If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82- _____

SPIRENT COMMUNICATIONS PLC

RESTRUCTURING ACTIONS

London, UK - 29 June 2006: Following the trading update on 14 June 2006, Spirent Communications plc ("Spirent") (LSE: SPT; NYSE: SPM), a leading communications technology company, is today reporting the following restructuring actions in its Communications businesses.

As previously stated, the Company is managing significant product transition in the current year:

- within the Performance Analysis Broadband division, as sales of older platforms decrease and are replaced by the sales of new products; and
- within the Service Assurance division, as legacy product revenues

Edgar Filing: SPIRENT COMMUNICATIONS PLC - Form 6-K

continue to decline, whilst investment is being made in new monitoring solutions for voice, video and data networks.

During this transition phase we said that we would continue to carefully manage the balance between the cost base and maintaining the capability to generate long term growth.

Accordingly, we are implementing restructuring actions in the Performance Analysis and Service Assurance divisions to realign resources and reduce operating expenses. The major part of these actions will take place in the Service Assurance division, which will enable it to maintain a near break-even result for the second half of 2006 (following the cost reductions outlined below, pro forma break-even sales for Service Assurance are estimated to be GBP36 million per year).

The total annualised cost reduction will be approximately GBP9.0 million per year. The cost of these actions is a one-time charge of GBP5.0 million of which GBP4.0 million will be in cash, to be expensed and reported in our forthcoming interim results on 10 August 2006.

Anders Gustafsson, Chief Executive of Spirent, commenting on the actions, said:

"The main consideration behind these restructuring actions is to ensure that our resources are allocated appropriately to develop our enhanced products. This will ensure that we can offer the platforms required by network equipment manufacturers for the development of their own products, and by service providers for the deployment of their next-generation networks."
