PRICING SUPPLEMENT No. WF-24 dated February 28, 2017

(To Prospectus Supplement dated April 30, 2015

and Prospectus dated April 30, 2015)

Canadian Imperial Bank of Commerce

Senior Global Medium-Term Notes (Structured Notes)

Market Linked Securities Leveraged Upside Participation to a Cap and Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

	ncipal at hisk becunties Linked to the Lhergy belect bector of Dright and due beptember 5, 2020	
¢	Linked to the Energy Select Sector SPDR® Fund (the Fund)	
¢	Unlike ordinary debt securities, the securities do not pay interest at a specified rate or repay a fixed amount of principal at maturity. Instead, the securities provide for a payment at maturity that may be greater than, equal to or less than the principal amount of the securities, depending on the performance of the Fund from its starting price to its ending price. The payment at maturity will reflect the following terms:	
	c If the price of the Fund increases, you will receive the principal amount plus	
	170% participation in the upside performance of the Fund, subject to a maximum total return at maturity of 36% of the principal amount	
	¢ If the price of the Fund decreases but the decrease is not more than 15%, you will be repaid the principal amount	
	¢ If the price of the Fund decreases by more than 15%, you will receive less than the principal amount and have 1-to-1 downside exposure to the decrease in the price of the Fund in excess of 15%	
¢	Investors may lose up to 85% of the principal amount	
¢	All payments on the securities are subject to the credit risk of Canadian Imperial Bank of Commerce and you will have no ability to pursue the shares of the Fund or any securities held by the Fund for payment; if Canadian Imperial Bank of Commerce defaults on its obligations, you could lose all or some of your investment	
¢	No periodic interest payments or dividends	
¢	No exchange listing; designed to be held to maturity	

The securities are unsecured obligations of Canadian Imperial Bank of Commerce and all payments on the securities are subject to the credit risk of Canadian Imperial Bank of Commerce. The securities will not constitute deposits insured by the Canada Deposit Insurance Corporation, the U.S. Federal Deposit Insurance Corporation or any other government agency or instrumentality of Canada, the United States or any other jurisdiction.

Neither the Securities and Exchange Commission (the SEC) nor any state or provincial securities commission has approved or disapproved of these securities or determined if this pricing supplement or the accompanying prospectus supplement and prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

	Principal amount(1)	Underwriting Discount and Commission(2)	Proceeds to Canadian Imperial Bank of Commerce
Per Security	\$1,000.00	\$32.70	\$967.30
Total	\$1,835,000.00	\$60,004.50	\$1,774,995.50

- (1) Our estimated value of the securities on the pricing date, based on our internal pricing models, is \$947.40 per security. The estimated value is less than the principal amount of the securities. See The Estimated Value of the Securities on page PRS-31 of this Pricing Supplement.
- (2) The agent, Wells Fargo Securities, LLC, will receive an underwriting discount of \$32.70 per security. The agent may resell the securities to other securities dealers at the principal amount less a concession not in excess of \$20.00 per security. Such securities dealers may include Wells Fargo Advisors (WFA) (the trade name of the retail brokerage business of Wells Fargo Clearing Services, LLC and Wells Fargo Advisors Financial Network, LLC, each an affiliate of Wells Fargo Securities). In addition to the selling concession allowed to WFA, the agent will pay \$0.75 per security of the underwriting discount to WFA as a distribution expense fee for each security sold by WFA. See Use of Proceeds and Hedging and Supplemental Plan of Distribution in this pricing supplement for information regarding how we may hedge our obligations under the securities.

Wells Fargo Securities

ABOUT THIS PRICING SUPPLEMENT

You should read this pricing supplement together with the prospectus dated April 30, 2015 and the prospectus supplement dated April 30, 2015, relating to our Senior Global Medium-Term Notes (Structured Notes), of which these securities are a part, for additional information about the securities. Information included in this pricing supplement supersedes information in the prospectus supplement and prospectus to the extent it is different from that information. Certain defined terms used but not defined herein have the meanings set forth in the prospectus supplement.

You should rely only on the information contained in or incorporated by reference in this pricing supplement, the accompanying prospectus supplement and the accompanying prospectus. This pricing supplement may be used only for the purpose for which it has been prepared. No one is authorized to give information other than that contained in this pricing supplement, the accompanying prospectus supplement and the accompanying prospectus, and in the documents referred to in this pricing supplement, the prospectus supplement and the prospectus and which are made available to the public. We have not, and Wells Fargo Securities, LLC (Wells Fargo Securities) has not, authorized any other person to provide you with different or additional information. If anyone provides you with different or additional information, you should not rely on it.

We are not, and Wells Fargo Securities is not, making an offer to sell the securities in any jurisdiction where the offer or sale is not permitted. You should not assume that the information contained in or incorporated by reference in this pricing supplement, the accompanying prospectus supplement or the accompanying prospectus is accurate as of any date other than the date of the applicable document. Our business, financial condition, results of operations and prospects may have changed since that date. Neither this pricing supplement, nor the accompanying prospectus supplement, nor the accompanying prospectus constitutes an offer, or an invitation on our behalf or on behalf of Wells Fargo Securities, to subscribe for and purchase any of the securities and may not be used for or in connection with an offer or solicitation by anyone in any jurisdiction in which such an offer or solicitation is not authorized or to any person to whom it is unlawful to make such an offer or solicitation.

References to CIBC, the Issuer, the Bank, we, us and our in this pricing supplement are references to Canadian Imperial Bank of Comme not to any of our subsidiaries, unless we state otherwise or the context otherwise requires.

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

INVESTMENT DESCRIPTION

The Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020 (the securities) are senior unsecured debt securities of Canadian Imperial Bank of Commerce that do not pay interest at a specified rate or repay a fixed amount of principal at maturity. Instead, the securities provide for a payment at maturity that may be greater than, equal to or less than the principal amount of the securities depending on the performance of the Energy Select Sector SPDR® Fund (the Fund) from its starting price on the pricing date to its ending price on the calculation date. The securities provide:

(i) the possibility of a leveraged return at maturity if the price of the Fund increases from its starting price to its ending price, provided that the total return at maturity of the securities will not exceed the maximum total return of 36% of the principal amount;

(ii) repayment of principal if, and only if, the ending price of the Fund is not less than the starting price by more than 15%; and

(iii) exposure to decreases in the price of the Fund if and to the extent that the ending price is less than the starting price by more than 15%.

If the ending price is less than the starting price by more than 15%, you will receive at maturity less, and up to 85% less, than the principal amount of your securities. All payments on the securities are subject to the credit risk of Canadian Imperial Bank of Commerce.

All components of the S&P 500® are assigned to at least one of eleven Select Sector Indices (as defined below), which track major economic segments and are highly liquid benchmarks. The Fund is an exchange traded fund that seeks to provide investment results that, before expenses, correspond generally to the price and yield performance of the Energy Select Sector Index.

to a Cap and Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

INVESTOR CONSIDERATIONS

We have designed the securities for investors who:

• seek 170% leveraged exposure to any upside performance of the Fund if the ending price is greater than the starting price, subject to the maximum total return at maturity of 36% of the principal amount;

• desire to limit downside exposure to the Fund through the 15% buffer;

• understand that if the ending price is less than the starting price by more than 15%, they will receive at maturity less, and up to 85% less, than the principal amount per security;

• are willing to forgo periodic interest payments on the securities and dividends on securities included in the Fund; and

• are willing to hold the securities until maturity.

The securities are not designed for, and may not be a suitable investment for, investors who:

• seek a liquid investment or are unable or unwilling to hold the securities to maturity;

• are unwilling to accept the risk that the ending price of the Fund may decrease by more than 15% from the starting price;

- seek uncapped exposure to the upside performance of the Fund;
- seek full return at maturity of the principal amount of the securities;

• are unwilling to purchase securities with an estimated value as of the pricing date that is lower than the principal amount;

- seek current income;
- are unwilling to accept the risk of exposure to the energy sector of the United States equity market;

• seek exposure to the Fund but are unwilling to accept the risk/return trade-offs inherent in the payment at stated maturity for the securities;

• are unwilling to accept the credit risk of Canadian Imperial Bank of Commerce to obtain exposure to the Fund generally, or to the exposure to the Fund that the securities provide specifically; or

• prefer the lower risk of fixed income investments with comparable maturities issued by companies with comparable credit ratings.

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

TERMS OF THE SECURITIES

The information in this Summary section is qualified by the more detailed information set forth in this pricing supplement, the prospectus supplement dated April 30, 2015 and the prospectus dated April 30, 2015, each filed with the SEC. See Investment Description in this pricing supplement.

Market Measure:	Energy Select Sector SPDR® Fund (Bloomberg ticker symbol XLE)		
Pricing Date:	February 28, 2017		
Issue Date:	March 3, 2017		
Principal Amount:	\$1,000 per security. References in this pricing supplement to a security are to a security with a principal amount of \$1,000.		
Redemption Amount:			
	On the stated maturity date, you will be entitled to receive a cash payment per security in U.S. dollars equal to the redemption amount. The redemption amount per security will equal:		
	• if the ending price is greater than the starting price: the lesser of:		

Edgar Filing: CANADIAN IMPERIAL BANK OF COMMERCE /CAN/ - Form 424B2	
(i) \$1,000 <i>plus</i> :	
(ii) the capped value;	
• if the ending price is less than or equal to the starting price, but greater than or equal to the threshold price: \$1,000; or	
• if the ending price is less than the threshold price: \$1,000 <i>minus</i> :	
If the ending price is less than the threshold price, you will receive at stated maturity less, and up to 85% less, that the principal amount of your securities.	ın
September 3, 2020. If a market disruption event occurs and is continuing on the calculation date, the stated maturity date will be postponed until the later of (i) September 3, 2020 and (ii) three business days after the ending price is determined. See Additional Terms of the Securities Market Disruption Events. The securities are not subject to redemption at the option of Canadian Imperial Bank of Commerce or repayment at the option of any holder of the securities prior to the stated maturity date.	1.

Stated Maturit Date:

to a Cap and Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

Fund Closing Price:	The fund closing price, with respect to the Fund on any trading day, means the product of (i) the closing price one share of the Fund on such trading day and (ii) the adjustment factor applicable to the Fund on such trading day		
Closing Price:	The closing price with respect to a share of the Fund on any trading day means the price, at the scheduled closing time, without regard to after hours or any other trading outside the regular trading session hours, of the share on the principal United States securities exchange registered under the Securities Exchange Act of 1934, as amended, on which the share (or any such other security) is listed or admitted to trading.		
Adjustment Factor:	The adjustment factor means, with respect to one share of the Fund (or one unit of any other security for which a fund closing price must be determined), 1.0, subject to adjustment in the event of certain events affecting the shares of the Fund. See Additional Terms of the Securities Anti-dilution Adjustments Relating to the Fund; Alternate Calculation below.		
Starting Price:	\$71.38, the fund closing price of the Fund on the pricing date.		
Ending Price:	The ending price will be the fund closing price of the Fund on the calculation date.		
Capped Value:	The capped value is 136% of the principal amount per security (\$1,360 per security). As a result of the capped value, the maximum total return at maturity of the securities is 36% of the principal amount.		
Threshold Price:	\$60.673, which is equal to 85% of the starting price.		
Participation Rate:			
	August 27, 2020 or, if such day is not a trading day, the next succeeding trading day. The calculation date is subject to postponement due to the occurrence of a market disruption event. See Additional Terms of the Securities Market Disruption Events.		
Calculation Date:	A trading day means a day, as determined by the calculation agent, on which the relevant stock exchange and each related futures or options exchange with respect to the Fund or any successor thereto, if applicable, are scheduled to be open for trading for their respective regular trading sessions. The relevant stock exchange for the Fund means the primary exchange or quotation system on which shares (or other applicable securities) of the Fund are traded, as determined by the calculation agent. A related futures or options exchange for the Fund means each exchange or quotation system where trading has a material effect (as determined by the calculation agent) on the overall market for futures or options contracts relating to the Fund.		
Calculation Agent:	Canadian Imperial Bank of Commerce. We may appoint a different calculation agent without your consent and without notifying you.		

	All determinations made by the calculation agent will be at the sole discretion of it, and, in the absence of manifest error, will be conclusive for all purposes and binding on us and you. All percentages and other amounts resulting from any calculation with respect to the securities will be rounded at the calculation agent s discretion. The calculation agent will have no liability for its determinations.
Business Day:	A Monday, Tuesday, Wednesday, Thursday or Friday that is neither a legal holiday nor a day on which banking institutions are authorized or obligated by law, regulation or order to close in New York or Toronto.
No Listing:	The securities will not be listed on any securities exchange or quoted on any automated quotation system.

to a Cap and Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

Clearance and The Depository Trust Company (DTC) Settlement: Image: Clearance and Cle			
Material U.S. Tax Consequences:	By purchasing the securities, each holder agrees to treat them as pre-paid cash-settled derivative contracts for U.S. federal income tax purposes. Assuming this treatment is respected, gain or loss recognized on the securities should be treated as long-term capital gain or loss if the holder has held the securities for more than a year. However, if the Internal Revenue Service were successful in asserting an alternative treatment of the securities, the tax consequences of the ownership and disposition of the securities might be materially and adversely affected. As described below under United States Federal Income Tax Considerations, the U.S. Treasury Department and the Internal Revenue Service released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of prepaid forward contracts and similar instruments. Any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, including the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. persons should be subject to withholding tax, possibly with retroactive effect. Both U.S. and non-U.S. persons considering an investment in the securities should review carefully the section of this pricing supplement entitled United States Federal Income Tax Considerations and consult their tax advisers regarding the U.S. federal tax consequences of an investment in the securities (including possible alternative treatments and the issues presented by the notice), as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.		
Agent:	Wells Fargo Securities. The agent may resell the securities to other securities dealers, including securities dealers acting as custodians, at the principal amount of the securities less a concession not in excess of \$20.00 per security. Such securities dealers may include Wells Fargo Advisors (WFA) (the trade name of the retail brokerage business of Wells Fargo Clearing Services, LLC and Wells Fargo Advisors Financial Network, LLC, each an affiliate of Wells Fargo Securities). In addition to the selling concession allowed to WFA, Wells Fargo Securities will pay \$0.75 per security of the underwriting discount to WFA as a distribution expense fee for each security sold by WFA.		
Denominations:	\$1,000 and any integral multiple of \$1,000.

DETERMINING PAYMENT AT MATURITY

On the stated maturity date, you will receive a cash payment per security (the redemption amount) calculated as follows:

to a Cap and Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

HYPOTHETICAL PAYOUT PROFILE

The following profile is based on a capped value of 136.00% or \$1,360.00 per security, a participation rate of 170% and a threshold price equal to 85% of the starting price. This graph has been prepared for purposes of illustration only. Your actual return will depend on the actual ending price and whether you hold your securities to maturity.

to a Cap and Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

RISK FACTORS

The securities have complex features and investing in the securities will involve risks not associated with an investment in conventional debt securities, the Fund, or the Energy Select Sector Index (the underlying index). You should carefully consider the risk factors set forth below as well as the other information contained in this pricing supplement and the accompanying prospectus supplement and prospectus, including the documents they incorporate by reference. As described in more detail below, the value of the securities may vary considerably before the stated maturity date due to events that are difficult to predict and are beyond our control. You should reach an investment decision only after you have carefully considered with your advisors the suitability of an investment in the securities in light of your particular circumstances.

If The Ending Price Is Less Than The Threshold Price, You Will Receive At Maturity Less, And Up To 85% Less, Than The Principal Amount Of Your Securities.

We will not repay you a fixed amount on the securities on the stated maturity date. The redemption amount will depend on the direction of and percentage change in the ending price of the Fund relative to the starting price, the capped value and the other terms of the securities. Because the price of the Fund will be subject to market fluctuations, the redemption amount you receive may be more or less, and possibly significantly less, than the principal amount of your securities.

If the ending price is less than the threshold price, the redemption amount that you receive at stated maturity will be reduced by an amount equal to the decline in the price of the Fund to the extent it is below the threshold price (expressed as a percentage of the starting price). The threshold price is 85% of the starting price. As a result, you may receive less, and up to 85% less, than the principal amount per security at maturity even if the price of the Fund is greater than or equal to the starting price or the threshold price at certain times during the term of the securities.

Even if the ending price is greater than the starting price, the amount you receive at stated maturity may only be slightly greater than the principal amount, and your yield on the securities may be less than the yield you would earn if you bought a traditional interest-bearing debt security of Canadian Imperial Bank of Commerce or another issuer with a similar credit rating with the same stated maturity date.

An Investment Linked To The Shares Of The Fund Is Different From An Investment Linked To The Underlying Index.

The performance of the shares of the Fund may not exactly replicate the performance of the underlying index because the Fund may not invest in all of the securities included in the underlying index and because the price of the Fund will reflect transaction costs and fees that are not included in the calculation of the underlying index. The Fund may also hold securities or derivative financial instruments not included in the underlying index. It is also possible that the Fund may not fully replicate the performance of the underlying index due to the temporary unavailability of

certain securities in the secondary market or due to other extraordinary circumstances. In addition, because the shares of the Fund are traded on a securities exchange and are subject to market supply and investor demand, the value of a share of the Fund may differ from the net asset value per share of the Fund. As a result, the performance of the Fund may not correlate perfectly with the performance of the underlying index, and the return on the securities based on the performance of the Fund will not be the same as the return on securities based on the performance of the underlying index.

Your Return Will Be Limited By The Capped Value And May Be Lower Than The Return On A Direct Investment In The Fund.

The opportunity to participate in the possible increases in the price of the Fund through an investment in the securities will be limited because the redemption amount will not exceed the capped value. Furthermore, the effect of the participation rate will be progressively reduced for all ending prices exceeding the ending price at which the capped value is reached.

Your Return On The Securities Could Be Less Than If You Owned Shares Of The Fund Or The Securities Composing The Underlying Index.

Your return on the securities will not reflect the return you would realize if you actually owned shares of the Fund, the securities held by the Fund, or the securities composing the underlying index. This is in part because the redemption amount payable at stated maturity will be determined by reference only to the closing price of a share of the Fund, without taking into consideration the value of

to a Cap and Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

dividends and other distributions paid on such share or the securities composing the underlying index. In addition, the redemption amount will not be greater than the capped value.

No Periodic Interest Will Be Paid On The Securities.

No periodic interest will be paid on the securities. However, because it is possible that the securities may be classified for U.S. federal income tax purposes as contingent payment debt instruments rather than prepaid forward contracts, you may be required to accrue interest income over the term of your securities. See United States Federal Income Tax Considerations.

The Securities Are Subject To The Credit Risk Of Canadian Imperial Bank of Commerce.

The securities are our obligations exclusively and are not, either directly or indirectly, an obligation of any third party. Any amounts payable under the securities are subject to our creditworthiness, and you will have no ability to pursue the shares of the Fund or any securities held by the Fund for payment. As a result, our actual and perceived creditworthiness and actual or anticipated decreases in our credit ratings may affect the value of the securities and, in the event we were to default on our obligations, you may not receive any amounts owed to you under the terms of the securities.

The Estimated Value Of The Securities Is Not An Indication Of The Price, If Any, At Which Wells Fargo Securities Or Any Other Person May Be Willing To Buy The Securities From You In The Secondary Market.

The price, if any, at which Wells Fargo Securities or any of its affiliates may purchase the securities in the secondary market will be based on Wells Fargo Securities s proprietary pricing models and will fluctuate over the term of the securities as a result of changes in the market and other factors described in the next risk factor. Any such secondary market price for the securities will also be reduced by a bid-offer spread, which may vary depending on the aggregate principal amount of the securities to be purchased in the secondary market transaction, and the expected cost of unwinding any related hedging transactions. Unless the factors described in the next risk factor change significantly in your favor, any such secondary market price for the securities will likely be less than the principal amount.

If Wells Fargo Securities or any of its affiliates makes a secondary market in the securities at any time up to the issue date or during the six-month period following the issue date, the secondary market price offered by Wells Fargo Securities or any of its affiliates will be increased by an amount reflecting a portion of the costs associated with selling, structuring, hedging and issuing the securities that are included in the principal amount. Because this portion of the costs is not fully deducted upon issuance, any secondary market price offered by Wells Fargo Securities or any of its affiliates during this period will be higher than it would be if it were based solely on Wells Fargo Securities s proprietary pricing models less the bid-offer spread and hedging unwind costs described above. The amount of this increase in the secondary market price

will decline steadily to zero over this six-month period. If you hold the securities through an account at Wells Fargo Securities or one of its affiliates, we expect that this increase will also be reflected in the value indicated for the securities on your brokerage account statement. If you hold your securities through an account at a broker-dealer other than Wells Fargo Securities or any of its affiliates, the value of the securities on your brokerage account statement may be different than if you held your securities at Wells Fargo Securities or any of its affiliates.

The Value Of The Securities Prior To Stated Maturity Will Be Affected By Numerous Factors, Some Of Which Are Related In Complex Ways.

The value of the securities prior to stated maturity will be affected by the price of the Fund at that time, interest rates at that time and a number of other factors, some of which are interrelated in complex ways. The effect of any one factor may be offset or magnified by the effect of another factor. The following factors, among others, are expected to affect the value of the securities. When we refer to the value of your security, we mean the value you could receive for your security if you are able to sell it in the open market before the stated maturity date.

• **Fund Performance.** The value of the securities prior to maturity will depend substantially on the price of the Fund. The price at which you may be able to sell the securities before stated maturity may be at a discount, which could be substantial, from their principal amount, if the price of the Fund at such time is less than, equal to or not sufficiently above its starting price.

• **Capped Value.** We anticipate that the value of the securities will always be at a discount to the capped value.

to a Cap and Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

• Interest Rates. The value of the securities may be affected by changes in the interest rates in the U.S. markets.

• Volatility Of The Fund. Volatility is the term used to describe the size and frequency of market fluctuations. The value of the securities may be affected if the volatility of the Fund changes.

• **Time Remaining To Maturity.** The value of the securities at any given time prior to maturity will likely be different from that which would be expected based on the then-current price of the Fund. This difference will most likely reflect a discount due to expectations and uncertainty concerning the price of the Fund during the period of time still remaining to the maturity date. In general, as the time remaining to maturity decreases, the value of the securities will approach the amount that could be payable at maturity based on the then-current price of the Fund.

• **Dividend Yields On Securities Included In The Fund.** The value of the securities may be affected by the dividend yields on securities held by the Fund (the amount of such dividends may influence the closing price of the shares of the Fund).

• Events Involving Companies Whose Securities Are Included In The Fund. General economic conditions and earnings results of the companies whose securities are held by the Fund and real or anticipated changes in those conditions or results may affect the value of the securities. Additionally, as a result of a merger or acquisition, one or more of the securities held by the Fund may be replaced with a surviving or acquiring entity s securities. The surviving or acquiring entity s securities may not have the same characteristics as the securities originally held by the Fund.

• **Our Credit Ratings, Financial Condition And Results Of Operation.** Actual or anticipated changes in our credit ratings, financial condition or results of operation may affect the value of the securities. However, because the return on the securities is dependent upon factors in addition to our ability to pay our obligations under the securities, such as the price of the Fund, an improvement in our credit ratings, financial condition or results of operation will not reduce the other investment risks related to the securities.

You should understand that the impact of one of the factors specified above, such as a change in interest rates, may offset some or all of any change in the value of the securities attributable to another factor, such as a change in the price of the Fund.

Anti-dilution Adjustments Relating To The Shares Of The Fund Do Not Address Every Event That Could Affect Such Shares.

An adjustment factor, as described herein, will be used to determine the ending price of the Fund. The adjustment factor will be adjusted by the calculation agent for certain events affecting the shares of the Fund. However, the calculation agent will not make an adjustment for every event that could affect such shares. If an event occurs that does not require the calculation agent to adjust the adjustment factor, the value of the securities may be adversely affected.

Our Estimated Value Of The Securities Is Lower Than The Principal Amount Of The Securities.

Our estimated value is only an estimate using several factors. The principal amount of the securities exceeds our estimated value because costs associated with selling and structuring the securities, as well as hedging the securities, are included in the principal amount of the securities. See The Estimated Value of the Securities in this pricing supplement.

Our Estimated Value Does Not Represent Future Values Of The Securities And May Differ From Others Estimates.

Our estimated value of the securities was determined by reference to our internal pricing models when the terms of the securities were set. This estimated value was based on market conditions and other relevant factors existing at that time and our assumptions about market parameters, which can include volatility, dividend rates, interest rates and other factors. Different pricing models and assumptions could provide valuations for the securities that are greater than or less than our estimated value. In addition, market conditions and other relevant factors in the future may change, and any assumptions may prove to be incorrect. On future dates, the value of the securities could change significantly based on, among other things, changes in market conditions, our creditworthiness, interest rate movements and other relevant factors, which may impact the price, if any, at which Wells Fargo Securities or any other person would be willing to buy securities from you in secondary market transactions. See The Estimated Value of the Securities in this pricing supplement.

to a Cap and Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

Our Estimated Value Was Not Determined By Reference To Credit Spreads For Our Conventional Fixed-Rate Debt.

The internal funding rate used in the determination of our estimated value generally represents a discount from the credit spreads for our conventional fixed-rate debt. If we were to have used the interest rate implied by our conventional fixed-rate credit spreads, we would expect the economic terms of the securities to be more favorable to you. Consequently, our use of an internal funding rate had an adverse effect on the terms of the securities and could have an adverse effect on any secondary market prices of the securities. See The Estimated Value of the Securities in this pricing supplement.

The Securities Will Not Be Listed On Any Securities Exchange And We Do Not Expect A Trading Market For The Securities To Develop.

The securities will not be listed or displayed on any securities exchange or any automated quotation system. Although Wells Fargo Securities and/or its affiliates may purchase the securities from holders, they are not obligated to do so and are not required to make a market for the securities. There can be no assurance that a secondary market will develop. Because we do not expect that any market makers will participate in a secondary market for the securities, the price at which you may be able to sell your securities is likely to depend on the price, if any, at which Wells Fargo Securities and/or its affiliates are willing to buy your securities.

If a secondary market does exist, it may be limited. Accordingly, there may be a limited number of buyers if you decide to sell your securities prior to stated maturity. This may affect the price you receive upon such sale. Consequently, you should be willing to hold the securities to stated maturity.

Historical Prices Of The Fund Should Not Be Taken As An Indication Of The Future Performance Of The Fund During The Term Of The Securities.

The trading prices of shares of the fund or the securities held by the Fund will determine the redemption amount payable at maturity to you. It is impossible to predict whether the ending price of the Fund will fall or rise compared to its starting price. Trading prices of shares of the Fund or of the securities held by the Fund will be influenced by complex and interrelated political, economic, financial and other factors that can affect the markets in which the Fund and those securities comprising the Fund are traded and the values of the Fund and such securities. Accordingly, any historical prices of the Fund or the securities held by the Fund do not provide an indication of the future performance of the Fund.

An Investment In The Securities Is Subject To Risks Associated With Investing In Stocks In The Energy Sector.

The stocks included in the Energy Select Sector Index and that are generally tracked by the Fund are stocks of companies whose primary business is directly associated with the energy sector, including the following two sub-sectors: oil, gas and consumable fuels; and energy equipment and services. Because the value of the securities is linked to the performance of the Fund, an investment in the securities exposes investors to risks associated with investments in the stocks of companies in the energy sector.

Energy companies develop and produce crude oil and natural gas and/or provide drilling and other energy resources production and distribution related services. Stock prices for these types of companies are mainly affected by the business, financial and operating conditions of the particular company, as well as changes in prices for oil, gas and other types of fuels, which in turn largely depend on supply and demand for various energy products and services. Some of the factors that may influence supply and demand for energy products and services include: general economic conditions and growth rates; weather conditions; the cost of exploring for, producing and delivering oil and gas; technological advances affecting energy efficiency and energy consumption; the ability of the Organization of Petroleum Exporting Countries (OPEC) to set and maintain production levels of oil; currency fluctuations; inflation; natural disasters; civil unrest, acts of sabotage or terrorism; and other regional or global events. The profitability of energy companies may also be adversely affected by existing and future laws, regulations, government actions and other legal requirements relating to protection of the environment, health and safety matters and others that may increase the costs of conducting their business or may reduce or delay available business opportunities. Increased supply or weak demand for energy products and services, as well as various developments leading to higher costs of doing business or missed business opportunities, would adversely impact the performance of companies in the energy sector. The value of the securities may be subject to greater volatility and be more adversely affected by a single economic, political or regulatory occurrence affecting the energy sector or one of the sub-sectors of the energy sector than a different investment linked to a more broadly diversified group of issuers. All of these factors could have an adverse effect on the price of the Fund and, therefore, on the value of the secu

to a Cap and Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

The Fund May Not Be Representative Of An Investment In The Energy Sector.

The Fund does not represent a direct investment in the energy sector. The Fund consists of securities of companies whose primary lines of business are directly associated with the energy sector. As a result, the fund closing price of the Fund will be influenced by a variety of economic, financial and other factors affecting those companies, some of which may be unrelated to the market and other conditions applicable to the U.S. energy sector. As a result, the performance of the Fund may not perfectly correlate with the performance of the energy sector and the fund closing price of the Fund could decrease even if the performance of the energy sector as a whole increases.

Changes That Affect The Fund Or The Underlying Index May Adversely Affect The Value Of The Securities And The Amount You Will Receive At Stated Maturity.

The investment advisor to the Fund, SSgA Funds Management, Inc. (SSgA FM), seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of the underlying index. Pursuant to its investment strategy or otherwise, SSgA FM may add, delete or substitute the stocks composing the Fund. Any of these actions could adversely affect the price of the Fund, and, consequently, the value of the securities. In addition, the publisher of the underlying index is responsible for calculating and maintaining the underlying index. The underlying index publisher may add, delete or substitute the securities composing the underlying index or make other methodological changes required by certain corporate events relating to the securities composing the underlying index. Any of these actions could adversely affect the value of the underlying index, and, consequently, the price of the Fund and the value of the securities.

We Cannot Control Actions By Any Of The Unaffiliated Companies Whose Securities Are Included In The Fund Or The Underlying Index.

Actions by any company whose securities are included in the Fund or the underlying index may have an adverse effect on the price of its security, the ending price and the value of the securities. These companies will not be involved in the offering of the securities and will have no obligations with respect to the securities, including any obligation to take our or your interests into consideration for any reason. These companies will not be responsible for, and will not have participated in, the determination of the timing of, prices for, or quantities of, the securities to be issued. These companies will not be involved with the administration, marketing or trading of the securities and will have no obligations with respect to the redemption amount to be paid to you at maturity.

We, Wells Fargo Securities, And Our Respective Affiliates Have No Affiliation With The Sponsor Of The Fund Or The Publisher Of The Underlying Index And Have Not Independently Verified Their Public Disclosure Of Information.

We, Wells Fargo Securities, and our respective affiliates are not affiliated in any way with the Fund sponsor or the publisher of the underlying index and have no ability to control or predict their actions, including any errors in or discontinuation of disclosure regarding the methods or policies relating to the management or calculation of the Fund or the underlying index. We have derived the information about the Fund sponsor, the Fund, the publisher of the underlying index and the underlying index contained herein from publicly available information, without independent verification. You, as an investor in the securities, should make your own investigation into the Fund, the underlying index and the sponsors. The sponsors are not involved in the offering of the securities made hereby in any way and have no obligation to consider your interest as an owner of securities in taking any actions that might affect the value of the securities.

You Will Not Have Any Shareholder Rights With Respect To The Shares Of The Fund.

You will not become a holder of shares of the Fund or a holder of securities included in the underlying index as a result of owning a security. You will not have any voting rights, any right to receive dividends or other distributions or any other rights with respect to such shares or securities. You will have no right to receive delivery of any shares or securities at stated maturity or upon automatic call.

The Stated Maturity Date May Be Postponed In Certain Circumstances.

The determination of the ending price will be postponed if the originally scheduled calculation day is not a trading day or if the calculation agent determines that a market disruption event has occurred or is continuing on that day. If such a postponement occurs, the stated maturity date will be postponed until the later of (i) three business days after the ending price is determined and (ii) the initial stated maturity date.

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

We Or One Of Our Affiliates Will Be The Calculation Agent And, As A Result, Potential Conflicts Of Interest Could Arise.

We or one of our affiliates will be the calculation agent for purposes of determining, among other things, the starting price and the ending price, calculating the redemption amount, determining whether adjustments should be made to the ending price, determining whether a market disruption event has occurred and, if publication of the Fund is discontinued, selecting a successor fund or, if no successor fund is available, determining the closing price and determining whether to adjust the closing price on the calculation date in the event of certain changes in or modifications to the Fund or the underlying index. Although the calculation agent will exercise its judgment in good faith when performing its functions, potential conflicts of interest may exist between the calculation agent and you.

Our Economic Interests And Those Of Any Dealer Participating In The Offering Of Securities Will Potentially Be Adverse To Your Interests.

You should be aware of the following ways in which our economic interests and those of any dealer participating in the distribution of the securities, which we refer to as a participating dealer, will potentially be adverse to your interests as an investor in the securities. In engaging in certain of the activities described below, our affiliates or any participating dealer or its affiliates may take actions that may adversely affect the value of and your return on the securities, and in so doing they will have no obligation to consider your interests as an investor in the securities. Our affiliates or any participating dealer or its affiliates even if investors do not receive a favorable investment return on the securities.

• Research reports by our affiliates or any participating dealer or its affiliates may be inconsistent with an investment in the securities and may adversely affect the price of the Fund. Our affiliates or any dealer participating in the offering of the securities or its affiliates may, at present or in the future, publish research reports on the Fund or the underlying index or the companies whose securities are included in the Fund or the underlying index. This research will be modified from time to time without notice and may, at present or in the future, express opinions or provide recommendations that are inconsistent with purchasing or holding the securities. Any research reports on the Fund or the underlying index or the companies whose securities are included in the Fund or the underlying index could adversely affect the price of the Fund and, therefore, adversely affect the value of and your return on the securities. You are encouraged to derive information concerning the Fund and the underlying index from multiple sources and should not rely on the views expressed by us or our affiliates or any participating dealer or its affiliates. In addition, any research reports on the Fund or the underlying index or the companies whose securities date could result in an increase in the price of the Fund or the underlying index or the companies whose here or the companies whose securities are included in the Fund or the underlying index from multiple sources and should not rely on the views expressed by us or our affiliates or any participating dealer or its affiliates. In addition, any research reports on the Fund or the underlying index or the companies whose securities are included in the Fund or the underlying index published on or prior to the pricing date could result in an increase in the price of the Fund on the price of the Fund on the price of the Fund or the underlying index published on or prior to the price by increasing the price at which the Fund must close on the calculation date in order for inves

• Business activities of our affiliates or any participating dealer or its affiliates with the companies whose securities are included in the Fund may adversely affect the price of the Fund. Our affiliates or any participating dealer or its affiliates may, at present or in the future, engage in business with the companies whose securities are included in the Fund or the underlying index, including making loans to those companies (including exercising creditors remedies with respect to such loans), making equity investments in those companies or providing investment banking, asset management or other advisory services to those companies. These business activities could adversely affect the price of the Fund and, therefore, adversely affect the value of and your return on the securities. In addition, in the course of these business activities, our affiliates or any participating dealer or its affiliates may acquire non-public information about one or more of the companies whose securities are included in the Fund or the underlying index. If our affiliates or any participating dealer or its affiliates do acquire such non-public information, we and they are not obligated to disclose such non-public information to you.

• Hedging activities by our affiliates or any participating dealer or its affiliates may adversely affect the price of the Fund. We expect to hedge our obligations under the securities through one or more hedge counterparties, which may include our affiliates or any participating dealer or its affiliates. Pursuant to such hedging activities, our hedge counterparty may acquire shares of the Fund or securities included in the Fund or the underlying index or listed or over-the-counter derivative or synthetic instruments related to the Fund or such securities. Depending on, among other things, future market conditions, the aggregate amount and the composition of such positions are likely to vary over time. To the extent that our hedge counterparty has a long hedge position in shares of the Fund or in any of the securities included in the Fund or the underlying index, or derivative or synthetic instruments related to the Fund or synthetic instruments related to the Fund or synthetic instruments related to the Fund or in any of the securities, they may liquidate a portion of such holdings at or about the time of the calculation date or at or about the time of a change in the

to a Cap and Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

securities included in the Fund or the underlying index. These hedging activities could potentially adversely affect the price of the shares of the Fund and, therefore, adversely affect the value of and your return on the securities.

• Trading activities by our affiliates or any participating dealer or its affiliates may adversely affect the price of the Fund. Our affiliates or any participating dealer or its affiliates may engage in trading in shares of the Fund or the securities included in the Fund or the underlying index and other instruments relating to the Fund or such securities on a regular basis as part of their general broker-dealer and other businesses. Any of these trading activities could potentially adversely affect the price of the shares of the Fund and, therefore, adversely affect the value of and your return on the securities.

• A participating dealer or its affiliates may realize hedging profits projected by its proprietary pricing models in addition to any selling concession or any distribution expense fee, creating a further incentive for the participating dealer to sell the securities to you. If any participating dealer or any of its affiliates conducts hedging activities for us in connection with the securities, that participating dealer or its affiliates will expect to realize a projected profit from such hedging activities, and this projected profit will be in addition to any concession or distribution expense fee that the participating dealer receives for the sale of the securities to you. This additional projected profit may create a further incentive for the participating dealer to sell the securities to you.

The U.S. Federal Tax Consequences Of An Investment In The Securities Are Unclear.

There is no direct legal authority regarding the proper U.S. federal tax treatment of the securities, and we do not plan to request a ruling from the Internal Revenue Service. Consequently, significant aspects of the tax treatment of the securities are uncertain, and the Internal Revenue Service or a court might not agree with the treatment of the securities as pre-paid cash-settled derivative contracts. If the Internal Revenue Service were successful in asserting an alternative treatment of the securities, the tax consequences of the ownership and disposition of the securities might be materially and adversely affected. As described below under United States Federal Income Tax Considerations, the U.S. Treasury Department and the Internal Revenue Service released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of prepaid forward contracts and similar instruments. Any Treasury regulations or other guidance promulgated after consideration of these issues

could materially and adversely affect the tax consequences of an investment in the securities, including the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. persons should be subject to withholding tax, possibly with retroactive effect.

Furthermore, Section 871(m) of the Internal Revenue Code imposes a withholding tax of up to 30% on dividend equivalents paid to non-U.S. investors in respect of certain financial instruments linked to U.S. equities. In light of an IRS notice providing a general exemption for non-delta-one financial instruments issued in 2017, as of the date of this pricing supplement the securities should not be subject to withholding under Section 871(m). However, the IRS could challenge this conclusion.

Both U.S. and non-U.S. persons considering an investment in the securities should review carefully the section of this pricing supplement entitled United States Federal Income Tax Considerations and consult their tax advisers regarding the U.S. federal tax consequences of an investment in the securities (including possible alternative treatments and the issues presented by the notice), as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

There Can Be No Assurance That The Canadian Federal Income Tax Consequences Of An Investment In The Securities Will Not Change In The Future.

There can be no assurance that Canadian federal income tax laws, the judicial interpretation thereof, or the administrative policies and assessing practices of the Canada Revenue Agency will not be changed in a manner that adversely affects investors. For a discussion of the Canadian federal income tax consequences of investing in the securities, please read the section entitled Certain Canadian Federal Income Tax Considerations in this pricing supplement as well as the section entitled Certain Income Tax Consequences Certain Canadian Income Tax Considerations in the accompanying prospectus supplement dated April 30, 2015. You should consult your tax advisor with respect to your own particular situation.

HYPOTHETICAL RETURNS

The following table illustrates, for a capped value of 136.00% or \$1,360.00 per security, a starting price of \$71.38, a participation rate of 170%, a term to maturity of approximately 3.5 years and a range of hypothetical ending prices of the Fund:

- the hypothetical percentage change from the starting price to the hypothetical ending price;
- the hypothetical redemption amount payable at stated maturity per security;
- the hypothetical total pre-tax rate of return; and
- the hypothetical pre-tax annualized rate of return.

Hypothetical

	Percentage Change	Hypothetical Redemption	Hypothetical	Hypothetical
Hypothetical	From the Starting	Amount Payable At	Pre-Tax	Pre-Tax
Ending	Price to the	Stated Maturity Per	Total Rate	Annualized Rate
Price	Hypothetical Ending Price	Security	of Return	of Return(1)
\$124.92	75.00%	\$1,360.00	36.00%	8.96%
\$107.07	50.00%	\$1,360.00	36.00%	8.96%
\$96.36	35.00%	\$1,360.00	36.00%	8.96%
\$92.79	30.00%	\$1,360.00	36.00%	8.96%
\$85.66	20.00%	\$1,340.00	34.00%	8.52%
\$78.52	10.00%	\$1,170.00	17.00%	4.53%
\$74.95	5.00%	\$1,085.00	8.50%	2.34%
\$71.38(2)	0.00%	\$1,000.00	0.00%	0.00%

\$67.81	-5.00%	\$1,000.00	0.00%	0.00%
\$64.24	-10.00%	\$1,000.00	0.00%	0.00%
\$60.67	-15.00%	\$1,000.00	0.00%	0.00%
\$57.10	-20.00%	\$950.00	-5.00%	-1.46%
\$53.54	-25.00%	\$900.00	-10.00%	-2.98%
\$35.69	-50.00%	\$650.00	-35.00%	-11.91%
\$17.85	-75.00%	\$400.00	-60.00%	-24.49%
\$0.00	-100.00%	\$150.00	-85.00%	-47.40%

(1) The annualized rates of return are calculated on a semi-annual bond equivalent basis with compounding.

(2) The starting price.

The above figures are for purposes of illustration only and may have been rounded for ease of analysis. The actual amount you receive at stated maturity and the resulting pre-tax rates of return will depend on the actual ending price.

to a Cap and Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

HYPOTHETICAL PAYMENTS AT STATED MATURITY

Set forth below are four examples of payment at stated maturity calculations (rounded to two decimal places), reflecting a capped value of 136.00% or \$1,360.00 per security, a starting price of \$71.38, a participation rate of 170% and assuming hypothetical ending prices as indicated in the examples.

Example 1. Redemption amount is greater than the principal amount but less than the capped value:

Hypothetical ending price: \$74.95

Since the hypothetical ending price is greater than the starting price, the redemption amount would equal:

On the stated maturity date you would receive \$1,085.00 per security.

Example 2. Redemption amount is equal to the capped value:

Hypothetical ending price: \$107.07

The redemption amount would be equal to the capped value since the capped value is less than:

On the stated maturity date you would receive \$1,360.00 per security.

In addition to limiting your return on the securities, the capped value limits the positive effect of the participation rate. If the ending price is greater than the starting price, you will participate in the performance of the Fund at a rate of 170% up to a certain point. However, the effect of the participation rate will be progressively reduced for ending prices that are greater than approximately 121.18% of the starting price since your return on the securities for any ending price greater than approximately 121.18% of the starting price value.

Example 3. Redemption amount is equal to the principal amount:

Hypothetical ending price: \$67.81

Threshold price: \$60.673, which is 85% of the starting price

Since the hypothetical ending price is less than the starting price, but not by more than 15%, you would not lose any of the principal amount of your securities.

On the stated maturity date you would receive \$1,000.00 per security.

Example 4. Redemption amount is less than the principal amount:

Hypothetical ending price: \$35.69

Threshold price: \$60.673, which is 85% of the starting price

to a Cap and Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

Since the hypothetical ending price is less than the starting price by more than 15%, you would lose a portion of the principal amount of your securities and receive the redemption amount equal to:

On the stated maturity date you would receive \$650.00 per security.

To the extent that the actual ending price differs from the values assumed above, the results indicated above would be different.

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

ADDITIONAL TERMS OF THE SECURITIES

Canadian Imperial Bank of Commerce will issue the securities as part of a series of senior unsecured debt securities entitled Senior Global Medium-Term Notes (Structured Notes), which is more fully described in the accompanying prospectus supplement and prospectus. Information included in this pricing supplement supersedes information in the prospectus supplement and prospectus to the extent that it is different from that information.

Payment of Redemption Amount

In the event that the stated maturity date is not a business day, then the redemption amount will be paid on the next business day (Following Business Day Convention).

Market Disruption Events

If a market disruption event occurs or is continuing on the calculation date, then the calculation date will be postponed to the first succeeding trading day on which a market disruption event has not occurred and is not continuing; however, if such first succeeding trading day has not occurred as of the eighth trading day after the originally scheduled calculation date, that eighth trading day shall be deemed to be the calculation date. If the calculation date has been postponed eight trading days after the originally scheduled calculation date, that eighth trading day shall be deemed to be the calculation event occurs or is continuing with respect to the Fund on such eighth trading day, the calculation agent will determine the closing price of the Fund on such eighth trading day based on its good faith estimate of the value of the shares (or other applicable securities) of the Fund as of the close of trading on such eighth trading day. No interest will accrue as a result of delayed payment.

A market disruption event means any of the following events as determined by the calculation agent in its sole discretion:

(A) the occurrence or existence of a material suspension of or limitation imposed on trading by the relevant stock exchange or otherwise relating to the shares (or other applicable securities) of the Fund or any successor fund on the relevant stock exchange at any time during the one-hour period that ends at the close of trading on such day, whether by reason of movements in price exceeding limits permitted by such relevant stock exchange or otherwise;

(B) the occurrence or existence of a material suspension of or limitation imposed on trading by any related futures or options exchange or otherwise in futures or options contracts relating to the shares (or other applicable securities) of the Fund or any successor fund on any related futures or options exchange at any time during the one-hour period that ends at the close of trading on that day, whether by reason of movements in price exceeding limits permitted by the related futures or options exchange or otherwise;

(C) the occurrence or existence of any event, other than an early closure, that materially disrupts or impairs the ability of market participants in general to effect transactions in, or obtain market values for, shares (or other applicable securities) of the Fund or any successor fund on the relevant stock exchange at any time during the one-hour period that ends at the close of trading on that day;

(D) the occurrence or existence of any event, other than an early closure, that materially disrupts or impairs the ability of market participants in general to effect transactions in, or obtain market values for, futures or options contracts relating to shares (or other applicable securities) of the Fund or any successor fund on any related futures or options exchange at any time during the one-hour period that ends at the close of trading on that day;

(E) the closure of the relevant stock exchange or any related futures or options exchange with respect to the Fund or any successor fund prior to its scheduled closing time unless the earlier closing time is announced by the relevant stock exchange or related futures or options exchange, as applicable, at least one hour prior to the earlier of (1) the actual closing time for the regular trading session on such relevant stock exchange or related futures or options exchange or related futures or options exchange or related futures or options exchange, as applicable, and (2) the submission deadline for orders to be entered into the relevant stock exchange or related futures or options exchange, as applicable, system for execution at the close of trading on that day;

(F) the relevant stock exchange or any related futures or options exchange with respect to the Fund or any successor fund fails to open for trading during its regular trading session; or

(E) any other event, if the calculation agent determines that the event interferes with our ability or the ability of any of our affiliates to unwind all or a portion of a hedge with respect to the securities that we or our affiliates have effected or may effect as described below under Use of Proceeds and Hedging in this pricing supplement.

to a Cap and Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

For purposes of determining whether a market disruption event has occurred:

(1) close of trading means the scheduled closing time of the relevant stock exchange with respect to the Fund or any successor fund; and

(2) the scheduled closing time of the relevant stock exchange or any related futures or options exchange on any trading day for the Fund or any successor fund means the scheduled weekday closing time of such relevant stock exchange or related futures or options exchange on such trading day, without regard to after hours or any other trading outside the regular trading session hours.

Anti-dilution Adjustments Relating to the Fund; Alternate Calculation

Anti-dilution Adjustments

The calculation agent will adjust the adjustment factor as specified below if any of the events specified below occurs with respect to the Fund and the effective date or ex-dividend date, as applicable, for such event is after the pricing date and on or prior to the calculation date.

The adjustments specified below do not cover all events that could affect the Fund, and there may be other events that could affect the Fund for which the calculation agent will not make any such adjustments, including, without limitation, an ordinary cash dividend. Nevertheless, the calculation agent may, in its sole discretion, make additional adjustments to any terms of the securities upon the occurrence of other events that affect or could potentially affect the market price of, or shareholder rights in, the Fund, with a view to offsetting, to the extent practical, any such change, and preserving the relative investment risks of the securities. In addition, the calculation agent may, in its sole discretion, make adjustments or a series of adjustments that differ from those described herein if the calculation agent determines that such adjustment risks of the securities. All determinations made by the calculation agent in making any adjustments to the terms of the securities, including adjustments that are in addition to, or that differ from, those described in this pricing supplement, will be made in good faith and a commercially reasonable manner, with the aim of ensuring an equitable result. In determining whether to make any adjustment to the terms of the securities, the calculation agent may consider any adjustment made by the Options Clearing Corporation or any other equity derivatives clearing organization on options contracts on the Fund.

For any event described below, the calculation agent will not be required to adjust the adjustment factor unless the adjustment would result in a change to the adjustment factor then in effect of at least 0.10%. The adjustment factor resulting from any adjustment will be rounded up or down, as appropriate, to the nearest one-hundred thousandth.

(A) Stock Splits and Reverse Stock Splits

If a stock split or reverse stock split has occurred, then once such split has become effective, the adjustment factor will be adjusted to equal the *product* of the prior adjustment factor and the number of securities which a holder of one share (or other applicable security) of the Fund before the effective date of such stock split or reverse stock split would have owned or been entitled to receive immediately following the applicable effective date.

(B) Stock Dividends

If a dividend or distribution of shares (or other applicable securities) to which the securities are linked has been made by the Fund ratably to all holders of record of such shares (or other applicable security), then the adjustment factor will be adjusted on the ex-dividend date to equal the prior adjustment factor plus the *product* of the prior adjustment factor and the number of shares (or other applicable security) of the Fund which a holder of one share (or other applicable security) of the Fund before the ex-dividend date would have owned or been entitled to receive immediately following that date; provided, however, that no adjustment will be made for a distribution for which the number of securities of the Fund paid or distributed is based on a fixed cash equivalent value.

(C) *Extraordinary Dividends*

If an extraordinary dividend (as defined below) has occurred, then the adjustment factor will be adjusted on the ex-dividend date to equal the *product* of the prior adjustment factor and a fraction, the numerator of which is the closing price per share (or other applicable security) of the Fund on the trading day preceding the ex-dividend date, and the denominator of which is the amount by

to a Cap and Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

which the closing price per share (or other applicable security) of the Fund on the trading day preceding the ex-dividend date exceeds the extraordinary dividend amount (as defined below).

For purposes of determining whether an extraordinary dividend has occurred:

(1) extraordinary dividend means any cash dividend or distribution (or portion thereof) that the calculation agent determines, in its sole discretion, is extraordinary or special; and

(2) extraordinary dividend amount with respect to an extraordinary dividend for the securities of the Fund will equal the amount per share (or other applicable security) of the Fund of the applicable cash dividend or distribution that is attributable to the extraordinary dividend, as determined by the calculation agent in its sole discretion.

A distribution on the securities of the Fund described below under the section entitled Reorganization Events below that also constitutes an extraordinary dividend will only cause an adjustment pursuant to that Reorganization Events section.

(D) Other Distributions

If the Fund declares or makes a distribution to all holders of the shares (or other applicable security) of the Fund of any non-cash assets, excluding dividends or distributions described under the section entitled Stock Dividends above, then the calculation agent may, in its sole discretion, make such adjustment (if any) to the adjustment factor as it deems appropriate in the circumstances. If the calculation agent determines to make an adjustment pursuant to this paragraph, it will do so with a view to offsetting, to the extent practical, any change in the economic position of a holder of the securities that results solely from the applicable event.

(E) *Reorganization Events*

If the Fund, or any successor fund, is subject to a merger, combination, consolidation or statutory exchange of securities with another exchange traded fund, and the Fund is not the surviving entity (a reorganization event), then, on or after the date of such event, the calculation agent shall, in its sole discretion, make an adjustment to the adjustment factor or the method of determining the payment at stated maturity or any other

terms of the securities as the calculation agent determines appropriate to account for the economic effect on the securities of such event, and determine the effective date of that adjustment. If the calculation agent determines that no adjustment that it could make will produce a commercially reasonable result, then the calculation agent may deem such event a liquidation event (as defined below).

Liquidation Events

If the Fund is de-listed, liquidated or otherwise terminated (a liquidation event), and a successor or substitute exchange traded fund exists that the calculation agent determines, in its sole discretion, to be comparable to the Fund, then, upon the calculation agent s notification of that determination to the trustee and the Bank, any subsequent fund closing price for the Fund will be determined by reference to the fund closing price of such successor or substitute exchange traded fund (such exchange traded fund being referred to herein as a successor fund), with such adjustments as the calculation agent determines are appropriate to account for the economic effect of such substitution on holders of the securities.

If the Fund undergoes a liquidation event prior to, and such liquidation event is continuing on, the date that any fund closing price of the Fund is to be determined and the calculation agent determines that no successor fund is available at such time, then the calculation agent will, in its discretion, calculate the fund closing price for the Fund on such date by a computation methodology that the calculation agent determines will as closely as reasonably possible replicate the Fund, provided that if the calculation agent determines in its discretion that it is not practicable to replicate the Fund (including but not limited to the instance in which the underlying index sponsor discontinues publication of the underlying index), then the calculation agent will calculate the fund closing price for the Fund in accordance with the formula last used to calculate such fund closing price before such liquidation event, but using only those securities that were held by the Fund immediately prior to such liquidation event without any rebalancing or substitution of such securities following such liquidation event.

If a successor fund is selected or the calculation agent calculates the fund closing price as a substitute for the Fund, such successor fund or fund closing price will be used as a substitute for the Fund for all purposes, including for purposes of determining whether a market disruption event exists. Notwithstanding these alternative arrangements, a liquidation event with respect to the Fund may adversely affect the value of the securities.

to a Cap and Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

If any event is both a reorganization event and a liquidation event, such event will be treated as a reorganization event for purposes of the securities unless the calculation agent makes the determination referenced in the last sentence of the section entitled Anti-dilution Adjustments Reorganization Events above.

Alternate Calculation

If at any time the method of calculating the Fund or a successor fund, or the underlying index, is changed in a material respect, or if the Fund or a successor fund is in any other way modified so that the Fund does not, in the opinion of the calculation agent, fairly represent the price of the securities of the Fund or such successor fund had such changes or modifications not been made, then the calculation agent may, at the close of business in New York City on the date that any fund closing price is to be determined, make such calculations and adjustments as, in the good faith judgment of the calculation agent, may be necessary in order to arrive at a closing price of the Fund comparable to the Fund or such successor fund, as the case may be, as if such changes or modifications had not been made, and calculate the fund closing price and the payment at stated maturity and determine whether the securities are automatically called on any call date with reference to such adjusted closing price of the Fund or such successor fund, as applicable.

Calculation Agent

We or one of our affiliates will act as calculation agent for the securities and may appoint agents to assist it in the performance of its duties. See Risk Factors We Or One Of Our Affiliates Will Be The Calculation Agent And, As A Result, Potential Conflicts Of Interest Could Arise. We may appoint a different calculation agent without your consent and without notifying you.

The calculation agent will determine the redemption amount you receive at stated maturity. In addition, the calculation agent will, among other things:

- determine whether a market disruption event has occurred;
- determine if adjustments are required to the fund closing price of the Fund under various circumstances; and

• if the Fund undergoes a liquidation event, select a successor fund (as defined above) or, if no successor fund is available, determine the fund closing price.

All determinations made by the calculation agent will be at the sole discretion of the calculation agent and, in the absence of manifest error, will be conclusive for all purposes and binding on us and you. All percentages and other amounts resulting from any calculation with respect to the securities will be rounded at the calculation agent s discretion. The calculation agent will have no liability for its determinations.

Appointment of Independent Calculation Experts

If a calculation or valuation described above under Additional Terms of the Securities Market Disruption Events or Additional Terms of the Securities Liquidation Events contemplated to be made by the calculation agent involves the application of material discretion and is not based on information or calculation methodologies compiled or utilized by, or derived from, independent third party sources, we will appoint one or more calculation experts to confirm such calculation or valuation. Such calculation experts will be independent from us and active participants in the financial markets in the relevant jurisdiction in which futures or options contracts on the shares of the Fund are traded. Calculation experts will not assume any obligation or duty to, or any relationship of agency or trust for or with, the holders of the securities or us. Holders of the securities will entitled to rely on any valuation or calculations made by such calculation experts and such valuations or calculation experts will not be responsible for good faith errors or omissions in the making of any such valuations or calculation. Calculation experts may, with the consent of us, delegate any of their obligations and functions to a third party as they deem appropriate, but acting honestly and reasonably at all times. The valuations and calculations of calculation experts will be made available to the holders of the securities upon request.

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

Events of Default and Acceleration

If the securities have become immediately due and payable following an event of default (as defined in the section Description of Senior Debt Securities Events of Default in the accompanying prospectus) with respect to the securities, the amount payable on the securities will be equal to the redemption amount, calculated as though the date of acceleration were the calculation date.

If the securities have become immediately due and payable following an event of default, you will not be entitled to any payments with respect to the securities in addition to the redemption amount, calculated as set forth in the preceding paragraph. For more information, see Description of Senior Debt Securities Events of Default beginning on page 9 of the accompanying prospectus.

Withholding

We or the applicable paying agent will deduct or withhold from a payment on a security any present or future tax, duty, assessment or other governmental charge that we determine is required by law or the interpretation or administration thereof to be deducted or withheld. Payments on a security will not be increased by any amount to offset such deduction or withholding.

THE ENERGY SELECT SECTOR SPDR® FUND

All disclosures contained in this pricing supplement regarding the Fund or the underlying index have been derived from publicly available information without independent verification. This information reflects the policies of, and is subject to change by, the Select Sector SPDR® Trust (the Trust), a registered investment company, and SSgA Funds Management, Inc. (SSgA FM). The Fund is an exchange-traded fund managed by the Trust. Information provided to or filed with the SEC by the Trust pursuant to the Securities Act of 1933 and the Investment Company Act of 1940 can be located by reference to SEC file numbers 333-57791 and 811-08837, respectively, through the SEC s website at www.sec.gov. For additional information regarding the Trust or the Fund, please see the Fund s prospectus. In addition, information may be obtained from other sources including, but not limited to, press releases, newspaper articles, other publicly disseminated documents and the Trust website at http://www.sectorspdrs.com. None of us, the calculation agent, or Wells Fargo Securities makes any representation that such publicly available documents or any other publicly available information regarding the Fund is accurate or complete.

General

The Fund is an investment portfolio managed by SSgA FM, the investment adviser to the Fund. The Fund is an exchange-traded fund that trades on the NYSE Arca, Inc. under the ticker symbol XLE.

The Trust is a registered investment company that consists of nine separate investment portfolios (each, a Select Sector SPDR® Fund), including the Fund. Each Select Sector SPDR® Fund is an index fund that invests in a particular sector or group of industries represented by a specified Select Sector Index (as defined below). The companies included in each Select Sector Index are selected on the basis of general industry classifications from a universe of companies defined by the S&P 500® Index. The Select Sector Indices upon which the Select Sector SPDR® Funds are based together comprise all of the companies in the S&P 500® Index. The investment objective of each Select Sector SPDR® Fund is to provide investment results that, before expenses, correspond generally to the price and yield performance of publicly traded equity securities of companies in a particular sector or group of industries, as represented by a specified market sector index. It is possible that this fund may not fully replicate the performance of the underlying index due to the temporary unavailability of certain securities in the secondary market or due to other extraordinary circumstances.

Investment Objective

The Fund seeks to provide investment results that, before expenses, correspond generally to the price and yield performance of publicly traded equity securities of companies in the oil, gas & consumable fuels and energy equipment & services industries, as represented by the underlying index. For more information about the underlying index, please see The Energy Select Sector Index below.

Holdings Information

As of February 28, 2017, the Fund included 38 securities. The following table summarizes the Fund s top holdings in individual securities as of that date.

Top Holdings in Individual Securities as of February 28, 2017

Security	Percentage of Total Holdings
Exxon Mobil Corp	16.25%
Chevron Corp	15.49%
Schlumberger NV	8.33%
Pioneer Natural Resources Company	5.11%
EOG Resources Inc.	4.87%
Halliburton Company	3.95%
Occidental Petroleum Corporation	3.12%
ConocoPhillips	3.11%
Valero Energy Corporation	3.07%
Anadarko Petroleum Corporation	3.01%

The information above was compiled from the Trust website, without independent verification. Information contained in the Trust website is not incorporated by reference in, and should not be considered a part of, this document.

Replication

The Fund employs a replication strategy in seeking to track the performance of the underlying index, which means that the Fund typically invests in substantially all of the securities represented in such index in approximately the same proportions as such index. Under normal market conditions, the Fund generally invests substantially all, but at least 95%, of its total assets in the securities comprising such index. The Fund will provide shareholders with at least 60 days notice prior to any material change in this 95% investment policy. In addition, the Fund may invest in cash and cash equivalents or money market instruments, such as repurchase agreements and money market funds (including money market funds advised by SSgA FM). The Board of Trustees of the Trust may change the Fund s investment strategy and certain other policies without shareholder approval.

There may, however, be instances where SSgA FM will utilize a sampling strategy. Sampling means that SSgA FM will use quantitative analysis to select securities, including securities in the Energy Select Sector Index, outside of the underlying index and derivatives, that have a similar investment profile as the underlying index in terms of key risk factors, performance attributes and other characteristics. These include industry weightings, market capitalization, and other financial characteristics of securities.

Correlation

The underlying index is a theoretical financial calculation, while the Fund is an actual investment portfolio. The performance of the Fund s return may not match or achieve a high degree of correlation with the return of the underlying index due to operating expenses, transaction costs, cash flows, regulatory requirements and operational inefficiencies.

Disclaimer

The Energy Select Sector Index

We have derived all information contained in this document regarding the Energy Select Sector Index, including, without limitation, its make-up, method of calculation and changes in its components, from publicly available information, without independent verification. This information reflects the policies of, and is subject to change by, S&P Dow Jones Indices LLC.

In July 2012, McGraw-Hill, the owner of the S&P Indices business, and CME Group Inc. (CME Group), the 90% owner of the CME Group and Dow Jones & Company, Inc. joint venture that owns the Dow Jones Indexes business, formed a new joint venture, S&P Dow Jones Indices LLC, which owns the S&P Indices business and the Dow Jones Indexes business, including the Select Sector Indices.

The constituents included in the Select Sector Indices are selected by the Index Compilation Agent in consultation with S&P Dow Jones Indices LLC from the universe of companies represented by the S&P 500® Index. The composition and weighting of the components included in the Select Sector Indices can be expected to differ from the composition and weighting of components included in any similar S&P 500® sector index that is published and disseminated by S&P Dow Jones Indices LLC. S&P Dow Jones Indices LLC acts as the index calculation agent in connection with the calculation and dissemination of the Select Sector Indices. S&P Dow Jones Indices LLC s only relationship to the Index Compilation Agent is the licensing of certain trademarks and trade names of S&P and of the S&P 500® Index which is determined, composed and calculated by S&P Dow Jones Indices LLC without regard to the Index Compilation Agent.

The Energy Select Sector Index is a modified market capitalization-based index, intended to provide an indication of the pattern of common stock price movements of companies that are components of the S&P 500® Index and are involved in the development or production of energy products. Companies in the Energy Select Sector Index develop and produce crude oil and natural gas and provide drilling and other energy related services. The Energy Select Sector Index is one of the eleven Select Sector sub-indices of the S&P 500® Index, each of which we refer to as a Select Sector Index.

Principal at Risk Securities Linked to the Energy Select Sector SPDR® Fund due September 3, 2020

Construction and Maintenance

The Select Sector Indices are developed, maintained and calculated in accordance with the following criteria:

• Each of the component stocks in the Select Sector Indices (the Component Stocks) is a constituent company of the S&P 500 Index.

• Each stock in the S&P 500® Index is allocated to at least one of the Select Sector Indices.

• S&P Dow Jones Indices, LLC assigns index constituents to a Select Sector Index based on the constituent s classification under the Global Industry Classification Standard (GICS®).

• The Select Sector Indices are calculated using the same methodology utilized by S&P Dow Jones Indices LLC in calculating the S&P 500® Index. The daily calculation of a Select Sector Index is computed by dividing the total market value of the companies in that Select Sector Index by a number called the index divisor.

• The Select Sector Indices are calculated using a modified market capitalization methodology subject to a capping methodology that implements Internal Revenue Code diversification requirements that are applicable to exchange-traded funds. For reweighting purposes, the Select Sector Indices are rebalanced quarterly after the close of business on the second to last calculation day of March, June, September and December using the following procedures:

1. The rebalancing reference date is two business days prior to the last calculation day of March, June, September and December.

2. With prices reflected on the rebalancing reference date, and membership, shares outstanding, AWF (capping factor) and IWFs as of the rebalancing effective date, each company is weighted using the modified market capitalization methodology. Modifications are made as defined below.

3. The Select Sector Indices are first evaluated based on their companies modified market capitalization weights to ensure none of the indices breach the maximum allowable limits defined in rules 4 and 7 below. If a Select Sector Index breaches any of the allowable limits, the companies are reweighted based on their float-adjusted market capitalization weights calculated using the prices as of the rebalancing reference date, and membership, shares outstanding and IWF s as of the rebalancing effective date.

4. If any company has a weight greater than 24%, that company has its float-adjusted market capitalization weight capped at 23%. The cap is set to 23% to allow for a 2% buffer. This buffer is needed to ensure that no company exceeds 25% as of the quarter end diversification requirement date.

5. All excess weight is equally redistributed to all uncapped companies within the relevant Select Sector Capped Index.

6. After this redistribution, if the float-adjusted market capitalization weight of any other company then breaches 23%, the process is repeated iteratively until no company breaches the 23% weight cap.

7. The sum of the companies with weight greater than 4.8% cannot exceed 50% of the total index weight. These caps are set to allow for a buffer below the 5% limit.

8. If the rule in step 7 is breached, all the companies are ranked in descending order of their float-adjusted market capitalization weights and the first company that causes the 50% limit to be breached is identified. The weight of this company is, then, reduced to 4.6%.

9. This excess weight is equally redistributed to all companies with weights below 4.6%. This process is repeated iteratively until step 7 is satisfied.

10. Index share amounts are assigned to each constituent to arrive at the weights calculated above. Since index shares are assigned based on prices one business day prior to rebalancing, the actual weight of each constituent at the rebalancing differs somewhat from these weights due to market movements.

If necessary, the reweighting process may take place more than once prior to the close on the last business day of March, June, September or December to ensure the Select Sector Indices conform to all diversification requirements.
