Item 1. Schedule of Investments.

The Schedule of Investments is attached herewith.

Key Investment Terms

American Depositary Receipt (ADR): Represents shares of foreign companies traded in U.S. dollars on U.S. exchanges that are held by a U.S. bank or a trust. Foreign companies use ADRs in order to make it easier for Americans to buy their shares.

Treasury-Inflation Protected Securities (TIPS): U.S. Treasury bonds and notes whose value is adjusted according to changes to the inflation rate every six months, as measured by the consumer price index. As inflation occurs, the value of TIPS increases.

Sponsored ADR (American Depositary Receipt) An ADR which is issued with the cooperation of the company whose stock will underlie the ADR. Sponsored ADRs generally carry the same rights normally given to stockholders, such as voting rights. ADRs must be sponsored to be able to trade on a major U.S. exchange such as the NYSE.

NOTES TO SCHEDULE OF INVESTMENTS

September 30, 2009  
(Unaudited)

NOTE 1 -- SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The preparation of financial statements in conformity with accounting principals

## Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-Q

generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates and those differences could be significant.

### A. Security Valuation:

Equity securities are valued at the official closing price (typically last sale) on the exchange on which the securities are primarily traded, or if no closing price is available, at the last bid price.

Debt securities are valued on the basis of broker quotations or valuations provided by a pricing service, which utilizes information with respect to recent sales, market transactions in comparable securities, quotations from dealers, and various relationships between securities in determining value. Due to the continued volatility in the current market, valuations developed through pricing techniques may materially vary from the actual amounts realized upon sale of the securities.

As required, some securities and other assets may be valued at fair value as determined in good faith by or under the direction of the Directors.

Certain foreign common stocks may be fair valued in cases where closing prices are not readily available or are deemed not reflective of readily available market prices. For example, significant events (such as movement in the U.S. securities market, or other regional and local developments) may occur between the time that foreign markets close (where the security is principally traded) and the time that the Fund calculates its net asset value (generally, the close of the NYSE) that may impact the value of securities traded in these foreign markets. In these cases, information from an external vendor may be utilized to adjust closing market prices of certain foreign common stocks to reflect their fair value. Because the frequency of significant events is not predictable, fair valuation of certain foreign common stocks may occur on a frequent basis.

Investments in underlying funds are valued at each fund's closing net asset value determined as of the close of business of the New York Stock Exchange (generally 4:00 p.m. Eastern time).

Short-term investments having a remaining maturity of 60 days or less are valued at amortized cost, which approximates market.

6

The Fund utilizes a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

- . Level 1 -- quoted prices in active markets for identical securities
- . Level 2 -- prices determined using other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- . Level 3 -- prices determined using significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

## Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-Q

A summary of the inputs used to value the Fund's net assets by each major security type is disclosed at the end of the Schedule of Investments.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

### NOTE 2 -- FEDERAL INCOME TAX INFORMATION

(\$ reported in thousands)

At September 30, 2009, federal tax cost and aggregate gross unrealized appreciation (depreciation) of securities held by the Fund were as follows:

Federal Tax Cost	Unrealized Appreciation	Unrealized (Depreciation)	Net Unrealized Appreciation (Depreciation)
\$455,328	\$29,074	\$(17,339)	\$11,735

### NOTE 3 -- SUBSEQUENT EVENT EVALUATIONS

Management has evaluated the impact of all subsequent events on the Fund through November 20, 2009, the date the financial statements were issued, and is reporting that The Zweig Total Return Fund, Inc.'s Special Meeting of Shareholders held on October 27, 2009 concluded with the Fund remaining closed-end. The number of in-person and proxy votes represented at the special meeting did not constitute a quorum and the chairman of the special meeting closed the meeting without adjournment, as permitted by the Fund's bylaws. The number of proxies received represented approximately 32% of the Fund's outstanding shares, with less than 8% of outstanding shares in favor of the conversion proposal. The affirmative vote of a majority of shares outstanding as of the record date would have been required to pass the proposal. The Fund was required to submit the conversion proposal to its shareholders in accordance with its Articles of Incorporation because its shares traded on the New York Stock Exchange during the quarter ended June 30, 2009 at an average discount from their net asset value of 10% or more, determined on the basis of the discount as of the end of the last trading day in each week during such quarter. As set forth in the Fund's definitive proxy statement filed with the Securities and Exchange Commission on August 28, 2009, the Board of Directors, including its independent directors, voted unanimously to recommend against conversion to an open-end fund.
