The Basel Committee on Banking Supervision announced new global capital and liquidity standards for financial institutions, such as us, as part of its comprehensive set of reform measures (Basel III) developed in response to the recent global financial crisis. It is expected that new regulatory requirements under the announced standards will likely be more stringent than those currently applicable to financial institutions and will be implemented in phases from 2013.

A reporting segment is a unit whose individual financial information, which is separated from other units that constitute MUFG, is readily available, and a unit on which MUFG's Board of Directors regularly reviews to make decisions regarding distribution of management resources and to evaluate MUFG's overall business performance.

MUFG's operations are conducted under an integrated business group system where its subsidiaries and affiliates are grouped into the following three business areas Retail, Corporate and Trust Assets.
