Enclosure: A press release dated July 23, 2003, announcing Pechiney's for the second quarter of 2003 results.

## PRESS RELEASE

July 23, 2003

**Second Quarter Results 2003**

(Provisional and none audited results. Definitive results will be approved by the Board on July 28. and will be published on July 29. at 7:30 AM)

**For the second quarter of 2003, Pechiney announces earnings from operations of 67 million, down slightly from the 71 million in the previous quarter. Net income in the second quarter totals 12 million, after a net loss of 1 million in the first quarter of the year.**

**Highlights**

The main trends in the Group's earnings from operations were as follows.

- As in previous quarters, the **Primary Aluminum** sector, which reported earnings from operations of 37 million, down from 42 million, was affected by the depreciation of the US dollar. The /\$ parity realized was 1.11 in the second quarter, compared with 1.04 in the first quarter and 0.90 in the second quarter of 2002. The recent stabilization of the US dollar observed in the markets is a positive factor for Pechiney as it is for all aluminum producers with reference to their production capacities outside the dollar zone.
- In the second quarter, the **Aluminum Conversion** sector confirmed the recovery reported in the previous quarter, with earnings from operations of 14 million, versus 15 million in the first quarter and 9 million in the second quarter of 2002. Sales volume remained satisfactory particularly in aerospace in Europe, after the inventory depletion observed in 2002, and as additional orders for the A380 are only beginning their upward trend.
- At 26 million, the **Packaging** sector reported earnings from operations identical to the first quarter. Boosted by good performances in controllable costs reductions, this result was achieved in spite of the fact that the cost of the plastic resins used in flexible packaging reached a high point during the quarter before starting to slide downwards, reflecting the decline in the price of oil.

Pechiney actively continued to implement its strategy during the second quarter with:

- New gains generated by the Pechiney Continuous Improvement System, totaling the cumulated sum of 181 million since January 1, 2002;
- Two major acquisitions: that of the 65% equity interest held by the financial partners in the Aluminium Dunkerque smelter (effective as of December 30, 2003), which will increase the Group's attributable aluminum capacity by 17%, and the acquisition of Novacel, the Mexican leader in specialty flexible packaging, a transaction that is expected to be finalized during the summer.

(\*) The accounting standard SFAS 143 Accounting for Asset Retirement Obligations was adopted during the second quarter of 2003, effective January 1, 2003. This change, which affects essentially the Primary Aluminum sector, resulted in a decrease of Earnings from Operations for the first quarter of 2003 by 1 million and an improvement of net income for the first quarter of 2003 by 1 million. (\*\*) Published net income per share as adjusted to exclude the impact, after taxes, of restructuring expense, other (expense) income and other non-recurring items. Pechiney believes that presenting net income is an additional measure of performance that investors can use to compare net income between reporting periods.
