EXPLANATORY NOTE

This Form 6-K contains the quarterly report of Galmed Pharmaceuticals Ltd. (the “Company”), which includes the Company’s unaudited consolidated financial statements for the three months ended March 31, 2017, together with related information and certain other information. The Company is not subject to the requirements to file quarterly or certain other reports under Section 13 or 15(d) of the Securities Exchange Act of 1934, as amended. The Company does not undertake to file or cause to be filed any such reports in the future, except to the extent required by law.

On May 15, 2017, the Company issued a press release announcing the filing of its financial results for the three months ended March 31, 2017, with the Securities and Exchange Commission. A copy of the press release is attached hereto as Exhibit 99.1 and is incorporated herein by reference.

This Form 6-K is incorporated by reference into the Company's Registration Statement on Form S-8 filed with the Securities and Exchange Commission on August 11, 2015 (Registration No. 333-206292) and its Registration Statement on Form F-3 filed with the Securities and Exchange Commission on March 31, 2015 (Registration No. 333-203133).

GALMED PHARMACEUTICALS LTD.
Notes to Consolidated Financial Statements

Note 1 - Basis of presentation

Galmed Pharmaceuticals Ltd. (the “Company”) is a clinical-stage biopharmaceutical company focused on the development of Aramchol, a first in class, novel once-daily, oral therapy for the treatment of Non-Alcoholic Steato-Hepatitis (“NASH”) for variable populations, as well as other liver associated disorders.

The Company in its current legal structure was incorporated in Israel on July 31, 2013 as a privately held company, and formally commenced operations on February 2, 2014; however, our business has been operating since 2000 under a different group of companies established in 2000 (the “Group”). On February 2, 2014, upon a pre-ruling from the Israeli Tax Authorities, the Company underwent a reorganization (the “Reorganization”), pursuant to which all of the business of our predecessor, Galmed Holdings Inc., including net assets and shares in its wholly-owned subsidiary, Galmed 2000, were transferred to the Company. Contemporaneously, the Company effected a 729-for-1 stock split.

These unaudited interim consolidated financial statements have been prepared as of March 31, 2017, and for the three months period then ended. Accordingly, certain information and footnote disclosures normally included in annual financial statements prepared in accordance with U.S. GAAP have been omitted. These unaudited interim consolidated financial statements should be read in conjunction with the audited financial statements and the accompanying notes of the Company for the year ended December 31, 2016, that are included in the Company's Annual Report on Form 20-F, filed with the Securities and Exchange Commission on March 23, 2017. The results of operations presented are not necessarily indicative of the results to be expected for the year ending December 31, 2017.

Note 2 - Summary of significant accounting policies

The significant accounting policies that have been applied in the preparation of the unaudited consolidated interim financial statements are identical to those that were applied in preparation of the Company's most recent annual financial statements in connection with our Annual Report on Form 20-F.

Note 3 - Stockholders' Equity

1. In January 2017, the Company granted 130,000 options to purchase ordinary shares of the Company with a NIS 0.01 par value to certain officers and employees. The options will vest over a period of four years. The options will expire 10 years from the grant date. The exercise price of the options is \$3.84 per share. The aggregate grant date fair value of such options is \$376 thousand.

2. Subsequent to the balance sheet date, in April 2017, the Company granted 30,000 options to purchase ordinary shares of the Company with a NIS 0.01 par value to two of its consultants. The options will vest over a period of between one and four years. The options will expire 10 years from the grant date. The exercise prices of the options ranges between \$4.75 and \$4.87 per share. The aggregate grant date fair value of such options is \$99 thousand.

7

Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our annual report on Form 20-F for the fiscal year ended December 31, 2016, filed with the Securities and Exchange Commission (the "SEC ") on March 23, 2017 (the "Annual Report"), and in subsequent filings with the SEC. In addition to historical financial information, the following discussion contains forward-looking statements that reflect our plans, estimates and beliefs. Our actual results could differ materially from those discussed in the forward-looking statements. Factors that could cause or contribute to these differences include those discussed below under "Cautionary Note Regarding Forward-Looking Statements" and elsewhere in this report, as well as those set forth under the same heading and the heading "Risk Factors" in the Annual Report.

Cautionary Note Regarding Forward-Looking Statements

This report contains forward-looking statements about our expectations, beliefs or intentions regarding, among other things, our product development efforts, business, financial condition, results of operations, strategies or prospects. In addition, from time to time, we or our representatives have made or may make forward-looking statements, orally or in writing. Forward-looking statements can be identified by the use of forward-looking words such as "believe," "expect," "intend," "plan," "may," "should," "anticipate," "could," "might," "seek," "target," "will," "project," "forecast," "continue" or variations of these words or other comparable words or by the fact that these statements do not relate strictly to historical matters. These forward-looking statements may be included in, among other things, various filings made by us with the SEC, press releases or oral statements made by or with the approval of one of our authorized executive officers. Forward-looking statements relate to anticipated or expected events, activities, trends or results as of the date they are made. Because forward-looking statements relate to matters that have not yet occurred, these statements are inherently subject to risks and uncertainties that could cause our actual results to differ materially from any future results expressed or implied by the forward-looking statements. Many factors could cause our actual activities or results to differ materially from the activities and results anticipated in forward-looking statements, including, but not limited to, the factors summarized below:

the timing and cost of our ongoing Phase IIB ARREST Study, and planned Phase III trials, for our product candidate, Aramchol™ (hereinafter referred to as "Aramchol") for the treatment of patients who are overweight or obese and have pre diabetes or type II diabetes mellitus (hereinafter OD patients) with Non-Alcoholic Steato-Hepatitis, or NASH, or whether Phase III trials will be conducted at all;

- completion and receiving favorable results of these Phase IIB ARREST Study and Phase III trials for Aramchol;
- regulatory action with respect to Aramchol by the U.S. Food and Drug Administration, or FDA, or the European Medicines Authority, or EMA, including but not limited to acceptance of an application for marketing authorization,

review and approval of such application, and, if approved, the scope of the approved indication and labeling;

- the commercial launch and future sales of Aramchol or any other future products or product candidates;

our ability to comply with all applicable post-market regulatory requirements for Aramchol in the countries in which we seek to market the product;

- our ability to achieve favorable pricing for Aramchol;

- our expectations regarding the commercial market for NASH in OD patients;

- third-party payor reimbursement for Aramchol;

- our estimates regarding anticipated capital requirements and our needs for additional financing;
- market adoption of Aramchol by physicians and patients;
- the timing, cost or other aspects of the commercial launch of Aramchol;
- the development and approval of the use of Aramchol for additional indications or in combination therapy; and
- our expectations regarding licensing, acquisitions and strategic operations.

We believe these forward-looking statements are reasonable; however, these statements are only current predictions and are subject to known and unknown risks, uncertainties and other factors that may cause our or our industry's actual results, levels of activity, performance or achievements to be materially different from those anticipated by the forward-looking statements. We discuss many of these risks in the Annual Report in greater detail under the heading "Risk Factors" and elsewhere in the Annual Report and this report. Given these uncertainties, you should not rely upon forward-looking statements as predictions of future events.

All forward-looking statements attributable to us or persons acting on our behalf speak only as of the date hereof and are expressly qualified in their entirety by the cautionary statements included in this report. We undertake no obligations to update or revise forward-looking statements to reflect events or circumstances that arise after the date made or to reflect the occurrence of unanticipated events. In evaluating forward-looking statements, you should consider these risks and uncertainties.

Overview

We are a clinical-stage biopharmaceutical company focused on the development of Aramchol™, a first in class, novel, once-daily, oral therapy for the treatment of NASH for variable populations, as well as other liver associated disorders. We are currently conducting the ARREST Study, a multicenter, randomized, double blind, placebo-controlled Phase IIb clinical study designed to evaluate the efficacy and safety of Aramchol™ in 248 subjects with NASH, who are overweight or obese, and who are pre-diabetic or type-II-diabetic. Top line Data from the ARREST Study are expected to be available during the second quarter of 2018.

We also sponsor the ARRIVE Study, a proof-of-concept Phase IIa clinical trial designed to evaluate the safety and efficacy of Aramchol™ in up to 50 patients with HIV-associated NAFLD (Non-Alcoholic Fatty Liver Disease) and lipodystrophy. The ARRIVE Study is an investigator-initiated trial, conducted at the University of California San Diego by Professor Rohit Loomba. More information about the ARREST Study and the ARRIVE Study may be found on ClinicalTrials.gov identifiers: NCT02279524 and NCT02684591, respectively.

Aramchol™ (arachidyl amido cholanoic acid) is a novel fatty acid bile acid conjugate, inducing beneficial modulation of intra-hepatic lipid metabolism. Aramchol™'s ability to modulate hepatic lipid metabolism was discovered and validated in animal models, demonstrating down regulation of the three key pathologies of NASH; steatosis, inflammation and fibrosis. The effect of Aramchol™ on fibrosis is mediated by down regulation of steatosis and directly on human collagen producing cells. We are investing efforts into better understanding the mechanisms by which Aramchol™ down regulates steatosis and fibrosis. Additional animal models are being investigated with variety of treatment regimens. The data, thus far, demonstrates dual mode of action of Aramchol on fibrosis via improvement of Fatty Acid oxidation as well a direct impact on stellate cells which are the collagen producing cells in the liver which results in reversing fibrosis. Aramchol™ has been granted by the FDA Fast Track designation status for the treatment of NASH.

Financial Overview

To date, we have funded our operations primarily through the sale of equity and debt securities in private equity and debt financings in Israel to our affiliates (which has subsequently been converted in whole into common equity; no debt remains on our balance sheet), shareholders and third-party investors, and as of March 18, 2014, through the sale of our ordinary shares in our initial public offering and ATM offering. On March 31, 2017, we had current assets of \$12.0 million, which consists of cash and cash equivalents of \$1.7 million and short-term investment securities of \$10.0 million. This compares with current assets of \$15.7 million at December 31, 2016, which consists of cash and cash equivalents of \$3.1 million and short-term investment securities of \$12.4 million. Although we provide no assurance, we believe that such existing funds will be sufficient to continue our business and operations as currently conducted through the first half of 2018. However, we will continue to incur operating losses, which may be substantial over the next several years, and we may need to obtain additional funds to complete the ARREST Study, and further develop our research and development programs.

Business Developments

During the first quarter of 2017, we announced the following developments:

- On January 9, 2017, we announced that we completed patient recruitment to the ARREST Phase IIb NASH Study.

On March 15, 2017, we announced certain organizational changes in our management, which include: (i) the appointment of Dr. Tali Gorfine, our then Senior Medical Director, as our Chief Medical Officer, in lieu of Prof. Ran Oren, which was appointed to serve as a member of our board of directors and continues to provide us services as a member of our scientific advisory board; (ii) the appointment of Adv. Guy Nehemya, our then Director of Operations, as Vice President, Operations; and (iii) the appointment of Adv. Yael Hollander, our then General Counsel and Corporate Secretary, as Vice President, Legal Affairs & Strategy.

Edgar Filing: Galmed Pharmaceuticals Ltd. - Form 6-K

We previously announced that CPA Yohai Stenzler, our then director of finance, will act as interim Chief Financial Officer, in lieu of Mr. Josh Blacher. On March 15, 2017, we announced the appointment of Mr. Stenzler as our permanent Chief Financial Officer.

On March 23, 2017, we announced new independent research is pointing towards potential direct effect of Aramchol on liver fibrosis.

Revenues:

On July 28, 2016, we entered into a license agreement, referred to herein as the Samil Agreement, with Samil Pharma. Co., Ltd. for the commercialization of Aramchol (with the option to manufacture) in the Republic of Korea. Under the terms of the Samil Agreement, we have received upfront payments of \$2.1 million, and may be eligible to receive up to approximately \$6.0 million in additional payments for development and regulatory milestones for Aramchol in the licensed territories. For accounting purposes, the upfront payment has been recorded as deferred revenue. The deferred revenue is then amortized on a straight-line basis over the contractual period and milestone payments are recognized once earned.

Costs and Operating Expenses:

Our current costs and operating expenses consist of two components: (i) research and development expenses; and (ii) general and administrative expenses.

Research and Development Expenses

Our research and development expenses consist primarily of outsourced development expenses, salaries and related personnel expenses and fees paid to external service providers, patent-related legal fees, costs of preclinical studies and clinical trials and drug and laboratory supplies. We charge all research and development expenses to operations as they are incurred. We expect our research and development expenses to remain our primary expenses in the near future as we continue to conduct clinical activities, as well as develop our products. Increases or decreases in research and development expenditures are attributable to the number or duration of the preclinical and clinical studies that we conduct.

We expect that a large percentage of our research and development expense in the future will be incurred in support of our current and future clinical and, to a lesser extent, preclinical development projects. Due to the inherently unpredictable nature of clinical and preclinical development processes, we are unable to estimate with any certainty the costs we will incur in the continued development of Aramchol for NASH and other indications in our pipeline for potential commercialization. Clinical development timelines, the probability of success for any given study, and development costs can differ materially from expectations. We expect to continue to conduct additional clinical trials for our product candidate, and to test our product candidate in preclinical studies for toxicology, safety and efficacy.

While we are currently focused on advancing our product development, our future research and development expenses will depend on the clinical success of our product candidate, as well as ongoing assessments of the candidate's commercial potential. As we obtain results from clinical trials, we may elect to discontinue or delay clinical trials for our product candidate in certain indications in order to focus our resources on more promising indications for such product candidate. Completion of clinical trials may take several years or more, but the length of time generally varies according to the type, complexity, novelty and intended use of a product candidate.

We expect our research and development expenses to increase in the future from current levels as we continue the advancement of our clinical product development and potentially in-license new product candidates. The lengthy process of completing clinical trials and seeking regulatory approval for our product candidate requires the expenditure of substantial resources. Any failure or delay in completing clinical trials, or in obtaining regulatory approvals, could cause a delay in generating product revenue and cause our research and development expenses to increase and, in turn, have a material adverse effect on our operations. Because of the factors set forth above, we are not able to estimate with any certainty when we would recognize any net cash inflows from our projects.

General and Administrative Expenses

General and administrative expenses consist primarily of compensation for employees in executive and operational roles, including accounting, finance, legal and investor relations. Our other significant general and administrative expenses include non-cash stock-based compensation costs and facilities costs (including the rental expense for our offices in Tel Aviv, Israel), professional fees for outside accounting and legal services, travel costs, investors relations, insurance premiums and depreciation.

We expect our general and administrative expenses, such as accounting and legal fees, to increase as we grow and operate as a public company, and we expect an increase in our salary and benefits expense as a result of the additional management and operational personnel that we hired since our initial public offering to address the anticipated growth of our company, as well as performance-based salary increases and bonuses, if at all.

Financial Income, Net

Our financial income consists of interest income from marketable securities and short-term bank deposits. Our financial expense consists of bank fees.

Results of Operations

The table below provides our results of operations for the three months ended March 31, 2017 as compared to the three months ended March 31, 2016.

	Three months ended March 31,	
	2017	2016
	(unaudited)	(unaudited)
	(In thousands, except per share data)	
Revenue	268	-
Research and development expenses	2,743	3,384
General and administrative expenses	789	719
Operating loss	3,264	4,103
Financial income, net	(102)	(119)
Net loss	3,162	3,984
Other comprehensive income:	(24)	(46)
Comprehensive loss	3,138	3,938
Basic and diluted net Loss per share	\$ 0.26	\$ 0.36

Revenue

Licensing revenue was approximately \$268 thousand for the three months ended March 31, 2017, compared to no revenue for the three months ended March 31, 2016. The above mentioned revenue resulted from the amortization of

the up-front payments under the license agreement with Samil Pharm.

Research and Development Expenses

Our research and development expenses amounted to approximately \$2.7 million during the three months ended March 31, 2017, representing a decrease of approximately \$641 thousand, or 19%, compared to approximately \$3.4 million for the comparable period in 2016.

The decrease during the three months ended March 31, 2017 primarily resulted from a decrease of approximately \$711 thousand in CMC expenses as compared to such expenses for the comparable period in 2016.

General and Administrative Expenses

Our general and administrative expenses amounted to approximately \$789 thousand during the three months ended March 31, 2017, representing an increase of approximately \$70 thousand, or 10%, compared to approximately \$719 thousand for the comparable period in 2016.

The increase during the three months ended March 31, 2017 primarily resulted from an increase of approximately \$46 thousand in salaries and benefits and an increase of approximately \$44 thousand of non-cash stock based compensation expenses, as compared to such expenses for the comparable period in 2016.

Operating Loss

As a result of the foregoing, for the three months ended March 31, 2017, our operating loss was approximately \$3.3 million, representing a decrease of approximately \$839 thousand, as compared to our operating loss of approximately \$4.1 million for the comparable prior year period. The decrease for the three months ended March 31, 2017, primarily resulted from a decrease in our research and development expenses, and as well, from our licensing revenue.

Financial Income, Net

Our financial income amounted to approximately \$102 thousand during the three months ended March 31, 2017, representing a decrease of approximately \$17 thousand, or 14%, compared to approximately \$119 thousand for the comparable period in 2016.

Net Loss

As a result of the foregoing, for the three months ended March 31, 2017, our Net loss was approximately \$3.2 million, representing a decrease of approximately \$822 thousand, respectively, as compared to our operating loss for the comparable prior year period.

Liquidity and Capital Resources

To date, we have funded our operations primarily through the sale of equity and debt securities in private equity offerings and debt financings in Israel to our affiliates (that has subsequently been converted in whole to common equity; no debt or debt-related securities remains on our balance sheet), shareholders and third-party investors, and as of March 18, 2014, through the sale of our ordinary shares in our initial public offering (approximately \$39.9 million of net proceeds) and through our ATM Offering (approximately \$4.5 million of net proceeds), and as well, through the upfront payment received from Samil (approximately \$2.1 million). Furthermore, under our Sales Agreement, we may still raise up to approximately \$11.3 million through the sale of additional ordinary shares in our ATM Offering.

We have incurred substantial losses since our inception. As of March 31, 2017, we had an accumulated deficit of approximately \$67.5 million and positive working capital (current assets less current liabilities) of approximately \$8.2 million. We expect that operating losses will continue for the foreseeable future.

As of March 31, 2017, we had cash and cash equivalents of approximately \$1.7 million and marketable securities of approximately \$10.0 million invested in accordance with our investment policy, totaling approximately \$11.7 million, as compared to approximately \$3.1 million and approximately \$12.4 million as of December 31, 2016, totaling approximately \$15.5 million. The decrease is mainly attributable to our net loss of approximately \$3.2 million during the three months ended, March 31, 2017.

We had negative cash flow from operating activities of approximately \$3.9 million for the three months ended March 31, 2017, as compared to negative cash flow from operating activities of approximately \$3.1 million for the three months ended March 31, 2016. The negative cash flow from operating activities for the three months ended March 31, 2017 is mainly attributable to our net loss of approximately \$3.2 million, and as well, a decrease of approximately \$1.0 million of trade payables, other accounts payables and upfront fee from license agreement; partially offset by non-cash stock based compensation expenses of approximately \$361 thousand.

We had positive cash flow from investing activities of approximately \$2.4 million for the three months ended March 31, 2017, as compared to positive cash flow from investing activities of approximately \$2.0 million for the three months ended March 31, 2016. The positive cash flow from investing activities for the three months ended in both periods was mainly related to the consideration of marketable securities.

Although there can be no assurance, we believe that our existing cash resources will be sufficient to fund our projected cash requirements through the first half of 2018. Nevertheless, we will require significant additional financing in the future to fund our operations if and when we progress into Phase III trials of Aramchol and clinical trials for other indications, obtain regulatory approval of Aramchol and commercialize the drug. Our management may choose to raise such additional capital, which would be authorized by our board of directors, at their discretion.

Trend Information

We are a development stage company, and it is not possible for us to predict with any degree of accuracy the outcome of our research, development or commercialization efforts. As such, it is not possible for us to predict with any degree of accuracy any significant trends, uncertainties, demands, commitments or events that are reasonably likely to have a material effect on our net sales or revenues, income from continuing operations, profitability, liquidity or capital resources, or that would cause financial information to not necessarily be indicative of future operating results or financial condition. However, to the extent possible, certain trends, uncertainties, demands, commitments and events are in this “Management’s Discussion and Analysis of Financial Condition and Results of Operations”.

Controls and Procedures

As a “foreign private issuer”, we are only required to conduct the evaluations required by Rules 13a-15(b) and 13a-15(d) of the Exchange Act as of the end of each fiscal year and therefore have elected not to provide disclosure regarding such evaluations at this time.
