III. Reference Relating to the Business**1. Overview****A. Industry****(1) Industry characteristics and growth potential**

- TFT-LCD technology is one of the most widely used technologies in the manufacture of flat panel displays and the demand for the flat panel displays is growing rapidly. There are high entry barriers due to its technology, capital-intensive characteristics, and the significant investments required to achieve economies of scale etc. There is strong competition between limited number of players within the industry.

- The demand for LCD panels for notebooks & monitors has been closely related to the IT industry. The demand for LCD panel for TV is growing as HDTV broadcasting starts and as LCD TV will play a key role in the digital display area. In addition, LCD panel markets for applications, such as mobile phones, PDAs, medical applications and automobile navigation systems, etc., are growing steadily.

(2) Cyclicalities of LCD industry

- The TFT-LCD business has high cyclicalities as a capital intensive business. In spite of the increase in demand for products, this industry has experienced periodical business cycle caused by imbalances between demand and supply due to capacity expansion within the industry.

(3) Competitiveness

- Core competitiveness includes technology leadership, capability to design new product and premium product, timely investment into advanced Fab, cost leadership through application of large lines and innovation of process and productivity, and collaborative customer relationship.
- Most importantly, cost leadership and stable and long-term relationships with customers are critical to secure profit even in a buyer's market.

(4) Sourcing material

- Major part of color filters is sourced in-house, and other materials are supplied by domestic and overseas vendors. However, domestic portion has grown due to the active participation of the domestic vendors.
- The shortage of raw materials may arise temporarily due to the rapid increase in demand for raw materials from the capacity expansion in the TFT-LCD industry.

(5) Others

- Most TFT-LCD panel makers are located in Asia.
 - a. Korea: LG.Philips LCD, Samsung Electronics (including Joint Venture between Samsung Electronics and Sony Corporation), BOE-Hydis
 - b. Taiwan: AU Optonics, Chi Mei Optoelectronics, CPT, QDI, etc.
 - c. Japan: Sharp, Hitachi, etc.
 - d. China: SVA-NEC LCD, BOE-OT

B. Company

(1) Company overview

- We started the TFT-LCD business in 1998 and became the first LCD maker in the world which commenced commercial production at a 4th generation fab (P3) in July 2000 and at a 5th generation fab (P4) in March 2002 to meet the demand for large-size monitors. In addition, we started mass production of the 6th generation fab (P6) in August 2004, which provided us with a full line-up of products and which makes us to meet customer demand for the growing LCD TV panel in addition to LCD panels for Notebook PC and Monitor, etc.
- Business area of the company for disclosure is limited to LCD business.

(2) Market shares

- World wide market share of large-size TFT-LCD panels (≥ 10 ") based on revenue

	from Q1 to Q3 in 2004	2003
Panel for Notebook	18.9%	19.9%
Panel for Monitor	22.1%	23.4%
Panel for TV	20.0%	26.0%
Total	20.8%	22.5%

(Source: DisplaySearch Q4 2004)

(3) Market characteristics

- Due to the recent high growth in the display appliance market for the flat display format, the scale of the LCD market is growing at a rapid rate, resulting in expansion of the market centered in America, Japan, Europe and China.

(4) New business etc.

- We currently operate six fabrication facilities located in Gumi, Gyeongsangbuk-do province, Korea and three module facilities located in Gumi, Gyeongsangbuk-do province, Korea and Nanjing, China.
- In March 2004, we broke ground for a new TFT-LCD industrial complex in Paju, Korea, and construction of P7 is currently in progress.
