* Annualized

^ Annualized Since June 1, 2010, when the current Advisers became investment advisers to the Fund.

The performance data quoted represents past performance. Past performance is no guarantee of future results. The investment return and the principal value of an investment will fluctuate and shares, if sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted.

Since the new Advisers were appointed and the Fund restructured in June of 2010, the Fund's net assets have increased 1.8% on an annualized basis while the S&P has increased 5.0%.

Among the investments having the most significant impact on performance during the period were the Fund's large holdings in hedge funds. All of the hedge funds in the portfolio outperformed the S&P 500 during the six month period ending September 30, 2011. For the six-month period, Wolf Creek Partners, L.P., in which the Fund owns a \$45.4 million stake (19.1% of assets), returned -8.1%; Bay Pond Partners, L.P., a \$39.9 million stake (16.8% of assets), returned -12.8%; J. Caird Partners, L.P., a \$17.8 million stake (7.3% of assets), returned -12.9%; and Iguazu Partners, L.P. a \$4.6 million stake (1.9% of the Fund's assets) returned 0.7%. North River Partners, L.P., in which the Fund owns a \$17.4 million stake (7.5% of the Fund's assets), was the top performing hedge fund in the portfolio returning positive 9.1% for the period.

A significant number of new investments were made during the six month period including Freeport-McMoRan Copper and Gold Inc., Penn Virginia Resource Partners L.P., Inergy, L.P., Alliance Resource Partners L.P., Boardwalk Pipeline Partners L.P., Buckeye Partners L.P., Republic Services Inc., Harris Corporation, Kinder Morgan Energy Partners L.P., POSCO (ADR), and Nestle.

During the six month period ending September 30, 2011, the Fund sold out of all of its shares in 1st United Bancorp Inc. and Meridian Interstate Bancorp Inc. The Fund also sold a majority of its First Republic Bank restricted shares through the bank's secondary offering for net proceeds of approximately \$13.7 million. As of March 31, 2011, First Republic Bank represented about 5.5% of the Fund's portfolio. As a result of the sale, First Republic Bank shares represented 0.6% of the Fund's portfolio as of September 30, 2011. The Fund also sold a portion of its holdings in RMR Asia Pacific Real Estate Fund.

Letter from the Advisers

First Opportunity Fund, Inc.
September 30, 2011 (Unaudited)

Wellington Management sub-advises the legacy portfolio, which consists of financial service investments and still makes up a substantial portion of the Fund's assets. As of September 30, 2011 the legacy portion of the portfolio was \$53.4 million or 22.4% of the Fund's assets.

During the six month period ended September 30, 2011, the three largest eliminations from the legacy sub-advised portfolio included Indian equity holdings Shriram Transport Finance, Manappuram Finance, and Tata Motors. Indian equities rallied in April, pushing the shares of these companies higher. The sub-adviser opportunistically sold the Fund's shares in each of the companies as they reached target prices. During the period the sub-advisers also removed the remaining protection in the form of credit default swap exposure as the legacy sub-advised portfolio continued to wind down.

During the six month period ended September 30, 2011, the S&P 500 (-13.8%) outpaced global equities (-19.3%) as measured by the MSCI All Country World ex US Index. US equities declined during the period as escalating global growth concerns, challenges in Europe, and mixed economic data combined to push the S&P 500 Index near bear-market territory (down 20% from its April high). Early in the period strong corporate earnings and manufacturing data provided a tail wind for stocks, despite fears about continuing inflationary pressures and the end of the Federal Reserve's second round of quantitative easing. In an effort to bolster the economy, the Federal Reserve pledged to keep benchmark interest rates at record lows at least through mid-2013, acknowledging that economic growth had been considerably slower than forecast.

However, the second half of the period saw risk aversion amplified by political brinkmanship over an increase in the federal debt ceiling, which caused both Moody's and S&P to put US government debt on review for downgrade. Investors were unimpressed with the debt-ceiling compromise in Washington, and confidence eroded further after S&P reduced the federal government's credit rating in early August. Employment unexpectedly stagnated in August as employers added no net new jobs for the first time in almost a year. One bright spot in September was a fourth consecutive rise in the Conference Board's index of leading indicators, which helped subdue fears that a recession is inevitable.

Financial stocks, as measured by the SNL Daily Thrift Index (-23.3%) and NASDAQ Banks Principal Only Index (-24.1), declined during the six month period ended September 30, 2011, underperforming US equities (-13.8%) as measured by the S&P 500 Index. Financials fell precipitously as worries about potential exposure to and contagion from shaky European banks took hold.

The European crisis deepened further in the second half of the period as investors became increasingly alarmed at the interconnectedness of European sovereign risk to the global financial system. Fears of a double dip recession in the US have been renewed. Although there has been modest growth in the US, a very bearish outcome in Europe could potentially push the US into recession. The US housing market continues to be a headwind for both the financial sector and US households. Small and mid cap banks are challenged by the continued housing slump, while large banks are still working through issues stemming from legacy residential real estate holdings. Pending regulation from the Dodd-Frank Bill continues to loom over the sector as the final outcome still remains unclear. In addition, fee growth from debit and credit cards have been challenged given the passage of the Durbin Amendment, and workouts on poor-performing loans remain a headwind.

First Opportunity Fund, Inc.

Letter from the Advisers

September 30, 2011 (Unaudited)

Looking forward we are very optimistic about the long term prospects of our investments. As the legacy portfolio continues to wind down, we are confident our large positions in hedge funds will complement our investments in operating companies. We believe the Fund provides a unique opportunity for investors and look forward to continuing our partnership with our long-term stockholders.

Sincerely,

Stephen C. Miller

The views and opinions in the preceding commentary are subject to change. This material represents an assessment of the market environment at a specific point in time, should not be relied upon as investment advice and is not intended to predict or depict performance of any investment.

Note to Stockholders on Investments in Hedge Funds: The Fund's investment advisers feel it is important that stockholders be aware that the Fund has highly concentrated positions in certain hedge funds and may take concentrated positions in other securities. Concentrating investments in a fewer number of securities (including investments in hedge funds) may involve a degree of risk that is greater than a fund which has less concentrated investments spread out over a greater number of securities. For example, the value of the Fund's net assets will fluctuate significantly based on the fluctuation in the value of the hedge funds in which it invests. In addition, investments in hedge funds can be highly volatile and may subject investors to heightened risk and higher operating expenses than another closed-end fund with a different investment focus.

Note to Stockholders on the Fund's Discount. As most stockholders are aware, the Fund's shares presently trade at a significant discount to net asset value. The Fund's board of directors is aware of this, monitors the discount and periodically reviews the limited options available to mitigate the discount. There are numerous factors affecting the Fund's discount over which the board and management have little or no control. In the end, the market sets the Fund's share price. The Fund's investment objective, its current long exposure in the legacy portfolio of financial sector stocks and the fact that it is not traded on a national exchange are likely factors that exacerbate the discount beyond other general equity closed-end investment companies. For long-term stockholders of a closed-end fund, we believe the Fund's discount should only be one of many factors taken into consideration at the time of your investment decision. If you buy shares at a 20% discount and hold for 10 years while the Fund returns 8% per annum and then sell at a 20% discount, your return on investment will be the same as if you bought the same shares at net asset value and sold at net asset value. Because the investment philosophy of the Advisers is long-term, we believe that stockholders who invest in the Fund for the short-term arbitrage on the discount ultimately may be disappointed. In contrast, we hope that stockholders who understand the Fund's goals and, like the Fund's largest stockholders, are long-term holders, will be rewarded for their patience.

Notes to Financial Statements

First Opportunity Fund, Inc.
September 30, 2011 (Unaudited)

NOTE 1. FUND ORGANIZATION

First Opportunity Fund, Inc. (the "Fund") was incorporated in Maryland on March 3, 1986, as a closed-end, management investment company. As of October 14, 2008, the Fund changed its name from First Financial Fund, Inc. to First Opportunity Fund, Inc. As of July 28, 2008, the Fund is non-diversified and its primary investment objective is total return.

In seeking to achieve its investment objective, the Fund invests a significant portion of its investments (the "Hedge Fund Portfolio") in private investment partnerships and similar investment vehicles, typically referred to as hedge funds ("Hedge Funds"). In addition, a portion of the Fund's assets is invested primarily in equity securities issued by financial services companies (the "Legacy Portfolio"). As discussed below, under the terms of the sub-advisory agreement, Wellington Management Company LLP ("Wellington" or the "Sub-Adviser"), currently serves as sub-adviser to the Fund and manages the Legacy Portfolio with a view toward holding and opportunistically liquidating the assets. As these assets are sold, the cash proceeds are available to Rocky Mountain Advisers, LLC ("RMA") and Stewart Investment Advisers ("SIA") (together, RMA and SIA are the "Advisers") for investment in a wide range of securities which could include, among others, U.S. or foreign common stocks, debt instruments, preferred stocks, securities convertible into common stocks, cash, and cash equivalents (the "Advisers' Portfolio").

Stockholders should be aware that an investment in the Fund involves a high degree of risk. In addition, an investment in the Fund entails unique risks because the Hedge Funds in which the Fund invests are private entities with limited regulatory oversight and disclosure obligations. Please refer to additional discussion of these risks in Note 2, below.

As of September 30, 2011, the portion of the Fund under the direct management of the Advisers represented approximately 77.6% of the Fund's net assets, including 25.1% of the Fund's net assets in the Advisers' Portfolio and 52.5% invested in Hedge Funds. The Legacy Portfolio represented approximately 22.4% of the Fund.

At a stockholder meeting held on May 3, 2010, stockholders approved new investment co-advisory agreements with RMA and SIA (the "Advisory Agreements"), as well as a new sub-advisory agreement with Wellington (the "Sub-Advisory Agreement"). Under the new structure, which became effective June 1, 2010, with respect to the portion of the portfolio managed by RMA and SIA, the Advisers made a substantial investment in two Hedge Funds managed by an affiliate of Wellington by transferring in-kind selected equity securities valued at \$77,773,022. Since then, the Advisers have made investments in other Hedge Funds also managed by an affiliate of Wellington. Separately, Wellington acts as sub-adviser with respect to a discrete portion of the portfolio containing positions with respect to which Wellington has long-term familiarity in its role as the Fund's prior adviser. The term of Wellington's role as sub-adviser is for a 2 year period and will be limited to managing and, if appropriate, opportunistically liquidating a portion of the Fund's legacy holdings.

On May 3, 2010, stockholders also approved eliminating the Fund's fundamental concentration policy which previously required that the Fund invest at least 65% of its assets in financial services companies. As a result, the Fund may not invest more than 25% of its assets in the financial services or any other industry. While the Advisers and the Sub-Adviser do not intend to invest more than 25% of the Fund's assets in a single industry, the Fund does not look through its investments in the Hedge Funds, some of which have significant exposure to the financial services sector, to determine whether the Fund exceeds the 25% limit. As a result, the Fund may be indirectly concentrated in an industry or group of industries by virtue of the Fund's investments in Hedge Funds.

The New York Stock Exchange (the "NYSE") suspended trading of the Fund's shares prior to the market opening on May 12, 2010, because of the restructuring proposals approved by a majority of the Fund's

First Opportunity Fund, Inc.

Notes to Financial Statements

September 30, 2011 (Unaudited)

stockholders. The NYSE does not have a listing standard expressly prohibiting or otherwise regulating the Fund's ability to invest in private investment funds nor does federal securities law prohibit it. The NYSE indicated that it would exercise its discretionary authority under the NYSE rules and initiate its de-listing process based on it being in the public interest. At the opening of the market on May 12, 2010, the Fund's shares stopped trading on the NYSE, but continued to trade in the over-the-counter market. The Fund notified stockholders on May 11, 2010, of its new trading symbol: FOFI. Stockholders should be able to continue to trade their Fund shares through their existing brokerage relationships, although under the new symbol.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES AND SECURITIES VALUATION

The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements. The preparation of financial statements is in accordance with generally accepted accounting principles in the United States of America (GAAP), which requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. The most critical estimates reflected in the financial statements relate to securities whose fair values have been estimated by management in the absence of readily determinable fair values. Actual results could differ from those estimates.

Securities for which market quotations are readily available (including securities listed on national securities exchanges and those traded over-the-counter) are valued based on quoted prices from the applicable exchange. To the extent valuation adjustments are not applied to these securities, they are categorized as Level 1. If such securities were not traded on the valuation date, but market quotations are readily available, they are valued at the most recently quoted bid price provided by an independent pricing service or by principal market makers. Securities traded on NASDAQ are valued at the NASDAQ Official Closing Price (NOCP). Where market quotations are not readily available or where the pricing agent or market maker does not provide a valuation or methodology, or provides a valuation or methodology that, in the judgment of the adviser or sub-adviser, does not represent fair value (Fair Value Securities), securities are valued at fair value by a Pricing Committee appointed by the Board of Directors, in consultation with the adviser or sub-adviser. The Fund uses various valuation techniques that utilize both observable and unobservable inputs including multi-dimensional relational pricing model, option adjusted spread pricing, book value, last available trade, discounted future cash flow models, cost, and comparable company approach. To the extent these inputs are observable and timely, the values of these securities are categorized as Level 2; otherwise, the values are categorized as Level 3. In such circumstances, the adviser or sub-adviser makes an initial written recommendation to the Pricing Committee regarding valuation methodology for each Fair Value Security. Thereafter, the adviser or sub-adviser conducts periodic reviews of each Fair Value Security to consider whether the respective methodology and its application is appropriate and recommends methodology changes when appropriate. The Pricing Committee reviews and makes a determination regarding each initial methodology recommendation and any subsequent methodology changes. All methodology recommendations and any changes are reviewed by the entire Board of Directors on a quarterly basis.

The Fund's investments in Hedge Funds are valued at the most recent estimated value periodically determined by the respective Hedge Fund managers according to such manager's policies and procedures (adjusted for estimated expenses and fees accrued to the Fund since the last valuation date); provided, however, that the Pricing Committee may consider whether it is appropriate, in light of relevant circumstances, to adjust such valuation in accordance with the Fund's valuation procedures. If a Hedge Fund does not report a value to the Fund on a timely basis, the fair value of such Hedge Fund shall be based on the most recent value reported by the Hedge Fund, as well as any other relevant information available at the time the Fund values its portfolio. As a practical matter, Hedge Fund valuations generally can be obtained from Hedge Fund managers on a weekly basis, as of close of business Thursday, but the

Notes to Financial Statements

First Opportunity Fund, Inc.
September 30, 2011 (Unaudited)

frequency and timing of receiving valuations for Hedge Fund investments is subject to change at any time, without notice to investors, at the discretion of the Hedge Fund manager or the Fund.

Any valuations provided by the Hedge Fund manager upon which the Fund relies to calculate its net asset value may be subject to later adjustment based on valuation information reasonably available at that time. For example, year-end net asset value calculations of the Hedge Funds are audited by the Hedge Funds independent auditors and may be revised as a result of such audits. Other adjustments may occur from time to time.

The financial statements include investments valued at \$145,204,918 (60.98% of total net assets) as of September 30, 2011 whose fair values have been estimated by management in the absence of readily determinable fair values. Due to the inherent uncertainty of the valuation of these investments, these values may differ from the values that would have been used had a ready market for these investments existed and the differences could be material.

Short-term securities which mature in more than 60 days are valued at current market quotations. Short-term securities which mature in 60 days or less are valued at amortized cost, which approximates fair value.

Corporate Bonds, other than short-term securities, are valued at the price provided by an independent pricing service. The prices provided by the independent service are based on the mean of bid and ask prices for each corporate bond security. In determining the value of a particular investment, pricing services may use certain information with respect to transactions in such investments, quotations from dealers, pricing matrixes, market transactions in comparable investments, various relationships observed in the market between investments and calculated yield measures based on valuation technology commonly employed in the market for such investments. To the extent that these inputs are observable and timely, the values of corporate bonds are categorized as Level 2; otherwise, the values are categorized as Level 3.

For valuation purposes, the last quoted prices of non-U.S. equity securities may be adjusted under the circumstances described below. If the Fund determines that developments between the close of a foreign market and the close of the NYSE will, in its judgment, materially affect the value of some or all of its portfolio securities, the Fund will adjust the previous closing prices to reflect what it believes to be the fair value of the securities as of the close of the NYSE. In deciding whether it is necessary to adjust closing prices to reflect fair value, the Fund reviews a variety of factors, including developments in foreign markets, the performance of U.S. securities markets, and the performance of instruments trading in U.S. markets that represent foreign securities and baskets of foreign securities. The Fund may also fair value securities in other situations, such as when a particular foreign market is closed but the U.S. market is open. The Fund uses outside pricing services to provide it with closing prices and information to evaluate and/or adjust those prices. The Fund cannot predict how often it will use closing prices and how often it will determine it necessary to adjust those prices to reflect fair value. If the Fund uses adjusted prices, the Fund will periodically compare closing prices, the next day's opening prices in the same markets and those adjusted prices as a means of evaluating its security valuation process.

Various inputs are used to determine the value of the Fund's investments. Observable inputs are inputs that reflect the assumptions market participants would use based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions based on the best information available in the circumstances.

These inputs are summarized in the three broad levels listed below.

- Level 1 Unadjusted quoted prices in active markets for identical investments
- Level 2 Significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Recent Accounting Pronouncements: In April 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-03 Transfers and Servicing (Topic 860): Reconsideration of Effective Control for Repurchase Agreements. The ASU 2011-03 is intended to improve financial reporting of repurchase agreements and other agreements that both entitle and obligate a transferor to repurchase or redeem the financial assets before their maturity. The ASU is effective for the first interim or annual period beginning on or after December 15, 2011. Management is currently evaluating the impact this ASU may have on the Fund's financial statements.

In May 2011, the FASB issued ASU No. 2011-04 Amendments to Achieve Common Fair Value measurement and Disclosure Requirements in U.S. GAAP and IFRSs. ASU 2011-04 includes common requirements for measurement of and disclosure about fair value between U.S. GAAP and IFRS. ASU 2011-04 will require reporting entities to disclose quantitative information about the unobservable inputs used in the fair value measurements categorized within Level 3 of the fair value hierarchy. addition, ASU 2011-04 will require reporting entities to make disclosures about amounts and reasons for all transfers in and out of Level 1 and Level 2 fair value measurements. The new and revised disclosures are effective for interim and annual reporting periods beginning after December 15, 2011. Management is currently evaluating the impact this ASU may have on the Fund's financial statements.

Securities Transactions and Investment Income: Securities transactions are recorded as of the trade date. Realized gains and losses from securities sold are recorded on the identified cost basis. Dividend income is recorded as of the ex-dividend date, or for certain foreign securities, when the information becomes available to the Fund. Interest income including amortization of premium and accretion of discount on debt securities, as required, is recorded on the accrual basis, using the interest method.

Foreign Currency Translations: The Fund may invest a portion of its assets in foreign securities. In the event that the Fund executes a foreign security transaction, the Fund will generally enter into a forward foreign currency contract to settle the foreign security transaction. Foreign securities may carry more risk than U.S. securities, such as political, market and currency risks.

The books and records of the Fund are maintained in U.S. dollars. Foreign currencies, investments and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars at the exchange rate prevailing at the end of the period, and purchases and sales of investment securities, income and expenses transacted in foreign currencies are translated at the exchange rate on the dates of such transactions. Foreign currency gains and losses result from fluctuations in exchange rates between trade date and settlement date on securities transactions, foreign currency transactions and the difference between amounts of foreign interest and dividends recorded on the books of the Fund and the amounts actually received. The Fund records net realized gain or loss on investment securities and foreign currency transactions separately.

The portion of foreign currency gains and losses related to fluctuation in the exchange rates between the initial purchase trade date and subsequent sale trade date is included in gains and losses as stated in the Statement of Operations under Foreign currency related transactions. The net U.S. dollar value of foreign currency underlying all contractual commitments held by the Fund and the resulting unrealized appreciation or depreciation are determined using prevailing forward foreign currency exchange rates. Unrealized appreciation and depreciation on foreign currency contracts are reported in the Fund's Statement of Assets and Liabilities as a receivable or a payable and in the Fund's Statement of Operations with the change in unrealized appreciation or depreciation.

Foreign Issuer Risk: Investment in non-U.S. issuers may involve unique risks compared to investing in securities of U.S. issuers. These risks may include, but are not limited to: (i) less information about non-U.S. issuers or markets may be available due to less rigorous disclosure, accounting standards or regulatory practices; (ii) many non-U.S. markets are smaller, less liquid and more volatile thus, in a changing market, the adviser may not be able to sell the Fund's portfolio securities at times, in amounts and at prices they consider reasonable; (iii) currency exchange rates or controls may adversely affect the value of the Fund's investments; (iv) the economies of non-U.S. countries may grow at slower rates than expected or may experience downturns or recessions; and, (v) withholdings and other non-U.S. taxes may decrease the Fund's return.

Concentration Risk: The Fund has highly concentrated positions in certain hedge funds and may take concentrated positions in other securities. Concentrating investments in a fewer number of securities (including investments in hedge funds) may involve a degree of risk that is greater than a fund which has less concentrated investments spread out over a greater number of securities. For example, the value of the Fund's net assets will fluctuate significantly based on the fluctuation in the value of the hedge funds in which it invests. In addition, investments in hedge funds can be highly volatile and may subject investors to heightened risk and higher operating expenses than another closed-end fund with a different investment focus.

Notes to Financial Statements

First Opportunity Fund, Inc.
September 30, 2011 (Unaudited)

Hedge Fund Risk: The Fund invests a significant portion of its assets in Hedge Funds. The Fund's investments in Hedge Funds are private entities that are not registered under the 1940 Act and have limited regulatory oversight and disclosure obligations. In addition, the Hedge Funds invest in and actively trade securities and other financial instruments using different strategies and investment techniques, which involve significant risks. These strategies and techniques may include, among others, leverage, employing various types of derivatives, short selling, securities lending, and commodities trading. These Hedge Funds may invest a high percentage of their assets in specific sectors of the market in order to achieve a potentially greater investment return. As a result, the Hedge Funds may be more susceptible to economic, political, and regulatory developments in a particular sector of the market, positive or negative, and may experience increased volatility. These and other risks associated with Hedge Funds may cause the Fund's net asset value to be more volatile and more susceptible to the risk of loss than that of other funds with a different investment strategy.

Credit Default Swaps: The Fund may enter into credit default swap contracts for hedging purposes, to gain market exposure or to add leverage to its portfolio. When used for hedging purposes, the Fund would be the buyer of a credit default swap contract. In that case, the Fund would be entitled to receive the par (or other agreed-upon) value of a referenced debt obligation, index or other investment from the counterparty to the contract in the event of a default by a third party, such as a U.S. or foreign issuer, on the referenced debt obligation. In return, the Fund would pay to the counterparty a periodic stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the Fund would have spent the stream of payments and received no benefit from the contract. When the Fund is the seller of a credit default swap contract, it receives the stream of payments but is obligated to pay upon default of the referenced debt obligation. As the seller, the Fund would effectively add leverage to its portfolio because, in addition to its total assets, the Fund would be subject to investment exposure on the notional amount of the swap.

In addition to the risks applicable to derivatives generally, credit default swaps involve special risks because they may be difficult to value, may be susceptible to liquidity and credit risk, and generally pay a return to the party that has paid the premium only in the event of an actual default by the issuer of the underlying obligation, as opposed to a credit downgrade or other indication of financial difficulty. Credit default swaps are marked to market periodically using quotations from pricing services. Unrealized gains, including the accrual of interest are recorded as an asset and unrealized losses are reported as a liability on the Statement of Assets and Liabilities. The change in value of the credit default swap, including the accrual of interest to be paid or received is reported as a change in unrealized appreciation/depreciation on the Statement of Operations. A realized gain or loss is recorded upon payment or receipt of a periodic payment or termination of the swap agreement.

Counterparty Risk: Changes in the credit quality of the companies that serve as the Fund's counterparties with respect to derivatives, swaps or other transactions supported by another party's credit will affect the value of those instruments. By using derivatives, swaps or other transactions, the Fund assumes the risk that its counterparties could experience such changes in credit quality.

The Fund had no outstanding credit default swap contracts as of September 30, 2011.

During the six months ended September 30, 2011, the average notional amounts of credit default swap contracts entered into by the Fund, were \$1,700,000 for those contracts measured in U.S. Dollars, and €17,000,000 for those measured in Euros.

Derivative Risk: The Fund, as well as the Hedge Funds in which the Fund invests, may employ derivative instruments as a strategy to hedge its portfolio or enhance return. Derivatives are financial instruments that derive their performance, at least in part, from the performance of an underlying asset, index or interest rate. Derivatives can be volatile and involve various types and degrees of risk.

Federal Income Taxes: For federal income tax purposes, the Fund currently qualifies, and intends to remain qualified, as a regulated investment company under the provisions of subchapter M of the Internal Revenue Code by distributing substantially all of its earnings to its stockholders. Accordingly, no provision for federal income or excise taxes has been made.

Notes to Financial Statements

First Opportunity Fund, Inc.
September 30, 2011 (Unaudited)

Income and capital gain distributions are determined and characterized in accordance with income tax regulations, which may differ from U.S. GAAP. These differences are primarily due to (1) differing treatments of income and gains on various investment securities held by the Fund, including temporary differences, (2) the attribution of expenses against certain components of taxable investment income, and (3) federal regulations requiring proportional allocation of income and gains to all classes of stockholders. The Code imposes a 4% nondeductible excise tax on the Fund to the extent the Fund does not distribute by the end of any calendar year at least (1) the sum of 98% of its net investment income and for that year and 98.2% of its capital gains (both long-term and short-term) for the one year period ended October 31 and (2) certain undistributed amounts from previous years.

Under the Regulated Investment Company Modernization Act of 2010 (the "Act"), net capital losses recognized in tax years beginning after December 22, 2010 may be carried forward indefinitely, and the character of the losses is retained as short-term and/or long-term. Under the law in effect prior to the Act, net capital losses were carried forward for eight years and treated as short-term. As a transition rule, the Act requires that post-enactment net capital losses be used before pre-enactment net capital losses.

Management has concluded that the Fund has taken no uncertain tax positions that require recognition. The Fund files income tax returns in the U.S. federal jurisdiction and Colorado. The statute of limitations on the Fund's federal tax filings remains open for the fiscal years ended March 31, 2008 through March 31, 2011. The statute of limitations on the Fund's state tax filings remains open for the fiscal years ended March 31, 2007 through March 31, 2011.

NOTE 3. AGREEMENTS

RMA and SIA serve as co-advisers to the Fund, and make investment decisions on behalf of the Fund. Wellington has entered into an agreement with the Fund, RMA and SIA to serve as sub-adviser to the Fund.

According to the Advisory Agreements, RMA and SIA are paid an advisory fee, payable monthly, at an annual rate equal to 1.25% of the Fund's average monthly total net assets plus leverage, if any ("Managed Assets") (the "Advisory Fee"). However, RMA and SIA have agreed to waive their fees in an amount equal to up to 1.00% of the Fund's assets invested in Wellington-affiliated private investment funds to offset any asset based fees (but not any performance-based fees) paid to Wellington with respect to the hedge fund investments. Additionally, RMA and SIA agreed to a waiver of advisory fees such that, the advisory fees would be calculated at the annual rate of 1.25% on Managed Assets up to \$400 million, 1.10% on Managed Assets between \$400-\$600 million; and 1.00% on Managed Assets exceeding \$600 million. The fee waiver agreement has a one-year term and is renewable annually.

RMA is owned by the Susan L. Ciciora Trust (the "SLC Trust"), which is also a member of Evergreen Atlantic LLC, a Colorado limited liability company ("EALLC"), and is a stockholder of the Fund. SIA is owned by the Stewart West Indies Trust, which is also a member of EALLC. RMA and SIA are considered affiliated persons of the Fund and FAS, as that term is defined in the Investment Company Act of 1940, as amended (the "1940 Act").

According to the Sub-Advisory Agreement, Wellington earns a sub-advisory fee, payable monthly by RMA and SIA, at an annual rate equal to 1.125% of the Fund's month-end value of Designated Securities (definition follows). Designated Securities are those securities held by the Fund on May 28, 2010, which were not identified to be contributed to the Wellington-affiliated private investment funds (disclosed as Limited Partnerships on the Portfolio of Investments) as of June 1, 2010 (date of adviser restructuring).

Notes to Financial Statements

September 30, 2011 (Unaudited)

Effective April 1, 2011, Wellington has agreed to voluntarily waive its sub-advisory fees in excess of 0.625%, per annum, based on the value of the Fund's Designated Securities. Under the terms of the Wellington fee waiver agreement, it is a condition to the waiver that the Advisers and the Fund expressly acknowledge that Wellington may unilaterally terminate the agreement if the Advisers do not pass through the economic benefit of this waiver to the Fund. Accordingly, the Advisers have voluntarily agreed to waive any additional fees relating to the Designated Securities to which the Advisers would otherwise be entitled by virtue of Wellington's waiver.

Fund Administrative Services, LLC (FAS), serves as the Fund's co-administrator. Under the Administration Agreement, FAS provides certain administrative and executive management services to the Fund. The Fund pays FAS a monthly fee, calculated at an annual rate of 0.20% of the Managed Assets up to \$100 million and 0.15% of the Fund's Managed Assets over \$100 million. Prior to February 1, 2010, the Fund paid FAS a monthly fee of 0.20% of the value of the Fund's Managed Assets up to \$250 million; 0.18% of the Fund's Managed Assets on the next \$150 million; and 0.15% of the value of the Fund's Managed Assets over \$400 million. The equity owners of FAS are EALLC and the Lola Brown Trust No. 1B (the Lola Trust). The Lola Trust is a stockholder of the Fund, and the Lola Trust and EALLC are considered to be affiliated persons of the Fund and the Advisers, as that term is defined in the 1940 Act.

ALPS Fund Services, Inc. (ALPS) serves as the Fund's co-administrator. As compensation for its services, ALPS receives certain out-of-pocket expenses and asset-based fees, which are accrued daily and paid monthly (the Co-Administration Fee). Fees paid to ALPS are calculated based on combined assets of the Fund and the following affiliates of the Fund: Boulder Total Return Fund, Inc., Boulder Growth & Income Fund, Inc., and The Denali Fund Inc. (the Fund Group). ALPS receives the greater of the following, based on combined average assets of the Fund Group: an annual minimum of \$460,000, or an annualized fee of 0.045% on assets up to \$1 billion, an annualized fee of 0.03% on assets between \$1 and \$3 billion, and an annualized fee of 0.02% on assets above \$3 billion.

The Fund pays each Director who is not a director, officer, employee, or affiliate of the investment adviser or FAS a fee of \$8,000 per annum, plus \$4,000 for each in-person meeting of the Board of Directors and \$500 for each telephone meeting. In addition, the Chairman of the Board and the Chairman of the Audit Committee receive \$1,000 per meeting and each member of the Audit Committee receives \$500 per meeting. The Fund will also reimburse all non-interested Directors for travel and out-of-pocket expenses incurred in connection with such meetings.

Bank of New York Mellon (BNY Mellon) serves as the Fund's custodian and as compensation for BNY Mellon's services the Fund pays BNY Mellon a monthly fee plus certain out-of-pocket expenses.

Computershare Trust Company, N.A. (Computershare), serves as the Fund's Transfer Agent, dividend-paying agent, and registrar, and as compensation for Computershare's services as such, the Fund pays Computershare a monthly fee plus certain out-of-pocket expenses.

NOTE 4. SECURITIES TRANSACTIONS

Cost of purchases and proceeds from sale of securities for the six months ended September 30, 2011, excluding short-term investments, aggregated \$16,175,666 and \$33,989,199, respectively.

As described in Note 1, on June 1, 2010, securities were transferred in-kind from the Fund to two limited partnerships managed by an affiliate of Wellington. The portion of the cost of purchases and proceeds from sales of securities associated with these transactions was \$77,773,022.

Notes to Financial Statements

NOTE 11. INVESTMENTS IN LIMITED PARTNERSHIPS

As of September 30, 2011, the Fund held investments in Hedge Funds that are organized as limited partnerships. The Fund's investments in the limited partnerships are reported on the Portfolio of Investments under the section titled Limited Partnerships.

Since the investments in limited partnerships are not publicly traded, the Fund's ability to make withdrawals from its investments in the limited partnerships is subject to certain restrictions which vary for each respective limited partnership. These restrictions include notice requirements for withdrawals and additional restrictions or charges for withdrawals within a certain time period following initial investment. In addition, there could be circumstances in which such restrictions can include the suspension or delay in withdrawals from the respective limited partnership, or limited withdrawals allowable only during specified times during the year. In certain circumstances a limited partner may not make withdrawals that occur less than one year following the date of admission to the partnership. As of September 30, 2011, withdrawal restrictions applied to certain of the Fund's investments in limited partnerships as the Fund was admitted as a partner less than one year ago in certain investments. The following table summarizes the Fund's investments in limited partnerships as of September 30, 2011.

NOTE 12. SUBSEQUENT EVENTS

The Fund has evaluated the need for disclosures and/or adjustments resulting from subsequent events through the date the financial statements were issued. Based on this evaluation, no adjustments were required to the financial statements as of September 30, 2011. However, the following are details relating to subsequent events through the date the financial statements were issued.

Hedge Fund Restructuring. On October 3, 2011, the Fund effected a series of transactions withdrawing from or transferring all of its interests in domestic Hedge Funds to offshore entities (the Hedge Fund Restructuring). As a result of these transactions, the Fund's investments in Hedge Funds became either: 1) direct investments in offshore Hedge Funds substantially similar to the domestic Hedge Fund from which the Fund withdrew, or 2) indirect investments in the same domestic Hedge Fund through wholly-owned subsidiaries of the Fund organized in the Cayman Islands. The Hedge Fund Restructuring was effected to ensure the Fund's continued compliance with the gross income test set forth under Subchapter M of the Code. Investments in offshore Hedge Funds and the use of offshore subsidiaries carries unique regulatory and tax risks that could exacerbate the risks already present in domestic hedge funds and will subject the Fund to increased expenses and tax reporting obligations.

In connection with the Hedge Fund Restructuring, the Fund and the Fund's wholly-owned Cayman subsidiaries entered into a new Administration Agreement with ALPS to provide certain administrative services to the Cayman subsidiaries. Pursuant to the new Administration Agreement, the Fund will pay ALPS a fee in addition to the Co-Administration Fee at the annual rate of \$45,000, payable monthly. The Hedge Fund Restructuring is expected to result in other increased costs to the Fund related to the administration, accounting, legal and audit functions. These increased costs could have a material impact on the Fund's expense ratio.

Election of New Director: Effective November 18, 2011, John Horejsi resigned as a Class I Director of the Fund. Also effective November 18, 2011, Steven K. Norgaard was appointed by the Board of Directors as a Class I Director of the Fund and will serve as nominee for election as Director by stockholders at the Fund's 2012 annual meeting of stockholders. Mr. Norgaard was also appointed a member of the Fund's Nominating Committee and Audit Committee.

Advisory Fee Waiver. Effective December 1, 2011, RMA and SIA agreed to waive 0.10% of the Advisory Fee applied to the Advisers' Portfolio such that the Advisory Fee will be calculated at the annual rate of 1.15% of Managed Assets in the Advisers' Portfolio. The fee waiver agreement has a one-year term and is renewable annually. The waiver does not apply to the Hedge Fund Portfolio or to the Legacy Portfolio.

Privacy Statement. Pursuant to SEC Regulation S-P (Privacy of Consumer Financial Information) the Directors of the Fund have established the following policy regarding information about the Fund's stockholders. We consider all stockholder data to be private and confidential, and we hold ourselves to the highest standards in its safekeeping and use.

General Statement. The Fund may collect nonpublic information (e.g., your name, address, email address, Social Security Number, Fund holdings (collectively, Personal Information)) about stockholders from transactions in Fund shares. The Fund will not release Personal Information about current or former stockholders (except as permitted by law) unless one of the following conditions is met: (i) we receive your prior written consent; (ii) we believe the recipient to be you or your authorized representative; (iii) to service or support the business functions of the Fund (as explained in more detail below), or (iv) we are required by law to release Personal Information to the recipient. The Fund has not and will not in the future give or sell Personal Information about its current or former stockholders to any company, individual, or group (except as permitted by law) and as otherwise provided in this policy.

In the future, the Fund may make certain electronic services available to its stockholders and may solicit your email address and contact you by email, telephone or US mail regarding the availability of such services. The Fund may also contact stockholders by email, telephone or US mail in connection with these services, such as to confirm enrollment in electronic stockholder communications or to update your Personal Information. In no event will the Fund transmit your Personal Information via email without your consent.

Use of Personal Information. The Fund will only use Personal Information (i) as necessary to service or maintain stockholder accounts in the ordinary course of business and (ii) to support business functions of the Fund and its affiliated businesses. This means that the Fund may share certain Personal Information, only as permitted by law, with affiliated businesses of the Fund, and that such information may be used for non-Fund-related solicitation. When Personal Information is shared with the Fund's business affiliates, the Fund may do so without providing you the option of preventing these types of disclosures as permitted by law.

Safeguards regarding Personal Information. Internally, we also restrict access to Personal Information to those who have a specific need for the records. We maintain physical, electronic, and procedural safeguards that comply with Federal standards to guard Personal Information. Any doubts about the confidentiality of Personal Information, as required by law, are resolved in favor of confidentiality.

Summary of Dividend

First Opportunity Fund, Inc.

Reinvestment Plan
September 30, 2011 (Unaudited)

Stockholders may elect to have all distributions of dividends and capital gains automatically reinvested in Fund shares (the "shares") pursuant to the Fund's Dividend Reinvestment Plan (the "Plan"). Stockholders who do not participate in the Plan will normally receive all distributions in cash paid by check in United States dollars mailed directly to the stockholders of record (or if the shares are held in street name or other nominee name, then to the nominee) by the custodian, as dividend disbursing agent, unless the Fund declares a distribution payable in shares, absent a stockholder's specific election to receive cash.

Computershare Trust Company, N.A. (the "Plan Agent") serves as agent for the stockholders in administering the Plan. After the Fund declares a dividend or a capital gains distribution, if (1) the market price is lower than net asset value, the participants in the Plan will receive the equivalent in shares valued at the market price determined as of the time of purchase (generally, following the payment date of a dividend or distribution); or if (2) the market price of shares on the payment date of the dividend or distribution is equal to or exceeds their net asset value, participants will be issued shares at the higher of net asset value or 95% of the market price. If the Fund declares a dividend or other distributions payable only in cash and the net asset value exceeds the market price of shares on the valuation date, the Plan Agent will, as agent for the participants, receive the cash payment and use it to buy shares on the open market. If, before the Plan Agent has completed its purchases, the market price exceeds the net asset value per share, the Plan Agent will halt open-market purchases of the Fund's shares for this purpose, and will request that the Fund pay the remainder, if any, in the form of newly issued shares. The Fund will not issue shares under the Plan below net asset value.

There is no charge to participants for reinvesting dividends or capital gain distributions, except for certain brokerage commissions, as described below. The Plan Agent's fees for the handling of the reinvestment of dividends will be paid by the Fund. There will be no brokerage commissions charged with respect to shares issued directly by the Fund. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent's open market purchase in connection with the reinvestment of dividends and distributions. The automatic reinvestment of dividends and distributions will not relieve participants of any federal income tax that may be payable on such dividends or distributions. The Fund reserves the right to amend or terminate the Plan upon 90 Days' written notice to stockholders of the Fund. Participants in the Plan may withdraw from the Plan upon written notice to the Plan Agent or by telephone in accordance with specific procedures and will receive certificates for whole shares and cash for fractional shares.

All correspondence concerning the Plan should be directed to the Plan Agent, Computershare Trust Company, N.A., P.O. Box 43011, Providence, RI 02940-3011.
