UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, DC 20549

FORM 10-K
(mark one)

☒ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2009

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the transition period from _____ to _____
Commission File No. 333-100979

LAPIS TECHNOLOGIES, INC.
(Exact Name of registrant as specified in its charter)

Delaware
(State or Other Jurisdiction of Incorporation
or Organization)

27-0016420
(I.R.S. Employer Identification No.)

19 W. 34 th Street, Suite 1008, New York, New
York
(Address of Principal Executive Offices)

10001
(Zip Code)

(212) 937-3580
(Issuer's Telephone Number, Including Area Code)

Securities registered pursuant to Section 12(b) of the Exchange Act:

Title of Each Class
to be so registered:
None

Name of each exchange on which
registered:
None

Securities registered under Section 12(g) of the Act:

None.
(Title of Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes ☐ No ☒

Edgar Filing: LAPIS TECHNOLOGIES INC - Form 10-K

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act.

Yes ☐ No ☒

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act of 1934 during the preceding 12 months, (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☐ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in the definitive proxy or information statement incorporated by reference in Part III of this Form 10-K or amendment to Form 10-K. ☒

Indicate by check mark whether the registrant is a large accelerated filer, and accelerated filer, a non-accelerated filer, or a small reporting company. See definitions of "large accelerated filer", "accelerated filer", and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check One):

Large Accelerated Filer ☐

Non-accelerated Filer ☐

Accelerated Filer ☐

Smaller reporting company ☒

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes ☐ No ☒

As of June 30, 2009, the aggregate market value of the issued and outstanding common stock held by non-affiliates of the registrant, based upon the closing price of the common stock, under the symbol "LPST" as quoted on the National Association of Securities Dealers Inc. OTC Bulletin Board was approximately \$344,800. For purposes of the statement in the preceding statement, all directors, executive officers and 10% shareholders are assumed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for any other purpose.

(ISSURERS INVOLVED IN BANKRUPTCY PROCEEDINGS DURING THE PAST FIVE YEARS)

Check whether the issuer has filed all documents and reports required to be filed by Section 12, 13 or 15(d) of the Exchange Act after the distribution of securities under a plan confirmed by a court. Yes ☐ No ☐

State the number of shares outstanding of each of the issuer's classes of common equity, as of the latest practicable date: The Registrant's common stock as of February 28, 2010, was 6,483,000 shares.

PART I

ITEM 1. BUSINESS.

Lapis Technologies Inc. was formed in Delaware on January 31, 2002 under the name Enertec Electronics, Inc. and has filed two Certificates of Amendment changing our name to Opal Technologies, Inc. and then to Lapis Technologies, Inc. We conduct operations in Israel through our wholly owned subsidiary, Enertec Electronics Limited ("Enertec Electronics"), an Israeli corporation formed on December 31, 1991, and Enertec Systems 2001 LTD ("Enertec Systems"), an Israeli corporation formed on August 28, 2001, of which we own a 73% equity interest. We are manufacturers and distributors of various military and airborne systems, simulators, automatic test equipment (ATE), electronic components and products relating to power supplies, converters and related power conversion products. Where the context requires, references to "we" "us" or "our" throughout this document include reference to Enertec Electronics and Enertec Systems.

Our revenues are derived from two main sources, the military and the commercial markets. In the military market we, design, develop and manufacture test systems, airborne, shipborne, land electronic equipment and other various military systems, for military manufacturers in accordance with their specifications. Most of this military business is carried out by the majority owned subsidiary Enertec Systems. In the commercial market we market and distribute, power supplies and other electronic components manufactured by other manufacturers who engage us to distribute their products. This activity is carried out primarily by Enertec Electronics, a wholly owned subsidiary. We have entered into representative and distribution agreements with seven such manufacturers, four of which have been reduced to written contracts.

OUR SUBSIDIARIES

In April 2002, we acquired all of the outstanding capital stock of Enertec Electronics, making it our wholly owned subsidiary. In this transaction, we acquired 99 ordinary shares of Enertec Electronics from Harry Mund, our President and Chief Executive Officer, in exchange for 4,750,000 shares of our common stock. The common stock issued to Mr. Mund represented 86.6% of our outstanding common stock after the transaction.

Enertec Management Limited (f/k/a Elcomtech Ltd.), a private Israeli company, is a wholly owned subsidiary of Enertec Electronics.

Enertec Systems, a private Israeli company, is owned by Enertec Management Limited ("Enertec Management") (73%), and Harry Mund (27%), our President and Chief Executive Officer of Enertec Electronics Limited. The Chief Executive Officer of Enertec Systems is Zvika Avni. Enertec Systems commenced operations on January 1, 2002.

ENERTEC ELECTRONICS

Enertec Electronics is responsible for:

- The marketing and distribution of power supplies and other related power products manufactured by third-party firms that engage us to distribute their products;

Our customers have products that require power supplies. We are contacted by them with their specifications, and based on that data, we provide a standard, or if necessary, a semi-custom or custom, power supply solution. We provide support to customers from the early stages of product definition and first sampling, through the production stages and up to after-sales support. Examples of products that require power supplies are computers, modems, printers, faxes, telephones, transmitter/receivers for commercial and military communications, , telecom

network routers, video-conference routers, cellular telephone transmitters/receivers, television on-routers, internet-routers, medical MRI scanners, x-ray equipment, robots, drivers for electric motors, and industrial control systems.

We have also entered into representative or distribution agreements with various international power supply manufacturers. These manufacturers granted us rights to sell their products in Israel. We solicit sales within Israel and, upon receipt of purchase orders, we contact the supply manufacturers to fulfill such orders.

Enertec Electronics is focusing its efforts almost exclusively on developing its business within the power supplies arena.

ENERTEC SYSTEMS

Enertec Systems is responsible for designing, developing and manufacturing of various military systems for airborne, land and seaborne applications - for example, electronic systems used in aircrafts such as power supplies, laser drivers, mission computers and control systems for motor and pumps, radio transceivers, altitude measuring devices, ground systems for missile control and sub-assemblies, which are parts of a system developed with a customer's specifications. We also design and manufacture test systems for electronics manufacturers in the military industry based on their specifications for the test and ground support of missiles, aircrafts and other various defense systems.

Enertec Systems exclusively manufactures customized military related products. Enertec Systems also meets the stringent security clearance requirements for the most sensitive defense programs we are involved.

Our quality control systems are compliant with ISO9001:2000.

The International Organization of Standardization ("ISO") designated ISO9001:2000 to apply to organizations that design, develop, produce, install, and service products. ISO expects organizations to apply this model, and to meet certain requirements, by developing a quality control system. ISO9001:2000 is the international standard for quality assurance and quality design. This is the most common worldwide standard and is implemented across all kinds of organizations, including manufacturers, schools and shops. Most customers in our industry insist on doing business with companies that are at least ISO9002:2000 approved, a standard that is less demanding than ISO9001:2000. The ISO9002:2000 standard is related mainly to the quality assurance of the manufacturing process, while the higher ISO9001:2000 standard includes both the quality assurance of the manufacturing process component as well as the quality of the design. The ISO9001:2000 standard is important to customers who are placing orders for custom made products.

The ISO9001:2000 quality assurance model is made up of a combination of quality system requirements.

The key requirements are that an organization should:

- Determine the needs and expectations of customers and other interested parties;
- Establish policies, objectives and a work environment necessary to motivate the organization to satisfy these needs;
- Design, resource and manage a system of interconnected processes necessary to implement the policy and attain the objectives;
- Measure and analyze the adequacy, efficiency and effectiveness of each process in fulfilling its purpose and objectives; and
 - Pursue the continual improvement of the system from an objective evaluation of its performance.

A typical process for designing, planning and implementing a quality system typically involves:

- Planning the quality initiative and obtaining executive sponsorship;
- Establishing the quality policy for the organization;
- Designing and planning the Quality Management System (QMS), usually based on international standards;
- Establishing the quality organization, developing the quality manual and structure of quality records;
 - Determining the scope of implementation;
 - Assuring quality plans;
 - Reviewing deliverables and determining any actions;
 - Auditing quality records;

- Defining areas for process improvement; and
- Managing the improvement program.

NEW PRODUCTS

ENERTEC SYSTEMS

Enertec Systems is focusing almost exclusively on the military arena, and entered into several new fields of military technology in addition to our "classic" ATE field of expertise.

During 2007-2008 we marketed a new line of ruggedized Command and Control mobile stations of modular architecture, allowing adaptation/customization to various applications.. The qualification process was performed during 2007 and 2008 and was completed by the end of 2008. Following the successful qualification the customer has released orders for additional 10 sets scheduled for delivery during 2009-2010. 6 sets have been delivered during 2009 and 4 sets will be delivered during 2010 .

During 2007-2008 we have introduced a new line of ruggedized mission computers for combat vehicles. We have already delivered several prototypes to I.A.I. (Israeli Aircraft Industry) who intends to replace their computers previously manufactured in-house and active in the field for many years with updated modern design models from a new outsourced supplier to fulfill IAI's need over the following 5-10 years. These first units that we delivered have successfully passed all qualification and validation tests. As a result of the success of the first prototypes, we have received new orders for additional prototypes for three different products delivered during 2007-2009. New orders for 90 pcs have been received during 2009 for delivery during 2010.

We introduced a new line of military grade Power Distribution Units for use in airborne applications, representing an upgraded version of a previous system introduced several years ago which generated about \$800,000 in revenues. The first set was submitted to stringent electrical and environmental qualification tests which were completed in the first quarter of 2007 and further units were delivered during 2007. New orders are expected to be received during 2010-2011.

We introduced a new test system for the helicopter's flight computer and the other helicopter's avionics units. We have completed the testing with the various units and during 2009 3 systems were first delivered and integrated. Its successful launch generated new orders for 2 systems for delivery during 2010-2011 and is expected to generate several additional follow up orders for deliveries during 2010-2012. We introduced a new line of small airborne multiple-output power supply specially designed for attack payloads, based on a proprietary technology that was developed in-house implementing a planar switching transformer which enables further miniaturization and a higher output power to size ratio. This line has been well received by our customers, and passed the stringent military screening tests. During 2008-2009, we have delivered about orders in the amount of \$ 400,000.

By the end of 2009 we had new orders for additional 130 pcs for delivery during 2010.

The Laser system and driver for Airborne Targeting Pods utilizing laser designation of targets which was originally introduced during 2005 is continuing to be well accepted by our customers. This is a new entry into the field of high-tech, high accuracy and high power military lasers. Our innovative and unique design is based on a state of the art high-power laser diode which provides high accuracy and long range detection and tracking of targets. This project is a turn-key product from the initial electronic and mechanical design up to the production and delivery of the complete system. The first prototypes have been delivered during 2006-2007 and following the successful qualification tests in 2007 we have received new order for additional 25 pcs for delivery during 2008-2009 and we expect to receive additional orders of 50-100 pcs during 2010-2011.

By the end of 2005 we introduced a Simulation and Test System for a highly classified defense project. This technologically complex design is being outsourced for the first time, and so it was very tentative in progress.

However, we have already delivered the first batch in December of 2005 resulting in revenues of about \$1,250,000 with a record lead-time of 3 months. During 2006 we received an additional order of about \$ 1,000,000 which has also been delivered. As a result of our success we expect new orders of about same size each during the following years.

A Generic Test and Validation System for new anti-tank missiles. This system incorporates state of the art hardware and software designs and is used for the tests and validation of about 30 different modules of the missile. The first systems were ordered in the amount of about \$1.4 Million dollars with scheduled delivery of the first unit during 2008. During 2008 we received an additional order for the implementation of upgrades which was delivered during 2009. This test system for anti-tank missiles could generate orders for a couple of units a year for approximately the next ten years.

A Control System for airborne attack platforms for naval application. The system receives data from aircrafts and transmits it in real time. The design was based on upgraded versions of previous designs already proven in the field. We have already received our first order for several units scheduled for delivery during 2008. In 2007 we have received a new order from a new customer for delivery during 2008-2010. During 2008 we have delivered orders in the amount of approximately \$ 1,100,000 and about \$ 500,000 during 2009.

Generic System for Simulation and Test of multiple stage missiles. This very complex high technology system simulates each stage of the missile and performs a comprehensive suite of tests. The first order for the design was received during 2006, generating revenues of several hundreds of dollars. During 2008, we have delivered orders in amount of approximately \$ 1,000,000 and during 2009 about \$ 500,000.

During 2007, we introduced a new Generic ATE System based on VXI technology for testing air-to-air missiles. The first order has already been received for 15 units which will generate revenues of about \$ 2 mill over the following years. The first prototype was completed by the end of 2008 and during 2009 delivered orders of about \$ 200,000.

ENERTEC ELECTRONICS

During 2004, we completed UL safety approvals for a new custom-made power supply. It is implemented in a series of modems for fast network access of data and voice over the IP network. In 2005, 1500 units were ordered, 2,000 units were ordered during 2006, 900 units during 2007, 1000 units during 2008 and 900 units during 2009.

We introduced the first samples of DC/DC converters for military CDU (Command Display Units) in the fourth quarter of 2004. These samples were followed with orders for 1500 pcs which were delivered over the course of 2005, for 1700 pcs delivered during 2006, for 1000 pcs delivered during 2007, for 1000 pcs delivered during 2008 and for 500 pcs delivered during 2009.

During 2004, we entered into a new arena of customized power supplies for fast data networking systems. We customized compact PCI power supplies and received orders for 200 units. This successful launch resulted in more than 200 units in follow-up orders in 2005, 100 pcs during 2006, 100 pcs during 2007. During 2008 and 2009 we have not received new orders.

A compact, and economical optimized cost/performance redundant power supply for data communication application. The first samples were delivered during 2005 and have already resulted in follow up orders of approximately 5000 pcs delivered during 2007-2008 and for 600 pcs for delivery during 2009 and 2010.

We introduced a customized external power supply for military note-book computers which will be installed by our customers to the US military within the army, navy, air-force etc. The first 25 power supplies have already been delivered and successfully passed all the stringent military qualification tests, followed by orders for additional 260 pcs during 2006, 800 pcs during 2007, 300 pcs during 2008 and 600 pcs during 2009.

In 2006, we introduced a new multiple output customized power supply for outdoor wireless application and have submitted for UL safety approvals. No orders have been received during 2008 and 2009.

In 2006, we introduced a line of 150W dc/dc military converters. We received orders for first 75 units from four different manufacturers of defense systems during 2006, additional 40 units during 2007, 30 units during 2008 and 90 units during 2009.

During 2008 and 2009, we have not been able to introduce any additional new products. We concentrated our efforts on the implementation of the products previously introduced and the maintaining of the relationships with our strategic partners.

MARKETING STRATEGIES

We market our products to a diverse group of manufacturers of electronic equipment. Our products serve the various needs of local Israeli manufacturers of electronic systems in the following fields:

- Military;
- Telecommunications;
- Medical; and
- Industrial.

We currently sell only to Israeli companies that, in turn, incorporate our components into their products for resale to the global markets. However, in the future we anticipate creating some kind of platform to market Enertec Systems' products to U.S. companies as well as creating a manufacturing base within the United States so as to benefit from U.S. government dollars directed to Israel's military aid with the condition of being spent on U.S manufactured products. Currently, we advertise in the local Israeli technical magazines and participate in electronic seminars, exhibitions and shows four to six times a year. A substantial part of the business is from our existing customers. Many companies have engaged us from the inception of their new programs, and have implemented our custom designed solutions. Many of our customers rely on us for technical services, products and support, and consider us to be their own "power supply department" and "ATE systems department". Since 2004, we have been a "systems house" of military systems, making turn-key projects from design to production on behalf of our customers.

We also derive a considerable percentage of our business from word-of-mouth referrals. Our reputation is backed by many years of providing quality products and services. Our marketing strategy has been based on our brand name and reputation, which has grown substantially over the last twenty years, including eight years prior to the formation of Enertec Electronics, when business was conducted under the name "Enertec International."

Over the next 24 months, we plan on continuing our aggressive marketing efforts. Part of our success within Enertec Systems has been to anticipate the needs of our clients, invest in R&D and to start working on products that we believe they will need thus gaining an edge on our competition in our time to market. Furthermore, we have been able to identify those of our clients and potential clients that look poised to get the big orders and focus our attention on gaining a foothold within that client. When successful, this strategy enables us to benefit from the large order flow that they receive both in terms of the typical products they would expect us to produce for them as well as the more sophisticated products that they might not expect that we are then in the perfect position to offer to them, especially if they are inundated with business we are able to step in and ease the burden of some of the non-core components as well as some of the core components.

By continuously diversifying into new and more complex products, Enertec Systems has been able to set itself apart from its competition. In 2009, following the trend we started in 2004, we continued to increase our suite of custom products based on our proprietary design and technology. These products are core components of several long term military programs spearheaded by our customers, with expected purchase lifecycles over periods of up to 10 years.

At Enertec Systems the competitive edge lies with the sophistication and the complex nature of the products. Enertec Electronics however, maintains its competitive advantage primarily through its range of products, their pricing, cost effective adaptation to the customers' needs and the technical application support provided to customers.

MARKET CONDITIONS

Enertec Systems

Manufacturers that sell defense end products such as missiles, aircrafts or computers, also provide a support system (e.g., an ATE) to the end-user. The end-user uses this support system for maintenance of the end product. Historically, support systems were made by manufacturers selling the end products. Recently, however, manufacturers have been focusing their resources on the end products rather than on support systems. This has opened up a market for us to develop these systems.

The local Israeli market for ATE's simulators and support systems is estimated at \$100 to \$200 million annually. We have about 5% of this market, approximately the same level of market penetration as our competitors. This market is largely controlled by big local defense manufacturers. However, there has been a noticeable trend by these and other defense manufacturers to outsource test and support systems to specialized firms so that large manufacturers can focus their resources on designing their core products.

During 2007 – 2009, we have introduced several new military products implemented in high volume long term defense programs.

Since 2005, the local military market is improving significantly resulting in many new orders received which contributed to the increase in our sales and backlog of military products. This trend continued through 2006-2009 resulting in a backlog of \$ 6,363,000 dollars by the end of 2009.

A key element of our growth potential is our ability to enhance our sales and marketing team. We will need to expand our sales and marketing team significantly over the next several years to achieve our sales targets. We will face

significant challenges and risks in building and managing our sales and marketing team, including managing geographically dispersed sales efforts and adequately training our sales people in the use and benefits of our products.

Enertec Electronics

The worldwide market for high-tech, telecommunications, and Internet related products affects the Electronics Division's power supplies sales. The overall market started to slow down during 2008 and 2009 resulting in a decrease of sales of our customers to this sector and this trend is reflected in our sales to our customers.

We service clients in the telecommunications, industrial control, medical and the military core business sectors. We offer more customized power supplies, which, we believe, makes it more difficult for our competitors to bid successfully on the same projects or replace our product down the road in production or for follow-on orders.

Enertec Electronics prospects are dependent on the electronics and electrical product industries in Israel. Since 2007 this industry is being strongly affected by the trend of outsourcing. Many Israeli companies manufacture their initial quantities using power supplies purchased locally from suppliers such as Enertec Electronics. However, when volumes increase they move production overseas, especially to China, leaving the subcontractors to source the components locally. This trend affects the receiving of high volume orders from our customers.

CUSTOMERS

Our customers are mostly local Israeli manufacturers of electronic systems from different segments of the electronics industry, within the military, industrial, commercial, medical, and telecommunications fields. Due to this level of diversification of our customers, we are not that dependent on any one specific market segment; so our overall performance is less affected by fluctuation in the markets. Until 2003 IAI (Israel Aircraft Industries) was our major customer representing approximately 38% of our sales. During 2004 we realized that several Rafael divisions were receiving an increasingly high number of new orders as a result of their aggressive marketing around the world but that they had not increased their technical and manufacturing staff to accommodate this growth. We positioned ourselves to become their outsourcing team for their new orders in the areas of design, engineering and production. We increased our investment in R&D that resulted in new designs and products that enabled us to successfully bid on a large number of projects. During 2005-2007, we focused our efforts in diversifying our sales across other technologies, for example avionic equipment and combat control stations. By the end of 2009 Rafael became our major customer representing approximately 37.4% of our total sales and 49.7% of Enertec Systems sales.

Investing in R&D has given us an edge with our time to market which resulted in several agreements, with Rafael bringing out products utilizing our systems within long project cycles, in many cases up to 10 years. This has created a significant increase in the backlog of orders from Rafael.

During 2005, the Israeli Aircraft Industry (IAI) started to design and manufacture a range of new products for which we have been asked to provide Test Equipment, Simulators and Support Systems. For the year ended December 31, 2009, sales to IAI was 29.2% of our total sales and 38.7% of Enertec Systems sales.

The rest of our sales are pretty much evenly spread between our other main customers: Elbit, El-Op and Tadiran Spectralink, at the military field and a large number of customers at the commercial field.

BACKLOG

As of December 31, 2009, we had a backlog of orders for our products and services in the amount of approximately \$6,553,000 as compared to a backlog of approximately \$6,548,000 as of December 31, 2008. The increase of approximately 0.07% in the backlog as of December 31, 2009 compared to December 31, 2008 is mainly due to the increase of the backlog at Enertec Systems offset by a decrease of the backlog at Enertec Electronics. The increase of the backlog at Enertec Systems of \$492,000 is mainly due to the receipt of some new orders at Enertec Systems for airborne power supplies and test systems for missiles and infra-red payloads. The decrease of the backlog at Enertec Electronics of \$487,000 is mainly due to the market slow-down and the outsourcing to the Far-East causing many of our customers to place orders with much shorter lead-times as opposed to larger cover orders during the previous years.

The orders included in the December 31, 2009 backlog figure are as follows:

Enertec Systems

\$ 3,453,000	representing airborne power supplies, laser systems, flight computers, test systems for avionics and military systems, missiles command & control systems
\$ 2,426,000	representing test systems for IAI missiles and avionic systems
\$ 284,000	representing airborne power supplies and test systems for infra-red payloads
144,000	representing medical systems
\$ 56,000	various systems
\$ 6,363,000	TOTAL backlog for Enertec Systems

Enertec Electronics

\$ 190,000 This figure includes a variety of orders for commercial, telecom, medical, industrial and military off- the-shelf power supplies..

COMPETITION

ENERTEC SYSTEMS

Our chief source of competition for Enertec Systems is our clients themselves. Most of our clients have done their own testing systems and core component manufacturing in house. But as their volume of sales start increasing it is easier for us to provide an outsourcing capability for them. Furthermore, as we continue to prove our expertise and our clients allow us to create increasingly complex products for them, we have started to build their trust and are overtaking a lot of the functions that previously they would have produced in house. Outside main competitors that we face are: Chaban Electronics Ltd, Symcotech Ltd, and Rada Electronic Industries Ltd.

ENERTEC ELECTRONICS

We face intense competition within Enertec Electronics from the existing local manufacturers and distributors of electronic components and products. Presently, several competing companies that have greater resources than we do, such as financial, operational, sales, marketing, and research and development resources, are actively engaged in the manufacture and distribution of power supplies. Our main competitors include Advice Electronics Ltd., EDCO, Nemic Lambda, Dan-El, Bruno International, Appletec Ltd., Migvan Technologies Ltd., Boran Technologies Ltd., Telkoor Power Supplies Ltd., Nisko and Horizon Electronics Ltd.

However, we have been able to compete with these companies for the following reasons:

- The power supplies we distribute are good quality, economically priced, and are backed by a good level of technical engineers.,
- Our products are sold in diversified activity fields, namely commercial, industrial, military and medical.

.However,since 2007 we have been affected by the strong trend of overseas outsourcing of the high volume projects.Our customers have transfered production overseas, especially to China, leaving the subcontractors to source the components locally. This trend affected the receiving of new high volume orders from our customers.

SUPPLIES AND SUPPLIERS

Our suppliers are diversified and we are not dependent upon a limited number of suppliers for essential raw materials, energy or other items. The manufacturers that supply to us are all established companies with facilities and products in compliance with all relevant international standards. However, while we are not dependent on any one supplier, disruptions in normal business arrangements by the loss of one or a few suppliers could cause possible short-term losses. These disruptions may be experienced if our existing suppliers are no longer able to meet our requirements. They may also occur if there is an industry shortage of electronic or mechanical components. Not only could these disruptions affect our product line and limit our production capacity, but also, in relation to the shortage of components, could result in higher costs due to the supply shortage or the need to use higher cost substitute components.

The raw materials we use are either electronic components or mechanical components. The electronic components are purchased from suppliers and the mechanical components are mainly manufactured by local subcontractors.

EMPLOYEES

As of December 31, 2009, Enertec Electronics had 9 employees and Enertec Systems had 55 employees. All key technical employees must sign a two-year confidentiality agreement and a two-year non-compete agreement, which prohibits our employees, if they cease working for us, from directly competing with us or working for our competitors. However, Israeli courts have required employers seeking to enforce non-compete undertakings of a former employee to demonstrate that the competitive activities of the former employee will harm one of a limited number of material interests of the employer, such as the secrecy of a company's confidential commercial information or its intellectual property. We may not be able to demonstrate that harm would be caused to us, and therefore, may be unable to prevent our competitors from hiring and benefiting from the expertise of our former employees. None of our employees are subject to a collective bargaining agreement. The C.E.O. of Enertec Systems is entitled to receive certain benefits based on a yearly performance. All of our employees are full-time. Management considers its employee relations to be good.

RESEARCH AND DEVELOPMENT EXPENDITURES

Research and Development costs totaled approximately \$251,000 and \$143,000 for the twelve months ended December 31, 2009 and 2008, respectively, which equates to approximately 2.8% and 1.4% of revenues, respectively, for both periods. These expenditures have adequately satisfied our research and development requirements.

The increase of our R&D expenditures as compared to 2008 is a result of allocating of larger percentage of our engineering resources to the task of making progress in the design of new technologies which we expect to implement into new projects and big military programs of our core customers.

SEASONAL ASPECTS OF OUR BUSINESS

The sales of military products experience seasonal variations this is due to the fact that the Israeli Ministry of Defense frequently delays the release of budgets near the end of the fiscal year. Therefore, new orders to the military industry are delayed, leading to delays of orders to the local subcontractors. When this happens, it negatively affects the sales volume of the 1st quarter of the year. In addition, some of our customers push for increased deliveries during the last weeks of the year in order to fulfill contractual delivery obligations to their customers and also to show better business results. This often causes an upward spike in our fourth quarter sales.

PATENTS AND TRADEMARKS

We are not dependent on patents or trademark protection with regards to the operation of our business and do not expect to be at any time in the future.

GOVERNMENT REGULATION

Every electronic product must comply with the UL standards of the United States and CE standards of Europe to be eligible for sale in the respective countries subject to these standards. Every system must be tested, qualified and labeled under the relevant standards. This is a complicated and expensive process and once completed, the approved product may not be altered for sale.

Change of Control

Pursuant to a Stock Purchase Agreement (the "Purchase Agreement"), dated July 5, 2009, on December 3, 2009, Mr. Mund transferred to D.L Capital Ltd. ("D.L. Capital"), 3,306,330 shares of the Common Stock of Lapis Technologies, Inc. The number of shares purchased represents 51% of the issued and outstanding shares of Lapis Technologies, Inc.'s common stock (the "Controlling Shares"). Pursuant to the Purchase Agreement, D.L Capital is also obligated to purchase an additional 1,443,670 shares of the Common Stock beneficially owned by Mr. Mund, which shares are being held in escrow (the "Escrowed Shares"). Mr. Mund is Lapis Technologies, Inc.'s Chief Executive Officer and President, and prior to this transaction was its majority stockholder.

The purchase price for the Controlling Shares was 1,000,000 New Israeli Shekels ("NIS") (approximately \$260,000) in cash plus the assumption by D.L Capital of financial liabilities and guarantees in the sum of 11,000,000 NIS (approximately \$2,900,000). In addition, in consideration of the Escrowed Shares D.L Capital shall pay for a period of three years, a yearly cash payment of the higher between 1,000,000 NIS or 25% of annual net profit of Enertec System 2001 Ltd. and shall assume additional financial liabilities and guarantees in the sum of 3,000,000 NIS (approximately \$790,000). D.L. Capital's source of the funds and liabilities and guarantees assumed was its working capital.

The Escrowed Shares will be released in accordance with the terms and conditions set out in the Purchase Agreement.

Pursuant to the Purchase Agreement, D.L. Capital and Mr. Mund agreed that, as soon as practicable following the closing under the Purchase Agreement, (i) the Company or a subsidiary of the Company would enter into an employment agreement with Mr. Mund pursuant to which Mr. Mund would be employed as a special advisor to the board of directors of the Company or a subsidiary thereof, for two days per week, for a term of 3 years, for a salary of 25,000 New Israeli Shekels (approximately \$6,500) per month, (ii) D.L. Capital and Mr. Mund would enter into a shareholders agreement, pursuant to which Mr. Mund would vote the Escrowed Shares in accordance with how D.L. Capital shall vote the Controlling Shares, and Mr. Mund shall receive certain protective provisions relating to his rights as a minority shareholder, including, without limitation, veto rights in respect the sale of the majority of the business or assets of the Company, and (iii) D.L. Capital (directly or indirectly) and the Company would enter into a consulting agreement under which D.L. Capital shall provide Company or any of its subsidiaries with consulting services for a monthly compensation of 50,000 New Israeli Shekels (approximately \$13,100) per month.

On August 12, 2009, Mr. Mund and Enertec Systems 2001 Ltd. entered into an employment agreement on the terms contemplated by the Purchase Agreement, and D.L. Capital entered and Enertec Systems 2001 Ltd. entered into a consulting agreement on the terms contemplated by the Purchase Agreement.

NOT APPLICABLE

ITEM 1B. UNRESOLVED STAFF COMMENTS

NOT APPLICABLE

ITEM 2. PROPERTIES.

We currently maintain plants in both Haifa and Carmiel. We have no plans to secure more space, as we believe both locations are suitable for our needs.

Our Haifa plant is 400 square meters and includes a production hall and management offices. We lease this property for \$21,901 per annum from Mund Holding Limited, an entity wholly owned by our President and Chief Executive Officer, Harry Mund. We entered into this lease in January 2001. The Haifa plant houses the headquarters and accounting offices, the imports department, sales and administration employees, application engineers, and a service laboratory. This plant is suitable for our present and near future needs. There is enough space to accommodate an additional two to four sales engineers, if needed. This space is also used to sell standard power supplies products.

Our Carmiel plant is 800 square meters and also includes a production hall, with a research and development and engineering facility for our Systems Division. The Carmiel property is leased at \$41,239 per annum. We use the Carmiel plant for manufacturing. It houses engineers, software programmers, electronic hardware designers, mechanical designers, and electronic and mechanical assembly personnel. It consists of office rooms for one to three people, and contains one room for electronics assembly, one for mechanical assembly, and two for final testing of finished products. The Systems Division manufactures its customized products in this facility, and accordingly, it is not a plant for high volume production. It is located in the Carmiel industrial area, and is in close proximity to many of our Systems Division clients. Every engineer has individual workstations, which contain computers that are inter-connected by our own local network for fast communication. The plant has been updated to satisfy all our present and near future needs. In this facility, there is space for five additional offices, which would accommodate approximately 15 more people, and the existing assembly rooms could accommodate eight to ten additional workers.

ITEM 3. LEGAL PROCEEDINGS.

We are not subject to any pending or threatened legal proceedings, nor is our property the subject of a pending or threatened legal proceeding. None of our directors, officers or affiliates is involved in a proceeding adverse to our business or has a material interest adverse to our business.

ITEM 4.(REMOVED AND RESERVED)

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASERS OF EQUITY SECURITIES.

MARKET INFORMATION

Our common stock began quotation on the OTC Bulletin Board on June 1, 2004 under the symbol LPST.OB. For the periods indicated, the following table sets forth the high and low bid prices per share of common stock. These prices

Edgar Filing: LAPIS TECHNOLOGIES INC - Form 10-K

represent inter-dealer quotations without retail markup, markdown, or commission and may not necessarily represent actual transactions.

Fiscal Quarter	Fiscal 2009		Fiscal 2008	
	High	Low	High	Low
First Quarter Ended March 31	\$.20	\$.10	\$.20	\$.20
Second Quarter Ended June 30	\$.10	\$.10	\$.20	\$.20
Third Quarter Ended September 30	\$.10	\$.10	\$.20	\$.20
Fourth Quarter Ended December 31	\$.10	\$.10	\$.20	\$.20

HOLDERS

As of February 28, 2010, we had 6,483,000 shares of common stock outstanding and such shares were held by approximately 42 stockholders of record. The transfer agent of our common stock is Continental Stock Transfer and Trust Company.

DIVIDENDS

We have not declared any dividends to date. We have no present intention of paying any cash dividends on our common stock in the foreseeable future, as we intend to use earnings, if any, to generate growth. The payment by us of dividends, if any, in the future, rests within the discretion of our Board of Directors and will depend, among other things, upon our earnings, our capital requirements and our financial condition, as well as other relevant factors. There are no restrictions in our articles of incorporation or bylaws that restrict us from declaring dividends.

RECENT SALES OF UNREGISTERED SECURITIES

During the fiscal year ended December 31, 2009, we did not issue any securities without registration under the Securities Act of 1933, as amended (the "Securities Act").

ITEM 6. SELECTED FINANCIAL DATA.

NOT APPLICABLE

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

FORWARD-LOOKING STATEMENTS

The information in this annual report contains forward-looking statements. All statements other than statements of historical fact made in this report are forward looking. In particular, the statements herein regarding industry prospects and future results of operations or financial position are forward-looking statements. Forward-looking statements reflect management's current expectations and are inherently uncertain. Our actual results may differ significantly from management's expectations.

The following discussion and analysis should be read in conjunction with the financial statements of Lapis Technologies, Inc. included herewith. This discussion should not be construed to imply that the results discussed herein will necessarily continue into the future, or that any conclusion reached herein will necessarily be indicative of actual operating results in the future. Such discussion represents only the best present assessment of our management.

LIQUIDITY AND CAPITAL RESOURCES

Our cash balance at December 31, 2009 has decreased compared to the cash balance at December 31, 2008. As of December 31, 2009, our cash balance was \$313,000 as compared to \$763,000 at December 31, 2008. Total current assets at December 31, 2009 were \$8,356,000 as compared to \$10,043,000 at December 31, 2008. The decrease in current assets is mainly due to the decrease in cash balance, the decrease in inventories and the decrease in accounts receivables.

Our accounts receivable at December 31, 2009 were \$4,307,000 as compared to \$4,884,000 at December 31, 2008. This decrease is a result of improved payment terms of certain large orders during 2009 resulting in an increased cash balance.

As of December 31, 2009 our working capital was \$1,866,000 as compared to \$1,706,000 at December 31, 2008. The increase in the working capital is mainly due a larger decrease in the total current liabilities than the decrease in the total current assets.

A consortium of banks, composed of the 1st international Bank, Bank Otzar Hachayal, Bank HaPoalim and Mercantile Bank have provided us a combined total credit line of some \$5,059,000 out of it we used only\$ 3,484,000 as of December 31, 2009, as compared to a total debt of \$5,621,000 as of December 31, 2008. This debt is made up of a number of different components: short-term debt, long-term debt and in the form of lines of credit, which we use from time to time to satisfy our temporary cash flow needs. The credit line provided is based on the pledge of our working capital and customers' receivables and by the pledge of financial assets and personal guarantees of Mr. David Lucatz. and Mr Harry Mund

The current portion of our term loans at December 31, 2009 consisted of \$88,000 as compared to \$197,000 at December 31, 2008. Our short-term loans consisted of \$2,990,000 of short-term loans and broken down as follows:

\$1,618,000 due January 2010, \$719,000 due February 2010, \$122,000 due March 2010, \$531,000 due November 2010 At December 31, 2009, our total bank debt was \$3,484,000 compared to \$5,621,000 at December 31, 2008. These funds were borrowed as follows:

\$3,078,000 which includes the current portion of long term debt, as various short term bank loans due through 2010, \$310,000 of long-term debt due June 2014 and \$96,000 borrowed using our bank lines of credit. As a result, we decreased the amount borrowed for the year ended December 31, 2009 by \$2,137,000 from \$5,621,000. The decrease in bank debt is mainly a result of the improved payment terms of certain large orders during 2009,a decrease in inventory ,a decrease in cash balance and an increase in the due to stockholders.

There are no other lines of credit available to us to refinance our short-term bank loans. Additionally, we currently do not have any other sources of financing available to us for refinancing our short-term loans. As of December 31, 2009, we are current with all of our bank debt and compliant with all the terms of our bank debt.

At December 31, 2008, Mr. Mund, our Chief Executive Officer and President, had receivables from the company in the amount of \$13,000. As of Dec 31, 2009, DL Capital, our major shareholder, had receivables from the company in the amount of \$1,060.

FINANCING NEEDS

Although we currently do not have any material commitments for capital expenditures, we expect our capital requirements to increase over the next several years as we continue to develop and test our suite of products, increase marketing and administration infrastructure, and embark on developing in-house business capabilities and facilities. Our future liquidity and capital funding requirements will depend on numerous factors, including, but not limited to, the levels and costs of our research and development initiatives, the cost of hiring and training additional sales and marketing personnel to promote our products and the cost and timing of the expansion of our marketing efforts.

Based on our current business plan, we anticipate that our existing cash balances and cash generated from future sales will be sufficient to permit us to conduct our operations and to carry out our contemplated business plans for the next twelve months. Currently, the only external sources of liquidity are our banks, and we may seek additional financing from them or through securities offerings to expand our operations, using new capital to develop new products, enhance existing products or respond to competitive pressures.

RESULTS OF OPERATIONS

FISCAL YEAR ENDED DECEMBER 31, 2009 COMPARED TO FISCAL YEAR ENDED DECEMBER 31, 2008

For the fiscal year ended December 31, 2009, we had total revenue of \$9,090,000 as compared to revenue of \$10,464,000 for the fiscal year ended December 31, 2008. The decrease in revenue of \$1,374,000, or 13.1% is mainly due to the decrease in the commercial business and the increase in USD/Shekel exchange rate, since part of the sales are Shekel related: The average USD/shekel exchange rates increased/ by 9.6% from 3.5878 the average for 2008 to 3.9326 the average for 2009.

Gross profit totaled \$2,242,000 for the fiscal year ended December 31, 2009 as compared to \$2,912,000 for the fiscal year ended December 31, 2008, a decrease of \$670,000 or 23.0%. The decrease in gross profit is mainly due to the decrease in sales. Gross profit as a percentage of sales for the fiscal year ended December 31, 2009 was 24.7% as compared to 27.8% for the fiscal year ended December 31, 2008. The decrease in gross profit as a percentage of sales is mainly a result of the decrease in gross profit as a percentage of sales at Enertec Electronics from 30.4% to 19.1% due to the intense competition in the commercial market and the decrease in gross profit as a percentage of sales at Enertec Systems from 26.8% to 26.5% due to several new projects with upgraded technology delivered during 2009 with lower profit margin as a result of the higher engineering cost.

Total operating expenses are comprised of R&D costs, selling, general and administrative expenses. Operating expenses for the fiscal years ended December 31, 2009 and 2008 were \$1,950,000 and \$2,180,000 respectively, a decrease of \$230,000 or 10.6%. The decrease in operating expenses is attributable to the following factors:

- Decrease in G&A expenses of \$294,000, mainly due the decrease in professional services expenses and the decrease in USD/Shekel exchange rate and the decrease in selling expenses of \$ 44,000, partly offset by an increase in R&D spending of \$108,000

We experienced a loss of \$120,000 in the fiscal year ended 2009 compared to a profit of \$171,000 in the fiscal year ended December 31, 2008. This decrease in net income in the amount of \$291,000 or 170.2% is mainly due to the decrease of \$670,000 in gross profit, an increase in the other expenses of \$49,000 partly offset by the decrease in the total operating expenses of \$230,000, the decrease in provision for income taxes of \$13,000, the decrease in interest expenses of \$138,000 and the decrease in minority interest of \$47,000.

As detailed in this annual report, our business is comprised of Enertec Electronics which derives its revenues from the commercial arena and Enertec Systems, which derives its revenues from the military arena.

For the fiscal year ended December 31, 2009, Enertec Electronics' revenue, costs of sales and gross profits were and \$2,245,000, \$1,816,000 and \$429,000, respectively, and \$2,927,000, \$2,037,000 and \$890,000 for the fiscal year ended December 31, 2008. Revenue decreased \$682,000 or 23.3% due to the overall market slow down during 2009 resulting in a decrease of sales of our customers to this sector which is reflected in our sales to our customers and the increase in USD/Shekel exchange rate.

Costs of sales decreased approximately by \$221,000 or 10.8%. Gross profit decreased by \$461,000 or 51.8% mainly due to a lower decrease in cost of sales than the decrease in the revenues during 2009.

Gross profit as a percentage of sales has decreased from 30.4% to 19.1% mainly due to new orders received with a lower profit margin. Due to the intense competition in this market by aggressive local and overseas outsourcing we had to deeply cut in our profit margins.

For the twelve months ended December 31, 2009, revenues, costs of sales and gross profits from Enertec Systems 2001 were \$6,845,000, \$5,033,000, and \$1,812,000, respectively, and \$7,537,000, \$5,516,000 and \$2,021,000, respectively, for twelve months ended December 31, 2008. Revenue decreased by \$692,000 or 9.2% mainly as a result of an increase of 9.6% in the USD/shekel exchange rates since part of the sales are Shekel related.

Cost of sales decreased approximately \$483,000 or 8.8% mainly due to the decrease in sales.

Gross Profit decreased by \$209,000 or 10.3% mainly due to the decrease in sales.

Gross profit as a percentage of sales has decreased from 26.8% to 26.5% mainly due to several new projects with upgraded technology delivered during 2009 with lower profit margin as a result of the higher engineering cost. As of December 31, 2009, we had two customers that accounted for approximately 68.2% of accounts receivable. For the years ended December 31, 2009 and 2008, approximately 66.6% and 63.4% of our sales were to two customers, respectively.

OFF-BALANCE SHEET ARRANGEMENTS

We do not have any off balance sheet arrangements that are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues, results of operations, liquidity, capital expenditures or capital resources.

CRITICAL ACCOUNTING POLICIES

Concentration of Credit Risk - Concentrations of credit risk with respect to trade receivables are limited to customers dispersed primarily across Israel. All trade receivables are concentrated in the manufacturing and distribution of electronic components segment of the economy; accordingly the Company is exposed to business and economic risk. Although the Company does not currently foresee a concentrated credit risk associated with these trade receivables, repayment is dependent upon the financial stability of this segment of the economy.

Revenue Recognition and Customer Deposits - Revenue is recorded as product is shipped, the price has been fixed or determined, collectibility is reasonably assured and all material specific performance obligations have been completed. The product sold by the Company is made to the specifications of each customer; sales returns and allowances are allowed on a case-by-case basis, are not material to the financial statements and are recorded as an adjustment to sales. Cash payments received in advance are recorded as customer deposits.

Revenue relating to service is recognized on the straight-line basis over the life of the agreement, generally one year. For the years ended December 31, 2009 and 2008 revenue relating to service contracts is less than one percent of net sales and the financial instruments are at fair value.

Research and Development Costs - Research and development costs are charged to general and administrative expense in the accompanying statement of income and consist mainly of salaries. Research and development cost for the years ended December 31, 2009 and 2008 were approximately \$251,000 and \$143,000, respectively.

Financial Instruments - The carrying amounts of financial instruments, including cash and cash equivalents, accounts receivable, bank line of credit, short term bank loans and accounts payable and accrued expenses approximate fair value at December 31, 2009 because of the relatively short maturity of the instruments. The fair value of due from stockholder is not practical to estimate without incurring excessive cost and is carried at cost at December 31, 2009. The carrying value of the long-term debt approximate fair value at December 31, 2009 based upon debt terms available for companies under similar terms.

Foreign Currency Translation - Lapis Technologies, Inc. has one wholly owned subsidiary, Enertec Electronics Limited, an Israeli corporation, and one majority owned subsidiary, Enertec Systems 2001 Ltd., an Israeli corporation. The assets and liabilities of the foreign subsidiaries are translated at current exchange rates and related revenues and expenses at average exchange rates in effect during the year. Resulting translation adjustments, if material, are recorded as a separate component of accumulated other comprehensive income or loss.

ITEM 7A. QUANTATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

NOT APPLICABLE

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

All financial information required by this Item is attached hereto at the end of this report beginning on page F-1 and is hereby incorporated by reference.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

NOT APPLICABLE.

ITEM 9A. CONTROLS AND PROCEDURES.

As of the end of the period covered by this report, we conducted an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer of our disclosure controls and procedures (as defined in Rule 13a-15(e) and Rule 15d-15(e) of the Exchange Act). Based upon this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is: (1) accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure; and (2) recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms. There was no change to our internal controls or in other factors that could affect these controls during the three months ended December 31, 2009, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Our internal control system was designed to provide reasonable assurance to our management and Board of Directors regarding the preparation and fair presentation of published financial statements.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2009. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—Integrated Framework. Based on our assessment we believe that, as of December 31, 2009, our internal control over financial reporting is effective based on those criteria.

This annual report does not include an attestation report of the Company's registered accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission

ITEM 9B. OTHER INFORMATION.

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS, AND CORPORATE GOVERNANCE.

The members of our board of directors and our executive officers, together with their respective ages and certain biographical information are set forth below. Our directors receive no compensation for their services as board members but are reimbursed for expenses incurred by them in connection with attending board meetings. All directors hold office until the next annual meeting of our stockholders and until their successors have been duly elected and qualified. Our executive officers are elected by, and serve at the designation and appointment of, the board of directors. There are no family relationships among any of our directors or executive officers.

Name	Age	Position
Harry Mund	62	Chairman of the Board, Chief Executive Officer, President and Secretary
Miron Markovitz	62	Director, Chief Financial Officer and Principal Accounting Officer

The following is a brief account of the business experience of each of our directors and executive officers during the past five years or more.

HARRY MUND, our Chairman of the Board, Chief Executive Officer, President and Secretary since our inception, and has been the Chief Executive Officer and President of our subsidiary, Enertec Electronics Limited, since 1987. Mr. Mund is also the Chief Executive Officer and managing director of Enertec Management Limited (f/k/a Elcomtech Limited), a wholly owned subsidiary of Enertec Electronics Limited. From 1983 to 1987, Mr. Mund was the President and Chief Executive Officer of Enercon International, a marketing and sales firm of military and commercial power supplies and test equipment. Enercon International's activities were transferred to Enertec International in 1987, which subsequently became Enertec Electronics Limited in 1992. From 1975 to 1983, Mr. Mund worked for Elbit Systems as a design engineer of advanced test systems and as the head of the ATE engineering group. Mr. Mund attended Ben-Gurion University from 1970 to 1974 and earned a Bachelor of Science as an Electronic Engineer.

MIRON MARKOVITZ, a Director, our Chief Financial Officer and Principal Accounting Officer since our inception, has been the Chief Financial Officer of our subsidiary, Enertec Electronics Limited, since 1992, responsible for its accounting and financial management. He attended Haifa University from 1975 to 1978 and earned a BA in economics and accounting.

DIRECTOR COMPENSATION:

During 2009, our directors did not receive any compensation for serving on our board.

SIGNIFICANT EMPLOYEES

The following is a brief description of the business experience of each of our significant employees:

ZVI AVNI, age 48, was the System Division Manager for our subsidiary, Enertec Electronics Limited, from February 1997 to January 2002. His responsibilities included the design and manufacture of automatic test systems. Mr. Avni has 18 years of experience with ATE systems for the military market and worked at Elbit Systems for 12 years as an ATE group leader. Since January 2002, Mr. Avni has worked for Enertec Systems 2001 Ltd., which is owned by Enertec Management Limited 73 % and Harry Mund (27%) and continues to be responsible for the design and manufacture of the Automatic Test Systems and military systems. Mr. Avni graduated from Haifa Technion Institute of Technology in 1982 and earned a degree as a Practical Electronic Engineer.

Our future success depends, in significant part, on the continued service of certain key executive officers, managers, and sales and technical personnel, who possess extensive expertise in various aspects of the our business, including Mr. Mund ,Mr. Markovitz and Mr. Avni,. We may not be able to find an appropriate replacement for any of our key personnel. Any loss or interruption of our key personnel's services could adversely affect our ability to implement our business plan. It could also result in our failure to create and maintain relationships with strategic partners that are critical to our success. We do not presently maintain key-man life insurance policies on any of our officers.

EMPLOYMENT AGREEMENTS

None of our employees are subject to a collective bargaining agreement.

On August 12, 2009, Harry Mund entered into an employment agreement with Enertec Systems 2001 Ltd., pursuant to which Mr. Mund will be employed as a special advisor to the board of directors of Enertec Systems 2001 Ltd., for two days per week, for a term of 3 years, for a salary of 25,000 New Israeli Shekels (approximately \$6,500) per month

AUDIT COMMITTEE

Our Board of Directors acts as our audit committee. We do not have an audit committee financial expert because we have not been able to identify a suitable nominee to serve as an audit committee financial expert.

CODE OF ETHICS

We have adopted a Code of Ethics and Business Conduct for Officers, Directors and Employees that applies to all of our officers, directors and employees, including our chief executive officer and chief financial officer. The Code of Ethics is filed as Exhibit 14.1 to our annual report on Form 10-KSB for the fiscal year ended December 31, 2003, filed with the Securities and Exchange Commission on June 28, 2004. Upon request, we will provide to any person without charge a copy of our Code of Ethics. Any such request should be made to Attn: Harry Mund, C/O Ira Strassberg, Rogoff and Company, 275 Madison Avenue, NY, NY, 10016. Our telephone number is (212) 937-3580.

CHANGES IN NOMINATING PROCESS

None.

Outstanding Equity Awards at December 31, 2009

The Company did not have any equity awards outstanding as of December 31, 2009.

SECTION 16(A) BENEFICIAL OWNERSHIP COMPLIANCE

We do not have affiliated persons required to file reports under Section 16(a) of the Exchange Act.

Board Leadership Structure and Role in Risk Oversight

Although we have not adopted a formal policy on whether the Chairman and Chief Executive Officer positions should be separate or combined, we have traditionally determined that it is in the best interests of the Company and its shareholders to combine these roles. Mr. Mund has served as our Chairman since inception. Due to the small size and early stage of the Company, we believe it is currently most effective to have the Chairman and Chief Executive Officer positions combined.

Our board of directors is primarily responsible for overseeing our risk management processes on behalf of the Company. The board of directors receives and reviews periodic reports from management, auditors, legal counsel, and others, as considered appropriate regarding our company's assessment of risks. The board of directors focuses on the most significant risks facing our company and our company's general risk management strategy, and also ensure that risks undertaken by our Company are consistent with the board's appetite for risk. While the board oversees our company's risk management, management is responsible for day-to-day risk management processes. We believe this division of responsibilities is the most effective approach for addressing the risks facing our company and that our board leadership structure supports this approach.

ITEM 11. EXECUTIVE COMPENSATION.

EXECUTIVE COMPENSATION

SUMMARY COMPENSATION TABLE

The following information is furnished for the years ended December 31, 2009 and 2008 for our principal executive officer. No executive officer other than Mr. Mund received total annual compensation in excess of \$100,000, during fiscal years 2008 and 2009.

Name and Principal Position	Year	Nonqualified Non-Equity Compensation							Total
		Salary	Bonus	Stock Awards	Options Awards	Incentive Compensation	Deferred Compensation	All Other Compensation	
		\$	\$ (3)	\$	\$ (5)	\$	\$	\$	\$
Harry Mund	2009	\$ 360,885	\$ 45,778					\$ 25,178	\$ 431,841
Chief Executive Officer and President	2008	\$ 387,050		—	—	—	—	—\$ 18,484*	\$ 405,534

* Represents compensation in lieu of accrued vacation and recreation days pursuant to Company policies. In Israel it is customary to offer financial compensation in lieu of vacation and recreation days (days set aside for employees to enjoy recreational activities)

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS.

he following table sets forth certain information, as of February 23, 2010 with respect to the beneficial ownership of the outstanding common stock by (i) each person known by us to be the beneficial owner of more than 5% of our common stock; (ii) each of our directors; (iii) each of our executive officers; and (iv) our executive officers and directors as a group. Unless otherwise indicated, the persons named in the table below have sole voting and investment power with respect to the number of shares indicated as beneficially owned by them. The address for each of the below persons is c/o Enertec Electronics Limited, 27 Rechov Ha'Mapilim, Kiriat Ata, Israel, P.O. Box 497, Kiriat Motzkin 26104, Israel.

Name of Beneficial Owner	Number of Shares Beneficially Owned	Percentage Ownership *
D.L Capital Ltd. (“D.L. Capital”	3,306,330	51%
Harry Mund	1,443,670	22.3
Miron Markovitz	9,000	**%
Zvi Avni	1,000,000	15.4%
All Directors and Executive Officers as a Group (2 persons)	1,452,670	22.4%

* Applicable percentage ownership is based on 6,483,000 shares of common stock outstanding as of February 23, 2009, together with securities exercisable or convertible into shares of common stock within 60 days of February

23, 2009 for each stockholder. Beneficial ownership is determined in accordance with the rules of the Securities and Exchange Commission and generally includes voting or investment power with respect to securities. Shares of common stock that are currently exercisable or exercisable within 60 days of February 23, 2009 are deemed to be beneficially owned by the person holding such securities for the purpose of computing the percentage of ownership of such person, but are not treated as outstanding for the purpose of computing the percentage ownership of any other person.

*

Less than 1% of the outstanding shares of common stock

SECURITIES AUTHORIZED FOR ISSUANCE UNDER EQUITY COMPENSATION PLANS

The following table shows information with respect to each equity compensation plan under which the Company's common stock is authorized for issuance as of the fiscal year ended December 31, 2010.

EQUITY COMPENSATION PLAN INFORMATION

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
	(a)	(b)	(c)
Equity compensation plans approved by security holders	-0-	-0-	500,000
Equity compensation plans not approved by security holders	-0-	-0-	-0-
Total	-0-	-0-	500,000

2002 STOCK OPTION PLAN

We adopted, subject to stockholder approval, our 2002 Stock Option Plan on October 16, 2002. Our stockholders approved the plan on October 16 2002. The plan provides for the grant of options intended to qualify as "incentive stock options", options that are not intended to so qualify or "nonstatutory stock options" and stock appreciation rights. The total number of shares of common stock reserved for issuance under the plan is 500,000, subject to adjustment in the event of a stock split, stock dividend, recapitalization or similar capital change, plus an indeterminate number of shares of common stock issuable upon the exercise of "reload options" described below. We have not yet granted any options or stock appreciation rights under the plan.

The plan is administered by our board of directors, which will select the eligible persons to whom options shall be granted, determines the number of common shares subject to each option, the exercise price therein and the periods during which options are exercisable, interprets the provisions of the plan and, subject to certain limitations, may amend the plan. Each option granted under the plan shall be evidenced by a written agreement between us and the optionee.

Options may be granted to our employees (including officers) and directors, any of our subsidiaries, and certain of our consultants and advisors. Incentive stock options can be issued to all employees (including officers). Nonstatutory stock options can be issued to employees, non-employee directors, or consultants and advisors.

The exercise price for incentive stock options granted under the plan may not be less than the fair market value of the common stock on the date the option is granted, except for options granted to 10% stockholders which must have an exercise price of not less than 110% of the fair market value of the common stock on the date the option is granted. The exercise price for nonstatutory stock options is determined by the board of directors, in its sole discretion, but

may not be less than 85% of the fair market value of the Company's common stock at the date of grant. Incentive stock options granted under the plan have a maximum term of ten years, except for 10% stockholders who are subject to a maximum term of five years. The term of nonstatutory stock options is determined by the Board of Directors. Options granted under the plan are not transferable, except by will and the laws of descent and distribution.

The board of directors may grant options with a reload feature. Optionees granted a reload feature shall receive, contemporaneously with the payment of the option price in common stock, a right to purchase that number of common shares equal to the sum of (i) the number of shares of common stock used to exercise the option, and (ii) with respect to nonstatutory stock options, the number of shares of common stock used to satisfy any tax withholding requirement incident to the exercise of such nonstatutory stock option.

Also, the plan allows the board of directors to award to an optionee for each share of common stock covered by an option, a related alternate stock appreciation right, permitting the optionee to be paid the appreciation on the option in lieu of exercising the option. The amount of payment to which an optionee shall be entitled upon the exercise of each stock appreciation right shall be the amount, if any, by which the fair market value of a share of common stock on the exercise date exceeds the exercise price per share of the option.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE.

Our management believes the terms of each of the below transactions are at least as favorable as could be obtained from unrelated third parties.

During 2001, our subsidiary Enertec Electronics Limited sold a building to Mund Holding Limited, an entity wholly owned by Harry Mund, our Chief Executive Officer and President, for approximately \$170,320. An independent appraiser and governmental body, The Capital Gains Authority, determined the sale price. The building was paid in part with cash in the amount of \$93,245, and the balance by a non-interest bearing loan. There are no written agreements setting for the repayment terms. The parties have orally agreed that the amount outstanding is due on demand. As of December 31, 2008, the loan was fully repaid.

Enertec Electronics rents the building's office and manufacturing space from Mund Holding Limited for \$32,008 annually for twenty-four months ending December 31, 2009.

On February 28, 2008, we entered into an agreement for the issue and sale of shares in Lapis Technologies, Inc. and the transfer of shares of Star Night Technologies Ltd. to us (the "Lapis SPA"), with Harry Mund, and Mordechai Solomon (the "Investor"). Mr. Mund is the Company's chief executive officer, director, and majority stockholder.

In connection with the Lapis SPA, on February 28, 2008, our indirect wholly owned subsidiary, Enertec Management Ltd. ("Enertec Management") (which we own through our direct wholly owned subsidiary Enertec Electronics Ltd.), entered into an agreement (the "Systems SPA") for the sale and purchase of Enertec Systems 2001 Ltd., with Harry Mund, and S.D.S. (Star Defense Systems) Ltd., a company traded on the Tel Aviv Stock Exchange ("S.D.S.") whose majority stockholder is Mordechai Solomon.

In connection with the Lapis SPA and the Systems SPA, we also entered into, on February 28, 2008, an agreement with Mund Holdings Ltd., a company owned by Harry Mund, for the sale of the entire issued and outstanding share capital of Enertec Electronics Ltd. (the "Electronics SPA").

The Investor, on behalf of himself and SDS, verbally informed Enertec, the Company and Enertec Management that the Investor and SDS will not complete the transactions contemplated by the Lapis SPA and the Systems SPA. The latter is evidenced by a report filed by SDS with the Tel Aviv Stock Exchange on September 10, 2008, to inform that it cancels the assembly of its general meeting scheduled for September 11, 2008 (the "Report"). According to the Report, the assembly was cancelled pursuant to Mordechai Solomon's, a controlling shareholder in SDS, notice to SDS that the transactions contemplated by the Lapis SPA (and, as a result, the transactions contemplated by the Systems SPA) will not be completed.

Because the transactions contemplated by the Lapis SPA and the Systems SPA will not be completed, the Company will also not complete the transactions contemplated by the Electronics SPA.

Pursuant to a Stock Purchase Agreement (the "Purchase Agreement"), dated July 5, 2009, on December 3, 2009, Mr. Mund transferred to D.L Capital Ltd. ("D.L. Capital"), 3,306,330 shares of the Common Stock of Lapis Technologies, Inc. The number of shares purchased represents 51% of the issued and outstanding shares of Lapis Technologies, Inc.'s common stock (the "Controlling Shares"). Pursuant to the Purchase Agreement, D.L Capital is also obligated to purchase an additional 1,443,670 shares of the Common Stock beneficially owned by Mr. Mund, which shares are being held in escrow (the "Escrowed Shares"). Mr. Mund is Lapis Technologies, Inc.'s Chief Executive Officer and President, and prior to this transaction was its majority stockholder.

The purchase price for the Controlling Shares was 1,000,000 New Israeli Shekels ("NIS") (approximately \$260,000) in cash plus the assumption by D.L Capital of financial liabilities and guarantees in the sum of 11,000,000 NIS (approximately \$2,900,000). In addition, in consideration of the Escrowed Shares D.L Capital shall pay for a period of three years, a yearly cash payment of the higher between 1,000,000 NIS or 25% of annual net profit of Enertec System 2001 Ltd. and shall assume additional financial liabilities and guarantees in the sum of 3,000,000 NIS (approximately \$790,000). D.L. Capital's source of the funds and liabilities and guarantees assumed was its working capital.

The Escrowed Shares will be released in accordance with the terms and conditions set out in the Purchase Agreement.

Pursuant to the Purchase Agreement, D.L. Capital and Mr. Mund agreed that, as soon as practicable following the closing under the Purchase Agreement, (i) the Company or a subsidiary of the Company would enter into an employment agreement with Mr. Mund pursuant to which Mr. Mund would be employed as a special advisor to the board of directors of the Company or a subsidiary thereof, for two days per week, for a term of 3 years, for a salary of 25,000 New Israeli Shekels (approximately \$6,500) per month, (ii) D.L. Capital and Mr. Mund would enter into a shareholders agreement, pursuant to which Mr. Mund would vote the Escrowed Shares in accordance with how D.L. Capital shall vote the Controlling Shares, and Mr. Mund shall receive certain protective provisions relating to his rights as a minority shareholder, including, without limitation, veto rights in respect the sale of the majority of the business or assets of the Company, and (iii) D.L. Capital (directly or indirectly) and the Company would enter into a consulting agreement under which D.L Capital shall provide Company or any of its subsidiaries with consulting services for a monthly compensation of 50,000 New Israeli Shekels (approximately \$13,100) per month.

Neither of our directors are independent as that term is defined under the Nasdaq Marketplace Rules.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES.

AUDIT FEES

The aggregate fees billed for professional services rendered by our principal accountants for the audit of our financial statements, for the reviews of the financial statements included in our annual report on Form 10-K and Form 10-KSB, and for other services normally provided in connection with statutory filings were \$16,150 and \$20,492 for the years ended December 31, 2009 and 2008, respectively.

AUDIT-RELATED FEES

We incurred fees of \$41,900 and \$43,600 for the years ended December 31, 2009 and 2008, respectively, for professional services rendered by our principal accountants that are reasonably related to the performance of the audit or review of our financial statements and not included in "Audit Fees."

TAX FEES

The aggregate fees billed for professional services rendered by our principal accountants for tax compliance, tax advice, and tax planning were \$2,000 and \$2,000 for the years ended December 31, 2009 and December 31, 2008, respectively. The services for which such fees were paid consisted of filing our tax returns for 2009 and 2008.

ALL OTHER FEES

We did not incur any fees for other professional services rendered by our principal accountants during the years ended December 31, 2009 and December 31, 2008.

AUDIT COMMITTEE PRE-APPROVAL POLICIES AND PROCEDURES

Our Board of Directors acts as our audit committee, and consults with respect to audit policy, choice of auditors, and approval of out of the ordinary financial transactions.

Independent Auditors' Report

To the Stockholders' and the Board of Directors of
Lapis Technologies, Inc.

We have audited the accompanying consolidated balance sheet of Lapis Technologies, Inc. and Subsidiaries (the "Company") as of December 31, 2009 and 2008, and the related consolidated statements of income, changes in stockholders' equity and comprehensive income and cash flows for each of the two years in the period ended December 31, 2009. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based upon our audit.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Lapis Technologies, Inc. and Subsidiaries as of December 31, 2009 and 2008 and the consolidated results of their operations and their cash flows for each of the two years in the period ended December 31, 2009, in conformity with accounting principles generally accepted in the United States of America.

LAPIS TECHNOLOGIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 2009

(In Thousands, Except Share and Per Share Amounts)

NOTE 1 - DESCRIPTION OF BUSINESS AND ACQUISITION

Lapis Technologies, Inc. (the "Company") was incorporated in the State of Delaware on January 31, 2002. The Company's operations are conducted through its wholly owned Israeli Subsidiary, Enertec Electronics Ltd. ("Enertec") and its majority owned Israeli subsidiary Enertec Systems 2001 Ltd. ("Systems"). Enertec is engaged in the manufacturing, distribution and marketing of electronic components and products relating to power supplies, converters and related power conversion products, automatic test equipment, simulators and various military and airborne systems, within the State of Israel.

On January 1, 2002 Enertec assisted in the organization of Systems in exchange for 25% of the common stock of Systems. This investment was accounted for under the equity method. Systems is engaged in the manufacturing of electronic components primarily for military use. On December 31, 2002 Enertec increased its common stock ownership interest in Systems to 55% for \$71, which was included in accounts payable and accrued expenses in the accompanying consolidated balance sheet at December 31, 2002. This amount was paid during January 2003.

NOTE 2 – BASIS OF PRESENTATION

The accompanying consolidated financial statements present the results of operations of the Company for the years ended December 31, 2009 and 2008 and their wholly owned subsidiary Enertec Electronics Ltd. and their ownership interest in Enertec Systems 2001 Ltd. All material intercompany accounts and transactions have been eliminated in consolidation.

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Concentration of Credit Risk

Concentrations of credit risk with respect to trade receivables are limited to customers dispersed primarily across Israel. All trade receivables are concentrated in the manufacturing and distribution of electronic components segment of the economy; accordingly the Company is exposed to business and economic risk. Although the Company does not currently foresee a concentrated credit risk associated with these trade receivables, repayment is dependent upon the financial stability of this segment of the economy.

LAPIS TECHNOLOGIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 2009
(In Thousands, Except Share and Per Share Amounts)

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

Cash and Cash Equivalents

For the purpose of the statement of cash flows the Company considers all highly liquid investments with an original maturity of three months or less at the time of purchase to be cash equivalents.

Allowance for Doubtful Accounts

The Company estimates uncollectibility of accounts receivable by analyzing historical bad debts, customer concentrations, customer credit worthiness and current economic trends when evaluating the adequacy of the allowance for doubtful accounts. At December 31, 2009 the Company has not recorded an allowance for doubtful accounts.

Inventories

Inventories are stated at the lower of cost (first-in, first-out basis) or market.

Property and Equipment

Property and equipment are stated at cost less accumulated depreciation and amortization. Routine maintenance and repairs and minor replacement costs are charged to expense as incurred, while expenditures that extend the life of these assets are capitalized. Depreciation and amortization are provided for in amounts sufficient to relate the cost of depreciable assets to operations over their estimated service lives. The Company uses the same depreciation method for both financial reporting and tax purposes. Upon the sale or retirement of property and equipment, the cost and related accumulated depreciation and amortization will be removed from the accounts and the resulting profit or loss will be reflected in the statement of income. The estimated lives used to determine depreciation and amortization are:

Leasehold improvements	10 years
Machinery and equipment	10 years
Furniture and fixtures	14 years
Transportation equipment	7 years
Computer equipment	3 years

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

Income Taxes

The Company uses the liability method of accounting for income taxes as required by Statement of Financial Accounting Standards ("SFAS") No. 109 "Accounting for Income Taxes." Under this method, deferred tax assets and liabilities are determined based on differences between financial reporting and tax basis of assets and liabilities. Deferred tax assets and liabilities are measured using enacted tax rates and laws that will be in effect when the differences are expected to reverse. Valuation allowances are established when it is determined that it is more likely than not that the deferred tax assets will not be realized.

Warranty Reserves

The Company includes a one-year warranty on all products sold. A provision for estimated warranty costs, if material, is recorded at the time of sale. Based upon historical experience the Company has not incurred material costs relating to its warranty and has therefore not recorded a warranty provision at December 31, 2009.

Revenue Recognition and Customer Deposits

Revenue is recorded as product is shipped, the price has been fixed or determined, collectability is reasonably assured and all material specific performance obligations have been completed. The product sold by the Company is made to the specifications of each customer; sales returns and allowances are allowed on a case-by-case basis, are not material to the financial statements and are recorded as an adjustment to sales. Cash payments received in advance are recorded as customer deposits.

Revenue relating to service is recognized on the straight-line basis over the life of the agreement, generally one year. For the years ended December 31, 2009 and 2008 revenue relating to service contracts is less than one percent of net sales.

Shipping and Handling Costs

Shipping and handling costs are included in cost of sales in accordance with guidance established by the Emerging Issues Task Force ("EITF") issue No. 00-10, "Accounting for Shipping and Handling Costs."

Stock Based Compensation

Effective January 1, 2003 the Company adopted the fair method value alternative of SFAS No. 148, "Accounting for Stock-Based Compensation-Transition and Disclosure." Under the fair value based method, compensation cost is measured at the grant date based on the value of the award and is recognized over the service period, which is usually the vesting period. For stock options, fair value is determined using an option-pricing model that takes into account the stock price at the grant date, the exercise price, the expected life of the option, the volatility of the underlying stock and the expected dividends on it, and the risk-free interest rate over the expected life of the option. For the years ended December 31, 2009 and 2008 the Company did not issued any stock options.

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

Research and Development Costs

Research and development costs are charged to general and administrative expense in the accompanying statement of income and consist of salaries. Research and development cost for the years ended December 31, 2009 and 2008 were approximately \$251 and \$ 143 respectively.

Earnings per Share

The Company presents basic earnings per share and, if appropriate, diluted earnings per share in accordance with the provisions of SFAS No. 128 "Earnings per Share" ("SFAS 128").

Under SFAS 128 basic net earnings per share is computed by dividing the net earnings for the year by the weighted average number of common shares outstanding during the year. Diluted net earnings per share is computed by dividing the net earnings for the year by the weighted average number of common shares and common share equivalents outstanding during the year. Common stock equivalents would arise from the granting of stock options. For the years ended December 31, 2009, and 2008 the Company did not grant any stock options. Diluted earnings per share is not included as it is the same as basic for all periods shown.

Impairment of Long-Lived Assets

The Company reviews long-lived assets for impairment whenever circumstances and situations change such that there is an indication that the carrying amounts may not be recovered. In such circumstances, the Company will estimate the future cash flows expected to result from the use of the asset and its eventual disposition. Future cash flows are the future cash inflows expected to be generated by an asset less the future outflows expected to be necessary to obtain those inflows. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, the Company will recognize an impairment loss to adjust to the fair value of the asset. Management believes that there is no impairment of long-lived assets at December 31, 2009.

Minority Interest

Minority interest represents the minority stockholders' proportionate share of the equity of the Company's subsidiary at December 31, 2009. The minority interest is adjusted for the minority's share of the earnings or loss of Systems.

Financial Instruments

The carrying amounts of financial instruments, including cash and cash equivalents, accounts receivable, bank line of credit, short term bank loans and accounts payable and accrued expenses approximate fair value at December 31, 2009 because of the relatively short maturity of the instruments. The fair value of due from stockholder is not practical to estimate without incurring excessive cost and is carried at cost at December 31, 2009. The carrying value of the long-term debt approximate fair value at December 31, 2009 based upon debt terms available for companies under similar terms.

(In Thousands, Except Share and Per Share Amounts)

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

Comprehensive Income (Loss)

Comprehensive income (loss) consists of net income for the year and foreign currency translation adjustments.

Foreign Currency Translation

The assets and liabilities of the foreign subsidiaries are translated at current exchange rates and related revenues and expenses at average exchange rates in effect during the year. Resulting translation adjustments, if material, are recorded as a separate component of accumulated other comprehensive income or loss.

Use of Estimates

In preparing financial statements in conformity with accounting principles generally accepted in the United States of America, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses during the reporting period. Actual results could differ from those estimates.

Reclassification

Certain reclassifications have been made to the prior year's financial statements in order to conform to the current year presentation.

New Accounting Pronouncements

In June 2009, the FASB issued SFAS No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting. SFAS 168 represents the last numbered standard to be issued by FASB under the old (pre-Codification) numbering system, and amends the GAAP hierarchy. On July 1, FASB launched the new FASB's Codification (full name: the FASB Accounting Standards Codification TM.) The Codification supersedes existing GAAP for nongovernmental entities; governmental entities will continue to follow standards issued by FASB's sister organization, the Governmental Accounting Standards Board (GASB). This pronouncement has no effect on the Company's financial statements.

LAPIS TECHNOLOGIES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2009

(In Thousands, Except Share and Per Share Amounts)

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

In June 2009, the FASB issued SFAS No. 167, a revision to FASB Interpretation No. 46(R), Consolidation of Variable Interest Entities, and will change how a company determines when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. Under SFAS No. 167, determining whether a company is required to consolidate an entity will be based on, among other things, an entity's purpose and design and a company's ability to direct the activities of the entity that most significantly impact the entity's economic performance. SFAS 167 is effective at the start of a company's first fiscal year beginning after November 15, 2009, or January 1, 2010 for companies reporting earnings on a calendar-year basis. The Company does not expect the adoption of SFAS No. 167 will have a material effect on its financial position, results of operations or cash flows.

In June 2009, the FASB issued SFAS No. 166, a revision to SFAS No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities, and will require more information about transferred of financial assets and where companies have continuing exposure to the risks related to transferred financial assets. SFAS 166 is effective at the start of a company's first fiscal year beginning after November 15, 2009, or January 1, 2010 for companies reporting earnings on a calendar-year basis. The Company does not expect the adoption of SFAS No. 140 will have a material effect on its financial position, results of operations or cash flows.

In May 2009, the FASB issued SFAS No. 165, "Subsequent Events" ("SFAS 165"). SFAS 165 is intended to establish general standards of accounting for and disclosures of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. It requires the disclosure of the date through which an entity has evaluated subsequent events and the basis for selecting that date, that is, whether that date represents the date the financial statements were issued or were available to be issued. SFAS 165 is effective for interim or annual financial periods ending after June 15, 2009. The Company does not expect the adoption of SFAS No. 165 will have a material effect on its financial position, results of operations or cash flows.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the AICPA, and the SEC did not, or are not believed by management to, have a material impact on the Company's present or future consolidated financial statements.

NOTE 6 - INCOME TAXES

The provision for income taxes consists of the following for the years ended December 31:

	2009	2008
Current:		
Foreign	\$ 4	\$ 17
Deferred:		
Foreign	\$ -	\$ -
Total provision for income taxes	\$ 4	\$ 17

NOTE 6 - INCOME TAXES – (continued)

At December 31, 2009 the Company has a net operating loss carryforward of approximately \$370 which may be utilized to offset future taxable income for United States Federal tax purposes. This net operating loss carryforward begins to expire in 2022. The only timing difference which creates a deferred tax asset is the net operating loss carryforward. This net operating loss carryforward creates a deferred tax asset of approximately \$10. Since it is more likely than not that the Company will not realize a benefit from these net operating loss carryforwards a 100% valuation allowance has been recorded to reduce the deferred tax asset to its net realizable value.

Deferred tax assets are classified as current or non-current, according to the classification of the related asset or liability for financial reporting. At December 31, 2008 the Company's wholly owned Israeli subsidiary has a deferred tax asset of approximately \$20, due to timing differences relating to severance payable. The Israeli subsidiary has not recorded a valuation allowance as it is more likely than not that the timing differences will be utilized.

The following is a summary of the components of non-current deferred tax assets at December 31, 2008:

Severance payable	\$ 20
Net operating loss carryforward	370
Valuation allowance	(370)
Deferred tax assets	\$ 20

NOTE 6 - INCOME TAXES - continued

Differences between the United States Federal statutory income tax rate and the effective tax rate are as follows for the years ended December 31:

	2009	2008
Federal statutory rate	34.0%	34.0%
Valuation Allowance	(34.0)	(34.0)
Effect of foreign taxes	0.0	7.0
	0.0	7.0

NOTE 7 - LONG-TERM DEBT

Long-term debt consists of the following at December 31, 2009 and 2008:

	2009	2008
Bank line of credit due December 31, 2009 at 6.7% per annum	\$ 96	\$ 1,248
Short-term bank loans, payable within twelve months at rates ranging from 5.5% per annum and 7.5% per annum	2,990	4,124
Long Term loans, due between January 2010 and June 2014 at rates ranging from 7.25% per annum and 8.15% per annum	398	249
	3,484	5,621
Less current portion of term loans	3,174	5,569
	\$ 310	\$ 52

The Company has pledged its working capital including its accounts receivables as collaterals against its long term debt, which is payable to several financial institutions. In addition, two of the company's officers have pledged personal assets as collateral for the Company's debt as defined in the agreement.

The aggregate maturities of long-term debt are as follows at December 31, 2009

Year Ended

2010	\$ 3,174
2014	310
	\$ 3484

NOTE 8 - SEVERANCE PAYABLE

Severance payable represents amounts computed on employees' most recent salary and the number of years working in Israel. The Company's liability is partially offset by amounts deposited to insurance policies, which are under the company's control.

NOTE 9 – STOCK OPTION PLAN

On October 16, 2002 the Board of Directors of the Company authorized the formation of the 2002 Stock Option Plan (the "Plan"), subject to stockholder approval. The Plan provides for the granting of incentive stock options, non-statutory stock options and stock appreciation rights. The incentive stock options can be granted to employees, including officers, or any subsidiary of the Company. The non-statutory stock options can be granted to all employees, including officers, non-employee directors, consultants or any subsidiary of the Company. Non-statutory stock options can only be granted to consultants that have rendered a bona fide service to the Company, so long as the service is not in connection with the offer or sale of securities in a capital raising transaction. The number of shares of common stock reserved for issuance under the Plan is 500,000, subject to adjustment in the event of a stock split, stock dividend, recapitalization or similar change in the Company's capital structure.

Incentive stock options must be granted prior to ten years from the date the Plan was initially adopted by the Board of Directors. The option price for shares issued as incentive stock options shall not be less than the fair market value of the Company's common stock at the date of grant unless the option is granted to an individual who, at the date of the grant, owns more than 10% of the total combined voting power of all classes of the Company's stock (the "Principal Stockholder"). Then the option price shall be at least 110% of the fair market value at the date the option is granted. No incentive stock option granted under the Plan shall be exercisable after ten years from its grant date. If the incentive stock option is granted to a Principal Stockholder then the exercise period is five years from the date of grant. Every incentive stock option granted under the Plan shall be subject to earlier termination as expressly provided for in the Plan.

NOTE 9 – STOCK OPTION PLAN - continued

The option price for shares issued under the non-statutory stock options shall be determined at the sole discretion of the Board of Directors, but may not be less than 85% of the fair market value of the may be of such duration as shall be determined by the Board of Directors.

NOTE 10 – RELATED PARTIES

Due to Stockholder

At December 31, 2009 the majority stockholder had advanced the Company a total of \$1,060.

NOTE 11 – RELATED PARTIES - continued

Due from Affiliate

During 2001 the Company entered into a sale-leaseback transaction with an entity owned by the majority stockholder of the Company. The Company sold a building for approximately \$170 and received approximately \$113 in cash and a note receivable for \$57, which was paid in full during the year ended December 31, 2003. No gain or loss was recorded on this transaction, as the book value of the building equaled the fair market value. The Company has agreed to exercise its option to rent this property through December 31, 2008 at approximately \$32 annually with an option to renew the lease for an additional two years ending December 31, 2010. This lease has been classified as an operating lease.

NOTE 12 - COMMITMENTS AND CONTINGENCIES

Lease commitments

The Company leases certain office and manufacturing space under two non-cancellable operating leases expiring at December 31, 2010 and March 31, 2010. Rent expense, including municipal taxes and utilities associated with the leases approximated \$84 and \$65, respectively, for the years ended December 31, 2009 and 2008.

At December 31, 2009, total minimum rentals under noncancellable operating leases with an initial or remaining term lease term of one year or more are as follows:

Year Ending December 31:		
2009	\$	63

Legal proceedings

We are not subject to any pending or threatened legal proceedings, nor is our property the subject of a pending or threatened legal proceeding. None of our directors, officers or affiliates is involved in a proceeding adverse to our business or has a material interest adverse to our business.

NOTE 12 - CONCENTRATIONS

The Company had deposits with commercial financial institutions, which, at times, may exceed the FDIC insured limits of \$100 in the United States. Management has placed these funds in high quality institutions in order to minimize the risk. Cash held in Israel at December 31, 2008 was \$ 763 and at December 31, 2009 was \$313

As of December 31, 2009, we had two customers that accounted for approximately 68.2% of accounts receivable. For the years ended December 31, 2009 and 2008 approximately 66.6% and 63.4% of our sales were to two customers respectively.

NOTE 13- SEGMENT AND GEOGRAPHIC INFORMATION

Information about the Company's assets in different geographic locations at December 31, 2009 is shown below pursuant to the provisions of SFAS 131, "Disclosures About Segments of an Enterprise and Related Information."

NOTE 14 – CHANGE OF CONTROL

Pursuant to a Stock Purchase Agreement (the “Purchase Agreement”), dated July 5, 2009, on December 3, 2009, Mr. Mund transferred to D.L Capital Ltd. (“D.L. Capital”), 3,306,330 shares of the Common Stock of Lapis Technologies, Inc. The number of shares purchased represents 51% of the issued and outstanding shares of Lapis Technologies, Inc.’s common stock (the “Controlling Shares”). Pursuant to the Purchase Agreement, D.L Capital is also obligated to purchase an additional 1,443,670 shares of the Common Stock beneficially owned by Mr. Mund, which shares are being held in escrow (the “Escrowed Shares”). Mr. Mund is Lapis Technologies, Inc.’s Chief Executive Officer and President, and prior to this transaction was its majority stockholder.

The purchase price for the Controlling Shares was 1,000,000 New Israeli Shekels ("NIS") (approximately \$260,000) in cash plus the assumption by D.L Capital of financial liabilities and guarantees in the sum of 11,000,000 NIS (approximately \$2,900,000). In addition, in consideration of the Escrowed Shares D.L Capital shall pay for a period of three years, a yearly cash payment of the higher between 1,000,000 NIS or 25% of annual net profit of Enertec System 2001 Ltd. and shall assume additional financial liabilities and guarantees in the sum of 3,000,000 NIS (approximately \$790,000). D.L. Capital’s source of the funds and liabilities and guarantees assumed was its working capital.

The Escrowed Shares will be released in accordance with the terms and conditions set out in the Purchase Agreement.

Pursuant to the Purchase Agreement, D.L. Capital and Mr. Mund agreed that, as soon as practicable following the closing under the Purchase Agreement, (i) the Company or a subsidiary of the Company would enter into an employment agreement with Mr. Mund pursuant to which Mr. Mund would be employed as a special advisor to the board of directors of the Company or a subsidiary thereof, for two days per week, for a term of 3 years, for a salary of 25,000 New Israeli Shekels (approximately \$6,500) per month, (ii) D.L. Capital and Mr. Mund would enter into a shareholders agreement, pursuant to which Mr. Mund would vote the Escrowed Shares in accordance with how D.L. Capital shall vote the Controlling Shares, and Mr. Mund shall receive certain protective provisions relating to his rights as a minority shareholder, including, without limitation, veto rights in respect the sale of the majority of the business or assets of the Company, and (iii) D.L. Capital (directly or indirectly) and the Company would enter into a consulting agreement under which D.L Capital shall provide Company or any of its subsidiaries with consulting services for a monthly compensation of 50,000 New Israeli Shekels (approximately \$13,100) per month.

Change of Control

Pursuant to a Stock Purchase Agreement (the “Purchase Agreement”), dated July 5, 2009, on December 3, 2009, Mr. Mund transferred to D.L Capital Ltd. (“D.L. Capital”), 3,306,330 shares of the Common Stock of Lapis Technologies, Inc. The number of shares purchased represents 51% of the issued and outstanding shares of Lapis Technologies, Inc.’s common stock (the “Controlling Shares”). Pursuant to the Purchase Agreement, D.L Capital is also obligated to purchase an additional 1,443,670 shares of the Common Stock beneficially owned by Mr. Mund, which shares are being held in escrow (the “Escrowed Shares”).
