**Rubicon Technology, Inc.**

**NOTES TO UNAUDITED FINANCIAL STATEMENTS**

**March 31, 2009**

**1. BASIS OF PRESENTATION**

**Interim financial data**

The accompanying unaudited financial statements have been prepared in accordance with accounting principles generally accepted in the United States ( GAAP ) for interim financial information and with the instructions to Form 10-Q and Article 10 for Regulation S-X. Accordingly, they do not include all of the information and notes required by accounting principles generally accepted in the United States for complete financial statements and should be read in conjunction with the Company s annual report filed on Form 10-K for the fiscal year ended December 31, 2008. In the opinion of management, all adjustments (consisting only of adjustments of a normal and recurring nature) considered necessary for a fair presentation of the results of operations have been included. Operating results for the three month period ended March 31, 2009 are not necessarily indicative of results that may be expected for the year ending December 31, 2009.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**Investments**

The Company invests available cash primarily in investment grade commercial paper, corporate notes and government securities. While the Company s investment policy no longer includes auction-rate securities as an approved investment, the Company continues to hold auction rate securities purchased prior to the policy change. The Company also holds put options associated with an agreement with UBS, AG (see Auction-rate securities put options below). Investments classified as available-for-sale securities are carried at fair market value with unrealized gains and losses recorded in accumulated other comprehensive income (loss). Investments in trading securities are reported at fair value, with both realized and unrealized gains and losses recorded in other income (expense), net in the Statement of Operations. Investments in which the Company has the ability and intent, if necessary, to liquidate in order to support its current operations, are classified as short-term. The Company s long-term investments consist primarily of auction-rate securities and put options.

The Company reviews its available-for-sale securities investments at the end of each quarter for other-than-temporary declines in fair value based on the specific identification method. The Company considers various factors in determining whether an impairment is other-than-temporary, including the severity and duration of the impairment, changes in underlying credit ratings, forecasted recovery, its ability and intent to hold the investment for a period of time sufficient to allow for any anticipated recovery in market value and the probability that the scheduled cash payments will continue to be made. When the Company concludes that an other- than-temporary impairment has resulted, the difference between the fair value and carrying value is written off and recorded as a charge on the Statement of Operations.

**Auction-rate securities put options ( ARS Put Options )**

In October 2008, the Company entered into an agreement that provides the Company with the right, but not the obligation, to sell all its auction-rate securities to UBS, AG for par value during the period of June 30, 2010 to July 2, 2012. The ARS Put Options will provide the Company with the opportunity to recover the estimated unrealized loss on its ARS investments. The Company recorded the fair value of the ARS Put Options upon receipt and included it in other long-term assets at March 31, 2009 and December 31, 2008. In accordance with SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of SFAS No. 115 ( SFAS No. 159 ), which was adopted by the Company on January 1, 2008, the Company elected fair value accounting for the ARS Put Options. Unrealized gains and losses related to the ARS Put Options will be recognized in earnings. See Note 4 Investments for additional information regarding the ARS Put Options.

**Treasury Stock**

The Company records treasury stock purchases under the cost method whereby the entire cost of the acquired stock is recorded as treasury stock.

**Table of Contents****Inventories**

Inventories are valued at the lower of cost or market. Cost is determined using the first-in, first-out method, and includes materials, labor and overhead. The Company reduces the carrying value of its inventories for differences between the cost and the estimated net realizable value, taking into account usage, expected demand, technological obsolescence and other information. Inventories are composed of the following:

	March 31, 2009	December 31, 2008
	(in thousands)	
Raw materials	\$ 4,588	\$ 4,295
Work in progress	1,774	1,775
Finished goods	2,377	2,401
	8,739	8,471
Reserve for obsolescence and realization	(645)	(589)
	\$ 8,094	\$ 7,882

**Property and equipment**

Property and equipment consisted of the following:

	March 31, 2009	December 31, 2008
	(in thousands)	
Machinery, equipment and tooling	\$ 43,279	\$ 42,322
Leasehold improvements	6,955	6,881
Furniture and fixtures	715	715
Information systems	546	546
Construction in progress	4,856	5,362
Total cost	56,351	55,826
Accumulated depreciation and amortization	(17,785)	(16,489)
Property and equipment, net	\$ 38,566	\$ 39,337

**Revenue recognition**

The Company recognizes revenue from product sales when earned in accordance with Staff Accounting Bulletin ( SAB ) No. 104, Revenue Recognition. Revenue is recognized when, and if, evidence of an arrangement is obtained and the other criteria to support revenue recognition are met, including:

*Persuasive evidence of an arrangement exists.* The Company requires evidence of a purchase order with the customer specifying the terms and specifications of the product to be delivered, typically in the form of a signed quotation or purchase order from the customer.

*Title has passed and the product has been delivered.* Title passage and product delivery generally occur when the product is delivered to a common carrier.

## Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

*The price is fixed or determinable.* All terms are fixed in the signed quotation or purchase order received from the customer. The purchase orders do not contain rights of cancellation, return, exchange or refund.

*Collection of the resulting receivable is reasonably assured.* The Company's standard arrangement with customers includes 30 day payment terms. Customers are subject to a credit review process that evaluates the customers' financial position and their ability to pay. Collectability is determined by considering the length of time the customer has been in business and history of collections. If it is determined that collection is not probable, no product is shipped and no revenue is recognized unless cash is received in advance. The Company does not provide maintenance or other services and it does not have sales that involve multiple elements or deliverables as defined under Emerging Issues Task Force Issue ( EITF ) No. 00-21, Revenue Arrangements with Multiple Deliverables.

**Table of Contents****Net income (loss) per share**

Net income (loss) per share is as follows for the three months ended March 31, 2009 and 2008:

	<b>Three months ended March 31,</b>	
	<b>2009</b>	<b>2008</b>
Net income (loss) (in thousands):	\$ (3,868)	\$ 2,272
Net income (loss) per share:		
Basic	\$ (0.19)	\$ 0.11
Diluted	\$ (0.19)	\$ 0.10

**Weighted average common shares outstanding used in:**

Basic	20,280,160	20,551,642
Diluted	20,280,160	22,366,654

Basic net income (loss) per share is computed by dividing net income (loss) by the weighted-average number of common shares outstanding during the period. Diluted net income per share is computed by dividing net income by the weighted-average number of dilutive common shares outstanding during the period. Dilutive shares outstanding are calculated by adding to the weighted shares outstanding any common stock equivalents from outstanding stock options and warrants based on the treasury stock method.

Diluted net loss per share is the same as basic net loss per share for the three months ended March 31, 2009 because the effects of potentially dilutive securities are anti-dilutive.

At March 31, 2009 the Company had the following anti-dilutive securities outstanding which were excluded from the calculation of diluted net loss per share:

Warrants	76,757
Stock options	62,244
	139,001

**Recent Accounting Pronouncements**

On January 1, 2009 the Company adopted FASB Staff Position FAS 157-2, Effective Date of FASB Statement No. 157, which had delayed the effective date of SFAS 157 for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually), to fiscal years beginning after November 15, 2008. The adoption of FSP FAS 157-2 did not have a material impact on the Company's financial position or results of operations.

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments. This FASB Staff Position ( FSP ) amends Statement of Financial Accounting Standards ( SFAS ) No. 107, Disclosures About Fair Value of Financial Instruments, to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. This FSP also amends APB Opinion No. 28, Interim Financial Reporting, to require those disclosures in summarized financial information at interim reporting periods. This FSP is effective for interim reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. The FSP does not require disclosures for earlier periods presented for comparative purposes at initial adoption. In periods after initial adoption, this FSP requires comparative purposes at initial adoption. In periods after initial adoption, this FSP requires comparative disclosures only for periods ending after initial adoption. The Company does not expect the changes associated with adoption of this FSP will have a material effect on the determination or reporting of the Company's financial results.

In April 2009, the FASB issued FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments. This FSP amends the other-than-temporary impairment guidance for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. This FSP does not

## Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities. This FSP is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. The FSP does not require disclosures for earlier periods presented for comparative purposes at initial adoption. In periods after initial adoption, this FSP requires comparative disclosures only for periods ending after initial adoption. The Company does not expect the changes associated with adoption of this FSP will have a material effect on the determination or reporting of the Company's financial results.

**Table of Contents**

In April 2009, the FASB issued FSP FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*. This FSP provides additional guidance for estimating fair value in accordance with SFAS No. 157, *Fair Value Measurements*, when the volume and level of activity for the asset or liability have significantly decreased. This FSP also includes guidance on identifying circumstances that indicate a transaction is not orderly. This FSP is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. The FSP does not require disclosures for earlier periods presented for comparative purposes at initial adoption. In periods after initial adoption, this FSP requires comparative disclosures only for periods ending after initial adoption. The Company does not expect the changes associated with the adoption of this FSP will have a material effect on the determination or reporting of the Company's financial results.

Effective January 1, 2009, the Company implemented SFAS No. 157, *Fair Value Measurements*, for our nonfinancial assets and liabilities that are remeasured at fair value on a non-recurring basis. See Note 4 for disclosures associated with adoption of this standard.

**3. SEGMENT INFORMATION**

The Company has determined that it operates in only one segment in accordance with SFAS No. 131, *Disclosures About Segments of an Enterprise and Related Information*, as it only reports profit and loss information on an aggregate basis to its chief operating decision maker.

**Table of Contents**

Revenue is attributed by geographic region based on ship-to location of the Company's customers. The following table summarizes revenue by geographic region:

	Three months ended March 31,	
	2009	2008
	(in thousands)	
Asia	\$ 537	\$ 5,736
North America	1,615	4,503
Europe	186	269
Revenue	\$ 2,338	\$ 10,508

**4. INVESTMENTS**

The Company invests available cash primarily in investment grade commercial paper, corporate notes and government securities. The Company's short-term investments balance of \$33.8 million as of March 31, 2009, is comprised of US Treasury securities of \$23.1 million, corporate notes and bonds of \$9.0 million and commercial paper of \$1.7 million. The Company's short-term investments are classified as available-for-sale securities and are carried at fair market value with unrealized gains and losses recorded in accumulated other comprehensive income (loss).

While the Company's investment policy no longer includes auction-rate securities as an approved investment, the Company continues to hold auction-rate securities purchased prior to the policy change. In February 2008, the Company began experiencing failed auctions of its entire auction-rate securities portfolio, resulting in its inability to sell these securities in the short term. All of these auction-rate securities are AAA rated by one or more of the major credit rating agencies and have contractual maturities from 2036 to 2045. Further, all of these securities are collateralized by student loans, and approximately 99% of the collateral qualifies under the Federal Family Education Loan Program and is guaranteed by the US government. The Company is receiving the underlying cash flows on all its auction-rate securities. The Company is unable to predict if these funds will become available before their maturity dates. As such, the auction-rate securities have been classified as long-term investments as of March 31, 2009. The Company also holds put options associated with an agreement with UBS, AG related to the auction-rate securities purchased through them. The Company's long-term investments consist of a \$2.0 million investment in Peregrine Semiconductor, Corp. (a customer) Series D-1 Preferred shares and \$10.7 million of auction-rate securities and put options. Long-term investments are trading securities recorded at fair value and unrealized gains and losses are reported as part of realized gain (loss).

**Table of Contents**

As noted above, in October 2008 the Company entered into an agreement with UBS, AG, which provides the Company certain rights to sell to UBS, AG the auction-rate securities that were purchased through them. As of March 31, 2009, the Company held \$10.8 million par value auction-rate securities purchased from UBS, AG. The Company has the option to sell these securities to UBS, AG at par value from June 10, 2010 through July 2, 2012. UBS, AG, at its discretion, may purchase or sell these securities on the Company's behalf at any time provided the Company receives par value for the securities sold. The issuers of the auction-rate securities continue to have the right to redeem the securities at their discretion. The agreement also permits the Company to establish a demand revolving credit line in an amount equal to the par value of the securities at a net no cost. If the Company's debt is determined to be rated below investment grade or is not rated, the amount that can be borrowed is limited to 75% of the market value of the auction-rate securities. As of March 31, 2009, the Company had no loans outstanding under this agreement.

The Company's right to sell the auction-rate securities to UBS, AG, commencing on June 10, 2010 represents put options for a payment equal to the par value of the auction-rate securities. The Company elected the fair value option under SFAS 159 and recorded the put options in long term investments. During the three months ended March 31, 2009, the Company recorded a loss of \$505,463 representing the changes in fair value of the put options. The Company also recorded a gain of \$518,934 representing the changes in fair value of the auction-rate securities. Both the gain and loss from recording the change in fair value of the put options and auction-rate securities were recorded in realized gain (loss).

The Company values the auction-rate securities and put options using a discounted cash model that weights various factors including interest rates and expected holding period. The investment in Peregrine Semiconductor, Corp. (Peregrine) is valued at a pre-money valuation of Peregrine as determined by an investor group in the fourth quarter of 2008 and is adjusted as needed based on a review of Peregrine's financial position. The Company believes this is a fair value of these investments at March 31, 2009.

The following table presents the amortized cost and gross unrealized gains and losses on all securities at March 31, 2009:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	(in thousands)			
U.S. Treasury securities and agency (taxable)	\$ 23,104	\$ 16	\$	\$ 23,120
Corporate Notes/Bonds (taxable)	9,021	2		9,023
Commercial Paper (taxable)	1,704		3	1,701
Total available-for-sale securities	33,829	18	3	33,844
Auction-rate securities	9,603			9,603
Auction-rate securities put options	1,106			1,106
Peregrine Semiconductor, Corp Series D-1 Preferred shares	2,000			2,000
Total trading securities	12,709			12,709
Total securities	\$ 46,538	\$ 18	\$ 3	\$ 46,553

The net carrying value and estimated fair value of available-for-sale securities at March 31, 2009, by contractual maturity, were as follows:

	Cost	Fair Value
Due in one year or less	\$ 33,829	\$ 33,844
Due after one year through three years		
Due after three years	\$ 12,709	\$ 12,709

Effective January 1, 2008, the Company adopted Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements (SFAS No. 157). In February 2008, the Financial Accounting Standards Board (FASB) issued FASB Staff Position No. FAS 157-2, Effective Date of FASB Statement No. 157, which provides a one year deferral of the effective date of SFAS 157 for non-financial assets and non-financial liabilities, except those that are recognized or disclosed in the financial statements at fair value at least annually. Therefore, the Company has adopted the provisions of SFAS No. 157 with respect to its financial assets and liabilities only. SFAS No. 157 defines fair value,

establishes a framework for measuring fair value under generally

**Table of Contents**

accepted accounting principles and enhances disclosures about fair value measurements. Fair value is defined under SFAS No. 157 as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value under SFAS No. 157 must maximize the use of observable inputs and minimize the use of unobservable inputs. The standard describes a fair value hierarchy based on three levels of inputs, of which the first two are considered observable and the last unobservable, that may be used to measure fair value which are the following:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The adoption of SFAS No. 157 did not have a material impact on the Company's results of operations and financial condition. The following table summarizes the Company's financial assets measured at fair value on a recurring basis in accordance with SFAS No. 157 as of March 31, 2009:

	Level 1	Level 2	Level 3	Total
<b>Cash Equivalents:</b>				
Money market funds	\$ 5,126	\$	\$	\$ 5,126
<b>Investments:</b>				
Available-for-sales securities - current		33,844		33,844
Trading securities - non-current			12,709	12,709
<b>Total</b>	<b>\$ 5,126</b>	<b>\$ 33,844</b>	<b>\$ 12,709</b>	<b>\$ 51,679</b>

Level 3 assets consist of AAA-rated municipal bonds with an auction reset feature (auction-rate securities) whose underlying assets are generally student loans which are substantially backed by the federal government, auction-rate security put options and Peregrine Semiconductor, Corp Series D-1 Preferred shares. As of March 31, 2009, due to the auction failures, underlying maturities of the auction-rate securities of greater than one year and the Company's ability to hold the securities beyond one year, the Company classified its investment in auction-rate securities as long-term investments. These investments were valued at fair value as of March 31, 2009. The following table provides a summary of changes in fair value of the Company's Level 3 financial assets as of March 31, 2009:

	Level 3
Balance at January 1, 2009	\$ 12,696
Net recognized gains and (losses)	13
<b>Balance at March 31, 2009</b>	<b>\$ 12,709</b>

---

## **Table of Contents**

In addition to the debt securities noted above, the Company had approximately \$386,000 of time deposits included in cash and cash equivalents as of March 31, 2009.

### **5. RELATED PARTY TRANSACTIONS**

In November 2008, the Company purchased 1,345,444 shares for a total of \$2.0 million of Peregrine Semiconductor, Corp. Series D-1 Preferred shares, which represents less than 1% of shares outstanding. The terms and stock price of the purchase were the same as for the other investors who participated. Peregrine Semiconductor, Corp. is a customer of the Company. For the three months ended March 31, 2009, revenue and accounts receivable from Peregrine Semiconductor, Corp were \$444,750. The pricing terms and conditions of the sales to Peregrine are similar to those available to the Company's other non-related customers.

### **6. SIGNIFICANT CUSTOMERS**

For the three months ended March 31, 2009, the Company had three customers that accounted for 34%, 19% and 14% of its revenue and for the three months ended March 31, 2008, the Company had four customers that accounted for approximately 30%, 16%, 15% and 11% of its revenue.

Customers individually representing more than 10% of trade receivables accounted for approximately 64% and 61% of accounts receivable as of March 31, 2009 and December 31, 2008, respectively. The Company grants credit to customers based on an evaluation of their financial condition. Losses from credit sales are provided for in the financial statements.

### **7. STOCKHOLDERS EQUITY**

#### **Common Stock**

As of March 31, 2009, the Company had 85,000,000 shares of common stock authorized with a par value of \$0.001 and the Company had reserved 1,917,743 shares of common stock for issuance upon the exercise of outstanding common stock options. Also, 1,305,766 shares of the Company's common stock were reserved for future grants of stock options (or other similar equity instruments) under the Company's 2001 Equity Plan (the 2001 Plan) and 2007 Stock Incentive Plan (the 2007 Plan) as of March 31, 2009. In addition, 336,705 shares of the Company's common stock were reserved for future exercise of outstanding warrants as of March 31, 2009.

#### **Warrants**

For the three months ended March 31, 2009, no common stock warrants were exercised. At March 31, 2009 and December 31, 2008, there were 336,705 common stock warrants outstanding.

#### **Treasury Stock**

In November 2008, the Company authorized a stock repurchase program to purchase up to \$15.0 million of common stock over a period of two years. The stock repurchase program authorizes the Company to repurchase shares of its common stock in the open market at times and prices considered appropriate by the Company depending upon prevailing market conditions and other corporate considerations. The treasury shares are accounted for using the cost method whereby the entire cost of the acquired stock is recorded as treasury stock. For the three months ended March 31, 2009, the Company repurchased 519,242 shares at an average price of \$4.96 for \$2.6 million.

### **8. STOCK INCENTIVE PLANS**

The Company sponsors a stock option plan, the 2001 Plan, which allows for the grant of incentive and nonqualified stock options for the purchase of common stock. Each option entitles the holder to purchase one share of common stock at the specified option exercise price. The exercise price of each incentive stock option granted must not be less than the fair market value on the grant date. At the discretion of management and with the approval of the Board of Directors, the Company may grant options under the 2001 Plan. Management and the Board of Directors determine vesting periods and expiration dates at the time of the grant.

**Table of Contents**

In August 2007, the Company adopted the 2007 Plan, which allows for the grant of incentive stock options, non-statutory stock options, stock appreciation rights, restricted stock, restricted stock units, performance awards and bonus shares. The maximum number of shares which may be awarded or sold under the 2007 Plan is 2,307,692 shares. The Board of Directors appoints a committee to administer the plan. The plan committee determines the type of award to be granted, the fair market value, the number of shares covered by the award, and the time when the award vests and may be exercised.

Upon the adoption of SFAS 123R, the Company began using the Black-Scholes option pricing model to value stock options. The Company uses historical stock prices of companies which it considers as a peer group as the basis for its volatility assumptions. The assumed risk-free rates were based on US Treasury rates in effect at the time of grant with a term consistent with the expected option lives. The expected term is based upon the vesting term of the Company's options, a review of a peer group of companies, and expected exercise behavior. The forfeiture rate is based on past history of forfeited options. The expense is being allocated using the straight-line method. For the three months ended March 31, 2009 and 2008, the Company recorded \$162,302 and \$165,560, respectively, of stock compensation expense related to the adoption of SFAS 123R. As of March 31, 2009, the Company has \$3,076,301 of total unrecognized compensation cost related to nonvested awards granted under the Company's stock-based plans that it expects to recognize over a weighted-average period of 3.05 years. Under the prospective method of adoption of SFAS 123R, the Company continues to account for options issued prior to January 1, 2006 under the intrinsic value method of APB 25.

**Table of Contents**

The following table summarizes the activity of the stock incentive and equity plans as of March 31, 2009 and changes during the three months then ended:

	Shares available for grant	Number of options outstanding	Weighted-average option exercise price	Number of restricted stock and board shares issued
At December 31, 2008	2,072,170	1,160,847	\$ 8.00	26,503
Authorized				
Granted	(768,328)	759,968	4.01	8,360
Exercised		(1,148)	2.87	
Cancelled/forfeited	1,924	(1,924)	7.52	
At March 31, 2009	1,305,766	1,917,743	\$ 6.42	34,863

The fair value per share of options granted for the three months ended March 31, 2009 was \$4.01 and the fair value of each option grant was estimated at the date of grant using the Black-Scholes option-pricing model using an expected term of 5.2 years, risk-free interest rate of 1.41%, expected volatility of 50% and no dividend yield. The Company used an expected forfeiture rate of 30.39%.

For the three months ended March 31, 2009 and 2008, the Company recorded \$28,499 and \$22,574, respectively, of stock compensation expense related to restricted stock.

For the three months ended March 31, 2009, the Company issued common stock shares totaling 8,360 shares to outside directors of the Company as a portion of the directors' compensation. The fair value of \$35,605 was recorded as stock compensation expense.

A summary of the Company's non-vested options during the three month period ended March 31, 2009 is presented below:

	Options	Weighted-average exercise price
Non-vested at January 1, 2009	581,131	\$ 9.18
Granted	759,968	4.01
Vested	(17,591)	5.82
Forfeited	(903)	12.85
Non-vested at March 31, 2009	1,322,605	\$ 3.95

An analysis of restricted stock issued is as follows:

Non-vested restricted stock as of December 31, 2008	14,651
Granted	
Vested	(1,437)
Non-vested restricted stock as of March 31, 2009	13,214

**9. COMMITMENTS AND CONTINGENCIES**

**Purchase Commitments**

## Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

The Company has entered into agreements to purchase equipment or components to construct furnaces. These agreements will result in the Company purchasing equipment or components for a total cost of approximately \$1,699,000 with deliveries occurring through December 2009.

### **Litigation**

From time to time, the Company experiences routine litigation in the normal course of its business. The management of the Company does not believe any pending litigation will have a material adverse effect on the financial condition or results of operations of the Company.

---

**Table of Contents**

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION**

All statements, other than statements of historical facts, included in this Quarterly Report on Form 10-Q regarding our estimates, expectations, beliefs, intentions, projections or strategies for the future, results of operations, financial position, net sales, projected costs, prospects and plans and objectives of management for future operations may be forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. We have based these forward-looking statements on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy, short-term and long-term business operations and objectives and financial needs. These forward looking statements can be identified by the use of terms and phrases such as believe, plan, intend, anticipate, target, estimate, expect, and the like, and/or future-tense or conditional constructions such as will, may, could, or the negative thereof). Items contemplating or making assumptions about actual or potential future sales, market size and trends or operating results also constitute forward-looking statements.

Moreover, we operate in a very competitive and rapidly changing environment. New risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. Before investing in our common stock, investors should be aware that the occurrence of the risks, uncertainties and events described in the section entitled Risk factors in our Annual Report on Form 10-K and elsewhere in this Quarterly Report could have a material adverse effect on our business, results of operations and financial condition.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, forward-looking statements are inherently subject to known and unknown business, economic and other risks and uncertainties that may cause actual results to be materially different from those discussed in these forward-looking statements. Readers are urged not to place undue reliance on these forward-looking statements, which speak only as of the date of this Quarterly Report. We assume no obligation to update any forward-looking statements in order to reflect any event or circumstance that may arise after the date of this Quarterly Report, other than as may be required by applicable law or regulation. If one or more of these risks or uncertainties materialize, or if the underlying assumptions prove incorrect, our actual results may vary materially from those expected or projected.

You should read this Quarterly Report, the documents that we reference in this Quarterly Report and have filed with the SEC as exhibits and our Annual Report on Form 10-K for the year ended December 31, 2008 with the understanding that our actual future results, levels of activity, performance and events and circumstances may be materially different from what we expect.

Unless otherwise indicated, the terms Rubicon, the Company, we, us, and our refer to Rubicon Technology, Inc.

**OVERVIEW**

We are an advanced electronic materials provider that develops, manufactures and sells monocrystalline sapphire and other innovative crystalline products for Light-Emitting Diodes ( LEDs ), radio frequency integrated circuits ( RFICs ), blue laser diodes, optoelectronics and other optical applications. The emergence of sapphire in commercial volumes at competitive prices has enabled the development of new technologies such as high brightness ( HB ) white, blue and green LEDs and highly-integrated RFICs. We apply our proprietary crystal growth technology to produce high-quality sapphire products efficiently to supply our end-markets, and we work closely with our customers to meet their quality and delivery needs.

We are a vertically-integrated manufacturer of high-quality sapphire substrates and optical windows that are used in a variety of high-growth, high-volume end-market applications. Our largest product line is two inch to four inch sapphire wafers for use in LEDs and blue laser diodes for solid state lighting and electronic applications. In addition, we sell six inch sapphire wafers that are used for Silicon-on-Sapphire ( SOS ) RFICs, as well as products for military, aerospace, sensor and other applications. We have also extended our technology to manufacture eight inch products to support next-generation LED, RFIC and optical window applications and are developing the capability to produce even larger products.

Our revenue consists of sales of sapphire materials sold in core, as-cut, as-ground and polished forms in two, three, four and six inch diameters as well as optical materials sold as blanks or polished windows. Products are made to varying specifications, such as crystal planar orientations and thicknesses.

Historically, a significant portion of our revenue has been derived from sales to relatively few customers. For the three months ended March 31, 2009, we had three customers that accounted for approximately 34%, 19% and 14% of our revenue and for the three months ended March 31, 2008, we had four customers that accounted for approximately for 30%, 16%, 15% and 11% of our revenue. Other than as discussed above, none of our customers accounted for more than 10% of our revenue for such periods. Although we are attempting to diversify and expand our

## Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

customer base, we expect our revenue to continue to be concentrated among a small number of customers. We expect that our significant customers may change from period to period.

## **Table of Contents**

We recognize revenue upon shipment to our customers. We derive a significant portion of our revenue from customers outside of the United States. The majority of our sales are to the Asian market and we expect that region to continue to be a major source of revenue for us. All of our revenue is denominated in US dollars. The current economic crisis has resulted in weak demand for LED and SOS products, which has significantly reduced orders and sale of our sapphire substrates. We anticipate that reduced demand for our products will continue at least through mid-2009. As a result, our manufacturing facilities are currently underutilized, which negatively impacts our gross margins.

Our cost of goods sold consists primarily of manufacturing materials, labor, manufacturing-related overhead such as utilities, depreciation and rent, provisions for excess and obsolete inventory reserves, freight and warranties. We manufacture our products at our Franklin Park, Illinois and Bensenville, Illinois manufacturing facilities based on customer orders. We purchase materials and supplies to support such demand. We are subject to variations in the cost of raw materials and consumables from period to period because we do not have long-term fixed-price agreements with our suppliers.

Our operating expenses are comprised of sales and marketing, research and development ( R&D ), and general and administrative expenses ( G&A ). G&A expenses consist primarily of salaries and associated costs for employees in finance, human resources, information technology and administrative activities, charges for accounting, legal, and insurance fees, and stock-based compensation under Statement of Financial Accounting Standards No. 123(R), Share-Based Payment ( SFAS 123R ). The majority of our stock-based compensation relates to administrative personnel and is accounted for as a general and administrative expense.

Other income (expense) consists of interest income and expense and realized gains and losses on investments. For the three months ended March 31, 2008, interest expense was \$2,000. We repaid most of our outstanding indebtedness with a portion of the proceeds from our IPO in November 2007 and repaid the remainder in February 2008. We do not expect to incur interest expense for the next twelve months. Proceeds from our IPO were invested in available-for-sale and trading securities.

We account for income taxes under the asset and liability method whereby the expected future tax consequences of temporary differences between the book value and the tax basis of assets and liabilities are recognized as deferred tax assets and liabilities, using enacted tax rates in effect for the year in which the differences are expected to be recognized. A full valuation allowance is provided as management cannot conclude that it is more likely than not that our deferred tax assets will be realized. At March 31, 2009, we had approximately \$42 million in net operating loss carryforwards ( NOLs ). We believe that we are not restricted in our ability to use the full amount of the NOLs, nor is there a limit to the amount of NOLs that may be used in any given year.

Because of the current economic environment, it is difficult to predict capital expenditures needed to support or enhance our current operations, but we anticipate it will be approximately \$10.0 million in 2009. These expenditures will be primarily focused on research and development and cost savings initiatives and will be incurred mostly in the second half of 2009. Our capital expenditures in the first quarter 2009 were \$525,000.

**Table of Contents****RESULTS OF OPERATIONS**

The following table sets forth our statements of operations for the periods indicated:

	<b>Three months ended March 31, 2009      2008 (in millions)</b>	
Revenue	\$ 2.3	\$ 10.5
Cost of goods sold	4.9	6.6
<b>Gross profit (loss)</b>	<b>(2.6)</b>	<b>3.9</b>
Operating expenses:		
General and administrative	1.1	1.9
Sales and marketing	0.2	0.2
Research and development	0.2	0.3
<b>Total operating expenses</b>	<b>1.5</b>	<b>2.4</b>
<b>Income (loss) from operations</b>	<b>(4.1)</b>	<b>1.5</b>
Other income (expense)	0.2	0.9
<b>Income (loss) before income taxes</b>	<b>(3.9)</b>	<b>2.4</b>
Income tax expense		0.1
<b>Net income (loss)</b>	<b>\$ (3.9)</b>	<b>\$ 2.3</b>

The following table sets forth our statements of operations as a percentage of revenue for the periods indicated:

	<b>Three months ended March 31, 2009      2008 (percentage of total)</b>	
Revenue	100%	100%
Cost of goods sold	213	63
<b>Gross profit (loss)</b>	<b>(113)</b>	<b>37</b>
Operating expenses:		
General and administrative	47	18
Sales and marketing	9	2
Research and development	9	3
<b>Total operating expenses</b>	<b>65</b>	<b>23</b>
<b>Income (loss) from operations</b>	<b>(178)</b>	<b>14</b>
Other income (expense)	9	9
<b>Income (loss) before income taxes</b>	<b>(169)</b>	<b>23</b>
Income tax expense		1

## Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

Net income (loss)	(169)%	22%
-------------------	--------	-----

*Revenue.* Revenue was \$2.3 million for the three months ended March 31, 2009 and \$10.5 million for the three months ended March 31, 2008, a decrease of \$8.2 million. We experienced a significant decrease in revenue across all product lines and diameters. The impact of the worldwide economic crisis resulted in excess inventory throughout the LED supply chain which significantly reduced orders. Core and as-cut quantities shipped for the three months ended March 31, 2009 decreased by 90% which resulted in lower revenue of \$5.0 million. In addition, the SOS RFIC business is largely dependent upon the consumer electronics market which also had a significant downturn. Consequently, SOS RFIC revenue decreased by \$2.4 million. Also, lower demand has resulted in lower pricing which decreased substrate revenue by \$250,000. We expect pricing pressure on new orders to continue in 2009 until demand for sapphire substrates improves. We had lower contract research revenue of \$250,000 as we completed our contract for the development of eight inch wafers in the third quarter 2008. We also had lower revenue of \$302,000 from optical products due to decreased sales of sapphire and fluorides for military, sensor and instrumentation applications. For the remainder of 2009, for us to achieve higher volumes of sapphire wafer sales, inventories in the LED and SOS RFIC industries need to be consumed. Our customers, particularly those in Taiwan, are beginning to see some improvement in demand driven by an increasing rate of adoption of LED back-lit products, such as notebook computers and LED back-lit LCD televisions. However, given our customers' current inventory levels, we do not expect revenue streams to improve until the third quarter 2009.

## **Table of Contents**

*Gross profit (loss).* Gross loss was \$2.6 million for the three months ended March 31, 2009 compared to a gross profit of \$3.9 million for the three months ended March 31, 2008, a decrease of \$6.5 million. With the decrease in orders, we experienced lower utilization of equipment and staff which resulted in under absorbed manufacturing costs of approximately \$2.9 million. Also, gross profit was impacted by the decrease of \$250,000 of direct contract revenue, which had little direct cost.

*General and administrative expenses.* G&A expenses were \$1.1 million for the three months ended March 31, 2009 and \$1.9 million for the three months ended March 31, 2008, a decrease of \$800,000. The decrease was primarily due to \$398,000 from lower bonus costs due to no performance bonus anticipated for 2009, lower bad debt expense of \$148,000 on collection of an over 90 day past due receivable, and \$36,000 in lower recruiting costs. In addition, follow-on public offering costs of \$181,000 were incurred in 2008 but not in 2009.

*Sales and marketing expenses.* Sales and marketing expenses were \$243,000 for the three months ended March 31, 2009 and \$235,000 for the three months ended March 31, 2008, an increase of \$8,000. The increase in sales and marketing expenses is attributable to additional headcount, travel and marketing and trade show expenses of \$14,000 all in support of increased initiatives to help grow sales with new customers partially offset by a decrease in agent commission expense of \$6,000 on lower sales and a phasing out of agents.

*Research and development expenses.* R&D expenses were \$152,000 for the three months ended March 31, 2009 and \$267,000 for the three months ended March 31, 2008, a decrease of \$115,000. The decrease was primarily attributable to a decrease in headcount expenses of \$108,000 and a decrease in spending on research projects of \$9,000. We have recently added two development engineers which will increase R&D expenses for the remainder of 2009.

*Other income (expense).* Other income (expense) was \$270,000 for the three months ended March 31, 2009 and \$858,000 for the three months ended March 31, 2008, a decrease in net other income of \$588,000. The decrease was due to lower interest income of \$603,000 as a result of lower investment principal and lower interest rates.

## **LIQUIDITY AND CAPITAL RESOURCES**

We historically funded our operations using a combination of issuances of common stock and preferred stock, a working capital line of credit and term loans, and cash generated from our operations. Since our inception, we have raised approximately \$136 million of equity from both private and public issuances of common and preferred stock.

As of March 31, 2009, we had cash and short term investments totaling \$39.4 million, including cash of \$386,000 held in deposits at a major bank, \$5.2 million invested in money market funds and short term investments in commercial paper, state and local bonds, and U.S. treasury securities of \$33.8 million. Our long term investments of \$12.7 million are municipal auction-rate securities and related put options of \$10.7 million and a \$2.0 million investment in Peregrine Semiconductor, Corp. (one of our customers) Series D1 preferred stock. In February 2008, we began experiencing failed auctions of our entire auction-rate securities portfolio, resulting in our inability to sell these securities in the short term. All of the auction-rate securities are AAA rated by one or more of the major credit rating agencies and have contractual maturities from 2036 to 2045. Further, all of these securities are collateralized by student loans, and approximately 99% of the collateral qualifies under the Federal Family Education Loan Program and is guaranteed by the US government. We are receiving the underlying cash flows on all of our auction-rate securities. The auction-rate securities have been classified as long-term inv
