Abbott Laboratories and Subsidiaries

Notes to Condensed Consolidated Financial Statements

September 30, 2009

(Unaudited)

Note 1 Basis of Presentation

The accompanying unaudited, condensed consolidated financial statements have been prepared pursuant to rules and regulations of the Securities and Exchange Commission and, therefore, do not include all information and footnote disclosures normally included in audited financial statements. However, in the opinion of management, all adjustments (which include only normal adjustments) necessary to present fairly the results of operations, financial position and cash flows have been made. It is suggested that these statements be read in conjunction with the financial statements included in Abbott s Annual Report on Form 10-K for the year ended December 31, 2008. Events that occurred after September 30, 2009 through the date that these financial statements have been filed with the Securities and Exchange Commission were considered in the preparation of these financial statements.

On January 1, 2009, Abbott adopted SFAS No. 160 Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51 and, accordingly, noncontrolling interests in subsidiaries are presented as a component of total equity as of September 30, 2009 and December 31, 2008.

Note 2 Supplemental Financial Information

Effective January 1, 2009, Abbott adopted FSP EITF 03-6-1, Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities, which requires that unvested restricted stock units that contain non-forfeitable rights to dividends be treated as participating securities and be included in the computation of earnings per share under the two-class method. Under the two-class method, net earnings are allocated between common shares and participating securities. Net earnings allocated to common shares for the three months and nine months ended September 30, 2009 were \$1.476 billion and \$4.196 billion, respectively. Net earnings allocated to common shares in 2008 were not significantly different than net earnings.

Other (income) expense, net, for the third quarter and first nine months of 2009 includes a \$287 million gain from the settlement reached between Abbott and Medtronic, Inc. resolving all outstanding intellectual property litigation between the two parties. Other (income) expense, net, for the first nine months of 2009 includes the derecognition of a contingent liability of \$797 million associated with the conclusion of the TAP joint venture as discussed in Note 9 and income from the recording of certain investments at fair value in connection with business acquisitions. Other (income) expense, net, for the third quarter and first nine months of 2009 and 2008 also includes ongoing contractual payments from Takeda associated with the conclusion of the TAP joint venture. In connection with the dissolution of the TAP joint venture,

Abbott recorded a gain of approximately \$95 million in the first nine months of 2008, which is included in Other (income) expense, net. Other (income) expense, net for the nine months ended September 30, 2008 also includes a gain of approximately \$52 million on the sale of an equity investment accounted for as an available-for-sale investment.

Supplemental Cash Flow Information Other, net in Net cash from operating activities for 2009 and 2008 includes the effects of contributions to the main domestic defined benefit plan of \$700 million and \$200 million, respectively. Other, net in Net cash from operating activities for 2008 also reflects increased accruals for cost improvement initiatives and payroll related obligations.

Purchases of other investment securities, net in 2009 and 2008 reflects the acquisition of short-term investments with original maturities of over three months.

The components of long-term investments as of September 30, 2009 and December 31, 2008 are as follows:

(dollars in millions)	September 30 2009	December 31 2008
Equity securities	\$ 171	\$ 147
Note receivable from Boston Scientific, 4% interest, due in 2011	876	865
Other	64	62
Total	\$ 1,111	\$ 1,074

Notes to Condensed Consolidated Financial Statements

September 30, 2009

(Unaudited), continued

Note 3 Taxes on Earnings

Taxes on earnings reflect the estimated annual effective rates and include charges for interest and penalties. The effective tax rates are less than the statutory U.S. federal income tax rate principally due to the benefit of lower statutory tax rates and tax exemptions in several foreign taxing jurisdictions. In the second quarter of 2008, Abbott s federal income tax returns for 2004 and 2005 were settled, resulting in a net reduction of income taxes of approximately \$30 million.

Note 4 Litigation and Environmental Matters

Abbott has been identified as a potentially responsible party for investigation and cleanup costs at a number of locations in the United States and Puerto Rico under federal and state remediation laws and is investigating potential contamination at a number of company-owned locations. Abbott has recorded an estimated cleanup cost for each site for which management believes Abbott has a probable loss exposure. No individual site cleanup exposure is expected to exceed \$3 million, and the aggregate cleanup exposure is not expected to exceed \$15 million.

There are a number of patent disputes with third parties who claim Abbott s products infringe their patents. In April 2007, New York University (NYU) and Centocor, Inc. filed a lawsuit in the Eastern District of Texas asserting that *HUMIRA* infringes a patent co-owned by NYU and Centocor and exclusively licensed to Centocor. In June 2009, a jury found that Abbott had willfully infringed the patent and awarded NYU and Centocor approximately \$1.67 billion in past compensatory damages. In October 2009, the district court overturned the jury s finding that Abbott s infringement was willful, but denied Abbott s request to overturn the jury s verdict on validity, infringement, and damages. Abbott will appeal the jury s verdict. Abbott is confident in the merits of its case and believes that it will prevail on appeal. As a result, no reserves have been recorded in this case. Abbott s acquisition of Kos Pharmaceuticals Inc. resulted in the assumption of various cases and investigations and Abbott has recorded a reserve.

There are several civil actions pending brought by individuals or entities that allege generally that Abbott and numerous pharmaceutical companies reported false or misleading pricing information relating to the average wholesale price of certain pharmaceutical products in connection with federal, state and private reimbursement. Civil actions have also been brought against Abbott, and in some cases other members of the pharmaceutical industry, by state attorneys general seeking to recover alleged damages on behalf of state Medicaid programs. In May 2006, Abbott was notified that the U.S. Department of Justice intervened in a civil whistle-blower lawsuit alleging that Abbott inflated prices for Medicaid and Medicare reimbursable drugs. Abbott has settled a few of the cases and recorded reserves for its estimated losses in a few other cases, however, Abbott is unable to estimate the range or amount of possible loss for the remaining cases, and no loss reserves have been recorded for them. Many of the products involved in these cases are Hospira products. Hospira, Abbott s former hospital products business, was spun off to Abbott s shareholders in 2004. Abbott retained liability for losses that result from these cases and investigations to the extent any such losses both relate to the sale of Hospira s products prior to the spin-off of Hospira and relate to allegations that were made in such pending and future cases and investigations that were the same as allegations existing at the date of the spin-off.

Within the next year, legal proceedings may occur that may result in a change in the estimated reserves recorded by Abbott. For its legal proceedings and environmental exposures, except as noted above, Abbott estimates the range of possible loss to be from approximately \$230 million to \$385 million. The recorded reserve balance at September 30, 2009 for these proceedings and exposures was approximately \$285 million. These reserves represent management s best estimate of probable loss, as defined by FASB Accounting Standards Codification No. 450, Contingencies.

While it is not feasible to predict the outcome of all such proceedings and exposures with certainty, management believes that their ultimate disposition should not have a material adverse effect on Abbott s financial position, cash flows, or results of operations, except for the cases and investigations discussed in the third paragraph and the patent case discussed in the second paragraph of this footnote, the resolution of which could be material to cash flows or results of operations.

In the third quarter 2009, Abbott and Medtronic, Inc. reached a settlement resolving all outstanding intellectual property litigation between the two parties. Under the terms of the settlement, Medtronic paid Abbott \$400 million. The settlement also includes a mutual agreement not to pursue additional litigation on current and future vascular products, subject to specific conditions and time limits. In connection with the settlement, Abbott recognized a gain of \$287 million which is included in Other (income) expense, net. The remaining amounts will be recognized as royalty income as earned.

Notes to Condensed Consolidated Financial Statements

(Unaudited), continued

#### Note 5 Post-Employment Benefits

Retirement plans consist of defined benefit, defined contribution, and medical and dental plans. Net cost for the three and nine months ended September 30 for Abbott s major defined benefit plans and post-employment medical and dental benefit plans is as follows:

		Defined Benefit Plans								<b>Medical and Dental Plans</b>							
		Three I Enc Septer	ded			Nine Months Ended September 30				Three M Enc Septem	led		Nine Months Ended September 30				
(dollars in millions)	2	2009		2008		2009	2	2008	2	2009		2008		2009		2008

Note 7 Segment Information

Abbott s principal business is the discovery, development, manufacture and sale of a broad line of health care products. Abbott s products are generally sold directly to retailers, wholesalers, hospitals, health care facilities, laboratories, physicians offices and government agencies throughout the world. Abbott s reportable segments are as follows:

*Pharmaceutical Products* Worldwide sales of a broad line of pharmaceuticals. For segment reporting purposes, two pharmaceutical divisions are aggregated and reported as the Pharmaceutical Products segment.

Nutritional Products Worldwide sales of a broad line of adult and pediatric nutritional products.

*Diagnostic Products* Worldwide sales of diagnostic systems and tests for blood banks, hospitals, commercial laboratories and alternate-care testing sites. For segment reporting purposes, three diagnostic divisions are aggregated and reported as the Diagnostic Products segment.

Vascular Products Worldwide sales of coronary, endovascular, vessel closure and other products.

Abbott s underlying accounting records are maintained on a legal entity basis for government and public reporting requirements. Segment disclosures are on a performance basis consistent with internal management reporting. Intersegment transfers of inventory are recorded at standard cost and are not a measure of segment operating earnings. The cost of some corporate functions and the cost of certain employee benefits are charged to segments at predetermined rates that approximate cost. Remaining costs, if any, are not allocated to segments. For acquisitions prior to 2006, substantially all intangible assets and related amortization are not allocated to segments. The following segment information has been prepared in accordance with the internal accounting policies of Abbott, as described above, and are not presented in accordance with generally accepted accounting principles applied to the consolidated financial statements.

#### Note 8 Incentive Stock Programs

In the first nine months of 2009, Abbott granted 1,726,900 stock options, 896,353 replacement stock options, 1,277,400 restricted stock awards and 5,468,672 restricted stock units under these programs. In addition, 2,899,411 options were issued in connection with the conversion of Advanced Medical Optics, Inc. options to Abbott options. At September 30, 2009, approximately 220 million shares were reserved for future grants, including 175 million shares authorized by Abbott s shareholders in April 2009. Information regarding the number of options outstanding and exercisable at September 30, 2009 is as follows:

	Outstanding	Exercisable
Number of shares	123,747,202	103,461,364
Weighted average remaining life (years)	6.1	5.6
Weighted average exercise price	\$ 49.77	\$ 48.84
Aggregate intrinsic value (in millions)	\$ 354	\$ 353

The total unrecognized share-based compensation cost at September 30, 2009 amounted to approximately \$285 million which is expected to be recognized over the next three years.

#### Note 9 Conclusion of TAP Pharmaceutical Products Inc. Joint Venture

On April 30, 2008, Abbott and Takeda concluded their TAP Pharmaceutical Products Inc. (TAP) joint venture, evenly splitting the value and assets of the joint venture. Abbott exchanged its 50 percent equity interest in TAP for the assets, liabilities and employees related to TAP s *Lupron* business. Beginning on May 1, 2008, Abbott began recording U.S. *Lupron* net sales and costs in its operating results and no longer records income from the TAP joint venture. Abbott receives payments based on specified development, approval and commercial events being achieved with respect to products retained by Takeda and payments from Takeda based on sales of products retained by Takeda, which are recorded by Abbott as Other (income) expense, net as earned. Abbott also agreed to remit cash to Takeda if certain research and development events are not achieved on the development assets retained by Takeda. These amounts were recorded as a liability at closing in the amount of approximately \$1.1 billion. Of the \$1.1 billion, Abbott made tax-deductible payments of \$83 million in 2009 and \$200 million in 2008 and Abbott will make a tax-deductible payment of approximately \$36 million in 2010. In the first quarter of 2009, events occurred resulting in the remaining payments not being required and the remaining liability in the amount of \$797 million was derecognized and recorded as income in Other (income) expense, net. The 50 percent-owned joint venture was accounted for under the equity method of accounting. Summarized financial information for TAP for the nine months ended September 30, 2008 are as follows: (*dollars in millions*)

Net sales	\$ 853
Cost of sales	229
Income before taxes	356
Net earnings	238

Note 10 Business Acquisitions

In February 2009, Abbott acquired the outstanding shares of Advanced Medical Optics, Inc. (AMO), a marketer of ophthalmic surgical technology and devices, as well as eye care solutions for approximately \$1.4 billion in cash, net of cash held by AMO. Prior to the acquisition, Abbott held a small investment in AMO. Abbott acquired AMO to take advantage of increasing demand for vision care technologies due to population growth and demographic shifts and AMO s premier position in its field. Abbott acquired control of this business on February 25, 2009 and the financial results of the acquired operations are included in these financial statements beginning on that date. The acquisition was financed with long-term debt. The preliminary allocation of the fair value of the acquisition is shown in the table below (*dollars in billions*). These allocations will be finalized when valuations are completed.

Goodwill, non-deductible	\$ 1.7
Acquired intangible assets, non-deductible	0.9
Acquired in-process research and development	0.2
Acquired net tangible assets	0.4
Acquired debt	(1.5)
Deferred income taxes recorded at acquisition	(0.3)
Total preliminary allocation of fair value	\$ 1.4

Acquired intangible assets consist of established customer relationships, developed technology and trade names and will be amortized over 2 to 30 years (average of 15 years). Acquired in-process research and development will be accounted for as an indefinite lived intangible asset until regulatory approval or discontinuation. The net tangible assets acquired consist primarily of trade accounts receivable, inventory, property and equipment and other assets, net of assumed liabilities, primarily trade accounts payable, accrued compensation and other liabilities.

Abbott incurred approximately \$73 million of acquisition-related expenses in the first nine months of 2009 which are classified as Selling, general and administrative expense. In addition, subsequent to the acquisition, Abbott repaid substantially all of the acquired debt of AMO.

In January 2009, Abbott acquired Ibis Biosciences, Inc. (Ibis) for \$175 million, in cash, to expand Abbott s position in molecular diagnostics for infectious disease. Including a \$40 million investment in Ibis in 2008, Abbott has acquired 100 percent of the outstanding shares of Ibis. A substantial portion of the fair value of the acquisition has been allocated to goodwill and amortizable intangible assets, and acquired in-process research and development which will be accounted for as an indefinite lived intangible asset until regulatory approval or discontinuation. The investment in Ibis in 2008 resulted in a charge to acquired in-process research and development in the first nine months of 2008. In connection with the acquisition, the carrying amount of this investment was revalued to fair value in the first quarter of 2009 resulting in recording \$33 million of income, which is reported as Other (income) expense, net.

On October 20, 2009, Abbott acquired 100 percent of Visiogen, Inc. for \$400 million in cash, providing Abbott with a next-generation accommodating intraocular lens (IOL) technology to address presbyopia for cataract patients. It is anticipated that a substantial portion of the

fair value of the acquisition will be allocated to acquired in-process research and development, amortizable intangible assets and goodwill.

On October 30, 2009, Abbott acquired Evalve, Inc. for \$320 million, in cash, plus an additional payment of \$90 million upon completion of certain regulatory milestones. Abbott acquired Evalve to obtain a presence in the growing area of non-surgical treatment for structural heart disease. Including a previous investment in Evalve, Abbott has acquired 100 percent of the outstanding shares of Evalve. It is anticipated that a substantial portion of the fair value of the acquisition will be allocated to acquired in-process research and development, amortizable intangible assets and goodwill.

Had the above acquisitions taken place on January 1 of the previous year, consolidated net sales and income would not have been significantly different from reported amounts.

In September 2009, Abbott announced an agreement to acquire Solvay s pharmaceuticals business for EUR 4.5 billion (approximately \$6.6 billion), in cash, plus additional payments of up to EUR 300 million if certain sales milestones are met. This acquisition will provide Abbott with a large and complementary portfolio of pharmaceutical products and a significant presence in key global emerging markets and will add approximately \$500 million to Abbott s research and development spending. The transaction is expected to close in the first quarter of 2010. Full year sales for the acquired business are forecast to be approximately \$3 billion in 2010.

#### Note 11 Financial Instruments, Derivatives and Fair Value Measures

Certain Abbott foreign subsidiaries enter into foreign currency forward exchange contracts to manage exposures to changes in foreign exchange rates for anticipated intercompany purchases by those subsidiaries whose functional currencies are not the U.S. dollar. These contracts, totaling \$79 million and \$129 million at September 30, 2009 and December 31, 2008, respectively, are designated as cash flow hedges of the variability of the cash flows due to changes in foreign exchange rates and are recorded at fair value. Accumulated gains and losses as of September 30, 2009 will be included in Cost of products sold at the time the products are sold, generally through the next twelve months.

Abbott enters into foreign currency forward exchange contracts to manage currency exposures for foreign currency denominated third-party trade payables and receivables, and for intercompany loans and trade accounts payable where the receivable or payable is denominated in a currency other than the functional currency of the entity. For intercompany loans, the contracts require Abbott to sell or buy foreign currencies, primarily European currencies and Japanese yen, in exchange for primarily U.S. dollars and other European currencies. For intercompany and trade payables and receivables, the currency exposures are primarily the U.S. dollar, European currencies and Japanese yen. At September 30, 2009 and December 31, 2008, Abbott held \$7.0 billion and \$8.3 billion, respectively, of such foreign currency forward exchange contracts.

Abbott has designated foreign denominated short-term debt as a hedge of the net investment in certain foreign subsidiaries of approximately \$587 million and approximately \$585 million as of September 30, 2009 and December 31, 2008, respectively. Accordingly, changes in the fair value of this debt due to changes in exchange rates are recorded in Accumulated other comprehensive income (loss), net of tax.

Abbott is a party to interest rate swap contracts totaling \$5.5 billion and \$2.5 billion at September 30, 2009 and December 31, 2008, respectively, to manage its exposure to changes in the fair value of fixed-rate debt due 2011 through 2019. These contracts are designated as fair value hedges of the variability of the fair value of fixed-rate debt due to changes in the long-term benchmark interest rates. The effect of the hedge is to change a fixed-rate interest obligation to a variable rate for that portion of the debt. Abbott records the contracts at fair value and adjusts the carrying amount of the fixed-rate debt by an offsetting amount. No hedge ineffectiveness was recorded in income in 2009 or 2008 for these hedges.

The following table summarizes the amounts and location of certain derivative financial instruments as of September 30, 2009 and December 31, 2008:

(dollars in millions)	t. 30 )09	De	Fair Value c. 31 008	- Assets Balance Sheet Caption	Sept 20		Fair Value Dec. 31 2008	- Liabilities Balance Sheet Caption

Note 12 Goodwill and Intangible Assets

Abbott recorded goodwill of approximately \$1.8 billion in 2009 related to the acquisitions of Advanced Medical Optics, Inc. and Ibis Biosciences, Inc. In connection with the dissolution of the TAP Pharmaceutical Products Inc. (TAP) joint venture in 2008, Abbott recorded approximately \$350 million of goodwill. In the third quarter of 2008, Abbott paid \$250 million to Boston Scientific as a result of the FDA s approval to market the *Xience V* drug-eluting stent in the U.S., resulting in an increase in goodwill. Goodwill related to the Ibis acquisition was allocated to the Diagnostic Products segment, goodwill related to the Boston Scientific payment was allocated to the Vascular Products segment and goodwill related to TAP was allocated to the Pharmaceutical Products segment. Foreign currency translation adjustments and other adjustments increased goodwill in the first nine months of 2009 and 2008 by approximately \$725 million and \$2 million, respectively. The amount of goodwill related to reportable segments at September 30, 2009 was \$6.5 billion for the Pharmaceutical Products segment, \$206 million for the Nutritional Products segment, \$385 million for the Diagnostic Products segment and \$2.4 billion for the Vascular Products segment. There were no reductions of goodwill relating to impairments or disposal of all or a portion of a business.

The gross amount of amortizable intangible assets, primarily product rights and technology was \$10.7 billion as of September 30, 2009 and \$9.4 billion as of December 31, 2008, and accumulated amortization was \$4.8 billion as of September 30, 2009 and \$4.2 billion as of December 31, 2008. The estimated annual amortization expense for intangible assets is approximately \$851 million in 2009, \$864 million in 2010, \$850 million in 2011, \$836 million in 2012 and \$681 million in 2013. Amortizable intangible assets are amortized over 2 to 30 years (average 11 years).

Note 13 Restructuring Plans

In 2008, Abbott management approved a plan to streamline global manufacturing operations, reduce overall costs, and improve efficiencies in Abbott s core diagnostic business. Additional charges of approximately \$38 million were recorded in the first nine months of 2009 relating to this restructuring, primarily for accelerated depreciation and product transfer costs. Additional charges will occur through 2011 as a result of product re-registration timelines required under manufacturing regulations in a number of countries and product transition timelines. The following summarizes the activity for this restructuring: (*dollars in millions*)
