WHOLESALE SEGMENT

Our Wholesale Segment is one of the largest wholesale convenience store distributors in the United States serving approximately 5,000 retail outlets including convenience stores, grocery stores, liquor stores, drug stores, and tobacco shops. We currently distribute over 14,000 different consumer products, including cigarettes and tobacco products, candy and other confectionery, beverages, groceries, paper products, health and beauty care products, frozen and chilled products and institutional foodservice products. We also provide a full range of consultative services to our customers in the areas of marketing, merchandising, inventory optimization, and information systems that allow our customers to better compete and maximize their profitability. Our Wholesale Segment operates six distribution centers located in Illinois, Missouri, Nebraska, North Dakota, South Dakota, and Tennessee. These distribution centers, combined with cross-dock facilities, include approximately 601,000 square feet of permanent floor space. Our principal suppliers include Philip Morris USA, RJ Reynolds, Commonwealth Brands, Lorillard, Proctor & Gamble, Hershey, Mars, Quaker, and Nabisco. We also market private label lines of water, candy products, batteries, film, and other products. We do not maintain any long-term purchase contracts with our suppliers.

RETAIL SEGMENT

Edgar Filing: AMCON DISTRIBUTING CO - Form 10-Q

The conversion prices for the Preferred Stock are subject to customary adjustments in the event of stock splits, stock dividends, and certain other distributions on the Common Stock. Cumulative dividends for the Preferred Stock are payable in arrears, when, and if declared by the Board of Directors, on March 31, June 30, September 30 and December 31 of each year.

In the event of a liquidation of the Company, the holders of the Preferred Stock would be entitled to receive the liquidation preference plus any accrued and unpaid dividends prior to the distribution of any amount to the holders of the Common Stock. The shares of Preferred Stock are optionally redeemable by the Company beginning on various dates, as listed in the above table, at redemption prices equal to 112% of the liquidation preference. The redemption prices decrease 1% annually thereafter until the redemption price equals the liquidation preference, after which date it remains the liquidation preference. The BMO loan contains cross default provisions which cause the loan with BMO to be considered in default if the loans where BMO is the lender, including the revolving credit facility, is in default. There were no such cross defaults at December 2012. In addition, the BMO loan contains co-terminus provisions which require all loans with BMO to be paid in full if any of the loans are paid in full prior to the end of their specified terms.

9. BUSINESS SEGMENTS

AMCON has two reportable business segments: the wholesale distribution of consumer products and the retail sale of health and natural food products. The retail health food stores' operations are aggregated to comprise the Retail Segment because such operations have similar economic characteristics, as well as similar characteristics with respect to the nature of products sold, the type and class of customers for the health food products and the methods used to sell the products. Included in the Other column are intercompany eliminations, and assets held and charges incurred by our holding company. The segments are evaluated on revenues, gross margins, operating income (loss), and income before taxes.

CRITICAL ACCOUNTING ESTIMATES

Certain accounting estimates used in the preparation of the Company's financial statements require us to make judgments and estimates and the financial results we report may vary depending on how we make these judgments and estimates. Our critical accounting estimates are set forth in our annual report on Form 10-K for the fiscal year ended September 30, 2012, as filed with the Securities and Exchange Commission. There have been no significant changes with respect to these policies during our fiscal quarter ended December 2012.

FIRST FISCAL QUARTER 2013 (Q1 2013)

The following discussion and analysis includes the Company's results of operations for the three months ended December 2012 and December 2011.

Wholesale Segment

Our wholesale segment is one of the largest wholesale convenience store distributors in the United States serving approximately 5,000 retail outlets including convenience stores, grocery stores, liquor stores, drug stores, and tobacco shops. In October 2012, Convenience Store News ranked us as the ninth (9th) largest convenience store distributor in the United States based on annual sales.

We currently distribute over 14,000 different consumer products, including cigarettes and tobacco products, candy and other confectionery, beverages, groceries, paper products, health and beauty care products, frozen and chilled products and institutional food service products. We also provide consultative services to our customers in the areas of marketing, merchandising, inventory optimization, and information systems which are designed to enhance the ability of our customers to compete and maximize their profitability. Convenience stores represent our largest customer category.

Retail Segment

Our Retail Segment is a specialty retailer of natural and organic groceries and dietary supplements, which is a subset of the larger U.S. grocery industry. We operate fourteen retail health food stores doing business as Chamberlin's Market & Café (Chamberlin's) and Akin's Natural Foods

Edgar Filing: AMCON DISTRIBUTING CO - Form 10-Q

Market (Akin s). Chamberlin s, which was established in 1935, operates six stores in and around Orlando, Florida. Akin s, which was also established in 1935, has a total of eight locations in Oklahoma, Nebraska, Missouri, and Kansas. We are also scheduled to open two new Akin s retail stores during fiscal 2013. These stores will be located in Arkansas and Nebraska.

Our stores carry over 30,000 different national and regionally branded and private label products including high-quality natural, organic, and specialty foods consisting of produce, baked goods, frozen foods, nutritional supplements, personal care items, and general merchandise. We compete against a wide range of retailers including, conventional, natural, gourmet, and discount retailers, as well as warehouse clubs, independent health food stores, dietary supplement retailers, drug stores, farmers markets, mail order, online retailers, and multi-level marketers.

Business Update Wholesale Segment

Legislative initiatives across the country continue to take aim at many of the products sold by our convenience stores customers. Tobacco products in particular are facing higher sales and excise taxes from state and local governments struggling to deal with budget shortfalls. Other profitable products such as sugary drinks are gaining tax focus as well. Additionally, both the convenience store industry, and the wholesale distributors that serve them, are undergoing significant structural changes (i.e. consolidation, product diversification, increasing reliance on technology etc.).

Despite these considerations, the demand for convenience shopping in the United States has remained steady. The convenience store industry, which represents the largest portion of our customer base, continues to show long term growth and has demonstrated resiliency compared to that of the general economy.

Table of Contents

We believe the future of wholesale distribution will be less about transporting highly commoditized products and will be more about providing differentiated merchandising and technology solutions to customers. While we expect the operating environment to remain highly competitive, we believe our long legacy of serving independent and fast growing small convenience store operations positions us well in the present environment.

Business Update **Retail Segment**

Sales in the retail health food industry have remained strong. Industry-wide, we believe a number of key factors are influencing overall demand trends. In particular, increased media coverage regarding possible linkages between food additives and disease, as well as premature development in children, has created tremendous awareness about the benefits of natural products. Additionally, food additives such as sugars, aspartame included in diet sodas, and the use of growth hormones and antibiotics in the production of chicken, beef, and dairy products have also come under a high degree of scrutiny in terms of dietary consumption, which has increased the interest in natural products.

During Q1 2013, our Florida market stores continued to experience sales growth, benefitting from the growing demand for natural products, as well as the improved economic conditions in that region. Our Akin's stores also performed well during Q1 2013, however, we continue to see increased competition in our Akin's stores resulting from the expansion of both regional and national health food chains.

Identifying both organic and strategic growth opportunities will continue to be a top priority throughout the remainder of fiscal 2013. We are currently scheduled to open two new Akin's retail stores located in Arkansas and Nebraska during fiscal 2013 and have ongoing efforts to identify potential acquisition opportunities.

Table of Contents

SALES:

Changes in sales are driven by two primary components:

- (i) changes to selling prices, which are largely controlled by our product suppliers, and excise taxes imposed on cigarettes and tobacco products by various states; and
- (ii) changes in the volume of products sold to our customers, either due to a change in purchasing patterns resulting from consumer preferences or the fluctuation in the comparable number of business days in our reporting period.

SALES Q1 2013 vs. Q1 2012

Sales in our Wholesale Segment increased \$18.5 million during Q1 2013 as compared to Q1 2012. Significant items impacting sales during Q1 2013 included a \$6.0 million increase in sales related to price increases implemented by cigarette manufacturers, a \$4.8 million increase in sales related to the volume and mix of cigarette cartons sold, a \$4.8 million increase in sales related to higher state excise taxes during the comparative periods, and a \$2.9 million increase in sales related to higher sales in our tobacco, beverage, snacks, candy, grocery, health & beauty products, automotive, food service, and store supplies categories (Other Products).

Sales in our Retail Segment increased approximately \$0.2 million in Q1 2013 as compared to Q1 2012. This change in sales was primarily related to higher sales in our Florida market stores which continue to benefit from the growing demand for natural products, as well as the strengthening economic conditions in that region.

GROSS PROFIT Q1 2013 vs. Q1 2012

Our gross profit does not include fulfillment costs and costs related to the distribution network which are included in selling, general and administrative costs, and may not be comparable to those of other entities. Some entities may classify such costs as a component of cost of sales. Cost of sales, a component used in determining gross profit, for the wholesale and retail segments includes the cost of products purchased from manufacturers, less incentives we receive which are netted against such costs.

Gross profit in our Wholesale Segment increased \$0.5 million in Q1 2013 as compared to Q1 2012. This increase in gross profit was primarily related to higher sales volume and mix in our Other Products categories. Gross profit for the Retail Segment increased \$0.1 million in Q1 2013 as compared to Q1 2012. This increase was primarily related to higher sales volumes in our Chamberlin's retail stores.

OPERATING EXPENSE Q1 2013 vs. Q1 2012

Operating expense includes selling, general and administrative expenses and depreciation and amortization. Selling, general, and administrative expenses include costs related to our sales, warehouse, delivery and administrative departments for all segments. Specifically, purchasing and receiving costs, warehousing costs and costs of picking and loading customer orders are all classified as selling, general and administrative expenses. Our most significant expenses relate to employee costs, facility and equipment leases, transportation costs, fuel costs, insurance, and professional fees. Q1 2013 operating expenses increased \$0.5 million as compared to Q1 2012. This increase in operating expenses was primarily related to higher compensation and other operating expenses.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

Overview

- **General.** The Company requires cash to pay operating expenses, purchase inventory, and make capital investments. In general, the Company finances its cash flow requirements with cash generated from operating activities and credit facility borrowings.
- **Operating Activities.** During Q1 2013, the Company used cash of approximately \$13.2 million for operating activities. Significant uses of cash during Q1 2013 included increases in inventory, prepaid assets and other current assets, and decreases in accounts payable, accrued expenses, and income taxes payable. These uses of cash were partially offset by decreases in accounts receivable and deferred income taxes, and the impact of net earnings.

Our variability in cash flows from operating activities is dependent on the timing of inventory purchases and seasonal fluctuations. For example, periodically we have inventory buy-in opportunities which offer more favorable pricing terms. As a result, we may have to hold inventory for a period longer than the payment terms. This generates a cash outflow from operating activities which we expect to reverse in later periods. Additionally, during the warm weather months, which is our peak time of operations, we generally carry higher amounts of inventory to ensure high fill rates and customer satisfaction.

- **Investing Activities.** The Company used approximately \$0.2 million of cash during Q1 2013 for investing activities, primarily related to capital expenditures for property and equipment.
- **Financing Activities.** The Company generated cash of \$12.9 million from financing activities during Q1 2013. Of this amount, approximately \$16.0 million related to net borrowings on the Company's credit facility. This was partially offset by \$0.3 million related to repayments on long-term debt, \$2.6 million related to the repurchase of shares of the Company's common stock and Series B Convertible Preferred Stock, \$0.2 million related to dividends on the Company's common and preferred stock.
- **Cash on Hand/Working Capital.** At December 2012, the Company had cash on hand of \$0.1 million and working capital (current assets less current liabilities) of \$66.2 million. This compares to cash on hand of \$0.5 million and working capital of \$49.9 million at September 2012.

CREDIT AGREEMENT

The Company primarily finances its operations through a credit facility provided under an agreement with Bank of America (the Facility). The Facility included the following significant terms at December 2012:

- April 2011 origination date and an April 2014 maturity date.
- \$70.0 million revolving credit limit.
- Loan accordion allowing the Company to increase the size of the credit facility agreement by \$25.0 million.
- A provision providing an additional \$5.0 million of credit advances for certain inventory purchases.
- Evergreen renewal clause automatically renewing the agreement for one year unless either the borrower or lender provides written notice terminating the agreement at least 90 days prior to the end of the original term of the agreement or the end of any renewal period.

Edgar Filing: AMCON DISTRIBUTING CO - Form 10-Q

- Prepayment penalty equal to one-fourth of one percent (1/4%) if the Company prepays the entire Facility or terminates it in year two of the agreement. The prepayment penalty is calculated based on the maximum loan limit.
- The Facility bears interest at either the bank's prime rate, or at LIBOR plus 175 basis points, at the election of the Company.
- Lending limits subject to accounts receivable and inventory limitations.
- An unused commitment fee equal to one-quarter of one percent (1/4%) per annum on the difference between the maximum loan limit and average monthly borrowings.

Table of Contents

- Secured by collateral including all of the Company's equipment, intangibles, inventories, and accounts receivable.
- Provides that the Company may not pay dividends on its common stock in excess of \$1.00 per share on an annual basis.
- A financial covenant requiring a fixed charge coverage ratio of at least 1.1 as measured by the previous twelve month period then ended only if excess availability falls below 10% of the maximum loan limit as defined in the credit agreement.

The amount available for use on the Facility at any given time is subject to a number of factors including eligible accounts receivable and inventory balances that fluctuate day-to-day. Based on our collateral and loan limits as defined in the Facility agreement, the credit limit of the Facility at December 2012 was \$69.6 million, of which \$30.4 million was outstanding, leaving \$39.2 million available.

At December 2012, the revolving portion of the Company's Facility balance bore interest based on the bank's prime rate and various short-term LIBOR rate elections made by the Company. The average interest rate was 2.52% at December 2012.

During Q1 2013, our peak borrowings under the Facility were \$45.9 million, and our average borrowings and average availability under the Facility were \$33.9 million and \$34.0 million, respectively. Our availability to borrow under the Facility generally decreases as inventory and accounts receivable levels increase because of the borrowing limitations that are placed on collateralized assets.

Cross Default and Co-Terminus Provisions

The Company's owned real estate in Bismarck, ND, Quincy, IL, and Rapid City, SD, is financed through a term loan with BMO Harris, NA (BMO) which is also a participant lender on the Company's revolving line of credit. The BMO loan contains cross default provisions which cause the loan with BMO to be considered in default if the loans where BMO is the lender, including the revolving credit facility, is in default. There were no such cross defaults at December 2012. In addition, the BMO loan contains co-terminus provisions which require all loans with BMO to be paid in full if any of the loans are paid in full prior to the end of their specified terms.

Dividends Payments

The Company paid cash dividends on its common stock and convertible preferred stock totaling approximately \$0.2 million during both Q1 2013 and Q1 2012.

Contractual Obligations

There have been no significant changes to the Company's contractual obligations as set forth in the Company's annual report on Form 10-K for the fiscal period ended September 30, 2012.

OTHER

AMCON has issued a letter of credit in the amount of approximately \$0.4 million to its workers' compensation insurance carrier as part of its self-insured loss control program.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements.

Liquidity Risk

The Company's liquidity position is significantly influenced by its ability to maintain sufficient levels of working capital. For our Company and industry in general, customer credit risk and ongoing access to bank credit heavily influence liquidity positions.

The Company does not currently hedge its exposure to interest rate risk or fuel costs. Accordingly, significant price movements in these areas can and do impact the Company's profitability.

Table of Contents

The Company believes its liquidity position going forward will be adequate to sustain operations. However, a precipitous change in operating environment could materially impact the Company's future revenue stream as well as its ability to collect on customer accounts receivable or secure bank credit.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Not applicable.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in company reports filed or submitted under the Securities Exchange Act of 1934 (the Exchange Act) is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in company reports filed or submitted under the Exchange Act is accumulated and communicated to management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

As required by Rules 13a-15(b) and 15d-15(b) under the Exchange Act, an evaluation of the effectiveness of our disclosure controls and procedures as of December 31, 2012 was made under the supervision and with the participation of our senior management, including our principal executive officer and principal financial officer. Based upon that evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report.

Limitations on Effectiveness of Controls

Our management, including our Chief Executive Officer and Chief Financial Officer, do not expect that our disclosure controls and procedures will prevent all errors and fraud. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable, not absolute, assurance of achieving the desired control objectives. Further, the design of a control system must reflect the fact that there are resource constraints, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management's override of the control.

The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.
