## **SOCIEDAD QUIMICA Y MINERA DE CHILE S.A.**

### Notes to the Consolidated Financial Statements

September 30, 2002 and 2001

#### **Note 1 □ General**

Sociedad Química y Minera de Chile S.A. was registered on March 18, 1983 under No. 0184 of the Chilean Superintendency of Securities and Insurance.

The subsidiaries registered in the securities registry of the Chilean Superintendency of Securities and Insurance are as follows:

Soquimich Comercial S.A. registered under No. 0436 on January 11, 1993.

SQM Potasio S.A. registered under No. 0728 on March 20, 2001.

SQM Salar S.A. registered under No. 0731 on April 17, 2001.

#### **Note 2 □ Summary of Significant Accounting Policies**

##### **a) Basis for the preparation of the consolidated financial statements**

The accompanying consolidated financial statements have been prepared in U.S. dollars in accordance with accounting principles generally accepted in Chile (Chilean GAAP) and the regulations of the Chilean Superintendency of Securities and Insurance.

##### **b) Period**

These consolidated financial statements have been prepared for the nine-month period between January 1<sup>st</sup> and September 30, 2002 and 2001.

**Back to TOC**

**c) Reporting currency and monetary correction**

The financial statements of the Company are prepared in U.S. dollars. A significant portion of the Company's operations are transacted in U.S. dollars and the U.S. dollar is the currency of the primary economic environment in which the Company operates.

The Parent Company and those subsidiaries which maintain their accounting records in U.S. dollars are not required, or permitted, to restate the historical dollar amounts for the effects of inflation.

The financial statements of the domestic subsidiaries, which maintain their accounting records in Chilean pesos, have been restated to reflect the effects of variations in the purchasing power of Chilean pesos during the period. For this purpose, in conformity with Chilean regulations, non-monetary assets and liabilities and equity accounts have been restated in terms of year-end constant pesos based on the change in the consumer price index during the period (1.3% and 2.2% in 2002 and 2001, respectively). The resulting net charge or credit to income arises as a result of the gain or loss in purchasing power from the holding of monetary assets and liabilities exposed to the effects of inflation.

**d) Foreign currency**

**i) Foreign currency transactions**

Assets and liabilities denominated in Chilean pesos and other currencies at September 30, 2002 and 2001 have been translated to US dollars at the exchange rates in force at those dates of Ch.\$748.73 and Ch.\$695.02 per US dollars, respectively.

[Back to TOC](#)

**ii) Translation of non-U.S. dollar financial statements**

In accordance with Chilean GAAP, the financial statements of foreign and domestic subsidiaries that do not maintain their accounting records in U.S. dollars are translated from the respective local currencies to U.S. dollars in accordance with Technical Bulletin No. 64 as follows:

With respect to subsidiaries and affiliates located in Chile which maintain their accounting records in price-level adjusted Chilean pesos:

- Balance sheet accounts are translated to U.S. dollars at the closing date for the period exchange rate without eliminating the effects of price-level restatements;
  
- Income statement accounts are translated to U.S. dollars at the average rate of exchange each month after elimination of price level adjustments to the income statement accounts; the monetary correction account on the income statement which reflects the impact of price level adjustments to the non-monetary assets and liabilities and shareholders' equity in the balance sheet is translated to U.S. dollars at the average rate of exchange each month.
  
- Translation gains and losses, as well as the price level adjustments to the balance sheet mentioned above, are included as an adjustment in shareholders' equity, in conformity with the Circular No. 368 of the Chilean Superintendency of Securities and Insurance.

The 2002 and 2001 financial statements of those foreign subsidiaries that keep their accounting records in currencies other than U.S. dollar have been translated at historical exchange rates following the methodology indicated in Chilean Technical Bulletin No. 64. Beginning on January 1, 1998, Technical Bulletin No. 64 of the Chilean Association of Accountants replaced Technical Bulletin No. 51. Differences between these two bulletins are not significant, nor do they differ significantly from FASB 52.

Prior year financial statements presented for comparative purposes are not restated to a constant purchasing power level of the most recent year-end. In accordance with Chilean GAAP, amounts expressed in U.S. dollars, including amounts included in the consolidated financial statements as determined in prior years from the translation of financial statements of those Chilean subsidiaries which maintain their accounting records in Chilean pesos, are not adjusted for price level changes.

**Back to TOC**

Exchange differences for the periods ended September 30, 2002 and 2001 generated net income of Th.US\$ 733 and Th.US\$ 225, respectively, which were charged to consolidated results of operations in each respective period.

The exchange rates used for the conversion of monetary assets and liabilities, expressed in foreign currency at each period end, were as follows:

	<b>2002 US\$</b>	<b>2001 US\$</b>
Brazilian real	3.85	2.67
New Peruvian sol	3.64	3.48
Colombian peso	2,808.04	2,336.45
Argentine peso	3.74	1.00
Japanese yen	122.60	119.55
Euro	1.01	1.10
Mexican peso	10.23	9.51
Indonesian rupee	9,015.10	□
Australian dollar	1.84	□
Sterling Pounds	0.6369	0.6787

The Company uses the □observed exchange rate□, which is the rate determined daily by the Chilean Central Bank based on the average exchange rates at which bankers conduct authorized transactions on such date.

**e) Basis of consolidation**

The Consolidated Financial Statements include the accounts of Sociedad Química y Minera de Chile S.A. (the □Parent Company□) and subsidiaries (companies in which the Parent Company holds a direct or indirect ownership of more than 50%). The Parent Company and its subsidiaries are referred to as the □Company□.

**Back to TOC**

In accordance with regulations set forth by the Chilean Superintendency of Securities and Insurance in its Circular No. 368, Technical Bulletins Nos. 42 and 64 of the Chilean Association of Accountants, the consolidated financial statements include the assets, liabilities, income statements, and cash flows for the following affiliates:

All significant intercompany balances, transactions and unrealized gains and losses arising from transactions between these companies have been eliminated in consolidation and the participation of minority shareholders has been recognized as minority interest.

At September 30, 2002 and 2001, the subsidiary Fertilizantes Naturales S.A. was included in the consolidation given that the Company maintains controlling interest.

At September 30, 2002 and 2001, the subsidiaries SQM Lithium Specialties LLP and SCM Antucoya were in development stage and therefore were not included in the consolidation.

At September 30, 2001, the subsidiary Potassium S.A. was in development stage and therefore was not included in the consolidation.

**Back to TOC**

**f) Cash and cash equivalents**

Time deposits are presented at cost plus accrued interest.

In conformity with Technical Bulletin No. 50 of the Chilean Association of Accountants, the Company has classified cash, time deposits and short-term investments, which mature within three months from the date of purchase as cash and cash equivalents

**g) Marketable securities**

Marketable securities are valued at the lower of cost plus accrued interest or market value.

**h) Bad debt estimate**

The Company records a provision for bad debt based on estimate of probable losses.

**i) Inventories and materials**

Inventories of finished products and in-process products have been valued at average production cost. Raw materials and products acquired from third parties are stated at average cost. Materials-in-transit are valued at cost. These values do not exceed net realizable values.

Inventories of spare parts and supplies are classified as Other Current Assets except for those items, which the Company estimates to have a turnover period of one year or more, which are classified as non-current Other Assets.

[Back to TOC](#)

**j) Income and deferred taxes**

The provision for income tax is determined and recorded in accordance with current Chilean tax regulations on the basis of income accrued during each period.

In Chile, the general corporate rate is 16% and non-deductible expenses are taxed at 35%. Taxable losses incurred by a company in any year must first be carried back to recover taxes previously paid, if any, on a first-in, first-out basis. Any remaining tax losses can be carried forward without limitation.

Each company is required to file a separate tax declaration.

Effective January 1, 2000, in accordance with Chilean Technical Bulletins Nos. 60, 69 and 71 and Circular No. 1466 of the Superintendency of Securities and Insurance, deferred taxes related to all temporary differences are recorded. The effect of the temporary differences at September 30, 1999 were recorded in complementary asset and liability accounts, and will be recognized in the statement of operations in the period in which they reverse.

**k) Property, plant and equipment**

Except for the increment arising from a revaluation in 1988, property, plant and equipment are stated at cost considering an average residual value of 5%. Depreciation expense has been calculated using the straight-line method based upon the estimated useful lives of the assets and is either capitalized as a production cost or charged directly to expense. Depreciation expense for the nine-month period ended September 30, 2002 and 2001 includes Th.US\$ 1,319 and Th.US\$ 1,319 respectively, arising from the depreciation of the 1988 technical appraisal adjustment of property, plant and equipment.

Fixed assets acquired through financing lease agreements are accounted for at the present value of the installments plus the purchase option based on the interest rate included in each contract. The Company does not legally own these assets and therefore cannot freely dispose of them.

**Back to TOC**

In conformity with Bulletin No. 31 of the Chilean Association of Accountants, the Company capitalizes interest cost associated with the financing of new assets during the construction period of such assets. Capitalized interest amounted to Th.US\$ 1,678 and Th.US\$ 1,966 during September 30, 2002 and 2001, respectively.

Maintenance costs of plant and equipment are charged to expenses as incurred.

The Company obtains property rights for mining concessions from the Chilean courts having jurisdiction by filing the corresponding applications for specifically identified properties. Other than minor filing fees, the property rights are usually obtained without initial cost, and once obtained, are retained perpetually by the Company as long as the annual fees are paid. Such fees, which are paid annually in September, are recorded as prepaid assets to be amortized over the succeeding twelve months. Values attributable to these original mining concessions received are being amortized on a straight-line basis over 50 years. Mining concessions acquired from others are recorded at acquisition cost and are being amortized based on the units of production method.

**l) Investments in related companies**

Permanent investments in domestic and foreign related companies are accounted for in accordance with the equity method, in conformity with Technical Bulletins Nos. 42 and 64 of the Chilean Association of Accountants. The translation adjustment to US dollars of investments in domestic subsidiaries which maintain their accounting records and are controlled in Chilean pesos is recognized in Other Reserves. Direct and indirect investments in foreign subsidiaries or affiliates are controlled in US dollars.

**m) Goodwill and negative goodwill**

Goodwill and negative goodwill resulting from investments in related companies are maintained in the same currency in which the investment was made and are amortized with a credit or charge to income considering the related period of investment return, generally 20 and 10 years for goodwill and negative goodwill, respectively.

**Back to TOC**

**n) Intangible assets**

Intangible assets are stated at cost plus all the expenses related to acquisition and are amortized over a maximum period of 40 years, in accordance with Technical Bulletin No. 55 of the Chilean Association of Accountants.

**o) Mining development cost**

Mining development costs are recorded in other long-term assets and are amortized as the ore reserves are extracted.

**p) Accrued employee severance**

The Company accrues severance obligations based on the present value of the accrued benefits for the actual years of service worked using an annual interest rate of 9% and an average capitalization period of 24 years.

**q) Vacations**

The cost of vacations earned by employees is recorded on an accrual basis.

**r) Dividends**

In accordance with past practice, dividends are generally declared in U.S. dollars but are paid in Chilean pesos.

[Back to TOC](#)

**s) Derivatives**

The Company maintains derivatives contracts, which are recorded in conformity with Chilean Technical Bulletin No. 57 (losses are recognized on the accrual basis and gains are recognized when realized).

**t) Reclassifications**

Certain amounts from the prior year financial statements have been reclassified in the current year to conform with the current year presentation.

**u) Revenue recognition**

Revenues are recognized upon the physical shipment of products.

**v) Computer software**

In accordance with Circular No. 981 dated December 28, 1990 of the Superintendency of Securities and Insurance, computer systems acquired by the Company are capitalized at cost plus all the related additional costs.

**w) Research and development expenses**

Research and development expenses are charged to expenses in the period in which they are incurred, except for fixed assets acquired for their use in research and development activities and are determined to provide additional benefits, which are recorded under the related item within property, plant and equipment.

**x) Statement of cash flows**

In conformity with Technical Bulletin No. 50 of the Chilean Association of Accountants, the Company considers the balances of cash, time deposits and other short-term investments whose maturity is less than 90 days, as cash and cash equivalents.

[Back to TOC](#)

**Note 3 □ Changes in Accounting Principles**

There were no accounting changes during the period.

[Back to TOC](#)**Note 8 Investments in and Receivables from Related Companies****a) Transactions executed in 2002**

On March 21, 2002, SQM North America Corporation acquired 50% of the affiliate SQM Venezuela S.A., which added to the ownership interest maintained by SQM Nitratos S.A. in this company, results in indirect ownership of 100% by SQM S.A.

On April 5, 2002, the subsidiary Royal Seed Trading Corporaion A.V.V. made a contribution of Th.US\$ 120.5 to form a joint venture with Rui Xin Packaging Materials, Sanhe Co. Ltd.

On May 1, 2002, the subsidiary Soquimich European Holdings B.V. acquired 50% ownership of the affiliate Nutrichem N.V., which subsequently changed its name to Nutrisi Holding N.V.

## Edgar Filing: CHEMICAL & MINING CO OF CHILE INC - Form 6-K

On May 7, 2002, SQM Nitratos S.A. concurred to a capital increase in SQM Brasil Ltda., which resulted in ownership of 88.54%, SQM Químicos S.A. did not concur to this increase and reduced its ownership to 11.46%.

During May 2002, P.S.H. Limited made a capital increase of Th.US\$ 250 in its affiliate Ajay Europe S.A.R.L.

During May 2002, Soquimich European Holding increased its ownership in its affiliate FNC Italy S.R.L. to 95%, thereby becoming an indirect subsidiary of SQM S.A. Subsequently, FNC Italy S.R.L. changed its name to SQM Italia S.R.L.

On May 28, 2002, the subsidiary Inversiones y Asesorías SQM Limitada changed its name to Almacenes y Depósitos Limitada.

On June 12, 2002, Soquimich European Holding acquired 50% of Impronta S.R.L.

On August 31, 2002, SQM S.A. acquired shares, which were owned by SQM Nitratos S.A. over Cía. Industrial y Minera S.A. (Cimin S.A.) in MUS\$. 5,016. This situation produced that all shares of Cimin S.A. are concentrated on an only one shareholder, SQM S.A., and consequently, it was impacted on the immediate dissolution of Cimin S.A., owning SQM S.A. the total equity, assets and liabilities of this entity.

On September 27, 2002, SQM Nitratos S.A. made an contribution of capital of MUS\$ 12,040 over SQM North America Corporation, acquiring the ownership of 39.946782% over this entity. No concurrence for the increase of equity made the participation of the old owners

29

### Back to TOC

decreased. SQM S.A. reduced its ownership from 81.75% to 49.093506% and Soquimich European Holding reduced its ownership from 18.25% to 10.959712%.

On September 30, 2002, SQM SA acquired shares which were owned by SQM Nitratos S.A. over the subsidiary SCM SQM Boratos by MU\$ 887. This situation produced that all shares of SCM SQM Boratos are concentrated on an only one shareholder, SQM S.A., and consequently, it was impacted on the immediate dissolution of SCM SQM Boratos, acquiring SQM S.A. the total shareholders equity, assets and liabilities of this entity.

### **Note 8 Investments in and Receivables from Related Companies (Continued)**

#### **b) Transactions executed in 2001**

On January 22, 2001, Sales de Magnesio Ltda. was formed through equal contributions by SQM Salar S.A. and the partner Sociedad Chilena del Litio S.A. (third party).

At the Extraordinary Shareholders Meeting held on February 14, 2001 of Productos Técnicos del Mediterráneo S.A., the shareholders agreed to change the Company's name to PTM SQM Iberica S.A.

At the Extraordinary Shareholders Meeting of Industrias Químicas de Yodo S.A. held on September 26, 2001, the Shareholders agreed to change this Company's name to Ajay SQM Chile S.A.

Extraordinary items were generated during 2001 only and relate to the restructuring expenses, as follows:

	<u>2002</u>	<u>2001</u>
	Th.US\$	Th.US\$
Restructuring and advisory expenses		(5,628)
Tax effect on extraordinary items		844
	<u>          </u>	<u>          </u>
Total		(4,784)
	<u>          </u>	<u>          </u>

**Note 20 Guarantees, Liens, Contingencies and Commitments**

a) Contingencies:

The Company has not recognized the effect of potential insurance recoveries relating to the compensation for damage resulting from a loss incident in the potassium sulfate ponds in the Atacama salt deposit.

## Edgar Filing: CHEMICAL & MINING CO OF CHILE INC - Form 6-K

The Company and its subsidiaries are involved in litigation in the ordinary course of business. Based on advice of council, management believes the litigation will not have a material effect on the consolidated financial statements.

The Company is currently reviewing the Production Model schemes for the María Elena works, which could be implemented as a result of the decontamination plan (note 24).

The different production and technology development alternatives for the works in María Elena, which are a part of the aforementioned Production Models, do not initially result in relevant changes in the current mining reserves or projected volume sales.

These alternatives are in place among other options for production through leaching piles and that of implementing a mixed system through this technology and the current production methods.

Advantages and disadvantages for the different alternatives relate to the extension of transition periods, investments to be made, production costs, changes in technology and production processes, the effects on certain company's assets and in the value of these assets.

45

### Back to TOC

In regard to the possible effects of the valuation of assets an objective quantification of this is still not possible.

#### b) Commitments:

The subsidiary SQM Salar S.A. maintains an agreement with a government agency, which obligates the company to make annual payments to this institution based on the company's annual sales until 2030. This sum, which has been paid since inception of the agreement in 1996, is reflected as expenses of Th.US\$ 2,546 in 2002 (Th.US\$ 1,636 in 2001).

46

### Back to TOC

Royal Bank of Canada	SQM Investment Corporation N.V.	Subsidiary	Guarantee				20,294
Bank of America N.A.	RS Agro-Chemical Trading A.V.V.	Subsidiary	Guarantee			80,893	81,429

**Back to TOC****Note 21 Third Party Guarantees**

During 2002 and 2001, the Company did not have any significant guarantees granted to third parties.

**Note 22 Sanctions**

During 2002 and 2001, the Chilean Superintendency of Securities and Insurance did not apply sanctions to the Company, its directors or managers.

**Note 23 Subsequent Events**

Company management are not aware of any significant subsequent events occurred between September 30, 2002 and the date of issuance of these consolidated financial statements (November 08, 2002), which may affect the presentation of these financial statements.

**Back to TOC****Note 24 Environmental Projects**

Disbursements incurred by the Company at September 30, 2002 related to its investments in production processes, the verification and control of compliance with official ordinances and laws relative to industrial processes and facilities amount to Th.US\$ 6,597, as follows:

Project	Th.US\$
Environmental department	206
Coya Sur sewage treatment plant	506
Pedro de Valdivia sewage treatment plant	39
Descontaminación Planta Boratos	44
Engineering and building of María Elena piles	4,680
Replacement of oil with natural gas	857
Tocopilla Money Exchange Office	99
Tocopilla Dust Captation	108
Environmental impact evaluation	58
	6,597
Total	6,597

With respect to the project for the replacement of oil with natural gas, the supplier will make an investment of Th.US\$ 5,500 which will be paid by the Company in monthly installments during the contract's term (10 years).

Technological processes are oriented to be environment-friendly and will strive to achieve the maximum reduction of waste as well as incorporating technological conditions, which ensure the efficient protection of the environment. As an example we may mention the increasing replacement of oil with natural gas in the Company's plants.

Operation which use caliche as raw material are developed in desert areas under favorable climatic conditions for solar drying and evaporation of solid and liquid substances. Open-pit extractive operations of minerals, due to their low material to mineral ratio generate deposits, which result in a slight alteration of the environment, and during the extractive process normal emissions are generated.

On August 10, 1993, The Ministry of Health published a resolution in the Official Gazette, which, in line with the Sanitary Code, established that particle levels in the productive facilities in María Elena exceeded the level allowed for air quality, which affected the location nearby.

**Back to TOC**

Remaining parts come mainly from dust produced during the processing of caliche, specially during the grinding process of ore prior to the leaching process. With certain indications, the Company's plan for the decontamination and reduction of particles was approved through the Decree No. 164. As a result of the investments and processes implemented in line with the approved plan, the Company has been able to significantly decrease particle levels in the environment. Resolution No. 384 published in the Official Gazette on May 16, 2000, authorized the review and drafting of a decontamination plan for the María Elena location. CONAMA should be able to publish its final resolution in the Official Gazette within the next few months. However, this cannot ensure that during the period, the Company will not be subject to any notices, fines or possible temporary closures on the mill grinding facilities located in María Elena. The Company continuously analyzing techniques, processes and systems for the processing of caliche, which could allow additional reductions in particles in the María Elena location.

Mineral treatment operations, due to the fact that these processes are controlled, generate solid waste, which relate to the non-soluble remaining part of the mineral with moist.

Productive operations from brines are performed in the Atacama salt deposit. Note that almost 95% of the energy used is obtained from the Sun. The remaining 5% is provided by electrical supply and fossil fuels. The remaining brines are re-injected to the salt deposit in order to minimize any possible impact on the environment.

SQM entered a contract with CONAF (the National Forestry Corporation) in order to monitor the activities of colonies of flamingo in the lagoon systems in the Atacama salt deposit, which includes counting birds, their reproduction and in-depth studies aiming to correlate the behavior of these birds with the different climatological phenomena occurred in the aforementioned sector.

In addition, the Company in its permanent commitment with environmental authorities, is active participant in the Joint Monitoring Study of the Atacama Salt deposit Basin, which includes the participation of other mining companies who use the water resources provided by the Atacama Salt deposit Basin.
