DORMAN PRODUCTS, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE THIRTY-NINE WEEKS ENDED SEPTEMBER 29, 2012 AND SEPTEMBER 24, 2011

(UNAUDITED)

1. Basis of Presentation

As used herein, unless the context otherwise requires, Dorman, the Company, we, us, or our refers to Dorman Products, Inc. and its subsidiaries. Our ticker symbol on NASDAQ is DORM.

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the U.S. for interim financial information and in accordance with the rules and regulations of the U.S. Securities and Exchange Commission (SEC). However, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the thirty-nine weeks ended September 29, 2012 are not necessarily indicative of the results that may be expected for the fiscal year ending December 29, 2012. We may experience significant fluctuations from quarter to quarter in our results of operations due to the timing of orders placed by our customers. Generally, the second and third quarters have the highest level of customer orders. The introduction of new products and product lines to customers may cause significant fluctuations from quarter to quarter. These financial statements should be read in conjunction with the consolidated financial statements and footnotes thereto included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011.

2. Stock Dividend

On May 15, 2012, our Board of Directors declared a two-for-one split of our common stock, payable in the form of a stock dividend of one share for each share held. The Board set June 1, 2012 as the record date for the determination of the shareholders entitled to receive the additional shares. The shares were distributed to the shareholders of record on June 15, 2012. All amounts related to shares, share prices and earnings per share have been retroactively restated. In addition, shareholders' equity has been retroactively restated by reclassifying the par value of the additional shares issued to common stock from additional paid in capital.

3. Discontinued Operations

On September 21, 2011, we announced our plan to exit the international portion of our ScanTech business due to continued operating losses and to focus on growing our North American business. ScanTech was headquartered outside Stockholm, Sweden and distributed a line of Volvo and Saab replacement parts throughout the world. During the thirty-nine weeks ended September 29, 2012, we reclassified approximately \$3.0 million of previously recorded currency translation adjustments from accumulated other comprehensive income to net income as a result of our substantial liquidation of our investment and recorded a deferred tax asset of \$1.5 million related to foreign tax credits we expect to utilize in the future. Additionally, included in ScanTech's costs of goods sold are \$0.8 million of reductions of previously recognized inventory reserves resulting from the sale of inventory during the thirty-nine weeks ended September 29, 2012. Similarly, we recorded charges to write-down inventory and tooling by approximately \$2.9 million during the thirty-nine weeks ended September 24, 2011, which were included in cost of goods sold. We also recorded \$0.6 million in charges for asset write-downs and employee related costs, which were included in selling, general and administrative expenses during the thirteen weeks ended September 24, 2011.

The following table summarizes ScanTech's net sales and income before taxes which have been presented as a discontinued operation in the Consolidated Statements of Operations for the thirteen and thirty-nine weeks ended September 29, 2012 and September 24, 2011:

(in thousands)

	Thirteen Weeks Ended	Thirty-nine Weeks Ended
--	----------------------	-------------------------

	September 29, 2012	September 24, 2011	September 29, 2012	September 24, 2011
Net sales	\$ 16	\$ 3,667	\$ 2,908	\$ 12,446
Income (loss) before taxes	\$ 12	\$ (3,517)	\$ 3,125	\$ (4,433)

Page 8 of 21

Table of Contents**4. Sales of Accounts Receivable**

We have entered into several customer sponsored programs administered by unrelated financial institutions that permit us to sell certain accounts receivable at discounted rates to the financial institutions. Transactions under these agreements were accounted for as sales of accounts receivable and were removed from our consolidated balance sheet at the time of the sales transactions. We do not service the receivables after the sales transactions. Pursuant to these agreements, we sold \$235.2 million and \$149.7 million of accounts receivable during the thirty-nine weeks ended September 29, 2012 and September 24, 2011, respectively. If receivables had not been sold, \$165.8 million and \$137.0 million of additional receivables would have been outstanding at September 29, 2012 and December 31, 2011, respectively, based on standard payment terms. Selling, general and administrative expenses for the thirty-nine weeks ended September 29, 2012 and September 24, 2011 included \$3.3 million and \$2.7 million, respectively, in financing costs associated with these accounts receivable sales programs.

5. Inventories

Inventories include the cost of material, freight, direct labor and overhead utilized in the processing of our products, and are stated at the lower of average cost or market. Inventories were as follows:

(in thousands)	September 29, 2012	December 31, 2011
Bulk product	\$ 46,904	\$ 41,761
Finished product	84,725	71,437
Packaging materials	2,673	2,647
 Total	 \$ 134,302	 \$ 115,845

6. Stock-Based Compensation

Our 2008 Stock Option and Stock Incentive Plan (the "Plan") was approved by our shareholders on May 20, 2009. Under the terms of the Plan, our Board of Directors may grant up to 2,000,000 shares of common stock in the form of incentive stock options, non-qualified stock options and shares of restricted stock or combinations thereof to officers, directors, employees, consultants and advisors. Grants under the Plan must be made within ten years of the date the Plan was approved and stock options are exercisable upon the terms set forth in the grant agreement approved by the Board of Directors, but in no event more than ten years from the date of grant. At September 29, 2012, 1,676,200 shares were available for grant under the Plan.

We expense the grant-date fair value of stock options. Compensation cost is recognized on a straight-line basis over the vesting period during which employees perform related services. The compensation cost charged against income for stock options for the thirty-nine weeks ended September 29, 2012 and September 24, 2011 was \$151,000 and \$188,000, respectively, before taxes. The compensation cost recognized is classified as selling, general and administrative expense in our Consolidated Statements of Operations. No compensation cost was capitalized during fiscal 2012 or fiscal 2011. We have included a forfeiture assumption of 5.4% for fiscal 2012 and fiscal 2011 in the calculation of compensation cost. Cash flows resulting from tax deductions in excess of compensation cost recognized in the financial statements are classified as a cash flow from financing activities.

We use the Black-Scholes option valuation model to estimate the fair value of options granted. Expected volatility and expected dividend yield are based on the actual historical experience of our common stock. The expected life represents the period of time that options granted are expected to be outstanding and is calculated using historical option exercise data. The risk-free rate is based on a U.S. Treasury security with terms equal to the expected time of exercise as of the grant date. We granted 20,000 stock options during the thirty-nine weeks ended September 29, 2012.

The following table summarizes our stock option activity for the thirty-nine weeks ended September 29, 2012:

Shares

Edgar Filing: Dorman Products, Inc. - Form 10-Q

		Weighted Average Price	Weighted Average Remaining Term (In years)	Aggregate Intrinsic Value
Balance at December 31, 2011	692,800	\$ 5.46		
Granted	20,000	22.71		
Exercised	(344,100)	4.22		
Balance at September 29, 2012	368,700	\$ 7.55	4.6	\$ 8,835,000
Options exercisable at September 29, 2012	228,700	\$ 5.32	3.2	\$ 5,990,000

Table of Contents

The total intrinsic value of stock options exercised in the thirty-nine weeks ended September 29, 2012 was \$6.8 million. Cash received from option exercises under the Plan in the thirty-nine weeks ended September 29, 2012 was \$1.4 million. The excess tax benefit generated from options which were exercised in the thirty-nine weeks ended September 29, 2012 was \$2.4 million and was credited to additional paid in capital.

As of September 29, 2012, there was approximately \$0.5 million of unrecognized compensation cost related to non-vested stock options, which is expected to be recognized over a weighted-average period of approximately 3.3 years.

We grant restricted stock to certain employees and members of our Board of Directors. The value of restricted stock issued is based on the fair value of our common stock on the grant date. Vesting of restricted stock is conditional based on continued employment or service for a specified period. Compensation cost related to restricted stock is recognized on a straight-line basis over the vesting period. We retain the restricted stock until the vesting provisions have been met. No dividends are paid on restricted stock. Compensation cost related to restricted stock was \$599,000 and \$267,000 for the thirty-nine weeks ended September 29, 2012 and September 24, 2011, respectively. We granted 10,000 shares of restricted stock during the thirty-nine weeks ended September 29, 2012.

The following table summarizes our restricted stock activity for the thirty-nine weeks ended September 29, 2012:

	Shares	Weighted Average Price
Nonvested at December 31, 2011	204,800	\$ 17.12
Granted	10,000	22.71
Vested	(34,750)	16.18
Nonvested at September 29, 2012	180,050	\$ 17.61

As of September 29, 2012, there was approximately \$2.7 million of unrecognized compensation cost related to nonvested restricted stock, which is expected to be recognized over a weighted-average period of approximately 3.5 years.

7. Earnings Per Share

Basic earnings per share was calculated by dividing our net income by the weighted average number of common shares outstanding during the period, excluding nonvested restricted stock which is considered to be contingently issuable. To calculate diluted earnings per share, common share equivalents are added to the weighted average number of common shares outstanding. Common share equivalents are computed based on the number of outstanding stock options and unvested restricted stock as calculated using the treasury stock method. However, in periods when the exercise price of our stock options, by grant, is greater than our average stock price during the period, those common share equivalents are considered anti-dilutive and are excluded from the calculation of diluted earnings per share. Options to purchase 50,000 and 30,000 shares of common stock were outstanding at September 29, 2012 and September 24, 2011, respectively, but were excluded from the calculation of dilutive earnings per share as their effect would have been anti-dilutive.

The following table sets forth the computation of basic earnings per share and diluted earnings per share:

(in thousands, except per share data)	Thirteen Weeks Ended		Thirty-nine Weeks Ended	
	September 29, 2012	September 24, 2011	September 29, 2012	September 24, 2011

Net income	\$ 0.56	\$ 0.32	\$ 1.53	\$ 1.01
------------	---------	---------	---------	---------

8. Common Stock Repurchases

We periodically repurchase, at the then current market price, and cancel common stock issued to the Dorman Products, Inc. 401(k) Retirement Plan and Trust (the 401(k) Plan). Shares are generally purchased from the 401(k) Plan when participants sell units as permitted by the 401(k) Plan or elect to leave the 401(k) Plan upon retirement, termination or other reasons. For the thirty-nine weeks ended September 29, 2012, we repurchased and cancelled 47,308 shares of common stock at an average price of \$25.44 per share. During the fifty-three weeks ended December 31, 2011, we repurchased and cancelled 90,268 shares of common stock at an average price of \$17.59 per share.

9. Related-Party Transactions

We have entered into a non-cancelable operating lease for our primary operating facility with a partnership in which Steven L. Berman, our Chief Executive Officer, and his family members, are partners. Based upon the terms of the lease, payments in fiscal 2012 will be \$1.5 million. Total rental payments to the partnership under the lease arrangement were \$1.4 million in fiscal 2011. The lease with the partnership expires December 28, 2012. We are currently pursuing a new lease agreement.

10. Income Taxes

At September 29, 2012, we had \$2.0 million of net unrecognized tax benefits, \$1.3 million of which would affect our effective tax rate if recognized. We recognize interest and penalties related to uncertain tax positions in income tax expense. As of September 29, 2012, we had approximately \$0.2 million of accrued interest related to uncertain tax positions.

The last United States federal income tax return examined by the Internal Revenue Service was 2005, and all years up through and including that year are closed by examination. We are currently under examination for the tax years 2007-2009 by one state tax authority and tax years 2008-2010 by another state tax authority to which we are subject to tax. The tax years 2008-2011 remain open to examination by the remaining major taxing jurisdictions in the United States to which we are subject. The tax years 2007-2011 remain open to examination in Sweden for our Swedish subsidiary.

11. Fair Value Disclosures

The carrying value of financial instruments such as cash, accounts receivable, accounts payable, and other current assets and liabilities approximate their fair value based on the short-term nature of these instruments.

12. New and Recently Adopted Accounting Pronouncements

In June 2011, the Financial Accounting Standards Board (FASB) issued an update to its authoritative guidance which allows only two options for presenting the components of net income and other comprehensive income: (1) in a single continuous financial statement or (2) in two

Edgar Filing: Dorman Products, Inc. - Form 10-Q

separate but consecutive financial statements. Also, items that are reclassified from other comprehensive income to net income must be presented on the face of the financial statements. The guidance is effective in two stages: the requirement to present a single continuous statement or two separate but consecutive statements was effective for us beginning January 1, 2012; however the requirement to present the reclassification adjustments from other comprehensive income to net income on the face of the financial statements has been deferred by the FASB indefinitely, pending further deliberations on this requirement. We adopted the first stage of this update on January 1, 2012. The adoption of this update affects presentation only and therefore, did not impact our results of operations, financial condition or cash flows.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cautionary Statement Regarding Forward Looking Statements

Certain statements in this document constitute forward-looking statements within the meaning of the Federal Private Securities Litigation Reform Act of 1995. While forward-looking statements sometimes are presented with numerical specificity, they are based on various assumptions made by management regarding future circumstances over many of which the Company has little or no control. Forward-looking statements may be identified by words including anticipate, believe, estimate, expect, and similar expressions. The Company cautions readers that forward-looking statements, including, without limitation, those relating to future business prospects, revenues, working capital, liquidity, and income, are subject to certain risks and uncertainties that would cause actual results to differ materially from those indicated in the forward-looking statements. Factors that could cause actual results to differ from forward-looking statements include but are not limited to: (i) competition in the automotive aftermarket; (ii) unfavorable economic conditions; (iii) the loss or decrease in sales among one of our top customers; (iv) customer consolidation in the automotive aftermarket leading to less favorable customer contract terms; (v) the cancellation or rescheduling of orders; (vi) foreign currency fluctuations and our dependence on foreign suppliers; (vi) extended credit to customers who may be unable to pay; (vii) the loss of a key vendor; (viii) limited customer shelf space; (ix) reliance on new product development; (x) patent filings made by original equipment manufacturers continuing to increase; (xi) quality problems with product after their production and sale to customers; (xii) loss of third party transportation providers on whom we depend; (xiii) improperly executed, or unrealized cost savings from, our on-going information technology initiatives; (xiv) unfavorable results of legal proceedings; (xv) dependence on senior management and control by officers, directors, and family members; (xvi) exposure to certain regulatory and financial risks related to climate change; and (xvii) healthcare reform legislation. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, estimated or projected. For additional information concerning factors that could cause actual results to differ materially from the information contained in this report, reference is made to the information in Part I, Item 1A. Risk Factors in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2011. You should not place undue reliance on forward-looking statements. Such statements speak only as to the date on which they are made, and we undertake no obligation to update publicly or revise any forward-looking statement, regardless of future developments or availability of new information.

Introduction

The following discussion and analysis, as well as other sections in this Quarterly Report on Form 10-Q, should be read in conjunction with the unaudited condensed consolidated financial statements and footnotes thereto of Dorman Products, Inc. and its subsidiaries included in Item 1. Consolidated Financial Statements of this Quarterly Report on Form 10-Q and with Management's Discussion and Analysis of Financial Condition and Results of Operations and the audited financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2011.

Overview

We are a supplier of automotive replacement parts, fasteners and service line products primarily for the automotive aftermarket. We market approximately 128,000 different automotive replacement parts (including brake parts), fasteners and service line products which are manufactured to our specifications. Approximately 26% of our parts and 63% of our net sales consist of parts and fasteners that were original equipment dealer exclusive items at the time of their introduction. Original equipment dealer exclusive parts are those which were traditionally available to consumers only from original equipment manufacturers or salvage yards and include, among other parts, intake manifolds, exhaust manifolds, oil cooler lines, window regulators, radiator fan assemblies, power steering pulleys and harmonic balancers. Fasteners include such items as oil drain plugs and wheel lug nuts. Approximately 79% of our products are sold under our brand names and the remainder are sold for resale under customers' private labels, other brands or in bulk. Our products are sold primarily in the United States and Canada through automotive aftermarket retailers (such as AutoZone, Advance Auto Parts and O'Reilly Automotive), national, regional and local warehouse distributors (such as Carquest Auto Parts and NAPA Auto Parts), specialty markets and salvage yards.

Although we distribute automotive replacement parts internationally, with sales into Europe, Mexico, the Middle East, Asia and Canada, we generate over 90% of our revenues from customers in the North American automotive aftermarket. The aftermarket has benefited from some of the factors affecting the general economy including the recent recession, tighter credit and higher unemployment. These conditions as well as others have resulted in consumers owning their vehicles longer as the average age of a vehicle on the road has increased to 10.8 years. This trend, if it continues, will increase the number of automotive parts that need replacing. Another important statistic impacting our market is total miles driven. Total U.S. miles driven increased slightly in 2009 and 2010, but has since declined. We believe that the combination of these factors accounted for a portion of our sales growth.

Table of Contents

While the overall automotive aftermarket in which we compete has benefited from the conditions mentioned above, our customer base has been consolidating over the past several years. As a result, our customers regularly seek more favorable pricing, product returns and extended payment terms when negotiating with us. While we attempt to avoid or minimize such concessions, in some cases pricing concessions have been made, customer payment terms have been extended and product returns have exceeded historical levels. The product returns and more favorable pricing primarily affect our profit levels while payment term extensions generally reduce operating cash flow and require additional capital to finance the business. We expect our customers to continue to exert pressure on these and other factors for the foreseeable future. We also expect our customers to continue to exert pressure on our margins. We have increased our focus on efficiency improvements, product cost reduction, and other initiatives to offset the impact of further margin and cash flow pressures.

In addition, we are relying on new product development as a way to offset some of these customer demands and as our primary vehicle for growth. As such, new product development is a critical success factor for us. We have invested heavily in resources necessary for us to increase our new product development efforts and to strengthen our relationships with our customers. These investments are primarily in the form of increased product development resources and awareness programs and customer service improvements. We believe this has enabled us to provide an expanding array of new product offerings and grow our revenues.

We may experience significant fluctuations from quarter to quarter in our results of operations due to the timing of orders placed by our customers. Generally, the second and third quarters have the highest level of customer orders, but the introduction of new products and product lines to customers may cause significant fluctuations from quarter to quarter.

We operate on a fifty-two or fifty-three week fiscal year period ending on the last Saturday of the calendar year. Our 2012 fiscal year will be a fifty-two week period that will end on December 29, 2012.

Results of Operations

The following table sets forth, for the periods indicated, the percentage of net sales represented by certain items in our Consolidated Statements of Operations:

	Thirteen Weeks Ended		Thirty-nine Weeks Ended	
	September 29, 2012	September 24, 2011	September 29, 2012	September 24, 2011
Net sales	100.0%	100.0%	100.0%	100.0%
Cost of goods sold	61.8	62.8	62.5	63.2
Gross profit	38.2	37.2	37.5	36.8
Selling, general and administrative expenses	18.3	19.3	18.8	19.9
Income from operations	19.9	17.9	18.7	16.9
Interest expense, net	0.0	0.0	0.1	0.0
Income from continuing operations before income taxes	19.9	17.9	18.6	16.9
Provision for income taxes	7.3	6.4	6.9	6.0
Net income from continuing operations	12.6%	11.5%	11.7%	10.9%

Thirteen Weeks Ended September 29, 2012 Compared to Thirteen Weeks Ended September 24, 2011

Net sales increased 20% to \$156.4 million for the thirteen weeks ended September 29, 2012 from \$130.6 million for the thirteen weeks ended September 24, 2011. Our revenue growth was primarily driven by strong overall demand for our products and higher revenues from recently introduced products. In addition, sales during the third fiscal quarter of 2012 benefitted from the shipment of several large line updates to a few large customers.

Cost of goods sold, as a percentage of net sales, decreased to 61.8% for the thirteen weeks ended September 29, 2012 from 62.8% for the thirteen weeks ended September 24, 2011. The improvement was due primarily to a favorable sales mix towards higher margin products, lower

transportation costs and lower provisions for excess and obsolete inventory.

Table of Contents

Selling, general and administrative expenses were approximately \$28.6 million for the thirteen weeks ended September 29, 2012 compared to \$25.2 million for the thirteen weeks ended September 24, 2011, but declined as a percentage of net sales to 18.3% from 19.3%. The spending increase was the result of higher variable costs related to our sales increase, additional product development spending, higher incentive compensation expenses and inflationary increases.

Interest expense, net, approximated prior year levels for the thirteen weeks ended September 29, 2012.

Our effective tax rate was 36.5% for the thirteen weeks ended September 29, 2012 compared to 35.8% for the thirteen weeks ended September 24, 2011. The effective tax rate in 2012 benefitted from a 2011 tax credit of \$0.3 million. The 2011 effective rate was favorably impacted by the reversal of interest accrued for uncertain tax positions.

Thirty-nine Weeks Ended September 29, 2012 Compared to Thirty-nine Weeks Ended September 24, 2011

Net sales increased 15% to \$435.4 million for the thirty-nine weeks ended September 29, 2012 from \$377.8 million for the thirty-nine weeks ended September 24, 2011. Our revenue growth was primarily driven by strong overall demand for our products and higher revenues from recently introduced products.

Cost of goods sold, as a percentage of net sales, decreased to 62.5% for the thirty-nine weeks ended September 29, 2012 from 63.2% for the thirty-nine weeks ended September 24, 2011. The decrease was primarily due to a favorable change in sales mix towards higher margin products, lower transportation costs and lower provisions for excess and obsolete inventory.

Selling, general and administrative expenses were approximately \$82.1 million for the thirty-nine weeks ended September 29, 2012 compared to \$75.1 million for the thirty-nine weeks ended September 24, 2011, but declined as a percentage of sales to 18.8% from 19.9%. The spending increase was the result of higher variable costs related to our sales increase, additional product development spending, increased incentive compensation expenses and inflationary increases.

Interest expense, net, approximated prior year levels for the thirty-nine weeks ended September 29, 2012.

Our effective tax rate was 37.0% for the thirty-nine weeks ended September 29, 2012 compared to 35.7% for the thirty-nine weeks ended September 24, 2011. The effective tax rate in fiscal 2011 was favorably impacted by the 2011 receipt of tax exempt life insurance proceeds to fund an officer's death benefit.

Liquidity and Capital Resources

Historically, we have financed our growth through a combination of cash flow from operations, accounts receivable sales programs provided by certain customers and through the issuance of senior indebtedness through our bank credit facility and senior note agreements. At September 29, 2012, working capital was \$311.6 million, while shareholders' equity was \$372.3 million. Cash and cash equivalents as of September 29, 2012 was \$66.1 million.

Over the past several years we extended payment terms to certain customers as a result of customer requests and market demands. We participate in accounts receivable sales programs with several customers which allow us to sell our accounts receivable to financial institutions to offset the negative cash flow impact of these payment terms extensions. Without these programs, these extended terms would have resulted in increased accounts receivable and significant uses of cash flow. Pursuant to these agreements, we sold accounts receivable in the aggregate amount of \$235.2 million and \$149.7 million during the thirty-nine weeks ended September 29, 2012 and September 24, 2011, respectively. If receivables had not been sold, \$165.8 million and \$137.0 million of additional receivables would have been outstanding at September 29, 2012 and December 31, 2011, respectively, based on standard payment terms.

We have a \$30.0 million revolving credit facility which expires in June 2013. Borrowings under the facility are on an unsecured basis with interest at rates ranging from LIBOR plus 100 basis points to LIBOR plus 250 basis points based upon the achievement of certain benchmarks related to the ratio of funded debt to EBITDA, as defined by our credit agreement. The interest rate at September 29, 2012 was LIBOR plus 100 basis points (1.21%). There were no borrowings under the facility as of September 29, 2012. As of September 29, 2012, we had three outstanding letters of credit for approximately \$0.9 million in the aggregate which were issued to secure ordinary course of business transactions. Net of these letters of credit, we had approximately \$29.1 million available under the facility at September 29, 2012. The credit agreement also contains covenants, the most restrictive of which pertain to net worth and the ratio of debt to EBITDA.

Table of Contents

Our business activities do not include the use of unconsolidated special purpose entities, and there are no significant business transactions that have not been reflected in the accompanying financial statements.

Cash generated from our operating activities was \$28.6 million in the thirty-nine weeks ended September 29, 2012. Net income and accounts payable increases of \$7.1 million were the primary sources of operating cash flow. Accounts payable increased due to the timing of payments to suppliers and higher inventory purchases. The primary uses of cash were inventory, which increased \$18.4 million in conjunction with our sales growth and efforts to improve customer order fill rates, and accounts receivables which increased \$16.4 million due to our sales growth.

Investing activities used \$14.4 million of cash in the thirty-nine weeks ended September 29, 2012 as a result of additions to property, plant and equipment. Capital spending in the thirty-nine weeks ended September 29, 2012 primarily consisted of upgrades to information systems, tooling associated with new products, and scheduled equipment replacements. In the third quarter of 2010, we began a project to replace our enterprise resource planning system. This project is expected to cost approximately \$20.4 million in software, installation services and capitalized internal costs in fiscal 2010 through fiscal 2013. Through September 29, 2012, we have spent \$13.3 million on the project, of which \$6.7 million was spent in 2012.

Financing activities provided \$1.6 million of cash in the thirty-nine weeks ended September 29, 2012, primarily related to proceeds received from the exercise of stock options which were partially offset by stock repurchases from the 401(k) Plan.

On September 21, 2011, we announced our plan to exit the international portion of our ScanTech business which was headquartered outside Stockholm, Sweden. As of September 29, 2012, the business is presented as a discontinued operation in the Consolidated Statements of Operations. During the thirty-nine weeks ended September 29, 2012, net income was \$4.5 million, primarily due to the reclassification of \$3.0 million of previously recorded currency translation adjustments from accumulated other comprehensive income to net income as a result of our substantial liquidation of our investment and a deferred tax asset of \$1.5 million related to foreign tax credits we expect to utilize in the future.

Based on our current operating plan, we believe that our sources of available capital are adequate to meet our ongoing cash needs for at least the next twelve months.

During the thirty-nine weeks ended September 29, 2012, we experienced no material changes to our contractual obligations as disclosed in our Annual Report on Form 10-K for the year ended December 31, 2011.

Foreign Currency Fluctuations

In fiscal 2011, approximately 80% of our products were purchased from suppliers in a variety of foreign countries. The products generally are purchased through purchase orders with the purchase price specified in U.S. dollars. Accordingly, we generally do not have exposure to fluctuations in the relationship between the dollar and various foreign currencies between the time of execution of the purchase order and payment for the product. To the extent that the dollar decreases in value to foreign currencies in the future, the price of the product in dollars for new purchase orders may increase.

The largest portion of our overseas purchases comes from China. Since June 2010, the Chinese Yuan has increased approximately 6.9% relative to the U.S. Dollar. A continued increase in the value of the Yuan relative to the U.S. Dollar will likely result in an increase in the cost of products that we purchase from China.

Impact of Inflation

The overall impact of inflation has not resulted in a significant change in labor costs or the cost of general services utilized. The cost of many of the commodities that are used in our products have fluctuated over time. During the first six months of fiscal 2011 commodity prices increased, but have since declined. The resulting increases and decreases impact the price of our products. In addition, we have periodically experienced increased transportation costs as a result of higher fuel prices. We will attempt to offset cost increases by passing along selling price increases to customers, through the use of alternative suppliers and by resourcing purchases to other countries. However there can be no assurance that we will be successful in these efforts.

Table of Contents

Related-Party Transactions

We have a noncancelable operating lease for our primary operating facility with a partnership in which Steven L. Berman, our Chief Executive Officer, and his family members, are partners. Based upon the terms of the lease, payments in fiscal 2012 will be \$1.5 million. Total rental payments to the partnership under the lease arrangement were \$1.4 million in fiscal 2011. The lease with the partnership expires December 28, 2012. We are currently pursuing a new lease agreement.

Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon the consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities and the reported amounts of revenues and expenses. We regularly evaluate our estimates and judgments, including those related to the allowance for doubtful accounts, revenue recognition and allowance for customer credits, inventory reserves, goodwill and income taxes. Estimates and judgments are based upon historical experience and on various other assumptions believed to be accurate and reasonable under the circumstances. Actual results may differ materially from these estimates under different assumptions or conditions. We believe the following critical accounting policies affect our significant estimates and judgments used in the preparation of our consolidated financial statements.

Allowance for Doubtful Accounts. The preparation of our financial statements requires us to make estimates of the collectability of our accounts receivable. We specifically analyze accounts receivable and historical bad debts, customer creditworthiness, current economic trends and changes in customer payment patterns when evaluating the adequacy of the allowance for doubtful accounts. A significant percentage of our accounts receivable have been, and will continue to be, concentrated among a relatively small number of automotive retailers and warehouse distributors in the United States. Our five largest customers accounted for 83% and 78% of net accounts receivable as of December 31, 2011 and December 25, 2010, respectively. A bankruptcy or financial loss associated with a major customer could have a material adverse effect on our sales and operating results.

Revenue Recognition and Allowance for Customer Credits. Revenue is recognized from product sales when goods are shipped, title and risk of loss have been transferred to the customer and collection is reasonably assured. We record estimates for cash discounts, product returns and warranties, discounts and promotional rebates in the period of the sale (Customer Credits). The provision for Customer Credits is recorded as a reduction from gross sales and reserves for Customer Credits are shown as a reduction of accounts receivable. Actual Customer Credits have not differed materially from estimated amounts for each period presented. Amounts billed to customers for shipping and handling are included in net sales. Costs associated with shipping and handling are included in cost of goods sold.

Excess and Obsolete Inventory Reserves. We must make estimates of potential future excess and obsolete inventory costs. We provide reserves for discontinued and excess inventory based upon historical demand, forecasted usage, estimated customer requirements and product line updates. We maintain contact with our customer base in order to understand buying patterns, customer preferences and the life cycle of our products. Changes in customer requirements are factored into the reserves as needed.

Goodwill. We assess the qualitative factors which could affect the fair values of our reporting units on an annual basis or more frequently when an indicator of impairment exists. This annual assessment is performed during our fourth fiscal quarter each year. If, during this assessment, we conclude that it is more likely than not that the carrying value of a reporting unit exceeds its fair value, then we would perform the two-step impairment test for that reporting unit.

Income Taxes. We follow the asset and liability method of accounting for deferred income taxes. Under this method, income tax expense is recognized for the amount of taxes payable or refundable for the current year and for the change in the deferred tax liabilities and assets for the future tax consequences of events that have been recognized in an entity's financial statements or tax returns. We must make assumptions, judgments and estimates to determine our current provision for income taxes and also our deferred tax assets and liabilities and any valuation allowance to be recorded against a deferred tax asset. Our judgments, assumptions and estimates relative to the current provision for income taxes takes into account current tax laws, our interpretation of current tax laws and possible outcomes of current and future audits conducted by tax authorities. Changes in tax laws or our interpretation of tax laws and the resolution of current and future tax audits could significantly impact the amounts provided for income taxes in our consolidated financial statements. Our assumptions, judgments and estimates relative to the value of a deferred tax asset takes into account predictions of the amount and category of future taxable income. Actual operating results and the underlying amount and category of income in future years could

Table of Contents

render our current assumptions, judgments and estimates of recoverable net deferred taxes inaccurate. Any of the assumptions, judgments and estimates mentioned above could cause our actual income tax obligations to differ from our estimates.

New and Recently Adopted Accounting Pronouncements

Please refer to Note 12, New and Recently Adopted Accounting Pronouncements, to the Notes to Consolidated Financial Statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our market risk is the potential loss arising from adverse changes in interest rates. Substantially all of our borrowing capacity and our accounts receivable sale programs bear interest at rates tied to LIBOR. Under the terms of our revolving credit facility and customer-sponsored programs to sell accounts receivable, a change in either the lender's base rate, LIBOR or discount rates under our accounts receivable sale programs would affect the rate at which we could access funds thereunder. Hypothetically, a one percentage point increase in LIBOR would increase our interest expense on our variable rate debt, if any, and our financing costs associated with our sales of accounts receivable by approximately \$1.7 million annually. This estimate assumes that our variable rate debt balance and the level of sales of accounts receivable remains constant for an annual period and the interest rate change occurs at the beginning of the period. The hypothetical changes and assumptions may be different from what actually occurs in the future.

We have not historically and do not intend to use derivative financial instruments for trading or to speculate on changes in interest rates or commodity prices. We are not exposed to any significant market risks, foreign currency exchange risk or interest rate risk from the use of derivative instruments.

Item 4. Controls and Procedures

(a) Quarterly Evaluation of Our Disclosure Controls and Internal Controls

The Company maintains disclosure controls and procedures (as defined in Rule 13a-15(e) of the Exchange Act) that are designed to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Company's management, including its principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, under the supervision of the Company's Disclosure Committee, evaluated the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-Q. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures, as defined in Rule 13a-15(e) of the Exchange Act, were effective as of September 29, 2012.

(b) Changes in Internal Control Over Financial Reporting

During the quarter ended September 29, 2012, there were no changes in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

(c) Limitations on the Effectiveness of Controls

Control systems, no matter how well conceived and operated, are designed to provide a reasonable, but not an absolute, level of assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected. The Company conducts periodic evaluations of its internal controls to enhance, where necessary, its procedures and controls.

Table of Contents**PART II. OTHER INFORMATION****Item 1. Legal Proceedings**

We are a party to or otherwise involved in legal proceedings that arise in the ordinary course of business, such as various claims and legal actions involving contracts, competitive practices, patent rights, trademark rights, product liability claims and other matters arising out of the conduct of our business. In the opinion of management, none of the actions, individually or in the aggregate, would likely have a material financial impact on us and we believe the range of reasonably possible losses from current matters continues to be immaterial.

Item 1A. Risk Factors

You should carefully consider the factors discussed in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2011, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**Issuer Purchases of Equity Securities**

During the thirteen weeks ended September 29, 2012, we purchased shares of our common stock as follows:

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs
July 1, 2012 through July 28, 2012	2,700	\$ 23.66		
July 29, 2012 through August 25, 2012	13,400	\$ 28.91		
August 26, 2012 through September 29, 2012		\$		
Total	16,100	\$ 28.03		

- (1) Includes shares of our common stock withheld from participants for income tax withholding purposes in connection with the vesting of restricted stock grants during the period, if any. The restricted stock was issued to participants pursuant to our 2008 Stock Option and Incentive Plan. Also includes shares purchased from the 401(k) Plan (as described in Note 8 to the Notes to Consolidated Financial Statements in this Quarterly Report on Form 10-Q).
