09.01 - A BRIEF HISTORY OF THE COMPANY

The Company was founded by the Brazilian Government in June 1942 to own and operate iron ore mines located at Itabira in the State of Minas Gerais and the Vitória-Minas Railroad, which had operated to carry iron ore and farm produce through the Rio Doce valley in southern Brazil to the Port of Vitória, located in state of Espírito Santo.

The Company was established pursuant to commitments from the United Kingdom to contribute the Itabira iron ore mines and from the United States to provide financing for the acquisition of railroad and mining equipment.

The initial purpose of the Company was to organize the production and export of iron ore through the Company's Southern System to help meet strategic raw material needs during World War II.

In 1970, the Company and United States Steel Corporation commenced a joint venture to develop high quality iron ore mineral deposits located at Carajás in the State of Pará in northern Brazil.

After acquiring U.S. Steel's interests in 1977, the Company commenced construction of the Carajás mining complex and the related Carajás Railroad with financing from various multilateral and commercial financial institutions, including the World Bank and the European Coal and Steel Community.

The Carajás mining complex and related transportation facilities initiated commercial scale operations in 1987.

On May 6, 1997 through an auction at the Rio de Janeiro Stock Exchange, the Brazilian Government privatized Companhia Vale do Rio Doce. The Consórcio Brasil (VALEPAR) bought 104,318,070 common shares of CVRD, equal to 41.73% of the voting capital, for R\$ 3,338,178,240.00.

Starting from two mine-railway-port systems in separate regions of the country, CVRD today is a conglomerate involved in extracting and processing natural resources and in transportation, including the operation of railroads and ports along with coastal and trans-oceanic shipping. It participates in a group of companies in the steelmaking and ferroalloy sectors and also is present in other important areas of the Brazilian economy, such as aluminum, copper. Spread over ten Brazilian states, in 1997 it constituted a new company in the energy segment.

CVRD decided to operate in the general cargo market with the same efficiency it does in handling the iron ore it exports. In 1999 it was set up a specific department for logistics to administer its maritime terminals together with the railroads it owns outright and in partnerships, thus boosting the reliability and efficiency of transporting various cargoes: containers, solid and liquid bulk products, and general cargo. The goal is to expand CVRD's presence in the sector by offering fully integrated logistics services.

The broad scope of CVRD's activities plays a hugely important role in Brazil's progress. For this reason, the Company's growth and development, besides justifying the pride of its employees, partners and shareholders, reflects the ability of Brazilians to manage a business that today is a synonym for efficiency and competitiveness the world over.

In touch with its times and aware of its responsibilities, CVRD published its first Social Report along with its 1999 Financial Statements. Through the Fundação Vale do Rio Doce (FVRD), the Company directs its efforts in education and in the areas of environmental preservation, health, infrastructure and economic development, working to improve the lives of all those living in the regions under its influence.

The year 2000 represented a milestone in the life of Companhia Vale do Rio Doce, with the launch of ADRs on the New York Stock Exchange. Such a complex range of businesses from mining ore to trading Company shares on skittish capital markets is only feasible with modern and innovative management. Backed up by dedicated, highly motivated employees, Company management has been more transparent, dynamic and, most importantly, more focused and efficient.

09.01 - A BRIEF HISTORY OF THE COMPANY

The third and final stage of the Company's privatization was successfully completed with the global offering of 78,787,838 common shares held by the National Treasury and the National Economic Development Bank - BNDES. The offer was oversubscribed more than three times, the shares being placed with institutional investors in 17 countries - Brazil, U.S., Canada, U.K., Ireland, Germany, Denmark, Spain, France, Holland, Italy, Kuwait, Luxembourg, Sweden, Switzerland, Australia and China (Hong Kong) - and 792,443 individual shareholders in Brazil. CVRD's common shares began trading on the NYSE on March 21, 2002 as American Depositary Receipts (ADRs), identified by ticker symbol RIO.

The success of these transactions demonstrates the strong confidence that Brazilian and foreign investors have in CVRD's future. The soundness of the Company's balance sheet and strong cash generation ensures credibility in the international debt market. A well defined long-term strategy, good corporate governance, operational excellence, unquestioned leadership in the global iron ore market, and significant growth opportunities in ferrous minerals, copper, bauxite, alumina and logistics services, were all important factors in attracting the large and diverse contingent of new shareholders.

CVRD won the following awards for recognition for its standards of excellence, such as:

Reuters Institutional Investor Survey 2002 chose CVRD as Best Mining and Metals Company of Latin America and Best Company of Brazil for its investor relations activities. ;

CVRD obtained the Anefac-Fipecafi-Serasa 2002 Award for the quality and transparency of its financial statements;

Best in Corporate Governance Institutional Investor do Brasil magazine Best Mining and Metals Company in Brazil;

Best Total Shareholder Return 2002 GVA Study Fundação Getulio Vargas and The Boston Consulting Group. CVRD was one of the three Brazilian companies that systematically had the best total shareholder returns in 2001 and over the last five and ten years;

Most profitable company in Brazil IstoÉ Dinheiro magazine (100 top profit-earners for 2001);

Company of the Year in the Mineral Sector Brasil Mineral 2002 This title is the most important award in the Brazilian mining and metallurgy sector;

Best Mining and Metals Company in Latin America Global Finance 2002;

2nd Volvo Logistics Award Tecnológica CVRD was indicated by the magazine's readers as one of the ten best logistics companies in Brazil, according to a survey conducted by the Coppead Institute of Administration of Rio de Janeiro Federal University;

Top de Ecologia Award Vale do Rio Doce Natural Reserve in Linhares Transforming a Protected Area into a Sustainable Business Unit, given by the Associação dos Dirigentes de Vendas e Marketing do Brasil ADMI (Brazilian Sales and Marketing Directors Association).

The Meu Ambiente Project won the Findes/Consuma Award in the Environmental Education Category, given by the Espírito Santo Federation of Industries Findes and by the Conselho Superior de Meio Ambiente Consuma (Superior Environmental Council).

ECO 2002 Award Conservation and Environmental Education Category Vale do Rio Doce Natural Reserve in Linhares, Espírito Santo American Chamber of Commerce Amcham Best Mining and Metals Company in Latin America Global Finance 2002;

Brazil Citizenship for Exportation Award Arabian-Brazilian Chamber of Commerce (Câmara de Comércio Árabe-Brasileira) and the Citizenship Institute (Instituto da Cidadania) in the Master 1 Category, which recognizes initiatives of great social impact;

Best Company of Latin America in Mining and Metals Global Finance and Reuters Institutional Investor Survey 2002.;

PERFORMANCE OF THE BUSINESS AREAS

FERROUS MINERALS

Iron ore and pellets: tailor-made solutions boost customer competitiveness

Based on a clear and well-defined management model, Companhia Vale do Rio Doce has been conducting its businesses in consistent and planned form, bringing significant improvements for the country. The Company's performance reflects not only the high quality of its iron ore and pellet products, but also the success of its marketing strategy, emphasizing customized solutions for each customer instead of simple product sales.

This strategy has been allowing expanded sales to markets such as China, whose geographical distance from Brazil is a competitive disadvantage. In the period 1998-2002, sales to the Chinese market grew at a yearly rate of 33.3%, with the share in total imports of this country rising from 11% in 1998 to 16% in 2002. To cater to the Chinese market, which has been the main growth engine in the transoceanic market, CVRD has developed various initiatives to reduce iron ore shipping costs. Among these is promoting sales of Chinese coal and metallurgical coke to Brazilian customers to generate return freight.

Consolidated sales of iron ore and pellets set a new record in 2002, reaching 163,916 million tons, for growth of 11.5% over the previous year. This figure includes the volume sold by the Parent Company and by Nibrasco, Kobrasco, Itabasco, Hispanobras, Urucum, Ferteco, Samarco, GIIC, MBR and QCM. This volume is net of intercompany transactions such as sales of pellet feed from the Parent Company to pelletizing plants and was calculated proportionally to the holdings of CVRD in each of these.

Iron ore sales were 135.187 million tons, 12% greater than the previous year, and pellets reached 28.729 million tons, a rise of 9.4%. Of the volume sold, 84.1% went to the external market, 15% more than in 2001.

The consolidated gross revenue from sales of iron ore and pellets totaled R\$ 8.728 billion in 2002 R\$ 5.987 billion for ore and R\$ 2.741 billion for pellets. This value corresponds to 57.2% of the Company's total gross revenue and represents a jump of 47.5% over the prior year.

The reference prices of iron ore and pellets for 2002 were only established at the end of May, in the most drawn-out negotiations in recent decades. The result was a generalized cut in prices, varying from 1.04% for standard sinter feed from the Southern System to 5.47% for blast furnace pellets.

Iron ore and pellet sales reached a new record of 163.9 million tons.

09.02 - CHARACTERISTICS OF THE BRANCH OF ACTIVITY

Consolidated Iron Ore and Pellet Sales

Manganese and Ferroalloys

High quality for the steel industry

CVRD's strategy in the area of ferrous minerals includes full development of the manganese and ferroalloy businesses, based on its commitment as a supplier of high-quality raw materials for the steel industry. The complementation and synergy with the iron ore and pellets business provide economies of scale in marketing and logistics.

Currently, CVRD owns and operates four manganese mines – Azul, Urucum, MMN and Morro da Mina – and seven mills turning out ferroalloys Corumbá, Santa Rita, Barbacena, Rancharia, São João del Rey, Sibra and Rio Doce Manganèse Europe (RDME). These operations are distributed geographically in four Brazilian states – Pará, Mato Grosso do Sul, Minas Gerais and Bahia – along with France.

In 2002, CVRD set a record for output of manganese ore, 2.33 million tons, a 29.5% increase over 2001. Total sales were 665 thousand tons. Sales of ferroalloys reached 539 thousand tons. Consolidated gross revenue from manganese and ferroalloys was R\$ 845 million, a rise of 34,6% over the previous year.

09.02 - CHARACTERISTICS OF THE BRANCH OF ACTIVITY

NON-FERROUS MINERALS

Gold

In search of new deposits

Recovery of CVRD's gold production will really get rolling with start-up of the copper mines in Carajás. Estimates are that these projects can produce about 685 thousand ounces of gold a year starting in 2007, which will help offset copper production costs. Besides this, the Company continues to invest in mineral prospecting, to identify new deposits.

At present, CVRD operates the Fazenda Brasileiro mine in Bahia, which is forecast to turn out 112 thousand ounces of refined gold in 2003. The recoverable gold reserves demonstrated at 2002 year-end were approximately 225 million ounces.

In July 2002, Igarapé Bahia, the Company's largest gold mine, was shut down. The copper ore under the remaining pit, which also contains gold, will be exploited in the future, making use of the existing installations.

The price of gold followed an upward trend during the year, reaching a peak of US\$ 350 per troy ounce in December 2002, the highest quotation in the last five years. CVRD, which began producing this mineral in 1984, has since then produced 5,890 thousand ounces of refined gold, 315 thousand ounces of this in 2002.

Gold sales, all going to the export market, added up to 331,479 ounces in 2002, against 508,472 ounces in 2001. Gross revenue in 2002 was R\$ 280 million, 15.4% below that in the previous year, basically due to reduced output, since the price in dollars per troy ounce was 14.4% higher than in 2001.

Kaolin

Winning new markets

With installed production capacity of 600 thousand tons annually, Pará Pigmentos S.A., a subsidiary of CVRD, developed a new line of products and implemented a marketing strategy aimed at selling kaolin to the United States.

Besides Century HC, the main product of PPSA, Para Print and Century S were produced in industrial scale in 2002. These products are targeted at producers of coated paper and yield excellent characteristics for the final products, opening perspectives for new sales in upcoming years, mainly as a result of negotiations to expand shipments to Europe.

The sales volume of PPSA in 2002 was 337 thousand tons, 89% of this going for export. Net revenue was R\$ 115 million and cash generation was R\$ 52 million.

Potash

More fertilizers for agricultural growth

The 8.5% expansion of Brazilian agriculture in 2002 caused a strong rise in demand for fertilizers, whose raw material is potassium chloride. The Taquari-Vassouras mine in Sergipe is the only domestic source of this input for Brazilian industry, which mainly relies on imports.

In 2002, sales and output were the highest since the start of activities at the Taquari-Vassouras mine. Potash sales to the domestic market totaled 731 thousand tons, a 45.3% rise in relation to 2001. This volume was made possible by production of 627 thousand tons and by using up stocks. Potash sales generated gross revenue of R\$ 272 million.

--------------------------------	--	---

09.02 - CHARACTERISTICS OF THE BRANCH OF ACTIVITY

LOGISTICS

Creating new transport corridors and expanding agricultural frontiers

The year 2002 set a high mark for the logistics area of Companhia Vale do Rio Doce – responsible for 16% of freight movement in Brazil and 65% of port operations with dry bulk cargoes, mostly iron ore from its own mines. As one of the country’s largest haulers of grains as well, particularly soybeans, CVRD’s logistics have been playing a key role in expanding the agricultural frontier in the North and Midwest regions, reducing costs and raising the competitiveness of Brazilian agricultural products in the international market. More than this, the Company has been bringing development to backward interior regions by shortening distances and creating new transport corridors.

Gross revenue from logistics services in 2002 was R\$ 1.435 billion. The steel industry, responsible for 40% of this figure, continues to be the Company’s main client, which is explained by the proximity of the Vitória a Minas Railroad – EFVM and the Tubarão Port Complex to the country’s main steel mills.

Net revenue obtained from logistics services for the largest and longest-running client increased 13% in 2002, reaching R\$ 484 million. Two elements were especially important to this result: the rise in exports of pig iron and steel in the second half of the year and the start-up of the hot rolling mill at Companhia Siderúrgica de Tubarão – CST.

Transport of agricultural products was the most dynamic segment of the Company’s logistics activities, influenced mainly by exports of soybeans and soy meal and the integrated operation of the Vitória a Minas Railroad – Centro-Atlântica Railroad – Tubarão Port Complex. Carrying grain has a huge growth potential in coming years and CVRD expects to gain from it. An example is the first movement of soybeans in the northeast of the state of Mato Grosso, for shipment from the Ponta da Madeira Maritime Terminal in Maranhão, opening a new transport corridor to that region.

The revenue obtained from these operations reached R\$ 250 million, a jump of 56% over the previous year. Various records were broken, such as for monthly soybeans and soy meal carried by the EFVM and the FCA together, 336 thousand tons in April, and the loading of 432 thousand tons of general cargo at the Sundry Products Terminal in June.

In intermodal service, which involves carrying containers by rail and coastal shipping, complemented by highway transport, revenue grew 44% to R\$ 170 million in 2002. The implementation of express train service and restructuring of coastal shipping have been crucial for this expansion.

09.02 - CHARACTERISTICS OF THE BRANCH OF ACTIVITY

Revenue from Railroad and Port Services *

Composition by Activity of Clients

* Except iron ore and pellets

Railroads

The record volume hauled by the CVRD railroads in 2002 191.381 million tons and the substantial improvement in performance, both in terms of operating costs and safety, resulted from the new management model put in place. These strategic changes increased 7.2% the transportation of sundry products, shaved R\$ 15 million off operating costs and reduced fuel consumption by about 6%, contributing to environmental preservation.

The availability and reliability of the locomotives and cars also set several new records. The MKBF distance traveled between failures in millions of kilometers set new levels in all CVRD's railroads, showing the improved maintenance of rolling stock. An important mark was the MKBF for the ore cars of the EFC. On average each car covered 9.7 million kilometers between failures, considered a world benchmark.

In January 2002, the FCA assumed operation of the 431 kilometers between the Valefértil station in Minas Gerais, and Boa Vista Nova station in the state of São Paulo, near the city of Campinas. This stretch is a concession from Ferrobán and complements the connection to Araguari, in the Triângulo Mineiro (Ore Triangle) region, already operated by the FCA. Through this agreement, which involves the passage right until Santos via Ferrobán's trackway, the FCA began serving an important corridor between the ore production center in the Triângulo Mineiro and the Port of Santos. In return for the FCA operating concession, the Company must transfer its shares in Ferrobán to the controlling shareholders of that company, after proper approval by the government railroad authority.

Port terminals

The competitiveness of the port terminals controlled and operated by CVRD is fundamental for Brazilian products to reach the international market. Consistent investments have allowed increased performance while significantly reducing the time necessary for handling the different products, bringing substantial advantages for importers and exporters, besides contributing to lowering the so-called Brazil cost .

09.02 - CHARACTERISTICS OF THE BRANCH OF ACTIVITY

The loading of 55.5 million tons of cargo at the Ponta da Madeira Maritime Terminal in 2002, higher by 4% than in 2001, set a new record. Located in São Luís, Maranhão, the terminal handled 51.6 million tons of iron ore and pellets, 1.2 million tons of manganese and 2.7 million tons of general cargo (pig iron and soybeans).

The Tubarão Port Complex, in Vitória, Espírito Santo composed of the Port of Tubarão, the Paul Quay and the Praia Mole, Liquid Bulk Cargo and Sundry Products terminals shipped out 89.9 million tons in 2002. Of this total, 72.9 million tons were iron ore and pellets.

The volume of general cargo handled for clients by CVRD-controlled ports Ponta da Madeira, Tubarão, Inácio Barbosa and Vila Velha rose 22% over the 2001 figure, reaching 23.8 million tons.

Shipping

In 2002, Docenave consolidated its activity as a carrier of general container cargo along coastal/river routes linking the main ports between Buenos Aires, in Argentina, and Manaus, up the Amazon River in the state of Amazonas. CVRD's shipping operations led to new business opportunities and expanded its offer of logistics services to domestic and international clients.

Docenave obtained revenue of R\$ 294,1 million, carrying 7.9 million tons of bulk cargoes and 69,482 TEUs (twenty-foot equivalent units) of general cargo over its cabotage service. The support services provided at the ports where CVRD operates generated another R\$ 38 million in revenue.

Of the total bulk cargo hauled in 2002, nearly 74% was iron ore, 5% coal, 4% steel products and 3% manganese. The remaining 14% referred to charter-out service.

Docenave's port support activity at the Tubarão Port Complex in Espírito Santo earned the ISO 14000 environmental management certificate in 2002. Docenave has its own tugboat fleet along of eight tugs with three chartered tugs to assist port operations.

BUSINESSES UNDER DEVELOPMENT AND EQUITY HOLDINGS

ALUMINUM

Strategic focus on bauxite and alumina

Companhia Vale do Rio Doce has a key strategic position in the aluminum industry, being a huge producer and supplier of bauxite and alumina for the national and international markets. Aware of this responsibility, CVRD has been investing to expand capacity of these products.

The Company's dealings in the aluminum sector contributed 11.6% of its total consolidated revenue. Gross revenue in the aluminum area was R\$ 1.767 billion in 2002, a 58.1% increase over the R\$ 1.118 billion in 2001.

MRN produced 9.919 million tons of bauxite in 2002, corresponding to 90% of its installed capacity. This was 7% below the 2001 output due to lower demand in the first half of the year and the interference caused by expansion work in the second half. Sales for the year totaled 9.928 million tons, 9% less than in 2001. Of this total, 26% went for export. Net revenue was R\$ 539 million, 7% higher than the previous year, and operating cash flow was R\$ 330 million.

**FEDERAL PUBLIC SERVICE
SECURITIES COMMISSION (Comissão de Valores Mobiliários - CVM)

09.02 - CHARACTERISTICS OF THE BRANCH OF ACTIVITY

Alunorte produced 1.656 million tons of alumina, 3.2% higher than in 2001 and slightly above its nominal capacity of 1.6 million tons yearly. Sales added up to 1.640 million tons, a new record, with 46.8% exported. Net revenue was R\$ 785 million, a 14% rise over the previous year. Alunorte's EBITDA grew 10%, reaching R\$ 239 million for the year.

Expansion of refining capacity to 2.4 million tons a year was concluded. Start-up of the third production line occurred in January 2003. Outlays to boost capacity at Alunorte totaled US\$ 277.6 million, with a cost per ton of US\$ 350, highly competitive by aluminum industry standards.

In June 2002, CVRD acquired for R\$ 118.9 million, through Aluvale, the 12.62% of Alunorte capital previously held by MRN. Aluvale increased its stake in Alunorte to 62.1% of its common shares and 57.03% of the total capital. This allows MRN to concentrate only on its core business, producing bauxite, and will enable CVRD to capture greater value generated by future increases in Alunorte's capacity.

Albras produced 407.7 thousand tons of primary aluminum, 23% more than in 2001. This growth was a consequence of the end of electricity rationing in 2001, the coming on line of expanded capacity, and also operational improvements.

Sales totaled 406.3 thousand tons, of which 97% went for export. Albras obtained net revenue of R\$ 1.5 billion in 2002, 36% higher than the previous year. Its EBITDA reached R\$ 644 million, 38% above that booked in 2001.

In 2002, Valesul attained primary production of 92.2 thousand tons, surpassing the 2001 production by 12 thousand tons. Its sales totaled 90.1 thousand tons for the year, of which 46% were exports. The company took in net revenue of R\$ 410 million, 36% greater than the prior year. Operating cash flow was R\$ 114 million, a jump of 38% over 2001.

The Machadinho Hydroelectric Station, in which Valesul has a 7% stake, began generating electricity in 2002. This allowed Valesul to reach self-sufficiency in peak power consumption.

ELECTRIC POWER

Own generation brings benefits to society

Currently, 9.9% of CVRD's electricity consumption is generated by its own power plants. With the investments scheduled, based on concessions to build and operate new plants, the Company will be able to meet some 50% of its projected consumption by the end of the decade, providing benefits to other sectors of the Brazilian economy and society at large through greater energy availability.

By concentrating its investments in hydroelectric facilities, the Company protects itself from price volatility of carbon fuels, besides ensuring electricity supply and increasing competitiveness. With consumption of approximately 14.1 million MWh in 2002, CVRD and its subsidiaries, affiliated companies and joint ventures were responsible for 4.5% of Brazil's electricity consumption.

CVRD has stakes in ten hydroelectric stations, three of which are in operation. Two more are scheduled to come on line in 2003 - Candonga and Aimorés - and five are awaiting start of construction. The investments to build power plants and in the licensing of future undertakings added up to US\$ 78 million in 2002.

In 2002, CVRD developed a department specialized in selling electric power, seeking a balance for all its operating units between own generation and power purchased from other generating companies. The Company participated in the first public auction for sale of electric power by government-owned generators.

In July, a consortium in which CVRD has a 30% stake was the winning bidder to build and operate the Estreito Hydroelectric Station, located on the Tocantins- Maranhão state border. This project will have installed capacity of 1,087 MW and will begin operating in 2007.

09.02 - CHARACTERISTICS OF THE BRANCH OF ACTIVITY

In December 2002, the first phase of the Funil Hydroelectric Station started generating. This is a partnership between CVRD and Cemig, located in Minas Gerais, with installed capacity of 180 MW. The plant was constructed in 27 months, a record for undertakings of this size. The value of the investment was US\$ 47.6 million, equivalent to US\$ 519 per installed kilowatt. CVRD's share of the power generated by Funil will be allocated to the Tubarão Port Complex.

The Company's portion of the power generated by the Igarapava and Porto Estrela stations was directed to its Itabira and Timbopeba operating units, as well as for sale to the market. Because of the electricity generated by the two plants, these operating units were able to cut their energy costs by US\$ 13 million in 2002.

STEEL

Good results leverage the steel industry

In 2002, the Brazilian steel industry obtained significant results. CST, the world's biggest steel slab exporter, beat its production record with output of 4.9 million tons, and total sales of 4.6 million tons. Net revenue was R\$ 2.84 billion, 43% higher than in 2001. CST's EBITDA totaled R\$ 1.1 billion, an impressive rise over the R\$ 563 million obtained the previous year. The improved result was due mainly to recovery of steel slab prices in the international market, along with the effects of exchange rate variation.

The sales volume of CSI reached a record of 1.83 million tons of finished products, a 10% increase over 2001. As a result of the good sales performance and better margin on products, net revenue reached US\$ 754 million, 18% higher than the year before. Operating cash flow totaled US\$ 101 million.

In 2002, Usiminas set a new sales record, with 7.7 million tons of finished steel products. This volume represented a 17% rise in relation to sales on 2001. Net revenue was R\$ 6.69 billion, 37% more than in the previous year. EBITDA was R\$ 2.4 billion, 56% above that booked in 2001.

FERTILIZERS

Profits generate additional dividends

Companhia Vale do Rio Doce has an 11.1% stake in Fosfertil, a company that produces and sells phosphate and nitrogen based fertilizers. In 2002, CVRD received R\$ 6.4 million in dividends and interest on stockholders' equity from Fosfertil. In January 2003, it received additional dividends of R\$ 16.9 million, from retained earnings.

In 2002, Fosfertil and its subsidiary Ultrafertil increased their sales volume by 5%, selling a total of 1,515 thousand tons of fertilizer nutrients, of which 56% were phosphate based and the other 44% nitrogen fertilizers. The net revenue of Fosfertil was R\$ 1.4 billion, an increase of 23% over the previous year.

09.02 - CHARACTERISTICS OF THE BRANCH OF ACTIVITY

PAPER AND PULP

Conclusion of divestiture

As a part of its long-term strategic guidelines, Companhia Vale do Rio Doce is selling assets that do not have synergy with its main business interests. In September 2002, CVRD concluded sale of its holding in Florestas Rio Doce S.A. FRDSA, for R\$ 191.4 million, composed of 39.7 thousand hectares in Espírito Santo and 8 thousand hectares in Minas Gerais

With the purchase of the stake held by Nissho Iwai Corporation in Celmar, in December 2002, CVRD became the sole owner of that company. Celmar maintained its 29.4 thousand hectares of eucalyptus forests in Maranhão and held to its studies of alternative projects for use of this wood, which will be of great importance to other projects under study in the metals area.

11.01 - PRODUCTION PROCESS

IRON ORE AND PELLETS

Extraction, grinding, screening, concentration, pelletizing, railroad transportation and shipping of iron ore and iron ore pellets.

The Company's iron ore mining and related operations are concentrated in two regions in Brazil, the Southern System and the Northern System. The Southern System is located in the states of Minas Gerais and Espírito Santo, and the Northern System is located in the states of Pará and Maranhão. Each system includes iron ore reserves and other mineral deposits, mines, ore processing facilities and integrated railroad and terminal transportation facilities. The railroads connect the systems and bring products from the mines to the marine terminals, located at Tubarão and Praia Mole in the Southern System, and São Luís in the Northern System. The operation of two separate systems, each with transportation capability under Company control, enhances reliability and consistency of service to customers.

Southern System

The Southern System is an integrated system consisting of iron ore mines, the Vitória-Minas railroad, and the ports of Tubarão and Praia Mole (located in Vitória, in the state of Espírito Santo). The iron ore mines of the Southern System are located in a region called the Iron Quadrangle in the state of Minas Gerais, in the southeast of Brazil. Nine mining complexes compose this system: Cauê and Conceição in the Itabira District, Timbopeba, Gongo Soco Complex, Alegria Complex, Água Limpa Complex, Córrego do Meio Complex, Capanema and Fazendão. The Southern System is accessible by road or by spur tracks of the Vitória-Minas railroad, which transports iron ore concentrate, lump, and natural pellet ore to the Tubarão marine terminal (located approximately 600 kilometers away) and domestic steelmakers, as well as third party general cargo.

Iron ore in the Southern System is mined by open pit methods. These ore reserves have high ratios of itabirite ore relative to hematite ore. Itabirite is a quartz-hematite rock with an average iron content ranging from 35% to 60%, requiring concentration to achieve shipping grade, which is above a 64% average iron content. Mines in the Southern System generally process their run-of-mine by means of standard crushing, classification and concentration steps, producing sinter feed, lump ore and pellet feed.

The Vitória-Minas railroad transports Southern System iron ore to the Tubarão marine terminal located at Vitória in the state of Espírito Santo. The Southern System has train-loading facilities with a daily carrying capacity of 300,000 tons of iron ore. A train composed of two diesel-electrical locomotives and up to 240 gondola ore-cars makes a roundtrip to the marine terminal every 43 hours. The Tubarão/Praia Mole marine terminal complex has a storage capacity of 4.5 million tons of iron ore and pellets. The storage capacity in connection with the complex's two piers, which are 25 meters deep and 600 meters wide, ensures access for ships of up to 365,000 DWT. The loading system consists of a bucket-wheel reclaimer, conveyor belts and a ship-loader for each pier, which represents a total loading capacity of 32,000 tons per hour to the terminal.

Northern System

The Northern System is an integrated mine, railroad and port system, including open pit mines and an ore processing complex. The Northern System is located in the Carajás region, in the states of Pará and Maranhão in the north of Brazil (in the Amazon River basin), on public lands for which CVRD holds mining concessions. The Northern System's reserves are among the largest iron ore deposits in the world, with a life of more than 21 years at 2000 output levels. These reserves are divided into two main ranges (north and south), situated approximately 35 kilometers apart. Iron ore mining activities in the Northern System are currently being conducted in the north range, which is divided into four main mining bodies (N4E, N4WC, N4WN and N5).

**FEDERAL PUBLIC SERVICE
SECURITIES COMMISSION (Comissão de Valores Mobiliários - CVM)
ANNUAL INFORMATION - IAN
YEAR ENDED 12/31/2002**

01.01 - IDENTIFICATION

1 - CVM CODE 00417-0	2 - NAME OF THE COMPANY COMPANHIA VALE DO RIO DOCE	3 - CNPJ (CORPORATE TAXPAYER NUMBER) 33.592.510/0001-54
--------------------------------	--	---

11.01 - PRODUCTION PROCESS

The N4E deposit is the largest operational pit in the Northern Region. Industrial scale mining operations began at this mine in 1985. The Company selected the N4E mine as the first iron body to be developed in the Northern System because development of the N4E would facilitate access to the N4W and N5 deposits, which could share the N4E beneficiation complex and train loading terminal. Mining operations at N4W began in 1994, opening two pits (N4WC and N4WN). The Company completed the construction of two in-pit crushing systems located at N4E and N4WN mines in late December 1998. The N4E and N4W mines use conventional open pit benching, with drilling and blasting to open a free face followed by shovel loading. During 1998, operations also began at the N5 mines (N5W and N5E).

Because of the high iron content (65.4% on average) in the Northern System, there is no need to operate a concentration plant at Carajás. The beneficiation process for creating marketable sinter feed, pellet feed, special fines for direct reduction processes and lump ore consists simply of sizing operations, including screening, hydrocycloning, crushing and filtration. CVRD can therefore produce marketable iron ore in the Northern System at a lower cost than in the Southern System. Output from the beneficiation process consists of sinter feed, pellet feed, special fines for direct reduction processes and lump ore, which is sampled regularly before storage at the Carajás stockyard by automatic sampling systems that conform to ISO 9002 standards. After the beneficiation process, the Carajás railroad transports Northern System iron ore to the Ponta da Madeira marine terminal located at São Luís in the state of Maranhão, on the Atlantic Ocean. The Northern System has train-loading facilities with an aggregate nominal loading capacity of 14,000 tons per hour. A train composed of three diesel-electrical locomotives and up to 206 gondola ore-cars, each car having a net capacity of 105 tons, makes each 54.5-hour round-trip to the marine terminal. At the Ponta da Madeira marine terminal, a 100 kilometer long natural channel (at least 23 meters deep and 500 meters wide) ensures access for ships of up to 420,000 DWT. With a storage capacity of 3.5 million tons, a loading system consisting of bucket-wheel reclaimers, conveyor belts and single boom ship-loaders at two piers, the marine terminal can handle vessels from 20,000 to 420,000 DWT with no repositioning.

The complex in Carajás is accessible by road, air and rail. It obtains electrical power at market rates from regional utilities. To support the Carajás operations and to reduce turnover of mining personnel, the Company provides housing and other facilities for its workers in a nearby township.

The Company's twelfth iron ore pellet production plant located in the port of Ponta da Madeira, São Luís, state of Maranhão has opened. This plant is a wholly-owned asset of CVRD. The São Luís pellet plant, which has a nominal production capacity of 6 million tons per year, will use the high quality Carajás iron ore. This investment, brings CVRD's consolidated pellet production capacity to 43 million tons per year.

The new pellet plant is the most automated of its kind in the world, using new concepts of network communication with the use of fiber optics and intelligent instruments which send data already processed to control computers.

Pursuant to CVRD commitment to environmental preservation and taking advantage of the knowledge accumulated with the operation of the pellet plants based in the port of Tubarão, state of Espírito Santo, significant investment was made in latest-generation equipment to ensure that the best environmental protection practices are used. Ninety seven local technicians were trained at the Tubarão units to work in the São Luís pellet plant.

The pellet plant uses a travelling grate process developed by Lurgi-Mettlurgie, the same used in the seven pellet plants located on Tubarão. Of the equipment used in this industrial unit, of special mention are two rolling presses used in the grinding of iron ore, which produce considerable savings in energy consumption, reducing therefore, the plant's operating costs.

--------------------------------	--	---

11.01 - PRODUCTION PROCESS

The Company's pelletizing activities increase its market for fine and ultrafine iron ore used for making pellets. Iron ore is sold to the joint ventures, which perform the pelletizing at market prices. Historically, the joint-venture pelletizing plants in the Southern System derive all their iron ore fines from CVRD.

GOLD

Extraction is by heap-leaching or CIP (carbon in pulp). Then the ore is cast into doré bars and transport to the refinery.

The gold business is primarily conducted at the parent company level and each gold mine is wholly owned. These operations began in 1984 and currently there is one major mine in operation, Fazenda Brasileiro, located in the state of Bahia.

POTASH

Potash operations involve extraction, treatment (removal of impurities) and compacting (transformation into granulated or powder form).

Potash is an important raw material used in the production of fertilizers. CVRD leases a potash mine in the state of Sergipe from Petróleo Brasileiro S.A. (Petrobrás), the Brazilian government oil company. It is the only mine of this type in Brazil and has a current capacity of 600,000 tons per year.

11.02 - COMMERCIALIZATION, DISTRIBUTION PROCESS, MARKETS AND EXPORTATION

CUSTOMERS AND SUPPLIERS

CUSTOMERS

The commitment of Companhia Vale do Rio Doce to its customers is based on a deep understanding of their specific needs. CVRD has teams in the commercial area that offer customer service at all phases, from the initial order for products and/or services to follow-through technical assistance. From the characteristics of each business, customer service is thorough, continuous and carried out in steps. Each team receives specific training to prepare it to serve the customer needs it will face.

In the iron ore area, CVRD has been the world's largest exporter since the 1970s, relying on two integrated production and shipping systems, consisting of mines, railroads and ports. Customer service is performed by a team of professionals who operate in Brazil and the Company's overseas offices in Brussels, New York, Tokyo and Shanghai.

The Company is a provider of integrated logistics solutions aimed at creating value for its customers. As the largest logistics operator in Brazil, it offers a standout portfolio of multimodal services. Its logistics team has recognized technical know-how and the latest technology to manage a first-class set of assets, located in regions of great strategic and economic importance. Its transport assets form the base of an ample and complex multimodal system. The CVRD logistics area has teams that are focused on prospecting, development and implementation of logistics projects in the most important segments of the Brazilian economy.

CVRD's logistics customers can follow in real time, through the Client Information Service (Serviço de Informação ao Cliente - SIC), the safe progress of their products carried on the Centro-Atlântica, Carajás and Vitória a Minas railroads. CVRD commercializes basically iron ore and pellets, through contracts.

Operating abroad in the sale of CVRD's iron ore are:

Rio Doce Europa Ltd.: with head office in Funchal; Madeira Island, its activities are related to exportation of the iron ore of its Parent Company - CVRD;

Rio Doce International S.A.: a CVRD subsidiary, operates as an agent in Europe;

Rio Doce Asia Kabuschiki Kaisha: a CVRD subsidiary, operates as an agent in Asia;

CVRD Overseas: an indirect subsidiary of CVRD dedicated to sales to the Company's six largest customers, located in Europe, the United States and Asia, through securitization;

Itabira International Company Limited: a CVRD subsidiary, it is engaged in the sale of iron ore to foreign customers.

Brasilux: a CVRD subsidiary, it is engaged in the sale of iron ore to Europe

CVRD distributes its products in the domestic and foreign markets.

11.03 - COMPETITORS

The international iron ore market is highly competitive. Several large producers dominate this market. The principal factors affecting competition are price, quality, range of products offered, reliability and transportation costs. In 2002, the Asian market (primarily Japan, South Korea and China) and the European market were the primary markets for our iron ore.

Our biggest competitors in the Asian market are located in Australia and include affiliates of Broken Hill Proprietary Company Limited, or BHP, and The Rio Tinto Corporation Plc. Although the transportation costs of delivering iron ore from Australia to Asian customers are generally lower than ours as a result of Australia's geographical proximity, we believe we are able to remain competitive in the Asian market for two principal reasons. First, steel producers generally seek to obtain the types (or blends) of iron ore which can produce the intended final product in the most economic and efficient manner. Our iron ore has low impurity levels which generally lead to lower processing costs. For example, the alumina content of our iron ore is very low compared to Australian ore. Second, steel mills often develop sales relationships based on a reliable supply of a specific mix of iron ore. We have an aggressive marketing policy of meeting our clients' needs to the extent possible, including placing specialized personnel in direct contact with our clients to determine the blend that best suits each particular client. We sell our products FOB from our ports, which means that the invoice price includes delivery at our expense to our ports and no further. In general, our ownership of the process of producing and transporting iron ore to our ports helps ensure that our products get to our ports on schedule and at competitive costs. Consequently, we believe that the sale of our shipping dry-bulk assets will not affect our competitiveness as we have not subsidized shipping costs for those customers who have used our fleet. We believe that third party carriers are available to serve our customers.

We are competitive in the European market for the reasons we described above, as well as the quality of our Carajás iron ore and the proximity of the Ponta da Madeira port facilities to European customers. Our principal competitors in Europe are:

Anglo American (U.K.) and Affiliates,
Iron Ore Co.,
Quebec Cartier Mining Co. (Canada),
Luossavaara Kiirunavaara AB (Sweden),
SociJtP Nationale Industrielle et MiniPre (Mauritania),
Kumba Resources (South Africa), and
BHP (Australia), Rio Tinto (UK) and Affiliates.

The Brazilian iron ore market is highly competitive with a wide range of smaller producers. Although pricing is a relevant factor, quality and reliability are important competitive factors as well. We believe that our integrated transportation systems, high-quality ore and technical services make us a strong competitor in domestic sales. Prevailing export market prices, with adjustments negotiated to compensate for lower transport costs to domestic customers, influence iron ore sales in the domestic market.

The table below shows the overseas exports in the last three years, comparing the main companies and the respective percentages in relation to worldwide demand.

COUNTRY	COMPANY	2002	%	2001	%	2000	%
Brazil	CVRD	141,1	29.4	121,1	26.9	101,0	22.2

12.01 - PATENTS, TRADEMARKS AND FRANCHISES

PATENTS

CVRD's numerous patents are fundamental in achieving its objectives for technological research and development. The Company holds 464 patents: 321 of these are in Brazil (183 of which have been granted and 138 are pending with the National Institute of Intellectual Property INPI), while the remaining 143 are abroad (109 granted and 34 pending with the competent agencies).

14.05 - EXPANSION, MODERNIZATION AND DIVERSIFICATION PROJECTS

The capital investments planned for 2003 correspond to the implementation of the long-term strategy of Companhia Vale do Rio Doce that places priority on exploring opportunities for organic growth to generate value.

The budget approved for 2003 forecasts expenditures worth US\$ 1.843 billion. These resources will be allocated to the following categories: US\$ 1.129 billion for new projects and expansion; US\$ 642.5 million for maintenance, modernization, information technology, research and development and environmental protection; along with US\$ 72 million for mineral exploration.

The greatest share of spending on projects will be earmarked for non-ferrous minerals, US\$ 315 million. The other outlays will be: logistics, US\$ 289.8 million; ferrous minerals, US\$ 244.3 million; aluminum, US\$ 160.3 million; and metals, US\$ 48.3 million.

Development of the Sossego copper project, set for completion in the first half of 2004, will be take investments of US\$ 253.1 million in 2003. The total amount budgeted for the project is US\$ 283 million. Expansion of capacity at the Taquari-Vassouras potash mine, from 600 thousand to 850 thousand tons annually, will demand US\$ 29.4 million in 2003.

Outlays on logistics projects programmed for 2003 are concentrated in acquiring 3,500 rail cars and 166 locomotives to haul iron ore US\$ 49.7 million and general cargo, mainly transport of agricultural products US\$ 97.5 million, construction material US\$ 34.2 million, and steel products US\$ 11.7 million. The remaining capital expenditures will go to the construction of grain silos and to increase the capacity of the Praia Mole terminal, specialized in unloading solid bulk cargoes, mainly coal, coke and anthracite.

In 2003, US\$ 61.4 million will be invested to expand the logistics capacity of the Northern System, with US\$ 6.8 million going to build Pier III of the Ponta da Madeira Maritime Terminal. In the first phase of this project, to be finished in 2004, the terminal's capacity will be augmented from the current 56 million tons a year to 70 million tons.

Development of the Brucutu and Fábrica Nova iron ore mines in the Southern System is meant to replace the capacity that will be lost from future depletion of the mines at Capanema (in 2003), Timbopeba (in 2006) and Córrego do Meio (in 2007), besides aiming to meet increased future demand.

Brucutu is the most important reserve in the Southern System in terms of ore quantity and quality. US\$ 19.7 million will be spent in 2003 to start a project to build a beneficiation plant, whose final objective is to reach capacity of 12 million tons a year in 2008.

Fábrica Nova is a reserve belonging to Samitri, acquired in May 2000. It is in reality an expansion project because it utilizes the existing infrastructure and equipment. The goal is to reach production capacity of 15 million tons a year in 2009. A total of US\$ 39.6 million will be invested in this project.

US\$ 8.5 million will be spent to replace equipment and to boost capacity of the pelletizing plants in Tubarão. The aim is to augment their annual capacity from the current 25 million tons to 28 million in 2005.

Development of the Paragominas bauxite mine will involve US\$ 70 million in 2003. In 2010, Paragominas should reach annual capacity of 9 million tons. In parallel, US\$ 87.8 million will be spent in 2003 on the initial phase of constructing modules 4 and 5 of Alunorte, which will increase its annual alumina production capacity to 4.2 million tons.

In 2003, CVRD's principal investments in electric power will be conclusion of the Candonga (US\$ 15.2 million) and Aimorés (US\$ 16.7 million) hydroelectric stations. Candonga, with 140 MW of installed power, will start operating in November this year, while Aimorés, with 330 MW, should come on line the following month.

Expenditures on maintenance will reach US\$ 296.7 million, with US\$ 190.8 million spent to modernize operations, US\$ 81.2 million on information technology, US\$ 52.5 million for research and development, and US\$ 21.3 million on environmental protection and rehabilitation.

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

In the ferrous minerals area, outlays will go to substitute mining equipment to raise productivity and cut costs, to replace equipment that was redeployed to the Sossego project, as well as on operational improvements at beneficiation plants and on geological research to expand recoverable reserves.

US\$ 144.1 million will be spent in the logistics area on replacement of rails and ties, operational improvements and control systems. The main objectives are to raise operational safety, reduce costs and shorten travel cycles.

The investments in information technology include spending of US\$ 37 million to acquire the ERP system.

US\$ 72 million will be earmarked to prospect for copper (US\$ 39.5 million), gold (US\$ 9 million), manganese (US\$ 5.2 million), platinum group minerals (US\$ 4.3 million), nickel (US\$ 3.3 million) and others (US\$ 10.7 million). Another US\$ 45.2 million will be invested in further developing Carajás and the rest will be spent in other regions of Brazil and abroad. This amount includes expenditures by the BNDES of US\$ 25.7 million, in accordance with the Mineral Risk Contract.

15.01 - ENVIRONMENTAL PROBLEMS

ENVIRONMENTAL MANAGEMENT

The environmental quality of the activities, products and services of Companhia Vale do Rio Doce is a strategic factor indispensable to its competitiveness and very survival in the international marketplace. CVRD takes a proactive stance, insisting on standards that surpass legal requirements.

The Company promotes sustainable development and regularly discloses information about the environmental quality of its processes, products and services. Its activities ensure good returns to shareholders without harming future generations.

As one of the first Brazilian companies to implement an environmental management process based on the ISO 14001 standard, CVRD had received 12 certifications by the end of 2002. All its iron ore exports come from certified mines and pass through equally certified port terminals. The same is true of its pelletizing plants. In France, the subsidiary Rio Doce Manganèse Europe, a producer of ferroalloys, was ISO 14001 certified in 2001, and in 2002 received the Industrial Excellence Award from the Institut Européen d'Administration des Affaires Insead.

CVRD units with ISO 14001 certification in 2002:

Docenave Tugboat Quay Espírito Santo;

Iron and Gold Mining Complex at Itabira and Conceição Minas Gerais;

Gongo Soco Iron Ore Mine Minas Gerais;

Sociedade Mineira de Mineração Manganese Mine Minas Gerais;

Ferteco Mineração Iron Ore Mines Minas Gerais;

Sepetiba Bay Maritime Terminal Rio de Janeiro.

The above units are in addition to others already certified, among which are the Santa Luzia Mineral Development Center in Minas Gerais and the Carajás iron ore and manganese mines in the state of Pará, which were the first such mines in the world to receive ISO 14001 certification.

ENVIRONMENTAL PARTNERS

CVRD preserves over 1.2 million hectares (nearly 3 million acres) of native forestlands. In the Amazon region, the Company helps the Instituto Brasileiro do Meio Ambiente e Recursos Naturais Renováveis Ibama (Brazilian Environmental Agency) in managing the Carajás and Tapirapé-Aquiri National Forests. These dense forests are among the largest remaining stands of primary forest in the south of Pará.

In the region of the Mata Atlântica (Atlantic coastal rainforest), besides helping Ibama to protect the Sooretama Biological Reserve, CVRD maintains more than 22 thousand hectares (over 54 thousand acres) of native forest in the Vale do Rio Doce Natural Reserve in Linhares, Espírito Santo. Together, these reserves correspond to 75% of the state's remaining Atlantic forest.

This natural reserve has implemented an innovative model for self-sustaining management, through controlled public access to 1% of its area. In Linhares, CVRD has developed studies and technologies that enable annual production of millions of seedlings of over 800 tropical

15.01 - ENVIRONMENTAL PROBLEMS

plant species. For this initiative, applicable to other protected areas, the Company in 2002 was honored with the ECO and Top de Ecologia awards.

MINIMIZATION OF INPUTS AND OUTPUTS

Reduction of effluents, emissions and residues avoids unneeded waste and the costs associated with their control, treatment and final disposal. Measures to rationalize the main industrial inputs electricity, fuels and water are longstanding at CVRD. Substantial investments are made to technologically upgrade productive processes and control systems, as well as to improve operational procedures.

WATER

CVRD has operations in 14 Brazilian states, ranging from the tropical Amazon region to the semiarid Northeast of the country. This imposes specific demands for adequate water management based on individualized studies and solutions appropriate for each operational unit.

Reduced water consumption at the Tubarão pelletizing plants is an example of the significant results achieved. Over the past ten years, despite a 67% rise in annual pellet output, water consumption has been cut by 48%.

AIR

The Company has been consistently improving its programs to minimize atmospheric emissions. In 2002, new electrostatic precipitators were installed at the Tubarão pelletizing plants in Espírito Santo, which added to those already installed eliminate over 95% of particle emissions. The automatic monitoring systems installed in Vitória in Espírito Santo and Itabira in Minas Gerais are among the most modern in the world, allowing emissions to be consistently maintained within established levels.

In mining activities, specific and routine procedures are adopted to reduce atmospheric emissions, such as spraying down internal roads, minimizing the exposure of benches and slopes, and planting arboreal strips with species chosen to cut down particle emissions..

SOLID WASTE

The solid waste management program seeks to minimize generation and rationalize final disposal. It stimulates recycling, reuse, co-processing, or disposal in landfills under Company control when no other alternatives are feasible.

REHABILITATION OF MINED AREAS

CVRD applies the latest techniques to rehabilitate mined areas. At the end of extraction, these areas can be used for other economic activities or for environmental conservation. The funds necessary for future recovery of its mines are assured by setting aside part of the revenue obtained during the productive period.

In 2002, CVRD invested nearly R\$ 23 million in various projects to rehabilitate mined areas.

RESPONSIBILITY FOR THE LIFE CYCLE OF PRODUCTS AND SERVICES

With products sold the world over, CVRD pays close attention to the environmental regulations placed on its customers, establishing ongoing technical partnerships to identify opportunities to improve the environmental quality of the processes and products they use.

--------------------------------	--	---

15.01 - ENVIRONMENTAL PROBLEMS

The environmental quality of the products and services acquired by CVRD is ensured by the requirement to demonstrate compliance with all applicable regulations and by conducting regular environmental audits. All service providers are duly qualified and trained and must follow the same environmental procedures practiced by the Company's own employees.

RESPONSIBILITY TO FUTURE GENERATIONS AND COMMITMENT TO THE ENVIRONMENTAL CAUSE

CVRD is a founding member of the World Business Council for Sustainable Development - WBCSD and of its Brazilian counterpart, the Conselho Empresarial Brasileiro para o Desenvolvimento Sustentável - CEBDS. It also participates in other governmental and technical forums responsible for perfecting environmental laws and standards. This permits planning of the necessary preventive actions to maintain legal and regulatory conformity at all times. The Company also participates in the formulation and implementation of the United Nations Convention on Climate Change and is a founding member of the International Emissions Trading Association.

ENVIRONMENTAL ACTIONS IN COMMUNITIES

The Company encourages and implements actions to improve the environmental quality of the communities in the areas influenced by its activities. It sponsors environmental education programs that have already trained nearly 3,500 educators and 600 community leaders in the areas where it operates. These teachings have been passed on to more than 23 thousand public and private school students and other community members.

REHABILITATION IN MARIANA

In 2002, CVRD spent R\$ 1.5 million to rehabilitate a sanitary landfill located near the center of the historic city of Mariana in the state of Minas Gerais.

WILD ANIMAL PROTECTION CENTER

Built in São Luís in partnership with Ibama, this center treats wild animals seized from poachers, for later reintroduction to their natural habitats or consignment to zoos or accredited breeders.

ASSESSMENT OF THE ENVIRONMENTAL IMPACT OF PORT OPERATIONS

Under a partnership between CVRD and the Universidade Federal do Maranhão, a study was conducted of the environmental impact of port operations in São Luís, Maranhão state, which will serve as a basis for protective measures.

VALE AMBIENTE (WORTH THE ENVIRONMENT)

In 2002, this program put on seven seminars, 25 courses and 18 presentations on sustainable development. Vale Ambiente is a joint program among several municipal governments in Minas Gerais and Bahia states. It benefits some 2,000 teachers and 600 community leaders, who spread their such awareness to the wider community.

MEU AMBIENTE (MY ENVIRONMENT)

This project informs residents of the watershed formed by the Santa Maria da Vitória and Jucu rivers, source of water for the greater Vitória metropolitan area in Espírito Santo, of the importance of environmental preservation and proper water use. In 2002, Meu Ambiente was also implemented in the municipalities of Cariacica and Vila Velha. The project benefits 11 thousand people.

15.01 - ENVIRONMENTAL PROBLEMS

VALE SEMEAR (WORTH PLANTING)

Vale Semear prepares municipal school teachers in the cities of Linhares and Sooretama, in Espírito Santo, to include environmental studies in their curricula. In 2002, the project involved 840 educators and 8,910 students in the first through eighth grades in 15 schools.

VALE O AMANHÃ (VALUE TOMORROW)

Begun in 2002, this project is developed in partnership with the municipal secretariats of education and the environment in Vitória, Vila Velha, Cariacica, Serra and Viana, in Espírito Santo. It trains primary school teachers in environmental education. These activities benefit 500 teachers and 3,600 students in 10 schools.

EDUCATION FOR URBAN SANITATION

In São Luís, Maranhão, CVRD has been helping the local government to implement selective trash collection systems, in a project that will serve 200 thousand residents of the Anjo da Guarda, Vila Ariri, Vila Bacanga, Vila Embratel and Vila Maranhão districts.

TUESDAYS AT THE MUSEUM

The Tuesdays at the Museum environmental education project at the Vale do Rio Doce Museum in Vila Velha, Espírito Santo is aimed at public and private school students in the greater Vitória metropolitan area. Each month an average of 320 students participate.

CVRD COMMUNITY PROGRAM MINING CIRCUIT

Started in June 2002, this program presents the productive processes and environmental control measures taken by CVRD. Nearly 14 thousand people in Itabira, Mariana, Catas Altas, Santa Rita do Durão, Antônio Pereira and Ouro Preto have visited the Itabira Mining Complex and the Timbopeba and Alegria mines in Minas Gerais.

EXPENDITURES OF COMPANHIA VALE DO RIO DOCE ON ENVIRONMENTAL MANAGEMENT 2002

In 2002, the Company's expenditures on environmental actions reached R\$ 78 million, including associated and subsidiary companies, evaluated by the equity method criterion.

18.01 - BY LAWS

**As amended at the Extraordinary Shareholders Meeting
held on April 16, 2003**

CHAPTER I - NAME, PURPOSE, HEAD OFFICE AND DURATION

Article 1 - COMPANHIA VALE DO RIO DOCE, referred to in abbreviated form as CVRD, is a joint-stock company governed by the present By-Laws and by applicable legislation.

Article 2 - The purpose of the company is:

- I.** the exploitation of mineral deposits in Brazil and abroad by means of extraction, processing, industrialization, transportation, shipment and commerce of mineral assets;
- II.** the building and operation of railways and the exploitation of own or third party rail traffic;
- III.** the building and operation of own or third party marine terminals, and the exploitation of nautical activities for the provision of support within the harbor;
- IV.** the provision of logistics services integrated with cargo transport, comprising generation, storage, transshipment, distribution and delivery within the context of a multimodal transport system;
- V.** the production, processing, transport, industrialization and commerce of all and any source and form of energy, also involving activities of production, generation, transmission, distribution and commerce of its products, derivatives and subproducts;
- VI.** the carrying-on, in Brazil or abroad, of other activities that may be of direct or indirect consequence for the achievement of its corporate purpose, including research, industrialization, purchase and sale, importation and exportation, the exploitation, industrialization and commerce of forest resources and the provision of services of any kind whatsoever;
- VII.** constituting or participating in any fashion in other companies, consortia or associations directly or indirectly related to its business purpose.

Article 3 - The head office and legal venue of the company shall be in the city of Rio de Janeiro, State of Rio de Janeiro, the company being empowered for the better realization of its activities to set up branch offices, subsidiary branch offices, depots, agencies, warehouses, representative offices or any other type of establishment in Brazil or abroad.

Article 4 - The term of duration of the company shall be unlimited.

CHAPTER II - CAPITAL AND SHARES

Article 5 - The share capital is R\$ 6.300.000.000,00 (six billion and three hundred million reais), corresponding to 388,559,056 (three hundred and eighty-eight million, five hundred and fifty-nine thousand and fifty-six) book shares, being 249,983,143 (two hundred and forty-nine million, nine hundred and eighty-three thousand one hundred and forty-three) common shares corresponding to R\$ 4.053.164.574,55 (four billion, fifty-three million, one hundred and sixty-four thousand and five hundred and seventy-four reais and fifty-five cents), and 138,575,913 (one hundred and thirty-eight million, five hundred and seventy-five thousand nine hundred and thirteen) class A preferred shares, including 1 (one) special class share, corresponding to R\$ 2.246.835.425,45 (two billion, two hundred and forty-six million, eight hundred and thirty-five thousand, four hundred and twenty-five reais and forty-five cents), all of no par value.

§ 1 - The shares are divided into common shares and preferred shares. The preferred shares comprise class A and special class.

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

- § 2 - The special class preferred share shall belong exclusively to the Federal Government. In addition to the other rights assigned to it in the present By-Laws, the special class share shall possess the same rights as the class A preferred shares.
- § 3 - Each common and class A preferred share and the special class share shall confer the right to one vote in decisions made at General Meetings, the provisions of § 4 following being observed.
- § 4 - The class A and special class preferred shares shall have the same rights as the common shares with the exception of the right to vote at the election of members of the Board of Directors, in accordance with the provisions set forth in §§ 2

18.01 - BY LAWS

and **3** of **Article 11** following, but shall nevertheless possess the right jointly to elect and remove one member of the Audit Committee and the respective alternate.

- §5 -** Holders of class A preferred and special class shares shall be entitled to receive dividends calculated as set forth in **Chapter VII** in accordance with the following criteria:
- a) priority in receipt of dividends specified in § 5 corresponding to: (i) a minimum of 3% (three percent) of the stockholders equity of the share, calculated based on the financial statements which served as reference for the payment of dividends, or (ii) 6% (six percent) calculated on the portion of the capital formed by this class of share, whichever higher;
 - b) entitlement to participate in the profit distributed and any bonuses, on the same conditions as those for common shares, once a dividend equal to the minimum priority established in accordance with letter a above is ensured; and
 - c) entitlement to participate in any bonuses, on the same conditions as those for common shares, the priority specified for the distribution of dividends being observed.
- §6 -** Preferred shares shall acquire full and unrestricted voting rights should the company fail to pay the minimum dividends to which they are entitled during 3 (three) consecutive fiscal years, under the terms of **§5** of **Article 5**.

Article 6 - The company is authorized to increase its share capital up to the limit of 300,000,000 (three hundred million) common shares and 600,000,000 (six hundred million) class A preferred shares. Within the limit authorized by the present Article the company shall, by means of a decision of the Board of Directors, be entitled to increase the share capital without any alteration of the By-laws by means of the issuance of common shares and/or preferred shares.

- § 1 -** The Board of Directors shall determine the conditions for issuance, including the price and the period of time prescribed for paying up.
- § 2 -** At the option of the Board of Directors the preemptive right in the issuance of shares, bonds convertible into shares and subscription bonuses, the placement of which on the market may be by sale on the stock exchange or by public subscription as per the prescriptions set forth in Law no. 6.404/76, may be rescinded.
- § 3 -** Provided that the plans approved by the General Meeting are complied with, the company shall be entitled to delegate the option of share purchase to its administrators and employees, with shares held in custody or by means of the issuance of new shares, the shareholders preemptive right being excluded.

Article 7 - The special class share shall possess a veto right regarding of the following subjects:

- I. change of name of the company;
- II. change of location of the head office;
- III. change of the corporate purpose with reference to mineral exploitation;
- IV. the winding-up of the company;
- V. the sale or cessation of the activities of any part or of the whole of the following categories of the integrated iron ore systems of the company: (a) mineral deposits, reserves and mines; (b) railways; (c) ports and marine terminals;
- VI.

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

any alteration of the rights assigned to the types and classes of the shares issued by the company in accordance with the prescriptions set forth in the present By-Laws;

VII. any alteration of the present Article 7 or of any of the other rights assigned to the special class share by the present By-Laws.

CHAPTER III - GENERAL MEETING

Article 8 - The ordinary Shareholders General Meeting shall be held within the first four months following the end of the fiscal year and, extraordinarily, whenever called by the Board of Directors.

§ 1 - An extraordinary Shareholders General Meeting shall be competent to discuss the subjects specified in Article 7.

18.01 - BY LAWS

- § 2 - The holder of the special class share shall be formally requested by the company to attend for the purpose of discussing the subjects specified in Article 7 by means of personal correspondence addressed to its legal representative, a minimum period of notice of 15 (fifteen) days being given.
- § 3 - Should the holder of the special class share be absent from the General Meeting called for this purpose or should it abstain from voting, the subjects specified in Article 7 shall be deemed as having been approved by the holder of the said special class.

Article 9 - At an Ordinary or Extraordinary General Meeting, the chair shall be taken by the Chairman, or in his absence by the Vice-Chairman of the Board of Directors of the company, and the Secretary of the Board of Directors shall act as secretary, as per § 14 of **Article 11**.

Sole Paragraph - In the case of temporary absence or impediment of the Chairman or Vice-Chairman of the Board of Directors, the General Meeting of Shareholders shall be chaired by their respective alternates, or in the absence or impediment of such alternates, by an Officer specially appointed by the Chairman of the Board of Directors.

CHAPTER IV - ADMINISTRATION

Article 10 - The Board of Directors and the Executive Board shall be responsible for the administration of the company.

- §1 - The members of the Board of Directors and the Executive Board shall take office by means of signing the Minute Book of the Board of Directors or the Executive Board, as the case may be.
- §2 - The term of office of the members of the Board of Directors and the Executive Board shall be extended until their respective successors have taken office.
- §3 - The General Meeting shall fix the overall amount for the remuneration of the administrators, benefits of any kind and allowances being included therein, taking into account the responsibilities of the administrators, the time devoted to the performance of their duties, their competence and professional repute and the market value of their duties, their competence and professional repute and the market value of their services. The Board of Directors shall apportion the fixed remuneration among its members and the Executive Board.
- §4 - The Board of Directors shall be supported by technical and consultant bodies, denominated Committees, regulated as set forth in **Section II Committees** hereinafter.

SECTION I - BOARD OF DIRECTORS

Subsection I - Composition

Article 11 - The Board of Directors, a joint decision-making body, shall be elected by the General Meeting and shall be formed of 11 (eleven) effective members and their respective alternates, all being shareholders in the company, and one of whom shall be the Chairman of the Board and another shall be the Vice-Chairman.

- §1 - The term of office of the members of the Board of Directors shall be 2 (two) years, their re-election being permitted.
- §2 - Under the terms of Article 141 of Law # 6,404/76, 1 (one) member and his alternate of the Board of Directors, may be elected and removed, by means of a separate vote at the general meeting of shareholders, excluding the controlling shareholder, by the majority of holders, respectively, of:
- I -** common shares representing at least 15% (fifteen percent) of the total shares with voting rights; and

II - preferred shares representing at least 10% (ten percent) of share capital.

§3 - Having ascertained that neither the holders of common shares or preferred shares have respectively formed the quorum required in **sections I and II** of **§2** above, they shall be entitled to combine their shares to jointly elect a member and an alternate to the Board of Directors, and in such hypothesis the quorum established in **section II** of **§2** of this Articleshall be observed.

18.01 - BY LAWS

- §4 - The entitlement set forth in §2 of this Article may only be exercised by those shareholders who are able to prove uninterrupted ownership of the shares required therein for a period of at least 3 (three) months, immediately prior to the general shareholders meeting which elected the members of the Board of Directors.
- §5 - From among the 11 (eleven) effective members and their respective alternates of the Board of Directors, 1 (one) member and his alternate shall be elected and/or removed, by means of a separate vote, by the employees of the company.
- §6 - The Chairman and the Vice-Chairman of the Board of Directors shall be elected among the members thereof during a Meeting of the Board of Directors to be held immediately after the General Meeting which has elected them.
- §7 - In the case of impediment or temporary absence, the Vice-Chairman shall replace the Chairman, and during the period of such replacement the Vice-Chairman shall have powers identical to those of the Chairman, the alternate of the Chairman being nevertheless entitled to exercise the right to vote in his capacity as a member of the Board of Directors.
- §8 - Should a vacancy occur in the office of Chairman or Vice-Chairman, the Board of Directors shall elect the respective alternates in the first Meeting to be held after the vacancy.
- §9 - During their impediments or temporary absences, the members of the Board of Directors shall be replaced by their respective alternates.
- §10 - Should a vacancy occur in the office of a member of the Board of Directors or of an alternate, the vacancy shall be filled by nomination by the remaining members of an alternate who shall serve until the next General Meeting, which shall decide on his election. Should vacancies occur in the majority of such offices, a General Meeting shall be convened in order to proceed with a new election.
- §11 - Whenever the Board of Directors is elected under the multiple vote regime, as established in Article 141 of Law # 6,404/1976, the Chairman of the shareholders meeting shall inform those shareholders present that the share which elected a member of the Board of Directors, by means of a separate vote in accordance with §§2 and 3 of **Article 11**, may not participate in the multiple vote regime and, evidently, may not participate in the calculation of the respective quorum. Once the separate vote has been held, then the ratio may be definitively defined in order to proceed with the multiple vote.
- §12 - With the exception of the effective members and their respective alternates, elected by means of separate vote, respectively, by the employees of the company and by the holders of preferred shares, under **section II, §2 of Article 11**, whenever the election for the Board of Directors is held under the multiple vote regime, the removal of any member of the Board of Directors, effective or alternate, by the general shareholders meeting, shall imply in the removal of the other members of the Board of Directors, and consequently a new election shall be held; in other cases of vacancy, in the absence of an alternate, the first general shareholders meeting shall elect the whole Board.
- §13 - Whenever, cumulatively, the election of the Board of Directors is held under the multiple vote system and the holders of common shares or preferred shares or company employees exercise the right established in §§ 2, 3 and 5 above, the shareholder or group of shareholders under vote agreement who hold over 50% (fifty percent) of shares with voting rights, shall be ensured the right to elect officers in a number equal to those elected by the other shareholders, plus one, irrespective of the number of officers established in the caption of **Article 11**.
- §14 - The Board of Directors shall have a Secretary, appointed by the Chairman of the Board of Directors, who shall necessarily be an employee or administrator of the company, in whose absence or impediment shall be replaced by another employee or administrator as designated by the Chairman of the Board of Directors.

Subsection II - Workings

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

Article 12 - The Board of Directors shall meet on an ordinary basis once a month and extraordinary whenever called by the Chairman or, in his absence, by the Vice-Chairman of the Board or by any 2 (two) members acting together.

Article 13 - Meetings of the Board of Directors shall only be held with the presence of and decisions shall only be taken by the affirmative vote of a majority of its members.

§1 - The minutes of the meetings of the Board of Directors shall be recorded in the Book of Minutes of Meetings of the Board of Directors which, after having been read and approved by the officers present at the meetings, shall be signed in a number sufficient to constitute the majority necessary for approval of the subjects examined.

Subsection I - Mission

Article 16 - The mission of the committees shall be to provide support to the Board of Directors in order to increase the efficiency and quality of its decisions.

Subsection II - Composition

Article 17 - The members of the committees shall have proven experience and technical skills in relation to matters that are the object of the respective committee's responsibility and shall be subject to the same legal duties and responsibilities as the administrators.

Article 18 - The composition of each committee shall be defined by the Board of Directors.

- §1 - The members of the committees shall be appointed by the Board of Directors and may belong to company administration bodies or not.
- §2 - The term of management for the members of the committees shall begin as of their appointment by the Board of Directors, and termination shall coincide with the end of the management term of the members of the Board of Directors, and re-appointment shall be permitted.
- §3 - During their management, members of the committees may be removed from office by the Board of Directors.

Subsection III - Workings

Article 19 - Standards relating to the workings of each committee shall be defined by the Board of Directors.

- §1 - The committees established within the company shall not have decision making power and their reports and proposals shall be submitted to the Board of Directors for approval.
- §2 - The committees' reports do not constitute a necessary condition for the presentation of matters for scrutiny and approval by the Board of Directors.

Subsection IV - Responsibilities

Article 20 - The main duties of the committees are set forth in **Article 21** and subsequent articles, whereas their detailed duties shall be defined by the Board of Directors.

Article 21 - The Executive Development Committee shall be responsible for:

- I** - issuing reports on the human resources general policies of the company submitted by the Executive Board to the Board of Directors;
- II** - analyzing and issuing reports to the Board of Directors on the restatement of remuneration of members of the Executive Board;
- III** - submitting and ensuring up-to-dateness of the performance evaluation methodology of the members of the Executive Board.

Article 22 - The Strategic Committee shall be responsible for:

- I** - issuing reports on the strategic guidelines and the strategic plan submitted annually by the Executive Board;

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

- II** - issuing reports on the company's annual and multi-annual investment budgets submitted by the Executive Board to the Board of Directors;

- I - issuing reports on the financial policies and the internal financial control systems of the company;
- II - issuing reports on the compatibility between the remuneration level of shareholders and the parameters established in the annual budget and financial scheduling, as well as its consistency with the general policy on dividends and the capital structure of the company.

Article 24 - The Audit Committee shall be responsible for:

- I - submitting appointment recommendations of the independent auditors and the employee responsible for internal auditing of the company to the Board of Directors;
- II - issuing reports on the policies and the company's annual auditing plan submitted by the employee responsible for internal auditing, and on its execution;
- III - tracking the results of the company's internal auditing, and identifying, prioritizing, and submitting actions to be accompanied by the Executive Board to the Board of Directors;
- IV - analyzing the Annual Report, as well as the Financial Statements of the company and making recommendations to the Board of Directors.

Article 25 - The Governance and Ethics Committee shall be responsible for:

- I - evaluating the efficiency of the company's governance practices and the workings of the Board of Directors, and submitting improvements;
- II - submitting improvements to the code of ethics and in the management system in order to avoid conflicts of interests between the company and its shareholders or company administrators;
- III - issuing reports on policies relating to corporate responsibility, such as the environment, health, safety and social responsibility of the company submitted by the Executive Board;
- IV - issuing reports on potential conflicts of interest between the company and its shareholders or administrators.

SECTION III - EXECUTIVE BOARD

Subsection I Composition

Article 26 - The Executive Board, the executive administration body of the company, shall consist of 6 (six) to 9 (nine) members, one of whom shall be the Chief Executive Officer and others shall be Executive Officers.

- §1 - The Chief Executive Officer shall submit to the Board of Directors the names of candidates for the Executive Board with renowned knowledge and specialization in the subject of responsibility of the respective operational area, and may also at any time submit to the Board of Directors a motion to remove.
- §2 - The Executive Officers shall have their individual duties defined by the Board of Directors.
- §3 - The management term of the members of the Executive Board shall be 2 (two) years, and re-election shall be permitted.

Subsection II Workings

Article 27 - In the case of temporary impediment of the Chief Executive Officer, same shall be replaced by another member of the Executive Board designated by majority vote of the members of the Executive Board, and in the case of absence, the Chief Executive Officer may designate his own substitute, who shall assume all legal, statutory and regulatory duties and responsibilities.

§1 - In the case of temporary impediment or absence of any Executive Officer, same shall be replaced by one of the Executive Officers appointed by the Chief Executive Officer, who shall accumulate the legal, statutory and regulatory responsibilities of the absent or impeded Executive Officer, for the term of exercise of the post of the substituted Executive Officer, excluded the right to vote at Executive Board meetings.

- § 2 - Should a vacancy occur in the office of an Executive Officer, the substitute member shall be selected and his name shall be submitted by the Chief Executive Officer to the Board of Directors who shall elect him to complete the remaining term of the substituted officer.
- § 3 - Should a vacancy occur in the office of the Chief Executive Officer, the Executive Officer in charge of Finance shall substitute the Chief Executive Officer, accumulating his own duties, rights and responsibilities with those of the Chief Executive Officer until the Board of Directors holds a new election for the office of Chief Executive Officer.

Article 28 - In respect of the limits established for each Executive Officer, the decisions on matters affecting his specific operational area, provided that the matter does not affect the operational area of another Executive Officer, shall be taken by himself or in conjunction with the Chief Executive Officer, in matters or situations pre-established by the latter.

Article 29 - The Executive Board shall meet on an ordinary basis once a fortnight and extraordinarily whenever called by the Chief Executive Officer or his substitute.

Sole Paragraph - The Chief Executive Officer shall convene an extraordinary meeting of the Executive Board by virtue of the request of at least 3 (three) members of the Executive Board;

Article 30 - The meetings of the Executive Board shall only begin with the presence of the majority of its members.

Article 31 - The Chief Executive Officer shall chair the meetings of the Executive Board in order to prioritize consensual approvals amongst its members.

- §1 - When there is no consent among members of the Board, the Chief Executive Officer may (i) withdraw the issue from the agenda, (ii) attempt to form a majority, with the use of his casting vote or, (iii) in the interests of the company and by grounded presentation, decide individually on the matters raised for joint approval, including those listed in Article 32, and in respect of the exceptions stated in §2 following;
- §2 - Decisions relating to annual and multi-annual budgets and to the strategic plan and the Annual Report of the company shall be taken by majority vote, considered to be all Executive Officers, provided that the favorable vote of the Chief Executive Officer is included therein.
- §3 - The Chief Executive Officer shall inform the Board of Directors the utilization of the prerogative concerning item (iii), §1 stated above, in the first Board of Directors meeting which succeed the corresponding decision.

Subsection III Responsibilities

Article 32 - The Executive Board shall be responsible for:

- I** - approving the creation and elimination of Executive Departments subordinated to each Executive Director;
- II** - preparing and submitting to the Board of Directors the company's general policies on human resources, and executing the approved policies;
- III** - complying with and ensuring compliance with the general guidelines and business policies of the Company laid down by the Board of Directors;
- IV** - preparing and submitting, annually, to the Board of Directors, the company's strategic guidelines and the strategic plan, and executing the approved strategic plan;

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

- V -** preparing and submitting the company's annual and multi-annual investments budgets to the Board of Directors, and executing the approved budgets;
- VI -** planning and steering the company's operations and reporting the company's economic and financial performance to the Board of Directors, and producing reports with specific performance indicators;
- VII -** identifying, evaluating and submitting investment and/or divestiture opportunities to the Board of Directors which exceed the limits of the Executive Board as defined by the Board of Directors, and executing the approved investments and/or divestitures;

- V -** Coordinate the decision making process of the Executive Board, as provided for in **Article 31** of **Subsection II Workings**;
- VI -** grant vacation and leave to the members of the Executive Board, and designate other Executive Officers as their alternates;
- VII -** keep the Board of Directors informed about the activities of the company;
- VIII -** together with the other Executive Officers, prepare the annual report and draw up the balance sheet;

Article 34 - The Executive Officers are to:

- I -** organize the services for which they are responsible;
- II -** participate in meetings of the Executive Board, contributing to the definition of the policies to be followed by the company and reporting on matters of the respective areas of supervision and coordination;
- III -** comply with and ensure compliance with the policy and general guidance of the company's business laid down by the Board of Directors, each Executive Officer being responsible for his business units and specific area of activities.

Article 35 - The company shall be represented as plaintiff or defendant in courts of law or otherwise, including as regards the signature of documents constituting responsibility for this, by 2 (two) members of the Executive Board, or by 2 (two) proxies established in accordance with § 1 of this Article, or by 1 (one) proxy jointly with an Executive Officer.

- § 1 -** Except when otherwise required by law, proxies shall be appointed by a power of attorney in the form of a private instrument in which the powers granted shall be specified, the term of validity of powers of attorney *ad negotia* expiring on December 31 of the year in which it is granted.
- § 2 -** The company may, moreover, be represented by a single proxy at the General Meetings of shareholders of the companies, consortia and other organizations in which it participates or for acts arising out of the exercise of powers specified in a power of attorney *ad judicia* or: (a) at agencies at any level of government, customs houses and public service concessionaires for specific acts for which a second proxy is not necessary or not permitted; (b) for signing of contract instruments in solemnity or at which the presence of a second proxy is not possible; (c) for signing of documents of any kind which imply an obligation for the company whose monetary limits shall be established by the Executive Board.
- § 3 -** In the case of commitments assumed abroad, the company may be represented by a single member of the Executive Board, or by an attorney-in-fact with specific and limited powers according to the present By-Laws.
- § 4 -** Summons and judicial or extrajudicial notifications shall be made in the name of the Executive Officer responsible for Investor Relations, or by proxy as established in § 1 of this Article.

CHAPTER V - AUDIT COMMITTEE

Article 36 - The Audit Committee, a permanently functioning body, shall be formed of 3 (three) to 5 (five) effective members and an equal number of alternates, elected by the General Meeting, which shall fix their remuneration.

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

Article 37 - The members of the Audit Committee shall carry out their duties until the first Ordinary General meeting to be held following their election, their re-election being permitted.

Article 38 - In their absence or impediment, or in cases of vacancy of office, the members of the Audit Committee shall be replaced by their respective alternates.

18.01 - BY LAWS

Article 39 - The Audit Committee shall exercise the functions attributed to it by prevailing legislation, and shall provide, with minimum notice of 30 (thirty) days prior to the Ordinary General Meeting, a report on the documentation as established in Article 133 of Law # 6,404/76, with the terms set forth in Law # 10,303/01.

CHAPTER VI - COMPANY PERSONNEL

Article 40 - The company shall maintain a social security plan for its employees administered by a foundation established for this purpose, the provisions of prevailing legislation being complied with.

CHAPTER VII - FINANCIAL YEAR AND DISTRIBUTION OF PROFITS

Article 41 - The fiscal year of the company shall coincide with the calendar year, thus finishing on December 31, when the balance sheets shall be prepared.

Article 42 - After the constitution of the legal reserve, the employment of the remaining portion of the net profit verified at the end of each financial year (which shall coincide with the calendar year) shall, on the motion of the Administration, be submitted to the decision of the General Meeting.

Sole Paragraph - The amount of the interest, paid or credited in the form of interest on stockholders' equity in accordance with the prescriptions of Article 9, § 7 of Law # 9,249 dated December 26, 1995 and of relevant legislation and regulations, may be ascribed to the compulsory dividend and to the minimum annual dividend on the preferred shares, such amount for all legal purposes forming the sum of the dividends distributed by the company.

Article 43 - The proposal for distribution of profit shall include the following reserves:

- I.** Depletion Reserve, to be constituted in accordance with prevailing fiscal legislation;
- II.** Investments Reserve, in order to ensure the maintenance and development of the main activities which comprise the company's purpose, in an amount not greater than 50% (fifty percent) of distributable net profit up to a maximum of the company's share capital.

Article 44 - At least 25% (twenty-five percent) of the net annual profit, adjusted as per the law, shall be devoted to the payment of dividends.

Article 45 - At the proposal of the Executive Board, the Board of Directors may determine the preparation of the balance sheets in periods of less than a year and declare dividends or interest on stockholders' equity on account of the profit verified in these balances as well as to declare for the account of accrued profits or profit reserves existing in the latest annual or semi-annual balance sheet.

Article 46 - The dividends and interest on stockholders' equity mentioned in the **Sole Paragraph** of **Article 42** shall be paid at the times and at the places specified by the Executive Board, those not claimed within 3 (three) years after the date of payment reverting in favour of the company.

I hereby declare that the above text is a true copy of the original, recorded in the appropriate book.
