Note: File three copies of this Form, one of which must be manually signed. If space is insufficient, see Instruction 6 for procedure. Potential persons who are to respond to the collection of information contained in this form are not required to respond unless the form displays a currently valid OMB number. =>

Achieving the anticipated benefits of the HLSS Acquisition is subject to a number of uncertainties, including, without limitation, whether we are able to complete the integration of HLSS assets and manage the assumed liabilities efficiently. We depend on Ocwen for significant operational support with respect to HLSS assets. It is possible that the integration process could take longer than anticipated and could result in additional and unforeseen expenses, the disruption of our ongoing business, processes and systems, or inconsistencies in standards, controls, procedures, practices and policies, any of which could adversely affect our ability to achieve the anticipated benefits of the HLSS Acquisition. Difficulties in adding the assets into our business could also result in the loss of contract counterparties or other persons with whom we conduct business and potential disputes or litigation with contract counterparties or other persons with whom we conduct business. We could also be adversely affected by any issues attributable to either company's operations that arise or are based on events or actions that occurred prior to the closing of the HLSS Acquisition. Completion of the integration process is subject to a number of uncertainties, and no assurance can be given that the anticipated benefits will be realized in their entirety or at all or, if realized, the timing of their realization. Failure to achieve these anticipated benefits could result in increased costs or decreases in the amount of expected revenues and could adversely affect our future business, financial condition, operating results and cash flows.

We are responsible for certain of HLSS's contingent and other corporate liabilities.

Under the HLSS Acquisition Agreement, we have assumed and are responsible for the payment of HLSS's contingent and other corporate liabilities of: (i) liabilities for litigation relating to, arising out of or resulting from certain lawsuits in which HLSS is named as the defendant, (ii) HLSS's tax liabilities, (iii) HLSS's corporate liabilities, (iv) generally any actions with respect to the HLSS Acquisition brought by any third party and (v) payments under contracts. We currently cannot estimate the amount we may ultimately be responsible for as a result of assuming substantially all of HLSS's contingent and other corporate liabilities. The amount for which we are ultimately responsible may be material and have a material adverse effect on our business, financial condition, results of operations and liquidity. In addition, certain claims and lawsuits may require significant costs to defend and resolve and may divert management's attention away from other aspects of operating and managing our business, each of which could materially and adversely affect our business, financial condition, results of operations and liquidity.

In August 2014, HLSS restated its consolidated financial statements for the quarter ended March 31, 2014, and for the years ended December 31, 2013 and 2012, including the quarterly periods within those years, to correct the valuation and the related effect on amortization of its Notes Receivable-Rights to MSRs that resulted from a material weakness in its internal control over financial reporting.

On March 23, 2015, HLSS received a subpoena from the SEC requesting that it provide information concerning communications between HLSS and certain investment advisors and hedge funds. The SEC also requested documents relating to HLSS's structure, certain governance documents and any investigations or complaints connected to trading in HLSS's securities. We are cooperating with the SEC in this matter.

Three shareholder derivative actions have been filed in the United States District Court for the Southern District of Florida purportedly on behalf of Ocwen: (i) Sokolowski v. Erbey, et al., No. 14-CV-81601 (S.D. Fla.) (the "Sokolowski Action"); (ii) Hutt v. Erbey, et al., No. 15-CV-81709 (S.D. Fla.) (the "Hutt Action"); and (iii) Lowinger v. Erbey, et al., No. 15-CV-62628 (S.D. Fla.) (the "Lowinger Action"). On November 9, 2015, HLSS filed a motion to dismiss the Sokolowski Action. While that motion was pending, the Hutt Action, which at the time did not name HLSS as a defendant, was transferred from the Northern District of Georgia to the Southern District of Florida and the Lowinger Action, which at the time also did not name HLSS as a defendant, was filed. On January 8, 2016, the court consolidated the three actions and denied HLSS's motion to dismiss the Sokolowski complaint as moot and without prejudice to re-file a new motion to dismiss following the filing of a consolidated complaint. On March 8, 2016, plaintiffs filed their consolidated complaint. The consolidated complaint alleges, among other things, that certain of Ocwen's current and former directors and officers, including former HLSS Chairman William C. Erbey, breached their fiduciary duties to Ocwen by, among other things, causing Ocwen to enter into transactions that were harmful to Ocwen. The complaint further alleges that HLSS and others aided and abetted the alleged breaches of fiduciary duty by Mr. Erbey and the other directors and officers of Ocwen who have been named as defendants. The consolidated complaint also asserts causes of action against HLSS and others for unjust enrichment and for contribution. The lawsuit seeks money damages from HLSS in an amount to be proven at trial. On May 13, 2016, HLSS filed a motion to dismiss the consolidated complaint pursuant to Federal Rules of Civil Procedure 12(b)(6) and 23.1. On October 18, 2016, plaintiffs filed a settlement term sheet with the court outlining an agreement in principle that plaintiffs have reached with Ocwen which would resolve the lawsuit and result in a with prejudice dismissal and releases for all defendants, including HLSS and New Residential. Neither HLSS nor New Residential is required to make any settlement payment. The proposed settlement is subject to court approval following notice of the settlement to Ocwen's shareholders and a final settlement hearing.

One shareholder derivative action has been filed in Florida state court in the Circuit Court of the Fifteenth Judicial Circuit in and for Palm Beach County, Florida purportedly on behalf of Ocwen: Moncavage v. Faris, et al., No. 2015CA003244 (Fla. Palm Beach Cty. Ct.). The complaint alleges, among other things, that certain current and former Ocwen directors and officers breached their fiduciary duties to Ocwen. The complaint also alleged that HLSS and others aided and abetted the alleged breaches of fiduciary duty. The lawsuit seeks money damages from HLSS in an amount to be proved at trial. On November 9, 2015, the court entered an order staying all proceedings in the case pending further order of the Court. HLSS has not been served. If the litigation proceeds, New Residential intends to vigorously defend the lawsuit.

Three putative class action lawsuits have been filed against HLSS and certain of its current and former officers and directors in the United States District Court for the Southern District of New York entitled: (i) Oliveira v. Home Loan Servicing Solutions, Ltd., et al., No. 15-CV-652 (S.D.N.Y.), filed on January 29, 2015; (ii) Berglan v. Home Loan Servicing Solutions, Ltd., et al., No. 15-CV-947 (S.D.N.Y.), filed on February 9, 2015; and (iii) W. Palm Beach Police Pension Fund v. Home Loan Servicing Solutions, Ltd., et al., No. 15-CV-1063 (S.D.N.Y.), filed on February 13, 2015. On April 2, 2015, these lawsuits were consolidated into a single action, which is referred to as the "Securities Action." On April 28, 2015, lead plaintiffs, lead counsel and liaison counsel were appointed in the Securities Action. On November 9, 2015, lead plaintiffs filed an amended class action complaint. On January 27, 2016, the Securities Action was transferred to the United States District Court for the Southern District of Florida and given the Index No. 16-CV-60165 (S.D. Fla.).

The Securities Action names as defendants HLSS, former HLSS Chairman William C. Erbey, HLSS Director, President and Chief Executive Officer John P. Van Vlack, and HLSS Chief Financial Officer James E. Lauter. The Securities Action asserts causes of action under Sections 10(b) and 20(a) of the Exchange Act based on certain public disclosures made by HLSS relating to its relationship with Ocwen and HLSS's risk management and internal controls. More specifically, the consolidated class action complaint alleges that a series of statements in HLSS's disclosures were materially false and misleading, including statements about (i) Ocwen's servicing capabilities; (ii) HLSS's contingencies and legal proceedings; (iii) its risk management and internal controls; and (iv) certain related party transactions. The consolidated class action complaint also appears to allege that HLSS's financial statements for the years ended 2012 and 2013, and the first quarter ended March 30, 2014, were false and misleading based on HLSS's August 18, 2014 restatement. Lead plaintiffs in the Securities Action also allege that HLSS misled investors by failing to disclose, among other things, information regarding governmental investigations of Ocwen's business practices. Lead plaintiffs seek money damages under the Exchange Act in an amount to be proven at trial and reasonable costs, expenses, and fees. On February 11, 2015, defendants filed motions to dismiss the Securities Action in its entirety. On June 6, 2016, all allegations except those regarding certain related party transactions were dismissed. We intend to vigorously defend the Securities Action.

On March 11, 2015, plaintiff David Rattner filed a shareholder derivative action purportedly on behalf of HLSS entitled *Rattner v. Van Vlack, et al.*, No. 2015CA002833 (Fla. Palm Beach Cty. Ct.) (the “HLSS Derivative Action”). The lawsuit names as defendants HLSS directors John P. Van Vlack, Robert J. McGinnis, Kerry Kennedy, Richard J. Lochrie, and David B. Reiner (collectively, the “Director Defendants”), New Residential Investment Corp., and Hexagon Merger Sub, Ltd. The HLSS Derivative Action alleges that the Director Defendants breached their fiduciary duties of due care, diligence, loyalty, honesty and good faith and the duty to act in the best interests of HLSS under Cayman law and claims that the Director Defendants approved a proposed merger with New Residential Investment Corp. that (i) provided inadequate consideration to HLSS’s shareholders, (ii) included unfair deal protection devices, and (iii) was the result of an inadequate process due to conflicts of interest. On July 8, 2015, the complaint was voluntarily dismissed without prejudice.

Refer to “Risk Factors—Risks Related to Our Business—Stockholder or other litigation against HLSS and/or us could result in the payment of damages and/or may materially and adversely affect our business, financial condition results of operations and liquidity” for a description of the Chester County Employees’ Retirement Fund litigation.

We cannot guarantee that we will not receive further regulatory inquiries or be subject to litigation regarding the subject matter of the subpoenas or matters relating thereto, or that existing inquires, or, should they occur, any future regulatory inquiries or litigation, will not consume internal resources, result in additional legal and consulting costs or negatively impact our stock price.

We could be materially and adversely affected by events, conditions or actions that might occur at HLSS or Ocwen.

HLSS acquired assets and assumed liabilities could be adversely affected as a result of events or conditions that occurred or existed before the closing of the HLSS Acquisition. Adverse changes in the assets or liabilities we have acquired or assumed, respectively, as part of the HLSS Acquisition, could occur or arise as a result of actions by HLSS or Ocwen, legal or regulatory developments, including the emergence or unfavorable resolution of pre-acquisition loss contingencies, deteriorating general business, market, industry or economic conditions, and other factors both within and beyond the control of HLSS or Ocwen. We are subject to a variety of risks as a result of our dependence on mortgage servicers such as Nationstar and Ocwen, including, without limitation, the potential loss of all of the value of our Excess MSR in the event that the servicer of the underlying loans is terminated by the mortgage loan owner or RMBS bondholders. A significant decline in the value of HLSS assets or a significant increase in HLSS liabilities we have acquired could adversely affect our future business, financial condition, cash flows and results of operations. HLSS is subject to a number of other risks and uncertainties, including regulatory investigations and legal proceedings against HLSS, and others with whom HLSS conducted and conducts business. Moreover, any insurance proceeds received with respect to such matters may be inadequate to cover the associated losses. For more information regarding recent actions against Ocwen, see “—Ocwen has been and is subject to certain federal and state regulatory matters” and “—We could be materially and adversely affected by events, conditions or actions that might occur at HLSS or Ocwen” above. Adverse developments at Ocwen, including liquidity issues, ratings downgrades, defaults under debt agreements, servicer rating downgrades, failure to comply with the terms of PSAs, termination under PSAs, Ocwen bankruptcy proceedings and additional regulatory issues and settlements, could have a material adverse effect on us. See “—We rely heavily on mortgage servicers to achieve our investment objective and have no direct ability to influence their performance.”

Our ability to borrow may be adversely affected by the suspension or delay of the rating of the notes issued under the NRART facility and the existing “HSART II facility” or other future advance facilities by the credit agency providing the ratings.

All or substantially all of the notes issued under the NRZ Advance Receivables Trust 2015-ON1 (“NRART”) facility and the HLSS Servicer Advance Receivables Trust II (“HSART II facility”) are rated by one rating agency and we may

sponsor advance facilities in the future that are rated by credit agencies. The related agency may suspend rating notes backed by servicer advances at any time. Rating agency delays may result in our inability to obtain timely ratings on new notes, which could adversely impact the availability of borrowings or the interest rates, advance rates or other financing terms and adversely affect our results of operations and liquidity. Further, if we are unable to secure ratings from other agencies, limited investor demand for unrated notes could result in further adverse changes to our liquidity and profitability.

A downgrade of certain of the notes issued under the NRART facility and HSART II facility or other future advance facilities would cause such notes to become due and payable prior to their expected repayment date/maturity date, which could have a material adverse effect on our business, financial condition, results of operations and liquidity.

Regulatory scrutiny regarding foreclosure processes could lengthen foreclosure timelines, which could increase advances and materially and adversely affect our business, financial condition, results of operations and liquidity.

When a mortgage loan is in foreclosure, the servicer is generally required to continue to advance delinquent principal and interest to the securitization trust and to also make advances for delinquent taxes and insurance and foreclosure costs and the upkeep of vacant property in foreclosure to the extent we determine that such amounts are recoverable. These servicer advances are generally recovered when the delinquency is resolved. Foreclosure moratoria or other actions that lengthen the foreclosure process increase the amount of servicer advances, lengthen the time it takes for reimbursement of such advances and increase the costs incurred during the foreclosure process. In addition, advance financing facilities generally contain provisions that limit the eligibility of servicer advances to be financed based on the length of time that servicer advances are outstanding, and, as a result, an increase in foreclosure timelines could further increase the amount of servicer advances that need to be funded from the related servicer's own capital. Such increases in foreclosure timelines could increase the need for capital to fund servicer advances, which would increase our interest expense, delay the collection of interest income or servicing fee revenue until the foreclosure has been resolved and, therefore, reduce the cash that we have available to pay our operating expenses or to pay dividends. For more information regarding recent actions against Ocwen, see “—Ocwen has been and is subject to certain federal and state regulatory matters” and “—We could be materially and adversely affected by events, conditions or actions that might occur at HLSS or Ocwen” above.

Certain of our servicers have triggered termination events or events of default under some PSAs underlying the MSR with respect to which we are entitled to the basic fee component or Excess MSR, and the parties to the related securitization transactions could enforce their rights against such servicer as a result.

If a servicer termination event or event of default occurs under a PSA, the servicer may be terminated without any right to compensation for its loss from the trustee for the securitization trust, other than the right to be reimbursed for any outstanding servicer advances as the related loans are brought current, modified, liquidated or charged off. So long as we are in compliance with our obligations under our servicing agreements and purchase agreements, if a servicer is terminated as servicer, we may have the right to receive an indemnification payment from such servicer, even if such termination related to servicer termination events or events of default existing at the time of any transaction with such servicer. If one of our servicers is terminated as servicer under a PSA, we will lose any investment related to such servicer's MSR. If such servicer is terminated as servicer with respect to a PSA and we are unable to enforce our contractual rights against such servicer or if such servicer is unable to make any resulting indemnification payments to us, if any such payment is due and payable, it may have a material adverse effect on our financial condition, results of operations, ability to make distributions, liquidity and financing arrangements, including our advance financing facilities, and may make it more difficult for us to acquire additional MSRs in the future.

During February and March 2015, Ocwen received two notices of servicer termination affecting four separate PSAs related to MSR related to the transactions contemplated by the Ocwen Purchase Agreement. Ocwen could be subject to further terminations as a result of its failure to maintain required minimum servicer ratings, which could have an adverse effect on our business, financing activities, financial condition and results of operations.

On January 23, 2015, Gibbs & Bruns LLP, on behalf of its clients, issued a press release regarding the notices of nonperformance provided to various trustees in relation to Ocwen's servicing practices under 119 residential mortgage-backed securities trusts. Of these transactions, 90 relate to agreements for MSR related to the transactions contemplated by the Ocwen Purchase Agreement. It is possible that Ocwen could be terminated for other servicing agreements related to such MSR.

On January 29, 2015, Moody's downgraded Ocwen's SQ assessment from SQ3+ to SQ3- as a primary servicer of subprime residential loans and as a special servicer of residential mortgage loans. During February 2015, Fitch

Ratings downgraded Ocwen's residential primary servicer rating for subprime products from "RPS3" to "RPS4" and, in February 2016, upgraded such rating to "RPS3-." During February 2015, Morningstar also downgraded Ocwen's residential primary servicer rating from "MOR RS2" to "MOR RS3." On June 18, 2015, S&P downgraded Ocwen's ratings as a residential mortgage prime, subprime, special, and subordinate-lien servicer from "average" to "below average." On October 1, 2015, S&P downgraded Ocwen's master servicer rating to "below average."

The performance of loans that we acquired in the HLSS Acquisition may be adversely affected by the performance of parties who service or subservice these mortgage loans.

HLSS and its subsidiaries acquired by us in the HLSS Acquisition contracted with third parties for the servicing of the mortgage loans in its early buy-out ("EBO") portfolio. The performance of this portfolio and our ability to finance this portfolio are subject to risks associated with inadequate or untimely servicing. If our servicers or subservicers commit a material breach of their obligations as a servicer, we may be subject to damages if the breach is not cured within a specified period of time following notice. In addition, we may be required to indemnify an investor or our lenders against losses from any failure of our servicer or

125

subservicer to perform the servicing obligations properly. Poor performance by a servicer or subservicer may result in greater than expected delinquencies and foreclosures and losses on our mortgage loans. A substantial increase in our delinquency or foreclosure rate or the inability to process claims in accordance with Ginnie Mae or FHA guidelines could adversely affect our ability to access the capital and secondary markets for our financing needs.

Servicing issues in the portfolio of loans that was acquired in the HLSS Acquisition could adversely impact our claims against FHA insurance and result in our reliance on servicer indemnifications which could increase losses.

We will rely on HLSS's servicers (including Ocwen) to service our Ginnie Mae EBO loans in a manner that supports our ability to make claims to the FHA for shortfalls on these loans. If servicing issues result in the curtailment of FHA insurance claims, we will only have recourse against the servicer for any shortfall. If the servicer is unable to make indemnification payments owed to us under this circumstance, we could incur losses.

Our borrowings collateralized by loans require that we make certain representations and warranties that, if determined to be inaccurate, could require us to repurchase loans or cover losses.

Our financing facilities require us to make certain representations and warranties regarding the loans that collateralize the borrowings. Although we perform due diligence on the loans that we acquire, certain representations and warranties that we make in respect of such loans may ultimately be determined to be inaccurate. In the event of a breach of a representation or warranty, we may be required to repurchase affected loans, make indemnification payments to certain indemnified parties or address any claims associated with such breach. Further, we may have limited or no recourse against the seller from whom we purchased the loans. Such recourse may be limited due to a variety of factors, including the absence of a representation or warranty from the seller corresponding to the representation provided by us or the contractual expiration thereof.

Representations and warranties made by us in our loan sale agreements may subject us to liability.

In March 2015, HLSS sold reperforming loans to an unrelated third party and transferred mortgages into a trust in exchange for cash. We may be liable to purchasers under the related sale agreement for any breaches of representations and warranties made by HLSS at the time the applicable loans are sold. Such representations and warranties may include, but are not limited to, issues such as the validity of the lien; the absence of delinquent taxes or other liens; the loans compliance with all local, state and federal laws and the delivery of all documents required to perfect title to the lien. If the purchaser is successful in asserting their claim for recourse, it could adversely affect the availability of financing under loan financing facilities or otherwise adversely impact our results of operations and liquidity. From time to time we sell residential mortgage loans pursuant to loan sale agreements. The risks describe in this paragraph relate to any such sale as well.

Our ability to exercise our cleanup call rights may be limited or delayed if a third party contests our ability to exercise our cleanup call rights, if the related securitization trustee refuses to permit the exercise of such rights, or if a related party is subject to bankruptcy proceedings.

Certain servicing contracts permit more than one party to exercise a cleanup call-meaning the right of a party to collapse a securitization trust by purchasing all of the remaining loans held by the securitization trust pursuant to the terms set forth in the applicable servicing agreement. While the servicers from which we acquired our cleanup call rights (or other servicers from which our servicers acquired MSR) may be named as the party entitled to exercise such rights, certain third parties may also be permitted to exercise such rights. If any such third party exercises a cleanup call, we could lose our ability to exercise our cleanup call right and, as a result, lose the ability to generate positive returns with respect to the related securitization transaction. In addition, another party could impair our ability to exercise our cleanup call rights by contesting our rights (for example, by claiming that they hold the exclusive

cleanup call right with respect to the applicable securitization trust). Moreover, because the ability to exercise a cleanup call right is governed by the terms of the applicable servicing agreement, any ambiguous or conflicting language regarding the exercise of such rights in the agreement may make it more difficult and costly to exercise a cleanup call right. Furthermore, certain servicing contracts provide cleanup call rights to a servicer currently subject to bankruptcy proceedings from which our servicers have acquired MSRs. While, notwithstanding the related bankruptcy proceedings, it is possible that we will be able to exercise the related cleanup calls within our desired time frame, our ability to exercise such rights may be significantly delayed or impaired by the applicable securitization trustee or bankruptcy estate or any additional steps required because of the bankruptcy process. Finally, many of our call rights are not currently exercisable and may not become exercisable for a period of years. As a result, our ability to realize the benefits from these rights will depend on a number of factors at the time they become exercisable many of which are outside our control, including interest rates, conditions in the capital markets and conditions in the residential mortgage market.

126

New Residential's subsidiary New Residential Mortgage LLC is or may become subject to significant state and federal regulations.

A subsidiary of NRZ, New Residential Mortgage LLC ("NRM"), has obtained or is currently in the process of obtaining applicable qualifications, licenses and approvals to own non-agency and certain Agency MSR's in the United States and certain other jurisdictions. As a result of NRM's current and expected approvals, NRM is subject to extensive and comprehensive regulation under federal, state and local laws in the United States. These laws and regulations may in the future significantly affect the way that NRM does business, and may subject NRM and New Residential to additional costs and regulatory obligations, which could impact our financial results.

NRM's business may become subject to increasing regulatory oversight and scrutiny in the future as it continues seeking and obtaining state and additional agency approvals to hold MSR's, which may lead to regulatory investigations or enforcement, including both formal and informal inquiries, from various state and federal agencies as part of those agencies' oversight of the mortgage servicing business. An adverse result in governmental investigations or examinations or private lawsuits, including purported class action lawsuits, may adversely affect NRM's and our financial results or result in serious reputational harm. In addition, a number of participants in the mortgage servicing industry have been the subject of purported class action lawsuits and regulatory actions by state or federal regulators, and other industry participants have been the subject of actions by state Attorneys General.

Failure of New Residential's subsidiary, NRM, to obtain or maintain certain licenses and approvals required for NRM to purchase and own MSR's could prevent us from purchasing or owning MSR's, which could limit our potential business activities.

State and federal laws require a business to hold certain state licenses prior to acquiring MSR's. NRM is currently licensed or otherwise eligible to hold MSR's in each applicable state. As a licensee in such states, NRM may become subject to administrative actions in those states for failing to satisfy ongoing license requirements or for other state law violations, the consequences of which could include fines or suspensions or revocations of NRM's licenses by applicable state regulatory authorities, which could in turn result in NRM becoming ineligible to hold MSR's in the related jurisdictions. We could be delayed or prohibited from conducting certain business activities if we do not maintain necessary licenses in certain jurisdictions. We cannot assure you that we will be able to maintain all of the required state licenses.

Additionally, NRM has received approval from FHA to hold MSR's associated with FHA-insured mortgage loans, from Fannie Mae to hold MSR's associated with loans owned by Fannie Mae, and from Freddie Mac to hold MSR's associated with loans owned by Freddie Mac. NRM is currently seeking approval from Ginnie Mae to become an approved Ginnie Mae Issuer, which would make NRM eligible to hold MSR's associated with Ginnie Mae securities. As an approved Fannie Mae Servicer, Freddie Mac Servicer and FHA Lender, NRM is required to conduct aspects of its operations in accordance with applicable policies and guidelines published by FHA, Fannie Mae and Freddie Mac in order to maintain those approvals. Should NRM fail to maintain FHA, Fannie Mae or Freddie Mac approval, or fail to obtain approval from Ginnie Mae, NRM may be unable to purchase certain types of MSR's, which could limit our potential business activities.

NRM is or may become subject to various information reporting and other regulatory requirements, and there is no assurance that we will be able to satisfy those requirements or other ongoing requirements applicable to mortgage loan servicers under applicable state and federal laws. Any failure by NRM to comply with such state or federal regulatory requirements may expose us to administrative or enforcement actions, license or approval suspensions or revocations or other penalties that may restrict our business and investment options, any of which could restrict our business and investment options, adversely impact our business and financial results and damage our reputation.

We may become subject to fines or other penalties based on the conduct of mortgage loan originators and brokers that originate residential mortgage loans related to MSRMs that we acquire, and the third-party servicers we may engage to subservice the loans underlying MSRMs we acquire.

We have acquired MSRMs and may in the future acquire additional MSRMs from third-party mortgage loan originators, brokers or other sellers, and we therefore are or will become dependent on such third parties for the related mortgage loans' compliance with applicable law, and on third-party mortgage servicers to perform the day-to-day servicing on the mortgage loans underlying any such MSRMs. Mortgage loan originators and brokers are subject to strict and evolving consumer protection laws and other legal obligations with respect to the origination of residential mortgage loans. These laws and regulations include the residential mortgage servicing standards, "ability-to-repay" and "qualified mortgage" regulations promulgated by the Consumer Financial Protection Bureau ("CFPB"), which became effective in 2014. In addition, there are various other federal, state, and local laws and regulations that are intended to discourage predatory lending practices by residential mortgage loan originators. These laws may be highly

127

subjective and open to interpretation and, as a result, a regulator or court may determine that there has been a violation where an originator or servicer of mortgage loans reasonably believed that the law or requirement had been satisfied. Although we will not originate or directly service any mortgage loans, failure or alleged failure by originators or servicers to comply with these laws and regulations could subject us, as an investor in MSR, to state or CFPB administrative proceedings, which could result in monetary penalties, license suspensions or revocations, or restrictions to our business, all of which could adversely impact our business and financial results and damage our reputation.

The final servicing rules promulgated by the CFPB to implement certain sections of the Dodd-Frank Act include provisions relating to, among other things, periodic billing statements and disclosures, responding to borrower inquiries and complaints, force-placed insurance, and adjustable rate mortgage interest rate adjustment notices. Further, the mortgage servicing rules require servicers to, among other things, make good faith early intervention efforts to notify delinquent borrowers of loss mitigation options, to implement specified loss mitigation procedures, and if feasible, exhaust all loss mitigation options before proceeding to foreclosure. Proposed updates to further refine these rules have been published and will likely lead to further changes in requirements applicable to servicing mortgage loans.

We do not engage in any day-to-day servicing operations, and instead engage third-party servicers to subservice mortgage loans relating to any MSR we acquire. It is therefore possible that a third-party servicer's failure to comply with the new and evolving servicing protocols could adversely affect the value of the MSR we acquire. Additionally, we may become subject to fines, penalties or civil liability based upon the conduct of any third-party servicer who services mortgage loans related to MSR that we have acquired or will acquire in the future.

Investments in MSR may expose us to additional risks.

As a result of the Walter transaction (described in Note 18 to our Condensed Consolidated Financial Statements included herein), we now hold investments in MSR. Our investments in MSR may subject us to certain additional risks, including the following:

We have limited experience acquiring MSR and operating a servicer. Although ownership of MSR and the operation of a servicer includes many of the same risks as our other target assets and business activities, including risks related to prepayments, borrower credit, defaults, interest rates, hedging, and regulatory changes, there can be no assurance that we will be able to successfully operate a servicer subsidiary and integrate MSR investments into our business operations.

NRM's existing and pending approvals from government-related entities or federal agencies are subject to compliance with their respective servicing guidelines, minimum capital requirements, reporting requirements and other conditions that they may impose from time to time at their discretion. Failure to satisfy such guidelines or conditions could result in the unilateral termination of NRM's existing approvals or pending applications by one or more entities or agencies. NRM is presently licensed or otherwise eligible to hold MSR in all states within the United States and the District of Columbia. Such state licenses may be suspended or revoked by a state regulatory authority, and we may as a result lose the ability to own MSR under the regulatory jurisdiction of such state regulatory authority.

Changes in minimum servicing compensation for agency loans could occur at any time and could negatively impact the value of the income derived from any MSR that we hold or may acquire in the future.

Investments in MSR are highly illiquid and subject to numerous restrictions on transfer and, as a result, there is risk that we would be unable to locate a willing buyer or get approval to sell any MSR in the future should we desire to do so.

Our business, results of operations, financial condition and reputation could be adversely impacted if we are not able to successfully manage these or other risks related to investing and managing MSR investments.

Risks Related to Our Manager

We are dependent on our Manager and may not find a suitable replacement if our Manager terminates the Management Agreement.

None of our officers or other senior individuals who perform services for us is an employee of New Residential. Instead, these individuals are employees of our Manager. Accordingly, we are completely reliant on our Manager, which has significant discretion as to the implementation of our operating policies and strategies, to conduct our business. We are subject to the risk that our Manager will terminate the Management Agreement and that we will not be able to find a suitable replacement for our Manager in a timely manner, at a reasonable cost or at all. Furthermore, we are dependent on the services of certain key employees of our Manager whose compensation is partially or entirely dependent upon the amount of incentive or management compensation earned by our Manager and whose continued service is not guaranteed, and the loss of such services could adversely affect our operations.

128

There are conflicts of interest in our relationship with our Manager.

Our Management Agreement with our Manager was not negotiated between unaffiliated parties, and its terms, including fees payable, although approved by the independent directors of New Residential as fair, may not be as favorable to us as if they had been negotiated with an unaffiliated third party.

There are conflicts of interest inherent in our relationship with our Manager insofar as our Manager and its affiliates—including investment funds, private investment funds, or businesses managed by our Manager, including Newcastle, Nationstar and OneMain—invest in real estate related securities, consumer loans and Excess MSR and servicer advances and whose investment objectives overlap with our investment objectives. Certain investments appropriate for us may also be appropriate for one or more of these other investment vehicles. Certain members of our board of directors and employees of our Manager who are our officers also serve as officers and/or directors of these other entities. For example, we have some of the same directors and officers as Newcastle. Although we have the same Manager, we may compete with entities affiliated with our Manager or Fortress, including Newcastle, for certain target assets. From time to time, affiliates of Fortress focus on investments in assets with a similar profile as our target assets that we may seek to acquire. These affiliates may have meaningful purchasing capacity, which may change over time depending upon a variety of factors, including, but not limited to, available equity capital and debt financing, market conditions and cash on hand. Fortress has two funds primarily focused on investing in Excess MSRs with approximately \$0.7 billion in capital commitments in aggregate. We have broad investment guidelines, and we have and may co-invest with Fortress funds or portfolio companies of private equity funds managed by our Manager (or an affiliate thereof) in a variety of investments. We also may invest in securities that are senior or junior to securities owned by funds managed by our Manager. Fortress funds generally have a fee structure similar to ours, but the fees actually paid will vary depending on the size, terms and performance of each fund. Fortress had approximately \$70.1 billion of assets under management as of September 30, 2016.

Our Management Agreement with our Manager generally does not limit or restrict our Manager or its affiliates from engaging in any business or managing other pooled investment vehicles that invest in investments that meet our investment objectives. Our Manager intends to engage in additional real estate related management and real estate and other investment opportunities in the future, which may compete with us for investments or result in a change in our current investment strategy. In addition, our certificate of incorporation provides that if Fortress or an affiliate or any of their officers, directors or employees acquire knowledge of a potential transaction that could be a corporate opportunity, they have no duty, to the fullest extent permitted by law, to offer such corporate opportunity to us, our stockholders or our affiliates. In the event that any of our directors and officers who is also a director, officer or employee of Fortress or its affiliates acquires knowledge of a corporate opportunity or is offered a corporate opportunity, provided that this knowledge was not acquired solely in such person's capacity as a director or officer of New Residential and such person acts in good faith, then to the fullest extent permitted by law such person is deemed to have fully satisfied such person's fiduciary duties owed to us and is not liable to us if Fortress or its affiliates pursues or acquires the corporate opportunity or if such person did not present the corporate opportunity to us.

The ability of our Manager and its officers and employees to engage in other business activities, subject to the terms of our Management Agreement with our Manager, may reduce the amount of time our Manager, its officers or other employees spend managing us. In addition, we may engage (subject to our investment guidelines) in material transactions with our Manager or another entity managed by our Manager or one of its affiliates, including Newcastle, Nationstar and OneMain which may include, but are not limited to, certain financing arrangements, purchases of debt, co-investments in Excess MSRs, consumer loans, servicer advances and other assets that present an actual, potential or perceived conflict of interest. It is possible that actual, potential or perceived conflicts could give rise to investor dissatisfaction, litigation or regulatory enforcement actions. Appropriately dealing with conflicts of interest is complex and difficult, and our reputation could be damaged if we fail, or appear to fail, to deal appropriately with one or more potential, actual or perceived conflicts of interest. Regulatory scrutiny of, or litigation in connection with, conflicts of

interest could have a material adverse effect on our reputation, which could materially adversely affect our business in a number of ways, including causing an inability to raise additional funds, a reluctance of counterparties to do business with us, a decrease in the prices of our equity securities and a resulting increased risk of litigation and regulatory enforcement actions.

The management compensation structure that we have agreed to with our Manager, as well as compensation arrangements that we may enter into with our Manager in the future (in connection with new lines of business or other activities), may incentivize our Manager to invest in high risk investments. In addition to its management fee, our Manager is currently entitled to receive incentive compensation. In evaluating investments and other management strategies, the opportunity to earn incentive compensation may lead our Manager to place undue emphasis on the maximization of earnings, including through the use of leverage, at the expense of other criteria, such as preservation of capital, in order to achieve higher incentive compensation. Investments with higher yield potential are generally riskier or more speculative than lower-yielding investments. Moreover, because our Manager receives compensation in the form of options in connection with the completion of our common equity offerings, our Manager may be incentivized to cause us to issue additional common stock, which could be dilutive to existing

129

stockholders. In addition, our Manager's management fee is not tied to our performance and may not sufficiently incentivize our Manager to generate attractive risk-adjusted returns for us.

It would be difficult and costly to terminate our Management Agreement with our Manager.

It would be difficult and costly for us to terminate our Management Agreement with our Manager. The Management Agreement may only be terminated annually upon (i) the affirmative vote of at least two-thirds of our independent directors, or by a vote of the holders of a simple majority of the outstanding shares of our common stock, that there has been unsatisfactory performance by our Manager that is materially detrimental to us or (ii) a determination by a simple majority of our independent directors that the management fee payable to our Manager is not fair, subject to our Manager's right to prevent such a termination by accepting a mutually acceptable reduction of fees. Our Manager will be provided 60 days' prior notice of any termination and will be paid a termination fee equal to the amount of the management fee earned by the Manager during the 12-month period preceding such termination. In addition, following any termination of the Management Agreement, our Manager may require us to purchase its right to receive incentive compensation at a price determined as if our assets were sold for their fair market value (as determined by an appraisal, taking into account, among other things, the expected future value of the underlying investments) or otherwise we may continue to pay the incentive compensation to our Manager. These provisions may increase the effective cost to us of terminating the Management Agreement, thereby adversely affecting our ability to terminate our Manager without cause.

Our directors have approved broad investment guidelines for our Manager and do not approve each investment decision made by our Manager. In addition, we may change our investment strategy without a stockholder vote, which may result in our making investments that are different, riskier or less profitable than our current investments.

Our Manager is authorized to follow broad investment guidelines. Consequently, our Manager has great latitude in determining the types and categories of assets it may decide are proper investments for us, including the latitude to invest in types and categories of assets that may differ from those in which we currently invest. Our directors will periodically review our investment guidelines and our investment portfolio. However, our board does not review or pre-approve each proposed investment or our related financing arrangements. In addition, in conducting periodic reviews, the directors rely primarily on information provided to them by our Manager. Furthermore, transactions entered into by our Manager may be difficult or impossible to unwind by the time they are reviewed by the directors even if the transactions contravene the terms of the Management Agreement. In addition, we may change our investment strategy, including our target asset classes, without a stockholder vote.

Our investment strategy may evolve in light of existing market conditions and investment opportunities, and this evolution may involve additional risks depending upon the nature of the assets in which we invest and our ability to finance such assets on a short or long-term basis. Investment opportunities that present unattractive risk-return profiles relative to other available investment opportunities under particular market conditions may become relatively attractive under changed market conditions and changes in market conditions may therefore result in changes in the investments we target. Decisions to make investments in new asset categories present risks that may be difficult for us to adequately assess and could therefore reduce our ability to pay dividends on our common stock or have adverse effects on our liquidity, results of operations or financial condition. A change in our investment strategy may also increase our exposure to interest rate, foreign currency, real estate market or credit market fluctuations and expose us to new legal and regulatory risks. In addition, a change in our investment strategy may increase our use of non-match-funded financing, increase the guarantee obligations we agree to incur or increase the number of transactions we enter into with affiliates. Our failure to accurately assess the risks inherent in new asset categories or the financing risks associated with such assets could adversely affect our results of operations, liquidity and financial condition.

Our Manager will not be liable to us for any acts or omissions performed in accordance with the Management Agreement, including with respect to the performance of our investments.

Pursuant to our Management Agreement, our Manager will not assume any responsibility other than to render the services called for thereunder in good faith and will not be responsible for any action of our board of directors in following or declining to follow its advice or recommendations. Our Manager, its members, managers, officers and employees will not be liable to us or any of our subsidiaries, to our board of directors, or our or any subsidiary's stockholders or partners for any acts or omissions by our Manager, its members, managers, officers or employees, except by reason of acts constituting bad faith, willful misconduct, gross negligence or reckless disregard of our Manager's duties under our Management Agreement. We shall, to the full extent lawful, reimburse, indemnify and hold our Manager, its members, managers, officers and employees and each other person, if any, controlling our Manager harmless of and from any and all expenses, losses, damages, liabilities, demands, charges and claims of any nature whatsoever (including attorneys' fees) in respect of or arising from any acts or omissions of an indemnified party made in good faith in the performance of our Manager's duties under our Management Agreement and not constituting such indemnified party's bad faith, willful misconduct, gross negligence or reckless disregard of our Manager's duties under our Management Agreement.

130

Our Manager's due diligence of investment opportunities or other transactions may not identify all pertinent risks, which could materially affect our business, financial condition, liquidity and results of operations.

Our Manager intends to conduct due diligence with respect to each investment opportunity or other transaction it pursues. It is possible, however, that our Manager's due diligence processes will not uncover all relevant facts, particularly with respect to any assets we acquire from third parties. In these cases, our Manager may be given limited access to information about the investment and will rely on information provided by the target of the investment. In addition, if investment opportunities are scarce, the process for selecting bidders is competitive, or the timeframe in which we are required to complete diligence is short, our ability to conduct a due diligence investigation may be limited, and we would be required to make investment decisions based upon a less thorough diligence process than would otherwise be the case. Accordingly, investments and other transactions that initially appear to be viable may prove not to be over time, due to the limitations of the due diligence process or other factors.

The ownership by our executive officers and directors of shares of common stock, options, or other equity awards of OneMain, Nationstar, and other entities either owned by Fortress funds managed by affiliates of our Manager or managed by our Manager may create, or may create the appearance of, conflicts of interest.

Some of our directors, officers and other employees of our Manager hold positions with OneMain, Nationstar, and other entities either owned by Fortress funds managed by affiliates of our Manager or managed by our Manager and own such entities' common stock, options to purchase such entities' common stock or other equity awards. Such ownership may create, or may create the appearance of, conflicts of interest when these directors, officers and other employees are faced with decisions that could have different implications for such entities than they do for us.

Risks Related to the Financial Markets

We do not know what impact the Dodd-Frank Act will have on our business.

On July 21, 2010, the U.S. enacted the Dodd-Frank Act. The Dodd-Frank Act affects almost every aspect of the U.S. financial services industry, including certain aspects of the markets in which we operate. The Dodd-Frank Act imposes new regulations on us and how we conduct our business. As we describe in more detail below, it affects our business in many ways but it is difficult at this time to know exactly how or what the cumulative impact will be.

First, generally the Dodd-Frank Act strengthens the regulatory oversight of securities and capital markets activities by the SEC and empowers the newly-created CFPB to enforce laws and regulations for consumer financial products and services. It requires market participants to undertake additional record-keeping activities and imposes many additional disclosure requirements for public companies.

Moreover, the Dodd-Frank Act contains a risk retention requirement for all asset-backed securities. We issue many asset-backed securities. In October 2014, final rules were promulgated by a consortium of regulators implementing the final credit risk retention requirements of Section 941(b) of the Dodd-Frank Act. Under these "Risk Retention Rules," sponsors of both public and private securitization transactions or one of their majority owned affiliates are required to retain at least 5% of the credit risk of the assets collateralizing such securitization transactions. These regulations generally prohibit the sponsor or its affiliate from directly or indirectly hedging or otherwise selling or transferring the retained interest for a specified period of time, depending on the type of asset that is securitized. Beginning December 2015, sponsors securitizing residential mortgages must comply with the Risk Retention Rules beginning in December 2015, while sponsors securitizing other types of assets will be required to comply with such rules beginning in December 2016. The Risk Retention Rules provide for limited exemptions for certain types of assets, however, these exemptions may be of limited use under our current market practices. In any event, compliance with these new Risk

Retention Rules has increased and will likely continue to increase the administrative and operational costs of asset securitization.

Further, the Dodd-Frank Act imposes mandatory clearing and exchange-trading requirements on many derivatives transactions (including formerly unregulated over-the-counter derivatives) in which we may engage. In addition, the Dodd-Frank Act is expected to increase the margin requirements for derivatives transactions that are not subject to mandatory clearing requirements, which may impact our activities. The Dodd-Frank Act also creates new categories of regulated market participants, such as “swap-dealers,” “security-based swap dealers,” “major swap participants” and “major security-based swap participants,” and subjects or may subject these regulated entities to significant new capital, registration, recordkeeping, reporting, disclosure, business conduct and other regulatory requirements that will give rise to new administrative costs.

Also, under the Dodd-Frank Act, financial regulators belonging to the Financial Stability Oversight Council are required to name financial institutions that are deemed to be systemically important to the economy and which may require closer regulatory supervision. Such systemically important financial institutions, or “SIFIs,” may be required to operate with greater safety margins, such as higher levels of capital, and may face further limitations on their activities. The determination of what constitutes a SIFI is evolving, and in time SIFIs may include large investment funds and even asset managers. There can be no assurance that we will not be deemed to be a SIFI and thus subject to further regulation.

Even if certain of the new requirements of the Dodd-Frank Act are not directly applicable to us, they may still increase our costs of entering into transactions with the parties to whom the requirements are directly applicable. For instance, the new exchange-trading and trade reporting requirements may lead to reductions in the liquidity of derivative transactions, causing higher pricing or reduced availability of derivatives, or the reduction of arbitrage opportunities for us, which could adversely affect the performance of certain of our trading strategies. Importantly, many key aspects of the changes imposed by the Dodd-Frank Act will continue to be established by various regulatory bodies and other groups over the next several years. As a result, we do not know how significantly the Dodd-Frank Act will affect us. It is possible that the Dodd-Frank Act could, among other things, increase our costs of operating as a public company, impose restrictions on our ability to securitize assets and reduce our investment returns on securitized assets.

We do not know what impact certain U.S. government programs intended to stabilize the economy and the financial markets will have on our business.

In recent years, the U.S. government has taken a number of steps to attempt to strengthen the financial markets and U.S. economy, including direct government investments in, and guarantees of, troubled financial institutions as well as government-sponsored programs such as the Term Asset-Backed Securities Loan Facility program and the Public Private Investment Partnership Program. The U.S. government continues to evaluate or implement an array of other measures and programs intended to help improve U.S. financial and market conditions. While conditions appear to have improved relative to the depths of the global financial crisis, it is not clear whether this improvement is real or will last for a significant period of time. It is not clear what impact the government’s future actions to improve financial and market conditions will have on our business. We may not derive any meaningful benefit from these programs in the future. Moreover, if any of our competitors are able to benefit from one or more of these initiatives, they may gain a significant competitive advantage over us.

The federal conservatorship of Fannie Mae and Freddie Mac and related efforts, along with any changes in laws and regulations affecting the relationship between these agencies and the U.S. government, may adversely affect our business.

The payments we receive on the Agency securities in which we invest depend upon a steady stream of payments by borrowers on the underlying mortgages and the fulfillment of guarantees by GSEs. Ginnie Mae is part of a U.S. Government agency and its guarantees are backed by the full faith and credit of the U.S. Fannie Mae and Freddie Mac are GSEs, but their guarantees are not backed by the full faith and credit of the U.S. Government.

In response to the deteriorating financial condition of Fannie Mae and Freddie Mac and the credit market disruption beginning in 2007, Congress and the U.S. Treasury undertook a series of actions to stabilize these GSEs and the financial markets, generally. The Housing and Economic Recovery Act of 2008 was signed into law on July 30, 2008, and established the FHFA, with enhanced regulatory authority over, among other things, the business activities of Fannie Mae and Freddie Mac and the size of their portfolio holdings. On September 7, 2008, FHFA placed Fannie Mae and Freddie Mac into federal conservatorship and, together with the U.S. Treasury, established a program designed to boost investor confidence in Fannie Mae’s and Freddie Mac’s debt and Agency securities.

As the conservator of Fannie Mae and Freddie Mac, the FHFA controls and directs the operations of Fannie Mae and Freddie Mac and may (1) take over the assets of and operate Fannie Mae and Freddie Mac with all the powers of the stockholders, the directors and the officers of Fannie Mae and Freddie Mac and conduct all business of Fannie Mae and Freddie Mac; (2) collect all obligations and money due to Fannie Mae and Freddie Mac; (3) perform all functions of Fannie Mae and Freddie Mac which are consistent with the conservator's appointment; (4) preserve and conserve the assets and property of Fannie Mae and Freddie Mac; and (5) contract for assistance in fulfilling any function, activity, action or duty of the conservator.

Those efforts resulted in significant U.S. Government financial support and increased control of the GSEs.

The U.S. Federal Reserve (the "Fed") announced in November 2008 a program of large-scale purchases of Agency securities in an attempt to lower longer-term interest rates and contribute to an overall easing of adverse financial conditions. Subject to specified investment guidelines, the portfolios of Agency securities purchased through the programs established by the U.S. Treasury and the Fed may be held to maturity and, based on mortgage market conditions, adjustments may be made to these portfolios. This

132

flexibility may adversely affect the pricing and availability of Agency securities that we seek to acquire during the remaining term of these portfolios.

There can be no assurance that the U.S. Government's intervention in Fannie Mae and Freddie Mac will be adequate for the longer-term viability of these GSEs. These uncertainties lead to questions about the availability of and trading market for, Agency securities. Accordingly, if these government actions are inadequate and the GSEs defaulted on their guaranteed obligations, suffered losses or ceased to exist, the value of our Agency securities and our business, operations and financial condition could be materially and adversely affected.

Additionally, because of the financial problems faced by Fannie Mae and Freddie Mac that led to their federal conservatorships, many policymakers have been examining the value of a federal mortgage guarantee and the appropriate role for the U.S. government in providing liquidity for mortgage loans. In June 2013, legislation titled "Housing Finance Reform and Taxpayer Protection Act of 2013" was introduced in the U.S. Senate; in July 2013, legislation titled "Protecting American Taxpayers and Homeowners Act of 2013" was introduced in the U.S. House of Representatives. The bills differ in many respects, but both require the wind-down of the GSEs. Other bills have been introduced that change the GSEs' business charters and eliminate the entities. We cannot predict whether or when the introduced legislation, the amended legislation or any future legislation may be enacted. Such legislation could materially and adversely affect the availability of, and trading market for, Agency securities and could, therefore, materially and adversely affect the value of our Agency securities and our business, operations and financial condition.

Legislation that permits modifications to the terms of outstanding loans may negatively affect our business, financial condition, liquidity and results of operations.

The U.S. government has enacted legislation that enables government agencies to modify the terms of a significant number of residential and other loans to provide relief to borrowers without the applicable investor's consent. These modifications allow for outstanding principal to be deferred, interest rates to be reduced, the term of the loan to be extended or other terms to be changed in ways that can permanently eliminate the cash flow (principal and interest) associated with a portion of the loan. These modifications are currently reducing, or in the future may reduce, the value of a number of our current or future investments, including investments in mortgage backed securities and MSRs. As a result, such loan modifications are negatively affecting our business, results of operations, liquidity and financial condition. In addition, certain market participants propose reducing the amount of paperwork required by a borrower to modify a loan, which could increase the likelihood of fraudulent modifications and materially harm the U.S. mortgage market and investors that have exposure to this market. Additional legislation intended to provide relief to borrowers may be enacted and could further harm our business, results of operations and financial condition.

Risks Related to Our Taxation as a REIT

Qualifying as a REIT involves highly technical and complex provisions of the Internal Revenue Code.

Qualification as a REIT involves the application of highly technical and complex Internal Revenue Code provisions for which only limited judicial and administrative authorities exist. Even a technical or inadvertent violation could jeopardize our REIT qualification. Our qualification as a REIT will depend on our satisfaction of certain asset, income, organizational, distribution, stockholder ownership and other requirements on a continuing basis. Compliance with these requirements must be carefully monitored on a continuing basis. Monitoring and managing our REIT compliance has become challenging due to the increased size and complexity of the assets in our portfolio, a meaningful portion of which are not qualifying REIT assets. There can be no assurance that our Manager's personnel responsible for doing so will be able to successfully monitor our compliance or maintain our REIT status.

Our failure to qualify as a REIT would result in higher taxes and reduced cash available for distribution to our stockholders.

We intend to operate in a manner intended to qualify us as a REIT for U.S. federal income tax purposes. Our ability to satisfy the asset tests depends upon our analysis of the fair market values of our assets, some of which are not susceptible to a precise determination, and for which we do not obtain independent appraisals. See “—Risks Related to our Business—The valuations of our assets are subject to uncertainty since most of our assets are not traded in an active market,” and “—Risks Related to Our Business—Rapid changes in the values of our assets may make it more difficult for us to maintain our qualification as a REIT or our exclusion from the 1940 Act.” Our compliance with the REIT income and quarterly asset requirements also depends upon our ability to successfully manage the composition of our income and assets on an ongoing basis. Moreover, the proper classification of one or more of our investments (such as TBAs) may be uncertain in some circumstances, which could affect the application of the REIT qualification requirements. Accordingly, there can be no assurance that the U.S. Internal Revenue Service (“IRS”) will not contend that our investments violate the REIT requirements.

133

If we were to fail to qualify as a REIT in any taxable year, we would be subject to U.S. federal income tax, including any applicable alternative minimum tax, on our taxable income at regular corporate rates, and distributions to stockholders would not be deductible by us in computing our taxable income. Any such corporate tax liability could be substantial and would reduce the amount of cash available for distribution to our stockholders, which in turn could have an adverse impact on the value of, and trading prices for, our stock. See also “—Our failure to qualify as a REIT would cause our stock to be delisted from the NYSE.”

Unless entitled to relief under certain provisions of the Internal Revenue Code, we also would be disqualified from taxation as a REIT for the four taxable years following the year during which we initially ceased to qualify as a REIT. The rule against re-electing REIT status following a loss of such status would also apply to us if Newcastle failed to qualify as a REIT for its taxable years ending on or before December 31, 2014, and we are treated as a successor to Newcastle for U.S. federal income tax purposes. Although Newcastle (i) represented in the separation and distribution agreement that it entered into with us on April 26, 2013 (the “Separation and Distribution Agreement”) that it has no knowledge of any fact or circumstance that would cause us to fail to qualify as a REIT and (ii) covenanted in the Separation and Distribution Agreement to use its reasonable best efforts to maintain its REIT status for each of Newcastle’s taxable years ending on or before December 31, 2014 (unless Newcastle obtains an opinion from a nationally recognized tax counsel or a private letter ruling from the IRS to the effect that Newcastle’s failure to maintain its REIT status will not cause us to fail to qualify as a REIT under the successor REIT rule referred to above), no assurance can be given that such representation and covenant would prevent us from failing to qualify as a REIT. Although, in the event of a breach, we may be able to seek damages from Newcastle, there can be no assurance that such damages, if any, would appropriately compensate us. In addition, if Newcastle were to fail to qualify as a REIT despite its reasonable best efforts, we would have no claim against Newcastle.

Our failure to qualify as a REIT would cause our stock to be delisted from the NYSE.

The NYSE requires, as a condition to the listing of our shares, that we maintain our REIT status. Consequently, if we fail to maintain our REIT status, our shares would promptly be delisted from the NYSE, which would decrease the trading activity of such shares. This could make it difficult to sell shares and would likely cause the market volume of the shares trading to decline.

If we were delisted as a result of losing our REIT status and desired to relist our shares on the NYSE, we would have to reapply to the NYSE to be listed as a domestic corporation. As the NYSE’s listing standards for REITs are less onerous than its standards for domestic corporations, it would be more difficult for us to become a listed company under these heightened standards. We might not be able to satisfy the NYSE’s listing standards for a domestic corporation. As a result, if we were delisted from the NYSE, we might not be able to relist as a domestic corporation, in which case our shares could not trade on the NYSE.

The failure of assets subject to repurchase agreements to qualify as real estate assets could adversely affect our ability to qualify as a REIT.

We enter into financing arrangements that are structured as sale and repurchase agreements pursuant to which we nominally sell certain of our assets to a counterparty and simultaneously enter into an agreement to repurchase these assets at a later date in exchange for a purchase price. Economically, these agreements are financings that are secured by the assets sold pursuant thereto. We believe that, for purposes of the REIT asset and income tests, we should be treated as the owner of the assets that are the subject of any such sale and repurchase agreement, notwithstanding that those agreements generally transfer record ownership of the assets to the counterparty during the term of the agreement. It is possible, however, that the IRS could assert that we did not own the assets during the term of the sale and repurchase agreement, in which case we might fail to qualify as a REIT.

The failure of our Excess MSR to qualify as real estate assets or the income from our Excess MSR to qualify as mortgage interest could adversely affect our ability to qualify as a REIT.

We have received from the IRS a private letter ruling substantially to the effect that our Excess MSR represents interests in mortgages on real property and thus are qualifying “real estate assets” for purposes of the REIT asset test, which generate income that qualifies as interest on obligations secured by mortgages on real property for purposes of the REIT income test. The ruling is based on, among other things, certain assumptions as well as on the accuracy of certain factual representations and statements that we and Newcastle have made to the IRS. If any of the representations or statements that we have made in connection with the private letter ruling, are, or become, inaccurate or incomplete in any material respect with respect to one or more Excess MSR investments, or if we acquire an Excess MSR investment with terms that are not consistent with the terms of the Excess MSR investments described in the private letter ruling, then we will not be able to rely on the private letter ruling. If we are unable to rely on the private letter ruling with respect to an Excess MSR investment, the IRS could assert that such Excess MSR investments do not qualify under the REIT asset and income tests, and if successful, we might fail to qualify as a REIT.

Dividends payable by REITs do not qualify for the reduced tax rates available for some dividends.

Dividends payable to domestic stockholders that are individuals, trusts, and estates are generally taxed at reduced tax rates. Dividends payable by REITs, however, generally are not eligible for the reduced rates. The more favorable rates applicable to regular corporate dividends could cause investors who are individuals, trusts and estates to perceive investments in REITs to be relatively less attractive than investments in the stocks of non-REIT corporations that pay dividends, which could adversely affect the value of the stock of REITs, including our common stock. In addition, the relative attractiveness of real estate in general may be adversely affected by the favorable tax treatment given to non-REIT corporate dividends, which could affect the value of our real estate assets negatively.

REIT distribution requirements could adversely affect our liquidity and our ability to execute our business plan.

We generally must distribute annually at least 90% of our REIT taxable income, excluding any net capital gain, in order for corporate income tax not to apply to earnings that we distribute. We intend to make distributions to our stockholders to comply with the REIT requirements of the Internal Revenue Code. However, differences in timing between the recognition of taxable income and the actual receipt of cash could require us to sell assets or borrow funds on a short-term or long-term basis to meet the 90% distribution requirement of the Internal Revenue Code. Certain of our assets, such as our investment in consumer loans, generate substantial mismatches between taxable income and available cash. As a result, the requirement to distribute a substantial portion of our net taxable income could cause us to: (i) sell assets in adverse market conditions; (ii) borrow on unfavorable terms; (iii) distribute amounts that would otherwise be invested in future acquisitions, capital expenditures or repayment of debt; or (iv) make taxable distributions of our capital stock or debt securities in order to comply with REIT requirements. Further, amounts distributed will not be available to fund investment activities. If we fail to obtain debt or equity capital in the future, it could limit our ability to satisfy our liquidity needs, which could adversely affect the value of our common stock.

We may be required to report taxable income for certain investments in excess of the economic income we ultimately realize from them.

Based on IRS guidance concerning the classification of Excess MSR, we intend to treat our Excess MSR as ownership interests in the interest payments made on the underlying mortgage loans, akin to an “interest only” strip. Under this treatment, for purposes of determining the amount and timing of taxable income, each Excess MSR is treated as a bond that was issued with original issue discount on the date we acquired such Excess MSR. In general, we will be required to accrue original issue discount based on the constant yield to maturity of each Excess MSR, and to treat such original issue discount as taxable income in accordance with the applicable U.S. federal income tax rules. The constant yield of an Excess MSR will be determined, and we will be taxed, based on a prepayment assumption regarding future payments due on the mortgage loans underlying the Excess MSR. If the mortgage loans underlying an Excess MSR prepay at a rate different than that under the prepayment assumption, our recognition of original issue discount will be either increased or decreased depending on the circumstances. Thus, in a particular taxable year, we may be required to accrue an amount of income in respect of an Excess MSR that exceeds the amount of cash collected in respect of that Excess MSR. Furthermore, it is possible that, over the life of the investment in an Excess MSR, the total amount we pay for, and accrue with respect to, the Excess MSR may exceed the total amount we collect on such Excess MSR. No assurance can be given that we will be entitled to a deduction for such excess, meaning that we may be required to recognize “phantom income” over the life of an Excess MSR.

Other debt instruments that we may acquire, including consumer loans, may be issued with, or treated as issued with, original issue discount. Those instruments would be subject to the original issue discount accrual and income computations that are described above with regard to Excess MSR.

We may acquire debt instruments in the secondary market for less than their face amount. The discount at which such debt instruments are acquired may reflect doubts about their ultimate collectability rather than current market interest rates. The amount of such discount will nevertheless generally be treated as “market discount” for U.S. federal income tax purposes. Accrued market discount is reported as income when, and to the extent that, any payment of principal of the debt instrument is made. If we collect less on the debt instrument than our purchase price plus the market discount we had previously reported as income, we may not be able to benefit from any offsetting loss deductions.

In addition, we may acquire debt instruments that are subsequently modified by agreement with the borrower. If the amendments to the outstanding instrument are “significant modifications” under the applicable U.S. Treasury regulations, the modified instrument will be considered to have been reissued to us in a debt-for-debt exchange with the borrower. In that event, we may be required to recognize taxable gain to the extent the principal amount of the modified instrument exceeds our adjusted tax basis in the unmodified instrument, even if the value of the instrument or the payment expectations have not changed. Following such a taxable modification, we would hold the modified loan with a cost basis equal to its principal amount for U.S. federal tax purposes.

135

Finally, in the event that any debt instruments acquired by us are delinquent as to mandatory principal and interest payments, or in the event payments with respect to a particular instrument are not made when due, we may nonetheless be required to continue to recognize the unpaid interest as taxable income as it accrues, despite doubt as to its ultimate collectability. Similarly, we may be required to accrue interest income with respect to debt instruments at the stated rate regardless of whether corresponding cash payments are received or are ultimately collectible. In each case, while we would in general ultimately have an offsetting loss deduction available to us when such interest was determined to be uncollectible, the utility of that deduction could depend on our having taxable income of an appropriate character in that later year or thereafter.

In any event, if our investments generate more taxable income than cash in any given year, we may have difficulty satisfying our annual REIT distribution requirement.

We may be unable to generate sufficient cash from operations to pay our operating expenses and to pay distributions to our stockholders.

As a REIT, we are generally required to distribute at least 90% of our REIT taxable income (determined without regard to the dividends paid deduction and not including net capital losses) each year to our stockholders. To qualify for the tax benefits accorded to REITs, we intend to make distributions to our stockholders in amounts such that we distribute all or substantially all of our net taxable income, subject to certain adjustments, although there can be no assurance that our operations will generate sufficient cash to make such distributions. Moreover, our ability to make distributions may be adversely affected by the risk factors described herein. See also “—Risks Related to our Common Stock—We have not established a minimum distribution payment level, and we cannot assure you of our ability to pay distributions in the future.”

The stock ownership limit imposed by the Internal Revenue Code for REITs and our certificate of incorporation may inhibit market activity in our stock and restrict our business combination opportunities.

In order for us to maintain our qualification as a REIT under the Internal Revenue Code, not more than 50% in value of our outstanding stock may be owned, directly or indirectly, by five or fewer individuals (as defined in the Internal Revenue Code to include certain entities) at any time during the last half of each taxable year after our first taxable year. Our certificate of incorporation, with certain exceptions, authorizes our board of directors to take the actions that are necessary and desirable to preserve our qualification as a REIT. Stockholders are generally restricted from owning more than 9.8% by value or number of shares, whichever is more restrictive, of our outstanding shares of common stock, or 9.8% by value or number of shares, whichever is more restrictive, of our outstanding shares of capital stock. Our board may grant an exemption in its sole discretion, subject to such conditions, representations and undertakings as it may determine in its sole discretion. These ownership limits could delay or prevent a transaction or a change in our control that might involve a premium price for our common stock or otherwise be in the best interest of our stockholders.

Even if we remain qualified as a REIT, we may face other tax liabilities that reduce our cash flow.

Even if we remain qualified for taxation as a REIT, we may be subject to certain federal, state and local taxes on our income and assets, including taxes on any undistributed income, tax on income from some activities conducted as a result of a foreclosure, and state or local income, property and transfer taxes. Moreover, if a REIT distributes less than 85% of its ordinary income, 95% of its capital gain net income plus any undistributed shortfall from the prior year (the “Required Distribution”) to its stockholders during any calendar year (including any distributions declared by the last day of the calendar year but paid in the subsequent year), then it is required to pay an excise tax on 4% of any shortfall between the Required Distribution and the amount that was actually distributed. Any of these taxes would decrease

cash available for distribution to our stockholders. In addition, in order to meet the REIT qualification requirements, or to avert the imposition of a 100% tax that applies to certain gains derived by a REIT from dealer property or inventory, we may hold some of our assets through TRSs. Such subsidiaries will be subject to corporate level income tax at regular rates and the payment of such taxes would reduce our return on the applicable investment. Currently, we hold some of our investments in TRSs, including servicer advances and MSRs, and we may contribute other non-qualifying investments, such as our investment in consumer loans, to a TRS in the future.

Complying with the REIT requirements may negatively impact our investment returns or cause us to forgo otherwise attractive opportunities, liquidate assets or contribute assets to a TRS.

To qualify as a REIT for U.S. federal income tax purposes, we must continually satisfy tests concerning, among other things, the sources of our income, the nature and diversification of our assets, the amounts we distribute to our stockholders and the ownership of our stock. As a result of these tests, we may be required to make distributions to stockholders at disadvantageous times or when we do not have funds readily available for distribution, forgo otherwise attractive investment opportunities, liquidate assets in

adverse market conditions or contribute assets to a TRS that is subject to regular corporate federal income tax. Our ability to acquire and hold MSRs, interests in consumer loans, servicer advances and other investments is subject to the applicable REIT qualification tests, and we may have to hold these interests through TRSs, which would negatively impact our returns from these assets. In general, compliance with the REIT requirements may hinder our ability to make and retain certain attractive investments.

Complying with the REIT requirements may limit our ability to hedge effectively.

The existing REIT provisions of the Internal Revenue Code may substantially limit our ability to hedge our operations because a significant amount of the income from those hedging transactions is likely to be treated as non-qualifying income for purposes of both REIT gross income tests. In addition, we must limit our aggregate income from non-qualified hedging transactions, from our provision of services and from other non-qualifying sources, to less than 5% of our annual gross income (determined without regard to gross income from qualified hedging transactions).

As a result, we may have to limit our use of certain hedging techniques or implement those hedges through TRSs. This could result in greater risks associated with changes in interest rates than we would otherwise want to incur or could increase the cost of our hedging activities. If we fail to comply with these limitations, we could lose our REIT qualification for U.S. federal income tax purposes, unless our failure was due to reasonable cause, and not due to willful neglect, and we meet certain other technical requirements. Even if our failure were due to reasonable cause, we might incur a penalty tax. See also “—Risks Related to Our Business—Any hedging transactions that we enter into may limit our gains or result in losses.”

Distributions to tax-exempt investors may be classified as unrelated business taxable income.

Neither ordinary nor capital gain distributions with respect to our stock nor gain from the sale of stock should generally constitute unrelated business taxable income to a tax-exempt investor. However, there are certain exceptions to this rule. In particular:

part of the income and gain recognized by certain qualified employee pension trusts with respect to our stock may be treated as unrelated business taxable income if shares of our stock are predominantly held by qualified employee pension trusts, and we are required to rely on a special look-through rule for purposes of meeting one of the REIT ownership tests, and we are not operated in a manner to avoid treatment of such income or gain as unrelated business taxable income;

part of the income and gain recognized by a tax-exempt investor with respect to our stock would constitute unrelated business taxable income if the investor incurs debt in order to acquire the stock; and

to the extent that we are (or a part of us, or a disregarded subsidiary of ours, is) a “taxable mortgage pool,” or if we hold residual interests in a real estate mortgage investment conduit (“REMIC”), a portion of the distributions paid to a tax exempt stockholder that is allocable to excess inclusion income may be treated as unrelated business taxable income.

The “taxable mortgage pool” rules may increase the taxes that we or our stockholders may incur, and may limit the manner in which we effect future securitizations.

We may enter into securitization or other financing transactions that result in the creation of taxable mortgage pools for U.S. federal income tax purposes. As a REIT, so long as we own 100% of the equity interests in a taxable mortgage pool, we would generally not be adversely affected by the characterization of a securitization as a taxable mortgage pool. Certain categories of stockholders, however, such as foreign stockholders eligible for treaty or other benefits, stockholders with net operating losses, and certain tax exempt stockholders that are subject to unrelated business income tax, could be subject to increased taxes on a portion of their dividend income from us that is attributable to the taxable mortgage pool. In addition, to the extent that our stock is owned by tax exempt “disqualified

organizations,” such as certain government-related entities and charitable remainder trusts that are not subject to tax on unrelated business income, we could incur a corporate level tax on a portion of our income from the taxable mortgage pool. In that case, we might reduce the amount of our distributions to any disqualified organization whose stock ownership gave rise to the tax. Moreover, we may be precluded from selling equity interests in these securitizations to outside investors, or selling any debt securities issued in connection with these securitizations that might be considered to be equity interests for tax purposes. These limitations may prevent us from using certain techniques to maximize our returns from securitization transactions.

Uncertainty exists with respect to the treatment of TBAs for purposes of the REIT asset and income tests, and the failure of TBAs to be qualifying assets or of income/gains from TBAs to be qualifying income could adversely affect our ability to qualify as a REIT.

We purchase and sell Agency RMBS through TBAs and recognize income or gains from the disposition of those TBAs, through dollar roll transactions or otherwise. In a dollar roll transaction, we exchange an existing TBA for another TBA with a different settlement date. There is no direct authority with respect to the qualification of TBAs as real estate assets or U.S. Government securities for purposes of the 75% asset test or the qualification of income or gains from dispositions of TBAs as gains from the

sale of real property (including interests in real property and interests in mortgages on real property) or other qualifying income for purposes of the 75% gross income test. For a particular taxable year, we would treat such TBAs as qualifying assets for purposes of the REIT asset tests, and income and gains from such TBAs as qualifying income for purposes of the 75% gross income test, to the extent set forth in an opinion from Skadden, Arps, Slate, Meagher & Flom LLP substantially to the effect that (i) for purposes of the REIT asset tests, our ownership of a TBA should be treated as ownership of the underlying Agency RMBS, and (ii) for purposes of the 75% REIT gross income test, any gain recognized by us in connection with the settlement of such TBAs should be treated as gain from the sale or disposition of the underlying Agency RMBS. Opinions of counsel are not binding on the IRS, and no assurance can be given that the IRS would not successfully challenge the conclusions set forth in such opinions. In addition, it must be emphasized that any opinion of Skadden, Arps, Slate, Meagher & Flom LLP would be based on various assumptions relating to any TBAs that we enter into and would be conditioned upon fact-based representations and covenants made by our management regarding such TBAs. No assurance can be given that the IRS would not assert that such assets or income are not qualifying assets or income. If the IRS were to successfully challenge any conclusions of Skadden, Arps, Slate, Meagher & Flom LLP, we could be subject to a penalty tax or we could fail to qualify as a REIT if a sufficient portion of our assets consists of TBAs or a sufficient portion of our income consists of income or gains from the disposition of TBAs.

The tax on prohibited transactions will limit our ability to engage in transactions that would be treated as prohibited transactions for U.S. federal income tax purposes.

Net income that we derive from a “prohibited transaction” is subject to a 100% tax. The term “prohibited transaction” generally includes a sale or other disposition of property (including mortgage loans, but other than foreclosure property, as discussed below) that is held primarily for sale to customers in the ordinary course of our trade or business. We might be subject to this tax if we were to dispose of or securitize loans or Excess MSR in a manner that was treated as a prohibited transaction for U.S. federal income tax purposes.

We intend to conduct our operations so that no asset that we own (or are treated as owning) will be treated as, or as having been, held-for-sale to customers, and that a sale of any such asset will not be treated as having been in the ordinary course of our business. As a result, we may choose not to engage in certain sales of loans or Excess MSR at the REIT level, and may limit the structures we utilize for our securitization transactions, even though the sales or structures might otherwise be beneficial to us. In addition, whether property is held “primarily for sale to customers in the ordinary course of a trade or business” depends on the particular facts and circumstances. No assurance can be given that any property that we sell will not be treated as property held-for-sale to customers, or that we can comply with certain safe-harbor provisions of the Internal Revenue Code that would prevent such treatment. The 100% prohibited transaction tax does not apply to gains from the sale of property that is held through a TRS or other taxable corporation, although such income will be subject to tax in the hands of the corporation at regular corporate rates. We intend to structure our activities to prevent prohibited transaction characterization.

New legislation or administrative or judicial action, in each instance potentially with retroactive effect, could make it more difficult or impossible for us to qualify as a REIT.

The present U.S. federal income tax treatment of REITs may be modified, possibly with retroactive effect, by legislative, judicial or administrative action at any time, which could affect the U.S. federal income tax treatment of an investment in us. The U.S. federal income tax rules dealing with REITs constantly are under review by persons involved in the legislative process, the IRS and the U.S. Treasury Department, which results in statutory changes as well as frequent revisions to regulations and interpretations. Revisions in U.S. federal tax laws and interpretations thereof could affect or cause us to change our investments and commitments and affect the tax considerations of an investment in us.

Liquidation of assets may jeopardize our REIT qualification or create additional tax liability for us.

To qualify as a REIT, we must comply with requirements regarding the composition of our assets and our sources of income. If we are compelled to liquidate our investments to repay obligations to our lenders, we may be unable to comply with these requirements, ultimately jeopardizing our qualification as a REIT, or we may be subject to a 100% tax on any resultant gain if we sell assets that are treated as dealer property or inventory.

138

Risks Related to our Common Stock

There can be no assurance that the market for our stock will provide you with adequate liquidity.

Our common stock began trading (on a when issued basis) on the NYSE on May 2, 2013. There can be no assurance that an active trading market for our common stock will be sustained in the future, and the market price of our common stock may fluctuate widely, depending upon many factors, some of which may be beyond our control. These factors include, without limitation:

- a shift in our investor base;
- our quarterly or annual earnings and cash flows, or those of other comparable companies;
- actual or anticipated fluctuations in our operating results;
- changes in accounting standards, policies, guidance, interpretations or principles;
- announcements by us or our competitors of significant investments, acquisitions or dispositions;
- the failure of securities analysts to cover our common stock;
- changes in earnings estimates by securities analysts or our ability to meet those estimates;
- market performance of affiliates and other counterparties with whom we conduct business;
- the operating and stock price performance of other comparable companies;
- our failure to qualify as a REIT, maintain our exemption under the 1940 Act or satisfy the NYSE listing requirements;
- overall market fluctuations; and
- general economic conditions.

Stock markets in general have experienced volatility that has often been unrelated to the operating performance of a particular company. These broad market fluctuations may adversely affect the trading price of our common stock.

Sales or issuances of shares of our common stock could adversely affect the market price of our common stock.

Sales or issuances of substantial amounts of shares of our common stock, or the perception that such sales or issuances might occur, could adversely affect the market price of our common stock. The issuance of our common stock in connection with property, portfolio or business acquisitions or the exercise of outstanding options or otherwise could also have an adverse effect on the market price of our common stock. We have an effective registration statement on file to sell common stock or convertible securities in public offerings.

Failure to maintain effective internal control over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act of 2002 could have a material adverse effect on our business and stock price.

As a public company, we are required to maintain effective internal control over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act of 2002. Internal control over financial reporting is complex and may be revised over time to adapt to changes in our business, or changes in applicable accounting rules. We have made investments through joint ventures, such as our investment in consumer loans, and accounting for such investments can increase the complexity of maintaining effective internal control over financial reporting. We cannot assure you that our internal control over financial reporting will be effective in the future or that a material weakness will not be discovered with respect to a prior period for which we had previously believed that our internal control over financial reporting was effective. If we are not able to maintain or document effective internal control over financial reporting, our independent registered public accounting firm will not be able to certify as to the effectiveness of our internal control over financial reporting. Matters impacting our internal control over financial reporting may cause us to be unable to report our financial information on a timely basis, or may cause us to restate previously issued financial information, and thereby subject us to adverse regulatory consequences, including sanctions or investigations by the SEC, or violations of applicable stock exchange listing rules. There could also be a negative reaction in the financial

markets due to a loss of investor confidence in us and the reliability of our financial statements. Confidence in the reliability of our financial statements is also likely to suffer if we or our independent registered public accounting firm reports a material weakness in the effectiveness of our internal control over financial reporting. This could materially adversely affect us by, for example, leading to a decline in our stock price and impairing our ability to raise capital.

Your percentage ownership in us may be diluted in the future.

Your percentage ownership in us may be diluted in the future because of equity awards that we expect will be granted to our Manager, to the directors, officers and employees of our Manager who perform services for us, and to our directors, officers and employees, as well as other equity instruments such as debt and equity financing. We have adopted a Nonqualified Stock Option and Incentive Award Plan, as amended (the "Plan"), which provides for the grant of equity-based awards, including restricted stock, options, stock appreciation rights ("SARs"), performance awards, tandem awards and other equity-based and non-equity

139

based awards, in each case to our Manager, to the directors, officers, employees, service providers, consultants and advisor of our Manager who perform services for us, and to our directors, officers, employees, service providers, consultants and advisors. We reserved 15 million shares of our common stock for issuance under the Plan. The term of the Plan expires in 2023. On the first day of each fiscal year beginning during the term of the Plan, that number will be increased by a number of shares of our common stock equal to 10% of the number of shares of our common stock newly issued by us during the immediately preceding fiscal year. In connection with any offering of our common stock, we will issue to our Manager options relating to shares of our common stock, representing 10% of the number of shares being offered. Our board of directors may also determine to issue options to the Manager that are not subject to the Plan, provided that the number of shares relating to any options granted to the Manager in connection with an offering of our common stock would not exceed 10% of the shares sold in such offering and would be subject to NYSE rules.

We may incur or issue debt or issue equity, which may negatively affect the market price of our common stock.

We may in the future incur or issue debt or issue equity or equity-related securities. In the event of our liquidation, lenders and holders of our debt and holders of our preferred stock (if any) would receive a distribution of our available assets before common stockholders. Any future incurrence or issuance of debt would increase our interest cost and could adversely affect our results of operations and cash flows. We are not required to offer any additional equity securities to existing common stockholders on a preemptive basis. Therefore, additional issuances of common stock, directly or through convertible or exchangeable securities, warrants or options, will dilute the holdings of our existing common stockholders and such issuances, or the perception of such issuances, may reduce the market price of our common stock. Any preferred stock issued by us would likely have a preference on distribution payments, periodically or upon liquidation, which could eliminate or otherwise limit our ability to make distributions to common stockholders. Because our decision to incur or issue debt or issue equity or equity-related securities in the future will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing, nature or success of our future capital raising efforts. Thus, common stockholders bear the risk that our future incurrence or issuance of debt or issuance of equity or equity-related securities will adversely affect the market price of our common stock.

We have not established a minimum distribution payment level, and we cannot assure you of our ability to pay distributions in the future.

We intend to make quarterly distributions of our REIT taxable income to holders of our common stock out of assets legally available therefor. We have not established a minimum distribution payment level and our ability to pay distributions may be adversely affected by a number of factors, including the risk factors described in this report. Any distributions will be authorized by our board of directors and declared by us based upon a number of factors, including our actual and anticipated results of operations, liquidity and financial condition, restrictions under Delaware law or applicable financing covenants, our REIT taxable income, the annual distribution requirements under the REIT provisions of the Internal Revenue Code, our operating expenses and other factors our directors deem relevant. We cannot assure you that we will achieve investment results that will allow us to make a specified level of cash distributions or year-to-year increases in cash distributions in the future.

Furthermore, while we are required to make distributions in order to maintain our REIT status (as described above under “—Risks Related to our Taxation as a REIT—We may be unable to generate sufficient revenue from operations to pay our operating expenses and to pay distributions to our stockholders”), we may elect not to maintain our REIT status, in which case we would no longer be required to make such distributions. Moreover, even if we do elect to maintain our REIT status, we may elect to comply with the applicable requirements by, after completing various procedural steps, distributing, under certain circumstances, a portion of the required amount in the form of shares of our common stock in lieu of cash. If we elect not to maintain our REIT status or to satisfy any required distributions in

shares of common stock in lieu of cash, such action could negatively and materially affect our business, results of operations, liquidity and financial condition as well as the market price of our common stock. No assurance can be given that we will make any distributions on shares of our common stock in the future.

We may in the future choose to make distributions in our own stock, in which case you could be required to pay income taxes in excess of any cash distributions you receive.

We may in the future make taxable distributions that are payable in cash and shares of our common stock at the election of each stockholder. Taxable stockholders receiving such distributions will be required to include the full amount of the distribution as ordinary income to the extent of our current and accumulated earnings and profits for federal income tax purposes. As a result, stockholders may be required to pay income taxes with respect to such distributions in excess of the cash distributions received. If a U.S. stockholder sells the stock that it receives as a distribution in order to pay this tax, the sale proceeds may be less than the amount included in income with respect to the distribution, depending on the market price of our stock at the time of the sale. Furthermore, with respect to certain non-U.S. stockholders, we may be required to withhold U.S. tax with respect to such distributions, including in respect of all or a portion of such distribution that is payable in stock. In addition, if a significant number

140

of our stockholders determine to sell shares of our common stock in order to pay taxes owed on distributions, it may put downward pressure on the trading price of our common stock.

It is unclear whether and to what extent we will be able to pay taxable distributions in cash and stock in later years. Moreover, various aspects of such a taxable cash/stock distribution are uncertain and have not yet been addressed by the IRS. No assurance can be given that the IRS will not impose additional requirements in the future with respect to taxable cash/stock distributions, including on a retroactive basis, or assert that the requirements for such taxable cash/stock distributions have not been met.

An increase in market interest rates may have an adverse effect on the market price of our common stock.

One of the factors that investors may consider in deciding whether to buy or sell shares of our common stock is our distribution rate as a percentage of our stock price relative to market interest rates. If the market price of our common stock is based primarily on the earnings and return that we derive from our investments and income with respect to our investments and our related distributions to stockholders, and not from the market value of the investments themselves, then interest rate fluctuations and capital market conditions will likely affect the market price of our common stock. For instance, if market interest rates rise without an increase in our distribution rate, the market price of our common stock could decrease as potential investors may require a higher distribution yield on our common stock or seek other securities paying higher distributions or interest. In addition, rising interest rates would result in increased interest expense on our outstanding and future (variable and fixed) rate debt, thereby adversely affecting cash flow and our ability to service our indebtedness and pay distributions.

Provisions in our certificate of incorporation and bylaws and of Delaware law may prevent or delay an acquisition of our company, which could decrease the trading price of our common stock.

Our certificate of incorporation, bylaws and Delaware law contain provisions that are intended to deter coercive takeover practices and inadequate takeover bids by making such practices or bids unacceptably expensive to the raider and to encourage prospective acquirers to negotiate with our board of directors rather than to attempt a hostile takeover. These provisions include, among others:

- a classified board of directors with staggered three-year terms;
- provisions regarding the election of directors, classes of directors, the term of office of directors, the filling of director vacancies and the resignation and removal of directors for cause only upon the affirmative vote of at least 80% of the then issued and outstanding shares of our capital stock entitled to vote thereon;
- provisions regarding corporate opportunity only upon the affirmative vote of at least 80% of the then issued and outstanding shares of our capital stock entitled to vote thereon;
- removal of directors only for cause and only with the affirmative vote of at least 80% of the then issued and outstanding shares of our capital stock entitled to vote in the election of directors;
- our board of directors to determine the powers, preferences and rights of our preferred stock and to issue such preferred stock without stockholder approval;
- advance notice requirements applicable to stockholders for director nominations and actions to be taken at annual meetings;
- a prohibition, in our certificate of incorporation, stating that no holder of shares of our common stock will have cumulative voting rights in the election of directors, which means that the holders of a majority of the issued and outstanding shares of common stock can elect all the directors standing for election; and
- a requirement in our bylaws specifically denying the ability of our stockholders to consent in writing to take any action in lieu of taking such action at a duly called annual or special meeting of our stockholders.

Public stockholders who might desire to participate in these types of transactions may not have an opportunity to do so, even if the transaction is considered favorable to stockholders. These anti-takeover provisions could substantially impede the ability of public stockholders to benefit from a change in control or a change in our management and board of directors and, as a result, may adversely affect the market price of our common stock and your ability to realize any potential change of control premium.

ERISA may restrict investments by plans in our common stock.

A plan fiduciary considering an investment in our common stock should consider, among other things, whether such an investment is consistent with the fiduciary obligations under the Employee Retirement Income Security Act of 1974, as amended (“ERISA”), including whether such investment might constitute or give rise to a prohibited transaction under ERISA, the Internal Revenue Code or any substantially similar federal, state or local law and, if so, whether an exemption from such prohibited transaction rules is available.
