UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2009

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 0-23976

(Exact name of registrant as specified in its charter)

Virginia (State or other jurisdiction of incorporation or organization)	54-1232965 (I.R.S. Employer Identification No.)
112 West King Street, Strasburg, Virginia (Address of principal executive offices)	22657 (Zip Code)
Registrant's telephone number, including area code: (540) 465-9121	

Securities registered pursuant to Section 12(b) of the Act: None

Securities registered pursuant to Section 12(g) of the Act:

Common Stock, \$1.25 par value

(Title of class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the closing sales price on June 30, 2009 was \$39,491,247.

The number of outstanding shares of common stock as of March 24, 2010 was 2,936,931.

Cautionary Statement Regarding Forward-Looking Statements

The Company makes forward-looking statements in this Form 10-K that are subject to risks and uncertainties. These forward-looking statements include statements regarding profitability, liquidity, allowance for loan losses, interest rate sensitivity, market risk, growth strategy and financial and other goals. The words believes, expects, may, will, should, projects, contemplates, anticipates, forecasts, intends, or other similar terms are intended to identify forward-looking statements. These forward-looking statements are subject to significant uncertainties because they are based upon or are affected by factors including:

the Company may be adversely affected by economic conditions in the market area;

risks inherent in the loan portfolio such as repayment risks, fluctuating collateral values and concentrations;

the adequacy of the allowance for loan losses related to changes in general economic and business conditions in the market area;

successful management of credit risk including certain concentrations in loans secured by real estate;

the adequacy of the valuation allowance for other real estate owned related to changes in economic conditions and local real estate activity;

potential impact on the Company of legislation;

the ability to continue paying common dividends;

difficult market conditions in the Company's industry;

the reliance on secondary sources, such as Federal Home Loan Bank advances, sales of securities and loans, federal funds lines of credit from correspondent banks and out-of-market time deposits, to meet liquidity needs;

the ability to raise capital as needed;

the successful management of interest rate risk;

the limited trading market in the Company's common stock; and

other factors identified in Item 1A, Risk Factors, below.

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

Because of these uncertainties, actual future results may be materially different from the results indicated by these forward-looking statements. In addition, past results of operations do not necessarily indicate future results.

Item 1. Business

General

First National Corporation (the Company) is the financial holding company of:

First Bank (the Bank). The Bank owns:

First Bank Financial Services, Inc.

Shen-Valley Land Holdings, LLC

First National (VA) Statutory Trust I (Trust I)

First National (VA) Statutory Trust II (Trust II)

First National (VA) Statutory Trust III (Trust III)

First Bank Financial Services, Inc. invests in partnerships that provide title insurance and investment services. Shen-Valley Land Holdings, LLC was formed to hold other real estate owned and future office sites. The Trusts were formed for the purpose of issuing redeemable capital securities, commonly known as trust preferred securities.

The Bank first opened for business on July 1, 1907 under the name The Peoples National Bank of Strasburg. On January 10, 1928, the Bank changed its name to The First National Bank of Strasburg. On April 12, 1994, the Bank received approval from the Federal Reserve Bank of Richmond (the Federal Reserve) and the Virginia State Corporation Commission's Bureau of Financial Institutions to convert to a state chartered bank with membership in the Federal Reserve System. On June 1, 1994, the Bank consummated such conversion and changed its name to First Bank.

Access to Filings

The Company's internet address is www.therespowerinone.com. The Company's Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K, and amendments to those reports, as filed with or furnished to the Securities and Exchange Commission (the SEC), are available free of charge at www.therespowerinone.com as soon as reasonably practicable after being filed with or furnished to the SEC. A copy of any of the Company's filings will be sent, without charge, to any shareholder upon written request to: M. Shane Bell, Chief Financial Officer, at 112 West King Street, Strasburg, Virginia 22657.

Table of Contents

Products and Services

The Bank's primary market area is located within the northern Shenandoah Valley region of Virginia, including Shenandoah County, Warren County, Frederick County and the City of Winchester. Within the market area there are various types of industry including medical and professional services, manufacturing, retail and higher education. Customers include individuals, small and medium-sized businesses, local governmental entities and non-profit organizations.

The Bank provides loan, deposit, investment, trust and asset management and other products and services in the northern Shenandoah Valley region of Virginia. Loan products and services include personal loans (including automobile and property improvement loans), residential mortgages, home equity loans and commercial loans. Deposit products and services include checking, savings, NOW accounts, money market accounts, IRA accounts, certificates of deposit, cash management and direct deposit services. The Bank offers other services, including safe deposit rentals, travelers and gift cards, internet banking, wire transfer services, remote deposit capture and other traditional banking services.

The Bank's Trust and Asset Management Department offers a variety of trust and asset management services including estate planning, investment management of assets, trustee under an agreement, trustee under a will, individual retirement accounts, estate settlement and benefit plans. The Bank offers financial planning and brokerage services for its customers through its investment division, First Financial Advisors.

The Bank's products and services are provided through 12 branch offices, 31 ATMs and its website, www.therespowerinone.com. The Bank operates six of its offices under the Financial Center concept. A Financial Center offers all of the Bank's financial services at one location. This concept allows loan, deposit, trust and investment advisory personnel to be readily available to serve customers throughout the Bank's market area. For the location of each of these Financial Centers, see Item 2 of this Form 10-K below.

Competition

The Company competes with other community banks, large financial institutions, savings banks, consumer finance companies, insurance companies, credit unions, internet-based banks and money market mutual funds. Competition has been increasing from out-of-state banks through their acquisition of Virginia-based banks and branches and from other financial institutions through use of internet banking.

The financial services industry is highly competitive and could become more competitive as a result of recent and ongoing legislative, regulatory and technological changes, and continued consolidation and economic turmoil within the financial services industry. Advantages larger financial institutions may have over the Company include more efficient operations from economies of scale, the ability to support wide-ranging advertising campaigns, raise larger amounts of capital and have substantially higher lending limits. Credit unions have a competitive advantage because of a more favorable tax treatment than the Company and can pass those savings on to their customers through lower loan rates and higher deposit rates.

Factors affecting the competition for loans and deposits are interest rates and terms offered, the number and location of branches and types of products offered, as well as the reputation of the institution. Advantages the Company has over the competition include long-term customer relationships, a commitment to excellent customer service, dedicated and loyal employees, local management and directors, and the support and involvement in the communities that the Company serves. The Company focuses on providing products and services to individuals, small to medium-sized businesses and local governmental entities within its communities. According to Federal Deposit Insurance Corporation (FDIC) deposit data as of June 30, 2009, the Bank was ranked first in Shenandoah County with \$266.0 million in deposits, representing 33% of the total deposit market; fourth in Warren County with \$53.0 million or 11% of the market; fourth in Frederick County with \$72.4 million or 16% of the market; and sixth in the City of Winchester with \$70.3 million or 5% of the market.

No material part of the business of the Company is dependent upon a single or a few customers, and the loss of any single customer would not have a materially adverse effect upon the business of the Company.

Employees

At December 31, 2009, the Company and the Bank employed a total of 163 full-time equivalent employees. The Company considers relations with its employees to be excellent.

SUPERVISION AND REGULATION

General

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

As a financial holding company, the Company is subject to regulation under the Bank Holding Company Act of 1956, as amended, and the supervision, examination and reporting requirements of the Board of Governors of the Federal Reserve System. As a state-chartered commercial bank, the Bank is subject to regulation, supervision and examination by the

Table of Contents

Virginia State Corporation Commission's Bureau of Financial Institutions. Other federal and state laws, including various consumer and compliance laws, govern the activities of the Bank, the investments that it makes and the aggregate amount of loans that it may grant to one borrower. Laws and regulations administered by the regulatory agencies also affect corporate practices, including business practices related to payment and charging of interest, documentation and disclosures, and affect the ability to open and close offices or purchase other entities.

The following description summarizes the significant federal and state laws applicable to the Company's industry. To the extent that statutory or regulatory provisions are described, the description is qualified in its entirety by reference to that particular statutory or regulatory provision.

The Bank Holding Company Act

Under the Bank Holding Company Act, the Company is subject to periodic examination by the Federal Reserve and required to file periodic reports regarding its operations and any additional information that the Federal Reserve may require. Activities at the bank holding company are limited to:

banking, managing or controlling banks;

furnishing services to or performing services for its subsidiaries; and

engaging in other activities that the Federal Reserve has determined by regulation or order to be so closely related to banking as to be a proper incident to these activities.

Some of the activities that the Federal Reserve Board has determined by regulation to be closely related to the business of a bank holding company include making or servicing loans and specific types of leases, performing specific data processing services and acting in some circumstances as a fiduciary or investment or financial adviser.

With some limited exceptions, the Bank Holding Company Act requires every bank holding company to obtain the prior approval of the Federal Reserve before:

acquiring substantially all the assets of any bank;

acquiring direct or indirect ownership or control of any voting shares of any bank if after such acquisition it would own or control more than 5% of the voting shares of such bank (unless it already owns or controls the majority of such shares); or

merging or consolidating with another bank holding company.

In addition, and subject to some exceptions, the Bank Holding Company Act and the Change in Bank Control Act, together with their regulations, require Federal Reserve approval prior to any person or company acquiring control of a bank holding company. Control is conclusively presumed to exist if an individual or company acquires 25% or more of any class of voting securities of the bank holding company. Control is rebuttably presumed to exist if a person acquires 10% or more, but less than 25%, of any class of voting securities and either the company has registered securities under Section 12 of the Securities Exchange Act of 1934 or no other person owns a greater percentage of that class of voting securities immediately after the transaction. The regulations provide a procedure for challenging this rebuttable control presumption.

In November 1999, Congress enacted the Gramm-Leach-Bliley Act (the GLBA), which made substantial revisions to the statutory restrictions separating banking activities from other financial activities. Under the GLBA, bank holding companies that are well-capitalized and well-managed and meet other conditions can elect to become financial holding companies. As financial holding companies, they and their subsidiaries are permitted to acquire or engage in previously impermissible activities such as insurance underwriting, securities underwriting and distribution, travel agency activities, insurance agency activities, merchant banking and other activities that the Federal Reserve determines to be

financial in nature or complementary to these activities. Financial holding companies continue to be subject to the overall oversight and supervision of the Federal Reserve, but the GLBA applies the concept of functional regulation to the activities conducted by subsidiaries. For example, insurance activities would be subject to supervision and regulation by state insurance authorities.

Capital Requirements

The Federal Reserve Board has issued risk-based and leverage capital guidelines applicable to banking organizations that it supervises. Under the risk-based capital requirements, the Company and the Bank are each generally required to maintain a minimum ratio of total capital to risk-weighted assets (including certain off-balance sheet activities, such as standby letters of credit) of 8%. At least half of the total capital must be composed of Tier 1 Capital, which is defined as common equity, retained earnings and qualifying perpetual preferred stock, less certain intangibles. The remainder may consist of Tier 2 Capital, which is defined as specific subordinated debt, some hybrid capital instruments and other qualifying preferred stock and a limited amount of the loan loss allowance. Trust preferred securities may be included in Tier 1 capital for regulatory capital adequacy purposes as long as their amount does not exceed 25% of Tier 1 capital, including trust preferred securities. The portion of the trust preferred securities not considered as Tier 1 capital, if any, may be included in Tier 2 capital. In addition, each of the federal banking regulatory agencies has established minimum leverage capital requirements for banking organizations. Under these requirements, banking organizations must maintain a minimum ratio of Tier 1 capital to adjusted average quarterly assets equal to 3% to 5%, subject to federal bank regulatory evaluation of an organization's overall safety and soundness.

Table of Contents

The risk-based capital standards of the Federal Reserve Board explicitly identify concentrations of credit risk and the risk arising from non-traditional activities, as well as an institution's ability to manage these risks, as important factors to be taken into account by the agency in assessing an institution's overall capital adequacy. The capital guidelines also provide that an institution's exposure to a decline in the economic value of its capital due to changes in interest rates be considered by the agency as a factor in evaluating a banking organization's capital adequacy.

The FDIC may take various corrective actions against any undercapitalized bank and any bank that fails to submit an acceptable capital restoration plan or fails to implement a plan accepted by the FDIC. These powers include, but are not limited to, requiring the institution to be recapitalized, prohibiting asset growth, restricting interest rates paid, requiring prior approval of capital distributions by any bank holding company that controls the institution, requiring divestiture by the institution of its subsidiaries or by the holding company of the institution itself, requiring new election of directors, and requiring the dismissal of directors and officers. The Company and the Bank presently maintain sufficient capital to remain in compliance with these capital requirements.

On March 13, 2009, the Company received an investment in the Company's preferred stock totaling \$13.9 million from the Company's participation in the Troubled Asset Relief Program (TARP) Capital Purchase Program (Capital Purchase Program) under the Emergency Economic Stabilization Act of 2008 (EESA).

Dividends

The Company is a legal entity separate and distinct from its banking and other subsidiaries. The majority of the Company's revenues are from dividends paid to the Company by the Bank. The Bank is subject to laws and regulations that limit the amount of dividends it can pay. In addition, both the Company and the Bank are subject to various regulatory restrictions relating to the payment of dividends, including requirements to maintain capital at or above regulatory minimums. Banking regulators have indicated that banking organizations should generally pay dividends only if the organization's net income available to common shareholders over the past year has been sufficient to fully fund the dividends and the prospective rate of earnings retention appears consistent with the organization's capital needs, asset quality and overall financial condition. During the year ended December 31, 2009, the Bank transferred \$2.6 million in dividends to the Company. As of December 31, 2009, the aggregate amount of unrestricted funds which could be transferred from the Bank to the Company, without prior regulatory approval, totaled \$4.0 million.

The FDIC has the general authority to limit the dividends paid by insured banks if the payment is deemed an unsafe and unsound practice. The FDIC has indicated that paying dividends that deplete a bank's capital base to an inadequate level would be an unsound and unsafe banking practice.

In connection with the Company's participation in the Capital Purchase Program established by the U.S. Department of the Treasury (the Treasury) under the EESA, the Company issued preferred stock to the Treasury on March 13, 2009. The Preferred Stock is in a superior ownership position compared to common stock. Dividends must be paid to the preferred stock holder before they can be paid to the common shareholders. In addition, prior to March 13, 2012, unless the Company has redeemed the Preferred Stock or the Treasury has transferred the Preferred Stock to a third party, the consent of the Treasury will be required for the Company to increase its common stock dividend or repurchase its common stock or other equity or capital securities, other than in certain circumstances specified in the Purchase Agreement. If the dividends on the Preferred Stock have not been paid for an aggregate of six (6) quarterly dividend periods or more, whether or not consecutive, the Company's authorized number of directors will be automatically increased by two (2) and the holders of the Preferred Stock will have the right to elect those directors at the Company's next annual meeting or at a special meeting called for that purpose; these two directors will be elected annually and will serve until all accrued and unpaid dividends for all past dividend periods have been declared and paid in full.

Deposit Insurance and Assessments

The deposits of the Bank are insured by the FDIC up to the limits set forth under applicable law. The deposits of the Bank are subject to the deposit insurance assessments of the Deposit Insurance Fund (DIF) of the FDIC. The DIF was formed March 31, 2006, upon the merger of the Bank Insurance Fund and the Savings Insurance Fund in accordance with the Federal Deposit Insurance Reform Act of 2005 (the Act). The Act established a range of 1.15% to 1.50% within which the FDIC board of directors may set the Designated Reserve Ratio (reserve ratio or DRR). The current target DRR is 1.25%. However, the Act has eliminated restrictions on premium rates based on the DRR and granted the FDIC Board the discretion to price deposit insurance according to risk for all insured institutions regardless of the level of the reserve ratio.

To maintain the DIF, member institutions are assessed an insurance premium based on their deposits and their institutional risk category. The FDIC determines an institution's risk category by combining its supervisory ratings with its financial ratios and other risk measures.

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

Recent depository institutional failures have resulted in a decline in the DIF reserve ratio to below 1.15%. Under the Act, in October 2008 the FDIC Board adopted a Restoration Plan to return the DIF to its statutorily mandated minimum reserve

Table of Contents

ratio of 1.15% within five years. In February 2009, given the extraordinary circumstances facing the banking industry, the Board amended its Restoration Plan to allow the Fund seven years to return to the ratio of 1.15%. In May 2009, Congress amended the statute governing establishment of the Plan to allow the FDIC up to eight years to return the DIF reserve ratio back to 1.15%, absent extraordinary circumstances.

In 2009, the FDIC undertook several measures in an effort to replenish the DIF. On February 27, 2009, the FDIC adopted a final rule modifying the risk-based assessment system and set new initial base assessment rates beginning April 1, 2009. Rates range from a minimum of 12 cents per \$100 of domestic deposits for well-managed, well-capitalized institutions with the highest credit ratings, to 45 cents per \$100 for those institutions posing the most risk to the DIF. Risk-based adjustments to the initial assessment rate may lower the rate to 7 cents per \$100 of domestic deposits for well-managed, well-capitalized banks with the highest credit ratings or raise the rate to 77.5 cents per \$100 for depository institutions posing the most risk to the DIF.

On May, 2009, the FDIC adopted a final rule imposing a 5 basis point special assessment on each insured depository institution's assets minus Tier 1 capital as of June 30, 2009. The amount of the special assessment for any institution was limited to 10 basis points times the institution's assessment base for the second quarter 2009. On September 29, 2009, the FDIC increased the annual assessment rates uniformly by 3 basis points beginning in 2011. On November 17, 2009, the FDIC amended its regulations to require insured institutions to prepay their estimated quarterly risk-based assessments for the fourth quarter of 2009, and for all of 2010, 2011 and 2012. For purposes of determining the prepayment, the FDIC used the institution's assessment rate in effect on September 30, 2009. The prepayment amount for the Bank was \$2.7 million.

On January 12, 2010, the FDIC issued an advance notice of proposed rulemaking seeking comment on ways the FDIC's risk-based assessment system could be changed to account for the risks posed by certain employee compensation programs. The FDIC is concerned with adjusting risk-based assessment rates to adequately compensate the DIF for risks inherent in the design of certain compensation programs. Any change to the risk-based assessment system would be intended to improve the way risk is differentiated among institutions rather than generate revenue for the DIF.

All FDIC-insured depository institutions must pay an annual assessment to provide funds for the payment of interest on bonds issued by the Financing Corporation, a federal corporation chartered under the authority of the Federal Housing Finance Board. The bonds, commonly referred to as FICO bonds, were issued to capitalize the Federal Savings and Loan Insurance Corporation. The FICO assessments rates are adjusted quarterly to reflect changes in the assessment bases of the FDIC's insurance funds and do not vary depending on a depository institution's capitalization or supervisory evaluations.

In 2009, under the FDIC's Temporary Liquidity Program, participating institutions paid a premium of 10 cents per \$100 to fully insure domestic noninterest-bearing transaction accounts. The assessment was paid on account balances in excess of the insurance limits. In December 2008, the Bank elected to participate in this program.

The FDIC may terminate a depository institution's deposit insurance upon a finding that the institution's financial condition is unsafe or unsound or that the institution has engaged in unsafe or unsound practices or has violated any applicable rule, regulation, order or condition enacted or imposed by the institution's regulatory agency.

FDIC Temporary Liquidity Guarantee Program

The Company participated in the FDIC's Temporary Liquidity Guarantee Program (TLGP). The TLGP had two components: the Debt Guarantee Program, which provided a temporary guarantee on newly issued senior unsecured debt issued by eligible entities; and the Transaction Account Guarantee Program (TAGP), which provided a temporary unlimited guarantee of funds in noninterest-bearing transaction accounts at FDIC-insured institutions. The fee assessment for deposit insurance coverage was 10 basis points per annum on amounts in covered accounts exceeding \$250,000.

The Debt Guarantee Program expired on October 31, 2009. In August 2009, the FDIC extended the TAGP through June 30, 2010. The Corporation elected to remain in the TAGP for the extended time period. As such, after December 31, 2009, the fee assessment for deposit insurance coverage was increased to 15 basis points per quarter on amounts in covered accounts exceeding \$250,000.

USA Patriot Act

The USA Patriot Act became effective on October 26, 2001 and provides for the facilitation of information sharing among governmental entities and financial institutions for the purpose of combating terrorism and money laundering. Among other provisions, the USA Patriot Act permits financial institutions, upon providing notice to the United States Treasury, to share information with one another in order to better identify and report to the federal government concerning activities that may involve money laundering or terrorism. The USA Patriot Act is considered a

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

significant banking law in terms of information disclosure regarding certain customer transactions. Although it does create a reporting obligation, the USA Patriot Act has not materially affected the Bank's products, services or other business activities.

Table of Contents***Safety and Soundness Standards***

The Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA), as amended by the Riegle Community Development and Regulatory Improvement Act of 1994, requires the federal bank regulatory agencies to prescribe standards, by regulations or guidelines, relating to internal controls, information systems and internal audit systems, loan documentation, credit underwriting, interest rate risk exposure, asset growth, asset quality, earnings, stock valuation and compensation, fees and benefits, and such other operational and managerial standards as the agencies deem appropriate. Guidelines adopted by the federal bank regulatory agencies establish general standards relating to internal controls and information systems, internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth and compensation, fees and benefits. In general, the guidelines require, among other things, appropriate systems and practices to identify and manage the risk and exposures specified in the guidelines. The guidelines prohibit excessive compensation as an unsafe and unsound practice and describe compensation as excessive when the amounts paid are unreasonable or disproportionate to the services performed by an executive officer, employee, director or principal stockholder. In addition, the agencies adopted regulations that authorize, but do not require, an agency to order an institution that has been given notice by an agency that it is not satisfying any of such safety and soundness standards to submit a compliance plan. If, after being so notified, an institution fails to submit an acceptable compliance plan or fails in any material respect to implement an acceptable compliance plan, the agency must issue an order directing action to correct the deficiency and may issue an order directing other actions of the types to which an undercapitalized institution is subject under the prompt corrective action provisions of FDIA. If an institution fails to comply with such an order, the agency may seek to enforce such order in judicial proceedings and to impose civil money penalties.

Community Reinvestment Act

Under the Community Reinvestment Act and related regulations, depository institutions have an affirmative obligation to assist in meeting the credit needs of their market areas, including low and moderate-income areas, consistent with safe and sound banking practice. The Community Reinvestment Act requires the adoption by each institution of a Community Reinvestment Act statement for each of its market areas describing the depository institution's efforts to assist in its community's credit needs. Depository institutions are periodically examined for compliance with the Community Reinvestment Act and are periodically assigned ratings in this regard. Banking regulators consider a depository institution's Community Reinvestment Act rating when reviewing applications to establish new branches, undertake new lines of business, and/or acquire part or all of another depository institution. An unsatisfactory rating can significantly delay or even prohibit regulatory approval of a proposed transaction by a bank holding company or its depository institution subsidiaries.

Privacy Legislation

Several regulations issued by federal banking agencies also provide protections against the transfer and use of customer information by financial institutions. A financial institution must provide to its customers information regarding its policies and procedures with respect to the handling of customers' personal information. Each institution must conduct an internal risk assessment of its ability to protect customer information. These privacy provisions generally prohibit a financial institution from providing a customer's personal financial information to unaffiliated parties without prior notice and approval from the customer.

Capital Purchase Program Regulations

As a result of the Company's participation in the TARP Capital Purchase Program (CPP), it is subject to certain provisions under EESA. On February 10, 2009, the Treasury announced the Financial Stability Plan under the EESA (the Financial Stability Plan) which is intended to further stabilize financial institutions and stimulate lending across a broad range of economic sectors. On February 18, 2009, President Obama signed the American Reinvestment and Recovery Act of 2009 (ARRA), a broad economic stimulus package that included additional restrictions on, and potential additional regulation of, financial institutions.

On June 10, 2009, under the authority granted to it under ARRA and EESA, the Treasury issued an interim final rule under Section 111 of EESA, as amended by ARRA, regarding compensation and corporate governance restrictions that would be imposed on CPP recipients, effective June 15, 2009. As a CPP recipient with currently outstanding CPP obligations, the Company is subject to the compensation and corporate governance restrictions and requirements set forth in the interim final rule, which, among other things: (1) prohibit us from paying or accruing bonuses, retention awards or incentive compensation, except for certain long-term stock awards, to the Company's most highly compensated employee; (2) prohibit us from making severance payments to any of the senior executive officers or next five most highly compensated employees; (3) require the Company to conduct semi-annual risk assessments to assure that compensation arrangements do not encourage unnecessary and excessive risks or the manipulation of earnings to increase compensation; (4) require the Company to recoup or clawback any bonus, retention award or incentive compensation paid by the Company to a senior executive officer or any of the next 20 most highly compensated employees, if the payment was based on financial statements or other performance criteria that are later found to be materially inaccurate; (5) prohibit the Company from providing tax gross-ups to any of the senior executive officers or next 20 most highly compensated employees; (6) require the Company to provide enhanced disclosure of perquisites, and the use and role of compensation

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

consultants; (7) require the Company to adopt a corporate policy on luxury and excessive expenditures; (8) require the chief executive officer and

Table of Contents

chief financial officer to provide periodic certifications about compensation practices and compliance with the interim final rule; (9) require the Company to provide enhanced disclosure of the relationship between the Company's compensation plans and the risk posed by those plans; and (10) require the Company to provide an annual non-binding shareholder vote, or "say-on-pay" proposal, to approve the compensation of our executives, consistent with regulations promulgated by the Securities and Exchange Commission (SEC). On January 12, 2010, the SEC adopted final regulations setting forth the parameters for such say-on-pay proposals for public company CPP participants.

Under EESA, Congress has the ability to impose "after-the-fact" terms and conditions on participants in Treasury's TARP Capital Purchase Program. As a participant in the TARP Capital Purchase Program, the Company is subject to any such retroactive legislation. Additional regulations applicable to CPP recipients adopted as part of EESA, the Financial Stability Plan, ARRA, or other legislation may subject the Company to additional regulatory requirements. The impact of these additional requirements may put us at competitive disadvantage in comparison to financial institutions that have either repaid all CPP funds or never accepted CPP funds and may materially adversely affect our business and results of operations.

Evolving Legislation and Regulatory Action

In 2009, many emergency government programs enacted in 2008 in response to the financial crisis and the recession slowed or wound down, and global regulatory and legislative focus has generally moved to a second phase of broader regulatory reform and a restructuring of the entire financial regulatory system. Legislators and regulators in the United States are currently considering a wide range of proposals that, if enacted, could result in major changes to the way banking operations are regulated. Some of these major changes may take effect as early as 2010, and could materially impact the profitability of our business, the value of assets we hold or the collateral available for our loans, require changes to business practices and expose us to additional costs, taxes, liabilities, enforcement actions and reputational risk.

Item 1A. Risk Factors

An investment in the Company's common stock involves significant risks, including the following risks and uncertainties. These risk factors should be read carefully and considered before deciding to invest in the Company's common stock. These risk factors may adversely affect the Company's financial condition and future earnings. In that event, the trading price of the Company's common stock could decline and you could lose a part or all of your investment. This section should be read together with the other information, including the consolidated financial statements and related notes to the consolidated financial statements included in Item 8 of this Form 10-K.

The Company may be further adversely affected by economic conditions in its market area.

The Company is headquartered in the northern Shenandoah Valley region of Virginia. Because lending is concentrated in this market, the Company is affected by the general economic conditions in the region. Changes in the economy may influence the growth rate of loans and deposits, the quality of the loan portfolio and loan and deposit pricing. A continued decline in general economic conditions caused by inflation, recession, unemployment or other factors beyond the Company's control would further impact these local economic conditions and the demand for banking products and services generally, which could negatively affect the Company's performance and financial condition.

Deteriorating credit quality, particularly in real estate loans, has adversely impacted the Company and may continue to adversely impact the Company.

During 2008 the Company began to experience a downturn in the overall credit performance of the loan portfolio, as well as acceleration in the deterioration of general economic conditions. This deterioration, including a significant increase in national and regional unemployment levels, is negatively impacting some borrower's ability to repay. During the year ended December 31, 2008, these conditions resulted in a \$15.4 million increase in nonperforming assets and loans over 90 days past due. During the year ended December 31, 2009, nonperforming assets and loans over 90 days past due decreased \$2.9 million. The allowance for loan losses increased \$1.4 million to \$7.1 million at December 31, 2009, compared to \$5.7 million at December 31, 2008. The allowance increased \$1.5 million during the year ended December 31, 2008. Additional increases in loan loss reserves may be necessary in the future. Continued deterioration in the quality of the loan portfolio can have a material adverse effect on earnings, liquidity and capital.

If the Bank's allowance for loan losses becomes inadequate, results of operations may be adversely affected.

The Bank maintains an allowance for loan losses that it believes is a reasonable estimate of known and inherent losses in the loan portfolio. Through a quarterly review of the loan portfolio, management determines the amount of the allowance for loan losses by considering economic conditions, credit quality of the loan portfolio, collateral supporting the loans, performance of customers relative to their financial obligations

and the quality of the Bank's loan administration. The amount of future losses is susceptible to changes in economic, operating and other conditions, including changes in interest rates that may be beyond the Bank's control, and these losses may exceed current estimates. Although the Company

Table of Contents

believes the allowance for loan losses is a reasonable estimate of known and inherent losses in the loan portfolio, such losses and the adequacy of the allowance for loan losses cannot be fully predicted. Excessive loan losses could have a material impact on financial performance. Earnings may also be negatively impacted by loan growth, which requires additions to the allowance for loan losses.

Federal and state regulators periodically review the allowance for loan losses and may require an increase to the provision for loan losses or recognition of further loan charge-offs, based on judgments different than those of management. Any increase in the amount of provision or loans charged-off as required by these regulatory agencies could have a negative effect on operating results.

The Bank's concentrations of loans could result in higher than normal risk of loan defaults and losses.

The Bank offers a variety of secured loans, including commercial lines of credit, commercial term loans, real estate, construction, home equity, consumer and other loans. The majority of the loans are secured by real estate (both residential and commercial) in the market area. At December 31, 2009, these loans totaled \$375.0 million, or 85%, of total loans. The Bank has a concentration of credit risk within the loan portfolio involving loans secured by hotels. This concentration totaled \$42.9 million at December 31, 2009, representing 78% of total equity and 10% of total loans. A major change in the real estate market, such as further deterioration in the value of this collateral, or in the local or national economy, could adversely affect customers' ability to pay these loans, which in turn could impact the Bank. Risk of loan defaults and foreclosures are unavoidable in the banking industry, and the Bank tries to limit exposure to this risk by monitoring extensions of credit carefully. The Bank cannot fully eliminate credit risk, and as a result credit losses may occur in the future.

If the Bank's valuation allowance on other real estate owned becomes inadequate, results of operations may be adversely affected.

The Bank maintains a valuation allowance that it believes is a reasonable estimate of known losses in other real estate owned (OREO). The Bank obtains appraisals on all OREO properties on an annual basis and adjusts the valuation allowance accordingly. The carrying value of OREO is susceptible to changes in economic and real estate market conditions. Although the Company believes the valuation allowance is a reasonable estimate of known losses, such losses and the adequacy of the allowance cannot be fully predicted. Excessive declines in market values could have a material impact on financial performance.

Regulation by federal and state agencies could adversely affect the profitability of the business.

The Company is heavily regulated by federal and state agencies. This regulation is to protect depositors, the federal deposit insurance fund and the banking system as a whole. Congress and state legislatures and federal and state regulatory agencies continually review banking laws, regulations, and policies for possible changes. Changes to statutes, regulations, or regulatory policies, including interpretation or implementation of statutes, regulations, or policies, could affect the Company adversely, including limiting the types of financial services and products it may offer and/or increasing the ability of non-banks to offer competing financial services and products. If the Company does not comply with laws, regulations, or policies, it could receive regulatory sanctions and damage to its reputation.

Regulation of the financial services industry is undergoing major changes, and future legislation could increase our cost of doing business or harm our competitive position.

In 2009, many emergency government programs enacted in 2008 in response to the financial crisis and the recession slowed or wound down, and global regulatory and legislative focus has generally moved to a second phase of broader reform and a restructuring of financial institution regulation. Legislators and regulators in the United States are currently considering a wide range of proposals that, if enacted, could result in major changes to the way banking operations are regulated. Some of these major changes may take effect as early as 2010, and could materially impact the profitability of our business, the value of assets we hold or the collateral available for our loans, require changes to business practices or force us to discontinue businesses and expose us to additional costs, taxes, liabilities, enforcement actions and reputational risk.

Certain reform proposals under consideration could result in our becoming subject to stricter capital requirements and leverage limits, and could also affect the scope, coverage, or calculation of capital, all of which could require us to reduce business levels or to raise capital, including in ways that may adversely impact our shareholders or creditors. In addition, we anticipate the enactment of certain reform proposals under consideration that would introduce stricter substantive standards, oversight and enforcement of rules governing consumer financial products and services, with particular emphasis on retail extensions of credit and other consumer-directed financial products or services. We cannot predict whether new legislation will be enacted and, if enacted, the effect that it, or any regulations, would have on our business, financial condition, or results of operations.

Table of Contents

Increases in FDIC insurance premiums have adversely impacted the Company and may continue to adversely affect the Company's profitability.

During 2008 and continuing in 2009, higher levels of bank failures have dramatically increased costs of the FDIC and depleted the deposit insurance fund. In addition, the FDIC instituted two temporary programs to further insure customer deposits at FDIC insured banks: deposit accounts are now insured up to \$250,000 per customer (up from \$100,000) and noninterest-bearing transactional accounts are currently fully insured (unlimited coverage). These programs have placed additional stress on the deposit insurance fund. In order to maintain a strong funding position and restore reserve ratios of the deposit insurance fund, the FDIC has increased assessment rates of insured institutions. In addition, on November 12, 2009, the FDIC adopted a rule requiring banks to prepay three years of estimated deposit insurance premiums by December 31, 2009. The Company is generally unable to control the amount of premiums that the Company is required to pay for FDIC insurance. If there are additional bank or financial institution failures, or the cost of resolving prior failures exceeds expectations, the Company may be required to pay even higher FDIC premiums than the recently increased levels. Any future increases or required prepayments of FDIC insurance premiums may adversely impact the Company's earnings and financial condition.

Table of Contents

The Company may not pay dividends on common shares.

Holders of the Company's common shares are only entitled to receive such dividends as the Board of Directors may declare out of funds legally available for such payments. Although the Company has historically declared cash dividends on common shares, it is not required to do so and may reduce or eliminate common share dividends in the future. This could adversely affect the market price of the Company's common shares. Also, the Company's ability to increase its dividend or to make other distributions is restricted due to participation in the Capital Purchase Program, which limits (without the consent of the Treasury) its ability to increase its dividend or to repurchase common shares for so long as any securities issued under such program remain outstanding.

Difficult market conditions have adversely affected the Company's industry.

Dramatic declines in the housing market over the past three years, with falling home prices and increasing foreclosures and unemployment, have negatively impacted the credit performance of real estate related loans and resulted in significant write-downs of asset values by financial institutions. These write-downs, initially of mortgage-backed securities (MBS) but spreading to other securities and loans have caused many financial institutions to seek additional capital, to reduce or eliminate dividends, to merge with larger and stronger institutions and, in some cases, to fail. Reflecting concern about the stability of the financial markets generally and the strength of counterparties, many lenders and institutional investors have reduced or ceased providing funding to borrowers, including to other financial institutions. This market turmoil and tightening of credit have led to an increased level of commercial and consumer delinquencies, lack of consumer confidence, increased market volatility and widespread reduction of business activity generally. The resulting economic pressure on consumers and lack of confidence in the financial markets has adversely affected the Company's business, financial condition and results of operations. Market developments may affect consumer confidence levels and may cause adverse changes in payment patterns, causing increases in delinquencies and default rates, which may impact charge-offs and the provision for loan losses. A worsening of these conditions would likely have an adverse effect on the Company and others in the financial services industry.

The Company relies on secondary sources, such as Federal Home Loan Bank advances, sales of securities and loans, federal funds lines of credit from correspondent banks and out-of-market time deposits, to meet liquidity needs.

In managing the Company's consolidated balance sheet, the Company depends on secondary sources to provide sufficient liquidity to meet our commitments and business needs, and to accommodate the transaction and cash management needs of our clients. Other sources of funding available to us, and upon which we rely as regular components of our liquidity risk management strategy, include federal funds lines of credit, sales of securities and loans, brokered deposits and borrowings from the Federal Home Loan Bank system. Any occurrence that may limit our access to these sources, such as a decline in the confidence of debt purchasers, or our depositors or counterparties, may adversely affect the Company's liquidity.

If the Company needs additional capital in the future, it may not be able to obtain it on terms that are favorable. This could negatively affect the Company's performance and the value of its common stock.

The Company anticipates that it will have sufficient capital to support asset growth and potential loan charge-offs. However, additional capital may be needed in the future to maintain capital levels. The ability to raise capital through the sale of additional securities will depend primarily upon the Company's financial condition and the condition of financial markets at that time. The Company may not be able to obtain additional capital in amounts or on terms that are satisfactory. The Company's ability to grow its balance sheet may be constrained if it is unable to raise additional capital as needed.

The Company may incur losses if unable to successfully manage interest rate risk.

The Company's profitability will depend substantially upon the spread between the interest rates earned on investments and loans and interest rates paid on deposits and other interest-bearing liabilities. Changes in interest rates, including the shape of the treasury yield curve, will affect the Company's financial performance and condition through the pricing of securities, loans, deposits and borrowings. The Company attempts to minimize exposure to interest rate risk, but will be unable to eliminate it. Our net interest spread will depend on many factors that are partly or entirely outside of the Company's control, including competition, federal economic, monetary and fiscal policies and general economic conditions.

There is a limited trading market for the Company's common stock; it may be difficult to sell shares after they have been purchased.

Shares of the Company's common stock are traded on the over-the-counter (OTC) market and quoted in the OTC Bulletin Board under the symbol FXNC. The volume of trading activity in the stock is relatively limited. Even if a more active market develops, there can be no assurance

that such market will continue, or that shares will be able to be sold at or above the investment price. The lack of liquidity of the investment in the common shares should be carefully considered when making an investment decision.

Table of Contents

The soundness of other financial institutions could adversely affect the Company.

The Company's ability to engage in routine funding transactions could be adversely affected by the actions and commercial soundness of other financial institutions. Financial services institutions are interrelated as a result of trading, clearing, counterparty, or other relationships. As a result, defaults by, or even rumors or questions about, one or more financial services institutions, or the financial services industry generally, have led to market-wide liquidity problems and could lead to losses or defaults by the Company or by other institutions. Many of these transactions expose the Company to credit risk in the event of default of its counterparty or client. There is no assurance that any such losses would not materially and adversely affect the Company's results of operations.

The Company relies heavily on its management team and the unexpected loss of any of those personnel could adversely affect operations; the Company depends on the ability to attract and retain key personnel.

The Company's future operating results depend substantially upon the continued service of its executive officers and key personnel. The Company's future operating results also depend in significant part upon its ability to attract and retain qualified management, financial, technical, marketing, sales and support personnel. Competition for qualified personnel is intense, and the Company cannot ensure success in attracting or retaining qualified personnel. There may be only a limited number of persons with the requisite skills to serve in these positions, and it may be increasingly difficult for the Company to hire personnel over time.

Our ability to retain key officers and employees may be further impacted by legislation and regulation affecting the financial services industry. For example, Section 7001 of the ARRA amended Section 111 of the EESA in its entirety, significantly expanded the executive compensation restrictions. These restrictions apply to the Company as a participant in the Capital Purchase Program and shall generally continue to apply for as long as any Senior Preferred shares are outstanding. Such restrictions and standards may further impact management's ability to compete with financial institutions that are not subject to the same limitations as the Company under Section 7001 of the ARRA.

Future success is dependent on the ability to compete effectively in the highly competitive banking industry.

The Company faces vigorous competition from other financial institutions, including other commercial banks, savings and loan associations, savings banks, finance companies and credit unions for deposits, loans and other financial services in its market area. A number of these other financial institutions are significantly larger than the Company and have substantially greater access to capital and other resources, as well as larger lending limits and branch systems, and offer a wider array of banking services. To a limited extent the Company also competes with other providers of financial services, such as money market mutual funds, brokerage firms, insurance companies and governmental organizations which may offer more favorable products and services than the Company. Many of the non-bank competitors are not subject to the same extensive regulations that govern the Company. As a result, the non-bank competitors have advantages over the Company in providing certain services. This competition may reduce or limit profit margins and market share and may adversely affect the results of operations and financial condition.

Changes in the Company's accounting policies or in accounting standards could materially affect how it reports financial results and condition.

From time to time, the Financial Accounting Standards Board (FASB) and SEC change the financial accounting and reporting standards that govern the preparation of our financial statements. These changes can be hard to predict and can materially impact how the Company records and reports its financial condition and results of operations. In some cases, the Company could be required to apply a new or revised standard retroactively, resulting in restating prior period financial statements.

Negative public opinion could damage our reputation and adversely impact business and revenues.

As a financial institution, the Company's earnings, liquidity, and capital are subject to risks associated with negative public opinion of the Company and of the financial services industry as a whole. Negative public opinion could result from our actual or alleged conduct in any number of activities, including lending practices, the failure of any product or service sold by us to meet our clients' expectations or applicable regulatory requirements, corporate governance and acquisitions, or from actions taken by government regulators and community organizations in response to those activities. Negative public opinion can adversely affect our ability to keep, attract and/or retain clients and can expose us to litigation and regulatory action. Actual or alleged conduct by one of our businesses can result in negative public opinion about our other businesses. Negative public opinion could also affect our ability to borrow funds in the unsecured wholesale debt markets.

Table of Contents

As a result of the Company's participation in the Capital Purchase Program (CPP), we may become subject to additional regulation, and we cannot predict the cost or effects of compliance at this time.

In connection with our participation in the CPP administered under the TARP, we may face additional regulations and/or reporting requirements, including, but not limited to, the following:

Congress has the ability to impose after-the-fact terms and conditions on participants in the CPP. As a participant in the CPP, we would be subject to any such retroactive legislation. We cannot predict whether or in what form any proposed regulation or statute will be adopted or the extent to which our business may be affected by any new regulation or statute.

Participation in the CPP will limit our ability to increase the dividend on our common stock above \$0.14 per share, or to repurchase, our common stock without the consent of the Treasury until the earlier of March 13, 2012 or until the Preferred Stock has been redeemed in whole.

Table of Contents**Item 2. Properties**

The following describes the location and general character of the principal offices of the Company.

The Company owns the headquarters building located at 112 West King Street, in Strasburg, Virginia. This location also serves as the Bank's Strasburg Financial Center, which primarily serves the banking needs of northern Shenandoah County customers. This three story building also houses administrative employees, including human resources and marketing. Loan and deposit operations, data processing and information technology employees are housed in the Operations Center. Financial accounting is housed in the Winchester Financial Center. Financial centers provide full service banking, including loan, deposit, trust and investment advisory services, while the bank branches primarily focus on depository and consumer lending functions. The following table provides the name, location, year opened and type of the Company's locations:

Name	Location	Year Opened	Type	Owned/Leased
Strasburg Financial Center	112 West King Street Strasburg, Virginia	1927	Financial Center	Owned
Front Royal Express	508 North Commerce Avenue Front Royal, Virginia	1985	Branch	Leased

4 th quarter	20.00	14.75	0.14

Dividend Policy

The Company's future dividend policy is subject to the discretion of its Board of Directors and will depend upon a number of factors, including future earnings, financial condition, liquidity and capital requirements of both the Company and the Bank, applicable governmental regulations and policies and other factors deemed relevant by its Board of Directors.

The Company is organized under the Virginia Stock Corporation Act, which prohibits the payment of a dividend if, after giving it effect, the corporation would not be able to pay its debts as they become due in the usual course of business. The payment of a dividend is also prohibited if the corporation's total assets would be less than the sum of its total liabilities plus the amount that would be needed, if the corporation were to be dissolved, to satisfy the preferential rights upon dissolution of any preferred shareholders.

The Company is a legal entity separate and distinct from its subsidiaries. Its ability to distribute cash dividends will depend primarily on the ability of the Bank to pay dividends to it, and the Bank is subject to laws and regulations that limit the amount of dividends that it can pay. As a state member bank, the Bank is subject to certain restrictions imposed by the reserve and capital requirements of federal and Virginia banking statutes and regulations. Under Virginia law, a bank may not declare a dividend in excess of its undivided profits. Additionally, under Federal Reserve regulations, the Bank may not declare a dividend if the total amount of all dividends, including the proposed dividend, declared by it in any calendar year exceeds the total of its retained net income of that year to date, combined with its retained net income of the two preceding years, unless the dividend is approved by the Federal Reserve. The Federal Reserve and the Commonwealth of Virginia have the general authority to limit the dividends paid by insured banks if the payment is deemed an unsafe and unsound practice. Both the Commonwealth of

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

Virginia and the Federal Reserve have indicated that paying dividends that deplete a bank's capital base to an inadequate level would be an unsound and unsafe banking practice. Under the Federal Reserve's regulations, the Bank may not declare or pay any dividend in excess of its net income for the current year plus any retained net income from the prior two calendar years.

The Company is subject to certain regulatory requirements to maintain capital at or above regulatory minimums. These regulatory requirements regarding capital affect its dividend policies. The Federal Reserve has indicated that a bank holding company should generally pay dividends only if its net income available to common shareholders over the past year has been sufficient to fully fund the dividends, and the prospective rate of earnings retention appears consistent with the organization's capital needs, asset quality and overall financial condition.

Table of Contents

In connection with its participation in the Capital Purchase Program established by the Treasury under the EESA, the Company issued preferred stock to the Treasury on March 13, 2009. The Preferred Stock is in a superior ownership position compared to common stock. Dividends must be paid to the preferred stock holder before they can be paid to the common shareholders. In addition, prior to March 13, 2012, unless the Company has redeemed the Preferred Stock or the Treasury has transferred the Preferred Stock to a third party, the consent of the Treasury will be required for the Company to increase its common stock dividend or repurchase its common stock or other equity or capital securities, other than in certain circumstances specified in the Purchase Agreement. If the dividends on the Preferred Stock have not been paid for an aggregate of six (6) quarterly dividend periods or more, whether or not consecutive, the Company's authorized number of directors will be automatically increased by two (2) and the holders of the Preferred Stock will have the right to elect those directors at the Company's next annual meeting or at a special meeting called for that purpose; these two directors will be elected annually and will serve until all accrued and unpaid dividends for all past dividend periods have been declared and paid in full.

Stock Repurchases

The Company did not repurchase any shares of its common stock during the fourth quarter of 2009.

Stock Performance Graph

The following graph compares the cumulative total return to the shareholders of the Company for the last five fiscal years with the total return on the S&P 500, NASDAQ-Total U.S. and the SNL Bank Index \$500M-\$1B, assuming an investment of \$100 in shares of Common Stock on December 31, 2004, and the reinvestment of dividends.

- (1) The efficiency ratio is computed by dividing noninterest expense excluding the provision for other real estate owned by the sum of net interest income on a tax equivalent basis and non-interest income excluding securities and premises and equipment gains and losses. This is a non-GAAP financial measure that the Company believes provides investors with important information regarding operational efficiency. Such information is not prepared in accordance with U.S. generally accepted accounting principles (GAAP) and should not be construed as such. Noninterest expense excluding the provision for other real estate owned was \$17,709, \$16,014, \$15,286, \$13,783 and \$11,834 for 2009, 2008, 2007, 2006 and 2005, respectively. Net interest income on a tax equivalent basis was \$18,668, \$18,442, \$18,391, \$17,824 and \$16,529 for 2009, 2008, 2007, 2006 and 2005, respectively. Non-interest income excluding securities and premises and equipment gains and losses was \$5,558, \$6,055, \$5,812, \$5,167 and \$4,521 for 2009, 2008, 2007, 2006 and 2005, respectively. Management believes such financial information is meaningful to the reader in understanding operating performance, but cautions that such information not be viewed as a substitute for GAAP. The Company, in referring to its net income, is referring to income under

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

generally accepted accounting principles, or GAAP. See Non-GAAP Financial Measures included in Item 7 of this Form 10-K.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation

The following discussion and analysis of the financial condition and results of operations of the Company for the years ended December 31, 2009, 2008 and 2007 should be read in conjunction with the consolidated financial statements and related notes to the consolidated financial statements included in Item 8 of this Form 10-K.

Executive Overview

The Company

First National Corporation (the Company) is the financial holding company of:

First Bank (the Bank). The Bank owns:

First Bank Financial Services, Inc.

Shen-Valley Land Holdings, LLC

First National (VA) Statutory Trust I (Trust I)

First National (VA) Statutory Trust II (Trust II)

First National (VA) Statutory Trust III (Trust III)

First Bank Financial Services, Inc. invests in partnerships that provide title insurance and investment services. Shen-Valley Land Holdings, LLC was formed to hold other real estate owned and future office sites. The Trusts were formed for the purpose of issuing redeemable capital securities, commonly known as trust preferred securities.

Products, Services, Customers and Locations

The Bank offers loan, deposit, trust and investment products and services through 12 offices, 31 ATMs and its website, www.therespowerinone.com, for both individuals and businesses. Customers include individuals, small and medium-sized businesses, governmental entities and non-profit organizations in the northern Shenandoah Valley region of Virginia.

Revenue Sources and Expense Factors

The primary source of revenue is from net interest income earned by the Bank. Net interest income is the difference between interest income and interest expense and typically represents between 75% to 80% of the Company's total revenue. Interest income is determined by the amount of interest-earning assets outstanding during the period and the interest rates earned on those assets. The Bank's interest expense is a function of the amount of interest-bearing liabilities outstanding during the period and the interest rates paid. In addition to net interest income, noninterest income is the other source of revenue for the Company. Noninterest income is derived primarily from service charges on loans and deposits and fees earned from other services. The Bank generates fee income from other services that include trust and investment advisory services and through the origination and sale of residential mortgages.

The provision for loan losses and noninterest expense are the two major expense categories. The provision is determined by factors that include loan growth, asset quality, net charge-offs and economic conditions. Changing economic conditions caused by inflation, recession, unemployment or other factors beyond the Company's control have a direct correlation with asset quality, net charge-offs and ultimately the required provision for loan losses. The largest component of noninterest expense for the year ended December 31, 2009 is salaries and employee benefits, comprising 46% of noninterest expenses, followed by occupancy and equipment expense, comprising 15% of expenses.

Financial Performance

Net income was \$2.1 million lower than the previous year:

Net interest income was \$210 thousand higher

Provision for loan losses was \$306 thousand higher

Noninterest income was \$374 thousand lower

Noninterest expense was \$2.7 million higher

For the year ended December 31, 2009, net income was \$2.1 million, a decrease of \$2.1 million or 50% compared to \$4.2 million in 2008. After the effective dividend on preferred stock, net income available to common shareholders was \$1.4 million, or \$0.49 per basic and diluted share, compared to \$4.2 million, or \$1.45 per basic and diluted share, for the same period in 2008. Return on assets was 0.39% for the year ended December 31, 2009 compared to 0.78% for the same period in 2008, and return on equity was 4.27% for the year ended December 31, 2009 compared to 10.65% for the same period in 2008.

Net interest income increased slightly to \$18.3 million for the year ended December 31, 2009 compared to \$18.1 million for the same period in 2008. The net interest margin was 1 basis point lower while average interest-earning assets were \$8.0 million higher when comparing the two periods. The net interest margin was 3.62% for the year ended December 31, 2009, compared to 3.63% for the same period in 2008.

Table of Contents

Noninterest income decreased 6% to \$5.6 million for the year ended December 31, 2009 from \$6.0 million for the same period in 2008. This decrease was attributable to less overdraft and trust and investment advisory fee income.

Noninterest expense increased 17% to \$18.7 million for the year ended December 31, 2009, compared to \$16.0 million for the same period in 2008. The increase in noninterest expense was primarily the result of expenses related to other real estate owned and higher FDIC assessments. The provision for other real estate owned totaled \$994 thousand for the year ended December 31, 2009 compared to no provision in 2008. FDIC assessment totaled \$973 thousand for the year ended December 31, 2009 compared to \$253 thousand in 2008.

The provision for loan losses increased to \$2.3 million in 2009 compared to \$2.0 million in 2008. This increase resulted from higher specific reserves on impaired loans, higher net charge-offs, less favorable economic conditions and lower collateral values during 2009 when compared to 2008.

Management Outlook

The Company expects stable net interest income and low expense growth over the next twelve months. The net interest margin is projected to continue performing near fourth quarter 2009 levels while earning asset growth is expected to remain low. Economic conditions are anticipated to make deposit gathering and earning asset growth challenging. Low noninterest expense growth has been forecast as the Company continues efforts to control expenses to improve profitability.

Noninterest income, the provision for loan losses and the provision for other real estate owned are less predictable for future periods. The impact on noninterest income from recent overdraft protection legislation has been difficult to measure, resulting in uncertain levels of noninterest income during periods beginning in the second half of 2010. Although management is developing strategies to mitigate earnings risk related to the legislation, the Company is planning for slightly lower noninterest income in 2010 compared to 2009.

The amount of provision for loan losses and provision for other real estate owned for future periods remains difficult to accurately forecast as the expense will be heavily influenced by economic conditions and local real estate activity.

Non-GAAP Financial Measures

This report refers to the efficiency ratio, which is computed by dividing noninterest expense by the sum of net interest income on a tax-equivalent basis and noninterest income excluding securities gains and losses. This is a non-GAAP financial measure that the Company believes provides investors with important information regarding operational efficiency. Such information is not prepared in accordance with U.S. generally accepted accounting principles (GAAP) and should not be construed as such. Management believes, however, such financial information is meaningful to the reader in understanding operating performance, but cautions that such information not be viewed as a substitute for GAAP. The Company, in referring to its net income, is referring to income under GAAP. The components of the efficiency ratio calculation are summarized in the table below.

	Efficiency Ratio (in thousands)	
	2009	2008
Noninterest expense	\$ 18,703	\$ 16,014
Less: provision for other real estate owned	994	
	\$ 17,709	\$ 16,014
Tax-equivalent net interest income	\$ 18,668	\$ 18,442
Noninterest income	5,577	5,951
Less: securities gains	10	2
Less: premises and equipment gains (losses)	9	(106)
	\$ 24,226	\$ 24,497

Efficiency ratio	73.10%	65.37%
------------------	--------	--------

Table of Contents

This report also refers to net interest margin, which is calculated by dividing tax equivalent net interest income by total average earning assets. Because a portion of interest income earned by the Company is nontaxable, the tax equivalent net interest income is considered in the calculation of this ratio. Tax equivalent net interest income is calculated by adding the tax benefit realized from interest income that is nontaxable to total interest income then subtracting total interest expense. The tax rate utilized in calculating the tax benefit for each of 2009 and 2008 is 34%. The reconciliation of tax equivalent net interest income, which is not a measurement under GAAP, to net interest income, is reflected in the table below.

	Reconciliation of Net Interest Income to Tax-Equivalent Net Interest Income (in thousands)	
	2009	2008
GAAP measures:		
Interest income loans	\$ 24,691	\$ 28,136
Interest income investments and other	2,723	2,777
Interest expense deposits	7,753	10,299
Interest expense other borrowings	824	1,740
Interest expense other	507	754
Total net interest income	\$ 18,330	\$ 18,120
Non-GAAP measures:		
Tax benefit realized on non-taxable interest income loans	\$ 41	\$ 43
Tax benefit realized on non-taxable interest income municipal securities	297	279
Total tax benefit realized on non-taxable interest income	\$ 338	\$ 322
Total tax-equivalent net interest income	\$ 18,668	\$ 18,442

Critical Accounting Policies*General*

The Company's consolidated financial statements and related notes are prepared in accordance with GAAP. The financial information contained within the statements is, to a significant extent, financial information that is based on measures of the financial effects of transactions and events that have already occurred. A variety of factors could affect the ultimate value that is obtained either when earning income, recognizing an expense, recovering an asset or relieving a liability. The Bank uses historical loss factors as one factor in determining the inherent loss that may be present in the loan portfolio. Actual losses could differ significantly from the historical factors used. In addition, GAAP itself may change from one previously acceptable method to another. Although the economics of transactions would be the same, the timing of events that would impact transactions could change. For further information about the Bank's loans and the allowance for loan losses, see Notes 3 and 4 to the consolidated financial statements, included in Item 8 of this Form 10-K.

Presented below is a discussion of those accounting policies that management believes are the most important (Critical Accounting Policies) to the portrayal and understanding of the Bank's financial condition and results of operations. The Critical Accounting Policies require management's most difficult, subjective and complex judgments about matters that are inherently uncertain. In the event that different assumptions or conditions were to prevail, and depending upon the severity of such changes, the possibility of materially different financial condition or results of operations is a reasonable likelihood.

Allowance for Loan Losses

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectability of a loan balance is confirmed. Subsequent

recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a quarterly basis by management and is based upon management's periodic review of the collectability of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

The allowance consists of specific and general components. The specific component relates to loans that are classified as doubtful, substandard or special mention. For such loans that are also classified as impaired, an allowance is established

Table of Contents

when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers non-classified loans and is based on historical loss experience adjusted for qualitative factors.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value (net of selling costs), and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral, net of selling costs, if the loan repayment is collateral dependent. The Company does not separately identify individual consumer and residential loans for impairment disclosures.

Lending Policies

General

The principal risk associated with each of the categories of loans in the Bank's portfolio is the creditworthiness of its borrowers. Within each category, such risk is increased or decreased, depending on prevailing economic conditions. The risk associated with real estate mortgage loans, commercial and consumer loans varies, based on economic conditions, fluctuations in the value of real estate and other conditions that affect the ability of borrowers to repay indebtedness. The risk associated with real estate construction loans varies, based on the supply and demand for the type of real estate under construction.

In an effort to manage the risk, the Bank's loan policy gives loan amount approval limits to individual loan officers based on their position within the Bank and level of experience. The Bank's Board of Directors and its Loan Committee approves all loan relationships greater than \$1.5 million. The President and CEO and the Executive Vice President Loan Administration can combine their lending limits to approve loan relationships up to \$1.5 million. All loan relationships greater than \$750 thousand are reported to the Board or its Loan Committee. The Loan Committee consists of five non-management directors and the President and CEO. The Committee approves the Bank's Loan Policy and reviews loans that have been charged-off. It also reviews the allowance for loan loss adequacy calculation as well as the loan watch list and other management reports. The Committee meets on a monthly basis and the Chairman of the Committee then reports to the Board of Directors.

Residential loan originations are primarily generated by Bank loan officer solicitations, referrals by real estate professionals and customers. Commercial real estate loan originations are obtained through broker referrals, direct solicitation of developers and continued business from customers. All completed loan applications are reviewed by the Bank's loan officers. As part of the application process, information is obtained concerning the income, financial condition, employment and credit history of the applicant. If commercial real estate is involved, information is also obtained concerning cash flow available for debt service. Loan quality is analyzed based on the Bank's experience and credit underwriting guidelines as well as the guidelines issued by the purchasers of loans, depending on the type of loan involved. Real estate collateral is appraised by independent fee appraisers who have been pre-approved by the Board Loan Committee.

In the normal course of business, the Bank makes various commitments and incurs certain contingent liabilities which are disclosed but not reflected in its financial statements, including commitments to extend credit. At December 31, 2009, commitments to extend credit, stand-by letters of credit and rate lock commitments totaled \$52.2 million.

Commercial Business Lending

Commercial business loans generally have a higher degree of risk than loans secured by real estate, but typically have higher yields. Commercial business loans typically are made on the basis of the borrower's ability to make repayment from cash flow from its business and are secured by business assets, such as accounts receivable, equipment and inventory. As a result, the availability of funds for the repayment of commercial business loans is substantially dependent on the success of the business itself. Furthermore, the collateral for commercial business loans may depreciate over time and generally cannot be appraised with as much precision as residential real estate. To manage these risks, the Bank generally obtains appropriate collateral and personal guarantees from the borrower's principal owners and monitors the financial condition of its business borrowers. At December 31, 2009, commercial loans not secured by real estate totaled \$48.7 million, or 11% of the total loan portfolio, as compared to \$53.2 million, or 12% at December 31, 2008.

Table of Contents*Commercial Real Estate Lending*

Commercial real estate loans are secured by various types of commercial real estate typically in the Bank's market area, including multi-family residential buildings, commercial buildings and offices, hotels, small shopping centers, farms and churches. At December 31, 2009, commercial real estate loans aggregated \$201.3 million, or 45% of the Bank's gross loans, as compared to \$197.9 million, or 44% at December 31, 2008. In its underwriting of commercial real estate, the Bank may lend, under federal regulation, up to 85% of the secured property's appraised value, although the Bank's loan to original appraised value ratio on such properties is typically 80% or less. The valuation of commercial collateral is provided by independent fee appraisers who have been approved by the Board Loan Committee. Commercial real estate lending entails significant additional risk, compared with residential mortgage lending. Commercial real estate loans typically involve larger loan balances concentrated with single borrowers or groups of related borrowers. Additionally, the payment experience on loans secured by income producing properties is typically dependent on the successful operation of a business or a real estate project and thus may be subject, to a greater extent, to adverse conditions in the real estate market or in the economy, in general. The Bank's commercial real estate loan underwriting criteria require an examination of debt service coverage ratios, the borrower's creditworthiness, prior credit history and reputation. The Bank typically requires personal guarantees of the borrowers' principal owners and carefully evaluates the location and environmental condition of the real estate collateral.

Construction Lending

The Bank makes local construction loans, including residential and land acquisition and development loans. These loans are secured by the property under construction and the underlying land for which the loan was obtained. Construction and land development loans outstanding at December 31, 2009 and 2008 were \$55.1 million, or 12% of gross loans, and \$63.7 million, or 14% of gross loans, respectively. The majority of these loans have an average life of approximately one year and reprice monthly as key rates change. Construction lending entails significant additional risks, compared with residential mortgage lending. Construction loans often involve larger loan balances concentrated with single borrowers or groups of related borrowers. Another risk involved in construction lending is attributable to the fact that loan funds are advanced upon the security of the land or property under construction, which value is estimated prior to the completion of construction. Thus, it is more difficult to evaluate accurately the total loan funds required to complete a project and related loan-to-value ratios. To mitigate the risks associated with construction lending, the Bank generally limits loan amounts to 80% of appraised value, in addition to analyzing the creditworthiness of its borrowers. The Bank typically obtains a first lien on the property as security for its construction loans, typically requires personal guarantees from the borrower's principal owners, and monitors the progress of the construction project during the draw period.

Residential Real Estate Lending

Residential lending activity may be generated by Bank loan officer solicitations, referrals by real estate professionals and existing or new bank customers. Loan applications are taken by a Bank loan officer. As part of the application process, information is gathered concerning income, employment and credit history of the applicant. Residential mortgage loans generally are made on the basis of the borrower's ability to make repayment from employment and other income and are secured by real estate whose value tends to be readily ascertainable. In addition to the Bank's underwriting standards, loan quality may be analyzed based on guidelines issued by a secondary market investor. The valuation of residential collateral is provided by independent fee appraisers who have been approved by the Board Loan Committee. Typically, the Bank originates fixed rate mortgage loans with the intent to sell to correspondent lenders. Depending on the financial goals of the Company, the Bank occasionally originates and retains these loans. At December 31, 2009, \$118.7 million, or 27% of the Bank's loan portfolio consisted of one-to-four family loans secured by residential real estate, as compared to \$116.8 million, or 26%, at December 31, 2008.

In connection with residential real estate loans, the Bank requires title insurance, hazard insurance and, if required, flood insurance. Flood determination letters with life of loan tracking are obtained on all federally related transactions with improvements serving as security for the transaction. The Bank requires escrows for real estate taxes and insurance for secondary market loans.

The Company does not participate in sub-prime lending practices so issues in the residential mortgage market from sub-prime lending are not expected to have a direct impact on earnings. Nevertheless, the Company is subject to risks associated with general economic and business conditions in its market area, as well as the condition of the regional residential mortgage market, each of which has been impacted by sub-prime lending and related issues.

Consumer Lending

The Bank offers various secured and unsecured consumer loans, including unsecured personal loans and lines of credit, automobile loans, deposit account loans and installment and demand loans. At December 31, 2009, consumer loans, including deposit overdraft balances, were \$13.8 million, or 3% of gross loans, as compared to \$16.2 million, or 4%, at December 31, 2008. Consumer loans may entail greater risk than

residential mortgage loans, particularly in the case of consumer loans which are unsecured, such as lines of credit, or secured by rapidly depreciable assets such as automobiles.

Table of Contents

In such cases, any repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment of the outstanding loan balance as a result of the greater likelihood of damage, loss or depreciation. Consumer loan collections are dependent on the borrower's continuing financial stability, and thus are more likely to be adversely affected by job loss, divorce, illness or personal bankruptcy. Furthermore, the application of various federal and state laws, including federal and state bankruptcy and insolvency laws, may limit the amount which can be recovered on such loans.

The underwriting standards employed by the Bank for consumer loans include a determination of the applicant's payment history on other debts and an assessment of ability to meet existing obligations and payments on a proposed loan. The stability of the applicant's monthly income may be determined by verification of gross monthly income from primary employment, and additionally from any verifiable secondary income. Although creditworthiness of the applicant is of primary consideration, the underwriting process also includes an analysis of the value of the collateral in relation to the proposed loan amount.

Results of Operations

General

Net interest income represents the primary source of earnings for the Company. Net interest income equals the amount by which interest income on interest-earning assets, predominantly loans and securities, exceeds interest expense on interest-bearing liabilities, including deposits, other borrowings and trust preferred securities. Changes in the volume and mix of interest-earning assets and interest-bearing liabilities, as well as their respective yields and rates, are the components that impact the level of net interest income. The net interest margin is calculated by dividing tax-equivalent net interest income by average earning assets. The provision for loan losses, noninterest income and noninterest expense are the other components that determine net income. Noninterest income and expense primarily consists of income from service charges on deposit accounts; fees charged for other customer services, including trust and investment advisory services; gains and losses from the sale of assets, including loans held for sale, securities and premises and equipment; general and administrative expenses; and income tax expense.

For the year ended December 31, 2009, net income totaled \$2.1 million. After the effective dividend and accretion on preferred stock, net income available to common shareholders was \$1.4 million, or \$0.49 per basic and diluted share compared to \$4.2 million, or \$1.45 per basic and diluted share, for the same period in 2008. The decrease in earnings for the year ended December 31, 2009 compared to the same period in 2008 was primarily attributable to expenses related to other real estate owned, higher FDIC assessments, lower overdraft fee income and higher provision for loan losses. Net interest income increased 1%, noninterest income decreased 6% and noninterest expense increased 17% when comparing the same periods. Return on assets was 0.39% for the year ended December 31, 2009 compared to 0.78% for the same period in 2008, and return on equity was 4.27% for the year ended December 31, 2009 compared to 10.65% for the same period in 2008.

Net Interest Income

Net interest income increased slightly to \$18.3 million for the year ended December 31, 2009, compared to \$18.1 million for the same period in 2008. The net interest margin was 1 basis point lower while average interest-earning assets were \$8.0 million higher when comparing the periods. The net interest margin for 2009 was 3.62% compared to 3.63% for 2008. In 2008, net interest income was unchanged at \$18.1 million compared to the same period in 2007.

The net interest margin was 3.62% in 2009, 3.63% in 2008 and 3.71% in 2007. Interest income as a percent of average earning assets was 5.31% in 2009, 6.15% in 2008 and 7.21% in 2007. Interest expense as a percent of average interest-bearing assets was 1.76% in 2009, 2.52% in 2008 and 4.25% in 2007. The interest rate spread was 3.21% in 2009, 3.12% in 2008 and 2.96% in 2007.

The Company expects stable net interest income over the next twelve months. The net interest margin is projected to continue performing near fourth quarter 2009 levels while earning asset growth is expected to remain low. Economic conditions are anticipated to make deposit gathering and earning asset growth challenging.

The following table provides information on average interest-earning assets and interest-bearing liabilities for the years ended December 31, 2009, 2008 and 2007, as well as amounts and rates of tax equivalent interest earned and interest paid. The volume and rate analysis table analyzes the changes in net interest income for the periods broken down by their rate and volume components.

Provision for Loan Losses

The provision for loan losses represents management's analysis of the existing loan portfolio and related credit risks. The provision for loan losses is based upon management's estimate of the amount required to maintain an adequate allowance for loan losses reflective of the risks in the loan portfolio. The provision for loan losses increased to \$2.3 million in 2009 compared to \$2.0 million in 2008. This increase resulted from higher specific reserves on impaired loans, higher net charge-offs, less favorable economic conditions and lower collateral values during 2009 when compared to 2008. At December 31, 2008, the provision for loan losses totaled \$2.0 million compared to \$398 thousand for the year ended December 31, 2007. The increase in the provision for loan losses during 2008 was a result of worsening asset quality and economic conditions.

The amount of provision for loan losses for future periods remains difficult to accurately forecast as the expense will be heavily influenced by economic conditions and local real estate activity.

Noninterest Income

Noninterest income decreased 6% to \$5.6 million for the year ended December 31, 2009 from \$6.0 million for the same period in 2008. Service charges on deposit accounts decreased 12% to \$2.5 million for 2009 compared to \$2.9 million for 2008. The decrease in service charges resulted primarily from less overdraft fee income. Fee income from trust and investment advisory services decreased 15% to \$1.1 million for 2009, compared to \$1.3 million for 2008. This decrease was attributable to fewer fees generated from lower average assets under management during 2009 when compared to 2008. In 2008, noninterest income decreased 2% to \$6.0 million from \$6.1 million in 2007.

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

The impact on noninterest income from recent overdraft protection legislation has been difficult to measure, resulting in uncertain levels of noninterest income during periods beginning in the second half of 2010. Although management is developing strategies to mitigate earnings risk related to the legislation, the Company is planning for slightly lower noninterest income in 2010 compared to 2009.

Table of Contents*Noninterest Expense*

Noninterest expense increased 17% to \$18.7 million for the year ended December 31, 2009, compared to \$16.0 million for the same period in 2008. The increase in noninterest expense was primarily the result of expenses related to other real estate owned and higher FDIC assessments. The provision for other real estate owned totaled \$994 thousand for the year ended December 31, 2009 compared to no provision in 2008. FDIC assessment totaled \$973 thousand for the year ended December 31, 2009 compared to \$253 thousand in 2008. In 2008, noninterest expense increased \$728 thousand, or 5%, over 2007. The increase in noninterest expense was driven primarily from occupancy and other operating costs.

Management expects lower noninterest expenses for the year ending December 31, 2010 compared to the same period in 2009 as the Company continues efforts to control expenses to improve profitability.

Income Taxes

The Company's income tax provision differed from the amount of income tax determined by applying the U.S. federal income tax rate to pretax income for the years ended December 31, 2009 and 2008. The difference was a result of net permanent tax deductions, primarily comprised of tax-exempt interest income. For a more detailed discussion of the Company's tax calculation, see Note 9 to the consolidated financial statements, included in Item 8 of this Form 10-K.

*Financial Condition**General*

Total assets were \$552.7 million at December 31, 2009 compared to \$548.2 million at December 31, 2008. The Company's trust and investment advisory group had assets under management of \$208.8 million at December 31, 2009 compared to \$174.0 million at December 31, 2008. Assets managed by the trust and investment advisory group are not held on the Company's balance sheet.

The Company does not expect significant balance sheet growth during 2010 based on current and anticipated economic conditions. It is believed that the contraction of the housing market, high unemployment rates and other factors will limit the ability to increase loan and deposit balances.

Loans

The Bank is an active lender with a loan portfolio that includes commercial and residential real estate loans, commercial loans, consumer loans, construction loans and home equity loans. The Bank's lending activity is concentrated on individuals, small and medium-sized businesses and local governmental entities in its market area. As a provider of community-oriented financial services, the Bank does not attempt to geographically diversify its loan portfolio by undertaking significant lending activity outside its market area. The Bank's loan portfolio is summarized in the table below for the periods indicated.

	Loan Portfolio (in thousands) At December 31,				
	2009	2008	2007	2006	2005
Commercial, financial, and agricultural	\$ 52,276	\$ 56,354	\$ 55,172	\$ 53,004	\$ 42,942
Real estate construction	55,057	63,744	73,478	60,913	49,748
Real estate mortgage:					
Residential (1-4 family)	118,675	116,821	106,378	112,323	99,442
Secured by farmland	1,281	1,702	1,789	2,507	2,195
Other real estate loans	200,001	196,163	192,616	168,754	148,805
Consumer	13,776	16,202	18,778	24,655	29,640
All other loans	2,169	991	1,376	4,973	5,078
Total loans	\$ 443,235	\$ 451,977	\$ 449,587	\$ 427,129	\$ 377,850
Less: allowance for loan losses	7,106	5,650	4,207	3,978	3,528

Loans, net of allowance for loan losses	\$ 436,129	\$ 446,327	\$ 445,380	\$ 423,151	\$ 374,322
-----------------------------------------	------------	------------	------------	------------	------------

Table of Contents

As shown in the table above, other real estate loans represented the largest growth in the loan portfolio of \$3.8 million, followed by residential real estate loans with growth of \$1.9 million, which include commercial real estate. Construction loans decreased by \$8.7 million and consumer loans decreased by \$2.4 million. These changes are reflective of the Bank's lending strategies and loan demand in the market during the year.

The Company has a credit concentration in mortgage loans on real estate. These loans totaled \$375.0 million, or 85% of total loans and \$378.4 million, or 84% of total loans at December 31, 2009 and 2008, respectively. Although the Company believes that its underwriting standards are generally conservative, the ability of its borrowers to meet their mortgage obligations is influenced by certain factors including local economic conditions. Construction loans totaled \$55.1 million and \$63.7 million, or 12% and 14% of total loans, at December 31, 2009 and 2008, respectively.

The Company has a concentration of credit risk within the loan portfolio involving loans secured by hotels. This concentration totaled \$42.9 million at December 31, 2009, representing 78% of total shareholders' equity and 10% of total loans. At December 31, 2008, this concentration totaled \$44.8 million representing 114% of total shareholders' equity and 10% of total loans. These loans are included in other real estate loans in the above table. The Company experienced no loan losses related to this identified risk during the years ended December 31, 2009, 2008 and 2007. The Company monitors risk in this concentration by performing interest rate and vacancy rate stress tests on a quarterly basis.

There was no category of loans that exceeded 10% of outstanding loans at December 31, 2009 that were not disclosed in the above table. The following table sets forth the maturities of the loan portfolio at December 31, 2009:

	Remaining Maturities of Selected Loans (in thousands)			
	At December 31, 2009			Total
	Less than One Year	One to Five Years	Greater than Five Years	
Commercial, financial, and agricultural	\$ 41,445	\$ 9,485	\$ 1,346	\$ 52,276
Real estate construction	46,639	6,728	1,690	55,057
Real estate mortgage:				
Residential (1-4 family)	23,179	52,885	42,611	118,675
Secured by farmland	206	972	103	1,281
Other real estate loans	62,685	131,526	5,790	200,001
Consumer	1,248	12,137	391	13,776
All other loans	429	1,300	440	2,169
Total loans	\$ 175,831	\$ 215,033	\$ 52,371	\$ 443,235

For maturities over one year:	
Fixed rates	\$ 205,887
Variable rates	61,517
	\$ 267,404

Asset Quality

Management classifies as nonperforming assets non-accrual loans, restructured loans and other real estate owned (OREO). OREO represents real property taken by the Bank either through foreclosure or through a deed in lieu thereof from the borrower. OREO is recorded at the lower of cost or market, less estimated selling costs, and is actively marketed by the Bank through brokerage channels. The Bank had \$6.3 million in other real estate owned, net of valuation allowance, at December 31, 2009 and \$4.3 million at December 31, 2008. The valuation allowance for other real estate owned totaled \$994 thousand at December 31, 2009. There was no valuation allowance for other real estate owned at December 31, 2008.

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

Nonperforming assets were \$14.5 million and \$15.9 million at December 31, 2009 and 2008, representing 2.63% and 2.90% of total assets, respectively. Nonperforming assets included \$8.2 million in non-accrual loans and \$6.3 million in OREO.

The higher levels of nonperforming assets in 2009 and 2008 were primarily attributable to weaker local economic conditions that negatively impacted the ability of certain borrowers to service debt. Borrowers that have not been able to meet their debt requirements are primarily business customers involved in retail operations and residential real estate development. At December 31, 2009, nonperforming assets consisted of \$6.4 million related to commercial real estate loans, \$6.1 million related to residential development loans, \$2.0 million related to residential real estate loans and \$124 thousand related to commercial loans not secured by real estate. The higher level of nonperforming assets was one of the factors that determined the provision for loan losses during 2009. Nonperforming assets could increase due to other potential problem loans identified by management. At December 31, 2009, other potential problem loans totaled \$36.8 million, of which \$34.5 million are currently performing and are generally considered well-secured. Certain risks, including the borrower's ability to pay and the collateral value securing the loan, have been identified that may result in the potential problem loans not being repaid in accordance with their terms.

Table of Contents

The provision for loan losses represents management's analysis of the existing loan portfolio and related credit risks. The provision for loan losses is based upon management's estimate of the amount required to maintain an adequate allowance for loan losses reflective of the risks in the loan portfolio. The allowance for loan losses totaled \$7.1 million and \$5.7 million at December 31, 2009 and 2008, representing 1.60% and 1.25% of total loans, respectively.

Impaired loans totaled \$8.1 million and \$12.0 million at December 31, 2009 and 2008, respectively. The related allowance for loan losses provided for these loans totaled \$1.5 million and \$571 thousand at December 31, 2009 and 2008. The average recorded investment in impaired loans during 2009 and 2008 was \$11.2 million and \$5.9 million, respectively.

Non-accrual loans excluded from impaired loan disclosure amounted to \$196 thousand, \$36 thousand and \$78 thousand at December 31, 2009, 2008 and 2007, respectively. If interest on these loans had been accrued, such income would have approximated \$6 thousand, \$2 thousand and \$6 thousand for 2009, 2008 and 2007, respectively. Loan payments received on non-accrual loans are applied to principal. When a loan is placed on non-accrual status there are several negative implications. First, all interest accrued but unpaid at the time of the classification is deducted from the interest income totals for the Bank. Second, accruals of interest are discontinued until it becomes certain that both principal and interest can be repaid. Third, there may be actual losses that necessitate additional provisions for credit losses charged against earnings. These loans were included in the nonperforming loan totals listed below.

Management believes, based upon its review and analysis, that the Bank has sufficient reserves to cover losses inherent within the loan portfolio. For each period presented, the provision for loan losses charged to expense was based on management's judgment after taking into consideration all factors connected with the collectability of the existing portfolio. Management considers loss experience over a one-year period, economic conditions, asset quality, collateral values and other relevant factors when evaluating the loan portfolio. There can be no assurance, however, that additional provisions for loan losses will not be required in the future, including as a result of changes in the economic assumptions underlying management's estimates and judgments, adverse developments in the economy, on a national basis or in the Company's market area, or changes in the circumstances of particular borrowers. For further discussion regarding the allowance for loan losses, see "Critical Accounting Policies" above. The following table shows a detail of loans charged-off, recovered and the changes in the allowance for loan losses.

	Allowance for Loan Losses (in thousands) At December 31,

<i>Securities</i>					

Securities at December 31, 2009 were \$60.1 million, an increase of \$5.3 million, or 10%, from \$54.8 million at the end of 2008. The Company received proceeds from a \$13.9 million investment in its preferred stock on March 13, 2009 and invested the proceeds in securities. Investment securities are comprised of U.S. agency and mortgage-backed securities, obligations of state and political subdivisions and corporate equity securities. As of December 31, 2009, neither the Company nor the Bank held any derivative financial instruments in their respective investment security portfolios.

Table of Contents

The following table summarizes the fair value of the Company's securities portfolio on the dates indicated.

	Securities Portfolio (in thousands) At December 31,		
	2009	2008	2007
Securities, available for sale			
U.S. agency and mortgage-backed securities	\$ 44,215	\$ 40,199	\$ 40,457
Obligations of state and political subdivisions	15,706	14,311	13,423
Other securities	208	281	237
Total securities	\$ 60,129	\$ 54,791	\$ 54,117

The following table shows the maturities of available for sale debt and equity securities at amortized cost and market value at December 31, 2009 and approximate weighted average yields of such securities. Yields on state and political subdivision securities are shown on a tax equivalent basis, assuming a 34% federal income tax rate. The Company attempts to maintain diversity in its portfolio and maintain credit quality and re-pricing terms that are consistent with its asset/liability management and investment practices and policies. For further information on securities available for sale, see Note 2 to the consolidated financial statements, included in Item 8 of this Form 10-K.

Weighted average yield ⁽¹⁾	6.20%	4.35%	5.19%	4.87%	

⁽¹⁾ Yields on tax-exempt securities have been calculated on a tax-equivalent basis.

The above table was prepared using the contractual maturities for all securities with the exception of mortgage-backed securities (MBS) and collateralized mortgage obligations (CMO). Both MBS and CMO securities were recorded using the Espiel prepayment model that considers many factors including rate and spread projections, housing turnover and borrower characteristics to create anticipated speeds.

Deposits

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

Deposits at December 31, 2009 were \$463.9 million, an increase of \$16.4 million or 4%, from \$447.5 million at December 31,

Table of Contents

2008. Non-interest bearing demand deposits increased \$7.7 million or 10% during 2009. Savings and interest-bearing demand deposits increased \$5.4 million or 4% when comparing the same periods. Time deposits, which included brokered deposits, increased \$3.4 million or 1% during 2009 to \$236.7 million compared to \$233.4 million at December 31, 2008. Brokered deposits decreased \$6.1 million or 12% to \$42.9 million compared to \$49.0 million at December 31, 2008. Although the Company plans to fund future asset growth with local deposits, deposits in the Company's market have decreased. The following tables include a summary of average deposits and average rates paid and maturities of CD's greater than \$100,000.

	Average Deposits and Rates Paid (dollars in thousands) Year Ended December 31,					
	2009		2008		2007	
	Amount	Rate	Amount	Rate	Amount	Rate
Noninterest-bearing deposits	\$ 75,570		\$ 74,883		\$ 78,947	
Interest-bearing deposits:						
Interest checking	\$ 38,206	0.50%	\$ 56,977	1.37%	\$ 56,823	2.84%
Money market	23,690	1.08%	16,636	1.83%	6,674	1.30%
Savings	77,854	0.69%	87,928	1.40%	112,702	3.72%
Time deposits:						
Less than \$100,000	104,464	3.25%	98,231	3.89%	95,178	4.49%
Greater than \$100,000	78,280	3.21%	78,859	4.04%	78,666	4.86%
Brokered deposits	58,995	1.47%	28,019	3.48%	1,183	4.99%
Total interest-bearing deposits	\$ 381,489	2.03%	\$ 366,650	2.81%	\$ 351,226	4.00%
Total deposits	\$ 457,059		\$ 441,533		\$ 430,173	

	Maturities of CD's Greater than \$100,000 (in thousands)				
	Less than Three Months	Three to Six Months	Six to Twelve Months	Greater than One Year	Total
At December 31, 2009	\$ 31,106	\$ 25,896	\$ 31,537	\$ 36,674	\$ 125,213

Liquidity

Liquidity represents the ability to meet present and future financial obligations through either the sale or maturity of existing assets or with borrowings from correspondent banks or other deposit markets. The Company classifies cash, interest-bearing and noninterest-bearing deposits with banks, federal funds sold, investment securities and loans maturing within one year as liquid assets. As a result of the Bank's management of liquid assets and the ability to generate liquidity through liability funding, management believes that the Bank maintains overall liquidity sufficient to satisfy its depositors' requirements and to meet its customers' borrowing needs.

At December 31, 2009, cash, interest-bearing and noninterest-bearing deposits with banks, federal funds sold, securities and loans maturing within one year were \$185.3 million. At the end of 2009, approximately 47% or \$209.1 million of the loan portfolio would mature or re-price within a one-year period. At December 31, 2009, non-deposit sources of available funds totaled \$124.8 million, which included \$84.8 million available from the Federal Home Loan Bank. During 2009, other borrowing activity included repayment of a fixed rate advance from FHLB in the amount of \$10.0 million. The Bank also borrowed and repaid Daily Rate Credit advances as an alternative to purchasing federal funds.

The Bank also maintains federal funds lines with correspondents for short-term liquidity needs totaling \$40.0 million at December 31, 2009.

Company Obligated Mandatorily Redeemable Capital Securities

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

See Note 8 to the consolidated financial statements, included in Item 8 of this Form 10-K, for discussion of company obligated mandatorily redeemable capital securities.

Table of Contents*Contractual Obligations*

The impact that contractual obligations as of December 31, 2009 are expected to have on liquidity and cash flow in future periods is as follows:

	Contractual Obligations (in thousands)				
	Total	Less than one year	1-3 years	3-5 years	More than 5 years
Other borrowings	\$ 20,186	\$ 10,064	\$ 10,070	\$ 52	\$
Operating leases	913	171	334	242	166
Total	\$ 21,099	\$ 10,235	\$ 10,404	\$ 294	\$ 166

The Company does not have any capital lease obligations or other purchase or long-term obligations.

Off-Balance Sheet Arrangements

The Company, through the Bank, is a party to credit related financial instruments with risk not reflected in the consolidated financial statements in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby letters of credit and commercial letters of credit. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets. The Bank's exposure to credit loss is represented by the contractual amount of these commitments. The Bank follows the same credit policies in making commitments as it does for on-balance-sheet instruments.

At December 31, 2009 and 2008, the following financial instruments were outstanding whose contract amounts represent credit risk:

	(in thousands)	
	2009	2008
Commitments to extend credit and unfunded commitments under lines of credit	\$ 46,211	\$ 48,617
Stand-by letters of credit	6,002	7,068
Rate lock commitments		1,911

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The commitments for lines of credit may expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Bank, is based on management's credit evaluation of the customer.

Unfunded commitments under commercial lines of credit, revolving credit lines and overdraft protection agreements are commitments for possible future extensions of credit to existing customers. These lines of credit are collateralized as deemed necessary and usually do not contain a specified maturity date and may not be drawn upon to the total extent to which the Bank is committed.

Commercial and standby letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. Those letters of credit are primarily issued to support public and private borrowing arrangements. Essentially all letters of credit issued have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Bank generally holds collateral supporting those commitments if deemed necessary.

At December 31, 2009, the Bank had no locked-rate commitments to originate mortgage loans. Risks arise from the possible inability of counterparties to meet the terms of their contracts. The Bank does not expect any counterparty to fail to meet its obligations.

Capital Resources

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

The adequacy of the Company's capital is reviewed by management on an ongoing basis with reference to the size, composition, and quality of the Company's asset and liability levels and consistent with regulatory requirements and industry standards. Management seeks to maintain a capital structure that will assure an adequate level of capital to support asset growth and absorb potential losses.

Table of Contents

The Board of Governors of the Federal Reserve System has adopted capital guidelines to supplement the existing definitions of capital for regulatory purposes and to establish minimum capital standards. Specifically, the guidelines categorize assets and off-balance sheet items into four risk-weighted categories. The minimum ratio of qualifying total capital to risk-weighted assets is 8.00%, of which at least 4.00% must be Tier 1 capital, composed of common equity, retained earnings and a limited amount of perpetual preferred stock, less certain intangible items. Under present regulations, trust preferred securities may be included in Tier 1 capital for regulatory capital adequacy purposes as long as their amount does not exceed 25% of Tier 1 capital, including total trust preferred securities. The portion of the trust preferred securities not considered as Tier 1 capital, if any, may be included in Tier 2 capital. The Company had a ratio of risk-weighted assets to total capital of 14.96% at December 31, 2009 and a ratio of risk-weighted assets to Tier 1 capital of 13.70%. Both of these exceed both the minimum capital requirement and the minimum to be well capitalized under prompt corrective action provisions adopted by the federal regulatory agencies.

The following table summarizes the Company's Tier 1 capital, Tier 2 capital, risk-weighted assets and capital ratios at December 31, 2009, 2008 and 2007.

	Analysis of Capital (dollars in thousands)		
	At December 31,		
	2009	2008	2007
Tier 1 capital:			
Preferred stock	\$ 13,998	\$	\$
Common stock	3,664	3,653	3,653
Surplus	1,418	1,409	1,453
Retained earnings	35,104	35,196	33,311
Trust preferred securities	9,279	9,279	12,372
Intangible assets	(345)	(68)	(74)
Total Tier 1 Capital	\$ 63,118	\$ 49,469	\$ 50,715
Tier 2 capital:			
Allowance for loan losses	5,774	5,650	4,207
Total Risk-Based Capital	\$ 68,892	\$ 55,119	\$ 54,922
Risk-weighted assets	\$ 460,605	\$ 470,110	\$ 465,629
Capital ratios:			
Tier 1 Risk-Based Capital Ratio	13.70%	10.52%	10.89%
Total Risk-Based Capital Ratio	14.96%	11.72%	11.80%
Tier 1 Capital to Average Assets	11.50%	9.10%	9.53%

On March 13, 2009, the Company received an investment in the Company's preferred stock totaling \$13.9 million from the Company's participation in the TARP Capital Purchase Program. As a result of this investment, capital ratios increased during 2009. The Preferred Stock pays a dividend of 5% per annum for the first five years and 9% thereafter. The Warrant Preferred Stock pays a dividend of 9% per annum.

Recent Accounting Pronouncements

See Note 1 to the consolidated financial statements, included in Item 8 of this Form 10-K, for discussion of recent accounting pronouncements.

Table of Contents**Quarterly Results**

MANAGEMENT'S REPORT REGARDING THE EFFECTIVENESS OF INTERNAL CONTROLS

OVER FINANCIAL REPORTING

The management of First National Corporation (the Corporation) is responsible for the preparation, integrity and fair presentation of the financial statements included in the annual report as of December 31, 2009. The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America and reflect management's judgments and estimates concerning the effects of events and transactions that are accounted for or disclosed.

Management is also responsible for establishing and maintaining an effective internal control structure over financial reporting. The Corporation's internal control over financial reporting includes those policies and procedures that pertain to the Corporation's ability to record, process, summarize and report reliable financial data. The internal control system contains monitoring mechanisms, and appropriate actions are taken to correct identified deficiencies. Management believes that internal controls over financial reporting, which are subject to scrutiny by management and the Corporation's internal auditor, support the integrity and reliability of the financial statements. Management recognizes that there are inherent limitations in the effectiveness of any internal control system, including the possibility of human error and the circumvention or overriding of internal controls. Accordingly, even effective internal control over financial reporting can provide only reasonable assurance with respect to financial statement preparation. In addition, because of changes in conditions and circumstances, the effectiveness of internal control over financial reporting may vary over time.

In order to insure that the Corporation's internal control structure over financial reporting is effective, management assessed these controls as they conformed to accounting principles generally accepted in the United States of America and related call report instructions as of December 31, 2009. This assessment was based on criteria for effective internal control over financial reporting as described in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations (COSO) of the Treadway Commission. Based on this assessment, management believes that the Corporation maintained effective internal controls over financial reporting as of December 31, 2009. Management's assessment did not determine any material weakness within the Corporation's internal control structure. The Corporation's annual report does not include an attestation report of the Corporation's registered public accounting firm, Yount, Hyde & Barbour, P.C. (YHB), regarding internal control over financial reporting. Management's report was not subject to attestation by YHB pursuant to temporary rules of the Securities and Exchange Commission that permit the Corporation to provide only management's report in its annual report.

The 2009 end of year financial statements have been audited by the independent accounting firm of Yount, Hyde & Barbour, P.C. (YHB). Personnel from YHB were given unrestricted access to all financial records and related data, including minutes of all meetings of the Board of Directors and Committees thereof.

Management believes that all representations made to the independent auditors were valid and appropriate. The resulting report from YHB accompanies the financial statements.

The Board of Directors of the Corporation, acting through its Audit and Compliance Committee (the Committee), is responsible for the oversight of the Corporation's accounting policies, financial reporting and internal control. The Audit and Compliance Committee of the Board of Directors is comprised entirely of outside directors who are independent of management. The Audit and Compliance Committee is responsible for the appointment and compensation of the independent auditors and approves decisions regarding the appointment or removal of members of the internal audit function. The Committee meets periodically with management, the independent auditors, and the internal auditor to insure that they are carrying out their responsibilities. The Committee is also responsible for performing an oversight role by reviewing and monitoring the financial, accounting, and auditing procedures of the Corporation in addition to reviewing the Corporation's financial reports. The independent auditors and the internal auditor have full and unlimited access to the Audit and Compliance Committee, with or without the presence of the management of the Corporation, to discuss the adequacy of internal control over financial reporting, and any other matters which they believe should be brought to the attention of the Audit and Compliance Committee.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Directors

First National Corporation

Strasburg, Virginia

We have audited the accompanying consolidated balance sheets of First National Corporation and subsidiaries as of December 31, 2009 and 2008, and the related consolidated statements of income, changes in shareholders' equity, and cash flows for the years ended December 31, 2009, 2008 and 2007. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of First National Corporation and subsidiaries as of December 31, 2009 and 2008, and the results of their operations and their cash flows for the years ended December 31, 2009, 2008 and 2007, in conformity with U.S. generally accepted accounting principles.

We were not engaged to examine management's assessment of the effectiveness of First National Corporation and subsidiaries' internal control over financial reporting as of December 31, 2009, included in the accompanying *Management's Report Regarding the Effectiveness of Internal Control Over Financial Reporting* and, accordingly, we do not express an opinion thereon.

FIRST NATIONAL CORPORATION

Notes to Consolidated Financial Statements

Note 1. Nature of Banking Activities and Significant Accounting Policies

First National Corporation (the Company) is the financial holding company of First Bank (the Bank), First National (VA) Statutory Trust I (Trust I), First National (VA) Statutory Trust II (Trust II) and First National (VA) Statutory Trust III (Trust III). The Trusts were formed for the purpose of issuing redeemable capital securities, commonly known as trust preferred securities. The Bank owns First Bank Financial Services, Inc., which invests in partnerships that provide title insurance and investment services. The Bank owns Shen-Valley Land Holdings, LLC which holds other real estate owned. The Bank provides commercial and personal loans, residential mortgages, credit cards, a variety of deposit products and personal trust and investment services to its customers in the northern Shenandoah Valley region of Virginia.

The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America and to accepted practices within the banking industry.

Principles of Consolidation

The consolidated financial statements of First National Corporation include the accounts of all five companies. All material intercompany balances and transactions have been eliminated in consolidation, except for balances and transactions related to the Trusts. The subordinated debt of these Trusts is reflected as a liability of the Company.

Use of Estimates

In preparing consolidated financial statements in conformity with accounting principles generally accepted in the United States, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, fair value, deferred tax assets and liabilities, and other real estate owned.

Significant Group Concentrations of Credit Risk

Most of the Company's activities are with customers located within the northern Shenandoah Valley region of Virginia. The types of lending that the Company engages in are included in Note 3. The Company has identified a concentration of credit risk in the hotel industry and mortgage loans on real estate. See Note 3 for further information on this concentration of credit risk. The Company does not have a significant concentration to any one customer.

Cash and Cash Equivalents

For purposes of the consolidated statements of cash flows, the Company has defined cash equivalents as those amounts included in the balance sheet captions "Cash and due from banks" and "interest-bearing deposits in banks."

Securities

Investments in debt securities with readily determinable fair values are classified as either held to maturity, available for sale (AFS) or trading based on management's intent. Currently all of the Company's debt securities are classified as AFS. Equity investments in the FHLB, the Federal Reserve Bank of Richmond and Community Bankers Bank are separately classified as restricted securities and are carried at cost. AFS securities are carried at estimated fair value with the corresponding unrealized gains and losses excluded from earnings and reported in other comprehensive income. Purchase premiums and discounts are recognized in interest income using the interest method over the terms of the securities.

Impairment of securities occurs when the fair value of a security is less than its amortized cost. For debt securities, impairment is considered other-than-temporary and recognized in its entirety in net income if either the Company (1) intends to sell the security or (2) it is more likely than not that it will be required to sell the security before recovery of its amortized cost basis. If, however, the Company intends to sell the security and it is not more-than-likely that it will be required to sell the security before recovery, the Company must determine what portion of

the impairment is attributable to a credit loss, which occurs when the amortized cost of the security exceeds the present value of the cash flows expected to be collected from the security. If there is no credit loss, there is no other-than-temporary impairment. If there is a credit loss, other-than-temporary impairment exists, and the credit loss must be recognized in net income and the remaining portion of impairment must be recognized in other comprehensive income.

Table of Contents

FIRST NATIONAL CORPORATION

Notes to Consolidated Financial Statements (Continued)

For equity securities carried at cost as restricted securities, impairment is considered to be other-than-temporary based on the Company's ability and intent to hold the investment until a recovery of fair value. Other-than-temporary impairment of an equity security results in a write-down that must be included in income. The Company regularly reviews each security for other-than-temporary impairment based on criteria that include the extent to which costs exceeds market price, the duration of that market decline, the financial health of and specific prospects for the issuer, the best estimate of the present value of cash flows expected to be collected from debt securities, the Company's intention with regard to holding the security to maturity and the likelihood that the Company would be required to sell the security before recovery.

Loans Held for Sale

Loans originated and intended for sale in the secondary market are carried at the lower of aggregate cost or estimated fair value. The Company, through its banking subsidiary, requires a firm purchase commitment from a permanent investor before a loan can be closed, thus limiting interest rate risk. Net unrealized losses, if any, are recognized through a valuation allowance by charges to income.

The Bank enters into commitments to originate mortgage loans whereby the interest rate on the loan is determined prior to funding (rate lock commitments). Rate lock commitments on mortgage loans that are intended to be sold are considered to be derivatives. The period of time between issuance of a loan commitment and closing and sale of the loan generally ranges from 30 to 60 days. The Bank protects itself from changes in interest rates through the use of best efforts forward delivery commitments, whereby the Bank commits to sell a loan at the time the borrower commits to an interest rate with the intent that the buyer has assumed interest rate risk on the loan. As a result, the Bank is not exposed to losses nor will it realize significant gains related to its rate lock commitments due to changes in interest rates. The correlation between the rate lock commitments and the best efforts contracts is very high due to their similarity.

The market value of rate lock commitments and best efforts contracts is not readily ascertainable with precision because rate lock commitments and best efforts contracts are not actively traded in stand-alone markets. The Bank determines the fair value of rate lock commitments and best efforts contracts by measuring the change in the value of the underlying asset while taking into consideration the probability that the rate lock commitments will close. Because of the high correlation between rate lock commitments and best efforts contracts, no gain or loss occurs on the rate lock commitments.

Loans

The Company, through its banking subsidiary, grants mortgage, commercial and consumer loans to customers. A substantial portion of the loan portfolio is represented by residential and commercial loans secured by real estate throughout the northern Shenandoah Valley region of Virginia. The ability of the Bank's debtors to honor their contracts is subject to the real estate and general economic conditions in this area.

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or pay-off generally are reported at their outstanding unpaid principal balances less the allowance for loan losses and any deferred fees or costs on originated loans. Interest income is accrued and credited to income based on the unpaid principal balance. Loan origination fees, net of certain origination costs, are deferred and recognized as an adjustment of the related loan yield using the interest method.

The accrual of interest on mortgage and commercial loans is discontinued at the time the loan is 90 days delinquent unless the credit is well-secured and in process of collection. Personal loans are typically charged off no later than 180 days past due. Past due status is based on contractual terms of the loan. In all cases, loans are placed on non-accrual or charged-off at an earlier date if collection of principal or interest is considered doubtful.

All interest accrued but not collected for loans that are placed on non-accrual or charged off is reversed against interest income. The interest on these loans is accounted for on the cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Allowance for Loan Losses

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectability of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance. For further information about the Company's loans and the allowance for loan losses, see Notes 3 and 4.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectability of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse

Table of Contents

FIRST NATIONAL CORPORATION

Notes to Consolidated Financial Statements (Continued)

situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

The allowance consists of specific and general components. The specific component relates to loans that are classified as impaired. For those loans that are classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers non-classified loans and is based on historical loss experience adjusted for qualitative factors.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value (net of selling costs), and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair market value of the collateral, net of selling costs, if the loan is collateral dependent. The Company does not separately identify individual consumer and residential loans for impairment disclosures.

Premises and Equipment

Land is carried at cost. Premises and equipment are stated at cost, less accumulated depreciation and amortization. Premises and equipment are depreciated over their estimated useful lives ranging from three years to forty years; leasehold improvements are amortized over the lives of the respective leases or the estimated useful life of the leasehold improvement, whichever is less. Software is amortized over its estimated useful life ranging from three to seven years. Depreciation and amortization are recorded on the straight-line method.

Costs of maintenance and repairs are charged to expense as incurred. Costs of replacing structural parts of major units are considered individually and are expensed or capitalized as the facts dictate. Gains and losses on routine dispositions are reflected in current operations.

Other Real Estate Owned

Assets acquired through, or in lieu of, loan foreclosure are held for sale and are initially recorded at lower of cost or fair value less cost to sell at the date of foreclosure. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at the lower of carrying amount or fair value less cost to sell. Revenue and expenses from operations and changes in the valuation allowance are included in net expenses from other real estate owned. The Company had \$6.3 million in other real estate owned at December 31, 2009 and \$4.3 million at December 31, 2008.

Transfers of Financial Assets

Transfers of financial assets, including loan participations, are accounted for as sales, when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before maturity.

Income Taxes

Deferred income tax assets and liabilities are determined using the liability method. Under this method, the net deferred tax asset or liability is determined based on the tax effects of the temporary differences between the book and tax bases of the various balance sheet assets and liabilities and gives current recognition to changes in tax rates and laws.

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

When tax returns are filed, it is highly certain that some positions taken would be sustained upon examination by the taxing authorities, while others are subject to uncertainty about the merits of the position taken or the amount of the position that would be ultimately sustained. The benefit of a tax position is recognized in the financial statements in the period during which, based on all available evidence, management believes it is more likely than not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. Tax positions taken are not offset or aggregated with other positions. Tax positions that meet the more-likely-than-not recognition threshold are measured as the largest amount of tax benefit that is more than 50 percent likely of being realized upon settlement with the applicable taxing

Table of Contents

FIRST NATIONAL CORPORATION

Notes to Consolidated Financial Statements (Continued)

authority. The portion of the benefits associated with tax positions taken that exceeds the amount measured as described above is reflected as a liability for unrecognized tax benefits in the accompanying balance sheet along with any associated interest and penalties that would be payable to the taxing authorities upon examination. Interest and penalties associated with unrecognized tax benefits are classified as additional income taxes in the statement of income.

Trust and Asset Management Department

Securities and other property held by the Trust and Asset Management Department in a fiduciary or agency capacity are not assets of the Company and are not included in the accompanying consolidated financial statements.

Earnings Per Share

Basic earnings per share represents income available to common shareholders divided by the weighted-average number of common shares outstanding during the period. Diluted earnings per share reflects additional common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustment to income that would result from the assumed issuance. There are no potential common shares that would have a dilutive effect. Shares not committed to be released under the Company's leveraged Employee Stock Ownership Plan (ESOP) are not considered to be outstanding. See Note 11 for further information on the Company's ESOP. The average number of common shares outstanding used to calculate basic and diluted earnings per share were 2,921,129, 2,913,011 and 2,906,431 for the years ended December 31, 2009, 2008 and 2007, respectively.

Advertising Costs

The Company follows the policy of charging the production costs of advertising to expense as incurred. Total advertising expense incurred for 2009, 2008 and 2007 was \$442 thousand, \$371 thousand and \$344 thousand, respectively.

Reclassifications

Certain reclassifications have been made to prior period balances to conform to the current year presentation.

Recent Accounting Pronouncements

The Company adopted new guidance impacting Financial Accounting Standards Board (FASB) Topic 805: *Business Combinations* (Topic 805) on January 1, 2009. This guidance requires the acquiring entity in a business combination to recognize the full fair value of assets acquired and liabilities assumed in the transaction (whether a full or partial acquisition); establishes the acquisition-date fair value as the measurement objective for all assets acquired and liabilities assumed; requires expensing of most transaction and restructuring costs; and requires the acquirer to disclose to investors and other users all of the information needed to evaluate and understand the nature and financial effect of the business combination. The adoption of the new guidance did not have a material impact on the Company's consolidated financial statements.

In April 2009, the FASB issued new guidance impacting Topic 805. This guidance addresses application issues raised by preparers, auditors, and members of the legal profession on initial recognition and measurement, subsequent measurement and accounting, and disclosure of assets and liabilities arising from contingencies in a business combination. This guidance was effective for business combinations entered into on or after January 1, 2009. This guidance did not have a material impact on the Company's consolidated financial statements.

In December 2008, the FASB issued new guidance impacting FASB Topic 715-20: *Compensation Retirement Benefits - Defined Benefit Plans - General*. The objectives of this guidance are to provide users of the financial statements with more detailed information related to the major categories of plan assets, the inputs and valuation techniques used to measure the fair value of plan assets and the effect of fair value measurements using significant unobservable inputs (Level 3) on changes in plan assets for the period, as well as how investment allocation decisions are made, including the factors that are pertinent to an understanding of investment policies and strategies. The disclosures about plan assets required by this guidance are included in Note 11 of the Company's consolidated financial statements.

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

In April 2009, the FASB issued new guidance impacting FASB Topic 820: *Fair Value Measurements and Disclosures* (Topic 820). This interpretation provides additional guidance for estimating fair value when the volume and level of activity for the asset or liability have significantly decreased. This also includes guidance on identifying circumstances that indicate a transaction is not orderly and requires additional disclosures of valuation inputs and techniques in interim periods and defines the major security types that are required to be disclosed. This guidance was effective for interim and annual periods ending after June 15, 2009, and should be applied prospectively. The adoption of the standard did not have a material impact on the Company's consolidated financial statements.

In April 2009, the FASB issued new guidance impacting FASB Topic 320-10: *Investments – Debt and Equity Securities*. This guidance amends GAAP for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. This guidance was

Table of Contents

FIRST NATIONAL CORPORATION

Notes to Consolidated Financial Statements (Continued)

effective for interim and annual periods ending after June 15, 2009, with earlier adoption permitted for periods ending after March 15, 2009. The Company did not have any cumulative effect adjustment related to the adoption of this guidance. The additional disclosures required are included in Note 2 to these consolidated financial statements.

Table of Contents

FIRST NATIONAL CORPORATION

Notes to Consolidated Financial Statements (Continued)

In May 2009, the FASB issued new guidance impacting FASB Topic 855: *Subsequent Events*. This update provides guidance on management's assessment of subsequent events that occur after the balance sheet date through the date that the financial statements are issued. This guidance is generally consistent with current accounting practice. This guidance was effective for periods ending after June 15, 2009 and had no impact on the Company's consolidated financial statements.

In August 2009, the FASB issued new guidance impacting Topic 820. This guidance is intended to reduce ambiguity in financial reporting when measuring the fair value of liabilities. This guidance was effective for the first reporting period (including interim periods) after issuance and had no impact on the Company's consolidated financial statements.

In September 2009, the FASB issued new guidance impacting Topic 820. This creates a practical expedient to measure the fair value of an alternative investment that does not have a readily determinable fair value. This guidance also requires certain additional disclosures. This guidance was effective for interim and annual periods ending after December 15, 2009. The adoption of the new guidance did not have a material impact on the consolidated financial statements.

In October 2009, the Securities and Exchange Commission issued Release No. 33-99072, *Internal Control over Financial Reporting in Exchange Act Periodic Reports of Non-Accelerated Filers*. Release No. 33-99072 delays the requirement for non-accelerated filers to include an attestation report of their independent auditor on internal control over financial reporting with their annual report until the fiscal year ending on or after June 15, 2010.

Accounting Standards Not Yet Effective

In June 2009, the FASB issued new guidance relating to the accounting for transfers of financial assets. The new guidance, which was issued as SFAS No. 166, *Accounting for Transfers of Financial Assets, an amendment to SFAS No. 140*, was adopted into Codification in December 2009 through the issuance of Accounting Standards Update (ASU) 2009-16. The new standard provides guidance to improve the relevance, representational faithfulness, and comparability of the information that an entity provides in its financial statements about a transfer of financial assets; the effects of a transfer on its financial position, financial performance, and cash flows; and a transferor's continuing involvement, if any, in transferred financial assets. The Company will adopt the new guidance in 2010 and is evaluating the impact it will have, if any, on its consolidated financial statements.

In June 2009, the FASB issued new guidance relating to the variable interest entities. The new guidance, which was issued as SFAS No. 167, *Amendments to FASB Interpretation No. 46(R)*, was adopted into Codification in December 2009. The objective of the guidance is to improve financial reporting by enterprises involved with variable interest entities and to provide more relevant and reliable information to users of financial statements. SFAS No. 167 is effective as of January 1, 2010. The Company does not expect the adoption of the new guidance to have a material impact on its consolidated financial statements.

In January 2010, the FASB issued ASU 2010-04, *Accounting for Various Topics - Technical Corrections to SEC Paragraphs*. ASU 2010-04 makes technical corrections to existing SEC guidance including the following topics: accounting for subsequent investments, termination of an interest rate swap, issuance of financial statements subsequent events, use of residential method to value acquired assets other than goodwill, adjustments in assets and liabilities for holding gains and losses, and selections of discount rate used for measuring defined benefit obligation. The Company does not expect the adoption of ASU 2010-04 to have a material impact on its consolidated financial statements.

In January 2010, the FASB issued ASU No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements*. ASU 2010-06 amends Subtopic 820-10 to clarify existing disclosures, require new disclosures, and includes conforming amendments to guidance on employers' disclosures about postretirement benefit plan assets. ASU 2010-06 is effective for interim and annual periods beginning after December 15, 2009, except for disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010 and for interim periods within those fiscal years. The Company does not expect the adoption of ASU 2010-06 to have a material impact on its consolidated financial statements.

Table of Contents**FIRST NATIONAL CORPORATION****Notes to Consolidated Financial Statements (Continued)****Note 2. Securities**

The Company invests in U.S. agency and mortgage-backed securities, obligations of states and political subdivisions, corporate equity securities and restricted securities. Restricted securities include required equity investments in certain correspondent banks which have no readily determinable market value. Amortized costs and fair values of securities available for sale at December 31, 2009 and 2008, were as follows:

	2009 (in thousands)			Fair Value
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized (Losses)	
U.S. agency and mortgage-backed securities	\$ 42,654	\$ 1,593	\$ (32)	\$ 44,215
Obligations of states and political subdivisions	15,551	326	(171)	15,706
Corporate equity securities	19	189		208
	\$ 58,224	\$ 2,108	\$ (203)	\$ 60,129

	2008 (in thousands)			Fair Value
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized (Losses)	
U.S. agency and mortgage-backed securities	\$ 39,296	\$ 945	\$ (42)	\$ 40,199
Obligations of states and political subdivisions	14,755	91	(535)	14,311
Corporate equity securities	16	265		281
	\$ 54,067	\$ 1,301	\$ (577)	\$ 54,791

At December 31, 2009 and 2008, investments in an unrealized loss position that are temporarily impaired were as follows:

	2009 (in thousands)					
	Less than 12 months		12 months or more		Total	
	Fair Value	Unrealized (Loss)	Fair Value	Unrealized (Loss)	Fair Value	Unrealized (Loss)

Table of Contents**FIRST NATIONAL CORPORATION****Notes to Consolidated Financial Statements (Continued)**

The tables above provide information about securities that have been in an unrealized loss position for less than twelve consecutive months and securities that have been in an unrealized loss position for twelve consecutive months or more. Management evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Impairment is considered to be other-than temporary if the Company (1) intends to sell the security, (2) more likely than not will be required to sell the security before recovering its cost, or (3) does not expect to recover the security's entire amortized cost basis. Presently, the Company does not intend to sell any of these securities, will not be required to sell these securities, and expects to recover the entire amortized cost of all the securities.

During 2009, six obligations of state and political subdivisions experienced a rating downgrade and four obligations of state and political subdivisions were no longer receiving ratings by Moody's or S&P. This was the direct result of downgrades of the insurers of these bonds. The bonds that were downgraded were still considered investment grade. For the four obligations of state and political subdivisions that are no longer rated, the Company evaluates the financial condition of the state and political subdivision on a quarterly basis. At December 31, 2009, there was one U.S. agency and mortgage-backed security and eight obligations of state and political subdivisions in an unrealized loss position. One hundred percent of the Company's investment portfolio that is rated is considered investment grade. The weighted-average re-pricing term of the portfolio was 3.7 years at December 31, 2009.

The amortized cost and fair value of securities available for sale at December 31, 2009 by contractual maturity are shown below. Expected maturities of mortgage-backed securities will differ from contractual maturities because borrowers may have the right to prepay obligations with or without call or prepayment penalties. Corporate equity securities and restricted securities are not included in the maturity categories in the following maturity summary because they do not have a stated maturity date.

	(in thousands)	
	Amortized Cost	Fair Value
Due within one year	\$ 250	\$ 251
Due after one year through five years	5,428	5,518
Due after five years through ten years	15,548	16,173
Due after ten years	36,979	37,979
Corporate equity securities	19	208
	\$ 58,224	\$ 60,129

Proceeds from sales and calls of securities available for sale during 2009, 2008 and 2007 were \$6.0 million, \$4.8 million and \$11.7 million, respectively. Gross gains of \$10 thousand, \$2 thousand and \$4 thousand were realized on those sales during 2009, 2008 and 2007, respectively. Gross losses of \$107 thousand were realized on those sales during 2007.

Securities having a book value of \$34.9 million and \$46.6 million at December 31, 2009 and 2008 were pledged to secure other borrowings, public deposits and for other purposes required by law.

The Company's investment in FHLB stock totaled \$2.6 million at December 31, 2009. FHLB stock is generally viewed as a long-term investment and as a restricted security, which is carried at cost, because there is no market for the stock, other than the FHLBs or member institutions. Therefore, when evaluating FHLB stock for impairment, its value is based on the ultimate recoverability of the par value rather than by recognizing temporary declines in value. Despite the FHLB's temporary suspension of repurchases of excess capital stock in 2009, we do not consider this investment to be other-than-temporarily impaired at December 31, 2009, and no impairment has been recognized. FHLB stock is shown in restricted securities on the balance sheet and is not part of the AFS securities portfolio.

Table of Contents**FIRST NATIONAL CORPORATION****Notes to Consolidated Financial Statements (Continued)****Note 3. Loans**

Loans at December 31, 2009 and 2008 are summarized as follows:

	(in thousands)	
	2009	2008
Mortgage loans on real estate:		
Construction	\$ 55,057	\$ 63,744
Secured by farm land	1,281	1,702
Secured by 1-4 family residential	118,675	116,821
Other real estate loans	200,001	196,163
Loans to farmers (except those secured by real estate)	3,530	3,158
Commercial and industrial loans (except those secured by real estate)	48,746	53,196
Consumer loans	13,619	14,572
Deposit overdrafts	157	1,630
All other loans	2,169	991
Total loans	\$ 443,235	\$ 451,977
Allowance for loan losses	7,106	5,650
Loans, net	\$ 436,129	\$ 446,327

The Company has a credit concentration in mortgage loans on real estate. These loans totaled \$375.0 million, or 85% of total loans and \$378.4 million, or 84% of total loans, at December 31, 2009 and 2008, respectively. Although the Company believes that its underwriting standards are generally conservative, the ability of its borrowers to meet their mortgage obligations is dependent upon local economic conditions. Construction loans totaled \$55.1 million and \$63.7 million, or 12% and 14% of total loans at December 31, 2009 and 2008, respectively.

The Company has a concentration of credit risk within the loan portfolio involving loans secured by hotels. This concentration totaled \$42.9 million at December 31, 2009, representing 78% of total equity and 10% of total loans. At December 31, 2008, this concentration totaled \$44.8 million representing 114% of total equity and 10% of total loans. These loans are included in other real estate loans in the above table. The Company experienced no loan losses related to this identified risk during the years ended December 31, 2009, 2008 and 2007.

Note 4. Allowance for Loan Losses

Transactions in the allowance for loan losses for the years ended December 31, 2009, 2008 and 2007 were as follows:

	(in thousands)		
	2009	2008	2007
Balance at beginning of year	\$ 5,650	\$ 4,207	\$ 3,978
Provision charged to operating expense	2,300	1,994	398
Loan recoveries	298	253	213
Loan charge-offs	(1,142)	(804)	(382)
Balance at end of year	\$ 7,106	\$ 5,650	\$ 4,207

A loan is considered impaired, in accordance with the impairment accounting guidance, when based on current information and events, it is probable that the Company will be unable to collect all amounts due from the borrower in accordance with the contractual terms of the loan. Impaired loans include nonperforming commercial loans but also include loans modified in troubled debt restructurings where concessions have been granted to borrowers experiencing financial difficulties. These concessions could include a reduction in the interest rate on the loan, payment extensions, forgiveness of principal, forbearance or other actions intended to maximize collection.

Included in certain loan categories in the impaired loans are troubled debt restructurings that were classified as impaired. At December 31, 2009, the Company had \$158 thousand in residential mortgages and \$646 thousand in commercial real estate loans that were modified in troubled debt restructurings and impaired. In addition to these amounts, the Company had troubled debt restructurings that were performing in accordance with their modified terms of \$5.1 million at December 31, 2009.

Table of Contents**FIRST NATIONAL CORPORATION****Notes to Consolidated Financial Statements (Continued)**

The following table presents the Company's impaired loans at December 31, 2009 and 2008. This table excludes performing troubled debt restructurings.

	(in thousands)	
	2009	2008
Impaired loans for which an allowance has been provided	\$ 7,314	\$ 1,336
Impaired loans for which no allowance has been provided	763	10,710
Total impaired loans	\$ 8,077	\$ 12,046
Allowance provided for impaired loans included in the allowance for loan losses	\$ 1,508	\$ 571
Average balance in impaired loans	\$ 11,225	\$ 5,866

Non-accrual loans excluded from impaired loan disclosure amounted to \$196 thousand, \$36 thousand and \$78 thousand at December 31, 2009, 2008 and 2007, respectively. If interest on these loans had been accrued, such income would have approximated \$6 thousand, \$2 thousand and \$6 thousand for 2009, 2008 and 2007, respectively. Loans past due greater than ninety days and still accruing interest at December 31, 2009, 2008 and 2007 totaled \$237 thousand, \$3.4 million and \$1.5 million, respectively.

Note 5. Premises and Equipment

Premises and equipment are summarized as follows at December 31, 2009 and 2008:

	(in thousands)	
	2009	2008
Land	\$ 5,061	\$ 5,003
Buildings and leasehold improvements	15,680	15,457
Furniture and equipment	9,382	9,028
Construction in process	532	267
	\$ 30,655	\$ 29,755
Less accumulated depreciation	9,507	8,236
	\$ 21,148	\$ 21,519

Depreciation expense included in operating expenses for 2009, 2008 and 2007 was \$1.3 million, \$1.2 million and \$1.1 million, respectively.

Note 6. Deposits

The aggregate amount of time deposits, in denominations of \$100 thousand or more, was \$125.2 million and \$79.9 million at December 31, 2009 and 2008, respectively.

The Bank obtains certain deposits through the efforts of third-party brokers. At December 31, 2009 and 2008, brokered deposits totaled \$42.9 million and \$49.0 million, respectively, and were included in time deposits on the Company's financial statements.

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

At December 31, 2009, the scheduled maturities of time deposits were as follows:

	(in thousands)
2010	\$ 157,532
2011	45,677
2012	8,637
2013	15,668
2014	9,215
	\$ 236,729

Note 7. Other Borrowings

The Bank had unused lines of credit totaling \$124.8 million and \$96.6 million available with non-affiliated banks at December 31, 2009 and 2008, respectively. These amounts primarily consist of a blanket floating lien agreement with the Federal Home Loan Bank of Atlanta in which the Bank can borrow up to 19% of its assets.

Table of Contents**FIRST NATIONAL CORPORATION****Notes to Consolidated Financial Statements (Continued)**

At December 31, 2009 and 2008, the Bank had borrowings from the Federal Home Loan Bank system totaling \$20.0 million and \$45.0 million, respectively, which mature through March 17, 2011. The interest rate on these borrowings ranged from 2.44% to 5.15% and the weighted average rate was 3.73% at December 31, 2009. The Bank had collateral pledged on these borrowings at December 31, 2009 including residential and commercial real estate loans totaling \$40.6 million, securities available for sale with a book value of \$18.6 million and Federal Home Loan Bank stock with a book value of \$2.6 million.

At December 31, 2009, the Bank had a \$144 thousand note payable, secured by a deed of trust, for land purchased to construct a banking office, which requires monthly payments of \$2 thousand, and matures January 3, 2016. The fixed interest rate on this loan is 4.00%.

At December 31, 2009, the Company had a \$42 thousand unsecured note payable, which requires monthly payments of \$11 thousand and matures September 12, 2011. The fixed interest rate on this loan is 7.35%.

The contractual maturities of other borrowings at December 31, 2009 were as follows:

	(in thousands)
2010	\$ 10,063
2011	10,023
2012	23
2013	24
2014	26
Later years	27
	\$ 20,186

Note 8. Company Obligated Mandatorily Redeemable Capital Securities

On June 8, 2004, First National (VA) Statutory Trust II (Trust II), a wholly-owned subsidiary of the Company, was formed for the purpose of issuing redeemable capital securities, commonly known as trust preferred securities. On June 17, 2004, \$5.0 million of trust preferred securities were issued through a pooled underwriting. The securities have a LIBOR-indexed floating rate of interest. The interest rate at December 31, 2009 was 2.85%. The securities have a mandatory redemption date of June 17, 2034, and are subject to varying call provisions beginning June 17, 2009. The principal asset of Trust II is \$5.2 million of the Company's junior subordinated debt securities with maturities and interest rates comparable to the trust preferred securities. The Trust's obligations under the trust preferred securities are fully and unconditionally guaranteed by the Company.

On July 24, 2006, First National (VA) Statutory Trust III (Trust III), a wholly-owned subsidiary of the Company, was formed for the purpose of issuing redeemable capital securities. On July 31, 2006, \$4.0 million of trust preferred securities were issued through a pooled underwriting. The securities have a fixed rate of interest of 7.26% until July 31, 2011. The securities then have a LIBOR-indexed floating rate of interest. The securities have a mandatory redemption date of October 1, 2036, and are subject to varying call provisions beginning October 1, 2011. The principal asset of Trust III is \$4.1 million of the Company's junior subordinated debt securities with maturities and interest rates comparable to the trust preferred securities. The Trust's obligations under the trust preferred securities are fully and unconditionally guaranteed by the Company.

While these securities are debt obligations of the Company, they are included in capital for regulatory capital ratio calculations. Under present regulations, the trust preferred securities may be included in Tier 1 capital for regulatory capital adequacy purposes as long as their amount does not exceed 25% of Tier 1 capital, including total trust preferred securities. The portion of the trust preferred securities not considered as Tier 1 capital, if any, may be included in Tier 2 capital. At December 31, 2009, the total amount of trust preferred securities issued by the Trusts was included in the Company's Tier 1 capital.

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

On March 11, 2003, First National (VA) Statutory Trust I (Trust I), a wholly-owned subsidiary of the Company, was formed for the purpose of issuing redeemable capital securities. On March 26, 2003, \$3.0 million of trust preferred securities were issued through a pooled underwriting. The securities had a LIBOR-indexed floating rate of interest. The securities had a mandatory redemption date of March 26, 2033, and were subject to varying call provisions beginning March 26, 2008. The principal asset of Trust I was \$3.1 million of the Company's junior subordinated debt securities with maturities and interest rates comparable to the trust preferred securities. The Trust's obligations under the trust preferred securities were fully and unconditionally guaranteed by the Company. The Company redeemed the securities in whole on March 26, 2008.

FIRST NATIONAL CORPORATION

Notes to Consolidated Financial Statements (Continued)

Note 9. Income Taxes

The Company files income tax returns in the U.S. federal jurisdiction and the state of Virginia. With few exceptions, the Company is no longer subject to U.S. federal, state and local income tax examinations by tax authorities for years prior to 2006.

Table of Contents**FIRST NATIONAL CORPORATION****Notes to Consolidated Financial Statements (Continued)**

Net deferred tax assets consisted of the following components at December 31, 2009 and 2008:

	(in thousands)	
	2009	2008
Deferred Tax Assets		
Allowance for loan losses	\$ 2,416	\$ 1,862
Allowance for other real estate owned	338	
Interest on non-accrual loans	186	73
Unfunded pension liability	305	680
Split dollar liability	335	335
Gain on other real estate owned	763	
Other	78	26
	\$ 4,421	\$ 2,976
Deferred Tax Liabilities		
Depreciation	\$ 772	\$ 748
Prepaid pension	112	189
Securities available for sale	648	246
Discount accretion	10	9
Loan origination costs, net	123	101
Other	44	44
	\$ 1,709	\$ 1,337
Net deferred tax assets	\$ 2,712	\$ 1,639

The provision for income taxes for the years ended December 31, 2009, 2008 and 2007 consisted of the following:

	(in thousands)		
	2009	2008	2007
Current tax expense	\$ 2,605	\$ 2,499	\$ 3,002
Deferred tax (benefit)	(1,850)	(659)	(261)
	\$ 755	\$ 1,840	\$ 2,741

The income tax provision differs from the amount of income tax determined by applying the U.S. federal income tax rate to pretax income for the years ended December 31, 2009, 2008 and 2007, due to the following:

(in thousands)

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

	2009	2008	2007
Computed tax expense at statutory federal rate	\$ 988	\$ 2,061	\$ 2,886
Increase (decrease) in income taxes resulting from:			
Tax-exempt interest and dividend income	(202)	(188)	(161)
Other	(31)	(33)	16
	\$ 755	\$ 1,840	\$ 2,741

Note 10. Funds Restrictions and Reserve Balance

Transfers of funds from the banking subsidiary to the parent company in the form of loans, advances and cash dividends are restricted by federal and state regulatory authorities. At December 31, 2009, the aggregate amount of unrestricted funds which could be transferred from the banking subsidiary to the parent Company, without prior regulatory approval, totaled \$4.0 million.

The Bank must maintain a reserve against its deposits in accordance with Regulation D of the Federal Reserve Act. For the final weekly reporting period in the years ended December 31, 2009 and 2008, the aggregate amounts of daily average required balances were approximately \$710 thousand and \$555 thousand, respectively.

Table of Contents**FIRST NATIONAL CORPORATION****Notes to Consolidated Financial Statements (Continued)****Note 11. Benefit Plans*****Pension Plan***

The Bank has a noncontributory, defined benefit pension plan for all full-time employees over 21 years of age with at least one year of credited service. Benefits are generally based upon years of service and average compensation for the five highest-paid consecutive years of service. The Bank's funding practice has been to make at least the minimum required annual contribution permitted by the Employee Retirement Income Security Act of 1974, as amended, and the Internal Revenue Code of 1986, as amended.

In 2008, the Company adopted a change in accounting guidance for defined benefit pension and other postretirement plans. This guidance requires that defined benefit plan assets and obligations are to be measured as of the date of the employer's fiscal year-end. As a result of this adoption, the Company was required to change the measurement date for the pension plan assets and benefit obligations from October 1 to December 31 beginning in 2008. The following table provides a reconciliation of the changes in the plan benefit obligation and the fair value of assets for the periods ended December 31, 2009, 2008 and 2007.

	(in thousands)		
	2009	2008	2007
Change in Benefit Obligation

Discount rate	6.00%	6.25%	6.00%
Expected return on plan assets	8.00%	8.50%	8.50%
Rate of compensation increase	4.00%	4.00%	5.00%

The plan sponsor selects the expected long-term rate of return on assets assumption in consultation with their investment advisors and actuary. This rate is intended to reflect the average rate of earnings expected to be earned on the funds invested or to be invested to provide plan benefits. Historical performance is reviewed, especially with respect to real rates of return (net of inflation), for the major asset classes held or anticipated to be held by the trust, and for the trust itself. Undue weight is not given to recent experience, which may not continue over the measurement period, with higher significance placed on current forecasts of future long-term economic conditions.

Because assets are held in a qualified trust, anticipated returns are not reduced for taxes. Further, solely for this purpose, the plan is assumed to continue in force and not terminate during the period during which assets are invested. However, consideration is given to the potential impact of current and future investment policy, cash flow into and out of the trust, and expenses (both investment and non-investment) typically paid from plan assets (to the extent such expenses are not explicitly estimated within periodic cost).

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

The process used to select the discount rate assumption takes into account the benefit cash flow and the segmented yields on high-quality corporate bonds that would be available to provide for the payment of the benefit cash flow. A single effective discount rate, rounded to the nearest .25%, is then established that produces an equivalent discounted present value.

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

The pension plan's weighted-average asset allocations at the end of the plan year for 2009 and 2008, by asset category were as follows:

Asset Category	2009	2008
Mutual funds - fixed income	38%	32%
Mutual funds - equity	61%	63%
Other	1%	5%
Total	100%	100%

The trust fund is sufficiently diversified to maintain a reasonable level of risk without imprudently sacrificing return, with a targeted asset allocation of 40% fixed income and 60% equities. The Investment Manager selects investment fund managers with demonstrated experience and expertise, and funds with demonstrated historical performance for the implementation of the plan's investment strategy. The investment manager will consider both actively and passively managed investment strategies and will allocate funds across the asset classes to develop an efficient investment structure.

Table of Contents**FIRST NATIONAL CORPORATION****Notes to Consolidated Financial Statements (Continued)**

It is the responsibility of the trustee to administer the investments of the trust within reasonable costs, being careful to avoid sacrificing quality. These costs include, but are not limited to, management and custodial fees, consulting fees, transaction costs and other administrative costs chargeable to the trust.

Following is a description of the valuation methodologies used for assets measured at fair value.

Fixed income and equity funds: Valued at the net asset value of shares held at year-end.

Cash and cash equivalents: Valued at cost which approximates fair value.

The following table sets forth by level, within the fair value hierarchy, the Company's pension plan assets at fair value as of December 31, 2009:

	Fair Value Measurements at December 31, 2009			
	(in thousands)			
	Total	Level 1	Level 2	Level 3
Cash and cash equivalents	\$ 38	\$ 38	\$	\$
Fixed income funds	1,494	1,494		
Equity funds	2,389	2,389		
Total	\$ 3,921	\$ 3,921	\$	\$

The Company made cash contributions of \$200 thousand and \$170 thousand for the 2009 and 2008 plan years, respectively, and expects to contribute \$298 thousand for the 2010 plan year. The accumulated benefit obligation for the defined benefit pension plan was \$3.2 million and \$2.8 million at December 31, 2009 and 2008, respectively.

Estimated future benefit payments, which reflect expected future service, as appropriate, were as follows at December 31, 2009:

	(in thousands)
2010	\$ 24
2011	32
2012	32
2013	58
2014	64
Years 2015-2019	858

401(k) Plan

The Company maintains a 401(k) plan for all eligible employees. Participating employees may elect to contribute up to the maximum percentage allowed by the Internal Revenue Service, as defined in the plan. The Company makes matching contributions up to the first three percent of an employee's compensation contributed to the Plan. The amount that the Company matches is contributed for the benefit of the respective employee to the employee stock ownership plan (ESOP). All employees who are age nineteen or older are eligible. Employee contributions vest immediately. Employer matching contributions vest after three plan service years with the Company. The Company has the discretion to make a profit sharing contribution to the plan each year based on overall performance, profitability, and other economic factors. For the years ended December 31, 2009, 2008 and 2007, expense attributable to the Plan amounted to \$103 thousand, \$150 thousand and \$164 thousand, respectively.

Employee Stock Ownership Plan

On January 1, 2000, the Company established an employee stock ownership plan. The ESOP provides an opportunity for the Company to award shares of First National Corporation stock to employees at its discretion. Employees are eligible to participate in the ESOP effective immediately upon beginning service with the Company. Participants become 100% vested after three years of credited service. In addition to the 401(k) matching contributions made by the Company to the ESOP, the Board of Directors may make discretionary contributions, within certain limitations prescribed by federal tax regulations.

The ESOP operates as a leveraged ESOP. The ESOP's debt was incurred when the Company loaned the ESOP \$570 thousand from the proceeds the Company received from its bank note payable. The ESOP shares initially were pledged as collateral for its debt. As the debt is repaid, shares are released from collateral and allocated to employees, based on the

Table of Contents**FIRST NATIONAL CORPORATION****Notes to Consolidated Financial Statements (Continued)**

proportion of debt service paid in the year. The shares are deducted from shareholders' equity as unearned ESOP shares in the accompanying balance sheets. As shares are released from collateral, the Company reports compensation expense equal to the current market price of the shares, and the shares become outstanding for EPS computations. Dividends on allocated ESOP shares are recorded as a reduction of retained earnings; dividends on unallocated ESOP shares are recorded as a reduction of debt and accrued interest.

There was no compensation expense for the ESOP for the years ended December 31, 2009, 2008 and 2007.

Shares of the Company held by the ESOP at December 31, 2009, 2008 and 2007, are as follows:

	2009	2008	2007
Allocated shares	44,014	36,980	31,536
Unreleased shares	1,543	8,618	14,093
Total ESOP shares	45,557	45,598	45,629
Fair value of unreleased shares (in thousands)	\$ 15	\$ 140	\$ 317

Split Dollar Life Insurance Plan

On January 6, 1999, the Bank adopted a Director Split Dollar Life Insurance Plan. This Plan provides life insurance coverage to insurable outside directors of the Bank. The Bank owns the policies and is entitled to all values and proceeds. The Plan provides retirement benefits and the payment of benefits at the death of the insured director. The amount of benefits will be determined by the performance of the policies over the director's life.

Accounting guidance requires a company to recognize an obligation over an employee's service period based upon the substantive agreement with the employee such as the promise to maintain a life insurance policy or provide a death benefit postretirement. The Company adopted new accounting guidance on January 1, 2008 as a change in accounting principle through a cumulative-effect adjustment to retained earnings totaling \$651 thousand. The related effect on net income recognized during the years ended December 31, 2009 and 2008 was a benefit of \$42 thousand and expense of \$59 thousand, respectively.

Note 12. Commitments and Unfunded Credits

The Company, through its banking subsidiary is a party to credit related financial instruments with risk not reflected in the consolidated financial statements in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby letters of credit and commercial letters of credit. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets.

The Bank's exposure to credit loss is represented by the contractual amount of these commitments. The Bank follows the same credit policies in making commitments as it does for on-balance-sheet instruments.

At December 31, 2009 and 2008, the following financial instruments were outstanding whose contract amounts represent credit risk:

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

	(in thousands)	
	2009	2008
Commitments to extend credit and unfunded commitments under lines of credit	\$ 46,211	\$ 48,617
Stand-by letters of credit	6,002	7,068
Rate lock commitments		1,911

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The commitments for lines of credit may expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Bank, is based on management's credit evaluation of the customer.

Table of Contents**FIRST NATIONAL CORPORATION****Notes to Consolidated Financial Statements (Continued)**

Unfunded commitments under commercial lines of credit, revolving credit lines and overdraft protection agreements are commitments for possible future extensions of credit to existing customers. These lines of credit are collateralized as deemed necessary and usually do not contain a specified maturity date and may not be drawn upon to the total extent to which the Bank is committed.

Commercial and standby letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. Those letters of credit are primarily issued to support public and private borrowing arrangements. Essentially all letters of credit issued have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Bank generally holds collateral supporting those commitments if deemed necessary.

At December 31, 2009, the Bank had no locked-rate commitments to originate mortgage loans and had \$210 thousand in loans held for sale. Risks arise from the possible inability of counterparties to meet the terms of their contracts. The Bank does not expect any counterparty to fail to meet its obligations.

The Bank has cash accounts in other commercial banks. The amount on deposit at these banks at December 31, 2009 exceeded the insurance limits of the Federal Deposit Insurance Corporation by \$52 thousand.

Note 13. Transactions with Related Parties

During the year, executive officers and directors (and companies controlled by them) were customers of and had transactions with the Company in the normal course of business. These transactions were made on substantially the same terms as those prevailing for other customers.

At December 31, 2009 and 2008, these loans totaled \$11.1 million and \$9.9 million, respectively. During 2009, total principal additions were \$2.6 million and total principal payments were \$1.4 million.

Deposits from related parties held by the Bank at December 31, 2009 and 2008 amounted to \$3.1 million and \$3.5 million, respectively.

Note 14. Lease Commitments

The Company was obligated under noncancelable leases for banking premises. Total rental expense for operating leases for 2009, 2008 and 2007 was \$227 thousand, \$162 thousand and \$74 thousand, respectively. Minimum rental commitments under noncancelable leases with terms in excess of one year as of December 31, 2009 were as follows:

	(in thousands)
	Operating Leases
2010	\$ 171
2011	167
2012	167
2013	148
2014	94
2015 and thereafter	166
Total minimum payments	\$ 913

Note 15. Dividend Reinvestment Plan

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

The Company has in effect a Dividend Reinvestment Plan (DRIP) which provides an automatic conversion of dividends into common stock for enrolled shareholders. Stock was purchased on the open market on each dividend payable date during the first two quarters of 2009. On August 5, 2009, the Board of Directors of the Company passed a resolution authorizing the Company to issue common shares to the DRIP, beginning on the next dividend payment date, September 11, 2009. Common shares are purchased at a price which is based on the average closing prices of the shares as quoted on the Over-the-Counter Bulletin Board Market for the 10 business days immediately preceding the dividend payment date.

The Company purchased 6,631, 10,193 and 7,885 shares on the open market for the years ended December 31, 2009, 2008 and 2007, respectively. The Company issued 8,861 common shares to the DRIP during the year ended December 31, 2009.

Table of Contents**FIRST NATIONAL CORPORATION****Notes to Consolidated Financial Statements (Continued)****Note 16. Fair Value Measurements***Determination of Fair Value*

The Company uses fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. In accordance with the *Fair Value Measurement and Disclosures* topic of FASB ASC, the fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Company's various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument.

The recent fair value guidance provides a consistent definition of fair value, which focuses on exit price in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. If there has been a significant decrease in the volume and level of activity for the asset or liability, a change in valuation technique or the use of multiple valuation techniques may be appropriate. In such instances, determining the price at which willing market participants would transact at the measurement date under current market conditions depends on the facts and circumstances and requires the use of significant judgment. The fair value is a reasonable point within the range that is most representative of fair value under current market conditions.

Fair Value Hierarchy

In accordance with this guidance, the Company groups its financial assets and financial liabilities generally measured at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value.

- Level 1 Valuation is based on quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. Level 1 assets and liabilities generally include debt and equity securities that are traded in an active exchange market. Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities.
- Level 2 Valuation is based on inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The valuation may be based on quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the asset or liability.
- Level 3 Valuation is based on unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which determination of fair value requires a significant management judgment or estimation.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

The following describes the valuation techniques used by the Company to measure certain financial assets and liabilities recorded at fair value on a recurring basis in the financial statements:

Securities available for sale

Securities available for sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted market prices, when available (Level 1). If quoted market prices are not available, fair values are measured utilizing independent valuation techniques of identical or similar securities for which significant assumptions are derived primarily from or corroborated by observable market data. Third party vendors

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

compile prices from various sources and may determine the fair value of identical or similar securities by using pricing models that considers observable market data (Level 2).

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

The following tables present the balances of financial assets measured at fair value on a recurring basis as of December 31, 2009 and 2008.

Description	Fair Value Measurements at December 31, 2009 Using (in thousands)			
	Balance as of December 31, 2009	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets				
Securities available for sale	\$ 60,129	\$ 208	\$ 59,921	\$

Description	Balance as of December 31, 2008	Fair Value Measurements at December 31, 2008 Using (in thousands)		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets				
Securities available for sale	\$ 54,791	\$ 281	\$ 54,510	\$

Certain financial assets are measured at fair value on a nonrecurring basis in accordance with GAAP. Adjustments to the fair value of these assets usually result from the application of lower-of-cost-or-market accounting or write-downs of individual assets.

The following describes the valuation techniques used by the Company to measure certain assets recorded at fair value on a nonrecurring basis in the financial statements:

Loans held for sale

Loans held for sale are carried at the lower of cost or market value. These loans currently consist of one-to-four family residential loans originated for sale in the secondary market. Fair value is based on the price secondary markets are currently offering for similar loans using observable market data which is not materially different than cost due to the short duration between origination and sale (Level 2). As such, the Company records any fair value adjustments on a nonrecurring basis. No nonrecurring fair value adjustments were recorded on loans held for sale during the year ended December 31, 2009.

Impaired Loans

Loans are designated as impaired when, in the judgment of management based on current information and events, it is probable that all amounts due according to the contractual terms of the loan agreement will not be collected. The measurement of loss associated with impaired loans can be based on either the observable market price of the loan or the fair value of the collateral. Fair value is measured based on the value of the collateral securing the loans. Collateral may be in the form of real estate or business assets including equipment, inventory, and accounts receivable. The vast majority of the collateral is real estate. The value of real estate collateral is determined utilizing an income or market valuation approach based on an appraisal conducted by an independent, licensed appraiser outside of the Company using observable market data (Level 2). However, if the collateral is a house or building in the process of construction or if an appraisal of the real estate property is over two years old, then the fair value is considered Level 3. The value of business equipment is based upon an outside appraisal if deemed significant, or the net book value on the applicable business's financial statements if not considered significant using observable market data. Likewise, values for inventory and accounts receivables collateral are based on financial statement balances or aging reports (Level 3). Impaired loans allocated to the Allowance for Loan Losses are measured at fair value on a nonrecurring basis. Any fair value adjustments are recorded in the period incurred as provision for loan losses on the Consolidated Statements of Income.

Other real estate owned

Loans are transferred to other real estate owned when the collateral securing them is foreclosed on or acquired through a deed in lieu of foreclosure. The measurement of loss associated with other real estate owned is based on the fair value of the collateral compared to the unpaid loan balance and anticipated costs to sell the property. If there is a contract for the sale of a property, and management reasonably believes the contract will be executed, fair value is based on the sale price in that contract (Level 1). Lacking such a contract, the value of real estate collateral is determined utilizing an income or market valuation approach based on an appraisal conducted by an independent, licensed appraiser outside of the Company using observable market data (Level 2). However, if the collateral is a house or building in the process of construction or if an appraisal of the real estate property is over two years old, then the fair value is considered Level 3. Any fair value adjustments to other

real estate owned are recorded in the period incurred and expensed against current earnings.

Table of Contents**FIRST NATIONAL CORPORATION****Notes to Consolidated Financial Statements (Continued)**

The following tables summarize the Company's financial assets that were measured at fair value on a nonrecurring basis as of December 31, 2009 and 2008.

Description	Carrying Value at December 31, 2009 (in thousands)

Other real estate owned	\$	6,261	\$	\$ 6,261

The fair value of a financial instrument is the current amount that would be exchanged between willing parties, other than in a forced liquidation. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Company's various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument. Certain financial instruments and all nonfinancial instruments are excluded from disclosure requirements. Accordingly, the aggregate fair value amounts presented may not necessarily represent the underlying fair value of the Company.

Accounting guidance requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis. The methodologies for estimating the fair value of financial assets and financial liabilities that are measured at fair value on a recurring or non-recurring basis are discussed above. The methodologies for other financial assets and financial liabilities are discussed below:

Cash and Cash Equivalents

The carrying amounts of cash and short-term instruments approximate fair values.

Table of Contents**FIRST NATIONAL CORPORATION****Notes to Consolidated Financial Statements (Continued)****Loans**

For variable-rate loans that re-price frequently and with no significant change in credit risk, fair values are based on carrying values. Fair values for all other loans are estimated using discounted cash flow analyses, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. Fair values for nonperforming loans are estimated using discounted cash flow analyses or underlying collateral values, where applicable.

Deposit Liabilities

The fair value of demand deposits, savings accounts, and certain money market deposits is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit is estimated using the rates currently offered for deposits of similar remaining maturities.

Accrued Interest

The carrying amounts of accrued interest approximate fair value.

Borrowings

The carrying amounts of federal funds purchased and other short-term borrowings maturing within ninety days approximate their fair values. Fair values of all other borrowings are estimated using discounted cash flow analyses based on the Company's current incremental borrowing rates for similar types of borrowing arrangements.

Commitments and Unfunded Credits

The fair value of commitments to extend credit is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates.

The fair value of stand-by letters of credit is based on fees currently charged for similar agreements or on the estimated cost to terminate them or otherwise settle the obligations with the counterparties at the reporting date. At December 31, 2009 and 2008, fair value of loan commitments and standby letters of credit was immaterial.

The estimated fair values of the Company's financial instruments at December 31, 2009 and 2008 were as follows:

	(in thousands)			
	2009		2008	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial Assets				
Cash and short-term investments	\$ 14,977	\$ 14,977	\$ 10,490	\$ 10,490
Securities available for sale	60,129	60,129	54,791	54,791
Loans, net	436,129	434,457	446,327	438,754
Loans held for sale	210	210		
Accrued interest receivable	1,710	1,710	1,763	1,763
Financial Liabilities				
Deposits	\$ 463,886	\$ 421,115	\$ 447,493	\$ 450,505

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

Federal funds purchased			2,456	2,456
Other borrowings	20,186	20,527	45,397	45,998
Company obligated mandatorily redeemable capital securities	9,279	9,784	9,279	11,532
Accrued interest payable	824	824	1,121	1,121

The Company assumes interest rate risk (the risk that general interest rate levels will change) as a result of its normal operations. As a result, the fair values of the Company's financial instruments will change when interest rate levels change and that change may be either favorable or unfavorable to the Company. Management attempts to match maturities of assets and liabilities to the extent believed necessary to minimize interest rate risk. However, borrowers with fixed rate

Table of Contents**FIRST NATIONAL CORPORATION****Notes to Consolidated Financial Statements (Continued)**

obligations are less likely to prepay in a rising rate environment and more likely to prepay in a falling rate environment. Conversely, depositors who are receiving fixed rates are more likely to withdraw funds before maturity in a rising rate environment and less likely to do so in a falling rate environment. Management monitors rates and maturities of assets and liabilities and attempts to minimize interest rate risk by adjusting terms of new loans and deposits and by investing in securities with terms that mitigate the Company's overall interest rate risk.

Note 17. Regulatory Matters

The Company (on a consolidated basis) and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's and the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. Prompt corrective action provisions are not applicable to bank holding companies.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios (set forth in the following table) of total (as defined in the regulations) and Tier 1 capital (as defined) to risk-weighted assets (as defined), and of Tier 1 capital to average assets. Management believes, as of December 31, 2009 and 2008, that the Company and the Bank met all capital adequacy requirements to which they are subject.

As of December 31, 2009, the most recent notification from the Federal Reserve Bank categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum total risk-based, Tier 1 risk-based, and Tier 1 leverage ratios as set forth in the following table. There are no conditions or events since that notification that management believes have changed the Bank's category.

The Company's and the Bank's actual capital amounts and ratios are also presented in the following table.

	(amounts in thousands)					
	Actual		Minimum Capital Requirement		Minimum To Be Well Capitalized Under Prompt Corrective Action Provisions

Note 18. Capital Purchase Program

On March 13, 2009, the Company entered into a Letter Agreement and Securities Purchase Agreement - Standard Terms (collectively, the Purchase Agreement) with the Treasury Department, pursuant to which the Company sold (i) 13,900 shares of its Fixed Rate Cumulative Perpetual Preferred Stock, Series A, par value \$1.25 per share and liquidation preference \$1,000 per share (the Preferred Stock) and (ii) a warrant (the Warrant) to purchase 695 shares of its Fixed Rate Cumulative

Table of Contents

FIRST NATIONAL CORPORATION

Notes to Consolidated Financial Statements (Continued)

Perpetual Preferred Stock, Series B (the Warrant Preferred Stock), at an exercise price of \$1.25 per share, for an aggregate purchase price of \$13.9 million in cash. The Treasury immediately exercised the Warrant and, after net settlement, received 695 shares of the Company's Warrant Preferred Stock, which has a liquidation preference amount of \$1,000 per share. Closing of the sale occurred on March 13, 2009 and increased Tier 1 and total capital by \$13.9 million. The Preferred Stock will pay cumulative dividends at a rate of 5% per annum for the first five years, and thereafter at a rate of 9% per annum. The Warrant Preferred Stock will pay cumulative dividends at a rate of 9% per annum from the date of issuance. The discount on the Preferred Stock is amortized over a five year period using the constant effective yield method.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

The Company's management has evaluated, under the supervision and with the participation of the Chief Executive Officer and Chief Financial Officer, the effectiveness of disclosure controls and procedures as of December 31, 2009 pursuant to Rule 13a-15(b) under the Securities Exchange Act of 1934 (the Exchange Act). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of December 31, 2009, the disclosure controls and procedures are effective in ensuring that the information required to be disclosed in Exchange Act reports is (1) recorded, processed, summarized and reported in a timely manner and (2) accumulated and communicated to the Company's management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. Refer to Item 8 of this report for the Management's Report on the Effectiveness of Internal Controls over Financial Reporting.

There were no changes in the Company's internal control over financial reporting identified in connection with the evaluation of it that occurred during the Company's last fiscal quarter that materially affected, or is reasonably likely to materially affect, internal control over financial reporting.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Information required by this Item is set forth under the headings Election of Directors Nominees, Executive Officers Who Are Not Directors, Section 16(a) Beneficial Ownership Reporting Compliance, Code of Conduct and Ethics, Committees and Director Selection Process in the Company's Proxy Statement for the 2010 Annual Meeting of Shareholders (the Proxy Statement), which information is incorporated herein by reference.

Item 11. Executive Compensation

Information required by this Item is set forth under the headings Executive Compensation and Director Compensation in the Proxy Statement, which information is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information required by this Item is set forth under the heading Stock Ownership of Directors and Executive Officers and Stock Ownership of Certain Beneficial Owners in the Proxy Statement, which information is incorporated herein by reference.

The Company does not have any compensation plans or other arrangements under which equity securities are authorized for issuance.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Information required by this Item is set forth under the headings Certain Relationships and Related Party Transactions and Director Independence in the Proxy Statement, which information is incorporated herein by reference.

Item 14. Principal Accounting Fees and Services

Information required by this Item is set forth under the headings Auditor Fees and Services and Policy for Approval of Audit and Permitted Non-Audit Services in the Proxy Statement, which information is incorporated herein by reference.
