STERLING BANCORP AND SUBSIDIARIES Notes to Consolidated Financial Statements (Unaudited)

- 1. The consolidated financial statements include the accounts of Sterling Bancorp (the parent company) and its subsidiaries, principally Sterling National Bank and its subsidiaries (the bank), after elimination of material intercompany transactions. The term the Company refers to Sterling Bancorp and its subsidiaries. The consolidated financial statements as of and for the interim periods ended September 30, 2005 and 2004 are unaudited; however, in the opinion of management, all adjustments, consisting of normal recurring accruals, necessary for a fair presentation of such periods have been made. Certain reclassifications have been made to the 2004 consolidated financial statements to conform to the current presentation. The interim consolidated financial statements should be read in conjunction with the Company s annual report on Form 10-K for the year ended December 31, 2004. The Company effected a six-for-five stock split on December 8, 2004 and a five-for-four stock split on September 10, 2003 and paid stock dividends as follows: 20% on December 9, 2002; 10% on December 10, 2001; 10% on December 11, 2000; and 5% on December 14, 1999. Fractional shares were cashed-out and payments were made to shareholders in lieu of fractional shares. All capital and share amounts as well as basic and diluted average number of shares outstanding and earnings per average common share information for all prior reporting periods presented, reflect the effect of the stock splits and stock dividends.
- 2. At September 30, 2005, the Company has a stock-based employee compensation plan, which is described more fully in Note 1 and Note 15 to the consolidated financial statements in the Company's annual report on Form 10-K for the year ended December 31, 2004. The Company accounts for this plan under the recognition and measurement principles of Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, and related Interpretations. No stock-based employee compensation cost is reflected in net income, as all options granted under those plans had an exercise price equal to the market value of the underlying common stock on the date of grant. In accordance with Statement of Financial Accounting Standards (SFAS) No. 148, the following table illustrates the effect on net income and earnings per average common share if the Company had applied the fair value recognition provisions of SFAS No. 123, Accounting for Stock-Based Compensation, to the stock-based employee compensation plans.

- 4. In February 2004, 224,432 Series D preferred shares were converted into 428,304 common shares.
- 5. SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*, established standards for the way that public business enterprises report and disclose selected information about operating segments in interim financial

STERLING BANCORP AND SUBSIDIARIES Notes to Consolidated Financial Statements (Unaudited)

The Company provides a broad range of financial products and services, including commercial loans, asset-based financing, factoring and accounts receivable management services, trade financing, equipment leasing, corporate and consumer deposit services, commercial and residential mortgage lending and brokerage, trust and estate administration and investment management services. The Company s primary source of earnings is net interest income, which represents the difference between interest earned on interest-earning assets and the interest incurred on interest-bearing liabilities. The Company s 2005 year-to-date average interest-earning assets were 58.5% loans (corporate lending was 66.7% and real estate lending was 29.7% of total loans, respectively) and 40.5% investment securities and money market investments. There are no industry concentrations exceeding 10% of loans, gross, in the corporate loan portfolio. Approximately 72% of loans are to borrowers located in the metropolitan New York area. In order to comply with SFAS No. 131, the Company has determined that it has three reportable operating segments: corporate lending, real estate lending and company-wide treasury.

The following tables provide certain information regarding the Company s operating segments for the three and nine month periods ended September 30, 2005 and 2004:

| | Corporate Lending | | Real Estate Lending | | Company-wide Treasury | | Totals |

7. The following table sets forth components of net periodic benefit cost and net benefit cost for the Company s noncontributory defined benefit pension plan and unfunded supplemental retirement plan:

| | Three Months Ended September 30, | | | | | Nine Months Ended September 30, | | | | |
|------------------------------------|----------------------------------|-----------|----|-----------|------|---------------------------------|------|-------------|--|--|
| | 2005 | | | 2004 | 2005 | | 2004 | | | |
| COMPONENTS OF NET PERIODIC COST | | | | | | | | | | |
| Service Cost | \$ | 395,231 | \$ | 388,090 | \$ | 1,202,917 | \$ | 1,191,131 | | |
| Interest Cost | | 559,634 | | 492,931 | | 1,578,620 | | 1,507,418 | | |
| Expected return on plan assets | | (480,328) | | (417,379) | | (1,365,426) | | (1,292,898) | | |
| Amortization of prior service cost | | 18,324 | | 19,331 | | 56,556 | | 57,993 | | |
| Recognized actuarial loss | | 291,769 | _ | 216,556 | | 706,477 | _ | 643,647 | | |
| Net periodic benefit cost | | 784,630 | | 699,529 | | 2,179,144 | | 2,107,291 | | |
| Settlement gain | _ | | _ | | _ | | _ | (1,331,190) | | |
| Net benefit cost | \$ | 784,630 | \$ | 699,529 | \$ | 2,179,144 | \$ | 776,101 | | |

The Company contributed \$3,000,000 to the defined benefit pension plan as of September 30, 2005.

- 8. SFAS No. 123R, *Share-Based Payment*, will be effective for the Company beginning January 1, 2006. SFAS No. 123R provides alternative transition methods, and the Company has not yet determined which transition method it will apply upon adoption of SFAS No. 123R. The impact on the Company s consolidated financial statements will depend on the transition method selected.
- 9. In May, 2005, the Financial Accounting Standards Board (FASB) issued SFAS No. 154, Accounting Changes and Error Corrections. This statement replaces APB Opinion No. 20, Accounting Changes, and SFAS No. 3, Reporting Accounting Changes in Interim Financial Statements, and changes the requirements for the accounting for and reporting of a change in accounting principle. This statement applies to all voluntary changes in accounting principle. It also applies to changes required by an accounting pronouncement in the unusual instance that the pronouncement does not include specific transition provisions. When a pronouncement includes specific transition provisions, those provisions should be followed. SFAS No. 154 establishes retrospective application as the required method for reporting a voluntary change in accounting principle and for adopting a new accounting pronouncement in the unusual instance that the pronouncement does not include specific transition guidance. SFAS No. 154 provides guidance for determining whether retrospective application of a change in accounting principle is impracticable and for reporting a change when retrospective application is impracticable. The reporting of a correction of an error by restating previously issued financial statements is also addressed by SFAS No. 154. SFAS No. 154 is effective for accounting changes and correction of errors made in fiscal years beginning after December 15, 2005. The Company expects to adopt SFAS No. 154 on January 1, 2006.

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following commentary presents management s discussion and analysis of the financial condition and results of operations of Sterling Bancorp (the parent company), a financial holding company under the Gramm-Leach-Bliley Act of 1999, and its subsidiaries, principally Sterling National Bank (the bank). Throughout this discussion and analysis, the term the Company refers to Sterling Bancorp and its subsidiaries. This discussion and analysis should be read in conjunction with the consolidated financial statements and supplemental data contained elsewhere in this quarterly report and the Company s annual report on Form 10-K for the year ended December 31, 2004. Certain reclassifications have been made to prior years financial data to conform to current financial statement presentations as well as to reflect the effect of the six-for-five stock split effected on December 8, 2004.

OVERVIEW

The Company provides a broad range of financial products and services, including business and consumer loans, commercial and residential mortgage lending and brokerage, asset-based financing, factoring/accounts receivable management services, deposit services, trade financing, equipment leasing, trust and estate administration, and investment management services. The Company has operations in New York, New Jersey, Virginia and North Carolina and conducts business throughout the United States. The general state of the U.S. economy and, in particular, economic and market conditions in the metropolitan New York area have a significant impact on loan demand, the ability of borrowers to repay these loans and the value of any collateral securing these loans and may also affect deposit levels. Accordingly, future general economic conditions are a key uncertainty that management expects will materially affect the Company s results of operations.

For the three months ended September 30, 2005, the bank s average earning assets represented approximately 96.5% of the Company s average earning assets. Loans represented 58.4% and investment securities represented 41.0% of the bank s average earning assets for the three months ended September 30, 2005.

For the nine months ended September 30, 2005, the bank s average earning assets represented approximately 96.5% of the Company s average earning assets. Loans represented 57.0% and investment securities represented 42.0% of the bank s average earning assets for the nine months ended September 30, 2005.

The Company s primary source of earnings is net interest income, and its principal market risk exposure is interest rate risk. The Company is not able to predict market interest rate fluctuations, and its asset-liability management strategy may not prevent interest rate changes from having a material adverse effect on the Company s results of operations and financial condition.

Although management endeavors to minimize the credit risk inherent in the Company s loan portfolio, it must necessarily make various assumptions and judgments about the collectibility of the loan portfolio based on its experience

and evaluation of economic conditions. If such assumptions or judgments prove to be incorrect, the current allowance for loan losses may not be sufficient to cover loan losses and additions to the allowance may be necessary, which would have a negative impact on net income.

There is intense competition in all areas in which the Company conducts its business. The Company competes with banks and other financial institutions, including savings and loan associations, savings banks, finance companies and credit unions. Many of these competitors have substantially greater resources and lending limits and provide a wider array of banking services. To a limited extent, the Company also competes with other providers of financial services, such as money market mutual funds, brokerage firms, consumer finance companies and insurance companies. Competition is based on a number of factors, including prices, interest rates, service, availability of products, and geographic location.

The Company regularly evaluates acquisition opportunities and conducts due diligence activities in connection with possible acquisitions. As a result, acquisition discussions, and in some cases negotiations, regularly take place and future acquisitions could occur.

INCOME STATEMENT ANALYSIS

Net interest income, which represents the difference between interest earned on interest-earning assets and interest incurred on interest-bearing liabilities, is the Company's primary source of earnings. Net interest income can be affected by changes in market interest rates as well as the level and composition of assets, liabilities and shareholders' equity. Net interest spread is the difference between the average rate earned, on a tax-equivalent basis, on interest-earning assets and the average rate paid on interest-bearing liabilities. The net yield on interest-earning assets (net interest margin) is calculated by dividing tax-equivalent net interest income by average interest-earnings assets. Generally, the net interest margin will exceed the net interest spread because a portion of interest-earning assets are funded by various noninterest-bearing sources, principally noninterest-bearing deposits and shareholders' equity. The increases (decreases) in the components of interest income and interest expense, expressed in terms of fluctuation in average volume and rate, are provided in the Rate/Volume Analysis shown on pages 27 and 28. Information as to the components of interest income and interest expense and average rates is provided in the Average Balance Sheets shown on pages 25 and 26.

Comparisons of the Three Months Ended September 30, 2005 and 2004

The Company reported net income for the three months ended September 30, 2005 of \$6.3 million, representing \$0.33 per share, calculated on a diluted basis, compared to \$6.6 million, or \$0.35 per share calculated on a diluted basis, for the third quarter of 2004. Net income benefitted from continued growth in net interest income and higher noninterest income, but these benefits were more than offset by increases in noninterest expenses, in the provision for income taxes and in the provision for loan losses.

Net Interest Income

Net interest income, on a tax-equivalent basis, increased to \$21.5 million for the third quarter of 2005 from \$20.0 million for the 2004 period, due to higher average earning assets outstanding coupled with higher average yield on loans partially offset by higher balances for interest-bearing deposits coupled with higher rates paid on interest-bearing deposit balances and borrowed funds. The net interest margin, on a tax-equivalent basis, was 4.76% for the third quarter of 2005 compared to 4.84% for the 2004 period. The net interest margin was affected by the higher interest rate environment in 2005 and by increases in average investment securities, loan outstandings and noninterest-bearing deposits, offset by the impact of higher average interest-bearing deposits.

Total interest income, on a tax-equivalent basis, aggregated \$29.4 million for the third quarter of 2005, up from \$25.0 million for the 2004 period. The tax-equivalent yield on interest-earning assets was 6.54% for the third quarter of 2005 compared to 6.11% for the 2004 period.

Interest earned on the loan portfolio amounted to \$21.2 million for the third quarter of 2005, up \$4.3 million from a year ago. Average loan balances amounted to \$1,087.3 million, an increase of \$135.4 million from an average of \$951.9 million in the prior year period. The increase in average loans (across virtually all segments of the Company s loan portfolio), primarily due to the Company s business development activities and the ongoing consolidation of banks in the Company s marketing area, accounted for \$2.6 million of the \$4.3 million increase in interest earned on loans. The increase in the yield on the domestic loan portfolio to 8.02% for the third quarter of 2005 from 7.31% for the 2004 period was primarily attributable to the mix of average outstanding balances among the components of the loan portfolio and the higher interest rate environment in 2005.

Interest earned on the securities portfolio, on a tax-equivalent basis, increased to \$8.1 million for the third quarter of 2005 from \$8.0 million in the prior year period. Average outstandings increased to \$719.8 million (39.6% of average earning assets for the third quarter of 2005) from \$682.7 million (41.2% of average earning assets) in the prior year period. The average life of the securities portfolio was approximately 3.8 years at September 30, 2005 compared to 4.2 years at September 30, 2004, reflecting the impact of purchases. The decrease in yields on most of the securities portfolio reflects the impact of the continued flattening of the yield curve.

Total interest expense increased to \$7.9 million for the third quarter of 2005 from \$5.1 million for the 2004 period, primarily due to higher rates paid for interest-bearing deposits and for borrowed funds and higher average balances for interest-bearing deposits.

Interest expense on deposits increased to \$5.0 million for the third quarter of 2005 from \$3.0 million for the 2004 period primarily due to the higher interest rate environment in 2005, coupled with an increase in average balances, primarily for time deposits. Average rate paid on interest-bearing deposits was 2.06%

which was 65 basis points higher than the prior year period. Average interest-bearing deposit balances increased to \$953.1 million for the third quarter of 2005 from \$853.3 million in the 2004 period, primarily as a result of the Company s branching initiatives and other business development activities.

Interest expense on borrowings increased to \$2.9 million for the third quarter of 2005 from \$2.0 million for the 2004 period, primarily due to the higher interest rate environment during 2005. The average rate paid on borrowed funds was 3.71% which was 85 basis points higher than the prior year period.

Provision for Loan Losses

Based on management s continuing evaluation of the loan portfolio (discussed under Asset Quality below), the provision for loan losses for the third quarter of 2005 increased to \$2.5 million from \$2.3 million for the prior year period. Factors affecting the level of provision included the growth in the loan portfolios, changes in general economic conditions and the amount of nonaccrual loans.

Noninterest Income

Noninterest income increased to \$9.4 million for the third quarter of 2005 from \$9.2 million in the 2004 period, primarily due to higher revenues from mortgage banking activities and fees for deposit services. Partially offsetting those increases were lower gains on sales of available for sale securities and fees for factoring services.

Noninterest Expenses

Noninterest expenses increased \$1.6 million for the third quarter of 2005 when compared to the 2004 period. The increase was primarily due to higher salaries and professional fees related to compliance efforts and investments in the Sterling franchise, including the new branches, with higher expenses related to salaries, equipment and occupancy costs. These increases were partially offset by a reversal of \$1.0 million of litigation settlement costs originally charged to noninterest expenses in 2001. The increase in other expenses was principally due to increases in appraisal fees, credit reports, mortgage taxes, insurance and interest on potential tax liability.

Provision for Income Taxes

The provision for income taxes for the third quarter of 2005 increased to \$3.9 million from \$3.6 million for the prior year period, primarily due to the higher effective tax rate in 2005.

Comparisons of the Nine Months Ended September 30, 2005 and 2004

The Company reported net income for the nine months ended September 30, 2005 of \$18.1 million, representing \$0.96 per share, calculated on a diluted basis, compared to \$18.3 million, or \$0.96 per share calculated on a diluted basis, for the first nine months of 2004. Net income benefitted from continued growth in net interest income, a lower provision for loan losses and higher noninterest income, which were more than offset by increases in noninterest expenses and in the provision for income taxes.

Net Interest Income

Net interest income, on a tax-equivalent basis, increased to \$63.4 million for the first nine months of 2005 from \$58.4 million for the 2004 period, due to higher average earning assets outstanding coupled with higher average yield on loans partially offset by higher balances for interest-bearing deposits coupled with higher rates paid on interest-bearing deposit balances and borrowed funds. The net interest margin, on a tax-equivalent basis, was 4.92% for the first nine months of 2005, unchanged from the 2004 period. Net interest margin was affected by the higher interest rate environment in 2005 and by increases in average loan outstandings and noninterest-bearing deposits, substantially offset by the impact of higher average interest-bearing deposits.

Total interest income, on a tax-equivalent basis, aggregated \$83.8 million for the first nine months of 2005, up from \$72.5 million for the 2004 period. The tax-equivalent yield on interest-earning assets was 6.52% for the first nine months of 2005 compared to 6.13% for the 2004 period.

Interest earned on the loan portfolio amounted to \$59.1 million for the first nine months of 2005, up \$11.7 million from a year ago. Average loan balances amounted to \$1,033.4 million, an increase of \$128.0 million from an average of \$905.4 million in the prior year period. The increase in average loans (across virtually all segments of the Company s loan portfolio), primarily due to the Company s business development activities and the ongoing consolidation of banks in the Company s marketing area, accounted for \$7.1 million of the \$11.7 million increase in interest earned on loans. The increase in the yield on the domestic loan portfolio to 8.04% for the first nine months of 2005 from 7.38% for the 2004 period was primarily attributable to the mix of average outstanding balances among the components of the loan portfolio and the higher interest rate environment in 2005.

Interest earned on the securities portfolio, on a tax-equivalent basis, decreased to \$24.4 million for the first nine months of 2005 from \$25.0 million in the prior year period. The decrease in yields on most of the securities portfolio reflects the impact of the continued flattening of the yield curve. Average outstandings increased to \$715.5 million (40.5% of average earning assets for the first nine months of 2005) from \$698.3 million (43.1% of average earning assets) in the prior year period. The average life of the securities portfolio was approximately 3.8 years at September 30, 2005 compared to 4.2 years at September 30, 2004, reflecting the impact of purchases.

Total interest expense increased to \$20.3 million for the first nine months of 2005 from \$14.1 million for the 2004 period, primarily due to higher rates paid for interest-bearing deposits and for borrowed funds and higher average balances for interest-bearing deposits.

Interest expense on deposits increased to \$12.5 million for the first nine months of 2005 from \$7.9 million for the 2004 period primarily due to the higher interest rate environment in 2005, coupled with an increase in average balances, primarily for time deposits. Average rate paid on interest-bearing deposits was 1.81% which was 52 basis points higher than the prior year period. Average

interest-bearing deposit balances increased to \$924.4 million for the first nine months of 2005 from \$815.3 million in the 2004 period, primarily as a result of the Company s branching initiatives and other business development activities.

Interest expense on borrowings increased to \$7.8 million for the first nine months of 2005 from \$6.2 for the 2004 period, primarily due to the higher interest rate environment during 2005. The average rate paid on borrowed funds was 3.42% which was 69 basis points higher than the prior year period.

Noninterest Income

Noninterest income increased to \$26.7 million for the first nine months of 2005 from \$25.9 million in the 2004 period, primarily due to higher revenues from mortgage banking activities, bank owned life insurance and fees for deposit services. Partially offsetting those increases were lower gains on sales of available for sale securities and fees for factoring services.

Noninterest Expenses

Noninterest expenses increased \$4.6 million for the first nine months of 2005 when compared to the 2004 period. The increase was primarily due to higher salaries and professional fees related to compliance efforts and investments in the Sterling franchise, including the new branches, with higher expenses related to salaries, equipment and occupancy costs. These increases were partially offset by a reversal during the third quarter of 2005 of \$1.0 million of litigation settlement costs originally charged to noninterest expenses in 2001. The increase in other expenses was principally due to increases in appraisal fees, credit reports, mortgage taxes, insurance and interest on potential tax liability.

Provision for Income Taxes

The provision for income taxes for the first nine months of 2005 increased by \$1.5 million from the 2004 period. The lower provision for taxes in the 2004 period was due primarily to the resolution, during the second quarter of 2004, of certain state tax issues for the years 1999-2001.

BALANCE SHEET ANALYSIS

Securities

The Company s securities portfolios are comprised principally of mortgage-backed securities of U.S. government corporations and government sponsored enterprises. At September 30, 2005, the Company s portfolio of securities totaled \$707.0 million, of which mortgage-backed securities and collateralized mortgage obligations of U.S. government corporations and government sponsored enterprises having an average life of approximately 4.1 years amounted to \$592.0 million. The Company has the intent and ability to hold to maturity securities classified as held to maturity. These securities are carried at cost, adjusted for amortization of premiums and accretion of discounts. The gross unrealized gains and losses on held to maturity securities were \$1.5 million and \$7.5 million, respectively.

Securities classified as available for sale may be sold in the future, prior to maturity. These securities are carried at market value. Net aggregate unrealized gains or losses on these securities are included in a valuation allowance account and are shown net of taxes, as a component of shareholders equity. Available for sale securities includes gross unrealized gains of \$0.8 million and gross unrealized losses of \$3.8 million. Given the generally high credit quality of the portfolio, management expects to realize all of its investment upon the maturity of such instruments and thus believes that any market value impairment is temporary.

The following table presents information regarding securities available for sale:

| September 30, 2005 | | Gross Amortized Cost | | Gross Unrealized Gains | | Gross Unrealized Losses | | Market Value |
|---|----|----------------------------|----|------------------------------|----|-------------------------------|----|-----------------|
| | | | | | | | | |

Loan Portfolio

A management objective is to maintain the quality of the loan portfolio. The Company seeks to achieve this objective by maintaining rigorous underwriting standards coupled with regular evaluation of the creditworthiness of and the designation of lending limits for each borrower. The portfolio strategies include seeking industry and loan size diversification in order to minimize credit exposure and originating loans in markets with which the Company is familiar.

The Company s commercial and industrial loan portfolio represents approximately 55% of all loans. Loans in this category are typically made to small and medium-sized businesses and range between \$25,000 and \$10 million. Sources of repayment are from the borrower s operating profits, cash flows and liquidation of pledged collateral. Based on underwriting standards, loans may be secured in whole or in part by collateral such as liquid assets, accounts receivable, equipment, inventory, and real property. The Company s real estate loan portfolio, which represents approximately 28% of all loans, is secured by mortgages on real property located principally in the states of New York and Virginia. The Company s leasing portfolio, which consists of finance leases for various types of business equipment, represents approximately 15% of all loans. The collateral securing any loan may vary in value based on market conditions.

The following table sets forth the composition of the Company s loans held for sale and loans held in portfolio:

| | September 30, | | | | | | | |
|------------------------------------|---------------|----------|-------------------------------|------|-----------|---------------|--|--|
| | 2005 2004 | | | | | | | |

Asset Quality

Intrinsic to the lending process is the possibility of loss. In times of economic slowdown, the risk of loss inherent in the Company s portfolio of loans may be increased. While management endeavors to minimize this risk, it recognizes that loan losses will occur and that the amount of these losses will fluctuate depending on the risk characteristics of the loan portfolio, which in turn depend on current and expected economic conditions, the financial condition of borrowers, the realization of collateral, and the credit management process.

Management views the allowance for loan losses as a critical accounting policy due to its subjectivity. The allowance for loan losses is maintained through the provision for loan losses, which is a charge to operating earnings. The adequacy of the provision and the resulting allowance for loan losses is determined by a management evaluation process of the loan portfolio, including identification and review of individual problem situations that may affect the borrower subility to repay, review of overall portfolio quality through an analysis of current charge-offs, delinquency and nonperforming loan data, estimates of the value of any underlying collateral, an assessment of current and expected economic conditions and changes in the size and character of the loan portfolio. Other data utilized by management in determining the adequacy of the allowance for loan losses includes, but is not limited to, the results of regulatory reviews, the amount of, trend of and/or borrower characteristics on loans that are identified as requiring special attention as part of the credit review process, and peer group comparisons. The impact of this other data might result in an allowance which will be greater than that indicated by the evaluation process previously described. The allowance reflects management is evaluation both of loans presenting identified loss potential and of the risk inherent in various components of the loan portfolio, including loans identified as impaired as required by SFAS No. 114. Thus, an increase in the size of the portfolio or in any of its components could necessitate an increase in the allowance even though there may not be a decline in credit quality or an increase in potential problem loans. A significant change in any of the evaluation factors described above could result in future additions to the allowance.

At September 30, 2005, the ratio of the allowance to loans held in portfolio, net of unearned discounts, was 1.47% and the allowance was \$16.2 million. At such date, the Company s nonaccrual loans amounted to \$4.0 million; \$0.7 million of such loans was judged to be impaired within the scope of SFAS No. 114. Loans 90 days past due and still accruing amounted to \$0.8 million. Nonaccrual loans and loans 90 days past due and still accruing include leases, in the amount of \$0.5 million and \$0.6 million, respectively, of telecommunications equipment from a company that went into bankruptcy in July 2004. The service provider to the lessees discontinued service, resulting in the failure of certain lessees to make payments. While pursuing collection of the lease payments, past due amounts accrue. Legal action is typically commenced against lessees whose accounts are not paid within 180 days and are placed in nonaccrual status. Lessees remain unconditionally obligated to make payments. All are creditworthy and personally guaranteed; the reported delinquencies are not due to credit issues. Based on the foregoing, as well as management s judgment as to the current risks inherent in loans held in portfolio, the Company s allowance for loan losses was deemed adequate to absorb all reasonably anticipated losses on specifically known and other possible credit risks associated with the portfolio as of September 30, 2005. Net losses within loans held in portfolio are not statistically predictable and changes in conditions in the next twelve months could result in future provisions for loan losses varying from the level taken in the first nine months of 2005. Potential problem loans, which are loans that are currently performing under present loan repayment terms but where known information about possible credit problems of borrowers causes management to have serious doubts as to the ability of the borrowers to continue to comply with the present repayment terms, aggregated \$2.6 million at September 30, 2005.

Deposits

A significant source of funds for the Company continues to be deposits, consisting of demand (noninterest-bearing), NOW, savings, money market and time deposits (principally certificates of deposit).

The following table provides certain information with respect to the Company s deposits:

| | | September 30, | | | | | | |
|-------------------------|--------------|------------------------------|------------------|---------------|--|--|--|--|
| | 2005 | 2005 | | | | | | |
| | Balances | (\$ in thou % of Total | sands) Balances | % of Total | | | | |

| Total domestic deposits | 1,474,474 | 99.8 | 1,296,369 | 99.7 | | | | |
| Foreign | | | | | | | | |
| Time deposits | 3,018 | 0.2 | 3,000 | 0.3 | | | | |
| Total deposits | \$ 1,477,492 | 100.0% | \$ 1,299,369 | 100.0% | | | | |

Fluctuations of balances in total or among categories at any date may occur based on the Company s mix of assets and liabilities as well as on customers balance sheet strategies. Historically, however, average balances for deposits have been relatively stable. Information regarding these average balances is presented on pages 25 and 26.

CAPITAL

The Company and the bank are subject to risk-based capital regulations which quantitatively measure capital against risk-weighted assets, including certain off-balance sheet items. These regulations define the elements of the Tier 1 and Tier 2 components of Total Capital and establish minimum ratios of 4% for Tier 1 capital and 8% for Total Capital for capital adequacy purposes. Supplementing these regulations is a leverage requirement. This requirement establishes a minimum leverage ratio (at least 3% to 5%) which is calculated by dividing Tier 1 capital by adjusted quarterly average assets (after deducting goodwill). Information regarding the Company s and the bank s risk-based capital is presented on page 29. In addition, the bank is subject to the Federal Deposit Insurance Corporation Improvement Act of 1981 (FDICIA) which imposes a number of mandatory supervisory measures. Among other matters, five capital categories, ranging from well capitalized to critically under capitalized, are used by regulatory agencies to determine a bank s deposit insurance premium, approval of applications authorizing institutions to increase their asset size or otherwise expand business activities or acquire other institutions. Under FDICIA, a well capitalized bank must maintain minimum leverage, Tier 1 and Total Capital ratios of 5%, 6% and 10%, respectively. The Federal Reserve Board applies comparable tests for holding companies such as the Company. At September 30, 2005, the Company and the bank exceeded the requirements for well capitalized institutions.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

Certain statements contained in this quarterly report, including but not limited to, statements concerning future results of operations or financial position, borrowing capacity and future liquidity, future investment results, future credit exposure, future loan losses and plans and objectives for future operations, and other statements contained herein regarding matters that are not historical facts, are forward-looking statements as defined in the Securities Exchange Act of 1934. These statements are not historical facts but instead are subject to numerous assumptions, risks and uncertainties, and represent only our belief regarding future events, many of which, by their nature, are inherently uncertain and outside our control. Any forward-looking statements we may make speak only as of the date on which such statements are made. Our actual results and financial position may differ materially from the anticipated results and financial condition indicated in or implied by these forward-looking statements.

Factors that could cause our actual results to differ materially from those in the forward-looking statements include, but are not limited to, the following: inflation, interest rates, market and monetary fluctuations; geopolitical developments including acts of war and terrorism and their impact on economic conditions; the effects of, and changes in, trade, monetary and fiscal policies and laws, including interest rate policies of the Board of Governors of the Federal Reserve System; changes, particularly declines, in general economic conditions and in the local economies in which the Company operates; the financial condition of the Company s borrowers; competitive pressures on loan and deposit pricing and demand; changes in technology and their impact on the marketing of new products and services and the acceptance of these products and services by new and existing customers; the willingness of customers to substitute competitors products and services for the Company s products and services; the impact of changes in the financial services laws and regulations (including laws concerning taxes, banking, securities and insurance); changes in accounting principles, policies and guidelines; the success of the Company at managing the risks involved in the foregoing as well as other risks and uncertainties indicated from time to time in press releases and other public filings. The foregoing list of important factors is not exclusive, and we will not update any forward-looking statement, whether written or oral, that may be made from time to time.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK ASSET/LIABILITY MANAGEMENT

The Company s primary earnings source is its net interest income; therefore the Company devotes significant time and has invested in resources to assist in the management of interest rate risk and asset quality. The Company s net interest income is affected by changes in market interest rates, and by the level and composition of interest-earning assets and interest-bearing liabilities. The Company s objectives in its asset/liability management are to utilize its capital effectively, to provide adequate liquidity and to enhance net interest income, without taking undue risks or subjecting the Company unduly to interest rate fluctuations.

The Company takes a coordinated approach to the management of its liquidity, capital and interest rate risk. This risk management process is governed by policies and limits established by senior management which are reviewed and approved by the Asset/Liability Committee. This committee, which is comprised of members of senior management, meets to review, among other things, economic conditions, interest rates, yield curve, cash flow projections, expected customer actions, liquidity levels, capital ratios and repricing characteristics of assets, liabilities and financial instruments.

Market Risk

Market risk is the risk of loss in a financial instrument arising from adverse changes in market indices such as interest rates, foreign exchange rates and equity prices. The Company s principal market risk exposure is interest rate risk, with no material impact on earnings from changes in foreign exchange rates or equity prices.

Interest rate risk is the exposure to changes in market interest rates. Interest rate sensitivity is the relationship between market interest rates and net interest income due to the repricing characteristics of assets and liabilities. The Company monitors the interest rate sensitivity of its balance sheet positions by examining its near-term sensitivity and its longer-term gap position. In its management of interest rate risk, the Company utilizes several financial and statistical tools, including traditional gap analysis and sophisticated income simulation models.

A traditional gap analysis is prepared based on the maturity and repricing characteristics of interest-earning assets and interest-bearing liabilities for selected time bands. The mismatch between repricings or maturities within a time band is commonly referred to as the gap for that period. A positive gap (asset sensitive) where interest rate sensitive assets exceed interest rate sensitive liabilities generally will result in the net interest margin increasing in a rising rate environment and decreasing in a falling rate environment. A negative gap (liability sensitive) will generally have the opposite result on the net interest margin. However, the traditional gap analysis does not assess the relative sensitivity of assets and liabilities to changes in interest rates and other factors that could have an impact on interest rate sensitivity or net interest income. The Company utilizes the gap analysis to complement its income simulations modeling, primarily focusing on the longer-term structure of the balance sheet.

The Company s balance sheet structure is primarily short-term in nature with a substantial portion of assets and liabilities repricing or maturing within one year. The Company s gap analysis at September 30, 2005, presented on page 35, indicates that net interest income would increase during periods of rising interest rates and decrease during periods of falling interest rates, but, as mentioned above, gap analysis may not be an accurate predictor of net interest income.

As part of its asset/liability management program, the Company may use interest rate floors or swaps to reduce its sensitivity to interest rate fluctuations. The Company has written policy guidelines, approved by the Board of Directors, governing the use of off-balance sheet financial instruments, including approved counterparties, risk limits and appropriate internal control procedures. The credit risk of derivatives arises principally from the potential for a counterparty to fail to meet its obligation to settle a contract on a timely basis.

During the third quarter of 2005, the Company entered into two interest rate floor agreements with notional amounts of \$50,000,000 each and maturities of September 14, 2007 and September 14, 2008, respectively. Interest rate floor contracts require the counterparty to pay the Company at specified future dates the amount, if any, by which the specified interest (prime rate) falls below the fixed floor rates, applied to the notional amounts. The Company utilizes these financial instruments to adjust its interest rate risk position without exposing itself to principal risk and funding requirements. These financial instruments are being used as part of the Company s interest rate risk management and not for trading purposes. At September 30, 2005, all counterparties have investment grade credit ratings from the major rating agencies. Each counterparty is specifically approved for applicable credit exposure.

The interest rate floor contracts require the Company to pay a fee for the right to receive a fixed interest payment. The Company paid up front premiums of \$141,250. At September 30, 2005, there were no amounts receivable under these contracts.

The interest rate floor agreements were not designated as hedges for accounting purposes and therefore changes in the fair values of the instruments are required to be recognized as income or expense in our financial statements. At September 30, 2005 the aggregate fair value of the interest rate floors was \$57,314; \$83,936 was charged to other expenses.

The Company utilizes income simulation models to complement its traditional gap analysis. While the Asset/Liability Committee routinely monitors simulated net interest income sensitivity over a rolling two-year horizon, it also utilizes additional tools to monitor potential longer-term interest rate risk.

The income simulation models measure the Company s net interest income volatility or sensitivity to interest rate changes utilizing statistical techniques that allow the Company to consider various factors which impact net interest income. These factors include actual maturities, estimated cash flows, repricing characteristics, deposits growth/retention and, most importantly, the relative sensitivity of the Company s assets and liabilities to changes in market interest rates. This relative sensitivity is important to consider as the Company s core deposit base has not been subject to the same degree of interest rate sensitivity as its assets. The core deposit costs are internally managed and tend to exhibit less sensitivity

to changes in interest rates than the Company s adjustable rate assets whose yields are based on external indices and generally change in concert with market interest rates.

The Company s interest rate sensitivity is determined by identifying the probable impact of changes in market interest rates on the yields on the Company s assets and the rates that would be paid on its liabilities. This modeling technique involves a degree of estimation based on certain assumptions that management believes to be reasonable. Utilizing this process, management projects the impact of changes in interest rates on net interest margin. The Company has established certain policy limits for the potential volatility of its net interest margin assuming certain levels of changes in market interest rates with the objective of maintaining a stable net interest margin under various probable rate scenarios. Management generally has maintained a risk position well within the policy limits. As of September 30, 2005, the model indicated the impact of a 200 basis point parallel and pro rata rise in rates over 12 months would approximate a 1.8% (\$1.6 million) increase in net interest income, while the impact of a 200 basis point decline in rates over the same period would approximate a 2.2% (\$1.9 million) decline from an unchanged rate environment.

The preceding sensitivity analysis does not represent a Company forecast and should not be relied upon as being indicative of expected operating results. These hypothetical estimates are based upon numerous assumptions including: the nature and timing of interest rate levels including yield curve shape, pre-payments on loans and securities, deposit decay rates, pricing decisions on loans and deposits, reinvestment/replacement of asset and liability cash flows, and others. While assumptions are developed based upon current economic and local market conditions, the Company cannot provide any assurances as to the predictive nature of these assumptions, including how customer preferences or competitor influences might change.

Also, as market conditions vary from those assumed in the sensitivity analysis, actual results will also differ due to: pre-payment/refinancing levels likely deviating from those assumed, the varying impact of interest rate change caps or floors on adjustable rate assets, the potential effect of changing debt service levels on customers with adjustable rate loans, depositor early withdrawals and product preference changes, and other variables. Furthermore, the sensitivity analysis does not reflect actions that the Asset/Liability Committee might take in responding to or anticipating changes in interest rates.

The shape of the yield curve can cause downward pressure on net interest income. In general, if and to the extent that the yield curve is flatter (i.e., the differences between interest rates for different maturities are relatively smaller) than previously anticipated, then the yield on the Company s interest-earning assets and its cash flows will tend to be lower. Management believes that a relatively flat yield curve shape could adversely affect the Company s results in 2005.

Liquidity Risk

Liquidity is the ability to meet cash needs arising from changes in various categories of assets and liabilities. Liquidity is constantly monitored and managed at both the parent company and the bank levels. Liquid assets consist of cash and due from banks, interest-bearing deposits in banks and Federal funds sold and securities available for sale. Primary funding sources include core deposits,

capital market funds and other money market sources. Core deposits include domestic noninterest-bearing and interest-bearing retail deposits, which historically have been relatively stable. The parent company and the bank believe that they have significant unused borrowing capacity. Contingency plans exist which we believe could be implemented on a timely basis to mitigate the impact of any dramatic change in market conditions.

While the parent company generates income from its own operations, it also depends for its cash requirements on funds maintained or generated by its subsidiaries, principally the bank. Such sources have been adequate to meet the parent company s cash requirements throughout its history.

Various legal restrictions limit the extent to which the bank can supply funds to the parent company and its nonbank subsidiaries. All national banks are limited in the payment of dividends without the approval of the Comptroller of the Currency to an amount not to exceed the net profits as defined, for the year to date combined with its retained net profits for the preceding two calendar years.

At September 30, 2005, the parent company s short-term debt, consisting principally of commercial paper used to finance ongoing current business activities, was approximately \$39.4 million. The parent company had cash, interest-bearing deposits with banks and other current assets aggregating \$34.0 million. The parent company also has back-up credit lines with banks of \$24.0 million. Since 1979, the parent company has had no need to use the available back-up lines of credit.

The following table sets forth information regarding the Company s obligations and commitments to make future payments under contract as of September 30, 2005:

Payments Due by Period

| Contractual Obligations | Total | than Year | | 1-3 Years | , | 4-5 Years | _ | After 5 Years |

We make available free of charge, on or through the investor relations section of our web site, annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission.

Also posted on our web site, and available in print upon request of any shareholder to our Investor Relations Department, are the charters for our Board of Directors Audit Committee, Compensation Committee and Corporate Governance and Nominating Committee, our Corporate Governance Guidelines, our Method for Interested Persons to Communicate with Non-Management Directors and a Code of Business Conduct and Ethics governing our directors, officers and employees. Within the time period required by the Securities and Exchange Commission and the New York Stock Exchange, we will post on our web site any amendment to the Code of Business Conduct and Ethics and any waiver applicable to our senior financial officers, as defined in the Code, or our executive officers or directors. In addition, information concerning purchases and sales of our equity securities by our executive officers and directors is posted on our web site.

STERLING BANCORP AND SUBSIDIARIES Interest Rate Sensitivity

To mitigate the vulnerability of earnings to changes in interest rates, the Company manages the repricing characteristics of assets and liabilities in an attempt to control net interest rate sensitivity. Management attempts to confine significant rate sensitivity gaps predominantly to repricing intervals of a year or less so that adjustments can be made quickly. Assets and liabilities with predetermined repricing dates are classified based on the earliest repricing period. Amounts are presented in thousands.

^[1] Historically, balances in non-maturity deposit accounts have remained relatively stable despite changes in levels of interest rates. Balances are shown in repricing periods based on management s historical repricing practices and run-off experience.

ITEM 4. CONTROLS AND PROCEDURES

Changes in internal control over financial reporting

The management of the Company is responsible for establishing and maintaining effective internal control over financial reporting. The Company s internal control system was designed to provide reasonable assurance to the Company s management and Board of Directors regarding the preparation and fair presentation of published financial statements.

As previously reported, the management of the Company assessed the effectiveness of the Company s internal control over financial reporting as of December 31, 2004. In making its assessment of internal control over financial reporting, management used the criteria issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control Integrated Framework*. In connection with this assessment, the following material weakness in internal control over financial reporting (as such term is defined in Public Company Accounting Oversight Board Auditing Standard No. 2) was identified: As of December 31, 2004, the Company did not employ sufficient personnel with adequate technical skills relative to accounting for Company-owned split-dollar life insurance policies on the lives of certain officers of the Company. As a result of this deficiency, employee benefits expense in prior periods was materially misstated. Accordingly, the Company restated its audited consolidated financial statements for the years ended December 31, 2002 and 2003, and its unaudited condensed financial information for the three months ended March 31, 2003 and 2004, the three months and six months ended June 30, 2003 and 2004, and the three months and nine months ended September 30, 2003 and 2004, to reflect the correction of the errors in the Company s accounting for split-dollar life insurance policies. As a result of the material weakness described above, the Company s management concluded that, as of December 31, 2004, the Company s internal control over financial reporting was not effective based on the criteria in *Internal Control Integrated Framework*.

As previously reported, the Company has implemented several changes in its internal control over financial reporting. During the first quarter of 2005, the Company developed and implemented procedures for quarterly expensing of premiums paid or prepaid for split-dollar life insurance policies on the lives of certain officers of the Company, retained actuarial assistance in determining the appropriate amounts to be expensed in respect of the Company s obligations to pay future premiums on split-dollar life insurance policies issued as part of a transaction in which an officer relinquishes his right to receive pension payments in exchange for the insurance policy and in respect of the Company s obligations to pay future post-retirement premiums on certain split-dollar life insurance policies, and retained life insurance consultants for assistance in determining the appropriate amounts to be credited in respect of increases in the cash surrender values of these various policies. During the second quarter of 2005, the Company enhanced its staffing by hiring an additional person with expertise in generally accepted accounting principles.

In developing and implementing these procedures and changes in its internal control over financial reporting, the Company s control objective is to account for split-dollar life insurance policies in accordance with generally accepted accounting principles. In connection with the preparation of its unaudited consolidated financial statements for the three months and nine months ended September 30, 2005,

the Company conducted tests of these procedures and changes in its internal control over financial reporting. Based on a review of the results of these tests and of the design and implementation of these procedures and changes, the Company s management concluded that, as of September 30, 2005, these procedures and changes address the previously reported material weakness in internal control over financial reporting described above and achieve the control objective identified above, and that, accordingly, as of September 30, 2005, such previously reported material weakness no longer exists.

No other change in the Company s internal control over financial reporting occurred during the fiscal quarter ended September 30, 2005 that has materially affected, or is reasonably likely to materially affect, the Company s internal control over financial reporting.

Evaluation of disclosure controls and procedures

As required under the Securities Exchange Act of 1934, the Company s management, with the participation of the Company s principal executive and principal financial officers, evaluated the Company s disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) as of the end of the period covered by this quarterly report on Form 10-Q. Based on this evaluation and management s conclusion that the previously reported material weakness in the Company s internal control over financial reporting described above no longer exists, the Company s management, including the Chief Executive Officer and Chief Financial Officer, concluded that, as of the end of the period covered by this quarterly report, the Company s disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms.

PART II - OTHER INFORMATION

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Under its share repurchase program, the Company buys back common shares from time to time. The following table discloses the Company s repurchases of the Company s common shares during the third quarter of 2005.

ISSUER PURCHASES OF EQUITY SECURITIES

| Period | Total Number of Shares Purchased | Average Price Paid Per Share | Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs | Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs |
|----------------------|---|------------------------------------|--|--|
| July 1-31, 2005 | 24,200 | \$ 22.33 | 24,200 | 892,619 |
| August 1-31, 2005 | 46,500 | 22.11 | 46,500 | 846,119 |
| September 1-30, 2005 | 65,300 | 21.46 | 65,300 | 780,819 |
| Total | 136,000 | | 136,000 | |
| Total | 130,000 | | 150,000 | |

All shares were repurchased through the Company s share repurchase program.

The Board of Directors initially authorized the repurchase of common shares in 1997 and since then has approved increases in the number of common shares that the Company is authorized to repurchase. The last increase was announced on June 16, 2005, when the Board of Directors increased the Company s authority to repurchase common shares by an additional 800,000 shares. As of June 30, 2005, the remaining number of shares that could be repurchased was 916,819.

Item 6. Exhibits

The following exhibits are filed as part of this report:

- 3. (i) Restated Certificate of Incorporation filed with the State of New York Department of State, October 28, 2004 (Filed as Exhibit 3(i) to the Registrant s Form 10-Q for the quarter ended September 30, 2004 and incorporated herein by reference).
 - (ii) By-Laws as in effect on August 5, 2004 (Filed as Exhibit 3(ii)(A) to the Registrant s Form 10-Q for the quarter ended September 30, 2004 and incorporated herein by reference).
- 11. Statement Re: Computation of Per Share Earnings.
- 31. Certifications of the CEO and CFO pursuant to Exchange Act Rule 13a-14(a).
- 32. Certifications of the CEO and CFO required by Section 1350 of Chapter 63 of Title 18 of the U.S. Code.
