FREQUENCY ELECTRONICS, INC. and SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements
(Unaudited)

NOTE A – CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

In the opinion of management of Frequency Electronics, Inc. (“the Company”), the accompanying unaudited condensed consolidated interim financial statements reflect all adjustments (which include only normal recurring adjustments) necessary to present fairly, in all material respects, the consolidated financial position of the Company as of July 31, 2015 and the results of its operations and cash flows for the three months ended July 31, 2015 and 2014. The April 30, 2015 condensed consolidated balance sheet was derived from audited financial statements. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted. It is suggested that these condensed consolidated financial statements be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended April 30, 2015 filed on July 29, 2015. The results of operations for such interim periods are not necessarily indicative of the operating results for the full fiscal year.

NOTE B – EARNINGS PER SHARE

Reconciliation of the weighted average shares outstanding for basic and diluted Earnings Per Share are as follows:

	Three months ended July 31,	
	2015	2014
Basic EPS Shares outstanding (weighted average)	8,706,185	8,578,733
Effect of Dilutive Securities	277,852	278,116
Diluted EPS Shares outstanding	8,984,037	8,856,849

The computation of diluted earnings per share excludes those options and stock appreciation rights (“SARS”) with an exercise price in excess of the average market price of the Company’s common shares during the periods presented. The inclusion of such options and SARS in the computation of earnings per share would have been antidilutive. The number of excluded options and SARS for the three months ended July 31, 2015 and 2014 were 330,500 and 300,875, respectively.

NOTE C – COSTS AND ESTIMATED EARNINGS IN EXCESS OF BILLINGS, NET

At July 31, 2015 and April 30, 2015, costs and estimated earnings in excess of billings, net, consist of the following:

	July 31, 2015	April 30, 2015
	(In thousands)	
Costs and estimated earnings in excess of billings	\$ 15,203	\$ 14,057
Billings in excess of costs and estimated earnings	(558)	(1,128)
Net asset	\$ 14,645	\$ 12,929

Such amounts represent revenue recognized on long-term contracts that had not been billed at the balance sheet dates or represent a liability for amounts billed in excess of the revenue recognized. Amounts are billed to customers

pursuant to contract terms, whereas the related revenue is recognized on the percentage of completion basis at the measurement date. In general, the recorded amounts will be billed and collected or revenue recognized within twelve months of the balance sheet date. Revenue on these long-term contracts is accounted for on the percentage of completion basis. During the three months ended July 31, 2015 and 2014, revenue recognized under percentage of completion contracts was approximately \$9.3 million and \$12.9 million, respectively.

NOTE D – TREASURY STOCK TRANSACTIONS

During the three month period ended July 31, 2015, the Company made a contribution of 12,195 shares of its common stock held in treasury to the Company's profit sharing plan and trust under section 401(k) of the Internal Revenue Code. Such contributions are in accordance with the Company's discretionary match of employee voluntary contributions to this plan. During the same period, the Company issued 4,905 shares from treasury upon the exercise of SARs by certain officers and employees of the Company.

Table of Contents

FREQUENCY ELECTRONICS, INC. and SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements
(Unaudited)

NOTE E – INVENTORIES

Inventories, which are reported at the lower of cost or market, consist of the following:

	July 31, 2015 (In thousands)	April 30, 2015
Raw Materials and Component Parts	\$ 24,796	\$ 24,274
Work in Progress	10,338	9,948
Finished Goods	3,956	4,017
	\$ 39,090	\$ 38,239

As of July 31, 2015 and April 30, 2015, approximately \$32.5 million and \$32.0 million, respectively, of total inventory is located in the United States, approximately \$5.5 million and \$5.4 million, respectively, is located in Belgium and approximately \$1.0 million and \$0.8 million, respectively, is located in China.

NOTE F – SEGMENT INFORMATION

The Company operates under three reportable segments based on the geographic locations of its subsidiaries:

- (1) FEI-NY – operates out of New York and its operations consist principally of precision time and frequency control products used in three principal markets- communication satellites (both commercial and U.S. Government-funded); terrestrial cellular telephone or other ground-based telecommunication stations and other components and systems for the U.S. military.
- (2) Gillam-FEI - operates out of Belgium and France and primarily sells wireline synchronization and network management systems in non-U.S. markets. All sales from Gillam-FEI to the United States are to other segments of the Company.
- (3) FEI-Zyfer – operates out of California and its products incorporate Global Positioning System (GPS) technologies into systems and subsystems for secure communications, both government and commercial, and other locator applications. This segment also provides sales and support for the Company’s wireline telecommunications family of products, including US5G, which are sold in the United States market.

The FEI-NY segment also includes the operations of the Company’s wholly-owned subsidiaries, FEI-Elcom Tech (“FEI-Elcom”) and FEI-Asia. FEI-Asia functions primarily as a manufacturing facility for the Company’s commercial product subsidiaries with historically minimal sales to outside customers. Beginning in late fiscal year 2014, FEI-Asia began shipping higher volumes of product to third parties as a contract manufacturer. FEI-Elcom, in addition to its own product line, provides design and technical support for the FEI-NY segment’s satellite business.

The Company’s chief executive officer measures segment performance based on total revenues and profits generated by each geographic location rather than on the specific types of customers or end- users. Consequently, the Company determined that the segments indicated above most appropriately reflect the way the Company’s management views the business.

Table of Contents

FREQUENCY ELECTRONICS, INC. and SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements
(Unaudited)

The tables below presents information about reported segments with reconciliation of segment amounts to consolidated amounts as reported in the statement of operations or the balance sheet for each of the periods (in thousands):

	Three months ended July 31,	
	2015	2014
Net revenues:		
FEI-NY	\$ 13,494	\$ 17,257
Gillam-FEI	1,407	1,491
FEI-Zyfer	2,100	1,120
less intercompany revenues	(321)	(128)
Consolidated revenues	\$ 16,680	\$ 19,740

	Three months ended July 31,	
	2015	2014
Operating profit (loss):		
FEI-NY	\$ 1,087	\$ 2,080
Gillam-FEI	(217)	(578)
FEI-Zyfer	123	(506)
Corporate	(52)	(68)
Consolidated operating profit	\$ 941	\$ 928

	July 31, 2015	April 30, 2015
Identifiable assets:		
FEI-NY (approximately \$2.5 million in China)	\$ 64,164	\$ 63,541
Gillam-FEI (all in Belgium or France)	9,488	9,878
FEI-Zyfer	11,902	11,088
less intersegment balances	(6,668)	(8,775)
Corporate	40,236	42,093
Consolidated identifiable assets	\$ 119,122	\$ 117,825

NOTE G – INVESTMENT IN MORION, INC.

The Company has an investment in Morion, Inc., (“Morion”) a privately-held Russian company, which manufactures high precision quartz resonators and crystal oscillators. The Company’s investment consists of 4.6% of Morion’s outstanding shares, accordingly, the Company accounts for its investment in Morion on the cost basis. This investment is included in other assets in the accompanying balance sheets.

During the three months ended July 31, 2015 and 2014, the Company acquired product from Morion in the aggregate amount of approximately \$32,000 and \$65,000, respectively, and the Company sold product and services to Morion in the aggregate amount of approximately \$423,000 and \$183,000, respectively. At July 31, 2015 and April 30, 2015, accounts receivable included \$429,000 and \$145,000, respectively, due from Morion and \$0 and \$23,000, respectively, was payable to Morion.

On October 22, 2012, the Company entered into an agreement to license its rubidium oscillator production technology to Morion. The agreement required the Company to sell certain fully-depreciated production equipment previously owned by the Company and to provide training to Morion employees to enable Morion to produce a minimum of 5,000 rubidium oscillators per year. Morion will pay the Company approximately \$2.7 million for the license and the equipment plus 5% royalties on third party sales for a 5-year period following an initial production run. During the same 5-year period, the Company commits to purchase from Morion a minimum of approximately \$400,000 worth of rubidium oscillators per year although Morion is not obligated to sell that amount to the Company. In November 2012, Morion paid the Company a \$925,000 deposit under the agreement which amount had been recorded on the Company's balance sheet as deferred revenue. In October 2013, after amending the original document to clarify certain billing events, the Company invoiced Morion for the equipment, certain component parts for the production of rubidium oscillators, training of certain Morion employees and transfer of the production technology and license to Morion. The \$925,000 deposit previously recorded as deferred revenue was recognized as income during the second quarter of fiscal year 2015. For the three months ended July 31, 2015, sales to Morion included \$375,000 for product and training services under this agreement. During the first quarter of fiscal year 2015, there were no sales to Morion under the agreement. Per the amended agreement, the balance of \$1 million for the transfer of the license will be due once the United States Department of State ("State Department") approves the removal of certain provisions of the original agreement. The State Department has approved the technology transfer called for under the agreement.

NOTE H – FAIR VALUE OF FINANCIAL INSTRUMENTS

The cost, gross unrealized gains, gross unrealized losses and fair market value of available-for-sale securities at July 31, 2015 and April 30, 2015 are as follows (in thousands):

	July 31, 2015			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Market Value
Fixed income securities	\$3,225	\$70	\$(27)	\$3,268
Equity securities	6,764	667	(335)	7,096
	\$9,989	\$737	\$(362)	\$10,364

	April 30, 2015			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Market Value
Fixed income securities	\$3,379	\$104	\$(16)	\$3,467
Equity securities	7,018	834	(133)	7,719
	\$10,397	\$938	\$(149)	\$11,186

The following table presents the fair value and unrealized losses, aggregated by investment type and length of time that individual securities have been in a continuous unrealized loss position (in thousands):

	Less than 12 months		12 Months or more		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
July 31, 2015						
Fixed Income Securities	\$ 92	\$ (5)	\$ 453	\$ (22)	\$ 545	\$ (27)
Equity Securities	2,778	(279)	749	(56)	3,527	(335)
	\$ 2,870	\$ (284)	\$ 1,202	\$ (78)	\$ 4,072	\$ (362)
April 30, 2015						
Fixed Income Securities	\$ 96	\$ (1)	\$ 461	\$ (15)	\$ 557	\$ (16)
Equity Securities	3,323	(133)	-	-	3,323	(133)
	\$ 3,419	\$ (134)	\$ 461	\$ (15)	\$ 3,880	\$ (149)

The Company regularly reviews its investment portfolio to identify and evaluate investments that have indications of possible impairment. The Company does not believe that its investments in marketable securities with unrealized losses at July 31, 2015 are other-than-temporary due to market volatility of the security's fair value, analysts' expectations and the Company's ability to hold the securities for a period of time sufficient to allow for any anticipated recoveries in market value.

During the three months ended July 31, 2015 and 2014, the Company sold or redeemed available-for-sale securities in the amounts of \$713,000 and \$2.2 million, respectively, realizing gains of approximately \$137,000 and \$280,000, respectively.

9 of 20

Table of Contents

FREQUENCY ELECTRONICS, INC. and SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements
(Unaudited)

Maturities of fixed income securities classified as available-for-sale at July 31, 2015 are as follows, at cost (in thousands):

Current	\$ 101
Due after one year through five years	1,622
Due after five years through ten years	1,502
	\$3,225

The fair value accounting framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Company has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs. All of the Company's investments in marketable securities are valued on a Level 1 basis.

NOTE I – RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standard Update ("ASU") No. 2014-09, Revenue from Contracts with Customers (Topic 606). ASU 2014-09 eliminates most of the existing industry-specific revenue recognition guidance and significantly expands related disclosures. The required disclosures will include both quantitative and qualitative information about the amount, timing and uncertainty of revenue from contracts with customers and the significant judgments used. Entities can retrospectively apply ASU 2014-09 or use an alternative transition method. In August 2015, the FASB issued ASU 2015-14 which provides a one-year deferral of the effective date of ASU 2014-09, while allowing companies to early adopt based on the original effective date of ASU 2014-09. ASU 2014-09 is now effective for public companies for annual reporting periods beginning on or after December 15, 2017 and for the Company, must be adopted for its fiscal year 2019 beginning on May 1, 2018. The Company is in the process of determining the effect that ASU 2014-09 may have on its financial statements.

NOTE J – CREDIT FACILITY

The Company has a credit facility (the “Facility”) with JPMorgan Chase Bank, N.A. (“JPMorgan”) pursuant to a credit agreement (the “Credit Agreement”) between the Company and JPMorgan. Under the Facility the Company may make borrowings from either Tranche A or Tranche B or a combination of both, not to exceed \$25.0 million. Pursuant to the Credit Agreement, the amount of Tranche A borrowings may not exceed the value of the Pledged Investments (as defined in the Credit Agreement). The amount of Tranche B borrowings may not exceed the lesser of (i) \$15.0 million and (ii) the Borrowing Base (as defined in the Credit Agreement). Current outstanding borrowings of \$6.0 million under the Facility are all under Tranche A. The Facility is fully guaranteed by certain of the Company’s subsidiaries and is secured by, among other things, a pledge of substantially all personal property of the Company and certain of the Company’s subsidiaries.

10 of 20

Table of Contents

FREQUENCY ELECTRONICS, INC. and SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements
(Unaudited)

Borrowings under the Facility are evidenced by a line of credit note (the “Note”) and bear interest, payable monthly, at a rate equal to the LIBOR Rate, as determined from time to time by JPMorgan pursuant to the terms of the Note, plus a margin of 0.75% for Tranche A borrowings and 1.75% for Tranche B borrowings. The principal balance on the Note, along with any accrued and unpaid interest, is due and payable no later than June 5, 2018, which is the maturity date of the Facility. In addition, the Company is required to pay JPMorgan fees equal to 0.1% per annum on any unused portion of the Facility.

The Credit Agreement contains a number of affirmative and negative covenants, including limitations on the incurrence of additional debt, liens on property, acquisitions, loans and guarantees, mergers, consolidations, liquidations and dissolutions, asset sales, and distributions and other payments in respect of the Company’s capital stock. The Credit Agreement also contains certain events of default customary for credit facilities of this type, including nonpayment of principal or interest when due, material incorrectness of representations and warranties when made, breach of covenants, bankruptcy and insolvency, unstayed material judgment beyond specified periods, and acceleration or payment default of other material indebtedness. The Credit Agreement requires the Company to maintain, as of the end of each fiscal quarter, a funded debt to EBITDA (Earnings Before Interest, Taxes, Depreciation and Amortization) ratio and an interest charge coverage ratio. The calculation of both ratios is defined in the Credit Agreement. For the period ended July 31, 2015, the Company met the required covenants for its borrowings under Tranche A.

NOTE K – VALUATION ALLOWANCE ON DEFERRED TAX ASSETS

In prior fiscal years, the Company reduced the valuation allowance on the deferred tax assets of its U.S. subsidiaries. Consequently, for the three months ended July 31, 2015 and 2014, the Company recorded provisions for income taxes based on both current taxes due in the United States as well as the tax provision or benefit to be realized from temporary tax differences. As of July 31, 2015 and April 30, 2015, the remaining deferred tax asset valuation allowance is approximately \$2.4 million and is primarily related to deferred tax assets of the Company’s non-U.S.-based subsidiaries.

Item 2 – Management’s Discussion and Analysis of Financial Condition and Results of Operations

“Safe Harbor” Statement under the Private Securities Litigation Reform Act of 1995:

The statements in this quarterly report on Form 10-Q regarding future earnings and operations and other statements relating to the future constitute "forward-looking" statements pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The words "believe," "may," "will," "could," "should," "would," "anticipate," "estimate," "expect," "project," "intend," "objective," "seek," "strive," "might," "likely result," "build," "grow," "plan," "goal," "expand," "position," or similar words, or the negatives of these words, or similar terminology, identify forward-looking statements. These statements are based on assumptions that the Company believes are reasonable, but are subject to a wide range of risks and uncertainties, and a number of factors could cause the Company's actual results to differ materially from those expressed in the forward-looking statements referred to above. Factors that would cause or contribute to such differences include, but are not limited to, continued acceptance of the Company's products in the marketplace, competitive factors, new products and technological changes, product prices and raw material costs, dependence upon third-party vendors, competitive developments, changes in manufacturing and transportation costs, changes in contractual terms, the availability of capital, and other risks detailed in the Company's periodic report filings with the Securities and Exchange Commission. Readers are cautioned not to place undue reliance on these forward-looking statements, which relate only to events as of the date on which the statements are made and which reflect management's analysis, judgments, belief, or expectation only as of such date. By making these forward-looking statements, the Company undertakes no obligation to update these statements for revisions or changes after the date of this report.

Critical Accounting Policies and Estimates

The Company’s significant accounting policies are described in Note 1 to the consolidated financial statements included in the Company’s Annual Report on Form 10-K for the year ended April 30, 2015. The Company believes its most critical accounting policies to be the recognition of revenue and costs on production contracts and the valuation of inventory. Each of these areas requires the Company to make use of reasoned estimates including estimating the cost to complete a contract, the realizable value of its inventory or the market value of its products. Changes in estimates can have a material impact on the Company’s financial position and results of operations.

Revenue Recognition

Revenues under larger, long-term contracts which generally require billings based on achievement of milestones rather than delivery of product, are reported in operating results using the percentage of completion method. On fixed-price contracts, which are typical for commercial and U.S. Government satellite programs and other long-term U.S. Government projects, and which require initial design and development of the product, revenue is recognized on the cost-to-cost method. Under this method, revenue is recorded based upon the ratio that incurred costs bear to total estimated contract costs with related cost of sales recorded as the costs are incurred. Each month management reviews estimated contract costs through a process of aggregating actual costs incurred and estimating additional costs to completion based upon the current available information and status of the contract. The effect of any change in the estimated gross margin percentage for a contract is reflected in revenues in the period in which the change is known. Provisions for anticipated losses on contracts are made in the period in which they become determinable.

On production-type orders, revenue is recorded as units are delivered with the related cost of sales recognized on each shipment based upon a percentage of estimated final program costs.

Changes in job performance on long-term contracts and production-type orders may result in revisions to costs and income and are recognized in the period in which revisions are determined to be required. Provisions for anticipated

losses on customer orders are made in the period in which they become determinable.

For customer orders in the Company's Gillam-FEI and FEI-Zyfer segments or smaller contracts or orders in the FEI-NY segment, sales of products and services to customers are reported in operating results based upon (i) shipment of the product or (ii) performance of the services pursuant to terms of the customer order. When payment is contingent upon customer acceptance of the installed system, revenue is deferred until such acceptance is received and installation completed.

Costs and Expenses

Contract costs include all direct material, direct labor costs, manufacturing overhead and other direct costs related to contract performance. Selling, general and administrative costs are charged to expense as incurred.

FREQUENCY ELECTRONICS, INC. and SUBSIDIARIES

(Continued)

Inventory

In accordance with industry practice, inventoried costs contain amounts relating to contracts and programs with long production cycles, a portion of which will not be realized within one year. Inventory write downs are established for slow-moving, obsolete items and costs incurred on programs for which production-level orders cannot be determined as probable. Such write downs are based upon management's experience and expectations for future business. Any changes arising from revised expectations are reflected in cost of sales in the period the revision is made.

Marketable Securities

All of the Company's investments in marketable securities are Level 1 securities which trade on public markets and have current prices that are readily available. In general, investments in fixed price securities are only in the commercial paper of financially sound corporations or the bonds of U.S. Government agencies. Although the value of such investments may fluctuate significantly based on economic factors, the Company's own financial strength enables it to wait for the securities to either recover their value or to mature such that any interim unrealized gains or losses are deemed to be temporary.

RESULTS OF OPERATIONS

The table below sets forth for the respective periods of fiscal years 2016 and 2015 (which end on April 30, 2016 and 2015, respectively) the percentage of consolidated revenues represented by certain items in the Company's consolidated statements of operations:

	Three months ended July 31,			
	2015		2014	
Net Revenues				
FEI-NY	80.9	%	87.4	%
Gillam-FEI	8.4		7.6	
FEI-Zyfer	12.6		5.7	
Less intersegment revenues	(1.9)	(0.7)
	100.0		100.0	
Cost of revenues	65.4		71.3	
Gross margin	34.6		28.7	
Selling and administrative expenses	22.1		17.7	
Research and development expenses	6.9		6.3	
Operating profit	5.6		4.7	
Other income, net	3.9		1.9	
Pretax income	9.5		6.6	
Provision for income taxes	4.2		3.0	
Net income	5.3	%	3.6	%

(Continued)

For the three months ended July 31, 2015, revenues from commercial and U.S. Government satellite programs accounted for more than 55% of consolidated revenues but were lower than that recorded in the same period of fiscal year 2015 as certain programs were completed. Revenues on these contracts are recorded in the FEI-NY segment and are recognized primarily under the percentage of completion method. Revenues from non-space U.S. Government/DOD customers, which are recorded in both the FEI-NY and FEI-Zyfer segments, more than doubled over the prior year and accounted for approximately 20% of consolidated fiscal year 2016 revenues. Network infrastructure and other industrial revenues in the fiscal year 2016 period, declined by approximately 30% from the same period of fiscal year 2015 and accounted for approximately 20% of consolidated revenues. Such revenues are recorded in all three segments. The primary reason for reduced revenue from this market area in the fiscal year 2016 period is the lack of third-party contract manufacturing revenues in the Company's FEI-Asia subsidiary which is part of the FEI-NY segment. Such third-party contract manufacturing business is sporadic and low margin and thus has little meaningful impact on the consolidated profits of the Company.

For the three months ended July 31, 2014, revenues from commercial and U.S. Government satellite programs accounted for more than 60% of consolidated revenues compared to 55% for the same period of fiscal year 2014. Revenues on these contracts are recorded in the FEI-NY segment and are recognized primarily under the percentage of completion method. Revenues from non-space U.S. Government/DOD customers, which are recorded in both the FEI-NY and FEI-Zyfer segments, accounted for less than 10% of consolidated revenues as compared to one-fourth of revenues in fiscal year 2014. In fiscal year 2015, the Company experienced delays in booking non-space U.S. Government business due to uncertainties related to the federal budget process in the United States. Network infrastructure and other industrial revenues accounted for one-fourth of consolidated revenues as compared to 20% of revenues in the prior year. The principal component of this growth is increased third party revenues in the Company's FEI-Asia subsidiary which is part of the FEI-NY segment. In prior periods, third party revenues for the FEI-Asia subsidiary were insignificant as most of its manufacturing capacity was applied to intersegment orders. Lower revenues at Gillam-FEI are primarily due to reduced intersegment sales.

Based on the Company's current backlog, over three-fourths of which represent satellite payload business, and the probability for obtaining new project orders which are sole-sourced to the Company, revenues for fiscal year 2016 are expected to be comparable to the prior fiscal year. Satellite payload revenues will remain the dominant portion of the Company's business and represents the Company's best growth opportunity. Revenues from non-space U.S. Government/DOD customers are expected to increase, particularly for the FEI-Zyfer segment, as it receives additional funding on several significant U.S. Government programs.

Gross margin

	Three months ended July 31, (in thousands)				Change	
	2015		2014		\$	%
	\$ 5,773		\$ 5,665		\$ 108	2 %
GM Rate	34.6 %		28.7 %			

Although consolidated revenues for the three month period ended July 31, 2015 were lower than the same period of fiscal year 2015, gross margin increased as a result of improved gross margin rates due to favorable contract and product mix. In addition, during the quarter the Company received reimbursement from a vendor which partially offset higher engineering and production costs incurred on certain programs impacted by a defective part. The cost

reimbursement improved the consolidated gross margin rate by approximately 2%.

Gross margin for the three month period ended July 31, 2014, decreased primarily due to lower revenues on non-space U.S. Government business and at the Gillam-FEI segment. Low sales volume at the Company's subsidiaries did not cover the fixed costs of these entities. The FEI-NY segment recorded an increase in gross margin on higher revenues but its gross margin rate was lower due to product mix. Included in the FEI-NY segment are low margin third party contract manufacturing sales at the Company's FEI-Asia subsidiary which had the effect of reducing the consolidated gross margin rate by approximately 2.5%.

FREQUENCY ELECTRONICS, INC. and SUBSIDIARIES

(Continued)

Selling and administrative expenses

Three months ended July 31,
(in thousands)

2015	2014	Change		
		\$	%	
\$ 3,685	\$ 3,498	\$ 187	5	%

For the three-month periods ended July 31, 2015 and 2014, selling and administrative ("SG&A") expenses were approximately 22% and 18%, respectively, of consolidated revenues. The increase in SG&A expenses in the fiscal year 2016 quarter compared to the same period of fiscal year 2015 was due to higher professional fees, deferred compensation expense and increased selling expenses partially offset by decreased incentive compensation in the FEI-NY segment. For the remainder of fiscal year 2016, the Company expects SG&A expenses to be incurred at approximately the same rate and to be approximately 20% of consolidated revenues.

Research and development expense

Three months ended July 31,
(in thousands)

2015	2014	Change		
		\$	%	
\$ 1,147	\$ 1,239	\$ (92)	(7	%)

Research and development ("R&D") expenditures represent investments intended to keep the Company's products at the leading edge of time and frequency technology and enhance competitiveness for future revenues. R&D spending for the three-month periods ended July 31, 2015 and 2014, was approximately 7% and 6% of revenues, respectively. In the fiscal year 2016 period, the Company continued the development of new satellite payload products as well as development and improvement of quartz-based and rubidium atomic clocks, development of new GPS-based synchronization products and further enhancement of the capabilities of the Company's line of low g-sensitivity and ruggedized rubidium oscillators. Included in these efforts are product design and process improvements to enhance product manufacturability and reduce production costs.

In addition to internal research and development efforts, the Company continues to conduct development activities on customer-funded programs the cost of which appears in cost of revenues. The Company will continue to devote significant resources to develop new products, enhance existing products and implement efficient manufacturing processes. For fiscal year 2016, the Company is targeting to increase spending on certain space products but will spend less than 10% of revenues on internal research and development projects. Internally generated cash and cash reserves are adequate to fund these development efforts.

Operating profit

Three months ended July 31,
(in thousands)

2015	2014	Change		
		\$	%	
\$ 941	\$ 928	\$ 13	1	%

For fiscal year 2016, higher gross margin resulting from improved gross margin rates, including the cost reimbursement noted above, combined with SG&A and R&D expenses that were approximately the same as for the period ended July 31, 2014 resulted in an operating profit comparable to the prior year. As a percentage of revenue, fiscal year 2016 operating profit was 5.6% of revenues compared to 4.7% of revenues last year.

Other income (expense)

	Three months ended July 31, (in thousands)		Change	
	2015	2014	\$	%
Investment income	\$ 271	\$ 414	\$ (143)	(35 %)
Interest expense	(24)	(34)	10	29 %
Other income, net	403	1	402	NM
	\$ 650	\$ 381	\$ 269	71 %

Table of Contents

FREQUENCY ELECTRONICS, INC. and SUBSIDIARIES

(Continued)

Investment income is derived primarily from the Company's holdings of marketable securities. Earnings on these securities may vary based on fluctuating interest rates and dividend payout levels and the timing of purchases or sales of securities. During the three months ended July 31, 2015 and 2014, the Company recorded gains of approximately \$137,000 and \$280,000, respectively, on the sale of certain marketable securities.

The decrease in interest expense for the three months ended July 31, 2015 compared to the same period of fiscal year 2015 is due to the reduced level of borrowings under the Company's credit facility from a bank.

During the period ended July 31, 2015, the Company recognized a gain of approximately \$400,000 from the proceeds of a life insurance policy upon the death of a former officer of the Company.

Income tax provision

		Three months ended July 31, (in thousands)		Change	
		2015	2014	\$	%
		\$ 700	\$ 590	\$ 110	19 %
Effective tax rate on pre-tax book income:					
		44.0 %	45.1 %		

The provision for income taxes for the three months ended July 31, 2015 increased from the same period of fiscal year 2015 due to a 21% increase in pretax income. During the first quarter of both fiscal years 2016 and 2015, losses at the Company's foreign subsidiaries as a proportion of consolidated pre-tax income are higher than are expected to be realized during the balance of the fiscal years. These non-deductible losses cause the effective tax rate to increase to a level that is higher than statutory rates. In addition, in both fiscal years, the Company has not assumed the availability of the U.S. research and development tax credit ("R&D Credit") since the U.S. Congress had not reinstated it as of July 31, 2015 for calendar 2015 or as of July 31, 2014 for calendar year 2014. If Congress reinstates the R&D credit, the effective tax rate in fiscal year 2016 is expected to be in the mid-30% range depending on the level of pretax income or loss recorded at the Company's foreign subsidiaries.

The Company is subject to taxation in several countries as well as the states of New York, New Jersey and California. The statutory federal rates are 34% in the United States and Belgium and 25% in China. The effective rate is impacted by the income or loss of certain of the Company's European and Asian subsidiaries for which no tax benefit is currently available. In addition, the Company utilizes the availability of R&D Credit and the Domestic Production Activity credit in the United States to lower its tax rate. As of April 30, 2015, the Company's European subsidiaries had available net operating loss carryforwards of approximately \$4.2 million, which will offset future taxable income. As a result of the FEI-Elcom acquisition, the Company has a federal net operating loss carryforward of \$5.1 million that may be applied in annually limited amounts to offset future U.S.-sourced taxable income over the next 17 years.

Net income

Three months ended July 31,
(in thousands)

2015	2014	Change		
		\$	%	
\$ 891	\$ 719	\$ 172	24	%

As detailed above, for the three months ended July 31, 2015, operating profit was similar to the prior fiscal year while other income, including a gain on the proceeds of a life insurance policy, resulted in a 21% increase in pretax income in the fiscal year 2016 period. The higher provision for income taxes partially offset the increased pretax income resulting in a 24% increase in net income for the quarter as compared to the prior year period.

LIQUIDITY AND CAPITAL RESOURCES

The Company's balance sheet continues to reflect a strong working capital position of \$76.6 million at July 31, 2015, compared to working capital of \$75.2 million at April 30, 2015. Included in working capital at July 31, 2015 is \$16.3 million consisting of cash, cash equivalents and marketable securities. The Company's current ratio at July 31, 2015 is 10.8 to 1.

For the three months ended July 31, 2015, the Company used cash from operations in the amount of \$1.8 million compared to the use of cash from operating activities of \$5.6 million in the comparable fiscal year 2015 period. The reduced cash flow in the fiscal year 2016 period resulted primarily from increases in accounts receivable, including "unbilled receivables" (costs and estimated earnings in excess of billings) and inventory plus reductions in accounts payable and accrued liabilities compared to the balances as of the end of the previous fiscal year. For the three-month periods ended July 31, 2015 and 2014, the Company incurred approximately \$1.2 million and \$1.1 million, respectively, of non-cash operating expenses such as depreciation and amortization and accruals for employee benefit programs.

Table of Contents

FREQUENCY ELECTRONICS, INC. and SUBSIDIARIES

(Continued)

The Company expects to bill and collect a high percentage of its unbilled receivable and anticipates it will generate positive cash flow from operating activities for the balance of fiscal year 2016.

Net cash used in investing activities for the three months ended July 31, 2015, was \$65,000 compared to \$59,000 provided by investing activities for the same period of fiscal year 2015. During the fiscal year 2016 period, marketable securities were sold or redeemed in the aggregate amount of \$713,000 compared to \$2.2 million of such redemptions during the fiscal year 2015 period. Some of these proceeds were reinvested in additional marketable securities for the periods ended July 31, 2015 and 2014 in the amount of \$172,000 and \$1.0 million, respectively. In the fiscal quarters ended July 31, 2015 and 2014, the Company acquired property, plant and equipment in the amount of approximately \$606,000 and \$1.2 million, respectively. The Company may continue to invest cash equivalents in longer-term securities or to convert short-term investments to cash equivalents as dictated by its investment and acquisition strategies. The Company will continue to acquire more efficient equipment to automate its production process. The Company intends to spend between \$3.0 million and \$4.0 million on capital equipment during fiscal year 2016. Internally generated cash or additional borrowings under the Company's credit facility will be used to acquire this level of capital equipment.

Net cash provided by financing activities for the three months ended July 31, 2015 and 2014 was \$8,000 and \$2.3 million, respectively. For the three months ended July 31, 2015 and 2014, the Company realized \$8,000 and \$26,000, respectively, from the tax benefit arising from the exercise of stock-based awards. During the first quarter of fiscal year 2015 ended July 31, 2014, the Company borrowed \$2.3 million under its credit facility with a bank. Such funds were used for working capital and to finance the acquisition of certain fixed assets.

The Company has been authorized by its Board of Directors to repurchase up to \$5 million worth of shares of its common stock for treasury whenever appropriate opportunities arise but it has neither a formal repurchase plan nor commitments to purchase additional shares in the future. As of July 31, 2015, the Company has repurchased approximately \$4 million of its common stock out of the \$5 million authorization.

The Company will continue to expend resources to develop, improve and acquire products for space applications, guidance and targeting systems, and communication systems which management believes will result in future growth and continued profitability. During fiscal year 2016, the Company intends to make a substantial investment of capital and technical resources to develop and acquire new products to meet the needs of the U.S. Government, commercial space and network infrastructure marketplaces and to invest in more efficient product designs and manufacturing procedures. Where possible, the Company will secure partial customer funding for such development efforts but is targeting to spend its own funds at a rate of less than 10% of revenues to achieve its development goals. Internally generated cash will be adequate to fund these development efforts. The Company may also pursue acquisitions to expand its range of products and may use internally generated cash and external funding in connection with such acquisitions.

As of July 31, 2015, the Company's consolidated backlog is approximately \$27 million compared to \$37 million at April 30, 2015, the end of fiscal year 2015. Approximately 75% of this backlog is expected to be realized in the next twelve months. Included in the backlog at July 31, 2015 is approximately \$3.5 million under cost-plus-fee contracts which the Company believes represent firm commitments from its customers for which the Company has not received full funding to-date. The Company excludes from backlog any contracts or awards for which it has not received authorization to proceed and on fixed price contracts excludes any unfunded portion. The Company expects these contracts to become fully funded over time and will add to its backlog at that time.

The Company believes that its liquidity is adequate to meet its operating and investment needs through at least September 14, 2016.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements, other than operating leases, that have or are reasonably likely to have a current or future effect on the Company's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

Item 3 – Quantitative and Qualitative Disclosures About Market Risk

Not applicable.

Item 4 – Controls and Procedures

Disclosure Controls and Procedures. The Company's management, with the participation of the Company's chief executive officer and chief financial officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this report. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based on their evaluation, the Company's chief executive officer and chief financial officer have concluded that, as of July 31, 2015, the Company's disclosure controls and procedures were effective to ensure that information relating to the Company, including its consolidated subsidiaries, required to be included in its reports that it filed or submitted under the Exchange Act are recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms.

Changes in Internal Control Over Financial Reporting. There were no changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the three months ended July 31, 2015 to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
