UMC announced its unconsolidated operating results for the second quarter of 2004

1. Date of the investor/press conference: 2004/07/28
2. Location of the investor/press conference: B3 Yong Le Room, The Westin Taipei, 133 Nanking East Road, Sec. 3, Taipei
3. Financial and business related information: United Microelectronics Corporation (NYSE: UMC; TSE: 2303)

(UMC or the Company) today announced its unconsolidated operating results for the second quarter of 2004. Year-over-year revenue increased by 34.4% to NT\$29.18 billion from NT\$21.71 billion, and a 15.2% QoQ increase from NT\$25.33 billion in 1Q04. The operating profit is NT\$7.59 billion, a 43.6% increase compared with 1Q04. The net income for 2Q04 was NT\$12.70 billion, increased by 84.2% from NT\$6.89 billion in 1Q04. EPS was NT\$0.83.

Wafer shipments in the second quarter were 710 thousand 8-inch equivalent wafers (including UMCi), a 9.7% increase from 1Q04, and utilization rate was over 99%. The blended average selling price (ASP) rose 6% during 2Q04 due to increasing demand for advanced technology products. The percentage of revenue from 0.18-micron and below technologies in the second quarter is 53%, increased by 3%, compared with 1Q04. Revenue from the communication market segment increased and accounted for 44% of total revenue in 2Q04. Most of the increase was due to the strong demand for programmable logic and handset baseband chips. Estimated installed capacity in the third quarter is 853 thousand 8-inch equivalent wafers. The increase in estimated capacity during the third quarter is primarily due to recognized capacity from Fab 8S as of July 1st, and additional 12-inch capacity expansion at 300mm fabs.

We experienced strong demand from our customers in the second quarter, leading to a 9.7% increase in wafer shipments and an increase in our blended average selling price. Together, these drove a 15.2% growth in quarter-over-quarter revenue and a 43.6% increase in operating income. Our second quarter results not only confirm that UMC is doing well in terms of business performance, but also demonstrate the successful execution of UMC's foundry strategy, said Dr. Jackson Hu, CEO at UMC.

Dr. Hu continued, We remain committed to providing the best foundry services to our customers. To maintain our leading position in semiconductor process technology, UMC will remain a primary driving force in the foundry industry's migration to 90nm technology. Some of the world's largest IC companies, including major suppliers of programmable logic and wireless handset baseband ICs, have already qualified and adopted UMC's 90nm process to fabricate their most advanced products. We are expanding our 90nm production on 300mm wafers at Fab 12A and at UMCi so that our customers will enjoy increased performance and cost benefits. Furthermore, UMC is working closely with several of our customers to ensure its leadership in 65nm process technology—the next generation of IC manufacturing technology.

Our capacity is on schedule to increase by 19% to 853 thousand 8-inch equivalents in the third quarter. The availability of this additional capacity, mainly from Fab 8S, Fab 12A and UMCi, will help ease the present tight capacity situation. Going forward, we expect revenue and profit growth to continue into the third quarter.
