Note 3: Income taxes:

In accordance with generally accepted accounting principles, the Company has analyzed its filing positions in federal and state income tax returns for the tax years ending December 31, 2007 through 2009 that remain subject to examination. The Company believes that all filing positions are highly certain and that all income tax filing positions and deductions would be sustained upon a taxing jurisdiction's audit. Therefore, no reserve for uncertain tax positions is required. No interest or penalties have been levied against the Company and none are anticipated.

Note 4: Land and Timber Purchases:

During the second quarter of 2010, the Company purchased 4 parcels of land with standing timber for \$599,944. Approximately 359 acres were purchased for \$340,965 and the standing timber was valued at \$258,979 based on timber cruises.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations

Revenue

Revenues for the first nine months of 2010 decreased by \$62,348 to \$1,231,446 from 2009. Royalty revenue from oil and gas revenues declined by \$155,208 from 2009. However, oil and gas lease bonuses and rentals increased by \$43,328 from 2009. The following schedule summarizes barrels and MCF reported from producers and presents an average price per barrel and per MCF for 2010 and 2009. The following schedule summarizes barrels and MCF produced and average price per barrel and per MCF for 2010 and 2009.

	2010	2009
Oil Royalty Revenue	\$ 613,938	\$ 702,455
Barrels produced	10,748	12,710
Average price per barrel	\$ 57.12	\$ 55.27
Gas Royalty Revenue	\$ 275,382	\$ 385,401
MCF produced	49,430	69,693
Average price per MCF	\$ 5.57	\$ 5.53

The decrease in oil royalty revenue is a net effect of a decrease in barrels produced and an increase in the average price per barrel. Resulting gas royalty revenue is the result of a decrease in MCF produced and an increase in the average price per MCF.

Agriculture revenue decreased from \$81,986 to \$69,975 in 2010, primarily due to non-renewal of one sugarcane related lease.

Timber revenue increased to \$132,842 in 2010 from \$27,971 in 2009. The Company harvested timber for internal maintenance programs which was not performed in 2009. Generally, timber prices have been depressed for the last several years and the Company has elected to only harvest timber for internal maintenance programs for age class timber and storm protection measures.

Costs and Expenses

Oil and gas production costs, primarily severance taxes, decreased by \$23,162 in 2010. This decrease is directly related to lower oil and gas revenues.

Timber expenses decreased by \$38,569 in 2010 due to a 2009 expense for a timber cruise mapping project.

General and administrative expenses increased by \$13,139 primarily due to an increase in office rental expense and public company compliance expense as well as the timing of recording auditing and employee training expenses.

Financial Condition

Current assets, securities available for sale and non-current certificate of deposits totaled \$6,692,802 and total liabilities equaled \$284,967 at September 30, 2010. Management believes existing cash and investments together with funds generated from operations should be sufficient to meet operating requirements and provide funds for strategic acquisitions.

The Company declared and paid another seven cents per common share during the quarter ended September 30, 2010. It is anticipated that the Company will be able to continue paying a seven cents per common share dividend each quarter. From time to time, the Company may elect to pay an extra dividend. In determining if an extra dividend will be declared, the Board of Directors will take into consideration the Company's current liquidity and capital resources and the availability of suitable timberland that has mineral potential.

Issues and Uncertainties

This Quarterly Report contains forward-looking statements. These statements are based on current expectations and assumptions that are subject to risks and uncertainties. Actual results could differ materially because of issues and uncertainties such as those discussed below, which, among others, should be considered in evaluating the Company's financial outlook.

Revenues from oil and gas provide most of the Company's income. All of these revenues come from wells operated by other companies from property belonging to CKX Lands, Inc. Consequently, these revenues fluctuate due to changes in oil and gas prices and changes in the operations of the other companies.

Item 3. Not applicable.

Item 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

The Company has evaluated the effectiveness of the design and operation of its disclosure controls and procedures pursuant to Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 as of the period covered by this report. Based on the evaluation, performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), the Company's management, including the CEO and CFO, concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by the report.

Changes in Internal Control Over Financial Reporting

There were no significant changes with respect to the Company's internal control over financial reporting or in other factors that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting during the quarter covered by this report.
