SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2009

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the transition period from.....to.....
Commission file number 0-8460

PORTA SYSTEMS CORP.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

11-2203988
(I.R.S. Employer
Identification No.)

6851 Jericho Turnpike, Suite 170, Syosset, New York 11791
(Address of principal executive offices, including ZIP Code)

516-364-9300
(Company's telephone number, including area code)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days
Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No.

Indicate by a check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer, see definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of Exchange Act. Check one:
Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by a check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock as of the latest practicable date:

Common stock (par value \$0.01) 9,954,569 shares as of May 8, 2009.

PORTA SYSTEMS CORP. AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1: Management's Responsibility for Interim Financial Statements Including All Adjustments Necessary for Fair Presentation

Management acknowledges its responsibility for the preparation of the accompanying interim consolidated financial statements which reflect all adjustments, consisting of normal recurring adjustments, considered necessary in its opinion for a fair presentation of its consolidated financial position and the results of its operations for the interim period presented. These consolidated financial statements should be read in conjunction with the summary of significant accounting policies and notes to consolidated financial statements included in the Company's Form 10-K annual report for the year ended December 31, 2008. These financial statements have been prepared assuming that the Company will continue as a going concern and, accordingly, do not include any adjustments that might result from the outcome of the uncertainties described in the financial statements. The audit opinion included in the December 31, 2008 Form 10-K annual report contained an explanatory paragraph regarding the Company's ability to continue as a going concern. The factors which resulted in the explanatory paragraph are continuing. Results for the first quarter of 2009 are not necessarily indicative of results for the year. Certain reclassifications have been made to the prior consolidated financial statements to conform to the current year presentation.

On July 31, 2008, the Company amended its certificate of incorporation to effect a one-for-11.11 reverse split pursuant to which each share of common stock was converted into 0.0900090009 shares of common stock. Neither the par value nor the number of authorized shares was changed as a result of the reverse split. The financial statements give retroactive effect to the reverse split.

Note 2: Inventories

Inventories are stated at the lower of cost (on the average or first-in, first-out method) or market. The composition of inventories at the end of the respective periods is as follows (net of reserve of \$1,849,000 for March 31, 2009 and \$1,876,000 for December 31, 2008):

	March 31, 2009	December 31, 2008
Parts and components	\$ 4,227,000	\$ 3,735,000
Work-in-process	947,000	1,176,000
Finished goods	1,097,000	1,199,000
	\$ 6,271,000	\$ 6,110,000

Note 3: Senior and Subordinated Debt

The following table sets forth information as to the Company's senior and subordinated debt as of March 31, 2009 and December 31, 2008. The senior debt and the subordinated notes were issued as part of a troubled debt restructuring during the third quarter of 2008, and, accordingly, the amounts shown for that debt includes interest accrued through the stated maturity dates of the respective notes. The convertible debentures were not changed as a result of the troubled debt restructuring. On January 1, 2009, the payment schedules for the senior notes were revised and extended. This revision is treated as a troubled debt restructuring. As the modification of terms did not reduce the future cash payments below the carrying amount of the liability, only the additional interest resulting from the revised payment schedule is treated as a current period cost.

	March 31, 2009	December 31, 2008
12.5% senior note in installments through September 30, 2016, including interest of \$6,165,000 at March 31, 2009 and December 31, 2008 (1)(2)	\$ 17,766,000	\$ 17,766,000
Floating rate working capital senior note, including interest of \$9,000 at March 31, 2009 and \$54,000 at December 31, 2008 (1)(3)	1,554,000	1,790,000
10% Subordinated notes due in installments through January 31, 2016, including interest of \$1,169,000 at March 31, 2009 and \$1,256,000 at December 31, 2008 (4)	2,911,000	2,958,000
Subordinated debentures (5)	385,000	385,000

- (1) The senior debt is secured by a security interest in substantially all of the Company's and its subsidiaries' assets.
- (2) This note initially provided for a maturity of March 31, 2015 with scheduled amortization payments over the term of the note. As a result of a January 1, 2009 modification, the maturity date and the payment schedule was revised. At March 31, 2009, the note provides for twelve quarterly installments each in the amount of \$375,000, with the first payment of principal and interest being due on June 30, 2010, followed by 13 quarterly installments of principal and interest each in the amount of \$500,000, with a final payment of all remaining principal and accrued interest on September 30, 2016. Payments are applied first to accrued interest and any remainder to principal.
- (3) These notes bear interest at the six-month LIBOR rate plus 10% per annum, which was 11.7% per annum at March 31, 2009 and December 31, 2008. On January 1, 2009, the terms of this note were modified to provide for monthly payments of \$125,000, with a final payment of the remaining principal and interest on April 30, 2010. Payments are applied first to accrued interest and any remainder to principal. During the first quarter of 2009, the Company made payments of \$250,000, of which \$60,000 was interest and \$190,000 was principal. (See Note 8-Subsequent Event)
- (4) These notes will be repaid based upon a 25-year amortization schedule and mature January 31, 2016.
- (5) At March 31, 2009 and December 31, 2008, accrued interest, was \$335,000 and \$326,000, respectively, and is included in other accrued interest payable. The trustee of the debentures gave notice to the Company that the non-payment caused an event of default. The convertibility feature associated with the debentures expired upon their stated maturity date, which was July 1, 2002. The holder of the senior debt precluded the Company from making payments on the debentures, except that, pursuant to the debt restructuring, the Company offered the holders of the debentures the right to exchange their debentures for their proportionate shares of (a) subordinated notes in the principal amount of \$100,000 and (b) 100,546 shares of common stock, and the Company may make the payments provided in the new notes. As of March 31, 2009, no holders of the debentures had accepted the Company's offer.

The holder of the senior debt has no obligation to make any further loans or modification of the loans to the Company. Any adverse events, including declines in business, could cause a default on the debt and could affect the decision of the senior debt holder to extend or demand payment. If the senior debt holder demands payment of all or a significant portion of the senior debt when due, the Company will not be able to continue in business, and it is likely that it would seek protection under the Bankruptcy Code.

Note 4: Accounting for Stock Based Compensation

Edgar Filing: PORTA SYSTEMS CORP - Form 10-Q

For the three months ended March 31, 2009 and 2008, the Company did not grant any stock options and, therefore did not recognize non-cash compensation expense attributable to stock options granted during the quarter. The Company uses the Black-Scholes valuation model and straight-line amortization of compensation expense over the requisite service period when granting stock options. All options previously granted are fully vested.

Page 5 of 19

Note 5: Segment Data

The Company develops, designs, manufactures and markets a range of standard and proprietary telecommunications equipment for sale domestically and internationally. Our core products, focused on ensuring communications for service providers worldwide, fall principally into two categories:

Voice and Data Connection and Protection Equipment. These products, which we refer to as our connection /protection equipment, are used to connect copper wire lines, automated digital subscriber lines (“ADSL”), wireless networks, fiber connection/protection lines (“FTTX”), and security networks, and to protect equipment from voltage surges. We market our connection and protection products to telephone operating companies, customer premise providers and installers and security providers and installers throughout the world.

Signal Processing Equipment. Signal processing products are sold principally for use in defense and aerospace applications and support copper wire-based communications systems. Our signal processing products provide network infrastructure in data-transmission applications. Customers for signal processing equipment are major aircraft, naval ship and ground-based vehicle manufacturers, as well as their systems integrators.

The factors used to determine the segments focused primarily on the types of products and services provided, and the type of customer served. Each of these segments is managed separately from the others, and management evaluates segment performance based on operating income.

There has been no significant change, from December 31, 2008, in the basis of measurement of segment revenues and profit or loss, and no significant change in the Company’s assets for the connection /protection and Signal reporting segments.

	Three Months Ended	
	March 31, 2009	March 31, 2008
Sales:		
Connection /protection	\$ 6,220,000	\$ 5,392,000
Signal	1,433,000	1,153,000
Total	\$ 7,653,000	\$ 6,545,000
Segment profit from operations:		
Connection/protection	\$ 471,000	\$ 447,000
Signal	471,000	241,000
Total	\$ 942,000	\$ 688,000

The following table reconciles segment totals to consolidated totals:

Operating income:		
Total segment income for reportable segments	\$ 942,000	\$ 688,000
Corporate and unallocated	(648,000)	(617,000)
Consolidated total operating income	\$ 294,000	\$ 71,000

Note 6: New Accounting Standards

The terms “SFAS” and “FASB” used in these notes refer to Statements of Financial Accounting Standards issued by the United States Financial Accounting Standards Board.

SFAS No. 157 — In September 2006, the Financial Accounting Standards Board issued SFAS No. 157, Fair Value Measurements, which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. In February 2008, the FASB issued Staff Position FAS 157-2, Effective Date of FASB Statement No. 157, which delayed the effective date of SFAS No. 157 for all non-financial assets and non-financial liabilities, except those that are measured at fair value on a recurring basis. Effective January 1, 2009, we adopted SFAS No. 157 with respect to non-financial assets and liabilities measured on a non-recurring basis. The application of the fair value framework established by SFAS No. 157 to these fair value measurements did not have a material impact on our consolidated financial position, results of operations or cash flow.

SFAS No. 141(R) — In December 2007, the FASB issued SFAS No. 141 (revised 2007), Business Combinations, which establishes principles for how the acquirer recognizes and measures in the financial statements the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the acquiree. This statement also provides guidance for recognizing and measuring the goodwill acquired in the business combination and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. Effective January 1, 2009, we adopted SFAS No. 141(R) which did not have a material impact on our consolidated financial statements.

SFAS No. 160 — In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements — an amendment of ARB No. 51, which establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. The standard also establishes that a noncontrolling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements. We adopted SFAS No. 160 on January 1, 2009. The adoption of SFAS No. 160 did not have a material impact on our consolidated financial statements.

In June 2008, the EITF reached a consensus in Issue No. 07-5, “Determining Whether an Instrument (or Embedded Feature) Is Indexed to an Entity’s Own Stock” (“EITF 07-5”). This Issue addresses the determination of whether an instrument (or an embedded feature) is indexed to an entity’s own stock, which is the first part of the scope exception in paragraph 11(a) of SFAS 133. EITF 07-5 is effective for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years. The adoption of EITF 07-5 as of January 1, 2009 did not have a material impact on our consolidated financial position, results of operations and cash flows.

On April 9, 2009, the FASB simultaneously issued the following three FSPs:

- FSP FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly, provides additional guidance to companies for determining fair values of financial instruments for which there is no active market or quoted prices may represent distressed transactions. The guidance includes a reaffirmation of the need to use judgment in certain

circumstances.

FSP FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments, requires companies to provide additional fair value information for certain financial instruments in interim financial statements, similar to what is currently required to be disclosed on an annual basis.

FSP FAS 115-2, FAS 124-2, and EITF 99-20-2, Recognition and Presentation of Other-Than-Temporary Impairments, amends the existing guidance regarding impairments for investments in debt securities. Specifically, it changes how companies determine if an impairment is considered to be other-than-temporary and the related accounting. This standard also provides for increased disclosures.

These FSPs apply to both interim and annual periods and will be effective for us beginning April 1, 2009. We have evaluated these standards and believe they will have no impact on our financial condition and results of operations.

Note 7: Significant Customers

Sales to British Telecommunications and its systems integrators and Teléfonos de Mexico S.A. de C.V. (Telmex) accounted for approximately 66% of sales in the first quarter of 2009, and 49% of sales for the same period in 2008. The following table sets forth information as to sales to each customer or customer group that accounted for 10% or more of the Company's sales for the three months ended March 31, 2009 and 2008 (dollars in thousands).

Customer	Three Months Ended March 31,		2008	
	Dollars	%	Dollars	%
British Telecommunications	\$ 2,957	39%	\$ 2,338	36%
British Telecommunications and its Systems Integrators*	3,351	44%	2,926	45%
Teléfonos de México S.A. de C.V. (Telmex)	1,684	22%	258	4%
Ericsson	-	-%	794	12%

* Sales to British Telecommunications are included in the sales and percentages figures on the line "British Telecommunications and its systems integrators".

Note 8: Subsequent Event

Effective May 1, 2009, the working capital senior note was replaced with a new working capital note in the amount of \$1,461,316 (including accrued interest). The new note provides for monthly payments of \$125,000 commencing May 31, 2009, with a final payment of the remaining principal and interest on May 31, 2010. Payments are applied first to accrued interest and any remainder to principal. The new working capital note is collateralized by all of the assets of the Company which also secure the existing senior debt.

On May 11, 2009, the Company's board of directors approved the 2009 Long-Term Incentive Plan, which covers 1,000,000 shares of common stock. The plan provides for the grant of incentive and non-qualified options, stock grants, stock appreciation rights and other equity-based incentives to employees, including officers, and consultants. The plan provides for the automatic grant of options to independent directors as follows: On the date that the plan was adopted, each independent director received the grant of an option to purchase 5,000 shares of common stock at an exercise price of \$0.022 per share, which was the average of the last reported price for the common stock for the ten trading days immediately preceding the date of grant. On May 1 of each year, commencing May 1, 2010, each independent director will receive an option to purchase 5,000 shares at an exercise price equal to the average of the

last reported price for the common stock for the ten trading days immediately preceding the date of grant. Each newly elected independent director will receive an option to purchase 10,000 shares at an exercise price equal to the average of the last ten trading days immediately preceding the date of becoming a director. Independent directors are not eligible for options or other rights under the plan except for the options granted pursuant to the automatic grant provision. The plan was approved subject to stockholder approval. The Company's principal stockholder, which holds 70% of the outstanding stock, has advised the Company that it will approve the plan.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

Statements contained in this Form 10-Q include forward-looking statements that are subject to risks and uncertainties. In particular, statements in this Form 10-Q that state our intentions, beliefs, expectations, strategies, predictions or any other statements relating to our future activities or other future events or conditions are "forward-looking statements." Forward-looking statements are subject to risks, uncertainties and other factors, including, but not limited to, those identified under "Risk Factors," in our Form 10-K for the year ended December 31, 2008 and those described in "Management's Discussion and Analysis of Financial Conditions and Results of Operations" in our Form 10-K and this Form 10-Q, and those described in any other filings by us with the Securities and Exchange Commission, as well as general economic conditions and economic conditions affecting the telecommunications industry, any one or more of which could cause actual results to differ materially from those stated in such statements. Such statements could be affected by risks and uncertainties related to our financial conditions, our relationship with the holder of our senior and subordinated debt, including the willingness or unwillingness of the holder of the senior debt to extend the maturity date of the senior debt and the amount and timing of any payments which the holder of the senior debt may require, our ability to sell any or all of our divisions or effect a restructure of our business and our debt and equity structure on terms acceptable to the holder of the senior debt, our relationship with British Telecommunications including its continued requirements for our products, factors which affect the telecommunications industry, market and customer acceptance, our access to current technology, competition, domestic and foreign government regulations and requirements and pricing, as well as general industry and market conditions and growth rates, and general economic conditions. Any forward-looking statements speak only as of the date on which they are made, and we do not undertake any obligation to update any forward-looking statement to reflect events or circumstances after the date of this Form 10-Q.

Overview

Our connection and protection equipment includes a variety of connector blocks, protector modules, building entrance terminals, category 5E and 6 cable connectors and protectors, frames used in telephone central switching offices, voice and data installations, multiple dwelling units and customer premises applications. The connector products are used by telephone companies and installers of voice and data transmission equipment to interconnect copper and fiber subscriber lines. The protector modules are used to protect from electrical surges the equipment and personnel of telephone companies, voice and data transmission providers and customer premises equipment providers. The need for protection products has increased as a result of the worldwide move to digital technology, wireless and broadband, which is extremely sensitive to damage by electrical overloads. Moreover, private owners of telecommunications equipment now have the responsibility to protect their equipment, personnel and buildings from damage caused by electrical surges.

We also have developed a range of security products for use in Closed Circuit TV (CCTV) installations. Our CCTV video balun products allow full motion color or monochrome video transmission via cost-effective UTP CAT 3 or better cable eliminating expensive and bulky coax cable. The Company's CCTV surge protectors provide protection against voltage spikes and current surges that can disable and permanently damage expensive video equipment, including cameras and recorders, resulting in loss of important information and reduced security.

Our connection and protection products are used by international telephone service providers as well as many of the regional telecommunication service providers as well as independent telecommunication service providers in the United States, and by owners of private telecommunications equipment providing communications and data transmission facilities and equipment. These products are also purchased by equipment manufacturers for integration with their systems. In addition, our telecommunications connection products have been sold to telephone operating companies in various foreign countries. This equipment is compatible with existing telephone systems both within and outside the United States and can generally be used without modification, although we do custom-design modifications to accommodate the specific needs of our customers.

Our Signal Processing products include data bus components, cable assemblies and wideband transformers. Our data bus components provide network infrastructure that connects remote terminals used in military data transmission applications, where an extremely high level of reliability and performance is required. Our wideband video isolation transformers are used by the television and broadcast, medical imaging, in-flight entertainment and industrial process control industries to reduce ground noise interference and improve picture quality. Our wideband products are also used by test and measurement engineers in the characterization of data transmission networks.

Our Connection/protection segment generated income from operations, prior to allocations of corporate expenses, of \$471,000 for the three months ended March 31, 2009 (the "March 2009 Quarter") and \$447,000 for the three months ended March 31, 2008 (the "March 2008 Quarter"). We had a net loss from operations after allocations of corporate expenses on our Connection/protection segment of \$56,000 for the March 2009 Quarter compared to a net loss of \$62,000 for the March 2008 Quarter. Although our sales from this segment increased \$828,000 from the March 2008 Quarter to the March 2009 Quarter, our gross margin decreased, primarily due to the strength of the US dollar versus the British pound on our sales to British Telecommunications and its system integrators. Our Signal segment generated net income from operations, prior to allocation of corporate expenses, of \$471,000 in the first quarter of 2009 compared to \$241,000 in the comparable period in 2008, on both increased sales and margins due to product mix. We recognize revenue from Connection/protection and Signal products when the product is shipped.

In February 2009, we entered into a supplier finance agreement with Lloyds TSB Commercial Finance Limited to factor British Telecommunications accounts receivables on a non-recourse basis. We pay fees to Lloyds TSB Commercial Financing at a rate equal to LIBOR plus 0.7%, based on the number of days to maturity of each invoice that is factored. These fees, which are treated as a general and administrative expense, were immaterial in the March 2009 Quarter.

Dependence on British Telecommunications

During the past three years, sales to British Telecommunications, consisting of both direct sales and sales to systems integrators for British Telecommunications represented a substantial percentage of our total sales. References to British Telecommunications include British Telecommunications and its systems integrators, unless the context indicates otherwise. These sales were of copper connection and protection products. Our sales to British Telecommunications have declined significantly, from \$20,313,000 in 2006 to \$12,504,000 in 2007 to \$10,296,000 in 2008. We were not able to offset completely this decline in sales. Sales to customers in Great Britain are made in the local currency. As a result, while our costs are incurred in dollars, the dollar value of our collections from these customers, primarily British Telecommunications, has decreased. The exchange rate change along with reduced sales

volume and change in product mix sold to British Telecommunications, had an impact on overall gross margin, which declined from 33% for 2006 to 29% for 2007 to 21% for 2008 and was 14% for the three months ended March 31, 2009.

Edgar Filing: PORTA SYSTEMS CORP - Form 10-Q

The following table sets forth information as to sales to each customer or customer group that accounted for 10% or more of the Company's sales in the three months ended March 31, 2009 and 2008 (dollars in thousands).

Customer	Three Months Ended March 31,			
	2009		2008	
	Dollars	%	Dollars	%
British Telecommunications	\$ 2,957	39%	\$ 2,338	36%
British Telecommunications and its Systems Integrators*	3,351	44%	2,926	45%
Teléfonos de México S.A. de C.V. (Telmex)	1,684	22%	258	4%
Ericsson	-	-%	794	12%

* Sales to British Telecommunications are included in the sales and percentages figures on the line "British Telecommunications and its systems integrators."

To the extent that British Telecommunications reduces its purchases from, or purchases products at a price which results in a reduced gross margin, our ability to operate profitably will be impaired. We may not be able to replace this business from other customers and we cannot give any assurance that British Telecommunications will increase or continue its purchases from us in the future or that we will be able to improve our margins on these sales.

Reverse Split and Debt Restructuring

On July 31, 2008, we effected a one-for-11.11 reverse split pursuant to which each share of common stock became converted into 0.0900090009 shares of common stock.

On July 31, 2008, we implemented a trouble debt restructuring plan (as defined under SFAS 15). As a result of the debt restructuring, our senior and subordinated debt was restructured and reduced. However, all of the interest due on the restructured senior debt and subordinated notes has been added to principal for accounting purposes. As a result, we do not accrue interest on our restructured senior debt and subordinated notes, which would have been accrued during the March 2008 Quarter.

As part of the debt restructuring, we issued to Cheyne Special Situations Fund, L.P., as the holder of the senior debt, 7,038,236 shares of common stock, which represents 70% of the outstanding common stock. As a result, pursuant to Section 482 of the Internal Revenue Code, our ability to use net operating loss carryforwards which were generated prior to the debt restructuring was significantly reduced.

Critical Accounting Policies

The discussion and analysis of our financial condition and results of operations are based on our consolidated financial statements, which have been prepared in conformity with accounting principles accepted in the United States. The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses reported in those financial statements. These judgments can be complex and consequently actual results could differ from those estimates. Among the more significant estimates included in these consolidated financial statements are allowance for doubtful accounts receivable, inventory reserves, goodwill valuation and the deferred tax asset valuation allowance. Because of our stockholders' deficit of \$16,044,000 at December 31, 2008, a net loss from continuing operations before extraordinary gain and discontinued operations of \$2,352,000 for the year ended December 31, 2008, and our working capital constraints, our accounting firm included

in its report on our financial statements for the year ended December 31, 2008, an explanatory paragraph about our ability to continue as a going concern. Although we generated net income of \$176,000 for the March 2009 Quarter, our stockholders' deficit at March 31, 2009 was \$16,019,000, and we continue to be subject to working capital constraints.

Use of Estimates

The preparation of financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Among the more significant estimates included in these consolidated financial statements are the estimated allowance for doubtful accounts receivable, inventory reserves, accrued expenses, goodwill valuation and the deferred tax asset valuation allowance. Actual results could differ from the estimates.

Allowance for Doubtful Accounts Receivable

We record an allowance for doubtful accounts receivable based on specifically identified amounts that we believe to be uncollectible. We also record additional allowances based on certain percentages of our aged receivables, which are determined based on historical experience and our assessment of the general financial conditions affecting our customer base. If our actual collections experience changes, revisions to our allowance may be required. We have a limited number of customers with individually large amounts due at any given balance sheet date. Any unanticipated change in one of those customers' creditworthiness, or other matters affecting the collectability of amounts due from such customers, could have a material effect on our results of operations in the period in which such changes or events occur. After all attempts to collect a receivable have failed, the receivable is written off against the allowance.

Inventory Reserves

Inventories are stated at the lower of cost (on the average or first-in, first-out methods) or fair market value. Our stated inventory reflects an inventory obsolescence reserve that represents the difference between the cost of the inventory and its estimated market value. This reserve is calculated based on historical usage and forecasted sales. Actual results may differ from our estimates.

Goodwill

Goodwill represents the difference between the purchase price and the fair market value of net assets acquired in business combinations. With respect to the testing of our goodwill for impairment, we determine the estimated fair value of the reporting unit by considering the projected cash flows generated and a market approach analysis to which the goodwill relates. The market approach is based on the comparable transaction method, which considers the sale and acquisition activities in our industry. We test the goodwill for impairment on an annual basis, or more frequently if certain events or changes in circumstances indicate that the carrying value may not be recoverable. As of March 31, 2009 and December 31, 2008, all of our goodwill related to our signal processing division. We cannot give assurances that write-downs in the future will not be necessary, although management believes that no additional goodwill impairment charges are necessary at this time and that there was no impairment of goodwill for the March 2009 Quarter.

Deferred Income Tax Valuation Allowance

Deferred taxes result from temporary differences between the tax bases of assets and liabilities and their reported amounts in the financial statements. The temporary differences result from costs required to be capitalized for tax purposes by the United States Internal Revenue Code, and certain items accrued for financial reporting purposes in the year incurred but not deductible for tax purposes until paid. An effect of our debt restructuring was the issuance of more than 50% of our common stock to new stockholders. As a result, our ability to use our remaining net operating loss carryforwards will be severely curtailed in accordance with Section 382 of the Internal Revenue Code. Due to our losses in previous years, a valuation allowance for the entire deferred tax asset was provided, which management believes is still appropriate, due to the uncertainty as to future realization and uncertainties associated with projections of future taxable income.

Other Matters

During the past several years we have, on a number of occasions, engaged in negotiations with respect to the sale of one or more of our divisions. None of our discussions resulted in an agreement. We expect to continue to engage in such negotiations in the future.

Results of Operations

The following table sets forth our consolidated statements of operations for the three months ended March 31, 2009, in dollars and as a percentage of sales.

	Three Months Ended March 31,			
	2009		2008	
	(dollars in thousands)			
	Dollars	%	Dollars	%
Sales	\$ 7,653	100%	\$ 6,545	100%
Cost of sales	5,718	75%	4,708	72%
Gross profit	1,935	25%	1,837	28%
Selling, general and administrative expenses	1,305	17%	1,342	21%
Research and development expenses	336	5%	424	6%
Operating income	294	3%	71	1%
Interest expense, net	(33)	-%	(591)	(9)%
Other income, net	9	-%	8	-%
Income (loss) before income taxes	270	3%	(512)	(8)%
Income tax expense	(94)	(1)%	(25)	-%
Net income (loss)	176	2%	(537)	(8)%
Foreign currency translation adjustment	(151)	(2)%	(84)	(1)%
Comprehensive income (loss)	\$ 25	-%	\$ (621)	(9)%

The following table sets forth the Company's sales by product line for the three months ended March 31, 2009 and 2008:

	Three Months Ended March 31,			
	2009		2008	
	(dollars in thousands)			
	Dollars	%	Dollars	%
Connection/protection:	\$ 6,220	81%	\$ 5,392	82%
Signal	1,433	19%	1,153	18%

Connection/protection equipment sales for the March 2009 Quarter were \$6,220,000, an increase of \$828,000 (15.4%) from \$5,392,000 for the March 2008 Quarter. The increase was primarily due to increased sales of connector products to British Telecommunications and its systems integrators of approximately \$425,000, and increase sales to Telmex of \$1,426,000 partially offset by decreased sales to Ericsson of \$794,000. A significant percentage of our revenues are derived from British Telecommunications and its installers. Any continuation of the significant reduction in the level of business from British Telecommunications and its installers could continue to have a material adverse effect upon both our revenue and net income. Sales to Telmex of \$1,684,000 represented 22% of our sales during the March 2009 Quarter. During the second quarter of 2009, business in Mexico generally was affected by the swine flu. We cannot determine at the present time the effect, if any, that the swine flu will have on the business from Telmex.

Signal sales for the March 2009 Quarter were \$1,433,000, an increase of \$280,000 (24.3%) from \$1,153,000 in the March 2008 Quarter. The increase in signal sales was primarily due to an increase in orders placed by the military sector.

Gross profit was \$1,935,000 for the March 2009 Quarter, an increase of \$98,000 (5%) from \$1,837,000 for the March 2008 Quarter. Gross margin for the March 2009 Quarter was 25% compared to 28% for the March 2008 Quarter. Gross margin for connection/protection was 19% for the March 2009 Quarter, as compared with 24% for the March 2008 Quarter. The decrease is related to changes in product mix in the connection/protection division and the effects of the stronger dollar, against the British pound. We do not engage in hedging as a method of seeking to reduce the impact of currency fluctuations. Gross margin for signal was 52% for the March 2009 Quarter, as compared with 47% for the March 2008 Quarter. The increase in gross margin for signal was primarily related to product mix.

Selling, general and administrative expenses decreased by \$37,000 (2.8%) from \$1,342,000 in the March 2008 Quarter to \$1,305,000 for the March 2009 Quarter. Selling expenses decreased primarily due to a reduction in advertising. General and administrative expenses decreased slightly as part of our overall cost cutting initiatives.

Research and development decreased by \$88,000 (20.8%) to \$336,000 for the March 2009 Quarter from \$424,000 for the March 2008 Quarter. The decrease in the quarter resulted primarily from a reduction of personnel and a decrease in prototypes which were not required in the current phase of the development of our new products.

As a result of the foregoing, we had operating income of \$294,000 for the March 2009 Quarter, compared with operating income of \$71,000 in the March 2008 Quarter.

Net interest expense, for the March 2009 Quarter was \$33,000 compared to \$591,000 for March 2008 Quarter. The decrease of \$558,000 resulted from the restructuring of our senior and subordinated debt during the third quarter of 2008. The debt restructuring was treated as a troubled debt restructuring, and all of the interest through the stated maturity dates of the notes was accrued on the date of issuance, on July 31, 2008, and added to the principal of the notes. As a result, the interest on the restructured senior and subordinated debt is not treated as a current period cost. Interest at the stated interest rates on the restructured debt would have been \$440,000 for the March 2009 Quarter if the debt had not been treated as a troubled debt restructuring. The interest which we accrued during the March 2009 Quarter represents interest on the \$425,000 advance made to us by our senior lender in November 2008 at a rate of LIBOR plus 10%, which was approximately 11.7% for the March 2009 Quarter, and interest on our subordinated debentures at 8.26%.

Income tax expense for the quarter ended March 31, 2009 relates to Mexico taxes. No federal or state income tax expense has been provided due to the availability of net operating loss carry forwards primarily generated after the July 31, 2008 debt restructuring.

For the March 2009 Quarter, we generated net income of \$176,000, or \$0.02 per share (basic and diluted), as compared with a net loss of \$537,000, or \$0.59 per share (basic and diluted) for the March 2008 Quarter.

Liquidity and Capital Resources

At March 31, 2009, we had cash and cash equivalents of \$542,000 compared with \$292,000 at December 31, 2008, and we had working capital of \$567,000, as compared with \$827,000 at December 31, 2008. The following table sets forth information as to the principal changes in the components of our working capital (dollars in thousands).

Category	March 31, 2009		December 31, 2008		December 31, 2008 to March 31, 2009	
	Dollar	Percent	Dollar	Percent	Dollar Change	Percent Change
Current Assets						
Cash and cash equivalents	\$ 542	86%	\$ 292		\$ 250	
Accounts receivable – trade, net	3,698	(19)%	4,554		(856)	
Inventories	6,271	3%	6,110		161	
Prepaid expenses and other current assets	369	83%	202		167	
Total current assets	\$ 10,880		\$ 11,158		\$ (278)	(2)%
Current Liabilities						
Senior debt, including interest	\$ 1,500	-	\$ 1,500		\$ -	
Subordinated notes, including interest	191	-	191		-	
Subordinated debentures, principal	385	-	385		-	
Accounts payable	5,400	(2)%	5,529		(129)	
Accrued expenses and other	2,488	4%	2,390		98	
Other accrued interest payable	349	4%	336		13	
Total current liabilities	\$ 10,313	-%	\$ 10,331		\$ (18)	
Working Capital	\$ 567	(31)%	\$ 827		\$ (260)	

Cash flow from operations was \$735,000 for the March 2009 Quarter, as compared with \$117,000 of cash used in operations for the March 2008 Quarter. The Company has entered into a supplier finance agreement with Lloyds TSB Commercial Finance to factor British Telecommunications receivables without recourse. The use of this agreement has the effect of accelerating the cash flow on British Telecommunications' receivables and represents a significant portion of the \$856,000 reduction in accounts receivable from the March 2008 Quarter to the March 2009

Quarter. Fees are at LIBOR plus 0.7% on the days to maturity of each invoice that is factored.

During both the March 2009 Quarter and the March 2008 Quarter, our only investing activities were capital expenditures of \$71,000 and \$22,000, respectively.

During the March 2009 Quarter, we paid senior and subordinated debt of \$ 286,000. We had no other cash flow or expenditure from financing activities during the March 2009 Quarter. During the March 2008 Quarter, there was no cash flow or expenditure from financing activities.

Because a significant portion of our sales are foreign and denominated in currencies other than the United States dollar, changes in exchange rates have an effect on our cash. During the March 2009 Quarter and the March 2008 Quarter, we sustained losses as a result of exchange rates of \$128,000, and \$40,000, respectively.

As a result of the debt restructuring, we had positive working capital at both March 31, 2009 and December 31, 2008. However, the debt restructuring itself did not provide us with any additional cash for our operations. Our only source of funds other than normal operations is our senior lender, Cheyne Special Situations Fund, L.P. During the fourth Quarter of 2008, we required additional funds from Cheyne, and Cheyne provided such funds. Cheyne also agreed to reschedule the payments on the senior debt as of January 1, 2009. However, despite our modest profit in the March 2009 Quarter, our significant historical losses and the uncertainty of any significant increase in business from British Telecommunications or Telmex, together with the worldwide economic downturn and the general lack of credit even for companies with strong balance sheets and positive operation results, will increase the difficulties in obtaining financings from other sources. These factors may continue to affect our ability to generate business from new customers as well as our ability to make the payments that are due to Cheyne. We cannot give any assurance that Cheyne will provide us with any additional funding if the need arises. If we are not able to generate sufficient revenue to enable us to meet our obligations or obtain financing from Cheyne, we would not be able to continue in business, and it would be likely that we would seek protection under the Bankruptcy Code.

We have in the past, and may in the future, consider the sale of one or more of our divisions. However, all of our past discussions terminated without any agreement and we cannot give any assurance that we would be able to effect any sale of our business or that such a sale would not be part of bankruptcy reorganization. Further, our senior debt is secured by a lien on substantially all of our and our subsidiaries' assets, and substantially all, if not all, of the proceeds from any sale may be required to be paid to our debt holders, principally the holder of our senior debt.

Item 3. Quantitative and Qualitative Disclosure About Market Risk.

We conduct certain operations outside the United States. A substantial portion of our revenue and expenses from our United Kingdom operations are denominated in pounds. Any pound-denominated receipts are promptly converted into United States dollars. We do not engage in any hedging or other currency transactions. During the March 2009 Quarter, the loss from exchange rates represented approximately 1% of sales. For the same period in 2008, the currency translation adjustment was not significant in relation to our total revenue.

Item 4. Controls and Procedures

Evaluation of disclosure controls and procedures

Disclosure controls and procedures are controls and procedures that are designed to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and timely reported as provided in SEC rules and forms. We periodically review the design and effectiveness of our disclosure controls and procedures, including compliance with various laws and regulations that apply to our operations. We make modifications to improve the design and effectiveness of our disclosure controls and procedures, and may take other corrective action, if our reviews identify a need for such modifications or actions. In designing and evaluating the disclosure controls and procedures, we recognize that any controls and procedures, no matter how well

designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Page 16 of 19

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including our chief executive officer and our chief financial officer, as appropriate to allow timely decisions regarding required disclosure. Our management, with participation of our chief executive and financial officers, has conducted an evaluation of the effectiveness of our disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this quarterly report on Form 10-Q.

As previously disclosed in our annual report on Form 10-K for the year ended December 31, 2008, we determined that, as of the end of the fiscal year 2008, there was a material weakness affecting our internal control over financial reporting with respect to information technology (as described below) and, as a result of the material weaknesses, our disclosure controls and procedures were not effective. We are continuing to evaluate a change in the information system platform for our financial and operational systems which will remediate the material weaknesses. The selection and implementation of a new system is expected to be completed over the next few years as a result of our current cash constraints. Consequently, based on the evaluation described above, our management, including our chief executive officer and our chief financial officer, have concluded that, as of the March 31, 2009, our disclosure controls and procedures were not effective.

Internal Control over Financial Reporting

As previously reported in form 10-K for the year ended December 31, 2008, management identified significant deficiencies that when aggregated may give rise to a material weakness specifically relating to a) program change management in the Company's PROCOMM system, b) lack of integrated modules with the general ledger and c) excessive manual adjustments to the inventory module are required.

Management's Plan of Remediation

Management plans to evaluate, select and install a new integrated enterprise resource planning (ERP) system that will include a complete general ledger and reporting package to eliminate the need for manual updates and significantly reduce the need for journal entries in the financial reporting process. Specific remediation actions used in 2009 to address our material weakness in internal control over financial reporting with respect to information technology include the following:

- In-depth review of all perpetual inventory reports;
- Analyzing of production reporting with respect to ending inventory, and
- Re-computation of reports on a test basis.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting during the most recently completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

Item 5. Other Information

Supplier Finance Agreement

In February 2009, we entered into a supplier finance agreement with Lloyds TSB Commercial Finance Limited to factor British Telecommunications accounts receivables on a non-recourse basis. We pay fees to Lloyds TSB Commercial Financing at a rate equal to LIBOR plus 0.7%, based on the number of days to maturity of each invoice that is factored.

Modification of Working Capital Senior Note

Effective May 1, 2009, the working capital senior note was replaced with a new working capital note in the amount of \$1,461,316 (including accrued interest). The new note provides for monthly payments of \$125,000 commencing May 31, 2009, with a final payment of the remaining principal and interest on May 31, 2010. Payments are applied first to accrued interest and any remainder to principal. The new working capital note is collateralized by all of the assets of the Company which also secure the existing senior debt.

Adoption of the 2009 Long-Term Incentive Plan.

On May 11, 2009, our board of directors approved the 2009 Long-Term Incentive Plan, which covers 1,000,000 shares of common stock. The plan provides for the grant of incentive and non-qualified options, stock grants, stock appreciation rights and other equity-based incentives to employees, including officers, and consultants. The plan provides for the automatic grant of options to independent directors as follows: On the date that the plan was adopted, each independent director received the grant of an option to purchase 5,000 shares of common stock at an exercise price of \$0.022 per share, which was the average of the last reported price for the common stock for the ten trading days immediately preceding the date of grant. On May 1 of each year, commencing May 1, 2010, each independent director will receive an option to purchase 5,000 shares at an exercise price equal to the average of the last reported price for the common stock for the ten trading days immediately preceding the date of grant. Each newly elected independent director will receive an option to purchase 10,000 shares at an exercise price equal to the average of the last ten trading days immediately preceding the date of becoming a director. Independent directors are not eligible for options or other rights under the plan except for the options granted pursuant to the automatic grant provision. The plan was approved subject to stockholder approval. The Company's principal stockholder, which holds 70% of the outstanding stock, has advised the Company that it will approve the plan.

Item 6. Exhibits

- 4.1 Working capital senior note dated May 1, 2009.
- 10.1 2009 Long-Term Incentive Plan.
- 10.2 Lloyds TSB Commercial Finance Limited supplier finance agreement
- 31.1 Certification of chief executive officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2 Certification of chief financial officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 32.1 Certification of chief executive officer and chief financial officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
