included elsewhere in Part I of this document.

Brookline Securities Corp. (BSC) is a wholly-owned subsidiary of the Company and BBS Investment Corporation (BBS) is a wholly-owned subsidiary of Brookline. These companies were established as Massachusetts security corporations for the purpose of buying, selling and holding investment securities on their own behalf and not as a broker. The income earned on their investment securities is subject to a significantly lower rate of state tax than that assessed on income earned on investment securities owned by the Company and Brookline. At December 31, 2005, BSC and BBS had total assets of $143.2 million and $313.0 million, respectively, of which $142.5 million and $310.3 million, respectively, were in investment securities and short-term investments.

160 Associates, Inc. (Associates), a wholly-owned subsidiary of Brookline established as a Massachusetts corporation primarily for the purpose of acquiring and holding stock in a subsidiary engaged in business that qualifies as a real estate investment trust, was liquidated on December 31, 2003. Brookline Preferred Capital Corporation (BPCC), a 99.9% owned subsidiary of Associates established as a real estate investment trust (REIT) engaged in the acquisition and holding of securities and mortgage loans, was also liquidated on December 31, 2003. These companies were liquidated because of a change in the Massachusetts law in 2003 that eliminated the favorable state tax treatment previously accorded to REITs.

Mystic Financial Capital Trust I (MFCI) and Mystic Financial Capital Trust II (MFCII) were formed for the purpose of issuing trust preferred securities and investing the proceeds from the sale of the securities in subordinated debentures issued by Mystic. The Company assumed the obligations related to the debentures when it acquired Mystic. Interest paid by the Company on the subordinated debentures equals the dividends paid by MFCI and MFCII to the holders of the trust preferred securities.

Proceeds from the trust preferred securities issued by MFCI were invested in $5.0 million of floating rate subordinated debentures that mature in 2032, but are callable at the option of the Company on April 22, 2007. These debentures represent the sole asset of MFCI. The interest rate on the debentures changes semi-annually to 6-month LIBOR plus 3.25%.

Proceeds from the trust preferred securities issued by MFCII were invested in $7.0 million of floating rate subordinated debentures that mature in 2033, but are callable at the option of the Company on April 15, 2008. These debentures represent the sole asset of MFCII. The interest rate on the debentures changes quarterly to 3-month LIBOR plus 3.70%.

Personnel

As of December 31, 2005, the Company had 169 full-time employees and 33 part-time employees. The employees are not represented by a collective bargaining unit and the Company considers its relationship with its employees to be good.

Supervision and Regulation

General

The Bank is regulated, examined and supervised by the Office of Thrift Supervision (OTS) and the Federal Deposit Insurance Corporation (FDIC). This regulation and supervision establishes a comprehensive framework of activities in

which an institution may engage. Under this system of federal regulation, financial institutions are periodically examined to ensure that they satisfy applicable standards with respect to their capital adequacy, assets, management, earnings, liquidity and sensitivity to market interest rates. The OTS examines the Bank and prepares reports for the consideration of its board of directors on any operating deficiencies.

Any change in these laws or regulations, whether by the FDIC, the OTS or Congress, could have a material adverse impact on the Company and the Bank and their operations.

Federal Banking Regulation

Business Activities. A federal savings bank derives its lending and investment powers from the Home Owners Loan Act, as amended, and the regulations of the OTS. Under these laws and regulations, the Bank may invest in mortgage loans secured

by residential and commercial real estate, commercial business and consumer loans, certain types of debt securities and certain other assets. The Bank also may establish subsidiaries that may engage in activities not otherwise permissible for the Bank, including real estate investment and securities brokerage.

Capital Requirements. OTS regulations require federal savings banks to meet three minimum capital standards: a 1.5% tangible capital ratio, a 4% leverage ratio (3% for associations receiving the highest rating on the CAMELS rating system) and an 8% risk-based capital ratio.

The risk-based capital standard for federal savings banks requires the maintenance of Tier 1 (core) and total capital (which is defined as core capital and supplementary capital) to risk-weighted assets of at least 4% and 8%, respectively. In determining the amount of risk-weighted assets, all assets, including certain off-balance sheet assets, are multiplied by a risk-weight factor of 0% to 100%, assigned by the OTS capital regulation based on the risks believed inherent in the type of asset. Core capital is defined as common stockholders equity (including retained earnings), certain noncumulative perpetual preferred stock and related surplus and minority interests in equity accounts of consolidated subsidiaries, less intangibles other than certain mortgage servicing rights and credit card relationships. The components of supplementary capital currently include cumulative preferred stock, long-term perpetual preferred stock, mandatory convertible securities, subordinated debt and intermediate preferred stock, the allowance for loan and lease losses limited to a maximum of 1.25% of risk-weighted assets and up to 45% of net unrealized gains on available-for-sale equity securities with readily determinable fair market values. Overall, the amount of supplementary capital included as part of total capital cannot exceed 100% of core capital.

At December 31, 2005, the Bank s capital exceeded all applicable requirements.

Loans-to-One Borrower. A federal savings bank generally may not make a loan or extend credit to a single or related group of borrowers in excess of 15% of unimpaired capital and surplus. An additional amount may be loaned, equal to 10% of unimpaired capital and surplus, if the loan is secured by readily marketable collateral, but generally does not include real estate. As of December 31, 2005, the Bank was in compliance with the loans-to-one borrower limitations.

Qualified Thrift Lender Test. As a federal savings bank, the Bank is subject to a qualified thrift lender, or QTL, test. Under the QTL test, the Bank must maintain at least 65% of its portfolio assets in qualified thrift investments in at least nine months of the most recent 12 month period. Portfolio assets generally means total assets of a federal savings bank, less the sum of specified liquid assets up to 20% of total assets, goodwill and other intangible assets, and the value of property used in the conduct of the bank s business.

Qualified thrift investments includes various types of loans made for residential and housing purposes, investments related to such purposes, including certain mortgage-backed and related securities, and loans for personal, family, household and certain other purposes up to a limit of 20% of portfolio assets. Qualified thrift investments also include 100% of a federal savings bank s credit card loans, education loans and small business loans.

A federal savings bank that fails the qualified thrift lender test must either convert to a bank charter or operate under specified restrictions. At December 31, 2005, the Bank maintained 67.0% of its portfolio assets in qualified thrift investments.

Capital Distributions. OTS regulations govern capital distributions by a federal savings bank, which include cash dividends, stock repurchases and other transactions charged to the capital account. A federal savings bank must file an application for approval of a capital distribution if:

the total capital distributions for the applicable calendar year exceed the sum of the bank s net income for that year to date plus the bank s retained net income for the preceding two years;

the bank would not be at least adequately capitalized following the distribution;

the distribution would violate any applicable statute, regulation, agreement or OTS-imposed condition; or

the bank is not eligible for expedited treatment of its filings.

Even if an application is not otherwise required, every federal savings bank that is a subsidiary of a holding company must still file a notice with the OTS at least 30 days before the board of directors declares a dividend or approves a capital distribution.

The OTS may disapprove a notice or application if:

the bank would be undercapitalized following the distribution;

the proposed capital distribution raises safety and soundness concerns; or

the capital distribution would violate a prohibition contained in any statute, regulation or agreement.

Liquidity. A federal savings bank is required to maintain a sufficient amount of liquid assets to ensure its safe and sound operation.

Community Reinvestment Act and Fair Lending Laws. All federal savings banks have a responsibility under the Community Reinvestment Act and related regulations of the OTS to help meet the credit needs of their communities, including low and moderate-income neighborhoods. In conducting bank examinations, the OTS is required to assess a bank s record of compliance with the Community Reinvestment Act. In addition, the Equal Credit Opportunity Act and the Fair Housing Act prohibit lenders from discriminating in their lending practices on the basis of characteristics specified in those statutes. A bank s failure to comply with the provisions of the Community Reinvestment Act could, at a minimum, result in regulatory restrictions on its activities. The failure to comply with the Equal Credit Opportunity Act and the Fair Housing Act could result in enforcement actions by the OTS, as well as other federal regulatory agencies and the Department of Justice. The Bank received an outstanding Community Reinvestment Act rating in its most recent examination conducted by the OTS.

Transactions with Related Parties. A federal savings bank s authority to engage in transactions with its affiliates is limited by Sections 23A and 23B of the Federal Reserve Act (the FRA) and implementing regulations. The term affiliates for these purposes generally means any company that controls or is under common control with an institution. The Company and its non-savings bank subsidiaries are affiliates of the Bank. In general, transactions with affiliates must be on terms that are as favorable to the bank as comparable transactions with non-affiliates. In addition, certain types of these transactions are restricted to an aggregate percentage of the bank s unimpaired capital and surplus. In addition, OTS regulations prohibit a bank from lending to any of its affiliates that are engaged in activities that are not permissible for bank holding companies and from purchasing the securities of any affiliate, other than a subsidiary.

The Bank s authority to extend credit to its directors, executive officers and 10% or higher shareholders, as well as to entities controlled by such persons, is governed by the requirements of Sections 22(g) and 22(h) of the FRA and Regulation O of the Federal Reserve Board. Among other things, these provisions require that extensions of credit to insiders (i) be made on terms that are substantially the same as, and follow credit underwriting procedures that are not less stringent than, those prevailing for comparable transactions with unaffiliated persons and that do not involve more than the normal risk of repayment or present other unfavorable features, and (ii) not exceed certain limitations on the amount of credit extended to such persons, individually and in the aggregate, which limits are based, in part, on the amount of the Bank s unimpaired capital and surplus. In addition, extensions of credit to insiders must be approved by the Bank s board of directors.

Enforcement. The OTS has primary enforcement responsibility over federal savings institutions and has the authority to bring enforcement action against all institution-affiliated parties which includes officers, directors and employees of the institution. Formal enforcement action may range from the issuance of a capital directive or cease and desist order to removal of officers and/or directors of the institution, receivership, conservatorship or the termination of deposit insurance. Civil penalties cover a wide range of violations and actions, and range up to $25,000 per day, unless a finding of reckless disregard is made, in which case penalties may be as high as $1 million per day.

Standards for Safety and Soundness. The federal banking agencies adopted Interagency Guidelines Prescribing Standards for Safety and Soundness to implement safety and soundness standards required under federal law. If the appropriate federal banking agency determines that an institution fails to meet any standard prescribed by the guidelines, the agency may require the institution to submit to the agency an acceptable plan to achieve compliance with the standard. If an institution fails to meet these standards, the appropriate federal banking agency may require the institution to submit a compliance plan.

Prompt Corrective Action Regulations. The OTS is required and authorized to take supervisory actions against undercapitalized savings institutions. For this purpose, a federal savings bank is placed in one of the following five categories based on the bank s capital:

well-capitalized (at least 5% leverage capital, 6% tier 1 risk-based capital and 10% total risk-based capital);

adequately capitalized (at least 4% leverage capital, 4% tier 1 risk-based capital and 8% total risk-based capital);

undercapitalized (less than 8% total risk-based capital, 4% tier 1 risk-based capital or 3% leverage capital);

significantly undercapitalized (less than 6% total risk-based capital, 3% tier 1 risk-based capital or 3% leverage capital); and

critically undercapitalized (less than 2% tangible capital).

Generally, the banking regulator is required to appoint a receiver or conservator for a bank that is critically undercapitalized . The regulation also provides that a capital restoration plan must be filed with the OTS within 45 days of the date a bank receives notice that it is undercapitalized , significantly undercapitalized or critically undercapitalized . In addition, numerous mandatory supervisory actions become immediately applicable to the bank, including, but not limited to, restrictions on growth, investment activities, capital distributions and affiliate transactions. The OTS may also take any one of a number of discretionary supervisory actions against undercapitalized banks, including the issuance of a capital directive and the replacement of senior executive officers and directors.

At December 31, 2005, the Bank met the criteria for being considered well-capitalized.

Insurance of Deposit Accounts. Deposit accounts in the Bank are insured by the Bank Insurance Fund of the FDIC, generally up to a maximum of $100,000 per separately insured depositor. The Bank s deposits therefore are subject to FDIC deposit insurance assessments. The FDIC has adopted a risk-based system for determining deposit insurance assessments. The FDIC is authorized to raise the assessment rates as necessary to maintain the required ratio of reserves to insured deposits of 1.25%.

On February 15, 2006, federal legislation to reform federal deposit insurance was enacted. This new legislation requires, among other things, the merger of the Savings Association Insurance Fund and the Bank Insurance Fund into a unified insurance deposit fund and an increase in the amount of federal deposit insurance coverage from $100,000 to $130,000 (with a cost of living adjustment to become effective in five years). The Act also requires the reserve ratio to be modified to provide for a range between 1.15% and 1.50% of estimated insured deposits. The new obligation requires the FDIC to issue regulations implementing the law. The changes required by the law will not become effective until final regulations have been issued, which must be no later than 270 days from the date of the enactment of the legislation.

Prohibitions Against Tying Arrangements. Federal savings banks are prohibited, subject to some exceptions, from extending credit to or offering any other service, or fixing or varying the consideration for such extension of credit or service, on the condition that the customer obtain some additional service from the bank or its affiliates or not obtain services of a competitor of the bank.

Federal Home Loan Bank System

The Bank is a member of the Federal Home Loan Bank System, which consists of 12 regional Federal Home Loan Banks. The Federal Home Loan Bank System provides a central credit facility primarily for member institutions. As a member of the Federal Home Loan Bank of Boston, the Bank is required to acquire and hold shares of capital stock in the Federal Home Loan Bank in an amount at least equal to 4.5% of its borrowings from the Federal Home Loan Bank. As of December 31, 2005, the Bank was in compliance with this requirement.

Federal Reserve System

The Federal Reserve Board regulations require federal savings banks to maintain non-interest-earning reserves against their transaction accounts, such as negotiable order of withdrawal and regular checking accounts. At December 31, 2005, the Bank was in compliance with these reserve requirements. The balances maintained to meet the reserve requirements imposed by the Federal Reserve Board may be used to satisfy liquidity requirements imposed by the OTS.

Holding Company Regulation

The Company is a Delaware-chartered savings and loan holding company subject to regulation and supervision by the OTS. The OTS

has enforcement authority over the Company and its non-savings bank subsidiaries. Among other things, this authority permits the OTS to restrict or prohibit activities that are determined to be a risk to the Bank.

The Company became a savings and loan holding company after May 4, 1999 and, therefore, its activities are limited to the activities permissible for financial holding companies or for multiple savings and loan holding companies. A financial holding company may engage in activities that are financial in nature, including underwriting equity securities and insurance, as well as activities incidental to or complementary to a financial activity. A multiple savings and loan holding company is generally limited to activities permissible for bank holding companies under Section 4(c)(8) of the Bank Holding Company Act, subject to the prior approval of the OTS, and certain additional activities authorized by OTS regulations.

Federal law prohibits a savings and loan holding company, directly or indirectly, or through one or more subsidiaries, from acquiring control of another savings institution or holding company thereof, without prior written approval of the OTS. It also prohibits the acquisition or retention of, with specified exceptions, more than 5% of the equity securities of a company engaged in activities that are not closely related to banking or financial in nature or acquiring or retaining control of an institution that is not federally insured. In evaluating applications by holding companies to acquire savings institutions, the OTS must consider the financial and managerial resources, future prospects of the savings institution involved, the effect of the acquisition on the risk to the insurance fund, the convenience and needs of the community and competitive factors.

The USA PATRIOT Act

On October 26, 2001, the USA PATRIOT Act was enacted. The Act gives the federal government new powers to address terrorist threats through enhanced domestic security measures, expanded surveillance powers, increased information sharing and broadened anti-money laundering requirements. The Act also requires the federal banking regulators to take into consideration the effectiveness of controls designed to combat money-laundering activities in determining whether to approve a merger or other acquisition application of an FDIC-insured institution. As such, if the Company or the Bank were to engage in a merger or other acquisition, the effectiveness of its anti-money-laundering controls would be considered as part of the application process. The Bank has established policies, procedures and systems to comply with the applicable requirements of the law.

Sarbanes-Oxley Act of 2002

The Sarbanes-Oxley Act of 2002 is a federal law that requires the Company s chief executive officer and chief financial officer to certify to the accuracy of periodic reports filed by the Company with the Security and Exchange Commission, subject to civil and criminal penalties if they knowingly or willingly violate this certification requirement. The legislation accelerates the time frame for disclosures by public companies like the Company, as they must immediately disclose any material changes in their financial condition or operations. Directors and executive officers

must also provide information for most changes in ownership in a company s securities within two business days of the change. Under the Act, Audit Committee members must be independent and are barred from accepting consulting, advisory or other compensatory fees from the issuer. In addition, the Act prohibits any officer or director of the Company or any other person acting under their direction from taking action to fraudulently influence, coerce, manipulate or mislead any independent accountant engaged in the audit of the Company s financial statements for the purpose of rendering the financial statements materially misleading.

The Act also requires inclusion of an internal control report and assessment by management in the annual report to shareholders. The Act requires the Company s independent registered public accounting firm that issues the audit report to attest to and report on management s assessment of the Company s internal controls.

We have incurred and expect to continue to incur additional expense in complying with the provisions of the Act and its implementing regulations.

Taxation

Federal Taxation

General. The Company and the Bank are subject to federal income taxation in the same general manner as other corporations, with some exceptions discussed below. The following discussion of federal taxation is intended only to summarize certain pertinent federal income tax matters and is not a comprehensive description of the tax rules applicable to the Company or the Bank.

The Company and the Bank have not had their federal income tax returns audited by the Internal Revenue Service during the past five years.

Method of Accounting. For federal income tax purposes, the Company reports its income and expenses on the accrual method of accounting and uses a fiscal year ending December 31 for filing its consolidated federal income tax returns.

Taxable Distributions and Recapture. Bad debt reserves created prior to November 1, 1988 are subject to recapture into taxable income should the Bank make certain non-dividend distributions or cease to maintain a bank charter. At December 31, 2005, the Bank s total federal pre-1988 reserve was $1.8 million. This reserve reflects the cumulative effects of federal tax deductions by the Bank for which no federal income tax provision has been made.

Minimum Tax. The Code imposes an alternative minimum tax (AMT) at a rate of 20% on a base of regular taxable income plus certain tax preferences (alternative minimum taxable income or AMTI). The AMT is payable to the extent such AMT exceeds regular income tax. In general, net operating losses can offset no more than 90% of AMTI. Certain payments of alternative minimum tax may be used as credits against regular tax liabilities in future years. The Company has not been subject to the alternative minimum tax and has no such amounts available as credits for carryover.

Net Operating Loss Carryovers. A financial institution may carry back net operating losses to the preceding two taxable years and forward to the succeeding 20 taxable years. At December 31, 2005, the Company had $3.9 million of net operating loss carry forward for federal income tax purposes resulting from the Mystic acquisition.

Corporate Dividends-Received Deduction. The Company may exclude from its income 100% of dividends received from the Bank as a member of the same affiliated group of corporations.

State Taxation

Massachusetts State Taxation. For Massachusetts income tax purposes, a consolidated tax return cannot be filed. Instead, the Company, the Bank and each of their subsidiaries file separate annual income tax returns. The Company and the Bank are subject to an annual Massachusetts excise tax at a rate of 10.50% of their net income. For these purposes, Massachusetts net income is defined as gross income from all sources without any exclusions, less the following deductions: all deductions (but not credits) which are allowable under the Internal Revenue Code of 1986, except for those deductions under the Internal Revenue Code relating to (1) dividends received, (2) losses sustained in other taxable years and (3) taxes on or measured by income, franchise taxes for the privilege of doing business and capital stock taxes imposed by any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States or any foreign country, or a political subdivision of any of the foregoing. The Company and the Bank are not permitted to carry their losses forward or back for Massachusetts tax

purposes. BBS, the Bank s wholly-owned subsidiary, and BSC, the Company s wholly-owned subsidiary, are securities corporations and, accordingly, are subject to an excise tax at the rate of 1.32% of their gross income.

In January 1997, the Bank incorporated BPCC which elected to be taxed as a real estate investment trust (REIT). BPCC was 99.9% owned by Associates, a wholly-owned subsidiary of the Bank. Both BPCC and Associates were liquidated on December 31, 2003.

The treatment of earnings of Associates and BPCC, for Massachusetts income tax purposes, was adversely affected by a new Massachusetts law enacted on March 5, 2003. That law denied a dividend received deduction for dividend distributions from a REIT in determining Massachusetts taxable income. The law not only disallowed dividend received deductions for the year 2003 and thereafter, but also disallowed dividend received deductions retroactively to tax years beginning in 1999. The Company disputed the retroactive tax assessments. Ultimately, the Company settled the dispute by paying $4.3 million to the Commonwealth of Massachusetts, which resulted in an after-tax charge to earnings of $2.8 million in 2003.

Securities and Exchange Commission Availability of Filings on Company Web Site

Under the Securities Exchange Act of 1934 Sections 13 and 15(d), periodic and current reports must be filed with the SEC. The public may read and copy any materials filed with the SEC at the SEC s Public Reference Room at 450 Fifth Street, NW, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0030. The Company electronically files the following reports with the SEC: Form 10-K (Annual Report), Form 10-Q (Quarterly Report) and Form 8-K (Report of Unscheduled Material Events). The Company may file additional forms.

The SEC maintains an internet site that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC, at www.sec.gov, in which all forms filed electronically may be accessed. Additionally, the Company s annual report on form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K

filed with the SEC and additional shareholder information are available free of charge on the Company s website: www.brooklinebank.com. The Company s Code of Ethics is also available on the Company s website.

Item 1A. Risk Factors

There are several significant risk factors that affect the financial performance of financial institutions in general and the Company in particular. This Report, as well as the Management s Discussion and Analysis of Financial Condition and Results of Operations section of the Company s Annual Report to Stockholders which is incorporated herein by reference, include comments relating to those factors.

Presented below is a summary of risk factors that are especially significant to the Company. While these factors apply to most financial institutions, the commentary which follows addresses only how those factors are significant to the Company.

Changes in the Interest Rate Policies of the Board of Governors of the Federal Reserve System. As has been noted herein, numerous interest rate changes have been made by the Federal Reserve since June 2004. Those changes have resulted in a flat yield curve. A flat yield curve diminishes the profitability of the Bank. A rising interest rate environment would likely be beneficial to the Company because of its higher than normal capital ratio and its reasonably matched interest rate sensitivity gap position. At December 31, 2005, interest-bearing liabilities maturing or repricing within one year were $979 million while interest-earning assets maturing or repricing within one year were $966 million. This essentially matched position reduces the Company s exposure to changes in profitability when interest rate policy movements occur.

Changes in the Real Estate Market. The real estate market in the area where the Company conducts most of its business has started to experience a slow down in activity and a reduction in the prices at which real estate is bought and sold. These trends could affect the volume of business the Company can achieve in the future and the value of underlying collateral related to the Company s mortgage loan portfolio. A substantial part of the Company s assets are supported by real estate.

Changes in the Local Economy. Most of the Company s activity is concentrated in eastern Massachusetts. Massachusetts is the only state in the United States that has lost population in each of the past two years. Continuation of that trend could affect the ability of the Company to grow in the future. Further, economic slowdown could affect the ability of both business and consumer borrowers to repay their loans. Besides a significant mortgage loan portfolio, the Company had $459 million of indirect automobile loans at December 31, 2005.

Competition. Currently, pricing for loans and deposits by many competitors is very aggressive and at rates that result in lower than normal profit margins. While the Company has more than ample capital to compete with most financial institutions, continuation of existing pricing trends will have an adverse effect on the Company s profitability.

Legislative and Regulatory Changes. Compliance with the Sarbanes-Oxley Act of 2002 that relates to, among other things, assessment and monitoring of the Company s internal controls over financial reporting, has resulted in substantial added costs for the Company. The requirements of this Act are especially burdensome and frustrating to an entity such as the Company that has been subjected to comprehensive regulatory examination and supervision for many years. The Company has also devoted important resources to meet new regulatory requirements in areas such as domestic security and customer privacy. Continuation of the frequency and complexity of legislative and regulatory changes will place further pressure on the Company s overall profitability.

Successful Execution of Growth Initiatives. As described elsewhere in this Report, the Company signed a merger agreement on February 28, 2006 to expand its ownership of Eastern Funding LLC, a specialty finance company, and hired a senior vice president in February 2006 to be responsible for commercial lending. It is expected that both of these initiatives will provide profitable growth opportunities. On the other hand, expansion of activities in areas where the Company s prior history is limited involves greater risks. The Company intends to proceed deliberately in the implementation of these initiatives.

Item 1B. Unresolved Staff Comments

None

Item 2. Properties

At December 31, 2005, the Bank conducted its business from its main office located in Brookline, fourteen other banking offices located in Brookline, Medford and adjacent communities in Middlesex and Norfolk counties in Massachusetts, an operations center of the Bank in Brookline and an office in Newton, Massachusetts used to conduct the Bank s indirect automobile lending business. In addition to its main office, the Bank owns three of its banking offices and leases all of its other locations. It also has three remote ATM locations, one of which is leased. Refer to note 13 of the Notes to Consolidated Financial Statements in the Company s Annual Report to Stockholders, which is incorporated herein by

reference, for information regarding the Company s lease commitments at December 31, 2005.

Item 3. **Legal Proceedings**

The Company is not involved in any pending legal proceedings other than routine legal proceedings occurring in the ordinary course of business which, in the aggregate, involve amounts which are believed by management to be immaterial to the financial condition and results of operations of the Company.

Item 4. **Submission Of Matters To A Vote Of Security Holders**

None

PART II

Item 5. **Market For The Registrant s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

(a) The common stock of the Company is traded on the Nasdaq National Market System. The approximate number of holders of common stock as of December 31, 2005, as well as a table setting forth cash dividends paid on common stock and the high and low closing prices of the common stock for each of the quarters in the years ended December 31, 2005 and 2004, appears on the inside of the back cover page of the Company s 2005 Annual Report to Stockholders which is incorporated herein by reference.

(b) Not applicable.

(c) No repurchases of the Company s common stock were made in the fourth quarter of 2005.

Item 6. **Selected Consolidated Financial Data**

Selected Consolidated Financial Data of the Company appears on the back of the cover page and page 1 of the Company s 2005 Annual Report to Stockholders which is incorporated herein by reference.

Item 7. Management s Discussion And Analysis Of Financial Condition And Results Of Operations

Management s Discussion and Analysis of Financial Condition and Results of Operations appears on pages 1 through 16 of the Management s Discussion and Analysis of Financial Condition and Results of Operations section of the Company s 2005 Annual Report to Stockholders which is incorporated herein by reference.

Item 7A. Quantitative And Qualitative Disclosures About Market Risk

Quantitative and Qualitative Disclosures About Market Risk appears on pages 12 through 14 of the Management s Discussion and Analysis of Financial Condition and Results of Operations section of the Company s 2005 Annual Report to Stockholders which is incorporated herein by reference.

Item 8. Financial Statements And Supplementary Data

The following financial statements and supplementary data appear on the pages indicated of the Company s 2005 Annual Report to Stockholders which is incorporated herein by reference:

Reports of Independent Registered Public Accounting Firm
Consolidated Balance Sheets as of December 31, 2005 and 2004
Consolidated Statements of Income for the years ended December 31, 2005, 2004 and 2003
Consolidated Statements of Comprehensive Income for the years ended December 31, 2005, 2004 and 2003
Consolidated Statements of Stockholders Equity for the years ended December 31, 2005, 2004 and 2003
Consolidated Statements of Cash Flows for the years ended December 31, 2005, 2004 and 2003
Notes to Consolidated Financial Statements

The supplementary data required by this Item relating to selected quarterly financial data is provided in note 18 of the notes to consolidated financial statements included in Item 8 of Part II of this Report.

Item 9. Changes In And Disagreements With Accountants On Accounting And Financial Disclosure

None

Item 9A. Controls and Procedures

Under the supervision and with the participation of the Company s management, including the Company s Chief Executive Officer and Chief Financial Officer, the Company has evaluated the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer considered that, as of the end of the period covered by this report, the Company s disclosure controls and procedures were effective to ensure that information required to be disclosed in the reports that the Company files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC s rules and forms.

There has been no change in the Company s internal control over financial reporting identified in connection with the quarterly evaluation that occurred during the Company s last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company s internal control over financial reporting.

Management s Report on Internal Control Over Financial Reporting as of December 31, 2005 appears on page F-1 of the Company s 2005 Annual Report to Stockholders which is incorporated herein by reference.

The Attestation Report of the independent registered public accounting firm on management s assessment of the Company s internal control over financial reporting appears on page F-2 of the Company s 2005 Annual Report to Stockholders which is incorporated herein by reference.

Item 9B. Other Information

None

PART III

Item 10. Directors and Executive Officers of the Registrant

A listing of and information about the Company s Directors and Executive Officers appears on pages 3 through 5 of the Company s proxy statement dated March 14, 2006 which is incorporated herein by reference.

Item 11. Executive Compensation

The information required by this Item is presented under the heading Proposal I - Election of Directors on pages 3 through 18 of the Company s proxy statement dated March 14, 2006 which is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Security Ownership of Certain Beneficial Owners and Management is presented on pages 2 through 4 of the Company s proxy statement dated March 14, 2006 which is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions

Certain Relationships and Related Transactions are presented on pages 17 and 18 of the Company s proxy statement dated March 14, 2006 which is incorporated herein by reference.

Item 14. Principal Accounting Fees and Services

The disclosure required by this Item is set forth under the heading Proposal 2-Ratification of Appointment of Independent Registered Public Accounting Firm on pages 18 and 19 of the Company s proxy statement dated March 14, 2006 which is incorporated herein by reference.

PART IV

Item 15. Exhibits, Financial Statement Schedules

(a) Documents

(1) Financial Statements: All financial statements are included in Item 8 of Part II of this Report.

(2) Financial Statement Schedules: All financial statement schedules have been omitted because they are not required, not applicable or are included in the consolidated financial statements or related notes.

(3) Exhibits: The exhibits listed in paragraph (c) below are filed herewith or incorporated herein by reference to other filings.

(b) Required Exhibits

EXHIBIT INDEX

Exhibit	Description
3.1	Certificate of Incorporation of Brookline Bancorp, Inc. (incorporated by reference to Exhibit 3.1 to a previously filed Registration Statement)*
3.2	Bylaws of Brookline Bancorp, Inc. (incorporated by reference to Exhibit 3.2 to a previously filed Registration Statement)*
4	Form of Common Stock Certificate of the Company (incorporated by reference to Exhibit 4 to a previously filed Registration Statement)*

Market value per common share at end of year (3)	$ 14.17	$ 16.32	$ 15.34	$ 11.90	$ 7.52

(1) Calculated on a fully-taxable equivalent basis.

(2) This regulatory ratio relates only to Brookline Bank.

(3) Amounts are restated to give retroactive recognition to the exchange ratio (2.186964 new shares for each old share) applied in the conversion that was completed on July 9, 2002.

(4) Common stock issued less treasury stock.

MANAGEMENT S DISCUSSION AND ANALYSIS OF

FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following should be read in conjunction with the Consolidated Financial Statements of Brookline Bancorp, Inc. (the Company) and the Notes thereto presented elsewhere in this Annual Report.

Forward-Looking Statements and Factors Affecting Those Statements

The following discussion contains forward-looking statements based on management s current expectations regarding factors that may affect the Company s earnings and financial condition in the future. Any statements herein that are not statements of historical fact are likely to be forward-looking statements. Any statements herein preceded by, followed by or which include the words may , could , should , will , would , believe , expect , anticipate , estimate , intend , plan , assume or similar expressions are forward-looking statements.

These forward-looking statements, implicitly and explicitly, include the underlying assumptions and information used by management to establish plans, objectives, goals and expectations. While the Company believes the expectations reflected in its forward-looking statements are reasonable, the statements involve risks and uncertainties that are subject to change based on various factors, some of which are outside the control of the Company. The following factors, among others, could cause the Company s financial performance to differ materially from the objectives, expectations, forecasts and projections expressed in the forward-looking statements:

Interest rate policies of the Board of Governors of the Federal Reserve System. The Company s results of operations depend significantly on net interest income, which is the difference between the interest rate earned on loans and investment securities and interest paid on deposits and borrowings. Changes in interest rates can affect profitability, stockholders equity, the carrying value and average life of assets, the demand for loans, the collectibility of loans and investment securities, and the flow and mix of deposits.

Changes in the local real estate market. A significant part of the Company s loan portfolio ($1.1 billion) is concentrated in commercial, multi-family, residential and construction loans secured by real estate located primarily in eastern Massachusetts. Changes in the real estate market can affect the volume of loan originations and the level of loan losses experienced.

Changes in the local, regional and national economy. In addition to real estate loans, the Company s loan portfolio also includes $459 million of indirect automobile loans. Changes in the economy can affect the ability of borrowers to repay loans, the demand for loans and the flow of deposits.

Competition and industry consolidation. Competition for loans and deposits is intense and consolidation within the banking and financial services sector continues at a significant pace. Competition and industry consolidation can affect the profitability achievable through product and service pricing and the ability to maintain and attract business.

Legislative and regulatory changes. The Company is subject to extensive federal and state legislation, regulation, examination and supervision. Legislative and regulatory changes can greatly affect the Company s operating costs and growth opportunities. Compliance with the requirements of the Sarbanes-Oxley Act relating to internal control over financial reporting and regulatory requirements relating to banking and customer privacy matters resulted in higher operating expenses in 2005 and 2004.

Acquisitions and other growth initiatives. On January 7, 2005, the Company acquired Mystic Financial, Inc. (Mystic). The Company continues to seek additional acquisitions and to expand through the opening of new branches and the offering of expanded services. In 2006, the Company plans to open one or two new branches and, in February, a highly experienced senior officer was recruited to expand commercial business lending. Additionally, on February 28, 2006, the Company signed a merger agreement to increase its ownership interest in Eastern Funding LLC (Eastern) from approximately 29% to 86%. Eastern, which had total assets of $106 million at December 31, 2005, specializes primarily in the financing of coin-operated laundry and dry cleaning equipment in the greater metropolitan New York area and selected other locations in the Northeast. While acquisitions and other growth activities are critical to the long-term success of the Company, there are risks associated with such initiatives. The initiatives often require investments and expenditures that can have a negative effect on operating results in the short-term and cause significant adverse consequences if the initiatives are not executed satisfactorily.

Executive Level Overview

Over the past three years, the Company s operating results were greatly affected by interest rate spread and margin contraction, the inauguration of indirect automobile lending in February 2003 and the acquisition of Mystic in January 2005.

Short and long-term interest rates have been moving gradually toward similar levels, thus causing a flattening yield curve. Steady shrinkage between rates earned on loans and investment securities and rates paid on deposits and liabilities had a negative effect on profitability.

The Company commenced originating indirect automobile loans in February 2003. Since then, that portfolio has grown to $459 million at the end of 2005. While the pace of future loan growth is expected to decline, the profit contribution from this lending activity should continue to improve. To date, amounts provided for loan losses have substantially exceeded net charge-offs. As the loan portfolio becomes more seasoned, provisions should become more comparable to charge-offs. On the other hand, deterioration in the ability of borrowers to repay their loans would likely have an adverse effect on profitability.

A significant part of the Company s growth in assets and profitability in 2005 resulted from the Mystic acquisition.

The following is a summary of operating and financial condition highlights as of and for each of the years in the three-year period ended December 31.

Operating Highlights

	Year ended December 31,		
	2005	2004	2003
	(In thousands except per share amounts)		
Net interest income	$ 68,046	$ 50,986	$ 47,602
Provision for loan losses	2,483	2,603	1,288

Non-performing assets	$ 973	$ 439	$ 133
Stockholders equity to total assets	27.20%	34.52%	39.81%

Acquisition of Mystic

As described more fully in note 2 to the consolidated financial statements appearing elsewhere herein, the Company acquired Mystic on January 7, 2005. The acquisition added $483.1 million to the Company s assets at that date (including

goodwill of $35.6 million and a core deposit intangible of $11.8 million) and $420.4 million (including deposits of $332.3 million) to the Company s liabilities. These additions accounted for much of the increase in the Company s assets and liabilities between December 31, 2004 and December 31, 2005. The issuance of 2,516,525 shares of the Company s common stock in connection with the acquisition added $39.2 million to stockholders equity.

Much of the improvement in net interest income in 2005 compared to 2004 was attributable to the inclusion of the acquired assets and liabilities mentioned above. As part of the acquisition, Mystic was merged into the Company and, on April 11, 2005, the operating systems of Mystic s bank subsidiary (Medford) were converted to the operating systems of the Company s bank subsidiary (Brookline). Merger/conversion related expenses were $894,000 in 2005, substantially all of which were incurred in the first half of the year. Non-interest expense in 2005 also included $2,370,000 of amortization of the core deposit intangible. Amortization of that asset, which is deductible for income tax purposes, is occurring over a nine year period on an accelerated basis.

Average Balances, Net Interest Income, Interest Rate Spread and Net Interest Margin

The following table sets forth information about the Company s average balances, interest income and rates earned on average interest-earning assets, interest expense and rates paid on interest-bearing liabilities, interest rate spread and net interest margin for 2005, 2004 and 2003. Average balances are derived from daily average balances and yields include fees and costs which are considered adjustments to yields.

	Year ended December 31,								
	2005			2004			2003

Total liabilities	1,577,541			1,016,408			828,821		
Stockholders equity	610,151			593,269			614,353		
Total liabilities and stockholders equity	$ 2,187,692			$ 1,609,677			$ 1,443,174		
Net interest income (tax equivalent basis)/interest rate spread		68,356	2.48%		51,123	2.34%		47,761	2.26%
Less adjustment of tax exempt income		310			137			159	
Net interest income		$ 68,046			$ 50,986			$ 47,602	
Net interest margin			3.24%			3.21%			3.34%

(1) Tax exempt income on equity and debt securities is included on a tax equivalent basis.

(2) Average balances include unrealized gains on securities available for sale. Equity securities include marketable equity securities (preferred and common stocks) and restricted equity securities.

(3) Loans on non-accrual status are included in average balances.

Highlights from the table on the preceding page follow.

Average interest-earning assets increased $516.9 million, or 32.4%, in 2005 compared to 2004 and $165.1 million, or 11.5%, in 2004 compared to 2003. The increases were attributable primarily to the assets derived from the Mystic acquisition and from growth of the indirect automobile loan portfolio.

Net interest income increased $17.1 million, or 33.5%, in 2005 compared to 2004 and $3.4 million, or 7.1% in 2004 compared to 2003. The increases were attributable primarily to the asset growth mentioned above and improvement in interest rate spread. However, net interest income was affected adversely by the decline in the percent of total assets funded by stockholders equity (for which there is no interest cost) from 43% in 2003 to 37% in 2004 and 28% in 2005.

The improvement in interest rate spread (the difference between the average yield on interest-earning assets and the average cost of interest-bearing liabilities) from 2.26% in 2003 to 2.34% in 2004 and 2.48% in 2005 was due primarily to the increase in loans as a percent of total interest-earning assets from 66% in 2003 to 74% in 2004 and 76% in 2005. Generally, the yield on loans is higher than on investment securities.

Net interest margin is net interest income, on a tax equivalent basis, divided by interest-earning assets. The improvement in net interest margin from 3.21% in 2004 to 3.24% in 2005 was due primarily to the effect of the matters mentioned in the two preceding subsections. Increased revenues derived from having a higher percent of earning assets in loans was partially offset by the decline in net interest margin resulting from a lower percent of assets funded by stockholders equity. The decline in net interest margin in 2004 compared to the 3.34% rate achieved in 2003 was due primarily to the decline in the percent of assets funded by stockholders equity in 2003 compared to 2004.

Despite the improvement in interest rate spread in 2005 compared to 2004, interest rate spread declined throughout most of 2005. After a rise from 2.36% in the 2004 fourth quarter to 2.59% in the 2005 first quarter, interest rate spread declined thereafter to 2.52% in the second quarter, 2.42% in the third quarter and 2.33% in the fourth quarter. The rise in the first quarter resulted from inclusion of Mystic which had a higher interest rate spread than Brookline. The subsequent declines resulted from a more rapid rise in the average rates paid on deposits and borrowed funds than in the increase in the average rates earned on assets.

Commencing in June 2004 and extending to the end of 2005, the Board of Governors of the Federal Reserve System approved 13 rate increases of 0.25% each in the federal funds rate for overnight borrowings between banks. The resulting rate of 4.25% at December 31, 2005 was the highest level in the past four and one-half years. Another increase of 0.25% was approved on January 31, 2006. As a result of these rate setting actions, a flat yield curve has evolved. The yield curve represents the difference in rates paid on U. S Treasury obligations with varying time periods to maturity. An upward slope in the yield curve means that longer-term rates are higher than shorter-term rates. Generally, an upward slope in the yield curve is favorable for banks. Over the past year, the slope of the yield curve has become flatter as the difference between the rate offered on a ten year U.S. Treasury obligation compared to the rate offered on a three month U. S. Treasury obligation declined from 2.01% at the end of 2004 to 0.32% at the end of 2005.

The rapid rise in the average rates paid for deposits and borrowings was caused by the changing interest rate environment described in the preceding paragraph, increased competition among banks and other financial service companies for deposits and other funds, and a shift in the mix of deposits. Customarily, higher rates are paid on certificate of deposit accounts than on transaction deposit accounts. Certificates of deposit comprised 55% of total deposits at December 31, 2005 compared to 41% at December 31, 2004 and 37% at December 31, 2003.

We expect that the relatively flat yield curve of the past few months will continue at least in the first half of 2006 and that interest rates will rise further. This environment will likely cause interest rate spread to decline in the first half of 2006 and possibly thereafter and make it challenging to improve net interest margin from its existing level. Trends in interest rates depend on many factors and, accordingly, actual rates in the future could vary significantly from the Company s predictions.

Since the second half of 2003, the Company has paid an extra dividend of $0.20 per share semi-annually. It is worth noting that each extra dividend of $0.20 per share reduces stockholders equity by approximately $12.3 million and interest income by the amount that otherwise would be earned if the dividend were not paid.

Rate/Volume Analysis

The following table presents, on a tax equivalent basis, the extent to which changes in interest rates and changes in volume of interest-earning assets and interest-bearing liabilities have affected the Company s interest income and interest expense during the years indicated. Information is provided in each category with respect to: (i) changes attributable to changes in volume (changes in volume multiplied by prior rate), (ii) changes attributable to changes in rate (changes in rate multiplied by prior volume), and (iii) the net change. The changes attributable to the combined impact of volume and rate have been allocated proportionately to the changes due to volume and the changes due to rate.

	Year ended December 31, 2005 compared to year ended December 31, 2004			Year ended December 31, 2004 compared to year ended December 31, 2003		
	Increase (decrease) due to			Increase (decrease) due to		
	Volume	Rate	Net	Volume	Rate	Net
	(In thousands)					
Interest income:						
Short-term investments	$ 358	$ 2,458	$ 2,816	$ (274)	$ 270	$ (4)
Debt securities	1,999	2,967	4,966	(1,467)	162	(1,305)
Equity securities	175	358	533	118	(99)	19
Mortgage loans	16,557	1,873	18,430	742	(2,403)	(1,661)
Other commercial loans	1,911	493	2,404	772	(216)	556
Indirect automobile loans	4,824	1,152	5,976	8,731	(420)	8,311
Other consumer loans	40	(6)	34	(32)	(6)	(38)
Total interest income	25,864	9,295	35,159	8,590	(2,712)	5,878
Interest expense:						
Deposits:						
NOW accounts	61	66	127	1	(19)	(18)
Savings accounts	1,108	(267)	841	564	480	1,044
Money market savings accounts	(141)	1,176	1,035	(251)	(1,019)	(1,270)
Certificate of deposit accounts	8,299	1,162	9,461	577	(920)	(343)
Total deposits	9,327	2,137	11,464	891	(1,478)	(587)
Borrowed funds	4,808	968	5,776	4,635	(1,532)	3,103
Subordinated debt	686		686			
Total interest expense	14,821	3,105	17,926	5,526	(3,010)	2,516
Net change in net interest income	$ 11,043	$ 6,190	$ 17,233	$ 3,064	$ 298	$ 3,362

Highlights from the above table follow.

The increases in total interest income and total interest expense in 2005 compared to 2004 resulted primarily from growth of interest-earning assets and interest-bearing liabilities and partly from higher average rates earned on assets and average rates paid on deposits and borrowed funds.

The increases in total interest income and total interest expense in 2004 compared to 2003 resulted from growth of interest-earning assets and interest-bearing liabilities. Part of the increases was offset by the effect of lower average rates earned on assets and average rates paid on deposits and borrowed funds.

.

Indirect Automobile Loan Business

Since the commencement of indirect automobile lending in February 2003, the portfolio has grown to $211 million at the end of 2003, $369 million at the end of 2004 and $459 million at the end of 2005. The Company does business with approximately 175 dealers. The Company has concentrated on originating loans to customers with good credit histories; there is no emphasis on sub-prime lending. The average credit score of all indirect automobile loans outstanding at December 31, 2005 was 731 and the percent of loans with credit scores below 660 was less than 9%. See the sections Provision for Loan Losses and Allowance for Loan Losses herein for commentary regarding the Company s indirect automobile loan loss experience.

In originating indirect automobile loans, there is a strong correlation between interest rates offered and the degree of the borrower s credit risk. In general, the higher the credit score of the borrower, the lower the interest rate earned. Also, the level of charge-offs or loan losses would normally be lower when credit scores are higher. Since entering the indirect automobile loan business, the Company has emphasized credit quality rather than profit maximization. In light of a current declining trend in automobile loan sales and an increasing trend in loan delinquencies, any efforts to enhance the profitability

of indirect automobile lending in the future will be initiated in a deliberate manner so that the risk profile of the portfolio does not increase suddenly and significantly. The pace of growth of the portfolio in 2006 is expected to be substantially more modest than what has been experienced over the past three years. This is attributable to the trends noted and the fact that a much higher amount of loan originations are required simply to offset scheduled loan payments.

Loans Other Than Indirect Automobile Loans

Loans acquired in the Mystic transaction amounted to $343 million. Since the January 7, 2005 acquisition date, the balance of former Mystic loans has declined to $240 million at December 31, 2005. After completion of the acquisition, the Company sold $30 million of fixed rate residential mortgage loans with 15 to 30 year maturities. While the sale of the loans had an adverse short-term effect on interest income, the risk of a decline in earnings in the future from holding long-term fixed rate loans in a rising interest rate environment was reduced. Much of the remainder of the reduction in loan balances was planned. Construction loans and certain other commercially-related loans in the Mystic portfolio were deemed to have higher risk characteristics and, accordingly, efforts were focused on having those loans paid off or strengthened through the obtaining of additional collateral. Further, recent less favorable trends in the residential real estate sector prompted the Company to proceed with greater caution in originating construction loans and residential mortgage loans.

Excluding indirect automobile loans and the loans acquired in the Mystic transaction, the remainder of the loan portfolio increased approximately $35 million, or 4%, in 2005. Historically, commercial and multi-family real estate lending has been the most significant part of the Company s lending activities. There is considerable competition for these types of loans. Competition has intensified in the last year or two, especially with respect to pricing. In the fourth quarter of 2005, the Company increased its efforts to originate new loans in this sector through more aggressive pricing. In pursuing loan growth, the Company is not departing from the conservative underwriting criteria it has consistently applied in originating loans.

In recognition of the increased competition for commercial real estate mortgage loans and the resulting reduction in profit margins from that business, the Company has decided to become more active in commercial lending to business entities. In February 2006, the Company hired a senior loan officer with considerable experience to be responsible for growing this lending sector. In the near term, this initiative will result in added expense, but on a longer-term basis, it should provide added profitability and a means to further leverage the Company s excess capital.

Provision for Loan Losses

The provision for loan losses charged to earnings was $2,483,000 in 2005, $2,603,000 in 2004 and $1,288,000 in 2003. Of these amounts, $2,859,000, $2,199,000 and $619,000, respectively, were attributable to the indirect automobile loan portfolio. Net charge-offs of indirect automobile loans were $1,358,000 in 2005, $1,246,000 in 2004 and $157,000 in 2003, or 0.32%, 0.40% and 0.17% of the average balance of indirect automobile loans outstanding in those respective years. While charge-off experience to date has been favorable, indirect automobile loans delinquent over 30 days increased from $4.5 million, or 1.00% of the portfolio, at the end of 2004 to $5.5 million, or 1.21% of the portfolio, at the end of 2005.The increase is considered to be due in part to the change in the bankruptcy law which occurred in October 2005. The substantial excess provisions over net charge-offs related to the indirect automobile loan portfolio reflect the rapid growth of that portfolio and our assumption that the rate of charge-offs may increase in the future.

Excluding the additions to the allowance for loan losses relating to indirect automobile loans, there was a $376,000 reduction in the allowance for loan losses in 2005 credited to earnings. This credit compares to charges to earnings of $404,000 in 2004 and $669,000 in 2003. The credit in 2005 resulted primarily from the payoff of Mystic loans, including several loans which were deemed to have higher than normal risk

characteristics. The provisions in 2004 and 2003 were attributable primarily to growth in the non-indirect automobile loan portfolio of $46 million in 2004 and $59 million in 2003. Excluding Mystic loans and indirect automobile loans, the Company experienced net recoveries of prior charge-offs of $2,000 in 2005 and $12,000 in 2003 and net charge-offs of $12,000 in 2004.

Accelerated Amortization of Investment Premiums

In the second half of 2002 and the first quarter of 2003, the Company invested a substantial part of the net proceeds from the 2002 stock offering in collateralized mortgage obligations and mortgage-backed securities (collectively mortgage securities) with expected maturities in the two to three year range. Because of the declining interest rate environment, the securities were purchased at a premium. Premiums are amortized to expense as a reduction in yield over the estimated life of the securities.

The Company s investment in mortgage securities increased to $315 million at March 31, 2003. From that date, the mortgage securities portfolio declined to $137 million at December 31, 2003, $71 million at December 31, 2004 and $49 million at December 31, 2005 as a result of scheduled payments and prepayments. Included in the portfolio at December 31,

2005 is $30 million of mortgage securities acquired through the Mystic transaction. The prepayments shortened the estimated remaining life of the securities significantly and necessitated the accelerated expensing of the premiums paid to purchase the securities. Accelerated amortization of investment premiums charged to interest income amounted to $2.4 million in 2003, $266,000 in 2004 and $25,000 in 2005. The net amount of unamortized premiums on the mortgage securities portfolio at December 31, 2005 was $174,000.

Goodwill and Core Deposit Intangible

Goodwill of $35.6 million at December 31, 2005 represents the cost of the Mystic acquisition over the fair value of the net assets acquired. A core deposit intangible asset of $11.8 million was also recognized in connection with the Mystic acquisition. That asset is being amortized over its estimated useful life of nine years on an accelerated basis. In 2005, amortization of $2,370,000 was charged to earnings.

The recoverability of goodwill and the core deposit intangible was evaluated in the fourth quarter of 2005. It was determined that no impairment in value had occurred and, accordingly, there was no charge to expense for impairment. The balance of the unamortized core deposit intangible was $9,471,000 at December 31, 2005. That amount is expected to be amortized in future years ending December 31 as follows (in thousands):

Year ended December 31:		
2006	$	2,105
2007		1,842
2008		1,579
2009		1,316
2010		1,053
2011 through 2013		1,576

Recognition and Retention Plans

The Company has two recognition and retention plans, the 1999 RRP and the 2003 RRP. Expense for shares awarded under the plans is recognized over the vesting period at the fair value of the shares on the date they were awarded. The total expense for the plans was $2.7 million in 2005, $2.9 million in 2004 and $4.0 million in 2003. The total expense for the plans is expected to be $2.7 million in 2006, $2.6 million in 2007 and 2008, and $233,000 in 2009.

Dividend Equivalent Rights Expense

In accordance with the terms of the 1999 Stock Option Plan, dividend equivalent rights were paid to holders of vested unexercised options awarded under that plan as a result of the semi-annual $0.20 per share extra dividends paid to stockholders of the Company. Compensation expense charged to earnings for such payments amounted to $702,000 in 2005, $734,000 in 2004 and $361,000 in 2003.

The terms of the 2003 Stock Option Plan also call for payment of dividend equivalent rights to holders of vested unexercised options if certain conditions are met. It is not expected that dividend equivalent rights payments will have to be made in 2006 in regard to the 2003 Stock Option

Plan.

In accordance with Statement of Financial Accounting Standards (SFAS) 123-R, Share-Based Payment , effective January 1, 2006, dividend equivalent rights paid to holders of vested unexercised options will be charged to retained earnings instead of compensation expense. Dividends paid on vested restricted stock, which prior to January 1, 2006 were charged to retained earnings, will be charged to compensation expense prospectively. If there were no changes in the per share amount of dividends paid in 2006 compared to 2005, the compensation expense charged to earnings would be approximately $423,000 in 2006.

Mortgage Loan Prepayment Fees

Due to the changing interest rate environment, the Company has experienced higher than normal levels of mortgage loan prepayments over the past three years. Fees resulting from such prepayments amounted to $1.6 million in 2005, $1.5 million in 2004 and $1.2 million in 2003. In view of recent increases in interest rates, the Company expects to experience a decline in fees from mortgage loan prepayments in 2006, the amount of which is undeterminable.

Effective Income Tax Rates

The effective rate of federal and state income taxes applied to the Company s pre-tax earnings (exclusive of the retroactive effect of the settlement of a REIT tax dispute in 2003 which is described in note 11 to the consolidated financial statements

appearing elsewhere herein) was 40.3% in 2005, 41.9% in 2004 and 41.4% in 2003.

The reduced effective rate in 2005 was due primarily to higher tax exempt income from investment in municipal obligations. The higher effective rate in 2004 was due primarily to (a) additional state taxes resulting from dividend transfers from Company subsidiaries to the parent Company in anticipation of funding the acquisition of Mystic Financial, Inc. in January 2005, (b) the non-deductibility of a part of executive compensation and (c) the non-deductibility of certain other expenses for state tax purposes.

Extra Dividends and Stock Repurchases

In August 2003, the Company commenced paying to stockholders a semi-annual extra dividend of $0.20 per share in addition to a regular quarterly dividend of $0.085 per share. In approving the extra dividends, the Board of Directors considered the capital requirements of the Company, potential future business initiatives and the reduction in tax rates on dividends that went into effect in 2003. The payment and magnitude of any future extra dividends will depend on the Board of Directors future assessment of opportunities to expand the Company s business and deploy capital effectively (including the repurchase of the Company s common stock), trends in interest rates, expected income tax rates, regulatory considerations and general economic conditions.

In 2003, the Company repurchased 1,165,000 shares of its common stock at an aggregate cost of $15.1 million, or $12.94 per share. As of December 31, 2005, management has authorization from the Board of Directors to purchase up to 1,772,532 shares. Subsequent authorizations by the Board of Directors to repurchase common stock do not require prior approval by or receipt of a non-objection notification from the Office of Thrift Supervision. The extent to which shares are repurchased depends on a number of factors including market trends and prices, economic conditions, the strength of the Company s capital in relation to its activities and the benefits to stockholders who retain ownership in the Company.

Other Operating Highlights

Non-Interest Income. Fees and charges include fees from mortgage loan prepayments, deposit services and other miscellaneous activities. Excluding fees from mortgage loan prepayments (which were discussed in a preceding sub-section), fees and charges were $1.9 million in 2005, $1.1 million in 2004 and $1.3 million in 2003, most of which related to deposit services. The increase in 2005 was attributable primarily to the Mystic acquisition.

Net gains on securities were $853,000 in 2005, $1.8 million in 2004 and $2.1 million in 2003. The net gains resulted from transactions involving marketable equity securities.

In 2005, the sale of a building and a foreclosed residential property acquired in the Mystic transaction resulted in gains of $265,000 and $57,000, respectively. Prior to the sale of the foreclosed property, a $250,000 write-down had been charged to non-interest expense in 2005.

Adjustments to the fair value of the Company s outstanding swap agreement resulted in credits to income of $49,000 in 2005, $231,000 in 2004 and $163,000 in 2003. The swap agreement matured in April 2005.

Other non-interest income included earnings from the Company s equity interest in a specialty finance company of $445,000 in 2005, $608,000 in 2004 and $538,000 in 2003. The decline in 2005 resulted primarily from higher funding costs and professional fees incurred by the finance company.

Non-Interest Expense. Excluding expenses for merger/conversion costs, amortization of the core deposit intangible, recognition and retention plans and dividend equivalent rights payments, all of which were addressed in preceding sub-sections, total non-interest expense was $27.3 million in 2005, $19.4 million in 2004 and $17.8 million in 2003. The rates of increase over the prior year were 40.8% in 2005 and 8.6% in 2004.

The increase in 2005 compared to 2004 was attributable primarily to the Mystic acquisition, the opening of a new branch in the fall of 2004, higher premiums for employee medical benefits and higher professional fees due mostly to meeting the added requirements of the Sarbanes-Oxley Act. The increase in 2004 compared to 2003 was attributable primarily to the expanded volume of the indirect automobile loan business, the opening of a new branch in the fall of 2003 and another in the fall of 2004, and higher professional fees due to compliance with the requirements of the Sarbanes-Oxley Act.

Other Financial Condition Highlights

Investments. Short-term investments and investment securities (excluding restricted equity securities) were $478 million (22% of total assets) at December 31, 2005 compared to $390 million (23%) at December 31, 2004 and $417 million (27%) at December 31, 2003. The increase in 2005 resulted primarily from the Mystic acquisition while the decrease in 2004 was

used primarily to fund part of the loan growth. Investment securities purchased in 2005 and 2004 were mostly U.S. Government-sponsored enterprise obligations with maturities in the one to two year range. The Company refrained from purchasing investment securities with longer maturities to avoid the added interest rate risk that occurs in a rising interest rate environment.

Deposits. Excluding deposits derived from the Mystic acquisition, deposits increased $62 million, or 8%, in 2005 and $94 million, or 14%, in 2004. The increases were due to the opening of new branches and marketing initiatives. The gains came at considerable cost, however, since the mix of deposits gravitated to more expensive certificates of deposit. That type of deposit represented 55% of total deposits at the end of 2005 compared to 41% of the end of 2004 and 37% at the end of 2003.

Borrowed Funds. Funds borrowed from the Federal Home Loan Bank were $412 million at the end of 2005. Excluding $74 million of borrowings assumed in the Mystic acquisition, the Company increased its borrowings from the Federal Home Loan Bank by $18 million in 2005, $99 million in 2004 and $76 million in 2003. Proceeds from the borrowings were used primarily to fund loan growth. The maturity dates of certain new borrowings were in the one to three year range to somewhat match the estimated life of the indirect automobile loan portfolio and certain other new borrowings had maturities in the five to seven year range to match the fixed rate periods of certain mortgage loan originations.

Stockholders Equity. Stockholders equity declined from $607 million at the end of 2003 to $585 million at the end of 2004 and increased to $602 million at the end of 2005. The decline in 2004 was due primarily to the payment of dividends to stockholders in excess of earnings and the repurchase of Company common stock. The increase in 2005 was due primarily to the issuance of $39 million of common stock in connection with the Mystic acquisition, offset in part by the payment of dividends to stockholders in excess of earnings.

Non-Performing Assets

The following table sets forth information regarding non-performing assets, restructured loans and the allowance for loan losses:

	Year ended December 31,				
	2005	2004	2003	2002	2001
	(In thousands)				
Non-accrual loans:					
Mortgage loans:					
One-to-four family	$ 167	$	$	$	$ 136
Indirect automobile loans	313	111	49		
Other consumer loans			1	5	4
Total non-accrual loans	480	111	50	5	140
Repossessed vehicles	493	328	83		
Defaulted corporate debt security					1,440
Total non-performing assets	$ 973	$ 439	$ 133	$ 5	$ 1,580
Restructured loans	$	$	$	$	$

Allowance for loan losses as a percent of total loans	1.36%	1.38%	1.51%	1.86%	1.83%
Non-performing loans as a percent of total loans	0.03	0.01			0.02
Non-performing assets as a percent of total assets	0.04	0.03	0.01		0.14

Loans are placed on non-accrual status either when reasonable doubt exists as to the full timely collection of interest and principal or automatically when a loan becomes past due 90 days.

Restructured loans represent performing loans for which concessions (such as reductions of interest rates to below market terms and/or extension of repayment terms) were granted due to a borrower s financial condition.

In 2001, the Company charged earnings $495,000 to recognize an other than temporary impairment in the carrying value of a $2.0 million bond. At December 31, 2001, the defaulted bond was carried on the books of the Company at $1,440,000. In 2002, principal and interest due on the bond was paid in full resulting in total recovery of the prior impairment charge.

Allowance for Loan Losses

The allowance for loan losses is management s estimate of probable known and inherent credit losses in the loan portfolio. The methodology followed to determine the amount of allowance to be recorded in the Company s financial statements is

described in the following paragraphs.

The Company utilizes an internal rating system to monitor and evaluate the credit risk inherent in its loan portfolio. At the time of loan approval, all loans other than indirect automobile loans, one-to-four family residential mortgage loans, home equity loans and other consumer loans are assigned a rating based on all the factors considered in originating the loan. The initial loan rating is recommended by the loan officer and approved by the individuals or committee responsible for approving the loan. Loan officers are expected to recommend to the Loan Committee changes in loan ratings when facts come to their attention that warrant an upgrade or downgrade in a loan rating. Problem and potential problem assets are assigned the three lowest ratings. Such ratings coincide with the Substandard , Doubtful and Loss classifications used by federal regulators in their examination of financial institutions. Generally, an asset is considered Substandard if it is inadequately protected by the current net worth and paying capacity of the obligors and/or the collateral pledged. Substandard assets include those characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected. Assets classified as Doubtful have all the weaknesses inherent in those classified Substandard with the added characteristic that the weaknesses present make collection or liquidation in full, on the basis of currently existing facts, highly questionable and improbable. Assets classified as Loss are those considered uncollectible and of such little value that their continuance as assets without the establishment of a specific loss reserve and/or charge-off is not warranted. Assets which do not currently expose the Company to sufficient risk to warrant classification in one of the aforementioned categories but possess weaknesses are designated Special Mention . The Company assigns its fourth lowest rating to loans meeting this designation.

On a quarterly basis, management reviews with the Watch Committee the status of each loan assigned one of the Company s four adverse internal ratings and the judgments made in determining the valuation allowances allocated to such loans. Loans, or portions of loans, classified Loss are either charged off against valuation allowances or a specific allowance is established in an amount equal to the amount classified Loss.

At December 31, 2005, there were loans of $5.5 million classified Special Mention, $2.5 million classified Substandard and $1.3 million classified Doubtful, all of which were loans acquired in the Mystic transaction. There were $567,000 of specific reserves on such loans at December 31, 2005. At December 31, 2004 and 2003, there were no loans designated Special Mention, Substandard, Doubtful or Loss.

The Company s classification of its loans and the amount of the valuation allowances it sets aside for estimated losses are subject to review by the banking agencies. Based on their reviews, these agencies can order the establishment of additional loss allowances. The OTS, in conjunction with the other federal banking agencies, has adopted an interagency policy statement on allowances for loan and lease losses. The policy statement provides guidance for financial institutions on both the responsibilities of management for the assessment and establishment of adequate allowances and guidance for banking agency examiners to use in determining the adequacy of a financial institution s valuation methodology. Generally, the policy statement recommends that financial institutions have effective systems and controls to identify, monitor and address asset quality problems; that management analyze all significant factors that affect the collectibility of the portfolio in a reasonable manner; and that management establish acceptable valuation processes that meet the objectives set forth in the policy statement. Management has adopted and applied these recommendations in its methodology and procedures for estimating its allowance for loan losses.

The following table sets forth activity in the Company s allowance for loan losses for the years presented in the table.

	Year ended December 31,				
	2005	2004	2003	2002	2001
			(In thousands)		
Balance at beginning of year	$ 17,540	$ 16,195	$ 15,052	$ 15,301	$ 14,315
Provision (credit) for loan losses	2,483	2,603	1,288	(250)	974

Allowance obtained through acquisition		3,501								
Charge-offs:										
Indirect automobile loans		1,803		1,384		186				
Other consumer loans		17		25		38		30		4
Total charge-offs		1,820		1,409		224		30		4
Recoveries:										
Mortgage loans:

Balance at end of year	$	22,248	$	17,540	$	16,195	$	15,052	$	15,301

37

The higher provisions for loan losses and net charge-offs in 2005, 2004 and 2003 related primarily to indirect automobile lending activity. This segment of the loan portfolio is expected to incur charge-offs because of the high volume of loans originated and the fact that a certain percentage of consumer loans inevitably are not paid in full. Net charge-offs expressed as a percent of the average balance of indirect automobile loans outstanding were 0.17% in 2003, 0.40% in 2004 and 0.32% in 2005.

No charge-offs have been experienced in each of the past five years related to any mortgage loan underwritten by the Company. The Company believes this favorable experience is attributable to the economy during that time and is not sustainable over normal lending cycles. When the economy is strong, an inherent higher level of risk continues to exist because of the long-term nature of the Company s mortgage loan portfolio. Multi-family and commercial real estate loans have comprised in the range of 70% of the Company s total mortgage loans outstanding for many years. These loans tend to have an average life of several years. The higher level of risk in such loans becomes more evident when the economy weakens.

The following tables set forth the Company s percent of allowance by loan category and the percent of loans to total loans in each of the categories listed at the dates indicated.

	At December 31,								
	2005			2004			2003		
	Amount	Percent of allowance to total allowance	Percent of loans in each category to gross loans	Amount	Percent of allowance to total allowance	Percent of loans in each category to gross loans	Amount	Percent of allowance to total allowance	Percent of loans in each category to gross loans
	(Dollars in thousands)								
Mortgage loans:

The long-term nature of the Company s mortgage and commercial loan portfolios as well as the impact of economic changes make it most difficult, if not impossible, to conclude with precision the amount of loss inherent in those loan portfolios at a point in time. In determining the level of the allowance, management evaluates specific credits and the portfolio in general using several methods that include historical performance, collateral values, cash flows and current economic conditions. This evaluation culminates with a judgment on the probability of collection of loans outstanding. Our methodology provides for three allowance components.

The first component represents allowances established for specific identified loans. Specific amounts are allocated on a loan-by-loan basis for any impairment loss as determined by applying one of the three methods cited in generally accepted accounting principles. Based on our experience during the last economic downturn, it is known that loans in the higher risk categories have inherent loss characteristics that result in their being placed on the Watch List when the economy weakens. Such loss characteristics, which exist throughout the long-term life of the mortgage and commercial loan portfolio, are less obvious in good economic times.

The second component represents allowances for groups of homogenous loans that currently exhibit no identified weaknesses and are evaluated on a collective basis. Allowances for groups of similar loans are established based on factors such as historical loss experience, the level and trend of loan delinquencies, and the level and trend of classified assets.

The third component of the allowance for loan losses is categorized as unallocated. The unallocated part of the allowance is based on an evaluation of factors such as trends in the economy and real estate values in the areas where we lend money, concentrations in the amount of loans we have outstanding to large borrowers and concentration in the type and geographic location of loan collateral. Determination of this portion of the allowance is a very subjective process. Management believes the unallocated allowance is an important component of the total allowance because it addresses the probable inherent risk of loss that exists in that part of the Company s loan portfolio with repayment terms extended over many years and that part related to indirect automobile lending, for which there is insufficient performance experience due to the elapsed short time since the Company commenced originating such loans. It also helps to minimize the risk related to the margin of imprecision inherent with the estimation of the allocated components of the allowance. We have not allocated the unallocated portion of the allowance to the major categories of loans because such an allocation would imply a degree of precision that does not exist.

Prior to January 1, 2005, the Company allocated part of its allowance for loan losses to address the risk associated with the normal lag that exists between the time deterioration might occur in a higher risk loan (commercial loans and mortgage loans excluding residential and home equity mortgage loans) and when such deterioration become known. While this lag represents an additional risk, the Company determined that measurement of that risk is not readily quantifiable and that the amounts previously allocated for such risk were based on somewhat arbitrary assumptions. Accordingly, the amount previously allocated for such risk has been included in the unallocated portion of the allowance effective January 1, 2005. Amounts allocated for such risks included in the table above were $1.5 million at December 31, 2004, $1.6 million at December 31, 2003, $1.4 million at December 31, 2002 and $1.2 million at December 31, 2001.

The Company has no established range into which the unallocated portion of the allowance should fall. The amount of the unallocated allowance at December 31, 2005 is considered reasonable in light of existing current real estate market and general economic conditions.

Quantitative and Qualitative Disclosure About Market Risk

Market risk is the risk of loss from adverse changes in market prices and/or interest rates. Since net interest income is the Company s primary source of revenue, interest rate risk is the most significant non-credit related market risk to which the Company is exposed.

The Company s Asset/Liability Committee, comprised of several members of senior management, is responsible for managing interest rate risk in accordance with policies approved by the Board of Directors regarding acceptable levels of interest rate risk, liquidity and capital. The Committee reviews with the Board of Directors on a quarterly basis its activities and strategies, the effect of those strategies on the Company s operating results, the Company s interest rate risk position and the effect subsequent changes in interest rates could have on the Company s future net interest income. The Committee is involved in the planning and budgeting process as well as in the monitoring of pricing for the Company s loan and deposit products.

The Committee manages interest rate risk through use of both earnings simulation and GAP analysis. Earnings simulation is based on actual cash flows and assumptions of management about future changes in interest rates and levels of activity (loan originations, loan prepayments and deposit flows). The assumptions are inherently uncertain and, therefore, actual results will differ from simulated results due to timing, magnitude and frequency of interest rate changes as well as changes in market conditions and strategies. The net interest income projection resulting from use of actual cash flows and management s assumptions (Base Case) is compared to net interest income projections based on an immediate shift of 200 basis points upward or downward in the first year of the model (Interest Rate Shock). The following table indicates the estimated impact on net interest income over a one year period under scenarios of a 200 basis points change upward or downward as a percentage of Base Case earnings projections.

Changes in interest rates (basis points)	**Estimated percentage change in future net interest income**
+200 over one year	(0.48)%
Base Case.	%
-200 over one year	(1.01)%

The Company s interest rate risk policy states that an immediate 200 basis points change upward or downward should not negatively impact estimated net interest income over a one year period by more than 15%.

The results shown above are based on the assumption that there are no significant changes in the Company s operating environment and that short-term interest rates will increase 50 basis points by March 31, 2006. Further, in the case of the 200 basis points downward adjustment, it was assumed that it would not be possible to reduce the rates paid on certain deposit accounts by 200 basis points. Instead, it was assumed that NOW accounts would be reduced by 14 basis points, savings accounts by 113 basis points and money market savings accounts by 187 basis points. There can be no assurance that the assumptions used will be validated in 2006.

GAP analysis measures the difference between the assets and liabilities repricing or maturing within specific time periods. An asset-sensitive position indicates that there are more rate-sensitive assets than rate-sensitive liabilities repricing or maturing within specific time horizons, which would generally imply a favorable impact on net interest income in periods of rising interest rates and a negative impact in periods of falling rates. A liability-sensitive position would generally imply a negative impact on net interest income in periods of rising rates and a positive impact in periods of falling rates. GAP analysis has limitations because it cannot measure the effect of interest rate movements and competitive pressures on the repricing and maturity characteristics of interest-earning assets and interest-bearing liabilities.

Generally, it is the Company s policy to reasonably match the rate sensitivity of its assets and liabilities. The interest rate sensitivity gap is defined as the difference between the amount of interest-earning assets maturing or repricing within a specific time period and the amount of interest-bearing liabilities maturing or repricing within the same time period.

The table below shows the Company s interest rate sensitivity gap position as of December 31, 2005.

	At December 31, 2005							
	One year or less	More than one year to two years	More than two years to three years	More than three years to four years	More than four years to five years	More than five years to ten years	More than ten years	Total

Weighted average rate	3.18%	2.99%	2.76%	4.21%	4.74%	4.80%	5.32%	3.18%
Interest sensitivity gap	$ (13,446)	$ 178,328	$ 124,707	$ 155,377	$ 64,519	$ 71,552	$ 8,110	$ 589,147
Cumulative interest sensitivity gap	$ (13,446)	$ 164,882	$ 289,589	$ 444,966	$ 509,485	$ 581,037	$ 589,147	
Cumulative interest sensitivity gap as a percentage of total assets	(0.61)%	7.44%	13.08%	20.09%	23.00%	26.24%	26.60%	
Cumulative interest sensitivity gap as a percentage of total interest-earning assets	(0.64)%	7.79%	13.69%	21.03%	24.08%	27.46%	27.85%	

(1) Interest-earning assets and interest-bearing liabilities are included in the period in which the balances are expected to be redeployed and/or repriced as a result of anticipated prepayments, scheduled rate adjustments and contractual maturities.

(2) Debt securities include all debt securities. The unrealized gain on securities, all other marketable equity securities and restricted equity securities are excluded.

(3) For purposes of the gap analysis, the allowance for loan losses, deferred loan fees and costs on loans other than indirect automobile loans, non-performing loans and fair value adjustments are excluded.

(4) Interest sensitivity gap represents the difference between interest-earning assets and interest-bearing liabilities.

Interest rates paid on NOW accounts, savings accounts and money market savings accounts are subject to change at any time and such deposits are immediately withdrawable. A review of rates paid on these deposit categories over the last several years indicated that the amount and timing of rate changes did not coincide with the amount and timing of rate changes on other deposits when the Federal Reserve adjusted its benchmark federal funds rate. Because of this lack of correlation and the unlikelihood that such deposits would be withdrawn immediately, the Company allocates money market savings accounts between the one year or less and the more than one year to two years columns and NOW accounts and savings accounts equally over those two columns and the more than two years to three years column in its gap position table.

At December 31, 2005, interest-earning assets maturing or repricing within one year amounted to $965.5 million and interest-bearing liabilities maturing or repricing within one year amounted to $978.9 million, resulting in a cumulative one year negative gap position of $13.4 million, or 0.6% of total assets. At December 31, 2004, the Company had a cumulative

one year positive gap position of $146.0 million, or 8.6% of total assets. The change in the cumulative one year gap position from the end of 2004 resulted primarily from the shift in deposits to short-term certificates of deposit and the acquisition of Mystic Financial, Inc.

The Company s cumulative interest sensitivity gap of assets and liabilities with expected maturities of more than three years changed from approximately $430 million, or 28%, of total assets at December 31, 2003 to $349 million, or 21%, of total assets at December 31, 2004 and $300 million, or 14%, of total assets at December 31, 2005. The percentage decreases in 2005 and 2004 resulted from having a significant part of the Company s growth resulting from origination of indirect automobile loans. Generally, such loans have an average life in the range of two to three years.

Other Market Risks. Included in the Company s investment portfolio at December 31, 2005 were marketable equity securities with a market value of $3.5 million. Included in those amounts were net unrealized gains of $662,000. Movements in the market price of securities may affect the amount of gains or losses ultimately realized by the Company from the sale of its equity securities.

Off-Balance Sheet Arrangements

The Company had no off-balance sheet arrangements at December 31, 2005. Periodically, the Bank enters into stand-by letters of credit. The effect of such activity on the Company s financial condition and results of operations are immaterial.

Contractual Obligations

A summary of contractual obligations at December 31, 2005 by the expected payment period follows.

	Payment due by period				
	Less than one year	One to three years	Three to five years (In thousands)	Over five years	Total
Borrowed funds from the FHLB	$ 166,915	$ 172,347	$ 37,400	$ 34,845	$ 411,507
Subordinated debt (1)		12,000			12,000
Loan commitments (2)	172,659				172,659
Occupancy lease commitments (3)	1,436	2,626	1,838	1,916	7,816
Service provider contracts (4)	4,025	3,531	1		7,557
Retirement benefit obligations	45	777	823	6,599	8,244
	$ 345,080	$ 191,281	$ 40,062	$ 43,360	$ 619,783

---

(1) Payment due dates represent when the subordinated debt can be paid off at the option of the Company.

(2) These amounts represent commitments made by the Company to extend credit to borrowers as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses. Since some of the commitments are expected to expire without being drawn upon, the total commitment amount does not necessarily represent future cash requirements.

(3) The leases contain escalation clauses for real estate taxes and other expenditures.

(4) Payments to service providers under most of the existing contracts are based on the volume of accounts served or transactions processed. Some contracts also call for higher required payments when there are increases in the Consumer Price Index. The expected payments shown in this table are based on an estimate of the number of accounts to be served or transactions to be processed, but do not include any projection of the effect of changes in the Consumer Price Index.

Liquidity and Capital Resources

The Company s primary sources of funds are deposits, principal and interest payments on loans and debt securities and borrowings from the FHLB. While maturities and scheduled amortization of loans and investments are predictable sources of funds, deposit flows and mortgage loan prepayments are greatly influenced by interest rate trends, economic conditions and competition.

Based on its monitoring of historic deposit trends and its current pricing strategy for deposits, management believes the Company will retain a large portion of its existing deposit base. While deposits grew $62 million, or 8%, in 2005 (excluding $332 million in deposits assumed in the Mystic transaction), growth in 2006 will depend on several factors, including the interest rate environment and competitor pricing.

The Company utilizes advances from the FHLB to fund growth and to manage part of the interest rate sensitivity of its assets and liabilities. Generally, borrowings from the FHLB result in more interest expense than would be incurred if growth was funded solely by deposits. Advances outstanding from the FHLB increased from $221 million at the end of 2003 to $320 million at the end of 2004 and $412 million at the end of 2005. The increase in 2005 includes $74 million of FHLB advances assumed in the Mystic transaction.

At December 31, 2005, the Company had the capacity to borrow an additional $167 million from the FHLB. The Company anticipates that it will increase borrowings from the FHLB in 2006 to fund part of its projected growth and its contemplated acquisition of Eastern Funding LLC (see note 19 to the consolidated financial statements appearing elsewhere herein). The amount ultimately borrowed will depend on actual loan growth and the extent to which deposits grow.

The Company s most liquid assets are cash and due from banks, short-term investments and debt securities that generally mature within 90 days. At December 31, 2005, such assets amounted to $144 million, or 6.5% of total assets.

At December 31, 2005, Brookline exceeded all regulatory capital requirements. Brookline s Tier I capital was $418 million, or 20.6% of adjusted assets. The minimum required Tier I capital ratio is 4.00%.

Recent Accounting Pronouncements

Statement of Financial Accounting Standard (SFAS) No. 123 (revised 2004), Share-Based Payment (SFAS 123R). In December 2004, the Financial Accounting Standards Board (FASB) issued SFAS No. 123 (revised 2004). SFAS No. 123R replaces SFAS No. 123 *Accounting for Stock-Based Compensation* and supersedes Accounting Principles Board Opinion No. 25 (APB 25), *Accounting for Stock Issued to Employees* . SFAS No. 123R requires that the compensation cost relating to share-based payment awards be recognized in the Company s financial statements, eliminating pro forma disclosure as an alternative. That cost will be measured based on the grant-date fair value of the equity or liability instruments issued. In addition, liability awards are remeasured to fair value each reporting period. On April 14, 2005, the SEC deferred the compliance date of SFAS 123R until the beginning of a company s next fiscal year for calendar-year companies. For the Company, implementation is therefore required beginning January 1, 2006. Adoption of SFAS 123R is not expected to have a material impact on the Company s financial position or results of operations.

FASB Emerging Issues Task Force (EITF) Issue 03-1, The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments . In November 2003 and March 2004, the FASB s EITF issued a consensus on EITF Issue 03-1. The guidance in EITF 03-1 provided application guidance to assess whether there has been any event or economic circumstances to indicate that a security is impaired on an other-than-temporary basis. Consideration is to be given to the length of time a security has had a market value less than the cost basis, the intent and ability of the Company to hold the security for a period of time sufficient for a recovery in value, recent events specific to the issuer or industry and, for debt securities, external credit ratings and recent downgrades. Securities deemed to be other-than-temporarily impaired are to be written down to fair value with the write-down recorded as a realized loss. Additionally, the guidance provided for expanded annual disclosure.

In September 2004, the FASB issued FASB Staff Position (FSP) EITF Issue No. 03-1-1 *Effective Date of Paragraphs 10-20 of EITF Issue 03-1, The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments* , which delayed the effective date for the guidance addressing the issues to be considered in determining whether a security is other-than-temporarily impaired. Companies still need to comply with the disclosure requirements under EITF 03-1 and all other relevant measurement and recognition requirements in other accounting literature.

In November 2005, the FASB issued FSP FAS 115-1 and 124-1, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments* . This FSP, which nullifies certain requirements of EITF 03-1, addresses the determination as to when an investment is considered impaired, whether that impairment is other than temporary and the measurement of an impairment loss. Additionally, the FSP addresses accounting considerations subsequent to the recognition of other-than-temporary impairment and requires certain disclosures about unrealized losses that have not been recognized as other-than-temporary impairments. The guidance requires an impairment charge to be recognized in the current period if it is determined that a security will be sold in a subsequent period where the fair value is not expected to be fully covered by the time of sale. This FSP is effective for other-than-temporary impairment analysis conducted in periods beginning after December 15, 2005. The adoptions of EITF 03-1 and EITF 03-1-1 did not have a material impact on the Company s financial position or results of operations and the Company does not believe that the adoption of FSP FAS 115-1 and 124-1 will have a material impact on the Company s financial position or results of operations.

Statement of Position 03-3 (SOP 03-3), Accounting for Certain Loans or Debt Securities Acquired in a Transfer . In December 2003, the American Institute of Certified Public Accountants (AICPA) issued SOP 03-3. SOP 03-3 requires loans acquired through a transfer, such as a business combination, where there are differences in expected cash flows and

contractual cash flows due in part to credit quality, be recognized at their fair value. The yield that may be accreted is limited to the excess of the investor s estimate of undiscounted expected principal, interest and other cash flows over the investor s initial investment in the loan. The excess of contractual cash flows over expected cash flows is not to be recognized as an adjustment of yield, loss accruals or valuation allowance. Any future excess of cash flows over the original expected cash flows is to be recognized as an adjustment of future yield.

Future decrease in actual cash flows compared to the original expected cash flows are recognized as a valuation allowance and expensed immediately. Valuation allowances can not be created nor carried over in the initial accounting for loans acquired in a transfer of loans with evidence of deterioration of credit quality since origination. However, valuation allowances for non-impaired loans acquired in a business combination can be carried over. This SOP is effective for loans acquired in fiscal years beginning after December 15, 2004, with early adoption encouraged. The adoption of SOP 03-3 did not have a material impact on the Company s financial position or results of operations.

FSP SOP 94-6-1, Terms of Loan Products That May Give Rise to a Concentration of Credit Risk . In December 2005, the FASB issued FSP SOP 94-6-1. This FSP was issued in response to inquiries from constituents and discussions with the SEC staff and regulators of financial institutions to address the circumstances in which the terms of loan products give rise to a concentration of credit risk as that term is used in SFAS No. 107 *Disclosures about Fair Value of Financial Instruments* and what disclosures apply to entities who deal with loan products whose terms may give rise to a concentration of credit risk. An entity shall provide the disclosures required by SFAS No. 107 for either an individual loan product type or a group of loan products with similar features that are determined to represent a concentration of credit risk in accordance with the guidance of SOP 94-6-1 for all periods presented in financial statements. This SOP is effective for interim and annual periods ending after December 19, 2005.

MANAGEMENT S REPORT ON INTERNAL CONTROL

OVER FINANCIAL REPORTING

The management of Brookline Bancorp, Inc. is responsible for establishing and maintaining adequate internal control over financial reporting. Brookline Bancorp Inc. s internal control system was designed to provide reasonable assurance to the Company s management and board of directors regarding the preparation and fair presentation of published financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Brookline Bancorp, Inc. s management assessed the effectiveness of the Company s internal control over financial reporting as of December 31, 2005. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework.* Based on our assessment, we believe that, as of December 31, 2005, the Company s internal control over financial reporting is effective based on those criteria.

Brookline Bancorp, Inc. s independent registered public accounting firm has issued an audit report on our assessment of the Company s internal control over financial reporting. This report appears on page F-2.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders

Brookline Bancorp, Inc.:

We have audited management s assessment, included in the accompanying Management s Report on Internal Control Over Financial Reporting, that Brookline Bancorp, Inc. maintained effective internal control over financial reporting as of December 31, 2005, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Brookline Bancorp, Inc. s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management s assessment and an opinion on the effectiveness of the Company s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management s assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management s assessment that Brookline Bancorp, Inc. maintained effective internal control over financial reporting as of December 31, 2005, is fairly stated, in all material respects, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Also, in our opinion, Brookline Bancorp, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2005, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Brookline Bancorp, Inc. and subsidiaries as of December 31, 2005 and 2004, and the related consolidated statements of income, comprehensive income, stockholders equity, and cash flows for each of the years in the three-year period ended December 31, 2005,

and our report dated March 9, 2006 expressed an unqualified opinion on those consolidated financial statements.

Boston, Massachusetts

March 9, 2006

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders

Brookline Bancorp, Inc.:

We have audited the accompanying consolidated balance sheets of Brookline Bancorp, Inc. and subsidiaries as of December 31, 2005 and 2004, and the related consolidated statements of income, comprehensive income, stockholders equity and cash flows for each of the years in the three-year period ended December 31, 2005. These consolidated financial statements are the responsibility of the Company s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Brookline Bancorp, Inc. and subsidiaries as of December 31, 2005 and 2004, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2005, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Brookline Bancorp, Inc. s internal control over financial reporting as of December 31, 2005, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 9, 2006 expressed an unqualified opinion on management s assessment of, and the effective operation of, internal control over financial reporting.

(1) Summary of Significant Accounting Policies and Related Matters (Dollars in thousands except per share amounts)

Brookline Bancorp. Inc. (the Company) is a Delaware chartered savings and loan holding company and the parent of Brookline Bank (Brookline or the Bank), a federally chartered stock savings institution.

Brookline operates fifteen full service banking offices in Brookline and adjacent communities. The primary activities of Brookline include acceptance of deposits from the general public, origination of mortgage loans on residential and commercial real estate located principally in Massachusetts, origination of commercial loans and indirect automobile loans, and investment in debt and equity securities. The Company is subject to competition from other financial and non-financial institutions and is supervised, examined and regulated by the Office of Thrift Supervision (OTS). Brookline s deposits are insured by the Federal Deposit Insurance Corporation (FDIC).

As a federally-chartered institution, Brookline is required to meet a qualified thrift lender test. Under that test, Brookline must maintain at least 65% of its portfolio assets in qualified thrift investments in at least nine months of the most recent 12-month period. Portfolio assets are Brookline s total assets less the sum of specified liquid assets, goodwill, other intangible assets and property used in the conduct of Brookline s business. Qualified thrift investments include various types of loans and investments related to housing, consumer and certain other purposes. A financial institution that fails the qualified thrift lender test is subject to certain operating restrictions and may be required to convert to a bank charter. Brookline has met the requirements of the thrift lender test and, at December 31, 2005, 67.0% of its assets were in qualified thrift investments .

The accounting and reporting policies of the Company conform to general practices within the banking industry and to accounting principles generally applied in the United States of America. The Company s critical accounting policies relate to the allowance for loan losses and the evaluation of goodwill and the core deposit intangible asset for impairment. The following is a description of those policies and the Company s other significant accounting policies.

Principles of Consolidation and Basis of Financial Statement Presentation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, Brookline and Brookline Securities Corp. (BSC). Brookline includes its wholly-owned subsidiaries, BBS Investment Corporation (BBS) and 160 Associates, Inc. (Associates). BSC and BBS are engaged in buying, selling and holding investment securities. Associates, which was liquidated in December 2003, engaged in marketing services at immaterial levels of activity and owned 99.9 % of Brookline Preferred Capital Corporation (BPCC), a real estate investment trust that owned and managed real estate mortgage loans originated by Brookline. BPCC was also liquidated in December 2003. Mystic Financial Capital Trust I (MFCI) and Mystic Financial Capital Trust II (MFCII) are unconsolidated special purpose entities. See note 10 for information about MFCI and MFCII.

The Company operates as one reportable segment for financial reporting purposes. All significant intercompany transactions and balances are eliminated in consolidation. Certain amounts previously reported have been reclassified to conform to the current year s presentation.

Use of Estimates

In preparing these consolidated financial statements, management has made estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses and the disclosure of contingent assets and liabilities. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near-term relate to the determination of the allowance for loan losses.

Cash Equivalents

For purposes of reporting cash flows, cash equivalents include highly liquid assets with an original maturity of three months or less. Highly liquid assets include cash and due from banks, short-term investments and money market loan participations.

Securities

Marketable equity securities are classified as available for sale. Debt securities are classified as either held to maturity or available for sale. Management determines the classification of debt securities at the time of purchase.

Debt securities for which the Company has the positive intent and ability to hold to maturity are classified as held to maturity and carried at amortized cost. Those securities held for indefinite periods of time and not intended to be held to maturity are classified as available for sale. Securities held for indefinite periods of time include securities that management intends to use as part of its asset/liability management strategy and that may be sold in response to changes in interest rates or other business factors. Securities available for sale are carried at estimated fair value.

Unrealized gains (losses), net of related income taxes, are included in the accumulated other comprehensive income component of stockholders equity. Restricted equity securities are carried at cost which approximates market value.

Realized gains and losses are determined using the specific identification method. Security valuations are reviewed and evaluated periodically by management. If the decline in the value of any security is deemed to be other than temporary, the security is written down to a new cost basis and the resulting loss is charged to income. Security transactions are recorded on the trade date.

Premiums and Discounts on Debt Securities

Premiums and discounts on debt securities are amortized to expense and accreted to income over the life of the related debt security using the interest method. Premiums paid and discounts resulting from purchases of collateralized mortgage obligations (CMOs) and pass-through mortgage-backed securities (collectively referred to as mortgage securities) are amortized to expense and accreted to income over the estimated life of the mortgage securities using the interest method. At the time of purchase, the estimated life of mortgage securities is based on anticipated future prepayments of loans underlying the mortgage securities. The anticipated prepayments take into consideration several factors including the interest rates of the underlying loans, the contractual repayment terms of the underlying loans, the priority rights of the investor to the cash flow from the mortgage securities, the current and projected interest rate environment, and other economic conditions.

When differences arise between anticipated prepayments and actual prepayments, the effective yield is recalculated to reflect actual payments to date and anticipated future payments. Unamortized premium or discount is adjusted to the amount that would have existed had the new effective yield been applied since purchase. The unamortized premium or discount is adjusted to the new balance with a corresponding charge or credit to interest income.

Loans

Loans are reported at the principal amount outstanding, reduced by net deferred loan origination fees, unearned discounts and unadvanced funds due mortgagors on uncompleted loans.

Loan origination fees and direct loan origination costs are deferred, and the net fee or cost is recognized in interest income using the interest method. Deferred amounts are recognized for fixed rate loans over the contractual life of the loans and for adjustable rate loans over the period of time required to adjust the contractual interest rate to a yield approximating a market rate at origination date. Deferred loan origination costs include payments to dealers originating indirect automobile loans. The difference between the rate charged by a dealer to originate an indirect automobile loan and the buy rate , or the rate earned by the Company, is referred to as the spread . The computed dollar value of the spread paid to a dealer is amortized as a charge to income over the life of the loan. If a loan is prepaid, the unamortized portion of the loan origination costs not subject to rebate from the dealer is charged to income.

Except for indirect automobile loans, accrual of interest on loans is discontinued either when reasonable doubt exists as to the full timely collection of interest and principal or when a loan becomes past due 90 days. Commencing January 1, 2005, this policy also applied to indirect automobile loans past due 90 days. The effect of this change was immaterial to the Company s consolidated financial statements. All interest previously accrued and not collected is reversed against interest income. Interest payments received on non-accrual and impaired loans are recognized as income unless further collections are doubtful, in which case the payments are applied as a reduction of principal. Loans are generally

returned to accrual status when principal and interest payments are current, full collectibility of principal and interest is reasonably assured and a consistent record of performance has been achieved.

A loan is considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect principal or interest due according to the contractual terms of the loan. Impaired loans are measured and reported based on one of three methods: the present value of expected future cash flows discounted at the loan s effective interest rate, the loan s observable market price or the fair value of the collateral if the loan is collateral dependent. If the measure is less than an impaired loan s recorded investment, an impairment loss is recognized as part of the allowance for loan losses.

Allowance for Loan Losses

The allowance for loan losses is established through provisions for loan losses charged to earnings. Loans are charged off against the allowance when the collectibility of principal is unlikely. Indirect automobile loans delinquent 120 days are charged off, net of recoverable value, unless it can be clearly demonstrated that repayment will occur regardless of the delinquency status. Recoveries of loans previously charged off are credited to the allowance. The allowance for loan losses is management s estimate of probable known and inherent credit losses in the loan portfolio. In determining the level of the allowance, management evaluates specific credits and the portfolio in general using several methods that include historical performance, collateral values, cash flows and current economic conditions. This evaluation culminates with a judgment on the probability of collection of loans outstanding.

Management s methodology provides for three allowance components. The first component represents allowances established for specific identified loans. The second component represents allowances for groups of homogenous loans that currently exhibit no identified weaknesses and are evaluated on a collective basis. Allowances for groups of similar loans are established based on factors such as historical loss experience, the level and trends of loan delinquencies, and the level and trends of classified assets. Regarding the indirect automobile loan portfolio, allowances are established over the average life of the loans due to the absence of sufficient historical loss experience. The last component is an unallocated allowance which is based on evaluation of factors such as trends in the economy and real estate values in the areas where the Company lends money, concentrations in the amount of loans the Company has outstanding to large borrowers and concentrations in the type and geographic location of loan collateral. Determination of the unallocated allowance is a very subjective process. Management believes the unallocated allowance is an important component of the total allowance because it (a) addresses the probable inherent risk of loss that exists in the Company s loan portfolio (a large portion of which is comprised of mortgage loans with repayment terms extended over many years) and (b) helps to minimize the risk related to the imprecision inherent in the estimation of the other two components of the allowance.

Other Investment

The Company has a 28.7% ownership interest in Eastern Funding LLC (Eastern), a Delaware chartered limited liability corporation based in New York, New York that specializes primarily in the financing of coin operated laundry and dry cleaning equipment in the greater metropolitan New York area and selected other locations in the Northeast. The Company accounts for this investment under the equity method of accounting and includes its share of Eastern s operating results in other income.

On February 28, 2006, the Company announced that it had entered into a merger agreement to acquire an additional 57% ownership interest in Eastern (see note 19).

Bank Premises and Equipment

Bank premises and equipment are carried at cost less accumulated depreciation and amortization, except for land which is carried at cost. Bank premises and equipment are depreciated using the straight-line method over the estimated useful life of the assets. Leasehold improvements are amortized using the straight-line method over the shorter of the lease term or the estimated useful life of the improvements.

Goodwill and Core Deposit Intangible Asset

Goodwill represents the excess of the cost of an acquisition over the fair value of the net assets acquired. Goodwill is not subject to amortization. The core deposit intangible is an asset resulting from an acquisition that is being amortized over its estimated useful life of nine years on an accelerated basis using the sum-of-the-digits method. The recoverability of goodwill and the core deposit intangible is evaluated for impairment at least annually. If impairment is deemed to have occurred, the amount of impairment is charged to expense when identified.

Non-Performing Assets

In addition to non-performing loans, non-performing assets include other real estate owned and repossessed vehicles. Other real estate owned is comprised of properties acquired through foreclosure or acceptance of a deed in lieu of foreclosure. Other real estate owned and repossessed vehicles are recorded initially at estimated fair value less costs to sell. When such assets are acquired, the excess of the loan balance over the estimated fair value of the asset is charged to the allowance for loan losses. An allowance for losses on other real estate owned is established by a charge to earnings when, upon periodic evaluation by management, further declines in the estimated fair value of properties have occurred. Such evaluations are based on an analysis of individual properties as well as a general assessment of current real estate market conditions. Holding costs and rental income on properties are included in current operations while certain costs to improve such properties are capitalized. Gains and losses from the sale of other real estate owned and repossessed vehicles are reflected in earnings when realized.

Retirement and Postretirement Benefits

Costs related to Brookline s 401(k) plan, supplemental executive retirement agreements and postretirement benefits are recognized over the vesting period or the related service periods of the participating employees.

Compensation expense for the Employee Stock Ownership Plan (ESOP) is recorded at an amount equal to the shares allocated by the ESOP multiplied by the average fair market value of the shares during the year. The Company recognizes compensation expense ratably over the year based upon the Company s estimate of the number of shares expected to be allocated by the ESOP. The difference between the average fair market value and the cost of the shares allocated by the ESOP is recorded as an adjustment to additional paid-in-capital.

In accordance with Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees , the Company measures compensation cost for stock options as the excess, if any, of the fair market value of the Company s stock at the grant date over the exercise price of options granted. This generally does not result in compensation charges to earnings. As required by Statement of Financial Accounting Standards (SFAS) No. 123, Accounting for Stock-Based Compensation , disclosed in the following table is net income and earnings per share, as reported, and pro forma net income and earnings per share as if compensation was measured at the date of grant based on the fair value of the award and recognized over the service period.

	Year ended December 31,					
	2005		2004		2003	
	Basic	**Diluted**	**Basic**	**Diluted**	**Basic**	**Diluted**

Net income as reported	$ 22,030	$ 22,030	$ 17,767	17,767	$ 14,480	$ 14,480
Total stock-based compensation expense determined using fair value accounting for stock option awards, net of taxes	(805)	(805)	(1,235)	(1,235)	(1,147)	(1,147)
Dividends on unvested restricted stock awards, net of taxes	(337)	(326)	(430)	(414)	(101)	(90)
Pro forma net income	$ 20,888	$ 20,899	$ 16,102	$ 16,118	$ 13,232	$ 13,243
Earning per share:						
As reported	$ 0.37	$ 0.36	$ 0.31	$ 0.31	$ 0.25	$ 0.25
Pro forma	0.35	0.34	0.28	0.28	0.23	0.23

As required by SFAS 123-R, Share-Based Payment , effective January 1, 2006, the Company will commence charging to expense the grant-date fair value of stock options over the requisite service period. Adoption of SFAS 123-R is not expected to have a material impact on the Company s financial position or results of operations.

Earnings Per Common Share

Basic earnings per share is computed by dividing net income by the weighted average number of shares of common stock outstanding for the applicable period, exclusive of unearned ESOP shares and unvested recognition and retention plan shares. Diluted earnings per share is calculated after adjusting the denominator of the basic earnings per share calculation for the effect of all potential dilutive common shares outstanding during the period. The dilutive effects of options and unvested restricted stock awards are computed using the treasury stock method.

Income Taxes

Income taxes are accounted for under the asset and liability method. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases.

Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Treasury Stock

Common stock shares repurchased are recorded as treasury stock at cost.

(2) Acquisition (Dollars in thousands except share and per share amounts)

On January 7, 2005, the Company acquired all of the outstanding common shares of Mystic Financial, Inc. (Mystic), the holding company of Medford Co-operative Bank (Medford), which had seven retail banking offices serving customers primarily in Middlesex County in Massachusetts. Management expects the acquisition of Mystic to provide expanded commercial and retail banking opportunities in that market and views the acquisition as a positive way to deploy some of the Company s excess capital. As part of the acquisition, Mystic was merged into the Company and Medford was merged into Brookline. On April 11, 2005, the operating systems of Medford were converted to the operating systems of Brookline.

Under the terms of the transaction agreement, (a) 60% of the shares of Mystic common stock were exchanged for Company common stock based on an exchange ratio of 2.6786 shares of Company common stock for each share of Mystic common stock and (b) 40% of the shares of Mystic common stock were exchanged for cash of $39.00 per share. Cash was paid for fractional shares. The acquisition was accounted for using the purchase method of accounting, which requires that the assets and liabilities of Mystic be recorded at fair value as of the acquisition date. The results of operations of Mystic are included in the 2005 consolidated statement of income from the date of acquisition. The purchase price to complete the acquisition was $69,075.

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the date of acquisition:

Assets		
Cash and cash equivalents	$	11,710
Securities available for sale		65,172
Restricted equity securities		4,222
Loans, net		339,949
Premises and equipment		7,596
Other real estate owned		1,400
Goodwill		35,615
Core deposit intangible		11,841
Other assets		5,608
Total assets acquired		483,113
Liabilities		
Deposits		332,316
Borrowed funds		73,761
Subordinated debt		12,337
Other liabilities		1,937
Total liabilities assumed		420,351
Net assets acquired	$	62,762

The purchase price of the acquisition has been allocated to the assets acquired and liabilities assumed using their fair values at the acquisition date. The computation of the purchase price, the allocation of the purchase price to the net assets of Mystic and the resulting goodwill are presented below.

Purchase price				
Mystic common stock exchanged for Company common stock		939,567		
Exchange ratio		2.6786		
Company common stock issued (adjusted for fractional shares)		2,516,525		
Purchase price per Company share of common stock (1)	$	15.57		
Total value of the Company s common stock exchanged			$	39,182
Cash paid in exchange, including cash paid in lieu of issuance of fractional shares				23,729
Cash paid to holders of Mystic stock options, net of related income tax benefits				2,605
Direct acquisition costs, net of related income tax benefits				4,686
Adjustment for 70,312 shares of Company common stock obtained and placed in treasury resulting from termination of Mystic s employee stock option plan and Company common stock owned by Mystic				(1,127)
Total purchase price (brought forward to next page)			$	69,075

(1) The value assigned per common share was the closing market price of the Company s shares on January 7, 2005. The price approximated the average market price of the Company s shares for the two days prior to, and the two days following, January 7, 2005.

Total purchase price (carried forward from prior page)			$ 69,075
Allocation of the purchase price			
Mystic stockholders equity (2)		$ 28,082	
Adjustments to reflect assets acquired at fair value:			
Investment securities	$ (181)		
Loans	(3,418)		
Bank premises and equipment	3,176		
Other real estate owned	(132)		
Core deposit intangible	11,841		
	11,286		
Adjustments to reflect liabilities assumed at fair value:			
Deposits	1,100		
Borrowed funds	319		
Subordinated debt	337		
Deferred income tax liability	3,836		
Other liabilities	316		
	5,908		
Net effect of fair value adjustments		5,378	
Fair value of net assets acquired			33,460
Goodwill resulting from the acquisition			$ 35,615

(2) Excludes $6,313 of direct acquisition costs paid by Mystic, net of related income tax benefits of $2,734, that were charged to Mystic s stockholders equity.

The following table summarizes unaudited pro forma information as if the acquisition of Mystic had been completed as of the beginning of the year presented. The pro forma data gives effect to actual operating results prior to the acquisition, the amortization of the core deposit intangible and the accretion and amortization of the purchase accounting adjustments which affected net interest income and non-interest expense. Special charges related to the acquisition and merger recorded by Mystic totaling $3,116 ($2,025 after-tax) and by the Company totaling $894 ($520 after-tax) have been excluded from the pro forma results for the year ended December 31, 2005. The special charges recorded by Mystic resulted in an increase in goodwill recorded in connection with the acquisition. In addition, an assumed interest charge relating to the cash portion of the purchase price was deducted from the pro forma operating results for both the year ended December 31, 2005 and 2004. No effect has been given to expected cost reductions or operating synergies in this presentation. These pro forma amounts do not purport to be indicative of the results that would have been actually obtained if the acquisition had occurred as of the beginning of the years presented or that may be obtained in the future.

	December 31,	
	2005	**2004**
Net interest income	$ 68,299	$ 65,886
Provision for loan losses	2,983	3,253
Net interest income after provision for loan losses	65,316	62,633
Non-interest income	5,620	6,816
Non-interest expense	(33,545)	(38,163)
Income before income taxes	37,391	31,286
Provision for income taxes	15,290	12,980
Net income	$ 22,101	$ 18,306
Earning per share:		
Basic	$ 0.37	$ 0.31
Diluted	0.36	0.30

Weighted average shares outstanding:		
Basic	60,094,271	59,724,542
Diluted	60,876,423	60,574,445

The following table summarizes the impact of the accretion (amortization) of the purchase accounting adjustments made in connection with the acquisition of Mystic on the results of operations of the Company for the year ended December 31, 2005 and the estimated impact in each of the years in the five-year period ended December 31, 2010:

Year ended December 31,	Amortization of core deposit intangible	Net accretion of assets and liabilities	Net decrease in income before income taxes
2005	$ 2,370	$ 1,701	$ (669)
2006	2,105	1,075	(1,030)
2007	1,842	633	(1,209)
2008	1,579	343	(1,236)
2009	1,316	82	(1,234)
2010	1,053	4	(1,049)

(3) Cash and Short-Term Investments (In thousands)

Aggregate reserves (in the form of deposits with the Federal Reserve Bank and vault cash) of $4,482 and $2,208 were maintained to satisfy federal regulatory requirements at December 31, 2005 and 2004, respectively.

Short-term investments are summarized as follows:

	December 31,	
	2005	2004
Discount notes issued by U.S. Government-sponsored enterprises	$ 63,694	$ 98,834
Money market funds	35,849	28,355
Federal funds sold	3,145	
Other deposits	200	739
	$ 102,888	$ 127,928

Short-term investments are stated at cost which approximates market. Money market funds are invested in mutual funds whose assets are comprised primarily of U.S. Treasury obligations, commercial paper and certificates of deposit with average maturities of 90 days or less.

(4) Investment Securities (In thousands)

Securities available for sale and held to maturity are summarized below:

	December 31, 2005							
		Amortized cost		Gross unrealized gains		Gross unrealized losses		Estimated fair value
Securities available for sale:								
Debt securities:								
U.S. Government-sponsored enterprises	$	295,232	$		$	1,716	$	293,516
Municipal obligations		8,671				167		8,504
Auction rate municipal obligations		12,750						12,750
Corporate obligations		7,478		57		15		7,520
Other obligations		500						500
Collateralized mortgage obligations issued by U.S. Government-sponsored enterprises		211				1		210
Mortgage-backed securities issued by U.S. Government-sponsored enterprises		49,681		6		1,324		48,363
Total debt securities		374,523		63		3,223		371,363
Marketable equity securities		2,881		713		51		3,543
Total securities available for sale	$	377,404	$	776	$	3,274	$	374,906
Securities held to maturity:								
Other obligations	$	100	$		$		$	100
Mortgage-backed securities issued by U.S. Government-sponsored enterprises	$	310		13				323
Total securities held to maturity	$	410	$	13	$		$	423

	December 31, 2004							
		Amortized cost		Gross unrealized gains		Gross unrealized losses		Estimated fair value
Securities available for sale:								
Debt securities:								
U.S. Government-sponsored enterprises	$	169,888	$	8	$	731	$	169,165
Municipal obligations		2,706				9		2,697
Corporate obligations		8,584		165				8,749
Other obligations		500						500
Collateralized mortgage obligations issued by U.S. Government-sponsored enterprises		46,016		6		87		45,935
Mortgage-backed securities issued by U.S. Government-sponsored enterprises		24,346		47		47		24,346
Total debt securities		252,040		226		874		251,392
