ENPRO INDUSTRIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. Overview, Basis of Presentation and Recently Adopted Accounting Pronouncement

Overview

EnPro Industries, Inc. (EnPro or the Company) is a leader in the design, development, manufacturing and marketing of proprietary engineered industrial products that primarily include sealing products, self-lubricating, non-rolling bearing products, precision engineered components and lubrication systems for reciprocating compressors, and heavy-duty, medium-speed diesel, natural gas and dual fuel reciprocating engines, including parts and services for engines.

Basis of Presentation

The accompanying consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. The Consolidated Balance Sheet as of December 31, 2011, was derived from the audited financial statements included in the Company s annual report on Form 10-K for the year ended December 31, 2011. In the opinion of management, all adjustments, consisting of normal recurring accruals, considered necessary for a fair statement of results for the periods presented, have been included. Management believes that the assumptions underlying the consolidated financial statements are reasonable. These interim financial statements should be read in conjunction with the Company s consolidated financial statements and notes thereto included in its annual report on Form 10-K for the year ended December 31, 2011.

Revenues, expenses, cash flows, assets and liabilities can and do vary each quarter of the year. Therefore, the results and trends in these interim financial statements may not be indicative of those for a full year.

All significant intercompany accounts and transactions between the Company s consolidated operations have been eliminated.

Recently Adopted Accounting Pronouncement

In June 2011, accounting guidance was amended to change the presentation of comprehensive income. These changes give an entity the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. These changes became effective retrospectively for fiscal years beginning after December 15, 2011. Other than the change in presentation, there was no effect on the consolidated financial results.

2. Acquisitions

In January 2011, the Company acquired certain assets and assumed certain liabilities of Rome Tool & Die, Inc., a leading supplier of steel brake shoes to the North American heavy-duty truck market. In February 2011, the Company acquired the business of Pipeline Seal and Insulator, Inc. and its affiliates (PSI), a privately-owned group of companies that manufacture products for the safe flow of fluids through pipeline transmission and distribution systems worldwide. In February 2011, the Company

Edgar Filing: ENPRO INDUSTRIES, INC - Form 10-Q

acquired the Mid Western group of companies, a privately-owned business primarily serving the oil and gas drilling, production and processing industries of Western Canada. In July 2011, the Company acquired Tara Technologies Corporation, a privately-held company that offers highly engineered products and solutions to the semiconductor, aerospace, energy and medical markets. In August 2011, the Company acquired certain assets and assumed certain liabilities of PI Bearing Technologies, a privately-held manufacturer of bearing blocks and other bearing products used in fluid power applications.

The following pro forma condensed consolidated financial results of operations for the Company for the quarter ended March 31, 2011, are presented as if the acquisitions had been completed on January 1, 2010:

	(in millions)
Pro forma net sales	\$ 299.1
Pro forma net income	18.6

These pro forma financial results have been prepared for comparative purposes only and do not reflect the effect of synergies that would have been expected to result from the integration of these acquisitions. The pro forma information does not purport to be indicative of the results of operations that actually would have resulted had the combinations occurred on January 1, 2010, or of future results of the consolidated entities.

In April 2012, i.e., subsequent to the end of the first quarter, the Company acquired Motorwheel Commercial Vehicle Systems, Inc. (Motorwheel). Motorwheel is a leading U.S. manufacturer of lightweight brake drums for heavy-duty trucks and other commercial vehicles. Motorwheel also sells wheel-end component assemblies for the heavy-duty market, sells fasteners for wheel-end applications and provides a full suite of services to its customers, including product development, testing and certification. The business is headquartered in Livonia, Michigan and operates manufacturing facilities in Chattanooga, Tennessee and Berea, Kentucky. Motorwheel will be managed as part of the Stemco operations in the Sealing Products segment.

The acquisition was paid for with approximately \$85 million of cash, which was funded by additional borrowings from the Company's revolving credit facility. The purchase price allocation is subject to the completion of the valuation of certain assets and liabilities as well as purchase price adjustments pursuant to the acquisition agreement.

3. Earnings Per Share

	Quarters Ended March 31, 2012 2011 (in millions, except per share amounts)	
Numerator (basic and diluted):		
Net income	\$ 13.8	\$ 15.2
Denominator:		
Weighted-average shares basic	20.6	20.5
Share-based awards	0.3	0.3
Convertible debentures	0.5	0.7
Weighted-average shares diluted	21.4	21.5
Earnings per share:		
Basic	\$ 0.67	\$ 0.74
Diluted	\$ 0.64	\$ 0.71

As discussed further in Note 8, the Company previously issued Convertible Senior Debentures (the Debentures). Under the terms of the Debentures, upon conversion, the Company would settle the par amount of its obligations in cash and the remaining obligations, if any, in common shares. Pursuant to applicable accounting guidelines, the Company includes the conversion option effect in diluted earnings per share during such periods when the Company's average stock price exceeds the stated conversion price.

4. Inventories

	March 31, 2012	December 31, 2011
	(in millions)	
Finished products	\$ 74.2	\$ 64.5
Deferred costs relating to long-term contracts	21.3	28.6
Work in process	20.9	18.9
Raw materials and supplies	41.5	42.3
	157.9	154.3
Reserve to reduce certain inventories to LIFO basis	(12.1)	(12.0)
Progress payments	(16.5)	(29.7)
Total	\$ 129.3	\$ 112.6

The Company uses the last-in, first-out (LIFO) method of valuing certain of its inventories. An actual valuation of inventory under the LIFO method can be made only at the end of each year based on the inventory levels and costs at that time. Accordingly, interim LIFO calculations are based on management's estimates of expected year-end inventory levels and costs, which are subject to change until the final year-end LIFO inventory valuation.

5. Goodwill and Other Intangible Assets

The changes in the net carrying value of goodwill by reportable segment for the three months ended March 31, 2012, are as follows:

	Sealing Products	Engineered Products	Engine Products and Services	Total
	(in millions)			
Gross goodwill as of December 31, 2011	\$ 164.1	\$ 166.5	\$ 7.1	\$ 337.7
Accumulated impairment losses	(27.8)	(108.7)		(136.5)
Goodwill as of December 31, 2011	136.3	57.8	7.1	201.2
Foreign currency translation	0.6	1.0		1.6
Acquisitions	0.4	1.3		1.7
Gross goodwill as of March 31, 2012	165.1	168.8	7.1	341.0
Accumulated impairment losses	(27.8)	(108.7)		(136.5)
Goodwill as of March 31, 2012	\$ 137.3	\$ 60.1	\$ 7.1	\$ 204.5

Identifiable intangible assets are as follows:

	As of March 31, 2012		As of December 31, 2011	
	Gross Carrying Amount	Accumulated Amortization (in millions)	Gross Carrying Amount	Accumulated Amortization
Amortized:				
Customer relationships	\$ 168.6	\$ 57.8	\$ 166.9	\$ 54.4
Existing technology	34.8	11.2	34.7	10.6
Trademarks	33.4	13.4	33.1	12.2
Other	23.9	13.0	24.3	12.2
	260.7	95.4	259.0	89.4
Indefinite-Lived:				
Trademarks	26.3		26.1	
Total	\$ 287.0	\$ 95.4	\$ 285.1	\$ 89.4

Amortization expense for the quarters ended March 31, 2012 and 2011, was \$5.4 million and \$4.0 million, respectively.

6. Accrued Expenses

	March 31, 2012	December 31, 2011
	(in millions)	
Salaries, wages and employee benefits	\$ 43.6	\$ 52.9
Interest	10.0	27.6
Other	35.1	39.0
	\$ 88.7	\$ 119.5

7. Related Party Transactions

The historical business operations of Garlock Sealing Technologies LLC (GST LLC) and The Anchor Packing Company (Anchor) have resulted in a substantial volume of asbestos litigation in which plaintiffs have alleged personal injury or death as a result of exposure to asbestos fibers. Those subsidiaries manufactured and/or sold industrial sealing products, predominately gaskets and packing, that contained encapsulated asbestos fibers. Anchor is an inactive and insolvent indirect subsidiary of Coltec Industries Inc (Coltec). The Company s subsidiaries exposure to asbestos litigation and their relationships with insurance carriers have been managed through another Coltec subsidiary, Garrison Litigation Management Group, Ltd. (Garrison). GST LLC, Anchor and Garrison are collectively referred to as GST.

On June 5, 2010, GST commenced an asbestos claims resolution process under Chapter 11 of the United States Bankruptcy Code. The resulting deconsolidation of GST from the Company s financial results, discussed more fully in Note 13, required certain intercompany indebtedness described below to be reflected on the Company s Consolidated Balance Sheets.

As of March 31, 2012 and December 31, 2011, Coltec Finance Company Ltd., a wholly-owned subsidiary of Coltec, had aggregate, short-term borrowings of \$10.0 million and \$9.9 million,

respectively, from GST's subsidiaries in Mexico and Australia. The unsecured obligations were denominated in the currency of the lending party, and bear interest based on the applicable one-month interbank offered rate for each foreign currency involved.

Effective as of January 1, 2010, Coltec entered into a \$73.4 million Amended and Restated Promissory Note due January 1, 2017 (the Coltec Note) in favor of GST LLC, and the Company's subsidiary Stemco LP entered into a \$153.8 million Amended and Restated Promissory Note due January 1, 2017, in favor of GST LLC (the Stemco Note), and together with the Coltec Note, the Intercompany Notes). The Intercompany Notes refinanced intercompany notes issued in 2005.

The Intercompany Notes bear interest at 11% per annum, of which 6.5% is payable in cash and 4.5% is added to the principal amount of the Intercompany Notes as payment-in-kind (PIK) interest, with interest due on January 31 of each year. In 2012 and 2011, \$10.7 million and \$10.2 million, respectively, of the PIK interest was added to the principal balance of the Intercompany Notes. If GST LLC is unable to pay ordinary course operating expenses, under certain conditions, GST LLC can require Coltec and Stemco to pay in cash the accrued PIK interest necessary to meet such ordinary course operating expenses, subject to certain restrictions described more fully in the Company's most recent Form 10-K.

The Coltec Note is secured by Coltec's pledge of certain of its equity ownership in specified U.S. subsidiaries. The Stemco Note is guaranteed by Coltec and secured by Coltec's pledge of its interest in Stemco. The Intercompany Notes are subordinated to any obligations under the Company's senior secured revolving credit facility described in Note 8.

Interest expense related to the Intercompany Notes of \$6.9 million and \$6.6 million was reflected in interest expense for the quarters ended March 31, 2012 and 2011, respectively. Accrued interest of \$6.8 million and \$26.1 million was included in accrued expenses at March 31, 2012 and December 31, 2011, respectively.

The Company regularly transacts business with GST. Sales to GST totaling \$4.6 million and \$5.8 million were reflected in net sales and purchases from GST totaling \$4.7 million and \$5.2 million were reflected in cost of sales for the quarters ended March 31, 2012 and 2011, respectively. The Company also provides services for GST including information technology, supply chain, treasury, tax administration, legal, and human resources under a support services agreement. Amounts due from GST totaling \$6.4 million and \$18.5 million resulting from the purchase of goods and services from the Company were included in accounts receivable at March 31, 2012 and December 31, 2011, respectively. Amounts due to GST totaling \$6.1 million and \$4.9 million resulting from the Company's purchase of goods from GST were included in accounts payable as of March 31, 2012 and December 31, 2011, respectively. Amounts due from GST totaling \$2.3 million for taxes paid on their behalf were included in other current assets at March 31, 2012 and December 31, 2011. Amounts due from GST totaling \$20.7 million and \$21.8 million for taxes paid on their behalf were included in other assets at March 31, 2012 and December 31, 2011, respectively.

Additionally, the Company and GST had outstanding foreign exchange forward contracts involving the Australian dollar, Canadian dollar, Mexican peso and U.S. dollar with a notional amount of \$21.6 million as of March 31, 2012. These related party contracts were eliminated in consolidation prior to the deconsolidation of GST.

8. Long-Term Debt

Debentures

The Company has \$172.5 million outstanding in aggregate principal amount of Debentures, originally recorded net of a discount of \$61.3 million. The Debentures bear interest at the annual rate of 3.9375%, with interest due on April 15 and October 15 of each year, and will mature on October 15, 2015, unless they are converted prior to that date. The Debentures are the Company's direct, unsecured and unsubordinated obligations and rank equal in priority with all unsecured and unsubordinated indebtedness and senior in right of payment to all subordinated indebtedness. They effectively rank junior to all secured indebtedness to the extent of the value of the assets securing such indebtedness. The Debentures do not contain any financial covenants.

Holders may convert the Debentures into cash and shares of the Company's common stock, under certain circumstances described more fully in the Company's most recent Form 10-K. None of the conditions that permit conversion were satisfied as of March 31, 2012.

The debt discount, \$28.7 million and \$30.4 million as of March 31, 2012 and December 31, 2011, respectively, is being amortized through interest expense until the maturity date of October 15, 2015, resulting in an effective interest rate of approximately 9.5%. Interest expense related to the Debentures for the quarters ended March 31, 2012 and 2011 includes \$1.7 million of contractual interest coupon in both periods and \$1.7 million and \$1.5 million, respectively, of debt discount amortization.

Credit Facility

The Company's primary U.S. operating subsidiaries, other than GST LLC, have a senior secured revolving credit facility with a maximum availability of \$175 million. Actual borrowing availability under the credit facility is determined by reference to a borrowing base of specified percentages of eligible accounts receivable, inventory, equipment and real property elected to be pledged, and is reduced by usage of the facility, including outstanding letters of credit, and any reserves. Under certain conditions, the Company may request an increase to the facility maximum availability to \$225 million in total. Any increase is dependent on obtaining future lender commitments for those amounts, and no current lender has any obligation to provide such commitment. The credit facility matures on July 17, 2015 unless, prior to that date, the Debentures are paid in full, refinanced on certain terms or defeased, in which case the facility will mature on March 30, 2016. The terms of the facility, including fees and customary covenants and restrictions, are described more fully in the Company's most recent Form 10-K.

The borrowing availability at March 31, 2012, under the Company's senior secured revolving credit facility was \$125.5 million after giving consideration to \$4.1 million of letters of credit outstanding and \$15.5 million of revolver borrowings. After funding the acquisition of Motorwheel in April 2012 through additional revolver borrowings, the availability on April 17, 2012 was approximately \$30 million.

9. Pensions and Postretirement Benefits

The components of net periodic benefit cost for the Company's U.S. and foreign defined benefit pension and other postretirement plans for the quarters ended March 31, 2012 and 2011, are as follows:

	Pension Benefits		Other Benefits	
	2012	2011	2012	2011
	(in millions)			
Service cost	\$ 1.2	\$ 1.3	\$ 0.2	\$ 0.2
Interest cost	2.5	2.8	0.1	0.1
Expected return on plan assets	(2.2)	(2.0)		
Amortization of prior service cost	0.1			
Net loss component	2.2	1.2		
Deconsolidation of GST	(0.6)	(0.5)		
	\$ 3.2	\$ 2.8	\$ 0.3	\$ 0.3

The Company estimates it will be required to contribute \$13.4 million to its U.S. defined benefit pension plans and approximately \$0.4 million to its foreign pension plans in 2012.

10. Derivative Instruments

The Company uses derivative financial instruments to manage its exposure to various risks. The use of these financial instruments modifies the exposure with the intent of reducing the risk to the Company. The Company does not use financial instruments for trading purposes, nor does it use leveraged financial instruments. The counterparties to these contractual arrangements are major financial institutions and GST as described in Note 7. The Company uses multiple financial institutions for derivative contracts to minimize the concentration of credit risk. The current accounting rules require derivative instruments, excluding certain contracts that are issued and held by a reporting entity that are both indexed to its own stock and classified in shareholders' equity, be reported in the Consolidated Balance Sheets at fair value and changes in a derivative's fair value be recognized currently in earnings unless specific hedge criteria are met.

The Company is exposed to foreign currency risks that arise from normal business operations. These risks include the translation of local currency balances on its foreign subsidiaries' balance sheets, intercompany loans with foreign subsidiaries and transactions denominated in foreign currencies. The Company strives to control its exposure to these risks through its normal operating activities and, where appropriate, through derivative instruments. The Company entered into contracts to hedge forecasted transactions occurring at various dates through March 2013 that are denominated in foreign currencies. The notional amount of foreign exchange contracts hedging foreign currency transactions was \$118.5 million and \$125.5 million at March 31, 2012 and December 31, 2011, respectively. At March 31, 2012, foreign exchange contracts with notional amounts totaling \$52.0 million were accounted for as cash flow hedges. As cash flow hedges, the effective portion of the gain or loss on the contracts was reported in accumulated other comprehensive loss and the ineffective portion was reported in income. Amounts in accumulated other comprehensive loss are reclassified into income, primarily cost of sales, in the period that the hedged transactions affect earnings. The balances of derivative assets are generally recorded in other current assets and the balances of derivative liabilities are generally recorded in accrued expenses in the Consolidated Balance Sheets. The remaining notional amounts of \$66.5 million of foreign exchange contracts, most of which have a maturity date of a month or less, were recorded at their fair market value with changes in market value recorded in income.

11. Business Segment Information

The Company has three reportable segments. The Sealing Products segment manufactures and sells sealing products, including metallic, non-metallic and composite material gaskets; dynamic seals; compression packing; resilient metal seals; elastomeric seals; hydraulic components; expansion joints;

Edgar Filing: ENPRO INDUSTRIES, INC - Form 10-Q

heavy-duty truck wheel-end component systems, including brake products; flange sealing and isolation products; pipeline casing spacers/isolators; casing end seals; modular sealing systems for sealing pipeline penetrations; hole forming products; manhole infiltration sealing systems; safety-related signage for pipelines; bellows and bellows assemblies; pedestals for semiconductor manufacturing; polytetrafluoroethylene (PTFE) products; conveyor belting; and sheeted rubber products.

The Engineered Products segment manufactures self-lubricating, non-rolling bearing products, aluminum blocks for hydraulic applications, and precision engineered components and lubrication systems for reciprocating compressors.

The Engine Products and Services segment manufactures and services heavy-duty, medium-speed diesel, natural gas and dual fuel reciprocating engines.

The Company's reportable segments are managed separately based on differences in their products and services and their end-customers. Segment profit is total segment revenue reduced by operating expenses and restructuring and other costs identifiable with the segment. Corporate expenses include general corporate administrative costs. Expenses not directly attributable to the segments, corporate expenses, net interest expense, gains and losses related to the sale of assets, impairments, and income taxes are not included in the computation of segment profit. The accounting policies of the reportable segments are the same as those for the Company.

Segment operating results and other financial data for the quarters ended March 31, 2012 and 2011, were as follows:

	2012	2011
	(in millions)	
Sales		
Sealing Products	\$ 149.5	\$ 115.7
Engineered Products	100.6	94.3
Engine Products and Services	62.0	60.2
	312.1	270.2
Intersegment sales	(0.6)	(0.6)
Total sales	\$ 311.5	\$ 269.6
Segment Profit		
Sealing Products	\$ 22.5	\$ 19.6
Engineered Products	9.0	10.1
Engine Products and Services	11.8	11.2
Total segment profit	43.3	40.9
Corporate expenses	(9.1)	(7.9)
Interest expense, net	(10.6)	(9.5)
Other expense, net	(2.0)	(1.6)
Income before income taxes	\$ 21.6	\$ 21.9

Segment assets are as follows:

	March 31, 2012	December 31, 2011
Sealing Products	\$ 484.9	\$ 474.8
Engineered Products	341.6	324.3
Engine Products and Services	114.9	99.1
Corporate	339.5	353.9

	\$ 1,280.9	\$ 1,252.1
--	------------	------------

12. Fair Value Measurements

The Company utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The following is a brief description of those three levels:

Level 1: Observable inputs such as quoted prices in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.

Level 3: Unobservable inputs that reflect the reporting entity's own assumptions.

Assets and liabilities measured at fair value on a recurring basis are summarized as follows:

	Fair Value Measurements as of			
	Total	Level 1	Level 2	Level 3
	March 31, 2012 (in millions)			
Assets				
Cash equivalents:				
European government money market	\$ 13.3	\$ 13.3	\$	\$
	13.3	13.3		
Guaranteed investment contract	2.5		2.5	
Foreign currency derivatives	0.9		0.9	
Deferred compensation assets	3.6	3.6		
	\$ 20.3	\$ 16.9	\$ 3.4	\$
Liabilities				
Deferred compensation liabilities	\$ 6.2	\$ 6.2	\$	\$
Foreign currency derivatives	0.8		0.8	
	\$ 7.0	\$ 6.2	\$ 0.8	\$

	Fair Value Measurements as of			
	Total	Level 1	Level 2	Level 3
	December 31, 2011 (in millions)			
Assets				
Cash equivalents:				
European government money market	\$ 13.0	\$ 13.0	\$	\$
	13.0	13.0		
Guaranteed investment contract	2.5		2.5	
Foreign currency derivatives	1.2		1.2	

Edgar Filing: ENPRO INDUSTRIES, INC - Form 10-Q

Deferred compensation assets	3.3	3.3		
	\$ 20.0	\$ 16.3	\$ 3.7	\$
Liabilities				
Deferred compensation liabilities	\$ 5.2	\$ 5.2	\$	\$
Foreign currency derivatives	2.1		2.1	
	\$ 7.3	\$ 5.2	\$ 2.1	\$

The Company's cash equivalents and deferred compensation assets and liabilities are classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices. The fair value for the guaranteed investment contract is based on quoted market prices for outstanding bonds of the insurance company issuing the contract. The fair values for foreign currency derivatives are based on quoted market prices from various banks for similar instruments.

The carrying values of the Company's significant financial instruments reflected in the Consolidated Balance Sheets approximate their respective fair values at March 31, 2012 and December 31, 2011, except for the following instruments:

	March 31, 2012		December 31, 2011	
	Carrying Value	Fair Value	Carrying Value	Fair Value
				(in millions)
Long-term debt	\$ 163.6	\$ 251.2	\$ 150.2	\$ 217.4
Notes payable to GST	248.1	260.7	237.4	239.8
	\$ 411.7	\$ 511.9	\$ 387.6	\$ 457.2

The fair values for long-term debt are based on quoted market prices, so this would be considered a Level 1 computation. The notes payable to GST computations would be considered Level 2 since they are based on rates available to the Company for debt with similar terms and maturities.

13. Garlock Sealing Technologies LLC and Garrison Litigation Management Group, Ltd.

On June 5, 2010 (the Petition Date), GST LLC, Anchor and Garrison filed voluntary petitions for reorganization under Chapter 11 of the United States Bankruptcy Code in the U.S. Bankruptcy Court for the Western District of North Carolina in Charlotte (the Bankruptcy Court). The filings were the initial step in a claims resolution process. The goal of the process is an efficient and permanent resolution of all current and future asbestos claims through court approval of a plan of reorganization, which is expected to establish a trust to which all asbestos claims will be channeled for resolution. GST intends to seek an agreement with asbestos claimants and other creditors on the terms of a plan for the establishment of such a trust and repayment of other creditors in full, or in the absence of such an agreement an order of the Bankruptcy Court confirming such a plan.

GST's financial results were included in the Company's consolidated results through June 4, 2010, the day prior to the Petition Date. However, GAAP requires an entity that files for protection under the U.S. Bankruptcy Code, whether solvent or insolvent, whose financial statements were previously consolidated with those of its parent, as GST and its subsidiaries were with EnPro, generally must be prospectively deconsolidated from the parent and the investment accounted for using the cost method. At deconsolidation, the Company's investment was recorded at its estimated fair value on June 4, 2010. The cost method requires the Company to present its ownership interests in the net assets of GST at the Petition Date as an investment and to not recognize any income or loss from GST and subsidiaries in the Company's results of operations during the reorganization period. When GST emerges from the jurisdiction of the Bankruptcy Court, the subsequent accounting will be determined based upon the applicable facts and circumstances at such time, including the terms of any plan of reorganization.

Financial Results

Condensed combined financial information for GST is set forth below, presented on a historical cost basis.

GST

(Debtor-in-Possession)

Condensed Combined Statements of Comprehensive Income (Unaudited)

(in millions)

	Quarters Ended March 31	
	2012	2011
Net sales	\$ 62.4	\$ 57.7
Cost of sales	37.9	35.2

GST

(Debtor-in-Possession)

Condensed Combined Balance Sheets (Unaudited)

(in millions)

	March 31, 2012	December 31, 2011
Assets:		
Current assets	\$ 217.8	\$ 237.0
Asbestos insurance receivable	141.6	142.3
Deferred income taxes	124.5	131.0
Notes receivable from affiliate	237.4	227.2
Other assets	73.9	74.1
Total assets	\$ 795.2	\$ 811.6
Liabilities and Shareholder's Equity:		
Current liabilities	\$ 55.5	\$ 65.9
Other liabilities	10.4	27.6
Liabilities subject to compromise (A)	469.3	469.2
Total liabilities	535.2	562.7
Shareholder's equity	260.0	248.9
Total liabilities and shareholder's equity	\$ 795.2	\$ 811.6

(A) Liabilities subject to compromise include pre-petition unsecured claims which may be settled at amounts which differ from those recorded in the condensed combined balance sheets. Liabilities subject to compromise consist principally of asbestos-related claims.

14. Commitments and Contingencies

General

A description of environmental, asbestos and other legal matters against certain of the Company's subsidiaries is included in this section in more detail. In addition to the matters noted herein, the Company is from time to time subject to, and is presently involved in, other litigation and legal proceedings arising in the ordinary course of business. While the outcome of litigation is by its nature uncertain, the Company believes that the outcome of such other litigation and legal proceedings will not have a material adverse effect on its financial condition, results of operations and cash flows. Expenses for legal and administrative proceedings are recorded when incurred.

Environmental

The Company's facilities and operations are subject to federal, state and local environmental and occupational health and safety requirements of the U.S. and foreign countries. The Company takes a proactive approach in its efforts to comply with environmental, health and safety laws as they relate to its manufacturing operations and in proposing and implementing any remedial plans that may be necessary. The Company also conducts comprehensive compliance and management system audits at its facilities to maintain compliance and improve operational efficiency.

Although the Company believes past operations were in substantial compliance with the then applicable regulations, the Company or one of its subsidiaries has been named as a potentially responsible party or is otherwise involved at 15 sites at each of which the costs to the Company or its subsidiary are expected to exceed \$100 thousand. Investigations have been completed for 12 sites and are in progress at the other three sites.

The majority of these sites relate to remediation projects at former operating

facilities that were sold or closed and primarily deal with soil and groundwater contamination. The laws governing investigation and remediation of these sites can impose joint and several liability for the associated costs. Liability for these costs can be imposed on present and former owners or operators of the properties or on parties that generated the wastes that contributed to the contamination.

The Company's policy is to accrue environmental investigation and remediation costs when it is probable that a liability has been incurred and the amount can be reasonably estimated. The measurement of the liability is based on an evaluation of currently available facts with respect to each individual situation and takes into consideration factors such as existing technology, presently enacted laws and regulations and prior experience in remediation of contaminated sites. Liabilities are established for all sites based on these factors. As assessments and remediation progress at individual sites, these liabilities are reviewed periodically and adjusted to reflect additional technical data and legal information. As of March 31, 2012 and December 31, 2011, EnPro had accrued liabilities of \$11.9 million and \$12.6 million, respectively, for estimated future expenditures relating to environmental contingencies. These amounts have been recorded on an undiscounted basis in the Consolidated Financial Statements.

The Company believes that its accruals for environmental liabilities are adequate based on currently available information. Actual costs to be incurred for identified situations in future periods may vary from estimates because of the inherent uncertainties in evaluating environmental exposures due to unknown and changing conditions, changing government regulations and legal standards regarding liability.

Colt Firearms and Central Moloney

The Company has contingent liabilities related to divested businesses for which certain of its subsidiaries retained liability or are obligated under indemnity agreements. These contingent liabilities include, but are not limited to, potential product liability and associated claims related to firearms manufactured prior to 1990 by Colt Firearms, a former operation of Coltec, and for electrical transformers manufactured prior to 1994 by Central Moloney, another former Coltec operation. The Company also has ongoing obligations, which are included in other liabilities in the Consolidated Balance Sheets, with regard to workers' compensation, retiree medical and other retiree benefit matters that relate to the Company's periods of ownership of these operations.

Crucible Materials Corporation

Crucible, which was engaged primarily in the manufacture and distribution of high technology specialty metal products, was a wholly owned subsidiary of Coltec until 1985 when a majority of the outstanding shares were sold. Coltec divested its remaining minority interest in 2004. Crucible filed for Chapter 11 bankruptcy protection in May 2009.

In conjunction with the closure of a Crucible plant in the early 1980s, Coltec was required to fund a trust for retiree medical benefits for certain employees at the plant. This trust (the Benefits Trust) pays for these retiree medical benefits on an ongoing basis. Coltec has no ownership interest in the Benefits Trust, and thus the assets and liabilities of this trust are not included in the Company's Consolidated Balance Sheets. Under the terms of the Benefits Trust agreement, the trustees retained an actuary to assess the adequacy of the assets in the Benefits Trust in 1995 and 2005. A third and final actuarial report will be required in 2015. The actuarial reports in 1995 and 2005 determined that the Benefits Trust has sufficient assets to fund the payment of future benefits. The Company owns a guaranteed investment contract (GIC) with a current value of \$2.5 million, which is being held in a special account in case of a shortfall in the Benefits Trust.

The Company also has ongoing obligations, which are included in other liabilities in the Consolidated Balance Sheets, including workers compensation, retiree medical and other retiree benefit matters, in addition to those mentioned previously, related to the Company's period of ownership of Crucible.

Warranties

The Company provides warranties on many of its products. The specific terms and conditions of these warranties vary depending on the product and the market in which the product is sold. The Company records a liability based upon estimates of the costs it may incur under its warranties after a review of historical warranty experience and information about specific warranty claims. Adjustments are made to the liability as claims data and historical experience warrant.

Changes in the carrying amount of the product warranty liability for the three-months ended March 31, 2012 and 2011 are as follows:

	2012	2011
	(in millions)	
Balance at beginning of year	\$ 3.5	\$ 3.5
Charges to expense	0.7	0.5
Settlements made (primarily payments)	(0.8)	(0.6)
Balance at end of period	\$ 3.4	\$ 3.4

Asbestos

Background on Asbestos-Related Litigation and Recent Developments. The historical business operations of GST LLC and Anchor resulted in a substantial volume of asbestos litigation in which plaintiffs alleged that exposure to asbestos fibers in products produced or sold by GST LLC or Anchor, together with products produced and sold by numerous other companies, contributed to the bodily injuries or deaths of such plaintiffs. Those subsidiaries manufactured and/or sold industrial sealing products that contained encapsulated asbestos fibers. The Company's subsidiaries exposure to asbestos litigation and their relationships with insurance carriers have been managed through Garrison.

On the Petition Date, GST LLC, Garrison and Anchor filed voluntary petitions for reorganization under Chapter 11 of the United States Bankruptcy Code in the Bankruptcy Court. The filings were the initial step in a claims resolution process. See Note 13 for additional information about this process and its impact on the Company.

As a result of the initiation of the Chapter 11 proceedings, the resolution of asbestos claims is subject to the jurisdiction of the Bankruptcy Court. The filing of the Chapter 11 cases automatically stayed the prosecution of pending asbestos bodily injury and wrongful death lawsuits, and initiation of new such lawsuits, against GST. Further, the Bankruptcy Court issued an order enjoining plaintiffs from bringing or further prosecuting asbestos products liability actions against affiliates of GST, including EnPro, Coltec and all their subsidiaries, during the pendency of the Chapter 11 proceedings, subject to further order.

During the pendency of the Chapter 11 proceedings, certain actions proposed to be taken by GST not in the ordinary course of business will be subject to approval by the Bankruptcy Court. As a result, during the pendency of these proceedings, the Company will not have exclusive control over these companies. Accordingly, under GAAP, the Company's investment in GST was deconsolidated from its financial results beginning on the Petition Date. The Company's recorded asbestos liability as of the Petition Date was \$472.1 million.

Appeals. GST LLC won reversals of adverse verdicts in one of two recent appellate decisions. In September 2011, the United States Court of Appeals for the Sixth Circuit overturned a \$500 thousand verdict against GST LLC that was handed down in 2009 by a Kentucky federal court jury. The federal appellate court found that GST LLC's motion for judgment as a matter of law should have been granted because the evidence was not sufficient to support a determination of liability. The Sixth Circuit's chief judge wrote that, "On the basis of this record, saying that exposure to Garlock gaskets was a substantial cause of [claimant's] mesothelioma would be akin to saying that one who pours a bucket of water into the ocean has substantially contributed to the ocean's volume." In May 2011, a three-judge panel of the Kentucky Court of Appeals upheld GST LLC's \$700 thousand share of a jury verdict, which included punitive damages, in a lung cancer case against GST LLC in Kentucky state court. GST LLC has appealed that decision further. At March 31, 2012, three additional GST LLC appeals are pending from adverse decisions totaling \$2.4 million.

Insurance Coverage. At March 31, 2012, the Company had \$157.3 million of insurance coverage the Company believes is available to cover current and future asbestos claims against GST LLC and certain expense payments. GST has collected insurance payments totaling \$37.3 million since the Petition Date. Of the \$157.3 million of available insurance coverage, the Company considers \$154.6 million (98%) to be of high quality because the insurance policies are written or guaranteed by U.S.-based carriers whose credit rating by S&P is investment grade (BBB-) or better, and whose AM Best rating is excellent (A-) or better. The Company considers \$2.7 million (2%) to be of moderate quality because the insurance policies are written with various London market carriers. Of the \$157.3 million, \$121.3 million is allocated to claims that have been paid by GST LLC and submitted to insurance companies for reimbursement and the remainder is allocated to pending and estimated future claims. The insurance available to cover current and future asbestos claims is from comprehensive general liability policies that cover Coltec and certain of its other subsidiaries in addition to GST LLC for periods prior to 1985 and therefore could be subject to potential competing claims of other covered subsidiaries and their assignees.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following is management's discussion and analysis of certain significant factors that have affected our financial condition, cash flows and operating results during the periods included in the accompanying unaudited consolidated financial statements and the related notes. You should read this in conjunction with those financial statements and the audited consolidated financial statements and related notes included in our annual report on Form 10-K for the fiscal year ended December 31, 2011.

Forward-Looking Information

This quarterly report on Form 10-Q includes statements that reflect projections or expectations of the future financial condition, results of operations and business of EnPro that are subject to risk and uncertainty. We believe those statements to be forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. When used in this report, the words may, hope, will, should, expect, plan, anticipate, intend, believe, estimate, predict, potential, continue, likely, generally identify forward-looking statements.

We cannot guarantee actual results or events will not differ materially from those projected, estimated, assigned or anticipated in any of the forward-looking statements contained in this report. In addition to those factors specifically noted in the forward-looking statements and those identified in the Company's annual report on Form 10-K for the year ended December 31, 2011, other important factors that could result in those differences include:

The value of pending claims and the number and value of future asbestos claims against our subsidiaries and risks inherent and potential adverse developments that may occur in the Chapter 11 reorganization proceeding involving Garlock Sealing Technologies LLC (GST LLC), The Anchor Packing Company (Anchor) and Garrison Litigation Management Group, Ltd. (Garrison);

general economic conditions in the markets served by our businesses, some of which are cyclical and experience periodic downturns;

prices and availability of raw materials; and

the amount of any payments required to satisfy contingent liabilities related to discontinued operations of our predecessors, including liabilities for certain products, environmental matters, guaranteed debt payments, employee benefit obligations and other matters.

We caution our shareholders not to place undue reliance on these statements, which speak only as of the date on which such statements were made.

Whenever you read or hear any subsequent written or oral forward-looking statements attributed to us or any person acting on our behalf, you should keep in mind the cautionary statements contained or referred to in this section. We do not undertake any obligation to release publicly any revisions to these forward-looking statements to reflect events or circumstances after the date of this report or to reflect the occurrence of unanticipated events.

Overview and Outlook

Overview. We are a leader in the design, development, manufacturing and marketing of proprietary engineered industrial products. We have 59 primary manufacturing facilities located in 11 countries, including the United States.

We manage our business as three segments: a Sealing Products segment, an Engineered Products segment, and an Engine Products and Services segment.

Our Sealing Products segment designs, manufactures and sells sealing products, including: metallic, non-metallic and composite material gaskets; dynamic seals; compression packing; resilient metal seals; elastomeric seals; hydraulic components; expansion joints; heavy-duty truck wheel-end component systems, including brake products; flange sealing and isolation products; pipeline casing spacers/isolators; casing end seals; modular sealing systems for sealing pipeline penetrations; hole forming products; manhole infiltration sealing systems; safety-related signage for pipelines; bellows and bellows assemblies; pedestals for semiconductor manufacturing; PTFE products; conveyor belting; and sheeted rubber products. These products are used in a variety of industries, including chemical and petrochemical processing, petroleum extraction and refining, pulp and paper processing, heavy-duty trucking, power generation, food and pharmaceutical processing, primary metal manufacturing, mining, water and waste treatment, aerospace, medical, filtration and semiconductor fabrication. In many of these industries, performance and durability are vital for safety and environmental protection. Many of our products are used in highly demanding applications, e.g., where extreme temperatures, extreme pressures, corrosive environments, strict tolerances, and/or worn equipment make product performance difficult.

Our Engineered Products segment includes operations that design, manufacture and sell self-lubricating, non-rolling, metal-polymer, solid polymer and filament wound bearing products, aluminum blocks for hydraulic applications, and precision engineered components and lubrication systems for reciprocating compressors. These products are used in a wide range of applications, including the automotive, pharmaceutical, pulp and paper, natural gas, health, power generation, machine tools, air treatment, refining, petrochemical and general industrial markets.

Our Engine Products and Services segment designs, manufactures, sells and services heavy-duty, medium-speed diesel, natural gas and dual fuel reciprocating engines. The United States government and the general markets for marine propulsion, power generation, and pump and compressor applications use these products and services.

The historical business operations of certain subsidiaries of the Company's subsidiary, Coltec Industries Inc (Coltec), principally GST LLC and Anchor, have resulted in a substantial volume of asbestos litigation in which plaintiffs have alleged personal injury or death as a result of exposure to asbestos fibers. Information about GST LLC's asbestos litigation is contained in this Management's Discussion and Analysis of Financial Condition and Results of Operation in the Asbestos subsection of the Contingencies section.

On June 5, 2010 (the Petition Date), GST LLC, Anchor and Garrison filed voluntary petitions for reorganization under Chapter 11 of the United States Bankruptcy Code in the U.S. Bankruptcy Court for the Western District of North Carolina in Charlotte (the Bankruptcy Court). GST LLC, Anchor and Garrison are sometimes referred to jointly as GST in this report. The filings were the initial step in a claims resolution process. GST LLC is one of the businesses in our broader Garlock group in our Sealing Products segment. GST LLC and its subsidiaries operate five primary manufacturing facilities, including operations in Palmyra, New York and Houston, Texas. The filings did not include EnPro Industries, Inc. or any other EnPro Industries, Inc. operating subsidiary.

GST LLC now operates in the ordinary course under court protection from asbestos claims. All pending litigation against GST is stayed during the process. We address our actions to permanently resolve GST LLC's asbestos litigation in this Management's Discussion and Analysis of Financial Condition and Results of Operation in the Garlock Sealing Technologies LLC and Garrison Litigation Management Group, Ltd. section.

The financial results of GST and subsidiaries were included in our consolidated results through June 4, 2010, the day prior to the Petition Date. However, U.S. generally accepted accounting principles require an entity that files for protection under the U.S. Bankruptcy Code, whether solvent or insolvent, whose financial statements were previously consolidated with those of its parent, as GST's and its subsidiaries were with ours, generally must be prospectively deconsolidated from the parent and the investment accounted for using the cost method. At deconsolidation, our investment was recorded at its estimated fair value as of June 4, 2010, resulting in a gain for reporting purposes. The cost method requires us to present our ownership interests in the net assets of GST at the Petition Date as an investment and not recognize any income or loss from GST and subsidiaries in our results of operations during the reorganization period. Our investment of \$236.9 million as of March 31, 2012, is subject to periodic reviews for impairment. When GST emerges from the jurisdiction of the Bankruptcy Court, the subsequent accounting will be determined based upon the applicable facts and circumstances at such time, including the terms of any plan of reorganization. See Note 13 to our Consolidated Financial Statements for condensed financial information for GST and subsidiaries.

In April 2012, i.e., subsequent to the end of the first quarter, the Company acquired Motorwheel Commercial Vehicle Systems, Inc. (Motorwheel). Motorwheel is a leading U.S. manufacturer of lightweight brake drums for heavy-duty trucks and other commercial vehicles. Motorwheel also sells wheel-end component assemblies for the heavy-duty market, sells fasteners for wheel-end applications and provides a full suite of services to its customers, including product development, testing and certification. The business is headquartered in Livonia, Michigan, and operates manufacturing facilities in Chattanooga, Tennessee, and Berea, Kentucky. Motorwheel will be managed as part of the Stemco operations in the Sealing Products segment.

The Motorwheel acquisition was paid for with approximately \$85 million of cash, which was funded by additional borrowings from our revolving credit facility. The purchase price allocation is subject to the completion of the valuation of certain assets and liabilities as well as purchase price adjustments pursuant to the acquisition agreement.

In January 2011, we acquired certain assets and assumed certain liabilities of Rome Tool & Die, Inc., a leading supplier of steel brake shoes to the North American heavy-duty truck market. The business is part of Stemco, which is in the Sealing Products segment. The business is located in Rome, Georgia.

In February 2011, we acquired the business of Pipeline Seal and Insulator, Inc. and its affiliates (PSI), a privately-owned group of companies that manufacture products for the safe flow of fluids through pipeline transmission and distribution systems worldwide. PSI primarily serves the global oil and gas industry and water and wastewater infrastructure markets. The business manufactures flange sealing and flange isolation products; pipeline casing spacers/isolators; casing end seals; the original Link-Seal® modular sealing system for sealing pipeline penetrations into walls, floors, ceilings and bulkheads; hole forming products; manhole infiltration sealing systems; and safety-related signage for pipelines. The business has manufacturing locations in the United States, Germany and the United Kingdom, and is part of our Sealing Products Segment.

In February 2011, we acquired the Mid Western group of companies, a privately-owned business primarily serving the oil and gas drilling, production and processing industries of western Canada. Mid Western services and rebuilds reciprocating compressors, designs and installs lubrication systems, and services and repairs a variety of other equipment used in the oil and gas industry. The business has locations in Calgary, Edmonton and Grand Prairie, Alberta, and is part of our Engineered Products segment.

In July 2011, we acquired Tara Technologies Corporation, a privately-held company that offers highly engineered products and solutions to the semiconductor, aerospace, energy and medical markets. The business, part of our Sealing Products segment, is headquartered in Daytona Beach, Florida, with facilities in San Carlos, California, and Singapore.

In August 2011, we acquired certain assets and assumed certain liabilities of PI Bearing Technologies, a privately held manufacturer of bearing blocks and other bearing products used in fluid power applications, and a distributor of high performance plain bearing products used in industrial applications. The business is located in Waukegan, Illinois and is part of our Engineered Products segment.

These acquisitions completed during 2011 were paid for with \$228.2 million in cash, which included \$99.2 million for the purchase of PSI. The purchase prices of the businesses acquired were allocated to the assets acquired and liabilities assumed based on their estimated fair values. The excess of the purchase prices over the identifiable assets acquired less the liabilities assumed was reflected as goodwill.

Outlook. We believe our first quarter results have laid the foundation for improved performance in 2012. We believe we are effectively executing our enterprise excellence programs, and we expect to see growing benefits from them as we focus on the successful integration of our acquisitions. These initiatives, combined with stable markets, should continue to benefit us for the remainder of the year. In 2012, we expect strong sales growth due to contributions from acquisitions and organic growth. Businesses acquired since the first quarter of 2011 are expected to add \$55 to \$60 million to sales in the

final three quarters of 2012. We also expect total segment profit margins for 2012 to improve over 2011. Margins will continue to reflect increased sales of lower margin products as we expand in original equipment markets and costs associated with the integration of the businesses acquired in 2011.

Our effective tax rate is directly affected by the relative proportions of revenue and income before taxes in the jurisdictions in which we operate. Based on the expected mix of domestic and foreign earnings, we anticipate our effective tax rate for the remainder of 2012 will be between 34% and 37%. Discrete tax events may cause our effective rate to fluctuate on a quarterly basis. Certain events, including, for example, acquisitions and other business changes, which are difficult to predict, may also cause our effective tax rate to fluctuate. The anticipated effective tax rate is higher than prior results primarily due to the expiration of certain temporary tax provisions that have not been renewed for 2012. These include the research and development credit, certain employment credits, and an exclusion for passive income earned by controlled foreign corporations. The absence of an exclusion for passive income earned between our affiliated foreign subsidiaries is taxed in the US as a dividend, in addition to being taxed in the local jurisdiction. These expired provisions result in approximately a net 2.5 percentage point increase in the projected effective income tax rate. If these tax incentives are renewed during the year, it could have a significant effect on tax expense in the period when renewed. We are subject to changing tax laws, regulations, and interpretations in multiple jurisdictions. Corporate tax reform continues to be a priority in many jurisdictions. Changes to the tax system in the U.S. or other jurisdictions in which we have a significant presence could materially impact our effective tax rate and deferred tax assets and liabilities.

The U.S. Internal Revenue Service (IRS) is currently examining our 2008, 2009 and 2010 U.S. federal income tax returns. These examinations are part of a routine and recurring cycle. We cannot predict the final outcome of the audit. Although we expect this examination to conclude before the end of 2012, we cannot be sure of a conclusion date. Various foreign and state tax returns also are under examination and some of these exams may also conclude within the next twelve months. The final outcomes of these audits are not yet determinable; however, we believe assessments that may arise will not have a material effect on our financial condition, results of operations, or cash flows. There are other returns not under examination for which it is possible the statute of limitations for assessments will expire in the next twelve months. Because we provide for uncertain tax positions, expiration of the period for assessments may have a favorable impact on our effective tax rate.

Our U.S. defined benefit plans continue to be underfunded. Based on currently available data, which is subject to change, we have estimated we will be required to contribute \$13.4 million to our U.S. defined benefit pension plans in 2012. Additional significant contributions are likely to be required in 2013 and beyond. Future contribution requirements depend on pension asset returns, pension valuation assumptions, plan design, and legislative actions. We estimate annual pension expense for the full year of 2012 will be \$13.2 million, which would be \$3.6 million more than in 2011. The expected increase in pension expense is primarily due to a decrease in the discount rate used in the actuarial computations.

In connection with our growth strategy, we plan to evaluate additional acquisition opportunities in 2012; however, the effects of such acquisitions, if any, cannot be predicted and therefore are not reflected in this outlook.

We address our outlook regarding our actions to permanently resolve GST LLC's asbestos litigation in this Management's Discussion and Analysis of Financial Condition and Results of Operations in the Garlock Sealing Technologies LLC and Garrison Litigation Management Group, Ltd. section.

Results of Operations

	Quarters Ended March 31,	
	2012	2011
	(in millions)	
Sales		
Sealing Products	\$ 149.5	\$ 115.7
Engineered Products	100.6	94.3
Engine Products and Services	62.0	60.2
	312.1	270.2
Intersegment sales	(0.6)	(0.6)
Total sales	\$ 311.5	\$ 269.6
Segment Profit		
Sealing Products	\$ 22.5	\$ 19.6
Engineered Products	9.0	10.1
Engine Products and Services	11.8	11.2
Total segment profit	43.3	40.9
Corporate expenses	(9.1)	(7.9)
Interest expense, net	(10.6)	(9.5)
Other expense, net	(2.0)	(1.6)
Income from continuing operations before income taxes	\$ 21.6	\$ 21.9

Segment profit is total segment revenue reduced by operating expenses and restructuring and other costs identifiable with the segment. Corporate expenses include general corporate administrative costs. Expenses not directly attributable to the segments, corporate expenses, net interest expense, asbestos-related expenses, gains/losses or impairments related to the sale of assets or deconsolidation of operations, and income taxes are not included in the computation of segment profit. The accounting policies of the reportable segments are the same as those for EnPro.

First Quarter of 2012 Compared to the First Quarter of 2011

Sales of \$311.5 million in the first quarter of 2012 increased 16% from \$269.6 million in the first quarter of 2011. Sales from acquisitions completed since the first quarter of 2011 contributed 12 percentage points of the increase. In addition, sales increased five percentage points as a result of higher volumes and selected price increases in each segment. We believe our volume growth in excess of market growth in our main markets is a result of our new products, efforts to gain market share, other sales efforts, and continued steady improvement in many customer markets compared to 2011. We also experienced a one percentage point decline in sales due to unfavorable currency rates quarter-over quarter.

Segment profit, management's primary measure of how our operations perform, increased 6% to \$43.3 million in the first quarter of 2012 from \$40.9 million in the first quarter of 2011. Segment profit increased due to the selected price increases, the increases in volume within each segment, and additional earnings generated by acquisitions since the first quarter of 2011. These increases were offset partially by cost increases, including those in manufacturing and selling, general and administrative expenses, which were not fully covered by price increases. In addition, we incurred \$1.3 million of restructuring charges and \$0.6 million of unfavorable foreign exchange effects, which reduced 2012 segment profit compared to 2011. Segment margins, defined as segment profit divided by sales, declined from 15.2% in 2011 to 13.9% in 2012. The margins declined primarily as a result of the additional sales from acquisitions, which have lower margins than our historical sales, as well as the restructuring expenses and unfavorable foreign currency effects.

Corporate expenses increased \$1.2 million from \$7.9 million in the first quarter of 2011 to \$9.1 million in 2012. The increase principally was a result of an increase in management long-term incentive compensation expense because the currently active three-year incentive plans are accruing at a higher achievement level than the plans active in the same quarter last year. In addition, directors' deferred compensation expense increased in connection with the increase in our stock price.

Net interest expense in the first quarter of 2012 was \$10.6 million compared to \$9.5 million during the same quarter in 2011. The increase is primarily due to an increase in the principal balance of the notes payable to GST LLC and new borrowings on the senior secured revolving credit facility.

We recorded income tax expense of \$7.8 million on pre-tax income from continuing operations of \$21.6 million in the first quarter of 2012, resulting in an effective tax rate for the quarter of 36.2%. During the first quarter of 2011, our effective tax rate was 30.4% as we recorded an income tax expense of \$6.7 million on pre-tax income of \$21.9 million. In the U.S., we historically have benefited from tax incentives such as the deduction for domestic production activities, and credits for research and development. However, at December 31, 2011, certain temporary tax provisions expired and have not been renewed for 2012. These include the research and experimentation credit, certain employment credits, and an exclusion for passive income earned by controlled foreign corporations. Legislation to extend these provisions for 2012 has not been enacted, which is contributing to the higher effective tax rate in the first quarter of 2012. Our effective tax rate is generally lower than U.S. statutory rates primarily due to the earnings in lower rate foreign jurisdictions where a significant portion of our income is taxed.

Net income was \$13.8 million, or \$0.64 per share, in the first quarter of 2012 compared to net income of \$15.2 million, or \$0.71 per share, in the same quarter of 2011. Earnings per share are expressed on a diluted basis.

Following is a discussion of operating results for each segment during the quarter:

Sealing Products. Sales of \$149.5 million in the first quarter of 2012 were 29% higher than the \$115.7 million reported in the same quarter of 2011. The increase in sales includes 21 percentage points from sales reported by businesses acquired since the first quarter of 2011. In addition, each business in the segment added volume compared to last year and gained from selected price increases. We experienced a one percentage point decline in sales due to unfavorable currency rates quarter-over-quarter.

Segment profit of \$22.5 million in the first quarter of 2012 increased 15% compared to the \$19.6 million reported in the first quarter of 2011. The increase in segment profit was a result of the additional volume, the acquisitions and the selected price increases. These increases were partially offset by cost increases in manufacturing, amortization expense of \$1.1 million, and a restructuring charge of \$0.4 million. Operating margins for the segment declined from 16.9% in 2011 to 15.1% in 2012.

Engineered Products. Sales of \$100.6 million in the first quarter of 2012 were 7% higher than the \$94.3 million reported in the first quarter of 2011. Acquisitions completed since the first quarter of 2011 favorably impacted revenue by seven percentage points. We also experienced organic growth of two percentage points, but this was offset by unfavorable changes in foreign currency exchange rates.

The segment profit in the first quarter of 2012 was \$9.0 million, which compares to \$10.1 million in the same quarter last year. GGB captured increased profitability primarily from selected price increases. Profits at CPI fell mainly as a result of a \$0.9 million restructuring charge for the acquired Mid Western business combined with net manufacturing cost increases. Operating margins for the segment were 8.9%, which declined from the 10.7% reported in the comparable quarter last year.

Engine Products and Services. Sales increased 3% from \$60.2 million in the first quarter of 2011 to \$62.0 million in the first quarter of 2012. The increase in sales was a result of small increases in revenue from new engine programs and aftermarket sales.

The segment reported a profit of \$11.8 million in the first quarter of 2012 compared to \$11.2 million in the first quarter of 2011. The quarter-over-quarter improvement was a result of net cost decreases, primarily in cost of goods sold. Operating margins increased slightly from 18.6% in the first quarter of 2011 to 19.0% in the same quarter this year.

Liquidity and Capital Resources

Cash requirements for, but not limited to, working capital, capital expenditures, acquisitions, pension contributions, and debt repayments have been funded from cash balances on hand, revolver borrowings and cash generated from operations. We are proactively pursuing acquisition opportunities. It is possible our cash requirements for one or more acquisition opportunities could exceed our cash balance at the time of closing. Should we need additional capital, we have resources available, which are discussed in this section under the heading of Capital Resources.

Cash Flows

Operating activities generated cash in the amount of \$3.0 million in the first quarter of 2012 compared to a use of cash of \$12.8 million in the same period last year. The improvement was primarily due to lower cash taxes paid of approximately \$7 million, improvements in working capital of approximately \$5 million, and improvements in segment profits. The use of cash in the first quarter of 2011 was primarily the result of increases in working capital as sales increased over the preceding quarter and the payment of income taxes.

Investing activities consumed \$6.0 million in cash in the first quarter of 2012, primarily to fund \$5.5 million of capital expenditures. Investing activities consumed \$157.5 million of cash during the first quarter of 2011 to fund acquisitions of \$152.2 million, net of cash acquired, and \$5.3 million of capital expenditures.

Cash generated from financing activities in the first quarter of 2012 included net borrowings on the senior secured revolving credit facility of \$11.4 million. Financing activities in the first quarter of 2011 included repayment of \$3.7 million of related-party debt.

Capital Resources

Senior Secured Revolving Credit Facility. Our primary U.S. operating subsidiaries, other than GST LLC, are parties to a senior secured revolving credit facility with a maximum availability of \$175 million, \$30 million of which may be used for letters of credit. Actual borrowing availability under the credit facility is determined by reference to a borrowing base of specified percentages of eligible accounts receivable, inventory, equipment and certain real property, and is reduced by usage of the facility, including outstanding letters of credit, and any reserves. Under certain conditions, we may request an increase to the facility maximum availability by up to \$50 million to \$225 million in total. Any increase is dependent on obtaining future lender commitments for those amounts, and no current lender has any obligation to provide such commitment. The credit facility matures on July 17, 2015, unless, prior to that date, our convertible debentures are paid in full, refinanced on certain terms, or defeased, in which case the facility will mature on March 30, 2016.

Borrowings under the credit facility are secured by specified assets of ours and our U.S. operating subsidiaries, other than GST LLC, and primarily include accounts receivable, inventory, equipment, certain real property, deposit accounts, intercompany loans, intellectual property and related contract rights, general intangibles related to any of the foregoing and proceeds related to the foregoing. Subsidiary capital stock is not included as collateral.

Outstanding borrowings under the credit facility currently bear interest at a rate equal to, at our option, either: (1) a base/prime rate plus 0.75%, or (2) the adjusted one, two, three or six-month LIBOR rate plus 1.75%. Future pricing under the credit facility at any particular time will be determined by reference to a pricing grid based on average daily availability under the facility for the immediately prior fiscal quarter. Under the pricing grid, the applicable margins will range from 0.75% to 1.25% for base/prime rate loans and from 1.75% to 2.25% for LIBOR loans. The undrawn portion of the credit facility is subject to an unused line fee calculated at an annual rate of 0.375%. Outstanding letters of credit are subject to an annual fee equal to the applicable margin for LIBOR loans under the credit facility as in effect from time to time, plus a fronting fee on the aggregate undrawn amount of the letters of credit at an annual rate of 0.125%.

The credit agreement contains customary covenants and restrictions for an asset-based credit facility, including a fixed charge test if availability falls below certain thresholds, and negative covenants limiting certain: fundamental changes (such as merger transactions); loans; incurrence of debt other than specifically permitted debt; transactions with affiliates that are not on arms-length terms; incurrence of liens other than specifically permitted liens; repayment of subordinated debt (except for scheduled payments in accordance with applicable subordination documents); prepayments of other debt; dividends; asset dispositions other than as specifically permitted; and acquisitions and other investments other than as specifically permitted.

For so long as the amount available for borrowing under the facility exceeds \$20 million, the limitation on fixed asset dispositions is not applicable. The limitations on acquisitions, investments in foreign subsidiaries, dividends (including those required to make payments on our convertible debentures), incurrence of certain cash collateral liens and prepayment of debt other than subordinated debt are generally not applicable if certain financial conditions are satisfied related to the facility.

The credit facility contains events of default including, but not limited to, nonpayment of principal or interest, violation of covenants, breaches of representations and warranties, cross-default to other debt, bankruptcy and other insolvency events, material judgments, certain ERISA events, actual or asserted invalidity of loan documentation and certain changes of control of the Company.

The borrowing availability at March 31, 2012, under our senior secured revolving credit facility was \$125.5 million after giving consideration to \$4.1 million of letters of credit outstanding and \$15.5 million of revolver borrowings. After funding the acquisition of Motorwheel in April 2012 through additional revolver borrowings, the availability on April 17, 2012 was approximately \$30 million.

Convertible Debentures. We issued \$172.5 million of convertible debentures in 2005. The debentures bear interest at an annual rate of 3.9375%, and we pay accrued interest on April 15 and October 15 of each year. The debentures will mature on October 15, 2015, unless they are converted prior to that date. The debentures are direct, unsecured and unsubordinated obligations and rank equal in priority with our unsecured and unsubordinated indebtedness and will be senior in right of payment to all subordinated indebtedness. They effectively rank junior to our secured indebtedness to the extent of the value of the assets securing such indebtedness. The debentures do not contain any financial covenants. Holders may convert the debentures into cash and shares of our common stock at an initial conversion rate of 29.5972 shares of common stock per \$1,000 principal amount of debentures, which is equal to an initial conversion price of \$33.79 per share, subject to adjustment, before the close of business on October 15, 2015. Upon conversion, we would deliver (i) cash equal to the lesser of the aggregate principal amount of the debentures to be converted or our total conversion obligation, and (ii) shares of our common stock in respect of the remainder, if any, of our conversion obligation. Conversion is permitted only under certain conditions, none of which were satisfied as of March 31, 2012.

We used a portion of the net proceeds from the sale of the debentures to enter into call options, i.e., hedge and warrant transactions, which entitle us to purchase shares of our stock from a financial institution at \$33.79 per share and entitle the financial institution to purchase shares of our stock from us at \$46.78 per share. This will reduce potential dilution to our common stock holders from conversion of the Debentures and have the effect to us of increasing the conversion price of the debentures to \$46.78 per share.

For a discussion of the potential liquidity issues and risks we could face in the event some or all of the Debentures are converted, see Part I, Item 1A, Risk Factors *We may not have sufficient cash to fund amounts payable upon a conversion of our convertible debentures or to repurchase the debentures at the option of the holder upon a change of control* in our annual report on Form 10-K for the year ended December 31, 2011.

Garlock Sealing Technologies LLC and Garrison Litigation Management Group, Ltd.

The historical business operations of GST LLC and Anchor have resulted in a substantial volume of asbestos litigation in which plaintiffs have alleged personal injury or death as a result of exposure to asbestos fibers. Those subsidiaries manufactured and/or sold industrial sealing products, predominately gaskets and packing, containing encapsulated asbestos fibers. Anchor is an inactive and insolvent indirect subsidiary of Coltec. The Company's subsidiaries' exposure to asbestos litigation and their relationships with insurance carriers have been managed through another Coltec subsidiary, Garrison.

On the Petition Date, GST LLC, Anchor and Garrison filed voluntary petitions for reorganization under Chapter 11 of the United States Bankruptcy Code in Bankruptcy Court. The filings were the initial step in a claims resolution process. The goal of the process is an efficient and permanent resolution of all current and future asbestos claims through court approval of a plan of reorganization, which is expected to establish a trust to which all asbestos claims will be channeled for resolution. GST intends to seek an agreement with asbestos claimants and other creditors on the terms of a plan for the establishment of such a trust and repayment of other creditors in full, or in the absence of such an agreement an order of the Bankruptcy Court confirming such a plan.

Prior to its deconsolidation effective on the Petition Date, GST LLC and its subsidiaries operated as part of the Garlock group of companies within EnPro's Sealing Products segment. GST LLC designs, manufactures and sells sealing products, including metallic, non-metallic and composite material gaskets, rotary seals, compression packing, resilient metal seals, elastomeric seals, hydraulic components, and expansion joints. GST LLC and its subsidiaries operate five primary manufacturing facilities, including GST LLC's operations in Palmyra, New York and Houston, Texas.

Garrison's principal business is to manage the defense of all asbestos-related litigation affecting the Company's subsidiaries, principally GST LLC and Anchor, arising from their sale or use of products or materials containing asbestos, and to manage, bill and collect available insurance proceeds. When it commenced business in 1996, Garrison acquired certain assets of GST LLC and assumed certain liabilities stemming from asbestos-related claims against GST LLC. Garrison is not itself a defendant in asbestos-related litigation and has no direct liability for asbestos-related claims. Rather, it has assumed GST LLC's liability for such claims and agreed to indemnify GST LLC from liability with respect to such claims. Anchor was a distributor of products containing asbestos and was acquired by GST LLC in 1987. Anchor has been inactive and insolvent since 1993.

The financial results of GST and subsidiaries have been excluded from our consolidated results since the Petition Date. The investment in GST will be presented using the cost method during the reorganization period and is subject to periodic reviews for impairment. The cost method requires us to present our ownership interests in the net assets of GST at the Petition Date as an investment and to not recognize any income or loss from GST and subsidiaries in our results of operations during the reorganization period. When GST emerges from the jurisdiction of the Bankruptcy Court, the subsequent accounting will be determined based upon the applicable circumstances and facts at such time, including the terms of any plan of reorganization. See Note 13 to our Consolidated Financial Statements for condensed financial information for GST and subsidiaries.

GST is included in our consolidated U.S. federal income tax return and certain state combined income tax returns. As the parent of these consolidated tax groups, we are liable for, and pay, income taxes owed by the entire group. We have agreed with GST to allocate group taxes to GST based on the U.S. consolidated tax return regulations and current accounting guidance. This method generally allocates current and deferred taxes to GST as if it were a separate taxpayer. As a result, we carry an income tax receivable from GST related to this allocation. At March 31, 2012, this amount was approximately \$23 million. This receivable is expected to be collected at a future date.

We have assessed GST LLC's and Garrison's liquidity position as a result of the bankruptcy filing and believe they can continue to fund their operating activities, and those of their subsidiaries, operating activities and meet their capital requirements for the foreseeable future. However, the ability of GST LLC and Garrison to continue as going concerns is dependent upon their ability to resolve their ultimate asbestos liability in the bankruptcy from their net assets, future cash flows, and available insurance proceeds, whether through the confirmation of a plan of reorganization or otherwise. As a result of the bankruptcy filing and related events, there can be no assurance the carrying values of the assets, including the carrying value of the business and the tax receivable, will be realized or that liabilities will be liquidated or settled for the amounts recorded. In addition, a plan of reorganization, or rejection thereof, could change the amounts reported in the GST LLC and Garrison financial statements and cause a material change in the carrying amount of our investment. See Note 13 to our Consolidated Financial Statements for additional information about GST's bankruptcy proceeding.

Critical Accounting Policies and Estimates

Please refer to our annual report on Form 10-K for the fiscal year ended December 31, 2011, for a complete list of our critical accounting policies and estimates.

Recently Issued Accounting Pronouncement

See Note 1 to our Consolidated Financial Statements in this Form 10-Q for a description of a new accounting pronouncement.

Contingencies

General

A description of environmental, asbestos and other legal matters against certain of our subsidiaries is included in this section in more detail. In addition to the matters noted herein, we are from time to time subject to, and are presently involved in, other litigation and legal proceedings arising in the ordinary course of business. We believe the outcome of such other litigation and legal proceedings will not have a material adverse affect on our financial condition, results of operations and cash flows.

Environmental

Our facilities and operations are subject to federal, state and local environmental and occupational health and safety requirements of the U.S. and foreign countries. We take a proactive approach in our efforts to comply with environmental, health and safety laws as they relate to our manufacturing operations and in proposing and implementing any remedial plans that may be necessary. We also regularly conduct comprehensive environmental, health and safety audits at our facilities to maintain compliance and improve operational efficiency.

Although we believe past operations were in substantial compliance with the then applicable regulations, we or one of our subsidiaries have been named as a potentially responsible party, or are otherwise involved, at 15 sites where the costs to us are expected to exceed \$100 thousand. Investigations have been completed for 12 sites and are in progress at the other three sites. The majority of these sites relate to remediation projects at former operating facilities that were sold or closed and primarily deal with soil and groundwater contamination.

As of March 31, 2012 and December 31, 2011, EnPro had accrued liabilities of \$11.9 million and \$12.6 million, respectively, for estimated future expenditures relating to environmental contingencies. See Note 14 to the Consolidated Financial Statements for additional information regarding our environmental contingencies.

Colt Firearms and Central Moloney

We have contingent liabilities related to divested businesses for which certain of our subsidiaries retained liability or are obligated under indemnity agreements. These contingent liabilities include, but are not limited to, potential product liability and associated claims related to firearms manufactured prior to March 1990 by Colt Firearms, a former operation of Coltec, and for electrical transformers manufactured prior to May 1994 by Central Moloney, another former Coltec operation. Coltec has ongoing obligations, which are included in other liabilities in our Consolidated Balance Sheets, with regard to workers' compensation, retiree medical and other retiree benefit matters that relate to Coltec's periods of ownership of these operations.

Crucible Materials Corporation

Crucible Materials Corporation (Crucible), which was engaged primarily in the manufacture and distribution of high technology specialty metal products, was a wholly owned subsidiary of Coltec until 1985 when a majority of the outstanding shares were sold. Coltec divested its remaining minority interest in 2004. Crucible filed for Chapter 11 bankruptcy protection in May 2009 and is no longer conducting operations. See Note 14 to the Consolidated Financial Statements for information about certain liabilities relating to Coltec's ownership of Crucible.

Subsidiary Bankruptcy

Three of our subsidiaries filed voluntary Chapter 11 bankruptcy petitions on the Petition Date as a result of tens of thousands of pending and expected future asbestos personal injury claims. The filings were the initial step in a claims resolution process. The goal of the process is an efficient and permanent resolution of all pending and future asbestos claims through court approval of a plan of reorganization that will establish a trust to which all asbestos claims will be channeled for resolution and payment. See the additional information provided earlier under the heading Garlock Sealing Technologies LLC and Garrison Litigation Management Group, Ltd., the discussion under the heading Asbestos, which follows, and Notes 13 and 14 to our Consolidated Financial Statements.

Asbestos

Background on Asbestos-Related Litigation and Recent Developments. The historical business operations of GST LLC and Anchor resulted in a substantial volume of asbestos litigation in which plaintiffs alleged that exposure to asbestos fibers in products produced or sold by GST LLC or Anchor, together with products produced and sold by numerous other companies, contributed to the bodily injuries or deaths of such plaintiffs.

On the Petition Date, GST LLC, Garrison and Anchor filed voluntary petitions for reorganization under Chapter 11 of the United States Bankruptcy Code in the U.S. Bankruptcy Court. The filings were the initial step in a claims resolution process. See Note 13 for additional information about this process and its impact on the Company.

As a result of the initiation of the Chapter 11 proceedings, the resolution of asbestos claims is subject to the jurisdiction of the Bankruptcy Court. The filing of the Chapter 11 cases automatically stayed the prosecution of pending asbestos bodily injury and wrongful death lawsuits, and initiation of new such lawsuits, against GST. Further, the Bankruptcy Court issued an order enjoining plaintiffs from bringing or further prosecuting asbestos products liability actions against affiliates of GST, including EnPro, Coltec and all their subsidiaries, during the pendency of the Chapter 11 proceedings, subject to further order.

GST LLC and Anchor were among a large number of defendants in actions filed in various states by plaintiffs alleging injury or death as a result of exposure to asbestos fibers. Among the many products at issue in these actions are industrial sealing products, including gaskets and packing. The damages claimed varied from action to action.

Beginning in 2000, the top-tier asbestos defendants companies that paid most of the plaintiffs' damages because they produced and sold huge quantities of highly friable asbestos products sought bankruptcy protection and stopped paying asbestos claims in the tort system. The bankruptcies of many additional producers of friable asbestos products followed. The plaintiffs could no longer pursue actions against these large defendants during the pendency of their bankruptcy proceedings, even though these defendants had historically been determined to be the largest contributors to asbestos-related injuries.

Many plaintiffs pursued GST LLC in civil court actions to recover compensation formerly paid by top-tier bankrupt companies under state law principles of joint and several liability and began identifying GST LLC's non-friable sealing products as a primary cause of their asbestos diseases while generally denying exposure to the friable products of companies in bankruptcy. GST LLC believes this targeting strategy effectively shifted damages caused by top tier defendants that produced friable asbestos products to GST LLC, thereby materially increasing GST LLC's cost of defending and resolving claims.

Almost all of the top-tier defendants that sought bankruptcy relief in the early 2000s have now emerged, or are positioning to emerge, from bankruptcy. Their asbestos liabilities have been assumed by wealthy 524(g) trusts created in the bankruptcies with assets contributed by the emerging former defendants and their affiliates. With the emergence of these companies from bankruptcy, many plaintiffs seek compensation from the 524(g) trusts. These trusts have aggregate assets exceeding \$30 billion (\$36.8 billion according to a study released in September 2011 by the United States Government Accountability Office) specifically set aside to compensate individuals with asbestos diseases caused by the friable products of those defendants. We believe that as billions of dollars of 524(g) trust assets continue to become available to claimants, defendants will obtain significant reductions in their costs to defend and resolve claims. As of the Petition Date, however, the establishment of these 524(g) trusts had taken longer than anticipated and the trusts had a significant backlog of claims that accumulated while the trusts were being established. Additionally, procedures adopted for the submissions of asbestos claims in bankruptcy cases and against 524(g) trusts made it difficult for GST LLC and other tort-system co-defendants to gain access to information about claims made against bankrupt defendants or the accompanying evidence of exposure to the asbestos-containing products of such bankrupt defendants. We believe that these procedures enable claimants to "double dip" by collecting payments from remaining defendants in the tort system under joint-and-several-liability principles for injuries caused by the former top-tier defendants while also collecting substantial additional amounts from 524(g) trusts established by those former defendants to pay asbestos claims. Because of these factors, while several 524(g) trusts had begun making substantial payments to claimants prior to the Petition Date, GST LLC had not yet experienced a significant reduction in damages being sought from GST LLC.

In light of GST LLC's experience that (a) its cost of defending and resolving claims had not yet declined as anticipated although 524(g) trusts had begun making substantial payments to claimants, and (b) new mesothelioma claims filings against it in recent years had not declined at a rate similar to the rate of decline in disease incidence, GST initiated the Chapter 11 proceedings as a means to determine and comprehensively resolve their asbestos liability.

During the pendency of the Chapter 11 proceedings, certain actions proposed to be taken by GST not in the ordinary course of business will be subject to approval by the Bankruptcy Court. As a result, during the pendency of these proceedings, we will not have exclusive control over these companies. Accordingly, under GAAP, our investment in GST was deconsolidated from our financial results beginning on the Petition Date. Our recorded asbestos liability as of the Petition Date was \$472.1 million.

Claims Mix. Of the more than 90,000 open cases at the Petition Date, we are aware of approximately 4,900 that involve claimants alleging mesothelioma. A large majority of the amount of settlement payments made by GST LLC in recent years have been paid in connection with mesothelioma claims.

Product Defenses. The asbestos in products formerly sold by GST LLC and Anchor was encapsulated, which means the asbestos fibers incorporated into the products during the manufacturing process were sealed in binders. The products were also nonfriable, which means they could not be crumbled by hand pressure. The U.S. Occupational Safety and Health Administration, which began generally requiring warnings on asbestos-containing products in 1972, has never required that a warning

be placed on products such as GST LLC's gaskets. Even though no warning label was required, GST LLC included one on all of its asbestos-containing products beginning in 1978. Further, gaskets such as those previously manufactured and sold by GST LLC are one of the few asbestos-containing products still permitted to be manufactured under regulations of the U.S. Environmental Protection Agency. Nevertheless, GST LLC discontinued all manufacture and distribution of asbestos-containing products in the U.S. during 2000 and worldwide in mid-2001.

Appeals. GST LLC won reversals of adverse verdicts in one of two recent appellate decisions. In September 2011, the United States Court of Appeals for the Sixth Circuit overturned a \$500 thousand verdict against GST LLC that was handed down in 2009 by a Kentucky federal court jury. The federal appellate court found that GST LLC's motion for judgment as a matter of law should have been granted because the evidence was not sufficient to support a determination of liability. The Sixth Circuit's chief judge wrote that, "On the basis of this record, saying that exposure to Garlock gaskets was a substantial cause of [claimant's] mesothelioma would be akin to saying that one who pours a bucket of water into the ocean has substantially contributed to the ocean's volume." In May 2011, a three-judge panel of the Kentucky Court of Appeals upheld GST LLC's \$700 thousand share of a jury verdict, which included punitive damages, in a lung cancer case against GST LLC in Kentucky state court. GST LLC has appealed that decision further. At March 31, 2012, three additional GST LLC appeals are pending from adverse decisions totaling \$2.4 million.

Insurance Coverage. At March 31, 2012, we had \$157.3 million of insurance coverage we believe is available to cover current and future asbestos claims against GST LLC and certain expense payments. GST has collected insurance payments totaling \$37.3 million since the Petition Date. Of the \$157.3 million of available insurance coverage, we consider \$154.6 million (98%) to be of high quality because the insurance policies are written or guaranteed by U.S.-based carriers whose credit rating by S&P is investment grade (BBB-) or better, and whose AM Best rating is excellent (A-) or better. We consider \$2.7 million (2%) to be of moderate quality because the insurance policies are written with various London market carriers. Of the \$157.3 million, \$121.3 million is allocated to claims that have been paid by GST LLC and submitted to insurance companies for reimbursement and the remainder is allocated to pending and estimated future claims. The insurance available to cover current and future asbestos claims is from comprehensive general liability policies that cover Coltec and certain of its other subsidiaries in addition to GST LLC for periods prior to 1985 and therefore could be subject to potential competing claims of other covered subsidiaries and their assignees.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to certain market risks as part of our ongoing business operations, including risks from changes in foreign currency exchange rates and interest rates that could impact our financial condition, results of operations and cash flows. We manage our exposure to these and other market risks through regular operating and financing activities and through the use of derivative financial instruments. We intend to use derivative financial instruments as risk management tools and not for speculative investment purposes. For information about our interest rate risk, see "Quantitative and Qualitative Disclosures about Market Risk - Interest Rate Risk" in our annual report on Form 10-K for the year ended December 31, 2011, and the following section.

Foreign Currency Risk

We are exposed to foreign currency risks that arise from normal business operations. These risks include the translation of local currency balances of our foreign subsidiaries, intercompany loans with foreign subsidiaries and transactions denominated in foreign currencies. Our objective is to control our exposure to these risks and limit the volatility in our reported earnings due to foreign currency fluctuations through our normal operating activities and, where appropriate, through foreign currency forward contracts and option contracts. The following table provides information about our outstanding foreign currency forward and option contracts as of March 31, 2012:

Transaction Type	Notional Amount Outstanding in Millions of U.S. Dollars (USD)	Maturity Dates		Exchange Rate Ranges
Forward Contracts				
Sell British pound/buy euro	\$ 24.0	Apr 2012		0.833 pound/euro
Buy euro/sell USD	16.9	Apr 2012	Jan 2013	1.295 to 1.441 USD/euro
Buy USD/sell euro	11.2	Apr 2012	Dec 2012	1.273 to 1.441 USD/euro
Sell USD/buy Australian dollar	10.8	Apr 2012	Mar 2013	0.948 to 1.057 USD/Australian dollar
Buy USD/sell Australian dollar	10.8	Apr 2012	Mar 2013	0.948 to 1.057 USD/Australian dollar
Sell British pound/buy Australian dollar	9.9	Apr 2012		1.539 Australian dollar/pound
Sell Australian dollar/buy Canadian dollar	5.5	Jun 2012		1.008 Australian dollar/Canadian dollar
Buy Australian dollar/sell Canadian dollar	5.5	Jun 2012		1.008 Australian dollar/Canadian dollar
Various others	21.0	Apr 2012	Mar 2012	Various
	115.6			
Option Contracts				
Buy Brazilian real/sell USD	1.6	May 2012		1.685 real/USD
Sell Brazilian real/buy USD	1.3	May 2012		2.115 real/USD
	2.9			
	\$ 118.5			

Item 4. Controls and Procedures

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our chief executive officer and chief financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures. The purpose of our disclosure controls and procedures is to provide reasonable assurance that information required to be disclosed in our reports filed under the Securities Exchange Act of 1934 (the Exchange Act), including this report, is recorded, processed, summarized and reported within the time periods specified, and that such information is accumulated and communicated to our management to allow timely decisions regarding disclosure.

Based on the controls evaluation, our chief executive officer and chief financial officer have concluded that our disclosure controls and procedures are effective to reasonably ensure that information required to be disclosed in our reports filed under the Exchange Act is recorded, processed, summarized and reported within the time periods specified, and that management will be timely alerted to material information required to be included in our periodic reports filed with the Securities and Exchange Commission.

In addition, no change in our internal control over financial reporting has occurred during the quarter ended March 31, 2012, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II

OTHER INFORMATION

Item 1. Legal Proceedings.

A description of environmental, asbestos and other legal matters is included in Note 14 to the Consolidated Financial Statements in this report, which is incorporated herein by reference. In addition to the matters noted therein, we are from time to time subject to, and are presently involved in, other litigation and legal proceedings arising in the ordinary course of business. We believe that the outcome of such other litigation and legal proceedings will not have a material adverse affect on our financial condition, results of operations and cash flows.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

The following table sets forth all purchases made by or on behalf of the Company or any affiliated purchaser, as defined in Rule 10b-18(a)(3) under the Exchange Act, of shares of the Company's common stock during each month in the first quarter of 2012.

Period	(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) That May Yet Be Purchased Under the Plans or Programs
January 1 - January 31, 2012				
February 1 - February 28, 2012	76(1)	\$ 33.89(1)		
March 1 - March 31, 2012	252(2)	\$ 41.12(2)		
Total	328(1)(2)	\$ 39.44(1)(2)		

- (1) In February 2012, a total of 76 shares were transferred to a rabbi trust that we established in connection with our Deferred Compensation Plan for Non-Employee Directors, pursuant to which non-employee directors may elect to defer directors' fees into common stock units. Coltec, which is a wholly owned subsidiary of EnPro, furnished these shares in exchange for management and other services provided by EnPro. The shares were transferred with respect to the deferral of amounts paid to correct underpayment of fees on June 30, September 30 and December 30, 2011. These shares were valued at the closing price of our common stock on the dates such amounts were to have been paid. We do not consider the transfer of shares from Coltec in this context to be pursuant to a publicly announced plan or program.
- (2) In March 2012, a total of 252 shares were transferred to a rabbi trust that we established in connection with our Deferred Compensation Plan for Non-Employee Directors, pursuant to which non-employee directors may elect to defer directors' fees into common stock units. Coltec furnished these shares in exchange for management and other services provided by EnPro. These shares were valued at a price of \$41.12 per share, the closing price of our common stock on March 30, 2012. We do not consider the transfer of shares from Coltec in this context to be pursuant to a publicly announced plan or program.

Item 6. Exhibits.

The exhibits to this report on Form 10-Q are listed in the accompanying Exhibit Index.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of Charlotte, North Carolina on this 9TH day of May, 2012.

ENPRO INDUSTRIES, INC.
