PROSPECTUS

SLS INTERNATIONAL, INC.

1,100,000 SHARES OF COMMON STOCK

This prospectus relates to the sale of up to 1,100,000 shares of our common stock by two selling stockholders. The prices at which the selling stockholders may sell the shares will be determined by the prevailing market price for the shares or in negotiated transactions. We will not receive proceeds from the sale of our shares by the selling stockholders.

Our common stock is quoted on the Nasdaq Over-The-Counter Bulletin Board under the symbol SITI.OB. On September 15, 2003, the last reported sale price for our common stock as reported on the Nasdaq Over-The-Counter Bulletin Board was \$1.20 per share.

The securities offered in this prospectus involve a high degree of risk. You should consider the Risk Factors beginning on page 4 before purchasing our common stock.

NEITHER THE SECURITIES AND EXCHANGE COMMISSION NOR ANY STATE SECURITIES COMMISSION HAS APPROVED OR DISAPPROVED OF THESE SECURITIES OR PASSED UPON THE ADEQUACY OR ACCURACY OF THE PROSPECTUS. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

Unless otherwise specified, the information in this prospectus is set forth as of September 22, 2003, and we anticipate that changes in our affairs will occur after such date. We have not authorized any person to give any information or to make any representations, other than as contained in this prospectus, in connection with the offer contained in this prospectus. If any person gives you any information or makes representations in connection with this offer, do not rely on it as information we have authorized. This prospectus is not an offer to sell our common stock in any state or other jurisdiction to any person to whom it is unlawful to make such offer.

Table of Contents

PROSPECTUS SUMMARY

This summary does not contain all of the information that you should consider before investing in our common stock. You should carefully read the entire prospectus including **Risk Factors** and the consolidated financial statements before making an investment decision.

The Company

We manufacture premium-quality loudspeakers and sell them through our dealer networks. The speakers use our proprietary ribbon-driver technology and are generally recognized in the industry as high-quality systems. We sell a Professional Line of loudspeakers, a Commercial Line of loudspeakers, and Home Theatre systems. Our executive offices are located at 3119 South Scenic, Springfield, Missouri, 65807, with telephone number (417) 883-4549.

The Offering

We entered into option agreements with Steerpike (Overseas) Ltd. and Beth Broday, pursuant to which we granted options to purchase 1,100,000 shares of our common stock for \$0.25 per share. Steerpike and Ms. Broday, the selling stockholders under this prospectus, are offering for sale up to 1,100,000 shares of our common stock, which are the shares issuable upon exercise of the options. On August 6, 2003, there were 24,114,528 shares of our common stock outstanding. Upon the selling stockholders' exercise of the options, the number of shares offered by this prospectus represents 4.4% of our total common stock outstanding on August 6, 2003.

OTC Bulletin Board Symbol

Our stock trades on the over-the-counter Bulletin Board under the symbol SITI.OB.

Table of Contents

RISK FACTORS

An investment in our common stock involves various risks, including those described in the risk factors below. You should carefully consider these risk factors, together with all of the other information included in this report, before you decide to invest in our common stock. If any of the following risks, or any other risks not described below, develop into actual events, then our business, financial condition, results of operations, or prospects could be materially adversely affected, the market price of our common stock could decline further and you could lose all or

part of your investment.

We Have a History of Losses and May Not Be Profitable in the Future if We Do Not Achieve Sufficient Revenue to Absorb Recent and Planned Expenditures.

We have experienced significant operating losses since investing in the development of ribbon driver technology in 1998 and, through December 31, 2002, have an accumulated retained deficit of approximately \$5,065,782. If we do not achieve continued revenue growth sufficient to absorb our recent and planned expenditures, we could experience additional losses in future periods. These losses or fluctuations in our operating results could cause the market value of our common stock to decline.

We Will Depend on Additional Capital.

Our ability to implement our strategy and expand our operations largely depends on our access to capital. To implement our long-term strategy, we plan to make ongoing expenditures for the expansion and improvement of our product line and the promotion of our products. To date, we have financed our operations primarily through sales of equity and the issuance of notes. We will need to issue additional equity or other securities to obtain the financing required to continue our operations. However, additional capital may not be available on terms acceptable to us. Our failure to obtain sufficient additional capital could curtail or alter our growth strategy or delay needed capital expenditures.

Our Dependence upon Third-Party Dealers for Sales Makes Us Vulnerable to the Efforts of Others Which Are Beyond Our Control.

Our distributors may not continue their current relationships with us and they may give higher priority to the sale of our competitors' products. In addition, effective distributors must devote significant technical, marketing and sales resources to an often lengthy sales cycle. Our current and future distributors may not devote sufficient resources to market our products effectively and economic or industry conditions may adversely affect their ability to market or sell for us. A reduction in sales efforts or a discontinuation of distribution of our products by any distributor could lead to reduced sales and loss of profits.

We May Not Gain Market Acceptance of Our Ribbon Driver Technology.

We believe that revenues from our ribbon driver product line will account for a material portion of our revenue for the foreseeable future. Our future financial performance will depend on the market acceptance of our ribbon driver

technology and products. The market for sound

Table of Contents

systems is sustained by ongoing technological developments, frequent new product announcements and introductions, evolving industry standards and changing customer requirements. To date, we have had limited sales of products containing our new technology ribbon drivers. If our ribbon driver technology and product line do not gain sufficient positive market acceptance, we may not achieve anticipated revenue, profits or continued viability.

In the Loudspeaker Market, We Are Subject to Intense Competition.

Although the market for our ribbon driver loudspeaker products is relatively new and emerging, the markets for our products are extremely competitive and we expect such competition to increase. The market for sound enhancement products in general is intensely competitive and sensitive to new product introductions or enhancements and marketing efforts by our competitors. We expect to experience increasing levels of competition in the future. Although we have attempted to design our loudspeaker systems to compete favorably with competitive products, we may not be able to establish and maintain our competitive position against current or potential competitors. Aggressive competition could cause us to have sales and profitability below expectations.

If We Are Unable to Hire or Retain Qualified and Skilled Personnel as Necessary, We May Not Be Able to Develop New Products or Successfully Manage Our Business.

We believe our success will depend in large part upon our ability to identify, attract and retain highly skilled managerial, engineering, sales and marketing, finance and operations personnel. However, we may not be successful in identifying, attracting and retaining such personnel. Our success also depends to a great degree upon the continued contributions of our key management, engineering, sales and marketing, finance and manufacturing personnel, many of whom would be difficult to replace. In particular, we believe that our future success depends on John Gott, Chief Executive Officer. We presently do not maintain key person life insurance on Mr. Gott, and we presently do not have an employment contract with him. If we experience the loss of the services of any of our key personnel, we may be unable to identify, attract or retain qualified personnel in the future. This could make it difficult for us to manage our business and meet key objectives, or achieve or sustain profits.

Our Recurring Losses and Dependence Upon Additional Financing Have Caused Our Auditors to Issue a Statement Indicating Substantial Doubt as to Our Ability to Continue as a Going Concern.

The accountants' audit report on our financial statements for the year ended December 31, 2002 included a statement that, because of recurring losses and our dependency on the sale of securities or obtaining additional debt financing, there was a substantial doubt about our ability to continue as a going concern. If we are unable to raise additional financing to cover operating expenses and derive additional revenue from sales, we may no longer be a viable business.

Since Our Common Stock is Thinly Traded, It Can Be Subject to Extreme Rises or Declines in Price, and You May Not Be Able to Sell Your Shares at or Above the Price You Paid.

You may have difficulty reselling the shares of our common stock. You may not be able to resell your shares at or above the price you paid, or at a fair market value. The stock markets

Table of Contents

have recently experienced significant price and volume changes that are not related to the operating performance of individual companies. These broad market changes may cause the market price of our common stock to decline regardless of how well we perform as a company.

Our Patent Application May Not Be Issued, and If Issued We May Not Be Able to Adequately Protect the Patent or Our Other Intellectual Property.

In September 2002, we filed a U.S. patent application on our proprietary ribbon driver technology. Our success will depend in significant part on our ability to obtain, preserve and defend U.S. patent protection for this technology. The patent may not be issued from the patent application. The issuance of a patent is not conclusive as to its validity or enforceability and, if a patent is issued, it is uncertain how much protection, if any, will be given to our patent if we

attempt to enforce it. Litigation, which could be costly and time consuming, may be necessary to enforce any patent issued in the future or to determine the scope and validity of the proprietary rights of third parties. A competitor may successfully challenge the validity or enforceability of our patent or challenge the extent of the patent's coverage. If the outcome of litigation is adverse to us, third parties may be able to use our patented technology without payment to us. Even if we are successful in defending such litigation, the cost of litigation to uphold the patent can be substantial.

It is possible that competitors may infringe our patents or successfully avoid them through design innovation. To stop these activities we may need to file a lawsuit. These lawsuits are expensive and would consume time and other resources. In addition, there is a risk that a court would decide that our patent is not valid, that we do not have the right to stop the other party from using the inventions, or that the competitor's activities do not infringe our patent.

Our competitive position is also dependent upon unpatented technology and trade secrets, which may be difficult to protect. Others may independently develop substantially equivalent proprietary information and techniques that would legally circumvent our intellectual property rights. Currently, we have not registered any potential trademarks and we may not be able to obtain registration for such trademarks.

The Use of Our Technologies Could Potentially Conflict With the Rights of Others.

Our competitors, or others, may have or may acquire patent rights that they could enforce against us. If our products conflict with patent rights of others, third parties could bring legal actions against us or our suppliers or customers, claiming damages and seeking to enjoin manufacturing and marketing of the affected products. If these legal actions are successful, in addition to any potential liability for damages, we could be required to alter our products or obtain a license in order to continue to manufacture or market the affected products. We may not prevail in any legal action and a required license under the patent may not be available on acceptable terms or at all. The cost to us of any litigation or other proceeding relating to intellectual property rights, even if resolved in our favor, could be substantial.

We will need to expand and effectively manage our operations and facilities to successfully pursue and complete our commercialization efforts. We will need to add personnel, including management, and expand our capabilities, which may strain our existing managerial, operational, financial and other resources. To compete effectively and manage our growth, we must train, manage and motivate a substantially larger employee base, accurately forecast demand for our products and implement operational, financial and management information systems. In the event that we fail to expand or manage our growth effectively or if we cannot recruit qualified employees, our commercialization efforts could be curtailed or delayed.

Future Sales of Common Stock Could Depress the Price of Our Common Stock.

Future sales of substantial amounts of our common stock pursuant to Rule 144 under the Securities Act of 1933 or otherwise could have a material adverse impact on the market price for the common stock at the time. There are presently approximately 14,365,736 outstanding shares of our common stock held by stockholders that are deemed restricted securities as defined by Rule 144 under the Securities Act. Under certain circumstances, these shares may be sold without registration pursuant to the provisions of rule 144. In general, under rule 144, a person (or persons whose shares are aggregated) who has satisfied a one-year holding period may, under certain circumstances, sell within any three-month period a number of restricted securities which does not exceed the greater of 1% of the shares outstanding or the average weekly trading volume during the four calendar weeks preceding the notice of sale required by rule 144. In addition, rule 144 permits, under certain circumstances, the sale of restricted securities without any quantity limitations by a non-affiliate who has satisfied a two-year holding period. Any sales of shares by stockholders pursuant to rule 144 may have a depressive effect on the price of our common stock.

FORWARD-LOOKING STATEMENTS

This registration statement, as well as our other reports filed with the SEC and our press releases and other communications, contain forward-looking statements made pursuant to the safe harbor provisions of the Securities Litigation Reform Act of 1995. Forward-looking statements include all statements regarding our expected financial position, results of operations, cash flows, dividends, financing plans, strategy, budgets, capital and other expenditures, competitive positions, growth opportunities, benefits from new technology, plans and objectives of management, and markets for stock. These forward-looking statements are based largely on our expectations and, like any other business, are subject to a number of risks and uncertainties, many of which are beyond our control. The risks include those stated in the Risk Factors section of this registration statement and economic, competitive and other factors affecting our operations, markets, products and services, expansion strategies and other factors discussed elsewhere in this registration statement and the other documents we have filed with the Securities and Exchange Commission. In light of these risks and uncertainties, there can be no assurance that the forward-looking information contained in this registration statement will in fact prove accurate, and our actual results may differ materially from the forward-looking statements.

Table of Contents**MARKET FOR OUR SHARES****Market Information**

Our common stock is traded on the NASDAQ over-the-counter (OTC) Bulletin Board under the symbol SITI.OB and the name SLS International, Inc. On September 15, 2003, the last reported sale price for our common stock as reported on the Nasdaq Over-The-Counter Bulletin Board was \$1.20 per share. The following table sets forth the range of high and low bid closing quotations for our common stock on the over-the-counter market for each quarter within the last two fiscal years. The over-the-counter quotes reflect inter-dealer prices without retail mark-up, mark-down or commission and may not represent actual transactions.

Period	Bid Prices	
	Low	High
Quarter Ended June 30, 2003	0.19	0.60
Quarter Ended March 31, 2003	0.20	0.45
Quarter Ended December 31, 2002	0.16	0.51
Quarter Ended September 30, 2002	0.23	0.59
Quarter Ended June 30, 2002	0.20	0.84
Quarter Ended March 31, 2002	0.36	0.84
Quarter Ended December 31, 2001	0.26	0.80
Quarter Ended September 30, 2001	0.45	1.20
Quarter Ended June 30, 2001	0.85	1.30

Holder

On August 6, 2003 there were approximately 90 holders of record of our common stock. Shares of our common stock

are also held in street name and may, therefore, be held by numerous beneficial owners.

Dividend Policy

We have never declared or paid cash dividends on our common stock. We currently intend to retain all available funds and any future earnings for use in the operation of our business and do not anticipate paying any cash dividends in the foreseeable future.

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

We manufacture premium-quality loudspeakers and sell them through our dealer networks. The speakers use our proprietary ribbon-driver technology and are generally recognized in the industry as high-quality systems. We sell a Professional Line of loudspeakers, a Commercial Line of loudspeakers, and Home Theatre systems.

From the early 1970's through 1999 we derived substantially all of our revenue from marketing, renting, selling and installing sound and lighting systems. In June 1999, due to the favorable customer acceptance of our custom-designed loudspeaker systems, we ceased these historical operations and began focusing all efforts towards becoming a loudspeaker manufacturer and selling to dealers and contractors on a wholesale basis. As a result, we have been essentially in a development stage, as we are bringing to market products that we introduced in 2000 and 2001 and designing and bringing to market additional products.

In June 2000, we asked dealers and distributors to sell our Professional Line of products. These dealers and distributors started to form our current network of approximately 50 dealers and 7 foreign distributors and we began shipping to them. However, most of the Professional Line required new ribbon drivers that we completed and implemented into the product line in early 2001.

In September 2000, we introduced our Home Theatre systems, and sales for those systems began immediately. From September through December 2000, we added 20 new Home Theatre dealers in the US and began marketing efforts to establish distributors and dealers outside the US.

In June 2001, we introduced a Commercial Line of loudspeakers that utilize our PRD500 Ribbon Driver and, in September 2001, we finished the development of our PRD1000 Ribbon Driver and began implementing it into our Professional Line. Our PRD drivers, which we manufacture, upgraded the previous drivers that we purchased from third-party manufacturers; and our cost is approximately one-sixth of the price that we had been paying for the previous drivers.

SLS International, Inc. was formed on July 25, 2000 and had no previous operations. On the same date, this corporation merged with Sound and Lighting Specialist Inc., its sole stockholder, and SLS International, Inc. was the surviving corporation. All of the financial information reported for periods prior to the merger are the results of operations of Sound and Lighting Specialist, Inc. All of the operating activity reported for periods after the merger are the results of operations of SLS International, Inc. The information in this section should be read together with the financial statements, the accompanying notes to the financial statements and other sections included in this report.

Table of Contents

Years Ended December 31, 2002 and December 31, 2001

Results Of Operations

Year ended December 31, 2002 as compared to the year ended December 31, 2001. For the year ended December 31, 2002, revenue increased to \$790,582 from \$353,797 in 2001, as a result of the further roll-out of our product line and customer acceptance of our products. Gross profit percentage increased to 32% in 2002 compared to 19% in 2001, primarily as a result of our conversion to in-house manufacturing of our ribbon drivers from our previous outsourcing of such components. In 2002, despite the increased revenue and improved gross profit percentage, we reported a net loss of \$2,242,325 as compared to a net loss of \$1,040,174 in 2001. The greater net loss was primarily the result of increased general and administrative expenses, as discussed below.

General and administrative expenses for 2002 increased to \$2,468,565 from \$1,068,335 in 2001, primarily as a result of the write-off of \$203,831 of bad debt expense (compared to \$4,000 in 2001) and \$1,074,229 of non-cash expenses amortized in 2002 reflecting a portion of the fair value of stock and options issued under consulting agreements entered into during 2001 and 2002. A total of \$1,599,213 in expenses were accrued under these consulting agreements, and the unamortized portion (\$524,984) of such expenses will be amortized in future periods. Other factors causing the increase in general and administrative expenses include a new employee handling our development of a transducer, a new controller for our financial operations, a new national sales manager, increased trade show participation to promote our products, and cash expenses for consultants targeted toward increased exposure and relations with top musical artists. Also, during the 2002 third quarter, we increased the size of our leased facility, thereby increasing our monthly lease costs, which will increase our capacity to satisfy the expected growth in revenue. Partially offsetting these increases was the elimination of legal, accounting, consulting and other costs incurred as a result of our 2001 public offering.

Interest expense decreased to \$33,306 in 2002 as compared to \$46,011 in 2001, due to decreased borrowings.

Year ended December 31, 2001 as compared to the year ended December 31, 2000. For the year ended December 31, 2001, revenue increased to \$353,797 from \$163,350 in 2000, since 2001 was our first full year of sales of several products following a partial year in 2000, and 2001 was the initial year for sales of other products. In addition, sales of all products have increased steadily since their introduction. In 2001, despite the increased revenue, we reported a net loss of \$1,040,174 as compared to a net loss of \$781,710 in 2000. The greater net loss was the result of increased general and administrative expenses and to a lesser extent increased interest expense.

General and administrative expense for the year ended December 31, 2001 increased to \$1,068,335 from \$813,571 in 2000, primarily as a result of a new employee handling our development of a transducer, a new controller for our financial operations, increased trade show participation to promote our products, and the additional legal, accounting, consulting and other costs incurred as a result of our 2001 public offering.

Interest expense increased to \$46,011 in 2001 as compared to \$27,126 in fiscal 2000, due to increased borrowings.

Table of Contents

Financial Condition

On December 31, 2002, our current liabilities exceeded current assets by \$588,486 compared to \$296,734 on December 31, 2001. Total liabilities exceeded net assets on December 31, 2002 by \$562,262, as compared to \$262,166 on December 31, 2001. The increased working capital deficit was due primarily to increases in accounts payable and other increased liabilities incurred from our expanding operations, and decreases in cash. These factors were partially offset by an increase in inventory and accounts receivable, funded in large part by the sales of equity described below, as well as increases in accounts payable and accrued liabilities. The changes in these items were the result of our net loss from operations in 2002.

We have experienced operating losses and negative cash flows from operating activities in all recent years. The losses have been incurred due to the development time and costs in bringing our products through engineering and to the marketplace. In addition we have not paid notes payable and accounts payable on due dates. The report of our accountants contains an explanatory paragraph indicating that these factors raise substantial doubt about our ability to continue as a going concern.

In 2002 and 2001, we entered into consulting agreements that required us to issue an aggregate of 2,495,000 shares of common stock, options to purchase 100,000 shares of Class A preferred stock at an exercise price of \$2.50 per share (each such share of preferred stock converts into 10 shares of common stock), and options to purchase 500,000 shares of our common stock at \$0.30 per share. Total expenses under such agreements are \$1,599,213, \$1,074,229 of which is reflected as amortized expenses in 2002 and the remainder of which is to be amortized in subsequent periods over the respective terms of such agreements. The difference between such total expenses and the amount amortized is reflected as unamortized cost of stock issued for services on the balance sheet. We also recorded \$3,000 of cash and \$27,000 of notes receivable received from such consultants. The notes receivable were then written off as bad debt expense in the quarter ended March 31, 2002.

We are experiencing significant cash shortages; we had \$4,240 in cash on December 31, 2002. In order to continue operations, we have been dependent on raising additional funds and have continued to sell preferred stock in the beginning of 2003 to raise capital. In 2002 we privately sold preferred stock for a total of \$787,500, and through March 2003 we sold an additional \$82,350. In addition, we have outstanding warrants, which, upon exercise, provided additional funding of \$50,500 in 2002.

Accounts receivable increased due to increased sales. However, the increase would have been greater if we had not taken an allowance of \$132,396.

Notes payable increased to \$414,720 on December 31, 2002. One note totaling \$2,087 is secured with equipment; and most of the remaining borrowings are from individuals, are unsecured and matured in the first quarter of 2002. However, these notes are payable to existing stockholders that are not making a demand on the notes and will continue to accrue interest at 7% (10% in the case of a note with a principal amount of \$50,000) for an indefinite period of time. We expect that these stockholders will continue to permit these notes to remain outstanding, but they have the right to demand full payment at any time and they may do so, which would have a material adverse effect on our financial condition.

Table of Contents

There is intense competition in the speaker business with other companies that are much larger and national in scope and have greater financial resources than we have. We will require additional capital to continue our growth in the wholesale speaker market. We are relying upon our ability to obtain the necessary financing through the issuance of equity and upon our relationships with our lenders to sustain our viability.

In the past, we have been able to privately borrow money from individuals by the issuance of notes and have sold our common stock to raise capital. We intend to continue to do so as needed. However, we cannot be certain that we will continue to be able to successfully obtain such financing. If we fail to do so, we may be unable to continue as a viable business.

Quarter and Six Months Ended June 30, 2003

Results Of Operations

Quarter ended June 30, 2003 as compared to the quarter ended June 30, 2002. For the quarter ended June 30, 2003, revenue increased to \$277,244 from \$189,330 in 2002, a 46% increase, resulting primarily from the expansion of our loudspeaker product line and the continued growth in sales of our loudspeakers. Our gross profit percentage increased

to approximately 65% in the 2003 period from approximately 42% in the 2002 period, primarily as a result of continued improvement in efficiency as we increase revenue and increased sales of our higher-margin Line Array models. Due to the revenue increase and the improvement in gross profits, partially offset by an increase in general and administrative expenses, our net loss decreased to \$401,271 in the second quarter of 2003 as compared to a net loss of \$490,506 in the comparable quarter of 2002.

General and administrative expenses for the 2003 second quarter increased to \$606,386 from \$563,468 in the 2002 second quarter, primarily as a result of a non-cash charge of \$23,134 related to the issuance of employee stock options.

Other income increased to \$25,996 in the 2003 second quarter as compared to other expense of \$6,800 in the 2002 second quarter, primarily due to interest and miscellaneous income related to the collection of accounts receivable that had been written off in prior periods.

Six months ended June 30, 2003 as compared to the six months ended June 30, 2002. For the first six months of 2003, revenue increased to \$382,021 from \$324,516 in 2002, an 18% increase, resulting primarily from the expansion of our loudspeaker product line and the continued growth in sales of our loudspeakers. Our gross profit percentage increased to approximately 59% in the 2003 period from approximately 40% in the 2002 period, primarily as a result of continued improvement in efficiency as we increase revenue and increased sales of our higher-margin Line Array models. Due primarily to the revenue increase and the improvement in gross profits, our net loss decreased to \$855,716 in the first half of 2003 as compared to a net loss of \$945,353 in the first half of 2002.

General and administrative expenses for the first six months of 2003 increased to \$1,108,535 from \$1,061,965 in 2002, primarily as a result of a non-cash charge of \$23,134 related to the issuance of employee stock options.

Other income increased to \$26,359 in the 2003 period as compared to other expense of \$13,225 in the 2002 period, primarily due to interest and miscellaneous income related to the collection of accounts receivable that had been written off in prior periods.

Financial Condition

On June 30, 2003, our current liabilities exceeded current assets by \$600,525, compared to \$588,486, on December 31, 2002. Total liabilities exceeded total assets by \$579,708, compared to \$562,262 on December 31, 2002. The increased working capital deficit was primarily due to a reduction in accounts receivable of \$91,889, a \$77,280 increase in accounts payable and an increase of \$88,052 in current maturities of long-term debt and notes payable, partially offset by increases of \$169,452 in inventory and \$101,116 in cash. On June 30, 2003, we had a backlog of orders of approximately \$80,000.

We have experienced operating losses and negative cash flows from operating activities in all recent years. The losses have been incurred due to the development time and costs in bringing our products through engineering and to the marketplace. In addition we have not paid notes payable and accounts payable on due dates. The report of our accountants contains an explanatory paragraph indicating that these factors raise substantial doubt about our ability to continue as a going concern.

We had been experiencing significant cash shortages; we had \$105,356 in cash on June 30, 2003. In order to continue operations, we have been dependent on raising additional funds and have continued to sell preferred stock in the beginning of 2003 to raise capital. In the second quarter of 2003 we sold preferred stock for \$289,250. In July 2003, we sold 1,221,660 shares of preferred stock for a total of \$3,054,150. These sales completed our preferred stock private placement that commenced in September 2001 and substantially alleviated our cash shortages in the near-term.

Long-term debt and notes payable increased to \$502,772 on June 30, 2003. One note totaling \$1,517 that was secured with equipment has been repaid; and most of the remaining borrowings are from individuals, are unsecured and matured in the first quarter of 2002 or are demand notes. However, these notes are payable to existing stockholders that are not making a demand on the notes and will continue to accrue interest at 7% (10% in the case of one note with a principal amount of \$50,000) for an indefinite period of time. We expect that these stockholders will continue to permit these notes to remain outstanding, but they have the right to demand full payment at any time and they may do so, which would have a material adverse effect on our financial condition.

There is intense competition in the speaker business with other companies that are much larger and national in scope and have greater financial resources than we have. We will require additional capital to continue our growth in the wholesale speaker market. We are relying upon our ability to obtain the necessary financing through the issuance of equity and upon our relationships with our lenders to sustain our viability.

Table of Contents

In the past, we have been able to privately borrow money from individuals by the issuance of notes, and we have been able to raise money by the issuance of preferred stock and common stock. We intend to continue to do so as needed. However, we cannot be certain that we will continue to be able to successfully obtain such financing. If we fail to do so, we may be unable to continue as a viable business.

In July 2003, we agreed to lease an additional 7,500 square feet of space for \$2,000 per month. We are planning the build-out of this space, which we intend to use for additional inventory space for the components and cabinets needed for (a) planned increases in production, (b) additional engineering testing space to perform critical tests and produce data for sound system designers to provide specifications for products, and (c) on-site product demonstrations. We anticipate that this additional space, together with our existing space, will be sufficient to meet our needs for projected sales levels for the next two to three years.

Effective as of May 2003, we orally agreed upon an endorsement arrangement with Gordon Sumner, p/k/a Sting, one of the world's most popular music entertainers. Our agreements with his companies, Steerpike, Inc. and Steerpike (Overseas) Ltd., signed in July 2003, provide that Sting will endorse our products until July 31, 2005 (subject to the early termination provisions of those agreements). The endorsement includes our use of certain approved photographs of Sting in connection with the advertising, sale and promotion of our loudspeaker products, as well as certain approved comments by Sting about our loudspeaker products. Our loudspeaker products will be installed in his home, studio and will be considered for use in connection with his upcoming world tour. For the endorsement, we issued options to purchase 1,000,000 shares of our common stock at \$0.25 per share, the market value of our common stock when the agreement was verbally made.

USE OF PROCEEDS

This prospectus relates to shares of our common stock that may be offered and sold from time to time by Steerpike. We will receive no proceeds from the sale of shares of common stock in this offering. However, we may receive up to \$275,000 in proceeds from the selling stockholders' exercise of the options pursuant to which the shares registered hereby are issuable. Any proceeds received upon the selling stockholders' exercise of the options will be used for working capital and general corporate purposes.

Table of Contents

BUSINESS

We manufacture premium-quality loudspeakers and sell them through our dealer networks. The speakers use our proprietary ribbon-driver technology and are generally recognized in the industry as high-quality systems. We sell a Professional Line of loudspeakers, a Commercial Line of loudspeakers, and Home Theatre systems.

From the early 1970 s through 1999 we derived substantially all of our revenue from marketing, renting, selling and installing sound and lighting systems under the name Sound and Lighting Specialist Inc. In June 1999, due to the favorable customer acceptance of our custom-designed loudspeaker systems, we ceased these historical operations and began focusing all efforts towards becoming a loudspeaker manufacturer and selling to dealers and contractors on a wholesale basis. As a result, we have been essentially in a development stage, as we are bringing to market products that we introduced in 2000 and 2001 and designing and bringing to market additional products.

In June 2000, we asked dealers and distributors to sell our Professional Line of products. These dealers and distributors started to form our current network of approximately 50 dealers and 7 foreign distributors and we began shipping to them. However, most of the Professional Line required new ribbon drivers that we completed and implemented into the product line in early 2001.

In September 2000, we introduced our Home Theatre systems, and sales for those systems began immediately. From September through December 2000, we added 20 new Home Theatre dealers in the US and began marketing efforts to establish distributors and dealers outside the US.

In June 2001, we introduced a Commercial Line of loudspeakers that use our PRD500 Ribbon Driver and, in September 2001, we finished the development of our PRD1000 Ribbon Driver and began implementing it into our Professional Line. Our PRD drivers, which we manufacture, upgraded the previous drivers that we purchased from third-party manufacturers; and our cost is approximately one-sixth of the price that we had been paying for the previous drivers.

SLS International, Inc. was formed on July 25, 2000 and had no previous operations. On the same date, this corporation merged with Sound and Lighting Specialist Inc., its sole stockholder, and SLS International, Inc. was the surviving corporation. All of the financial and other information reported for periods prior to the merger are the results

of operations of Sound and Lighting Specialist, Inc. All of the operating activity reported for periods after the merger are the results of operations of SLS International, Inc. The information in this section should be read together with the financial statements, the accompanying notes to the financial statements and other sections included in this report.

In July 2000, our Board of Directors declared a 12,800 to one, forward stock split. As a result, for each outstanding share of SLS, we issued an additional 12,800 shares. The resulting total of outstanding shares of SLS, as reorganized, became 14,340,480 shares of common stock. All references to shares in this prospectus, whether prior to or after the reorganization, are references to the outstanding shares of SLS, as it has been reorganized.

Table of Contents

Development

Initially, we engaged in the direct sale and installation of sound systems for various customers and rented lighting and sound equipment. The business evolved into the business of designing cabinets for loudspeaker systems for sale and installation. We manufactured the cabinets and purchased the components, which consisted of compression drivers and woofers from independent manufacturers, and sold and installed the systems for our customers. The compression drivers made the high frequency or treble sounds and the woofers made the low frequency or bass sounds. During 1994, we expanded our line of loudspeaker systems to include speakers that used ribbon drivers instead of compression drivers. At that time, we purchased the ribbon drivers from an independent manufacturer. As we developed our ribbon driver line of loudspeakers we relied on our Tef 20 computer acoustic measurement system to analyze and measure sound waves. This system is the industry standard for loudspeaker designing and is used by most of the major loudspeaker manufacturers in the design and manufacture of loudspeaker systems. Our Tef 20 system indicated that the ribbon driver systems that we were designing were superior in several ways to the compression driver systems that we previously used. The ribbon driver system that we were designing had a smoother frequency response. The level of mid-range sound and treble sound that the ribbon driver systems were producing was more even and therefore the loudspeaker reproduced whatever sound it received in a more natural manner. Also, the ribbon driver did not produce the same level of distortion when played at higher frequency levels, as compared to the compression driver. This resulted in a positive reaction from our customers to the quality of sound, and as a result we decided to change our overall strategy.

In the latter part of 1998, we determined to focus our efforts solely on the manufacture and sale of lines of ribbon driver speaker systems. Our speaker systems product lines consist of:

.
The Professional Contractor Speaker System, a more expensive professional line;

.
The Universal Soldier Speaker System, a less expensive commercial line; and

.
The Home Theatre Speaker System.

The market for the ribbon driver product line is new and growing. Our future success is uncertain because the loudspeaker market is experiencing rapid technological advances, changing customer needs and evolving industry standards.

To realize our expectations regarding our operating results, we will depend on:

.
Market acceptance of our ribbon driver products;

.
Our ability to compete in quality and price for our products;

.
Our ability to develop, in a timely manner, new products and services that keep pace with developments in technology;

.
Our ability to meet changing customer requirements; and

.
Our ability to enhance our current products and services and deliver them efficiently through appropriate distribution channels.

Table of Contents**Technology**

The function of loudspeakers is to increase the volume of sound in order to enable the sound to be heard by many persons occupying a large area. For many years, the loudspeaker industry used certain types of components to increase the volume of sound. The technology originally permitted only the types of components that required low electrical power in order to achieve high volume sound. In the past, loudspeakers consisted in part of a component called the compression driver. This device generally is used to reproduce the mid-range and high frequencies of sound. Early compression drivers consisted of a diaphragm made of a linen-based manmade resin material that is enclosed in a chamber. This diaphragm was generally formed as a partial sphere, similar to a ball that has been cut in half. The edges of the diaphragm were then wound many times with a fine electrical wire called a voice coil. Electrical current from an amplifier is sent through the wire and the diaphragm vibrates to produce the sound wave. However, in the compression driver, the diaphragm is enclosed in a chamber with the sound exiting out of a relatively small hole that increases the velocity of the sound. This is similar to forcing air or water through a small hole to increase its velocity. The disadvantage of the compression driver is that before the sound waves are forced through the small hole they are first bounced around inside of the chamber and become distorted and tend to produce a certain amount of listening fatigue for audiences. Today the compression drivers use a diaphragm made from aluminum and titanium and can produce the same high volume but with higher frequency sounds. Although today's compression drivers are superior to those of the past due to the new materials, the negative aspects still exist to a degree because of the nature of the design of the compression driver.

Originally the diaphragm of the ribbon driver consisted of a material made from mylar plastic. This plastic component produced a better quality sound but was not able to handle the amount of electrical current needed to produce a high level of sound. This caused the component to melt and thereby cease to function. In addition, the ribbon drivers required relatively large, cumbersome and heavy magnet assemblies using ceramic magnets. Over the years the ribbon driver was developed using higher-powered magnets and materials that could withstand higher temperatures.

The ribbon driver works in a different manner than the compression driver. The diaphragm of the ribbon driver is a flat piece of mylar plastic or in the case of SLS ribbon drivers, a high temperature Kapton plastic. These materials are considerably thinner and lighter than the linen or even the aluminum or titanium diaphragms of the compression drivers. The ribbon diaphragm is laminated on one side with a thin coating of aluminum. This aluminum is then chemically etched to leave wire-like traces of aluminum that act as a voice coil, vibrating the diaphragm when current is applied. The diaphragm of the ribbon driver is not in a chamber and is open and visible to the air. The sound waves are not restricted and therefore they do not have the distorted properties of the compression driver. Because the diaphragm of the ribbon driver is so thin and light it reacts very quickly to the electrical signal and does not introduce new or resonated sounds created by the material of the diaphragm itself. This enables the ribbon driver to produce a

much purer reproduction of the sound source without adding any tones of its own.

Table of Contents

In 1994, we purchased several ribbon drivers from a non-affiliated European company to determine if they could be used in our loudspeaker systems. Prior to this, we were only using compression drivers. We immediately noticed the difference in the quality of sound and began to install the ribbon drivers in some of our own smaller speaker cabinets that did not require high electrical power. Due to the positive response from our customers we decided to develop a completely new product line using the ribbon drivers that we purchased from the European manufacturers.

In February 2000, we retained Igor Levitsky, an electro-acoustics engineer to develop a new technology ribbon driver for us. We requested that he develop two different-sized ribbon drivers and we paid a fixed fee for his work. We also agreed to pay him a royalty of \$2,000 per year for an indefinite period of time. In April 2001, Mr. Levitsky became our employee and waived his royalty. Research and development expense was \$17,568 in 2001 and \$22,095 in 2002. The cost of such research and development is not borne directly by our customers.

The ribbon driver that we have developed uses new lightweight high-powered magnets and plastics that can withstand high temperatures. This enables the speaker system to have increased power-handling ability and higher sound volume with substantial reliability and clarity. We have completed development of our own proprietary ribbon driver, model PRD 500, a 5-inch version of the ribbon driver. We have recently started to directly manufacture models PRD 500 and PRD 1000, for use in our Home Theatre line, Universal Soldier Commercial line and our Professional line of loudspeakers. Sale of the Commercial line of loudspeakers with direct-manufactured ribbon drivers began in June 2001, and sales of the Professional line of products with direct-manufactured ribbon drivers began in September 2001. This direct manufacture of ribbon drivers substantially reduces our product cost, and it also provides improved performance for our loudspeaker systems. We also expect to use the PRD 1000 in a proposed Cinema Line of loudspeakers for movie houses.

Products

Previously, when we were involved in selling and installing our products for end-users, our product line consisted of twelve models of Professional Contractor speaker systems. As a result of the change in operations to a wholesale business, selling to distributors, we have increased our product lines. In addition to the models previously

manufactured, we have added two new product lines, consisting of twelve new models, and increased the number of models we manufacture under our Professional Contractor System.

Our Professional Contractor Speaker System line presently consists of eighteen models of speaker systems, each model consisting of a speaker cabinet and components of woofers which provide the bass sounds and ribbon drivers which provide the treble sound. This line, the cabinets of which we generally manufacture, is usually sold to large contractors and is installed for churches, theatres, school auditoriums, casinos, night clubs and touring production companies. Although we now manufacture our own ribbon drivers, the woofers are manufactured to our specifications by non-affiliated manufacturers.

Table of Contents

Our Commercial line, the Universal Soldier Speaker System, consists of lower-cost speakers which are designed to be sold by music stores for orchestras, disc jockeys and the less expensive commercial market. There are twelve models of different size, with less expensive components that produce varying sound levels and area coverage capabilities. These are equal in quality to, but do not produce the sound levels of, our Professional Contractor Speaker System Line.

We recently developed a new line of loudspeakers for the home theatre market. We intend to direct a substantial effort to capture an appropriate market share of the home theatre market. Our Home Theatre Loudspeaker System consists of four models that use the smallest unit of our Professional Contractor Loudspeaker System as their basis. We manufacture the cabinetry and the ribbon drivers for this system, our PRD 500. These systems are designed for boardroom and for the home. The home theatre market requires equipment that uses five or more speakers placed around a room. This configuration provides the listener with surround sound similar to a movie theatre experience. Almost all current movies are now produced in surround sound, which uses at least five speakers plus a sub-woofer system.

Revenue from our ribbon driver product line is expected to account for a material portion of our revenue for the foreseeable future. Our financial performance will depend on market acceptance of our ribbon driver technology and products. The sound system industry continually introduces technological developments, frequently announces new products, and has evolving industry standards and changing customer requirements. As a result, if our ribbon driver technology and product line do not rapidly achieve sufficient market acceptance, we may not be able to achieve expected revenues or profits.

Future Products

We re-packaged certain models of our Professional Contractor Sound Systems for the cinema and movie theatre market by simplifying the cabinetry. In a typical movie house, the speakers are usually not displayed in view of the public, which allows for simplified cabinetry. The new cabinetry is designed to be less costly, as are the other components, which we expect to provide our representatives with a cost advantage in marketing our system to cinema owners. At present, a total of ten models are being repackaged for this line. We are conducting tests on the repackaged models and plan to introduce them in Fall 2003.

We have developed a new less-expensive 5.1 Home Theater system, which is nearly ready for production. All research and development has been completed, and we are waiting for the delivery schedule from our vendors for the cabinets and other parts that we do not manufacture.

Manufacturing and Sourcing

We generally design and manufacture our own cabinets for our product lines, and on occasion contract certain models manufactured by independent, established, local and other woodcrafters. These manufacturers construct the cabinetry to our specifications. Our ribbon

Table of Contents

drivers are either directly manufactured or purchased from a non-affiliated manufacturer, B&G Corporation. The principal suppliers of our woofers are Belisle Acoustics, Eminence, PHL and Seas Speaker Component Manufacturers. The manufacture of our own ribbon drivers has resulted in a meaningful reduction in costs, and we expect that it will enable our products to be more competitively priced.

Our sources of supply of other component sub-parts are all competitively priced and we have a sufficient number of other sources of supply available to us should the need arise for additional components. If a termination of existing

relationship with any current supplier occurs we do not expect to have any difficulty in replacing that source. We presently purchase most of the woofers used in our systems from a non-affiliated Canadian company that produces them according to our specifications.

Sales and Marketing

Domestic. We are no longer engaged in the installation of speaker systems but are solely involved with the design, manufacture and distributor sale of our loudspeaker product lines. In addition to advertising in trade journals and attending industry conventions for promotion and sale of our products, we are in the process of establishing a network of distributors to cover the territorial United States. Currently, we have approximately 100 dealers for our Professional line, 6 distributors for our Professional and Commercial lines, 20 dealers for our Home Theatre line, 2 domestic and 6 international distributors for our Home Theatre line, and 100 dealers for our Commercial line. These outlets sell our products in approximately three-quarters of the United States and six foreign countries. Our agreement with our dealers requires them to use their best efforts to promote and advertise our products, maintain a minimum inventory of loudspeaker systems and produce a minimum of annual sales. The agreement requires that we are to design products with the highest-quality standards and provide suggested user prices to dealers. The dealer agreement may be terminated without cause by either party on 30 days notice.

We train the sales representatives to enable them to deal more easily with customer questions. As manufacturers, we are always available to respond to inquiries of customers and potential customers, if and when required. Although we are small in comparison to the industry leaders, we are seeking to become established in a niche market consisting of commercial and residential customers who are more interested in a truer reproduction of sound than in a brand name.

In June 1999, we ceased selling our loudspeaker systems directly to end-users. Up to that time, we sold only the Professional Contractor Loudspeaker Systems to end-user customers, primarily churches, schools, nightclubs and similar establishments. These systems contained ribbon drivers manufactured by others. From June 1999 through June 2000, we converted to a manufacturing company and developed more products. These additional products consisted of the Commercial line of Universal Soldier Loudspeaker systems and Home Theatre speaker systems. In 2002, we sold 300 units of the Universal Soldier systems, a total of 325 units of the Home Theatre Systems, and 400 units of our Professional Contractor systems.

We will continue to design and manufacture the same products as previously sold to end-users for sale through our dealer network. The Universal Soldier and Home Theatre lines that we manufacture contain our new technology ribbon driver model PRD 500. The Professional Contractor Loudspeaker product line contains our new technology ribbon driver model PRD 1000.

International. We are also engaged in marketing and promotion internationally. Our international business involves a number of risks, including:

.

foreign currency exchange fluctuations;

.

political and economic instability;

.

difficulty in managing distributors or sales representatives;

.

tariffs and other trade barriers; and

.

complex foreign laws and treaties including employment laws.

Because our sales are in US currency, foreign currency exchange fluctuations could materially affect us negatively. A decrease in the value of foreign currencies as they relate to the U.S. dollar could make the pricing of our products more expensive than products of our foreign competitors which are priced in foreign currencies. Because of the fluctuating exchange rates and our involvement with a number of currencies, we are unable to predict future operating results.

In January 1999, the new Euro currency was introduced in European countries that are part of the European Monetary Union, or EMU. During 2002, all EMU countries replaced their national currencies with the Euro. Because it is too early to determine the effect the Euro will have on the marketplace, we cannot determine the effect this may have on our business.

In the future we expect to make significant investments in our operations, particularly to support technological developments and sales activities. As a result, operating expenses are expected to continue to increase. As we develop

and introduce new products and expand into new markets such as international, direct and OEM markets, we intend to make such investments on a continuing basis, primarily from revenues generated from operations and from funds raised from sales of our stock. If our net sales do not increase along with capital requirements or other investments, we are likely to continue to incur net losses and our financial condition could be materially and adversely affected. Since 1998 we have not been profitable due mostly to the shift in our operating focus, and we cannot be certain that we will achieve or sustain profitability in the future.

Competition

Our main competitors are JBL Professional, a division of Harmon International, Inc.; Eastern Acoustics Works, Inc.; Meyer Sound, Inc.; Turbosound, Inc.; and Renkus-Heinz, Inc. All of these companies have substantially greater assets and financial resources than we do. Most of the competitors compete in both the higher priced, more sophisticated line of loudspeaker systems, which are similar to our Professional Contractor Speaker Systems, and lower priced,

Table of Contents

less sophisticated line of loudspeaker systems, similar to our Universal Soldier Speaker Systems. Meyer Sound and Renkus-Heinz are engaged only in the more expensive speaker systems. All of these competitors presently use the compression driver component in their sound systems. Although our ribbon driver products are new, the nature of the market for our loudspeaker products is highly competitive and sensitive to the introduction of new products. As a result, we may experience increasing competition in the future.

Our success will depend, in part, upon our ability to increase sales in our targeted markets. We may not be able to compete successfully with our competitors and the pressures from competitors may have a material adverse effect on us. Our success will depend in large part upon our ability to increase our share of our target market and to sell additional products to existing customers. However, future competition could result in price reductions, reduced margins or decreased sales of our products.

We currently compete primarily with the internal design efforts of larger and more established companies that have larger technical staffs, more established and larger marketing and sales organizations and significantly greater financial resources than we have. Such competitors may be able to respond more quickly to new or emerging technologies and changes in customer requirements. They are able to devote greater resources to the development, sale

and promotion of their products than we are able to devote. They may develop products that are superior in certain respects to our products or may develop products that achieve greater market acceptance.

Proprietary Technology

We are the owners of the proprietary ribbon driver technology for our models PRD 500 and PRD 1000. We have no patents on this technology. However, we have filed a Disclosure Statement with the US Patent and Trademark Office as evidence of our conception of the invention, and we filed a patent application in September 2002. Although we have filed for a patent we cannot be certain that a patent will be granted, or that it will give us an advantage over our competitors.

The laws of some foreign countries do not protect or enforce proprietary rights to the same extent as do the laws of the United States. Also, our domestic and international competitors may develop other technology which produces results similar to our technology. We expect that some loudspeaker products may be subject to patent infringement claims as the number of products and competitors in our industry grows. As a result, third parties may assert patent infringement claims against us in the future, and such claims may not be resolved in our favor. Any such claims, with or without merit, could be time-consuming and may result in costly litigation. Such claims may also require us to enter into royalty or licensing agreements. Such royalty or licensing agreements, if they become necessary, may not be available on terms that are favorable to us, if at all. In addition, we may be forced to commence litigation in the future to protect our trade secrets or proprietary rights, or to determine the validity and extent of the proprietary rights of others. Such possible litigation could result in substantial costs and diversion of our energy and resources.

Table of Contents

Employees

We have a total of 11 employees, one of which is executive, two are administrative, one is a marketing director, and seven are technical. In the past, we have employed temporary and part-time employees to meet production obligations and fill orders. There is presently no labor union contract between any union and us. We do not anticipate our employees will seek to form or join a union for the foreseeable future.

Business Strategy

As a result of our experience, we have determined that maintaining consistent contact with distributors, customers and others in the industry and continued marketing through conventions and trade magazines will produce additional business. We have determined that marketing our products by the distributor/sales representative network is best suited to generate revenue. Our distributors are expected to be our primary source of business in coming years. In addition, the sales representatives will enable us to monitor the effectiveness of our marketing program. Now that we have the ability to manufacture our own ribbon drivers, we will derive savings from the cost of purchasing compression drivers and ribbon drivers from third parties. Both the cost savings and the quality of the lower distortion, as demonstrated by our Tef 20 analysis device, are expected to enable us to establish a place in the home, commercial and professional loudspeaker markets.

We have recently re-focused our business on the development and application of our ribbon driver technology. This new business may not be successful and our future operating performance may not bring about the results that we are seeking. Our operating results for the future periods are subject to all of the risks and uncertainties which are inherent in the establishment of new business enterprises. Our future operating results will depend upon:

- .
market acceptance of our ribbon driver technology;
- .
our success in establishing and expanding the distribution network nationwide and internationally;
- .
our success in establishing ribbon driver products as a retail product line;
- .
our success in attracting a strategic partner;
- .
availability of capital;
- .
our success in attracting and retaining motivated and qualified personnel, particularly in the technical areas; and
- .
our marketing of new products and ribbon driver technology applications.

Our initial market concentration has been in the area of church construction and cinema theatre construction. The larger speakers we currently manufacture have been specifically designed for use in the church and cinema markets.

We intend to continue advertising in trade journals and attending industry conventions to maintain our image as a competitor in the loudspeaker industry in the U.S. and internationally. We are seeking to derive profits and competitiveness by sales through the dealer network of our product line using our new, less costly, ribbon driver manufactured by us, beginning in 2001. However, we cannot assure investors or predict profits from distributor sales or any other business activity.

Table of Contents

At the appropriate time, we intend to investigate possible strategic alliances with key industry participants to strengthen our image, our product components and our distribution pattern. We cannot be certain that a future alliance opportunity will present itself; or, if an opportunity is presented, that it will result in a profitable working relationship. It is likely that in some future financial quarter or quarters, our operating results will be below the expectations of securities analysts and investors. If a shortfall in revenue occurs, the market price for our common stock may decline significantly. The factors that may cause our quarterly operating results to fall short of expectations include:

- .
- our ability to develop and market our new ribbon driver loudspeaker products in a timely manner;
- .
- the size and timing of customer orders;
- .
- seasonality of sales;
- .
- availability of capital;

the degree and rate of growth of the markets in which we compete and the accompanying demand for our loudspeaker products;

our suppliers' ability to perform under their contracts with us.

Many of these factors are beyond our control. For these reasons, you should not rely on period-to-period comparisons of our financial results to forecast our future performance.

Property

We do not own any real property. We presently lease and operate in 19,500 square feet of office and factory space at our current address from a nonaffiliated landlord. The lease expires on August 31, 2003. The monthly rental is presently \$4,650. Our facility is divided into four equal 3,000 square foot sections that are internally connected plus one 7,500 square foot adjoining section. One of the 3,000 square foot sections is used for cabinet fabrication; another is used for storage of completed cabinets and component storage; the third is used for assembly and shipping; and the fourth is used for engineering and administration. The 7,500 square foot section is used for inventory, packaging and trade show materials storage. These facilities are suitable for producing in excess of 300 finished speaker cabinets per week and for the production of up to 1,500 ribbon drivers per month. Although we have no plans to relocate our facility, should the occasion arise to do so, there is ample factory and office space available at other locations in the region at similar or competitive rates. In addition, we have three subcontractor cabinet shops that add to our production capabilities. These companies are highly automated and can supply up to a total of 2000 cabinets per week on scheduled notice.

In July 2003, we agreed to lease an additional 7,500 square feet of space for \$2,000 per month. We are planning the build-out of this space, which we intend to use for additional inventory space for the components and cabinets needed for (a) planned increases in production, (b) additional engineering testing space to perform critical tests and produce data for sound system designers to provide specifications for products, and (c) on-site product demonstrations. We anticipate that this additional space, together with our existing space, will be sufficient to meet our needs for projected sales levels for the next two to three years.

Litigation

On December 24, 2002, 21-Day Capital Corporation filed a complaint against us in the Superior Court of California, County of Los Angeles. 21-Day Capital Corporation is the assignee of certain rights of Muir, Crane & Co. The complaint alleges breach of contract and seeks the payment of \$48,750.67, plus interest, attorneys' fees and costs, and other relief as the court deems proper. We filed an answer on February 6, 2003 denying the allegations contained in the complaint and asserting affirmative defenses.

MANAGEMENT

Directors, Executive Officers, Promoters and Control Persons

The following table sets forth the names, ages and offices of the Company's executive officers and directors:

Name	Age	Office
John M. Gott	52	President, CEO, CFO and Director
Robert H. Luke, Ph.D.	61	Director
Michael L. Maples	54	Director

John M. Gott, our President, Chief Executive Officer, Chief Financial Officer and Director, founded SLS in July 2000 in connection with the merger between SLS and its predecessor. He was also founder and Chief Executive Officer of Sound and Lighting Specialists, Inc., the predecessor of SLS International, Inc., which was founded in October 1994. The predecessor engaged in the sale and installation of sound and lighting systems. Mr. Gott acted as its President and CEO since inception. In that capacity he spearheaded its growth with respect to the sale and installation of sound and lighting systems across the world, including in Carnegie Hall and Disney World in Tokyo. He was our primary salesman through August 2001, when we hired another salesman. Mr. Gott has also been instrumental in the conceptual design and marketing of most of our products.

Robert H. (Robin) Luke, Ph.D., has served as a Director since 2001. He is Professor of Marketing and the Department Head of the Marketing Department at Southwest Missouri State University. He has served as the first Department Head of two Marketing Departments and directed the development of the MBA/MPA programs for the

University of the Virgin Islands. Dr. Luke has owned and developed several businesses and regularly consults with major U.S. corporations and institutions on marketing issues as a Senior Consultant with R.H. Luke & Associates. He served the Academy of Marketing Science as a member of its Board of Governors from 1992 to 1996 and as Vice President of Development, Vice President and Vice President for Academic Affairs. He presently serves as a Board Member of the Marketing Management Association. He has given or continues to give service commitments to the Boards of Directors or Boards of Advisors of the following organizations: Missouri Partnership for Outstanding Schools, Ozark Greenways, Community Investment Alliance, Sports Directories International, the Community Foundation of the Ozarks, Vision 20/20, the Downtown Springfield Association, Ozarks Chapter of the Boy Scouts of America, A+ Advisory Board of Glendale High School, and Lake County Youth Soccer.

Table of Contents

Dr. Luke has presented numerous papers at international, national and regional marketing conferences. He serves on the Editorial Review Board of the Journal of the Academy of Marketing Science, Journal of Marketing Management. His writings have appeared in over 14 publications. He is the author of *Business Careers*, an informational source on career opportunities for students, counselors and advisors wishing to know more about business professions. At the age of sixteen, under the name Robin Luke, he wrote and performed *Susie Darling*, a song that sold over two million copies from 1958 to 1960 and became number one around the world. His career as a recording artist spanned five years and 14 records. He has received numerous awards, including Distinguished Fellow of the Academy of Marketing Science, the Marketing Management Association's Firooz Hekmat Award in Consumer Behavior and their prestigious Marketing Excellence Award, best paper awards from national and international organizations, and the Gift of Time Award from his home city of Springfield Missouri.

Michael L. Maples has served as a Director since 2001. He is Chief Financial Officer, Chief Administrative Officer, Vice President, Treasurer and Corporate Secretary of TranSystems Corporation, an engineering, planning, and consulting firm for the transportation industry. From 1994 to 1996, he was Senior Financial Consultant for Glass & Associates, a consultant to businesses in critical stages of development. From 1991 to 1994, Mr. Maples was Senior Vice President and Controller for Franklin Savings Association, a publicly held group of financial companies. From 1987 to 1991, he was Vice President of Finance & Information Systems for McNally Wellman Company. From 1987 to 1989 he was Treasurer and Corporate Secretary for McNally Pittsburgh, Inc., a group of privately owned engineering and manufacturing companies supplying equipment, systems, parts, and service to the international and domestic material handling industry. From 1983 to 1987, he was Controller and Staff CPA for Gage & Tucker, a multi-office law firm specializing in corporate representation. From 1976 to 1983, he was a Certified Public Accountant, first at Touche Ross & Co., then with a regional firm, and finally as a sole practitioner.

Each director is elected at the annual meeting of stockholders and each director is elected to serve until his successor shall be elected and shall qualify.

Section 16(a) Beneficial Ownership Reporting Compliance

No reports have been required under Section 16(a) of the Securities Exchange Act of 1934, as amended, because our common stock is not registered under Section 12 of such act.

Statement as to Indemnification

Section 145 of the Delaware General Corporation Law provides for indemnification of our officers, directors, employees and agents. In general, these sections provide that persons who are officers or directors of the corporation may be indemnified by the corporation for acts performed in their capacities as such.

Table of Contents

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers or persons controlling SLS pursuant to the provisions in the SLS By-Laws, we have been informed that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act and is therefore unenforceable.

Executive Compensation

The following summarizes the principal compensation received by our executive officers for the fiscal years indicated:

Name & Principal Position	Year	Salary	Bonus	Other Annual
				Compensation(a)
John M. Gott	2002	\$50,440	0	\$3,898
President	2001	\$50,440	0	\$2,614
Richard L. Norton(b)	2002	\$35,384	0	\$2,487
Vice President	2001	\$40,000	0	\$6,547

(a)

All amounts are payments of medical insurance.

(b)

Resigned on November 18, 2002.

Each executive officer also serves as a director but receives no compensation for acting as a director. We intend to pay future outside directors who are not officers reasonable and customary fees for their services as directors and for attendance, in person or by telephone, at each meeting of the Board of Directors. We presently have no audit, compensation or nominating committee.

Table of Contents

PRINCIPAL STOCKHOLDERS

The following table sets forth certain information as of August 6, 2003 with respect to the beneficial ownership of our common stock by all persons known by us to be beneficial owners of more than 5% of the outstanding shares of our common stock, by directors who own common stock and all officers and directors as a group:

Name & Address	Shares	Percent(1)
John M. Gott 1020 S. Pickwick Springfield, MO 65804	10,590,736(2)	43.9%
Robert H. Luke 818 N. Forest Springfield, MO 65802	16,500(3)	*
Michael L. Maples 12608 Howe Drive Leawood, KS 66209	10,000(3)	0%
Richard L. Norton 818 N. Forest Springfield, MO 65802	3,420,544	14.2%
Officers and Directors as a Group (3 persons)	10,587,236	43.9%

All such shares are owned directly by the named stockholders.

*

Less than one percent

(1)

Based upon a total of 24,114,528 shares outstanding on August 6, 2003.

(2)

Includes (a) an option to purchase 3,420,544 shares owned by Richard L. Norton for \$.05 per share, or if lower, 50% of the 5-day average trading price if the trading price and (b) an option to purchase 10,000 shares at \$0.25 per share.

(3)

Includes options to purchase 10,000 shares at \$0.25 per share.

Table of Contents
Equity Compensation Plans

On August 6, 2003, we had the following securities issued and available for future issuance under equity compensation plans:

	(a)	(b)	(c)
	Number of securities to	Weighted-average exercise	Number of securities
	be issued upon exercise of	price of outstanding options,	remaining available for
	outstanding options,	warrants and rights	future issuance
	warrants and rights	warrants and rights	under equity

Equity compensation plans not approved by security holders	100,000 shares of preferred stock*	\$2.50 per share	0
Equity compensation plans approved by security holders	1,100,000 shares of common stock	\$0.25 per share	0

Total	1,745,000 shares of	\$0.27 per share of	1,355,000 shares of
	common stock and	common stock and	common stock
	100,000 shares of	\$2.50 per share of	
	preferred stock	preferred stock	

*

Represents options to purchase 100,000 shares of Class A preferred stock at an exercise price of \$2.50 per share (each such share of preferred stock converts into 10 shares of common stock). These options were issued pursuant to an agreement dated April 18, 2002 with Sam F. Hamra for consulting services.

CERTAIN TRANSACTIONS WITH MANAGEMENT AND OTHERS

During 1999, certain receivables totaling \$80,000 due to SLS from Mr. Gott and Richard Norton were paid by them through an assignment of certain equipment rental fees. The assigned fees had been due them individually for equipment owned by them and leased to non-affiliated third parties. We also received a commission from Messrs. Gott and Norton for handling the rentals and income over a period of three years on their behalf. As of June 30, 2003, we owed \$22,674 to Mr. Gott and \$0 to Mr. Norton.

[Table of Contents](#)

SELLING STOCKHOLDERS

The following table presents information regarding the selling stockholders. Neither the selling stockholders nor any of their affiliates have held a position or office, or had any other material relationship, with us.

	Shares	Percentage of	Shares to be	Percentage of Shares
	Beneficially	Outstanding Shares		
Selling Stockholders	Owned Before	Beneficially Owned	Sold in the	Beneficially Owned
	Offering	Before Offering (1)	Offering	After Offering
Steerpike (Overseas) Ltd. (1)	1,000,000	4.0%	1,000,000	0%
Beth Broday (1)	100,000	0.4%	100,000	0%

(1)

Represents shares that may be acquired upon the exercise of outstanding and fully exercisable options at an exercise price of \$0.25 per share.

(2)

Percentage of outstanding shares is based on 25,214,528 shares of common stock, which consists of the number of shares outstanding on August 6, 2003, plus the assumed exercise of the options to purchase 1,100,000 shares held by the selling stockholders.

PLAN OF DISTRIBUTION

The common stock offered by this prospectus is being offered by Steerpike (Overseas), Ltd., the selling stockholder. The common stock may be sold or distributed from time to time by the selling stockholder directly to one or more purchasers or through brokers, dealers, or underwriters who may act solely as agents at market prices prevailing at the time of sale, at prices related to the prevailing market prices, at negotiated prices, or at fixed prices, which may be changed. The sale of the common stock offered by this prospectus may be effected in one or more of the following methods:

.

ordinary brokers transactions

.

transactions involving cross or block trades

.

through brokers, dealers, or underwriters who may act solely as agents

at the market into an existing market for the common stock

in other ways not involving market makers or established trading markets, including direct sales to purchasers or sales effected through agents

in privately negotiated transactions

any combination of the foregoing

In order to comply with the securities laws of certain states, if applicable, the shares may be sold only through registered or licensed brokers or dealers. In addition, in certain states, the shares may not be sold unless they have been registered or qualified for sale in the state or an exemption from the registration or qualification requirement is available and complied with.

Brokers, dealers, underwriters, or agents participating in the distribution of the shares as agents may receive compensation in the form of commissions, discounts, or concessions from the selling stockholder and/or purchasers of the common stock for whom the broker-dealers may act as agent. The compensation paid to a particular broker-dealer may be less than or in excess of customary commissions.

Table of Contents

Neither we nor the selling stockholder can presently estimate the amount of compensation that any agent will receive. We know of no existing arrangements between the selling stockholder, any other stockholder, broker, dealer, underwriter, or agent relating to the sale or distribution of the shares offered by this prospectus. At the time a particular offer of shares is made, a prospectus supplement, if required, will be distributed that will set forth the names

of any agents, underwriters, or dealers and any compensation from the selling stockholder and any other required information.

We will pay all of the expenses incident to the registration, offering, and sale of the shares to the public other than commissions or discounts of underwriters, broker-dealers, or agents. We have also agreed to indemnify the selling stockholder and related persons against specified liabilities, including liabilities under the Securities Act.

We have advised the selling stockholder that while it is engaged in a distribution of the shares included in this prospectus it is required to comply with Regulation M promulgated under the Securities Exchange Act of 1934, as amended. With certain exceptions, Regulation M precludes the selling stockholder, any affiliated purchasers, and any broker-dealer or other person who participates in the distribution from bidding for or purchasing, or attempting to induce any person to bid for or purchase any security which is the subject of the distribution until the entire distribution is complete. Regulation M also prohibits any bids or purchases made in order to stabilize the price of a security in connection with the distribution of that security. All of the foregoing may affect the marketability of the shares offered hereby this prospectus.

This offering will terminate on the date that all shares offered by this prospectus have been sold by the selling stockholder.

DESCRIPTION OF CAPITAL STOCK

Common Stock

Our authorized capital stock consists of 75,000,000 shares of common stock, par value \$.001 per share. On August 6, 2003, there were outstanding a total of 24,114,528 shares of common stock. The holders of shares of common stock:

.

have equal ratable rights to dividends on funds legally available for dividends, provided dividends are declared by the our Board of Directors

.

are entitled to share proportionately in all of our assets available for distribution to holders of common stock upon any sale, dissolution or winding up of our affairs

.
do not have priority rights to subscribe for future offerings of shares of common stock by us

.
do not have any priority rights to convert their shares of common stock into any of our other securities

.
do not have rights to subscribe for shares or convert their shares

.
have no right to have their shares redeemed by us

.
are entitled to one vote per share on all matters upon which stockholders may vote at all meetings of stockholders

Table of Contents

All shares of common stock now outstanding are fully paid for and are not assessable by us; and all the shares of common stock that are the subject of this offering, when issued, will be fully paid for and will not be assessable by us.

The holders of shares of our common stock do not have cumulative voting rights, which are rights to accumulate votes to be cast for directors in an election. In this way a stockholder could vote his or her entire total of votes for one director only, and not vote for any other director. However, because there is no cumulative voting, the holders of more than 50% of the outstanding shares, when voting for the election of directors, can elect all of the directors to be elected, if they so choose. As a result, the holders of the remaining shares will not be able to elect any of our directors. Upon completion of this offering, Mr. Gott will own 42% of our common stock. Such a concentration of ownership could have an adverse effect on the price of the common stock. It may have the effect of delaying or preventing a change in control, including transactions in which stockholders might otherwise receive a premium for their shares over the then current market prices.

Some provisions of our certificate of incorporation and bylaws could make it more difficult for a third party to acquire us even if a change of control would be beneficial to our stockholders. These provisions include:

.
authorizing the issuance of preferred stock without common stockholder

approval

.
prohibiting cumulative voting in the election of directors

.
limiting the persons who may call special meetings of stockholders

Preferred Stock

Our authorized capital stock also includes 5,000,000 shares of preferred stock, \$.001 par value, of which 2,000,000 shares have been designated Series A Preferred Stock and are outstanding on the date of this prospectus. Our articles of incorporation authorize a class of preferred stock commonly known as a blank check preferred stock. Specifically, the preferred stock may be issued from time to time by the board of directors as shares of one or more classes or series. Our board of directors, subject to the provisions of our Certificate of Incorporation and limitations imposed by law, is authorized to adopt resolutions to issue the shares; to fix the number of shares; to change the number of shares constituting any series; to provide for or change the voting powers, designations, preferences, and relative, participating, optional or other special rights, qualifications, limitations or restrictions; the dividend rights, including whether dividends are cumulative; to fix dividend rates; to fix terms of redemption, including sinking fund provisions; to fix redemption prices; to fix conversion rights; and to fix liquidation preferences of the shares constituting any class or series of the preferred stock.

In each such case, we will not need any further action or vote by our stockholders. One of the effects of undesignated preferred stock may be to enable the board of directors to render more difficult or to discourage an attempt to obtain control of us by means of a tender offer, proxy contest, merger or otherwise, and thereby to protect the continuity of our management. The issuance of shares of preferred stock pursuant to the board of director s authority described

Table of Contents

above may adversely affect the rights of holders of common stock. For example, preferred stock issued by us may rank prior to the common stock as to dividend rights, liquidation preference or both, may have full or limited voting rights and may be convertible into shares of common stock. Accordingly, the issuance of shares of preferred stock may discourage bids for the common stock at a premium or may otherwise adversely affect the market price of the common stock.

We designated 2,000,000 shares as Series A Convertible Preferred Stock. Such shares were sold from time to time in a private placement that commenced in September 2001 and concluded in July 2003. The shares are convertible to common stock one year from the date of purchase at a conversion rate of 10 shares of common stock for each share of preferred stock.

Stock Option Plan

Our Board of Directors approved the SLS International, Inc. 2000 Stock Purchase and Option Plan (the Plan) and the plan was approved by existing stockholders.

Our Board of Directors administers the Plan. The Plan affords key employees, officers, and consultants, who are responsible for our continued growth, an opportunity to acquire an investment interest in SLS, and to create in such individuals a greater incentive and concern for the welfare of SLS. By means of this 2000 Stock Purchase and Option Plan, we seek to retain the services of persons now holding key positions and to secure the services of persons capable of filling such positions.

We have reserved up to 2,000,000 shares of common stock for issuance upon exercise of options that may be issued from time to time under the Plan. The shares to be issued are subject to adjustment in the event of stock dividends, splits and other events that affect the number of shares of common stock outstanding.

Maximum Purchase. The options offered in the plan are a matter of separate inducement and are in addition to any salary or other compensation for the services of any key employee or consultant. The options granted under the plan are intended to be either incentive stock options or non-qualified or non- statutory stock options.

Option. Participants will receive such options as are granted from time to time by the Board of Directors. The option will state the number of shares and price of common stock to be purchased upon exercise of the options by the option holder.

Exercise Price. The purchase price per share purchasable under an option will be determined by the Board of Directors. However, for statutory options, the purchase price shall not be less than 90% of the fair market value of a share on the date of grant of such option. Furthermore, any option granted to a participant under the plan who, at the time the option is granted, is one of our officers or directors, the purchase price shall not be less than 100% of the fair market value of a share on the date of grant of such option. In the case of an incentive stock option granted to a participant who, at the time the option is granted, is a 10% stockholder, the purchase price for each share will be an amount not less than 110% of the fair market value per share on the date the incentive stock option is granted.

Table of Contents

Term of Option. The term of each option shall be fixed by the Administrator which in any event will not exceed a term of 10 years from the date of the grant.

Termination of Employment. The Administrator will have the right to specify the effect to a participant upon his or her retirement, death, disability, leave of absence or any other termination of employment during the term of any option.

Amendments. The Board of Directors may amend, suspend, discontinue or terminate the Plan; provided, however, that, without approval of our stockholders, no such amendment, suspension, discontinuation or termination will be made that: 1. would cause Rule 16b-3 under the Securities Exchange Act of 1934 to become unavailable with respect to the Plan; 2. would violate the rules or regulations of any national securities exchange on which our shares are traded or the rules or regulations of the NASD that are applicable to us; or 3. would cause us to be unable, under the Internal Revenue Code, to grant investment stock options under the Plan.

SHARES ELIGIBLE FOR FUTURE SALE

Upon completion of this offering, we will have 25,214,528 shares of common stock issued and outstanding. Prior to this offering, 14,365,736 of our outstanding shares are deemed to be restricted shares under the Securities Act of 1933. The restricted shares will be eligible for sale pursuant to Rule 144 of the Securities Act at the expiration of the one-year holding period from their date of acquisition. The one-year holding period for some shares has already expired. In addition, we have 1,469,300 shares of preferred stock outstanding on August 28, 2003. As of August 28, 2003, 318,000 shares of preferred stock have been converted into common stock and such common stock is eligible for sale pursuant to Rule 144 at the expiration of the one-year holding period from their date of acquisition.

Pursuant to a Consent Order with the State of Missouri, Mr. Gott agreed to lockup his shares through May 5, 2005, to be released only upon specified occurrences, or in increments after May 5, 2003. When eligible under the lock-up agreement, Mr. Gott, who owns 10,590,736 shares, may only sell up to 2½% of his outstanding shares in any 3-month period. Such sales would also be subject to the resale restrictions of Rule 144 of the Securities Act of 1933, as amended. Future sales may have a negative effect on the price of our shares in the public market. This may cause the price of our common stock to decline and may prevent investors from reselling their shares at a profit.

LEGAL MATTERS

Legal matters in connection with this offering will be passed upon by Freeborn & Peters LLP, 311 South Wacker Drive, Suite 3000.

Table of Contents

EXPERTS

The audited financial statements of the Company as of December 31, 2002 and 2001 and for each of the three years in the period ended December 31, 2002 appearing in this prospectus and in the registration statement of which this

prospectus forms a part, have been audited by Weaver & Martin, LLC, independent public accountants. Their report, which appears elsewhere herein, includes an explanatory paragraph as to the ability of SLS to continue as a going concern. The financial statements are included in reliance upon such report and upon the authority of such firm as an expert in auditing and accounting.

FURTHER INFORMATION

We are subject to the reporting requirements of the Securities Exchange Act of 1934, as amended, and file reports, proxy statements and other information with the Securities and Exchange Commission. These reports, proxy statements and other information may be inspected and copied at the public reference facilities maintained by the Securities and Exchange Commission at 450 Fifth Street, N.W., Washington, D.C. 20549 and at the Securities and Exchange Commission's regional offices. You can obtain copies of these materials from the Public Reference Section of the Securities and Exchange Commission upon payment of fees prescribed by the Securities and Exchange Commission. You may obtain information on the operation of the Public Reference Room by calling the Securities and Exchange Commission at 1-800-SEC-0330. The Securities and Exchange Commission's Web site contains reports, proxy and information statements and other information regarding registrants that file electronically with the Securities and Exchange Commission. The address of that site is <http://www.sec.gov>.

We have filed a registration statement on Form SB-2 with the Securities and Exchange Commission under the Securities Act with respect to the securities offered in this prospectus. This prospectus, which is filed as part of a registration statement, does not contain all of the information set forth in the registration statement, some portions of which have been omitted in accordance with the Securities and Exchange Commission's rules and regulations. Statements made in this prospectus as to the contents of any contract, agreement or other document referred to in this prospectus are not necessarily complete and are qualified in their entirety by reference to each such contract, agreement or other document which is filed as an exhibit to the registration statement. The registration statement may be inspected without charge at the public reference facilities maintained by the Securities and Exchange Commission, and copies of such materials can be obtained from the Public Reference Section of the Securities and Exchange Commission at prescribed rates.

SLS INTERNATIONAL, INC.

NOTES TO CONDENSED FINANCIAL STATEMENTS

Note 1 - Basis of Presentation

The accompanying unaudited condensed financial statements at June 30, 2003 have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-QSB and reflect all adjustments which, in the opinion of management, are necessary for a fair presentation of financial positions as of June 30, 2003 and results of operations and cash flows for the six months ended June 30, 2003. All such adjustments are of a normal recurring nature. The results of operations for the interim period are not necessarily indicative of the results expected for a full year. Certain amounts in the 2002 financial statements have been reclassified to conform to the 2003 presentations. The statements should be read in conjunction with the financial statements and footnotes thereto included in the Company's Form 10-KSB for the year ended December 31, 2002.

Note 2 - Commitments and Contingencies

Going Concern

The accompanying unaudited condensed financial statements at June 30, 2003 have been prepared in conformity with generally accepted accounting principles which contemplate the continuance of the Company as a going concern. The Company has suffered losses from operations during the six months ended June 30, 2003 and the years ended December 31, 2002, 2001, 2000, and 1999. The Company's cash position may be inadequate to pay all of the costs associated with establishing a market for sales of its loudspeakers. Management intends to use borrowings and security sales to mitigate the effects of its cash position, however no assurance can be given that debt or equity financing, if and when required, will be available. The unaudited condensed financial statements do not include any adjustments relating to the recoverability and classification of recorded assets and classification of liabilities that might be necessary should the Company be unable to continue in existence.

Note 3 - Notes Payable

The interest rate on the current notes range from 5% to 10% and all are past due or demand notes.

Note 4 - Stock Transactions

In May, 2001, the Company completed a public offering. The number of shares sold was 4,000,000. Included with the purchase of the shares was a Class A warrant and a Class B warrant. The Class A warrants expire on February 4, 2004 and are exercisable at a price of \$.50 per share. The Class B warrants expire on August 4, 2004 and are exercisable at a price of \$3.00 per share. The warrants are detachable from the common stock but are not separable from each other until the Class A warrant is exercised.

Table of Contents

SLS INTERNATIONAL, INC.

NOTES TO CONDENSED FINANCIAL STATEMENTS continued

Note 4 - Stock Transactions - continued

From January 1, 2003 to June 30, 2003, no Class A warrants were exercised. As of June 30, 2003, 2,000 shares of common stock purchased through the exercise of the A warrants in the year ended December 31, 2002 had not been issued and therefore are shown on the balance sheet as common stock not issued but owed to buyers. 3,111,000 Class A warrants are outstanding as of June 30, 2003. No Class B warrants have been exercised as of June 30, 2003.

In the six months ended June 30, 2003, the Company sold 148,640 shares of preferred stock for \$371,600. This preferred stock contained beneficial conversion features. The features allows the holder to convert the preferred to 10 shares of common stock after a one year period. A discount on preferred shares of \$152,570 relating to the beneficial conversion feature was recorded on these sales, which will be amortized over a one year period beginning with the date the shareholders purchased their shares. \$212,558 was amortized to retained earnings in the six months ended June 30, 2003. At June 30, 2003, the unamortized beneficial conversion on preferred shares was \$173,306.

In January of 2002, an agreement was signed with Office Radio Network for consulting services to be performed from January 5, 2002 to January 5, 2003. As compensation for consulting services, the Company gave Office Radio Network \$15,000 and issued 150,000 shares of common stock. The shares of common stock were issued on November 19, 2002. Using the market value on the date the agreement was signed, the shares were valued at \$111,000

and recorded as a debit in the equity section of the balance sheet as unamortized cost of stock issued for services. The expense will be amortized over the one year period of the agreement. Consulting expense relating to this agreement was \$1,388 for the six months ended June 30, 2003. On June 30, 2003, there was \$0 remaining in unamortized cost of stock issued for services on the balance sheet.

In January of 2002, three agreements were signed for consulting services to be performed. The agreements paid 300,000 shares to the consultants in exchange for \$3,000, an executed note receivable for \$27,000, and services to be rendered. As of March 31, 2003, 200,000 of the shares had not been issued and are therefore recorded as common stock not issued but owed to buyers on these financial statements. 100,000 of the common shares were issued on November 19, 2002. Using the market value on the date the agreements were signed, the shares were valued at \$237,000. Value of the shares over consideration given is \$207,000 and is recorded as a debit in the equity section of the balance sheet as unamortized cost of stock issued for services. The expense will be amortized over a one year period. Consulting expense relating to these agreements was \$8,790 for the six months ended June 30, 2003. On June 30, 2003 there was \$0 remaining in unamortized cost of stock issued for services on the balance sheet. A valuation allowance of \$27,000 has been used to offset the resulting note receivable from the transaction and therefore \$0 is reflected in the asset section of the balance sheet for the note receivables.

Note 4 - Stock Transactions continued

In April of 2002, an agreement was signed with The Equitable Group, LLC for consulting services to be performed from March 26, 2002 to September 26, 2002. As compensation for consulting services, the Company agreed to issue 600,000 shares of common stock, of which 100,000 were nonrefundable, to the consultant. The Company issued

100,000 shares on April 9, 2002. Using the market value on the date the agreement was signed, the shares were valued at \$51,000 and recorded as a debit in the equity section of the balance sheet as unamortized cost of stock given for services. On May 2, 2002, the Company terminated the agreement. Upon termination of the agreement all

unamortized costs were amortized as consulting expense.

In April of 2002, an agreement was signed with Muir, Crane, & Co. for consulting services to be performed April 2, 2002 to April 2, 2003. As compensation for consulting services the Company agreed to pay a retainer of \$4,000 per month and issue 200,000 shares of common stock. 100,000 shares were issued on April 9, 2002 and 100,000 shares were issued on July 18, 2002. Using the market value on the date the agreement was signed, the shares were valued at \$95,000 and recorded as a debit in the equity section of the balance sheet as unamortized cost of stock issued for services. At December 31, 2002, the consulting agreement had been terminated and all costs were amortized.

In April of 2002, an agreement was signed with Sam Hamra for consulting services to be performed April 18, 2002 to April 18, 2003. As compensation for consulting services the Company agreed to issue 70,000 shares of common stock. 70,000 shares of common stock were issued on April 18, 2002. Using the market value on the date the agreement was signed, the shares were valued at \$39,200 and recorded as a debit in the equity section of the balance sheet as unamortized cost of stock issued for services. As compensation, Mr. Hamra was also issued options to purchase 100,000 shares of preferred stock at a strike price of \$2.50 per share. This preferred stock was convertible into 1,000,000 shares of common stock after a period of one year. The options expire when the preferred stock offering closes. The closing date has been extended to July 31, 2003. Using the Black-Scholes pricing model, the options were valued at \$311,222 and shown as a debit in the equity section of the balance sheet as unamortized cost of stock issued for services. At December 31, 2002, the consulting agreement had been terminated and all costs were amortized.

In June of 2002, an agreement was signed with Liquid Solutions Corp. for consulting services to be performed June 10, 2002 to September 10, 2002. As compensation for consulting services the Company agreed to issue 500,000 shares of common stock. 500,000 shares of common stock were issued on June 19, 2002. Using the market value on the date the agreement was signed, the shares were valued at \$155,000 and recorded as a debit in the equity section of the balance sheet as unamortized cost of stock issued for services. The expense will be amortized over the three months of the agreement.

Note 4 - Stock Transactions - continued

In August of 2002, an agreement was signed with Atlantic Services, Ltd., a foreign corporation based in Costa Rica, for consulting services to be performed August 15, 2002 to August 15, 2003. As compensation for consulting services the Company agreed to issue 125,000 shares of common stock. 125,000 shares of common stock were issued on August 15, 2002. Using the market value on the date the agreement was signed, the shares were valued at \$43,750 and recorded as a debit in the equity section of the balance sheet as unamortized cost of stock issued for services. The expense will be amortized over the one year period of the agreement. Consulting expense relating to this agreement was \$21,874 for the six months ended June 30, 2003. On June 30, 2003, there was \$5,251 remaining in unamortized cost of stock issued for services on the balance sheet.

In September of 2002, an agreement was signed with Art Malone, Jr. for consulting services to be performed September 10, 2002 to March 10, 2003. As compensation for consulting services the Company agreed to issue 250,000 shares of common stock upon signing of the agreement and another 250,000 shares upon the consummation or signing of a celebrity brought directly or indirectly by Mr. Malone as an endorser. 250,000 shares of common stock were issued on September 17, 2002. As of March 31, 2003 no other shares have been issued in regards to this agreement. Using the market value on the date the agreement was signed, the shares were valued at \$60,000 and recorded as a debit in the equity section of the balance sheet as unamortized cost of stock issued for services. The expense will be amortized over the six month period of the agreement. Consulting expense relating to this agreement was \$22,800 for the six months ended June 30, 2003. On June 30, 2003, there was \$0 remaining in unamortized cost of stock issued for services on the balance sheet.

In October of 2002, an agreement was signed with Patrick Armstrong of Titan Entertainment Group for consulting services to be performed November 5, 2002 to November 5, 2003. As compensation for consulting services the Company agreed to issue 100,000 shares of common stock and 250,000 options for 250,000 shares of common stock. The options have a strike price of \$.30 and expire ten years from date of issuance. 100,000 shares of common stock were issued on November 5, 2002. Using the market value on the date the agreement was signed, the shares were valued at \$39,000 and recorded as a debit in the equity section of the balance sheet as unamortized cost of stock issued for services. Using the Black-Scholes pricing model, the options were valued at \$57,471 and recorded as a debit in the equity section of the balance sheet as unamortized cost of stock issued for services. All costs will be amortized over the one year period of the agreement. Consulting expense relating to this agreement was \$48,236 for the six months ended June 30, 2003. On June 30, 2003, there was \$31,225 remaining in unamortized cost of stock issued for services on the balance sheet.

Note 4 - Stock Transactions - continued

In February 2003, an agreement was signed with Tom Puccio for consulting services to be performed February 25, 2003 to August 25, 2003. As compensation for consulting services the Company agreed to issue 300,000 shares of common stock. 300,000 shares of common stock were issued on February 25, 2003. Using the market value of the date the agreement was signed, the shares were valued at \$93,000 and recorded as a debit in the equity section of the balance sheet as unamortized cost of stock issued for services. The cost will be amortized over the six month period of the agreement. Consulting expense relating to this agreement was \$40,920 for the six months ended June 30, 2003. On June 30, 2003, there was \$52,080 remaining in unamortized cost of stock issued for services on the balance sheet.

In the six months ended June 30, 2003, 176,000 shares of preferred stock were converted into 1,760,000 shares of common stock. 420,000 shares were issued in February of 2003. The remaining 1,340,000 shares were unissued at June 30, 2003 and are therefore shown in common stock not issued but owed to buyers.

Note 5 - Subsequent Events

In July 2003, 24,000 shares of preferred stock were converted into 240,000 shares of common stock.

In August 2003, the expiration dates on the Class A and Class B warrants were extended to February 4, 2004.

From July 1 through August 13, 2003, 1,082,000 Class A warrants were exercised for 1,082,000 shares of common stock for a total of \$541,000. In July 2003, 1,221,660 shares of preferred stock were sold for \$3,054,150.

On July 31, 2003 the preferred stock offering was closed.

In July 2003, the Company entered into an endorsement agreement with Steerpike Ltd. The agreement grants 1,000,000 options in exchange for future endorsements of SLS products. Each option is convertible into one share of common stock at a strike price of \$0.25. Expense associated with the options will be recorded over the two year period of the agreement beginning July 31, 2003 and ending July 31, 2005. Expense will be recorded at fair market value on an accelerated method in accordance with Interpretation 28.

Note 6 - Unamortized Cost of Stock issued for Services

As detailed in Note 4, the Company issued or agreed to issue 2,795,000 shares of common stock and 1,500,000 options as part of consulting agreements in the year ended December 31, 2002 and the six months ended June 30, 2003. The value of stock issued

Table of Contents

SLS INTERNATIONAL, INC.

NOTES TO CONDENSED FINANCIAL STATEMENTS - continued

Note 6 - Unamortized Cost of Stock issued for Services - continued

and options granted totaled \$1,692,213 for the period of January 1, 2002 through June 30, 2003. This cost is recorded as a debit in the equity section of the balance sheet as unamortized cost of stock issued for services. The balance will be amortized into consulting expense over the lives of the various consulting agreements. \$1,074,229 for the year

ended December 31, 2002 and \$443,536 for the six months ended June 30, 2003, was amortized into consulting expense for those periods. Unamortized cost of stock issued for services was \$174,448 as of June 30, 2003.

Note 7 - Related Party Transactions

On January 18, 2002, the Company borrowed \$5,000 from a friend of the president of the Company. The note is a demand note and bears interest at 7%. Monthly interest payments totaling \$175 have been paid in the six months ended June 30, 2003. The note was paid in full on June 17, 2003. The note balance on June 30, 2003 was \$0.

On November 13, 2002, the Company borrowed \$50,000 from a friend of the president of the Company. The note is a demand note and bears interest at 10%. Monthly interest payments totaling \$2,714 have been paid in the six months ended June 30, 2003. The note balance on June 30, 2003 was \$50,000. The note was paid in full on July 18, 2003.

Note 8 - Employee Stock Options

During the second quarter of 2003, the Company adopted the fair value recognition provisions of FASB Statement No. 123, Accounting for Stock-Based Compensation, effective as of the beginning of the year. There have been no previous granting of options to employees and therefore this adoption has no effect on previous financial statements. No method of reporting the change in accounting principle has been used.

The board of directors approved 145,000 options for employees and directors in the quarter ended June 30, 2003. The options vested immediately. 10,000 options were approved for each of three board members for their roles as directors of the company. 115,000 options were approved for employees of the Company for services rendered. Using the black-scholes pricing model, in accordance with the fair value recognition provision of FASB Statement No. 123, the options were valued at \$23,134 and recorded as compensation expense in the six months ended June 30, 2003.

Report of Independent Certified Public Accountants

Stockholders and Directors

SLS International, Inc.

We have audited the accompanying balance sheet of SLS International, Inc. as of December 31, 2002 and 2001 and the related statements of operations, shareholders' deficit, and cash flows for each of the years in the three year period ended December 31, 2002. These financial statements are the responsibility of the management of the Company. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of SLS International, Inc. as of December 31, 2002 and 2001 and the results of their operations and their cash flows for each of the three years ended December 31, 2002 in conformity with generally accepted accounting principles in the United States.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 2 to the financial statements, the Company has suffered recurring losses from operations and is dependent upon the continued sale of its securities or obtaining debt financing for funds to meet its cash requirements. These factors raise substantial doubt about the Company's ability to continue as a going concern. Management's plans with regard to these matters are also described in Note 2. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.
