PART I

Item 1. Business

The following business description should be read in conjunction with our consolidated financial statements and related notes appearing elsewhere in this Annual Report on Form 10-K.

Overview

Comstock Homebuilding Companies, Inc. is a multi-faceted real estate development and services company focused on the Washington, D.C. metropolitan area. We have substantial experience with building a diverse range of products including apartments, single-family homes, townhouses, mid-rise condominiums, high-rise multi-family condominiums and mixed-use (residential and commercial) developments. Since our founding in 1985, and as of December 31, 2011, we have built and delivered more than 5,300 units generating total revenue in excess of \$1.4 billion. References in this Form 10-K to Comstock, Company, we, our and us refer to Comstock Homebuilding Companies, Inc. together in case with our subsidiaries and any predecessor entities unless the context suggests otherwise. Dollars in thousands unless otherwise indicated.

Our Operating Market

We are exclusively focused on the Washington, D.C. market which is the eighth largest metropolitan statistical area in the United States. Our expertise in developing traditional and non-traditional housing products enables us to focus on a wide range of opportunities within our core market. We build homes and apartment buildings in suburban communities, where we focus on low density products such as single family detached homes, townhomes and mid-rise multi-family buildings, and in urban areas, where we focus on high density multi-family and mixed use products. For our homebuilding operations, we develop properties with the intent that they be sold either as fee-simple properties or condominiums to individual unit buyers or as investment properties sold to private or institutional investors. Our apartment buildings are developed as rental properties to be held and operated for our own purposes, converted at some point to for-sale condominium units or sold on a merchant build basis. Currently, we operate only in the Washington, D.C. market, where our for-sale products are designed to attract first-time, early move-up, and secondary move-up buyers. We focus on products that we are able to offer for sale in the middle price points within the markets where we operate, avoiding the very low-end and high-end products. When developing rental communities, we design our products to be affordable for tenants that fit one of two groups; (i) young first time tenants, or (ii) renters by choice. We believe our middle market strategy positions our products such that they are affordable to a significant segment of potential home buyers in our market.

We believe that our significant experience over the past 25 years, combined with our ability to navigate through two major housing downturns (early 1990s and late 2000s) have provided us the experience necessary to capitalize on attractive opportunities in our core market of Washington, D.C. and to build shareholder value. We believe that our focus on the Washington, D.C. market, which has historically been characterized by economic conditions less volatile than many other major homebuilding markets, will provide an opportunity to generate attractive returns on investment and for growth.

Our Business Strategy

Our business strategy is designed to leverage our extensive capabilities and market knowledge to maximize returns on invested capital on our various real estate related activities. We execute our strategy through three related business segments:

Homebuilding We target new home building opportunities where our building experience and ability to manage highly complex entitlement, development and related issues provides us with a competitive advantage.

Apartments We seek opportunities in the multi-family rental market where our experience and core capabilities can be leveraged. We will either position the assets for sale to institutional buyers when completed or operate the asset within our own portfolio. Operating the asset for our own account affords us the flexibility of converting the units to condominiums in the future.

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

Real Estate Services Our management team has significant experience in all aspects of real estate management, including strategic planning, land development, entitlement, property management, sales and marketing, workout and turnaround strategies, financing and general construction. We are able to provide a wide range of construction management, general contracting and real estate related services to other property owners. This business line not only allows us to generate positive fee income from our highly qualified personnel but also serves as a potential catalyst for joint venture and acquisition opportunities.

These business units work in concert to leverage the collective skill sets of our organization. The talent and experience of our personnel allows workflow flexibility and a multitasking approach to managing various projects. In a capital constrained environment, we use creative problem solving and financing approaches by working closely with banks, borrowers and other parties in an effort to generate value for all constituents. We believe that our business network within the Washington, D.C. real estate market provides us a competitive advantage in sourcing and executing investment opportunities.

Table of Contents

With respect to our homebuilding operations, we seek to minimize risk associated with fluctuating market conditions by primarily building pre-sold units and limiting the number of spec units held in inventory. In each new community that we develop we build model homes to demonstrate our products and to house our on-site sales operations. We limit the building of spec units to locations where there is a demonstrated demand for immediate delivery homes or where the majority of the units within a multi-family building (such as townhouses or condominiums) have been pre-sold. We believe that by limiting the number of spec units held in inventory we reduce our exposure to cyclical fluctuations in market values and minimize costs associated with holding inventory, such as debt service.

In certain communities we continue to offer units for sale and for rent. In the difficult market conditions that were common during the housing downturn this strategy dramatically enhanced our ability to maintain adequate operating cash flow. Additionally, by operating key properties as rental communities during the housing downturn, we were able to position valuable assets for sale in improving market conditions.

Our Operations

Our operations have been scaled back to align general and administrative expenses with market conditions. When the market downturn began, we adopted a defensive strategy to enhance our ability to survive a prolonged downturn in housing demand, we eliminated several operating divisions and refocused operations on the Washington, D.C. market, where we believe our 25 years of market experience provides us the best opportunity to enhance shareholder value. Although we have dramatically reduced the size of our staff we believe that we have maintained the critical capabilities we need to capitalize on emerging opportunities. We believe that we are properly staffed for current market conditions and that we have the ability to manage growth as market conditions warrant.

Our Communities

We are currently operating, or developing in the following counties in Virginia: Loudoun, Prince William, Arlington, and Fairfax. We also have communities in the Maryland counties of Frederick and Montgomery and the District of Columbia. The following table summarizes certain information regarding our communities as of December 31, 2011:

As of December 31, 2011 (Dollars in thousands)							
Project	State	Product Type ⁽³⁾	Estimated Units at Completion	Units Settled	Backlog ⁽⁴⁾	Lots Owned Unsold	Average New Order Revenue to Date
Commons on Potomac Square ⁽¹⁾	VA	Apartment	103	0	0	0	\$ 0
Eclipse on Center Park ⁽²⁾	VA	Condo	465	438	0	0	\$ 409
Penderbrook Square ⁽²⁾	VA	Condo	424	385	3	0	\$ 245
Emerald Farm ⁽⁵⁾	MD	SF	84	78	0	6	\$ 452
The Hampshires ⁽⁶⁾	DC	SF/TH	110	0	0	0	\$ 0
Cedar Hill ⁽⁶⁾	DC	Condo	40	0	0	0	\$ 0
Falls Grove ⁽⁶⁾	VA	Condo	129	0	0	0	\$ 0
Boulevard on Newell ⁽⁶⁾	MD	Apartment	145	0	0	0	\$ 0
Total							

(1) Apartment was sold on March 7, 2012

(2) For sale communities.

(3) SF means single family home, TH means townhome and Condo means condominium.

(4) Backlog means we have an executed order with a buyer, but the settlement has not yet taken place.

(5) Developed and available for sale.

(6) Community under our control currently in development.

Table of Contents

Northern Virginia Market

The Commons on Potomac Square is a two building, 103-unit, rental apartment community in Loudoun County, Virginia (the Apartment). The project is located in the Potomac Falls area of Loudoun County, Virginia. Initial occupancies occurred July 1, 2011 with final construction of the second building completed end of September 2011. The land on which the community was built was one of the last remaining parcels within the master planned and amenity rich Cascades Community in eastern Loudoun County. The Cascades community provides residents with exceptional attractions, including excellent schools, golf courses, multiple parks, swimming pools, walking/bicycle trails, upscale shopping and dining facilities and other convenient amenities. The location of the Cascades community provides easy commuter access to all of the major employment centers in the Washington, D.C. region and is located within walking distance of the Loudoun campus of Northern Virginia Community College. This Apartment was developed and completed during 2011. The Apartment project was sold on March 7, 2012 for \$19.35 million.

The Eclipse on Center Park is a 465-unit, high-rise condominium complex in Arlington, Virginia. The project is just minutes from downtown Washington D.C., the Pentagon and Reagan National Airport. The project is an upscale, urban-style, mixed-use complex with residential condominiums above an 83,000 square foot retail center, which includes a Harris Teeter grocery store and other convenience-oriented retailers. Condominium sales began in the second quarter of 2004 and settlements began in November 2006. At December 31, 2011, 27 units remain in our inventory.

Penderbrook Square is a 424-unit rental apartment complex in the Fair Oaks area of Fairfax County, Virginia that we purchased as a condominium conversion project. We acquired the property in 2005 and made significant improvements to common areas, building exteriors, and heating and air-conditioning systems within units and have completed the conversion and sale of a majority of the units to condominiums. Sales and settlements began in 2005. At December 31, 2011, 39 units remain in our inventory.

Falls Grove is a new community located in northern Prince William County near Centreville, Virginia. The property will be developed as 19 single family homes and 110 townhouses with prices expected to be starting from \$200 thousand for the townhomes and \$400 thousand for the single-family homes. The Company anticipates development to commence in the first half of 2012 and unit sales to commence in the second half of 2012.

Maryland

Emerald Farm is an 84-unit development of single-family homes in Frederick, Maryland conveniently located near major transportation routes. A water moratorium imposed by the local jurisdiction has prevented the timely completion of the project. We believe the moratorium no longer applies to the lots we currently own in this community. It is our intention to pursue construction financing for homes on the 6 remaining finished building lots in the near future and as market conditions warrant.

Boulevard on Newell is a newly planned 145 unit apartment community located proximate to the metro rail station in downtown Silver Spring, MD. The Company has initiated the process of securing rezoning and land development permits and expects to commence development in 2014.

District of Columbia

On December 10, 2010, we announced that we had formed joint ventures with Four Points, LLC (Four Points) for the development of two new communities located in Washington, D.C. The two communities, to be known as The Hampshires and Cedar Hill, will include approximately 150 new homes. The Hampshires, located in the Northeast section of the District of Columbia along New Hampshire Avenue, will include approximately 110 townhomes and single family homes, while Cedar Hill, located in the Southeast section of Washington, D.C. near the home of the Washington Nationals baseball team, will include approximately 40 townhomes and townhome style condominiums.

Construction

Our home designs are selected or prepared in each of our communities to appeal to the tastes and preferences of local homebuyers. We also offer optional interior and exterior features to allow homebuyers to enhance the basic home design and to allow us to generate additional revenues from each home sold.

Substantially all of our construction work is performed by subcontractors. Subcontractors typically are selected after a competitive bidding process and retained for a specific subdivision pursuant to a contract that obligates the subcontractor to complete construction at an agreed-upon price. Agreements with the subcontractors and suppliers we use generally are negotiated for each subdivision. We compete with other homebuilders for qualified subcontractors, raw materials and lots in the markets where we operate. We employ construction superintendents to

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

monitor homes under construction, participate in major design and building decisions, coordinate the activities of subcontractors and suppliers, review the work of subcontractors for quality and cost controls and monitor compliance with zoning and building codes. In addition, our construction superintendents play a significant role in working with our homebuyers by assisting with option selection and home modification decisions, educating buyers on the construction process and instructing buyers on post-closing home maintenance.

Table of Contents

Construction time for our homes depends on the weather, availability of labor, materials and supplies, size of the home, and other factors. We typically complete the construction of a home within three to six months.

We typically do not maintain significant inventories of construction materials, except for work in progress materials for homes under construction. Generally, the construction materials used in our operations are readily available from numerous sources. In recent years, we have not experienced delays in construction due to shortages of materials or labor that have materially affected our consolidated operating results.

Warranty

We provide our single-family and townhouse home buyers with a one-year limited warranty covering workmanship and materials. The limited warranty is transferable to subsequent buyers not under direct contract with us and requires that all home buyers agree to the definitions and procedures set forth in the warranty. Typically, we provide our condominium home buyers a two-year limited warranty. In addition, we periodically provide structural warranty of longer durations pursuant to applicable statutory requirements. From time to time, we assess the appropriateness of our warranty reserves and adjust accruals as necessary. When deemed appropriate by us, we will accrue additional warranty reserves. We require our general contractors and sub-contractors to warrant the work they perform and they are contractually obligated to correct defects in their work that arise during the applicable warranty period. We seek to minimize our risk associated with warranty repairs through our quality assurance program and by selecting contractors with good reputations, sufficient resources and adequate insurance. It is typical that there is a gap in the warranty coverage provided by contractors and by home builders, which we have self-insured in the past. It is our experience that the warranty claims which we self insured have not been significant in nature but we periodically obtain additional insurance to protect against this unquantifiable risk.

Competition

The real estate development industry is highly competitive. We compete primarily on the basis of price, location, design, quality, service and reputation. We compete with small private builders and large regional or national builders. In addition to competing for home buyers and renters, builders compete for construction financing, raw materials and skilled labor. Additionally, under normal market conditions competition exists within the industry for prime development sites, especially those where developed building lots are available under option lot contracts. We compete with other local, regional and national builders in all of these areas. Many of our competitors have significantly greater financial, marketing, sales and other resources than we have. Some of the national builders against which we compete include Pulte Homes, DR Horton, Toll Brothers, Ryland Homes, NVR, K. Hovnanian and Lennar.

However, competition among home builders and apartment developers is often specific to product types being offered in a particular area. Often we do not find ourselves competing with the large national developers in the urban communities where we develop high-rise and mixed use products. This is primarily because most national builders tend to focus on a narrower range of products than what we offer. We believe this provides us a distinct advantage in terms of attracting potential home buyers and renters in certain areas. We believe the factors that home buyers consider in deciding whether to purchase or rent from us include the product type, location, value quality, and reputation of the developer. We believe that our projects and product offerings compare favorably on these factors and we continually strive to maintain our reputation of building quality products.

Additionally, we compete with the resale market of existing homes including foreclosures and short-sales. The dramatic increase of inventory of existing homes available for sale beginning in 2006 created significant competition among builders and home sellers for a shrinking number of prospective home buyers. This led to downward pressure on home prices in many areas that still persist in many markets.

Regulation

We are subject to various local, state and federal statutes, ordinances, rules and regulations concerning zoning, building design, construction and similar matters, including local regulation, which imposes restrictive zoning and density requirements in order to limit the number of residential units that can ultimately be built within the boundaries of a particular project. We and our competitors may also be subject to periodic delays or may be precluded entirely from developing in certain communities due to building moratoriums or slow-growth or no-growth initiatives that could be implemented in the future in the states in which we operate. Local and state governments also have broad discretion regarding the imposition of development fees for projects in their jurisdiction.

We and our competitors are also subject to a variety of local, state and federal statutes, ordinances, rules and regulations concerning protection of the environment. Some of the laws to which we and our properties are subject may impose requirements concerning development in waters of the United States, including wetlands, the closure of water supply wells, management of asbestos-containing materials, exposure to radon and similar issues. The particular environmental laws that apply to any given community vary based on several factors including but not limited to

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

the environmental conditions related to a particular property and the present and former uses of the property. These environmental laws may result in delays, may cause us and our competitors to incur substantial compliance related costs, and may prohibit or severely restrict development in certain environmentally sensitive areas. To date, environmental laws have not had a material adverse impact on our operations.

Table of Contents**Technology and Intellectual Property**

We are committed to the use of Internet-based technology for managing our business, communicating with our customers, and marketing our projects. For customer relationship management, we use Builder's Co-Pilot, a management information system that was custom developed in accordance with our needs and requirements. This system allows for online and collaborative efforts between our sales and marketing functions and integrates our sales, production and divisional office operations in tracking the progress of construction on each of our projects. We believe that real-time access to our construction progress information and our sales and marketing data and documents through our systems increases the effectiveness of our sales and marketing efforts as well as management's ability to monitor our business.

We utilize our technology infrastructure to facilitate marketing of our projects as well. Through our web site, www.comstockhomebuilding.com, our customers and prospects receive automatic electronic communications from us on a regular basis. Our corporate marketing directors work with in-house marketing and technology specialists to develop advertising and public relations programs for each project that leverage our technology capabilities. During 2011, we continued to lower marketing costs through the increased utilization of internet based marketing platforms in lieu of print advertisements. We believe that the home buying population will continue to increase its reliance on information available on the internet to help guide their home buying decision. Accordingly, our marketing efforts will continue to seek to leverage this trend in an effort to lower per sale marketing costs while maximizing potential sales.

For accounting and purchasing management purposes we use the JD Edwards Enterprise One software system.

Our Chief Executive Officer and Chairman of the Board, Christopher Clemente, has licensed his ownership interest in the Comstock brand and trademark to us in perpetuity and free of charge. We do not own the brand or the trademark and are not in a position to be able to adequately protect it against infringement from third parties. Additionally, Mr. Clemente has retained the right to continue using the Comstock brand and trademark individually and through his affiliates, including real estate development projects in our current or future markets that are unrelated to the Company.

Employees

At December 31, 2011, we had 32 full-time and 4 part time employees. Our employees are not represented by any collective bargaining agreement and we have never experienced a work stoppage. We believe we have good relations with our employees.

Executive Officers of the Registrant

Our executive officers and other management employees and their respective ages and positions as of December 31, 2011 are as follows:

Name	Age	Current Position
Christopher Clemente	52	Chairman and Chief Executive Officer
Gregory V. Benson	57	President, Chief Operating Officer
Joseph M. Squeri	46	Chief Financial Officer
Jubal R. Thompson	42	General Counsel and Secretary

Christopher Clemente founded Comstock in 1985 and has been a director since May 2004. Since 1992, Mr. Clemente has served as our Chairman and Chief Executive Officer. Mr. Clemente has over 25 years of experience in all aspects of real estate development and home building, and more than 30 years of experience as an entrepreneur.

Gregory V. Benson joined us in 1991 as President and Chief Operating Officer and has been a director since May 2004. Mr. Benson is also a member of our board of directors. Mr. Benson has over 30 years of home building experience including over 14 years at national home builders, including NVHomes, Ryan Homes and Centex Homes.

Joseph M. Squeri has served as our Chief Financial Officer since August 2010. Mr. Squeri has more than a decade of public company leadership experience in corporate finance, strategic planning, accounting and operations. From October 2008 to August 2010, Mr. Squeri served as an independent financial and business consultant to privately held companies. From January 2008 to September 2008, Mr. Squeri served as the Executive Vice President-Chief Financial Officer and Treasurer of the Federal Realty Investment Trust (NYSE: FRT) with responsibility for capital markets, financial reporting and investor relations functions. From 1997 through 2007, Mr. Squeri served in a variety of positions at Choice Hotels International (NYSE: CHH), including chief financial officer starting in 1999, and then more significant operating roles culminating his position as president and chief operating officer. Mr. Squeri is a certified public accountant.

Table of Contents

Jubal R. Thompson has served as our General Counsel since October 1998 and our Secretary since December 2004. Mr. Thompson has significant experience in areas of real estate acquisitions and dispositions, real estate and corporate finance, corporate governance, mergers and acquisition and risk management.

Item 1A. Risk Factors
Risks Relating to Our Business

Failure to meet the minimum unit settlement requirements in our modified credit facilities would adversely affect our liquidity.

Two of our existing projects provide us a percentage of realized cash flow from the settlement proceeds of each unit at its respective project provided that we settle on a prescribed minimum number of units semi-annually. If we are unable to achieve the required number of settlements, the lender may elect to reduce the amount of cash flow to us from settlement proceeds. If that happened, it could significantly reduce our cash flows available to support operations and would increase our reliance on capital raising activities and existing cash reserves.

Table of Contents

Our operations require significant capital, which may not to be available.

The real estate development industry is capital intensive and requires significant expenditures for operations, land purchases, land development and construction as well as potential acquisitions of other homebuilders or developers. In order to maintain our operations, we will need to obtain additional financing. These funds can be generated through public or private debt or equity financings, operating cash flow, additional bank borrowings or from strategic alliances or joint ventures. In light of the current economic climate we may not be successful in obtaining additional funds in a timely manner, on favorable terms or at all. Moreover, certain of our bank financing agreements contain provisions that limit the type and amount of debt we may incur in the future without our lenders' consent. In addition, the availability of borrowed funds, especially for land acquisition and construction financing, has been greatly reduced, and lenders may require us to invest increased amounts of equity in a project in connection with both new loans and the extension of existing loans. If we do not have access to additional capital, we may be required to delay, scale back or abandon some or all of our operating strategies or reduce capital expenditures and the size of our operations. As a result, such an inability to access additional capital would likely cause us to experience a material adverse affect on our business, results of operations and financial condition.

Our continuing operations and future growth depends on the availability of construction, acquisition and development loans.

To finance projects, we have historically utilized construction, acquisition and development loans. These credit facilities tend to be project-oriented and generally have variable rates and require significant management time to administer. If financial institutions decide to discontinue providing these facilities to us we would lose our primary source of financing our operations or the cost of retaining or replacing these credit facilities could increase dramatically. Further, this type of financing is typically characterized by short-term loans which are subject to call. If construction, acquisition and development loans become unavailable or accelerated repayment of our existing facilities is demanded, we may not be able to meet our obligations and we may be forced to seek protections afforded under the bankruptcy code.

We engage in construction and real estate activities which are speculative and involve a high degree of risk.

The home building industry is speculative and demand for new homes is significantly affected by changes in economic and other conditions, such as:

employment levels;

availability of home buyer mortgage financing;

interest rates; and

consumer confidence.

These factors can negatively affect the demand for and pricing of our homes and our margin on sale. We are also subject to a number of risks, many of which are beyond our control, including:

delays in construction schedules;

cost overruns;

changes in governmental regulations (such as slow- or no-growth initiatives);

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

increases in real estate taxes and other local government fees;

labor strikes;

transportation costs for delivery of materials; and

increases and/or shortages in raw materials and labor cost.

Our ability to sell homes and, accordingly, our results of operations, will be affected by the availability of mortgage financing to potential home buyers.

Most home buyers finance their purchase of a new home through third-party mortgage financing. As a result, residential real estate demand is adversely affected by:

increases in interest rates and/or related fees;

increases in real estate transaction closing costs;

decreases in the availability of consumer mortgage financing;

increasing housing costs;

unemployment;

changes in federally sponsored financing programs; and

increases in foreclosure inventory and reduction in market comparables resulting from foreclosures and short sales.

Table of Contents

Increases in interest rates and decreases in the availability of consumer mortgage financing have depressed the market for new homes because of the increased monthly mortgage costs and the unavailability of financing to potential home buyers. For instance, recent initiatives to tighten underwriting standards have made mortgage financing more difficult to obtain for some of our entry-level home buyers, which has led to decreased demand from these buyers. Even if potential home buyers do not experience difficulty securing mortgage financing for their purchase of a new home, increases in interest rates and decreased mortgage availability or significant alterations to mortgage product types could make it harder for them to sell their existing homes. This could continue to adversely affect our operating results and financial condition.

The potential reduction or winding down of the role Fannie Mae and Freddie Mac play in the mortgage market may materially adversely affect the multifamily sector and our business, operations and financial condition.

On February 11, 2011, the U.S. Treasury and the U.S. Department of Housing & Urban Development issued a report to the U.S. Congress entitled *Reforming America's Housing Finance Market* that lays out, among other things, three options for long-term reform, which would reduce or wind down the role that Fannie Mae and Freddie Mac play in the mortgage market. These proposals are: (a) a privatized system of housing finance with the government insurance role limited to the Federal Housing Administration (the *FHA*), the United States Department of Agriculture (the *USDA*) and the Department of Veterans Affairs (the *VA*) assistance for narrowly targeted groups of borrowers; (b) a privatized system of housing finance with assistance from the *FHA*, *USDA* and *VA* for narrowly targeted groups of borrowers and a guarantee mechanism to scale up during times of crisis; and (c) a privatized system of housing finance with *FHA*, *USDA* and *VA* assistance for low- and moderate-income borrowers and catastrophic reinsurance behind significant private capital. Any such proposals, if enacted, may have broad and material adverse implications for the multifamily sector and our business, operations and financial condition. We expect such proposals to be the subject of significant discussion and it is not yet possible to determine whether or when such proposals may be enacted, what form any final legislation or policies might take and how proposals, legislation or policies emanating from this report may impact the multifamily sector and our business, operations and financial condition. We are evaluating, and will continue to evaluate, the potential impact of the proposals set for in this report.

Fluctuations in market conditions may affect our ability to sell our land and home inventories at expected prices, if at all, which could adversely affect our revenues, earnings and cash flows.

We are subject to the potential for significant fluctuations in the market value of our land and home inventories. We must constantly locate and acquire new tracts of undeveloped and developed land if we are to support growth in our home building operations. There is a lag between the time we acquire control of undeveloped land or developed home sites and the time that we can bring communities built on that land to market. This lag time varies from site to site as it is impossible to predict with any certainty the length of time it will take to obtain governmental approvals and building permits. The risk of owning undeveloped land, developed land and homes can be substantial. The market value of undeveloped land, buildable lots and housing inventories can fluctuate significantly as a result of changing economic and market conditions. Inventory carrying costs can be significant and can result in losses in a poorly performing development or market. Material write-downs of the estimated value of our land and home inventories could occur if market conditions deteriorate or if we purchase land or build home inventories at higher prices during stronger economic periods and the value of those land or home inventories subsequently declines during weaker economic periods. We could also be forced to sell homes, land or lots for prices that generate lower profit than we anticipated, or at a loss, and may not be able to dispose of an investment in a timely manner when we find dispositions advantageous or necessary. Furthermore, a continued decline in the market value of our land or home inventories may give rise to additional impairments of our inventory and write-offs of contract deposits and feasibility cost, which may result in a breach of financial covenants contained in one or more of our credit facilities, which could cause a default under those credit facilities. Defaults in these credit facilities are often times the responsibility of the Company as the Company is the guarantor of most of its subsidiary's debts.

Deteriorating market conditions, turmoil in the credit markets and increased price competition continued to negatively impact us in 2011 resulting in reduced sales prices, increased customer concessions, reduced gross margins and extended estimates for project completion dates. As a result, we evaluated all of our projects to determine if recorded carrying amounts were recoverable. This evaluation resulted in an aggregate 2010 impairment charge of \$1.5 million in the Washington D.C. region. Impairment charges are recorded as a reduction in our capitalized land and/or house costs. The impairment charge was calculated using a discounted cash flow analysis model, which is dependent upon several subjective factors, including the selection of an appropriate discount rate, estimated average sales prices and estimated sales rates. In performing our impairment modeling, we must select what we believe is an appropriate discount rate based on current market cost of capital and returns expectations. We have used our best judgment in determining an appropriate discount rate based on anecdotal information we have received from marketing our deals for sale in recent months. We have elected to use a rate of 13% in our discounted cash flow model. While the selection of a 13% discount rate was subjective in nature, we believe it is an appropriate rate in the current market. The estimates used by us are based on the best information available at the time the estimates are made. If market conditions continue to deteriorate additional adverse changes to these estimates in future periods could result in further material impairment amounts to be recorded.

Table of Contents

Our ability to use our NOLs and, in certain circumstances, future built-in losses and depreciation deductions can be negatively affected if there is an ownership change as defined under Section 382 of the Internal Revenue Code.

In general, an ownership change occurs whenever there is a shift in ownership by more than 50 percentage points by one or more 5% shareholders over a specified time period (generally three years). Given Section 382's broad definition, an ownership change could be the unintended consequence of otherwise normal market trading in our stock that is outside of our control.

We currently have approximately \$106 million in federal and state NOLs with a potential value of up to approximately \$42 million in tax savings. These deferred tax assets are currently fully reserved. If unused, these NOLs will begin expiring in 2028. Under Internal Revenue Code Section 382 rules, if a change of ownership is triggered, our NOL asset and possibly certain other deferred tax assets may be impaired. We estimate that as of December 31, 2011, the cumulative shift in the Company's stock would not cause an inability to utilize some of our NOL asset.

Home prices and sales activities in the Washington, D.C. geographic market have a large impact on our results of operations because we conduct substantially all of our business in this market.

We currently develop and sell homes principally in the Washington, D.C. market. Home prices and sales activities in the Washington, D.C. geographic market have a large impact on our results of operations because we conduct substantially all of our business in this market. Although demand in this area historically has been strong, the current slowdown in residential real estate demand and reduced availability of consumer mortgage financing have reduced the likelihood of consumers seeking to purchase new homes which has had and will likely continue to have a negative impact on the pace at which we receive orders for our new homes. As a result of the foregoing and general economic conditions, potential customers may be less willing or able to buy our homes, or we may take longer or incur more costs to build them. We may not be able to recapture increased costs by raising prices in many cases because of market conditions or because we fix our prices in advance of delivery by signing home sales contracts. We may be unable to change the mix of our homes or our offerings or the affordability of our homes to maintain our margins or satisfactorily address changing market conditions in other ways. Our limited geographic diversity means that adverse general economic, weather or other conditions in this market could adversely affect our results of operations and cash flows or our ability to grow our business.

Because our business depends on the acquisition of new land, the potential limitations on the supply of land could reduce our revenues or negatively impact our results of operations and financial condition.

Even in the current depressed housing market, we experience competition for available land and developed home sites in the Washington, D.C. market. We have experienced competition for home sites from other, better capitalized, home builders. Our ability to continue our home building activities over the long term depends upon our ability to locate and acquire suitable parcels of land or developed home sites to support our home building operations. If competition for land increases, the cost of acquiring it may rise, and the availability of suitable parcels at acceptable prices may decline. Any need for increased pricing could increase the rate at which consumer demand for our homes declines and, consequently, reduce the number of homes we sell and lead to a decrease in our revenues, earnings and cash flows.

Our business is subject to governmental regulations that may delay, increase the cost of, prohibit or severely restrict our development and home building projects and reduce our revenues and cash flows.

We are subject to extensive and complex laws and regulations that affect the land development and home building process, including laws and regulations related to zoning, permitted land uses, levels of density (number of dwelling units per acre), building design, access to water and other utilities, water and waste disposal and use of open spaces. In addition, we and our subcontractors are subject to laws and regulations relating to worker health and safety. We also are subject to a variety of local, state and federal laws and regulations concerning the protection of health and the environment. In some of our markets, we are required to pay environmental impact fees, use energy saving construction materials and give commitments to provide certain infrastructure such as roads and sewage systems. We must also obtain permits and approvals from local authorities to complete residential development or home construction. The laws and regulations under which we and our subcontractors operate, and our and their obligations to comply with them, may result in delays in construction and development, cause us to incur substantial compliance and other increased costs, and prohibit or severely restrict development and home building activity in certain areas in which we operate. If we are unable to continue to develop communities and build and deliver homes as a result of these restrictions or if our compliance costs increase substantially, our revenues, earnings and cash flows may be reduced.

Cities and counties in which we operate have adopted, or may adopt, slow or no-growth initiatives that would reduce our ability to build and sell homes in these areas and could adversely affect our revenues, earnings and cash flows.

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

From time to time, certain cities and counties in which we operate have approved, and others in which we operate may approve, various slow-growth or no-growth initiatives and other similar ballot measures. Such initiatives restrict development within localities by, for example, limiting the number of building permits available in a given year. Approval of slow- or no-growth measures could reduce our ability to acquire land, obtain building permits and build and sell homes in the affected markets and could create additional costs and administration requirements, which in turn could have an adverse effect on our revenues, earnings and cash flows.

Table of Contents

Increased regulation in the housing industry increases the time required to obtain the necessary approvals to begin construction and has prolonged the time between the initial acquisition of land or land options and the commencement and completion of construction. These delays increase our costs, decrease our profitability and increase the risks associated with the land inventories we maintain.

Municipalities may restrict or place moratoriums on the availability of utilities, such as water and sewer taps. If municipalities in which we operate take actions like these, it could have an adverse effect on our business by causing delays, increasing our costs or limiting our ability to build in those municipalities. This, in turn, could reduce the number of homes we sell and decrease our revenues, earnings and cash flows.

The competitive conditions in the home building industry could increase our costs, reduce our revenues and earnings and otherwise adversely affect our results of operations and cash flows.

The home building industry is highly competitive and fragmented. We compete with a number of national, regional and local builders for customers, undeveloped land and home sites, raw materials and labor. For example, in the Washington, D.C. market, we compete against multiple publicly-traded national home builders, and many privately-owned regional and local home builders. We do not compete against all of the builders in all of our product types or submarkets, as some builders focus on particular types of projects within those markets, such as large estate homes, that are not in competition with our projects.

We compete primarily on the basis of price, location, design, quality, service and reputation. Some of our competitors have greater financial resources, more established market positions and better opportunities for land and home site acquisitions than we do and have greater amounts of unrestricted cash resources on hand, lower costs of capital, labor and material than us. The competitive conditions in the home building industry could, among other things:

make it difficult for us to acquire suitable land or home sites in desirable locations at acceptable prices and terms, which could adversely affect our ability to build homes;

require us to increase selling commissions and other incentives, which could reduce our profit margins;

result in delays in construction if we experience delays in procuring materials or hiring trades people or laborers;

result in lower sales volume and revenues; and

increase our costs and reduce our earnings.

We also compete with sales of existing homes and condominiums, foreclosure sales of existing homes and condominiums and available rental housing. A continued oversupply of competitively priced resale, foreclosure or rental homes in our markets could adversely affect our ability to sell homes profitably.

We are dependent on the services of certain key employees and the loss of their services could harm our business.

Our success largely depends on the continuing services of certain key employees, including Christopher Clemente, our Chairman and Chief Executive Officer; Gregory Benson, our Chief Operating Officer; Jubal Thompson, our General Counsel and Secretary; and Joseph Squeri, our Chief Financial Officer. Our continued success also depends on our ability to attract and retain qualified personnel. We believe that Messrs. Clemente, Benson, Thompson and Squeri each possess valuable industry knowledge, experience and leadership abilities that would be difficult in the short term to replicate. The loss of these or other key employees could harm our operations, business plans and cash flows.

A significant portion of our business plan involves and may continue to involve mixed-use developments and high-rise projects with which we have less experience.

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

We are actively involved in the construction and development of mixed-use and high-rise residential projects. Our experience is largely based on smaller wood-framed structures that are less complex than high-rise construction or the development of mixed-use projects. A mixed-use project is one that integrates residential and non-residential uses in the same structure or in close proximity to each other, on the same land. As we continue to expand into these new product types, we expect to encounter operating, marketing, customer service, warranty and management challenges with which we have less familiarity. We had previously expanded our management team to include individuals with significant experience in this type of real estate development but then were forced to furlough some of them as we downsized our operation. If we are unable to successfully manage the challenges of this portion of our business, we may incur additional costs and our results of operations and cash flows could be adversely affected.

If we experience shortages of labor or supplies or other circumstances beyond our control, there could be delays or increased costs in developing our projects, which would adversely affect our operating results and cash flows.

We and the home building industry, from time to time, may be affected by circumstances beyond our control, including:

work stoppages, labor disputes and shortages of qualified trades people, such as carpenters, roofers, electricians and plumbers;

lack of availability of adequate utility infrastructure and services;

Table of Contents

transportation cost increases;

our need to rely on local subcontractors who may not be adequately capitalized or insured; and

shortages or fluctuations in prices of building materials.

These difficulties have caused and likely will cause unexpected construction delays and short-term increases in construction costs. In an attempt to protect the margins on our projects, we often purchase certain building materials with commitments that lock in the prices of these materials for 90 to 120 days or more. However, once the supply of building materials subject to these commitments is exhausted, we are again subject to market fluctuations and shortages. We may not be able to recover unexpected increases in construction or materials costs by raising our home prices because, typically, the price of each home is established at the time a customer executes a home sale contract. Furthermore, sustained increases in construction costs may, over time, erode our profit margins and may adversely affect our results of operations and cash flows.

We depend on the availability and skill of subcontractors and their willingness to work with us.

Substantially all of our construction work is done by subcontractors with us acting as the general contractor or by subcontractors working for a general contractor we select for a particular project. Accordingly, the timing and quality of our construction depends on the availability and skill of those subcontractors. We do not have long-term contractual commitments with subcontractors or suppliers. Although we believe that our relationships with our suppliers and subcontractors are good, we cannot assure that skilled subcontractors will continue to be available at reasonable rates and in the areas in which we conduct our operations. The inability to contract with skilled subcontractors or general contractors at reasonable costs on a timely basis could limit our ability to build and deliver homes and could erode our profit margins and adversely affect our results of operations and cash flows. Recent cash flow and credit facility limitations have forced us to negotiate settlements with our vendors at less than the entire amounts owed. This may result in vendor hesitation to work with us on future projects.

Construction defect and product liability litigation and claims that arise in the ordinary course of business may be costly or negatively impact sales, which could adversely affect our results of operations and cash flows.

Our home building business is subject to construction defect and product liability claims arising in the ordinary course of business. These claims are common in the home building industry and can be costly. Among the claims for which developers and builders have financial exposure are property damage, environmental claims and bodily injury claims and latent defects that may not materialize for an extended period of time. Damages awarded under these suits may include the costs of remediation, loss of property and health-related bodily injury. In response to increased litigation, insurance underwriters have attempted to limit their risk by excluding coverage for certain claims associated with environmental conditions, pollution and product and workmanship defects. As a developer and a home builder, we may be at risk of loss for mold-related property, bodily injury and other claims in amounts that exceed available limits on our comprehensive general liability policies and those of our subcontractors. In addition, the costs of insuring against construction defect and product liability claims are high and the amount of coverage offered by insurance companies is limited. Uninsured construction defect, product liability and similar claims, claims in excess of the limits under our insurance policies, defense costs and the costs of obtaining insurance to cover such claims could have a material adverse effect on our revenues, earnings and cash flows.

Increased insurance risk could negatively affect our business, results of operations and cash flows.

Insurance and surety companies have reassessed many aspects of their business and, as a result, may take actions that could negatively affect our business. These actions could include increasing insurance premiums, requiring higher self-insured retentions and deductibles, requiring additional collateral on surety bonds, reducing limits, restricting coverages, imposing exclusions, and refusing to underwrite certain risks and classes of business. Any of these actions may adversely affect our ability to obtain appropriate insurance coverage at reasonable costs, which could have a material adverse effect on our business. Additionally, coverage for certain types of claims, such as claims relating to mold, is generally unavailable. Further, we rely on surety bonds, typically provided by insurance companies, as a means of limiting the amount of capital utilized in connection with the public improvement sureties that we are required to post with governmental authorities in connection with land development and construction activities. The cost of obtaining these surety bonds is, from time to time, unpredictable and these surety bonds may be unavailable to us for new projects. These factors can delay or prohibit commencement of development projects and adversely affect revenue, earnings and cash flows.

We are subject to warranty claims arising in the ordinary course of business that could be costly.

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

We provide service warranties on our homes for a period of one year or more post closing and provide warranties on occasion as required by applicable statutory requirements for extended periods. We self-insure our warranties from time to time and reserve an amount we believe will be sufficient to satisfy any warranty claims on homes we sell and periodically purchase insurance related coverage to cover the costs associated with potential claims. Additionally, we also attempt to pass much of the risk associated with potential defects in materials and workmanship on to the subcontractors performing the work and the suppliers and manufacturers of the materials and their insurance carriers. In such cases, we still may incur unanticipated costs if a subcontractor, supplier, manufacturer or its insurance carrier fails to honor its obligations regarding the work or materials it supplies to our projects. If the amount of actual claims materially exceeds our aggregate warranty reserves, any available insurance coverage and/or the amounts we can recover from our subcontractors and suppliers, our operating results and cash flows would be adversely affected.

Table of Contents

Our business, results of operations and financial condition may be affected by adverse weather conditions or natural disasters.

Adverse weather conditions, such as extended periods of rain, snow or cold temperatures, and natural disasters, such as hurricanes, tornadoes, floods and fires, can delay completion and sale of homes, damage partially complete or other unsold homes in our inventory and/or decrease the demand for homes or increase the cost of building homes. To the extent that natural disasters or adverse weather events occur, our business and results may be adversely affected. To the extent our insurance is not adequate to cover business interruption losses or repair costs resulting from these events, our results of operations and financial conditions may be adversely affected.

We are subject to certain environmental laws and the cost of compliance could adversely affect our business, results of operations and cash flows.

As a current or previous owner or operator of real property, we may be liable under federal, state, and local environmental laws, ordinances and regulations for the costs of removal or remediation of hazardous or toxic substances on, under or in the properties or in the proximity of the properties we develop. These laws often impose liability whether or not we knew of, or were responsible for, the presence of such hazardous or toxic substances. The cost of investigating, remediating or removing such hazardous or toxic substances may be substantial. The presence of any such substance, or the failure promptly to remediate any such substance, may adversely affect our ability to sell the property, to use the property for our intended purpose, or to borrow funds using the property as collateral. In addition, the construction process involves the use of hazardous and toxic materials. We could be held liable under environmental laws for the costs of removal or remediation of such materials. In addition, our existing credit facilities also restrict our access to the loan proceeds if the properties that are used to collateralize the loans are contaminated by hazardous substances and require us to indemnify the bank against losses resulting from such occurrence for significant periods of time, even after the loan is fully repaid.

Our Eclipse project is part of a larger development located at Potomac Yard in Northern Virginia. Potomac Yard was formerly part of a railroad switching yard contaminated as a result of rail-related activities. Remediation of the property was conducted under supervision of the U.S. Environmental Protection Agency, or EPA, in coordination with state and local authorities. In 1998, federal, state and local government agencies authorized redevelopment of the property. Our plans for development of our portion of the project are consistent with those authorizations. Although concentrations of contaminants remain on the property under the EPA-approved remediation work plan, the EPA has determined that they do not present an unacceptable risk to human health or the environment. However, the EPA's determination does not preclude private lawsuits and it is possible that we could incur costs to defend against any claims that may be brought in the future relating to any such contaminants.

If we are not able to develop our communities successfully, results of operations and financial condition could be diminished.

Before a community generates any revenues, material expenditures are required to acquire land, to obtain development approvals and to construct significant portions of project infrastructure, amenities, model homes and sales facilities. It can take a year or more for a community development to achieve cumulative positive cash flow. Our inability to develop and market our communities successfully and to generate positive cash flows from these operations in a timely manner would have a material adverse effect on our ability to service our debt and to meet our working capital requirements.

Our operating results may vary.

We expect to experience variability in our revenues and net income. Factors expected to contribute to this variability include, among other things:

the uncertain timing of real estate closings;

our ability to continue to acquire additional land or options thereon on acceptable terms and the timing of all necessary regulatory approvals required for development;

the condition of the real estate market and the general economy in the markets in which we operate;

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

the cyclical nature of the home building industry;

the changing regulatory environment concerning real estate development and home building;

changes in prevailing interests rates and the availability of mortgage financing; and

costs of material and labor and delays in construction schedules.

The volume of sales contracts and closings typically varies from month to month and from quarter to quarter depending on several factors, including the stages of development of our projects, weather and other factors beyond our control. In the early stages of a project's development, we incur significant start-up costs associated with, among other things, project design, land acquisition and development, construction and marketing expenses. Since revenues from sales of properties are generally recognized only upon the

Table of Contents

transfer of title at the closing of a sale, no revenue is recognized during the early stages of a project unless land parcels or residential home sites are sold to other developers. Periodic sales of properties may be insufficient to fund operating expenses. Further, if sales and other revenues are not adequate to cover operating expenses, we will be required to seek sources of additional operating funds. Accordingly, our financial results will vary from community to community and from time to time.

Acts of war or terrorism may seriously harm our business.

Acts of war, any outbreak or escalation of hostilities between the United States and any foreign power or acts of terrorism, may cause disruption to the U.S. economy, or the local economies of the markets in which we operate, cause shortages of building materials, increase costs associated with obtaining building materials, result in building code changes that could increase costs of construction, affect job growth and consumer confidence, or cause economic changes that we cannot anticipate, all of which could reduce demand for our homes and adversely impact our revenues, earnings and cash flows.

We do not own the Comstock brand or trademark, but use the brand and trademark pursuant to the terms of a perpetual license granted by Christopher Clemente, our Chief Executive Officer and Chairman of the Board.

Our Chief Executive Officer and Chairman of the Board, Christopher Clemente, has licensed his ownership interest in the Comstock brand and trademark to us in perpetuity and free of charge. We do not own the brand or the trademark and are not in a position to be able to adequately protect it against infringement from third parties. Additionally, Mr. Clemente has retained the right to continue using the Comstock brand and trademark individually and through his affiliates, including real estate development projects in our current or future markets that are unrelated to the Company. We will be unable to control the quality of projects undertaken by Mr. Clemente or others using the Comstock brand and trademark and therefore will be unable to prevent any damage to its goodwill that may occur. We will further be unable to preclude Mr. Clemente from licensing or transferring the ownership of the Comstock trademark to third parties, some of whom may compete against us. Consequently, we are at risk that our brand could be damaged which could have a material adverse effect on our business, operations and cash flows.

Risks Related to our Common Stock and the Securities Markets

Volatility of our stock price could adversely affect stockholders.

The market price of our Class A common stock could fluctuate significantly as a result of:

quarterly variations in our operating results;

general conditions in the home building industry;

interest rate changes;

changes in the market's expectations about our operating results;

our operating results failing to meet the expectation of securities analysts or investors in a particular period;

changes in financial estimates and recommendations by securities analysts concerning our Company or of the home building industry in general;

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

operating and stock price performance of other companies that investors deem comparable to us;

news reports relating to trends in our markets;

changes in laws and regulations affecting our business;

material announcements by us or our competitors;

material announcements by our construction lenders or the manufacturers and suppliers we use;

sales of substantial amounts of Class A common stock by our directors, executive officers or significant stockholders or the perception that such sales could occur; and

general economic and political conditions such as recessions and acts of war or terrorism.

Investors may not be able to resell their shares of our Class A common stock following periods of volatility because of the market's adverse reaction to that volatility. Our Class A common stock may not trade at the same levels as the stock of other homebuilders, and the market in general may not sustain its current prices.

Investors in our Class A common stock may experience dilution with the future exercise of stock options and warrants, the grant of restricted stock and issuance of stock in connection with our acquisitions of other companies.

From time to time, we have issued and we will continue to issue stock options or restricted stock grants to employees and non-employee directors pursuant to our equity incentive plan. We expect that these options or restricted stock grants will generally vest commencing one year from the date of grant and continue vesting over a four-year period. Investors may experience dilution as the

Table of Contents

options vest and are exercised by their holders and the restrictions lapse on the restricted stock grants. In addition, we may issue stock in connection with acquisitions of other companies, or warrants in connection with the settlement of obligations and or indebtedness with vendors and suppliers, which may result in investors experiencing dilution.

Substantial sales of our Class A common stock, or the perception that such sales might occur, could depress the market price of our Class A common stock.

A substantial amount of the shares of our Class A common stock are eligible for immediate resale in the public market. Any sales of substantial amounts of our Class A common stock in the public market, or the perception that such sales might occur, could depress the market price of our Class A common stock.

The holders of our Class B common stocks exert control over us and thus limit the ability of other stockholders to influence corporate matters.

Messrs. Clemente and Benson own 100% of our outstanding Class B common stock, which, together with their shares of Class A common stock, represent approximately 78.1% of the combined voting power of all classes of our voting stock as of March 19, 2012. As a result, Messrs. Clemente and Benson, acting together, have control over us, the election of our board of directors and our management and policies. Messrs. Clemente and Benson, acting together, also have control over all matters requiring stockholder approval, including the amendment of certain provisions of our certificate of incorporation and bylaws, the approval of any equity-based employee compensation plans and the approval of fundamental corporate transactions, including mergers. In light of this control, other companies could be discouraged from initiating a potential merger, takeover or any other transaction resulting in a change of control. Such a transaction potentially could be beneficial to our business or to our stockholders. This may in turn reduce the price that investors are willing to pay in the future for shares of our Class A common stock.

The limited voting rights of our Class A common stock could impact its attractiveness to investors and its liquidity and, as a result, its market value.

The holders of our Class A and Class B common stock generally have identical rights, except that holders of our Class A common stock are entitled to one vote per share and holders of our Class B common stock are entitled to 15 votes per share on all matters to be voted on by stockholders. The difference in the voting rights of the Class A and Class B common stock could diminish the value of the Class A common stock to the extent that investors or any potential future purchasers of our Class A common stock ascribe value to the superior voting rights of the Class B common stock.

It may be difficult for a third party to acquire us, which could inhibit stockholders from realizing a premium on their stock price.

We are subject to the Delaware anti-takeover laws regulating corporate takeovers. These anti-takeover laws prevent Delaware corporations from engaging in business combinations with any stockholder, including all affiliates and employees of a stockholder, who owns 15% or more of the corporation's outstanding voting stock, for three years following the date that the stockholder acquired 15% or more of the corporation's voting stock unless specified conditions are met.

Our amended and restated certificate of incorporation and bylaws contain provisions that have the effect of delaying, deferring or preventing a change in control that stockholders could consider favorable or beneficial. These provisions could discourage proxy contests and make it more difficult for stockholders to elect directors and take other corporate actions. These provisions could also limit the price that investors might be willing to pay in the future for shares of our common stock. These provisions include:

a staggered board of directors, so that it would take three successive annual meetings to replace all directors;

a prohibition of stockholder action by written consent; and

advance notice requirements for the submission by stockholders of nominations for election to the board of directors and for proposing matters that can be acted upon by stockholders at a meeting.

Our issuance of shares of preferred stock could delay or prevent a change of control of us.

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

Our Board of Directors has the authority to cause us to issue, without any further vote or action by the stockholders, up to 20,000,000 shares of preferred stock, par value \$.01 per share, in one or more series, to designate the number of shares constituting any series, and to fix the rights, preferences, privileges and restrictions thereof, including dividend rights, voting rights, rights and terms of redemption, redemption price or prices and liquidation preferences of such series. The issuance of shares of preferred stock may have the effect of delaying, deferring or preventing a change in control of us without further action by the stockholders, even where stockholders are offered a premium for their shares. The issuance of shares of preferred stock with voting and conversion rights may adversely affect the voting power of the holders of Class A common stock, including the loss of voting control. We have no present plans to issue any shares of preferred stock.

Item 1B. Unresolved Staff Comments

Not Applicable.

Item 2. Properties

Our principal administrative, sales and marketing facilities are located at our headquarters in Reston, Virginia. At December 31, 2009 we leased approximately 8,200 square feet of office space in the Reston facility from Comstock Asset Management, L.C., an affiliate wholly-owned by Christopher Clemente. Pursuant to this three-year headquarters lease, which we entered into on December 31, 2009 and amended in March 2010, decreasing our office space to approximately 7,200 square feet, we will pay annual rent of approximately \$204,000, subject to a 4% annual increase through the lease termination.

For information regarding the properties at our communities, please see Item 1 Business Our Communities.

Item 3. Legal Proceedings

On July 29, 2008, Balfour Beatty Construction, LLC (Balfour), successor in interest to Centex Construction, the general contractor for a subsidiary of the Company, filed liens totaling approximately \$552 at The Eclipse on Center Park Condominium project (Project) in connection with its claim for amounts allegedly owed under the Project contract documents. In September 2008, the Company s subsidiary filed suit against Balfour to invalidate the liens and for its actual and liquidated damages in the approximate amount of \$17.1 million due to construction delays and additional costs incurred by the Company s subsidiary with respect to the Project. In October 2008, Balfour filed counterclaims in the approximate amount of \$2.8 million. Subsequent to an expedited hearing filed by the Company s subsidiary to determine the validity of the liens that was ultimately heard in February 2009, the Company received an order of the court in April 2009 invalidating the liens. On March 19, 2010, the Company s subsidiary received a judgment against Balfour in an amount of \$11.96 million. On March 25, 2010, the Company s subsidiary received notice of Balfour s intention to appeal the judgment and post a supersedeas bond in the amount of \$12.5 million. On July 21, 2011, the Company and Balfour reached a settlement including disbursement of payment for all claims related to this matter for approximately \$9.4 million, net of closing costs of approximately \$900. The Company received the proceeds of the settlement on August 4, 2011.

Currently, we are not subject to any material legal proceedings. From time to time, however, we are named as a defendant in legal actions arising from our normal business activities. Although we cannot accurately predict the amount of our liability, if any, that could arise with respect to legal actions pending against us, we do not expect that any such liability will have a material adverse effect on our financial position, operating results or cash flows. We believe that we have obtained adequate insurance coverage, rights to indemnification, or where appropriate, have established reserves in connection with these legal proceedings.

Item 4. (Removed and Reserved)

Table of Contents**PART II****Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**
Market for Common Stock

Our Class A common stock is traded on the NASDAQ Capital Market under the symbol CHCI. The following table sets forth the high and low sale prices of our Class A common stock, as reported on NASDAQ, for the periods indicated:

	High	Low
Fiscal Year Ended 2010		
First quarter	\$ 1.25	\$.70
Second quarter	\$ 3.99	\$.91
Third quarter	\$ 1.88	\$ 1.15
Fourth quarter	\$ 1.55	\$.96
Fiscal Year Ended 2011		
First quarter	\$ 2.07	\$ 1.09
Second quarter	\$ 1.43	\$.90
Third quarter	\$ 1.59	\$.86
Fourth quarter	\$ 1.22	\$.91

Dividends

We have never paid any cash dividends on our common stock and do not anticipate doing so in the foreseeable future. From time to time, our board of directors evaluates the desirability of paying cash dividends. The future payment and amount of cash dividends will depend upon our financial condition and results of operations, applicable loan covenants and other factors deemed relevant by our board of directors. Our current loan agreements restrict us from paying dividends.

Unregistered Sales of Equity Securities and Use of Proceeds

In 2009, the Company's Board of Directors approved the issuance of up to 600,000 warrants of the Company's Class A Common Stock to settle outstanding trade debt. For the years ended December 31, 2010, 258,674 warrants, at an average strike price of \$1.11, were issued to settle trade debt of \$419. The Company recorded a gain of \$195 in 2010 resulting from the settlement. There were no warrants issued to settle trade debt for the year ended December 31, 2011. The warrant exercise period begins on the date of execution of the release agreement and ends 5 years after the execution date. Since the inception of the program, 440,331 warrants have been issued at an average strike price of \$1.06. There are 159,689 warrants remaining under the authorization.

No general solicitation or advertising was involved, the number of recipients of the securities was limited and such recipients were accredited and/or sophisticated. As a result, we are relying on the exemption provided by Section 4(2) of the Securities Act of 1933, as amended (the Securities Act), and Rule 506 of Regulation D of the Securities Act for the issuance of securities.

Issuer Purchases of Equity Securities

Our board of directors has previously authorized the repurchase of up to 1.0 million shares of our Class A common stock in one or more open market or privately negotiated transactions. During the twelve months ended December 31, 2011, we did not repurchase any of our outstanding Class A common stock. As of December 31, 2011, 0.6 million shares of Class A common stock authorized for repurchase remain available for repurchase; however, we have no immediate plans to repurchase stock under this authorization. On December 31, 2011, there were approximately 26 record holders of our Class A common stock. On December 31, 2011 there were two holders of our Class B common stock.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our consolidated financial statements and related notes appearing elsewhere in this report. This discussion and analysis contains forward-looking statements that involve risks and uncertainties. Please see **Cautionary Notes Regarding Forward-looking Statements** for more information. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of various factors including, but not limited to, those discussed below and elsewhere in this report, particularly under the headings **Risk Factors** and **Cautionary Notes Regarding Forward-looking Statements**.

Overview

We are a multi-faceted real estate development and services company. We have substantial experience with building a diverse range of products including apartments, single-family homes, townhouses, mid-rise condominiums, high-rise multi-family condominiums and mixed-use (residential and commercial) developments. We operate our business through three segments: Homebuilding, Apartment Buildings and Real Estate Services as further discussed in Note 2 of our consolidated financial statements. We are currently focused on the Washington, D.C. market, which is the eighth largest metropolitan statistical area in the United States.

Homebuilding

Our expertise in developing traditional and non-traditional housing products enables us to focus on a wide range of opportunities within our core market. For our homebuilding operations, we develop properties with the intent that they be sold either as fee-simple properties or condominiums to individual unit buyers or as investment properties sold to private or institutional investors. Our for sale products are designed to attract first-time, early move-up, and secondary move-up buyers. We focus on products that we are able to offer for sale in the middle price points within the markets where we operate, avoiding the very low-end and high-end products. We believe our middle market strategy positions our products such that they are affordable to a significant segment of potential home buyers in our market.

Apartment Buildings

Comstock's focus on the apartment sector is on developing projects ranging from approximately 75 to 200 units in locations that are supply constrained with demonstrated demand for stabilized assets. We seek opportunities in the multi-family rental market where our experience and core capabilities can be leveraged. We will either position the assets for sale when completed or operate the asset within our own portfolio. Operating the asset for our own account affords us the flexibility of converting the units to condominiums in the future. When developing rental communities, we design our products to be affordable for tenants that fit one of two groups; (i) young first-time renters, or (ii) renters by choice. The multi-family asset class has benefitted from turmoil in the new home industry, limited access to residential mortgage financing and market conditions that have driven down construction costs during the past few years. Continued favorable economic and employment conditions in the Washington, D.C. market have caused rents to rise while vacancy rates and cap rates have declined.

Real Estate Services

Our management team has significant experience in all aspects of real estate management including strategic planning, land development, entitlement, property management, sales and marketing, workout and turnaround strategies, financing and general construction. We are able to provide a wide range of construction management, general contracting and other real estate related services to other property owners. This business line not only allows us to generate fee income from our highly qualified personnel but also serves as a potential catalyst for joint venture and acquisition opportunities.

We believe that our significant experience over the past 25 years, combined with our ability to navigate through two major housing downturns (early 1990s and late 2000s) have provided us the experience necessary to capitalize on attractive opportunities in our core market of Washington, D.C. and to rebuild shareholder value. We believe that our focus on the Washington, D.C. market, which has historically been characterized by economic conditions less volatile than many other major homebuilding markets, will provide an opportunity to generate attractive returns on investment and for growth.

Recent Developments

SunBridge Financing and Relationship

On July 12, 2011, the Company, through a subsidiary called Comstock Potomac Yard, L.C., entered into a loan agreement with BCL Eclipse, LLC, an affiliate of SunBridge Capital Management, LLC (**SunBridge**), pursuant to which the Company secured a \$13.8 million loan with a

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

three year term (the SunBridge Eclipse Loan) to refinance the Company s Eclipse condominium project. Proceeds from the SunBridge Eclipse Loan were primarily utilized to (i) pay off existing indebtedness of approximately \$9.0 million, (ii) pay approximately \$0.8 million for expenses associated with the SunBridge Eclipse Loan (which are classified in other assets in the accompanying balance sheet), and (iii) for general corporate purposes.

Table of Contents

On July 12, 2011, SunBridge also issued a binding commitment letter to the Company, through a subsidiary called Comstock Penderbrook, L.C., for a cash out refinance of the Company's Penderbrook Square condominium projected in an amount of up to \$7.0 million with a three year term. This commitment was drawn upon on October 5, 2011 and the loan was funded for approximately \$5.4 million. Proceeds from this loan were primarily utilized to (i) pay off existing indebtedness of approximately \$3.9 million, (ii) pay for expenses associated with the loan of approximately \$0.7 million, and (iii) for general corporate purposes.

In connection with the SunBridge Loans, on July 12, 2011, the Company agreed to issue to BridgeCom Development I, LLC, an affiliate of SunBridge (BridgeCom), an immediately exercisable warrant to purchase 1.0 million shares of the Company's Class A common stock at an exercise price equal to the average closing price of the stock for the preceding thirty days (\$1.03) (the SunBridge Warrant).

In addition, on July 12, 2011, the Company also agreed to enter into a right of first offer and refusal (Strategic Agreement) with SunBridge to jointly pursue certain homebuilding and multi-family projects in the Washington, D.C. metropolitan area. Under the general terms of the Strategic Agreement, the Company will offer material future investment opportunities to SunBridge and if mutually agreed upon, the Company and SunBridge will enter into specific joint venture arrangements for each identified opportunity. The Strategic Agreement terminates at the earlier of three years from the date of the agreement or until each party funds a minimum of \$25.0 million in identified investment opportunities.

Cascades Apartment Project

On January 31, 2011, Comstock Cascades II, L.C., one of our subsidiaries (Cascades II), entered into a private placement whereby Cascades II raised working capital in the amount of \$2.35 million (the Private Placement) related to the planned construction of a 103 unit apartment project located in the Cascades master planned community in Loudoun County, Virginia (the Cascades Apartments or The Commons on Potomac Square Apartments). Proceeds of the Private Placement were utilized (i) to provide sufficient capital needed to secure project financing for the Cascades Apartments, (ii) to retire a portion of the existing indebtedness owed to M and T Bank (M&T) in relation to the Cascades Apartments project, and (iii) to reimburse the Company for prior expenditures incurred on behalf of the project. Participants in the Private Placement included unrelated third party investors along with several members of the Company's Board of Directors, as well as the Chief Operating Officer, Chief Financial Officer and General Counsel of the Company. The Private Placement was redeemed on March 7, 2012 in connection with the sale of the Potomac Square Apartments project.

On February 11, 2011, Cascades II entered into a Loan Agreement (the Cardinal Loan Agreement) with Cardinal Bank pursuant to which Cascades II obtained an \$11.0 million multi-family construction loan and mortgage with a five year term (the Cardinal Loan). Proceeds from the Cardinal Loan were used to (i) fund the construction of a 103 unit apartment project located in the Cascades master planned community in Loudoun County, Virginia (the Cascades Apartments) and (ii) retire existing indebtedness of the Company owed to M&T having a maturity date of February 14, 2011 and which was secured by a first deed of trust on the real property upon which the Potomac Square Apartments was constructed. The Company has fully guaranteed the Cardinal Loan. Christopher Clemente, the Chief Executive Officer of the Company and Gregory Benson, the Chief Operating Officer of the Company (each an Officer), also provided a limited guaranty in connection with the Cardinal Loan of up to \$6.8 million, subject to further reduction upon the satisfaction of certain enumerated conditions set forth in the Cardinal Loan Agreement. In connection with the Officers' limited guaranty of the Cardinal Loan, and in connection with the Company's entry into a loan with Eagle Bank, the Officers and the Company entered into a Credit Enhancement and Indemnification Agreement on February 17, 2011 (the Indemnification Agreement) providing for full indemnification of the Officers by the Company against future losses incurred as a result of their guaranty of the Cardinal Loan or the Eagle Bank Loan. Pursuant to the Indemnification Agreement, the Officers, on an aggregate basis, are entitled to a credit enhancement fee (Credit Enhancement Fee) from the Company for the Cardinal Loan and the Eagle Bank Loan calculated at a rate of four percent (4%) per annum based on the lesser of (i) the combined outstanding balance of the Cardinal Loan and the Eagle Bank Loan at the end of each month, or (ii) such Officer's maximum guaranty exposure in connection with the Cardinal Loan and the Eagle Bank Loan. One-half of the Credit Enhancement Fee is payable monthly, in arrears, and the remaining half is deferred and payable on an annual basis. There is no obligation that the Officers provide credit support to the Company for its future borrowing needs. The Eagle Bank Loan was retired on July 12, 2011.

On March 7, 2012, Cascades II completed the sale of Cascades Apartments to an affiliate of CAPREIT Acquisition Corporation (Purchaser), a Maryland corporation, pursuant to a Contract of Sale Agreement, as amended, dated October 31, 2011. The Cascades II development was sold for \$19.35 million. At settlement, the Company received net proceeds of approximately \$4.7 million from the transaction after repayment of the existing loan from Cardinal Bank secured by the Cascades Apartments and the retirement of the non-controlling equity investment related to the Cascades Apartments. Upon settlement of existing loan from Cardinal Bank, the Indemnification Agreement was terminated and the deferred Credit Enhancement Fees, of which \$93 were outstanding as of December 31, 2011, were settled in full.

Recent Accounting Pronouncements

In May 2011, the FASB issued Accounting Standards Update No. 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs (ASU 2011-04), which changes the wording used to describe the requirements in GAAP for measuring fair value and for disclosing information about fair value measurements in order to improve

Table of Contents

consistency in the application and description of fair value between GAAP and IFRS. ASU 2011-04 clarifies how the concepts of highest and best use and valuation premise in a fair value measurement are relevant only when measuring the fair value of nonfinancial assets and are not relevant when measuring the fair value of financial assets or liabilities. In addition, the guidance expanded the disclosures for the unobservable inputs for Level 3 fair value measurements, requiring quantitative information to be disclosed related to (1) the valuation processes used, (2) the sensitivity of the fair value measurement to changes in unobservable inputs and the interrelationships between those unobservable inputs, and (3) use of a nonfinancial asset in a way that differs from the asset's highest and best use. The revised guidance is effective for interim and annual periods beginning after December 15, 2011 and early application by public entities is prohibited. We are currently evaluating the potential impact of adopting this guidance on our consolidated financial position and results of operations.

Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with generally accepted accounting principles, which require us to make certain estimates and judgments that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. On an ongoing basis, we evaluate our estimates, including those related to the consolidation of variable interest entities, revenue recognition, impairment of real estate held for development and sale, warranty reserve and our environmental liability exposure. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. Actual results may differ materially from these estimates.

A summary of significant accounting policies is provided in Note 2 to our audited consolidated financial statements. The following section is a summary of certain aspects of those accounting policies that require our most difficult, subjective or complex judgments and estimates.

Real estate held for development and sale

Real estate held for development and sale includes land, land development costs, interest and other construction costs. Land held for development is stated at cost, or when circumstances or events indicate that the land is impaired, at estimated fair value. Land, land development and indirect land development costs are accumulated by specific project and allocated to various units within that project using specific identification and allocation based upon the relative sales value, unit or area methods. Direct construction costs are assigned to units based on specific identification. Construction costs primarily include direct construction costs and capitalized field overhead. Other costs are comprised of fees, capitalized interest and real estate taxes. Selling costs are expensed as incurred.

If the project is considered held for sale, it is valued at the lower of cost or fair value less estimated selling costs. Currently, the Company's Eclipse and Penderbrook projects meet these criteria. Because the project sales are expected to extend over a period of time, the Company calculates fair value utilizing a discounted cash flow model as discussed below.

For assets held for development, estimated fair value is based on comparable sales of real estate in the normal course of business under existing and anticipated market conditions. The evaluation takes into consideration the current status of the property, various restrictions, carrying costs, costs of disposition and any other circumstances which may affect fair value including management's plans for the property. A write-down to estimated fair value is recorded when the net carrying value of the property exceeds its estimated undiscounted future cash flows. These evaluations are made on a property-by-property basis whenever events or changes in circumstances indicate that the net book value may not be recoverable.

The Company has classified its Eclipse and Penderbrook projects as held for sale as discussed above and accordingly, written the projects down to fair value less costs to sell as determined by discounted cash flow models. Discounted cash flow models are dependent upon several subjective factors, primarily estimated average sales prices, estimated sales pace, and the selection of an appropriate discount rate. While current market conditions make the estimated timeframe for sales challenging, the Company has generally assumed sales prices equal to or less than current prices and the remaining duration of the community sales process are estimated to be one to two years. These assumptions are often interrelated as price reductions can generally be assumed to increase the sales pace. In addition, the Company must select what it believes to be an appropriate discount rate. The Company has used its best judgment in determining an appropriate discount rate based on information it has received from marketing its communities for sale in recent periods, and accordingly has elected to use a rate of 13% in its discounted cash flow model. The estimates of sales prices, sales pace, and discount rates used by the Company are based on the best information available at the time the estimates are made. In recent months, market conditions affecting the Company's Washington, D.C. area projects have improved; however, if market conditions deteriorate again, additional adverse changes to these estimates in future periods could result in further material impairment amounts to be recorded.

The Company recorded an impairment charge of \$1.5 million during the year ended December 31, 2010 to properly record its held for sale projects at fair market value less costs to sell. No such charges were recorded during the year ended December 31, 2011.

Table of Contents

After impairments and write-offs, real estate held for development and sale consists of the following:

	December 31, 2011	December 31, 2010
Land and land development costs	\$ 4,693	\$ 8,862
Cost of construction (including capitalized interest and real estate taxes)	16,519	25,146
	\$ 21,212	\$ 34,008

Warranty reserve

Warranty reserves for units settled are established to cover potential costs for materials and labor with regard to warranty-type claims expected to arise during the typical one-year warranty period provided by the Company or within the two-year statutorily mandated structural warranty period for condominiums. Since the Company typically subcontracts its homebuilding work, subcontractors are required to provide the Company with an indemnity and a certificate of insurance prior to receiving payments for their work. Claims relating to workmanship and materials are generally the primary responsibility of the subcontractors and product manufacturers. The warranty reserve is established at the time of closing, and is calculated based upon historical warranty cost experience and current business factors. This reserve is an estimate and actual warranty costs could vary from these estimates. Variables used in the calculation of the reserve, as well as the adequacy of the reserve based on the number of homes still under warranty, are reviewed on a periodic basis. Warranty claims are directly charged to the reserve as they arise. The following table is a summary of warranty reserve activity which is included in accounts payable and accrued liabilities:

	Years ended December 31,	
	2011	2010
Balance at beginning period	\$ 1,110	\$ 692
Additions	110	721
Releases and/or charges incurred	(211)	(303)
Balance at end of period	\$ 1,009	\$ 1,110

Revenue recognition

We recognize revenues and related profits or losses from the sale of residential properties, including multiple units to the same buyer, finished lots and land sales when closing has occurred, full payment has been received, title and possession of the property has transferred to the buyer and we have no significant continuing involvement in the property. Other revenues include revenue from land sales, rental revenue from leased apartments, which is recognized over the terms of the respective leases, and revenue earned from management and administrative support services provided to related parties, which is recognized as the services are provided.

Income taxes

Income taxes are accounted for under the asset and liability method in accordance with ASC 740, Accounting for Income Taxes, (ASC 740). Deferred tax assets and liabilities are recognized for future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on the deferred tax assets and liabilities is recognized in income in the period that includes the enactment date.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. At December 31, 2007, the Company recorded valuation allowances for certain tax attributes and other deferred tax assets. At this time, sufficient uncertainty exists regarding the future realization of these deferred tax assets through future taxable income or carry back opportunities. If, in the future, the Company believes that it is more likely than not that these deferred tax benefits will be realized, the valuation allowances will be reversed. With a full valuation allowance, any change in the deferred tax asset or liability is fully offset by a corresponding change in the valuation allowance. This results in a zero deferred tax benefit or expense for the

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

year ended December 31, 2011.

The Company currently has approximately \$106 million in federal and state NOLs, which based on current statutory notes, has a potential value of up to \$41 million in tax savings. If unused, these NOLs will begin expiring in 2028. Under Internal Revenue Code Section 382 rules, if a change of ownership is triggered, the Company's NOL asset and possibly certain other deferred tax assets may be impaired. In general, an ownership change occurs whenever there is a shift in ownership by more than 50 percentage points by one or more 5% shareholders over a specified time period (generally three years). Given Section 382's broad definition, an ownership change could be the

Table of Contents

unintended consequence of otherwise normal market trading in the Company's stock that is outside of the Company's control. We estimate that as of December 31, 2011, the cumulative shift in the Company's stock would not cause an impairment of our NOL asset. However, if an ownership change were to occur, a Section 382 limitation is not expected to materially impact the Company's financial position or results of operations as of December 31, 2011.

In an effort to preserve the availability of these NOLs, Comstock earlier this year adopted a Section 382 stockholder rights plan (the Rights Plan). The Rights Plan was adopted to reduce the likelihood of such an unintended ownership change and thus assist in preserving the value of these tax benefits. Similar plans have been adopted by a number of companies holding similar significant tax assets over the past several years. This plan was submitted to a vote of the Company's shareholders on June 17, 2011 and the plan was approved at that meeting.

We file U.S. and state income tax returns in jurisdictions with varying statutes of limitations. The 2008 through 2010 tax years generally remain subject to examination by federal and most state tax authorities.

Use of estimates

The preparation of the financial statements, in conformity with accounting principles generally accepted in the United States of America, requires management to make estimates and assumptions that affect the reported amounts in the financial statements and accompanying notes. Actual results could differ from those estimates. Material estimates are utilized in the valuation of real estate held for development and sale, valuation of deferred tax assets, capitalization of costs, consolidation of variable interest entities and warranty reserves.

Results of Operations

Year ended December 31, 2011 compared to year ended December 31, 2010

Orders, backlog and cancellations

Gross new order revenue for the year ended December 31, 2011 decreased \$4.1 million to \$14.5 million on 50 homes as compared to \$18.6 million on 58 homes for the year ended December 31, 2010. Net new order revenue for the year ended December 31, 2011 decreased \$4.0 million to \$14.1 million on 48 homes as compared to \$18.1 million on 57 homes for the year ended December 31, 2010. The average gross new order revenue per unit for the year ended December 31, 2011 decreased by \$30 to \$290, as compared to \$320 for the year ended December 31, 2010. Our backlog at December 31, 2011 increased \$0.07 million to \$0.63 million on 3 homes as compared to our backlog at December 31, 2010 of \$0.56 million on 1 home.

We have two Washington, D.C. condominium projects where we have units available for sale and for rent: Penderbrook Square in Fairfax, VA and the Eclipse at Potomac Yard in Arlington, VA. Therefore, we were only able to generate orders and backlog at these two condominium projects for the year ended December 31, 2011. Because our unit sales are generated from completed inventory we do not need to construct units after a sales contract is executed with a unit purchaser. As a result, we are able to quickly execute on a sales contract and deliver the unit to the purchaser. Typically, unit deliveries are made within thirty days of contract execution. As a result, we do not tend to generate significant order backlog.

Revenue homebuilding

The number of homes delivered for the year ended December 31, 2011 decreased by 9 homes, to 48, as compared to 57 homes for the year ended December 31, 2010. A modest improvement in the pricing environment offset by a lower priced product mix, resulted in the average revenue performance delivered decreased by \$42 to \$293 for the year ended December 31, 2011 as compared to \$335 for the year ended December 31, 2010.

Homebuilding revenues decreased by \$5.0 million to \$14.1 million for the year ended December 31, 2011 as compared to \$19.1 million for the year ended December 31, 2010. This reduction in revenue from homebuilding in 2011 compared to 2010 is primarily attributable to unit mix and is not indicative of decreased value in the inventory delivered.

Revenue other

Other revenue for the year ended December 31, 2011 increased by \$3.3 million to \$8.1 million, as compared to \$4.8 million for the year ended December 31, 2010, primarily a result of the increase of activity in the real estate services segment, which generated revenue of \$6.6 million for

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

the year ended December 31, 2011. Other revenue includes \$1.5 million and \$1.8 million of revenue generated by our rental communities during the twelve months ended December 31, 2011 and the twelve months ended December 31, 2010, respectively. For the year ended December 31, 2011, other revenue includes \$4.8 million of related party real estate services as further discussed in Note 12 to the consolidated financial statements. We consider revenue to be from homebuilding when there is a structure built or being built on the lot when delivered. Sales of lots occur, and are included in other revenues, when we sell raw land or finished home sites in advance of any home construction.

Table of Contents*Cost of sales homebuilding*

Cost of sales homebuilding for the year ended December 31, 2011 decreased \$7.0 million to \$12.2 million of homebuilding cost of sales, as compared to \$19.2 million for the year ended December 31, 2010. The decrease in cost of sales as a percentage of homebuilding revenue for the year ended December 31, 2011, as compared to the year ended December 31, 2010, is reflective of the impairment realized as well as the result of the significant increase in the warranty reserve during the year ended December 31, 2010. Further, this is a reflection of decreased sales concessions such as the payment of certain buyer closing costs at settlement that do not affect the revenue per sale but do increase the cost of a settled home.

Cost of sales other

Cost of sales other is principally comprised of operating expenses incurred in generating rental revenue at our rental communities and in the construction services segment. Cost of sales other for the year ended December 31, 2011 increased by \$3.8 million to \$7.8 million, as compared to \$4.0 million for the year ended December 31, 2010. This increase is primarily related to the increased activity in the construction services segment.

Impairments and write-offs

Although market conditions in the Washington, D.C. area have improved, if market conditions deteriorate again, additional adverse changes to these estimates in future periods could result in further material impairment amounts to be recorded. We recorded an impairment charge of \$1.5 million during the year ended December 31, 2010, to properly record our for sale projects at fair market value less costs to sell consistent with the provisions of ASC 360. There were no impairment charges recorded during the year ended December 31, 2011.

If the project meets the GAAP accounting criteria of held for sale, the project is valued at the lower of cost or fair value less estimated selling costs. At December 31, 2011, the Eclipse and Penderbrook developments met that criterion.

The following table summarizes impairment charges and write-offs for the twelve months ended:

	Twelve Months Ended December 31,	
	2011	2010
Washington DC Metropolitan Area	\$ 0	\$ 1,548
	\$ 0	\$ 1,548

Selling, general and administrative expenses

Selling, general and administrative costs for the year ended December 31, 2011 increased \$1.8 million to \$7.4 million as compared to \$5.6 million for the year ended December 31, 2010. The increase is primarily attributable to increase in stock compensation expenses of \$0.9 million, feasibility expenses of \$0.3 million and an increase in consulting expenses of \$0.3 million. We had 32 full time and 4 part time employees at December 31, 2011 versus 26 full time and 1 part time at December 31, 2010.

Interest, real estate taxes and indirect costs related to inactive projects

Interest and real estate taxes incurred relating to the development of lots and parcels are capitalized to real estate held for development and sale during the active development period, which generally commences when borrowings are used to acquire real estate assets and ends when the properties are substantially complete or the property becomes inactive which means that development and construction activities have been suspended indefinitely. Interest is capitalized based on the interest rate applicable to specific borrowings or the weighted average of the rates applicable to other borrowings during the period. Interest and real estate taxes capitalized to real estate held for development and sale are expensed as a component of cost of sales as related units are sold.

When a project becomes inactive, its interest, real estate taxes and indirect production overhead costs are no longer capitalized but rather expensed in the period in which they are incurred. During the twelve months ended December 31, 2011 and 2010, all of our projects were determined to be inactive for accounting purposes. The following is a breakdown of the interest, real estate taxes and indirect costs related to

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

inactive projects reported on the statement of operations related to the inactivation of certain real estate projects held for development and sale:

	Years ended December 31,	
	2011	2010
Total interest incurred and expensed for inactive projects	\$ 2,507	\$ 1,567
Total real estate taxes incurred and expensed for inactive projects	381	517
Total production overhead incurred and expensed for inactive projects	214	140
	\$ 3,102	\$ 2,224

Table of Contents

Liquidity and Capital Resources

We require capital to operate, to post deposits on new deals, to purchase and develop land, to construct homes, to fund related carrying costs and overhead and to fund various advertising and marketing programs to generate sales. These expenditures include payroll, community engineering, entitlement, architecture, advertising, utilities and interest as well as the construction costs of our homes. Our sources of capital include, and will continue to include, funds derived from various secured and unsecured borrowings, cash flow from operations, which includes the sale and delivery of constructed homes, rental apartment projects, finished and raw building lots and the sale of equity and debt securities.

Several recent events have resulted in an improved financial position for the Company. As discussed in Notes 9 and 10, the Company entered into a strategic alliance with SunBridge Capital Management, LLC (SunBridge) which, among other things, provided for a cash out refinancing for both the Eclipse and Penderbrook projects. Additionally, the Company reached a settlement of \$9.4 million in its Balfour lawsuit (see Note 15). Finally, on March 7, 2012, Cascades II completed the sale of its Potomac Square Apartment for \$19.35 million resulting in unrestricted net proceeds of approximately \$4.7 million from the transaction. The Company will use the net proceeds from each of these events to support its ongoing business operations and new business initiatives.

The Company is involved in ongoing discussions with lenders and potential equity investors in an effort to provide additional liquidity to sustain business operations and growth capital to fund various new business opportunities. We are anticipating that through a combination of these discussions, the additional cash from settlement proceeds, the cash generated by our rental operations and the cash generated from settlements at our new communities currently under development that the Company will generate sufficient cash to sustain our operations through 2012.

Credit Facilities

We have outstanding borrowings with various financial institutions and other lenders that have been used to finance the acquisition, development and construction of real estate property.

As of December 31, 2011, maturities and/or curtailment obligations of all of our borrowings are as follows (\$000s):

2012	557
2013	5,108
2014	10,178
2015	263
2016 and thereafter	13,709
Total	\$ 29,815

In the past, the Company has generally financed its development and construction activities on a single or multiple project basis so it is not uncommon for each project or collection of projects the Company develops and builds to have a separate credit facility. Accordingly, the Company typically has had numerous credit facilities and lenders.

Table of Contents

As described in more detail below, at December 31, 2011 and 2010 our outstanding debt by lender was as follows:

Bank	Balance as of 12/31/11	Balance as of 12/31/10	Recourse
SunBridge, net of \$0.6 million discount	\$ 10,178	\$	Secured
Cardinal Bank	9,957		Secured
Bank of America	3,751	3,885	Unsecured
Cornerstone (Haven Trust)	400	400	Unsecured
Branch Banking & Trust	263	263	Secured
Wachovia	133	205	Unsecured
Seller - Emerald Farm	100	100	Secured
Fifth Third	25	25	Unsecured
KeyBank		10,578	Secured
Guggenheim Capital Partners		6,400	Secured
M&T Bank		1,512	Secured
	24,807	23,368	
Due to affiliates - Stonehenge Funding	5,008	5,008	Unsecured
Total	29,815	\$ 28,376	

Significant 2011 Borrowings

On February 11, 2011, an entity in which the Company has a controlling interest, Cascades II, entered into a loan agreement with Cardinal Bank pursuant to which Cascades II obtained an \$11.0 million multi-family construction loan and mortgage with a five year term. Proceeds from the loan were used to (i) fund the construction of a 103 unit apartment project located in the Cascades master planned community in Loudoun County, Virginia (the Cascades Apartments) and (ii) retire existing indebtedness of the Company owed to M&T having a maturity date of February 14, 2011 and which was secured by a first deed of trust on the real property upon which the Potomac Square Apartments was constructed.

On March 7, 2012, Cascades II completed the sale of Cascades Apartments to an affiliate of CAPREIT Acquisition Corporation (Purchaser), a Maryland corporation, pursuant to a Contract of Sale Agreement, as amended, dated October 31, 2011. The Project was sold for \$19.35 million. At settlement, the Cardinal Bank loan was retired in full.

On July 12, 2011, the Company, through a subsidiary called Comstock Potomac Yard, L.C., entered into a loan agreement with BCL Eclipse, LLC, an affiliate of SunBridge Capital Management, LLC (SunBridge), pursuant to which the Company secured a \$13.8 million loan with a three year term (the SunBridge Eclipse Loan) to refinance the Company's Eclipse condominium project. Proceeds from the SunBridge Eclipse Loan were primarily utilized to (i) pay off existing indebtedness of approximately \$9.0 million, (ii) pay approximately \$.8 million for expenses associated with the SunBridge Eclipse Loan (which are classified in other assets in the accompanying balance sheet), and (iii) for general corporate purposes. The SunBridge Eclipse Loan provides for a 1% origination fee and an interest rate of 12.5%. There is no prepayment penalty associated with the SunBridge Eclipse Loan, which is secured by a first deed of trust on the property. The loan is subject to minimum sales and release requirements.

On July 12, 2011, SunBridge also issued a binding commitment letter to the Company, through a subsidiary called Comstock Penderbrook, L.C., for a cash out refinance of the Company's Penderbrook Square condominium projected in an amount of up to \$7.0 million with a three-year term (the SunBridge Penderbrook Loan). This commitment was drawn upon on October 5, 2011 and the loan was funded for approximately \$5.4 million. Proceeds from this loan were primarily utilized to (i) pay off existing indebtedness of approximately \$3.9 million, (ii) pay for expenses associated with the loan of approximately \$.7 million, and (iii) for general corporate purposes. The SunBridge Penderbrook Loan provides for a 1% origination fee and an interest rate of 12.5%. There is no prepayment penalty associated with the SunBridge Penderbrook Loan, which is secured by a first deed of trust on the property. The loan is subject to minimum sales and release requirements.

Cash Flow

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

Net cash provided by operating activities was \$12.7 million for the year ended December 31, 2011 and \$15.4 million for the year ended December 31, 2010. In both years the primary source of cash provided by operating activities was the sale of real estate assets. On March 17, 2010, we completed the sale of land at our Station View project located in Loudoun County, Virginia for \$2.8 million.

Net cash used in investing activities was \$9.8 million for the year ended December 31, 2011. In 2011, the primary use of cash in investing activities was for construction of Cascades II. There were no material cash flows from investing activities for the year ended December 31, 2010.

Net cash provided by financing activities was \$2.3 million for the year ended December 31, 2011. The primary source of cash was from the SunBridge financing. Net cash used in financing activities was \$16.0 million for the year ended December 31, 2010. Repayments of indebtedness were the primary use of cash from financing activities in both years.

Table of Contents

Seasonality and Weather

Our business is affected by seasonality with respect to orders and deliveries. In the market in which we operate, the primary selling season is from January through May as well as September and October. Orders in other months typically are lower. In addition, the markets in which we operate are four-season markets that experience significant periods of rain and snow. Construction cycles and efforts are often adversely affected by severe weather.

Inflation

Inflation can have a significant impact on our business performance and the home building industry in general. Rising costs of land, transportation costs, utility costs, materials, labor, overhead, administrative costs and interest rates on floating credit facilities can adversely affect our business performance. In addition, rising costs of certain items, such as lumber, can adversely affect the expected profitability of our backlog. Generally, we have been able to recover any increases in costs through increased selling prices. However, there is no assurance we will be able to increase selling prices in the future to cover the effects of inflation and other cost increases.

CAUTIONARY NOTES REGARDING FORWARD-LOOKING STATEMENTS

Some of the statements contained in this report include forward-looking statements. These forward-looking statements can be identified by the use of words such as anticipate, believe, estimate, may, intend, expect, will, should, seeks or other similar expressions. Forward-looking statements are based largely on our expectations and involve inherent risks and uncertainties including certain risks described in this report. When considering those forward-looking statements, you should keep in mind the risks, uncertainties and other cautionary statements made in this report. You should not place undue reliance on any forward-looking statement, which speaks only as of the date made. Some factors which may affect the accuracy of the forward-looking statements apply generally to the real estate industry, while other factors apply directly to us. Any number of important factors which could cause actual results to differ materially from those in the forward-looking statements include: general economic and market conditions, including interest rate levels; our ability to service our debt; inherent risks in investment in real estate; our ability to compete in the markets in which we operate; regulatory actions; fluctuations in operating results; our anticipated growth strategies; shortages and increased costs of labor or building materials; the availability and cost of land in desirable areas; natural disasters; our ability to raise debt and equity capital and grow our operations on a profitable basis and our continuing relationships with affiliates.

Many of these factors are beyond our control. For a discussion of factors that could cause actual results to differ, please see the discussion in this report under the heading "Risk Factors" in Item 1A.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Not Applicable.

Item 8. Financial Statements and Supplementary Data

Reference is made to the financial statements, the notes thereto, and the report thereon, commencing on page F-1 of this report, which financial statements, notes, and report are incorporated herein by reference.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

We have evaluated, with the participation of our Chief Executive Officer and our Chief Financial Officer, the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act) as of December 31, 2011. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective, at the reasonable assurance level, as of December 31, 2011.

Limitations on the Effectiveness of Controls

We do not expect that our disclosure controls and internal controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only assurance, at the reasonable assurance level, that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Table of Contents

The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, a control may become inadequate because of changes in conditions or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and may not be detected.

Management's Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over our financial reporting.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2011, based on criteria set forth in the framework in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). This evaluation included review of the documentation of controls, evaluation of the design effectiveness of controls, testing of the operating effectiveness of controls and a conclusion on this evaluation. Our management determined that, as of December 31, 2011, our internal control over financial reporting is effective.

Changes in Internal Control

No change has occurred in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) during our last fiscal quarter ended December 31, 2011, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required by this Item is incorporated herein by reference to the definitive Proxy Statement to be filed pursuant to Regulation 14A of the Exchange Act for our 2012 Annual Meeting of Stockholders, except that the information relating to our executive officers is included in Item 1, Business – Executive Officers of this report.

Item 11. Executive Compensation

The information required by this Item is incorporated herein by reference to the definitive Proxy Statement to be filed pursuant to Regulation 14A of the Exchange Act for our 2012 Annual Meeting of Stockholders.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this Item is incorporated herein by reference to the definitive Proxy Statement to be filed pursuant to Regulation 14A of the Exchange Act for our 2012 Annual Meeting of Stockholders.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this Item is incorporated herein by reference to the definitive Proxy Statement to be filed pursuant to Regulation 14A of the Exchange Act for our 2012 Annual Meeting of Stockholders.

Item 14. Principal Accountant Fees and Services

The information required by this Item is incorporated herein by reference to the definitive Proxy Statement to be filed pursuant to Regulation 14A of the Exchange Act for our 2012 Annual Meeting of Stockholders.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Comstock Homebuilding Companies, Inc.:

In our opinion, the consolidated financial statements listed on page F-1 present fairly, in all material respects, the financial position of Comstock Homebuilding Companies, Inc. and subsidiaries (the Company) at December 31, 2011 and 2010, and the results of their operations and their cash flows for each of the two years in the period ended December 31, 2011 in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

COMSTOCK HOMEBUILDING COMPANIES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands, except per share data)

1. ORGANIZATION

Comstock Homebuilding Companies, Inc. is a multi-faceted real estate development and construction services company focused on the Washington, D.C. metropolitan area. The Company has substantial experience with building a diverse range of products including single-family homes, townhouses, mid-rise condominiums, high-rise multi-family condominiums, apartments and mixed-use (residential and commercial) developments. Since our founding in 1985, and as of December 31, 2011, we have built and delivered more than 5,300 homes generating total revenue in excess of \$1.4 billion. References in this Form 10-K to Comstock, Company, we, our and us refer to Comstock Homebuilding Companies, Inc. together in each case with our subsidiaries and any predecessor entities unless the context suggests otherwise.

Our business was founded in 1985 as a residential land developer and home builder focused on the Northern Virginia suburbs of the Washington, D.C area.

Comstock Companies, Inc. was incorporated on May 24, 2004 as a Delaware corporation. On June 30, 2004, the Company changed its name to Comstock Homebuilding Companies, Inc. On December 17, 2004, the Company completed an initial public offering (IPO) of its Class A common stock.

The Company's Class A common stock is traded on the NASDAQ Capital market (NASDAQ) under the symbol CHCI and has no public trading history prior to December 17, 2004. On April 20, 2010, the Company received notice from NASDAQ stating that the Company had regained compliance with the \$1.00 minimum bid price requirement after its shares achieved a closing bid-price exceeding \$1.00 for 10 consecutive days ending on April 19, 2010. The Company is now in compliance with all three NASDAQ continued listing requirements which are the minimum bid-price requirement, the market value of publicly held shares requirement and the minimum equity requirement.

Liquidity Developments

In an effort to stabilize the Company, management spent much of 2009 focused on negotiating with lenders to eliminate and restructure debt which temporarily limited our ability to pursue new business opportunities. In mid 2009, management formulated a Strategic Realignment Plan which identified key real estate projects to be retained by the Company and those to be disposed of. As part of that plan, the Company worked to restructure the entirety of its debt. The resulting restructured balance sheet has significantly improved the Company's financial position. Additionally, the SunBridge financing, discussed in more detail in Note 9, coupled with the settlement of the Balfour lawsuit, discussed in Note 15, has provided the Company with improved financial flexibility.

The Company continues to engage in discussions with lenders and potential equity investors in an effort to provide additional liquidity to sustain business operations and growth capital to fund various new business opportunities. We are anticipating that through a combination of these discussions, the additional cash from settlement proceeds, the cash generated by our rental operations and the cash generated from settlements at our new communities currently under development that the Company will generate sufficient cash to sustain our operations through 2012. Towards that end, subsequent to December 31, 2011, the Company has successfully sold the Cascades II Apartment building resulting in \$4.7 million in unrestricted net proceeds available to the Company for its business operations. See Subsequent Event Note 20 below.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies and practices used in the preparation of the consolidated financial statements is as follows:

Basis of presentation

The accompanying consolidated financial statements include the accounts of Comstock, a Delaware corporation, and its majority-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated. Investments in 50% or less owned partnerships and affiliates are accounted for using the equity method unless it is determined that the Company has control of the entity, in which case the entity would be consolidated.

Cash and cash equivalents and restricted cash

Cash and cash equivalents are comprised of cash and short-term investments with maturities of three months or less when purchased. At times, the Company may have deposits with institutions in excess of federally insured limits. Banking institutions with which the Company does business are considered credit worthy; therefore, credit risk associated with cash and cash equivalents is

Table of Contents

considered low. At December 31, 2011 and 2010, the Company had restricted cash of \$3.1 million and \$5.2 million, respectively, which includes a \$3.0 million deposit with an insurance provider, to which we have no access currently, as security for future claims. The December 31, 2010 restricted cash amounts also includes \$2.1 million related to the private placement raise related to the construction of the Cascades Apartments.

Real estate held for development and sale

Real estate held for development and sale includes land, land development costs, interest and other construction costs. Land held for development is stated at cost, or when circumstances or events indicate that the land is impaired, at estimated fair value. Real estate held for sale is carried at the lower of cost or fair value less costs to sell. Land, land development and indirect land development costs are accumulated by specific project and allocated to various units within that project using specific identification and allocation based upon the relative sales value, unit or area methods. Direct construction costs are assigned to units based on specific identification. Construction costs primarily include direct construction costs and capitalized field overhead. Other costs are comprised of fees, capitalized interest and real estate taxes. Selling costs are expensed as incurred.

The Company assesses the estimated fair value of its projects based on discounted cash flow models or based on comparable sales of real estate in the normal course of business under existing and anticipated market conditions. The evaluation takes into consideration the current status of the property, various restrictions, carrying costs, costs of disposition and any other circumstances which may affect fair value including management's plans for the property. A write-down to estimated fair value is indicated when the net carrying value of the property exceeds its estimated undiscounted future cash flows. These evaluations are made on a property-by-property basis whenever events or changes in circumstances indicate that the net book value may not be recoverable.

Capitalized interest and real estate taxes

Interest and real estate taxes incurred relating to the development of lots and parcels are capitalized to real estate held for development and sale during the active development period, which generally commences when borrowings are used to acquire real estate assets and ends when the properties are substantially complete or the property becomes inactive. A project becomes inactive when development and construction activities have been suspended indefinitely. Interest is capitalized based on the interest rate applicable to specific borrowings or the weighted average of the rates applicable to other borrowings during the period. Interest and real estate taxes capitalized to real estate held for development and sale are expensed as a component of cost of sales as related units are sold. The following table is a summary of interest incurred and capitalized and interest expensed for units settled:

	Years ended December 31,	
	2011	2010
Total interest incurred and capitalized	\$ 320	\$
Interest expensed as a component of cost of sales	\$ 2,329	\$ 3,141

When a project becomes inactive, its interest, real estate taxes and indirect production overhead costs are no longer capitalized but rather expensed in the period in which they are incurred. Following is a breakdown of the interest, real estate taxes and indirect costs related to inactive projects reported in real estate held for development and sale:

	Years ended December 31,	
	2011	2010
Total interest incurred and expensed for inactive projects	\$ 2,507	\$ 1,567
Total real estate taxes incurred and expensed for inactive projects	381	517
Total production overhead incurred and expensed for inactive projects	214	140
	\$ 3,102	\$ 2,224

Property, plant and equipment

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

Property, plant and equipment are carried at cost less accumulated depreciation and are depreciated on the straight-line method over their estimated useful lives as follows:

Furniture and fixtures	7 years
Office equipment	5 years
Computer equipment and capitalized software	3 years
Leasehold improvements	Life of related lease

When assets are retired or otherwise disposed of, the cost and accumulated depreciation are removed from their separate accounts and any gain or loss on sale is reflected in operations. Expenditures for maintenance and repairs are charged to expense as incurred.

F-9

Table of Contents**Warranty reserve**

Warranty reserves for units settled are established to cover potential costs for materials and labor with regard to warranty-type claims expected to arise during the typical one-year warranty period provided by the Company or within the two-year statutorily mandated structural warranty period for condominiums. Since the Company typically subcontracts its homebuilding work, subcontractors are required to provide the Company with an indemnity and a certificate of insurance prior to receiving payments for their work. Claims relating to workmanship and materials are generally the primary responsibility of the subcontractors and product manufacturers. The warranty reserve is established at the time of closing, and is calculated based upon historical warranty cost experience and current business factors. This reserve is an estimate and actual warranty costs could vary from these estimates. Variables used in the calculation of the reserve, as well as the adequacy of the reserve based on the number of homes still under warranty, are reviewed on a periodic basis. Warranty claims are directly charged to the reserve as they arise. The following table is a summary of warranty reserve activity which is included in accounts payable and accrued liabilities:

	Years ended December 31,	
	2011	2010
Balance at beginning period	\$ 1,110	\$ 692
Additions	110	721
Releases and/or charges incurred	(211)	(303)
Balance at end of period	\$ 1,009	\$ 1,110

Revenue recognition

The Company recognizes revenues and related profits or losses from the sale of residential properties, including multiple units to the same buyer, finished lots and land sales when closing has occurred, full payment has been received, title and possession of the property has transferred to the buyer and the Company has no significant continuing involvement in the property. Other revenues include revenue from land sales, rental revenue from leased apartments, which is recognized over the terms of the respective leases, revenue from construction services and revenue earned from management and administrative support services provided to related parties, which is recognized as the services are provided.

Advertising costs

The total amount of advertising costs charged to selling, general and administrative expense was \$94 and \$133 for the years ended December 31, 2011 and 2010, respectively.

Stock compensation

As discussed in Note 14, the Company sponsors stock option plans and restricted stock award plans. The Company accounts for its share-based awards pursuant to Accounting Standards Codification (ASC) 718, *Share Based Payments*. ASC 718 requires all share-based payments to employees, including grants of employee stock options, to be recognized in the financial statements over the vesting period based on their fair values at the date of grant. For the year ended December 31, 2011 and 2010, total stock-based compensation cost was \$932 and \$802, respectively. Of this amount, \$925 and \$802 was charged to selling, general and administration expenses for the years ended December 31, 2011 and 2010, respectively, as these costs were attributable pro rata to inactive projects.

Income taxes

Income taxes are accounted for under the asset and liability method in accordance with ASC 740, *Accounting for Income Taxes* (ASC 740). Deferred tax assets and liabilities are recognized for future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on the deferred tax assets and liabilities is recognized in income in the period that includes the enactment date.

Table of Contents**Income (Loss) per share**

The weighted average shares and share equivalents used to calculate basic and diluted loss per share for the twelve months ended December 31, 2011 and December 31, 2010 are presented on the consolidated statement of operations. Stock options and warrants for twelve months ended December 31, 2011 are included in the diluted earnings per share calculation using the treasury stock method and average market prices during the period, unless the stock option and warrants would be anti-dilutive. As a result of net losses for the year ended December 31, 2010, approximately 1,237 and 2,185 of options and warrants, respectively, were excluded from the computation of dilutive earnings per share because their inclusion would have been anti-dilutive. The computation of basic and diluted earnings per common share is as follows:

	Year Ended December 31,	
	2011	2010
Computation of Basic Earnings Per Share		
Net income(loss) available to common shareholders	\$ 1,107	\$ (7,698)
Weighted average common shares outstanding - basic	20,287	18,313
Basic earnings per share	\$ 0.05	\$ (0.42)
Computation of Diluted Earnings Per Share		
Net income(loss) available to common shareholders	\$ 1,107	\$ (7,698)
Weighted average common shares outstanding - basic	20,287	18,313
Dilutive effect of stock options	170	0
Dilutive effect of warrants	263	0
Weighted average common shares outstanding - diluted	20,720	18,313
Diluted earnings per share	\$ 0.05	\$ (0.42)

Comprehensive income

For the years ended December 31, 2011 and 2010, comprehensive income equaled net income; therefore, a separate statement of comprehensive income is not included in the accompanying consolidated financial statements.

Segment reporting

We operate our business through three segments: Homebuilding, Apartment Buildings and Real Estate Services. We are currently focused on the Washington, D.C. market.

For our Homebuilding operations, we develop properties with the intent that they be sold either as fee-simple properties or condominiums to individual unit buyers or as investment properties sold to private or institutional investors. Our for sale products are designed to attract first-time, early move-up, and secondary move-up buyers. We focus on products that we are able to offer for sale in the middle price points within the markets where we operate, avoiding the very low-end and high-end products.

For our Apartment Buildings segment we focus on projects ranging from approximately 75 to 200 units in locations that are supply constrained with demonstrated demand for stabilized assets. We seek opportunities in the multi-family rental market where our experience and core capabilities can be leveraged. We will either position the assets for sale when completed or operate the asset within our own portfolio. Operating the asset for our own account affords us the flexibility of converting the units to condominiums in the future.

Our Real Estate Services segment pursues projects in all aspects of real estate management including strategic planning, land development, entitlement, property management, sales and marketing, workout and turnaround strategies, financing and general construction. We are able to provide a wide range of construction management and general contracting services to other property owners.

The following disclosure includes the Company's three reportable segments of Homebuilding, Apartment Buildings and Real Estate Services. Each of these segments operates within the Company's single Washington, DC reportable geographic segment. The information for 2010 has been reclassified to conform to current year business segment presentation.

Table of Contents

	(in thousands)			
	Homebuilding	Apartment Buildings	Real Estate Services	Total
Twelve Months Ended December 31, 2011				
Gross revenue (1)	\$ 15,354	\$ 276	\$ 6,579	\$ 22,209

Interest expense	1,567			1,567
Capital expenditures	4			4

(1) Gross revenue includes Revenue homebuilding and Revenue-other as described in the consolidated income statement for assets included in each segment.

The Company allocates selling general and administrative expenses to the individual segments based upon specifically allocable costs and, in the absence of direct allocations, based upon its estimate of time allocable to the segment or based upon overall pro rata revenue generation.

Use of estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts in the financial statements and accompanying notes. Actual results could differ from those estimates. Material estimates are utilized in the valuation of real estate held for development and sale, valuation of deferred tax assets, capitalization of costs, consolidation of variable interest entities and warranty reserves.

Recent accounting pronouncements

In May 2011, the FASB issued Accounting Standards Update No. 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS (ASU 2011-04), which changes the wording used to describe the requirements in GAAP for measuring fair value and for disclosing information about fair value measurements in order to improve consistency in the application and description of fair value between GAAP and IFRS. ASU 2011-04 clarifies how the concepts of highest and best use and valuation premise in a fair value measurement are relevant only when measuring the fair value of nonfinancial assets and are not relevant when measuring the fair value of financial assets or liabilities. In addition, the guidance expanded the disclosures for the unobservable inputs for Level 3 fair value measurements, requiring quantitative information to be disclosed related to (1) the valuation processes used, (2) the sensitivity of the fair value measurement to changes in unobservable inputs and the interrelationships between those unobservable inputs, and (3) use of a nonfinancial asset in a way that differs from the asset's highest and best use. The revised guidance is effective for interim and annual periods beginning after December 15, 2011 and early application by public entities is prohibited. We are currently evaluating the potential impact of adopting this guidance on our consolidated financial position and results of operations.

Table of Contents**3. CONSOLIDATION OF VARIABLE INTEREST ENTITIES**

GAAP requires a variable interest entity (VIE) to be consolidated by the company which is the primary beneficiary. The primary beneficiary of a VIE is the entity that has both of the following characteristics: (a) the power to direct the activities of a VIE that most significantly impact the VIE's economic performance and (b) the obligation to absorb losses of the VIE that could potentially be significant to the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE. Entities determined to be VIEs, for which we are not the primary beneficiary, are accounted for under the equity method. Comstock's variable interest in VIEs may be in the form of (1) equity ownership, (2) contracts to purchase assets and/or (3) loans provided and or guaranteed to a VIE. We examine specific criteria and use judgment when determining if Comstock is the primary beneficiary of a VIE. Factors considered in determining whether we are the primary beneficiary include risk and reward sharing, experience and financial condition of other partner(s), voting rights, involvement in day-to-day capital and operating decisions and contracts to purchase assets from VIEs.

Consolidated Real Estate Held for Development and Sale

Included within the Company's real estate held for development and sale at December 31, 2011 are two consolidated entities that are VIEs and for which the Company is the primary beneficiary. These entities have been established to own and operate real estate property and were deemed VIEs primarily based on the fact that the equity investment at risk is not sufficient to permit the entities to finance their activities without additional financial support. The Company determined that it was the primary beneficiary of these VIEs as a result of its majority voting and complete operational control of the entities.

At December 31, 2011, total assets of these VIEs were approximately \$21.1 million and total liabilities were approximately \$10.5 million. The classification of these assets is primarily within real estate held for development and sale and the classification of liabilities are primarily within notes payable secured by real estate held for development and sale in the Company's consolidated balance sheets.

Consolidated Operating Real Estate, Net

On January 31, 2011, Comstock Cascades II, L.C., a subsidiary of the Company (Cascades II) entered into a private placement for the sale of membership interests in Cascades II whereby Cascades II raised working capital in the amount of \$2.35 million (the Private Placement) related to the planned construction of a 103 unit apartment project located in the Cascades master planned community in Loudoun County, Virginia (the Cascades Apartments). The balance was received during the first quarter of 2011. Proceeds of the Private Placement were utilized (i) to provide sufficient capital needed to secure project financing for the Cascades Apartments, (ii) to retire a portion of the existing indebtedness, and (iii) to reimburse the Company for prior expenditures incurred on behalf of the project. Participants in the Private Placement included unrelated third party investors along with several members of the Company's Board of Directors, as well as the Chief Operating Officer, Chief Financial Officer and General Counsel of the Company.

On February 11, 2011, Comstock closed its loan agreement with Cardinal Bank (see Note 9) which provided the necessary construction financing for the development of the Cascades Apartments and concurrent with that closing, the Company utilized the proceeds of the Private Placement offering as described above. The Company has fully guaranteed the loan and accordingly, Comstock has concluded that Cascades II is a VIE. As part of the Cascades II operating agreement, the Company has majority voting and complete operational control of the subsidiary. The Company concluded that it is the primary beneficiary of the VIE and therefore the financial condition, results of operations and cash flows of Cascades II are consolidated in the accompanying financial statements.

The investors in the Private Placement (the Priority Members) are entitled to a cumulative, compounded, preferred return, subject to the performance of Cascades II, of 20% per annum, compounded annually on their capital account balances. Comstock has the right to repurchase the interest of the Priority Members provided that i) all of the Priority Members interests are acquired, ii) the purchase is made in cash and iii) the purchase price shall equal the Priority Members capital account plus an amount necessary to cause the preferred return to equal a cumulative cash on cash return equal to 20% per annum. The equity contribution related to the Private Placement is reflected as a Non-Controlling Interest as a component of consolidated shareholders' equity. The Company's investment is subordinate to the Priority Members investment and gains from the operating activity and distributions of cash flow (if any) of Cascades II will be allocated to the Priority Members (in advance of Comstock) up to their capital account plus the required preferred return of 20% as outlined above. The estimated accrued priority return of \$491 thousand is reflected in the accompanying statement of operations as net income attributable to non-controlling interests to properly state the capital accounts of the members of the VIE. At December 31, 2011, total assets of this VIE was approximately \$12.1 million and total liabilities were approximately \$10.0 million. The classification of these assets is within operating real estate, net and the classification of liabilities are primarily within notes payable secured by operating real estate, net in the accompanying consolidated balance sheets. As discussed in Note 20, this asset was sold in 2012.

Table of Contents**Land purchase options**

The Company typically acquires land for development at market prices under fixed price purchase agreements. The purchase agreements require deposits that may be forfeited if the Company fails to perform under the agreements. The deposits required under the purchase agreements are in the form of cash or letters of credit in varying amounts. The Company may, at its option, choose for any reason and at any time not to perform under these purchase agreements by delivering notice of its intent not to acquire the land under contract. The Company's sole legal obligation and economic loss for failure to perform under these purchase agreements is typically limited to the amount of the deposit pursuant to the liquidated damages provision contained within the purchase agreement. As a result, none of the creditors of any of the entities with which the Company enters into forward fixed price purchase agreements have recourse to the general credit of the Company.

The Company does not share in an allocation of either the profit earned or loss incurred by any of these entities with which the Company has fixed price purchase agreements. The Company has concluded that whenever it options land or lots from an entity and pays a significant non-refundable deposit as described above, a variable interest entity is created under the provisions of ASC 810-10 *Consolidation*. This is because the Company has been deemed to have provided subordinated financial support, which creates a variable interest which limits the equity holder's returns and may absorb some or all of an entity's expected theoretical losses if they occur. The Company, therefore, examines the entities with which it has fixed price purchase agreements for possible consolidation by the Company under the provision of ASC 810-10. The Company does not have any contractual or ownership interests in the entities with which it contracts to buy the land. Through review of the VIE, the Company concluded that it does not have the power to direct the activities that most significantly impact the VIE's economic performance, therefore, the Company has not consolidated these VIE's in the consolidated balance sheet.

4. REAL ESTATE HELD FOR DEVELOPMENT AND SALE

The Company has classified its Eclipse and Penderbrook projects as held for sale as discussed above and accordingly, written the projects down to fair value less costs to sell as determined by discounted cash flow models. Discounted cash flow models are dependent upon several subjective factors, including estimated average sales prices, estimated sales pace, and the selection of an appropriate discount rate. While current market conditions make the estimated timeframe for sales challenging, the Company has generally assumed sales prices equal to or less than current prices with the remaining duration of the community sales process are estimated to be one to two years. These assumptions are often interrelated as price reductions can generally be assumed to increase the sales pace. In addition, the Company must select what it believes to be an appropriate discount rate. The Company has used its best judgment in determining an appropriate discount rate based on information it has received from marketing its communities for sale in recent periods, and accordingly has elected to use a rate of 13% in its discounted cash flow model. The estimates of sales prices, sales pace, and discount rates used by the Company are based on the best information available at the time the estimates are made. In recent months, market conditions affecting the Company's Washington, DC area projects have improved; however, if market conditions deteriorate again, additional adverse changes to these estimates in future periods could result in further material impairment charges to be recorded.

The Company recorded an impairment charge of \$1.5 million during the year ended December 31 2010 to properly record its held for sale projects at fair market value less costs to sell consistent with the provisions of ASC 360. There were no impairment charges recorded during the year ended December 31, 2011.

After impairments and write-offs, real estate held for development and sale consists of the following:

	December 31,	
	2011	2010
Land and land development costs	\$ 4,693	\$ 8,862
Cost of construction (including capitalized interest and real estate taxes)	16,519	25,146
	\$ 21,212	\$ 34,008

5. OPERATING REAL ESTATE, NET

Operating real estate consists of the following:

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

	December 31,	
	2011	2010
Land	\$ 2,815	\$
Building and improvements	9,453	
	12,268	
Less: accumulated depreciation	(173)	
	\$ 12,095	\$

F-14

Table of Contents

Depreciation expense, included in cost of sales-other in the consolidated financial statements of operations, amounted to \$173 for the year ended December 31, 2011. There was no depreciation recognized during the year ended December 31, 2010.

6. PROPERTY, PLANT AND EQUIPMENT, NET

Property, plant and equipment consist of the following:

	December 31,	
	2011	2010
Computer equipment and capitalized software	\$ 1,840	\$ 1,762
Furniture and fixtures	82	82
Office equipment	84	84
Leasehold improvements	15	15
	2,021	1,943
Less: accumulated depreciation	(1,916)	(1,893)
	\$ 105	\$ 50

Depreciation and amortization expense, included in selling, general, and administrative in the consolidated financial statements of operations, amounted to \$23 and \$98 for the years ended December 31, 2011 and 2010, respectively.

7. OTHER ASSETS

Other assets consist of the following:

	December 31,	
	2011	2010
Restricted escrow deposits	\$ 442	\$ 179
Deferred financing costs	581	486
Other	995	137
	\$ 2,018	\$ 802

8. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

Accounts payable and accrued liabilities consist of the following:

	December 31,	
	2011	2010
Trade payables	\$ 2,910	\$ 2,511
Warranty	1,009	1,110
Customer deposits	63	2,185
Other	5	78

F-15

Table of Contents**9. MORTGAGES AND CREDIT FACILITIES**

The Company generally finances its development and construction activities on a single or multiple project basis so it is not uncommon for each project or collection of projects the Company develops and builds to have a separate credit facility. Accordingly, the Company typically has had numerous credit facilities and lenders. As described in more detail below, our outstanding debt by lender was as follows:

Bank	Balance as of 12/31/11	Balance as of 12/31/10	Recourse
SunBridge, net of \$0.6 million discount	\$ 10,178	\$	Secured
Cardinal Bank	9,957		Secured
Bank of America	3,751	3,885	Unsecured
Cornerstone (Haven Trust)	400	400	Unsecured
Branch Banking & Trust	263	263	Secured
Wachovia	133	205	Unsecured
Seller Emerald Farm	100	100	Secured
Fifth Third	25	25	Unsecured
KeyBank		10,578	Secured
Guggenheim Capital Partners		6,400	Secured
M&T Bank		1,512	Secured
	24,807	23,368	
Due to affiliates Stonehenge Funding	5,008	5,008	Unsecured
Total	\$ 29,815	\$ 28,376	

The SunBridge debt is fixed at 12.5%, but the majority of the Company's remaining debt is variable rate, based on LIBOR or the prime rate plus a specified number of basis points, typically ranging from 220 to 600 basis points over the LIBOR rate and from 25 to 200 basis points over the prime rate. As a result, we are exposed to market risk in the event of interest rate increases. At December 31, 2011 and 2010, the one-month LIBOR and prime rates of interest were 0.26% and 3.25%, respectively, and the interest rates in effect under the existing secured revolving development and construction credit facilities ranged from 3.5% to 14.26% and 2.5% to 18%, respectively. During the past twelve months, these rates were relatively stable. Since all projects are currently inactive by accounting standards, any change in interest would be expensed in the period incurred.

The material loan agreements are discussed below.

Cardinal Bank

On February 11, 2011, the Company, through a subsidiary called Comstock Cascades II, L.C., entered into a loan agreement with Cardinal Bank pursuant to which the Company obtained an \$11.0 million multi-family construction loan and mortgage with a five-year term (the Cardinal Bank Loan). Proceeds from the Cardinal Bank Loan (i) funded the construction of the Company's Cascades apartment project and (ii) retired existing indebtedness of the Company owed to M&T Bank having a maturity date of February 14, 2011 and which was secured by a first deed of trust on the real property upon which the Cascades project was constructed. The Cardinal Bank Loan, secured by a new first deed of trust on the property, has an initial interest rate of Prime plus two percent (2%), with an interest rate floor of 6.5%, converted after 18 months to 425 basis points over the 5 year swap rate with an interest rate floor of 5% and a ceiling of 8%. The Cardinal Bank Loan shall be amortized in accordance with a 5.5%, 25-year schedule, with amortization to begin 18 months after the loan closing and has a 2% prepayment penalty if paid within the first or second year and a 1% prepayment penalty if retired in the third or fourth year. The Cardinal Bank Loan requires debt service coverage (DCR) of (i) 1.0 to 1.0 no later than 24 months from the date of closing, (ii) 1.15 DCR no later than 36 months from the date of closing, and (iii) 1.25 DCR no later than 48 months from the date of closing. The Company has fully guaranteed the Cardinal Bank Loan. Christopher Clemente, the Chief Executive Officer of the Company and Gregory Benson, the Chief Operating Officer of the Company, also provided a limited guaranty in connection with the Cardinal Bank Loan of up to \$6.8 million, subject to further reduction upon the satisfaction of certain enumerated conditions set forth in the loan agreement (see Note 12). On March 7, 2012, the Company sold the Cascades Apartment Project and the Cardinal Bank Loan was repaid in full. A prepayment penalty of \$0.2 million was incurred in connection with the early repayment.

Concurrent with the closing of the Cardinal Bank Loan, \$1.5 million of existing indebtedness to M&T Bank was retired for approximately \$1.3 million. Accordingly, the Company recorded a gain of approximately \$0.2 million on the extinguishment of the M&T Bank debt.

SunBridge

On July 12, 2011, the Company, through a subsidiary called Comstock Potomac Yard, L.C., entered into a loan agreement with BCL Eclipse, LLC, an affiliate of SunBridge Capital Management, LLC (SunBridge), pursuant to which the Company secured a \$13.8 million loan with a three year term (the SunBridge Eclipse Loan) to refinance the Company's Eclipse condominium project. Proceeds from the SunBridge Eclipse Loan were primarily utilized to (i) pay off existing indebtedness of approximately \$9.0 million, (ii) pay approximately \$0.8 million for expenses associated with the SunBridge Eclipse Loan (which are classified in other assets in the accompanying balance sheet), and (iii) for general corporate purposes. The SunBridge Eclipse Loan provides for a 1% origination fee and an interest rate of 12.5%. There is no prepayment penalty associated with the SunBridge Eclipse Loan, which is secured by a first deed of trust on the property. The loan is subject to minimum sales and release requirements.

On July 12, 2011, SunBridge also issued a binding commitment letter to the Company, through a subsidiary called Comstock Penderbrook, L.C., for a cash out refinance of the Company's Penderbrook Square condominium projected in an amount of up to \$7.0 million with a three-year term (the SunBridge Penderbrook Loan). This commitment was drawn upon on October 5, 2011 and the loan was funded for approximately \$5.4 million. Proceeds from this loan were primarily utilized to (i) pay off existing indebtedness of approximately \$3.9 million, (ii) pay for expenses associated with the loan of approximately \$0.7 million, and (iii) for general corporate purposes.

Table of Contents

As a condition of the loan agreement, the Company also entered into a cross-collateralization agreement whereby the Penderbrook project and the Company's Eclipse project each secure payment and performance of the covenants and agreements of the October 5, 2011 SunBridge Penderbrook Loan and the loan funded on July 12, 2011 with respect to the Eclipse project as described above. The SunBridge Penderbrook Loan provides for a 1% origination fee and an interest rate of 12.5%. There is no prepayment penalty associated with the SunBridge Penderbrook Loan, which is secured by a first deed of trust on the property. The loan is subject to minimum sales and release requirements.

On October 5, 2011, the Company and a subsidiary of the Company, Comstock Emerald Farm, L.C., as guarantors, also, entered into a guaranty agreement for the benefit of Sunbridge. Pursuant to the guaranty agreement, the guarantors jointly and severally guaranteed the payment of principal and interest and any other amounts due under the Sunbridge Penderbrook Loan Agreement, (ii) the Company pledged its equity interest in Comstock Penderbrook, L.C, and (iii) each guarantor granted SunBridge a security interest in all of its unencumbered assets, all as additional security for the SunBridge Penderbrook Loan.

Bank of America

At December 31, 2011, the Company had \$3.8 million outstanding to Bank of America under a 10-year unsecured note. On February 25, 2010 the Company entered into a Seventh Loan Modification Agreement with Bank of America regarding the modification of the terms of this loan. In connection therewith the Company agreed to pay an extension fee of \$100 and Bank of America agreed to delay for one year, until January 2011, the commencement of repayments of all previously unpaid interest accruing since the date of the Company's previously reported modification of the line of credit in November 2008. On February 1, 2011, the Company entered into the Eighth Loan Modification Agreement with Bank of America. The modification required payments of past interest and modification fees of approximately \$175 on February 1, 2011, which were paid in accordance with the agreement. The maturity date remains December 28, 2018. Comstock is required to make monthly interest payments beginning on February 28, 2011 through loan maturity. Commencing January 28, 2012 and continuing on each and every month through November 28, 2018, Comstock is also required to make monthly principal payments of approximately \$37.

Stonehenge

On December 23, 2009, Stonehenge Funding, LC (Stonehenge), an entity wholly-owned by Christopher Clemente, the Chairman and Chief Executive Officer of the Company, completed the purchase of a senior unsecured note (the JP Morgan Debt) from JP Morgan Ventures (JPMV) in the then outstanding amount of approximately \$9.0 million, plus accrued and unpaid interest. The purchase of the JP Morgan Debt resulted in the transfer to Stonehenge of the warrant previously issued to JPMV for the purchase of 1.5 million shares of the Company's Class A Common Stock with a strike price of \$0.07 per share (the JP Morgan Warrant). Gregory Benson, the Company's Chief Operating Officer and a member of the Company's Board of Directors, subsequently purchased a participation interest in the JP Morgan Debt and the JP Morgan Warrant from Stonehenge. In connection with the SunBridge financing, Stonehenge entered into a subordination and standstill agreement providing that the Company will not make any cash interest or principal payments to Stonehenge prior to the full repayment of loans to SunBridge in connection with the Eclipse and Penderbrook projects. On February 12, 2010 the Company entered into a Modification Agreement to modify the terms of the Company's senior unsecured note with Stonehenge. Under the terms of the Modification Agreement, Stonehenge agreed to forgive \$4.5 million of the principal balance due from the Company under the JP Morgan Debt; reducing the principal balance by 50% to \$4.5 million. Stonehenge also agreed to forgive an additional amount due from the Company of approximately \$875 representing all past due interest, late fees and penalties accruing through December 31, 2009 under the JP Morgan Debt. Stonehenge further agreed to reduce the interest rate, effective January 1, 2010, by 50% to 300 basis points above the one year LIBOR on a floating basis. In addition, to ensure the Company's ability to comply with certain restrictions placed upon the Company by KeyBank and Guggenheim in connection with previously announced loan modifications enhancing cashflow to the Company, Stonehenge agreed to allow all future interest payments due from the Company under the JP Morgan Debt to accrue until at least 90 days after the KeyBank and Guggenheim have been fully repaid. In connection therewith, Stonehenge may, on a quarterly basis, elect to accept stock of the Company (or warrants for the purchase thereof) with a cumulative value equal to the value of the scheduled interest payment in lieu of accruing a future quarterly interest payment. For the year ended December 31, 2011, no elections were made and no warrants were issued under the agreement. For the year ended December 31, 2010, warrants were issued with a fair value of \$46, to settle interest payments. The KeyBank debt was fully repaid on February 2, 2011. The Guggenheim debt was fully repaid upon funding of the SunBridge Penderbrook Loan on October 5, 2011.

Further, the Modification Agreement provided for the elimination or forbearance upon the enforcement of all financial covenants contained in the JP Morgan Debt and all previously reported covenant violations by the Company. The maturity date of the Stonehenge debt remains unchanged at March 14, 2013. Stonehenge, as a condition of the new financing arrangement with SunBridge, agreed to subordinate its loan and delay principal and interest payments until the SunBridge loans on both Eclipse and Penderbrook are fully repaid.

Table of Contents*Wachovia*

As a condition of a foreclosure arrangement with Wachovia Bank, the Company is assisting in the selling process associated with certain parcels of land now under the control of Wachovia. As a result of several of those parcels being sold, the deficiency note to Wachovia was reduced by \$73. This is reflected as a gain on debt restructuring in the accompanying consolidated statement of operations in the year ended December 31, 2011. There were no parcels sold and no gain on debt restructuring for the year ended December 31, 2010.

The Company's borrowings mature as follows:

2012	557
2013	5,108
2014	10,178
2015	263
2016 and thereafter	13,709
Total	\$ 29,815

10. SUNBRIDGE WARRANT AND STRATEGIC AGREEMENT

In connection with entering into the SunBridge Loans, on July 12, 2011, the Company agreed to issue BridgeCom Development I, LLC, an affiliate of SunBridge (BridgeCom), an immediately exercisable warrant to purchase 1.0 million shares of the Company's Class A common stock at an exercise price equal to the average closing price of the stock for the preceding thirty days (\$1.03) (the SunBridge Warrant). The exercise period is ten years from July 12, 2011. The Company calculated the fair value of the SunBridge Warrant and the SunBridge Loans and allocated the proceeds of the SunBridge Loans on a relative fair value basis. The fair value of the SunBridge Warrant was calculated using a Black Scholes option pricing model and the fair value of the SunBridge Loans was calculated using a discounted cash flow model. The Black Scholes option pricing model considered risk-free interest rates, volatility factors and current market and contractual prices. The fair value of the SunBridge Loans was estimated based on interest rates available to the Company for debt with similar terms. The amount allocated to the SunBridge Warrant was approximately \$1.0 million and is reflected as an addition to additional paid-in capital and a corresponding discount on the SunBridge Loans. The Company is amortizing this discount over the term of the SunBridge Loans using the effective interest method. The remaining discount at December 31, 2011 is approximately \$0.6 million.

In addition, the Company agreed to enter into a right of first offer and refusal (Strategic Agreement) with SunBridge to jointly pursue certain homebuilding and multi-family projects in the Washington, D.C. metropolitan area. Under the general terms of the Strategic Agreement, the Company will offer material future investment opportunities to SunBridge and if mutually agreed upon, the Company and SunBridge will enter into specific joint venture arrangements for each identified opportunity. The Strategic Agreement terminates at the earlier of three years from the date of the agreement or until each party funds a minimum of \$25.0 million in identified investment opportunities.

11. COMMON STOCK AND WARRANTS

On May 12, 2006, the Company completed a private placement (the PIPE) to institutional and other accredited investors of 2,121 shares of Class A common stock and warrants exercisable into 636 shares of Class A common stock. The Company sold the securities for \$9.43 per share for total proceeds of approximately \$20.0 million and net proceeds of approximately \$18.7 million. The per share price of \$9.43 represented a premium of approximately 14.6% to the closing price of the Company's common stock on the date the purchase was completed. The net proceeds were used for general corporate purposes. The warrants issued in connection with the PIPE were five-year warrants exercisable at any time after November 10, 2006 with an exercise price of \$11.32 per share. The fair value of the warrants issued under the PIPE have been reported as equity instruments because the liquidated damages, which are capped at 10%, reasonably represent the difference between the value of a registered share and an unregistered share of the Company's common stock. All unexercised warrants were forfeited as of November 10, 2011.

In February 2006 the Company's Board of Directors authorized the Company to purchase up to 1.0 million shares of the Company's Class A common stock in the open market or in privately negotiated transactions. The authorization did not include a specified time period in which the shares repurchase would remain in effect. During the twelve months ended December 31, 2006, the Company repurchased an aggregate of

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

0.4 million shares of Class A common stock for a total of \$2,439 or \$6.23 per share. There were no shares repurchased for the twelve months ended December 31, 2011 and 2010 and the Company has no immediate plans to repurchase any additional shares under the existing authorization.

F-18

Table of Contents

In 2009, the Company's Board of Directors approved the issuance of up to 600,000 warrants of the Company's Class A Common Stock to settle outstanding trade debt. For the year ended December 31, 2010, 225,674 warrants, at an average strike price of \$1.11, were issued to settle trade debt of \$419,774. The Company recorded a gain of \$195,890 in 2010, in connection with these exchanges. There were no warrants issued to settle trade debt for the year ended December 31, 2011. The warrant exercise period begins on the date of execution of the release agreement and ends 5 years after the execution date. Since the inception of the program, 440,311 warrants have been issued at an average strike price of \$1.06. There are 159,689 warrants remaining under the authorization.

12. RELATED PARTY TRANSACTIONS

In October 2004, the Company entered into a lease agreement (the Lease) for its corporate headquarters at 11465 Sunset Hills Road, Reston, Virginia with Comstock Asset Management, L.C. (CAM), an entity wholly owned by Christopher Clemente. In October 2007, the lease agreement was amended, decreasing the total square footage from approximately 24,000 to 17,000 and extending the term to four years through September 2011. For the year ended December 31, 2011 and 2010, total payments made under this lease agreement were \$203 and \$196, respectively. Pursuant to the terms of an early termination of the Lease (the Lease Termination), the Company agreed to surrender approximately 15,700 square feet of space to CAM in exchange for (i) an agreement to enter into the Lease for the reduced space and at a reduced rate; and (ii) the issuance of a warrant to purchase up to 55,000 shares of the Company's Class A common stock at a strike price equal to the average of the closing stock price for the twenty days immediately preceding the effective date of the Lease Termination in exchange for the forgiveness of approximately \$110 in delinquent rent. The fair value of the 55,000 warrants was \$25 which resulted in a gain of \$85 recorded in the first quarter of 2010. Although CAM has no obligation to do so, it has allowed us to defer portions of our payment obligations from time to time and has reduced the amount due from us under the agreements.

On December 31, 2009 we entered into a three-year lease for approximately 7,200 square feet of office space in the Reston facility from Comstock Asset Management, L.C., an affiliate wholly-owned by Christopher Clemente. For the twelve months ended December 31, 2011 and 2010, total payments made under this lease agreement were \$203 and \$196, respectively.

During the second quarter of 2009, the Company began deferring a portion of the base salary payments to our Chief Executive Officer and our Chief Operating Officer. These deferrals ended on May 1, 2011 and the deferred balance of \$842 was paid during the third quarter of 2011.

During 2003, the Company entered into agreements with I-Connect, L.C., a company in which Investors Management, LLC, an entity wholly owned by Gregory Benson, the Chief Operating Officer of the Company, holds a 25% interest, for information technology consulting services and the right to use certain customized enterprise software. Effective January 1, 2010, the Company entered into a new software license agreement with I-Connect for the use of I-Connect's proprietary Builder's Co-Pilot software (the Agreement). Pursuant to the terms of the Agreement, I-Connect agreed to forgive approximately \$12 in delinquent payments in exchange for a warrant to purchase up to 6,000 shares of the Company's Class A common stock at a strike price equal to the average of the closing stock price for the twenty days immediately preceding the effective date of the Agreement and the Company agreed to make reduced monthly payments of \$6 for the use of the software for a term of 24 months. During the twelve months ended December 31, 2011 and 2010 total payments made to I-Connect were \$72 and \$78 respectively. Although I-Connect has no obligation to do so, it has allowed us to defer portions of our payment obligations from time to time.

In connection with the purchase of the unsecured debt discussed in Note 9, Stonehenge acquired a warrant for the purchase of 1,500,000 shares of the Company's Class A Common Stock at an exercise price of \$.70 per share. Thereafter, Stonehenge surrendered a portion of the warrant representing 500,000 shares to the Company. On September 14, 2010, the Company's Chairman and Chief Executive Officer exercised his right to purchase 855,000 shares of the Company's Class A Common Stock for an exercise price of \$.70 per share tendering approximately \$600 to Comstock. The purchase was accomplished through Stonehenge.

On February 11, 2011, Comstock Services, L.C., a subsidiary of the Company, entered into an Owner-Contractor Agreement with CRS Construction Services, L.C., an entity wholly-owned by Christopher Clemente, the Chairman and Chief Executive Officer of the Company, to perform paving and certain site improvement work to property in Reston, Virginia which is owned by Fairfax County, Virginia. The contract sum was for approximately \$1 million and the work was completed in April 2011.

Comstock Services, L.C., a subsidiary of the Company, entered into a Subcontract Agreement with Davis Construction, LLC to perform sitework and land development for a project known as Loudoun Station in Loudoun County, Virginia. Comstock Partners, L.C., an entity wholly-owned by Christopher Clemente, the Chairman and Chief Executive Officer of the Company, is the owner of the Loudoun Station project. The total contract value is estimated to be approximately \$5 million and is expected to be completed in July 2012. For the year ended December 31, 2011, the Company recognized \$3.8 million of revenue from the contract, which is included in Revenue-other in the consolidated income statement. As of December 31, 2011, the Company was owed \$1.0 million under this contract, which is included in Trade receivables in

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

the consolidated balance sheet. The Company recognized no revenue or trade receivables during the year ended December 31, 2010 on the contract.

Pursuant to a Credit Enhancement Agreement by and between Comstock Homebuilding Companies, Inc. and Gregory Benson, the COO and President of the Company, and Christopher Clemente, the Chairman and Chief Executive Officer of the Company (each,

F-19

Table of Contents

a Guarantor), the Guarantors have agreed to provide credit enhancement and the personal guarantee of loans with Cardinal Bank and Eagle Bank in exchange for payment by the Company of a Credit Enhancement Fee (see Note 9). As a result of this credit enhancement the Guarantors on an aggregate basis are entitled to a credit enhancement fee calculated at a rate of four percent (4%) per annum based on an agreed upon formula more fully discussed in Note 9. One-half of the Credit Enhancement Fee is payable monthly, in arrears, and the remaining half is deferred and payable on an annual basis. During the twelve months ended December 31, 2011, the Company made guarantee payments under this agreement of approximately \$254. Another \$93 is accrued in accounts payable to be paid at the end of the year. The financing with Sunbridge eliminated the need for personal guarantees on the applicable projects and accordingly this agreement was terminated on July 12, 2011 with respect to the fees paid on the Eagle Bank loan. On March 7, 2012, the Cardinal Bank Loan was repaid and, accordingly, the agreement was terminated with respect to the fees paid on the Cardinal Loan.

13. EMPLOYEE BENEFIT PLANS

The Company maintains a defined contribution retirement savings plan pursuant to Section 401(k) of the Internal Revenue Code (the Code). Eligible participants may contribute a portion of their compensation to their respective retirement accounts in an amount not to exceed the maximum allowed under the Code. In January 2006, the Company began matching employee contributions. The total amount matched for the twelve months 2011 and 2010 was \$28 and \$25 respectively. The Company also maintained an Employee Stock Purchase Plan in which eligible employees had the opportunity to purchase common stock of the Company at a discounted price of 85% of the fair market value of the stock on the designated dates of purchase. Under the terms of the plan, the total fair market value of the common stock that an eligible employee could purchase each year was limited to the lesser of 15% of the employee's annual compensation or \$15. The Employee Stock Purchase Plan was discontinued in 2008. While it was active, employees of the Company purchased zero shares of Class A common stock in the last three years.

14. RESTRICTED STOCK, STOCK OPTIONS AND OTHER STOCK PLANS

Effective January 1, 2004, the Company adopted the fair value recognition provisions required in accounting for share based payments. Prior to December 14, 2004, the Company did not sponsor any stock based plans.

On December 14, 2004 the Company adopted the 2004 Long-Term Compensation Plan (The Plan). The Plan provides for the issuance of stock options, stock appreciation rights, or SARs, restricted stock, deferred stock, dividend equivalents, bonus stock and awards in lieu of cash compensation, other stock-based awards and performance awards. Any shares issued under the Plan typically vest over service periods that range from one to five years. Stock options issued under the plan expire 10 years from the date they are granted.

The Plan provided an initial authorization of 2,550 shares of Class A common stock for issuance and allows an automatic annual increase equal to the lesser of (i) 3% of the Class A common stock outstanding (ii) 750 shares or (iii) such lesser amount as may be determined by the Company's Board of Directors. As of December 31, 2011, there were 0.7 million shares available for issuance under the Plan.

The fair value of each option award is calculated on the date of grant using the Black-Scholes option pricing model and certain subjective assumptions. Because the Company does not have sufficient trading history, expected volatilities are based on historical volatilities of comparable companies within our industry. We estimate forfeitures using a weighted average historical forfeiture rate. Our estimates of forfeitures will be adjusted over the requisite service period based on the extent to which actual forfeitures differ, or are expected to differ, from their estimate. The risk-free rate for the periods is based on the U.S. Treasury rates in effect at the time of grant. The expected term of options is based on the simplified method which assumes that the option will be exercised midway between the vesting date and the contractual term of the option. The Company is able to use the simplified method as the options qualify as plain vanilla options as defined by ASC 718 Stock Compensation. The following table summarizes the assumptions used to calculate the fair value of options during 2011 and 2010.

	2011	2010
Weighted average fair value of options granted	\$ 0.99	\$ 1.41
Dividend yields	0	0
Expected volatility	107.3%-164.5%	107.3%-164.5%
Weighted average expected volatility	137.00%	136.00%
Risk free interest rates	0.96%	1.46%
Weighted average expected term (in years)	6.25	5

Table of Contents

The following table summarizes information about stock option activity:

	Shares	Weighted average exercise price
Outstanding at December 31, 2009	748	\$ 0.81
Granted	100	1.69
Exercised	(133)	0.71
Forfeited or expired	(53)	1.00
Outstanding at December 31, 2010	663	\$ 0.94
Granted	100	1.08
Exercised	0	0.00
Forfeited or expired	0	0.00
Outstanding at December 31, 2011	763	0.96
Exercisable at December 31, 2011	663	\$ 0.94

As of December 31, 2011 and 2010, the weighted-average remaining contractual term of unexercised stock options was 7.8 years and 8.4 years, respectively.

A summary of the Company's restricted share activity is presented below:

	Shares	Weighted average fair value at date of grant
Restricted shares outstanding at December 31, 2009		\$
Granted	361	0.88
Vested	(267)	(0.75)
Forfeited		
Restricted shares outstanding at December 31, 2010	94	\$ 1.24
Granted	1,471	1.31
Vested	(602)	1.30
Forfeited	0	0
Restricted shares outstanding at December 31, 2011	963	\$ 1.31

As of December 31, 2011, there was \$991 unrecognized compensation cost related to restricted stock issuances granted under the Plan. The Company intends to issue new shares of its common stock upon vesting of restricted stock grants or the exercise of stock options.

15. COMMITMENTS AND CONTINGENCIES***Litigation***

On July 29, 2008, Balfour Beatty Construction, LLC, successor in interest to Centex Construction (Balfour), the general contractor for a subsidiary of the Company, filed liens totaling approximately \$552 at The Eclipse on Center Park Condominium project (Project) in connection

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

with its claim for amounts allegedly owed under the Project contract documents. In September 2008, the Company's subsidiary filed suit against Balfour to invalidate the liens and for its actual and liquidated damages in the approximate amount of \$17.1 million due to construction delays and additional costs incurred by the Company's subsidiary with respect to the Project. In October 2008, Balfour filed counterclaims in the approximate amount of \$2.8 million. Subsequent to an expedited hearing filed by the Company's subsidiary to determine the validity of the liens that was ultimately heard in February 2009, the Company received an order of the court in April 2009 invalidating the liens. On March 19, 2010, the Company's subsidiary received a judgment against Balfour in an amount of \$11.96 million. On March 25, 2010, the Company's subsidiary received notice of Balfour's intention to appeal the judgment and post a supersedeas bond in the amount of \$12.5 million. On July 21, 2011, the Company and Balfour reached a settlement for all claims related to this matter for approximately \$9.4 million, net of closing costs of approximately \$900. The Company received the proceeds of the settlement on August 4, 2011.

Currently, we are not subject to any material legal proceedings. From time to time, however, we are named as a defendant in legal actions arising from our normal business activities. Although we cannot accurately predict the amount of our liability, if any, that could arise with respect to legal actions pending against us, we do not expect that any such liability will have a material adverse effect on our financial position, operating results and cash flows. We believe that we have obtained adequate insurance coverage, rights to indemnification, or where appropriate, have established reserves in connection with these legal proceedings.

Letters of credit and performance bonds

The Company has commitments as a result of contracts entered into with certain third parties, primarily local governmental authorities, to meet certain performance criteria as outlined in such contracts. The Company is required to issue letters of credit and performance bonds to these third parties as a way of ensuring that such commitments entered into are met by the Company. The letters of credit and performance bonds issued in favor of the Company and/or its subsidiaries mature on a revolving basis, and if called into default, would be deemed material if assessed against the Company and/or its subsidiaries for the full amounts claimed. Although in some circumstances we have negotiated with our lenders in connection with foreclosure agreements for the lender to assume certain liabilities with respect to the letters of credit and performance bonds, we cannot accurately predict the amount of any liability that could be imposed upon the Company with respect to maturing or defaulted letters of credit or performance bonds and it is anticipated that any such liability would likely have a material adverse effect on our financial position, operating results or cash flows. At December 31, 2011 the Company has issued \$528 in letters of credit and \$2,133 in performance and payment bonds to these third parties. No amounts have been drawn against these letters of credit and performance bonds.

Table of Contents**16. FAIR VALUE OF FINANCIAL INSTRUMENTS**

There are three measurement input levels for determining fair value: Level 1, Level 2, and Level 3. Fair values determined by Level 1 inputs utilize quoted prices in active markets for identical assets or liabilities that the Company has the ability to access. Fair values determined by Level 2 inputs utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. Level 3 inputs are unobservable inputs for the asset or liability, and include situations where there is little, if any, market activity for the asset or liability. An asset's or liability's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

The carrying amounts reported in the consolidated balance sheets for cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities are reasonable estimates of their fair values based on their short maturities.

The fair value of fixed rate debt is based on observable market rates (Level 2 inputs). The following table summarizes the fair value of fixed and floating rate debt and the corresponding carrying value as of:

	December 31, 2011	December 31, 2010
Carrying amount	\$ 30,378	\$ 28,376
Fair value	\$ 26,927	\$ 23,264

Fair value estimates are made at a specific point in time, based on relevant market information about the financial instruments. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

The Company may also value its real estate held for development and sale at fair value on a nonrecurring basis if it is determined that an impairment has occurred. Such fair value measurements use significant unobservable inputs and are classified as Level 3. See Note 2 for a further discussion of the valuation techniques and the inputs used.

17. INCOME TAXES

Income taxes are accounted for under the asset and liability method in accordance with ASC 740, Accounting for Income Taxes (ASC 740). Deferred tax assets and liabilities are recognized for future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on the deferred tax assets and liabilities is recognized in income in the period that includes the enactment date.

Table of Contents

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. At December 31, 2007, the Company recorded valuation allowances for certain tax attributes and other deferred tax assets. At this time, sufficient uncertainty exists regarding the future realization of these deferred tax assets through future taxable income. If, in the future, the Company believes that it is more likely than not that these deferred tax benefits will be realized, the valuation allowances will be reversed. With a full valuation allowance, any change in the deferred tax asset or liability is fully offset by a corresponding change in the valuation allowance. This results in a zero deferred tax benefit or expense for the years ended December 31, 2011 and 2010.

The Company currently has approximately \$106 million in federal and state NOLs, which based on current statutory tax rates, has a potential fair value of approximately \$42 million in tax savings. If unused, these NOLs will begin expiring in 2028. Under Internal Revenue Code Section 382 rules, if a change of ownership is triggered, the Company's NOL asset and possibly certain other deferred tax assets may be impaired. We estimate that as of December 31, 2011, the cumulative shift in ownership of the Company's stock would not cause an impairment of our NOL asset. However, if an ownership change were to occur, the Section 382 limitation would not be expected to materially impact the Company's financial position or results of operations as of December 31, 2011, because of the Company's full valuation allowance on its net deferred tax assets.

The Company's ability to use its NOLs (and in certain circumstances, future built-in losses and depreciation deductions) can be negatively affected if there is an ownership change as defined under Section 382 of the Internal Revenue Code. In general, an ownership change occurs whenever there is a shift in ownership by more than 50 percentage points by one or more 5% shareholders over a specified time period (generally three years). Given Section 382's broad definition, an ownership change could be the unintended consequence of otherwise normal market trading in the Company's stock that is outside of the Company's control.

In an effort to preserve the availability of these NOLs, Comstock earlier this year adopted a Section 382 stockholder rights plan (the Rights Plan). The Rights Plan was adopted to reduce the likelihood of such an unintended ownership change and thus assist in preserving the value of these tax benefits. Similar plans have been adopted by a number of companies holding similar significant tax assets over the past several years. This plan was submitted to a vote of the Company's shareholders on June 17, 2011 and the plan was approved at that meeting.

We file U.S. and state income tax returns in jurisdictions with varying statutes of limitations. The 2009 through 2011 tax years generally remain subject to examination by federal and most state tax authorities.

Table of Contents

Income tax provision consists of the following as of December 31 :

	2011	2010
Current:		
Federal	\$ 33	\$ 0
State	0	11
	33	11
Deferred:		
Federal	731	(548)
State	136	(102)
	867	(650)
Other		
Valuation allowance	(867)	650
Total income tax expense (benefit)	\$ 33	\$ 11

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Components of the Company's deferred tax assets and liabilities at December 31 are as follows:

	2011	2010
Deferred tax assets:		
Inventory	\$ 3,480	\$ 4,713
Warranty	320	338
Net operating loss and tax credit carryforwards	41,562	41,444
Cancellation of debt gain	760	760
Accrued expenses	(63)	130
Stock based compensation	303	(47)
	46,362	47,338
Less - valuation allowance	(45,815)	(46,682)
Net deferred tax assets	547	656
Deferred tax liabilities:		
Depreciation and amortization	(547)	(656)
Net deferred tax liabilities		
Net deferred tax assets (liabilities)	\$ 0	\$ 0

We file U.S. and state income tax returns in jurisdictions with varying statutes of limitations. The 2008 through 2011 tax years generally remain subject to examination by federal and most state tax authorities.

A reconciliation of the statutory rate and the effective tax rate follows:

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

	2011	2010
Federal statutory rate	(35.00)%	35.00%
State income taxes - net of federal benefit	(3.97)%	3.97%
Permanent differences	0.0%	(39.93)%
Return to provision adjustments	(14.19)%	9.42%
Change in valuation allowance	53.16%	(8.46)%
 Tax benefit	 0.0%	 0.0%

F-24

Table of Contents**18. QUARTERLY RESULTS (unaudited)**

Quarterly results for the years ended December 31, 2011 and 2010 follow (in thousands, except per share amounts):

	Three months ended			
	March 31, 2011	June 30, 2011	September 30, 2011	December 31, 2011
Revenues	\$ 4,586	\$ 5,903	\$ 5,394	\$ 6,326
Operating loss	(1,163)	(1,845)	(2,491)	(2,823)
Pretax income (loss)	(893)	(1,558)	6,743	(2,661)
Net income (loss)	(1,025)	(1,676)	6,541	(2,733)
Basic earnings (loss) per share	(0.05)	(0.09)	0.33	(0.14)
Diluted earnings (loss) per share	(0.05)	(0.09)	0.33	(0.14)

	Three months ended			
	March 31, 2010	June 30, 2010	September 30, 2010	December 31, 2010
Revenues	\$ 9,139	\$ 6,428	\$ 5,589	\$ 2,695
Operating loss	(1,728)	(1,884)	(3,599)	(1,514)
Pretax income (loss)	(892)	(1,843)	(3,417)	(1,535)
Net income (loss)	(892)	(1,843)	(3,428)	(1,535)
Basic earnings (loss) per share	(0.05)	(0.10)	(0.18)	(0.09)
Diluted earnings (loss) per share	(0.05)	(0.10)	(0.18)	(0.09)

Quarterly and year-to-date computations of per share amounts are made independently. Therefore, the sum of per share amounts for the quarters may not agree with per share amounts for the year due to rounding.

19. TROUBLED DEBT RESTRUCTURING

On February 12, 2010, the Company executed a loan modification agreement with Stonehenge Funding (Stonehenge), an entity wholly-owned by Christopher Clemente, the Chairman and Chief Executive Officer of the Company, with respect to approximately \$9.0 million of unsecured debt. Under the terms of the agreement, Stonehenge agreed to forgive \$4.5 million of the principal balance due from the Company, reducing the remaining principal balance by fifty percent (50%) to \$4.5 million; and to forgive all past due interest, late fees and penalties accruing through the date of the agreement. The agreement further provides that effective January 1, 2010, the interest rate is reduced by approximately fifty percent (50%) to 300 basis points above the one year LIBOR rate. Stonehenge may, on a quarterly basis, elect to receive stock of the Company (or warrants for the purchase thereof) in an amount equal to the value of the scheduled interest payment. Stonehenge has also agreed to eliminate or forbear upon the enforcement of all financial covenants. The maturity date of the debt remains unchanged at March 14, 2013. The negotiations regarding the loan modification agreement were handled by the independent members of the Board of Directors of the Company. The gain on this transaction was accounted for as a troubled debt restructuring modification of terms pursuant to ASC 470.

Principal amount of debt prior to restructure	\$ 9,000
Interest	3,743
Carrying amount of debt at December 31, 2009	12,743
Less: principal amount of debt after restructure	4,500
Less: future interest liability	554
Gain on troubled debt restructuring	\$ 7,689

Cancellation of indebtedness by a related party is accounted for as a capital contribution. As a result, the gain on troubled debt restructuring of \$7,689 was credited to additional paid in capital during the three months ended March 31, 2010.

Edgar Filing: Comstock Homebuilding Companies, Inc. - Form 10-K

To date Comstock has issued to Stonehenge approximately 33 thousand shares of the Company's Class A Common Stock with a stock price of \$1.40 in satisfaction of approximately \$46 in interest. At December 31, 2011 the Company had \$5,008 outstanding to Stonehenge Funding, which represents the December 31, 2009 balance of \$12,743 less the gain on troubled debt restructuring of \$7,689 recognized in the first quarter of 2010, and the \$46 in interest paid in Comstock shares.

F-25

Table of Contents

20. Subsequent Event

On March 7, 2012, Cascades II completed the sale of its Potomac Square Apartment project to an affiliate of CAPREIT Acquisition Corporation. The project was sold for \$19.35 million. In connection with the closing of the transaction, Cascades II placed in escrow \$300 (the Warranty Escrow) to secure performance of certain post-closing warranty work and \$650 (the Claims Escrow) to secure Cascades II s indemnification and other obligations set forth in the sale agreement. The Warranty Escrow shall be released to Cascades II upon completion of the post-closing warranty work and the Claims Escrow shall be released to Cascades II in three equal installments at six, eight and twelve months from the date of settlement provided that no claims have been made against Cascades by the purchaser. At settlement, the Company received net proceeds of approximately \$4.7 million from the transaction after repayment of the existing loan from Cardinal Bank secured by the Potomac Square apartments and the retirement of the related non-controlling equity investment. Upon settlement of existing loan from Cardinal Bank, the Credit Enhancement and Indemnification Agreement was terminated and the deferred Credit Enhancement Fees, of which \$93 were outstanding as of December 31, 2011, were settled in full. Upon settlement of the sale, \$2.9 million was disbursed to the non-controlling equity investment holders, including \$0.6 million of preferred returns on the investment, of which \$0.5 million was outstanding as of December 31, 2011.
