The Report to Shareholders is attached herewith.

The GDL Fund

Annual Report

December 31, 2011

Mario J. Gabelli, CFA

To Our Shareholders,

The Sarbanes-Oxley Act requires a fund s principal executive and financial officers to certify the entire contents of the semiannual and annual shareholder reports in a filing with the Securities and Exchange Commission (SEC) on Form N-CSR. This certification would cover the portfolio manager s commentary and subjective opinions if they are attached to or a part of the financial statements. Many of these comments and opinions would be difficult or impossible to certify.

Because we do not want our portfolio manager to eliminate his opinions and/or restrict his commentary to historical facts, we have separated his commentary from the financial statements and investment portfolio and have sent it to you separately. Both the commentary and the financial statements, including the portfolio of investments, will be available on our website at www.gabelli.com.

Investment Performance

For the year ended December 31, 2011, the net asset value (NAV) total return of The GDL Fund was 1.3%, compared with a total return of 0.1% for the 3 Month U.S. Treasury Bill Index. The total return for the Fund s publicly traded shares was (2.5)%. On December 31, 2011, the Fund s NAV per share was \$13.94, while the price of the publicly traded shares closed at \$11.80 on the New York Stock Exchange (NYSE).

Enclosed are the schedule of investments and financial statements as of December 31, 2011.

Sincerely yours,

Bruce N. Alpert

- (a) Returns represent past performance and do not guarantee future results. Investment returns and the principal value of an investment will fluctuate. When shares are sold, they may be worth more or less than their original cost. Current performance may be lower or higher than the performance data presented. Visit www.gabelli.com for performance information as of the most recent month end. Performance returns for periods of less than one year are not annualized. Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund before investing. The 3 Month U.S. Treasury Bill Index is comprised of a single issue purchased at the beginning of the month and held for a full month. At the end of the month, that issue is sold and rolled into the outstanding Treasury Bill that matures closest to, but not beyond three months from the re-balancing date. To qualify for selection, an issue must have settled on or before the re-balancing (month end) date. Dividends are considered reinvested except for the 3 Month U.S. Treasury Bill Index. You cannot invest directly in an index.
- (b) Total returns and average annual returns reflect changes in the NAV per share and reinvestment of distributions at NAV on the ex-dividend date and are net of expenses. Since inception return is based on an initial NAV of \$19.06.
- (c) Total returns and average annual returns reflect changes in closing market values on the NYSE and reinvestment of distributions. Since inception return is based on an initial offering price of \$20.00.
