INTRODUCTION - FORWARD LOOKING STATEMENTS

This Form 10-K contains various forward-looking statements, usually containing the words "estimate," "project," "expect," "objective," "goal," or similar expressions and includes assumptions concerning the Company's operations, future results, and prospects. These forward-looking statements are based upon current expectations and are subject to risk and uncertainties. In connection with the "safe-harbor" provisions of the Private Securities Litigation Reform Act of 1995, the Company provides the following cautionary statement identifying important factors which could cause the actual results of events to differ materially from those set forth in or implied by the forward-looking statements and related assumptions.

Such factors include the following: (i) the effect of changing regional and national economic conditions; (ii) significant changes in interest rates and prepayment speeds; (iii) credit risks of commercial, agricultural, real estate, consumer, and other lending activities; (iv) changes in federal and state banking laws or regulations; (v) competitive pressure in the banking industry; (vi) changes in governmental fiscal or monetary policies; (vii) uncertainty regarding the economic outlook resulting from the continuing war on terrorism, as well as actions taken or to be taken by the U.S. or other governments as a result of further acts or threats of terrorism; and (viii) other factors discussed in Item 1A. Risk Factors.

Readers are cautioned not to place undue reliance on these forward-looking statements which speak only as of the date hereof. The Company undertakes no

obligation to update any forward-looking statements to reflect events or circumstances arising after the date on which they are made.

PART I

ITEM 1. BUSINESS

GENERAL DEVELOPMENT OF THE BUSINESS

August 1, 1916 marked the first day of business for Farmers & Merchants Bank of Lodi. The Bank was incorporated under the laws of the State of California and was licensed by the California Department of Financial Institutions as a state-chartered bank. The Bank prospered and grew even through the Depression years. Farmers & Merchants' first venture out of Lodi occurred in response to the closure of the only bank serving the community of Galt, requiring area residents to drive miles away for the simplest banking transaction. To meet this need, the Galt office was opened in 1948. Shortly thereafter branches were opened in Linden, North Modesto and South Sacramento. On April 12, 1957, the Bank's name was changed to Farmers & Merchants Bank of Central California.

The Bank continued expansion in the Lodi market area and also acquired three offices in Turlock and Hilmar in 1985. The service area was next expanded by opening a loan production office in the community of Elk Grove. This office was later converted to a full service branch. A third office was also opened in Modesto. The year 2002 saw the opening of the Lincoln Center office, the Company's first branch in the city of Stockton. In September, 2003 the Bank opened its fourth office in Modesto. Located across from the Vintage Faire Mall, this branch incorporates state of the art technology throughout and represents the template for the Bank's future branch expansions and renovations.

During 2004 the Company initiated a major branch expansion, relocation and renovation program. A second Galt office was opened in June 2005 and a new full-service branch in downtown Sacramento in February 2006. In October 2006, the Company opened its sixth Lodi office on the southwest side of town in the Vintner's Square shopping center and in November 2006, the Company's flagship commercial branch was opened on March Lane in Stockton. The downtown Turlock branch will be relocated to a new facility during the second half of 2007. Many branches received renovations during the previous three years, both to update these facilities and to comply with the Americans with Disabilities Act. The Company currently estimates that the capital expenditures associated with this multi-year program, which began in 2004, will be in excess of $10 million, which will result in increases in the Company's occupancy and equipment expenses.

3

On March 10, 1999, Farmers & Merchants Bancorp (together with its subsidiaries, the "Company"), pursuant to a reorganization, acquired all of the voting stock of Farmers & Merchants Bank of Central California (the "Bank"). Farmers & Merchants Bancorp is a bank holding company incorporated in the State of Delaware, and registered under the Bank Holding Company Act of 1956, as amended. The Company's outstanding securities as of December 31, 2006 consisted of 811,933 shares of common stock, $0.01 par value and no shares of preferred stock issued. The Bank is the Company's principal asset.

The Bank's two wholly owned subsidiaries are Farmers & Merchants Investment Corporation and Farmers/Merchants Corp. Farmers & Merchants Investment Corporation is currently dormant and Farmers/Merchants Corp. acts as trustee on deeds of trust originated by the Bank.

F & M Bancorp, Inc. was created in March 2002 to protect the name "F & M Bank". During 2002, the Company completed a fictitious name filing in California to

begin using the streamlined name, "F & M Bank" as part of a larger effort to enhance the Company's image and build brand name recognition. Since 2002, the Company has converted most of its daily operating and image advertising to the "F & M Bank" name and the Company's logo, slogan and signage were redesigned to incorporate the trade name, "F & M Bank".

During 2003 the Company formed a wholly owned Connecticut statutory business trust, FMCB Statutory Trust I, for the sole purpose of issuing trust preferred securities. See Note 17 located in "Item 8. Financial Statements and Supplementary Data."

The Company's principal business is to serve as a holding company for the Bank and for other banking or banking related subsidiaries which the Company may establish or acquire. As a legal entity separate and distinct from its subsidiary, the Company's principal source of funds is, and will continue to be, dividends paid by and other funds advanced from the Bank. Legal limitations are imposed on the amount of dividends that may be paid and loans that may be made by the Bank to the Company. See "Item 1. Business - Dividends and Other Transfer of Funds."

The Bank's deposit accounts are insured under the Federal Deposit Insurance Act up to applicable limits.

As a bank holding company, the Company is subject to regulation and examination by the Board of Governors of the Federal Reserve System ("FRB"). The Bank is a California state-chartered non-fed member bank subject to the regulation and examination of the California Department of Financial Institutions and the Federal Deposit Insurance Corporation.

SERVICE AREA

The Company services the northern Central Valley of California with 21 banking offices. The area includes Sacramento, San Joaquin, Stanislaus and Merced Counties with branches in Sacramento, Elk Grove, Galt, Lodi, Stockton, Linden, Modesto, Turlock and Hilmar.

Through its network of banking offices, the Company emphasizes personalized service along with a full range of banking services to businesses and individuals located in the service areas of its offices. Although the Company focuses on marketing its services to small and medium sized businesses, a full range of retail banking services are made available to the local consumer market.

The Company offers a wide range of deposit instruments. These include checking, savings, money market, time certificates of deposit, individual retirement accounts and online banking services for both business and personal accounts. The Company also serves as a federal tax depository for its business customers.

The Company provides a full complement of lending products, including commercial, real estate construction, agribusiness, installment, credit card and real estate loans. Commercial products include lines of credit and other working capital financing and letters of credit. Financing products for individuals include automobile financing, lines of credit, residential real estate, home improvement and home equity lines of credit.

The Company also offers a wide range of specialized services designed for the needs of its commercial accounts. These services include a credit card program for merchants, collection services, lockbox, investment sweep, on-line account access, and electronic funds transfers by way of domestic and international wire

and automated clearinghouse.

The Company makes investment products available to customers, including mutual funds and annuities. These investment products are offered through a third party, which employs investment advisors to meet with and provide investment advice to the Company's customers.

EMPLOYEES

At December 31, 2006, the Company employed a total of 302 full time equivalent employees. The Company believes that its employee relations are satisfactory.

COMPETITION

The banking and financial services industry in California generally, and in the Company's market areas specifically, is highly competitive. The increasingly competitive environment is a result primarily of changes in regulation, changes in technology and product delivery systems, and the accelerating pace of consolidation among financial service providers. The Company competes with other major commercial banks, diversified financial institutions, credit unions, savings and loan associations, money market and other mutual funds, mortgage companies, and a variety of other non-banking financial services and advisory companies. Federal legislation encourages competition between different types of financial service providers and has fostered new entrants into the financial services market, and it is anticipated that this trend will continue. Using the financial holding company structure, insurance companies and securities firms may compete more directly with banks and bank holding companies.

Many of our competitors are much larger in total assets and capitalization, have greater access to capital markets and offer a broader range of financial services than the Company. In order to compete with other financial service providers, the Company relies upon personal contact by its officers, directors, employees, and shareholders, along with various promotional activities and specialized services. In those instances where the Company is unable to accommodate a customer's needs, the Company may arrange for those services to be provided through its correspondents.

GOVERNMENT POLICIES

The Company's profitability, like most financial institutions, is primarily dependent on interest rate differentials. The difference between the interest rates paid by the Company on interest-bearing liabilities, such as deposits and other borrowings, and the interest rates received by the Company on its interest-earning assets, such as loans extended to its customers and securities held in its investment portfolio, comprise the major portion of the Company's earnings. These rates are highly sensitive to many factors that are beyond the control of the Company and the Bank, such as inflation, recession and unemployment, and the impact which future changes in economic conditions might have on the Company and the Bank cannot be predicted.

The business of the Company is also influenced by the monetary and fiscal policies of the federal government and the policies of regulatory agencies, particularly the Board of Governors of the Federal Reserve System (the "FRB"). The FRB implements national monetary policies (with objectives such as curbing inflation and combating recession) through its open-market operations in U.S. Government securities by adjusting the required level of reserves for depository institutions subject to its reserve requirements, and by varying the target federal funds and discount rates applicable to borrowings by depository institutions. The actions of the FRB in these areas influence the growth of bank loans, investments, and deposits and also affect interest rates earned on interest-earning assets and paid on interest-bearing liabilities. The nature and impact on the Company of any future changes in monetary and fiscal policies

cannot be predicted.

From time to time, legislative acts, as well as regulations, are enacted which have the effect of increasing the cost of doing business, limiting or expanding permissible activities, or affecting the competitive balance between banks and

5

other financial services providers. Proposals to change the laws and regulations governing the operations and taxation of banks, bank holding companies, and other financial institutions and financial services providers are frequently made in the U.S. Congress, in the state legislatures, and before various regulatory agencies. This legislation may change banking statutes and the operating environment of the Company and its subsidiaries in substantial and unpredictable ways. If enacted, such legislation could increase or decrease the cost of doing business, limit or expand permissible activities or affect the competitive balance among banks, savings associations, credit unions, and other financial institutions. The Company cannot predict whether any of this potential legislation will be enacted, and if enacted, the effect that it, or any implementing regulations, would have on the financial condition or results of operations of the Company or any of its subsidiaries. See "Item 1. Business – Supervision and Regulation."

SUPERVISION AND REGULATION

General

Bank holding companies and banks are extensively regulated under both federal and state law. The regulation is intended primarily for the protection of depositors and the deposit insurance fund and not for the benefit of shareholders of the Company. Set forth below is a summary description of the material laws and regulations, which relate to the operations of the Company and the Bank. This description does not purport to be complete and is qualified in its entirety by reference to the applicable laws and regulations.

In recent years significant legislative proposals and reforms affecting the financial services industry have been discussed and evaluated by Congress, the state legislature and before the various bank regulatory agencies. These proposals may increase or decrease the cost of doing business, limiting or expanding permissible activities, or enhance the competitive position of other financial service providers. The likelihood and timing of any such proposals or bills and the impact they might have on the Company and its subsidiaries cannot be predicted.

The Company

The Company is a registered bank holding company and is subject to regulation under the Bank Holding Company Act of 1956 ("BHCA"), as amended. Accordingly, the Company's operations are subject to extensive regulation and examination by the FRB. The Company is required to file with the FRB quarterly and annual reports and such additional information as the FRB may require pursuant to the Bank Holding Company Act. The FRB conducts periodic examinations of the Company.

The FRB may require that the Company terminate an activity or terminate control of or liquidate or divest certain subsidiaries of affiliates when the FRB believes the activity or the control of the subsidiary or affiliate constitutes a significant risk to the financial safety, soundness or stability of any of its banking subsidiaries. The FRB also has the authority to regulate provisions of certain bank holding company debt, including authority to impose interest ceilings and reserve requirements on such debt. Under certain circumstances, the Company must file written notice and obtain approval from the FRB prior to purchasing or redeeming its equity securities.

Under the BHCA and regulations adopted by the FRB, a bank holding company and its non-banking subsidiaries are prohibited from requiring certain tie-in arrangements in connection with an extension of credit, lease or sale of property or furnishing of services. For example, with certain exceptions, a bank may not condition an extension of credit on a promise by its customer to obtain other services provided by it, its holding company or other subsidiaries, or on a promise by its customer not to obtain other services from a competitor. In addition, federal law imposes certain restrictions on transactions between Farmers & Merchants Bancorp and its subsidiaries. Further, the Company is required by the FRB to maintain certain levels of capital. See "Item 1. Business - Supervision and Regulation - Capital Standards."

Directors, officers and principal shareholders of the Company, and the companies with which they are associated, have had and will continue to have banking transactions with the Bank in the ordinary course of business. All such extensions of credit are made on substantially the same terms (including interest rates and collateral) as, and following credit-underwriting procedures that are not less stringent than, those prevailing at the time for comparable transactions by the Bank with other persons not covered by 12 USC 215.1 et seq. and who are not employed by the Bank, and does not involve more than the normal risk of repayment or present other unfavorable features. Extensions

6

of credit to insiders have been and may be made pursuant to a benefit or compensation program that is widely available to employees of the Bank and that does not give preference to any insider of the Bank over other employees.

The Company is prohibited by the BHCA, except in certain statutorily prescribed instances, from acquiring direct or indirect ownership or control of more than 5% of the outstanding voting shares of any company that is not a bank or bank holding company and from engaging directly or indirectly in activities other than those of banking, managing or controlling banks or furnishing services to its subsidiaries. However, the Company, subject to the prior approval of the FRB, may engage in any, or acquire shares of companies engaged in, activities that are deemed by the FRB to be so closely related to banking or managing or controlling banks as to be a proper incident thereto.

Under FRB regulations, a bank holding company is required to serve as a source of financial and managerial strength to its subsidiary banks and may not conduct its operations in an unsafe or unsound manner. In addition, it is the FRB's policy that in serving as a source of strength to its subsidiary banks, a bank holding company should stand ready to use available resources to provide adequate capital funds to its subsidiary banks during periods of financial stress or adversity and should maintain the financial flexibility and capital-raising capacity to obtain additional resources for assisting its subsidiary banks. This support may be required at times when a bank holding company may not be able to provide such support. A bank holding company's failure to meet its obligations to serve as a source of strength to its subsidiary banks will generally be considered by the FRB to be an unsafe and unsound banking practice or a violation of the FRB's regulations or both.

The Gramm-Leach-Bliley Act of 1999 ("GLBA") eliminated many of the restrictions placed on the activities of bank holding companies that become financial holding companies. Among other things, GLBA repealed certain Glass-Steagall Act restrictions on affiliations between banks and securities firms, and amended the BHCA to permit bank holding companies that are financial holding companies to engage in activities, and acquire companies engaged in activities, that are: financial in nature (including insurance underwriting, insurance company portfolio investment, financial advisory, securities underwriting, dealing and market-making, and merchant banking activities); incidental to financial

activities; or complementary to financial activities if the FRB determines that they pose no substantial risk to the safety or soundness of depository institutions or the financial system in general. The Company has not become a financial holding company. GLBA also permits national banks to engage in activities considered financial in nature through a financial subsidiary, subject to certain conditions and limitations.

The Company's securities are registered with the Securities and Exchange Commission under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). As such, the Company is subject to the information, proxy solicitation, insider trading and other requirements and restrictions of the Exchange Act.

The Bank

The Bank, as a California chartered non-member bank, is subject to primary supervision, periodic examination and regulation by the California Department of Financial Institutions ("DFI") and the Federal Deposit Insurance Corporation ("FDIC"). If, as a result of an examination of the Bank, the FDIC should determine that the financial condition, capital resources, asset quality, earnings prospects, management, liquidity, or other aspects of the Bank's operations are unsatisfactory or that the Bank or its management is violating or has violated any law or regulation, various remedies are available to the FDIC. Such remedies include the power to enjoin "unsafe or unsound" practices, to require affirmative action to correct any conditions resulting from any violation or practice, to issue an administrative order that can be judicially enforced, to direct an increase in capital, to restrict the growth of the Bank, to assess civil monetary penalties, to remove officers and directors and ultimately to terminate the Bank's deposit insurance, which for a California chartered bank would result in a revocation of the Bank's charter. The DFI has many of the same remedial powers.

Various requirements and restrictions under the laws of the State of California and the United States affect the operations of the Bank. State and federal statutes and regulations relate to many aspects of the Bank's operations, including reserves against deposits, ownership of deposit accounts, interest rates payable on deposits, loans, investments, mergers and acquisitions, borrowings, dividends, locations of branch offices, and capital requirements. Further, the Bank is required to maintain certain levels of capital. See "Item 1. Business - Supervision and Regulation - Capital Standards."

The USA Patriot Act

Title III of the United and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (the USA Patriot Act") includes numerous provisions for fighting international money laundering and blocking terrorism access to the U.S. financial system. The USA Patriot Act requires certain additional due diligence and record keeping practices, including, but not limited to, new customers, correspondent and private banking accounts.

Part of the USA Patriot Act requires covered financial institutions to: (i) establish an anti-money laundering program; (ii) establish appropriate anti-money laundering policies, procedures and controls; (iii) appoint a Bank Secrecy Act officer responsible for day-to-day compliance; and (iv) conduct independent audits. The Patriot Act also expands penalties for violation of the anti-money laundering laws, including expanding the circumstances under which funds in a bank account may be forfeited. The Patriot Act also requires covered financial institutions to respond under certain circumstances to requests for information from federal banking agencies within 120 hours. Various measures are currently pending before Congress to extend portions of the Patriot Act.

Privacy Restrictions

The GLBA, in addition to the previous described changes in permissible non-banking activities permitted to banks, bank holding companies and financial holding companies, also requires financial institutions in the U.S. to provide certain privacy disclosures to customers and consumers, to comply with certain restrictions on the sharing and usage of personally identifiable information, and to implement and maintain commercially reasonable customer information safeguarding standards.

The Company believes that it complies with all provisions of the GLBA and all implementing regulations and the Bank has developed appropriate policies and procedures to meet its responsibilities in connection with the privacy provisions of GLBA.

Dividends and Other Transfer of Funds

Dividends from the Bank constitute the principal source of income to the Company. The Company is a legal entity separate and distinct from the Bank. The Bank is subject to various statutory and regulatory restrictions on its ability to pay dividends to the Company. Under such restrictions, the amount available for payment of dividends to the Company by the Bank totaled $19.4 million at December 31, 2006.

The FDIC and the DFI also have authority to prohibit the Bank from engaging in activities that, in their opinion, constitute unsafe or unsound practices in conducting its business. It is possible, depending upon the financial condition of the bank in question and other factors, that the FDIC and the DFI could assert that the payment of dividends or other payments might, under some circumstances, be an unsafe or unsound practice. Further, the FRB and the FDIC have established guidelines with respect to the maintenance of appropriate levels of capital by banks or bank holding companies under their jurisdiction. Compliance with the standards set forth in such guidelines and the restrictions that are or may be imposed under the prompt corrective action provisions of federal law could limit the amount of dividends which the Bank or the Company may pay. An insured depository institution is prohibited from paying management fees to any controlling persons or, with certain limited exceptions, making capital distributions if after such transaction the institution would be undercapitalized. The DFI may impose similar limitations on the Bank. See "Prompt Corrective Regulatory Action and Other Enforcement Mechanisms" and "Capital Standards" for a discussion of these additional restrictions on capital distributions.

Transactions with Affiliates

The Bank is subject to certain restrictions imposed by federal law on any extensions of credit to, or the issuance of a guarantee or letter of credit on behalf of, the Company or other affiliates, the purchase of, or investments in, stock or other securities thereof, the taking of such securities as collateral for loans, and the purchase of assets of the Company or other affiliates. Such restrictions prevent the Company and other affiliates from borrowing from the Bank unless the loans are secured by marketable obligations of designated amounts. Further, such secured loans and investments by the Bank to or in the Company or to or in any other affiliates are limited, individually, to 10% of the Bank's capital and surplus (as defined by federal regulations), and such secured loans and investments are limited, in the aggregate, to 20% of the Bank's capital and surplus (as defined by federal regulations).

In addition, the Company and its operating subsidiaries generally may not purchase a low-quality asset from an affiliate, and other specified transactions between the Company or its operating subsidiaries and an affiliate must be on terms and conditions that are consistent with safe and sound banking practices.

Also, the Company and its operating subsidiaries may engage in transactions with affiliates only on terms and under conditions that are substantially the same, or at least as favorable to the Company or its subsidiaries, as those prevailing at the time for comparable transactions with (or that in good faith would be offered to) non-affiliated companies.

California law also imposes certain restrictions with respect to transactions with affiliates. Additionally, limitations involving the transactions with affiliates may be imposed on the Bank under the prompt corrective action provisions of federal law. See "Item 1. Business - Supervision and Regulation - Prompt Corrective Action and Other Enforcement Mechanisms."

Capital Standards

The FRB and the FDIC have established risk-based capital guidelines with respect to the maintenance of appropriate levels of capital by United States banking organizations. These guidelines are intended to provide a measure of capital that reflects the risk associated with a banking organization's operations for both transactions reported on the balance sheet as assets and transactions, such as letters of credit and recourse arrangements, which are recorded as off balance sheet items. Under these guidelines, nominal dollar amounts of assets and credit equivalent amounts of off balance sheet items are multiplied by one of several risk adjustment percentages, which range from 0% for assets with low credit risk, such as certain U.S. Treasury securities, to 100% for assets with relatively high credit risk, such as commercial loans.

The federal banking agencies require a minimum ratio of qualifying total capital to risk-weighted assets of 8% and a minimum ratio of Tier 1 capital to risk-weighted assets of 4%. In addition to the risk-based guidelines, federal banking regulators require banking organizations to maintain a minimum amount of Tier 1 capital to total assets, referred to as the leverage ratio. For a banking organization rated in the highest of the five categories used by regulators to rate banking organizations, the minimum leverage ratio of Tier 1 capital to total assets must be 4%. In addition to these uniform risk-based capital guidelines and leverage ratios that apply across the industry, the regulators have the discretion to set individual minimum capital requirements for specific institutions at rates significantly above minimum guidelines and ratios. For further information on the Company and the Bank's risk-based capital ratios, see Note 10 located in "Item 8. Financial Statements and Supplementary Data."

Prompt Corrective Action and Other Enforcement Mechanisms

The Federal Deposit Insurance Corporation Improvement Act of 1991 ("FDICIA"), among other things, identifies five capital categories for insured depository institutions (well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized) and requires the respective Federal regulatory agencies to implement systems for "prompt corrective action" for insured depository institutions that do not meet minimum capital requirements within such categories. FDICIA imposes progressively more restrictive constraints on operations, management and capital distributions, depending on the category in which an institution is classified. Failure to meet the capital guidelines could also subject a banking institution to capital raising requirements. An "undercapitalized" Company must develop a capital restoration plan. At December 31, 2006 the Bank exceeded all of the required ratios for classification as "well capitalized." It should be noted, however, that the Bank's capital category is determined solely for the purpose of applying the federal banking agencies' prompt corrective action regulations and the capital category may not constitute an accurate representation of the Bank's overall financial condition or prospects.

An institution that, based upon its capital levels, is classified as well capitalized, adequately capitalized, or undercapitalized may be treated as though it were in the next lower capital category if the appropriate federal

banking agency, after notice and opportunity for hearing, determines that an unsafe or unsound condition or practice warrants such treatment. At each successive lower capital category, an insured depository institution is subject to more restrictions.

Banking agencies have also adopted regulations which mandate that regulators take into consideration (i) concentrations of credit risk; (ii) interest rate risk (when the interest rate sensitivity of an institution's assets does not match the sensitivity of its liabilities or its off-balance-sheet position); and (iii) risks from non-traditional activities, as well as an institution's ability to manage those risks, when determining the adequacy of an institution's capital. That evaluation will be made as a part of the institution's regular safety and soundness examination. In addition, the banking agencies have amended their regulatory capital guidelines to incorporate a measure for market risk. In accordance with the amended guidelines, the Company and any company with significant trading activity must incorporate a measure for market risk in its regulatory capital calculations.

In addition to measures taken under the prompt corrective action provisions, commercial banking organizations may be subject to potential enforcement actions by the federal banking agencies for unsafe or unsound practices in conducting their businesses or for violations of any law, rule, regulation or any condition imposed in writing by the agency or any written agreement with the agency. Enforcement actions may include the imposition of a conservator or receiver, the issuance of a cease-and-desist order that can be judicially enforced, the termination of insurance of deposits (in the case of a depository institution), the imposition of civil money penalties, the issuance of directives to increase capital, the issuance of formal and informal agreements, the issuance of removal and prohibition orders against institution-affiliated parties and the enforcement of such actions through injunctions or restraining orders based upon a judicial determination that the agency would be harmed if such equitable relief was not granted. Additionally, a holding company's inability to serve as a source of strength to its subsidiary banking organizations could serve as an additional basis for a regulatory action against the holding company.

Safety and Soundness Standards

The federal banking agencies have adopted guidelines designed to assist in identifying and addressing potential safety and soundness concerns before capital becomes impaired. The guidelines set forth operational and managerial standards relating to: (i) internal controls, information systems and internal audit systems; (ii) loan documentation; (iii) credit underwriting; (iv) asset growth; (v) earnings; and (vi) compensation, fees and benefits. In addition, the federal banking agencies have also adopted safety and soundness guidelines with respect to asset quality and earnings standards. These guidelines provide six standards for establishing and maintaining a system to identify problem assets and prevent those assets from deteriorating. Under these standards, any insured depository institution should: (i) conduct periodic asset quality reviews to identify problem assets; (ii) estimate the inherent losses in problem assets and establish reserves that are sufficient to absorb estimated losses; (iii) compare problem asset totals to capital; (iv) take appropriate corrective action to resolve problem assets; (v) consider the size and potential risks of material asset concentrations; and (vi) provide periodic asset quality reports with adequate information for management and the Board of Directors to assess the level of asset risk. These guidelines also set forth standards for evaluating and monitoring earnings and for ensuring that earnings are sufficient for the maintenance of adequate capital and reserves.

Premiums for Deposit Insurance

The Company's deposit accounts are insured by the Bank Insurance Fund ("BIF"),

as administered by the FDIC, up to the maximum permitted by law. Insurance of deposits may be terminated by the FDIC upon a finding that the institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operation, or has violated any applicable law, regulation, rule, order, or condition imposed by the FDIC or the Company's primary regulator.

For the year ending December 31, 2006, the FDIC charges an annual assessment for the insurance of deposits ranging from 0 to 27 basis points per $100 of insured deposits, based on the results of examinations, findings by the Company's primary federal regulator and other information deemed relevant by the FDIC to the Company's financial condition and the risk posed to the BIF. The risk classification is based on an institution's capital group and supervisory subgroup assignment. An institution's risk category is based upon whether the institution is well capitalized, adequately capitalized, or less than adequately capitalized. Each insured depository institution is also assigned to one of the following "supervisory subgroups." Subgroup A, B or C. Subgroup A institutions are financially sound institutions with few minor weaknesses; Subgroup B institutions are institutions that demonstrate weaknesses which, if not corrected, could result in significant deterioration; and Subgroup C institutions are institutions for which there is a substantial probability that the FDIC will suffer a loss in connection with the institution unless effective action is taken to correct the areas of weakness. Insured institutions are not allowed to

disclose their risk assessment classification and no assurance can be given as to what the future level of premiums will be.

Effective January 1, 2007 the FDIC has adopted a new rule for the insurance assessment on deposits. Under the new rule the charge for annual insurance deposit assessments will range from a minimum of 5 basis points to a maximum of 43 basis points per $100 of insured deposits. The new rule consolidates the number of assessment risk categories from nine to four and names them Risk Categories I, II, III and IV. The four new categories will continue to be defined based upon supervisory and capital evaluations, which are both established measures of risk. Risk Category I contains all well-capitalized institutions generally with CAMELS composite ratings of 1 or 2 and will be assessed annual insurance rates of 5 to 7 basis points per $100 in deposits. Risk Category II contains both well capitalized and adequately capitalized institutions with CAMELS composite ratings of 1, 2 or 3 and will be assessed an annual insurance rate of 10 basis points per $100 in deposits. Risk Category III contains all undercapitalized institutions generally with CAMELS composite ratings of 4 or 5 and will be assessed an annual insurance rate of 28 basis points. Risk Category IV contains all undercapitalized institutions for which there is substantial probability the FDIC will suffer a loss in connection with the institution unless effective action is taken to correct the areas of weakness. Those institutions in Risk Category IV will be assessed an annual insurance rate of 43 basis points per $100 in deposits. Insured institutions are not all allowed to disclose their risk assessment classification and no assurance can be given as to what the future level of premiums will be.

The President signed the budget reconciliation package (S. 1932) that contains the comprehensive Federal Deposit Insurance Reform Act of 2005 which provides for the following:

- Merging the Bank Insurance Fund (BIF) and the Savings Association Insurance Fund (SAIF) into a new fund, the Deposit Insurance Fund (DIF). This change was made effective March 31, 2006.

- Increasing the coverage limit for retirement accounts to $250,000 and

indexing the coverage limit for retirement accounts to inflation as with the general deposit insurance coverage limit. This change was made effective April 1, 2006.

- Establishing a range of 1.15 percent to 1.50 percent within which the FDIC Board of Directors may set the Designated Reserve Ratio (DRR).

- Allowing the FDIC to manage the pace at which the reserve ratio varies within this range.

  - If the reserve ratio falls below 1.15 percent-or is expected to within 6 months-the FDIC must adopt a restoration plan that provides that the DIF will return to 1.15 percent generally within 5 years.

  - If the reserve ratio exceeds 1.35 percent, the FDIC must generally dividend to DIF members half of the amount above the amount necessary to maintain the DIF at 1.35 percent, unless the FDIC Board, considering statutory factors, suspends the dividends.

  - If the reserve ratio exceeds 1.5 percent, the FDIC must generally dividend to DIF members all amounts above the amount necessary to maintain the DIF at 1.5 percent.

- Eliminating the restrictions on premium rates based on the DRR and granting the FDIC Board the discretion to price deposit insurance according to risk for all insured institutions regardless of the level of the reserve ratio.

- Granting a one-time initial assessment credit (of approximately $4.7 billion) to recognize institutions' past contributions to the fund.

Based upon the Company's preliminary assessment of the effect of this regulation, management believes it will not currently have a material financial impact.

Community Reinvestment Act ("CRA") and Fair Lending

The Bank is subject to certain fair lending requirements involving lending, investing and other CRA activities. CRA requires each insured depository institution to identify the communities served by the institution's offices and to identify the types of credit and investments the institution is prepared to extend within such communities including low and moderate income neighborhoods. It also requires the institution's regulators to assess the institution's performance in meeting the credit needs of its community and to take such assessment into consideration in reviewing application for mergers, acquisitions, relocation of existing branches, opening of new branches and other transactions. A bank may be subject to substantial penalties and corrective measures for a violation of certain fair lending laws.

A bank's compliance with the Community Reinvestment Act is based on a performance based evaluation system which bases CRA ratings on an institution's lending service and investment performance. An unsatisfactory rating may be the basis for denying a merger application. The Bank's latest CRA examination was completed by the Federal Reserve Bank of San Francisco and the lending test portion included a review of small business, small farm, and home mortgage loans originated between October 1, 2001 and September 30, 2003. Community development lending as well as investment and service activities were reviewed for all of 2002 and 2003. The Bank received a High Satisfactory rating in the lending area and an Outstanding rating in the areas of investment and service. The Bank received an overall rating of Outstanding in complying with its CRA obligations. The Bank is expecting to have another CRA exam during the 1st quarter of 2007.

The Sarbanes-Oxley Act of 2002 ("the Act")
This legislation addresses accounting oversight and corporate governance matters, including:

- The creation of a five-member oversight board that sets standards for accountants and has investigative and disciplinary powers.
- The prohibition of accounting firms from providing various types of consulting services to public clients and requires accounting firms to rotate partners among public client assignments every five years.
- Increased penalties for financial crimes.
- Expanded disclosure of corporate operations and internal controls and certification of financial statements.
- Enhanced controls on, and reporting of, insider trading.
- Prohibition on lending to officers and directors of public companies, although the bank may continue to make these loans within the constraints of existing banking regulations.

As a public reporting company, the Company is subject to the requirements of this legislation and related rules and regulations issued by the Securities and Exchange Commission (the "Commission").

AVAILABLE INFORMATION

Company reports filed with the Securities and Exchange Commission including the annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy statements and ownership reports filed by Directors, executive officers and principal shareholders can be accessed through the Company's web site at http://www.fmbonline.com. The link to the Securities and Exchange Commission is on the About F & M Bank page.

STATISTICAL DISCLOSURES

The tables on the following pages set forth certain statistical information for Farmers & Merchants Bancorp on a consolidated basis. This information should be read in conjunction with Item 7. "Management's Discussion and

12

Analysis" and with the Company's Consolidated Financial Statements and the Notes thereto included in Item 8. "Financial Statements and Supplementary Data."

Allowance for Loan Losses as a Percent of Total Loans	1.72%	1.83%	2.04%	2.13%	2.39

The Bank's policy is to place loans (excluding Credit Card loans) on nonaccrual status when the principal or interest is past due for ninety days or more unless it is both well secured and in the process of collection. Any interest accrued, but unpaid, is reversed against current income. Thereafter interest is recognized as income only as it is collected in cash. The gross interest income that would have been recorded if the loans had been current for the year ending December 31, 2006 was $15,000. For a discussion of impaired loan policy see Note 3. located in "Item 8. Financial Statements and Supplementary Data."

COMMITMENTS AND LINES OF CREDIT

The Company issues formal commitments or lines of credit to financially responsible commercial and agricultural enterprises. Such commitments can be either secured or unsecured and are typically in the form of revolving lines of credit for seasonal working capital needs. Occasionally, such commitments are in the form of letters of credit to facilitate the customer's particular business transactions. For further discussion about commitments and contingencies, see

Note 14 located in "Item 8. Financial Statements and Supplementary Data."

FARMERS & MERCHANTS BANCORP
ANALYSIS OF CERTIFICATES OF DEPOSIT
(In thousands)
The following table sets forth, by time remaining to maturity, the Company's time deposits in amounts of $100,000 or more for the periods indicated.

	December 31, 2006
TIME DEPOSITS OF $100,000 OR MORE	
Three Months or Less	$ 213,708
Over Three Months Through Six Months	72,991
Over Six Months Through Twelve Months	43,948
Over Twelve Months	9,640
TOTAL TIME DEPOSITS OF $100,000 OR MORE	$ 340,287

Refer to the Year-To-Date Average Balances and Rate Schedules located in "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" for information on separate deposit categories.

ITEM 1A. RISK FACTORS

An investment in our common stock is subject to risks inherent in our business. The material risks and uncertainties that management believes may affect our business are described below. Before making an investment decision, you should carefully consider the risks and uncertainties described below together with all of the other information included or incorporated by reference in this report. The risks and uncertainties described below are not the only ones facing our business. Additional risks and uncertainties that management is not aware of or focused on or that management currently deems immaterial may also impair our business operations. This report is qualified in its entirety by these risk factors.

If any of the following risks actually occur, our financial condition and results of operations could be materially and adversely affected. If this were to happen, the value of our common stock could decline significantly, and you could lose all or part of your investment.

RISKS ASSOCIATED WITH OUR BUSINESS

We Are Dependent On Real Estate And A Downturn In The Real Estate Market Could Hurt Our Business - A significant portion of our loan portfolio is dependent on real estate. At December 31, 2006, real estate served as the principal source of collateral with respect to approximately 66% of our loan outstandings. A decline in current economic conditions or rising interest rates could have an adverse effect on the demand for new loans, the ability of borrowers to repay outstanding loans, the value of real estate and other collateral securing loans and the value of real estate owned by us, as well as our financial condition and results of operations in general and the market value of our common stock.

Acts of nature, including earthquakes, floods and fires, which may cause

uninsured damage and other loss of value to real estate that secures these loans, may also negatively impact our financial condition.

Our Real Estate Lending Also Exposes Us To The Risk Of Environmental Liabilities - In the course of our business, we may foreclose and take title to real estate, and could be subject to environmental liabilities with respect to these properties. We may be held liable to a governmental entity or to third persons for property damage, personal injury, investigation and clean-up costs incurred by these parties in connection with environmental contamination, or may be required to investigate or clean up hazardous or toxic substances, or chemical releases at a property. The costs associated with investigation or remediation activities could be substantial. In addition, as the owner or former owner of a contaminated site, we may be subject to common law claims by third parties based on damages and costs resulting from environmental contamination emanating from the property. If we ever become subject to significant environmental liabilities, our business, financial condition, liquidity and results of operations could be materially and adversely affected.

Our Business Is Subject To Interest Rate Risk And Changes In Interest Rates May Adversely Affect Our Performance And Financial Condition - Our earnings are impacted by changing interest rates. Changes in interest rates impact the demand for new loans, the credit profile of our borrowers, the rates received on loans and securities and rates paid on deposits and borrowings. The difference between the rates received on loans and securities and the rates paid on deposits and borrowings is known as interest rate spread. Given our current volume and mix of interest-bearing liabilities and interest-earning assets, we would expect our interest rate spread to increase if interest rates rise and, conversely, to decline if interest rates fall. Increasing levels of competition in the banking and financial services business may decrease our interest rate spread by forcing us to offer lower lending interest rates and pay higher deposit interest rates. Although we believe our current level of interest rate sensitivity is reasonable, significant fluctuations in interest rates and increasing competition may have an adverse effect on our business, financial condition and results of operations.

A sustained decrease in market interest rates could adversely affect our earnings. When interest rates decline, borrowers tend to refinance higher-rate, fixed-rate loans at lower rates, prepaying their existing loans. Under those circumstances, we would not be able to reinvest those prepayments in assets earning interest rates as high as the rates on the prepaid loans. In addition, our commercial real estate and commercial loans, which carry interest rates that, in general, adjust in accordance with changes in the prime rate, will adjust to lower rates. We are also significantly affected by the level of loan demand available in our market. The inability to make sufficient loans directly affects

the interest income we earn. Lower loan demand will generally result in lower interest income realized as we place funds in lower yielding investments.

Failure To Successfully Execute Our Strategy Could Adversely Affect Our Performance - Our financial performance and profitability depends on our ability to execute our corporate growth strategy. Continued growth, however, may present operating and other problems that could adversely affect our business, financial condition and results of operations. Accordingly, there can be no assurance that we will be able to execute our growth strategy or maintain the level of profitability that we have recently experienced. Factors that may adversely affect our ability to attain our long-term financial performance goals include those stated elsewhere in this section, as well as:

- Inability to control non-interest expense, including, but not limited to, rising employee and healthcare costs.

- Inability to increase non-interest income.

- Continuing ability to expand through de novo branching or otherwise.

Economic Conditions In Our Service Areas Could Adversely Affect Our Operations And/Or Cause Us To Sustain Losses - Our retail and commercial banking operations are concentrated primarily in Sacramento, San Joaquin, Stanislaus and Merced Counties. As a result of this geographic concentration, our results of operations depend largely upon economic conditions in this area. A significant source of risk arises from the possibility that losses will be sustained if a significant number of our borrowers, guarantors and related parties fail to perform in accordance with the terms of their loans. This risk increases when the economy is weak. We have adopted underwriting and credit monitoring procedures and credit policies, including the establishment and review of the allowance for loan losses, that management believes are appropriate to minimize this risk by assessing the likelihood of nonperformance, tracking loan performance and diversifying our credit portfolio. These policies and procedures, however, may not prevent unexpected losses that could materially adversely affect our results of operations in general and the market value of our stock.

This Company's service areas can be significantly impacted by the seasonal and cyclical trends of the agricultural industry. As a result, the Company's financial results are influenced by the seasonal banking needs of its agricultural customers (e.g., during the spring and summer customers draw down their deposit balances and increase loan borrowing to fund the purchase of equipment and the planting of crops. Correspondingly, deposit balances are replenished and loans repaid in late fall and winter as crops are harvested and sold). Additionally, although the Company's loan portfolio is believed to be well diversified, at various times during the year approximately 35% of the Company's loan balances can be outstanding to agricultural borrowers. Commitments are well diversified across various commodities, including dairy, grapes, walnuts, almonds, cherries, apples, pears, walnuts, and various row crops. Additionally, many individual borrowers are themselves diversified across commodity types, reducing their exposure, and therefore the Company's, to cyclical downturns in any one commodity.

We Face Strong Competition From Financial Service Companies And Other Companies That Offer Banking Services That Could Hurt Our Business - The financial services business in our market areas is highly competitive. It is becoming increasingly competitive due to changes in regulation, technological advances, and the accelerating pace of consolidation among financial services providers. We face competition both in attracting deposits and in making loans. We compete for loans principally through the interest rates and loan fees we charge and the efficiency and quality of services we provide. Increasing levels of competition in the banking and financial services business may reduce our market share, decrease loan demand, cause the prices we charge for our services to fall, or decrease our net interest margin by forcing us to offer lower lending interest rates and pay higher deposit interest rates. Therefore, our results may differ in future periods depending upon the nature or level of competition.

Technology and other changes are allowing parties to complete financial transactions that historically have involved banks through alternative methods. For example, consumers can now maintain funds that would have historically been held as bank deposits in brokerage accounts or mutual funds. Consumers can also complete transactions such as paying bills and/or transferring funds directly without the assistance of banks. The process of eliminating banks as intermediaries, known as "disintermediation," could result in the loss of fee income, as well as the loss of customer deposits and the related income

generated from those deposits. The loss of these revenue streams and the lower cost

deposits as a source of funds could have a material adverse effect on our financial condition and results of operations.

We May Not Be Able To Attract And Retain Skilled People - Our success depends, in large part, on our ability to attract and retain key people. Competition for the best people in most of our activities can be intense and we may not be able to hire people or to retain them. The unexpected loss of services of one or more of our key personnel could have a material adverse impact on our business because of their skills, knowledge of our market, years of industry experience and the difficulty of promptly finding qualified replacement personnel.

Our Internal Operations Are Subject To A Number Of Risks - We are subject to certain operations risks, including, but not limited to, information system failures and errors, customer or employee fraud and catastrophic failures resulting from terrorist acts or natural disasters. We maintain a system of internal controls to mitigate against such occurrences and maintain insurance coverage for such risks that are insurable, but should such an event occur that is not prevented or detected by our internal controls, uninsured or in excess of applicable insurance limits, it could have a significant adverse impact on our business, financial condition or results of operations.

We rely heavily on communications and information systems to conduct our business. Any failure, interruption or breach in security of these systems could result in failures or disruptions in our customer relationship management, general ledger, deposit, loan and other systems. While we have policies and procedures designed to prevent or limit the effect of the failure, interruption or security breach of our information systems, there can be no assurance that any such failures, interruptions or security breaches will not occur or, if they do occur, that they will be adequately addressed. The occurrence of any failures, interruptions or security breaches of our information systems could damage our reputation, result in a loss of customer business, subject us to additional regulatory scrutiny, or expose us to civil litigation and possible financial liability, any of which could have a material adverse effect on our financial condition and results of operations.

The financial services industry is continually undergoing rapid technological change with frequent introductions of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better serve customers and to reduce costs. Our future success depends, in part, upon our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands, as well as to create additional efficiencies in our operations. Many of our competitors have substantially greater resources to invest in technological improvements. We may not be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to our customers. Failure to successfully keep pace with technological change affecting the financial services industry could have a material adverse impact on our business and, in turn, our financial condition and results of operations.

Severe weather, natural disasters, acts of war or terrorism and other adverse external events could have a significant impact on our ability to conduct business. Such events could affect the stability of our deposit base, impair the ability of borrowers to repay outstanding loans, impair the value of collateral securing loans, cause significant property damage, result in loss of revenue and/or cause us to incur additional expenses. Operations in several of our markets could be disrupted by both the evacuation of large portions of the population as well as damage and or lack of access to our banking and operation

facilities. While we have not experienced such an occurrence to date, other severe weather or natural disasters, acts of war or terrorism or other adverse external events may occur in the future. Although management has established disaster recovery policies and procedures, the occurrence of any such event could have a material adverse effect on our business, which, in turn, could have a material adverse effect on our financial condition and results of operations.

We Depend On Cash Dividends From Our Subsidiary Bank To Meet Our Cash Obligations - As a holding company, dividends from our subsidiary bank provide a substantial portion of our cash flow used to service the interest payments on our Trust Preferred Securities and our other obligations, including cash dividends. See "Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities." Various statutory provisions restrict the amount of dividends our subsidiary bank can pay to us without regulatory approval.

RISKS ASSOCIATED WITH OUR INDUSTRY

We Are Subject To Government Regulation That Could Limit Or Restrict Our Activities, Which In Turn Could Adversely Impact Our Operations - The financial services industry is regulated extensively. Federal and State regulation is designed primarily to protect the deposit insurance funds and consumers, and not to benefit our shareholders. These regulations can sometimes impose significant limitations on our operations.

New laws and regulations or changes in existing laws and regulations or repeal of existing laws and regulations may adversely impact our business.

Further, federal monetary policy, particularly as implemented through the Federal Reserve System, significantly affects economic conditions for us.

New Legislative And Regulatory Proposals May Affect Our Operations And Growth - Proposals to change the laws and regulations governing the operations and taxation of, and federal insurance premiums paid by, banks and other financial institutions and companies that control such institutions are frequently raised in the U.S. Congress, the California legislature and before bank regulatory authorities. The likelihood of any major changes in the future and the impact such changes might have on us or our subsidiaries are impossible to determine. Similarly, proposals to change the accounting treatment applicable to banks and other depository institutions are frequently raised by the SEC, the federal banking agencies, the IRS and other appropriate authorities. The likelihood and impact of any additional future changes in law or regulation and the impact such changes might have on us or our subsidiaries are impossible to determine at this time.

RISKS ASSOCIATED WITH OUR STOCK

Our Stock Trades Less Frequently Than Others - The Company's common stock is not widely held or listed on any exchange. However, trades may be reported on the OTC Bulletin Board under the symbol "FMCB.OB". Management is aware that there are private transactions in the Company's common stock. However, the limited trading market for the Company's common stock may make it difficult for stockholders to dispose of their shares.

Our Stock Price Is Affected By A Variety Of Factors - Stock price volatility may make it more difficult for you to resell your common stock when you want and at prices you find attractive. Our stock price can fluctuate significantly in response to a variety of factors discussed in this section, including, among other things:

- Actual or anticipated variations in quarterly results of operations.
- Operating and stock price performance of other companies that investors deem comparable to our Company.
- News reports relating to trends, concerns and other issues in the financial services industry.
- Perceptions in the marketplace regarding our Company and/or its competitors.

Our Common Stock Is Not An Insured Deposit - Our common stock is not a bank deposit and, therefore, is not insured against loss by the FDIC, any other deposit insurance fund or by any other public or private entity. Investment in our common stock is inherently risky for the reasons described in this "Risk Factors" section and elsewhere in this report and is subject to the same market forces that affect the price of common stock in any company. As a result, if you acquire our common stock, you may lose some or all of your investment.

ITEM 1B. UNRESOLVED STAFF COMMENTS

The Company has no unresolved comments received from staff at the SEC.

ITEM 2. PROPERTIES

Farmers & Merchants Bancorp along with its subsidiaries are headquartered in Lodi, California. Executive offices are located at 111 W. Pine Street. Banking services are provided in twenty-one locations in the Company's service area. Of the twenty-one locations, thirteen are owned and eight are leased. The expiration of these leases occurs between the years 2007 and 2016. See Note 14 located in "Item 8. Financial Statements and Supplementary Data."

ITEM 3. LEGAL PROCEEDINGS

Certain lawsuits and claims arising in the ordinary course of business have been filed or are pending against the Company or its subsidiaries. Based upon information available to the Company, its review of such lawsuits and claims and consultation with its counsel, the Company believes the liability relating to these actions, if any, would not have a material adverse effect on its consolidated financial statements.

There are no material proceedings adverse to the Company to which any Director, officer or affiliate of the Company is a party.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matters were submitted to a vote of the Company's stockholders during the fourth quarter of 2006.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

The common stock of Farmers & Merchants Bancorp is not widely held or listed on any exchange. However, trades may be reported on the OTC Bulletin Board under the symbol "FMCB.OB". Additionally, management is aware that there are private transactions in the Company's common stock.

The following table summarizes the actual high and low sale prices for the Company's common stock since the first quarter of 2005. These figures are based on activity posted on the OTC Bulletin Board and on private transactions between individual shareholders that are reported to the Company.

	Calendar Quarter	High	Low	Cash Dividends Declared (Per Share)
2006	Fourth quarter	$ 557	$505	$ 4.80
	Third quarter	565	505	-
	Second quarter	550	475	3.75
	First quarter	510	485	-
2005	Fourth quarter	$ 500	$465	$ 4.50
	Third quarter	515	465	-
	Second quarter	515	438	3.18
	First quarter	525	415	-

As of January 31, 2007, there were approximately 1,483 shareholders of record of the Company's common stock.

Beginning in 1975 and continuing through 2005, the Company issued a 5% stock dividend annually. However, this dividend was discontinued in 2006 based upon management's and the Board's assessment that: (1) the Company had a sufficient number of shares outstanding to provide for orderly and timely market trades; (2) the costs associated with the issuance of stock dividends could be better spent in other areas of the Company's operations; and (3)

21

whereas the required accounting for a stock dividend has no impact on the Company's overall capital position it does require that Retained Earnings be reclassified to Additional Paid-In Capital, which over time limits the growth of the Retained Earnings account from which cash dividends are paid.

There are limitations under Delaware corporate law as to the amounts of dividends that may be paid by the Company. Additionally, if we decided to defer interest on our subordinated debentures, we would be prohibited from paying cash dividends on the Company's common stock. The Company is dependent on dividends paid by the Bank to fund its dividend payments to its stockholders. There are regulatory limitations on cash dividends that may be paid by the Bank under state and federal laws. See "Item 1. Business - Supervision and Regulation."

In 1998, the Board approved the Company's first stock repurchase program which expired on May 1, 2001. During the second quarter of 2004, the Board approved a second stock repurchase program because it concluded that the Company continued to have more capital than it needed to meet present and anticipated regulatory guidelines for the Bank to be classified as "well capitalized." On April 4, 2006, the Board unanimously approved expanding the Repurchase Program to allow the repurchase of up to $15 million of stock between May 1, 2006 and April 30, 2009.

Repurchases under the program will continue to be made on the open market or through private transactions. The repurchase program also requires that no purchases may be made if the Bank would not remain "well-capitalized" after the repurchase. All shares repurchased under the repurchase program will be retired.

The following table indicates the number of shares repurchased by Farmers & Merchants Bancorp during the fourth quarter of 2006.

Period	Number of Shares	Average Price per Share	Number of Shares Purchased as Part of a Publicly Announced Plan or Program	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plan or Program
October 2006	800	$ 510	800	$ 10,817,820
November 2006	-	-	-	10,817,820
December 2006	-	-	-	10,817,820
Total	800	$ 510	800	$ 10,817,820

All of the above shares were repurchased in private transactions.

PERFORMANCE GRAPHS

The following graphs compare the yearly percentage change in the Company's cumulative total stockholder return on common stock with: (i) the cumulative total return of the American Stock Exchange market index; and (ii) a published index compiled by Hemscott Group (formerly Core Data) of banks and bank holding companies throughout the United States. The following comparisons cover the period January 1, 2002 to December 31, 2006. The graphs assume an initial investment of $100 on January 1, 2002 and reinvestment of dividends. The stock price performance set forth in the following graphs is not necessarily indicative of future price performance.

These graphs shall not be deemed filed or incorporated by reference into any filing under the Securities Act of 1933 or under the Securities Exchange Act of 1934, except to the extent that we specifically incorporate these graphs by reference.

(1) Per share data has been adjusted, where applicable, for stock dividends issued in any of the above years.

Farmers & Merchants Bancorp stock is not traded on any exchange. The shares are primarily held by local residents and are not actively traded. Based on information from shareholders and from Company stock transfer records, the prices paid in 2006, 2005 and 2004 ranged from $565.00 to $300.00 per share. Additional information about the Company's common stock is available in Part II, Item 5.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS

This annual report contains various forward-looking statements, usually containing the words "estimate," "project," "expect," "objective," "goal," or similar expressions and includes assumptions concerning the Company's operations, future results, and prospects. These forward-looking statements are based upon current expectations and are subject to risk and uncertainties. In connection with the "safe-harbor" provisions of the Private Securities Litigation Reform Act, the Company provides the following cautionary statement identifying important factors which could cause the actual results of events to differ materially from those set forth in or implied by the forward-looking statements and related assumptions.

Such factors include the following: (i) the effect of changing regional and national economic conditions; (ii) significant changes in interest rates and prepayment speeds; (iii) credit risks of commercial, agricultural, real estate, consumer, and other lending activities; (iv) changes in federal and state banking laws or regulations; (v) competitive pressure in the banking industry; (vi) changes in governmental fiscal or monetary policies; (vii) uncertainty regarding the economic outlook resulting from the continuing war on terrorism, as well as actions taken or to be taken by the U.S. or other governments as a result of further acts or threats of terrorism; and (viii) other factors discussed in the Company's filings with the Securities and Exchange Commission.

Readers are cautioned not to place undue reliance on these forward-looking statements which speak only as of the date hereof. The Company undertakes no obligation to update any forward-looking statements to reflect events or circumstances arising after the date on which they are made.

INTRODUCTION

Farmers & Merchants Bancorp, or the Company, is a bank holding company formed March 10, 1999. Its subsidiary, Farmers & Merchants Bank of Central California, or the Bank, is a California state-chartered bank formed in 1916. The Bank serves the northern Central Valley of California with 21 banking offices. The service area includes Sacramento, San Joaquin, Stanislaus and Merced Counties with branches in Sacramento, Elk Grove, Galt, Lodi, Stockton, Linden, Modesto, Turlock and Hilmar.

Substantially all of the Company's business activities are conducted within its market area.

As a bank holding company, the Company is subject to regulation and examination by the Board of Governors of the Federal Reserve System ("FRB"). As a California, state-chartered, non-fed member bank, the Bank is subject to regulation and examination by the California Department of Financial Institutions and the Federal Deposit Insurance Corporation.

This section should be read in conjunction with the consolidated financial statements and the notes thereto, along with other financial information included in this report.

OVERVIEW

The Company's primary service area encompasses the northern Central Valley of California, a region that can be significantly impacted by the seasonal needs of the agricultural industry. Accordingly, discussion of the Company's Financial Condition and Results of Operations is influenced by the seasonal banking needs of its agricultural customers (e.g., during the spring and summer customers draw down their deposit balances and increase loan borrowing to fund the purchase of equipment and planting of crops. Correspondingly, deposit balances are

replenished and loans repaid in late fall and winter as crops are harvested and sold).

The Five Year Period: 2002 through 2006
The following table presents key performance data for the Company over the past five years.

(in thousands, except per share data)

Financial Performance Indicator	2006	2005	2004	2003	200
Net Income	$ 20,629	$ 18,428	$ 16,450	$ 14,775	$ 13
Total Assets	$1,411,233	$1,352,989	$1,226,295	$1,148,565	$1,021
Total Loans	$1,046,912	$ 973,257	$ 866,908	$ 806,906	$ 696
Total Deposits	$1,198,528	$1,103,340	$1,002,110	$ 904,349	$ 850
Total Shareholders' Equity	$ 132,340	$ 123,648	$ 116,547	$ 109,605	$ 103
Total Risk-Based Capital Ratio	12.17%	12.32%	13.34%	13.24%	1
Non-Performing Loans as a % of Total Loans	0.01%	0.07%	0.03%	0.32%	
Net Charge-Offs to Average Loans	0.00%	0.03%	0.08%	0.01%	
Loan Loss Allowance as a % of Total Loans	1.72%	1.83%	2.04%	2.13%	
Return on Average Assets	1.51%	1.46%	1.40%	1.36%	
Return on Average Equity	16.16%	15.26%	14.50%	13.68%	1
Earnings Per Share (1)	$ 25.25	$ 22.24	$ 19.68	$ 17.55	$ 1
Cash Dividends Per Share (1) (2)	$ 8.55	$ 7.68	$ 6.85	$ 5.63	$
Cash Dividends Declared (2)	$ 6,966	$ 6,366	$ 5,723	$ 4,736	$ 4
# Shares Repurchased During Year	11,718	8,066	7,981	5,732	20
Average Share Price of Repurchased Shares	$ 507	$ 496	$ 389	$ 256	$
High Stock Price - Fourth Quarter	$ 557	$ 500	$ 455	$ 375	$
Low Stock Price - Fourth Quarter	$ 505	$ 465	$ 400	$ 300	$

(1) Prior years have been restated for stock dividends issued in 2002 through 2005. No stock dividend was issued in 2006.
(2) Not including cash paid in lieu of fractional shares related to stock dividends. These payments totaled $779,000 between 2002 and 2005.

During the five year period 2002 through 2006, the Company's operating performance improved every year.

- Annual net income increased 54% to $20.6 million from $13.4 million.

- Earnings Per Share increased 60% to $25.25 from $15.78.

- Return on Average Equity increased 300 basis points to 16.16% from 13.16%.

- Total assets increased 38% to $1.4 billion.

- Total loans increased 50% to $1.0 billion.

Importantly, during this period of asset and earnings growth:

- The Bank's risk based capital ratio has remained above the 10% level that federal and state banking regulators require for banks to be considered "well capitalized." See "Financial Condition - Capital."

- The Company's asset quality has remained strong, as reflected by net charge-offs never exceeding 0.15% of average loans in any year and non-performing loans totaling 0.01% of total loans at December 31, 2006. See "Financial Condition - Non-Performing Assets."

- The Company's allowance for loan losses has been maintained above 1.7% of total loans, reflecting a conservative approach to providing for loan losses. See "Results of Operations - Provision and Allowance for Loan Losses."

As a result of this strong earnings performance, capital position and asset quality, shareholders have benefited well in excess of overall stock market returns over the past five years.

- Return on Average Equity has increased every year from 13.16% in 2002 to 16.16% in 2006.

- Cash Dividends per Share, restated for stock dividends issued, have increased 89% since 2001, and totaled $33.87 per share over the five year period.

- The market price of the Company's stock has increased $265 per share from a close of $250 in the fourth quarter of 2001 to a close of $515 in the fourth quarter of 2006. Additionally, as a result of the 5% stock dividend declared in 2002 through 2005; the average shareholder owned approximately 121 shares at December 31, 2006 for every 100 shares they owned at December 31, 2001.

- The total return on the Company's stock over the past five years compares very favorably to overall stock market returns as represented by the AMEX Market Index and the Hemscott Group Index of Banks and Bank Holding Companies. See "Performance Graphs."

- The total market capitalization of the Company has increased $238.3 million, or 133%, over the five year period.

In 1998, the Board approved the Company's first stock repurchase program which expired on May 1, 2001. During the second quarter of 2004, the Board approved a second stock repurchase program because it concluded that the Company continued to have more capital than it needed to meet present and anticipated regulatory guidelines for the Bank to be classified as "well capitalized." On April 4, 2006, the Board unanimously approved expanding the Repurchase Program to allow the repurchase of up to $15 million of stock between May 1, 2006 and April 30, 2009.Repurchases under the program will continue to be made on the open market or through private transactions. The repurchase program also requires that no purchases may be made if the Bank would not remain "well-capitalized" after the repurchase. All shares repurchased under the repurchase program will be retired.

Since the second stock repurchase program was expanded in 2006, the Company has repurchased over 8,200 shares for total consideration of $4.2 million.

The Current Year: 2006

At the completion of our 90th year, management and the Board are pleased to report the highest net income in the Company's history. For the year ended December 31, 2006, Farmers & Merchants Bancorp reported net income of $20.6 million, earnings per share of $25.25, return on average assets of 1.51% and return on average equity of 16.16%.

The Company's continuing strong earnings performance in 2006 was due to a carefully implemented strategy to balance growth and margin protection, which resulted in: (1) 7.6% growth in average earning assets; (2) improvement in the mix of earning assets as reflected by an increase in loans as a percentage of average earning assets from 77% in 2005 to 79% in 2006; (3) improvement in the net interest margin from 5.12% in 2005 to 5.18% in 2006 due to the continuing residual impact of increases in market interest rates that occurred in mid-2004 through mid-2006; and (4) improvement in the efficiency ratio from 58.3% in 2005 to 56.9% in 2006.

28

The following is a summary of the financial accomplishments achieved during 2006 as compared to 2005.

- Net income increased 11.9% to $20.6 million from $18.4 million.
- Earnings per share increased 13.5% to $25.25 from $22.24.
- Net interest income increased 9.2% to $63.8 million from $58.4 million.
- Total assets increased 4.3% to $1.41 billion from $1.35 billion.
- Gross loans increased 7.6% to $1.0 billion from $973.3 million.
- Total deposits increased 8.6% to $1.2 billion from $1.1 billion.
- Total shareholders' equity increased 7.3% to $132.3 million from $123.6 million, after dividends of $7.0 million, stock buybacks of $5.9 million and a decrease in Accumulated Other Comprehensive Loss of $975,000.
- Total market capitalization increased $14.6 million.

Looking Forward: 2007 and Beyond

In management's opinion, the following key issues will influence the financial results of the Company in 2007 and future years:

- The Company is asset sensitive. See "Item 7A. Quantitative and Qualitative

Disclosures About Market Risk - Interest Rate Risk." As a result, between 2005 and 2006, the Company's net interest margin improved approximately 6 basis points as a result of the continuing residual impact of increases in market interest rates that occurred in mid-2004 through mid-2006. However, since increases in the Company's deposit rates typically lag increases in loan rates, once short-term market rates stabilized in June 2006 the Company's net interest margin has dropped by approximately 33 bps from a high of 5.37% in the first quarter of 2006 to 5.04% in the fourth quarter of 2006. Some economists are predicting that short-term market rates may drop in late 2007 which will place further pressure on the net interest margin as decreases in deposit rates will lag decreases in loan rates. Additionally, the Company's net interest margin is coming under pressure from (1) competitor pricing strategies for both loans and deposits that the Company may need to respond to in order to retain key customers and (2) changes in deposit mix as customers move funds from low or non-interest bearing transaction and savings accounts to higher yielding time deposits.

- The Company's results can be influenced by changes in the credit quality of its borrowers. Non-performing loans totaled $54,000 or 0.01% of total loans at December 31, 2006 and $694,000 or 0.07% of total loans at December 31, 2005. Management believes that these levels are adequately covered by the Company's current loan loss reserves and that the general economic conditions in the Company's service area appear positive at the current time. However, future financial results could be impacted should deterioration in economic conditions or other factors that affect credit quality cause the level of the Company's non-performing loans to increase.

In addition to the preceding issues, over the past several years management has reviewed the Company's existing branch delivery system, along with the availability and desirability of additional branch locations, and initiated a major branch expansion, relocation and renovation program. New branches were opened during 2006 in Sacramento, Lodi and Stockton and the downtown Turlock branch will be relocated to a new facility in 2007. In management's opinion, these moves are integral to the long-term strategic positioning of the Company.

The Company currently estimates that the total capital expenditures associated with this multi-year branch program, which began in 2004, will be in excess of $10 million which will result in an increase in the Company's future occupancy expense as compared to 2006. In addition, the increased staffing and other operating expense associated

with these new branches will place pressure on the Company's earnings over the next 24-36 months, the timeframe in which these branches are estimated to reach break-even.

RESULTS OF OPERATIONS

The following discussion and analysis is intended to provide a better understanding of Farmers & Merchants Bancorp and its subsidiaries' performance during each of the years in the three-year period ended December 31, 2006 and the material changes in financial condition, operating income and expense of the Company and its subsidiaries as shown in the accompanying financial statements.

Net Interest Income/Net Interest Margin

The tables on the following pages reflect the Company's average balance sheets and volume and rate analysis for the years ending 2006, 2005 and 2004. Average balance amounts for assets and liabilities are the computed average of daily balances.

Net interest income is the amount by which the interest and fees on loans and other interest earning assets exceed the interest paid on interest bearing sources of funds. For the purpose of analysis, the interest earned on tax-exempt investments and municipal loans is adjusted to an amount comparable to interest subject to normal income taxes. This adjustment is referred to as "taxable equivalent" adjustment and is noted wherever applicable.

The Volume and Rate Analysis of Net Interest Income summarizes the changes in interest income and interest expense based on changes in average asset and liability balances (volume) and changes in average rates (rate). For each category of interest-earning assets and interest-bearing liabilities, information is provided with respect to changes attributable to: (1) changes in volume (change in volume multiplied by initial rate); (2) changes in rate (change in rate multiplied by initial volume); and (3) changes in rate/volume (allocated in proportion to the respective volume and rate components).

The Company's earning assets and rate sensitive liabilities are subject to repricing at different times, which exposes the Company to income fluctuations when interest rates change. In order to minimize income fluctuations, the Company attempts to match asset and liability maturities. However, some maturity mismatch is inherent in the asset and liability mix. See "Item 7A. Quantitative and Qualitative Disclosures About Market Risk - Interest Rate Risk."

2006 Compared to 2005

Net interest income increased 9.2% to $63.8 million during 2006. During 2005, net interest income was $58.4 million, representing an increase of 18.1% from 2004. On a fully taxable equivalent basis, net interest income increased 8.9% and totaled $65.4 million during 2006, compared to $60.1 million for 2005. The increase in net interest income was due to a combination of (1) growth in average earning assets in 2006 and (2) improvement in the net interest margin.

Net interest income on a taxable equivalent basis, expressed as a percentage of average total earning assets, is referred to as the net interest margin. For 2006, the Company's net interest margin was 5.18% compared to 5.12% in 2005. As discussed previously, this improvement is due to the continuing residual impact of increases in market interest rates that occurred in mid-2004 through mid-2006. See "Overview - Looking Forward: 2007 and Beyond" for a discussion of factors impacting the Company's future net interest margin.

Loans, generally the Company's highest earning assets, increased $73.7 million as of December 31, 2006 compared to December 31, 2005. See "Financial Condition - Loans" for further discussion on this increase. On an average balance basis, loans increased by $94.8 million for the year ended December 31, 2006. As a result of this loan growth, the mix of the Company's earning assets improved as loans increased from 77.0% of average earning assets during 2005 to 79% in 2006. Due to increases in market rates from mid- 2004 through mid-2006, the year-to-date yield on the loan portfolio increased 86 basis points to 7.70% for the year ended December 31, 2006 compared to 6.84% for the year ended December 31, 2005. This increase in yield plus the growth in loan balances resulted in interest revenue from loans increasing 24.3% to $76.9 million for 2006.

35

The investment portfolio is the other main component of the Company's earning assets. The Company invests primarily in mortgage-backed securities, U.S. Government Agencies, and high-grade municipals. Since the risk factor for these types of investments is significantly lower than that of loans, the yield earned on investments is generally less than that of loans.

Average investment securities decreased $1.0 million in 2006 compared to the average balance during 2005. Interest income on securities increased $1.0 million to $13.1 million for the year ended December 31, 2006 compared to $12.1 million for the year ended December 31, 2005. The average yield, on a taxable equivalent basis, in the investment portfolio was 5.0% in 2006 compared to 4.6% in 2005. See "Financial Condition - Investment Securities" for a discussion of the Company's repositioning of its securities portfolio during 2006 which resulted in this increase in yield. Net interest income on the Schedule of Year-to-Date Average Balances and Interest Rates shown on a taxable equivalent basis, which is higher than net interest income as reflected on the Consolidated Statement of Income because of adjustments that relate to income on securities that are exempt from federal income taxes.

Average interest-bearing sources of funds increased $83.7 million or 9.8% during 2006. Of that increase, average borrowed funds (primarily FHLB Advances) increased $20.8 million, interest-bearing deposits increased $62.9 million, and subordinated debt remained unchanged.

During 2006, the Company was able to grow average interest bearing deposits by $62.9 million. The increase was primarily in time deposits, which grew $73.2 million, as lower cost savings and interest bearing DDA decreased by $10.3 million. See "Financial Condition - Deposits" for a discussion of trends in the Company's deposit base. Total interest expense on deposit accounts for 2006 was $18.6 million as compared to $9.8 million in 2005. As deposits increased, interest expense on deposits increased 89.6% or $8.8 million in 2006. The average rate paid on interest-bearing deposits was 2.2% in 2006 and 1.3% in 2005. This increase in rates is a result of the lagging impact of increases in market interest rates that occurred in mid-2004 through mid-2006. The Company anticipates that its deposit rates will continue to increase in 2007, even though market rates have been stable since June 2006. See "Overview - Looking

Forward: 2007 and Beyond" for a discussion of factors impacting the Company's future deposit rates and their impact on net interest margin.

2005 Compared to 2004

Net interest income increased 18.1% to $58.4 million during 2005. During 2004, net interest income was $49.5 million, representing an increase of 12.9% from 2003. On a fully taxable equivalent basis, net interest income increased 18.3% and totaled $60.1 million during 2005, compared to $50.8 million for 2004. Although average earning assets grew 7.4% during 2005, a significant reason for the increase in net interest income during 2005 was increased market interest rates by the FRB.

For 2005, the Company's net interest margin was 5.12% compared to 4.65% in 2004. This improvement is primarily a result of the FRB's 200 basis point increase in market rates since December 31, 2004.

Loans, generally the Company's highest earning assets, increased $106.3 million as of December 31, 2005 compared to December 31, 2004. On an average balance basis, loans increased by $79.1 million for the year ended December 31, 2005. As a result of this loan growth, the mix of the Company's earning assets improved as loans increased from 75.5% of average earning assets during 2004 to 77.0% in 2005. Due to increases in the prime rate during the latter half of 2004 through 2005, the year-to-date yield on the loan portfolio increased 86 basis points to 6.84% for the year ended December 31, 2005 compared to 5.98% for the year ended December 31, 2004. This increase in yield plus the growth in loan balances resulted in interest revenue from loans increasing 25.4% to $61.8 million for 2005.

Average investment securities increased slightly from the prior year. Average balances increased $10.9 million in 2005 compared to the average balance during 2004. Interest income on securities increased $969,000 to $12.1 million for the year ended December 31, 2005 compared to $11.1 million for the year ended December 31, 2004. The average yield, on a taxable equivalent basis, in the investment portfolio was 4.6% in 2005 compared to 4.4% in 2004. Net interest income on the Schedule of Year-to-Date Average Balances and Interest Rates shown on a taxable

equivalent basis, which is higher than net interest income as reflected on the Consolidated Statement of Income because of adjustments that relate to income on securities that are exempt from federal income taxes.

Average interest-bearing sources of funds increased $49.0 million or 6.1% during 2005. Of that increase, average borrowed funds (primarily FHLB Advances) decreased $2.9 million, interest-bearing deposits increased $51.9 million, and subordinated debt remained unchanged.

During 2005, the Company was able to grow average interest bearing deposits by $51.9 million. The increase was primarily in lower cost savings and interest bearing DDA deposits, which grew $33.7 million, as higher cost time deposits grew by $18.2 million. Total interest expense on deposit accounts for 2005 was $9.8 million as compared to $6.7 million in 2004. As deposits increased, interest expense on deposits increased 47.6% or $3.2 million in 2005. The average rate paid on interest-bearing deposits was 1.3% in 2005 and 0.9% in 2004. This increase in rates is a result of the FRB's increase in market rates during 2005.

Provision and Allowance for Loan Losses

As a financial institution that assumes lending and credit risks as a principal element of its business, credit losses will be experienced in the normal course

of business. The allowance for loan losses is established to absorb losses inherent in the loan portfolio. The allowance for loan losses is maintained at a level considered by management to be adequate to provide for risks inherent in the loan portfolio. The allowance is increased by provisions charged to operating expense and reduced by net charge-offs. In determining the adequacy of the allowance for loan losses, management takes into consideration examinations by the Company's supervisory authorities, results of internal credit reviews, financial condition of borrowers, loan concentrations, prior loan loss experience, and general economic conditions. The allowance is based on estimates and ultimate losses may vary from the current estimates. Management reviews these estimates periodically and, when adjustments are necessary, they are reported in the period in which they become known.

The Company has established credit management policies and procedures that govern both the approval of new loans and the monitoring of the existing portfolio. The Company manages and controls credit risk through comprehensive underwriting and approval standards, dollar limits on loans to one borrower and by restricting loans made primarily to its principal market area where management believes it is better able to assess the applicable risk. Additionally, management has established guidelines to ensure the diversification of the Company's credit portfolio such that even within key portfolio sectors such as real estate or agriculture, the portfolio is diversified across factors such as location, building type, crop type, etc. Management reports regularly to the Board of Directors regarding trends and conditions in the loan portfolio and regularly conducts credit reviews of individual loans. Loans that are performing but have shown some signs of weakness are subjected to more stringent reporting and oversight.

The provision for loan losses totaled $275,000 in 2006, compared to $425,000 in 2005 and $1.3 million in 2004. Changes in the provision between years were the result of management's evaluation of the adequacy of the allowance for loan losses relative to factors such as the credit quality of the loan portfolio, loan growth, current loan losses and the prevailing economic climate and its effect on borrowers' ability to repay loans in accordance with the terms of the notes. See "Critical Accounting Policies and Estimates - Allowance for Loan Losses" and "Item 7A. Quantitative and Qualitative Disclosures About Market Risk-Credit Risk."

As of December 31, 2006, the allowance for loan losses was $18.1 million, which represented 1.7% of the total loan balance. At December 31, 2005, the allowance for loan losses was $17.9 million or 1.8% of the total loan balance. After reviewing all factors above, management concluded that the allowance for loan losses as of December 31, 2006 was adequate.

37

The table below summarizes the activity in the allowance for losses for the years 2006, 2005 and 2004.

Allowance for Losses (IN THOUSAND)S	2006	2005	2004
Allowance for Loan Losses, Beginning of Year	$17,860	$17,727	$17,220
Allowance for Losses - Unfunded Commitments	141	111	-
Total Allowance for Losses, Beginning of Year	18,001	17,838	17,220
Provision for Loan Losses Charged to Expense	275	425	1,275
Provision for Losses - Unfunded Commitments Charged to Expense	-	30	-

Loans Charged Off	(839)	(867)	(955)
Recoveries of Loans Previously Charged Off	803	575	298
Total Allowance for Losses, End of Year	$18,240	$18,001	$17,838

Allocation of Allowance for Losses

Allowance for Loan Losses	$18,099	$17,860	$17,727
Allowance for Losses - Unfunded Commitments*	141	141	111
Total Allowance for Losses, End of Year	$18,240	$18,001	$17,838

*As of December 31, 2004, the Company reclassified $111,000 of the Allowance for Loan Losses that pertained to commitments under commercial and standby letters of credit to the "Other Liabilities" section of the Consolidated Balance Sheet.

Non-Interest Income

Non-interest income includes: (1) service charges and fees from deposit accounts; (2) net gains and losses from the sale of investment securities; (3) credit card merchant fees; (4) ATM fees; (5) gains and losses from the sale of assets; (6) increases in the cash surrender value of bank owned life insurance; and (7) fees from other miscellaneous business services.

2006 Compared to 2005

Non-interest income totaled $12.1 million, an increase of $789,000 or 7.0% from non-interest income of $11.3 million for 2005.

Most of the increase in 2006 occurred in service charges on deposit accounts. Service charges totaled $6.0 million, an increase of $1.7 million or 38.5% from service charges on deposit accounts of $4.4 million in 2005. This increase was due to fees related to the Company's Overdraft Privilege Service which was offered to eligible customers with deposit accounts in good standing beginning May 1, 2006.

The increase in service charges was offset by an increase in loss on sale of investment securities, which was a loss of $2.2 million in 2006 as compared to a loss of $953,000 for 2005. During 2006 the Company made the decision to sell some of its investment portfolio at a loss in order to better align the portfolio with its evolving asset/liability management objectives. See "Financial Condition-Investment Securities."

ATM fees totaled $1.2 million, an increase of $211,000 or 21.3% over fees in 2005. The increase in these fees is due to the convenience and increased number of ATM's at strategic locations which benefit both customers and non-customers.

2005 Compared to 2004

Non-interest income totaled $11.3 million, a decrease of $3.0 million or 20.9% from non-interest income of $14.3 million for 2004.

Most of the decrease in 2005 occurred in gain (loss) on sale of investment securities, which was a loss of $953,000 in 2005 as compared to a gain of $1.9 million for 2004. During 2005 the Company made the decision to sell some of its investment portfolio at a loss in order to better align the portfolio with its evolving asset/liability management

objectives. See "Financial Condition-Investment Securities." Additionally, $1.1

million of the gain in 2004 was a result of a non-recurring gain from the sale of common stock of another Company.

Service charges on deposit accounts totaled $4.4 million, a decrease of $427,000 or 8.9% from service charges on deposit accounts of $4.8 million in 2004 due to: (1) the conversion of certain deposit customers to a newly offered high performance checking product that does not have a monthly service charge; (2) increasing interest rates which reduced service charges for those commercial customers on business account analysis; and (3) a decrease in fees generated from money service business relationships as a result of the Company's strategic decision to exit this product line.

Credit card merchant fees totaled $2.0 million, an increase of $286,000 or 16.3% over fee income of $1.8 million in 2004. The increase during 2005 was due to an increase in merchant volume during the year.

ATM fees totaled $991,000, an increase of $257,000 or 35.0% over fees in 2004. The increase in these fees is due to the convenience and increased number of ATM's at strategic locations which benefit both customers and non-customers.

Non-Interest Expense

Non-interest expense for the Company includes expenses for salaries and employee benefits, occupancy, equipment, supplies, legal fees, professional services, data processing, marketing, deposit insurance, merchant bankcard operations, and other miscellaneous expenses.

2006 Compared to 2005

Overall, non-interest expense totaled $43.1 million, an increase of $2.5 million or 6.2% for the year ended December 31, 2006.

Salaries and employee benefits increased $1.0 million due to: (1) officer salary merit increases which occurred in November 2005; (2) increased contributions to the Company's incentive compensation and supplemental retirement plans; and (3) increased staff related to the three new branches opened during 2006. At the end of 2006, the Company had 302 full time equivalent employees compared to 294 at the end of 2005.

Occupancy and equipment expenses represent the cost of operating and maintaining branch and administrative facilities, including the purchase and maintenance of furniture, fixtures, and office equipment and data processing equipment. Occupancy expense in 2006 totaled $2.5 million, an increase of $382,000 or 18.4% over 2005. This increase was due to: (1) three new branches opened in 2006; (2) increased utilities due to increased gas and electricity prices; (3) increased rents on leased properties; and (4) increased property taxes.

Equipment expense in 2006 totaled $3.2 million, an increase of $709,000 or 28.3% over 2005. This increase was due to: (1) annual computer hardware/software maintenance and upgrades; and (2) increased furniture and equipment depreciation related to remodeling and adding branch locations.

Marketing expense was $1.2 million in 2006, a decrease of $355,000 or 23.3% from $1.5 million in 2005. In 2005 there were significant marketing expenses for a new high performance checking product started in November 2004, including the associated direct mail and other ancillary expenses incurred to promote this product. These same expenses were not required in 2006.

Other operating expense totaled $6.9 million, a 9.7% increase from the prior year. This increase in other operating expense during 2006 was due to: (1) $228,000 early payoff penalties of FHLB borrowings; (2) operating losses related to non-sufficient funds and electronic funds transactions; and (3) increased stationary and printing expense related to the Company's 90th anniversary logo.

2005 Compared to 2004

Overall, non-interest expense totaled $40.6 million, an increase of $4.4 million or 12.3% for the year ended December 31, 2005, primarily as a result of a $2.7 million increase in salaries and employee benefits. This increase was due to: (1) officer salary merit increases which occurred in November 2005; (2) increased contributions to the

39

Company's incentive compensation and supplemental retirement plans; and (3) increased expense recognition associated with the termination of the Company's defined benefit pension plan which took place in 2005. At the end of 2005, the Company had 294 full time equivalent employees compared to 288 at the end of 2004.

Occupancy and equipment expenses represent the cost of operating and maintaining branch and administrative facilities, including the purchase and maintenance of furniture, fixtures, and office equipment and data processing equipment. Occupancy expense in 2005 totaled $2.1 million, an increase of $343,000 or 19.8% over 2004. This increase was due to: (1) increased branch maintenance and equipment expense; and (2) increased furniture and equipment depreciation related to remodeling and adding branch locations. Equipment expense in 2005 totaled $2.5 million, an increase of $190,000 or 8.2% over 2004.

Marketing expense was $1.5 million in 2005, an increase of $520,000 or 51.9% from $1.0 million in 2004. This increase in 2005 was due to marketing expenses for a new high performance checking product started in November 2004, including the associated direct mail and other ancillary expenses incurred to promote this product.

Other operating expense totaled $6.3 million, a 7.9% increase from the prior year. This increase in other operating expense during 2005 was due primarily to increases in insurance premiums and charitable contributions.

Income Taxes

The provision for income taxes increased $1.6 million during 2006. The effective tax rate in 2006 was 36.4% compared to 35.7% in 2005 and 36.5% in 2004. The increase in the effective tax rate during 2006 was due primarily to decreased municipal security income that is tax exempt for federal tax purposes. The effective rates were lower than the statutory rate of 42% due primarily to benefits regarding the cash surrender value of life insurance, California enterprise zone interest income exclusion, and tax exempt interest income on municipal securities and loans.

Current tax law causes the Company's current taxes payable to approximate or exceed the current provision for taxes on the income statement. Three provisions have had a significant effect on the Company's current income tax liability: the restrictions on the deductibility of loan losses, deductibility of pension and other long-term employee benefits only when paid and the statutory deferral of deductibility of California franchise taxes on the Company's federal return.

FINANCIAL CONDITION

Investment Securities

The investment portfolio provides the Company with an income alternative to loans. The Company's investment portfolio at the end of 2006 was $244.4 million, a decrease of $23.5 million or 8.8% from 2005.

During 2006 the Company sold $63.3 million in available-for-sale investment securities at a loss of $2.2 million. These securities generally had a remaining life under three years and yields below current market rates. Funds not invested

in loans or used to pay down short-term borrowings were reinvested in higher yielding, somewhat longer term (5-7 years) securities which management believes should strengthen the Company's net interest margin and reduce the Company's asset sensitivity, thereby better protecting against future declines in market interest rates.

The Company's total investment portfolio represented 17.3% of the Company's total assets during 2006 and 19.8% of the Company's total assets during 2005. Not included in the investment portfolio are overnight investments in Federal Funds Sold. In 2006, average Federal Funds Sold on a year to date basis was $1.0 million compared to $5.6 million in 2005.

The Company classifies its investments as held-to-maturity, trading or available-for-sale. Securities are classified as held-to-maturity and are carried at amortized cost when the Company has the intent and ability to hold the securities to maturity. Trading securities are securities acquired for short-term appreciation and are carried at fair value, with unrealized gains and losses recorded in non-interest income. As of December 31, 2006 and 2005 there were no securities in the trading portfolio. Securities classified as available-for-sale include securities which may be sold to effectively manage interest rate risk exposure, prepayment risk, satisfy liquidity demands and other factors. These

40

securities are reported at fair value with aggregate, unrealized gains or losses excluded from income and included as a separate component of shareholders' equity, net of related income taxes.

Note 2 located in "Item 8. Financial Statements and Supplementary Data" displays the classifications of the Company's investment portfolio, the market value of the Company's investment portfolio and the maturity distribution.

Loans

The Company's loan portfolio at December 31, 2006 increased $73.6 million from December 31, 2005. The increase was due to strong loan demand in the Company's market area, along with a focused calling program on selected loan prospects. Most of the current year's growth occurred in Agricultural Loans and Real Estate Loans (primarily those secured by production agricultural properties), market segments where the Company believes that current market rates are more reasonable than in the areas of Commercial, Consumer, Home Equity and Other Real Estate loans. Additionally, on an average balance basis, loans have increased $94.8 million or 10.5%. In 2005, average balances increased 9.6% or $79.1 million from the prior year. The table following sets forth the distribution of the loan portfolio by type as of the dates indicated.

Loan Portfolio (in thousands)	December 31, 2006	December 31, 2005
Real Estate	$ 516,606	$ 432,378
Real Estate Construction	95,378	110,235
Home Equity	67,132	69,013
Agricultural	183,589	170,657
Commercial	165,412	174,530
Consumer	21,222	18,958
Gross Loans	1,049,339	975,771
Less:		

Unearned Income	2,427	2,514
Allowance for Loan Losses	18,099	17,860
Net Loans	$ 1,028,813	$ 955,397

In the ordinary course of business, the Company enters into commitments to extend credit to its customers. These commitments are not reflected in the accompanying consolidated financial statements. As of December 31, 2006, the Company had entered into loan commitments amounting to $442.5 million compared to $447.7 million at December 31, 2005. In addition, letters of credit issued by the Company to guarantee the performance of a customer to a third party at December 31, 2006 and December 31, 2005, were $10.9 million and $11.5 million, respectively.

Non-Performing Assets

Non-performing assets are comprised of non-performing loans (defined as non-accrual loans plus accruing loans past due 90 days or more) and other real estate owned. As set forth in the table below, non-performing loans as of December 31, 2006 were $54,000 compared to $694,000 at December 31, 2005. The Company reported no other real estate owned at either December 31, 2006 or December 31, 2005.

The Company's policy is to place loans on non-accrual status when, for any reason, principal or interest is past due for ninety days or more unless it is both well secured and in the process of collection. Any interest accrued, but unpaid, is reversed against current income. Thereafter, interest is recognized as income only as it is collected in cash. Accrued interest reversed from income on loans placed on a non-accrual status totaled $15,000 at December 31, 2006 compared to $50,000 at December 31, 2005. Non-performing loans as a percentage of total loans for the year ended 2006 was 0.01%. For the year ended 2005 the percentage was 0.07%.

41

Non-Performing Assets (in thousands)	December 31, 2006	December 31, 2005
Non-Performing Loans	$ 54	$ 694
Other Real Estate Owned	-	-
Total	$ 54	$ 694
Non-Performing Assets as a % of Total Loans	0.01%	0.07%
Allowance for Loan Losses as a % of Non-Performing Loans	33,516.7%	2,573.5%

Except for non-performing loans shown in the table above, the Company's management is not aware of any loans as of December 31, 2006 for which known credit problems of the borrower would cause serious doubts as to the ability of such borrowers to comply with their present loan repayment terms, or any known events that would result in the loan being designated as non-performing at some future date. The Company's management cannot, however, predict the extent to which the following or other factors may affect a borrower's ability to pay: (1) deterioration in general economic conditions, real estate values or agricultural

commodity prices; (2) increases in general rates of interest; or (3) changes in the financial condition or business of a borrower.

Although management believes that non-performing loans are generally well-secured and that potential losses are provided for in the Company's allowance for loan losses, there can be no assurance that future deterioration in economic conditions or collateral values will not result in future credit losses.

Deposits

One of the key sources of funds to support earning assets is the generation of deposits from the Company's customer base. The ability to grow the customer base and subsequently deposits is a significant element in the performance of the Company.

Consistent with general banking industry trends, the Company saw a slowing of overall deposit growth during 2006 along with a significant shift in the mix of deposits to higher yielding Time Deposits as customers sought to take advantage of increasing market interest rates. Additionally, the Company's strategy of balancing growth and margin protection called for not pursuing "high cost" local deposits by offering the deposit specials that many of its competitors were using. The Company is continually reviewing this strategy with regard to liquidity trends and market rates.

At December 31, 2006, total deposits were $1.2 billion, an increase of 8.6% or $95.2 million from December 31, 2005. Of the $95.2 million in overall deposit growth, core deposits (exclusive of State of California Time Deposits) increased $25.0 million or 2.3% during 2006. As previously discussed, the mix of core deposits changed significantly as Time Deposits increased $73.0 million and all other core deposit types (Demand, Interest Bearing Transaction and Savings) decreased $48.0 million. Should this trend continue in 2007, it will place additional pressure on the Company's net interest margin. See "Results of Operations - Net Interest Income/Net Interest Margin."

Time Deposits with the State of California increased $70.0 million since December 31, 2005. These CD's are used to manage the Company's liquidity position, as they represent a cost effective alternative to (1) high cost local deposit specials and (2) short-term borrowings. See "Federal Home Loan Bank Advances."

Federal Home Loan Bank Advances

Advances from the Federal Home Loan Bank (FHLB) are another key source of funds to support earning assets. These advances are also used to manage the Bank's interest rate risk exposure, and as opportunities exist to borrow and invest the proceeds at a positive spread through the investment portfolio. FHLB advances as of December 31, 2006 were $47.5 million compared to $98.8 million as of December 31, 2005. This decrease of $51.3 million in

borrowings occurred as a result of the Company's management of its liquidity needs using State of California Time Deposits which generally have rates from 20 to 30 basis points lower than FHLB advances. The average rate on FHLB advances during 2006 was 5.2% compared to 4.5% in 2005.

Subordinated Debentures

On December 17, 2003 the Company raised $10 million through an offering of trust preferred securities. See Note 17 located in "Item 8. Financial Statements and Supplementary Data." Although this amount is reflected as subordinated debt on the Company's balance sheet, under applicable regulatory guidelines, trust preferred securities qualify as regulatory capital. See "Capital." These

securities accrue interest at a variable rate based upon 3-month LIBOR plus 2.85%. Interest rates reset quarterly (the next reset is March 16, 2007) and the rate was 8.21% as of December 31, 2006. The average rate paid for these securities in 2006 was 8.02% compared to 6.24% in 2005. Additionally, if the Company decided to defer interest on the subordinated debentures, the Company would be prohibited from paying cash dividends on the Company's common stock.

Capital

The Company relies primarily on capital generated through the retention of earnings to satisfy its capital requirements. The Company engages in an ongoing assessment of its capital needs in order to support business growth and to insure depositor protection. Shareholders' Equity totaled $132.3 million at December 31, 2006 and $123.6 million at the end of 2005.

The Company and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory, and possibly discretionary, actions by regulators that, if undertaken, could have a direct material effect on the Company and the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of the Company's and the Bank's assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The Company's and the Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios of Total and Tier 1 capital to risk-weighted assets (as defined in the regulations), and of Tier 1 capital to average assets (as defined in the regulations). Management believes, as of December 31, 2006, that the Company and the Bank meet all capital adequacy requirements to which they are subject. For further information on the Company and the Bank's risk-based capital ratios, see Note 10 located in "Item 8. Financial Statements and Supplementary Data."

As previously discussed (see "Subordinated Debentures"), in order to supplement its regulatory capital base, during December 2003 the Company issued $10 million of trust preferred securities. See Note 17 located in "Item 8. Financial Statements and Supplementary Data." On March 1, 2005 the Federal Reserve Board issued its final rule effective April 11, 2005, concerning the regulatory capital treatment of trust preferred securities ("TPS") by bank holding companies ("BHCs"). Under the final rule BHCs may include TPS in Tier 1 capital in an amount equal to 25% of the sum of core capital net of goodwill. The quantitative limitation concerning goodwill will not be effective until March 31, 2009. Any portion of trust preferred securities not qualifying as Tier 1 capital would qualify as Tier 2 capital subject to certain limitations. The Company has received notification from the Federal Reserve Bank of San Francisco that all of the Company's trust preferred securities currently qualify as Tier 1 capital.

In accordance with the provisions of Financial Accounting Standard Board Interpretation No. 46, "Consolidation of Variable Interest Entities" ("FIN 46"), the Company does not consolidate the subsidiary trust which has issued the trust preferred securities.

In 1998, the Board approved the Company's first stock repurchase program which expired on May 1, 2001. During the second quarter of 2004, the Board approved a second stock repurchase program because it concluded that the Company continued to have more capital than it needed to meet present and anticipated regulatory guidelines for the Bank to be classified as "well capitalized." On April 4, 2006, the Board unanimously approved expanding the Repurchase Program to allow

the repurchase of up to $15 million of stock between May 1, 2006 and April 30, 2009.

Repurchases under the program will continue to be made on the open market or through private transactions. The repurchase program also requires that no purchases may be made if the Bank would not remain "well-capitalized" after the repurchase. All shares repurchased under the repurchase program will be retired. See Part II, "Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities."

During 2006, the Company repurchased 11,718 shares at an average share price of $507 per share. In 2005, the Company repurchased 8,066 shares at an average share price of $498. Since the second share repurchase program was expanded in 2006, the Company has repurchased over 8,200 shares for total consideration of $4.2 million.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

This "Management's Discussion and Analysis of Financial Condition and Results of Operations," is based upon the Company's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. In preparing the Company's financial statements management makes estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. Management believes that the most significant subjective judgments that it makes include the following:

- Allowance for Loan Losses. As a financial institution which assumes lending and credit risks as a principle element in its business, the Company anticipates that credit losses will be experienced in the normal course of business. Accordingly, the allowance for loan losses is maintained at a level considered adequate by management to provide for losses that are inherent in the portfolio. The allowance is increased by provisions charged to operating expense and reduced by net charge-offs. Management employs a systematic methodology for determining the allowance for loan losses. On a quarterly basis, management reviews the credit quality of the loan portfolio and considers problem loans, delinquencies, internal credit reviews, current economic conditions, loan loss experience and other factors in determining the adequacy of the allowance balance.

  While the Company utilizes a systematic methodology in determining its allowance, the allowance is based on estimates, and ultimate losses may vary from current estimates. The estimates are reviewed periodically and, as adjustments become necessary, are reported in earnings in the periods in which they become known. For additional information, see Note 3 located in "Item 8. Financial Statements and Supplementary Data."

- Fair Value. The Company discloses the fair value of financial instruments and the methods and significant assumptions used to estimate those fair values. The estimated fair value amounts have been determined by the Company using available market information and appropriate valuation methodologies. The use of assumptions and various valuation techniques, as well as the absence of secondary markets for certain financial instruments, will likely reduce the comparability of fair value disclosures between financial institutions. In some cases, book value is a reasonable estimate of fair value due to the relatively short period of time between origination of the instrument and its expected realization. For additional information, see Note 12 located in "Item 8. Financial Statements and Supplementary Data."

- Income Taxes. The Company uses the liability method of accounting for income taxes. This method results in the recognition of deferred tax assets and liabilities that are reflected at currently enacted income tax rates applicable to the period in which the deferred tax assets or liabilities are expected to be realized or settled. As changes in tax laws or rates are enacted, deferred tax assets and liabilities are adjusted through the provision for income taxes. The deferred provision for income taxes is the result of the net change in the deferred tax asset and deferred tax liability balances during the year. This amount combined with the current taxes payable or refundable results in the income tax expense for the current year. For additional information, see Note 7 located in "Item 8. Financial Statements and Supplementary Data."

OFF-BALANCE SHEET ARRANGEMENTS AND AGGREGATE CONTRACTUAL OBLIGATIONS AND COMMITMENTS

Off-balance sheet arrangements are any contractual arrangement to which an unconsolidated entity is a party, under which the Company has: (1) any obligation under a guarantee contract; (2) a retained or contingent interest in assets transferred to an unconsolidated entity or similar arrangement that serves as credit, liquidity or market risk support to that entity for such assets; (3) any obligation under certain derivative instruments; or (4) any obligation under a

44

material variable interest held by us in an unconsolidated entity that provides financing, liquidity, market risk or credit risk support to the Company, or engages in leasing, hedging or research and development services with the Company.

Our most significant off-balance sheet arrangements are limited to: (1) the full and unconditional payment guarantee of accrued distributions relating to $10 million of Trust Preferred Securities issued by FMCB Statutory Trust (see Note 17 located in "Item 8. Financial Statements and Supplementary Data"); (2) derivative instruments indexed to the Prime Rate (see Note 13 located in "Item 8. Financial Statements and Supplementary Data"); (3) obligations under guarantee contracts such as financial and performance standby letters of credit for our credit customers (see Note 14 located in "Item 8. Financial Statements and Supplementary Data"); (4) unfunded commitments to lend (see Note 14 located in "Item 8. Financial Statements and Supplementary Data"); and (5) lease contracts (see Note 14 located in "Item 8. Financial Statements and Supplementary Data"). It is our belief that none of these arrangements expose us to any greater risk of loss than is already reflected on our balance sheet. We do not have any off-balance sheet arrangements in which we have any retained or contingent interest (as we do not transfer or sell our assets to entities in which we have a continuing involvement), any exposure to derivative instruments that are indexed to stock indices nor any variable interests in any unconsolidated entity to which we may be a party.

The following table presents, as of December 31, 2006, our significant and determinable contractual obligations by payment date. The payment amounts represent those amounts contractually due to the recipient and do not include any unamortized premiums or discount, hedge basis adjustments or other similar carrying value adjustments. For further information on the nature of each obligation type, see applicable note disclosure located in "Item 8. Financial Statements and Supplementary Data."

Payments Due By Period

(in thousands)

Contractual Obligations	Total	Less Than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
Operating Lease Obligations	$ 2,620	$ 475	$ 706	$ 579	$ 860
FHLB Advances	47,532	46,730	-	-	802
Long-Term Subordinated Debentures	10,310	-	-	-	10,310
Deferred Compensation (1)	10,846	158	133	219	10,336
Total	$71,308	$ 47,363	$ 839	$ 798	$ 22,308

(1) These amounts represent payments to participants under the Company's non-qualified deferred compensation and supplemental retirement plans. See Note 11 located in "Item 8. Financial Statements and Supplementary Data."

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

RISK MANAGEMENT

The Company has adopted a Risk Management Plan which aims to ensure the proper control and management of all risk factors inherent in the operation of the Company. Specifically, credit risk, interest rate risk, liquidity risk, compliance risk, strategic risk, reputation risk and price risk can all affect the market risk of the Company. These specific risk factors are not mutually exclusive. It is recognized that any product or service offered by the Company may expose the Company to one or more of these risk factors.

Credit Risk
Credit risk is the risk to earnings or capital arising from an obligor's failure to meet the terms of any contract or otherwise fail to perform as agreed. Credit risk is found in all activities where success depends on counterparty, issuer or borrower performance.

Credit risk in the investment portfolio and correspondent bank accounts is addressed through defined limits in the Company's policy statements. In addition, certain securities carry insurance to enhance credit quality of the bond. Credit risk in the loan portfolio is controlled by limits on industry concentration, aggregate customer borrowings and geographic boundaries. Standards on loan quality also are designed to reduce loan credit risk. Senior Management, Directors' Committees, and the Board of Directors are regularly provided with information intended to identify, measure, control and monitor the credit risk of the Company.

The Company's methodology for assessing the appropriateness of the allowance is applied on a regular basis and considers all loans. The systematic methodology consists of two major elements. The first major element includes a detailed analysis of the loan portfolio in two phases. The first phase is conducted in accordance with SFAS No. 114, "Accounting by Creditors for the Impairment of a Loan" as amended by SFAS No. 118, "Accounting by Creditors for Impairment of a Loan - Income Recognition and Disclosures." Individual loans are reviewed to identify loans for impairment. A loan is impaired when principal and interest are deemed uncollectible in accordance with the original contractual terms of the loan. Impairment is measured as either the expected future cash flows discounted at each loan's effective interest rate, the fair value of the loan's collateral if the loan is collateral dependent, or an observable market price of the loan (if one exists). Upon measuring the impairment, the Company will ensure

an appropriate level of allowance is present or established.

Central to the first phase and the Company's credit risk management is its loan risk rating system. The originating credit officer assigns borrowers an initial risk rating, which is based primarily on a thorough analysis of each borrower's financial position in conjunction with industry and economic trends. Approvals are made based upon the amount of inherent credit risk specific to the transaction and are reviewed for appropriateness by senior credit administration personnel. Credits are monitored by credit administration personnel for deterioration in a borrower's financial condition, which would impact the ability of the borrower to perform under the contract. Risk ratings are adjusted as necessary.

Based on the risk rating system, specific allowances are established in cases where management has identified significant conditions or circumstances related to a credit that management believes indicates the possibility of loss. Management performs a detailed analysis of these loans, including, but not limited to, cash flows, appraisals of the collateral, conditions of the marketplace for liquidating the collateral and assessment of the guarantors. Management then determines the inherent loss potential and allocates a portion of the allowance for losses as a specific allowance for each of these credits.

The second phase is conducted by segmenting the loan portfolio by risk rating and into groups of loans with similar characteristics in accordance with SFAS No. 5, "Accounting for Contingencies". In this second phase, groups of loans are reviewed and applied the appropriate allowance percentage to determine a portfolio formula allowance.

The second major element of the analysis, which considers all known relevant internal and external factors that may affect a loan's collectibility, is based upon management's evaluation of various conditions, the effects of which are not directly measured in the determination of the formula and specific allowances. The evaluation of the inherent loss with respect to these conditions is subject to a higher degree of uncertainty because they are not identified with specific problem credits or portfolio segments. The conditions evaluated in connection with the second element of the analysis of the allowance include, but are not limited to the following conditions that existed as of the balance sheet date:

- then-existing general economic and business conditions affecting the key lending areas of the Company;
- credit quality trends (including trends in non-performing loans expected to result from existing conditions);
- collateral values;
- loan volumes and concentrations;
- seasoning of the loan portfolio;
- specific industry conditions within portfolio segments;
- recent loss experience within portfolio segments;
- duration of the current business cycle;
- bank regulatory examination results; and

- findings of the Company's internal credit examiners.

Management reviews these conditions in discussion with the Company's senior credit officers. To the extent that any of these conditions are evidenced by a specifically identifiable problem credit or portfolio segment as of the evaluation date, management's estimate of the effect of such condition may be reflected as a specific allowance applicable to such credit or portfolio segment. Where any of these conditions is not evidenced by a specifically identifiable problem credit or portfolio segment as of the evaluation date,

management's evaluation of the inherent loss related to such condition is reflected in the second major element allowance.

Implicit in lending activities is the risk that losses will and do occur and that the amount of such losses will vary over time. Consequently, the Company maintains an allowance for loan losses by charging a provision for loan losses to earnings. Loans determined to be losses are charged against the allowance for loan losses. The Company's allowance for loan losses is maintained at a level considered by management to be adequate to provide for estimated losses inherent in the existing portfolio.

Management believes that the allowance for loan losses at December 31, 2006 was adequate to provide for both recognized losses and estimated inherent losses in the portfolio. No assurances can be given that future events may not result in increases in delinquencies, non-performing loans or net loan charge-offs that would increase the provision for loan losses and thereby adversely affect the results of operations.

Interest Rate Risk

The mismatch between maturities of interest sensitive assets and liabilities results in uncertainty in the Company's earnings and economic value and is referred to as interest rate risk. The Company does not attempt to predict interest rates and positions the balance sheet in a manner which seeks to minimize, to the extent possible, the effects of changing interest rates.

The Company measures interest rate risk in terms of potential impact on both its economic value and earnings. The methods for governing the amount of interest rate risk include: (1) analysis of asset and liability mismatches (GAP analysis); (2) the utilization of a simulation model; and (3) limits on maturities of investment, loan and deposit products which reduces the market volatility of those instruments.

The Gap analysis measures, at specific time intervals, the divergence between earning assets and interest bearing liabilities for which repricing opportunities will occur. A positive difference, or Gap, indicates that earning assets will reprice faster than interest-bearing liabilities. This will generally produce a greater net interest margin during periods of rising interest rates and a lower net interest margin during periods of declining interest rates. Conversely, a negative Gap will generally produce a lower net interest margin during periods of rising interest rates and a greater net interest margin during periods of decreasing interest rates.

The interest rates paid on deposit accounts do not always move in unison with the rates charged on loans. In addition, the magnitude of changes in the rates charged on loans is not always proportionate to the magnitude of changes in the rate paid for deposits. Consequently, changes in interest rates do not necessarily result in an increase or decrease in the net interest margin solely as a result of the differences between repricing opportunities of earning assets or interest bearing liabilities.

The Company also utilizes the results of a dynamic simulation model to quantify the estimated exposure of net interest income to sustained interest rate changes. The sensitivity of the Company's net interest income is measured over a rolling one-year horizon.

The simulation model estimates the impact of changing interest rates on interest income from all interest earning assets and the interest expense paid on all interest bearing liabilities reflected on the Company's balance sheet. This sensitivity analysis is compared to policy limits, which specify a maximum tolerance level for net interest income exposure over a one-year horizon assuming no balance sheet growth, given a 200 basis point upward and a 200 basis point downward shift in interest rates. A shift in rates over a 12-month period

is assumed. Results that exceed policy limits, if any, are analyzed for risk tolerance and reported to the Board with appropriate recommendations. At December 31, 2006, the Company's estimated net interest income sensitivity to changes in interest rates, as a percent

47

of net interest income was an increase in net interest income of 0.92% if rates increase by 200 basis points and a decrease in net interest income of 2.43% if rates decline 200 basis points.

The estimated sensitivity does not necessarily represent a Company forecast and the results may not be indicative of actual changes to the Company's net interest income. These estimates are based upon a number of assumptions including: the nature and timing of interest rate levels including yield curve shape; prepayments on loans and securities; pricing strategies on loans and deposits; replacement of asset and liability cash flows; and other assumptions. While the assumptions used are based on current economic and local market conditions, there is no assurance as to the predictive nature of these conditions including how customer preferences or competitor influences might change. See Note 12 located in "Item 8. Financial Statements and Supplementary Data."

Liquidity Risk

Liquidity risk is the risk to earnings or capital resulting from the Company's inability to meet its obligations when they come due without incurring unacceptable losses. It includes the ability to manage unplanned decreases or changes in funding sources and to recognize or address changes in market conditions that affect the Company's ability to liquidate assets or acquire funds quickly and with minimum loss of value. The Company endeavors to maintain a cash flow adequate to fund operations, handle fluctuations in deposit levels, respond to the credit needs of borrowers and to take advantage of investment opportunities as they arise. The principal sources of liquidity include credit facilities from correspondent banks, brokerage firms and the Federal Home Loan Bank, as well as interest and principal payments on loans and investments, proceeds from the maturity or sale of investments, and growth in deposits.

In general, liquidity risk is managed daily by controlling the level of Federal Funds and the use of funds provided by the cash flow from the investment portfolio. The Company maintains overnight investments in Federal Funds as a cushion for temporary liquidity needs. During 2006, Federal Funds Sold averaged $1.0 million. The Company maintains Federal Funds credit lines of $75 million with major banks subject to the customary terms and conditions for such arrangements and $150 million in repurchase lines with major brokers. In addition, the Company has additional borrowing capacity of $179.8 million from the Federal Home Loan Bank.

At December 31, 2006, the Company had available sources of liquidity, which included cash and cash equivalents and unpledged investment securities of approximately $75.7 million, which represents 5.4% of total assets.

FARMERS & MERCHANTS BANCORP

REPORT OF MANAGEMENT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is responsible for establishing and maintaining adequate internal control over financial reporting at Farmers & Merchants Bancorp ("the Company"). Internal control over financial reporting includes controls over the preparation of financial statements in accordance with the instructions to the Consolidated Financial Statements for Bank Holding Companies (Form FR Y-9C) to comply with the reporting requirements of Section 112 of the Federal Deposit Insurance Corporation Improvement Act ("FDICIA").

Management has assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2006 based on criteria described in "Internal Control-Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on that assessment, management concluded that the Company maintained effective internal control over financial reporting as of December 31, 2006.

Perry-Smith LLP, the independent registered public accounting firm that audited the financial statements included in this Annual Report has audited management's assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2006, as stated in their report which follows this report.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Shareholders and Board of Directors
Farmers & Merchants Bancorp
Lodi, California

We have audited the accompanying consolidated balance sheet of Farmers & Merchants Bancorp and subsidiaries (the "Company") as of December 31, 2006 and 2005 and the related consolidated statements of income, changes in shareholders'

equity, comprehensive income and cash flows for the years then ended. We also have audited management's assessment, included in the accompanying Report of Management on Internal Control Over Financial Reporting, that Farmers & Merchants Bancorp and subsidiaries maintained effective internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the "COSO criteria"). The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on these consolidated financial statements, an opinion on management's assessment, and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audits. The consolidated financial statements for the Company for the year ended December 31, 2004 were audited by other auditors whose report, dated March 14, 2005, expressed an unqualified opinion on those financial statements.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audit of financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM
(Continued)

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Management's assessment and our audit of internal control over financial reporting included controls over the Company's preparation of financial statements in accordance with the instructions to the Consolidated Financial Statements for Bank Holding Companies (Form FR Y9C) to comply with the requirements of Section 112 of the Federal Deposit Insurance Corporation Improvement Act (FDICIA). A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any

evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Farmers & Merchants Bancorp and subsidiaries as of December 31, 2006 and 2005 and the related consolidated statements of income, changes in shareholders' equity, comprehensive income and cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, management's assessment that Farmers & Merchants Bancorp and subsidiaries maintained effective internal control over financial reporting as of December 31, 2006, is fairly stated, in all material respects, based on the COSO criteria. Furthermore, in our opinion, Farmers & Merchants Bancorp and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on the COSO criteria.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors
and Stockholders of Farmers & Merchants Bancorp:

In our opinion, the accompanying consolidated statements of income, of changes in shareholders' equity, of comprehensive income and of cash flows present fairly, in all material respects, the result of the operations and the cash flows of Farmers & Merchants Bancorp and its subsidiaries for the year ended December 31, 2004, in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. SIGNIFICANT ACCOUNTING POLICIES

Farmers & Merchants Bancorp (the Company) was organized March 10, 1999. Primary operations are related to traditional banking activities through its subsidiary Farmers & Merchants Bank of Central California (the Bank) which was established in 1916. The Bank's wholly owned subsidiaries include Farmers & Merchants Investment Corporation and Farmers/Merchants Corp. Farmers & Merchants Investment Corporation has been dormant since 1991. Farmers/Merchants Corp. acts as trustee on deeds of trust originated by the Bank.

The Company's other subsidiaries include F & M Bancorp, Inc. and FMCB Statutory Trust I. F & M Bancorp, Inc. was created in March 2002 to protect the name F & M Bank. During 2002, the Company completed a fictitious name filing in California to begin using the streamlined name, "F & M Bank" as part of a larger effort to enhance the Company's image and build brand name recognition. In December 2003, the Company formed a wholly owned subsidiary, FMCB Statutory Trust I. FMCB Statutory Trust I is a non-consolidated subsidiary per generally accepted accounting principles (GAAP), and was formed for the sole purpose of issuing Trust Preferred Securities. The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America and prevailing practice within the banking industry. The following is a summary of the significant accounting and reporting policies used in preparing the consolidated financial statements.

Basis of Presentation

The accompanying consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America for financial information and with the instructions to Form 10-K and Article 9 of Regulation S-X.

The accompanying consolidated financial statements include the accounts of the Company and the Company's wholly owned subsidiaries, F & M Bancorp, Inc. and the Bank, along with the Bank's wholly owned subsidiaries, Farmers & Merchants Investment Corporation and Farmers/Merchants Corp. Significant inter-company transactions have been eliminated in consolidation.

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

Certain amounts in the prior years' financial statements and related footnote disclosures have been reclassified to conform to the current-year presentation. These reclassifications have no effect on previously reported income.

Cash and Cash Equivalents

For purposes of the Consolidated Statement of Cash Flows, the Company has defined cash and cash equivalents as those amounts included in the balance sheet captions Cash and Due from Banks, Federal Funds Sold and Securities Purchased Under Agreements to Resell. Generally, these transactions are for one-day periods. For these instruments, the carrying amount is a reasonable estimate of fair value.

Investment Securities

Investment securities are classified at the time of purchase as held-to-maturity if it is management's intent and the Company has the ability to hold the securities until maturity. These securities are carried at cost, adjusted for amortization of premium and accretion of discount using a level yield of interest over the estimated remaining period until maturity. Losses, reflecting a decline in value judged by the Company to be other than temporary, are recognized in the period in which they occur.

Securities are classified as available-for-sale if it is management's intent, at the time of purchase, to hold the securities for an indefinite period of time and/or to use the securities as part of the Company's asset/liability

management strategy. These securities are reported at fair value with aggregate unrealized gains or losses excluded from income and included as a separate component of shareholders' equity, net of related income taxes. Fair values are based on quoted market prices or broker/dealer price quotations on a specific identification basis. Gains or losses on the sale of these securities are computed using the specific identification method.

Trading securities, if any, are acquired for short-term appreciation and are recorded in a trading portfolio and are carried at fair value, with unrealized gains and losses recorded in non-interest income.

Investment securities are evaluated for impairment on at least a quarterly basis and more frequently when economic or market conditions warrant such an evaluation to determine whether a decline in their value is other than temporary. Management utilizes criteria such as the magnitude and duration of the decline and the intent and ability of the Company to retain its investment in the securities for a period of time sufficient to allow for an anticipated recovery in fair value, in addition to the reasons underlying the decline, to determine whether the loss in value is other than temporary. The term "other than temporary" is not intended to indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value is not necessarily favorable, or that there is a lack of evidence to support a realizable value equal to or greater than the carrying value of the investment. Once a decline in value is determined to be other than temporary, the value of the security is reduced and a corresponding charge to earnings is recognized.

Loans

Loans are reported at the principal amount outstanding net of unearned discounts and deferred loan fees. Interest income on loans is accrued daily on the outstanding balances using the simple interest method. Loan origination fees are deferred and recognized over the contractual life of the loan as an adjustment to the yield. Loans are placed on non-accrual status when the collection of principal or interest is in doubt or when they become past due for 90 days or more unless they are both well-secured and in the process of collection. For this purpose a loan is considered well-secured if it is collateralized by property having a net realizable value in excess of the amount of the loan or is guaranteed by a financially capable party. When a loan is placed on non-accrual status, the accrued and unpaid interest receivable is reversed and charged

against current income; thereafter, interest income is recognized only as it is collected in cash. Loans placed on a non-accrual status are returned to accrual status when the loans are paid current as to principal and interest and future payments are expected to be made in accordance with the contractual terms of the loan.

A loan is impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. When a loan is impaired, the recorded amount of the loan in the Consolidated Balance Sheet is based on the present value of expected future cash flows discounted at the loan's effective interest rate, or the observable or estimated market price of the loan or on the fair value of the collateral if the loan is collateral dependent. Impaired loans are placed on non-accrual status with income reported accordingly. Cash payments are first applied as a reduction of the principal balance until collection of the remaining principal and interest can be reasonably assured. Thereafter, interest income is recognized as it is collected in cash.

Allowance for Loan Losses

As a financial institution which assumes lending and credit risks as a principal element in its business, the Company anticipates that credit losses will be experienced in the normal course of business. Accordingly, the allowance for loan losses is maintained at a level considered adequate by management to provide for losses that are inherent in the portfolio. The allowance is reduced by charge-offs and increased by provisions charged to operating expense and by recoveries on loans previously charged off. Management employs a systematic methodology for determining the allowance for loan losses. On a quarterly basis, management reviews the credit quality of the loan portfolio and considers many factors in determining the adequacy of the allowance at the balance sheet date.

The factors evaluated in connection with the allowance may include existing general economic and business conditions affecting the key lending areas of the Company, current levels of problem loans and delinquencies, credit quality trends, collateral values, loan volumes and concentration, seasoning of the loan portfolio, specific industry conditions, recent loss experience, duration of the current business cycle, bank regulatory examination results and findings of the Company's internal credit examiners.

The allowance also incorporates the results of measuring impaired loans as provided in Statement of Financial Accounting Standards (SFAS) No. 114, "Accounting by Creditors for Impairment of a Loan" and SFAS No. 118, "Accounting by Creditors for Impairment of a Loan-Income Recognition and Disclosures." These accounting standards prescribe the measurement methods, income recognition and disclosures related to impaired loans, which are discussed more fully in Note 4 to these Consolidated Financial Statements.

While the Company utilizes a systematic methodology in determining its allowance, the allowance is based on estimates, and ultimate losses may vary from current estimates. In addition, the Federal Deposit Insurance Corporation and the California Department of Financial Institutions, as an integral part of their examination process, review the allowance for loan losses. These agencies may require additions to the allowance for loan losses based on their judgment about information available at the time of their examinations.

Premises and Equipment

Premises, equipment and leasehold improvements are stated at cost, less accumulated depreciation and amortization. Depreciation is computed principally by the straight line method over the estimated useful lives of the assets. Estimated useful lives of buildings range from 30 to 40 years, and for furniture

and equipment from 3 to 8 years. Leasehold improvements are amortized over the lesser of the terms of the respective leases, or their useful lives, which are generally 5 to 10 years. Remodeling and capital improvements are capitalized while maintenance and repairs are charged directly to occupancy expense.

Other Real Estate

Other real estate, which is included in other assets, is comprised of properties no longer utilized for business operations and property acquired through foreclosure in satisfaction of indebtedness. These properties are recorded at fair value less estimated selling costs upon acquisition. Revised estimates to the fair value less cost to sell are reported as adjustments to the carrying amount of the asset, provided that such adjusted value is not in excess of the carrying amount at acquisition. Initial losses on properties acquired through full or partial satisfaction of debt are treated as credit losses and charged to the Allowance for Loan Losses at the time of acquisition. Subsequent declines in value from the recorded amounts, routine holding costs, and gains or losses upon disposition, if any, are included in non-interest income or expense as incurred.

Income Taxes

The Company uses the liability method of accounting for income taxes. This method results in the recognition of deferred tax assets and liabilities that are reflected at currently enacted income tax rates applicable to the period in which the deferred tax assets or liabilities are expected to be realized or settled. As changes in tax laws or rates are enacted, deferred tax assets and liabilities are adjusted through the provision for income taxes. The deferred provision for income taxes is the result of the net change in the deferred tax asset and deferred tax liability balances during the year. This amount combined with the current taxes payable or refundable results in the income tax expense for the current year.

Dividends and Earnings Per Share

Farmers & Merchants Bancorp common stock is not traded on any exchange. The shares are primarily held by local residents and are not actively traded.

No stock dividend was declared during 2006. The Board of Directors declared a 5% stock dividend in each of the years 2005 and 2004. Common stock shareholders received one share of common stock for every 20 shares of common stock owned. Fractional shares were not issued. For common stock share lots of less than 20 shares, a cash dividend in the amount of $22.62 and $17.15 per share was paid in lieu of the stock dividend for each of the years 2005 and 2004, respectively.

Total cash dividends during 2006 were $6,966,000 or $8.55 per share of common stock, an increase of 11.3% from $6,366,000 or $7.68 per share in 2005. In 2004, cash dividends totaled $5,723,000 or $6.85 per share. Prior periods have been restated where applicable for stock dividends paid.

60

Earnings per share for the years ending December 31, 2006, 2005 and 2004 were $25.25, $22.24 and $19.68, respectively, and were computed by dividing net income by the weighted average number of common shares outstanding for the period. The weighted average number of shares outstanding for the three years ending December 31, 2006, 2005 and 2004 were 817,044, 828,537 and 835,746, respectively. Prior periods have been restated where applicable for stock dividends paid.

Segment Reporting

Statement of Financial Accounting Standards No. 131, "Disclosures about Segments of an Enterprise and Related Information" requires that public companies report certain information about operating segments. It also requires that public companies report certain information about their products and services, the

geographic areas in which they operate, and their major customers. The Company is a holding company for a community bank which offers a wide array of products and services to its customers. Pursuant to its banking strategy, emphasis is placed on building relationships with its customers, as opposed to building specific lines of business. As a result, the Company is not organized around discernable lines of business and prefers to work as an integrated unit to customize solutions for its customers, with business line emphasis and product offerings changing over time as needs and demands change. Therefore, the Company only reports one segment.

Derivative Instruments and Hedging Activities

Statement of Financial Accounting Standards, No. 133, "Accounting for Derivative Instruments and Certain Hedging Activities" as amended by the Statement of Financial Accounting Standards, No. 138, establishes accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities. All derivatives, whether designated in hedging relationships or not, are required to be recorded on the balance sheet at fair value. Changes in the fair value of those derivatives are accounted for depending on the intended use of the derivative and the resulting designation under specified criteria. If the derivative is designated as a fair value hedge, the changes in the fair value of the derivative and of the hedged item attributable to the hedged risk are recognized in earnings. If the derivative is designated as a cash flow hedge, designed to minimize interest rate risk, the effective portions of the change in the fair value of the derivative are recorded in other comprehensive income (loss), net of related income taxes. Ineffective portions of changes in the fair value of cash flow hedges are recognized in earnings.

The Company utilizes derivative financial instruments such as interest rate caps, floors, swaps and collars. These instruments are purchased and/or sold to reduce the Company's exposure to changing interest rates. The Company marks to market the value of its derivative financial instruments and reflects gain or loss in earnings in the period of change or in other comprehensive income (loss). The Company was not utilizing any derivative instruments as of December 31, 2006.

Comprehensive Income

Statement of Financial Accounting Standards No. 130, "Reporting Comprehensive Income" establishes standards for the reporting and display of comprehensive income and its components in the financial statements. Other comprehensive income refers to revenues, expenses, gains and losses that generally accepted accounting principles recognize as changes in value to an enterprise but are excluded from net income. For the Company, comprehensive income (loss) includes net income and changes in fair value of its available-for-sale investment securities, minimum pension liability adjustments and cash flow hedges.

Evaluating the Effects of Potential Misstatements

In September 2006, the SEC ("SEC") issued Staff Accounting Bulletin ("SAB") No. 108 Considering the Effects of Prior Year Misstatements When Quantifying Misstatements in Current Year Financial Statements, which provides interpretive guidance on how registrants should quantify financial statement misstatements. Under SAB 108 registrants are required to consider both a "rollover" method which focuses primarily on the income statement impact of misstatements and the "iron curtain" method which focuses primarily on the balance sheet impact of misstatements. The transition provisions of SAB 108 permit a registrant to adjust retained earnings for the cumulative effect of immaterial errors relating to prior years. The Company was required to adopt SAB 108 in the fourth quarter of 2006.

Historically, the Company evaluated uncorrected differences utilizing the rollover approach. Under SAB 108 management must assess materiality using both the rollover method and the iron-curtain method. The adoption of this accounting standard did not have a material effect on the Company's financial position or results of operations.

2. INVESTMENT SECURITIES

The amortized cost, fair values and unrealized gains and losses of the securities available-for-sale are as follows:
(in thousands)

	Amortized	Gross Unrealized		Fair/Bo
December 31, 2006	Cost	Gains	Losses	Value
Obligations of States and Political Subdivisions	$ 11,224	$ 59	$ 9	$ 11,
Mortgage-Backed Securities	110,568	109	1,292	109,
Other	12,075	-	107	11,
Total	$ 133,867	$ 168	$ 1,408	$ 132,

	Amortized	Gross Unrealized		Fair/Bo
December 31, 2005	Cost	Gains	Losses	Value
Securities of U.S. Government Agencies	$ 30,867	$ -	$ 941	$ 29,
Obligations of States and Political Subdivisions	15,433	170	27	15,
Mortgage-Backed Securities	108,553	-	2,120	106,
Other	6,094	-	-	6,
Total	$ 160,947	$ 170	$ 3,088	$ 158,

Included with the 2006 available-for-sale "Other Securities Fair/Book Value" total of $11.9 million was $7.7 million of FHLB stock. Included with the 2005 available-for-sale "Other Securities Fair/Book Value" total of $6.1 million was $5.8 million of FHLB stock.

The book values, estimated fair values and unrealized gains and losses of investments classified as held-to-maturity are as follows: (in thousands)

	Book	Gross Unrealized		Fair
December 31, 2006	Value	Gains	Losses	Value
Securities of U.S. Government Agencies	$ 30,539	$ -	$ 735	$ 29,
Obligations of States and Political Subdivisions	69,910	319	334	69,
Mortgage-Backed Securities	8,677	-	365	8,
Other	2,114	7	-	2,
Total	$ 111,240	$ 326	$ 1,434	$ 110,

December 31, 2005	Book Value	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Securities of U.S. Government Agencies	$ 30,644	$ -	$ 721	$ 29,
Obligations of States and Political Subdivisions	66,260	151	840	65,
Mortgage-Backed Securities	10,881	-	449	10,
Other	2,126	8	-	2,
Total	$ 109,911	$ 159	$ 2,010	$ 108,

Fair values are based on quoted market prices or dealer quotes. If a quoted market price or dealer quote is not available, fair value is estimated using quoted market prices for similar securities.

The remaining principal maturities of debt securities as of December 31, 2006 and 2005 are shown in the following tables. Mortgage-Backed Securities are presented based on expected maturities. Expected maturities may differ from contractual maturities as borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

62

Total	$ 80,996	$ 736	$82,024	$ 2,106	$163,020	$

	Less Than 12 Months		12 Months or More		Tot	
December 31, 2005 (in thousands)	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	U
Securities of U.S. Government Agencies	$ 25,220	$ 796	$34,629	$ 866	$ 59,849	$
Obligations of States and Political Subdivisions	41,036	465	13,118	402	54,154	
Mortgage-Backed Securities	91,808	1,676	25,057	893	116,865	
Total	$158,064	$ 2,937	$72,804	$ 2,161	$230,868	$

As of December 31, 2006, the Company held 200 investment securities of which 37 were in a loss position for less than twelve months and 48 were in a loss position and had been in a loss position for twelve months or more. Management periodically evaluates each investment security for other than temporary impairment relying primarily

on industry analyst reports and observations of market conditions and interest rate fluctuations. Management believes it will be able to collect all amounts due according to the contractual terms of the underlying investment securities.

Securities of U.S. Government Agencies and Obligations of States and Political Subdivisions

The unrealized losses on the Company's investments in U.S. government agencies and obligations of states and political subdivisions were caused by interest rate increases. The contractual terms of these investments do not permit the issuer to settle the securities at a price less than the amortized cost of the investment. Because the Company has the ability and intent to hold these investments until a recovery of fair value, which may be maturity, the Company does not consider these investments to be other-than-temporarily impaired at December 31, 2006.

Mortgage-Backed Securities

The unrealized losses on the Company's investment in mortgage-backed securities were caused by interest rate increases. The contractual cash flows of these investments are guaranteed by an agency of the U.S. government. Accordingly, it is expected that the securities would not be settled at a price less than the amortized cost of the Company's investment. Because the decline in market value

is attributable to changes in interest rates and not credit quality, and because the Company has the ability and intent to hold these investments until a recovery of fair value, which may be maturity, the Company does not consider these investments to be other-than-temporarily impaired at December 31, 2006.

Marketable Equity Securities (shown in the 2006 table in the "Other" category)
The Company's investment in marketable equity securities consists primarily of investments in common stock. The current fair value is 2.7% less than cost as a result of normal fluctuations in general market conditions. The duration of the unrealized loss is less than 12 months. The Company has the ability and intent to hold these investments until a recovery of fair value and does not consider these investments to be other-than-temporarily impaired at December 31, 2006.

Proceeds from sales of securities available-for-sale were as follows:

(in thousands)	Gross Proceeds	Gross Gains	Gross Losses
2006	$ 63,760	$ 1	$ 2,169
2005	64,635	163	1,116
2004	74,775	1,977	91

As of December 31, 2006, securities carried at $196,459,000 were pledged to secure public deposits, FHLB borrowings and other government agency deposits as required by law. This amount at December 31, 2005 was $150,741,000.

3. LOANS AND ALLOWANCE FOR LOAN LOSSES

Loans as of December 31, consisted of the following:

(in thousands)	2006	2005
Real Estate	$ 516,606	$432,378
Real Estate Construction	95,378	110,235
Home Equity	67,132	69,013
Agricultural	183,589	170,657
Commercial	165,412	174,530
Consumer and Other	21,222	18,958
Subtotal	1,049,339	975,771
Less: Deferred Loan Origination Fees	(2,427)	(2,514)
Total Loans	$1,046,912	$973,257
Non-Performing Loans	$ 54	$ 694

Changes in the allowance for loan losses consisted of the following:
(in thousands)

	2006	2005	2004
Balance, January 1	$17,860	$17,727	$17,220
Provision Charged to Operating Expense	275	425	1,275
Recoveries of Loans Previously Charged Off	803	575	298
Loans Charged Off	(839)	(867)	(955)
Reclassification Adjustment*	-	-	(111)
Balance, December 31	$18,099	$17,860	$17,727

*As of December 31, 2004, the Company reclassified $111,000 of the Allowance for Loan Losses that pertained to commitments under commercial and standby letters of credit to the "Other Liabilities" section of the Consolidated Balance Sheet.

All impaired loans have been assigned a related allowance for credit losses. As of December 31, 2006 and 2005, the total recorded investment in impaired loans was $39,000 and $606,000, respectively. The related allowance for impaired loans was $10,000 and $135,000 for the years ended 2006 and 2005, respectively. The average balance of impaired loans was $250,000, $412,000 and $1.6 million for the years ended 2006, 2005 and 2004, respectively. There was no interest income reported on impaired loans in 2006, 2005 and 2004. Interest income forgone on loans placed on nonaccrual status was $15,000, $50,000 and $30,000 for the years ended December 31, 2006, 2005 and 2004, respectively. A portion of pledged loans totaling $225,569,000 were used to secure Federal Home Loan Bank advances of $46,730,000 and the unused commitments.

4. PREMISES AND EQUIPMENT

Premises and equipment as of December 31, consisted of the following:

(in thousands)	2006	2005
Land and Buildings	$24,248	$22,049
Furniture, Fixtures and Equipment	16,984	16,557
Leasehold Improvements	2,257	1,167
Subtotal	43,489	39,773
Less: Accumulated Depreciation and Amortization	22,993	22,251
Total	$20,496	$17,522

Depreciation and amortization on premises and equipment included in occupancy and equipment expense amounted to $1,892,000, $1,611,000 and $1,574,000 for the years ended December 31, 2006, 2005 and 2004, respectively. Total rental expense for premises was $375,000, $268,000 and $265,000 for the years ended December 31, 2006, 2005 and 2004, respectively. Rental income was $116,000, $109,000 and $115,000 for the years ended December 31, 2006, 2005 and 2004, respectively.

5. OTHER REAL ESTATE

The Bank reported no other real estate at December 31, 2006 and 2005. Other real estate includes property no longer utilized for business operations and property acquired through foreclosure proceedings. These properties are carried at the

lower of cost or fair value less selling costs determined at the date acquired. Losses arising from properties acquired through foreclosure are charged against the allowance for loan losses. Subsequent declines in value, routine holding costs and net gains or losses on disposition are included in other operating expense as incurred.

65

6. TIME DEPOSITS

Time Deposits of $100,000 or more as of December 31, were as follows: (in thousands)

	2006	2005
Balance	$340,287	$207,976

At December 31, 2006, the scheduled maturities of time deposits were as follows:

(in thousands)	Scheduled Maturities
2007	$ 475,938
2008	16,199
2009	5,775
2010	619
2011	961
Total	$ 499,492

7. INCOME TAXES

Current and deferred income tax expense (benefit) provided for the years ended December 31, consisted of the following:

(in thousands)	2006	2005	2004
Current			
Federal	$ 9,443	$ 8,826	$ 8,071
State	3,539	3,278	3,228
Total Current	12,982	12,104	11,299
Deferred			
Federal	(950)	(1,508)	(1,379)
State	(219)	(366)	(458)
Total Deferred	(1,169)	(1,874)	(1,837)

Total Provision for Taxes*	$11,813	$10,230	$ 9,462

*The Provision for Taxes for 2004 includes the $163,000 tax impact associated with the cumulative effect of change in accounting principle shown net of tax on the Consolidated Statement of Income.

The total provision for income taxes differs from the federal statutory rate as follows:
(in thousands)

	2006		2005		2004	
	Amount	Rate	Amount	Rate	Amount	Rate
Tax Provision at Federal Statutory Rate	$11,355	35.0%	$10,030	35.0 %	$ 9,069	35.0 %
Interest on Obligations of States and Political Subdivisions Exempt from Federal Taxation	(1,062)	(3.3)%	(1,081)	(3.7) %	(769)	(3.0)%
State and Local Income Taxes, Net of Federal Income Tax Benefit	2,158	6.7 %	1,893	6.6 %	1,801	6.9 %
Bank Owned Life Insurance	(675)	(2.1)%	(636)	(2.2) %	(645)	(2.5)%
Other, Net	37	0.1%	24	0.0 %	6	0.0 %
Total Provision for Taxes	$11,813	36.4%	$10,230	35.7 %	$ 9,462	36.4 %

The components of the net deferred tax assets as of December 31 are as follows:

(in thousands)	2006	2005
Deferred Tax Assets		
Allowance for Loan Losses	$ 7,670	$ 7,569
Accrued Liabilities	2,214	1,650
Deferred Compensation	3,372	2,335
State Franchise Tax	1,249	1,147
Unrealized Losses on Securities Available-for-Sale	522	708
Interest on Non-Accrual Loans	6	255
Total Deferred Tax Assets	$15,033	$13,664
Deferred Tax Liabilities		
Premises and Equipment	$ (444)	$ (427)
Securities Accretion (zero coupon securities)	(877)	(572)
Other	(510)	(446)
Total Deferred Tax Liabilities	(1,831)	(1,445)
Net Deferred Tax Assets	$13,202	$12,219

The net deferred tax assets are reported in Interest Receivable and Other Assets on the Company's Consolidated Balance Sheet.

8. SHORT TERM BORROWINGS

As of December 31, 2006 and 2005, the Company had unused lines of credit available for short term liquidity purposes of $405 million and $346 million, respectively. Federal Funds purchased and advances from the Federal Reserve Bank are generally issued on an overnight basis. There were no Federal Funds purchased at December 31, 2006 and $650,000 at December 31, 2005.

9. FEDERAL HOME LOAN BANK ADVANCES

The Company's advances from the Federal Home Loan Bank of San Francisco consist of the following as of December 31,

(in thousands)	200
5.35% note payable due February 4, 2008 with interest due quarterly, callable February 2, 2003 and quarterly thereafter.	$
5.38% note payable due August 12, 2008 with interest due quarterly, callable August 12, 2003 and quarterly thereafter.	
5.60% amortizing note, interest and principal payable monthly with final maturity of September 25, 2018.	
4.28% fixed rate credit advance, interest payable weekly with a maturity of January 4, 2008*	
5.38% fixed rate credit advance, interest payable at month end and maturity of January 11, 2007	25,
5.34% fixed rate credit advance, interest payable daily with a maturity of January 2, 2007	21,
Total	$47,

*While this borrowing had a maturity in 2008, the Company prepaid it in 2006.

In accordance with the Collateral Pledge and Security Agreement, advances are secured by all Federal Home Loan Bank stock held by the Company and by agency and mortgage-backed securities, with carrying values of $1,840,000.

67

A portion of pledged loans totaling $225,569,000 were used to secure Federal Home Loan Bank advances of $46,730,000 and the unused commitments.

10. SHAREHOLDERS' EQUITY

From 1975 through 2005, the Company issued an annual 5% stock dividend. In 2006 the stock dividend was discontinued. Earnings and cash dividends per share amounts have been restated where applicable for stock dividends.

During the second quarter of 2004, the Board of Directors of Farmers & Merchants Bancorp approved a resolution authorizing the repurchase, from time to time, of outstanding shares of the common stock of the Company. Repurchases will be made on the open market or through private transactions. When the Company repurchases shares in private transactions the price is determined based upon the most recent transactions that have occurred between third party shareholders. This repurchase program was announced in a press release dated June 21, 2004. The aggregate price to be paid by the Company for all repurchased stock will not

exceed $10,000,000 and the program will expire on May 31, 2007. On April 4, 2006, the Board unanimously approved expanding the repurchase program to allow the repurchase of up to $15 million of stock between May 1, 2006 and April 30, 2009.Repurchases under the program will continue to be made on the open market or through private transactions. The repurchase program also requires that no purchases may be made if the Bank would not remain "well-capitalized" after the repurchase. All shares repurchased under the repurchase program will be retired.

Dividends from the Bank constitute the principal source of cash to the Company. The Company is a legal entity separate and distinct from the Bank. Under regulations controlling California state chartered banks, the Bank is, to some extent, limited in the amount of dividends that can be paid to shareholders without prior approval of the California Department of Financial Institutions. These regulations require approval if total dividends declared by a state chartered bank in any calendar year exceed the bank's net profits for that year combined with its retained net profits for the preceding two calendar years. As of December 31, 2006, the Bank could declare dividends of $19,376,000 without approval of the California Department of Financial Institutions.

The Company and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory, and possibly discretionary, actions by regulators that, if undertaken, could have a direct material effect on the Company and the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of the Company and the Bank's assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Company and the Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios set forth in the following table of Total and Tier 1 capital to risk-weighted assets (as defined in the regulations), and of Tier 1 capital to average assets (as defined in the regulations). Management believes, as of December 31, 2006, that the Company and the Bank meet all capital adequacy requirements to which they are subject.

In addition, the most recent notification from the FDIC categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the following tables. There are no conditions or events since that notification that management believes have changed the Bank's category.

68

(in thousands)	Actual		Regulatory Capi Requirements	
December 31, 2006	Amount	Ratio	Amount	Ra
Total Bank Capital to Risk Weighted Assets	$ 152,118	11.69%	$ 104,101	
Total Consolidated Capital to Risk Weighted Assets	$ 159,336	12.17%	$ 104,698	
Tier 1 Bank Capital to Risk Weighted Assets	$ 135,827	10.44%	$ 52,051	

	Amount	Ratio	Amount	Ra
Tier 1 Consolidated Capital to Risk Weighted Assets	$ 142,954	10.92%	$ 52,349	
Tier 1 Bank Capital to Average Assets	$ 135,827	9.93%	$ 54,736	
Tier 1 Consolidated Capital to Average Assets	$ 142,954	10.40%	$ 54,979	

December 31, 2005	Amount	Ratio	Amount	Ra
Total Bank Capital to Risk Weighted Assets	$ 148,139	12.14%	$ 97,606	
Total Consolidated Capital to Risk Weighted Assets	$ 150,648	12.32%	$ 97,805	
Tier 1 Bank Capital to Risk Weighted Assets	$ 132,854	10.89%	$ 48,803	
Tier 1 Consolidated Capital to Risk Weighted Assets	$ 135,333	11.07%	$ 48,903	
Tier 1 Bank Capital to Average Assets	$ 132,854	10.25%	$ 51,852	
Tier 1 Consolidated Capital to Average Assets	$ 135,333	10.42%	$ 51,936	

11. EMPLOYEE BENEFIT PLANS

Pension Plan

The Company, through the Bank, sponsored a defined benefit Pension Plan (the Plan) that covered substantially all full-time employees of the Company. Effective June 9, 2001 the Plan was amended to freeze the benefit accruals in the Plan. With the exception of employees who had reached age 55 and who had accumulated 10 years of Plan service, the effect of the amendment was to freeze the participants' monthly pension benefit.

In February 2005 the Board of Directors terminated the Plan. Benefits for those employees who were still accruing benefits under the Plan were frozen on April 30, 2005 when the Plan was amended to halt all future benefit accruals. Those employees now participate in the mandatory contributions to the Company's Profit Sharing Plan.

The Company filed Form 500, Standard Termination Notice for Single Employer Plan, with the Pension Benefit Guaranty Corporation (the "PBGC") on October 21, 2005. The Company did not receive a Notice of Noncompliance from the PBGC within sixty days, so it distributed all benefits to all participants prior to December 31, 2005.

The Company filed Form 5310, Application for Determination of Terminating Plan, with the Internal Revenue Service on September 22, 2005. The Company received a favorable determination letter from the Internal Revenue Service on June 19, 2006.

Because of the Company's decision to terminate the Plan in 2005, it elected to accelerate the recognition of gain/loss over a two year amortization period effective January 1, 2004, to match the remaining life of the Plan. This change in amortization period resulted in a cumulative adjustment in the amount of $387,000 ($224,000, net of tax).

The following schedule states the change in benefit obligations for the year ended December 31, 2005.

(in thousands)	2005
Benefit Obligation at Beginning of Year	$ 5,508
Service Cost	53
Interest Cost	258
Benefits Paid	(767)
Increase Due to Actuarial Loss and Assumption Change	320
Settlement Payments	(5,372)

Total Benefit Obligation at End of Year	$ -

69

The Change in Plan Assets are as follows:(in thousands)	2005
Fair Value of Plan Assets at Beginning of Year	$ 4,080
Employer Contribution	1,945
Benefits Paid	(6,139)
Actual Return on Plan Assets	114
Total Fair Value of Plan Assets at End of Year	$ -

The components of the net periodic benefit costs are as follows:

(in thousands)	2005	2004
Service Cost	$ 53	$ 47
Interest Cost	258	255
Expected Return on Plan Assets	(114)	(114)
Amortization of :		
Unrecognized Prior Service Cost	-	-
Unrecognized Net Loss	947	1,569
Total Net Periodic Benefit Cost	$ 1,144	$ 1,757
One-Time Charge Due to Plan Termination	1,229	-
Total Net Periodic Benefit Cost	$ 2,373	$ 1,757
(Decrease) /Increase in Minimum Liability Included in Other Comprehensive Income	$(1,756)	$(1,674)

Weighted-average assumptions used to determine benefit obligations at December 31, 2005.

	2005
Assumptions Used in the Accounting were:	
Discount Rate (Settlement Rate)	4.89%
Rate of Compensation Increase	4.00%

Weighted-average assumptions used to determine net benefit cost for years ended December 31,

	2005	2004

Assumptions Used in the Accounting were:		
Discount Rate (Settlement Rate)	4.89%	5.12%
Expected Return on Plan Assets	3.00%	3.00%
Rate of Compensation Increase	4.00%	4.00%

The Company's Pension Plan had no weighted-average assets for the year ended December 31, 2006 and the weighted-average asset allocation for the year ended December 31, 2005, by asset category was 91% in savings deposits and 9% in other deposits.

Profit Sharing Plan

The Company, through the Bank, sponsors a Profit Sharing Plan for substantially all full-time employees of the Company with one or more years of service. Participants receive up to two annual employer contributions, one is discretionary and the other is mandatory. The discretionary contributions to the Profit Sharing Plan are determined annually by the Board of Directors. The discretionary contributions totaled $775,000, $725,000 and $660,000 for the years ended December 31, 2006, 2005 and 2004, respectively. The mandatory contributions to the Profit Sharing Plan are made according to a predetermined set of criteria. Mandatory contributions totaled $727,000, $693,000 and $645,000 for the years ended December 31, 2006, 2005 and 2004, respectively. Company employees are permitted, within limitations imposed by tax law, to make pretax contributions to the 401(k) feature of the Profit Sharing Plan. The Company does not match employee contributions within the 401(k) feature of the Profit Sharing Plan and the

70

Company can terminate the Profit Sharing Plan at any time. Benefits pursuant to the Profit Sharing Plan vest 0% during the first year of participation, 25% per full year thereafter and after five years such benefits are fully vested.

Indexed Retirement Plan and Life Insurance Arrangements

The Company, through the Bank, sponsors an Indexed Retirement Plan for certain employees. The Indexed Retirement Plan is a defined contribution supplemental executive retirement plan and was developed to supplement the Company's Profit Sharing Plan which, as a qualified plan, has a ceiling on benefits as set by the Internal Revenue Service.

The Company made contributions to the Indexed Retirement Plan of $856,000, $802,000 and $751,000 for the years ended December 31, 2006, 2005 and 2004, respectively. The Company's total accrued liability under the Indexed Retirement Plan was $2.83 million and $1.94 million as of December 31, 2006 and 2005, respectively. The balance in each participant's account is 0% vested during the first five years of employment and becomes fully vested after five years of employment.

The Company has purchased single premium life insurance policies on the lives of the Indexed Retirement Plan participants as well as certain other employees of the Company. These policies provide: (1) financial protection to the Company in the event of the death of a key employee and; (2) since the interest earned on the cash surrender value of the policies is tax exempt as long as the policies are used to finance employee benefits, significant income to the Company to offset the expense associated with the Indexed Retirement Plan and other employee benefit plans. As compensation to each employee for agreeing to allow the Company to purchase an insurance policy on his or her life, split dollar agreements have been entered into with those employees. These agreements provide for a division of the life insurance death proceeds between the Company and each

employee's designated beneficiary or beneficiaries.

The Company earned tax exempt interest on the life insurance policies of $1.6 million for each of the years ended December 31, 2006, 2005 and 2004. As of December 31, 2006 and 2005, the total cash surrender value of the insurance policies was $38.4 million and $36.8 million, respectively.

Deferred Bonus and Executive Retention Plans
The Company, through the Bank, sponsors Deferred Bonus and Executive Retention Plans for certain employees. Both plans grant bonuses based on the long-term cumulative profitability and increase in market value of the Company. The Company made contributions to both plans of $1.4 million, $966,000 and $248,000 for the years ended December 31, 2006, 2005 and 2004, respectively. Benefits pursuant to the Deferred Bonus Plan vest 0% during the first year of participation, 25% per full year thereafter and after five years such benefits are fully vested. Benefits pursuant to the Executive Retention Plan vest 10% per year beginning in 2005 and after ten years are fully vested. The Company's total accrued liability under the Deferred Bonus and Executive Retention Plans was $3.6 million and $2.1 million as of December 31, 2006 and 2005, respectively.

12. FAIR VALUE OF FINANCIAL INSTRUMENTS

The following disclosure of the estimated fair value of financial instruments is made in accordance with the requirements of SFAS No. 107, "Disclosure about Fair Value of Financial Instruments." The estimated fair value amounts have been determined by the Company using available market information and appropriate valuation methodologies. The use of assumptions and various valuation techniques, as well as the absence of secondary markets for certain financial instruments, will likely reduce the comparability of fair value disclosures between financial institutions. In some cases, book value is a reasonable estimate of fair value due to the relatively short period of time between origination of the instrument and its expected realization.

The following table summarized the book value and estimated fair value of financial instruments as of December 31:

	2006		2005	
ASSETS:(in thousands)	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimate Fair Valu
Cash and Cash Equivalents	$ 47,006	$ 47,006	$ 50,669	$ 50,6
Investment Securities Held-to-Maturity	111,240	110,132	109,911	108,0
Investment Securities Available-for-Sale	132,627	132,627	158,029	158,0
Loans, Net of Deferred Loan Origination Fees	1,046,912	1,025,363	973,257	971,7
Cash Surrender Value of Life Insurance Policies	38,444	38,444	36,799	36,7
Accrued Interest Receivable	8,537	8,537	7,880	7,8
LIABILITIES:				
Deposits:				
Non-Interest Bearing	295,142	295,142	325,745	325,7
Interest-Bearing	903,386	902,019	777,595	707,8
Federal Funds Purchased	-	-	650	6
Federal Home Loan Bank Advances	47,532	47,555	98,847	99,5
Subordinated Debentures	10,310	10,281	10,310	10,3
Accrued Interest Payable	3,897	3,897	2,133	2,1

The methods and assumptions used to estimate the fair value of each class of financial instrument listed in the table above are explained below.

Cash and Cash Equivalents: The carrying amounts reported in the balance sheet for cash and due from banks and federal funds sold are a reasonable estimate of fair value.

Investment Securities: Fair values for investment securities are based on quoted market prices, where available. If quoted market prices are not available, fair values are based on quoted market prices of comparable instruments.

Loans: For variable-rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values. The fair values for fixed-rate loans are estimated using discounted cash flow analyses, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. The carrying amount of accrued interest receivable approximates its fair value.

Cash Surrender Value of Life Insurance Policies: The fair value of life insurance policies are based on cash surrender values at each reporting date as provided by the insurers.

Deposit Liabilities: The fair value of demand deposits, interest bearing transaction accounts and savings accounts is the amount payable on demand. The fair value of fixed-maturity certificates of deposit is estimated by discounting expected future cash flows utilizing interest rates currently being offered for deposits of similar remaining maturities. The carrying amount of accrued interest payable approximates its fair value.

Borrowings: The fair value of federal funds purchased and other short-term borrowings is approximated by the book value. The fair value for Federal Home Loan Bank borrowings is determined using discounted future cash flows.

Subordinated Debentures: Fair values of subordinated debentures were determined based on the current market value of like-kind instruments of a similar maturity and structure.

Limitations: Fair value estimates presented herein are based on pertinent information available to management as of December 31, 2006 and 2005. Although management is not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued for purposes of these financial statements since that date, and therefore, current estimates of fair value may differ significantly from the amounts presented above.

72

13. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company uses derivative instruments to limit its exposure to changes in interest rates. The Company has developed a Hedging Policy to provide guidelines that address instruments to be used, authority limits, implementation guidelines, guidelines for evaluating hedge alternatives, reporting requirements, and the credit worthiness of the instrument's counterparty.

The Company reviews compliance with these guidelines annually with the ALCO Committee and the Board of Directors. The guidelines may change as the Company's business needs dictate.

In January of 2004, the Company terminated an interest rate swap agreement with a notional amount of $12 million and maturity of December 8, 2006. As a result

of this termination, the Company recorded a deferred gain of $112,500 to be amortized over the original remaining life of the interest rate swap as follows: $37,500 in 2004, $37,500 in 2005 and $37,500 in 2006.

As required, the Company records in the balance sheet the interest rate swaps at fair value. Because the transactions meet the criteria for a cash-flow hedge, changes in fair value are reported in other comprehensive income (loss). In the event that a portion of the hedge becomes ineffective, the ineffective portion of the derivative's change in fair value will be immediately recognized in earnings.

14. COMMITMENTS AND CONTINGENCIES

In the normal course of business, the Company is a party to financial instruments with off-balance sheet risk to meet the financing needs of its customers and to reduce its own exposure to fluctuations in interest rates. These instruments include commitments to extend credit, letters of credit and financial guarantees that are not reflected in the Consolidated Balance Sheet.

The Company's exposure to credit loss in the event of nonperformance by the other party with regard to standby letters of credit, undisbursed loan commitments and financial guarantees is represented by the contractual notional amount of those instruments. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. The Company uses the same credit policies in making commitments and conditional obligations as it does for recorded balance sheet items. The Company may or may not require collateral or other security to support financial instruments with credit risk. Evaluations of each customer's creditworthiness are performed on a case-by-case basis.

Standby letters of credit are conditional commitments issued by the Company to guarantee performance of or payment for a customer to a third party. The Company had standby letters of credit outstanding of $10,929,000 at December 31, 2006, and $11,541,000 at December 31, 2005. Outstanding standby letters of credit had original terms ranging from 1 to 34 months with final expiration in 2009. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Undisbursed loan commitments totaled $442,544,000 and $447,685,000 as of December 31, 2006 and 2005, respectively. Since many of these commitments are expected to expire without fully being drawn upon, the total commitment amounts do not necessarily represent future cash requirements.

The Company is obligated under a number of noncancellable operating leases for premises and equipment used for banking purposes. Minimum future rental commitments under noncancellable operating leases as of December 31, 2006 were $475,000, $353,000, $353,000, $310,000, and $269,000 for the years 2007 to 2011 and $860,000 thereafter.

In the ordinary course of business, the Company becomes involved in litigation arising out of its normal business activities. Management, after consultation with legal counsel, believes that the ultimate liability, if any, resulting from the disposition of such claims would not be material in relation to the financial position of the Company.

The Company may be required to maintain average reserves on deposit with the Federal Reserve Bank primarily based on deposits outstanding. There were no reserve requirements during 2006 or 2005.

15. RECENT ACCOUNTING DEVELOPMENTS

In June 2006, FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes - an Interpretation of FASB Statement 109 (FIN 48). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements in accordance with FASB Statement No. 109, Accounting for Income Taxes. FIN 48 also prescribes a recognition threshold and measurement standard for the financial statement recognition and measurement of an income tax position taken or expected to be taken in a tax return. In addition, FIN 48 provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition.

The Company presently recognizes income tax positions based on management's estimate of whether it is reasonably possible that a liability has been incurred for unrecognized income tax benefits by applying FASB Statement No. 5, Accounting for Contingencies. The provisions of FIN 48 will be effective for the Company on January 1, 2007 and are to be applied to all tax positions upon initial application of this standard. Only tax positions that meet the more-likely-than-not recognition threshold at the effective date may be recognized or continue to be recognized upon adoption. The cumulative effect of applying the provisions of FIN 48 will be reported as an adjustment to the opening balance of retained earnings for the fiscal year of adoption. Management does not expect the adoption of FIN 48 to have a material impact on the Company's financial position or results of operations.

In September 2006, the FASB issued Statement No. 157 (SFAS 157), "Fair Value Measurements." SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS 157 applies whenever other standards require (or permit) assets or liabilities to be measured at fair value but does not expand the use of fair value in any new circumstances. In this standard, the FASB clarifies the principle that fair value should be based on the assumptions market participants would use when pricing the asset or liability. In support of this principle, SFAS 157 establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. The provisions of SFAS 157 are effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. Management is in the process of evaluating the impact the adoption of SFAS 157 will have on the results of operations.

In September 2006, the FASB ratified the consensuses reached by the Emerging Issues Task Force (the Task Force) on Issue No. 06-5 (EITF 06-5) "Accounting for the Purchases of Life Insurance - Determining the Amount that Could be Realized in Accordance with FASB Technical Bulletin No.85-4" (FTB 85-4). FTB 85-4 indicates that the amount of the asset included in the balance sheet for life insurance contracts within its scope should be "the amount that could be realized under the insurance contract as of the date of the statement of financial position." Questions arose in applying the guidance in FTB 85-4 to whether "the amount that could be realized" should consider 1) any additional amounts included in the contractual terms of the insurance policy other than the cash surrender value and 2) the contractual ability to surrender all of the individual-life policies (or certificates in a group policy) at the same time. EITF 06-5 determined that "the amount that could be realized" should 1) consider any additional amounts included in the contractual terms of the policy and 2) assume the surrender of an individual-life by individual-life policy (or certificate by certificate in a group policy. Any amount that is ultimately realized by the policy holder upon the assumed surrender of the final policy (or final certificate in a group policy) shall be included in the "amount that could be realized." An entity should apply the provisions of EITF 06-5 through either a change in accounting principle through a cumulative-effect adjustment to retained earnings as of the beginning of the year of adoption or a change in accounting principle through retrospective application to all prior periods. The provisions of EITF 06-5 are effective for fiscal years beginning after December

15, 2006. Management is in the process of evaluating the impact the adoption of EITF 06-5 will have on the results of operations.

In September 2006, the FASB ratified the consensuses reached by the Task Force on Issue No. 06-4 (EITF 06-4) "Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements." A question arose when an employer enters into an endorsement split-dollar life insurance arrangement related to whether the employer should recognize a liability for the future benefits or premiums to be provided to the employee. EITF 06-4 indicates that an employer should recognize a liability for future benefits and that a liability for the benefit obligation has not been settled through the purchase of an endorsement type policy. An entity should apply the provisions of EITF 06-4 either through a change in accounting principle through a cumulative-effect adjustment to retained earnings as of the beginning of the year of adoption or a change in accounting principle through retrospective application to all prior periods. The provisions of EITF 06-4 are effective

74

for fiscal years beginning after December 15, 2007. Management is in the process of evaluating the impact the adoption of EITF 06-4 will have on the results of operations.

17. LONG-TERM SUBORDINATED DEBENTURES

In December 2003, the Company formed a wholly owned Connecticut statutory business trust, FMCB Statutory Trust I ("Statutory Trust I"), which issued $10,000,000 of guaranteed preferred beneficial interests in the Company's junior

subordinated deferrable interest debentures (the "Trust Preferred Securities"). These debentures qualify as Tier 1 capital under Federal Reserve Board guidelines. All of the common securities of Statutory Trust I are owned by the Company. The proceeds from the issuance of the common securities and the Trust Preferred Securities were used by FMCB Statutory Trust to purchase $10,310,000 of junior subordinated debentures of the Company, which carry a floating rate based on three-month LIBOR plus 2.85%. The debentures represent the sole asset of Statutory Trust I. The Trust Preferred Securities accrue and pay distributions at a floating rate of three-month LIBOR plus 2.85% per annum of the stated liquidation value of $1,000 per capital security. The Company has entered into contractual arrangements which, taken collectively, fully and unconditionally guarantee payment of: (i) accrued and unpaid distributions required to be paid on the Trust Preferred Securities; (ii) the redemption price with respect to any Trust Preferred Securities called for redemption by Statutory Trust I; and (iii) payments due upon a voluntary or involuntary dissolution, winding up or liquidation of Statutory Trust I. The Trust Preferred Securities are mandatorily redeemable upon maturity of the subordinated debentures on December 17, 2033, or upon earlier redemption as provided in the indenture. The Company has the right to redeem the subordinated debentures purchased by Statutory Trust I, in whole or in part, on or after December 17, 2008. As specified in the indenture, if the subordinated debentures are redeemed prior to maturity, the redemption price will be the principal amount and any accrued but unpaid interest. Additionally, if the Company decided to defer interest on the subordinated debentures, the Company would be prohibited from paying cash dividends on the Company's common stock.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None

ITEM 9A. CONTROLS AND PROCEDURES

The Company maintains controls and procedures designed to ensure that all relevant information is recorded and reported in all filings of financial reports. Such information is reported to the Company's management, including its Chief Executive Officer and its Chief Financial Officer to allow timely and accurate disclosure based on the definition of "disclosure controls and procedures" in Rule 13a-15(e). In designing these controls and procedures, management recognizes that they can only provide reasonable assurance of achieving the desired control objectives. Management also evaluated the cost-benefit relationship of possible controls and procedures.

Under the supervision and with the participation of management, including the Company's Chief Executive Officer and Chief Financial Officer, the Company conducted an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2006 based on the framework in "Internal Control - Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based upon that evaluation, management concluded that our internal control over financial reporting was effective as of December 31, 2006.

There have been no significant changes in the Company's internal controls or in other factors that could significantly affect the internal controls subsequent to the date the Company completed its evaluation.

Management's report on internal control over financial reporting is set forth on page 49 in "Item 8. Financial Statements and Supplementary Data," and is incorporated herein by reference. Management's assessment of the effectiveness

of the Company's internal control over financial reporting has been audited by Perry-Smith LLP, the independent registered public accounting firm that audited the Company's 2006 Consolidated Financial Statements, as stated in its report, which is set forth on page 50 in "Item 8. Financial Statements and Supplementary Data," and is incorporated herein by reference.

ITEM 9B. OTHER INFORMATION

None
