SUBSCRIPTION AND COMMUNITY

OFFERING PROSPECTUS

(Proposed Holding Company for Northfield Bank)

Up to 41,975,000 Shares of Common Stock

Northfield Bancorp, Inc., a Delaware corporation, is offering up to 41,975,000 shares of common stock for sale at \$10.00 per share on a best efforts basis in connection with the conversion of Northfield Bancorp, MHC from the mutual holding company to the stock holding company form of organization. The shares we are offering represent the ownership interest in Northfield Bancorp, Inc., a federal corporation, currently owned by Northfield Bancorp, MHC. In this prospectus, we will refer to Northfield Bancorp, Inc., the Delaware corporation, as

Northfield-Delaware, and we will refer to Northfield Bancorp, Inc., the federal corporation, as Northfield-Federal. Northfield-Federal's common stock is currently traded on the Nasdaq Global Select Market under the trading symbol NFBK, and we expect the shares of Northfield-Delaware common stock will also trade on the Nasdaq Global Select Market under the symbol NFBK.

The shares of common stock are first being offered in a subscription offering to eligible depositors of Northfield Bank, the former First State Bank and the former Flatbush Federal Savings & Loan Association, and to the tax-qualified employee benefit plans of Northfield Bank, as described in this prospectus. Eligible depositors and tax-qualified employee benefit plans have priority rights to buy all of the shares offered. Shares not purchased in the subscription offering will be offered for sale simultaneously to the general public in a community offering, with a preference given to residents of the communities served by Northfield Bank and existing stockholders of Northfield-Federal. We also may offer for sale shares of common stock not purchased in the subscription or community offerings through a syndicate of broker-dealers, referred to in this prospectus as the syndicated offering, or, in our discretion after consultation with our financial advisors, in a separate firm commitment underwritten public offering. The syndicated offering or the firm commitment underwritten offering may commence before the subscription and community offerings (including any extensions) have expired. The subscription, community, syndicated and firm commitment underwritten offerings are collectively referred to in this prospectus as the offering. We must sell a minimum of 31,025,000 shares in order to complete the offering and the conversion.

In addition to the shares we are selling in the offering, the shares of Northfield-Federal currently held by the public will be exchanged for shares of common stock of Northfield-Delaware based on an exchange ratio that will result in existing public stockholders of Northfield-Federal owning approximately the same percentage of Northfield-Delaware common stock as they owned in Northfield-Federal common stock immediately prior to the completion of the conversion. The number of shares we expect to issue in the exchange ranges from 19,780,217 shares to 26,761,470 shares.

The minimum order is 25 shares. The subscription and community offerings are expected to expire at 4:00 p.m., Eastern Time, on December 17, 2012. We may extend this expiration date without notice to you until January 31, 2013. Once submitted, orders are irrevocable unless the subscription and community offerings are terminated or extended, with regulatory approval, beyond January 31, 2013, or the number of shares of common stock to be sold is increased to more than 41,975,000 shares or decreased to less than 31,025,000 shares. If the subscription and community offerings are extended past January 31, 2013, or if the number of shares to be sold in the offerings is increased to more than 41,975,000 shares or decreased to less than 31,025,000 shares, we will resolicit subscribers, and all funds delivered to us to purchase shares of common stock in the subscription and community offerings will be returned promptly with interest. Funds received in the subscription and the community offerings will be held in a segregated account at Northfield Bank and will earn interest at 0.20% per annum until completion or termination of the offering. No shares purchased in the subscription offering or the community offering will be issued until the completion of any syndicated or firm commitment underwritten offering.

Sandler O'Neill & Partners, L.P. will assist us in selling the shares on a best efforts basis in the subscription and community offerings, and will serve as a joint book-running manager for any syndicated or firm commitment underwritten offering. Sandler O'Neill & Partners, L.P. is not required to purchase any shares of common stock that are sold in the subscription and community offerings.

OFFERING SUMMARY

Price: \$10.00 per Share

	Minimum	Midpoint	Maximum
Number of shares	31,025,000	36,500,000	41,975,000
Gross offering proceeds	\$ 310,250,000	\$ 365,000,000	\$ 419,750,000
Estimated offering expenses, excluding selling agent and underwriters' commissions	\$ 2,240,600	\$ 2,240,600	\$ 2,240,600
Selling agent and underwriters' commissions (1)(2)	\$ 13,197,100	\$ 15,529,400	\$ 17,861,800
Estimated net proceeds	\$ 294,812,300	\$ 347,230,000	\$ 399,647,600
Estimated net proceeds per share	\$ 9.50	\$ 9.51	\$ 9.52

- (1) Includes \$100,000 payable to Sandler O'Neill & Partners, L.P. for records management.
- (2) The amounts shown assume that 25% of the shares are sold in the subscription and community offerings and the remaining 75% are sold in a syndicated or firm commitment underwritten offering. The amounts shown further assume that Sandler O'Neill & Partners, L.P. will receive fees in the amount of: (i) 1.0% of the aggregate amount of common stock sold in the subscription and community offerings (net of insider purchases and shares purchased by our employee stock ownership plan) up to the first 10% of the shares sold in such offering; and (ii) 3.0% of the aggregate amount of common stock sold in the subscription and community offerings (net of insider purchases and shares purchased by our employee stock ownership plan) in excess of 10% of the shares sold in such offerings. The amounts shown also include fees of 5% of the aggregate amount of common stock sold in the syndicated or firm commitment underwritten offering, which will be paid to Sandler O'Neill & Partners, L.P., Jefferies & Company, Inc. and Stifel, Nicolaus & Company, Incorporated and any other broker-dealers included in the syndicated or firm commitment underwritten offering. See The Conversion and Offering Plan of Distribution; Selling Agent and Underwriter Compensation for information regarding compensation to be received by Sandler O'Neill & Partners, L.P. in the subscription and community offerings and the compensation to be received by Sandler O'Neill & Partners, L.P. and the other broker-dealers that may participate in the syndicated or firm commitment underwritten offering. If all shares of common stock were sold in the syndicated or firm commitment underwritten offering, the selling agent and broker-dealers' commissions would be approximately \$15.5 million, \$18.3 million and \$21.0 million at the minimum, midpoint and maximum levels of the offering, respectively.

This investment involves a degree of risk, including the possible loss of principal.

Please read Risk Factors beginning on page 17.

SUMMARY

The following summary explains the significant aspects of the conversion, the offering and the exchange of existing shares of Northfield-Federal common stock for shares of Northfield-Delaware common stock. It may not contain all of the information that is important to you. Before making an investment decision, you should read this entire document carefully, including the consolidated financial statements and the notes to the consolidated financial statements, and the section entitled "Risk Factors."

Our Business

Our business operations are conducted through our wholly-owned subsidiary, Northfield Bank. Northfield Bank is a community bank that has served the banking needs of its customers since 1887. Northfield Bank conducts business primarily from its home office located in Staten Island, New York, its operations center located in Woodbridge, New Jersey, and its 28 branch offices located in the New York counties of Richmond (Staten Island) and Kings (Brooklyn) and the New Jersey counties of Union and Middlesex.

Northfield Bank's principal business consists of accepting deposits, primarily through its retail banking offices, and investing those funds in loans and securities. Northfield Bank offers a variety of deposit accounts with a range of interest rates and terms, and relies on its convenient locations, customer service, technological capabilities and competitive pricing and products to attract and retain deposits. To a lesser extent, Northfield Bank uses borrowed funds and brokered deposits as additional sources of funds. Northfield Bank's principal lending activity is originating multifamily and commercial real estate loans for retention in its portfolio. Northfield Bank also offers, to a lesser extent, construction and land loans, commercial and industrial loans, one- to four-family residential mortgage loans, and home equity loans and lines of credit. Northfield Bank's investment securities portfolio is comprised principally of mortgage-backed securities and corporate bonds. Northfield Bank is subject to comprehensive regulation and examination by the Office of the Comptroller of the Currency.

Northfield-Delaware's executive offices are located at 581 Main Street, Suite 810, Woodbridge, New Jersey 07095, and its telephone number at this address is (732) 499-7200. Our website address is www.eNorthfield.com. Information on this website is not and should not be considered a part of this prospectus.

Our Organizational Structure

Northfield Bank has been organized in the mutual holding company structure since 1995 and Northfield-Federal completed its initial public offering of shares in 2007. Northfield-Federal's parent mutual holding company is Northfield Bancorp, MHC, a federally chartered mutual holding company. Northfield-Federal is our federally chartered, publicly-traded mid-tier stock holding company and the parent holding company of Northfield Bank. At June 30, 2012, Northfield-Federal had consolidated assets of \$2.5 billion, deposits of \$1.5 billion and stockholders' equity of \$388.9 million. At June 30, 2012, Northfield-Federal had 40,206,678 shares of common stock outstanding, of which 15,564,994 shares, or 38.7%, were owned by the public (including 896,061 shares owned by Northfield Bank Foundation), and the remaining 24,641,684 shares were held by Northfield Bancorp, MHC.

Pursuant to the terms of the plan of conversion and reorganization, Northfield Bancorp, MHC is now converting from the mutual holding company corporate structure to the stock holding company corporate structure. As part of the conversion, we are offering for sale the majority ownership interest in Northfield-Federal that is currently held by Northfield Bancorp, MHC. The shares being offered in the offering will be issued by Northfield-Delaware. We are not contributing additional shares to the Northfield Bank Foundation in connection with the conversion and offering. Upon completion of the conversion, public stockholders of Northfield-Federal will receive shares of common stock of Northfield-Delaware in exchange for their shares of Northfield-Federal and Northfield Bancorp, MHC's shares will be cancelled, Northfield Bancorp, MHC and Northfield-Federal will cease to exist, and Northfield-Delaware will become the successor corporation to Northfield-Federal and the parent holding company for Northfield Bank.

Table of Contents

The following diagram shows our current organizational structure, reflecting ownership percentages as of June 30, 2012 and assuming the acquisition of Flatbush Federal Bancorp, Inc. (described below) had been completed as of that date:

After the conversion and offering are completed, we will be organized as a fully public holding company, as follows:

Table of Contents

Recent Acquisitions

On November 2, 2012, Northfield Bancorp, MHC, Northfield-Federal and Northfield Bank acquired Flatbush Federal Bancorp, MHC, Flatbush Federal Bancorp, Inc. and Flatbush Federal Savings & Loan Association, respectively. Flatbush Federal Bancorp, Inc. stockholders received 0.4748 of a share of Northfield-Federal stock for each share of Flatbush Federal Bancorp, Inc. common stock they owned, which at the date of announcement was valued at \$6.50 per share, subject to the terms and conditions of the merger agreement. At June 30, 2012, Flatbush Federal Bancorp, Inc. had 2,736,907 shares of common stock outstanding, and consolidated assets of \$143.3 million, deposits of \$117.5 million, stockholders' equity of \$18.8 million and a book value per share of \$6.88. As a result of the acquisition, we expect to record approximately \$800,000 of core deposit intangibles. As merger consideration, we issued approximately 1,299,483 shares of Northfield-Federal common stock, including 594,781 shares to stockholders other than Flatbush Federal Bancorp, MHC, and 704,702 shares to Northfield Bancorp, MHC, as the successor to Flatbush Federal Bancorp, MHC, with shares issued subject to adjustment for cash paid in lieu of fractional shares.

In October 2011, Northfield Bank assumed all of the deposits and acquired substantially all of the assets of First State Bank, a New Jersey chartered bank, from the Federal Deposit Insurance Corporation as receiver for First State Bank, pursuant to the terms of a Purchase and Assumption Agreement. The agreement did not contain any loss-share provisions with the Federal Deposit Insurance Corporation and the deposits were acquired at no premium while the asset discount was \$46.9 million, resulting in a cash payment from the Federal Deposit Insurance Corporation of approximately \$50.5 million. Northfield Bank acquired approximately \$194.6 million of assets at fair value, including \$91.9 million of loans, net of fair value adjustment of \$40.5 million. Northfield Bank also assumed deposit liabilities with a fair value of \$188.2 million. The assets purchased and liabilities assumed have been accounted for under the acquisition method of accounting. As the acquisition date fair value of the identifiable assets acquired exceeded the liabilities assumed, we recognized an after-tax bargain purchase gain of \$3.6 million.

Business Strategy

Our business strategies are summarized below:

Disciplined expansion through organic growth coupled with opportunistic acquisitions. Since we became a public company in 2007, we have successfully pursued a strategy of organic growth by continuing to leverage our existing franchise and expanding the franchise through de novo branching. Since 2007, we opened a branch in Staten Island to enhance an already significant presence, added two branches in New Jersey, and expanded into Brooklyn where we have opened four branches and expect to open one more in December 2012. While organic growth has been our primary focus, we also have selectively pursued acquisition opportunities in our market area that we believe will enhance our franchise and yield financial benefits for our stockholders. In October 2011, we acquired all the deposits and substantially all the assets of First State Bank from the Federal Deposit Insurance Corporation, and on November 2, 2012, we acquired Flatbush Federal Bancorp, Inc. The First State Bank transaction was immediately accretive to earnings and resulted in a \$3.6 million after-tax bargain purchase gain. The Flatbush Federal Bancorp acquisition also is expected to be accretive to earnings and tangible book value, and added three branches in Brooklyn with approximately \$88.4 million in loans and \$117.5 million in deposits at June 30, 2012.

Increased lending, with an emphasis on multifamily real estate loans. We increased our loan portfolio to \$1.07 billion at June 30, 2012 from \$424.2 million at December 31, 2007, and have rebalanced the mix of our earning assets away from securities and into loans as a percentage of our earning assets. Our loan portfolio accounted for 46.2% of our earning assets at June 30, 2012, compared to 33.3% at December 31, 2007. Our loan-to-deposit ratio has increased to 69.5% at June 30, 2012 from 48.4% in December 31, 2007. This growth in our loan portfolio has helped maintain our net interest margin and mitigated the impact of protracted low interest rates on our earnings. To achieve this growth, and in recognition of the current economic environment, we

Table of Contents

adjusted our lending focus to emphasize the origination of multifamily real estate loans. At June 30, 2012, our multifamily loan portfolio totaled \$538.3 million, or 50.3% of total loans, compared to \$14.2 million, or 3.3% of total loans, at December 31, 2007. We intend to continue to emphasize multifamily lending, and as economic conditions improve, we also anticipate increasing the origination of commercial real estate, commercial and home equity loans.

Enhanced core earnings through improved funding mix and continued emphasis on operational efficiencies. In addition to increasing our loans outstanding, we have made a concerted effort to improve our core funding profile by increasing lower-cost transaction deposit accounts and reducing time deposits and wholesale borrowings. Deposits increased 75.9% to \$1.54 billion at June 30, 2012 from \$877.2 million at December 31, 2007. Our ratio of non-time deposits to total deposits increased to 68.7% from 54.1% over the same period. We also recognize that controlling operating expenses is essential to our long term profitability. We intend to further capitalize on our technology capabilities to improve operating efficiencies and enhance customer service. Our efficiency ratio for the year ended December 31, 2011 was 53.6%, which compared favorably to the ratio of the SNL Thrift Index of 60.6% for the same period.

Improved asset quality and a reduction in problem assets. Maintaining strong asset quality has been, and will continue to be, a key element of our business strategy. Our ratio of non-performing assets to total assets decreased to 1.50% at June 30, 2012 from 2.72% at December 31, 2010, a level that compares favorably to the SNL Thrift Index ratio of 2.86% at June 30, 2012. At June 30, 2012, non-performing loans totaled \$34.8 million, or 3.24% of total loans, as compared to \$60.9 million, or 7.36% of total loans at December 31, 2010.

Stockholder-focused management of capital. We began paying regular quarterly dividends in the fourth quarter of 2008, and increased the dividend twice from our initial annual rate of \$0.16 to \$0.20 and then to \$0.24, respectively. These dividend increases were accomplished during a period when many depository institutions were reducing or eliminating their dividends. Our average dividend yield for the quarter ended March 31, 2012 was 1.7% compared to 1.2% for the SNL Thrift Index. Our board of directors decided to delay future dividend payments after our March 2012 dividend, because the Board of Governors of the Federal Reserve System, or Federal Reserve Board, currently requires Northfield Bancorp, MHC to obtain a member (depositor) vote before waiving its right to receive dividends from Northfield-Federal. However, following the completion of the conversion we intend to seek regulatory approval to pay a one-time, special dividend of \$0.25 per share to all stockholders, and also resume the payment of regular quarterly dividends.

See Management's Discussion and Analysis of Financial Condition and Results of Operations - Business Strategy for a more complete discussion of our business strategy.

Reasons for the Conversion and Offering

Our primary reasons for converting to the fully public stock form of ownership and undertaking the stock offering are to:

Eliminate the uncertainties associated with the mutual holding company structure under financial reform legislation. The Dodd-Frank Wall Street Reform and Consumer Protection Act, or Dodd-Frank Act, has changed our primary bank and holding company regulator, which has resulted in changes in regulations applicable to Northfield Bancorp, MHC and Northfield-Federal. Under the Dodd-Frank Act, the Federal Reserve Board became the federal regulator of all savings and loan holding companies and mutual holding companies, and the Federal Reserve Board historically has not allowed mutual holding companies to waive the receipt of dividends from their mid-tier holding company subsidiaries. Absent approval for Northfield Bancorp, MHC to waive

Table of Contents

dividends, any dividend declared on Northfield-Federal's common stock would have to be paid to Northfield Bancorp, MHC as well as our public stockholders, resulting in a tax liability for Northfield Bancorp, MHC and a decrease in the exchange ratio for our public stockholders upon conversion to stock form. The Federal Reserve Board currently requires a grandfathered mutual holding company, like Northfield Bancorp, MHC, to obtain member (depositor) approval and comply with other procedural requirements prior to waiving dividends, which would make dividend waivers impracticable. The conversion will eliminate our mutual holding company structure and will enable us to continue paying dividends to our stockholders, subject to the customary legal, regulatory and financial considerations applicable to all financial institutions. See Our Dividend Policy. It also will eliminate the risk that the Federal Reserve Board will amend existing regulations applicable to the conversion process in a manner disadvantageous to our public stockholders or depositors.

Transition us to a more familiar and flexible organizational structure. The stock holding company structure is a more familiar form of organization, which we believe will make our common stock more appealing to investors, and will give us greater flexibility to access the capital markets through possible future equity and debt offerings, although we have no current plans, agreements or understandings regarding any additional securities offerings.

Improve the liquidity of our shares of common stock. The larger number of shares that will be outstanding after completion of the conversion and offering is expected to result in a more liquid and active market for Northfield-Federal common stock. A more liquid and active market would make it easier for our stockholders to buy and sell our common stock and would give us greater flexibility in implementing capital management strategies.

Facilitate future mergers and acquisitions. Although we do not currently have any understandings or agreements regarding any specific acquisition transaction, the stock holding company structure will give us greater flexibility to structure, and make us a more attractive and competitive bidder for, mergers and acquisitions of other financial institutions, as opportunities arise. The additional capital raised in the offering also will enable us to consider larger transactions. In addition, although we intend to remain an independent financial institution, the stock holding company structure may make us a more attractive acquisition candidate for other institutions. Applicable regulations prohibit the acquisition of Northfield-Delaware for three years following completion of the conversion.

See The Conversion and Offering for a more complete discussion of our reasons for conducting the conversion and offering.

Terms of the Offering

We are offering between 31,025,000 and 41,975,000 shares of common stock to eligible depositors of Northfield Bank, the former First State Bank and the former Flatbush Federal Savings & Loan Association, to our tax-qualified employee benefit plans and, to the extent shares remain available, in a community offering to residents of the New Jersey Counties of Bergen, Essex, Hudson, Hunterdon, Middlesex, Monmouth, Morris, Ocean, Passaic, Somerset, Sussex and Union, the New York Counties of Bronx, Kings, Nassau, New York, Putnam, Queens, Richmond, Rockland, Suffolk and Westchester, and Pike County, Pennsylvania, and to our existing public stockholders and to the general public. If necessary, we will also offer shares to the general public in a syndicated or firm commitment underwritten offering. Unless the number of shares of common stock to be offered is increased to more than 41,975,000 shares or decreased to fewer than 31,025,000 shares, or the subscription and community offerings are extended beyond January 31, 2013, subscribers will not have the opportunity to change or cancel their stock orders once submitted. If the subscription and community offerings are extended past January 31, 2013, or if the number of shares to be sold is increased to more than 41,975,000 shares or decreased to less than 31,025,000 shares, all subscribers' stock orders will be canceled, their withdrawal authorizations will be canceled and funds delivered to us to purchase shares of common stock in the subscription and community offerings will be returned.

Table of Contents

promptly with interest at 0.20% per annum. We will then resolicit subscribers, giving them an opportunity to place new orders for a period of time. No shares purchased in the subscription offering and community offering will be issued until the completion of any syndicated or firm commitment underwritten offering.

The purchase price of each share of common stock offered for sale in the offering is \$10.00. All investors will pay the same purchase price per share, regardless of whether the shares are purchased in the subscription offering, the community offering or a syndicated or firm commitment underwritten offering. Investors will not be charged a commission to purchase shares of common stock in the offering. Sandler O'Neill & Partners, L.P., our marketing agent in the subscription and community offerings, will use its best efforts to assist us in selling shares of our common stock but is not obligated to purchase any shares of common stock being offered for sale in the subscription and community offerings.

How We Determined the Offering Range, the Exchange Ratio and the \$10.00 Per Share Stock Price

The amount of common stock we are offering for sale and the exchange ratio for the exchange of shares of Northfield-Delaware for shares of Northfield-Federal are based on an independent appraisal of the estimated market value of Northfield-Delaware, assuming the acquisition of Flatbush Federal Bancorp, Inc. and the offering are completed. RP Financial, L.C., our independent appraiser, has estimated that, as of October 12, 2012, and assuming that we had completed our acquisition of Flatbush Federal Bancorp, Inc. as of June 30, 2012, this market value was \$597.7 million. Based on federal regulations, this market value forms the midpoint of a valuation range with a minimum of \$508.1 million and a maximum of \$687.4 million. Based on this valuation range, the 61.1% pro forma ownership interest of Northfield Bancorp, MHC in Northfield-Federal as of June 30, 2012 (assuming completion of the Flatbush Federal Bancorp, Inc. acquisition at that date) being sold in the offering and the \$10.00 per share price, the number of shares of common stock being offered for sale by Northfield-Delaware ranges from 31,025,000 shares to 41,975,000 shares. The \$10.00 per share price was selected primarily because it is the price most commonly used in mutual-to-stock conversions of financial institutions. The exchange ratio ranges from 1.2240 shares at the minimum of the offering range to 1.6561 shares at the maximum of the offering range, and will preserve the existing percentage ownership of public stockholders of Northfield-Federal (excluding any new shares purchased by them in the stock offering and their receipt of cash in lieu of fractional shares).

The appraisal is based in part on Northfield-Federal's financial condition and results of operations (assuming completion of the Flatbush Federal Bancorp, Inc. acquisition as of June 30, 2012), the pro forma effect of the additional capital raised by the sale of shares of common stock in the offering, and an analysis of a peer group of ten publicly traded thrift holding companies that RP Financial, L.C. considers comparable to Northfield-Federal. The appraisal peer group consists of the following companies, all of which are traded on the Nasdaq Stock Market.

Company Name	Ticker Symbol	Headquarters	Total Assets (1) (in millions)
Cape Bancorp, Inc.	CBNJ	Cape May Courthouse, NJ	\$ 1,048
ESSA Bancorp, Inc.	ESSA	Stroudsburg, PA	\$ 1,113
Flushing Financial Corp.	FFIC	Lake Success, NY	\$ 4,436
Fox Chase Bancorp, Inc.	FXCB	Hatboro, PA	\$ 1,012
OceanFirst Financial Corp.	OCFC	Toms River, NJ	\$ 2,288
Oritani Financial Corp.	ORIT	Township of Washington, NJ	\$ 2,701
Provident NY Bancorp, Inc.	PBNY	Montebello, NY	\$ 3,150
Rockville Financial, Inc.	RCKB	Rockville, CT	\$ 1,928
United Financial Bancorp	UBNK	West Springfield, MA	\$ 1,654
Westfield Financial Inc.	WFD	Westfield, MA	\$ 1,319

(1) Asset size for all companies is as of June 30, 2012.

Table of Contents

The following table presents a summary of selected pricing ratios for Northfield-Delaware (on a pro forma basis) and for the peer group companies based on earnings and other information as of and for the twelve months ended June 30, 2012, and stock prices as of October 12, 2012, as reflected in the appraisal report. Compared to the average pricing of the peer group, our pro forma pricing ratios at the midpoint of the offering range indicated a discount of 18.9% on a price-to-book value basis, a discount of 22.3% on a price-to-tangible book value basis, and a premium of 154.7% on a price-to-earnings basis.

	Price-to-earnings multiple (1)	Price-to-book value ratio	Price-to-tangible book value ratio
Northfield-Delaware (on a pro forma basis, assuming completion of the conversion)			
Maximum	71.43x	88.65%	90.74%
Midpoint	62.50x	82.17%	84.25%
Minimum	50.00x	74.79%	76.86%
Valuation of peer group companies, all of which are fully converted (on an historical basis)			
Averages	24.54x	101.32%	108.41%
Medians	24.52x	103.70%	113.09%

(1) Price-to-earnings multiples calculated by RP Financial, L.C. in the independent appraisal are based on an estimate of core or recurring earnings on a trailing twelve-month basis through June 30, 2012. These ratios are different than those presented in Pro Forma Data. **The independent appraisal does not indicate trading market value. Do not assume or expect that our valuation as indicated in the appraisal means that after the conversion and offering the shares of our common stock will trade at or above the \$10.00 per share purchase price. Furthermore, the pricing ratios presented in the appraisal were utilized by RP Financial, L.C. to estimate our pro forma appraised value for regulatory purposes and not to compare the relative value of shares of our common stock with the value of the capital stock of the peer group. The value of the capital stock of a particular company may be affected by a number of factors such as financial performance, asset size and market location.**

For a more complete discussion of the amount of common stock we are offering for sale and the independent appraisal, see The Conversion and Offering Stock Pricing and Number of Shares to be Issued.

The Exchange of Existing Shares of Northfield-Federal Common Stock

If you are currently a stockholder of Northfield-Federal, your shares will be canceled at the completion of the conversion and will be exchanged for shares of common stock of Northfield-Delaware. The number of shares of common stock you receive will be based on the exchange ratio, which will depend upon our final appraised value and the percentage of outstanding shares of Northfield-Federal common stock owned by public stockholders immediately prior to the completion of the conversion. The following table shows how the exchange ratio will adjust, based on the appraised value of Northfield-Delaware as of October 12, 2012, assuming public stockholders of Northfield-Federal, including former stockholders of Flatbush Federal Bancorp, Inc., own 38.9% of Northfield-Federal common stock immediately prior to the completion of the conversion. The table also shows the number of shares of Northfield-Delaware common stock a hypothetical owner of Northfield-Federal common stock would receive in exchange for 100 shares of Northfield-Federal common stock owned at the completion of the conversion, depending on the number of shares of common stock issued in the offering.

Table of Contents

	Shares to be Sold in This Offering		Shares of Northfield-Delaware to be Issued for Shares of Northfield-Federal		Total Shares of Common Stock to be Issued in Exchange and Offering	Exchange Ratio	Equivalent Value of Shares Based Upon Offering Price (1)	Equivalent Pro Forma Tangible Book Value Per Exchanged Share (2)	Shares to be Received for 100 Existing Shares (3)
	Amount	Percent	Amount	Percent					
Minimum	31,025,000	61.1%	19,780,217	38.9%	50,805,217	1.2240	\$ 12.24	\$ 15.94	122
Midpoint	36,500,000	61.1	23,270,844	38.9	59,770,844	1.4400	14.40	17.09	144
Maximum	41,975,000	61.1	26,761,470	38.9	68,736,470	1.6561	16.56	18.25	165

- (1) Represents the value of shares of Northfield-Delaware common stock to be received in the conversion by a holder of one share of Northfield-Federal, pursuant to the exchange ratio, based upon the \$10.00 per share purchase price.
- (2) Represents the pro forma tangible book value per share at each level of the offering range multiplied by the respective exchange ratio.
- (3) Cash will be paid in lieu of fractional shares.

No fractional shares of Northfield-Delaware common stock will be issued to any public stockholder of Northfield-Federal. For each fractional share that otherwise would be issued, Northfield-Delaware will pay in cash an amount equal to the product obtained by multiplying the fractional share interest to which the holder otherwise would be entitled by the \$10.00 per share offering price.

Outstanding options to purchase shares of Northfield-Federal common stock also will convert into and become options to purchase shares of Northfield-Delaware common stock based upon the exchange ratio. The aggregate exercise price, duration and vesting schedule of these options will not be affected by the conversion. At June 30, 2012, there were 2,053,100 outstanding options to purchase shares of Northfield-Federal common stock, 1,240,040 of which have vested. Such outstanding options will be converted into options to purchase 2,512,994 shares of common stock at the minimum of the offering range and 3,400,139 shares of common stock at the maximum of the offering range. Because federal regulations prohibit us from repurchasing our common stock during the first year following the conversion unless compelling business reasons exist for such repurchases, we may use authorized but unissued shares to fund option exercises that occur during the first year following the conversion. If all existing options were exercised for authorized but unissued shares of common stock following the conversion, stockholders would experience ownership dilution of approximately 4.71%.

How We Intend to Use the Proceeds From the Offering

We intend to invest at least 50% of the net proceeds from the stock offering in Northfield Bank, loan funds to our employee stock ownership plan to fund its purchase of shares of common stock in the stock offering and retain the remainder of the net proceeds from the offering at Northfield-Delaware. Therefore, assuming we sell 36,500,000 shares of common stock in the stock offering, and we have net proceeds of \$347.2 million, we intend to invest \$173.6 million in Northfield Bank, loan \$14.6 million to our employee stock ownership plan to fund its purchase of shares of common stock and retain the remaining \$159.0 million of the net proceeds at Northfield-Delaware.

Northfield-Delaware may use the funds it retains to acquire other financial institutions, for investments, to pay cash dividends, to repurchase shares of common stock and for other general corporate purposes. Northfield Bank may use the proceeds it receives to acquire other financial institutions, to expand its branch network and to support increased lending and other products and services.

Please see the section of this prospectus entitled "How We Intend to Use the Proceeds from the Offering" for more information on the proposed use of the proceeds from the offering.

Table of Contents

Persons Who May Order Shares of Common Stock in the Offering

We are offering the shares of common stock in a subscription offering in the following descending order of priority:

- (i) To depositors with accounts at Northfield Bank, the former First State Bank or Flatbush Federal Savings & Loan Association, with aggregate balances of at least \$50 at the close of business on March 31, 2011.
- (ii) To our tax-qualified employee benefit plans (including Northfield Bank's employee stock ownership plan and 401(k) plan), which will receive, without payment therefor, nontransferable subscription rights to purchase in the aggregate up to 10% of the shares of common stock sold in the offering. We expect our employee stock ownership plan to purchase 4% of the shares of common stock sold in the stock offering, although we reserve the right to have the employee stock ownership plan purchase more than 4% of the shares sold in the offering to the extent necessary to complete the offering at the minimum of the offering range.
- (iii) To depositors with accounts at Northfield Bank or the former Flatbush Federal Savings & Loan Association with aggregate balances of at least \$50 at the close of business on September 30, 2012.
- (iv) To depositors of Northfield Bank at the close of business on November 6, 2012.

Shares of common stock not purchased in the subscription offering will be offered for sale to the general public in a community offering, with a preference given first to natural persons (including trusts of natural persons) residing in the New Jersey Counties of Bergen, Essex, Hudson, Hunterdon, Middlesex, Monmouth, Morris, Ocean, Passaic, Somerset, Sussex and Union, the New York Counties of Bronx, Kings, Nassau, New York, Putnam, Queens, Richmond, Rockland, Suffolk and Westchester, and Pike County, Pennsylvania. To the extent shares of common stock remain available, we will also offer the shares to Northfield-Federal's public stockholders as of November 8, 2012. The community offering is expected to begin concurrently with the subscription offering. We also may offer for sale shares of common stock not purchased in the subscription offering or the community offering through a syndicated or firm commitment underwritten offering. Sandler O'Neill & Partners, L.P., Jefferies & Company, Inc. and Stifel, Nicolaus & Company, Incorporated will act as joint book-running managers for the syndicated or firm commitment underwritten offering. We have the right to accept or reject, in our sole discretion, orders received in the community offering or syndicated or firm commitment underwritten offering. Any determination to accept or reject stock orders in the community offering or syndicated or firm commitment underwritten offering will be based on the facts and circumstances available to management at the time of the determination.

If we receive orders for more shares than we are offering, we may not be able to fully or partially fill your order. Shares will be allocated first to categories in the subscription offering. A detailed description of the subscription offering, the community offering and the syndicated or firm commitment underwritten offering, as well as a discussion regarding allocation procedures, can be found in the section of this prospectus entitled "The Conversion and Offering."

Limits on How Much Common Stock You May Purchase

The minimum number of shares of common stock that may be purchased is 25.

Generally, no individual may purchase more than 300,000 shares (\$3.0 million) of common stock. If any of the following persons purchase shares of common stock, their purchases, in all categories of the offering, when combined with your purchases, cannot exceed 300,000 shares (\$3.0 million) of common stock:

your spouse or relatives of you or your spouse living in your house;

Table of Contents

most companies, trusts or other entities in which you are a trustee, have a substantial beneficial interest or hold a senior position; or

other persons who may be your associates or persons acting in concert with you.

Unless we determine otherwise, persons having the same address and persons exercising subscription rights through qualifying deposit accounts registered to the same address will be subject to the overall purchase limitation of 300,000 shares (\$3.0 million).

In addition to the above purchase limitations, there is an ownership limitation for current stockholders of Northfield-Federal other than our employee stock ownership plan. Shares of common stock that you purchase in the offering individually and together with persons described above, *plus* any shares you and they receive in exchange for existing shares of Northfield-Federal common stock, may not exceed 5% of the total shares of common stock to be issued and outstanding after the completion of the conversion. However, if, based on your current ownership level, you will own more than 5% of the total shares of common stock to be issued and outstanding after the completion of the conversion following the exchange of your shares of Northfield-Federal common stock, you will not need to divest any of your shares.

Subject to regulatory approval, we may increase or decrease the purchase and ownership limitations at any time. See the detailed description of the purchase limitations in [The Conversion and Offering](#) [Additional Limitations on Common Stock Purchases](#).

How You May Purchase Shares of Common Stock in the Subscription Offering and the Community Offering

In the subscription offering and community offering, you may pay for your shares only by:

(i) personal check, bank check or money order made payable directly to Northfield Bancorp, Inc.; or

(ii) authorizing us to withdraw available funds from the types of Northfield Bank deposit accounts designated on the stock order form. Northfield Bank is not permitted to lend funds to anyone for the purpose of purchasing shares of common stock in the offering. Additionally, you may not use a Northfield Bank line of credit check or any type of third party check to pay for shares of common stock. Please do not submit cash or wire transfers. You may not designate withdrawal from Northfield Bank's accounts with check-writing privileges; instead, please submit a check. You may not authorize direct withdrawal from a Northfield Bank retirement account. See [Using Individual Retirement Account Funds to Purchase Shares of Common Stock](#).

You may subscribe for shares of common stock in the subscription and community offerings by delivering a signed and completed original stock order form, together with full payment payable to Northfield Bancorp, Inc. or authorization to withdraw funds from one or more of your Northfield Bank deposit accounts, provided that the stock order form is *received* before 4:00 p.m., Eastern Time, on December 17, 2012, which is the end of the subscription offering period. You may submit your stock order form and payment by mail using the stock order reply envelope provided, or by overnight delivery to our Stock Information Center at the address noted below. You may hand-deliver stock order forms to the Stock Information Center, which will be located at Northfield Bank's Woodbridge operations center, 581 Main Street, Eighth Floor, Woodbridge, New Jersey. Hand-delivered stock order forms will only be accepted at this location. We will not accept stock order forms at our banking offices. **Please do not mail stock order forms to Northfield Bank's offices.**

Please see [The Conversion and Offering](#) [Procedure for Purchasing Shares in Subscription and Community Offerings](#) [Payment for Shares](#) for a complete description of how to purchase shares in the subscription and community offerings.

Table of Contents

Using Individual Retirement Account Funds to Purchase Shares of Common Stock

You may be able to subscribe for shares of common stock using funds in your individual retirement account, or IRA. If you wish to use some or all of the funds in your Northfield Bank individual retirement account, the applicable funds must be transferred to a self-directed account maintained by an independent trustee, such as a brokerage firm, and the purchase must be made through that account. If you do not have such an account, you will need to establish one before placing your stock order. An annual administrative fee may be payable to the independent trustee. Because individual circumstances differ and the processing of retirement fund orders takes additional time, we recommend that you contact our Stock Information Center promptly, preferably at least two weeks before the December 17, 2012 offering deadline, for assistance with purchases using your individual retirement account or other retirement account you may have at Northfield Bank *or elsewhere*. Whether you may use such funds for the purchase of shares in the stock offering may depend on timing constraints and, possibly, limitations imposed by the institution where the funds are held.

See [The Conversion and Offering Procedure for Purchasing Shares in Subscription and Community Offerings](#), [Payment for Shares](#) and [Using Individual Retirement Account Funds](#) for a complete description of how to use IRA funds to purchase shares in the stock offering.

Market for Common Stock

Existing publicly held shares of Northfield-Federal's common stock are listed on the Nasdaq Global Select Market under the symbol NFBK. Upon completion of the conversion, the shares of common stock of Northfield-Delaware will replace the existing shares, and we expect the shares of Northfield-Delaware common stock will also trade on the Nasdaq Global Select Market under the symbol NFBK. In order to list our stock on the Nasdaq Global Select Market, we are required to have at least three broker-dealers who will make a market in our common stock. As of November 8, 2012, Northfield-Federal had approximately 24 registered market makers in its common stock. Sandler O'Neill & Partners, L.P., Jefferies & Company, Inc. and Stifel, Nicolaus & Company, Incorporated have advised us that they intend to make a market in our common stock following the offering, but are under no obligation to do so.

Our Dividend Policy

After the completion of the conversion, we intend to pay cash dividends on a quarterly basis. Initially, we expect the quarterly dividends to be \$0.06 per share, which equals \$0.24 per share on an annualized basis and an annual yield of 2.4% based on a price of \$10.00 per share.

We also intend to seek regulatory approval to pay a one-time, special dividend of \$0.25 per share to all Northfield-Delaware stockholders. We cannot assure you that we will obtain such approval or when such approval may be obtained.

The dividend rate and the continued payment of dividends will depend on a number of factors, including our capital requirements, our financial condition and results of operations, tax considerations, statutory and regulatory limitations, and general economic conditions. We cannot assure you that we will pay dividends in the future, or that any such dividends will not be reduced or eliminated.

For information regarding our historical dividend payments, see [Selected Consolidated Financial and Other Data](#) and [Market for the Common Stock](#). For information regarding our current and proposed dividend policy, see [Our Dividend Policy](#).

Purchases by Officers and Directors

We expect our directors and executive officers, together with their associates, to subscribe for 196,000 shares of common stock in the offering, representing 0.6% of shares to be sold at the minimum of the offering range. The purchase price paid by them will be the same \$10.00 per share price paid by all other persons who purchase

Table of Contents

shares of common stock in the offering. Following the conversion, our directors and executive officers, together with their associates, are expected to beneficially own 2,542,571 shares of common stock, or 5.0% of our total outstanding shares of common stock at the minimum of the offering range, which includes shares they currently own that will be exchanged for new shares of Northfield-Delaware.

See [Subscriptions by Directors and Executive Officers](#) for more information on the proposed purchases of shares of common stock by our directors and executive officers.

Deadline for Orders of Shares of Common Stock in the Subscription and Community Offerings

The deadline for purchasing shares of common stock in the subscription and community offerings is 4:00 p.m., Eastern Time, on December 17, 2012, unless we extend this deadline. If you wish to purchase shares of common stock, a properly completed and signed original stock order form, together with full payment, must be received (not postmarked) by this time.

Although we will make reasonable attempts to provide this prospectus and offering materials to holders of subscription rights, the subscription offering and all subscription rights will expire at 4:00 p.m., Eastern Time, on December 17, 2012, whether or not we have been able to locate each person entitled to subscription rights.

See [The Conversion and Offering Procedure for Purchasing Shares in Subscription and Community Offerings](#) [Expiration Date](#) for a complete description of the deadline for purchasing shares in the stock offering.

You May Not Sell or Transfer Your Subscription Rights

Federal regulations prohibit you from transferring your subscription rights. If you order shares of common stock in the subscription offering, you will be required to certify that you are purchasing the common stock for yourself and that you have no agreement or understanding to sell or transfer your subscription rights. We intend to take legal action, including reporting persons to federal agencies, against anyone who we believe has sold or transferred his or her subscription rights. We will not accept your order if we have reason to believe you have sold or transferred your subscription rights. On the order form, you may not add the names of others for joint stock registration who do not have subscription rights or who qualify only in a lower subscription offering priority than you do. You may add only those who were eligible to purchase shares of common stock in the subscription offering at your date of eligibility. In addition, the stock order form requires that you list all deposit accounts, giving all names on each account and the account number at the applicable eligibility date. Failure to provide this information, or providing incomplete or incorrect information, may result in a loss of part or all of your share allocation if there is an oversubscription.

Delivery of Stock Certificates

Certificates representing shares of common stock sold in the subscription offering and community offering will be mailed to the certificate registration address noted by purchasers on the stock order form. Stock certificates will be sent to purchasers by first-class mail as soon as practicable after the completion of the conversion and offering. We expect trading in the stock to begin on the day of completion of the conversion and offering or the next business day. The conversion and offering are expected to be completed as soon as practicable following satisfaction of the conditions described below in [Conditions to Completion of the Conversion](#). **It is possible that until certificates for the common stock are delivered to purchasers, purchasers might not be able to sell the shares of common stock that they ordered, even though the common stock will have begun trading.** Your ability to sell the shares of common stock before receiving your stock certificate will depend on arrangements you may make with a brokerage firm.

Table of Contents

Conditions to Completion of the Conversion

We cannot complete the conversion and offering unless:

The plan of conversion and reorganization is approved by at least *a majority of votes eligible to be cast* by members of Northfield Bancorp, MHC (depositors of Northfield Bank) as of November 6, 2012;

The plan of conversion and reorganization is approved by Northfield-Federal stockholders holding at least *two-thirds of the outstanding shares* of common stock of Northfield-Federal as of November 8, 2012, including shares held by Northfield Bancorp, MHC;

The plan of conversion and reorganization is approved by Northfield-Federal stockholders holding at least *a majority of the outstanding shares* of common stock of Northfield-Federal as of November 8, 2012, excluding those shares held by Northfield Bancorp, MHC;

We sell at least the minimum number of shares of common stock offered in the offering; and

We receive the final approval of the Board of Governors of the Federal Reserve System to complete the conversion and offering. Northfield Bancorp, MHC intends to vote its shares in favor of the plan of conversion and reorganization. At November 8, 2012, Northfield Bancorp, MHC owned 61.1% of the outstanding shares of common stock of Northfield-Federal. The directors and executive officers of Northfield-Federal and their affiliates owned 1,012,458 shares of Northfield-Federal (excluding exercisable options), or 2.4% of the outstanding shares of common stock and 6.3% of the outstanding shares of common stock excluding shares held by Northfield Bancorp, MHC. They intend to vote those shares in favor of the plan of conversion and reorganization.

Steps We May Take if We Do Not Receive Orders for the Minimum Number of Shares

If we do not receive orders for at least 31,025,000 shares of common stock, we may take several steps in order to issue the minimum number of shares of common stock in the offering range. Specifically, we may:

- (i) increase the purchase and ownership limitations; and/or
- (ii) seek regulatory approval to extend the offering beyond January 31, 2013, so long as we resolicit subscriptions that we have previously received in the offering; and/or
- (iii) increase the shares purchased by the employee stock ownership plan.

If one or more purchase limitations are increased, subscribers in the subscription offering who ordered the maximum amount will be, and, in our sole discretion, some other large purchasers may be, given the opportunity to increase their subscriptions up to the then-applicable limit.

Possible Change in the Offering Range

RP Financial, LC. will update its appraisal before we complete the offering. If our pro forma market value at that time is either below \$508.1 million or above \$687.4 million, then, after consulting with the Board of Governors of the Federal Reserve System, we may:

terminate the stock offering and promptly return all funds (with interest paid on funds received in the subscription and community offerings);

Table of Contents

set a new offering range; or

take such other actions as may be permitted by the Federal Reserve Board and the Securities and Exchange Commission. If we set a new offering range, we will promptly return funds, with interest at 0.20% per annum for funds received for purchases in the subscription and community offerings, and cancel any authorization to withdraw funds from deposit accounts for the purchase of shares of common stock. We will resolicit subscribers, allowing them to place a new stock order for a period of time.

Possible Termination of the Offering

We may terminate the offering at any time prior to the special meeting of members of Northfield Bancorp, MHC that has been called to vote on the conversion, and at any time after member approval with the approval of the Federal Reserve Board. If we terminate the offering, we will promptly return your funds with interest at 0.20% per annum and we will cancel deposit account withdrawal authorizations.

Benefits to Management and Potential Dilution to Stockholders Resulting from the Conversion

We expect our employee stock ownership plan, which is a tax-qualified retirement plan for the benefit of all of our employees, to purchase up to 4% of the shares of common stock we sell in the offering. These shares, when combined with shares owned by our existing employee stock ownership plan, will be less than 8% of the shares outstanding following the conversion. If we receive orders in the subscription offering for more shares of common stock than the maximum of the offering range, the employee stock ownership plan's subscription order will not be filled and the employee stock ownership plan may, with prior Federal Reserve Board approval, purchase shares in the open market following completion of the conversion.

Federal regulations permit us to implement one or more new stock-based benefit plans no earlier than six months after completion of the conversion. Our current intention is to implement one or more new stock-based benefit plans, but we have not determined whether we would adopt the plans within 12 months following the completion of the conversion or more than 12 months following the completion of the conversion. Stockholder approval of these plans would be required. If we implement stock-based benefit plans within 12 months following the completion of the conversion, the stock-based benefit plans would reserve a number of shares (i) up to 4% of the shares of common stock sold in the offering (reduced by amounts purchased in excess of 4% of the shares of common stock sold in the stock offering by our 401(k) plan using its purchase priority in the stock offering) for awards of restricted stock to key employees and directors, at no cost to the recipients, and (ii) up to 10% of the shares of common stock sold in the offering for issuance pursuant to the exercise of stock options by key employees and directors. The total number of shares available under the stock-based benefit plans is subject to adjustment as may be required by federal regulations or policy to reflect shares of common stock or stock options previously granted by Northfield-Federal or Northfield Bank. For stock-based benefit plans adopted within 12 months following the completion of the conversion, current regulatory policy would require that the total number of shares of restricted stock and the total number of shares available for the exercise of stock options not exceed 4% and 10%, respectively, of our total outstanding shares following the conversion. If the stock-based benefit plan is adopted more than 12 months after the completion of the conversion, it would not be subject to the percentage limitations set forth above. We have not yet determined the number of shares that would be reserved for issuance under these plans. For a description of our current stock-based benefit plan, see Management Compensation Discussion and Analysis Equity Awards.

The following table summarizes the number of shares of common stock and the aggregate dollar value of grants that are available under one or more stock-based benefit plans if such plans reserve a number of shares of common stock equal to 4% and 10% of the shares sold in the stock offering for restricted stock awards and stock options, respectively. The table shows the dilution to stockholders if all such shares are issued from authorized but unissued shares, instead of shares purchased in the open market. A portion of the stock grants shown in the table

Table of Contents

below may be made to non-management employees or consultants. The table also sets forth the number of shares of common stock to be acquired by the employee stock ownership plan for allocation to all qualifying employees.

	Number of Shares to be Granted or Purchased			Dilution Resulting From Issuance of Shares for Stock-Based Benefit Plans	Value of Grants (In Thousands) (1)	
	At Minimum of Offering Range	At Maximum of Offering Range	As a Percentage of Common Stock to be Sold in the Offering		At Minimum of Offering Range	At Maximum of Offering Range
Employee stock ownership plan	1,241,000	1,679,000	4.0%	N/A(2)	\$ 12,410	\$ 16,790
Restricted stock awards	1,241,000	1,679,000	4.0	2.38%	12,410	16,790
Stock options	3,102,500	4,197,500	10.0	5.76%	5,553	7,514
Total	5,584,500	7,555,500	18.0%	7.88%	\$ 30,373	\$ 41,094

(1) The actual value of restricted stock awards will be determined based on their fair value as of the date grants are made. For purposes of this table, fair value for stock awards is assumed to be the same as the offering price of \$10.00 per share. The fair value of stock options has been estimated at \$1.79 per option using the Black-Scholes option pricing model with the following assumptions: a grant-date share price and option exercise price of \$10.00; an expected option term of 10 years; a dividend yield of 2.4%; a risk-free rate of return of 1.67%; and expected volatility of 20.4%. The actual value of option grants will be determined by the grant-date fair value of the options, which will depend on a number of factors, including the valuation assumptions used in the option pricing model ultimately adopted.

(2) No dilution is reflected for the employee stock ownership plan because such shares are assumed to be purchased in the stock offering. We may fund our stock-based benefit plans through open market purchases, as opposed to new issuances of stock; however, if any options previously granted under our existing 2008 Equity Incentive Plan are exercised during the first year following completion of the offering, they will be funded with newly issued shares as federal regulations do not permit us to repurchase our shares during the first year following the completion of the offering except to fund the grants of restricted stock under our existing stock-based benefit plan or under extraordinary circumstances.

The following table presents information as of June 30, 2012 regarding our employee stock ownership plan, our 2008 Equity Incentive Plan and our proposed stock-based benefit plan. The table below assumes that 68,736,470 shares are outstanding after the offering, which includes the sale of 41,975,000 shares in the offering at the maximum of the offering range and the issuance of new shares in exchange for shares of Northfield-Federal using an exchange ratio of 1.6561. It also assumes that the value of the stock is \$10.00 per share.

Existing and New Stock Benefit Plans	Participants	Shares at Maximum of Offering Range	Estimated Value of Shares	Percentage of Shares Outstanding After the Conversion
Employee Stock Ownership Plan:	Officers and Employees			
Shares purchased in 2007 offering (1)		2,908,574(2)	\$ 29,085,740	4.23%
Shares to be purchased in this offering		1,679,000	16,790,000	2.44
Total employee stock ownership plan shares		4,587,574	\$ 45,875,740	6.67%
Restricted Stock Awards:	Directors, Officers and Employees			

Edgar Filing: Northfield Bancorp, Inc. - Form 424B3

2008 Equity Incentive Plan (1)	1,392,863(3)	\$ 13,928,630(4)	2.03%
New shares of restricted stock	1,679,000	16,790,000(4)	2.44
Total shares of restricted stock	3,071,863	\$ 30,718,630	4.47%(5)
Stock Options:	Directors, Officers and Employees		
2008 Equity Incentive Plan (1)	3,493,377(6)	\$ 6,253,145	5.08%
New stock options	4,197,500	7,513,525(7)	6.11
Total stock options	7,690,877	\$ 13,766,670	11.19%(5)
Total of stock benefit plans	15,350,314	\$ 90,361,040	22.33%

(footnotes begin on following page)

Table of Contents

- (1) The number of shares indicated has been adjusted for the 1.6561 exchange ratio at the maximum of the offering range.
- (2) As of June 30, 2012, 495,623 of these shares, or 299,271 shares prior to adjustment for the exchange, have been allocated.
- (3) As of June 30, 2012, 1,392,863 of these shares, or 841,050 shares prior to adjustment for the exchange, have been awarded, and 833,631 of these shares, or 503,370 shares prior to adjustment for the exchange, have vested.
- (4) The value of restricted stock awards is determined based on their fair value as of the date grants are made. For purposes of this table, the fair value of awards under the new stock-based benefit plan is assumed to be the same as the offering price of \$10.00 per share.
- (5) The number of shares of restricted stock and shares reserved for stock options set forth in the table would exceed regulatory limits if a stock-based benefit plan were adopted within one year of the completion of the conversion. Accordingly, the number of new shares of restricted stock and shares reserved for stock options set forth in the table would have to be reduced such that the aggregate amount of stock awards and shares reserved for stock options would be 4% or less and 10% or less, respectively, of our outstanding shares, unless we obtain a waiver from the Board of Governors of the Federal Reserve System, or we implement the incentive plan more than 12 months after completion of the conversion. We have not determined whether we will implement a new stock-based benefit plan earlier than 12 months after completion of the conversion or more than 12 months after the completion of the conversion.
- (6) As of June 30, 2012, options to purchase 3,493,377 of these shares, or 2,109,400 shares prior to adjustment for the exchange, have been awarded, and options to purchase 2,053,630 of these shares, or 1,240,040 shares prior to adjustment for the exchange, have vested.
- (7) The weighted-average fair value of stock options to be granted has been estimated at \$1.79 per option, using the Black-Scholes option pricing model. The fair value of stock options uses the Black-Scholes option pricing model with the following assumptions: exercise price, \$10.00; trading price on date of grant, \$10.00; dividend yield, 2.4%; expected term, 10 years; expected volatility, 20.4%; and risk-free rate of return, 1.67%. The actual value of option grants will be determined by the grant-date fair value of the options, which will depend on a number of factors, including the valuation assumptions used in the option pricing model ultimately adopted.

Tax Consequences

Northfield Bancorp, MHC, Northfield-Federal, Northfield Bank and Northfield-Delaware have received an opinion of counsel, Luse Gorman Pomerenk & Schick, P.C., regarding the material federal income tax consequences of the conversion, and have received opinions of Crowe Horwath LLP regarding the material New York and New Jersey state tax consequences of the conversion. As a general matter, the conversion will not be a taxable transaction for purposes of federal or state income taxes to Northfield Bancorp, MHC, Northfield-Federal (except for cash paid for fractional shares), Northfield Bank, Northfield-Delaware, persons eligible to subscribe in the subscription offering, or existing stockholders of Northfield-Federal. Existing stockholders of Northfield-Federal who receive cash in lieu of fractional shares of Northfield-Delaware will recognize a gain or loss equal to the difference between the cash received and the tax basis of the fractional share.

How You Can Obtain Additional Information Stock Information Center

Our banking personnel may not, by law, assist with investment-related questions about the offering. If you have any questions regarding the conversion or offering, please call our Stock Information Center. The toll-free telephone number is (877) 651-9234. The Stock Information Center is open Monday through Friday between 10:00 a.m. and 4:00 p.m., Eastern Time. The Stock Information Center will be closed on weekends and bank holidays.

Table of Contents

RISK FACTORS

You should consider carefully the following risk factors in evaluating an investment in the shares of common stock.

Risks Related to Our Business

Our concentration in multifamily loans and commercial real estate loans could expose us to increased lending risks and related loan losses.

Our current business strategy is to continue to emphasize multifamily loans and to a lesser extent commercial real estate loans. At June 30, 2012, \$849.5 million, or 85.7% of our originated total loan portfolio held-for-investment, consisted of multifamily and commercial real estate loans. In addition, in October 2011, we acquired \$41.9 million of commercial real estate purchased-credit impaired loans with an estimated fair value of \$33.4 million at the acquisition date.

These types of loans generally expose a lender to greater risk of non-payment and loss than one- to four-family residential mortgage loans because repayment of the loans often depends on the successful operation of the properties and the income stream of the borrowers. Such loans typically involve larger loan balances to single borrowers or groups of related borrowers compared to one- to four-family residential mortgage loans. Also, many of our borrowers have more than one of these types of loans outstanding. Consequently, an adverse development with respect to one loan or one credit relationship can expose us to a significantly greater risk of loss compared to an adverse development with respect to a one-to four-family residential real estate loan.

In addition, if loans that are collateralized by real estate become troubled and the value of the real estate has been significantly impaired, then we may not be able to recover the full contractual amount of principal and interest that we anticipated at the time we originated the loan, which could cause us to increase our provision for loan losses and adversely affect our operating results and financial condition.

A significant portion of our loan portfolio is unseasoned. It is difficult to judge the future performance of unseasoned loans.

Our net loan portfolio has grown to \$1.05 billion at June 30, 2012, from \$418.7 million at December 31, 2007. A large portion of this increase is due to increases in multifamily real estate loans. It is difficult to assess the future performance of these recently originated loans because our relatively limited experience in multifamily lending does not provide us with a significant payment history from which to judge future collectability, especially in the current weak economic environment. These loans may experience higher delinquency or charge-off levels than our historical loan portfolio experience, which could adversely affect our future performance.

If our allowance for loan losses is not sufficient to cover actual loan losses, our earnings and capital could decrease.

We make various assumptions and judgments about the collectability of our loan portfolio, including the creditworthiness of our borrowers and the value of the real estate and other assets serving as collateral for the repayment of many of our loans. In determining the amount of the allowance for loan losses, we review our loans and our loss and delinquency experience, as well as the experience of other similarly situated institutions, and we evaluate other factors including, among other things, current economic conditions. If our assumptions are incorrect, or if delinquencies do not continue to improve or non-accrual and non-performing loans increase, our allowance for loan losses may not be sufficient to cover losses inherent in our loan portfolio, which would require additions to our allowance. Material additions to our allowance would materially decrease our net income.

In addition, bank regulators periodically review our allowance for loan losses and, based on information available to them at the time of their review, may require us to increase our allowance for loan losses or recognize

Table of Contents

further loan charge-offs. An increase in our allowance for loan losses or loan charge-offs as required by these regulatory authorities may have a material adverse effect on our financial condition and results of operations.

Because most of our borrowers are located in the New York metropolitan area, a prolonged downturn in the local economy, or a decline in local real estate values, could cause an increase in nonperforming loans or a decrease in loan demand, which would reduce our profits.

Substantially all of our loans are secured by real estate located in our primary market areas. Continued weakness in our local economy and our local real estate markets could adversely affect the ability of our borrowers to repay their loans and the value of the collateral securing our loans, which could adversely affect our results of operations. Real estate values are affected by various factors, including supply and demand, changes in general or regional economic conditions, interest rates, governmental rules or policies, natural disasters, and the threat of terrorist attacks. Continued weakness in economic conditions also could result in reduced loan demand and a decline in loan originations. In particular, a significant decline in real estate values would likely lead to a decrease in new multifamily, commercial real estate, and home equity loan originations and increased delinquencies and defaults in our real estate loan portfolio.

Hurricane Sandy could adversely affect our asset quality and earnings.

Our primary market areas of Staten Island and Brooklyn, New York and Union and Middlesex Counties in New Jersey were significantly affected by Hurricane Sandy, which struck the region on October 29, 2012. The storm caused significant damage throughout our market area, including widespread disruptions in power and transportation. Many properties and structures also have incurred flood and wind damage, which ranges from minor to moderate in many areas to very severe in coastal areas, which may adversely affect the value of certain collateral securing our loans, and, potentially, our borrowers' ability to repay their obligations to us. In addition, flood and property insurance may not be sufficient to fully cover our exposure to losses, and our borrowers may experience delays in receiving proceeds from insurance claims. We are in the process of performing a detailed evaluation of the effects that Hurricane Sandy may have had on our borrowers and our collateral, but we do not yet have enough information to reasonably estimate the potential financial impact of the storm on us. However, it is likely that our results of operations will be negatively impacted, and it is possible that the impact could be material. For example, it is likely that we will experience increased delinquencies and loan restructurings, particularly in the short term, as customers undertake recovery and clean-up efforts, including the submission of insurance claims. Customers may also experience disruptions in their employment status or income if their employers were affected by the storm. These increases in delinquencies and restructurings would negatively affect our cash flows and, if not timely cured, would increase our non-performing assets and reduce our net interest income. Loan restructurings may also increase as we work with borrowers impacted by the storm. We may also experience increased provisions for loan losses as total loan delinquencies and loan restructurings increase, and to the extent that the combination of insurance proceeds and collateral values are insufficient to cover loan balances on loans that may default.

Strong competition within our market areas may limit our growth and profitability.

Competition in the banking and financial services industry is intense. In our market areas, we compete with commercial banks, savings institutions, mortgage brokerage firms, credit unions, finance companies, mutual funds, money market funds, insurance companies, and brokerage and investment banking firms operating locally and elsewhere. Some of our competitors have greater name recognition and market presence and offer certain services that we do not or cannot provide, all of which benefit them in attracting business. In addition, larger competitors may be able to price loans and deposits more aggressively than we do.

For additional information, see [Business of Northfield-Federal and Northfield Bank Market Area and Competition](#).

Table of Contents

We have been negatively affected by current market and economic conditions. A continuation or worsening of these conditions could adversely affect our operations, financial condition, and earnings.

The severe economic recession of 2008 and 2009 and the weak economic recovery since then have resulted in continued uncertainty in the financial markets and the expectation of weak general economic conditions, including high levels of unemployment. The resulting economic pressure on consumers and businesses has adversely affected our business, financial condition, and results of operations. The credit quality of loan and investment securities portfolios has deteriorated at many financial institutions and the values of real estate collateral supporting many commercial loans and home mortgages have declined and may continue to decline. Some of our commercial and multifamily real estate loan customers have experienced increases in vacancy rates and declines in rental rates for both multifamily and commercial properties. Financial companies' stock prices have been negatively affected, as has the ability of banks and bank holding companies to raise capital or borrow in the debt markets. A continuation or worsening of these conditions could result in reduced loan demand and further increases in loan delinquencies, loan losses, loan loss provisions, costs associated with monitoring delinquent loans and disposing of foreclosed property, and otherwise negatively affect our operations, financial condition, and earnings.

There are potential risks stemming from the loans we acquired in our Federal Deposit Insurance Corporation-assisted transaction.

The credit risk associated with the loans and other real estate owned we acquired in our Federal Deposit Insurance Corporation-assisted acquisition of First State Bank in October 2011 were substantially mitigated by the discount we received from the Federal Deposit Insurance Corporation; however, these assets are not without risk of loss. Although these acquired assets were initially accounted for at fair value, which reflects an estimate of expected credit losses related to these assets, we did not purchase the assets with loss share from the Federal Deposit Insurance Corporation. To the extent future cash flows are less than those estimated at time of acquisition, we will recognize impairment losses on the underlying loan pools. Fluctuations in national, regional and local economic conditions and other factors may increase the level of charge-offs on the loans we acquired in this transaction and correspondingly reduce our net income.

We could record future losses on our securities portfolio.

During the years ended December 31, 2011 and 2010, we recognized total other-than-temporary impairment on our securities portfolio of \$1.2 million and \$962,000, respectively, of which \$409,000 and \$154,000, respectively, were considered to be credit-related and, therefore, recorded as a loss through a reduction of non-interest income. A number of factors or combinations of factors could require us to conclude, in one or more future reporting periods, that an unrealized loss that exists with respect to our securities portfolio constitutes additional impairment that is other than temporary, which could result in material losses to us. These factors include, but are not limited to, a continued failure by an issuer to make scheduled interest payments, an increase in the severity of the unrealized loss on a particular security, an increase in the continuous duration of the unrealized loss without an improvement in value or changes in market conditions and/or industry or issuer specific factors that would render us unable to forecast a full recovery in value. In addition, the fair values of securities could decline if the overall economy and the financial condition of some of the issuers deteriorates and there remains limited liquidity for these securities.

Our inability to achieve profitability on new branches may negatively impact our earnings.

We currently intend to open four new branch offices by December 31, 2013, two in Brooklyn, New York, one in Staten Island, New York and one in Union, New Jersey. The profitability of these branches will depend on whether the income that we generate from the additional branches we establish will offset the increased expenses resulting from operating new branches. We expect that it may take a period of time before new branches become profitable. During this period, operating new branches may negatively affect our operating results.

Table of Contents

Changes in market interest rates could adversely affect our financial condition and results of operations.

Our financial condition and results of operations are significantly affected by changes in market interest rates. Our results of operations substantially depend on our net interest income, which is the difference between the interest income we earn on our interest-earning assets and the interest expense we pay on our interest-bearing liabilities. Our interest-bearing liabilities generally reprice or mature more quickly than our interest-earning assets. If rates increase rapidly, we may have to increase the rates we pay on our deposits and borrowed funds more quickly than any changes in interest rates earned on our loans and investments, resulting in a negative effect on interest spreads and net interest income. In addition, the effect of rising rates could be compounded if deposit customers move funds from savings accounts to higher rate certificate of deposit accounts. Conversely, should market interest rates fall below current levels, our net interest margin could also be negatively affected if competitive pressures keep us from further reducing rates on our deposits, while the yields on our assets decrease more rapidly through loan prepayments and interest rate adjustments.

We also are subject to reinvestment risk associated with changes in interest rates. Changes in interest rates may affect the average life of loans and mortgage-related securities. Decreases in interest rates often result in increased prepayments of loans and mortgage-related securities, as borrowers refinance their loans to reduce borrowings costs. Under these circumstances, we are subject to reinvestment risk to the extent we are unable to reinvest the cash received from such prepayments in loans or other investments that have interest rates that are comparable to the interest rates on existing loans and securities. Additionally, increases in interest rates may decrease loan demand and/or may make it more difficult for borrowers to repay adjustable rate loans.

Changes in interest rates also affect the value of our interest earning assets and in particular our securities portfolio. Generally, the value of securities fluctuates inversely with changes in interest rates. At June 30, 2012, the fair value of our securities portfolio (excluding Federal Home Loan Bank of New York stock) totaled \$1.23 billion.

At June 30, 2012, our simulation model indicated that our net portfolio value (the net present value of our interest-earning assets and interest-bearing liabilities) would decrease by 13.8% if there was an instantaneous parallel 200 basis point increase in market interest rates. See Management's Discussion and Analysis of Financial Condition and Results of Operations Management of Market Risk.

Historically low interest rates may adversely affect our net interest income and profitability.

The Federal Reserve Board has recently maintained interest rates at historically low levels through its targeted federal funds rate and the purchase of mortgage-backed securities. As a general matter, our interest-bearing liabilities reprice or mature more quickly than our interest-earning assets, which has resulted in increases in net interest income in the short term. Our ability to lower our interest expense is limited at these interest rate levels while the average yield on our interest-earning assets may continue to decrease. The Federal Reserve Board has indicated its intention to maintain low interest rates through late 2014. Accordingly, our net interest income (the difference between interest income earned on assets and interest expense paid on liabilities) may decrease, which may have an adverse affect on our profitability.

If our investment in the common stock of the Federal Home Loan Bank of New York is classified as other-than-temporarily impaired or as permanently impaired, earnings and stockholders' equity could decrease.

We own stock of the Federal Home Loan Bank of New York, which is part of the Federal Home Loan Bank system. The Federal Home Loan Bank of New York common stock is held to qualify for membership in the Federal Home Loan Bank of New York and to be eligible to borrow funds under the Federal Home Loan Bank of New York's advance programs. The aggregate cost of our Federal Home Loan Bank of New York common stock as of June 30, 2012, was \$14.2 million based on its par value. There is no market for Federal Home Loan Bank of New York common stock.

Table of Contents

Although the Federal Home Loan Bank of New York is not reporting current operating difficulties, it is possible that the capital of the Federal Home Loan Bank system, including the Federal Home Loan Bank of New York, could be substantially diminished. This could occur with respect to an individual Federal Home Loan Bank due to the requirement that each Federal Home Loan Bank is jointly and severally liable along with the other Federal Home Loan Banks for the consolidated obligations issued through the Office of Finance, a joint office of the Federal Home Loan Banks, or due to the merger of a Federal Home Loan Bank experiencing operating difficulties into a stronger Federal Home Loan Bank. Consequently, there continues to be a risk that our investment in Federal Home Loan Bank of New York common stock could be deemed other-than-temporarily impaired at some time in the future, and if this occurs, it would cause our earnings and stockholders' equity to decrease by the impairment charge.

The expiration of unlimited Federal Deposit Insurance Corporation insurance on certain non-interest-bearing transaction accounts may increase our costs and reduce our liquidity levels.

On December 31, 2012, unlimited Federal Deposit Insurance Corporation insurance on certain non-interest-bearing transaction accounts is scheduled to expire. Unlimited insurance coverage does not apply to money market deposit accounts or negotiable order of withdrawal accounts. The reduction in Federal Deposit Insurance Corporation insurance on other types of accounts to the standard \$250,000 maximum amount may cause depositors to place such funds in fully insured interest-bearing accounts, which would increase our costs of funds and negatively affect our results of operations, or may cause depositors to withdraw their deposits and invest uninsured funds in investments perceived as being more secure, such as securities issued by the United States Treasury. This may reduce our liquidity, or require us to pay higher interest rates to maintain our liquidity by retaining deposits.

Further downgrades in the U.S. government's sovereign credit rating, and in the credit ratings of instruments issued, insured or guaranteed by certain related institutions, agencies and instrumentalities, could result in risks to us and the general economy that we are not able to predict.

On August 5, 2011, Standard & Poor's downgraded the United States long-term debt rating from its AAA rating to AA+. On August 8, 2011, Standard & Poor's downgraded the credit ratings of certain long-term debt instruments issued by Fannie Mae and Freddie Mac and other U.S. government agencies linked to long-term U.S. debt. Instruments of this nature are key assets on the balance sheets of financial institutions, including Northfield Bank. These downgrades could adversely affect the market value of such instruments, and could adversely impact our ability to obtain funding that is collateralized by affected instruments, as well as affecting the pricing of that funding when it is available. We cannot predict if, when or how these changes to the credit ratings will affect economic conditions. These ratings downgrades could result in a significant adverse impact to us, and could exacerbate the other risks to which we are subject.

Changes in our accounting policies or in accounting standards could materially affect how we report our financial condition and results of operations.

Our accounting policies are essential to understanding our financial results and condition. Some of these policies require the use of estimates and assumptions that may affect the value of our assets or liabilities and financial results. Some of our accounting policies are critical because they require management to make difficult, subjective, and complex judgments about matters that are inherently uncertain and because it is likely that materially different amounts would be reported under different conditions or using different assumptions. If such estimates or assumptions underlying our financial statements are incorrect, we may experience material losses.

From time to time, the Financial Accounting Standards Board and the Securities and Exchange Commission change the financial accounting and reporting standards or the interpretation of those standards that govern the preparation of our financial statements. These changes are beyond our control, can be hard to predict and could materially affect how we report our results of operations and financial condition. We could also be required to apply a new or revised standard retroactively, resulting in our restating prior period financial statements in material amounts.

Table of Contents

The need to account for certain assets at estimated fair value may adversely affect our results of operations.

We report certain assets, including securities, at estimated fair value. Generally, for assets that are reported at fair value, we use quoted market prices or valuation models that utilize observable market inputs to estimate fair value. Because we carry these assets on our books at their estimated fair value, we may incur losses even if the asset in question presents minimal credit risk. Elevated delinquencies, defaults, and estimated losses from the disposition of collateral in our private-label mortgage-backed securities portfolio may require us to recognize additional other-than-temporary impairments in future periods with respect to our securities portfolio. The amount and timing of any impairment recognized will depend on the severity and duration of the decline in the estimated fair value of the securities and our estimation of the anticipated recovery period.

We hold certain intangible assets that could be classified as impaired in the future. If these assets are considered to be either partially or fully impaired in the future, our earnings and the book values of these assets would decrease.

We are required to test our goodwill for impairment on a periodic basis. The impairment testing process considers a variety of factors, including the current market price of our common shares, the estimated net present value of our assets and liabilities and information concerning the terminal valuation of similarly situated insured depository institutions. It is possible that future impairment testing could result in a partial or full impairment of the value of our goodwill. If an impairment determination is made in a future reporting period, our earnings and the book value of goodwill will be reduced by the amount of the impairment.

Because the nature of the financial services business involves a high volume of transactions, we face significant operational risks.

We operate in diverse markets and rely on the ability of our employees and systems to process a high number of transactions. Operational risk is the risk of loss resulting from our operations, including but not limited to, the risk of fraud by employees or persons outside our company, the execution of unauthorized transactions by employees, errors relating to transaction processing and technology, breaches of the internal control system and compliance requirements, and business continuation and disaster recovery. Insurance coverage may not be available for such losses, or where available, such losses may exceed insurance limits. This risk of loss also includes the potential legal actions that could arise as a result of an operational deficiency or as a result of noncompliance with applicable regulatory standards, adverse business decisions or their implementation, and customer attrition due to potential negative publicity. In the event of a breakdown in the internal control system, improper operation of systems or improper employee actions, we could suffer financial loss, face regulatory action, and suffer damage to our reputation.

We are required to maintain a significant percentage of our total assets in residential mortgage loans and investments secured by residential mortgage loans, which restricts our ability to diversify our loan portfolio.

A federal savings bank differs from a commercial bank in that it is required to maintain at least 65% of its total assets in qualified thrift investments which generally include loans and investments for the purchase, refinance, construction, improvement, or repair of residential real estate, as well as home equity loans, education loans and small business loans. To maintain our federal savings bank charter we have to be a qualified thrift lender or QTL in nine out of each 12 immediately preceding months. The QTL requirement limits the extent to which we can grow our commercial loan portfolio, and failing the QTL test can result in an enforcement action. However, a loan that does not exceed \$2 million (including a group of loans to one borrower) that is for commercial, corporate, business, or agricultural purposes is included in our qualified thrift investments. As of June 30, 2012, we maintained 84.1% of our portfolio assets in qualified thrift investments. Because of the QTL requirement, we may be limited in our ability to change our asset mix and increase the yield on our earning assets by growing our commercial loan portfolio.

In addition, if we continue to increase our commercial real estate loan portfolio and our residential mortgage loan portfolio decreases, it is possible that in order to maintain our QTL status, we would need to invest in

Table of Contents

mortgage-backed securities or other qualifying assets at times when the terms of such investments are not attractive. Alternatively, we may find it necessary to convert Northfield Bank's savings bank charter to a commercial bank charter since commercial banks are not subject to a QTL requirement.

Risks associated with system failures, interruptions, or breaches of security could negatively affect our earnings.

Information technology systems are critical to our business. We use various technology systems to manage our customer relationships, general ledger, securities investments, deposits, and loans. We have established policies and procedures to prevent or limit the impact of system failures, interruptions, and security breaches, but such events may still occur or may not be adequately addressed if they do occur. In addition, any compromise of our systems could deter customers from using our products and services. Although we rely on security systems to provide security and authentication necessary to effect the secure transmission of data, these precautions may not protect our systems from compromises or breaches of security.

In addition, we outsource a majority of our data processing to certain third-party providers. If these third-party providers encounter difficulties, or if we have difficulty communicating with them, our ability to adequately process and account for transactions could be affected, and our business operations could be adversely affected. Threats to information security also exist in the processing of customer information through various other vendors and their personnel.

The occurrence of any system failures, interruption, or breach of security could damage our reputation and result in a loss of customers and business thereby subjecting us to additional regulatory scrutiny, or could expose us to litigation and possible financial liability. Any of these events could have a material adverse effect on our financial condition and results of operations.

We are subject to extensive regulatory oversight.

We are subject to extensive supervision, regulation, and examination by the Office of the Comptroller of the Currency, the Federal Reserve Board and the Federal Deposit Insurance Corporation. As a result, we are limited in the manner in which we conduct our business, undertake new investments and activities, and obtain financing. This regulatory structure is designed primarily for the protection of the Deposit Insurance Fund and our depositors, and not to benefit our stockholders. This regulatory structure also gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement actions and examination policies, including policies with respect to capital levels, the timing and amount of dividend payments, the classification of assets, the establishment of adequate loan loss reserves for regulatory purposes and the timing and amounts of assessments and fees.

In addition, we must comply with significant anti-money laundering and anti-terrorism laws and regulations, Community Reinvestment Act laws and regulations, and fair lending laws and regulations. Government agencies have the authority to impose monetary penalties and other sanctions on institutions that fail to comply with these laws and regulations, which could significantly affect our business activities, including our ability to acquire other financial institutions or expand our branch network.

Legislative or regulatory responses to perceived financial and market problems could impair our rights against borrowers.

Federal, state and local laws and policies could reduce the amount distressed borrowers are otherwise contractually obligated to pay under their mortgage loans, and may limit the ability of lenders to foreclose on mortgage collateral. Restrictions on Northfield Bank's rights as creditor could result in increased credit losses on our loans and mortgage-backed securities, or increased expense in pursuing our remedies as a creditor.

Table of Contents

Changes in the structure of Fannie Mae and Freddie Mac (GSEs) and the relationship among the GSEs, the federal government and the private markets, or the conversion of the current conservatorship of the GSEs into receivership, could result in significant changes to our securities portfolio.

The GSEs are currently in conservatorship, with its primary regulator, the Federal Housing Finance Agency, acting as conservator. We cannot predict if, when or how the conservatorships will end, or any associated changes to the GSEs' business structure that could result. We also cannot predict whether the conservatorships will end in receivership. There are several proposed approaches to reform the GSEs which, if enacted, could change the structure of the GSEs and the relationship among the GSEs, the government and the private markets, including the trading markets for agency conforming mortgage loans and markets for mortgage-related securities in which we participate. We cannot predict the prospects for the enactment, timing or content of legislative or rulemaking proposals regarding the future status of the GSEs. Accordingly, there continues to be uncertainty regarding the future of the GSEs, including whether they will continue to exist in their current form. GSE reform, if enacted, could result in a significant change and adversely impact our business operations.

Financial reform legislation has, among other things, eliminated the Office of Thrift Supervision, tightened capital standards and created a new Consumer Financial Protection Bureau, and will result in new laws and regulations that are expected to increase our costs of operations.

The Dodd-Frank Act requires various federal agencies to adopt a broad range of new implementing rules and regulations, and to prepare numerous studies and reports for Congress. The federal agencies are given significant discretion in drafting the implementing rules and regulations, and consequently, many of the details and much of the impact of the Dodd-Frank Act may not be known for many months or years.

Among other things, as a result of the Dodd-Frank Act:

the Office of the Comptroller of the Currency became the primary federal regulator for federal savings associations such as Northfield Bank (replacing the Office of Thrift Supervision), and the Federal Reserve Board now supervises and regulates all savings and loan holding companies that were formerly regulated by the Office of Thrift Supervision, including Northfield-Federal and Northfield Bancorp, MHC;

effective July 21, 2011, the federal prohibition on paying interest on demand deposits has been eliminated, thus allowing businesses to have interest bearing checking accounts. Depending on competitive responses, this significant change could have an adverse effect on our interest expense;

the Federal Reserve Board is required to set minimum capital levels for depository institution holding companies that are as stringent as those required for the insured depository subsidiaries, and the components of Tier 1 capital are required to be restricted to capital instruments that are currently considered to be Tier 1 capital for insured depository institutions. There is a five-year transition period (from the July 21, 2010 effective date of the Dodd-Frank Act) before the capital requirements will apply to savings and loan holding companies. However, recently proposed rules would not provide such a transition period for savings and loan holding companies. See [Supervision and Regulation Capital Requirements](#);

the federal banking regulators are required to implement new leverage and capital requirements that take into account off-balance sheet activities and other risks, including risks relating to securitized products and derivatives;

a new Consumer Financial Protection Bureau has been established, which has broad powers to supervise and enforce consumer protection laws. The Consumer Financial Protection Bureau has broad rule-making authority for a wide range of consumer protection laws that apply to all banks and savings institutions, including the authority to prohibit unfair, deceptive or abusive acts and practices. The Consumer Financial Protection Bureau has examination and enforcement authority over all banks and savings institutions with more than \$10 billion in assets. Banks and savings

Table of Contents

institutions with \$10 billion or less in assets, like Northfield Bank, will be examined by their applicable bank regulators; and

federal preemption rules that have been applicable for national banks and federal savings banks have been weakened, and state attorneys general have the ability to enforce federal consumer protection laws.

In addition to the risks noted above, we expect that our operating and compliance costs, and possibly our interest expense, could increase as a result of the Dodd-Frank Act and the implementing rules and regulations. The need to comply with additional rules and regulations, as well as state laws and regulations to which we were not previously subject, will also divert management's time from managing our operations. Higher capital levels would require us to maintain higher levels of assets that earn less interest and dividend income.

The value of our deferred tax asset could be reduced if corporate tax rates in the U.S. are decreased.

There have been recent discussions in Congress and by the executive branch regarding potentially decreasing the U.S. corporate tax rate. While we may benefit in some respects from any decreases in these corporate tax rates, any reduction in the U.S. corporate tax rate would result in a decrease to the value of our net deferred tax asset, which could negatively affect our financial condition and results of operations.

Our financial condition and results of operations could be negatively affected if we fail to grow or fail to manage our growth effectively.

Our business strategy includes growth plans. Our prospects must be considered carefully in light of risks, expenses and difficulties frequently encountered by companies that have significant growth strategies. We may not be able to expand our market presence in our existing markets, and any expansion, including the costs associated with *de novo* branching or acquisitions, may adversely affect our results of operations. Failure to effectively grow could have a material adverse effect on our business, future prospects, financial condition or results of operations, and could adversely affect our ability to successfully implement our business strategy. In addition, if we grow more slowly than anticipated, our operating results could be adversely affected.

Our ability to grow successfully will depend on a variety of factors, including the continued availability of attractive business opportunities, competitive responses from other financial institutions in our market areas and our ability to manage our growth.

Our risk management framework may not be effective in mitigating risk and reducing the potential for significant losses.

Our risk management framework is designed to minimize risk and loss to us. We seek to identify, measure, monitor, report and control our exposure to risk, including strategic, market, liquidity, compliance and operational risks. While we use a broad and diversified set of risk monitoring and mitigation techniques, these techniques are inherently limited because they cannot anticipate the existence or future development of currently unanticipated or unknown risks. Recent economic conditions and heightened legislative and regulatory scrutiny of the financial services industry, among other developments, have increased our level of risk. Accordingly, we could suffer losses as a result of our failure to properly anticipate and manage these risks.

Acquisitions may disrupt our business and dilute stockholder value.

In October 2011, Northfield Bank assumed all of the deposits and acquired substantially all of the assets of First State Bank, a New Jersey chartered bank, from the Federal Deposit Insurance Corporation as receiver for First State Bank. In addition, on November 2, 2012, we acquired Flatbush Federal Bancorp, Inc. and Flatbush Federal Savings & Loan Association. We regularly evaluate merger and acquisition opportunities and conduct due diligence activities related to possible transactions with other financial institutions and financial services companies. As a result, negotiations may take place and future mergers or acquisitions involving cash, debt, or equity securities may

Table of Contents

occur at any time. We seek acquisition partners that offer us either significant market presence or the potential to expand our market footprint and improve profitability through economies of scale or expanded services.

Acquiring other banks, businesses, or branches may have an adverse impact on our financial results and may involve various other risks commonly associated with acquisitions, including, among other things:

difficulty in estimating the value of the target company;

payment of a premium over book and market values that may dilute our tangible book value and earnings per share in the short and long term;

potential exposure to unknown or contingent liabilities of the target company;

exposure to potential asset quality problems of the target company;

potential volatility in reported income associated with goodwill impairment losses;

difficulty and expense of integrating the operations and personnel of the target company;

inability to realize the expected revenue increases, cost savings, increases in geographic or product presence, and/or other projected benefits;

potential disruption to our business;

potential diversion of our management's time and attention;

the possible loss of key employees and customers of the target company; and

potential changes in banking or tax laws or regulations that may affect the target company.

Risks Related to the Offering

The future price of the shares of common stock may be less than the \$10.00 purchase price per share in the offering.

If you purchase shares of common stock in the offering, you may not be able to sell them later at or above the \$10.00 purchase price in the offering. In several cases, shares of common stock issued by newly converted savings institutions or mutual holding companies have traded below the initial offering price. The aggregate purchase price of the shares of common stock sold in the offering will be based on an independent appraisal. The independent appraisal is not intended, and should not be construed, as a recommendation of any kind as to the advisability of purchasing shares of common stock. The independent appraisal is based on certain estimates, assumptions and projections, all of which are subject to change from time to time. After the shares begin trading, the trading price of our common stock will be determined by the marketplace, and may be influenced by many factors, including prevailing interest rates, the overall performance of the economy, investor perceptions of Northfield-Delaware and the outlook for the financial services industry in general. Price fluctuations in our common stock may be

unrelated to our operating performance.

Our failure to effectively deploy the net proceeds may have an adverse effect on our financial performance.

We intend to invest between \$147.4 million and \$199.8 million of the net proceeds of the offering in Northfield Bank. We may use the remaining net proceeds to invest in short-term investments, repurchase shares of common stock, pay dividends or for other general corporate purposes. We also expect to use a portion of the net proceeds we retain to fund a loan for the purchase of shares of common stock in the offering by the employee stock ownership plan. Northfield Bank may use the net proceeds it receives to fund new loans, expand its retail banking

Table of Contents

franchise by acquiring new branches or by acquiring other financial institutions or other financial services companies, or for other general corporate purposes. However, with the exception of the loan to the employee stock ownership plan, we have not allocated specific amounts of the net proceeds for any of these purposes, and we will have significant flexibility in determining the amount of the net proceeds we apply to different uses and when we apply or reinvest such proceeds. Also, certain of these uses, such as opening new branches or acquiring other financial institutions, may require the approval of the Office of the Comptroller of the Currency and the Federal Reserve Board. We have not established a timetable for reinvesting the net proceeds, and we cannot predict how long we will require to reinvest the net proceeds. Our failure to utilize these funds effectively would reduce our profitability and may adversely affect the value of our common stock.

Our return on equity will be low following the stock offering. This could negatively affect the trading price of our shares of common stock.

Net income divided by average equity, known as return on equity, is a ratio many investors use to compare the performance of financial institutions. Following the stock offering, we expect our consolidated equity to be between \$679.4 million at the minimum of the offering range and \$775.5 million at the maximum of the offering range. Based upon our annualized income for the six months ended June 30, 2012, and these pro forma equity levels, our return on equity would be 2.62% and 2.29% at the minimum and maximum of the offering range, respectively. We expect our return on equity will remain low until we are able to leverage the additional capital we receive from the stock offering. Although we will be able to increase net interest income using proceeds of the stock offering, our return on equity will be negatively affected by added expenses associated with our employee stock ownership plan and the stock-based benefit plan we intend to adopt. Until we can increase our net interest income and non-interest income and leverage the capital raised in the stock offering, we expect our return on equity to remain low, which may reduce the market price of our shares of common stock.

Our stock-based benefit plans will increase our expenses and reduce our income.

We intend to adopt one or more new stock-based benefit plans after the conversion, subject to stockholder approval, which will increase our annual compensation and benefit expenses related to the stock options and stock awards granted to participants under the stock-based benefit plan. The actual amount of these new stock-related compensation and benefit expenses will depend on the number of options and stock awards actually granted under the plan, the fair market value of our stock or options on the date of grant, the vesting period and other factors which we cannot predict at this time. In the event we adopt the plan within 12 months following the conversion, under current regulatory policy the total shares of common stock reserved for issuance pursuant to awards of restricted stock and grants of options under our existing and proposed stock-based benefit plans will be limited to 4% and 10%, respectively, of the total shares of our common stock outstanding. If we award restricted shares of common stock or grant options in excess of these amounts under stock-based benefit plans adopted more than 12 months after the completion of the conversion, our costs would increase further.

In addition, we will recognize expense for our employee stock ownership plan when shares are committed to be released to participants accounts, and we will recognize expense for restricted stock awards and stock options over the vesting period of awards made to recipients. The expense in the first year following the offering for shares purchased in the offering has been estimated to be approximately \$5.4 million (\$3.7 million after tax) at the maximum of the offering range as set forth in the pro forma financial information under Pro Forma Data, assuming the \$10.00 per share purchase price as fair market value. Actual expenses, however, may be higher or lower, depending on the price of our common stock. For further discussion of our proposed stock-based plans, see Management Benefits to be Considered Following Completion of the Conversion.

The implementation of stock-based benefit plans may dilute your ownership interest. Historically, stockholders have approved these stock-based benefit plans.

We intend to adopt one or more new stock-based benefit plans following the stock offering. These plans may be funded either through open market purchases or from the issuance of authorized but unissued shares of common stock. Our ability to repurchase shares of common stock to fund these plans will be subject to many

Table of Contents

factors, including, but not limited to, applicable regulatory restrictions on stock repurchases, the availability of stock in the market, the trading price of the stock, our capital levels, alternative uses for our capital and our financial performance. While our intention is to fund the new stock-based benefit plan through open market purchases, stockholders would experience a 7.88% dilution in ownership interest at the maximum of the offering range in the event newly issued shares of our common stock are used to fund stock options and shares of restricted common stock in an amount equal to 10% and 4%, respectively, of the shares sold in the offering. In the event we adopt the plan within 12 months following the conversion, under current regulatory policy the total shares of common stock reserved for issuance pursuant to awards of restricted stock and grants of options under our existing and proposed stock-based benefit plans would be limited to 4% and 10%, respectively, of the total shares of our common stock outstanding. In the event we adopt the plan more than 12 months following the conversion, the plan would not be subject to these limitations and stockholders could experience greater dilution.

Although the implementation of the stock-based benefit plan will be subject to stockholder approval, historically, the overwhelming majority of stock-based benefit plans adopted by savings institutions and their holding companies following mutual-to-stock conversions have been approved by stockholders.

We have not determined when we will adopt one or more new stock-based benefit plans. Stock-based benefit plans adopted more than 12 months following the completion of the conversion may exceed regulatory restrictions on the size of stock-based benefit plans adopted within 12 months, which would further increase our costs.

If we adopt stock-based benefit plans more than 12 months following the completion of the conversion, then grants of shares of common stock or stock options under our existing and proposed stock-based benefit plans may exceed 4% and 10%, respectively, of our total outstanding shares. Stock-based benefit plans that provide for awards in excess of these amounts would increase our costs beyond the amounts estimated in

Our stock-based benefit plans will increase our expenses and reduce our income. Stock-based benefit plans that provide for awards in excess of these amounts could also result in dilution to stockholders in excess of that described in . The implementation of stock-based benefit plans may dilute your ownership interest. Historically, stockholders have approved these stock-based benefit plans. Although the implementation of stock-based benefit plans would be subject to stockholder approval, the determination as to the timing of the implementation of such plans will be at the discretion of our board of directors.

Various factors may make takeover attempts more difficult to achieve.

Our board of directors has no current intention to sell control of Northfield-Delaware. Our certificate of incorporation and bylaws, federal regulations, Northfield Bank's charter, Delaware law, shares of restricted stock and stock options that we have granted or may grant to employees and directors, stock ownership by our management and directors and employment agreements that we have entered into with our executive officers, and various other factors may make it more difficult for companies or persons to acquire control of Northfield-Delaware without the consent of our board of directors. You may want a takeover attempt to succeed because, for example, a potential acquiror could offer a premium over the then prevailing price of our common stock. For additional information, see Restrictions on Acquisition of Northfield-Delaware, Management Employment Agreements, Potential Payments to Named Executive Officers and Benefits to be Considered Following Completion of the Conversion.

We may not pay dividends on our shares of common stock, and we may not receive regulatory approval to pay a special dividend following the completion of the conversion.

Northfield-Federal ceased paying dividends on its common stock after March 31, 2012. Although Northfield-Delaware intends to pay a quarterly cash dividend to its stockholders, stockholders are not entitled to receive dividends. Furthermore, the payment of a one-time, special dividend to all Northfield-Delaware stockholders is subject to regulatory approval. We may not receive such regulatory approval, either promptly following the completion of the conversion or at all, or we may only receive regulatory approval to pay a smaller special dividend than we currently intend. See Our Dividend Policy for additional information.

Table of Contents

There may be a decrease in stockholders' rights for existing stockholders of Northfield-Federal.

As a result of the conversion, existing stockholders of Northfield-Federal will become stockholders of Northfield-Delaware. In addition to the provisions discussed above that may discourage takeover attempts that may be favored by stockholders, some rights of stockholders of Northfield-Delaware will be reduced compared to the rights stockholders currently have in Northfield-Federal. The reduction in stockholder rights results from differences between the federal and Delaware chartering documents and bylaws, and from distinctions between federal and Delaware law. Many of the differences in stockholder rights under the certificate of incorporation and bylaws of Northfield-Delaware are not mandated by Delaware law but have been chosen by management as being in the best interests of Northfield-Delaware and its stockholders. The certificate of incorporation and bylaws of Northfield-Delaware include the following provisions: (i) greater lead time required for stockholders to submit proposals for new business or to nominate directors; and (ii) approval by at least 80% of the outstanding shares of capital stock entitled to vote generally is required to amend the bylaws and certain provisions of the certificate of incorporation. See [Comparison of Stockholders Rights For Existing Stockholders of Northfield Bancorp, Inc.](#) for a discussion of these differences.

You may not revoke your decision to purchase Northfield-Delaware common stock in the subscription or community offerings after you send us your order.

Funds submitted or automatic withdrawals authorized in connection with a purchase of shares of common stock in the subscription and community offerings will be held by us until the completion or termination of the conversion and offering, including any extension of the expiration date and consummation of a syndicated or firm commitment underwritten offering. Because completion of the conversion and offering will be subject to regulatory approvals and an update of the independent appraisal prepared by RP Financial, L.C., among other factors, there may be one or more delays in the completion of the conversion and offering. Orders submitted in the subscription and community offerings are irrevocable, and purchasers will have no access to their funds unless the offering is terminated, or extended beyond January 31, 2013, or the number of shares to be sold in the offering is increased to more than 41,975,000 shares or decreased to fewer than 31,025,000 shares.

The distribution of subscription rights could have adverse income tax consequences.

If the subscription rights granted to certain current or former depositors of Northfield Bank or depositors of the former First State Bank or Flatbush Federal Savings & Loan Association are deemed to have an ascertainable value, receipt of such rights may be taxable in an amount equal to such value. Whether subscription rights are considered to have ascertainable value is an inherently factual determination. We have received an opinion of counsel, Luse Gorman Pomerenk & Schick, P.C., that it is more likely than not that such rights have no value; however, such opinion is not binding on the Internal Revenue Service.

Table of Contents**SELECTED CONSOLIDATED FINANCIAL AND OTHER DATA**

The following tables set forth selected consolidated historical financial and other data of Northfield-Federal and its subsidiaries for the periods and at the dates indicated. The following is only a summary and you should read it in conjunction with the business and financial information regarding Northfield-Federal contained elsewhere in this prospectus, including the consolidated financial statements beginning on page F-1 of this prospectus. The information at December 31, 2011 and 2010, and for the years ended December 31, 2011, 2010, and 2009 is derived in part from the audited consolidated financial statements that appear in this prospectus. The information at December 31, 2009, 2008 and 2007 and for the years ended December 31, 2008 and 2007, is derived in part from audited consolidated financial statements that do not appear in this prospectus. The information at June 30, 2012 and for the six months ended June 30, 2012 and 2011, is unaudited and reflects only normal recurring adjustments that are, in the opinion of management, necessary for a fair presentation of the results for the interim periods presented. The results of operations for the six months ended June 30, 2012, are not necessarily indicative of the results to be achieved for all of 2012.

- (1) Loans held-for-sale at December 31, 2011 included \$3.4 million of non-performing loans.
- (2) Non-interest income for the year ended December 31, 2011 includes bargain-purchase gain, net of tax, of \$3.6 million.
- (3) Net loss per share in 2007 is calculated for the period that Northfield-Federal's shares of common stock were outstanding (November 8, 2007 through December 31, 2007). The net loss for this period was \$1.5 million due to the \$7.8 million contribution to Northfield Bank Foundation in connection with our initial stock offering.
- (4) 2011 performance ratios include an after tax bargain purchase gain of \$3.6 million associated with the Federal Deposit Insurance Corporation-assisted acquisition of First State Bank. 2010 performance ratios include a \$1.8 million charge (\$1.2 million after-tax) related to costs associated with Northfield Federal's postponed second-step offering, and a \$738,000 benefit related to the elimination of deferred tax liabilities associated with a change in New York state tax law. 2009 performance ratios include a \$770,000 expense (\$462,000 after-tax) related to a special Federal Deposit Insurance Corporation deposit insurance assessment. 2008 performance ratios include a \$2.5 million tax-exempt gain from the death of an officer and \$463,000 (\$292,000, net of tax) in costs associated with the Bank's conversion to a new core processing system that was completed in January 2009. 2007 performance ratios include the after-tax effect of: a charge of \$7.8 million due to Northfield-Federal's contribution to the Northfield Bank Foundation; a gain of \$2.4 million as a result of the sale of two branch locations, and associated deposit relationships; net interest income of approximately \$800,000 (after-tax), for the year ended December 31, 2007, as it relates to short-term investment returns earned on subscription proceeds (net of interest paid during the stock offering); and the reversal of state and local tax liabilities of approximately \$4.5 million, net of federal taxes.
- (5) The interest rate spread represents the difference between the weighted-average yield on interest earning assets and the weighted-average rate of interest-bearing liabilities.
- (6) The net interest margin represents net interest income as a percent of average interest-earning assets for the period.
- (7) Dividend payout ratio is calculated as total dividends declared for the period (excluding dividends waived by Northfield Bancorp, MHC) divided by net income for the period.
- (8) The efficiency ratio represents non-interest expense divided by the sum of net interest income and non-interest income.

Edgar Filing: Northfield Bancorp, Inc. - Form 424B3

- (9) Excludes PCI loans held-for-investment.
- (10) Excludes nonperforming loans held-for-sale, carried at aggregate lower of cost or estimated fair value, less costs to sell.
- (11) Includes PCI loans held-for-investment.
- (12) Capital ratios are presented for Northfield Bank only.
- (13) Ratios are annualized, where appropriate.

Table of Contents

RECENT DEVELOPMENTS

Impact of Hurricane Sandy

Our primary market areas of Staten Island and Brooklyn, New York and Union and Middlesex Counties in New Jersey were significantly impacted by Hurricane Sandy, which struck the region on October 29, 2012.

Although we experienced short-term service disruptions, the storm has not had a significant effect on our ability to continue to service our customers. With the exception of flooding at our Brighton Beach, Brooklyn office acquired in the Flatbush Federal Bancorp transaction, none of our branches sustained any significant damage as a result of the storm, although many were temporarily affected by power outages and telecommunication problems. As of November 6, 2012, our Woodbridge, New Jersey operations center was fully functional, all of our banking offices other than Brighton Beach were open for business, and our internet banking service was fully operational.

While our facilities sustained only minor damage, Hurricane Sandy caused significant property damage throughout our market area, resulting in widespread disruptions in power and transportation. Many properties and structures also have incurred flood and wind damage, which ranges from minor to moderate in many areas to very severe in the coastal areas of Brooklyn, Staten Island, and New Jersey. Substantially all of our loans are secured by real estate located in our market area. Based on our initial assessments of where our borrowers are located within the market area, we believe that many of our borrowers will likely have experienced power outages and wind damage, and to a lesser extent, flood damage. However, we believe most of our borrowers will not have suffered catastrophic damage to their businesses or the collateral securing their loans. For our collateral dependent loans, our policy is to require property insurance on all loans (which normally covers wind damage), as well as flood insurance if the property is located within a flood zone, which should reduce our exposure to potential loss. Properties not located within flood zones are not required to have flood insurance, and thus it is likely that insurance coverage will not be available for any flood-related damage to those properties.

We are in the process of performing a detailed evaluation of the effects Hurricane Sandy may have had on our borrowers and our collateral, but we do not yet have sufficient information to reasonably estimate the potential financial impact of the storm on us. However, it is likely that our results of operations will be negatively impacted, and it is possible that the impact could be material. For example, it is likely that we will experience increased delinquencies and loan restructurings, particularly in the short term, as customers undertake recovery and clean-up efforts, including the submission of insurance claims. Customers may also experience disruptions in their employment status or income if their employers were affected by the storm. These increases in delinquencies and restructurings would negatively impact our cash flow and, if not timely cured, would increase our non-performing assets and reduce our net interest income. Loan restructurings may also increase as we work with borrowers impacted by the storm. We may also experience increased provisions for loan losses as total loan delinquencies and loan restructurings increase, and to the extent that the combination of insurance proceeds and collateral values are insufficient to cover loan balances on loans that may default.

Table of Contents**Financial Information**

- (1) Loans held-for-sale at December 31, 2011 included \$3.4 million of non-performing loans.
- (2) The interest rate spread represents the difference between the weighted-average yield on interest earning assets and the weighted-average rate of interest-bearing liabilities.
- (3) The net interest margin represents net interest income as a percent of average interest-earning assets for the period.
- (4) Dividend payout ratio is calculated as total dividends declared for the year (excluding dividends waived by Northfield Bancorp, MHC) divided by net income for the period. On June 6, 2012, Northfield-Federal temporarily suspended dividend payments pending the completion of Northfield Bancorp, MHC's second-step conversion.
- (5) The efficiency ratio represents non-interest expense divided by the sum of net interest income and non-interest income.
- (6) Excludes PCI loans held-for-investment.
- (7) Excludes nonperforming loans held-for-sale, carried at aggregate lower of cost or estimated fair value, less costs to sell.
- (8) Includes PCI loans held-for-investment.
- (9) Capital ratios are presented for Northfield Bank only.
- (10) Ratios are annualized, where appropriate.

Table of Contents

Overview

Net income amounted to \$3.9 million and \$12.8 million for the three and nine months ended September 30, 2012, respectively, as compared to \$3.7 million and \$13.0 million for the three and nine months ended September 30, 2011, respectively. Basic and diluted earnings per share were \$0.10 and \$0.33 for the three and nine months ended September 30, 2012, respectively, compared to \$0.09 and \$0.32 for the three and nine months ended September 30, 2011, respectively. For the three and nine months ended September 30, 2012, our return on average assets was 0.63% and 0.70%, respectively, as compared to 0.63% and 0.76% for the three and nine months ended September 30, 2011, respectively. For the three and nine months ended September 30, 2012, our return on average stockholders' equity was 3.95% and 4.41%, respectively, as compared to 3.71% and 4.39% for the three and nine months ended September 30, 2011, respectively.

Assets increased by 4.8% to \$2.49 billion at September 30, 2012, from \$2.38 billion at December 31, 2011. The increase in total assets reflected an increase in securities available-for-sale of \$110.3 million, or 10.0%, and an increase in net loans held-for-investment of \$26.7 million, which was partially offset by decreases in cash and cash equivalents of \$33.3 million. Deposits increased \$77.3 million to \$1.57 billion at September 30, 2012, from \$1.49 billion at December 31, 2011. The increase in deposits was attributable to growth in transaction accounts and savings accounts, partially offset by decreases in certificates of deposit and short-term certificates of deposit originated through the CDARS® Network. Borrowed funds increased \$18.0 million to \$499.9 million at September 30, 2012, from \$481.9 million at December 31, 2011.

Comparison of Financial Condition at September 30, 2012, and December 31, 2011

Total assets increased \$114.2 million, or 4.8%, to \$2.49 billion at September 30, 2012, from \$2.38 billion at December 31, 2011. The increase was primarily attributable to increases in securities available-for-sale of \$110.3 million and net loans held-for-investment of \$26.7 million, partially offset by a decrease in cash and cash equivalents of \$33.3 million.

Cash and cash equivalents decreased \$33.3 million, or 51.0%, to \$32.0 million at September 30, 2012, from \$65.3 million at December 31, 2011. We routinely maintain liquid assets in interest-bearing accounts in other well-capitalized financial institutions.

Securities available-for-sale increased \$110.3 million, or 10.0%, to \$1.21 billion at September 30, 2012, from \$1.10 billion at December 31, 2011. The increase was primarily attributable to purchases of \$611.2 million partially offset by maturities and pay-downs of \$318.2 million and sales of \$190.4 million. At September 30, 2012, \$1.11 billion of the portfolio consisted of residential mortgage-backed securities issued or guaranteed by Fannie Mae, Freddie Mac, or Ginnie Mae. We also held residential mortgage-backed securities not guaranteed by these three entities, referred to as private label securities. The private label securities had an estimated fair value of \$11.6 million at September 30, 2012, a decrease of \$28.9 million from December 31, 2011. During the current quarter, we sold 2 pass-through non-GSE mortgage-backed securities issued by private companies (private label) that were rated less than investment grade at a combined loss of \$490,000. In addition to the above mortgage-backed securities, we held \$75.0 million in corporate bonds which were all rated investment grade at September 30, 2012, and \$13.0 million of equity investments in mutual funds, which focus on investments that qualify under the Community Reinvestment Act and on money market mutual funds.

Securities held-to-maturity decreased \$1.1 million, or 29.9%, to \$2.5 million at September 30, 2012, from \$3.6 million at December 31, 2011. The decrease was attributable to maturities and paydowns during the nine months ended September 30, 2012.

Table of Contents

The following table sets forth the amortized cost and estimated fair value of our available-for-sale and held-to-maturity securities portfolios (excluding Federal Home Loan Bank of New York common stock) at the dates indicated. As of September 30, 2012 and December 31, 2011, we also had a trading portfolio with a market value of \$4.7 million and \$4.1 million, respectively, consisting of mutual funds quoted in actively traded markets. These securities are utilized to fund non-qualified deferred compensation obligations.

Table of Contents

Originated loans held-for-investment, net, totaled \$1.02 billion at September 30, 2012, as compared to \$985.9 million at December 31, 2011. The increase was primarily due to an increase in multifamily real estate loans, which increased \$114.9 million, or 25.1%, to \$573.3 million at September 30, 2012, from \$458.4 million at December 31, 2011. This was partially offset by a decrease in insurance premium loans of \$59.1 million, due to the sale of the majority of the portfolio, and a decrease in commercial real estate loans of \$14.7 million. Currently, management is primarily focused on originating multifamily loans, with less emphasis on other loan types.

Purchased credit-impaired (PCI) loans, acquired as part of a Federal Deposit Insurance Corporation-assisted transaction, totaled \$77.4 million at September 30, 2012, as compared to \$88.5 million at December 31, 2011. We recorded accretion of interest income of \$4.7 million for the nine months ended September 30, 2012 attributable to these loans.

The following table sets forth the composition of our loan portfolio, by type of loan at the dates indicated, excluding loans held for sale of \$859,000 and \$3.9 million at September 30, 2012 and December 31, 2011, respectively.

	At September 30, 2012		At December 31, 2011

Bank owned life insurance increased \$2.1 million, or 2.8%, to \$79.9 million at September 30, 2012 from \$77.8 million at December 31, 2011. The increase resulted from income earned on bank owned life insurance for the nine months ended September 30, 2012.

Federal Home Loan Bank of New York stock, at cost, increased \$1.8 million, or 14.2%, to \$14.5 million at September 30, 2012, from \$12.7 million at December 31, 2011. This increase was attributable to an increase in borrowings outstanding with the Federal Home Loan Bank of New York over the same time period.

Premises and equipment, net, increased \$4.1 million, or 20.4%, to \$24.1 million at September 30, 2012, from \$20.0 million at December 31, 2011. This increase was primarily attributable to new branches and the renovation of existing branches.

Other real estate owned decreased \$2.7 million, or 81.2%, to \$633,000 at September 30, 2012, from \$3.4 million at December 31, 2011. This decrease was attributable to the sale of properties during the nine months ended September 30, 2012.

Other assets increased \$10.0 million, or 66.5%, to \$25.1 million at September 30, 2012, from \$15.1 million at December 31, 2011. The increase in other assets was attributable to an increase in amounts due from brokers due to the sale of several securities with trade dates prior to September 30, 2012 settling in October 2012, and an

Table of Contents

increase in prepaid expenses, which was partially offset by a decrease in amounts due us from taxing authorities and a decrease in prepaid Federal Deposit Insurance Corporation insurance premiums due to amortization related to the Federal Deposit Insurance Corporation prepayment of insurance premiums that was made in 2009.

Deposits increased \$77.3 million, or 5.2%, to \$1.57 billion at September 30, 2012 from \$1.49 billion at December 31, 2011. The increase in deposits for the nine months ended September 30, 2012 was due to an increase in savings (passbook and statement) and money market accounts of \$50.1 million, or 6.6%, as compared to December 31, 2011, and an increase in transaction accounts of \$33.2 million, or 13.4%, as compared to December 31, 2011. These increases were partially offset by decreases in certificate of deposit accounts (issued by Northfield Bank) of \$3.3 million, or 0.7%, from December 31, 2011 to September 30, 2012 and of \$2.7 million in short-term certificates of deposit originated through the CDARS® Network. Deposits originated through the CDARS® Network totaled \$661,000 at September 30, 2012, and \$3.4 million at December 31, 2011. We utilize the CDARS® Network as a cost-effective alternative to other short-term funding sources.

The following tables set forth the distribution of our average total deposit accounts, by account type, for the periods indicated.

	For the Nine Months Ended September 30,					
	2012			2011

As of September 30, 2012, the aggregate amount of our outstanding certificates of deposit in amounts greater than or equal to \$100,000 was \$224.8 million. The following table sets forth the maturity of these certificates at September 30, 2012.

	At September 30, 2012 (In thousands)
Three months or less	\$ 114,101
Over three months through six months	28,151
Over six months through one year	20,895
Over one year to three years	48,779
Over three years	12,846
Total	\$ 224,772

Borrowings, consisting primarily of repurchase agreements from other financial institutions and Federal Home Loan Bank advances, increased \$18.0 million, or 3.7%, to \$499.9 million at September 30, 2012, from \$481.9 million at December 31, 2011. The increase in borrowings was primarily the result of increased Federal Home Loan Bank advances.

Accrued expenses and other liabilities increased \$4.0 million, to \$20.6 million at September 30, 2012, from \$16.6 million at December 31, 2011. The increase was primarily a result of an increase in escrow payables.

Edgar Filing: Northfield Bancorp, Inc. - Form 424B3

Total stockholders' equity increased by \$13.1 million to \$395.8 million at September 30, 2012, from \$382.7 million at December 31, 2011. This increase was primarily attributable to net income of \$12.8 million for the nine months ended September 30, 2012, a \$3.4 million increase in accumulated other comprehensive income and

Table of Contents

an increase of \$2.7 million in additional paid-in capital primarily related to the recognition of compensation expense associated with equity awards. The increase was partially offset by \$4.2 million in stock repurchases net of stock option exercises and the payment of \$1.7 million in dividends. As previously announced, we have temporarily suspended dividend payments pending the completion of Northfield Bancorp, MHC's second-step conversion.

As of September 30, 2012, we had repurchased 5,384,510 shares of our common stock under our prior repurchase plans at an average price of \$12.91 per share. On June 6, 2012, we announced that we had terminated our stock repurchase plan in connection with the adoption by the board of directors of the Plan of Conversion and Reorganization related to Northfield Bancorp, MHC's second-step conversion.

Comparison of Operating Results for the Three Months Ended September 30, 2012 and 2011

Net income. Net income was \$3.9 million for the quarter ended September 30, 2012, as compared to \$3.7 million for the quarter ended September 30, 2011. Results reflected an increase of \$722,000 in net interest income, a \$470,000 increase in non-interest income, a decrease of \$1.5 million in the provision for loan losses, a \$2.2 million increase in non-interest expense, and a \$250,000 increase in income tax expense.

Interest income. Interest income was \$22.7 million for both the three months ended September 30, 2012 and September 30, 2011. Interest income on loans increased by \$1.1 million, primarily attributable to an increase in the average balances of \$145.6 million, partially offset by a decrease of 37 basis points in the yield earned. Interest income on loans for the quarter ended September 30, 2012 reflected prepayment loan income of \$542,000 compared to \$331,000 for the quarter ended September 30, 2011. Interest income on mortgage backed securities decreased by \$947,000, primarily attributable to a decrease of 38 basis points in the yield earned partially offset by an increase in the average balance of \$13.2 million.

Interest expense. Interest expense decreased \$751,000, or 11.7%, to \$5.7 million for the three months ended September 30, 2012, from \$6.4 million for the three months ended September 30, 2011. The decrease was comprised of a decrease of \$664,000 in interest expense on deposits and a decrease in interest expense on borrowings of \$87,000. The decrease in interest expense on deposits was attributed to a decrease in the cost of interest bearing deposits of 22 basis points to 0.70% from 0.92%, partially offset by an increase in average balance of interest bearing deposit accounts of \$60.4 million, or 4.5%, to \$1.39 billion for the three months ended September 30, 2012, from \$1.33 billion for the three months ended September 30, 2011. The decrease in interest expense on borrowings was attributed to a decrease in the cost of 39 basis points to 2.60% for the three months ended September 30, 2012 from 2.99% for the three months ended September 30, 2011, partially offset by an increase in average balances of borrowings of \$54.4 million, or 12.3%, to \$496.6 million for the three months ended September 30, 2012 from \$442.2 million for the three months ended September 30, 2011.

Net Interest Income. Net interest income increased \$722,000, or 4.4%, as average interest-earning assets increased by 6.7% to \$2.33 billion. The increase in average interest-earning assets was due primarily to increases in average loans outstanding of \$145.6 million and in average mortgage-backed securities of \$13.2 million, partially offset by a decrease in average interest-earning deposits of \$12.4 million. Rates paid on interest-bearing liabilities decreased 24 basis points to 1.20% for the current quarter as compared to 1.44% for the 2011 quarter. This was partially offset by a 26 basis point decrease in yields earned on interest earning assets to 3.88% for the current quarter as compared to 4.14% for the 2011 quarter.

Provision for Loan Losses. The provision for loan losses was \$502,000 for the quarter ended September 30, 2012, a decrease of \$1.5 million, or 74.9%, from the \$2.0 million provision recorded in the quarter ended September 30, 2011. The decrease in the provision for loan losses was due primarily to a shift in the composition of our loan portfolio to multifamily loans, which generally require lower general reserves than our other commercial real estate loans, and a decrease in non-performing loans during the quarter ended September 30, 2012 as compared to the prior year period. During the quarter ended September 30, 2012, we recorded net charge-offs of \$475,000 compared to net charge-offs of \$17,000 for the quarter ended September 30, 2011.

Table of Contents

Non-interest Income. Non-interest income increased \$470,000, or 37.9%, to \$1.7 million for the quarter ended September 30, 2012, as compared to \$1.2 million for the quarter ended September 30, 2011. This increase was primarily a result of an increase in gains on securities transactions, net, of \$699,000, to income of \$428,000 for the quarter ended September 30, 2012, compared to a loss of \$271,000 for the quarter ended September 30, 2011, partially offset by a decrease in other income of \$170,000.

Non-interest Expense. Non-interest expense increased \$2.2 million, or 22.9%, for the quarter ended September 30, 2012, as compared to the quarter ended September 30, 2011, due primarily to compensation and employee benefits increasing by \$1.1 million primarily related to increased staff associated with branch openings and acquisitions, an increase in occupancy expense of \$516,000 primarily related to new branches and the renovation of existing branches, an increase of \$106,000 in data processing fees primarily related to conversion costs associated with the Federal Deposit Insurance Corporation-assisted transaction, a \$302,000 increase in professional fees primarily related to merger activity and an increase in other non-interest expense of \$201,000.

Income Tax Expense. We recorded income tax expense of \$2.3 million for the quarter ended September 30, 2012, compared to \$2.0 million for the quarter ended September 30, 2011. The effective tax rate for the quarter ended September 30, 2012 was 37.0%, as compared to 35.5% for the quarter ended September 30, 2011. The increase in the effective tax rate was primarily attributable to merger related expenses from the Flatbush Federal transaction, which are not deductible for tax purposes.

Comparison of Operating Results for the Nine Months Ended September 30, 2012 and 2011

Net income. Net income was \$12.8 million for the nine months ended September 30, 2012, as compared to \$13.0 million for the nine months ended September 30, 2011. Results reflected an increase of \$3.1 million in net interest income, a \$576,000 increase in non-interest income, a decrease of \$3.5 million in the provision for loan losses, a \$7.1 million increase in non-interest expense, and a \$167,000 increase in income tax expense.

Interest income. Interest income increased \$1.0 million, or 1.5%, to \$68.2 million for the nine months ended September 30, 2012, from \$67.2 million for the nine months ended September 30, 2011. The increase was primarily due to an increase in interest income on loans of \$5.9 million. The increase in interest income on loans was due to an increase in the average balances of \$185.8 million, partially offset by a decrease of 29 basis points in the yield earned. Interest income on loans for the nine months ended September 30, 2012 reflected prepayment loan income of \$956,000 compared to \$491,000 for the nine months ended September 30, 2011. This increase in interest income on loans was partially offset by a decrease in interest income on mortgage backed securities of \$4.4 million. The decrease in interest income on mortgage backed securities was primarily attributable to a decrease of 41 basis points in the yield earned and a decrease in the average balance of \$55.6 million.

Interest expense. Interest expense decreased \$2.0 million, or 10.5%, to \$17.3 million for the nine months ended September 30, 2012, from \$19.3 million for the nine months ended September 30, 2011. The decrease resulted from a decrease of \$2.0 million in interest expense on deposits. Interest expense on borrowings was relatively flat compared to the prior year period. The decrease in interest expense on deposits was due to a decrease in the cost of interest bearing deposits of 24 basis points to 0.73% for the nine months ended September 30, 2012, from 0.97% for the nine months ended September 30, 2011, partially offset by an increase in the average balance of interest bearing deposit accounts of \$71.8 million, or 5.6%, to \$1.36 billion for the nine months ended September 30, 2012 from \$1.29 billion for the nine months ended September 30, 2011.

Net Interest Income. Net interest income increased \$3.1 million, or 6.4%, as interest-earning assets increased by 5.5% to \$2.28 billion. The increase in average interest-earning assets was due primarily to an increase in average loans outstanding of \$185.8 million, partially offset by decreases in average interest-earning deposits of \$10.3 million, average mortgage-backed securities of \$55.6 million, and average other securities of \$5.4 million. Rates paid on interest-bearing liabilities decreased 22 basis points to 1.24% as compared to 1.46% for the prior-year comparable period. This was partially offset by a 16 basis point decrease in yields earned on interest-earning assets to 4.00% as compared to 4.16% for the prior-year comparable period.

Table of Contents

Provision for Loan Losses. The provision for loan losses was \$1.7 million for the nine months ended September 30, 2012, a decrease of \$3.4 million, or 67.5%, from the \$5.1 million provision recorded in the nine months ended September 30, 2011. The decrease in the provision for loan losses was due primarily to a shift in the composition of our loan portfolio to multifamily loans, which generally require lower general reserves than our other commercial real estate loans, and a decrease in non-performing loans during the nine months ended September 30, 2012, as compared to the nine months ended September 30, 2011. During both the nine months ended September 30, 2012 and 2011, we recorded net charge-offs of \$1.4 million.

The following table sets forth activity in our allowance for loan losses for the periods indicated.

	At or For the Nine Months Ended September 30, 2012 2011 (Dollars in Thousands)	
Balance at beginning of period	\$ 26,836	\$ 21,819

Table of Contents

The following tables set forth the allowance for loan losses allocated by loan category and the percent of allowance in each category to total allocated allowance at September 30, 2012. The allowance for loan losses allocated to each category is not necessarily indicative of future losses in any particular category and does not restrict the use of the allowance to absorb losses in other categories.

	At September 30, 2012	
	Allowance for Loan Losses	Percent of Allowance in Each Category to Total Allocated Allowance
	(Dollars in thousands)	
Real estate loans:		
Commercial	\$ 13,747	53.46%
One- to four-family residential	600	2.33
Construction and land	969	3.77
Multifamily	7,526	29.27
Home equity and lines of credit	613	2.38
Commercial and industrial	2,219	8.63

 Total allocated allowance	 25,715	 100.00%
 Unallocated	 1,354	
 Total	 \$ 27,069	

Non-interest Income. Non-interest income increased \$576,000, or 8.8%, to \$7.1 million for the nine months ended September 30, 2012, as compared to \$6.5 million for the nine months ended September 30, 2011. This increase was primarily a result of a \$104,000 increase in fees and service charges for customer services, a decrease in losses on other-than-temporary-impairment of securities of \$409,000 and an increase in other income of \$44,000, an increase in gains on securities transactions, net, of \$115,000, to \$2.5 million for the nine months ended September 30, 2012, compared to \$2.4 million for the nine months ended September 30, 2011, partially offset by a decrease in income on bank owned life insurance of \$96,000.

Non-interest Expense. Non-interest expense increased \$7.1 million, or 24.4%, to \$36.4 million for the nine months ended September 30, 2012, as compared to \$29.3 million for the nine months ended September 30, 2011, due primarily to compensation and employee benefits increasing by \$2.8 million primarily related to increased staff due to branch openings and acquisitions, an increase in occupancy expense of \$1.7 million primarily relating to new branches and the renovation of existing branches, an increase of \$775,000 in data processing fees primarily related to conversion costs associated with the Federal Deposit Insurance Corporation-assisted transaction, a \$1.2 million increase in professional fees related to merger activity and an increase in other non-interest expense of \$694,000.

Income Tax Expense. We recorded income tax expense of \$7.1 million for the nine months ended September 30, 2012, compared to \$7.0 million for the nine months ended September 30, 2011. The effective tax rate for the nine months ended September 30, 2012 was 35.8%, as compared to 34.9% for the nine months ended September 30, 2011. The increase in the effective tax rate was primarily attributable to merger related expenses from the Flatbush Federal transaction, which are not deductible for tax purposes.

Table of Contents

Average Balances and Yields. The following tables set forth average balance sheets, average yields and costs, and certain other information for the periods indicated. No tax-equivalent yield adjustments have been made, as we had no tax-free interest-earning assets during the periods. All average balances are daily average balances based upon amortized costs. Non-accrual loans were included in the computation of average balances. The yields set forth below include the effect of deferred fees, discounts, and premiums that are amortized or accreted to interest income or interest expense.

Net interest margin (4)			2.99%			2.96%
Average interest-earning assets to interest-bearing liabilities	122.88%			122.17%		

(1) Annualized.

(2) Net interest rate spread represents the difference between the weighted average yield on interest-earning assets and the weighted average cost of interest-bearing liabilities.

(3) Net interest-earning assets represent total interest-earning assets less total interest-bearing liabilities.

(4) Net interest margin represents net interest income divided by average total interest-earning assets.

Table of Contents**Rate/Volume Analysis**

The following table presents the effects of changing rates and volumes on our net interest income for the nine months ended September 30, 2012. The rate column shows the effects attributable to changes in rate (changes in rate multiplied by prior volume). The volume column shows the effects attributable to changes in volume (changes in volume multiplied by prior rate). The total column represents the sum of the prior columns. For purposes of this table, changes attributable to both rate and volume, which cannot be segregated, have been allocated proportionately based on the changes due to rate and the changes due to volume.

	Nine Months Ended September 30, 2012 vs. 2011

Asset Quality***Purchased Credit Impaired Loans***

PCI loans were recorded at estimated fair value using expected future cash flows deemed to be collectible on the date acquired. Based on its detailed review of PCI loans and experience in loan workouts, management believes it has a reasonable expectation about the amount and timing of future cash flows and accordingly has classified PCI loans (\$77.4 million at September 30, 2012 and \$88.5 million at December 31, 2011) as accruing, even though they may be contractually past due. At September 30, 2012, based on recorded contractual principal, 5.7% of PCI loans were past due 30 to 89 days, and 11.5% were past due 90 days or more. At December 31, 2011, based on recorded contractual principal, 9.0% of PCI loans were past due 30 to 89 days, and 16.1% were past due 90 days or more, as compared to 8.0% and 13.9% at October 14, 2011. The amount and timing of expected cash flows as of September 30, 2012 did not change significantly from the October 2011 acquisition date.

Table of Contents**Originated loans**

The discussion that follows relates to originated loans, both held-for-investment and held-for-sale.

The following table shows total non-performing assets for the current and previous four quarters and also shows, for the same dates, non-performing originated loans to total loans, troubled debt restructurings on which interest is accruing, and accruing loans delinquent 30 to 89 days.

Total non-performing loans	\$ 33,258	\$ 43,866

Table of Contents

Total Non-accruing Loans. Total non-accruing loans decreased \$10.6 million to \$33.2 million at September 30, 2012, from \$43.8 million at December 31, 2011. This decrease was primarily attributable to loans held-for-sale of \$3.4 million sold during the nine months ended September 30, 2012, \$1.4 million of loans returned to accrual status, \$428,000 of pay-offs and principal pay-downs, charge-offs of \$1.1 million, the sale of \$7.7 million of loans held-for-investment and the transfer of \$166,000 to other real estate owned. The above decreases in non-accruing loans during the nine months ended September 30, 2012 were partially offset by \$3.1 million of loans being placed on non-accrual status and advances of \$561,000 during the nine months ended September 30, 2012.

Delinquency Status of Total Non-accruing Loans. Generally, loans are placed on non-accrual status when they become 90 days or more delinquent, and remain on non-accrual status until they are brought current, have a minimum of six months of performance under the loan terms, and factors indicating reasonable doubt about the timely collection of payments no longer exist. Therefore, loans may be current in accordance with their loan terms, or may be less than 90 days delinquent, and still be on non-accrual status.

The following tables detail the delinquency status of non-accruing loans (held-for-investment and held-for-sale) at September 30, 2012 and December 31, 2011. All delinquent loans in the following two tables are classified as held-for-investment, with the exception of \$3.4 million of loans held-for-sale at December 31, 2011.

	September 30, 2012			Total

Five Largest Non-accruing Loans. A discussion of the five largest non-accrual loans at September 30, 2012 follows. The carrying value of these loans totaled \$17.8 million, or 53.6% of total non-accrual loans of \$33.2 million at September 30, 2012.

Edgar Filing: Northfield Bancorp, Inc. - Form 424B3

An owner-occupied commercial real estate relationship with a carrying value of \$8.1 million. The business and collateral are located in New Jersey. The real estate collateral consists of a first mortgage on a manufacturing facility and subordinated mortgages on other real estate. At September 30, 2012, the relationship was performing under a restructuring agreement that commenced in March 2011, which reduced the borrower's debt service payments and requires monthly payments of principal and interest. The manufacturing facility was appraised for \$8.0 million in December 2011. Because of the nature of the collateral, the appraiser relied on the cost

Table of Contents

and sales approaches to value. The other collateral includes a subordinated mortgage on the primary residence of one of the principals that was appraised for \$1.9 million in December 2011 and is subordinate to a first mortgage of less than \$400,000. The loans are personally guaranteed by the principals.

A commercial real estate loan with a carrying value of \$3.0 million. The real estate collateral is a first mortgage on a New Jersey property primarily used as a recreational facility with some retail usage. The borrower is now repositioning the property at his own cost by converting the recreational portion to retail usage and the project is expected to be completed by the middle of 2013. The loan was restructured in early 2010 to reduce the borrower's debt service and required interest only payments. Beginning in December 2011, the borrower's monthly payment included principal and interest. The borrower was performing in accordance with the restructured terms as of September 30, 2012. The property was appraised on an as is basis for \$4.9 million in November 2010. The capitalization rate utilized in the appraisal was 8%, and the loan is personally guaranteed by the principal.

A commercial real estate loan with a carrying value of \$2.9 million. The real estate collateral consists of a first mortgage on an office building in Staten Island, New York. Northfield Bank has filed a foreclosure action and a lock box is in place to control rent receipts. The property was appraised in November 2011 for \$5.0 million. The capitalization rate utilized in the appraisal was 8.1%, and the loan is personally guaranteed by the principal.

A construction loan with a carrying value of \$2.1 million. The collateral is an eight-unit condominium construction project in New York City. A new sponsor assumed control of the project in December 2011 and the project is nearly complete. As of September 30, 2012, six units were under contract and marketing activity continues on the remaining two units. The property was appraised in November 2011 for \$3.6 million based on the gross sellout value of the completed units. The gross listing price for the eight units is in excess of \$3.5 million. Closings of the sold units are expected to begin in the fourth quarter of 2012.

A commercial real estate loan with a carrying value of \$1.7 million. The real estate collateral is an owner-occupied commercial real estate building located in Middlesex County, New Jersey. The business slowed in 2010. The borrower has performed under an interest-only debt restructure for the past 24 months. On July 1, 2012, the loan was returned to contractual terms. The property was appraised in June 2012 for \$1.9 million.

Loans Subject to Restructuring Agreements. Included in non-accruing loans are loans subject to restructuring agreements totaling \$21.0 million and \$23.3 million at September 30, 2012, and December 31, 2011, respectively. At September 30, 2012, \$17.8 million, or 84.8% of the \$21.0 million, were performing in accordance with their restructured terms, as compared to \$19.2 million, or 82.3%, at December 31, 2011.

We also hold loans subject to restructuring agreements and still accruing, which totaled \$24.1 million and \$18.3 million at September 30, 2012 and December 31, 2011, respectively. At September 30, 2012, \$21.7 million, or 90.1% of the \$24.1 million, were performing in accordance with their restructured terms.

Table of Contents

The following table details the amounts and categories of the loans subject to restructuring agreements by loan type as of September 30, 2012 and December 31, 2011.

	At September 30, 2012		At December 31, 2011	
	Non-Accruing	Accruing	Non-Accruing	Accruing
	(Dollars in Thousands)			
Troubled debt restructurings:				
Real estate loans:				
Commercial	\$ 17,834	\$ 20,204	\$ 20,420	\$ 13,389
One- to four-family residential	539	524		2,532
Construction and land	2,070		1,709	
Multifamily		2,049	523	1,552

Commercial and industrial	451	962	547	876
Total	\$ 20,990	\$ 24,099	\$ 23,301	\$ 18,349
Performing in accordance with restructured terms	84.8%	90.1%	82.3%	69.0%

Loans 90 Days or More Past Due and Still Accruing and Other Real Estate Owned. Loans 90 days or more past due and still accruing decreased \$48,000 to \$37,000 at September 30, 2012, as compared to \$85,000 at December 31, 2011. Loans 90 days or more past due and still accruing at September 30, 2012, are considered well-secured and in the process of collection.

Other real estate owned declined to \$633,000 at September 30, 2012, as compared to \$3.4 million at December 31, 2011 due primarily to sales of \$2.4 million.

Delinquency Status of Accruing Loans 30 to 89 Days Delinquent. Loans 30 to 89 days delinquent and on accrual status at September 30, 2012 totaled \$10.0 million, a decrease of \$11.1 million from the December 31, 2011 balance of \$21.1 million. The following tables set forth delinquencies for accruing loans by type and by amount at September 30, 2012 and December 31, 2011.

FORWARD-LOOKING STATEMENTS

This prospectus contains forward-looking statements, which can be identified by the use of words such as estimate, project, believe, intend, anticipate, plan, seek, expect and words of similar meaning. These forward-looking statements include, but are not limited to:

statements of our goals, intentions and expectations;

statements regarding our business plans, prospects, growth and operating strategies;

statements regarding the quality of our loan and investment portfolios; and

estimates of our risks and future costs and benefits.

These forward-looking statements are based on current beliefs and expectations of our management and are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond our control. In addition, these forward-looking statements are subject to assumptions with respect to future business strategies and decisions that are subject to change.

The following factors, among others, could cause actual results to differ materially from the anticipated results or other expectations expressed in the forward-looking statements:

general economic conditions, either nationally or in our market areas, that are worse than expected;

competition among depository and other financial institutions;

inflation and changes in the interest rate environment that reduce our margins and yields or reduce the fair value of financial instruments;

adverse changes in the securities markets;

changes in laws or government regulations or policies affecting financial institutions, including changes in regulatory fees and capital requirements;

our ability to manage operations in the current economic conditions;

our ability to enter new markets successfully and capitalize on growth opportunities;

our ability to successfully integrate acquired entities;

Edgar Filing: Northfield Bancorp, Inc. - Form 424B3

changes in consumer spending, borrowing and savings habits;

changes in accounting policies and practices, as may be adopted by the bank regulatory agencies, the Financial Accounting Standards Board, the Securities and Exchange Commission or the Public Company Accounting Oversight Board;

changes in our organization, compensation and benefit plans;

changes in the level of government support for housing finance;

Table of Contents

Hurricane Sandy negatively impacting our asset quality and earnings more than initially expected;

significant increases in our loan losses; and

changes in the financial condition, results of operations or future prospects of issuers of securities that we own.

Because of these and other uncertainties, our actual future results may be materially different from the results indicated by these forward-looking statements. Please see Risk Factors beginning on page 17.

HOW WE INTEND TO USE THE PROCEEDS FROM THE OFFERING

Although we cannot determine what the actual net proceeds from the sale of the shares of common stock in the offering will be until the offering is completed, we anticipate that the net proceeds will be between \$294.8 million and \$399.6 million.

We intend to distribute the net proceeds as follows:

	Based Upon the Sale at \$10.00 Per Share of					
	31,025,000 Shares		36,500,000 Shares		41,975,000 Shares	
	Amount	Percent of Net Proceeds	Amount	Percent of Net Proceeds	Amount	Percent of Net Proceeds
	(Dollars in thousands)					
Offering proceeds	\$ 310,250		\$ 365,000		\$ 419,750	
Less offering expenses	15,438		17,770		20,102	
Net offering proceeds	\$ 294,812	100.0%	\$ 347,230	100.0%	\$ 399,648	100.0%
Distribution of net proceeds:						
To Northfield Bank	\$ 147,406	50.0%	\$ 173,615	50.0%	\$ 199,824	50.0%
To fund loan to employee stock ownership plan	\$ 12,410	4.2%	\$ 14,600	4.2%	\$ 16,790	4.2%
Retained by Northfield-Delaware (1)	\$ 134,996	45.8%	\$ 159,015	45.8%	\$ 183,034	45.8%

(1) In the event the stock-based benefit plan providing for stock awards and stock options is approved by stockholders, and assuming shares are purchased for the stock awards at \$10.00 per share, an additional \$12.4 million, \$14.6 million and \$16.8 million of net proceeds will be used by Northfield-Delaware. In this case, the net proceeds retained by Northfield-Delaware would be \$135.0 million, \$159.0 million and \$183.0 million, respectively, at the minimum, midpoint and maximum of the offering range.

Payments for shares of common stock made through withdrawals from existing deposit accounts will not result in the receipt of new funds for investment but will result in a reduction of Northfield Bank's deposits. The net proceeds may vary because total expenses relating to the offering may be more or less than our estimates. For example, our expenses would increase if fewer shares were sold in the subscription and community offerings and more in the syndicated or firm commitment underwritten offering than we have assumed. In addition, amounts shown for the distribution of the net proceeds at the minimum of the offering range to fund the loan to the employee stock ownership plan and proceeds to be retained by Northfield-Delaware may change if we exercise our right to have the employee stock ownership plan purchase more than 4% of the shares of common stock offered if necessary to complete the offering at the minimum of the offering range.

Northfield-Delaware may use the proceeds it retains from the offering:

to invest in securities;

Edgar Filing: Northfield Bancorp, Inc. - Form 424B3

to finance the acquisition of financial institutions, although we do not currently have any agreements or understandings regarding any specific acquisition transaction;

Table of Contents

to pay cash dividends to stockholders;

to repurchase shares of our common stock; and

for other general corporate purposes.

See **Our Dividend Policy** for a discussion of our expected dividend policy following the completion of the conversion. Under current federal regulations, we may not repurchase shares of our common stock during the first year following the completion of the conversion, except when extraordinary circumstances exist and with prior regulatory approval, or except to fund management recognition plans (which would require notification to the Federal Reserve Board) or tax qualified employee stock benefit plans.

Northfield Bank may use the net proceeds it receives from the offering:

to fund new loans, with an emphasis on multifamily real estate loans and commercial real estate loans;

to expand its retail banking franchise by establishing or acquiring new branches or by acquiring other financial institutions or other financial services companies as opportunities arise, although we do not currently have any understandings or agreements to acquire a financial institution or other entity;

to enhance existing products and services and to support the development of new products and services;

to invest in mortgage-backed securities and collateralized mortgage obligations, and debt securities issued by the U.S. Government, U.S. Government agencies or U.S. Government sponsored enterprises; and

for other general corporate purposes.

Initially, a substantial portion of the net proceeds will be invested in short-term investments, investment-grade debt obligations and mortgage-backed securities. We have not determined specific amounts of the net proceeds that would be used for the purposes described above. The use of the proceeds outlined above may change based on many factors, including, but not limited to, changes in interest rates, equity markets, laws and regulations affecting the financial services industry, our relative position in the financial services industry, the attractiveness of potential acquisitions to expand our operations, and overall market conditions. The use of the proceeds may also change depending on our ability to receive regulatory approval to establish new branches or acquire other financial institutions.

We expect our return on equity to decrease as compared to our performance in recent years, until we are able to reinvest effectively the additional capital raised in the offering. Until we can increase our net interest income and non-interest income, we expect our return on equity to be below the industry average, which may negatively affect the value of our common stock. See **Risk Factors** **Risks Related to the Offering** Our failure to effectively deploy the net proceeds may have an adverse effect on our financial performance.

OUR DIVIDEND POLICY

After the completion of the conversion, we intend to pay cash dividends on a quarterly basis. Initially, we expect the quarterly dividends to be \$0.06 per share, which equals \$0.24 per share on an annualized basis and an annual yield of 2.4% based on a price of \$10.00 per share.

Table of Contents

We also intend to seek regulatory approval to pay a one-time, special dividend of \$0.25 per share to all Northfield-Delaware stockholders. We cannot assure you that we will obtain such approval or when such approval may be obtained.

The dividend rate and the continued payment of dividends will depend on a number of factors, including our capital requirements, our financial condition and results of operations, tax considerations, statutory and regulatory limitations, and general economic conditions. We cannot assure you that we will pay dividends in the future, or that any such dividends will not be reduced or eliminated.

Northfield-Federal declared its initial dividend during the quarter ended December 31, 2008. Dividends were declared in each subsequent quarterly period through the quarter ended March 31, 2012. This final dividend payment was \$0.06 per share, which equals \$0.24 per share on an annualized basis. Northfield-Federal stopped paying dividends following the March 31, 2012 quarter due to a Federal Reserve Board requirement that a grandfathered mutual holding company, like Northfield Bancorp, MHC, obtain member (depositor) approval and comply with other procedural requirements prior to waiving dividends, which would make dividend waivers impracticable. Northfield Bancorp, MHC had previously received non-objection from the Office of Thrift Supervision and, after July 21, 2011, from the Federal Reserve Board, to waive receipt of all dividend payments on the Northfield-Federal shares owned by Northfield Bancorp, MHC through the dividend paid for the quarter ended March 31, 2012. Cash dividends paid by Northfield-Federal during the three months ended March 31, 2012 were \$1.7 million. Dividends waived by Northfield Bancorp, MHC during the three months ended March 31, 2012 were \$3.0 million.

After the completion of the conversion, Northfield Bank will not be permitted to pay dividends on its capital stock to Northfield-Delaware, its sole stockholder, if Northfield Bank's stockholder's equity would be reduced below the amount of the liquidation account established in connection with the conversion. In addition, Northfield Bank will not be permitted to make a capital distribution if, after making such distribution, it would be undercapitalized. Northfield Bank must generally file an application with the Office of the Comptroller of the Currency for approval of a capital distribution if the total capital distributions for the applicable calendar year exceed the sum of Northfield Bank's net income for that year to date plus its retained net income for the preceding two years or Northfield Bank would not be at least adequately capitalized following the distribution. In addition, any payment of dividends by Northfield Bank to Northfield-Delaware that would be deemed to be drawn from Northfield Bank's bad debt reserves, if any, would require a payment of taxes at the then-current tax rate by Northfield Bank on the amount of earnings deemed to be removed from the reserves for such distribution. Northfield Bank does not intend to make any distribution that would create such a federal tax liability. See [The Conversion and Offering](#) [Liquidation Rights](#). For further information concerning additional federal law and regulations regarding the ability of Northfield Bank to make capital distributions, including the payment of dividends to Northfield-Delaware, see [Taxation](#) [Federal Taxation](#) and [Supervision and Regulation](#) [Capital Distributions](#).

Northfield-Delaware will not be permitted to pay dividends on its common stock if its stockholders' equity would be reduced below the amount of the liquidation account established by Northfield-Delaware in connection with the conversion. However, the source of dividends will depend on the net proceeds retained by Northfield-Delaware and earnings thereon, and dividends from Northfield Bank. In addition, Northfield-Delaware will be subject to state law limitations and federal banking regulatory policy on the payment of dividends. Delaware law generally limits dividends to our capital surplus or, if there is no capital surplus, our net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year.

We will file a consolidated federal tax return with Northfield Bank. Accordingly, it is anticipated that any cash distributions made by us to our stockholders would be treated as cash dividends and not as a non-taxable return of capital for federal tax purposes. Additionally, pursuant to Federal Reserve Board regulations, during the three-year period following the conversion, we will not make any capital distribution to stockholders that would be treated by recipients as a tax-free return of capital for federal income tax purposes.

Table of Contents**MARKET FOR THE COMMON STOCK**

Northfield-Federal's common stock is currently listed on the Nasdaq Global Select Market under the symbol NFBK. Upon completion of the conversion, the new shares of common stock of Northfield-Delaware will replace the existing shares on the Nasdaq Global Select Market and we expect our shares of common stock will also trade on the Nasdaq Global Select Market under the symbol NFBK. In order to list our stock on the Nasdaq Global Select Market, we are required to have at least three broker-dealers who will make a market in our common stock. As of November 8, 2012, Northfield-Federal had approximately 24 registered market makers in its common stock. Sandler O'Neill & Partners, L.P., Jefferies & Company, Inc. and Stifel, Nicolaus & Company, Incorporated have advised us that they intend to make a market in our common stock following the offering, but are under no obligation to do so.

The following table sets forth the high and low trading prices for shares of Northfield-Federal common stock for the periods indicated, as obtained from the Nasdaq Stock Market, and the dividends paid during those periods. As of the close of business on November 8, 2012, there were 41,505,941 shares of common stock outstanding, including 16,159,556 publicly held shares (shares held by stockholders other than Northfield Bancorp, MHC), and approximately 4,679 stockholders of record.

	Price Per Share		Dividends Paid
	High	Low	
2012			
Fourth quarter (through November 7, 2012)	\$ 16.39	\$ 15.53	\$
Third quarter	\$ 16.02	\$ 14.22	\$

First quarter	\$ 13.88	\$ 12.70	\$ 0.05
2010			
Fourth quarter	\$ 13.49	\$ 10.80	\$ 0.05
Third quarter	\$ 13.81	\$ 10.51	\$ 0.05
Second quarter	\$ 15.30	\$ 12.80	\$ 0.05
First quarter	\$ 15.00	\$ 12.29	\$ 0.04

On June 5, 2012, the business day immediately preceding the public announcement of the conversion, and on November 7, 2012, the closing prices of Northfield-Federal common stock as reported on the Nasdaq Global Select Market were \$13.90 per share and \$15.53 per share, respectively. On the effective date of the conversion, all publicly held shares of Northfield-Federal common stock, including shares of common stock held by our officers and directors, will be converted automatically into and become the right to receive a number of shares of Northfield-Delaware common stock determined pursuant to the exchange ratio. See The Conversion and Offering Share Exchange Ratio for Current Stockholders. Options to purchase shares of Northfield-Federal common stock will be converted into options to purchase a number of shares of Northfield-Delaware common stock determined pursuant to the exchange ratio, for the same aggregate exercise price. See Beneficial Ownership of Common Stock.

Table of Contents**HISTORICAL AND PRO FORMA REGULATORY CAPITAL COMPLIANCE**

At June 30, 2012, Northfield Bank exceeded all of the applicable regulatory capital requirements and was considered well capitalized. The table below sets forth the historical equity capital and regulatory capital of Northfield Bank at June 30, 2012, and the pro forma equity capital and regulatory capital of Northfield Bank, after giving effect to the sale of shares of common stock at \$10.00 per share. The table assumes the receipt by Northfield Bank of 50% of the net offering proceeds. See How We Intend to Use the Proceeds from the Offering.

	Northfield Bank Historical at June 30, 2012		Pro Forma at June 30, 2012, Based Upon the Sale in the Offering of (1)

- (1) Does not reflect withdrawals from deposit accounts for the purchase of shares of common stock in the conversion and offering. These withdrawals would reduce pro forma deposits and assets by the amount of the withdrawals.
- (2) Northfield-Federal currently has 10,000,000 authorized shares of preferred stock and 90,000,000 authorized shares of common stock, par value \$0.01 per share. On a pro forma basis, common stock and additional paid-in capital have been revised to reflect the number of shares of Northfield-Delaware common stock to be outstanding.
- (3)

Edgar Filing: Northfield Bancorp, Inc. - Form 424B3

No effect has been given to the issuance of additional shares of Northfield-Delaware common stock pursuant to the exercise of options under one or more stock-based benefit plans. If the plans are implemented within the first year after the closing of the offering, an amount up to 10% of the shares of Northfield-Delaware common stock sold in the offering will be reserved for issuance upon the exercise of options under the plans, subject to adjustment as may be required by federal regulations or policy to reflect stock options previously granted by Northfield-Federal or Northfield Bank so that the total shares available for issuance upon the exercise of stock options does not exceed 10% of Northfield-Delaware's outstanding shares immediately after the conversion and offering. No effect has been given to the exercise of options currently outstanding. See Management.

- (4) The retained earnings of Northfield Bank will be substantially restricted after the conversion. See The Conversion and Offering Liquidation Rights and Supervision and Regulation Capital Distributions.
- (5) Reflects historical stockholders' equity of Flatbush Federal Bancorp, Inc. of \$18.8 million at June 30, 2012 and estimated acquisition adjustments of \$1.5 million.

(footnotes continue on following page)

Table of Contents

(continued from previous page)

- (6) Assumes that 4% of the shares sold in the offering will be acquired by the employee stock ownership plan financed by a loan from Northfield-Delaware. The loan will be repaid principally from Northfield Bank's contributions to the employee stock ownership plan. Since Northfield-Delaware will finance the employee stock ownership plan debt, this debt will be eliminated through consolidation and no liability will be reflected on Northfield-Delaware's consolidated financial statements. Accordingly, the amount of shares of common stock acquired by the employee stock ownership plan is shown in this table as a reduction of total stockholders' equity.
- (7) Assumes a number of shares of common stock equal to 4% of the shares of common stock to be sold in the offering will be purchased for grant by one or more stock-based benefit plans. If the stock-based benefit plans are adopted within 12 months following the conversion, the amount reserved for restricted stock awards would be subject to adjustment as may be required by federal regulations or policy to reflect restricted stock previously granted by Northfield-Federal or Northfield Bank so that the total shares reserved for restricted stock awards does not exceed 4% of Northfield-Delaware's outstanding shares immediately after the conversion and offering. The funds to be used by the plan to purchase the shares will be provided by Northfield-Delaware. The dollar amount of common stock to be purchased is based on the \$10.00 per share subscription price in the offering and represents unearned compensation. This amount does not reflect possible increases or decreases in the value of common stock relative to the subscription price in the offering. Northfield-Delaware will accrue compensation expense to reflect the vesting of shares pursuant to the plan and will credit capital in an amount equal to the charge to operations. Implementation of the plan will require stockholder approval.

Table of Contents

PRO FORMA DATA

The following tables summarize historical data of Northfield-Federal and pro forma data of Northfield-Delaware at and for the six months ended June 30, 2012, and at and for the year ended December 31, 2011. This information is based on assumptions set forth below and in the tables, and should not be used as a basis for projections of market value of the shares of common stock following the conversion and offering.

The net proceeds in the tables are based upon the following assumptions:

- (i) 25% of all shares of common stock will be sold in the subscription and community offerings and 75% of all shares of common stock will be sold in the syndicated or firm commitment underwritten offering;
- (ii) our executive officers and directors, and their associates, will purchase 196,000 shares of common stock;
- (iii) our employee stock ownership plan will purchase 4% of the shares of common stock sold in the offering, with a loan from Northfield-Delaware. The loan will be repaid in substantially equal payments of principal and interest (at the prime rate of interest, calculated as of the date of the origination of the loan) over a period of 30 years. Interest income that we earn on the loan will offset the interest paid by Northfield Bank;
- (iv) the acquisition of Flatbush Federal Bancorp, Inc. had been completed as of the beginning of each period;
- (v) we will pay Sandler O'Neill & Partners, L.P. a fee equal to (a) 1.0% of the aggregate amount of common stock sold in the subscription and community offerings (net of insider purchases and shares purchased by our employee stock ownership plan) up to the first 10% of shares sold in the offering; and (b) 3.0% of the aggregate amount of common stock sold in the subscription and community offerings (net of insider purchases and shares purchased by our employee stock ownership plan) in excess of 10% of the shares sold in the offering;
- (vi) we will pay Sandler O'Neill & Partners, L.P., Jefferies & Company, Inc. and Stifel, Nicolaus & Company, Incorporated and any other broker-dealers participating in the syndicated or firm commitment underwritten offering an aggregate fee of 5% of the aggregate dollar amount of the common stock sold in the syndicated or firm commitment underwritten offering;
- (vii) No fee will be paid with respect to shares of common stock purchased by our qualified and non-qualified employee stock benefit plans, or stock purchased by our officers, directors and employees, and their immediate families, and no fee will be paid with respect to exchange shares; and
- (viii) total expenses of the offering, other than the sales fees and commissions to be paid to Sandler O'Neill & Partners, L.P., Jefferies & Company, Inc. and Stifel, Nicolaus & Company, Incorporated and other broker-dealers, will be \$2.2 million.

We calculated pro forma consolidated net income for the six months ended June 30, 2012, and the year ended December 31, 2011, as if the estimated net proceeds we received had been invested at the beginning of the period at an assumed interest rate of 0.72% (0.43% on an after-tax basis). This represents the yield on the five-year U.S. Treasury Note as of June 30, 2012, which, in light of current market interest rates, we consider to more accurately reflect the pro forma reinvestment rate than the arithmetic average of the weighted average yield earned on our interest earning assets and the weighted average rate paid on our deposits, which is the reinvestment rate generally required by federal regulations.

Table of Contents

We further believe that the reinvestment rate is factually supportable because:

the yield on the U.S Treasury Note can be determined and/or estimated from third-party sources; and

we believe that U.S. Treasury securities are not subject to credit losses due to a U.S. Government guarantee of payment of principal and interest.

We calculated historical and pro forma per share amounts by dividing historical and pro forma amounts of consolidated net income and stockholders' equity by the indicated number of shares of common stock. We adjusted these figures to give effect to the shares of common stock purchased by the employee stock ownership plan. We computed per share amounts for each period as if the shares of common stock were outstanding at the beginning of each period, but we did not adjust per share historical or pro forma stockholders' equity to reflect the earnings on the estimated net proceeds.

The pro forma tables give effect to the implementation of one or more stock-based benefit plans. Subject to the receipt of stockholder approval, we have assumed that the stock-based benefit plans will acquire for restricted stock awards a number of shares of common stock equal to 4% of the shares of common stock sold in the stock offering at the same price for which they were sold in the stock offering. We assume that awards of common stock granted under the plans vest over a five-year period.

We have also assumed that the stock-based benefit plans will grant options to acquire shares of common stock equal to 10% of the shares of common stock sold in the stock offering. In preparing the tables below, we assumed that stockholder approval was obtained, that the exercise price of the stock options and the market price of the stock at the date of grant were \$10.00 per share and that the stock options had a term of ten years and vested over five years. We applied the Black-Scholes option pricing model to estimate a grant-date fair value of \$1.79 for each option. In addition to the terms of the options described above, the Black-Scholes option pricing model assumed an estimated volatility rate of 20.4% for the shares of common stock, a dividend yield of 2.4%, an expected option term of 10 years and a risk-free rate of return of 1.67%.

We may grant options and award shares of common stock under one or more stock-based benefit plans in excess of 10% and 4%, respectively, of the shares of common stock sold in the stock offering and that vest sooner than over a five-year period if the stock-based benefit plans are adopted more than one year following the stock offering.

As discussed under "How We Intend to Use the Proceeds from the Stock Offering," we intend to contribute 50% of the net proceeds from the stock offering to Northfield Bank, and we will retain the remainder of the net proceeds from the stock offering. We will use a portion of the proceeds we retain for the purpose of making a loan to the employee stock ownership plan and retain the rest of the proceeds for future use.

The pro forma table does not give effect to:

withdrawals from deposit accounts for the purpose of purchasing shares of common stock in the stock offering;

our results of operations after the stock offering; or

changes in the market price of the shares of common stock after the stock offering.

The following pro forma information may not be representative of the financial effects of the offering at the dates on which the offering actually occurs, and should not be taken as indicative of future results of operations. Pro forma consolidated stockholders' equity represents the difference between the stated amounts of our assets and liabilities. The pro forma stockholders' equity is not intended to represent the fair market value of the shares of

Table of Contents

common stock and may be different than the amounts that would be available for distribution to stockholders if we liquidated. Moreover, pro forma stockholders' equity per share does not give effect to the liquidation accounts to be established in the conversion or, in the unlikely event of a liquidation of Northfield Bank, to the tax effect of the recapture of the bad debt reserve. See "The Conversion and Offering - Liquidation Rights."

		<i>(footnotes begin on following page)</i>	

Table of Contents

- (1) Assumes that 4% of the shares of common stock sold in the offering will be purchased by the employee stock ownership plan. For purposes of this table, the funds used to acquire these shares are assumed to have been borrowed by the employee stock ownership plan from Northfield-Delaware. Northfield Bank intends to make annual contributions to the employee stock ownership plan in an amount at least equal to the required principal and interest payments on the debt. Northfield Bank's total annual payments on the employee stock ownership plan debt are based upon 30 equal annual installments of principal and interest. Financial Accounting Standards Board Accounting Standards Codification 718-40, Employers' Accounting for Employee Stock Ownership Plans (ASC 718-40) requires that an employer record compensation expense in an amount equal to the fair value of the shares committed to be released to employees. The pro forma adjustments assume that the employee stock ownership plan shares are allocated in equal annual installments based on the number of loan repayment installments assumed to be paid by Northfield Bank, the fair value of the common stock remains equal to the subscription price and the employee stock ownership plan expense reflects an effective combined federal and state tax rate of 40.0%. The unallocated employee stock ownership plan shares are reflected as a reduction of stockholders' equity. No reinvestment is assumed on proceeds contributed to fund the employee stock ownership plan. The pro forma net income further assumes that 20,683, 24,333 and 27,983 shares were committed to be released during the period at the minimum, midpoint and maximum of the offering range, respectively, and in accordance with ASC 718-40, only the employee stock ownership plan shares committed to be released during the period were considered outstanding for purposes of net income per share calculations.
- (2) Assumes that, if approved by Northfield-Delaware's stockholders, one or more stock-based benefit plans purchase an aggregate number of shares of common stock equal to 4% of the shares to be sold in the offering. Such amount is subject to adjustment as may be required by federal regulations or policy to reflect restricted stock previously granted by Northfield-Federal or Northfield Bank (or may be a greater number of shares if the plan is implemented more than one year after completion of the conversion). Stockholder approval of the plans and purchases by the plans may not occur earlier than six months after the completion of the conversion. The shares may be acquired directly from Northfield-Delaware or through open market purchases. Shares in the stock-based benefit plan are assumed to vest over a period of five years. The funds to be used to purchase the shares will be provided by Northfield-Delaware. The table assumes that (i) the stock-based benefit plan acquires the shares through open market purchases at \$10.00 per share, (ii) 10% of the amount contributed to the plan is amortized as an expense during the six months ended June 30, 2012, and (iii) the plan expense reflects an effective combined federal and state tax rate of 40.0%. Assuming stockholder approval of the stock-based benefit plans and that shares of common stock (equal to 4% of the shares sold in the offering) are awarded through the use of authorized but unissued shares of common stock, stockholders would have their ownership and voting interests diluted by approximately 2.38%.
- (3) Assumes that, if approved by Northfield-Delaware's stockholders, one or more stock-based benefit plans grant options to acquire an aggregate number of shares of common stock equal to 10% of the shares to be sold in the offering. Such amount is subject to adjustment as may be required by federal regulations or policy to reflect stock options previously granted by Northfield-Federal or Northfield Bank (or may be a greater number of shares if the plan is implemented more than one year after completion of the conversion). Stockholder approval of the plans may not occur earlier than six months after the completion of the conversion. In calculating the pro forma effect of the stock-based benefit plans, it is assumed that the exercise price of the stock options and the trading price of the common stock at the date of grant were \$10.00 per share, the estimated grant-date fair value determined using the Black-Scholes option pricing model was \$1.79 for each option, the aggregate grant-date fair value of the stock options was amortized to expense on a straight-line basis over a five-year vesting period of the options, and that 25% of the amortization expense (or the assumed portion relating to options granted to directors) resulted in a tax benefit using an assumed tax rate of 40.0%. The actual expense will be determined by the grant-date fair value of the options, which will depend on a number of factors, including the valuation assumptions used in the option pricing model ultimately adopted. Under the above assumptions, the adoption of the stock-based benefit plans will result in no additional shares under the treasury stock method for purposes of calculating earnings per share. There can be no assurance that the actual exercise price of the stock options will be

(footnotes continue on following page)

Table of Contents

(continued from previous page)

- equal to the \$10.00 price per share. If a portion of the shares used to satisfy the exercise of options comes from authorized but unissued shares, our net income per share and stockholders' equity per share would decrease. The issuance of authorized but unissued shares of common stock pursuant to the exercise of options under such plan would dilute stockholders' ownership and voting interests by approximately 5.76%.
- (4) Per share figures include publicly held shares of Northfield-Federal common stock that will be exchanged for shares of Northfield-Delaware common stock in the conversion. See The Conversion and Offering Share Exchange Ratio for Current Stockholders. Net income per share computations are determined by taking the number of shares assumed to be sold in the offering and the number of new shares assumed to be issued in exchange for publicly held shares and, in accordance with ASC 718-40, subtracting the employee stock ownership plan shares which have not been committed for release during the period. See note 1. The number of shares of common stock actually sold and the corresponding number of exchange shares may be more or less than the assumed amounts. Pro forma net income per share has been annualized for purposes of calculating the offering price to pro forma net earnings per share.
- (5) Includes historical stockholders' equity of \$18.8 million at June 30, 2012 for Flatbush Federal Bancorp, Inc. and estimated acquisition adjustments of \$1.6 million. Intangible assets resulting from the acquisition are estimated at \$813,000.
- (6) The retained earnings of Northfield Bank will be substantially restricted after the conversion. See Our Dividend Policy, The Conversion and Offering Liquidation Rights and Supervision and Regulation Capital Distributions.
- (7) Per share figures include publicly held shares of Northfield-Federal common stock that will be exchanged for shares of Northfield-Delaware common stock in the conversion. Stockholders' equity per share calculations are based upon the sum of (i) the number of shares assumed to be sold in the offering and (ii) shares to be issued in exchange for publicly held shares at the minimum, midpoint and maximum of the offering range, respectively. The exchange shares reflect an exchange ratio of 1.2240, 1.4400 and 1.6561 at the minimum, midpoint and maximum of the offering range, respectively. The number of shares actually sold and the corresponding number of exchange shares may be more or less than the assumed amounts.

Table of Contents

- (1) Assumes that 4% of the shares of common stock sold in the offering will be purchased by the employee stock ownership plan. For purposes of this table, the funds used to acquire these shares are assumed to have been borrowed by the employee stock ownership plan from Northfield-Delaware. Northfield Bank intends to make annual contributions to the employee stock ownership plan in an amount at least equal to the required principal and interest payments on the debt. Northfield Bank's total annual payments on the employee stock ownership plan debt are based upon 30 equal annual installments of principal and interest. ASC 718-40 requires that an employer record compensation expense in an amount equal to the fair value of the shares committed to be released to employees. The pro forma adjustments assume that the employee stock ownership plan shares are allocated in equal annual installments based on the number of loan repayment installments assumed to be paid by Northfield Bank, the fair value of the common stock remains equal to the subscription price and the employee stock ownership plan expense reflects an effective combined federal and state tax rate of 40.0%. The unallocated employee stock ownership plan shares are reflected as a reduction of stockholders' equity. No reinvestment is assumed on proceeds contributed to fund the employee stock ownership plan. The pro forma net income further assumes that 41,367, 48,667 and 55,967 shares were committed to be released during the year at the minimum, midpoint and maximum of the offering range, respectively, and in accordance with ASC 718-40, only the employee stock ownership plan shares committed to be released during the period were considered outstanding for purposes of net income per share calculations.
- (2) Assumes that, if approved by Northfield-Delaware's stockholders, one or more stock-based benefit plans purchase an aggregate number of shares of common stock equal to 4% of the shares to be sold in the offering, subject to adjustment as may be required by federal regulations or policy to reflect restricted stock previously granted by Northfield-Federal or Northfield Bank (and may be a greater number of shares if the plan is implemented more than one year after completion of the conversion). Stockholder approval of the plans and purchases by the plans may not occur earlier than six months after the completion of the conversion. The shares may be acquired directly from Northfield-Delaware or through open market purchases. Shares in the stock-based benefit plan are assumed to vest over a period of five years. The funds to be used to purchase the shares will be provided by Northfield-Delaware. The table assumes that (i) the stock-based benefit plan acquires the shares through open market purchases at \$10.00 per share, (ii) 20% of the amount contributed to the plan is amortized as an expense during the year ended December 31, 2011, and (iii) the plan expense reflects an effective combined federal and state tax rate of 40.0%. Assuming stockholder approval of the stock-based benefit plans and that shares of common stock (equal to 4% of the shares sold in the offering) are awarded through the use of authorized but unissued shares of common stock, stockholders would have their ownership and voting interests diluted by approximately 2.38%.
- (3) Assumes that, if approved by Northfield-Delaware's stockholders, one or more stock-based benefit plans grant options to acquire an aggregate number of shares of common stock equal to 10% of the shares to be sold in the offering, subject to adjustment as may be required by federal regulations or policy to reflect stock options previously granted by Northfield-Federal or Northfield Bank (and may be a greater number of shares if the plan is implemented more than one year after completion of the conversion). Stockholder approval of the plans may not occur earlier than six months after the completion of the conversion. In calculating the pro forma effect of the stock-based benefit plans, it is assumed that the exercise price of the stock options and the trading price of the common stock at the date of grant were \$10.00 per share, the estimated grant-date fair value determined using the Black-Scholes option pricing model was \$1.79 for each option, the aggregate grant-date fair value of the stock options was amortized to expense on a straight-line basis over a five-year vesting period of the options, and that 25% of the amortization expense (or the assumed portion relating to options granted to directors) resulted in a tax benefit using an assumed tax rate of 40.0%. The actual expense will be determined by the grant-date fair value of the options, which will depend on a number of factors, including the valuation assumptions used in the option pricing model ultimately adopted. Under the above assumptions, the adoption of the stock-based benefit plans will result in no additional shares under the treasury stock method for purposes of calculating earnings per share. There can be no assurance that the actual exercise price of the stock options will be equal to the \$10.00 price per share. If a portion of the shares used to satisfy the exercise of options comes from authorized but unissued shares, our net income per share and stockholders' equity per share would decrease. The issuance

(footnotes continue on following page)

Table of Contents

(continued from previous page)

- of authorized but unissued shares of common stock pursuant to the exercise of options under such plan would dilute stockholders ownership and voting interests by approximately 5.76%.
- (4) Per share figures include publicly held shares of Northfield-Federal common stock that will be exchanged for shares of Northfield-Delaware common stock in the conversion. See The Conversion and Offering Share Exchange Ratio for Current Stockholders. Net income per share computations are determined by taking the number of shares assumed to be sold in the offering and the number of new shares assumed to be issued in exchange for publicly held shares and, in accordance with ASC 718-40, subtracting the employee stock ownership plan shares which have not been committed for release during the year. See note 1. The number of shares of common stock actually sold and the corresponding number of exchange shares may be more or less than the assumed amounts. Pro forma net income per share has been annualized for purposes of calculating the offering price to pro forma net earnings per share.
- (5) Includes historical stockholders equity of \$14.6 million at December 31, 2011 for Flatbush Federal Bancorp, Inc. and estimated acquisition adjustments of \$1.1 million. Intangible assets resulting from the acquisition are estimated at \$813,000.
- (6) The retained earnings of Northfield Bank will be substantially restricted after the conversion. See Our Dividend Policy, The Conversion and Offering Liquidation Rights and Supervision and Regulation Capital Distributions.
- (7) Per share figures include publicly held shares of Northfield-Federal common stock that will be exchanged for shares of Northfield-Delaware common stock in the conversion. Stockholders equity per share calculations are based upon the sum of (i) the number of shares assumed to be sold in the offering and (ii) shares to be issued in exchange for publicly held shares at the minimum, midpoint and maximum of the offering range, respectively. The exchange shares reflect an exchange ratio of 1.2240, 1.4400 and 1.6561 at the minimum, midpoint and maximum of the offering range, respectively. The number of shares actually sold and the corresponding number of exchange shares may be more or less than the assumed amounts.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS**

This discussion and analysis reflects our consolidated financial statements and other relevant statistical data, and is intended to enhance your understanding of our financial condition and results of operations. The information in this section has been derived from the audited and unaudited consolidated financial statements, which appear beginning on page F-1 of this prospectus. You should read the information in this section in conjunction with the business and financial information regarding Northfield-Federal and the financial statements provided in this prospectus.

Overview

We have a 125-year history of strong performance and commitment to our community. Our principal business consists of accepting deposits, primarily through our retail banking offices, and investing those funds in loans and securities. We consider our competitive products and pricing, local decision making, branch network and capabilities to implement emerging delivery technologies, strong ties to the community, and favorable financial performance as our significant strengths in attracting and retaining customers.

Our market area consists primarily of Staten Island (Richmond County) and Brooklyn (Kings County) in New York, as well as Union and Middlesex counties in New Jersey. Operating in these New York Metropolitan areas, which are characterized by densely populated markets, favorable growth characteristics, and stronger economic trends than national averages, has enabled us to achieve sustained profitability and growth throughout various economic cycles. Our Staten Island franchise, which consists of 12 branches, represents the largest locally-based depository institution, and our 10.6% deposit market share as of June 30, 2011, ranked us fifth in that market. In recent years, we also have expanded into Brooklyn, which is a densely populated market with a population approaching 2.5 million that is primarily served by large national and regional banks; consequently, we believe we have a significant opportunity to capture market share in that market.

Our net income has increased over the past year, and totaled \$16.8 million for the year ended December 31, 2011, compared to \$13.8 million for the year ended December 31, 2010. The increase in net income resulted primarily from our acquisition of First State Bank in October 2011, for which we recorded a bargain-purchase gain, net of tax, of \$3.6 million. Our net income was \$8.9 million for the six months ended June 30, 2012, compared to \$9.3 million for the six months ended June 30, 2011. Although our net interest income before provision for loan losses increased to \$33.9 million for the six months ended June 30, 2012 from \$31.6 million for the six months ended June 30, 2011, and our provision for loan losses decreased to \$1.2 million from \$3.1 million for the same period, net income was negatively affected by an increase in non-interest expense of \$4.9 million, or 25.1%, to \$24.4 million for the six months ended June 30, 2012, as compared to \$19.5 million for the six months ended June 30, 2011. This increase was due to compensation and employee benefits increasing by \$1.7 million, or 16.9%, due to increased staff primarily related to branch openings and the First State Bank transaction, an increase in occupancy expense of \$1.2 million primarily relating to new branches and the renovation of existing branches and an increase of \$669,000 in data processing fees primarily related to conversion costs associated with the First State Bank transaction.

Following the completion of the conversion and offering, we expect our net interest income to increase from the investment of the offering proceeds. We also expect non-interest expenses to increase because of actual and planned growth, as well as from increased compensation expenses associated with the purchase of shares of common stock by our employee stock ownership plan and the possible implementation of one or more stock-based benefit plans, if approved by our stockholders no earlier than six months after the completion of the conversion. For further information, see [Summary Benefits to Management and Potential Dilution to Stockholders Resulting from the Conversion](#); [Risk Factors Risks Related to Our Business](#). Our stock-based benefit plans will increase our expenses and reduce our income; [Management Benefits to be Considered Following Completion of the Conversion](#); and [Risk Factors Risks Related to Our Business](#). Acquisitions may disrupt our business and dilute stockholder value.

Table of Contents

Our business is affected by prevailing general and local economic conditions, particularly market interest rates, and by government policies concerning, among other things, monetary and fiscal affairs and housing. In addition, we are subject to extensive regulations applicable to financial institutions, lending and other operations, privacy, and consumer disclosure.

Business Strategy

Our principal objective is to build long-term value for our stockholders by operating a profitable community-oriented financial institution dedicated to meeting the banking needs of our customers. We have sought to accomplish this objective by focusing on strategies designed to enhance and expand our franchise, increase profitability, and maintain strong asset quality while actively managing our strong capital position. Highlights of each of these strategies are discussed below.

Disciplined expansion through organic growth coupled with opportunistic acquisitions. Since we became a public company in 2007, we have successfully pursued a strategy of organic growth by continuing to leverage our existing franchise and expanding the franchise through *de novo* branching. We believe that the strong demographic profile of our market area will continue to offer opportunities for both deposit and loan growth, particularly if the economy improves. Since 2007, we opened a branch in Staten Island to enhance an already significant presence, added two branches in New Jersey, and expanded into Brooklyn where we have opened four branches and expect to open one more in December 2012. Management intends to focus on growing legacy branches and firmly establishing new branches, and will continue to evaluate future branching opportunities.

While organic growth has been our primary focus, we also have selectively pursued acquisition opportunities in our market area that we believe will enhance our franchise and yield financial benefits for our stockholders. In October 2011, we acquired all the deposits and substantially all the assets of First State Bank from the Federal Deposit Insurance Corporation, and on November 2, 2012, we acquired Flatbush Federal Bancorp, Inc. The First State Bank transaction was immediately accretive to earnings and resulted in a \$3.6 million after-tax bargain purchase gain. The Flatbush Federal Bancorp acquisition also is expected to be accretive to earnings and tangible book value, and added three branches in Brooklyn with approximately \$88.4 million in loans and \$117.5 million in deposits at June 30, 2012.

As a result of our growth strategy, our total assets increased to \$2.46 billion at June 30, 2012 from \$1.39 billion at December 31, 2007. We have achieved this growth while maintaining our focus on profitability, with returns on average assets of 0.75% and 0.72% for the six months ended June 30, 2012, and the year ended December 31, 2011, respectively. We expect to continue this growth strategy following the conversion. While our focus will remain on organic growth, we expect consolidation opportunities, particularly in our New Jersey market area, which is home to numerous smaller financial institutions. We intend to pursue acquisitions that are located in attractive markets, increase our earnings capacity, solidify our existing market share, and increase franchise value. Currently, we do not have any plans or arrangements to acquire any financial institutions. However, we believe that the conversion into a stock holding company structure will better position us to participate in expected consolidation activity by providing a more flexible corporate structure and additional capital resources.

Increased lending, with an emphasis on multifamily real estate loans. We increased our loan portfolio to \$1.07 billion at June 30, 2012 from \$424.2 million at December 31, 2007, and have rebalanced the mix of our earning assets away from securities and into loans as a percentage of our earning assets. Our loan portfolio accounted for 46.2% of our earning assets at June 30, 2012, compared to 33.3% at December 31, 2007. Our loan-to-deposit ratio has increased to 69.5% at June 30, 2012 from 48.4% at December 31, 2007. This growth in our loan portfolio has helped maintain our net interest margin and mitigated the impact of protracted low interest rates on our earnings.

To achieve this growth, and in recognition of the current economic environment, we adjusted our lending focus to emphasize the origination of multifamily real estate loans. At June 30, 2012, our multifamily loan portfolio totaled \$538.3 million, or 50.3% of total loans, compared to \$14.2 million, or 3.3% of total loans, at December 31,

Table of Contents

2007. We include in this category mixed-use properties having more than four residential family units and a business or businesses when the majority of space is utilized for residential purposes. These loans have higher yields than the prevailing rates for securities or residential mortgage loans, and generally have periodic adjustable interest rates and/or shorter terms which assists us in managing our interest rate risk.

We intend to continue to emphasize multifamily lending, and as economic conditions improve, we also anticipate increasing the origination of commercial real estate, commercial and home equity loans.

Enhanced core earnings through improved funding mix and continued emphasis on operational efficiencies. In addition to increasing our loans outstanding, we have made a concerted effort to improve our core funding profile by increasing lower-cost transaction deposit accounts and reducing time deposits and wholesale borrowings. Deposits increased 75.9% to \$1.54 billion at June 30, 2012 from \$877.2 million at December 31, 2007. Also, our ratio of non-time deposits to total deposits increased to 68.7% from 54.1% over the same period. In addition, we intend to pay down maturing high cost borrowings, which would further support our net interest margin.

We also recognize that controlling operating expenses is essential to our long term profitability. Over the last several years, we significantly upgraded our technology capabilities, and we currently offer web-based on-line and mobile banking, remote deposit capture, electronic check clearing, paperless statements, and online business customer cash management. We intend to further capitalize on our technology capabilities to improve operating efficiencies and enhance customer service. Our efficiency ratio for the year ended December 31, 2011 was 53.6%, which compared favorably to the ratio of the SNL Thrift Index of 60.6% for the same period.

Improved asset quality and a reduction in problem assets. Maintaining strong asset quality has been, and will continue to be, a key element of our business strategy. We employ prudent underwriting standards for new loan originations and maintain sound credit administration practices, including early recognition of problem loans and implementation of sound resolutions, including work-outs, charge-offs and sales of problem loans. In addition, substantially all of our loans are secured, predominantly by real estate. We also enhanced our credit administration function by hiring a Senior Credit Officer in 2010 to further develop and oversee a centralized credit administration process. We also retain an independent third party firm that performs semi-annual loan reviews with a primary focus on our commercial portfolio.

While we have experienced increases in delinquent and non-performing loans over the past several years as a result of the difficult economic environment, we have worked aggressively to resolve these problem assets. Our ratio of non-performing assets to total assets decreased to 1.50% at June 30, 2012 from 2.72% at December 31, 2010, a level that compares favorably to the SNL Thrift Index ratio of 2.86% at June 30, 2012. At June 30, 2012, non-performing loans totaled \$34.8 million, or 3.24% of total loans, as compared to \$60.9 million, or 7.36% of total loans at December 31, 2010.

To mitigate our exposure to loan losses over the past several years, we de-emphasized the origination of commercial real estate loans, and construction and land loans. We also increased our allowance for loan losses to \$27.0 million, or 2.52% of loans held for investment, net, at June 30, 2012, from \$5.6 million, or 1.33% of loans held for investment, net, at December 31, 2007. We also work with willing and able borrowers experiencing financial difficulties in order to maximize recoveries and, when circumstances warrant, we may modify existing loan terms and conditions, commonly referred to as troubled debt restructurings (TDRs). At June 30, 2012, we had \$47.1 million of loans classified as TDRs, of which \$25.5 million were accruing interest and \$21.6 million were on non-accrual status. At June 30, 2012, \$40.9 million, or 86.9% of loans subject to restructuring agreements (accruing and non-accruing) were performing in accordance with their restructured terms.

Stockholder-focused management of capital. While we recognize the importance of maintaining a strong capital base to support our long-range business plan, we also strive to manage our capital position, using appropriate capital management tools, to return excess capital to our stockholders. We intend to continue this strategy following completion of the conversion, subject to applicable regulatory restrictions.

Table of Contents

We began paying regular quarterly dividends in the fourth quarter of 2008, and increased the dividend twice from our initial annual rate of \$0.16 to \$0.20 and then to \$0.24, respectively. These dividend increases were accomplished during a period when many depository institutions were reducing or eliminating their dividends. Our average dividend yield for the quarter ended March 31, 2012 was 1.7% compared to 1.2% for the SNL Thrift Index.

Our board of directors decided to delay future dividend payments after our March 2012 dividend, because the Federal Reserve Board currently requires Northfield Bancorp, MHC to obtain a member (depositor) vote before waiving its right to receive dividends from Northfield-Federal. However, following the completion of the conversion we intend to seek regulatory approval to pay a one-time, special dividend of \$0.25 per share to all stockholders, and also resume the payment of regular quarterly dividends.

We have also repurchased a total of \$70.1 million of our common stock since 2009 and \$37.8 million in the year ended December 31, 2011. Under current federal regulations, subject to certain exceptions, we may not repurchase shares of our common stock during the first year following the completion of the conversion. See [How we Intend to Use of Proceeds from the Offering](#).

Critical Accounting Policies

Critical accounting policies are defined as those that involve significant judgments and uncertainties, and could potentially result in materially different results under different assumptions and conditions. We believe that the most critical accounting policies upon which our financial condition and results of operation depend, and which involve the most complex subjective decisions or assessments, are the following:

Allowance for Loan Losses, Impaired Loans, and Other Real Estate Owned. The allowance for loan losses is the estimated amount considered necessary to cover probable and reasonably estimable credit losses inherent in the loan portfolio at the balance sheet date. The allowance is established through the provision for loan losses that is charged against income. In determining the allowance for loan losses, we make significant estimates and judgments. The determination of the allowance for loan losses is considered a critical accounting policy by management because of the high degree of judgment involved, the subjectivity of the assumptions used, and the potential for changes in the economic environment that could result in changes to the amount of the recorded allowance for loan losses.

The allowance for loan losses has been determined in accordance with GAAP. We are responsible for the timely and periodic determination of the amount of the allowance required. We believe that our allowance for loan losses is adequate to cover identifiable losses, as well as estimated losses inherent in our portfolio for which certain losses are probable but not specifically identifiable.

Management performs a formal quarterly evaluation of the adequacy of the allowance for loan losses. The analysis of the allowance for loan losses has a component for originated held-for-investment impaired loan losses, and a component for general loan losses, including unallocated reserves. Management has defined an originated impaired loan to be a loan for which it is probable, based on current information, that we will not collect all amounts due in accordance with the contractual terms of the loan agreement. We have defined the population of originated held-for-investment impaired loans to be all originated non-accrual loans held-for-investment with an outstanding balance of \$500,000 or greater, and all originated loans subject to a troubled debt restructuring. Impaired loans are individually assessed to determine that the loan's carrying value is not in excess of the estimated fair value of the collateral (less cost to sell), if the loan is collateral dependent, or the present value of the expected future cash flows, if the loan is not collateral dependent. Management performs a detailed evaluation of each originated impaired loan and generally obtains updated appraisals as part of the evaluation. In addition, management adjusts estimated fair values down to appropriately consider recent market conditions, our willingness to accept a lower sales price to effect a quick sale, and costs to dispose of any supporting collateral. Determining the estimated fair value of underlying collateral (and related costs to sell) can be difficult in illiquid real estate markets and is subject to significant assumptions and estimates. Management employs an independent third party expert in appraisal preparation and review to ascertain the reasonableness of updated appraisals. Projecting the expected cash flows under troubled debt restructurings is inherently subjective and requires, among other things, an evaluation of the

Table of Contents

borrower's current and projected financial condition. Actual results may be significantly different than our projections, and our established allowance for loan losses on these loans, and could have a material effect on our financial results.

The second component of the allowance for loan losses is the general loss allocation. This assessment excludes impaired originated held-for-investment, trouble debt restructured, held-for-sale and purchased credit-impaired (PCI) loans, with loans being grouped into similar risk characteristics, primarily loan type, loan-to-value (if collateral dependent) and internal credit risk rating. We apply an estimated loss rate to each loan group. The loss rates applied are based on our loss experience as adjusted for our qualitative assessment of relevant changes related to: underwriting standards; delinquency trends; collection, charge-off and recovery practices; the nature or volume of the loan group; changes in lending staff; concentration of loan type; current economic conditions; and other relevant factors considered appropriate by management. In evaluating the estimated loss factors to be utilized for each loan group, management also reviews actual loss history over an extended period of time as reported by the Federal Deposit Insurance Corporation for institutions both nationally and in our market area, during periods that are believed to have been under similar economic conditions. This evaluation is inherently subjective as it requires material estimates that may be susceptible to significant revisions based on changes in economic and real estate market conditions. Actual loan losses may be significantly different than the allowance for loan losses we have established, and could have a material effect on our financial results. We also maintain an unallocated component related to the general loss allocation. Management does not target a specific unallocated percentage of the total general allocation, or total allowance for loan losses. The primary purpose of the unallocated component is to account for the inherent imprecision of the loss estimation process related primarily to periodic updating of appraisals on impaired loans, as well as periodic updating of commercial loan credit risk ratings by loan officers and our internal credit audit process. Generally, management will establish higher levels of unallocated reserves between independent credit audits, and between appraisal reviews for larger impaired loans. Adjustments to the provision for loans due to the receipt of updated appraisals is mitigated by management's quarterly review of real estate market index changes, and reviews of property valuation trends noted in current appraisals being received on other impaired and unimpaired loans. These changes in indicators of value are applied to impaired loans that are awaiting updated appraisals.

This quarterly process is performed by the accounting department, in conjunction with the credit administration department, and approved by the Controller. The Chief Financial Officer performs a final review of the calculation. All supporting documentation with regard to the evaluation process is maintained by the accounting department. Each quarter a summary of the allowance for loan losses is presented by the Controller to the audit committee of the board of directors.

We have a concentration of loans secured by real property located in New York and New Jersey. As a substantial amount of our loan portfolio is collateralized by real estate, appraisals of the underlying value of property securing loans are critical in determining the amount of the allowance required for specific loans. Assumptions for appraisal valuations are instrumental in determining the value of properties. Overly optimistic assumptions or negative changes to assumptions could significantly impact the valuation of a property securing a loan and the related allowance determined. The assumptions supporting such appraisals are reviewed by management and an independent third party appraiser to determine that the resulting values reasonably reflect amounts realizable on the collateral. Based on the composition of our loan portfolio, we believe the primary risks are increases in interest rates, a decline in the economy generally, or a decline in real estate market values in New York or New Jersey. Any one or a combination of these events may adversely affect our loan portfolio resulting in delinquencies, increased loan losses, and future loan loss provisions.

Although we believe we have established and maintained the allowance for loan losses at adequate levels, changes may be necessary if future economic or other conditions differ substantially from our estimation of the current operating environment. Although management uses the information available, the level of the allowance for loan losses remains an estimate that is subject to significant judgment and short-term change. In addition, the Office of the Comptroller of the Currency, as an integral part of their examination process, will review our allowance for loan losses and may require us to recognize adjustments to the allowance based on their judgments about information available to them at the time of their examination.

Table of Contents

We also maintain an allowance for estimated losses on off-balance sheet credit risks related to loan commitments and standby letters of credit. Management utilizes a methodology similar to its allowance for loan loss methodology to estimate losses on these items. The allowance for estimated credit losses on these items is included in other liabilities and any changes to the allowance are recorded as a component of other non-interest expense.

Real estate acquired by us as a result of foreclosure or by deed in lieu of foreclosure is classified as other real estate owned. When we acquire other real estate owned, we generally obtain a current appraisal to substantiate the net carrying value of the asset. The asset is recorded at the lower of cost or estimated fair value, establishing a new cost basis. Holding costs and declines in estimated fair value result in charges to expense after acquisition.

Purchased Credit-Impaired Loans. Purchased credit-impaired loans, or PCI loans, are subject to our internal credit review. If and when credit deterioration occurs at the loan pool level subsequent to the acquisition date, a provision for credit losses for PCI loans will be charged to earnings for the full amount of the decline in expected cash flows for the pool. Under the accounting guidance of ASC Topic 310-30, for acquired credit impaired loans, the allowance for loan losses on PCI loans is measured at each financial reporting date based on future expected cash flows. This assessment and measurement is performed at the pool level and not at the individual loan level. Accordingly, decreases in expected cash flows resulting from further credit deterioration, on a pool basis, as of such measurement date compared to those originally estimated are recognized by recording a provision and allowance for credit losses on PCI loans. Subsequent increases in the expected cash flows of the loans in each pool would first reduce any allowance for loan losses on PCI loans; and any excess will be accreted prospectively as a yield adjustment. The analysis of expected cash flows for pools incorporates updated pool level expected prepayment rates, default rates, and delinquency levels, and loan level loss severity given default assumptions. The expected cash flows are estimated based on factors which include loan grades established in Northfield Bank's ongoing credit review program, likelihood of default based on observations of specific loans during the credit review process as well as applicable industry data, loss severity based on updated evaluation of cash flows from available collateral, and the contractual terms of the underlying loan agreement. Actual cash flows could differ from those expected, and others provided with the same information could draw different reasonable conclusions and calculate different expected cash flows.

Goodwill. Business combinations accounted for under the acquisition method require us to record as assets on our financial statements goodwill, an unidentifiable intangible asset which is equal to the excess of the purchase price which we pay for another company over the estimated fair value of the net assets acquired. Net assets acquired include identifiable intangible assets such as core deposit intangibles and non-compete agreements. We evaluate goodwill for impairment annually on December 31, and more often if circumstances warrant, and we will reduce its carrying value through a charge to earnings if impairment exists. Future events or changes in the estimates that we use to determine the carrying value of our goodwill or which otherwise adversely affect its value could have a material adverse impact on our results of operations. As of June 30, 2012, goodwill had a carrying value of \$16.2 million.

Securities Valuation and Impairment. Our securities portfolio is comprised of mortgage-backed securities and to a lesser extent corporate bonds, agency bonds, and mutual funds. Our available-for-sale securities portfolio is carried at estimated fair value, with any unrealized gains or losses, net of taxes, reported as accumulated other comprehensive income or loss in stockholders' equity. Our trading securities portfolio is reported at estimated fair value. Our held-to-maturity securities portfolio, consisting of debt securities for which we have a positive intent and ability to hold to maturity, is carried at amortized cost. We conduct a quarterly review and evaluation of the available-for-sale and held-to-maturity securities portfolios to determine if the estimated fair value of any security has declined below its amortized cost, and whether such decline is other-than-temporary. If such decline is deemed other-than-temporary, we adjust the cost basis of the security by writing down the security to estimated fair value through a charge to current period operations. The estimated fair values of our securities are primarily affected by changes in interest rates, credit quality, and market liquidity.

Management is responsible for determining the estimated fair value of the securities in our portfolio. In determining estimated fair values, each quarter management utilizes the services of an independent third-party

Table of Contents

service, recognized as a specialist in pricing securities. The independent pricing service utilizes market prices of same or similar securities whenever such prices are available. Prices involving distressed sellers are not utilized in determining fair value, if identifiable. Where necessary, the independent third party pricing service estimates fair value using models employing techniques such as discounted cash flow analyses. The assumptions used in these models typically include assumptions for interest rates, credit losses, and prepayments, utilizing observable market data, where available. Where the market price of the same or similar securities is not available, the valuation becomes more subjective and involves a high degree of judgment. In addition, we compare securities prices to a second independent pricing service that is utilized as part of our asset liability risk management process and analyze significant anomalies in pricing including significant fluctuations, or lack thereof, in relation to other securities. At June 30 and March 31, 2012, and for each quarter end in 2011, all securities were priced by an independent third party pricing service, and management made no adjustment to the prices received.

Determining that a security's decline in estimated fair value is other-than-temporary is inherently subjective, and becomes increasing difficult as it relates to mortgage-backed securities that are not guaranteed by the U.S. Government, or a U.S. Government Sponsored Enterprise (e.g., Fannie Mae and Freddie Mac). In performing our evaluation of securities in an unrealized loss position, we consider among other things, the severity and duration of time that the security has been in an unrealized loss position and the credit quality of the issuer. As it relates to mortgage-backed securities not guaranteed by the U.S. Government, Fannie Mae, or Freddie Mac, we perform a review of the key underlying loan collateral risk characteristics including, among other things, origination dates, interest rate levels, composition of variable and fixed rates, reset dates (including related pricing indices), current loan to original collateral values, locations of collateral, delinquency status of loans, and current credit support. In addition, for securities experiencing declines in estimated fair values of over 10%, as compared to its amortized cost, management also reviews published historical and expected prepayment speeds, underlying loan collateral default rates, and related historical and expected losses on the disposal of the underlying collateral on defaulted loans. This evaluation is inherently subjective as it requires estimates of future events, many of which are difficult to predict. Actual results could be significantly different than our estimates and could have a material effect on our financial results.

Federal Home Loan Bank Stock Impairment Assessment. Northfield Bank is a member of the Federal Home Loan Bank System, which consists of 12 regional Federal Home Loan Banks, through its membership in the Federal Home Loan Bank of New York. As a member of the Federal Home Loan Bank of New York, Northfield Bank is required to acquire and hold shares of common stock in the Federal Home Loan Bank of New York in an amount determined by a membership investment component and an activity-based investment component. As of June 30, 2012, Northfield Bank was in compliance with its ownership requirement. At June 30, 2012, Northfield Bank held \$14.2 million of Federal Home Loan Bank of New York common stock. In performing our evaluation of our investment in Federal Home Loan Bank of New York stock, on a quarterly basis, management reviews the Federal Home Loan Bank of New York's most recent financial statements and determines whether there have been any adverse changes to its capital position as compared to the trailing period. In addition, management reviews the Federal Home Loan Bank of New York's most recent President's Report in order to determine whether or not a dividend has been declared for the current reporting period. Furthermore, management obtains the credit rating of the Federal Home Loan Bank of New York from an accredited credit rating service to ensure that no downgrades have occurred. At June 30, 2012, it was determined by management that Northfield Bank's investment in Federal Home Loan Bank of New York common stock was not impaired.

Deferred Income Taxes. We use the asset and liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. If it is determined that it is more likely than not that the deferred tax assets will not be realized, a valuation allowance is established. We consider the determination of this valuation allowance to be a critical accounting policy because of the need to exercise significant judgment in evaluating the amount and timing of recognition of deferred tax liabilities and assets, including projections of future taxable income. These judgments and estimates are reviewed quarterly as regulatory and business factors change. A valuation allowance for deferred tax assets may be required if the amounts of taxes

Table of Contents

recoverable through loss carry backs decline, or if we project lower levels of future taxable income. Such a valuation allowance would be established and any subsequent changes to such allowance would require an adjustment to income tax expense that could adversely affect our operating results.

Stock Based Compensation. We recognize the cost of employee services received in exchange for awards of equity instruments based on the grant-date fair value.

We estimate the per share fair value of options on the date of grant using the Black-Scholes option pricing model using assumptions for the expected dividend yield, expected stock price volatility, risk-free interest rate and expected option term. These assumptions are based on our judgments regarding future option exercise experience and market conditions. These assumptions are subjective in nature, involve uncertainties, and, therefore, cannot be determined with precision. The Black-Scholes option pricing model also contains certain inherent limitations when applied to options that are not traded on public markets.

The per share fair value of options is highly sensitive to changes in assumptions. In general, the per share fair value of options will move in the same direction as changes in the expected stock price volatility, risk-free interest rate and expected option term, and in the opposite direction of changes in the expected dividend yield. For example, the per share fair value of options will generally increase as expected stock price volatility increases, risk-free interest rate increases, expected option term increases and expected dividend yield decreases. The use of different assumptions or different option pricing models could result in materially different per share fair values of options.

As our common stock does not have a significant amount of historical price volatility, we utilized the historical stock price volatility of a peer group when pricing stock options.

Comparison of Financial Condition at June 30, 2012 and December 31, 2011

Total assets increased \$87.0 million, or 3.7%, to \$2.46 billion at June 30, 2012, from \$2.38 billion at December 31, 2011. The increase was primarily attributable to an increase in securities available-for-sale of \$122.5 million, partially offset by decreases of \$1.7 million in net loans held-for-investment and \$30.9 million in cash and cash equivalents.

Cash and cash equivalents decreased \$30.9 million, or 47.3%, to \$34.4 million at June 30, 2012, from \$65.3 million at December 31, 2011. We routinely maintain liquid assets in interest-bearing accounts in other well-capitalized financial institutions.

Securities available-for-sale increased \$122.5 million, or 11.1%, to \$1.22 billion at June 30, 2012, from \$1.10 billion at December 31, 2011. The increase was primarily attributable to purchases of \$466.7 million partially offset by maturities and pay-downs of \$217.6 million and sales of \$130.3 million.

Securities held-to-maturity decreased \$785,000, or 21.7%, to \$2.8 million at June 30, 2012, from \$3.6 million at December 31, 2011. The decrease was attributable to maturities and paydowns during the six months ended June 30, 2012.

Originated loans held-for-investment, net, totaled \$990.8 million at June 30, 2012, compared to \$985.9 million at December 31, 2011. The increase was primarily due to an increase in multifamily real estate loans, which increased \$79.9 million, or 17.4%, to \$538.3 million at June 30, 2012, from \$458.4 million at December 31, 2011. This was partially offset by a decrease in insurance premium loans of \$58.6 million, due to the sale of the majority of the portfolio, and in commercial real estate of \$15.8 million. Currently, management is focused on originating multifamily loans, with less emphasis on other loan types.

Table of Contents

Purchased credit-impaired (PCI) loans, acquired as part of the acquisition of First State Bank in a Federal Deposit Insurance Corporation-assisted transaction, totaled \$82.1 million at June 30, 2012 as compared to \$88.5 million at December 31, 2011.

Bank owned life insurance increased \$1.4 million, or 1.8%, from December 31, 2011 to June 30, 2012. The increase resulted from income earned on bank owned life insurance for the six months ended June 30, 2012.

Federal Home Loan Bank of New York stock, at cost, increased \$1.5 million, or 12.1%, to \$14.2 million at June 30, 2012, from \$12.7 million at December 31, 2011. This increase was attributable to an increase in borrowings outstanding with the Federal Home Loan Bank of New York over the same time period.

Premises and equipment, net, increased \$3.1 million, or 15.8%, to \$23.1 million at June 30, 2012, from \$20.0 million at December 31, 2011. The increase was primarily attributable to leasehold improvements made to new branches and the renovation of existing branches.

Other real estate owned decreased \$1.2 million, or 36.3%, to \$2.2 million at June 30, 2012, from \$3.4 million at December 31, 2011. The decrease was attributable to the sales of several properties during the six months ended June 30, 2012.

Other assets decreased \$3.0 million, or 19.7%, to \$12.1 million at June 30, 2012, from \$15.1 million at December 31, 2011. The decrease in other assets was attributable to a decrease in amounts due us from taxing authorities, and a decrease in prepaid Federal Deposit Insurance Corporation insurance premiums due to amortization related to the Federal Deposit Insurance Corporation prepayment of insurance premiums that was made in 2009, partially offset by an increase in prepaid expenses.

Deposits increased \$49.7 million, or 3.3%, to \$1.54 billion at June 30, 2012 compared to \$1.49 billion at December 31, 2011. The increase in deposits was due to an increase in savings and money market accounts of \$29.7 million, or 3.9%, an increase in transaction accounts of \$17.7 million, or 7.1%, and an increase in certificate of deposit accounts (issued by Northfield Bank) of \$5.0 million, or 1.1%. These increases were partially offset by a decrease of \$2.7 million in short-term certificates of deposit originated through the CDARS® Network. Deposits originated through the CDARS® Network totaled \$659,000 at June 30, 2012, and \$3.4 million at December 31, 2011. We utilize the CDARS® Network as a cost-effective alternative to other short-term funding sources.

Borrowings, consisting primarily of repurchase agreements from other financial institutions and Federal Home Loan Bank advances, increased \$31.7 million, or 6.6%, to \$513.6 million at June 30, 2012, from \$481.9 million at December 31, 2011. The increase in borrowings was primarily the result of increased FHLB advances.

Accrued expenses and other liabilities decreased \$1.5 million, to \$15.1 million at June 30, 2012, from \$16.6 million at December 31, 2011. The decrease was primarily a result of a decrease in net accrued taxes.

Total stockholders' equity increased by \$6.2 million to \$388.9 million at June 30, 2012, from \$382.7 million at December 31, 2011. This increase was primarily attributable to net income of \$8.9 million for the six months ended June 30, 2012, a \$1.3 million increase in accumulated other comprehensive income and an increase of \$1.8 million in additional paid-in capital primarily related to the recognition of compensation expense associated with equity awards. The increase was partially offset by \$4.3 million in stock repurchases and the payment of approximately \$1.7 million in dividends.

Comparison of Financial Condition at December 31, 2011 and 2010

Total assets increased \$129.8 million, or 5.8%, to \$2.38 billion at December 31, 2011, from \$2.25 billion at December 31, 2010. The increase was primarily attributable to increases in net loans held-for-investment of \$241.9 million, or 30.0% and cash and cash equivalents of \$21.4 million. This increase was partially offset by a decrease in securities available for sale of \$145.6 million.

Table of Contents

Cash and cash equivalents increased by \$21.4 million, or 48.9%, to \$65.3 million at December 31, 2011, from \$43.9 million at December 31, 2010. Balances fluctuate based on the timing of receipt of security and loan repayments and the redeployment into higher yielding assets, or the funding of deposit or borrowing obligations.

Securities available-for-sale decreased \$145.6 million, or 11.7%, to \$1.18 billion at December 31, 2011, from \$1.24 billion at December 31, 2010. The decrease was primarily attributable to maturities and paydowns of \$403.4 million and sales of \$182.7 million partially offset by purchases of \$427.4 million and an increase of \$10.9 million in net unrealized gains. We routinely sell securities when market pricing presents, in management's assessment, an economic benefit that outweighs holding such securities, and when smaller balance securities become cost prohibitive to carry. In the current low interest rate environment, we have experienced elevated levels of prepayments on mortgage-backed securities that we have reinvested into shorter term securities.

At December 31, 2011, \$949.6 million of the portfolio consisted of residential mortgage-backed securities issued or guaranteed by Fannie Mae, Freddie Mac, or Ginnie Mae. We also held residential mortgage-backed securities not guaranteed by Fannie Mae, Freddie Mac, or Ginnie Mae, referred to as private label securities. The private label securities had an amortized cost of \$39.9 million and an estimated fair value of \$40.5 million at December 31, 2011. These private label securities were in a net unrealized gain position of \$567,000 at December 31, 2011, consisting of gross unrealized gains of \$1.9 million and gross unrealized losses of \$1.3 million. In addition to the above mortgage-backed securities, we held \$100.7 million in securities issued by corporate entities which were all rated investment grade (A- or better) by an accredited credit rating service at December 31, 2011.

Securities held-to-maturity decreased \$1.4 million, or 28.5%, to \$3.6 million at December 31, 2011, from \$5.0 million at December 31, 2010. The decrease was attributable to maturities and paydowns during the year ended December 31, 2011.

Originated loans held-for-investment, net, totaled \$985.9 million at December 31, 2011, as compared to \$827.6 million at December 31, 2010. The increase was primarily in multifamily real estate loans, which increased \$174.7 million, or 61.6%, to \$458.3 million at December 31, 2011, from \$283.6 million at December 31, 2010. Insurance premium loans increased \$14.6 million, or 32.7%, to \$59.1 million and home equity loans increased \$1.5 million, or 5.5%, to \$29.7 million at December 31, 2011. These increases were partially offset by \$7.4 million of originated loans held-for-investment, at amortized cost, being transferred to held-for-sale, at estimated fair value, less costs to sell, of \$3.4 million, resulting in a charge-off to the allowance for loan losses of \$4.0 million. Originated loans held-for-investment also decreased due to decreases in one- to four-family residential loans of \$5.4 million, commercial real estate loans of \$12.5 million, land and construction loans of \$11.9 million, and commercial and industrial loans of \$4.3 million. Currently, management is focused on originating multi-family loans, with less emphasis on other loan types.

PCI loans were \$88.5 million at December 31, 2011. On October 14, 2011, we purchased PCI loans of approximately \$132.4 million, based on the recorded principal balance, net of deferred fees and costs, as part of a Federal Deposit Insurance Corporation-assisted transaction. Management recorded PCI loans at their estimated fair value of \$91.9 million at the date of acquisition.

Bank owned life insurance increased \$3.0 million, or 4.0%, to \$77.8 million at December 31, 2011. The increase resulted from income earned on bank owned life insurance for the year ended December 31, 2011.

Federal Home Loan Bank of New York stock, at cost, increased \$2.9 million, or 29.6%, to \$12.7 million at December 31, 2011, from \$9.8 million at December 31, 2010. This increase was attributable to an increase in borrowings outstanding with the Federal Home Loan Bank of New York over the same time period.

Premises and equipment, net, increased \$3.9 million, or 24.5%, to \$20.0 million at December 31, 2011, from \$16.1 million at December 31, 2010. This increase was primarily attributable to leasehold improvements made to new branches and the renovation of existing branches.

Table of Contents

Other real estate owned increased \$3.2 million to \$3.4 million at December 31, 2011, from \$171,000 at December 31, 2010. This increase was partially attributable to \$1.2 million of properties acquired as part of a Federal Deposit Insurance Corporation-assisted transaction.

Other assets decreased \$3.0 million, or 16.6%, to \$15.1 million at December 31, 2011, from \$18.1 million at December 31, 2010. The decrease in other assets was primarily attributable to a decrease in net deferred tax assets, due to an increase in deferred tax liabilities associated with net unrealized gains on securities available-for-sale and the amortization of prepaid Federal Deposit Insurance Corporation insurance.

Deposits increased \$120.7 million, or 8.8%, to \$1.5 billion at December 31, 2011, from \$1.4 billion at December 31, 2010. The increase in deposits for the year ended December 31, 2011 was due to an increase in transaction accounts of \$67.0 million, or 35.7% as compared to December 31, 2010. This increase was partially offset by a decrease in certificates of deposit accounts (issued by Northfield Bank) of \$7.9 million, or 1.6%, from December 31, 2010 to December 31, 2011, a decrease in savings accounts of \$3.1 million, or 0.9%, from December 31, 2010 and a decrease of \$65.0 million in short-term certificates of deposit originated through the CDARS® Network. We utilize the CDARS® Network as a cost effective alternative to other short-term funding sources. The increase in deposits was also primarily attributable to the Federal Deposit Insurance Corporation-assisted transaction. The acquired deposits were approximately \$109.5 million at December 31, 2011. We continue to focus on our marketing and pricing of our products, which we believe promotes longer-term customer relationships.

Borrowings, consisting primarily of Federal Home Loan Bank advances and repurchase agreements, increased \$90.7 million, or 23.2%, to \$481.9 million at December 31, 2011, from \$391.2 million at December 31, 2010. The increase in borrowings was primarily the result of our increasing longer-term borrowings, taking advantage of, and locking in, lower interest rates, partially offset by maturities during the year ended December 31, 2011.

Accrued expenses and other liabilities decreased \$69.1 million, to \$16.6 million at December 31, 2011, from \$85.7 million at December 31, 2010. The decrease was primarily a result of \$70.7 million owed for securities purchases occurring prior to December 31, 2010, and settling after year end. We had 0 such transactions at December 31, 2011.

Total stockholders' equity decreased by \$14.1 million to \$382.7 million at December 31, 2011, from \$396.7 million at December 31, 2010. The decrease was primarily due to \$37.8 million in stock repurchases and the payment of approximately \$3.7 million in cash dividends. These decreases were partially offset by net income of \$16.8 million for the year ended December 31, 2011, an increase of \$3.2 million in additional paid-in capital primarily related to the recognition of compensation expense associated with equity awards, and an increase in accumulated other comprehensive income of \$6.6 million, related primarily to increases in unrealized gains on securities available for sale, net of tax, due to a decrease in general market interest rates.

On September 9, 2011, our board of directors authorized the continuance of the stock repurchase program. Under the program, we intend to repurchase up to 2,066,379 additional shares, representing approximately 5% of our outstanding shares following the repurchase of the remaining shares authorized under the existing stock repurchase program announced on October 27, 2010. The timing of the repurchases will depend on certain factors, including but not limited to, market conditions and prices, our liquidity and capital requirements, and alternative uses of capital. Any repurchased shares will be held as treasury stock and will be available for general corporate purposes. We are conducting such repurchases in accordance with a Rule 10(b)5-1 trading plan. As of December 31, 2011, we had repurchased (under our current and prior repurchase plans) 5,064, 252 shares of our stock at an average price of \$12.85 per share. We have also repurchased shares of stock from employees to meet minimum tax obligations related to vesting of equity awards. In connection with our announcement that we intend to convert to a fully public company, the board of directors terminated our most recently announced stock repurchase program.

Table of Contents**Comparison of Operating Results for the Six Months Ended June 30, 2012 and 2011**

Net income. Net income was \$8.9 million for the six months ended June 30, 2012, as compared to \$9.3 million for the six months ended June 30, 2011. Results reflected an increase of \$2.3 million in net interest income, a \$106,000 decrease in non-interest income, a decrease of \$2.0 million in the provision for loan losses, a \$4.9 million increase in non-interest expense and an \$83,000 decrease in income tax expense.

Interest income. Interest income increased \$1.1 million, or 2.4%, to \$45.5 million for the six months ended June 30, 2012, from \$44.4 million for the six months ended June 30, 2011. The increase was primarily due to an increase in interest income on loans of \$4.8 million. The increase in interest income of loans was attributed to an increase in the average balances of \$206.3 million, partially offset by a decrease of 26 basis points in the yield earned. This increase was partially offset by a decrease in interest income on mortgage backed securities of \$3.5 million. The decrease in mortgage backed securities was primarily attributable to a decrease of 43 basis points in the yield earned and a decrease in the average balance of \$90.4 million.

Interest expense. Interest expense decreased \$1.2 million, or 9.9%, to \$11.6 million for the six months ended June 30, 2012, from \$12.8 million for the six months ended June 30, 2011. The decrease was due to a decrease of \$1.3 million in interest expense on deposits. Interest expense on borrowings was relatively flat compared to the prior year quarter. The decrease in interest expense on deposits was attributed to a decrease in the cost of interest bearing deposits of 26 basis points to 0.74% from 1.00%, partially offset by an increase in average balance of interest bearing deposit accounts of \$77.6 million, or 6.1%, to \$1.35 billion for the six months ended June 30, 2012 from \$1.27 billion for the six months ended June 30, 2011.

Net Interest Income. Net interest income increased \$2.3 million, or 7.4%, to \$33.9 million for the six months ended June 30, 2012 compared to \$31.6 million for the six months ended June 30, 2011, as interest-earning assets increased by 4.8% to \$2.25 billion. The increase in average interest-earning assets was due primarily to an increase in average loans outstanding of \$206.3 million, partially offset by decreases in average interest-earning assets in other financial institutions of \$9.2 million, mortgage-backed securities of \$90.4 million and other securities of \$5.8 million. The six months ended June 30, 2012 included prepayment loan income of \$414,000 compared to \$248,000 for the six months ended June 30, 2011. Other securities consist primarily of investment-grade shorter-term corporate bonds and government-sponsored enterprise bonds. Rates paid on interest-bearing liabilities decreased 20 basis points to 1.27% for the six months ended June 30, 2012 as compared to 1.47% for the prior-year comparable period. This was partially offset by an 11 basis point decrease in yields earned on interest-earning assets to 4.06% as compared to 4.17% for the prior-year comparable period.

Provision for Loan Losses. The provision for loan losses was \$1.2 million for the six months ended June 30, 2012, a decrease of \$1.9 million, or 62.8%, from the \$3.1 million provision recorded in the six months ended June 30, 2011. The decrease in the provision for loan losses was due primarily to a shift in the composition of our loan portfolio to multifamily loans, which generally require lower general reserves than our other commercial real estate loans, and a decrease in non-performing loans during the six months ended June 30, 2012, as compared to the six months ended June 30, 2011. During the six months ended June 30, 2012, we recorded net charge-offs of \$953,000 compared to net charge-offs of \$1.4 million for the six months ended June 30, 2011.

Non-interest Income. Non-interest income increased \$106,000, or 2.0%, to \$5.4 million for the six months ended June 30, 2012, as compared to \$5.3 million for the six months ended June 30, 2011. This increase was primarily a result of a \$128,000 increase in fees and service charges for customer services, a decrease in losses on other-than-temporary-impairment of securities of \$409,000 and an increase in other income of \$211,000, partially offset by decreases in securities transactions, net of \$584,000 and in income on bank owed life insurance of \$58,000.

Non-interest Expense. Non-interest expense increased \$4.9 million, or 25.1%, to \$24.4 million for the six months ended June 30, 2012, as compared to \$19.5 million for the six months ended June 30, 2011, due primarily to compensation and employee benefits increasing by \$1.7 million, or 16.9%, the increase in compensation and employee benefits was due to increased staff primarily related to branch openings and acquisitions, an increase in

Table of Contents

occupancy expense of \$1.2 million primarily relating to new branches and the renovation of existing branches, an increase of \$669,000 in data processing fees primarily related to conversion costs associated with the transaction with the Federal Deposit Insurance Corporation, a \$728,000 increase in professional fees primarily related to merger activity and an increase in other non-interest expense of \$487,000.

Income Tax Expense. We recorded income tax expense of \$4.8 million for the six months ended June 30, 2012, compared to \$4.9 million for the six months ended June 30, 2011. The effective tax rate for the six months ended June 30, 2012 was 35.3%, as compared to 34.6% for the six months ended June 30, 2011.

Comparison of Operating Results for the Years Ended December 31, 2011 and 2010

Net Income. Net income increased \$3.0 million, or 22.0%, to \$16.8 million for the year ended December 31, 2011, as compared to \$13.8 million for the year ended December 31, 2010, due primarily to an increase of \$3.5 million in net interest income and an increase in non-interest income of \$5.0 million, partially offset by a \$2.5 million increase in the provision for loan losses, an increase of \$2.8 million in non-interest expense and an increase of \$127,000 in income tax expense.

Interest Income. Interest income increased by \$4.5 million, or 5.2%, to \$91.0 million for the year ended December 31, 2011, as compared to \$86.5 million for the year ended December 31, 2010. The increase was primarily the result of an increase in average interest-earning assets of \$175.6 million, or 8.8%. The increase in average interest-earning assets was primarily attributable to an increase in average loans of \$153.5 million, or 19.8%, an increase in average mortgage-backed securities of \$124.3 million, or 13.3%, and an increase in average interest-earning deposits of \$3.0 million, or 6.4%, partially offset by a decrease in securities (other than mortgage-backed securities) of \$108.7 million, or 45.3%. The effect of the increase in average interest-earning assets was partially offset by a decrease of 14 basis points, or 3.2%, in the yield earned to 4.17% for the year ended December 31, 2011, from 4.31% for the year ended December 31, 2010. The rates earned on loans and mortgage-backed securities decreased due to the general decline in market interest rates for these asset types.

Interest Expense. Interest expense increased \$1.0 million, or 4.1%, to \$25.4 million for the year ended December 31, 2011, from \$24.4 million for the year ended December 31, 2010. The increase was attributable to an increase in interest expense on borrowings of \$2.3 million, or 21.5%, partially offset by a decrease in interest expense on deposits of \$1.3 million, or 9.7%. The increase in interest expense on borrowings was primarily attributable to an increase of \$145.7 million, or 44.1%, in average borrowings outstanding, partially offset by a decrease of 52 basis points, or 15.9%, in the cost of borrowings, reflecting lower market interest rates for borrowed funds. The decrease in interest expense on deposits was attributable to a decrease in the cost of interest-bearing deposits of 13 basis points, or 12.1%, to 0.94% for the year ended December 31, 2011, from 1.07% for the year ended December 31, 2010, reflecting lower market interest rates for short-term deposits. The decrease in the cost of deposits was partially offset by an increase of \$41.0 million, or 3.2%, in average interest-bearing deposits outstanding.

Net Interest Income. Net interest income increased \$3.5 million, or 5.7%, as interest-earning assets increased by 8.8% to \$2.2 billion. The general decline in interest rates has resulted in a decline in the yields earned on interest-earning assets by 14 basis points to 4.17% for the current year as compared to 4.31% for the prior year, while rates paid on interest-bearing liabilities decreased 11 basis points to 1.42% for the current year as compared to 1.53% for the prior year. Yields on loans include \$1.4 million in interest income recognized on PCI loans with an average balance of \$19.3 million contributing approximately 4 basis points to the net interest margin. Additionally, net interest income for the year ended December 31, 2011 included prepayment penalties of \$812,000 compared to \$67,000 for the year ended December 31, 2010. The increase in average interest earning assets was due primarily to increases in average loans outstanding of \$153.5 million and \$124.3 million in mortgage-backed securities, partially offset by a decrease in other securities. Other securities consist primarily of investment-grade shorter-term corporate bonds and government-sponsored enterprise bonds.

Provision for Loan Losses. The provision for loan losses was \$12.6 million for the year ended December 31, 2011, an increase of \$2.5 million, or 24.8%, from the \$10.1 million provision recorded in the year ended

Table of Contents

December 31, 2010. The increase in the provision for loan losses in the current year was due primarily to increased charge-offs and increased loan originations partially offset by a shift in the composition of our loan portfolio to multifamily loans, which generally require lower general reserves than other commercial real estate loans, and decreases in non-performing loans during the year ended December 31, 2011, as compared to the year ended December 31, 2010. During the year ended December 31, 2011, we recorded net charge-offs of \$7.6 million compared to net charge-offs of \$3.7 million for the year ended December 31, 2010. Charge-offs for 2011 included \$4.0 million related to the transfer of \$7.4 million of loans to held-for-sale.

Non-interest Income. Non-interest income increased \$5.0 million, or 73.0%, to \$11.8 million for the year ended December 31, 2011, as compared to \$6.8 million for the year ended December 31, 2010. This increase was primarily the result of a \$3.6 million, net of taxes, bargain purchase gain, associated with the Federal Deposit Insurance Corporation-assisted acquisition in October 2011, a \$750,000 increase in gains on security sales, a \$364,000 increase in fees and service charges for customer services, and a \$694,000 increase in income earned on bank owned life insurance, generated by increased cash surrender values, primarily resulting from higher levels of bank owned life insurance. We routinely sell securities when market pricing presents, in management's assessment, an economic benefit that outweighs holding such securities, and when smaller balance securities become cost prohibitive to carry. These increases were partially offset by an increase of \$255,000 in other-than-temporary credit impairment charges recognized on 2 private label mortgage-backed securities and 1 equity mutual fund and a decrease of \$120,000 in other income.

Non-interest Expense. Non-interest expense increased \$2.8 million, or 7.4%, for the year ended December 31, 2011, as compared to the year ended December 31, 2010, due primarily to compensation and employee benefits expense increasing \$2.6 million, which resulted primarily from increases in employees related to additional branch and operations personnel, and to a lesser extent, salary adjustments effective January 1, 2011. Occupancy expense increased \$1.1 million, or 22.3%, primarily due to increases in rent and amortization of leasehold improvements relating to new branches and the renovation of existing branches. These increases were partially offset by decreased professional fees of \$1.3 million, primarily resulting from the expensing of approximately \$1.8 million in costs incurred for our postponed, second-step stock offering in the prior year partially offset by increased costs related to loan workouts.

Income Tax Expense. We recorded income tax expense of \$6.5 million and \$6.4 million for the years ended December 31, 2011 and 2010, respectively. The effective tax rate for the year ended December 31, 2011 was 27.8%, as compared to 31.6% for the year ended December 31, 2010. The decrease in rate was due primarily to the \$5.9 million bargain purchase gain recorded in the Federal Deposit Insurance Corporation-assisted transaction being recorded net of tax of \$2.3 million and lower taxable income in the current year as a result of an increase in tax-exempt bank owned life insurance income of \$694,000.

Comparison of Operating Results for the Years Ended December 31, 2010 and 2009

Net Income. Net income increased \$1.7 million or 14.2%, to \$13.8 million for the year ended December 31, 2010, from \$12.1 million for the year ended December 31, 2009, due primarily to an increase of \$5.5 million in net interest income, an increase of \$1.4 million in non-interest income, and a decrease of \$248,000 in income tax expense, partially offset by an increase of \$4.4 million in non-interest expense, and an increase of \$1.0 million in provision for loan losses.

Interest Income. Interest income increased by \$927,000, or 1.1%, to \$86.5 million for the year ended December 31, 2010, as compared to \$85.6 million for the year ended December 31, 2009. The increase was primarily the result of an increase in average interest-earning assets of \$213.0 million, or 11.9%. The increase in average interest-earning assets was primarily attributable to an increase in average loans of \$121.7 million, or 18.6%, an increase in average mortgage-backed securities of \$16.2 million, or 1.8%, and an increase in securities (other than mortgage-backed securities) of \$112.9 million, or 88.9%, partially offset by a decrease in average interest-earning deposits of \$37.2 million, or 44.7%. The effect of the increase in average interest-earning assets was partially offset by a decrease in the yield earned to 4.31% for the year ended December 31, 2010, from 4.77% for the year ended December 31, 2009. The rates earned on all asset categories, other than loans, decreased due to

Table of Contents

the general decline in market interest rates for these asset types. The rate earned on loans increased from 5.95% for the year ended December 31, 2009 to 6.02% for the year ended December 31, 2010, primarily as a result of fewer loans migrating to non-accrual status during 2010, as compared to the amount of loans that migrated to non-accrual status during 2009.

Interest Expense. Interest expense decreased \$4.6 million, or 15.8%, to \$24.4 million for the year ended December 31, 2010, from \$29.0 million for the year ended December 31, 2009. The decrease was attributable to a decrease in interest expense on deposits of \$4.6 million, or 25.5%, partially offset by a modest increase in interest expense on borrowings of \$70,000, or 0.7%. The decrease in interest expense on deposits was attributable to a decrease in the cost of interest-bearing deposits of 62 basis points, or 36.7%, to 1.07% for the year ended December 31, 2010, from 1.69% for the year ended December 31, 2009, reflecting lower market interest rates for short-term deposits. The decrease in the cost of deposits was partially offset by an increase of \$190.3 million, or 17.7%, in average interest-bearing deposits outstanding. The increase in interest expense on borrowings was primarily attributable to an increase of \$33.3 million, or 11.2%, in average borrowings outstanding, partially offset by a decrease of 34 basis points, or 9.4%, in the cost of borrowings, reflecting lower market interest rates for borrowed funds.

Net Interest Income. Net interest income increased \$5.5 million, or 9.7%, due primarily to interest earning assets increasing \$213.0 million, or 11.9%, partially offset by a decrease in the net interest margin of 6 basis points, or 1.9%, over the prior year. The net interest margin decreased for the year ended December 31, 2010 as the average yield earned on interest earning assets decreased, which was partially offset by a decrease in the average rate paid on interest-bearing liabilities. The general decline in yields was due to the overall low interest rate environment and was driven by decreases in yields earned on mortgage-backed securities, as principal repayments were reinvested into lower yielding securities. The decline in yield on interest-earning assets was also due to declining yields on other securities and interest-earning deposits in other financial institutions. These decreases were partially offset by an increase in yield earned on loans due primarily to fewer loans migrating to non-accrual status during 2010, as compared to the amount of loans that migrated to non-accrual status during 2009. The increase in average interest earning assets was due primarily to an increase in average loans outstanding of \$121.7 million, other securities of \$112.9 million, and mortgage-backed securities of \$16.2 million, being partially offset by decreases in interest-earning assets in other financial institutions. Other securities consist primarily of investment-grade corporate bonds, and government-sponsored enterprise bonds.

Provision for Loan Losses. We recorded a provision for loan losses of \$10.1 million for the year ended December 31, 2010, an increase of \$1.1 million, or 11.6%, from the \$9.0 million provision recorded for the year ended December 31, 2009. The increase in the provision for loan losses was due primarily to increases in total loans, the change in the composition of our loan portfolio, and increases in general loss factors, due primarily to higher levels of charge-offs. The increases in the general loss factors utilized in management's estimate of credit losses inherent in the loan portfolio were also the result of continued deterioration of the local economy. Net charge-offs for the year ended December 31, 2010, were \$3.7 million, as compared to \$2.4 million for the year ended December 31, 2009.

Non-interest Income. Non-interest income increased \$1.4 million, or 26.9%, primarily as a result of an increase of \$962,000 in gains on securities transactions, net for the year ended December 31, 2010, as compared to the year ended December 31, 2009. We recognized \$1.9 million in gains on securities transactions during the year ended December 31, 2010, as compared to \$891,000 in gains on securities transactions during the year ended December 31, 2009. Securities gains during the year ended December 31, 2010 included gross realized gains of \$1.3 million primarily from the sale of mortgage-backed securities, coupled with securities gains of \$597,000 related to our trading portfolio. During the year ended December 31, 2009, securities gains included gross realized gains of \$299,000 primarily from the sale of mortgage-backed securities, coupled with securities gains of \$592,000 related to our trading portfolio. The trading portfolio is utilized to fund our deferred compensation obligation to certain of our employees and directors. The participants of this plan, at their election, defer a portion of their compensation. Gains and losses on trading securities have no effect on net income since participants benefit from, and bear the full risk of, changes in the trading securities market values. Therefore, we record an equal and offsetting amount in non-interest expense, reflecting the change in our obligations under the plan. We routinely sell securities when market

Table of Contents

pricing presents, in management's assessment, an economic benefit that outweighs holding such security, and when smaller balance securities become cost prohibitive to carry.

Non-interest income also was positively affected by a \$524,000, or 29.9%, increase in income on bank owned life insurance for the year ended December 31, 2010, as compared to the year ended December 31, 2009, due to the purchase of \$28.8 million of insurance policies during the year ended December 31, 2010. We also recognized approximately \$197,000 of income on the sale of fixed assets during the year ended December 31, 2010.

Non-interest Expense. Non-interest expense increased \$4.4 million, or 12.9%, for the year ended December 31, 2010, as compared to the year ended December 31, 2009, due primarily to the expensing of approximately \$1.8 million in costs incurred on our postponed, second-step stock offering, and an increase of \$2.2 million, or 12.8%, in compensation and employee benefits expense. Compensation and employee benefits expense increased primarily due to increases in full-time equivalent employees related to additional branch and operations personnel, as well as incremental personnel from our insurance premium finance division formed in October 2009. Occupancy expense increased \$547,000, or 11.9%, over the same time period, primarily due to increases in rent and amortization of leasehold improvements relating to new branches and the renovation of existing branches. In addition, other non-interest expense also increased \$536,000, or 15.7%, from the year ended December 31, 2009 to the year ended December 31, 2010. This increase is primarily attributable to operating expenses of the insurance premium finance division. These increases in non-interest expense were partially offset by a decrease of \$515,000 in Federal Deposit Insurance Corporation insurance expense. Federal Deposit Insurance Corporation insurance expense for the year ended December 31, 2009 included \$770,000 related to a Federal Deposit Insurance Corporation special assessment.

Income Tax Expense. We recorded a provision for income taxes of \$6.4 million for the year ended December 31, 2010, as compared to \$6.6 million for the year ended December 31, 2009. The effective tax rate for the year ended December 31, 2010, was 31.6%, as compared to 35.4% for the year ended December 31, 2009. The decrease in the effective tax rate was primarily the result of the reversal of deferred tax liabilities related to state bad debt reserves of approximately \$738,000 resulting from the enactment of new State of New York tax laws during the year ended December 31, 2010, and higher levels of tax exempt income from bank owned life insurance.

Table of Contents

Average Balances and Yields. The following tables set forth average balance sheets, average yields and costs, and certain other information at June 30, 2012 and for the periods indicated. No tax-equivalent yield adjustments have been made, as we had no tax-free interest-earning assets during the years. All average balances are daily average balances based upon amortized costs. Non-accrual loans were included in the computation of average balances. The yields set forth below include the effect of deferred fees, discounts, and premiums that are amortized or accreted to interest income or interest expense.

- (1) Net interest rate spread represents the difference between the weighted average yield on interest-earning assets and the weighted average rate of interest-bearing liabilities.
- (2) Net interest-earning assets represent total interest-earning assets less total interest-bearing liabilities.
- (3) Net interest margin represents net interest income divided by average total interest-earning assets.
- (4) Annualized.

Table of Contents**Rate/Volume Analysis**

The following table presents the effects of changing rates and volumes on our net interest income for the years indicated. The rate column shows the effects attributable to changes in rate (changes in rate multiplied by prior volume). The volume column shows the effects attributable to changes in volume (changes in volume multiplied by prior rate). The total column represents the sum of the prior columns. For purposes of this table, changes attributable to both rate and volume, which cannot be segregated, have been allocated proportionately based on the changes due to rate and the changes due to volume.

	Six Months Ended June 30, 2012 vs. 2011			Year Ended December 31, 2011 vs. 2010			Year Ended December 31, 2010 vs. 2009

Table of Contents**Asset Quality****Purchased Credit Impaired Loans**

PCI loans were recorded at estimated fair value using expected future cash flows deemed to be collectible on the date acquired. Based on its detailed review of PCI loans and experience in loan workouts, management believes it has a reasonable expectation about the amount and timing of future cash flows and accordingly has classified PCI loans (\$82.1 million at June 30, 2012 and \$88.5 million at December 31, 2011) as accruing, even though they may be contractually past due. At June 30, 2012, based on recorded contractual principal, 6.1% of PCI loans were past due 30 to 89 days, and 12.8% were past due 90 days or more. At December 31, 2011, based on recorded contractual principal, 9.0% of PCI loans were past due 30 to 89 days, and 16.1% were past due 90 days or more, as compared to 8.0% and 13.9% at October 14, 2011. The amount and timing of expected cash flows as of June 30, 2012 did not change significantly from the October 2011 acquisition date. The discussion that follows relates specifically to originated loans, both held-for-investment and held-for-sale.

Originated Loans

General. Maintaining loan quality historically has been, and will continue to be, a key element of our business strategy. We employ conservative underwriting standards for new loan originations and maintain sound credit administration practices while the loans are outstanding. In addition, substantially all of our loans are secured, predominantly by real estate. However, during the current economic recession, we have experienced increases in delinquent and non-performing loans. At June 30, 2012, our non-performing loans totaled \$34.8 million or 3.24% of total loans. Charge-offs have remained relatively low at 0.18% (annualized) of average total loans for the six months ended June 30, 2012, 0.78% of average loans outstanding for the year ended December 31, 2011, 0.47% for the year ended December 31, 2010, and 0.37% for the year ended December 31, 2009. Net charge-offs in 2011 included \$4.0 million related to the transfer of \$7.4 million of loans held-for-investment to held-for-sale.

Delinquent Loans and Non-performing Loans. Non-performing loans totaled \$34.8 million at June 30, 2012, compared to \$43.9 million at December 31, 2011, and \$60.9 million at December 31, 2010. The following table details non-performing loans at those dates.

	June 30, 2012	December 31, 2011 2010 (In thousands)	
Non-accruing loans:			
Held-for-investment	\$ 12,680	\$ 17,489	\$ 39,303
Held-for-sale	80	2,991	
Non-accruing loans subject to restructuring agreements:			
Held-for-investment	21,609	22,844	19,978
Held-for-sale		457	
Total non-accruing loans	34,639	43,781	59,281
Loans 90 days or more past due and still accruing:			
Held-for-investment	424	85	1,609
Held-for-sale			
Total loans 90 days or more past due and still accruing:	424	85	1,609
Total non-performing loans	34,793	43,866	60,890
Other real estate owned	2,139	3,359	171
Total non-performing assets	\$ 36,932	\$ 47,225	\$ 61,061
Loans subject to restructuring agreements and still accruing	\$ 25,502	\$ 18,349	\$ 11,198

Table of Contents

The following table details non-performing loans by loan type at June 30, 2012 and December 31, 2011 and 2010:

	June 30, 2012	December 31, 2011 (in thousands)	
Non-accrual loans:			
Real estate loans:			
Commercial	\$ 25,378	\$ 34,659	\$ 46,388
One- to four-family residential	1,660	1,338	1,275
Construction and land	1,861	2,131	5,122

Total loans delinquent 90 days or more and still accruing	424	85	1,609
Total non-performing loans	\$ 34,793	\$ 43,866	\$ 60,890

Generally, originated loans are placed on non-accruing status when they become 90 days or more delinquent, and remain on non-accrual status until they are brought current, have six months of performance under the loan terms, and factors indicating reasonable doubt about the timely collection of payments no longer exist. Therefore, loans may be current in accordance with their loan terms, or may be less than 90 days delinquent and still be on a non-accruing status. The following tables detail the delinquency status of non-accruing loans at June 30, 2012 and December 31, 2011:

	At June 30, 2012			Total
	Days Past Due

Table of Contents

Total non-accruing loans decreased \$9.4 million, to \$34.4 million at June 30, 2012, from \$43.8 million at December 31, 2011. This decrease was primarily attributable to loans held-for-sale of \$3.4 million being sold during the six months ended June 30, 2012, \$876,000 of loans returned to accrual status, \$2.2 million of pay-offs and principal pay-downs, charge-offs of \$519,000, the sale of \$5.7 million of loans held-for-investment and the transfer of \$166,000 to other real estate owned. The above decreases in non-accruing loans during the six months ended June 30, 2012, were partially offset by \$3.1 million of loans being placed on non-accrual status and advances of \$352,000 during the quarter ended June 30, 2012.

The decrease in non-accrual loans during the year ended December 31, 2011 was primarily attributable to \$12.5 million in loans being returned to accrual status during the year ended December 31, 2011. Non-accrual loans also decreased as a result of \$4.0 million of pay-offs and principal pay-downs, charge-offs of \$7.6 million, and the transfer of \$2.7 million to other real estate owned. The above decreases in non-accruing loans during the year ended December 31, 2011 were partially offset by \$11.3 million of loans being placed on non-accrual status during the year ended December 31, 2011.

A discussion of the five largest non-accrual loans at June 30, 2012 follows. The carrying value of these loans totaled \$18.1 million, or 52.7% of total non-accrual loans of \$34.4 million at June 30, 2012.

An owner-occupied commercial real estate relationship with a carrying value of \$8.1 million. The business and collateral are located in New Jersey. The real estate collateral consists of a first mortgage on a manufacturing facility and subordinated mortgages on other real estate. At June 30, 2012, the relationship was performing under a restructure agreement that commenced in March 2011, which reduced the borrower's debt service payments and requires monthly payments of principal and interest. The manufacturing facility was appraised for \$8.0 million in December 2011. Because of the nature of the collateral, the appraiser relied on the cost and sales approaches to value. The other collateral includes a subordinated mortgage on the primary residence of one of the principals that was appraised for \$1.9 million in December 2011 and is subordinate to a first mortgage of less than \$400,000. The loans are personally guaranteed by the principals.

A commercial real estate loan with a carrying value of \$3.4 million. The real estate collateral consists of a first mortgage on an office building in Staten Island, New York. Northfield Bank has filed a foreclosure action and a lock box is in place to control rent receipts. The property was appraised in November 2011 for \$5.0 million. The capitalization rate utilized in the appraisal was 8.1%, and the loan is personally guaranteed by the principal.

A commercial real estate loan with a carrying value of \$3.0 million. The real estate collateral is a first mortgage on a New Jersey property primarily used as a recreational facility with some retail usage. The borrower is now repositioning the property at his own cost by converting the recreational portion to retail usage and the project is expected to be completed by the middle of 2013. The loan was restructured in early 2010 to reduce the borrower's debt service and required interest only payments. Beginning in December 2011, the borrower's monthly payment included principal and interest. The borrower was performing in accordance with the restructured terms as of March 31, 2012. The property was appraised on an as-is basis for \$4.9 million in November 2010. The capitalization rate utilized in the appraisal was 8%, and the loan is personally guaranteed by the principal.

A construction loan with a carrying value of \$1.9 million. The collateral is an eight-unit condominium construction project in New York City. A new sponsor assumed control of the project in December 2011 and the project is now 90% completed. Northfield Bank is funding the \$650,000 necessary to complete the project by the end of the third quarter of 2012. As of June 30, 2012 six units were under contract and marketing activity continues on the remaining two units. The property was appraised in November 2011 for \$3.6 million based on the gross sellout value of

Table of Contents

the completed units. The gross listing price for the eight units is in excess of \$3.5 million. Closings of the sold units are expected to begin in the fourth quarter of 2012.

A commercial real estate loan with a carrying value of \$1.8 million. The real estate collateral is an owner-occupied commercial real estate building located in Middlesex County, New Jersey. The business slowed in 2010. The borrower has performed under an interest-only debt restructure for the past 24 months. On July 1, 2012, the loan was returned to contractual terms. The property was appraised in June 2012 for \$1.9 million.

At June 30, 2012, we had \$12.1 million of accruing loans that were 30 to 89 days delinquent, as compared to \$21.1 million at December 31, 2011 and \$19.8 million at December 31, 2010. The following table sets forth the total amounts of delinquencies for accruing loans that were 30 to 89 days past due by type and by amount at the dates indicated.

	June 30, 2012	December 31, 2011 2010 (in thousands)	
Real estate loans:			
Commercial	\$ 6,498	\$ 8,404	\$ 8,970
One- to four-family residential	3,105	2,258	2,575
Construction and land		3,041	499
Multifamily	2,200	6,468	6,194
Home equity and lines of credit	93	30	262
Commercial and industrial loans	98	207	536
Insurance premium loans	89	568	660
Other loans	37	91	102
Total	\$ 12,120	\$ 21,067	\$ 19,798

Non-accruing loans subject to restructuring agreements were \$21.6 million at June 30, 2012, \$23.3 million at December 31, 2011 and \$20.0 million at December 31, 2010. Loans subject to restructuring agreements and still accruing totaled \$25.5 million, \$18.3 million and \$11.2 million at June 30, 2012 and December 31, 2011 and 2010, respectively. During the six months ended June 30, 2012, we entered into 4 troubled debt restructurings (TDRs), of which \$6.7 million and \$257,000 were classified as accruing and non-accruing, respectively, at June 30, 2012. At June 30, 2012, \$23.1 million, or 90.6%, of the \$25.5 million of accruing troubled debt restructurings, and \$17.8 million, or 82.5%, of the \$21.6 million of non-accruing troubled debt restructurings, were performing in accordance with their restructured terms. During the year ended December 31, 2011, we entered into 13 troubled TDRs, of which \$6.8 million and \$12.8 million were classified as accruing and non-accruing, respectively, at December 31, 2011. At December 31, 2011, \$12.7 million, or 69.4%, of the \$18.3 million of accruing troubled debt restructurings, and \$19.2 million, or 82.3%, of the \$23.3 million of non-accruing troubled debt restructurings, were performing in accordance with their restructured terms. Generally, the types of concession that we make to troubled borrowers includes reduction to, both temporary and permanent, interest rates and extension of payment terms. At December 31, 2011, the balance of TDRs are 81% commercial real estate loans, 4% construction loans, 5% multifamily loans, 4% commercial and industrial loans, and 6% one- to four-family residential loans.

Table of Contents

The table below sets forth the amounts and categories of the troubled debt restructurings as of June 30, 2012 and December 31, 2011 and 2010.

	At June 30, 2012		At December 31, 2011		At December 31, 2010	
	Non-Accruing	Accruing	Non-Accruing	Accruing	Non-Accruing	Accruing
(in thousands)						
Troubled Debt Restructurings:						
Real estate loans:						
Commercial	\$ 18,371	\$ 20,344	\$ 20,420	\$ 13,389	\$ 13,138	\$ 7,879
One- to four-family residential	308	2,275		2,532		1,750
Construction and land	1,861		1,709		4,012	
Multifamily	517	1,540	523	1,552	2,327	1,569
Home equity and lines of credit	100	364	102			
Commercial and industrial loans	452	979	547	876	501	
	\$ 21,609	\$ 25,502	\$ 23,301	\$ 18,349	\$ 19,978	\$ 11,198
Performing in accordance with restructured terms	82.51%	90.62%	82.34%	69.03%	61.03%	100.00%

For the six months ended June 30, 2012 and the year ended December 31, 2011, gross interest income that would have been recorded had the nonaccrual and troubled debt restructurings been current in accordance with their original terms totaled \$2.2 million and \$6.1 million, respectively. Interest income recognized on nonaccrual and troubled debt restructurings for the six months ended June 30, 2012 and the year ended December 31, 2011 was \$1.3 million and \$3.6 million, respectively.

The allowance for loan losses to non-performing loans (held-for-investment) increased to 77.9% at June 30, 2012 from 66.4% at December 31, 2011. This increase was primarily attributable to a decrease in non-performing loans of \$9.1 million, from \$43.9 million at December 31, 2011 to \$34.8 million at June 30, 2012. At June 30, 2012, 80.5% (balance of impaired loans) of the appraisals utilized for our impairment analysis were completed within the last nine months, 6.3% (balance of impaired loans) were completed within the last 18 months, with the remaining 13.2% (balance of impaired loans) being older than 18 months. All appraisals older than 12 months were reviewed by management and appropriate adjustments were made utilizing current market indices. Generally loans are charged down to the appraised value less costs to sell, which reduces the coverage ratio of the allowance for loan losses to non-performing loans. Downward adjustments to appraisal values, primarily to reflect quick sale discounts, are generally recorded as specific reserves within the allowance for loan losses.

The allowance for loan losses to originated loans held-for-investment, net, remained relatively the same at 2.73% at June 30, 2012, compared to 2.72% at December 31, 2011.

Specific reserves on impaired loans increased \$599,000, or 14.7%, to \$4.7 million at June 30, 2012 from \$4.1 million at December 31, 2011. At June 30, 2012, we had 50 loans classified as impaired and recorded a total of \$4.7 million of specific reserves on 19 of the 50 impaired loans. At December 31, 2011, we had 48 loans classified as impaired and recorded a total of \$4.1 million of specific reserves on 16 of the 48 impaired loans.

The allowance for loan losses to non-performing loans (held-for-investment) increased from 35.83% at December 31, 2010 to 66.4% at December 31, 2011. This increase was primarily attributable to an increase of \$5.0 million, or 23.0%, in the allowance for loan losses partially offset by a decrease in non-performing loans of \$17.0 million, from \$60.9 million at December 31, 2010 to \$43.9 million at December 31, 2011. At December 31, 2011, 64.5% (balance of impaired loans) of the appraisals utilized for our impairment analysis were completed within the last nine months, 32.7% (balance of impaired loans) were completed within the last 18 months, with the remaining 2.8% (balance of impaired loans) being older than 18 months. All appraisals older than 12 months were reviewed by management and appropriate adjustments were made utilizing current market indices. Generally loans are charged down to the appraised value less costs to sell, which reduces the coverage ratio of the allowance for loan losses to non-performing loans. Downward adjustments to appraisal values, primarily to reflect quick sale discounts, are generally recorded as specific reserves within the allowance for loan losses.

Table of Contents

The allowance for loan losses to originated loans held-for-investment, net, increased to 2.72% at December 31, 2011, from 2.64% at December 31, 2010. This increase was attributable to an increase of \$2.5 million, or 24.9%, in the provision for loan losses for the year ended December 31, 2011 compared to the provision for the year ended December 31, 2010, partially offset by an increase in the loan portfolio over the same time period. The increase in our allowance for loan losses during the year is primarily attributable to specific reserves on impaired loans related to quick sale discounts, and an increase in general loss factors related to increases in non-accrual loans, fluctuations in loan delinquencies, and continued declines in general economic conditions and real estate values as well as an increase in unallocated reserves due to the timing of appraisals and ongoing loan reviews.

Specific reserves on impaired loans increased \$1.4 million, or 51.8%, from \$2.7 million, for the year ended December 31, 2010, to \$4.1 million for the year ended December 31, 2011. At December 31, 2011, we had 48 loans classified as impaired and recorded a total of \$4.1 million of specific reserves on 16 of the 48 impaired loans. At December 31, 2010, we had 44 loans classified as impaired and recorded a total of \$2.7 million of specific reserves on 13 of the 44 impaired loans.

Table of Contents

The following table sets forth activity in our allowance for loan losses, by loan type, for the periods indicated.

	Real Estate Loans				Home Equity and Lines and Credit (in thousands)	Commercial and Industrial	Insurance Premium Loans	Other	Unallocated	Total Allowance for Loan Losses
	Commercial	One-to-four Family Residential	Construction and Land	Multifamily

June 30, 2012	\$ 14,019	\$ 637	\$ 1,027	\$ 7,132	\$ 561	\$ 2,196	\$ 40	\$ 46	\$ 1,384	\$ 27,042

Table of Contents

During the six months ended June 30, 2012, we recorded net charge-offs of \$953,000, a decrease of \$463,000, or 32.7%, as compared to the six months ended June 30, 2011. The decrease in net charge-offs was primarily attributable to a \$552,000 decrease in net charge-offs related to commercial real estate loans and a decrease of \$107,000 in commercial and industrial loans net charge-offs offset by a \$172,000 increase in net charge-offs related to insurance premium loans. Allowance for loan losses allocated to multifamily real estate loans increased by \$360,000, or 5.3%, from \$6.8 million at December 31, 2011 to \$7.1 million at June 30, 2012 as a result of increases in outstanding balances offset by decreased historical and general loss factors. We could experience an increase in the allowance for loan losses in future periods if charge-offs and non-performing loans increase.

During the year ended December 31, 2011, we recorded net charge-offs of \$7.6 million, an increase of \$3.9 million, or 105.4%, as compared to the year ended December 31, 2010. The increase in net charge-offs was primarily attributable to a \$4.4 million increase in net charge-offs related to commercial real estate loans and a \$602,000 increase in net charge-offs related to commercial and industrial loans offset by a \$1.4 million decrease in net charge-offs related to multifamily real estate loans. During the year ended December 31, 2011, net charge-offs included \$4.0 million related to loans transferred to held-for-sale. Charge-offs related to this transfer did not have a material effect on our loss factors for calculating the allowance for loan losses since such losses represent a change in intent for these loans which is not the intent for the held-for-investment portfolio. As a result of increases in outstanding balances, the general decline in real estate values and the current economic downturn, our historical and general loss factors have increased, thus increasing the allowance for loan losses allocated to multifamily real estate loans by \$1.7 million, or 31.8%, from \$5.1 million at December 31, 2010, to \$6.8 million at December 31, 2011. In addition, as a result of the net charge-offs incurred, as well as increased levels of commercial real estate loans on non-accrual status, coupled with the general decline in real estate values and the current economic downturn, our historical and general loss factors have increased, thus increasing the allowance for loan losses allocated to commercial real estate loans by \$1.5 million, or 11.6%, from \$12.6 million at December 31, 2010, to \$14.1 million at December 31, 2011. The allowance for loan losses allocated to commercial and industrial loans increased \$1.3 million from December 31, 2010 to December 31, 2011. This increase was primarily attributable to an increase in historical loss factors, coupled with the increased level of non-accrual commercial and industrial loans. We could experience an increase in our allowance for loan losses in future periods if charge-offs and non-performing loans continue to increase.

Management of Market Risk

General. A majority of our assets and liabilities are monetary in nature. Consequently, our most significant form of market risk is interest rate risk. Our assets, consisting primarily of mortgage-related assets and loans, generally have longer maturities than our liabilities, which consist primarily of deposits and wholesale funding. As a result, a principal part of our business strategy involves managing interest rate risk and limiting the exposure of our net interest income to changes in market interest rates. Accordingly, our board of directors has established a management risk committee, comprised of our Treasurer, who chairs this Committee, our Chief Executive Officer, our Chief Financial Officer, our Chief Lending Officer, and our Executive Vice President of Operations. This committee is responsible for, among other things, evaluating the interest rate risk inherent in our assets and liabilities, for recommending to the risk committee of our board of directors the level of risk that is appropriate given our business strategy, operating environment, capital, liquidity and performance objectives, and for managing this risk consistent with the guidelines approved by the board of directors.

We seek to manage our interest rate risk in order to minimize the exposure of our earnings and capital to changes in interest rates. As part of our ongoing asset-liability management, we currently use the following strategies to manage our interest rate risk:

- originate multifamily real estate and commercial real estate loans that generally have interest rates that reset every five years;
- sell longer-term, one- to four-family residential real estate loans;

Table of Contents

invest in shorter maturity investment grade corporate securities and mortgage-related securities; and

obtain general financing through lower cost deposits and wholesale funding and repurchase agreements.

Net Portfolio Value Analysis. We compute the net present value of our interest-earning assets and interest-bearing liabilities (net portfolio value or NPV) over a range of assumed market interest rates. Our simulation model uses a discounted cash flow analysis to measure the net portfolio value. We estimate the economic value of these assets and liabilities under the assumption that interest rates experience an instantaneous, parallel, and sustained increase of 100, 200, 300, or 400 basis points, or a decrease of 100 and 200 basis points which is based on the current interest rate environment. A basis point equals one-hundredth of one percent, and 100 basis points equals one percent. An increase in interest rates from 3% to 4% would mean, for example, a 100 basis point increase in the Change in Interest Rates column below.

Net Interest Income Analysis. We also analyze our sensitivity to changes in interest rates through our net interest income model. Net interest income is the difference between the interest income we earn on our interest-earning assets, such as loans and securities, and the interest we pay on our interest-bearing liabilities, such as deposits and borrowings. We estimate what our net interest income would be for a twelve-month period. We then calculate what the net interest income would be for the same period under the assumption that interest rates experience an instantaneous and sustained increase of 100, 200, 300, or 400 basis points or a decrease of 100 and 200 basis points which is based on the current interest rate environment.

Table of Contents

The tables below set forth, as of June 30, 2012 and December 31, 2011, our calculation of the estimated changes in our net portfolio value, net present value ratio, and percent change in net interest income that would result from the designated instantaneous and sustained changes in interest rates. Computations of prospective effects of hypothetical interest rate changes are based on numerous assumptions, including relative levels of market interest rates, loan prepayments and deposit decay, and should not be relied on as indicative of actual results.

Change in Interest Rates (basis points) (1)	At June 30, 2012					
	Estimated Present Value of Assets	Estimated Present Value of Liabilities	NPV		Estimated NPV/Present Value of Assets Ratio	Net Interest Income Percent Change
			Estimated NPV (2)	Change In NPV

-200	2,480,170	2,026,021	454,149	23,921	18.31%	(2.21)%

(1) Assumes an instantaneous and sustained uniform change in interest rates at all maturities.

(2) NPV includes non-interest earning assets and liabilities.

The tables above indicate that at June 30, 2012 and December 31, 2011, in the event of a 200 basis point decrease in interest rates, we would experience a 5.46% and 5.56% increase in estimated net portfolio value, respectively, and a 3.82% and 2.21% decrease in net interest income, respectively. In the event of a 400 basis point increase in interest rates at June 30, 2012 and December 31, 2011, we would experience a 27.43% and 27.48% decrease in net portfolio value, respectively, and a 13.97% and 7.72% decrease in net interest income, respectively. Our policies provide that, in the event of a 300 basis point increase/decrease or less in interest rates, our net present value ratio should decrease by no more than 400 basis points. Additionally, our policy states that our net portfolio value should be at least 8.0% of total assets before and after such shock. At June 30, 2012 and December 31, 2011, we were in compliance with all board approved policies with respect to interest rate risk management.

Certain shortcomings are inherent in the methodologies used in determining interest rate risk through changes in net portfolio value and net interest income. Our model requires us to make certain assumptions that may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. In this regard, the net portfolio value and net interest income information presented assume that the composition of our interest-sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and assume that a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration or repricing of specific assets and liabilities. Accordingly, although interest rate risk calculations provide an indication of our interest rate risk exposure at a particular point in time, such measurements

Table of Contents

are not intended to and do not provide a precise forecast of the effect of changes in market interest rates on our net interest income and will differ from actual results.

Liquidity and Capital Resources

Liquidity is the ability to fund assets and meet obligations as they come due. Our primary sources of funds consist of deposit inflows, loan repayments, borrowings through repurchase agreements and advances from money center banks and the Federal Home Loan Bank of New York, and repayments, maturities and sales of securities. While maturities and scheduled amortization of loans and securities are reasonably predictable sources of funds, deposit flows and mortgage prepayments are greatly influenced by general interest rates, economic conditions, and competition. The risk committee of the board of directors is responsible for establishing and monitoring our liquidity targets and strategies in order to ensure that sufficient liquidity exists for meeting the borrowing needs and withdrawals of deposits by our customers as well as unanticipated contingencies. We seek to maintain a ratio of liquid assets (not subject to pledge) as a percentage of deposits and borrowings of 35% or greater. At June 30, 2012, this ratio was 50.7%. We believe that we had sufficient sources of liquidity to satisfy our short- and long-term liquidity needs at June 30, 2012.

We regularly adjust our investments in liquid assets based on our assessment of:

expected loan demand;

expected deposit flows;

yields available on interest-earning deposits and securities; and

the objectives of our asset/liability management program.

Our most liquid assets are cash and cash equivalents, and unpledged mortgage-related securities issued or guaranteed by the U.S. Government, Fannie Mae, or Freddie Mac that we can either borrow against or sell. We also have the ability to surrender bank owned life insurance contracts. The surrender of these contracts would subject us to income taxes and penalties for increases in the cash surrender values over the original premium payments.

We had the following primary sources of liquidity at June 30, 2012 (in thousands):

Cash and cash equivalents	\$ 34,381
Unpledged mortgage-backed securities (Issued or guaranteed by the U.S. Government, Fannie Mae, or Freddie Mac)	\$ 521,474

At June 30, 2012, we had \$28.0 million in outstanding loan commitments. In addition, we had \$48.6 million in unused lines of credit to borrowers. Certificates of deposit due within one year of June 30, 2012 totaled \$168.4 million, or 10.9% of total deposits. If these deposits do not remain with us, we may be required to seek other sources of funds, including loan sales, other deposit products, including replacement certificates of deposit, securities sold under agreements to repurchase (repurchase agreements), and advances from the Federal Home Loan Bank of New York and other borrowing sources. Depending on market conditions, we may be required to pay higher rates on such deposits or other borrowings than we currently pay on the certificates of deposit due on or before June 30, 2012. We believe, based on experience, that a significant portion of such deposits will remain with us, and we have the ability to attract and retain deposits by adjusting the interest rates offered.

We have a detailed contingency funding plan that is reviewed and reported to the risk committee of the board of directors on at least a quarterly basis. This plan includes monitoring cash on a daily basis to determine our liquidity needs. Additionally, management performs a stress test on our retail deposits and wholesale funding sources in several scenarios on a quarterly basis. The stress scenarios include deposit attrition of up to 50%, and

Table of Contents

selling our securities available-for-sale portfolio at a discount of 20% to its current estimated fair value. We continue to maintain what we believe to be significant liquidity under all stress scenarios.

Northfield Bank is subject to various regulatory capital requirements, including a risk-based capital measure. The risk-based capital guidelines include both a definition of capital and a framework for calculating risk-weighted assets by assigning assets and off-balance sheet items to broad risk categories. At June 30, 2012, Northfield Bank exceeded all regulatory capital requirements and is considered well capitalized under regulatory guidelines. See Supervision and Regulation Capital Requirements and Note 12 of the Notes to the Consolidated Financial Statements.

The net proceeds from the stock offering will significantly increase our liquidity and capital resources. Over time, the initial level of liquidity will be reduced as net proceeds from the stock offering are used for general corporate purposes, including the funding of loans. Our financial condition and results of operations will be enhanced by the net proceeds from the stock offering, resulting in increased net interest-earning assets and net interest income. However, due to the increase in equity resulting from the net proceeds from the stock offering, our return on equity will be adversely affected following the stock offering.

Off-Balance Sheet Arrangements and Aggregate Contractual Obligations

Commitments. As a financial services provider, we routinely are a party to various financial instruments with off-balance-sheet risks, such as commitments to extend credit, and unused lines of credit. While these contractual obligations represent our potential future cash requirements, a significant portion of commitments to extend credit may expire without being drawn upon. Such commitments are subject to the same credit policies and approval process applicable to loans we originate. In addition, we routinely enter into commitments to sell mortgage loans; such amounts are not significant to our operations. For additional information, see Note 12 of the Notes to the Consolidated Financial Statements.

Contractual Obligations. In the ordinary course of our operations we enter into certain contractual obligations. Such obligations include leases for premises and equipment, agreements with respect to borrowed funds and deposit liabilities, and agreements with respect to investments.

The following table summarizes our significant fixed and determinable contractual obligations and other funding needs by payment date at December 31, 2011. The payment amounts represent those amounts due to the recipient and do not include any unamortized premiums or discounts or other similar carrying amount adjustments.

Contractual Obligations	Payments Due by Period				Total
	Less Than One Year	One to Three Years	Three to Five Years	More Than Five Years	
	(In thousands)				
Long-term debt (1)	\$ 108,681	\$ 138,800	\$ 223,410	\$ 8,000	\$ 478,891
Floating rate advances	3,004				3,004
Operating leases	3,378	6,609	6,474	31,607	48,068
Capitalized leases	387	810	516	560	2,273
Certificates of deposit	356,391	72,017	51,712	3	480,123
Total	\$ 471,841	\$ 218,236	\$ 282,112	\$ 40,170	\$ 1,012,359
Commitments to extend credit (2)	\$ 64,735	\$	\$	\$	\$ 64,735

(1) Includes repurchase agreements, Federal Home Loan Bank of New York advances, and accrued interest payable at December 31, 2011.

(2) Includes unused lines of credit which are assumed to be funded within the year.

As of June 30, 2012 and December 31, 2011, we serviced \$35.3 million and \$41.3 million of loans for Freddie Mac. These one- to four-family residential mortgage real estate loans were underwritten to Freddie Mac guidelines and to comply with applicable federal, state, and local laws. At the time of the closing of these loans we owned the loans and subsequently sold them to Freddie Mac providing normal and customary representations and warranties, including representations and warranties related to compliance with Freddie Mac underwriting standards. At the time of sale, the loans were free from encumbrances except for the mortgages we filed which, with other

Table of Contents

underwriting documents, were subsequently assigned and delivered to Freddie Mac. At June 30, 2012 and December 31, 2011, substantially all of the loans serviced for Freddie Mac were performing in accordance with their contractual terms and management believes that it has no material repurchase obligations associated with these loans.

Recent Accounting Pronouncements

For a discussion of recent accounting pronouncements, please see Note 10 of the Notes to the Unaudited Consolidated Financial Statements.

Effect of Inflation and Changing Prices

Our consolidated financial statements and related notes have been prepared in accordance with GAAP. GAAP generally requires the measurement of financial position and operating results in terms of historical dollars without consideration for changes in the relative purchasing power of money over time due to inflation. The effect of inflation is reflected in the increased cost of our operations. Unlike industrial companies, our assets and liabilities are primarily monetary in nature. As a result, changes in market interest rates have a greater effect on our performance than inflation.

BUSINESS OF NORTHFIELD-DELAWARE

Northfield-Delaware is a Delaware corporation that was organized in June 2010. Upon completion of the conversion, Northfield-Delaware will become the holding company of Northfield Bank and will succeed to all of the business and operations of Northfield-Federal and each of Northfield-Federal and Northfield Bancorp, MHC will cease to exist.

Initially following the completion of the conversion, Northfield-Delaware will have approximately \$29.8 million in cash and other assets held by Northfield-Federal and Northfield Bancorp, MHC as of June 30, 2012, and the net proceeds it retains from the offering, part of which will be used to make a loan to the Northfield Bank Employee Stock Ownership Plan, and will have no significant liabilities. See [How We Intend to Use the Proceeds From the Offering](#). Northfield-Delaware intends to use the support staff and offices of Northfield Bank and will pay Northfield Bank for these services. If Northfield-Delaware expands or changes its business in the future, it may hire its own employees.

Northfield-Delaware intends to invest the net proceeds of the offering as discussed under [How We Intend to Use the Proceeds From the Offering](#). In the future, we may pursue other business activities, including mergers and acquisitions, investment alternatives and diversification of operations. There are, however, no current understandings or agreements for these activities.

BUSINESS OF NORTHFIELD-FEDERAL

AND NORTHFIELD BANK

Northfield-Federal

Northfield-Federal is a federally chartered corporation that owns all of the outstanding shares of common stock of Northfield Bank. At June 30, 2012, Northfield-Federal had consolidated assets of \$2.5 billion, deposits of \$1.5 billion and stockholders' equity of \$388.9 million.

Northfield Bank became the wholly-owned subsidiary of Northfield-Federal's New York predecessor in 1995, when Northfield Bank reorganized into the two-tier mutual holding company structure. In November 2007, Northfield-Federal converted from a New York corporation to a federally chartered corporation and concurrently sold 19,265,316 shares of its common stock to the public, representing 43% of its then-outstanding shares, at \$10.00 per share. An additional 24,641,684 shares, or 55% of the outstanding shares, were issued to Northfield Bancorp, MHC, and 896,061 shares, or 2% of the outstanding shares, plus \$3.0 million of cash were issued to the Northfield

Table of Contents

Bank Foundation. As part of this stock offering, we established an employee stock ownership plan, which acquired 1,756,279 shares of common stock in the stock offering, financed by a loan from Northfield-Federal.

Northfield-Federal's home office is located at 1410 St. Georges Avenue, Avenel, New Jersey 07001 and the telephone number is (732) 499-7200. Its website address is www.eNorthfield.com. Information on this website is not and should not be considered a part of this prospectus.

Northfield Bank

Northfield Bank was organized in 1887 and is a federally chartered savings bank. Northfield Bank conducts business primarily from its home office located in Staten Island, New York, its operations center located in Woodbridge, New Jersey, its 24 additional branch offices located in New York and New Jersey and its lending office located in Brooklyn, New York. The branch offices are located in Staten Island and Brooklyn and the New Jersey counties of Union and Middlesex.

Northfield Bank's principal business consists of originating multifamily and commercial real estate loans, purchasing investment securities, including mortgage-backed securities and corporate bonds, and investing funds in other financial institutions. Northfield Bank also offers construction and land loans, commercial and industrial loans, one- to four-family residential mortgage loans, and home equity loans and lines of credit. Northfield Bank offers a variety of deposit accounts, including certificates of deposit, passbook, statement, and money market savings accounts, transaction deposit accounts (negotiable orders of withdrawal (NOW) accounts and non-interest bearing demand accounts), individual retirement accounts, and to a lesser extent when it is deemed cost effective, brokered deposits. Deposits are Northfield Bank's primary source of funds for its lending and investing activities. Northfield Bank also uses borrowed funds as a source of funds, principally repurchase agreements with brokers and Federal Home Loan Bank of New York advances. In addition to traditional banking services, Northfield Bank offers insurance products through NSB Insurance Agency, Inc. Northfield Bank owns 100% of NSB Services Corp., which, in turn, owns 100% of the voting common stock of a real estate investment trust, NSB Realty Trust, which holds primarily mortgage loans and other real estate related investments.

Northfield Bank is subject to comprehensive regulation and examination by the Office of the Comptroller of the Currency.

Northfield Bank's main office is located at 1731 Victory Boulevard, Staten Island, New York 10314, and its telephone number at this address is (718) 448-1000. Its website address is www.eNorthfield.com. Information on this website is not and should not be considered to be a part of this prospectus.

Recent Acquisitions

On November 2, 2012, Northfield Bancorp, MHC, Northfield-Federal and Northfield Bank acquired Flatbush Federal Bancorp, MHC, Flatbush Federal Bancorp, Inc. and Flatbush Federal Savings & Loan Association. Flatbush Federal Bancorp, Inc. stockholders received 0.4748 of a share of Northfield-Federal stock for each share of Flatbush Federal Bancorp, Inc. common stock they owned, which at the date of announcement was valued at \$6.50 per share, subject to the terms and conditions of the merger agreement. At June 30, 2012, Flatbush Federal Bancorp, Inc. had 2,736,907 shares of common stock outstanding, and consolidated assets of \$143.3 million, deposits of \$117.5 million, stockholders' equity of \$18.8 million and a book value per share of \$6.88. As a result of the acquisition, we expect to record approximately \$800,000 of core deposit intangibles. As merger consideration, we issued a total of 1,299,483 shares of Northfield-Federal common stock, including 594,781 shares to stockholders other than Flatbush Federal Bancorp, MHC, and 704,702 shares to Northfield Bancorp, MHC, as the successor to Flatbush Federal Bancorp, MHC, with shares issued subject to adjustment for cash paid in lieu of fractional shares.

Table of Contents

In October 2011, Northfield Bank assumed all of the deposits and acquired substantially all of the assets of First State Bank, a New Jersey chartered bank, from the Federal Deposit Insurance Corporation as receiver for First State Bank, pursuant to the terms of a Purchase and Assumption Agreement. The agreement did not contain any loss-share provisions with the Federal Deposit Insurance Corporation and the deposits were acquired at no premium while the asset discount was \$46.9 million, resulting in a cash payment from the Federal Deposit Insurance Corporation of approximately \$50.5 million. Northfield Bank acquired approximately \$194.6 million of assets at fair value, including \$91.9 million of loans, net of fair value adjustment of \$40.5 million. Northfield Bank also assumed deposit liabilities with a fair value of \$188.2 million. The assets purchased and liabilities assumed have been accounted for under the acquisition method of accounting. As the acquisition date fair value of the identifiable assets acquired exceeded the liabilities assumed, we recognized an after-tax bargain purchase gain of \$3.6 million.

Market Area and Competition

We have been in business for over 125 years, offering a variety of financial products and services to meet the needs of the communities we serve. Our retail banking network consists of multiple delivery channels including full-service banking offices, automated teller machines, and telephone and internet banking capabilities. We consider our competitive products and pricing, branch network, reputation for superior customer service, and financial strength, as our major strengths in attracting and retaining customers in our market areas.

We face intense competition in our market area both in making loans and attracting deposits. Our market areas have a high concentration of financial institutions, including large money center and regional banks, community banks, and credit unions. We face additional competition for deposits from money market funds, brokerage firms, mutual funds, and insurance companies. Some of our competitors offer products and services that we do not offer, such as trust services and private banking.

In addition, turmoil in the United States and world economies, and more specifically in the financial services industry, has resulted in financial services companies such as investment banks, and automobile and real estate finance companies, electing to become bank holding companies. These financial services companies have traditionally received their funding from sources other than insured bank deposits. Many of the alternative funding sources traditionally used by these companies are no longer available, which has resulted in their relying more on insured bank deposits to fund their operations, thereby increasing competition for deposits and related costs of such deposits.

Our deposit sources are primarily concentrated in the communities surrounding our banking offices in the New York Counties of Richmond (Staten Island) and Kings (Brooklyn), and Union and Middlesex Counties in New Jersey. As of June 30, 2011 (the latest date for which information is publicly available), we ranked fifth in deposit market share in Staten Island with a 10.58% market share. As of that date, we had a 0.27% market share in Brooklyn, New York. In Middlesex and Union Counties in New Jersey, as of June 30, 2011, we had a combined market share of 0.84%.

The following table sets forth the unemployment rates for the communities we serve and the national average for the last five years, as provided by the Bureau of Labor Statistics.

	Unemployment Rate At December 31,				
	2011	2010	2009	2008	2007
Union County, NJ	8.8%	9.2%	9.4%	7.0%	4.5%
Middlesex County, NJ	7.6	7.9	8.4	6.0	3.8
Richmond County, NY	7.9	8.0	8.7	6.1	4.3
Kings County, NY	9.5	9.5	10.6	7.3	5.2
National Average	8.5	9.4	9.9	7.3	5.0

Table of Contents

The following table sets forth median household income at December 31, 2011 for the communities we serve, as provided by the U.S. Census Bureau.

	Median Household Income	
	At December 31, 2011	
Union County, NJ	\$	65,937
Middlesex County, NJ	\$	75,890
Richmond County, NY	\$	69,163
Kings County, NY	\$	42,047

Lending Activities

Our principal lending activity is the origination of multifamily real estate loans and, to a lesser extent, commercial real estate loans. We also originate one- to four-family residential real estate loans, construction and land loans, commercial and industrial loans, and home equity loans and lines of credit. In October 2009, we began to offer loans to finance premiums on insurance policies, including commercial property and casualty insurance, and professional liability insurance. At the end of December 2011, we stopped originating loans to finance premiums on insurance policies and in February 2012 we sold the majority of our insurance premium loans at par value.

Loan Originations, Purchases, Sales, Participations, and Servicing. All loans we originate for our portfolio are underwritten pursuant to our policies and procedures or are properly approved as exceptions to our policies and procedures. In addition, we originate residential real estate loans under an origination assistance agreement with a third party underwriter that conforms to secondary market underwriting standards, whereby the third party underwriter processes and underwrites one- to four-family residential real estate loans that we fund at origination, and we elect either to portfolio the loans or sell them to the third party underwriter. Prior to entering into the origination assistance agreement with this third party underwriter in 2010, Northfield Bank was a participating seller/servicer with Freddie Mac, and generally underwrote its one- to four-family residential real estate loans to conform with Freddie Mac standards. We originate both adjustable-rate and fixed-rate loans. Our ability to originate fixed- or adjustable-rate loans is dependent on the relative customer demand for such loans, which is affected by various factors including current market interest rates as well as anticipated future market interest rates. Our loan origination and sales activity may be adversely affected by changes in economic conditions that results in decreased loan demand. Our home equity loans and lines of credit typically are generated through direct mail advertisements, newspaper advertisements, and referrals from branch personnel. A significant portion of our commercial real estate loans and multifamily real estate loans are generated by referrals from loan brokers, accountants, and other professional contacts.

We generally retain in our portfolio all adjustable-rate loans we originate, as well as shorter-term, fixed-rate residential loans (terms of 10 years or less). Loans we sell consist primarily of conforming, longer-term, fixed-rate residential loans. We sold \$6.7 million and \$11.2 million of one- to four-family residential real estate loans (generally fixed-rate loans, with terms of 15 years or longer) during the six months ended June 30, 2012 and the year ended December 31, 2011, and had \$355,000 of loans held-for-sale at June 30, 2012 consisting of \$80,000 in non-performing commercial real estate loans and \$275,000 of one- to four-family residential real estate loans.

We sell our loans without recourse, except for standard representations and warranties provided in secondary market transactions. Currently, we do not retain any servicing rights on one- to four-family residential real estate loans originated under the agreement with the third-party underwriter, including loans we may elect to add to our portfolio. At June 30, 2012, we were servicing loans owned by others which consisted of \$35.3 million of one- to four-family residential real estate loans. Historically, the origination of loans held-for-sale and related servicing activity has not been material to our operations. Loan servicing includes collecting and remitting loan payments, accounting for principal and interest, contacting delinquent borrowers, supervising foreclosures and property dispositions in the event of unremediated defaults, making certain insurance and tax payments on behalf of the borrowers and generally administering the loans. We retain a portion of the interest paid by the borrower on the loans we service for others as consideration for our servicing activities.

Table of Contents

During the fourth quarter of 2011, we purchased a loan portfolio, with deteriorated credit quality, from the Federal Deposit Insurance Corporation, herein referred to as purchased credit-impaired loans (PCI loans). Additionally, we transferred certain loans, which we had previously originated and designated as held-for-investment, to held-for-sale. The accounting and reporting for both of these groups of loans differs substantially from those loans originated and classified as held-for-investment. For purposes of reporting, discussion and analysis, management has classified its loan portfolio into three categories: (1) PCI loans, which are held-for-investment, and initially valued at estimated fair value on the date of acquisition, with no initial related allowance for loan losses, (2) loans originated and held-for-sale, which are carried at the lower of aggregate cost or estimated fair value, less costs to sell, and therefore have no associated allowance for loan losses, and (3) originated loans held-for-investment, which are carried at amortized cost, less net charge-offs and the allowance for loan losses.

Loan Approval Procedures and Authority. Our lending activities follow written, non-discriminatory underwriting standards established by our board of directors. The loan approval process is intended to assess the borrower's ability to repay the loan and the value of the collateral that will secure the loan, if any. To assess the borrower's ability to repay, we review the borrower's employment and credit history, and information on the historical and projected income and expenses of the borrower.

In underwriting a loan secured by real property, we require an appraisal of the property by an independent licensed appraiser approved by our board of directors. The appraisals of multifamily, mixed use, and commercial real estate properties are also reviewed by an independent third party we hire but where the fee is passed onto the borrower. We review and inspect properties before disbursement of funds during the term of a construction loan. Generally, management obtains updated appraisals when a loan is deemed impaired. These appraisals may be more limited than those prepared for the underwriting of a new loan. In addition, when we acquire other real estate owned, we generally obtain a current appraisal to substantiate the net carrying value of the asset.

The board of directors maintains a loan committee consisting of five bank directors to: periodically review and recommend for approval our policies related to lending (collectively, the loan policies) as prepared by management; approve or reject loan applicants meeting certain criteria; and monitor loan quality including concentrations, and certain other aspects of our lending functions, as applicable. Northfield Bank's officers at levels beginning with vice president have individual lending authority that is approved by the board of directors.

Table of Contents

Loan Portfolio Composition. The following table sets forth the composition of our loan portfolio, by type of loan at the dates indicated, excluding loans held for sale of \$355,000, \$3.9 million, \$1.2 million, \$0, \$0, and \$270,000 at June 30, 2012, December 31, 2011, 2010, 2009, 2008, and 2007, respectively.

At June 30, 2012, PCI loans consisted of approximately 34% commercial real estate, 55% commercial and industrial loans with the remaining balance in residential and home equity loans. At December 31, 2011, these loans consisted of approximately 37% commercial real estate, 53% commercial and industrial loans with the remaining balance in residential and home equity loans.

Table of Contents

Loan Portfolio Maturities. The following table summarizes the scheduled repayments of our loan portfolio at December 31, 2011. Demand loans (loans having no stated repayment schedule or maturity) and overdraft loans are reported as being due in the year ending December 31, 2012. Maturities are based on the final contractual payment date and do not reflect the effect of prepayments and scheduled principal amortization.

Multifamily Real Estate Loans. We currently focus on originating multifamily real estate loans. Loans secured by multifamily properties totaled approximately \$538.3 million, or 50.3% of our total loan portfolio, at June 30, 2012. We include in this category mixed use properties having more than four residential family units and a business or businesses where the majority of space is utilized for residential purposes. At June 30, 2012, we had 512 multifamily real estate loans with an average loan balance of approximately \$1.1 million. At June 30, 2012, our largest multifamily real estate loan had a principal balance of \$13.5 million and was performing in accordance with its original contractual terms. Substantially all of our multifamily real estate loans are secured by properties located in our market areas.

Our multifamily real estate loans typically amortize over 20 to 30 years with interest rates that adjust after an initial five- or 10-year period, and every five years thereafter. Margins generally range from 275 basis points to 350 basis points above the average yield on U.S. Treasury securities, adjusted to a constant maturity of similar term, as published by the Federal Reserve Board. Variable rate loans originated subsequent to 2008 generally have been indexed to the five-year LIBOR swaps rate as published in the Federal Reserve Statistical Release adjusted for a negotiated margin. We also originate, to a lesser extent, 10- to 15-year fixed-rate, fully amortizing loans. In general, our multifamily real estate loans have interest rate floors equal to the interest rate on the date the loan is originated, and have prepayment penalties should the loan be prepaid in the initial five years.

In underwriting multifamily real estate loans, we consider a number of factors, including the projected net cash flow to the loan's debt service requirement (generally requiring a minimum ratio of 120%), the age and condition of the collateral, the financial resources and income level of the borrower, and the borrower's experience in owning or managing similar properties. Multifamily real estate loans generally are originated in amounts up to 75% of the appraised value of the property securing the loan. Due to competitor considerations, as is customary in our marketplace, we typically do not obtain personal guarantees from multifamily real estate borrowers.

Loans secured by multifamily real estate properties generally have less credit risk than other commercial real estate loans. The repayment of loans secured by multifamily real estate properties typically depends on the successful operation of the property. If the cash flow from the project is reduced, the borrower's ability to repay the loan may be impaired.

In a ruling that was contrary to a 1996 advisory opinion from the New York State Division of Housing and Community Renewal that owners of housing units who benefited from the receipt of J-51 tax incentives under the Rent Stabilization Law are eligible to decontrol apartments, the New York State Court of Appeals ruled, on October 22, 2009, that residential housing units located in two major housing complexes in New York City had been illegally decontrolled by the current and previous property owners. This ruling may subject other property owners that have previously or are currently benefiting from a J-51 tax incentive to litigation, possibly resulting in a significant reduction to property cash flows. Based on management's assessment of its multifamily loan portfolio, it believes

Table of Contents

that only one loan may be affected by the recent ruling regarding J-51. The loan has a principal balance of \$7.6 million at June 30, 2012, and is performing in accordance with its original contractual terms.

Commercial Real Estate Loans. Commercial real estate loans totaled \$311.3 million, or 29.1% of our loan portfolio as of June 30, 2012. At June 30, 2012, our commercial real estate loan portfolio consisted of 331 loans with an average loan balance of approximately \$940,000, although there are a large number of loans with balances substantially greater than this average. At June 30, 2012, our largest commercial real estate loan had a principal balance of \$9.2 million, was secured by a hotel, and was performing in accordance with its original contractual terms. Substantially all of our commercial real estate loans are secured by properties located in our primary market areas.

The table below sets forth the property types collateralizing our commercial real estate loans as of June 30, 2012.

	At June 30, 2012	
	Amount	Percent
	(Dollars in thousands)	
Manufacturing	\$ 37,763	12.1%

Recreational	10,531	3.4
Other	32,216	10.4
	\$ 311,256	100.0%

Our commercial real estate loans typically amortize over 20 to 25 years with interest rates that adjust after an initial five- or 10-year period, and every five years thereafter. Margins generally range from 275 basis points to 350 basis points above the average yield on U.S. Treasury securities, adjusted to a constant maturity of similar term, as published by the Federal Reserve Board. Variable rate loans originated subsequent to 2008 have generally been indexed to the five year London Interbank Offered Rate (LIBOR) swaps rate as published in the Federal Reserve Statistical Release adjusted for a negotiated margin. We also originate, to a lesser extent, 10- to 15-year fixed-rate, fully amortizing loans. In general, our commercial real estate loans have interest rate floors equal to the interest rate on the date the loan is originated, and generally have prepayment penalties if the loan is repaid in the initial five years.

In the underwriting of commercial real estate loans, we generally lend up to the lesser of 75% of the property's appraised value or purchase price. Certain single use property types have lower loan to appraised value ratios. We base our decision to lend primarily on the economic viability of the property and the creditworthiness of the borrower. In evaluating a proposed commercial real estate loan, we emphasize the ratio of the property's projected net cash flow to the loan's debt service requirement (generally requiring a minimum ratio of 125%), computed after deduction for a vacancy factor, when applicable, and property expenses we deem appropriate. Personal guarantees are usually obtained from commercial real estate borrowers. We require title insurance, fire and extended coverage casualty insurance, and, if appropriate, flood insurance, in order to protect our security interest in the underlying property. Although a significant portion of our commercial real estate loans are referred by brokers, we underwrite all commercial real estate loans in accordance with our underwriting standards.

Commercial real estate loans generally carry higher interest rates and have shorter terms than one- to four-family residential real estate loans. Commercial real estate loans generally have greater credit risk compared to one-

Table of Contents

to four-family residential real estate loans, as they typically involve larger loan balances concentrated with single borrowers or groups of related borrowers. In addition, the payment of loans secured by income-producing properties typically depends on the successful operation of the property or business, as repayment of the loan generally depends on sufficient income from the property to cover operating expenses and debt service. Changes in economic conditions that are not in the control of the borrower or lender may affect the value of the collateral for the loan or the future cash flow of the property. Additionally, any decline in real estate values may be more pronounced for commercial real estate than for residential properties.

Construction and Land Loans. At June 30, 2012, construction and land loans totaled \$25.5 million, or 2.4% of total loans receivable. At June 30, 2012, the additional un-advanced portion of these construction loans totaled \$1.8 million. At June 30, 2012, we had 18 construction and land loans with an average loan balance of approximately \$1.4 million. At June 30, 2012, our largest construction and land loan had a principal balance of \$4.9 million and was for the purpose of refinancing a land loan. This loan is performing in accordance with its original contractual terms.

Our construction and land loans typically are interest only loans with interest rates that are tied to a prime rate index as published by the Wall Street Journal. Margins generally range from zero basis points to 200 basis points above the prime rate index. We also originate, to a lesser extent, 10- to 15-year fixed-rate, fully amortizing land loans. In general, our construction and land loans have interest rate floors equal to the interest rate on the date the loan is originated, and we do not typically charge prepayment penalties.

We grant construction and land loans to experienced developers for the construction of single-family residences including condominiums, and commercial properties. Construction and land loans also are made to individuals for the construction of their personal residences. Advances on construction loans are made in accordance with a schedule reflecting the cost of construction, but are generally limited to a loan-to-completed-appraised-value ratio of 70%. Repayment of construction loans on residential properties normally is expected from the sale of units to individual purchasers, or in the case of individuals building their own, with a permanent mortgage. In the case of income-producing property, repayment usually is expected from permanent financing upon completion of construction. We typically offer the permanent mortgage financing on our construction loans on income-producing properties.

Land loans also help finance the purchase of land intended for future development, including single-family housing, multifamily housing, and commercial property. In some cases, we may make an acquisition loan before the borrower has received approval to develop the land. In general, the maximum loan-to-value ratio for a land acquisition loan is 50% of the appraised value of the property, and the maximum term of these loans is two years. Generally, if the maturity of the loan exceeds two years, the loan must be an amortizing loan.

Construction and land loans generally carry higher interest rates and have shorter terms than one- to four-family residential real estate loans. Construction and land loans have greater credit risk than long-term financing on improved, owner-occupied real estate. Risk of loss on a construction loan depends largely upon the accuracy of the initial estimate of the real estate value at completion of construction as compared to the estimated cost (including interest) of construction and other assumptions. If the estimate of construction costs is inaccurate, we may decide to advance additional funds beyond the amount originally committed in order to protect the value of the real estate. However, if the estimated value of the completed project is inaccurate, the borrower may hold the real estate with a value that is insufficient to assure full repayment of the construction loan upon its sale. In the event we make a land acquisition loan on real estate that is not yet approved for the planned development, there is a risk that approvals will not be granted or will be delayed. Construction loans also expose us to a risk that improvements will not be completed on time in accordance with specifications and projected costs. In addition, the ultimate sale or rental of the real estate may not occur as anticipated and the market value of collateral, when completed, may be less than the outstanding loans against the real estate and there may be no permanent financing available upon completion. Substantially all of our construction and land loans are secured by real estate located in our primary market areas.

Commercial and Industrial Loans. At June 30, 2012, commercial and industrial loans totaled \$13.4 million, or 1.3% of the total loan portfolio. As of June 30, 2012, we had 89 commercial and industrial loans with an

Table of Contents

average loan balance of approximately \$150,000, although we originate these types of loans in amounts substantially greater and smaller than this average. At June 30, 2012, our largest commercial and industrial loan had a principal balance of \$2.7 million and was performing in accordance with its original contractual terms.

Our commercial and industrial loans typically amortize over 10 years with interest rates that are tied to a prime rate index as published in the Wall Street Journal. Margins generally range from zero basis points to 300 basis points above the prime rate index. We also originate, to a lesser extent, 10 year fixed-rate, fully amortizing loans. In general, our commercial and industrial loans have interest rate floors equal to the interest rate on the date the loan is originated and have prepayment penalties.

We make various types of secured and unsecured commercial and industrial loans to customers in our market area for the purpose of working capital and other general business purposes. The terms of these loans generally range from less than one year to a maximum of 15 years. The loans either are negotiated on a fixed-rate basis or carry adjustable interest rates indexed to a market rate index.

Commercial credit decisions are based on our credit assessment of the applicant. We evaluate the applicant's ability to repay in accordance with the proposed terms of the loan and assess the risks involved. Personal guarantees of the principals are typically obtained. In addition to evaluating the loan applicant's financial statements, we consider the adequacy of the secondary sources of repayment for the loan, such as pledged collateral and the financial stability of the guarantors. Credit agency reports of the guarantors' personal credit history supplement our analysis of the applicant's creditworthiness. We also attempt to confirm with other banks and conduct trade investigations as part of our credit assessment of the borrower. Collateral supporting a secured transaction also is analyzed to determine its marketability.

Commercial and industrial loans generally carry higher interest rates than one- to four-family residential real estate loans of like maturity because they have a higher risk of default since their repayment generally depends on the successful operation of the borrower's business.

One- to Four-Family Residential Real Estate Loans. At June 30, 2012, we had 372 one- to four-family residential real estate loans outstanding with an aggregate balance of \$69.8 million, or 6.5% of our total loan portfolio. As of June 30, 2012, the average balance of one- to four-family residential real estate loans was approximately \$188,000, although we have originated this type of loan in amounts substantially greater and smaller than this average. At June 30, 2012, our largest loan of this type had a principal balance of \$2.3 million and was performing in accordance with its original contractual terms.

For all one- to four-family residential real estate loans originated through the origination assistance agreement with the third party underwriter, upon receipt of a completed loan application from a prospective borrower: (1) a credit report is reviewed; (2) income, assets, indebtedness and certain other information are reviewed; (3) if necessary, additional financial information is required of the borrower; and (4) an appraisal of the real estate intended to secure the proposed loan is ordered from an independent appraiser. One- to four-family residential real estate loans sold to the third party underwriter under a Loan and Servicing Rights Purchase and Sale Agreement totaled \$6.7 million and \$11.2 million during the six months ended June 30, 2012 and the year ended December 31, 2011, respectively. As of June 30, 2012, our portfolio of one- to four-family residential real estate loans serviced for others totaled \$35.3 million.

We do not offer interest only mortgage loans on one- to four-family residential real estate properties, where the borrower pays interest for an initial period, after which the loan converts to a fully amortizing loan. We also do not offer loans that provide for negative amortization of principal, such as Option ARM loans, where the borrower can pay less than the interest owed on their loan, resulting in an increased principal balance during the life of the loan. We do not offer subprime loans (loans that generally target borrowers with weakened credit histories typically characterized by payment delinquencies, previous charge-offs, judgments, bankruptcies, or borrowers with questionable repayment capacity as evidenced by low credit scores or high debt-burden ratios).

Table of Contents

Home Equity Loans and Lines of Credit. At June 30, 2012, we had 489 home equity loans and lines of credit with an aggregate outstanding balance of \$28.9 million, or 2.7% of our total loan portfolio. Of this total, there were outstanding home equity lines of credit of \$15.7 million, or 1.5% of our total loan portfolio. At June 30, 2012, the average home equity loan and line of credit balance was approximately \$59,000, although we originate these types of loans in amounts substantially greater and lower than this average. At June 30, 2012, our largest home equity line of credit outstanding was \$1.5 million and on non-accrual status. At June 30, 2012, our largest home equity loan was \$302,000 and was performing in accordance with its modified terms.

We offer home equity loans and home equity lines of credit that are secured by the borrower's primary residence or second home. Home equity lines of credit are variable rate loans tied to a prime rate index as published in the Wall Street Journal adjusted for a margin, and have a maximum term of 20 years during which time the borrower is required to make principal payments based on a 20-year amortization. Home equity lines generally have interest rate floors and ceilings. The borrower is permitted to draw against the line during the entire term on originations occurring prior to June 15, 2011. For home equity loans originated from June 15, 2011 forward, the borrower is only permitted to draw against the line for the initial 10 years. Our home equity loans typically are fully amortizing with fixed terms to 20 years. Home equity loans and lines of credit generally are underwritten with the same criteria we use to underwrite fixed-rate, one- to four-family residential real estate loans. Home equity loans and lines of credit may be underwritten with a loan-to-value ratio of 80% when combined with the principal balance of the existing mortgage loan. We appraise the property securing the loan at the time of the loan application to determine the value of the property. At the time we close a home equity loan or line of credit, we record a mortgage to perfect our security interest in the underlying collateral.

Insurance premium loans. At June 30, 2012, insurance premium loans totaled \$454,000. We sold the majority of our portfolio of insurance premium finance loans during the six months ended June 30, 2012, except for remaining cancelled loans. We will hold cancelled loans until their ultimate resolution, which is generally a payment from the insurance carrier in the amount of the unearned premium which generally exceeds the loan balance.

Purchased Credit-Impaired Loans. PCI loans are accounted for in accordance with Accounting Standards Codification Topic 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality (ASC 310-30), since all of these loans were acquired at a discount attributable, at least in part, to credit quality. PCI loans were initially recorded at fair value (as determined by the present value of expected future cash flows) with no valuation allowance (i.e., allowance for loan losses). Under ASC Topic 310-30, the PCI loans were aggregated and accounted for as pools of loans based on common risk characteristics. The PCI loans had a carrying balance of approximately \$82.1 million at June 30, 2012 or 7.7% of our total loan portfolio. At June 30, 2012, PCI loans consisted of approximately 34% commercial real estate and 55% commercial and industrial loans, with the remaining balance in residential and home equity loans. At June 30, 2012, based on recorded contractual principal, 6.1% of PCI loans were past due 30 to 89 days, and 12.8% were past due 90 days or more.

The difference between the undiscounted cash flows expected at acquisition and the investment in the PCI loans, or the accretable yield, is recognized as interest income utilizing the level-yield method over the life of the loans in each pool. Contractually required payments for interest and principal that exceed the undiscounted cash flows expected at acquisition, or the non-accretable difference, are not recognized as a yield adjustment or as a loss accrual or a valuation allowance. Increases in expected cash flows subsequent to the acquisition are recognized prospectively through an adjustment of the yield on the pool over its remaining life, while decreases in expected cash flows are recognized as impairment through a loss provision and an increase in the allowance for loan losses.

Non-Performing and Problem Assets

When a loan is over 15 days delinquent, we generally send the borrower a late charge notice. When the loan is 30 days past due, we generally mail the borrower a letter reminding the borrower of the delinquency and, except for loans secured by one- to four-family residential real estate, we attempt personal, direct contact with the borrower to determine the reason for the delinquency, to ensure that the borrower correctly understands the terms of the loan, and to emphasize the importance of making payments on or before the due date. If necessary, additional late charges and delinquency notices are issued and the account will be monitored periodically. After the 90th day of

Table of Contents

delinquency, we will send the borrower a final demand for payment and generally refer the loan to legal counsel to commence foreclosure and related legal proceedings. Our loan officers can shorten these time frames in consultation with the Chief Lending Officer.

Generally, loans (excluding PCI loans) are placed on non-accrual status when payment of principal or interest is 90 days or more delinquent unless the loan is considered well-secured and in the process of collection. Loans also are placed on non-accrual status at any time if the ultimate collection of principal or interest in full is in doubt. When loans are placed on non-accrual status, unpaid accrued interest is reversed, and further income is recognized only to the extent received, and only if the principal balance is deemed fully collectible. The loan may be returned to accrual status if both principal and interest payments are brought current and factors indicating doubtful collection no longer exist, including performance by the borrower under the loan terms for a six-month period. Our Chief Lending Officer reports monitored loans, including all loans rated watch, special mention, substandard, doubtful or loss, to the loan committee of the board of directors at least quarterly.

For economic reasons and to maximize the recovery of loans, we work with borrowers experiencing financial difficulties, and will consider modifications to a borrower's existing loan terms and conditions that it would not otherwise consider, commonly referred to as troubled debt restructurings (TDR). We record an impairment loss associated with TDRs, if any, based on the present value of expected future cash flows discounted at the original loan's effective interest rate or the underlying collateral value, less cost to sell, if the loan is collateral dependent. Once an obligation has been restructured because of such credit problems, it continues to be considered restructured until paid in full or, if the obligation yields a market rate (a rate equal to or greater than the rate we were willing to accept at the time of the restructuring for a new loan with comparable risk), until the year subsequent to the year in which the restructuring takes place, provided the borrower has performed under the modified terms for a six-month period.

PCI loans are subject to the same internal credit review process as non-PCI loans. If and when unexpected credit deterioration occurs at the loan pool level subsequent to the acquisition date, a provision for credit losses for PCI loans will be charged to earnings for the full amount of the decline in expected cash flows for the pool. Under the accounting guidance of ASC Subtopic 310-30, for acquired credit impaired loans, the allowance for loan losses on PCI loans is measured at each financial reporting date based on future expected cash flows. This assessment and measurement is performed at the pool level and not at the individual loan level. Accordingly, decreases in expected cash flows resulting from further credit deterioration on a pool of acquired PCI loan pools as of such measurement date compared to those originally estimated are recognized by recording a provision and allowance for credit losses on PCI loans. Subsequent increases in the expected cash flows of the loans in that pool would first reduce any allowance for loan losses on PCI loans; and any excess will be accreted prospectively as a yield adjustment.

We consider our PCI loans to be performing due to the application of the yield accretion method under ASC Topic 310-30. ASC Topic 310-30 allows us to aggregate credit-impaired loans acquired in the same fiscal quarter into one or more pools, provided that the loans have common risk characteristics. A pool is then accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows. Accordingly, loans that may have been classified as non-performing loans by the acquired company are no longer classified as non-performing because, at the respective dates of acquisition, we believed that we would fully collect the new carrying value of these loans. The new carrying value represents the contractual balance, reduced by the portion expected to be uncollectible (referred to as the non-accretable difference) and by an accretable yield (discount) that is recognized as interest income. It is important to note that management's judgment is required in reclassifying loans subject to ASC Topic 310-30 as performing loans, and is dependent on having a reasonable expectation about the timing and amount of the cash flows to be collected, even if a loan is contractually past due.

Non-Performing and Restructured Loans excluding PCI Loans. The table below sets forth the amounts and categories of our non-performing assets at the dates indicated. At June 30, 2012 and December 31, 2011, 2010, 2009, 2008, and 2007, we had troubled debt restructurings of \$21.6 million, \$23.3 million, \$20.0 million, \$10.7 million, \$1.0 million, and \$1.3 million, respectively, which are included in the appropriate categories which appear within non-accrual loans. Additionally, we had \$25.5 million, \$18.3 million, \$11.2 million and \$7.3 million of troubled debt restructurings on accrual status at June 30, 2012 and December 31, 2011, 2010 and 2009, respectively,

Table of Contents

which do not appear in the table below. We had 0 troubled debt restructurings on accrual status at December 31, 2008 and 2007. Generally, the types of concessions that we make to troubled borrowers include reduction in interest rates and payment extensions. At June 30, 2012, 82% of TDRs were commercial real estate loans, 4% were construction loans, 4% were multifamily loans, 3% were commercial and industrial loans, 1% were home equity loans and 6% were one- to four-family residential loans. At June 30, 2012, \$23.1 million of the \$25.5 million of accruing troubled debt restructurings, and \$17.8 million of the \$21.6 million of non-accruing troubled debt restructurings, were performing in accordance with their restructured terms. At December 31, 2011, 81% of TDRs were commercial real estate loans, 4% were construction loans, 5% were multifamily loans, 4% were commercial and industrial loans, and 6% were one- to four-family residential loans. At December 31, 2011, \$12.7 million of the \$18.3 million of accruing troubled debt restructurings, and \$19.2 million of the \$23.3 million of non-accruing troubled debt restructurings, were performing in accordance with their restructured terms.

At June 30, 2012, based on recorded contractual principal, 6.1% of PCI loans were past due 30 to 89 days, and 12.8% were past due 90 days or more. At December 31, 2011, based on recorded contractual principal, 9.0% of PCI loans were past due 30 to 89 days, and 16.1% were past due 90 days or more, as compared to 8.0% and 13.9% at October 14, 2011. The amount and timing of expected cash flows as of June 30, 2012 and December 31, 2012 did not change significantly from the October 2011 acquisition date.

Other Real Estate Owned. Real estate acquired by us as a result of foreclosure or by deed in lieu of foreclosure is classified as other real estate owned. On the date property is acquired it is recorded at the lower of cost or estimated fair value, establishing a new cost basis. Estimated fair value generally represents the sale price a buyer would be willing to pay on the basis of current market conditions, including normal terms from other financial institutions, less the estimated costs to sell the property. Holding costs and declines in estimated fair value result in charges to expense after acquisition. Other real estate owned amounted to 7 properties totaling \$2.1 million at June 30, 2012, as compared to 13 properties totaling \$3.4 million at December 31, 2011, and 7 properties totaling \$171,000 at December 31, 2010. The December 31, 2011 amounts include properties totaling approximately \$1.2 million acquired as part of the Federal Deposit Insurance Corporation-assisted acquisition.

Potential Problem Loans and Classification of Assets. The current economic environment continues to negatively affect certain borrowers. Our loan officers and credit administration department continue to monitor their loan portfolios, including evaluation of borrowers' business operations, current financial condition, underlying values of any collateral, and assessment of their financial prospects in the current and deteriorating economic environment. Based on these evaluations, we determine an appropriate strategy to assist borrowers, with the objective of maximizing the recovery of the related loan balances.

Our policies, consistent with regulatory guidelines, provide for the classification of loans and other assets that are considered to be of lesser quality as substandard, doubtful, or loss assets. An asset is considered substandard if it is inadequately protected by the current net worth and paying capacity of the obligor, or of the collateral pledged, if any. Substandard assets include those assets characterized by the distinct possibility that we will sustain some loss if the deficiencies are not corrected. Assets classified as doubtful have all of the weaknesses inherent in those classified substandard with the added characteristic that the weaknesses present make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. Assets (or portions of assets) classified as loss are those considered uncollectible and of such little value that their continuance as assets is not warranted. Assets that do not expose us to risk sufficient to warrant classification in one of the aforementioned categories, but which possess potential weaknesses that deserve our close attention, are designated as special mention. At June 30, 2012, classified assets consisted of substandard assets of \$36.5 million and 0 doubtful or loss assets. We also had \$46.3 million of assets designated as special mention. At December 31, 2011, classified assets consisted of substandard assets of \$36.0 million and 0 doubtful or loss assets. We also had \$36.8 million of assets designated as special mention.

Our determination as to the classification of our assets (and the amount of our loss allowances) is subject to review by our principal federal regulator, the Office of the Comptroller of the Currency, which can require that we adjust our classification and related loss allowances. We regularly review our asset portfolio to determine whether any assets require classification in accordance with applicable regulations. We also engage the services of a third party to review our classification on a semi-annual basis.

Table of Contents

Allowance for Loan Losses

We provide for loan losses based on the consistent application of our documented allowance for loan loss methodology. Loan losses are charged to the allowance for loans losses and recoveries are credited to it. Additions to the allowance for loan losses are provided by charges against income based on various factors which, in our judgment, deserve current recognition in estimating probable losses. We regularly review the loan portfolio and make adjustments for loan losses in order to maintain the allowance for loan losses in accordance with GAAP. The allowance for loan losses consists primarily of the following two components:

- (1) Allowances are established for impaired loans (which we generally define as non-accrual loans with an outstanding balance of \$500,000 or greater). The amount of impairment provided is represented by the deficiency, if any, between the present value of expected future cash flows discounted at the original loan's effective interest rate or the underlying collateral value (less estimated costs to sell), if the loan is collateral dependent, and the carrying value of the loan. Impaired loans that have no impairment losses are not considered for general valuation allowances described below. Generally, we charge down a loan to the estimated fair value of the underlying collateral, less costs to sell, and maintains an allowance for loan losses for expected losses related to discounts to facilitate a sale of the property.

- (2) General allowances are established for loan losses on a portfolio basis for loans that do not meet the definition of impaired. The portfolio is grouped into similar risk characteristics, primarily loan type, loan-to-value, if collateral dependent, and internal credit risk rating. We apply an estimated loss rate to each loan group. The loss rates applied are based on our cumulative prior two year loss experience adjusted, as appropriate, for the environmental factors discussed below. This evaluation is inherently subjective as it requires material estimates that may be susceptible to significant revisions based upon changes in economic and real estate market conditions. Actual loan losses may be significantly more than the allowance for loan losses we have established, which could have a material negative effect on our financial results. Within general allowances is an unallocated reserve established to recognize losses related to the inherent subjective nature of the appraisal process and the internal credit risk rating process.

The adjustments to our loss experience are based on our evaluation of several environmental factors, including:

changes in local, regional, national, and international economic and business conditions and developments that affect the collectability of our portfolio, including the condition of various market segments;

changes in the nature and volume of our portfolio and in the terms of our loans;

changes in the experience, ability, and depth of lending management and other relevant staff;

changes in the volume and severity of past due loans, the volume of non-accrual loans, and the volume and severity of adversely classified or graded loans;

changes in the quality of our loan review system;

changes in the value of underlying collateral for collateral-dependent loans;

the existence and effect of any concentrations of credit, and changes in the level of such concentrations; and

Table of Contents

the effect of other external factors such as competition and legal and regulatory requirements on the level of estimated credit losses in our existing portfolio.

In evaluating the estimated loss factors to be utilized for each loan group, management also reviews actual loss history over an extended period of time as reported by the Federal Deposit Insurance Corporation for institutions both nationally and in our market area for periods that are believed to have been under similar economic conditions.

We evaluate the allowance for loan losses based on the combined total of the impaired and general components for originated loans. Generally when the loan portfolio increases, absent other factors, our allowance for loan loss methodology results in a higher dollar amount of estimated probable losses. Conversely, when the loan portfolio decreases, absent other factors, our allowance for loan loss methodology results in a lower dollar amount of estimated probable losses.

We also maintain an unallocated component related to the general loss allocation. Management does not target a specific unallocated percentage of the total general allocation, or total allowance for loan losses. The primary purpose of the unallocated component is to account for the inherent imprecision of the loss estimation process related primarily to periodic updating of appraisals on impaired loans, as well as periodic updating of commercial loan credit risk ratings by loan officers and our internal credit audit process. Generally, management will establish higher levels of unallocated reserves between independent credit audits, and between appraisal reviews for larger impaired loans. Adjustments to the provision for loans due to the receipt of updated appraisals is mitigated by management's quarterly review of real estate market index changes, and reviews of property valuation trends noted in current appraisals being received on other impaired and unimpaired loans. These changes in indicators of value are applied to impaired loans that are awaiting updated appraisals.

Each quarter we evaluate the allowance for loan losses and adjust the allowance as appropriate through a provision or recovery for loan losses. While we use the best information available to make evaluations, future adjustments to the allowance may be necessary if conditions differ substantially from the information used in making the evaluations. In addition, as an integral part of their examination process, the Office of the Comptroller of the Currency will periodically review the allowance for loan losses. The Office of the Comptroller of the Currency may require us to adjust the allowance based on their analysis of information available to them at the time of their examination. Our last completed regulatory examination was as of September 30, 2011, and we are currently under examination with respect to information as of June 30, 2012.

Table of Contents

The following table sets forth activity in our allowance for loan losses for the periods indicated.

	At or For the Six Months Ended			At or For the Years Ended December 31,

Investments

We conduct investment transactions in accordance with our board approved investment policy which is reviewed at least annually by the risk committee of the board of directors, and any changes to the policy are subject to ratification by the full board of directors. This policy dictates that investment decisions give consideration to the safety of the investment, liquidity requirements, potential returns, the ability to provide collateral for pledging requirements, and consistency with our interest rate risk management strategy. Our Treasurer executes our securities portfolio transactions, within policy requirements, with the approval of either the Chief Executive Officer or the Chief Financial Officer. NSB Services Corp. s and NSB Realty Trust s investment officers execute security portfolio transactions in accordance with investment policies that substantially mirror Northfield Bank s investment policy. All purchase and sale transactions are reviewed by the risk committee at least quarterly.

Table of Contents

Our current investment policy permits investments in mortgage-backed securities, including pass-through securities and real estate mortgage investment conduits (REMICs). The investment policy also permits, with certain limitations, investments in debt securities issued by the U.S. Government, agencies of the U.S. Government or U.S. Government-sponsored enterprises (GSEs), asset-backed securities, money market mutual funds, federal funds, investment grade corporate bonds, reverse repurchase agreements, and certificates of deposit.

Our investment policy does not permit investment in municipal bonds, preferred and common stock of other entities including U.S. Government sponsored enterprises or equity securities other than our required investment in the common stock of the Federal Home Loan Bank of New York, or as permitted for community reinvestment purposes or for the purposes of funding the Bank's deferred compensation plan. Northfield-Federal may invest in equity securities of other financial institutions up to certain limitations. As of June 30, 2012, we held 0 asset-backed securities other than mortgage-backed securities. Our board of directors may change these limitations in the future.

Our current investment policy does not permit hedging through the use of such instruments as financial futures or interest rate options and swaps.

At the time of purchase, we designate a security as either held-to-maturity, available-for-sale, or trading, based upon our ability and intent to hold such securities. Trading securities and securities available-for-sale are reported at estimated fair value, and securities held-to-maturity are reported at amortized cost. A periodic review and evaluation of the available-for-sale and held-to-maturity securities portfolios is conducted to determine if the estimated fair value of any security has declined below its carrying value and whether such impairment is other-than-temporary. If such impairment is deemed to be other-than-temporary, the security is written down to a new cost basis and the resulting loss is charged against earnings. The estimated fair values of our securities are obtained from an independent nationally recognized pricing service (see Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies for further discussion). At June 30, 2012, our investment portfolio consisted primarily of mortgage-backed securities guaranteed by GSEs and to a lesser extent private label mortgage-backed securities, mutual funds and corporate securities. The market for these securities primarily consists of other financial institutions, insurance companies, real estate investment trusts, and mutual funds.

We purchase mortgage-backed securities insured or guaranteed primarily by Fannie Mae, Freddie Mac, or Ginnie Mae, and to a lesser extent, securities issued by private companies (private label). We invest in mortgage-backed securities to achieve positive interest rate spreads with minimal administrative expense, and to lower our credit risk as a result of the guarantees provided by Fannie Mae, Freddie Mac, or Ginnie Mae as well as to provide us liquidity to fund loan originations and deposit outflows. In September 2008, the Federal Housing Finance Agency placed Freddie Mac and Fannie Mae into conservatorship. The U.S. Treasury Department has established financing agreements to ensure that Freddie Mac and Fannie Mae meet their obligations to holders of mortgage-backed securities that they have issued or guaranteed.

Mortgage-backed securities are securities sold in the secondary market that are collateralized by pools of mortgages. Certain types of mortgage-backed securities are commonly referred to as pass-through certificates because the principal and interest of the underlying loans is passed through pro rata to investors, net of certain costs, including servicing and guarantee fees, in proportion to an investor's ownership in the entire pool. The issuers of such securities pool mortgages and resell the participation interests in the form of securities to investors. The interest rate of the security is lower than the interest rates of the underlying loans to allow for payment of servicing and guaranty fees. Ginnie Mae, a U.S. Government agency, and GSEs, such as Fannie Mae and Freddie Mac, may guarantee the payments, or guarantee the timely payment of, principal and interest to investors.

Mortgage-backed securities are more liquid than individual mortgage loans since there is a more active market for such securities. In addition, mortgage-backed securities may be used to collateralize our specific liabilities and obligations. Investments in mortgage-backed securities issued or guaranteed by GSEs involve a risk that actual payments will be greater or less than estimated at the time of purchase, which may require adjustments to the amortization of any premium or accretion of any discount relating to such interests, thereby affecting the net

Table of Contents

yield on our securities. We periodically review current prepayment speeds to determine whether prepayment estimates require modification that could cause adjustment of amortization or accretion.

REMICs are a type of mortgage-backed security issued by special-purpose entities that aggregate pools of mortgages and mortgage-backed securities and create different classes of securities with varying maturities and amortization schedules, as well as a residual interest, with each class possessing different risk characteristics. The cash flows from the underlying collateral are generally divided into tranches or classes that have descending priorities with respect to the distribution of principal and interest cash flows.

The timely payment of principal and interest on these REMICs is generally supported (credit enhanced) in varying degrees by either insurance issued by a financial guarantee insurer, letters of credit, over collateralization, or subordination techniques. Substantially all of these securities are rated AAA by Standard & Poor's or Moody's at the time of purchase. Privately issued REMICs and pass-throughs can be subject to certain credit-related risks normally not associated with U.S. Government agency and U.S. Government-sponsored enterprise mortgage-backed securities. The loss protection generally provided by the various forms of credit enhancements is limited, and losses in excess of certain levels are not protected. Furthermore, the credit enhancement itself may be subject to the creditworthiness of the credit enhancer. Thus, in the event a credit enhancer does not fulfill its obligations, the holder could be subject to risk of loss similar to a purchaser of a whole loan pool. Management believes that the credit enhancements are adequate to protect us from material losses on our privately issued mortgage-backed securities.

At June 30, 2012, our corporate bond portfolio consisted of investment grade securities with maturities generally shorter than three years. Our investment policy provides that we may invest up to 15% of our tier-one risk-based capital in corporate bonds from individual issuers which, at the time of purchase, are within the three highest investment-grade ratings from Standard & Poor's or Moody's. The maturity of these bonds may not exceed 10 years, and there is no aggregate limit for this security type. Corporate bonds from individual issuers with investment-grade ratings, at the time of purchase, below the top three ratings are limited to the lesser of 1% of our total assets or 15% of our tier-one risk-based capital and must have a maturity of less than one year. Aggregate holdings of this security type cannot exceed 5% of our total assets. Bonds that subsequently experience a decline in credit rating below investment grade are monitored at least quarterly.

Table of Contents

The following table sets forth the amortized cost and estimated fair value of our available-for-sale and held-to-maturity securities portfolios (excluding Federal Home Loan Bank of New York common stock) at the dates indicated. As of June 30, 2012 and December 31, 2011, 2010, and 2009, we also had a trading portfolio with a market value of \$4.5 million, \$4.1 million, \$4.1 million, and \$3.4 million, respectively, consisting of mutual funds quoted in actively traded markets. These securities are utilized to fund non-qualified deferred compensation obligations.

Sources of Funds

General. Deposits traditionally have been our primary source of funds for our securities and lending activities. We also borrow from the Federal Home Loan Bank of New York and other financial institutions to supplement cash flow needs, to manage the maturities of liabilities for interest rate and investment risk management purposes, and to manage our cost of funds. Our additional sources of funds are the proceeds of loan sales, scheduled loan and investment payments, maturing investments, loan prepayments, and retained income on other earning assets.

Deposits. We accept deposits primarily from the areas in which our offices are located. We rely on our convenient locations, customer service, and competitive products and pricing to attract and retain deposits. We offer a variety of deposit accounts with a range of interest rates and terms. Our deposit accounts consist of transaction accounts (NOW and non-interest bearing checking accounts), savings accounts (money market, passbook, and statement savings), and certificates of deposit, including individual retirement accounts. We accept brokered deposits on a limited basis, when it is deemed cost effective. At June 30, 2012 and December 31, 2011 and 2010, we had brokered certificates of deposits totaling \$659,000, \$3.4 million and \$68.4 million, respectively.

Interest rates offered generally are established weekly, while maturity terms, service fees, and withdrawal penalties are reviewed on a periodic basis. Deposit rates and terms are based primarily on current operating strategies and market interest rates, liquidity requirements, and our deposit growth goals.

At June 30, 2012, we had a total of \$482.4 million in certificates of deposit, of which \$168.4 million had remaining maturities of one year or less. Based on our experience and current pricing strategy, we believe we will retain a significant portion of these accounts at maturity.

Table of Contents

The following tables set forth the distribution of our average total deposit accounts, by account type, for the periods indicated.

	For the Six Months Ended June 30,

Table of Contents

As of June 30, 2012, the aggregate amount of our outstanding certificates of deposit in amounts greater than or equal to \$100,000 was \$229.1 million. The following table sets forth the maturity of these certificates at June 30, 2012.

	At June 30, 2012 (In thousands)
Three months or less	\$ 50,198
Over three months through six months	95,313
Over six months through one year	22,853
Over one year to three years	40,362
Over three years	20,384
Total	\$ 229,110

Borrowings. Our borrowings consist primarily of securities sold under agreements to repurchase (repurchase agreements) with third party financial institutions, as well as advances from the Federal Home Loan Bank of New York and the Federal Reserve Bank of New York. As of June 30, 2012, our repurchase agreements totaled \$276.0 million, or 13.3% of total liabilities, capitalized lease obligations totaled \$1.6 million, or 0.1% of total liabilities, floating rate advances totaled \$5.8 million, or 0.3% of total liabilities and our Federal Home Loan Bank advances totaled \$230.2 million, or 11.1% of total liabilities. At June 30, 2012, we had the ability to obtain additional funding from the Federal Home Loan Bank of New York and Federal Reserve Bank of New York discount window of approximately \$588.8 million, utilizing unencumbered securities of \$521.5 million and multifamily loans of \$127.5 million at June 30, 2012. Repurchase agreements are primarily secured by mortgage-backed securities. Advances from the Federal Home Loan Bank of New York are secured by our investment in the common stock of the Federal Home Loan Bank of New York as well as by pledged mortgage-backed securities.

The following table sets forth information concerning balances and interest rates on our borrowings at and for the periods indicated:

	At or For the Six Months Ended June 30,		At or For the Years Ended December 31,		
	2012	2011	2011	2010	2009

Average interest rate during period	2.70%	2.66%	2.76%	3.28%	3.62%

Employees

As of June 30, 2012, we had 255 full-time employees and 42 part-time employees. Our employees are not represented by any collective bargaining group. Management believes that we have a good working relationship with our employees.

Subsidiary Activities

Northfield-Federal owns 100% of Northfield Investments, Inc., an inactive New Jersey investment company, and 100% of Northfield Bank. Northfield Bank owns 100% of NSB Services Corp., a Delaware corporation, which in turn owns 100% of the voting common stock of NSB Realty Trust. NSB Realty Trust is a Maryland real estate investment trust that holds mortgage loans, mortgage-backed securities and other investments. These entities enable us to segregate certain assets for management purposes, and promote our ability to raise regulatory capital in the future through the sale of preferred stock or other capital-enhancing securities or borrow against assets or stock of these entities for liquidity purposes. At June 30, 2012, Northfield Bank's investment in

Table of Contents

NSB Services Corp. was \$609.4 million, and NSB Services Corp. had assets of \$609.5 million and liabilities of \$120,000 at that date. At June 30, 2012, NSB Services Corp. s investment in NSB Realty Trust was \$615.3 million, and NSB Realty Trust had \$615.3 million in assets, and liabilities of \$19,000 at that date. NSB Insurance Agency, Inc. is a New York corporation that receives nominal commissions from the sale of life insurance by employees of Northfield Bank. At June 30, 2012, Northfield Bank s investment in NSB Insurance Agency was \$1,000.

Legal Proceedings

In the normal course of business, we may be party to various outstanding legal proceedings and claims. In the opinion of management, the consolidated financial statements will not be materially affected by the outcome of such legal proceedings and claims as of June 30, 2012.

Expense and Tax Allocation Agreements

Northfield Bank will enter into an agreement with Northfield-Delaware to provide it with certain administrative support services, whereby Northfield Bank will be compensated at not less than the fair market value of the services provided. In addition, Northfield Bank and Northfield-Delaware will enter into an agreement to establish a method for allocating and for reimbursing the payment of their consolidated tax liability.

Properties

We operate from our home office located at 1731 Victory Boulevard, Staten Island, New York, our operations center located at 581 Main Street, Woodbridge, New Jersey, our additional 28 branch offices located in New York and New Jersey and our commercial loan center. Our branch offices are located in the New York Counties of Richmond, and Kings and the New Jersey Counties of Middlesex and Union. The net book value of our premises, land, and equipment was \$23.1 million at June 30, 2012.

Table of Contents

The following table sets forth information with respect to our full-service banking offices and our loan centers as of June 30, 2012, including the expiration date of leases with respect to leased facilities. The table excludes information with respect to the three full-service banking offices that were acquired as part of the acquisition of Flatbush Federal Bancorp on November 2, 2012.

SUPERVISION AND REGULATION

General

Northfield Bank is a federally chartered savings bank that is regulated, examined and supervised by the Office of the Comptroller of the Currency and the Federal Deposit Insurance Corporation. This regulation and supervision establishes a comprehensive framework of activities in which an institution may engage and is intended primarily for the protection of the Federal Deposit Insurance Corporation's deposit insurance fund and depositors, and not for the protection of security holders. Under this system of federal regulation, financial institutions are periodically examined to ensure that they satisfy applicable standards with respect to their capital adequacy, assets, management, earnings, liquidity and sensitivity to market interest rates. Northfield Bank also is regulated to a lesser extent by the Federal Reserve Board, governing reserves to be maintained against deposits and other matters. The Office of the Comptroller of the Currency examines Northfield Bank and prepares reports for the consideration of its board of directors on any operating deficiencies. Northfield Bank's relationship with its depositors and borrowers also is regulated to a great extent by federal law and, to a much lesser extent, state law, especially in matters concerning the ownership of deposit accounts and the form and content of Northfield Bank's loan documents. Northfield Bank is also a member of and owns stock in the Federal Home Loan Bank of Boston, which is one of the twelve regional banks in the Federal Home Loan Bank System.

As a savings and loan holding company following the conversion, Northfield-Delaware will be required to comply with the rules and regulations of the Federal Reserve Board. It will be required to file certain reports with and will be subject to examination by and the enforcement authority of the Federal Reserve Board. Northfield-Delaware will also be subject to the rules and regulations of the Securities and Exchange Commission under the federal securities laws.

Any change in applicable laws or regulations, whether by the Federal Deposit Insurance Corporation, the Office of the Comptroller of the Currency, the Federal Reserve Board or Congress, could have a material adverse impact on the operations and financial performance of Northfield-Delaware and Northfield Bank.

Set forth below is a brief description of material regulatory requirements that are or will be applicable to Northfield Bank and Northfield-Delaware. The description is limited to certain material aspects of the statutes and regulations addressed and is not intended to be a complete description of such statutes and regulations and their effects on Northfield Bank and Northfield-Delaware.

Dodd-Frank Act

The Dodd-Frank Act significantly changed the bank regulatory structure and has affected the lending, investment, trading and operating activities of depository institutions and their holding companies. The Dodd-Frank Act eliminated our primary federal regulator, the Office of Thrift Supervision, as of July 21, 2011, and required Northfield Bank to be supervised and examined by the Office of the Comptroller of the Currency, the primary federal regulator of national banks. On the same date, the Federal Reserve Board assumed regulatory jurisdiction over savings and loan holding companies, in addition to its role of supervising bank holding companies.

The Dodd-Frank Act also created a new Consumer Financial Protection Bureau with expansive powers to supervise and enforce consumer protection laws. The Consumer Financial Protection Bureau has broad rule-making authority for a wide range of consumer protection laws that apply to all banks and savings institutions, including the authority to prohibit unfair, deceptive or abusive acts and practices. The Consumer Financial Protection Bureau also has examination and enforcement authority over all banks and savings institutions with more than \$10 billion in assets. Banks and savings institutions with \$10 billion or less in assets, such as Northfield Bank, will continue to be examined by their applicable federal bank regulators. The legislation gives state attorneys general the ability to enforce applicable federal consumer protection laws.

The Dodd-Frank Act broadened the base for Federal Deposit Insurance Corporation assessments for deposit insurance, permanently increased the maximum amount of deposit insurance to \$250,000 per depositor and provided

Table of Contents

non-interest bearing transaction accounts with unlimited deposit insurance through December 31, 2012. The legislation also, among other things, requires originators of certain securitized loans to retain a portion of the credit risk, stipulates regulatory rate-setting for certain debit card interchange fees, repealed restrictions on the payment of interest on commercial demand deposits and contains a number of reforms related to mortgage originations. The Dodd-Frank Act increased stockholder influence over boards of directors by requiring companies to give stockholders a non-binding vote on executive compensation and so-called "golden parachute" payments. The legislation also directs the Federal Reserve Board to promulgate rules prohibiting excessive compensation paid to company executives, regardless of whether the company is publicly traded or not.

Many of the provisions of the Dodd-Frank Act are subject to delayed effective dates and/or require the issuance of implementing regulations, and therefore their impact on our operations cannot be fully determined at this time. However, it is likely that the Dodd-Frank Act will increase the regulatory burden, compliance costs and interest expense for Northfield Bank and Northfield-Delaware.

Business Activities

A federal savings bank derives its lending and investment powers from the Home Owners' Loan Act, as amended, and the regulations of the Office of the Comptroller of the Currency. Under these laws and regulations, Northfield Bank may originate mortgage loans secured by residential and commercial real estate, commercial business loans and consumer loans, and it may invest in certain types of debt securities and certain other assets. Certain types of lending, such as commercial and consumer loans, are subject to aggregate limits calculated as a specified percentage of Northfield Bank's capital or assets. Northfield Bank also may establish subsidiaries that may engage in a variety of activities, including some that are not otherwise permissible for Northfield Bank, including real estate investment and securities and insurance brokerage.

The Dodd-Frank Act removed federal statutory restrictions on the payment of interest on commercial demand deposit accounts, effective July 21, 2011.

Loans-to-One-Borrower

We generally may not make a loan or extend credit to a single or related group of borrowers in excess of 15% of our unimpaired capital and unimpaired surplus. An additional amount may be lent, equal to 10% of unimpaired capital and unimpaired surplus, if the loan is secured by readily marketable collateral, which is defined to include certain financial instruments and bullion, but generally does not include real estate. As of June 30, 2012, we were in compliance with our loans-to-one-borrower limits.

Qualified Thrift Lender Test

We are required to satisfy a qualified thrift lender (QTL) test, under which we either must qualify as a domestic building and loan association as defined by the Internal Revenue Code or maintain at least 65% of our portfolio assets in qualified thrift investments. Qualified thrift investments consist primarily of residential mortgages and related investments, including mortgage-backed and related securities. Portfolio assets generally means total assets less specified liquid assets up to 20% of total assets, goodwill and other intangible assets and the value of property used to conduct business. A savings institution that fails the qualified thrift lender test must operate under specified restrictions. The Dodd-Frank Act made noncompliance with the QTL test also subject to agency enforcement action for a violation of law. As of June 30, 2012, we maintained 84.1% of our portfolio assets in qualified thrift investments and, therefore, we met the QTL test.

Standards for Safety and Soundness

Federal law requires each federal banking agency to prescribe for insured depository institutions under its jurisdiction standards relating to, among other things, internal controls, information systems and internal audit systems, loan documentation, credit underwriting, interest rate risk exposure, asset growth, employee compensation, and other operational and managerial standards as the agency deems appropriate. The federal banking agencies

Table of Contents

adopted Interagency Guidelines Prescribing Standards for Safety and Soundness to implement the safety and soundness standards required under federal law. The guidelines set forth the safety and soundness standards that the federal banking agencies use to identify and address problems at insured depository institutions before capital becomes impaired. If the appropriate federal banking agency determines that an institution fails to meet any standard prescribed by the guidelines, the agency may require the institution to submit to the agency an acceptable plan to achieve compliance with the standard. If an institution fails to submit or implement an acceptable plan, the appropriate federal banking agency may issue an enforceable order requiring correction of the deficiencies.

Capital Requirements

Federal regulations require savings institutions to meet three minimum capital standards: a 1.5% tangible capital ratio, a 4% leverage ratio (3% for institutions receiving the highest rating on the CAMELS rating system) and an 8% risk-based capital ratio. In addition, the prompt corrective action standards discussed below also establish, in effect, a minimum 2% tangible capital standard, a 4% leverage ratio (3% for institutions receiving the highest rating on the CAMELS financial institution rating system) and, together with the risk-based capital standard itself, a 4% Tier 1 risk-based capital standard. Federal regulations also require that in meeting the tangible, leverage and risk-based capital standards, institutions must generally deduct investments in and loans to subsidiaries engaged in activities that are not permissible for a national bank.

The risk-based capital standard for savings institutions requires the maintenance of Tier 1 (core) and total capital (which is defined as core capital and supplementary capital) to risk-weighted assets of at least 4% and 8%, respectively. In determining the amount of risk-weighted assets, all assets, including certain off-balance sheet assets, are multiplied by a risk-weight factor of 0% to 100%, assigned by capital regulations based on the risks believed inherent in the type of asset. Core capital is defined as common stockholders' equity (including retained earnings), certain noncumulative perpetual preferred stock and related surplus and minority interests in equity accounts of consolidated subsidiaries, less intangibles other than certain mortgage servicing rights and credit card relationships. The components of supplementary capital currently include cumulative preferred stock, long-term perpetual preferred stock, mandatory convertible securities, subordinated debt and intermediate preferred stock, the allowance for loan and lease losses limited to a maximum of 1.25% of risk-weighted assets, and up to 45% of unrealized gains on available-for-sale equity securities with readily determinable fair market values. Overall, the amount of supplementary capital included as part of total capital cannot exceed 100% of core capital. Additionally, a savings institution that retains credit risk in connection with an asset sale may be required to maintain additional regulatory capital because of the recourse back to the savings bank. In assessing an institution's capital adequacy, the Office of the Comptroller of the Currency takes into consideration not only these numeric factors but also qualitative factors, and has the authority to establish higher capital requirements for individual associations where necessary.

On June 6, 2012, the Office of the Comptroller of the Currency and the other federal bank regulatory agencies issued a series of proposed rules to revise their risk-based and leverage capital requirements and their method for calculating risk-weighted assets to make them consistent with the agreements that were reached by the Basel Committee on Banking Supervision in Basel III: A Global Regulatory Framework for More Resilient Banks and Banking Systems (Basel III). The proposed rules would apply to all depository institutions, top-tier bank holding companies with total consolidated assets of \$500 million or more, and top-tier savings and loan holding companies (banking organizations). Among other things, the proposed rules establish a new common equity tier 1 minimum capital requirement and a higher minimum tier 1 capital requirement, and assign higher risk weightings (150%) to exposures that are more than 90 days past due or are on nonaccrual status and certain commercial real estate facilities that finance the acquisition, development or construction of real property. The proposed rules also limit a banking organization's capital distributions and certain discretionary bonus payments if the banking organization does not hold a capital conservation buffer consisting of a specified amount of common equity tier 1 capital in addition to the amount necessary to meet its minimum risk-based capital requirements. Under the proposed rules, and unless extended by the federal bank regulatory agencies, the final rules will become effective on January 1, 2013, and the changes set forth in the final rules will be phased in from January 1, 2013 through January 1, 2019.

At June 30, 2012, Northfield Bank met each of its capital requirements.

Table of Contents

Prompt Corrective Regulatory Action

Under the federal Prompt Corrective Action statute, the Office of the Comptroller of the Currency is required to take supervisory actions against undercapitalized national banks and federal savings associations depending upon each institution's capital levels. A savings institution that has total risk-based capital of less than 8% or a leverage ratio or a Tier 1 risk-based capital ratio that generally is less than 4% is considered to be undercapitalized. A savings institution that has total risk-based capital of less than 6%, a Tier 1 core risk-based capital ratio of less than 3% or a leverage ratio that is less than 3% is considered to be significantly undercapitalized. A savings institution that has a tangible capital to assets ratio equal to or less than 2% is deemed to be critically undercapitalized.

Generally, the Office of the Comptroller of the Currency is required to appoint a receiver or conservator for a savings institution that is critically undercapitalized within specific time frames. The regulations also provide that a capital restoration plan must be filed with the Office of the Comptroller of the Currency within 45 days of the date a savings institution receives notice that it is undercapitalized, significantly undercapitalized or critically undercapitalized. Any holding company for the savings institution required to submit a capital restoration plan must guarantee the lesser of an amount equal to 5% of the savings institution's assets at the time it was notified or deemed to be undercapitalized by the Office of the Comptroller of the Currency, or the amount necessary to restore the savings institution to adequately capitalized status. This guarantee remains in place until the Office of the Comptroller of the Currency notifies the savings institution that it has maintained adequately capitalized status for each of four consecutive calendar quarters, and the Office of the Comptroller of the Currency has the authority to require payment and collect payment under the guarantee. Various restrictions, such as restrictions on capital distributions and growth, also apply to undercapitalized institutions. The Office of the Comptroller of the Currency may also take any one of a number of discretionary supervisory actions against undercapitalized institutions, including the issuance of a capital directive and the replacement of senior executive officers and directors.

Capital Distributions

Federal regulations restrict capital distributions by savings institutions, which include cash dividends, stock repurchases and other transactions charged to the capital account of a savings institution. A federal savings institution must file an application with the Office of the Comptroller of the Currency for approval of the capital distribution if:

the total capital distributions for the applicable calendar year exceeds the sum of the institution's net income for that year to date plus the institution's retained net income for the preceding two years that is still available for dividend;

the institution would not be at least adequately capitalized following the distribution;

the distribution would violate any applicable statute, regulation, agreement or written regulatory condition; or

the institution is not eligible for expedited review of its filings (i.e., generally, institutions that do not have safety and soundness, compliance and Community Reinvestment Act ratings in the top two categories or fail a capital requirement).

A savings institution that is a subsidiary of a holding company, which is the case with Northfield Bank, must file a notice with the Federal Reserve Board at least 30 days before the board of directors declares a dividend or approves a capital distribution, and must receive Federal Reserve Board non-objection to the payment of the dividend.

Table of Contents

Applications or notices may be denied if the institution would be undercapitalized after the dividend, the proposed dividend raises safety and soundness concerns or the proposed dividend would violate a law, regulation enforcement order or regulatory condition.

In the event that a savings institution's capital falls below its regulatory requirements or it is notified by the regulatory agency that it is in need of more than normal supervision, its ability to make capital distributions would be restricted. In addition, any proposed capital distribution could be prohibited if the regulatory agency determines that the distribution would constitute an unsafe or unsound practice.

Transactions with Related Parties

A savings institution's authority to engage in transactions with related parties or affiliates is limited by Sections 23A and 23B of the Federal Reserve Act and the Federal Reserve Board's Regulation W. The term "affiliate" generally means any company that controls or is under common control with an institution, including Northfield-Delaware and its non-savings institution subsidiaries. Applicable law limits the aggregate amount of covered transactions with any individual affiliate, including loans to the affiliate, to 10% of the capital and surplus of the savings institution. The aggregate amount of covered transactions with all affiliates is limited to 20% of the savings institution's capital and surplus. Certain covered transactions with affiliates, such as loans to or guarantees issued on behalf of affiliates, are required to be secured by specified amounts of collateral. Purchasing low quality assets from affiliates is generally prohibited. Regulation W also provides that transactions with affiliates, including covered transactions, must be on terms and under circumstances, including credit standards, that are substantially the same or at least as favorable to the institution as those prevailing at the time for comparable transactions with non-affiliated companies. In addition, savings institutions are prohibited by law from lending to any affiliate that is engaged in activities that are not permissible for bank holding companies and no savings institution may purchase the securities of any affiliate other than a subsidiary.

Our authority to extend credit to executive officers, directors and 10% or greater stockholders ("insiders"), as well as entities controlled by these persons, is governed by Sections 22(g) and 22(h) of the Federal Reserve Act and Federal Reserve Board Regulation O. Among other things, loans to insiders must be made on terms substantially the same as those offered to unaffiliated individuals and not involve more than the normal risk of repayment. There is an exception for bank-wide lending programs that do not discriminate in favor of insiders. Regulation O also places individual and aggregate limits on the amount of loans that may be made to insiders based, in part, on the institution's capital position, and requires that certain prior board approval procedures be followed. Extensions of credit to executive officers are subject to additional restrictions on the types and amounts of loans that may be made. At June 30, 2012, we were in compliance with these regulations.

Enforcement

The Office of the Comptroller of the Currency has primary enforcement responsibility over federal savings institutions, including the authority to bring enforcement action against institution-related parties, which includes officers, directors, certain stockholders, and attorneys, appraisers and accountants who knowingly or recklessly participate in wrongful action likely to have an adverse effect on an institution. Formal enforcement action may range from the issuance of a capital directive or cease and desist order to removal of officers or directors of the institution, receivership, conservatorship or the termination of deposit insurance. Civil penalties cover a wide range of violations and actions, and range up to \$25,000 per day, unless a finding of reckless disregard is made, in which case penalties may be as high as \$1.0 million per day.

Deposit Insurance

Northfield Bank is a member of the Deposit Insurance Fund, which is administered by the Federal Deposit Insurance Corporation. Deposit accounts in Northfield Bank are insured up to a maximum of \$250,000 for each separately insured depositor. In addition, certain non-interest-bearing transaction accounts are fully insured, regardless of the dollar amount, until December 31, 2012.

Table of Contents

The Federal Deposit Insurance Corporation assesses deposit insurance premiums on all insured depository institutions. Under the Federal Deposit Insurance Corporation's risk-based assessment system, insured institutions are assigned to risk categories based on supervisory evaluations, regulatory capital levels and certain other factors. An institution's assessment rate depends upon the category to which it is assigned and certain adjustments specified by Federal Deposit Insurance Corporation regulations, with less risky institutions paying lower rates. Assessment rates (inclusive of possible adjustments) currently range from 2 1/2 to 45 basis points of each institution's total assets less tangible capital. The Federal Deposit Insurance Corporation may increase or decrease the range of assessments uniformly, except that no adjustment can deviate more than two basis points from the base assessment rate without notice and comment rulemaking. The Federal Deposit Insurance Corporation's current system represents a change, required by the Dodd-Frank Act, from its prior practice of basing the assessment on an institution's aggregate deposits.

In addition to the Federal Deposit Insurance Corporation assessments, the Financing Corporation is authorized to impose and collect, through the Federal Deposit Insurance Corporation, assessments for anticipated payments, issuance costs and custodial fees on bonds issued by the Financing Corporation in the 1980s to recapitalize the former Federal Savings and Loan Insurance Corporation. The bonds issued by the Financing Corporation are due to mature in 2017 through 2019. For the quarter ended June 30, 2012, the annualized Financing Corporation assessment was equal to 0.66 basis points of total assets less tangible capital.

The Dodd-Frank Act increased the minimum target ratio for the Deposit Insurance Fund from 1.15% of estimated insured deposits to 1.35% of estimated insured deposits, and the Federal Deposit Insurance Corporation must achieve the 1.35% ratio by September 30, 2020. Insured institutions with assets of \$10 billion or more are required to fund the increase. The Dodd-Frank Act also eliminated the 1.5% maximum fund ratio, and instead gives the discretion of the Federal Deposit Insurance Corporation the discretion to determine the maximum fund ratio. The Federal Deposit Insurance Corporation has exercised that discretion by establishing a long-term fund ratio of 2%.

The Federal Deposit Insurance Corporation has authority to increase insurance assessments. Any significant increases would have an adverse effect on the results of operations of Northfield Bank. Management cannot predict what assessment rates will be in the future.

Insurance of deposits may be terminated by the Federal Deposit Insurance Corporation upon a finding that an institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC. Management of Northfield Bank does not know of any practice, condition or violation that may lead to termination of our deposit insurance.

Federal Home Loan Bank System

Northfield Bank is a member of the Federal Home Loan Bank System, which consists of 12 regional Federal Home Loan Banks. The Federal Home Loan Bank System provides a central credit facility primarily for member institutions. As a member of the Federal Home Loan Bank of New York, we are required to acquire and hold a specified amount of shares of capital stock in Federal Home Loan Bank.

Community Reinvestment Act and Fair Lending Laws

Savings institutions have a responsibility under the Community Reinvestment Act and related regulations to help meet the credit needs of their communities, including low- and moderate-income neighborhoods. An institution's failure to comply with the provisions of the Community Reinvestment Act could, at a minimum, result in regulatory restrictions on certain activities such as branching and acquisitions. Northfield Bank received a Satisfactory Community Reinvestment Act rating in its most recent examination.

Table of Contents

Other Regulations

Interest and other charges collected or contracted for by Northfield Bank are subject to state usury laws and federal laws concerning interest rates. Northfield Bank's operations are also subject to federal laws applicable to credit transactions, such as the:

Truth-In-Lending Act, governing disclosures of credit terms to consumer borrowers;

Real Estate Settlement Procedures Act, requiring that borrowers for mortgage loans for one- to four-family residential real estate receive various disclosures, including good faith estimates of settlement costs, lender servicing and escrow account practices, and prohibiting certain practices that increase the cost of settlement services;

Home Mortgage Disclosure Act, requiring financial institutions to provide information to enable the public and public officials to determine whether a financial institution is fulfilling its obligation to help meet the housing needs of the community it serves;

Equal Credit Opportunity Act, prohibiting discrimination on the basis of race, creed or other prohibited factors in extending credit;

Fair Credit Reporting Act, governing the use and provision of information to credit reporting agencies;

Fair Debt Collection Act, governing the manner in which consumer debts may be collected by collection agencies;

Truth in Savings Act; and

Rules and regulations of the various federal agencies charged with the responsibility of implementing such federal laws. The operations of Northfield Bank also are subject to the:

Right to Financial Privacy Act, which imposes a duty to maintain confidentiality of consumer financial records and prescribes procedures for complying with administrative subpoenas of financial records;

Electronic Funds Transfer Act, which governs automatic deposits in and withdrawals from deposit accounts and customers' rights and liabilities arising from the use of automated teller machines and other electronic banking services;

Check Clearing for the 21st Century Act (also known as Check 21), which gives substitute checks, such as digital check images and copies made from that image, the same legal standing as the original paper check;

The USA PATRIOT Act, which requires banks and savings institutions to, among other things, establish broadened anti-money laundering compliance programs and due diligence policies and controls to ensure the detection and reporting of money laundering. Such required compliance programs are intended to supplement pre-existing compliance requirements that apply to financial institutions under the Bank Secrecy Act and the Office of Foreign Assets Control regulations; and

The Gramm-Leach-Bliley Act, which places limitations on the sharing of consumer financial information by financial institutions with unaffiliated third parties and requires all financial

Table of Contents

institutions offering products or services to retail customers to provide such customers with the financial institution's privacy policy and allow such customers the opportunity to opt out of the sharing of certain personal financial information with unaffiliated third parties.

Holding Company Regulation

Northfield-Delaware will be a unitary savings and loan holding company subject to regulation and supervision by the Federal Reserve Board. The Federal Reserve Board will have enforcement authority over Northfield-Delaware and its non-savings institution subsidiaries. Among other things, that authority permits the Federal Reserve Board to restrict or prohibit activities that are determined to be a risk to Northfield Bank.

As a savings and loan holding company, Northfield-Delaware's activities will be limited to those activities permissible by law for financial holding companies or multiple savings and loan holding companies. A financial holding company may engage in activities that are financial in nature, incidental to financial activities or complementary to a financial activity. Such activities include lending and other activities permitted for bank holding companies, insurance and underwriting equity securities.

Federal law prohibits a savings and loan holding company, directly or indirectly, or through one or more subsidiaries, from acquiring more than 5% of another savings institution or savings and loan holding company without prior written approval of the Federal Reserve Board and from acquiring or retaining control of any depository institution not insured by the Federal Deposit Insurance Corporation. In evaluating applications by holding companies to acquire savings institutions, the Federal Reserve Board must consider such things as the financial and managerial resources and future prospects of the company and institution involved, the effect of the acquisition on and the risk to the federal deposit insurance fund, the convenience and needs of the community and competitive factors. A savings and loan holding company may not acquire a savings institution in another state and hold the target institution as a separate subsidiary unless it is a supervisory acquisition under Section 13(k) of the Federal Deposit Insurance Act or the law of the state in which the target is located authorizes such acquisitions by out-of-state companies.

Savings and loan holding companies historically have not been subject to consolidated regulatory capital requirements. However, the Dodd-Frank Act requires the Federal Reserve Board to set for all depository institution holding companies minimum consolidated capital levels that are as stringent as those required for the insured depository subsidiaries. The components of Tier 1 capital would be restricted to capital instruments that are currently considered to be Tier 1 capital for insured depository institutions, which would exclude instruments such as trust preferred securities and cumulative preferred stock. Instruments issued before May 19, 2010 are grandfathered for companies with consolidated assets of \$15 billion or less. Holding companies that were not regulated by the Federal Reserve Board as of May 19, 2010 receive a five year phase-in from the July 21, 2010 date of enactment of the Dodd-Frank Act.

The Dodd-Frank Act extended the source of strength doctrine to savings and loan holding companies. The regulatory agencies must promulgate regulations implementing the source of strength policy that requires holding companies to act as a source of strength to their subsidiary depository institutions by providing capital, liquidity and other support in times of financial stress.

The Federal Reserve Board has issued a policy statement regarding the payment of dividends and the repurchase of shares of common stock by bank holding companies and savings and loan holding companies. In general, the policy provides that dividends should be paid only out of current earnings and only if the prospective rate of earnings retention by the holding company appears consistent with the organization's capital needs, asset quality and overall financial condition. Regulatory guidance provides for prior regulatory review of capital distributions in certain circumstances such as where the company's net income for the past four quarters, net of dividends previously paid over that period, is insufficient to fully fund the dividend or the company's overall rate of earnings retention is inconsistent with the company's capital needs and overall financial condition. The ability of a holding company to pay dividends may be restricted if a subsidiary bank becomes undercapitalized. The policy statement also states that a holding company should inform the Federal Reserve Board supervisory staff prior to

Table of Contents

redeeming or repurchasing common stock or perpetual preferred stock if the holding company is experiencing financial weaknesses or if the repurchase or redemption would result in a net reduction, as of the end of a quarter, in the amount of such equity instruments outstanding compared with the beginning of the quarter in which the redemption or repurchase occurred. These regulatory policies may affect the ability of Northfield-Delaware to pay dividends, repurchase shares of common stock or otherwise engage in capital distributions.

Federal Securities Laws

Northfield-Delaware common stock will be registered with the Securities and Exchange Commission after the conversion and stock offering. Northfield-Delaware will be subject to the information, proxy solicitation, insider trading restrictions and other requirements under the Securities Exchange Act of 1934.

The registration under the Securities Act of 1933 of shares of common stock issued in Northfield-Delaware's public offering does not cover the resale of those shares. Shares of common stock purchased by persons who are not affiliates of Northfield-Delaware may be resold without registration. Shares purchased by an affiliate of Northfield-Delaware will be subject to the resale restrictions of Rule 144 under the Securities Act of 1933. If Northfield-Delaware meets the current public information requirements of Rule 144 under the Securities Act of 1933, each affiliate of Northfield-Delaware that complies with the other conditions of Rule 144, including those that require the affiliate's sale to be aggregated with those of other persons, would be able to sell in the public market, without registration, a number of shares not to exceed, in any three-month period, the greater of 1% of the outstanding shares of Northfield-Delaware, or the average weekly volume of trading in the shares during the preceding four calendar weeks. In the future, Northfield-Delaware may permit affiliates to have their shares registered for sale under the Securities Act of 1933.

Sarbanes-Oxley Act of 2002

The Sarbanes-Oxley Act of 2002 addresses, among other issues, corporate governance, auditing and accounting, executive compensation, and enhanced and timely disclosure of corporate information. We have existing policies, procedures and systems designed to comply with these regulations, and we are reviewing and documenting such policies, procedures and systems to ensure continued compliance with these regulations.

Change in Control Regulations

Under the Change in Bank Control Act, no person may acquire control of a savings and loan holding company such as Northfield-Delaware unless the Federal Reserve Board has been given 60 days' prior written notice and has not issued a notice disapproving the proposed acquisition, taking into consideration certain factors, including the financial and managerial resources of the acquirer and the competitive effects of the acquisition. Control, as defined under federal law, means ownership, control of or holding irrevocable proxies representing more than 25% of any class of voting stock, control in any manner of the election of a majority of the institution's directors, or a determination by the regulator that the acquirer has the power, directly or indirectly, to exercise a controlling influence over the management or policies of the institution. Acquisition of more than 10% of any class of a savings and loan holding company's voting stock constitutes a rebuttable determination of control under the regulations under certain circumstances including where, as will be the case with Northfield-Delaware, the issuer has registered securities under Section 12 of the Securities Exchange Act of 1934.

In addition, federal regulations provide that no company may acquire control of a savings and loan holding company without the prior approval of the Federal Reserve Board. Any company that acquires such control becomes a savings and loan holding company subject to registration, examination and regulation by the Federal Reserve Board.

Table of Contents

TAXATION

Federal Taxation

General. Northfield Bancorp, MHC, Northfield-Federal and Northfield Bank are, and Northfield-Delaware will be, subject to federal income taxation in the same general manner as other corporations, with some exceptions discussed below. The following discussion of federal taxation is intended only to summarize certain pertinent federal income tax matters and is not a comprehensive description of the tax rules applicable to Northfield-Federal, Northfield-Delaware or Northfield Bank.

Northfield-Federal's consolidated federal tax returns are currently under audit for the tax years of 2009 and 2010.

Method of Accounting. For federal income tax purposes, Northfield-Federal currently reports its income and expenses on the accrual method of accounting and uses a tax year ending December 31 for filing its federal and state income tax returns.

Bad Debt Reserves. Historically, Northfield Bank was subject to special provisions in the tax law applicable to qualifying savings banks regarding allowable tax bad debt deductions and related reserves. Tax law changes were enacted in 1996 that eliminated the ability of savings banks to use the percentage of taxable income method for computing tax bad debt reserves for tax years after 1995, and required recapture into taxable income over a six-year period of all bad debt reserves accumulated after a savings bank's last tax year beginning before January 1, 1988. Northfield Bank recaptured its post December 31, 1987, bad-debt reserve balance over the six-year period ended December 31, 2004.

Northfield-Federal is required to use the specific charge off method to account for tax bad debt deductions.

Taxable Distributions and Recapture. Prior to 1996, bad debt reserves created prior to 1988 were subject to recapture into taxable income if Northfield Bank failed to meet certain thrift asset and definitional tests or made certain distributions. Tax law changes in 1996 eliminated thrift-related recapture rules. However, under current law, pre-1988 tax bad debt reserves remain subject to recapture if Northfield Bank makes certain non-dividend distributions, repurchases any of its common stock, pays dividends in excess of earnings and profits, or fails to qualify as a bank for tax purposes.

At December 31, 2011, the total federal pre-base year bad debt reserve of Northfield Bank was approximately \$5.9 million.

Alternative Minimum Tax. The Internal Revenue Code of 1986, as amended, imposes an alternative minimum tax at a rate of 20% on a base of regular taxable income plus certain tax preferences, less any available exemption. The alternative minimum tax is imposed to the extent it exceeds the regular income tax. Net operating losses can offset no more than 90% of alternative taxable income. Certain payments of alternative minimum tax may be used as credits against regular tax liabilities in future years. Northfield-Federal's consolidated group has not been subject to the alternative minimum tax and has no such amounts available as credits for carryover.

Net Operating Loss Carryovers. A financial institution may carry back net operating losses to the preceding two taxable years and forward to the succeeding 20 taxable years. At December 31, 2011, Northfield Bancorp Inc.'s consolidated group had no net operating loss carryforwards for federal income tax purposes.

Corporate Dividends-Received Deduction. Northfield-Federal may exclude from its federal taxable income 100% of dividends received from Northfield Bank as a wholly-owned subsidiary by filing consolidated tax returns. The corporate dividends-received deduction is 80% when the corporation receiving the dividend owns at least 20% of the stock of the distributing corporation. The dividends-received deduction is 70% when the corporation receiving the dividend owns less than 20% of the distributing corporation.

Table of Contents

State Taxation

Northfield Bancorp, MHC and Northfield Bank report income on a calendar year basis to New York State. New York State franchise tax on corporations is imposed in an amount equal to the greater of (a) 7.1% of entire net income allocable to New York State, (b) 3% of alternative entire net income allocable to New York State, or (c) 0.01% of the average value of assets allocable to New York State plus nominal minimum tax of \$250 per company. Entire net income is based on federal taxable income, subject to certain modifications. Alternative entire net income is equal to entire net income without certain modifications.

Northfield Bancorp, MHC and Northfield Bank report income on a calendar year basis to New York City. New York City franchise tax on corporations is imposed in an amount equal to the greater of (a) 9.0% of entire net income allocable to New York State, (b) 3% of alternative entire net income allocable to New York City, or (c) 0.01% of the average value of assets allocable to New York City plus nominal minimum tax of \$250 per company. Entire net income is based on federal taxable income, subject to certain modifications. Alternative entire net income is equal to entire net income without certain modifications.

The State of New York passed legislation in August of 2010 to conform the bad debt deduction allowed under Article 32 of the New York State tax law to the bad debt deduction allowed for federal income tax purposes. As a result, Northfield Bank no longer establishes, or maintains, a New York reserve for losses on loans, and is required to claim a deduction for bad debts in an amount equal to its actual loan loss experience. In addition, this legislation eliminated the potential recapture of the New York tax bad debt reserve that could have otherwise occurred in certain circumstances under New York State tax law prior to August of 2010. As a result of this new legislation, Northfield-Federal reversed approximately \$738,000 in deferred tax liabilities during the third quarter of 2010.

Northfield-Federal and Northfield Bank file New Jersey Corporation Business Tax returns on a calendar year basis. Generally, the income derived from New Jersey sources is subject to New Jersey tax. Northfield-Federal and Northfield Bank pay the greater of the corporate business tax at 9% of taxable income or the minimum tax of \$1,200 per entity.

At December 31, 2005, Northfield Bank did not meet the definition of a domestic building and loan association for New York State and City tax purposes. As a result, we were required to recognize a \$2.2 million deferred tax liability for state and city thrift-related base-year bad debt reserves accumulated after December 31, 1987.

Our New York State tax returns are currently under audit for tax years 2007, 2008 and 2009.

As a Delaware business corporation, Northfield-Delaware is required to file an annual report with and pay franchise taxes to the state of Delaware.

MANAGEMENT

Shared Management Structure

The directors of Northfield-Delaware are the same persons who are the directors of Northfield Bank. In addition, each executive officer of Northfield-Delaware is also an executive officer of Northfield Bank. We expect that Northfield-Delaware and Northfield Bank will continue to have common executive officers until there is a business reason to establish separate management structures.

Table of Contents**Executive Officers of Northfield-Delaware and Northfield Bank**

The following table sets forth information regarding the executive officers of Northfield-Delaware and Northfield Bank. Age information is as of December 31, 2011. The executive officers of Northfield-Delaware and Northfield Bank are elected annually.

Name	Age	Position
John W. Alexander	62	Chairman of the Board, President and Chief Executive Officer
Kenneth J. Doherty	54	Executive Vice President, Chief Lending Officer
Steven M. Klein	46	Executive Vice President, Chief Operating Officer and Chief Financial Officer
Michael J. Widmer	52	Executive Vice President, Operations

The business experience for the past five years of each of our executive officers other than Mr. Alexander is set forth below. Unless otherwise indicated, executive officers have held their positions for at least the past five years.

Kenneth J. Doherty joined Northfield Bank in 1988, and currently serves as Executive Vice President and Chief Lending Officer.

Steven M. Klein joined Northfield-Federal and Northfield Bank in March 2005 and has served as Chief Financial Officer since that time. Effective March 1, 2011, Mr. Klein also was named Chief Operating Officer. Mr. Klein is a licensed certified public accountant in the State of New Jersey, and a member of the American Institute of Certified Public Accountants.

Michael J. Widmer joined Northfield Bank in 2002 and currently serves as Executive Vice President, Operations.

Directors of Northfield-Delaware and Northfield Bank

Northfield-Delaware has nine directors. Directors serve three-year staggered terms so that approximately one-third of the directors are elected at each annual meeting. Directors of Northfield Bank will be elected by Northfield-Delaware as its sole stockholder.

The following details include for each of our directors: their age as of December 31, 2011; the year in which they first became a director of Northfield Bank; the year that their term expires; and their business experience for at least the past five years. With the exception of Ms. Catino, none of the directors listed below currently serves as a director, or served as a director during the past five years, of a publicly-held entity (other than Northfield-Federal). Ms. Catino previously served on the board of directors of Middlesex Water Company, which is traded on the Nasdaq Stock Market, LLC under the symbol MSEX. Ms. Catino resigned from the board of directors of Middlesex Water Company effective October 26, 2010. The following also includes the particular experience, qualifications, attributes, or skills, considered by the Nominating and Corporate Governance Committee that led the board of directors to conclude that such person should serve as a director of Northfield-Federal. The mailing address for each person listed is 581 Main Street, Suite 810, Woodbridge, New Jersey 07095. Each of the persons listed as a director is also a trustee of Northfield Bancorp, MHC and a director of Northfield Bank.

Ms. Lamberti has strong training and development skills, and has extensive knowledge of and relationships with many residents and businesses located in Staten Island, New York. Ms. Lamberti is a resident of Staten Island, and is involved in local professional and community organizations including the National Association of Corporate Directors, Sisters of Charity Housing Development Fund Corporation, and Service Auxiliary of Staten Island University Hospital. Ms. Lamberti also serves as Chairman of the Northfield Bank Foundation.</p>
Albert J. Regen, 74, director since 1990, term expires 2015	<p><i>Business Experience:</i> Mr. Regen served as the President of Northfield Bank from 1990 until his retirement in September 2006.</p> <p><i>Reasons why this person should serve as a director:</i> Mr. Regen has over 30 years of experience in community banking. Mr. Regen has extensive knowledge in the treasury area as well as interest rate risk management. Mr. Regen is currently a resident of New Jersey and is a director of the Northfield Bank Foundation. Mr. Regen was formerly a resident of Staten Island, New York and has extensive knowledge of and relationships with many of the residents and businesses located in Staten Island, New York.</p>
Patrick E. Scura, Jr., 67, director since 2006, term expires 2015	<p><i>Business Experience:</i> Mr. Scura was an audit partner with a national accounting and auditing firm for 27 years, until his retirement in 2005.</p> <p><i>Reasons why this person should serve as a director:</i> Mr. Scura is a former audit partner with a national accounting and auditing firm, specializing in community banking. Mr. Scura has over 35 years of experience auditing public company financial institutions in New Jersey. Mr. Scura is a licensed certified public accountant, and has strong risk assessment, financial reporting, and internal control expertise. Mr. Scura also has extensive knowledge of and relationships with community banks in our market area. Mr. Scura has the requisite qualifications to be designated as an audit committee financial expert under the Securities and Exchange Commission's rules and regulations. Mr. Scura resides in New Jersey, and is involved in local professional and community organizations including St. Peter's College and the American Institute of Certified Public Accountants.</p>

Board Independence

The board of directors affirmatively determines the independence of each director in accordance with Nasdaq Stock Market rules, which include all elements of independence as set forth in the listing requirements for Nasdaq securities. The board of directors has determined that each of the following non-employee Directors is independent of Northfield-Federal:

John R. Bowen
Annette Catino
Gil Chapman
John P. Connors, Jr.

John J. DePierro
Susan Lamberti
Albert J. Regen
Patrick E. Scura, Jr.

Table of Contents

Codes of Conduct and Ethics

Northfield-Federal has adopted a Code of Conduct and Ethics for Senior Financial Officers that is applicable to our chief executive officer, chief financial officer, and controller. The Code of Conduct and Ethics for Senior Financial Officers is available on our website at www.eNorthfield.com. Amendments to and waivers of the Code of Conduct and Ethics for Senior Financial Officers will be disclosed on our website, or otherwise in the manner required by applicable law, rule, or listing standard.

Northfield-Federal and Northfield Bank have also adopted a Code of Conduct and Ethics that is applicable to all employees, officers and directors, which is available on our website at www.eNorthfield.com. Employees, officers, and directors acknowledge annually that they will comply with all aspects of the Code of Conduct and Ethics for Employees, Officers, and Directors.

Transactions With Certain Related Persons

Loans and Extensions of Credit. The Sarbanes-Oxley Act of 2002 generally prohibits us from making loans to our executive officers and directors, but it contains a specific exemption from such prohibition for loans made by Northfield Bank to our executive officers and directors in compliance with federal banking regulations.

The aggregate amount of our outstanding loans to our executive officers and directors and their related entities was approximately \$430,474 at December 31, 2011. All of such loans were made in the ordinary course of business, were made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable loans with persons not related to Northfield Bank, and did not involve more than the normal risk of collectibility or present other unfavorable features. These loans were performing according to their original terms at December 31, 2011, and were made in compliance with federal banking regulations.

Other Transactions. John P. Connors, Jr. is a practicing attorney who performs legal work directly for or on behalf of Northfield Bank. During the year ended December 31, 2011, Mr. Connors received fees, either from Northfield Bank, or directly from our customers, in connection with transactions with Northfield Bank, in the amount of approximately \$5,191. The board of directors authorizes the appointment of Mr. Connors each year, and the Compensation Committee of the board of directors reviews a summary of the services performed and the total fees paid for services on an annual basis. All transactions with Mr. Connors are in the ordinary course of business, and the terms and fees are considered to be consistent with those prevailing at the time for comparable transactions with other persons.

Director Compensation

Every three years, director compensation is reviewed in detail by the Compensation Committee, in consultation with the Nominating and Corporate Governance Committee. The Compensation Committee considers, among other things, the size and complexity of Northfield-Federal, as well as the responsibilities, marketplace availability of necessary skill sets, and the time commitment necessary for the board of directors, its committees, and its committee chairs, to adequately discharge their oversight role and responsibilities. The Compensation Committee utilizes the assistance of a third-party compensation consultant, Pearl Meyer & Partners (PM&P), and available peer and survey data, regarding director compensation at other comparable financial institutions, as part of this process. For interim years between detailed reviews, the Compensation Committee reviews current market conditions and trends in director compensation in consultation with its third-party compensation consultant. In 2010, the Compensation Committee performed its triennial detailed review of director (and executive) compensation for 2011.

In December 2008, stockholders approved the Northfield-Federal 2008 Equity Incentive Plan. The objective of equity awards is to further align the interests of our employees and directors with those of other stockholders and reward sustained performance. In January 2009 the Compensation Committee granted equity awards to each director, consisting of 27,750 shares of restricted common stock, and 69,300 options to purchase shares of common stock at a price of \$9.94 per share, representing the closing price of Northfield-Federal's common

Table of Contents

stock on the grant date. The equity awards vest in equal installments over a five-year period, commencing one year from the date of the grant.

Prior to November 2007, Northfield Bank was a mutual organization and did not have equity compensation available to employees or directors. The Compensation Committee's objectives in granting equity awards in January 2009 included further aligning the interests of directors with those of other stockholders of Northfield-Federal, consistent with comparable peers that recently completed initial public offerings, and with organizations that were established stock companies. The Compensation Committee consulted with PM&P during this process.

The following table sets forth the director and committee fee structure for the board of directors and its standing committees (all of which were due and payable in cash) for the year ended December 31, 2011. Directors who are also employees of Northfield-Federal receive no additional compensation for service as a director. Attendance fees, and one-fourth of any annual retainer, are paid on a quarterly basis, in arrears, unless a director elects to have such fees or a portion thereof, deferred under our non-qualified deferred compensation plan, described below.

	Board of Directors	Nominating and Corporate Governance	Compensation Committee	Audit Committee
Annual Retainer	\$ 30,000			
Annual Retainer-Chair		\$ 3,000	\$ 4,000	\$ 6,000
Per Meeting Fee	\$ 1,250	\$ 850	\$ 850	\$ 1,250

Members of other committees of the Board receive, in cash, an \$850 per meeting attendance fee and an annual committee chair retainer of \$3,000. In addition, the Lead Independent Director receives an annual retainer of \$3,000.

Northfield-Federal also pays directly or reimburses directors for normal, customary, and necessary business expenses, which includes computer equipment, services, and supplies, relevant professional memberships, and participation in professional training seminars.

Table of Contents

The following table sets forth for the year ended December 31, 2011, certain information as to the total remuneration we paid or that was earned by our directors. Mr. Alexander does not receive separate compensation for his service as a director. The Stock awards, Options awards, Non-equity incentive plan compensation, and Change in pension value and nonqualified deferred compensation earnings columns have been omitted from the table because no director earned any compensation during the year ended December 31, 2011, of a type required to be disclosed in those columns.

Name	Fees earned or paid in cash (2) (\$)	All other compensation (4) (\$)	Total (\$)
John R. Bowen	80,500	1,943	82,443
Annette Catino	68,400	1,943	70,343
Gil Chapman	88,500	1,943	90,443
John P. Connors, Jr. (1)	62,400	1,943	64,343
John J. DePierro	66,650	1,943	68,593
Susan Lamberti	68,500	1,943	70,443
Albert J. Regen (3)	78,800	1,943	80,743
Patrick E. Scura, Jr.	91,500	1,943	93,443

- (1) During 2011, Mr. Connors provided legal services to or for the benefit of Northfield Bank that are not included in the table above. See Transactions With Certain Related Persons for a discussion of fees received for legal services provided in 2011.
- (2) Includes retainer payments, meeting fees, and committee and/or chairmanship fees earned during the calendar year, whether the director received payment of such amounts or elected to defer them.
- (3) Includes amounts received by Mr. Regen for service as a director of NSB Services Corp and NSB Realty Trust. Northfield-Federal's wholly-owned subsidiary, Northfield Bank, is the sole owner of the outstanding common stock of these two entities.
- (4) Other compensation consists solely of dividends paid upon the vesting of restricted stock awards that were withheld while the restricted stock awards were invested.

Executive Compensation**Compensation Committee Report**

The Compensation Committee has reviewed and discussed the section entitled Compensation Discussion and Analysis included in this prospectus with management. Based on this review and discussion, the Compensation Committee recommended to the board of directors that the Compensation Discussion and Analysis be included in this prospectus. The members of the Compensation Committee are: Annette Catino, who serves as Chairman, Gil Chapman, John J. DePierro and Patrick E. Scura, Jr.

Compensation Discussion and Analysis

Persons Covered. This discussion and analysis addresses compensation for 2011 for the following executive officers: John W. Alexander, Chairman, President and Chief Executive Officer; Steven M. Klein, Chief Operating and Financial Officer; Kenneth J. Doherty, Executive Vice President and Chief Lending Officer; Michael J. Widmer, Executive Vice President of Operations; and Madeline G. Frank, former Senior Vice President and Assistant Corporate Secretary who retired from those positions effective June 30, 2012. These five executives are referred to in this discussion as the Named Executive Officers.

Executive Summary. Prior to completing our initial public offering in November 2007, we were wholly-owned by our mutual holding company. As a mutually owned company, our compensation programs were, by nature, limited, and consisted primarily of base salary and annual cash incentive compensation.

As part of our transition to a public company, our compensation program continues to evolve and is being augmented and modified, as appropriate, to ensure that we attract and retain superior financial services executive talent, and reward sustainable performance within the context of appropriate risk management parameters and safe and sound operation of Northfield-Federal, and its subsidiary, Northfield Bank.

Table of Contents

We strive to create a compensation program that rewards performance and the long-term success of Northfield-Federal. Our compensation program is designed to achieve an appropriate balance between shorter-term and longer-term performance, fixed and performance-based compensation, and cash and equity compensation. A primary objective of our current compensation program is to align the interests of our executives with those of our stockholders. Our 2011 compensation program included competitively benchmarked base salaries, a formal annual cash incentive compensation program directly linked to, among other things, Northfield-Federal's strategic objectives, and beginning in January 2009, an equity incentive plan. Northfield-Federal has remained committed to its disciplined and balanced approach to providing community banking services and utilizes the same philosophy in designing a compensation program that is consistent with effective risk management.

Role of the Compensation Committee. The Compensation Committee of the board of directors is responsible for overseeing and approving, subject to ratification by the board of directors, the compensation of the Named Executive Officers, including the Chief Executive Officer. As part of these duties, the Committee administers Northfield-Federal's cash and equity incentive compensation plans and conducts an annual performance review of the Chief Executive Officer and, in consultation with the Chief Executive Officer, reviews the performance of the other Named Executive Officers. The board of directors has ultimate authority to ratify the compensation of all Named Executive Officers, including the Chief Executive Officer.

The Compensation Committee also reviews, oversees, and approves the management and implementation of Northfield Bank's employee benefit plans. The Committee has a formal charter that describes the Committee's scope of authority and its duties.

The Compensation Committee consists of four Directors, all of whom are independent as set forth in the listing requirements for NASDAQ securities. The Nominating and Corporate Governance Committee of the board of directors evaluates the independence of Committee members at least annually, using the standards contained in NASDAQ listing requirements. This evaluation, and the determination that each member of the Committee is independent, was made most recently in March 2012.

Role of Executives in Committee Activities. The executive officers who serve as a resource to the Compensation Committee are the Chief Executive Officer, the Chief Risk Officer, the Chief Operating and Financial Officer, and the Director of Human Resources. Executives provide the Compensation Committee with input regarding employee compensation philosophy, processes, risk considerations, and decisions for employees other than Named Executive Officers. This communication assists in the design and alignment of compensation programs throughout Northfield-Federal. In addition to providing factual information such as Northfield-Federal-wide performance on relevant measures, these executives articulate management's views on current compensation programs and processes, recommend relevant performance measures to be used for future evaluations, and otherwise supply information to assist the Compensation Committee. The Chief Executive Officer also provides information about individual performance assessments for the other Named Executive Officers, and expresses to the Compensation Committee his views on the appropriate levels of compensation for the other Named Executive Officers for the ensuing year. At the request of the Compensation Committee, the Chief Financial Officer communicates directly with third-party consultants, providing third-party consultants with Northfield-Federal-specific data and information, and assisting in the evaluation of the estimated financial effect regarding any proposed changes to the various components of compensation.

Executives participate in Committee activities purely in an informational and advisory capacity and have no vote in the Committee's decision-making process. The Chief Executive Officer and Chief Financial Officer do not attend those portions of Compensation Committee meetings during which their performance is evaluated or their compensation is being determined. No executive officer other than the Chief Executive Officer attends those portions of Compensation Committee meetings during which the performance of the other Named Executive Officers is evaluated or their compensation is being determined. In addition, the Compensation Committee meets, as appropriate, without management being present.

Use of Consultants. The Compensation Committee periodically engages an independent compensation consultant to assist it in the compensation process for Named Executive Officers. The consultant is retained by and

Table of Contents

reports directly to the Compensation Committee. The Compensation Committee places no restrictions on the consultant within the scope of contracted services and such consultant is not engaged by management for any purpose. The consultant provides expertise and information about competitive trends in the employment marketplace, including established and emerging compensation practices at other companies. The consultant also provides proxy statement and survey data, and assists in assembling relevant comparison groups for various purposes and establishing benchmarks for base salary, equity awards, and cash incentives from the comparison group proxy statement and survey data.

For 2011, the Compensation Committee engaged PM&P, an independent compensation consulting firm, as its advisor on executive and Board compensation matters. PM&P assisted the Compensation Committee in the development of the 2011 cash incentive plan and assisted in a detailed review of executive compensation. The Committee undertakes a comprehensive assessment every three years and it utilizes PM&P to provide ongoing market trends and guidance for pay structures in the intervening years.

Compensation Objectives and Philosophy. The overall objectives of Northfield-Federal's compensation program are to retain, motivate, and reward employees and officers (including the Named Executive Officers) for sustained performance, and to provide competitive compensation, including incentive compensation, to attract talent to Northfield-Federal, consistent with effective risk management. The methods used to achieve these goals for Named Executive Officers are influenced by the compensation and employment practices of our competitors within the financial services industry, and elsewhere in the marketplace, for executive talent. Other considerations include each Named Executive Officer's individual performance in achieving both financial and non-financial corporate goals.

Our compensation program is designed to reward the Named Executive Officers based on their level of assigned management responsibilities, individual experience and performance levels, and knowledge of banking and our business. The creation of long-term value is highly dependent on the development and effective execution of our business strategy by our executive officers.

Factors that influence the design of our executive compensation program include, among other things, the items listed below.

We operate in a highly regulated industry, and we value industry-specific experience that promotes the safe and sound operation of Northfield Bank.

We value executives with sufficient experience in our markets relating to the behavior of our customers, products, and investments in various phases of the economic cycle.

We operate in interest rate and credit markets that are often volatile. We value disciplined decision-making that respects our business plan but adapts appropriately to change.

We value the retention and development of performing incumbent executives. Recruitment of executives can have substantial monetary costs, unpredictable outcomes, and a disruptive effect on our operations.

Our 2011 compensation program for our Named Executive Officers included three key components. The first component is base salary, which is designed to provide a reasonable level of predictable income commensurate with market standards of the position held. The second component is an annual cash incentive plan, designed to reward our executives for attaining specific performance goals that support the strategic objectives of Northfield-Federal, and the third component, which was added in January 2009, is the granting of equity incentive awards in the form of Northfield-Federal common stock, and options to purchase Northfield-Federal common stock at a specified price. We also provide benefits and perquisites to the Named Executive Officers at levels that are competitive and appropriate for their roles.

Table of Contents

Benchmarking. Our compensation program is periodically evaluated in relation to benchmark data derived from information reported in publicly-available proxy statements and from market survey data. The Compensation Committee will generally review and consider updated peer proxy and market survey compensation data every three years. In 2010, the Compensation Committee engaged PM&P to assist it in completing a comprehensive competitive review. PM&P selected the peer group using objective criteria to reflect banks similar in asset size, business model and region to Northfield-Federal. The asset size ranged from one-half to two times Northfield-Federal's asset size with a median of \$2 billion. The Compensation Committee approved the following peer group:

Dime Community Bancshares, Inc.	State Bancorp, Inc.	Smithtown Bancorp, Inc.
Provident New York Bancorp	Sandy Spring Bancorp, Inc.	First of Long Island Corporation
Flushing Financial Corporation	Suffolk Bancorp	Financial Institutions, Inc.
OceanFirst Financial Corp.	Sun Bancorp, Inc.	Eagle Bancorp, Inc.
Kearny Financial Corp.	Oritani Financial Corp.	Roma Financial Corporation
Sterling Bancorp	Hudson Valley Holding Corp.	First United Corporation
Center Bancorp, Inc.	Lakeland Bancorp, Inc.	First Mariner Bancorp

Assembling the Components of Compensation. The Compensation Committee analyzes the level and relative mix of executive compensation by component (e.g., base salary, incentives, and benefits) and in the aggregate. The Chief Executive Officer provides recommendations to the Committee relating to compensation to be paid to the Named Executive Officers other than himself. Based on their analysis, the Compensation Committee approves each Named Executive Officer's compensation, subject to ratification by the board of directors.

When evaluating the mix of total compensation, the Compensation Committee considers among other things, general market practices, benchmarking studies conducted by the consultant, the alignment of cash and equity incentive awards with our strategic objectives and Northfield-Federal performance, and the desire to reward performance through incentive compensation within Board-approved risk parameters. The Compensation Committee seeks to create appropriate incentives without encouraging behaviors that result in undue risk. These components are periodically evaluated in relation to benchmark data derived from information reported in publicly-available proxy statements and from market survey data.

Base Salary. Base salary is designed to provide a reasonable level of predictable income commensurate with market standards of the position held adjusted for specific job responsibilities assigned, individual experience, and demonstrated performance. Named Executive Officers are eligible for periodic adjustments to their base salary as a result of changes in the cost of living, individual performance, updated market analysis, or significant changes in their duties and responsibilities. The Compensation Committee annually reviews and approves base salaries, and changes thereto, for Named Executive Officers, including our Chief Executive Officer.

Base salary amounts for 2011 were determined based on a review of peer proxy and survey data provided by PM&P after an analysis of current financial services industry compensation trends. The Compensation Committee reviewed the 50th percentile of peer proxy and survey data, and a pay range around the median to allow for recognition of each Named Executive Officer's specific experience, responsibilities and performance, estimated value in the marketplace, and the Committee's view of each Named Executive Officer's role in the future success of Northfield-Federal. For 2011, the Compensation Committee generally targeted base salary compensation at the 65th percentile for each of the Named Executive Officers.

The Committee considered the responsibility, significant experience, contributions, and performance of each Named Executive Officer, their value in the marketplace, and their critical roles in the future successes of Northfield-Federal, and determined in November 2010, that existing base salaries properly reflected these factors and made a determination not to change base salaries for any Named Executive Officers in 2011, with the exception of Michael Widmer, whose base salary was increased 8.7% to \$250,000. In March 2011, Mr. Klein's role and responsibilities were expanded to include the position of Chief Operating Officer and his base salary was increased to \$350,000, or 16.6%, as compared to his 2010 base salary of \$300,000.

Table of Contents

Cash Incentives. The Compensation Committee developed and implemented a management incentive plan (the Cash Incentive Plan) for 2011. The Cash Incentive Plan provides performance-based annual cash incentives to reward Northfield-Federal s Named Executive Officers for the execution of specific financial and non-financial elements of our strategic business plan, as well as individual goals related to each executive s functional area. A defined level (80% or greater) of Corporate performance is required for the Plan to activate or turn on. Once the Plan is active, incentives are based on Corporate and Individual performance. The Corporate goal is designed to reflect a significant portion of the Named Executive s incentive (70% to 75%) while the individual performance reflects between 25% to 30% of the incentive.

The Compensation Committee evaluates the reasonableness and likelihood of attaining designated incentive goals, including stretch goals, in an effort to ensure that such targets appropriately reward performance, but do not encourage undue risk taking. Actual performance over the applicable measurement period may exceed or fall short of the targets resulting in the Named Executive Officer receiving an annual incentive cash award that is above or below the initial targeted level. Annual incentive cash awards granted in prior years are not taken into account by the Compensation Committee in the process of setting performance targets for the current year. The Committee believes that doing so would be inconsistent with the underlying reasons for the use of incentive compensation.

For 2011, the Compensation Committee set a target total cash incentive award of 20% of base salary for each Named Executive Officer. The actual cash incentive award range was defined as 10% of base salary for threshold performance and 30% for stretch performance. These targets were intentionally set lower than current market practice as part of Northfield-Federal s shift from its former compensation philosophy as a mutually owned bank (greater focus on cash compensation weighted towards base salary) to that of a public company (which includes equity compensation and a greater weighting of compensation towards long-term incentive compensation rather than short-term incentives).

The Compensation Committee established one shared corporate goal (the Corporate Goal) and individual performance goals for each Named Executive Officer. The target Corporate Goal measured the attainment of the Board-approved, budgeted basic earnings per share of \$0.34. The stretch goal was 120% or greater of budgeted basic earnings per share and the threshold was 90% of budgeted basic earnings per share. If 90% of budgeted basic earnings per share was not achieved, Named Executive Officers were not eligible to receive incentive payments for achievement of their individual performance goals.

Individual performance goals were aligned with our strategic business plan and focused on the following areas: for Messrs. Alexander, Klein, Doherty and Widmer and Ms. Frank, maintaining the efficiency ratio at 58% or less; for Mr. Doherty, originating loans to specified targets while minimizing credit risk, and reducing non-accruing loans to specified targets; and for Mr. Widmer, increasing deposits to specified targets.

In March of 2012, the Compensation Committee evaluated achievement of the Corporate Goal and Individual Goals. Regarding the Corporate Goal, Northfield-Federal reported 2011 basic earnings per share of \$0.42 exceeding the target goal of \$0.34 basic earnings per share. Based on the achievement of \$0.42 basic earnings per share, the Corporate Goal stretch award of 22.50% of base salary (30% stretch award times 75% weighting) was earned by Mr. Alexander, and a stretch award of 21.00% of base salary (30% stretch award times 70% weighting) was earned by all other Named Executive Officers.

The remaining 25% of Mr. Alexander s eligible award, and 30% of each other Named Executive Officer s eligible award, was determined based on each Named Executive s attainment of individual goals, which were assessed by the Compensation Committee in its annual evaluation of each Named Executive Officer s performance.

Table of Contents

The Compensation Committee concluded the following related to each Named Executive Officer's performance related to their Corporate and individual goals in accordance with the 2011 Management (Cash) Incentive Plan:

Mr. Alexander's award for the Corporate Goal was \$152,100 (22.50% of salary). Based on the achievement of an efficiency ratio of 53.63%, Mr. Alexander's individual goal target award of 5% of base salary (20% target award times 25% weighting) increased to approximately 6.09% or \$41,185.

Mr. Klein's award for the Corporate Goal was \$73,500 (21.00% of salary). Based on the achievement of an efficiency ratio of 53.63%, Mr. Klein's individual goal target award of 6% of base salary (20% target award times 30% weighting) increased to approximately 7.31% or \$25,589.

Mr. Doherty's award for the Corporate Goal was \$58,800 (21.00% of salary). Mr. Doherty's individual goal cash incentive payment of \$23,621 reflects the Compensation Committee's determination that Mr. Doherty exceeded the target level for the efficiency ratio goal, while loan originations and the reduction in non-accrual loans exceeded the stretch goals.

Mr. Widmer's award for the Corporate goal was \$52,500 (21.00% of salary). Mr. Widmer's individual cash incentive payment of \$20,389 for 2011 reflects the Compensation Committee's determination that Mr. Widmer exceeded the target level for the efficiency ratio goal, while deposit growth exceeded the stretch goal.

Ms. Frank's award for the Corporate goal was \$35,700 (21.00% of salary). Based on the achievement of an efficiency ratio of 53.63%, Ms. Frank's individual goal target award of 6% of base salary (20% target award times 30% weighting) increased to approximately 7.31% or \$12,429.

In recognition of Northfield-Federal's overall performance and the Executives' contributions to executing on Northfield-Federal's strategic plan, including capital deployment, franchise enhancement, and asset quality improvement, the Compensation Committee granted discretionary awards to Messrs. Alexander, Klein, Doherty, and Widmer, of \$34,400, \$23,000, \$11,600, and \$11,000, respectively.

For 2011, the Named Executive Officers' total target award opportunities, and actual incentives awarded as a percentage of target are detailed below. The amounts shown for Messrs. Alexander, Klein, Widmer and Doherty also include the discretionary awards referred to above.

Name	Target	Actual Award	Actual Award as a
	Award		percentage of
	Opportunity		Target Award
	(\$)	(\$)	Opportunity
			(%)
John W. Alexander	135,200	227,685	168.4
Steven M. Klein	70,000	122,089	174.4
Kenneth J. Doherty	56,000	94,021	167.9
Michael J. Widmer	50,000	83,889	167.8
Madeline G. Frank	34,000	48,129	141.6

Equity Awards. In December 2008, the stockholders of Northfield-Federal approved the Northfield Bancorp, Inc. 2008 Equity Incentive Plan. The objective of equity awards is to further align the interests of our executives with those of stockholders and reward sustained performance. In January 2009 the Compensation Committee, granted equity awards in the form of common stock, and options to purchase common stock at \$9.94 per share, representing the closing price of Northfield-Federal's common stock on the grant date, to each of the Named Executive Officers. The equity awards vest in equal installments over a five-year period, commencing one year from the date of the grant. The Compensation Committee consulted with PM&P during this process.

Prior to November 2007, Northfield-Federal was a mutual organization and did not have equity compensation available to employees. The Compensation Committee's objective in granting equity awards in

Table of Contents

January 2009 was to provide employees with a substantial equity interest in Northfield-Federal, consistent with comparable peers that recently completed initial public offerings.

Broad-based benefits. We also provide to our Named Executive Officers certain broad-based benefits available to all qualifying employees of Northfield-Federal, as well as fringe benefits and perquisites, and restoration and other termination benefits, not generally available to all qualifying employees of Northfield-Federal.

The following summarizes the significant broad-based benefits in which the Named Executive Officers were eligible to participate in 2011:

a defined contribution 401(k) retirement plan and discretionary profit-sharing plan;

an employee stock ownership plan;

medical coverage (all employees share between 20% to 30% of the cost, depending on their elections);

pre-tax health and dependent care spending accounts; and

group life insurance coverage (death benefit capped at \$750,000, with the value of the death benefit over \$50,000 being reported as taxable income to all employees).

The Northfield Bank Employee Stock Ownership Plan (the ESOP) was established effective January 1, 2007. The ESOP allocates a certain number of shares of Northfield-Federal's common stock on an annual basis among plan participants on the basis of eligible compensation in the year of allocation, subject to Internal Revenue Code limitations. All eligible employees, including Named Executive Officers, participate in the plan and received an allocation of common stock for 2011.

Executive Benefits and Perquisites. In addition to the broad-based benefits described above, the specifically Named Executive Officers received the following fringe benefits and perquisites in 2011:

all Named Executive Officers may participate in a non-qualified deferred compensation plan. The plan provides restoration of benefits capped under Northfield Bank's broad-based benefits due to Internal Revenue Code salary limitations or limitations due to participation requirements under tax-qualified plans. The plan also permits elective salary and cash incentive award deferrals;

Messrs. Klein, Doherty, and Widmer received a monthly automobile allowance of \$800;

all Named Executive Officers pay for and are provided with reimbursement for long-term disability insurance coverage;

Messrs. Alexander, Klein, Doherty, and Widmer are reimbursed for appropriate spousal expenses for attendance at business events; and

Messrs. Alexander, Klein, Doherty, and Widmer are provided a cellular phone allowance of \$100 per month for business usage. Northfield-Federal also reimburses individuals for the cost of cellular phone equipment.

Edgar Filing: Northfield Bancorp, Inc. - Form 424B3

Northfield-Federal incurs the expense of one country club membership and related expenses for Mr. Alexander. Mr. Alexander reimburses Northfield Bank for personal expenses pertaining to club usage. In lieu of a monthly automobile allowance, Mr. Alexander received use of an automobile (including all operating expenses) leased by Northfield Bank for business and personal use. Personal use of the automobile is reported as taxable income to Mr. Alexander. In addition, Northfield Bank pays an annual premium on a whole-life insurance policy for the benefit of Mr. Alexander.

Table of Contents

The Compensation Committee reviews the other components of executive compensation (broad-based benefits, and executive benefits and perquisites) on an annual basis. Changes to the level or types of broad-based benefits within these categories, including considerations relating to the addition or elimination of benefits and plan design changes, are made by the Compensation Committee on an aggregate basis with respect to the group of employees entitled to those benefits, and not necessarily with reference to a particular Named Executive Officer's compensation. Decisions about these components of compensation are made without reference to the Named Executive Officers' salary and annual cash incentives, as they involve issues of more general application and often include consideration of trends in the industry or in the employment marketplace.

Employment Agreements. In addition to the components of executive compensation described above, Messrs. Alexander, Klein, Doherty, and Widmer are each parties to employment agreements with Northfield Bank. See Employment Agreements for a description of these agreements and Potential Payments to Named Executive Officers for information about potential payments to these individuals upon termination of their employment with Northfield Bank. Our employment agreements contain no payment provisions for tax gross-ups to executives under any circumstance.

The executive employment agreements are designed to allow Northfield-Federal to retain the services of the designated executives while reducing, to the extent possible, unnecessary disruptions to Northfield Bank's operations. In addition, the Compensation Committee believes that the employment agreements better align the interests of the executive with those of our stockholders. The Compensation Committee believes that these agreements allow executives to more objectively evaluate opportunities for stockholders without causing undue personal financial conflicts.

The Compensation Committee reviewed prevailing market practices, consulted with PM&P on the competitiveness and reasonableness of the terms of the agreements, and negotiated the agreements with the individuals. The Compensation Committee believes such agreements are common and necessary to retain executive talent.

The agreements are for a three-year period, are reviewed for renewal annually by the Compensation Committee of the board of directors, and provide for salary and incentive cash compensation payments, as well as additional post-employment benefits, primarily health benefits (or equivalent cash payments), under certain conditions, as defined in the employment agreements. See Employment Agreements for further discussion.

Exceptions to Usual Procedures. The Compensation Committee may recommend to the board of directors that they approve the payment of special cash compensation to one or more Named Executive Officers in addition to payments approved during the normal annual compensation-setting cycle. The Committee may make such a recommendation if it believes it would be appropriate to reward one or more Named Executive Officers in recognition of contributions to a particular project, or in response to competitive and other factors that were not addressed during the normal annual compensation-setting cycle. The Compensation Committee made discretionary awards to the Named Executive Officers for 2011 totaling \$80,000. See Cash Incentives, above, for further discussion.

The Committee will consider off-cycle compensation adjustments whenever a Named Executive Officer's status, role or responsibilities change, or an executive officer is hired. The Committee may depart from the compensation guidelines it would normally follow for executives in the case of outside hires.

The Compensation Committee considers, but is not bound by, the tax treatment of each component of compensation. Under Section 162(m) of the Internal Revenue Code, annual compensation paid to a Named Executive Officer is not deductible if it exceeds \$1 million unless it qualifies as performance-based compensation as defined in the Internal Revenue Code and related tax regulations. Base salary is not a form of performance-based compensation. Fringe benefits and perquisites also do not qualify as performance-based compensation. Annual incentive cash awards may qualify as a form of performance-based compensation under the income tax regulations.

Table of Contents

For 2011, we estimate that approximately \$140,000 of the total amount of executive compensation earned for our Named Executive Officers will not be deductible for tax purposes due to limitations under Section 162(m).

Committee Actions During 2011 Affecting 2012 Compensation, and Other Actions by the Committee.

The Compensation Committee completed a review, in consultation with PM&P, of executive compensation in 2011. Based on this review, which included an assessment of current compensation trends and practices, a determination was made that Named Executive Officers' base salaries were competitive and would remain unchanged for 2012. In December of 2011, the Compensation Committee approved the 2012 cash incentive compensation plan. The plan contains similar terms and conditions as our prior year plan.

Effective January 1, 2012, Mr. Klein's automobile allowance ceased and he is provided full-time use of a Northfield-Federal-maintained vehicle. The automobile allowance for Messrs. Doherty and Widmer was increased to \$875 per month. Reimbursement for cellular and data plans was increased to \$120 per month for Messrs. Alexander, Klein, Doherty and Widmer.

Compensation Tables

Summary Compensation Table. The following table sets forth for the three years ended December 31, 2011, certain information as to the total remuneration we paid to Mr. Alexander, who serves as Chairman of the Board, President and Chief Executive Officer, Mr. Klein, who serves as Chief Operating and Financial Officer, and the three most highly compensated executive officers of Northfield-Federal or Northfield Bank other than Messrs. Alexander and Klein. The Change in Pension Value and Nonqualified Deferred Compensation Earnings column has been omitted from the Summary Compensation Table because no listed individual earned any compensation during the years ended December 31, 2011, 2010, or 2009 of a type required to be disclosed in those columns.

Summary Compensation Table								
Name and principal position	Year	Salary (\$)	Stock Awards (2)(\$)	Option Awards (3)(\$)	Bonus (\$)	Non-equity incentive plan compensation (\$)	All other compensation (1)(\$)	Total (\$)
John W. Alexander, Chairman of the Board, President and Chief Executive Officer	2011	676,000			34,400	193,285	147,523	1,051,208
	2010	676,000				122,544	138,504	937,048
	2009	676,000	1,669,920	1,356,425		107,388	141,951	3,951,684
Steven M. Klein, Chief Operating and Financial Officer	2011	342,308			23,000	99,089	59,811	524,208
	2010	300,000				55,758	54,551	410,309
	2009	300,000	778,302	661,710		50,157	53,422	1,843,591
Kenneth J. Doherty, Executive Vice President and Chief Lending Officer	2011	280,000			11,600	82,421	56,573	430,594
	2010	280,000				51,111	53,401	384,512
	2009	280,000	725,620	618,240		42,438	53,540	1,719,838
Michael J. Widmer, Executive Vice President, Operations	2011	250,000			11,000	72,889	51,030	384,919
	2010	230,000				43,898	48,379	322,277
	2009	220,000	596,400	507,955		37,376	46,325	1,418,056

(footnotes begin on following page)

Table of Contents*(footnotes from previous page)*

- (1) The individuals listed in this table participate in certain medical and dental coverage plans, not disclosed in the Summary Compensation Table, that are generally available to salaried employees and do not discriminate in scope, terms and operation. The amount shown below for each individual for the year ended December 31, 2011, includes our direct out-of-pocket costs (reduced for Mr. Alexander, in the case of the figures shown for automobiles, by the amount that we would otherwise have paid in cash reimbursements during the year for business use) for the following items:

	Mr. Alexander	Mr. Klein	Mr. Doherty	Mr. Widmer	Ms. Frank
Employer contributions to qualified and non-qualified defined contribution plans (including 401(k), ESOP and non-qualified deferred compensation plans)	\$ 67,591	\$ 39,877	\$ 36,720	\$ 33,728	\$ 25,901
Life insurance premiums	37,536	599	1,137	577	1,487
Long-term disability	5,200	2,362	1,932	1,725	1,181
Automobile	10,449	9,600	9,600	9,600	
Club dues	12,398				
Dividends paid on restricted stock awards (4)	11,760	5,481	5,110	4,200	931
Travel expense for spouse to accompany on business travel	1,389	692	874		
Other (5)					1,600
Reimbursement for business cell phone and data usage	1,200	1,200	1,200	1,200	
Total	\$ 147,523	\$ 59,811	\$ 56,573	\$ 51,030	\$ 31,100

- (2) Represents the aggregate grant date fair value of restricted stock of Northfield-Federal awarded to the employee on January 30, 2009, based upon a grant date stock price of \$9.94 per share, which was the final reported sales price of Northfield-Federal's common stock on the date of the grant. The restricted stock awards vest in equal installments over a five-year period, commencing one year from the date of the grant. No forfeitures were assumed in calculating the aggregate grant date fair value. For further information see footnote 11 to the consolidated financial statements included in Northfield-Federal's Form 10-K for the fiscal year ended December 31, 2011.
- (3) Represents the aggregate grant date fair value of options to purchase Northfield-Federal common stock awarded to each employee on January 30, 2009. The options vest in equal installments over a five-year period, commencing one year from the date of the grant and have an exercise price of \$9.94 per share, which was the final reported sales price of Northfield-Federal's common stock on the date of the grant. The grant date fair value was \$3.22 per option and was determined using the Black-Scholes method assuming an option's average life of 6.5 years; 2.17% risk free rate of return; 35.33% volatility, and 1.61% dividend yield. No forfeitures were assumed in calculating the aggregate grant date fair value. For further information see footnote 11 to the consolidated financial statements included in Northfield-Federal's Form 10-K for the fiscal year ended December 31, 2011.
- (4) Amounts represent dividends paid upon the vesting of restricted stock awards that were withheld while the restricted stock awards were unvested.
- (5) Amount represents an annual discretionary stipend provided to employees whose work location was moved from New York to New Jersey.

Plan-Based Awards. As further discussed in Compensation Discussion and Analysis Assembling the Components of Compensation, Northfield-Federal maintained a cash incentive award program and equity incentive award program (both based upon Board and stockholder approved plans) for its Named Executive Officers for the year ended December 31, 2011.

Table of Contents

The following table sets forth for the year ended December 31, 2011, certain information as to grants of plan-based cash and equity awards.

Name	Grant date	Estimated future payouts under non-equity incentive plan awards			All other stock awards: number of shares of stock or units	All other option awards: number of securities underlying options	Exercise or base price of option awards (\$)	Grant date fair value of stock and option awards (\$)
		Threshold(\$)	Target (\$)	Maximum(\$)				
John W. Alexander	12/22/10	67,600	135,200	202,800				
Steven M. Klein	12/22/10	35,000	70,000	105,000				
Kenneth J. Doherty	12/22/10	28,000	56,000	84,000				
Michael J. Widmer	12/22/10	25,000	50,000	75,000				
Madeline G. Frank	12/22/10	17,000	34,000	51,000				

The following table sets forth certain information regarding stock awards and stock options outstanding at December 31, 2011:

Name	Grant date	Option Awards			Option price (\$)	Option expiration date (1)	Stock Awards	
		Number of securities underlying unexercised options (exercisable) (#)	Number of securities underlying unexercised options (unexercisable) (#)	Number of shares or units of stock that have not vested (#)			Market value of shares or units of stock that have not vested(2) (\$)	
John W. Alexander	01/30/09	168,500	252,750	9.94	01/30/19	100,800	1,427,328	
Steven M. Klein	01/30/09	82,200	123,300	9.94	01/30/19	46,980	665,237	
Kenneth J. Doherty	01/30/09	76,800	115,200	9.94	01/30/19	43,800	620,208	
Michael J. Widmer	01/30/09	63,100	94,650	9.94	01/30/19	36,000	509,760	
Madeline G. Frank	01/30/09	10,600	15,900	9.94	01/30/19	7,980	112,997	

(1) Stock options expire if unexercised 10 years from the grant date.

(2) Amount is based on a \$14.16 per share which is the last reported closing price of Northfield-Federal's common stock on December 31, 2011.

The following table provides information concerning stock option exercises and the vesting of stock awards for each Named Executive Officer during 2011.

Name	Option Awards		Stock Awards	
	Number of Shares Acquired on Exercise (#)	Value Realized on Exercise (\$)	Number of Shares Acquired on Vesting (#)	Value Realized on Vesting (\$)(1)
John W. Alexander			33,600	428,736
Steven M. Klein			15,660	199,822
Kenneth J. Doherty			14,600	186,296
Michael J. Widmer			12,000	153,120
Madeline G. Frank			2,660	33,942

- (1) Represents the market value of the vested stock on the day the stock vested (January 30, 2011) as determined by the last reported closing price of the stock of \$12.76.

Nonqualified Deferred Compensation Plan. Northfield Bank maintains a non-qualified deferred compensation plan to provide for the elective deferral of non-employee director fees by participating members of the Boards of Directors, and the elective deferral of compensation and/or performance-based compensation payable to eligible employees of Northfield-Federal and Northfield Bank. A designated amount of director fees, compensation

Table of Contents

and/or performance based compensation may be deferred until one of the specified events in the plan occurs, which permits all or part of the monies so deferred, together with earnings, to be distributed to participants or their beneficiaries. In addition, the plan provides eligible employees of Northfield Bank with supplemental retirement income from Northfield Bank when such amounts are not payable under the contribution formula of the Northfield Bank 401(k) Savings Plan (the 401(k) Savings Plan), due to reductions and other limitations imposed under the Internal Revenue Code.

Members of the Boards of Directors of Northfield-Federal and Northfield Bank, and certain employees are eligible to participate in the plan. Eligible directors or employees become participants upon agreeing in a written enrollment agreement to defer any portion of their trustee fees, director fees, compensation, and/or performance-based compensation. In Northfield-Federal's sole discretion, each participant may request that his or her deferred compensation account be deemed to be invested in any one or more of the investment options available to Northfield-Federal or Northfield Bank. A participant may periodically request a change to his or her investment allocation deemed available under the plan. In the event any participant fails to direct the investment of his or her deferred compensation account, or to the extent the employer chooses not to honor the participant's request, the deferred compensation account will be deemed to bear interest at the rate prevailing for 30-year United States Treasury Bonds.

With respect to amounts of deferred trustee or director fees, deferred compensation or performance-based compensation, distributions will be made under the plan in the event of the participant's retirement, death, termination due to disability, separation from service prior to the participant's retirement date, upon the establishment of an unforeseeable emergency, upon a change in control, or upon the attainment of a specific date of distribution, in a single lump sum or in up to 15 annual installment payments, as designated by the participant in his or her enrollment agreement. In the case of an unforeseeable emergency, the amounts distributed will not exceed the amounts necessary to satisfy the emergency plus an amount necessary to pay any taxes owed on the distribution. In the event the participant fails to designate a payment schedule on his enrollment agreement or if the entire balance credited to the participant's account is less than \$10,000, payment will be made in a single lump sum. In the event a participant dies before receiving the full amount of his benefit, the remaining amounts will be paid to the participant's designated beneficiary according to the participant's form of election or, if there is no designated beneficiary at the time of the participant's death, to the participant's estate in a single lump sum. Distributions to certain specified employees on account of their separation from service may be delayed for six months, if necessary, to comply with Internal Revenue Code Section 409A.

In addition, the non-qualified deferred compensation plan provides for benefits which supplement those paid under the 401(k) Savings Plan in the event of normal, early or postponed retirement, death or termination of service. Such benefits will be equal to the sum of: (i) the maximum amount of employer matching contributions provided to a participant each calendar year, assuming a participant's maximum contributions, reduced by the amount of employer matching contributions made for the participant under the 401(k) Savings Plan for such year, adjusted by gains and losses; (ii) commencing January 1, 2000, the amount of employer matching contributions not credited to a participant's 401(k) Savings Plan account as a result of an employer error, adjusted by gains and losses, if any; and (iii) the maximum amount of discretionary employer contributions that would be provided to a participant under the 401(k) Savings Plan, assuming an allocation without taking into account the limitations imposed by the Internal Revenue Code, reduced by the amount of discretionary employer contributions actually made to a participant under the 401(k) Savings Plan for each such year, adjusted by gains and losses, if any. Benefits payable under this plan that supplement matching contributions under the 401(k) Savings Plan will be aggregated with benefits payable under the Supplemental ESOP (described below). Upon the occurrence of a distribution event, such benefits will be payable in either a lump sum or installments over a period of up to 15 years, at the election of the participant made in accordance with Section 409A of the Internal Revenue Code.

The non-qualified deferred compensation plan is considered an unfunded plan for tax and Employee Retirement Income Security Act purposes. All obligations owing under the plan are payable from the general assets of Northfield Bank and Northfield-Federal and are subject to the claims of Northfield Bank's or Northfield-Federal's creditors.

Table of Contents

Supplemental Employee Stock Ownership Plan. The Northfield Bank Supplemental Employee Stock Ownership Plan (the Supplemental ESOP) is a benefit restoration plan that provides additional cash benefits, equal to the participant's account balance, at retirement or other termination of employment (or upon a change in control) to participants who are key employees, who are approved by the Compensation Committee and whose benefits under the tax-qualified ESOP, described below, are limited by tax law limitations applicable to tax-qualified plans. In 2011, Messrs. Alexander, Klein, and Doherty were the only participants receiving a benefit from this plan. The Supplemental ESOP credits each participant who also participates in the tax-qualified ESOP with an annual amount equal to the sum of the difference (expressed in dollars) between (a) the number of shares of common stock of Northfield-Federal that would have been allocated to the participant's account in the employee stock ownership plan, but for the tax law limitations, plus earnings thereon, and (b) the actual number of shares allocated to the participant's account in the employee stock ownership plan plus earnings thereon. In each case, the number of shares will be multiplied by the fair market value of the shares on the allocation date to determine the annual allocation amount. Each participant is permitted to make investment recommendations for the annual amount credited to his or her account among a broadly diversified group of mutual funds selected for investment by a committee appointed by Northfield Bank's board of directors to administer the Supplemental ESOP. Northfield Bank has established a rabbi trust to hold assets attributable to the Supplemental ESOP to informally fund its benefit obligation. Northfield Bank, at its discretion, may account for the Supplemental ESOP solely as bookkeeping entries. Whether or not a rabbi trust is established, the participant's account value is based on the value of the investments in which the participant invests, or is deemed to invest, his account. Benefits distributed to participants from the Supplemental ESOP will be aggregated with benefits payable under the matching contributions portion of the Nonqualified Deferred Compensation Plan (described above). Upon the occurrence of a distribution event, such benefits will be payable in either a lump sum or installments over a period of up to 15 years, at the election of the participant made in accordance with Section 409A of Internal Revenue Code.

The following table sets forth certain information with respect to our nonqualified deferred compensation plans at and for the year ended December 31, 2011.

Nonqualified Deferred Compensation At And For The Year Ended December 31, 2011

Name	Executive contributions in last fiscal year (\$)(1)	Registrant contributions in last fiscal year (\$)(1)	Aggregate earnings in last fiscal year (\$)(2)	Aggregate withdrawals/distributions (\$)	Aggregate balance at last fiscal year end (\$)(3)
John W. Alexander	26,000	32,979	11,780		1,820,949
Steven M. Klein	1,589	5,283	(4,214)		138,204
Kenneth J. Doherty	2,552	2,108	(1,233)		172,569
Michael J. Widmer	312	150	(127)		56,156
Madeline G. Frank	7,220		1,567		87,382

- (1) Contributions included in the Executive contributions in last fiscal year and the Registrant contributions in last fiscal year columns are included as compensation for the listed individuals in the Summary Compensation Table.
- (2) Amounts included in the Aggregate earnings in last fiscal year are not included as compensation for the listed individuals in the Summary Compensation Table as such earnings are not preferential or above market.
- (3) Amounts included in the Aggregate balance at last fiscal year end previously were reported as compensation for the listed individuals except to the extent that such balances reflect earnings, all of which were not preferential or above market.

Short- and Long-Term Disability

Named Executive Officers and certain other members of senior management at Northfield Bank will be paid their full salary for the duration of any period of short-term disability, up to 26 weeks. Senior management receives this benefit in lieu of the ability to bank paid time off for future use, which is only available to employees of Northfield Bank who are not senior management. With respect to long-term disability, senior management employees are required to purchase long-term disability coverage and Northfield Bank provides such persons a bonus payment, including related income taxes, in recognition of their payment of such coverage. The amount of the bonus is in the sole discretion of Northfield Bank.

Table of Contents

Life Insurance Coverage

Employees of Northfield Bank receive life insurance coverage of up to three times salary if hired before January 1, 2003, and up to two times salary if hired on or after January 1, 2003. Such life insurance coverage is generally capped at \$500,000. However, in the case of senior management, such life insurance coverage is capped at \$750,000.

401(k) Savings Plan

Northfield Bank maintains the 401(k) Savings Plan, which is a tax-qualified defined contribution plan with a salary deferral feature under Section 401(k) of the Internal Revenue Code. Salaried employees, who have completed at least three months of eligible service, as defined in the plan, are eligible to participate in the plan. Employees who are paid on an hourly basis, employees who are paid exclusively on a commission basis, leased employees or employees covered by a collective bargaining agreement are not eligible to participate in the 401(k) Savings Plan. Eligible employees may contribute from 2% to 15% of their base salary to the 401(k) Savings Plan on a pre-tax basis each year, subject to the limitations of the Internal Revenue Code (for 2011, the limit was \$16,500, exclusive of any catch-up contributions). After 12 months of eligible service, employees who have been making before-tax contributions for less than 36 months will receive an employer matching contribution equal to 25% of the first 6% of before-tax base salary contributions. Employees who have participated for 36 or more months will receive an employer matching contribution equal to 50% of their first 6% of before-tax base salary contributions. In addition, we may make discretionary employer contributions on behalf of eligible employees.

The 401(k) Savings Plan permits employees to invest in common stock of Northfield-Federal and is permitting such employees to designate their account or a portion thereof to purchase shares of Northfield-Delaware in the stock offering.

Employee Stock Ownership Plan and Trust

We maintain the ESOP to promote employee ownership of Northfield-Federal's common stock. At the ESOP's inception, the ESOP trust borrowed funds from Northfield-Federal and used those funds to purchase 1,756,279 shares of common stock of Northfield-Federal. The collateral for the loan is the common stock purchased by the ESOP. The loan will be repaid principally from discretionary contributions made by Northfield Bank to the ESOP over a period of up to 30 years. The loan documents provide that the loan may be repaid over a shorter period, without penalty for prepayments. The interest rate on the loan equals the prime interest rate as of closing of the stock offering, and adjusts annually at the beginning of each calendar year. Shares purchased by the ESOP are held in a suspense account for allocation among participants as the loan is repaid primarily on the basis of compensation in the year of allocation, subject to Internal Revenue Code limitations. Benefits under the plan vest at the rate of 20% per year of credited service beginning in the second year of credited service so that a participant with six years of credited service will become fully vested. Credit is given for vesting purposes to participants for years of service with Northfield Bank prior to the adoption of the plan. Credit is also given to those employees who were employed at Liberty Bank and Flatbush Federal Savings & Loan Association at the time of their acquisition by Northfield Bank for their years of service at Liberty Bank and Flatbush Federal Savings & Loan Association, respectively. A participant's interest in his account under the plan fully vests in the event of termination of service due to a participant's normal retirement, death, disability, or upon a change in control (as defined in the plan). In the event of a change in control, the ESOP will terminate, loan amounts outstanding will be repaid, and remaining shares will fully vest. The ESOP intends to purchase 4% of the shares of common stock sold in the offering; however, it could purchase up to 8% of the shares sold in the offering to the extent necessary to complete the offering at the minimum of the offering range.

Pension Benefits

None of the individuals listed in the Summary Compensation Table had accumulated pension benefits either at or during the year ended December 31, 2011.

Table of Contents

Employment Agreements

Northfield Bank has entered into employment agreements with each of Messrs. Alexander, Klein, Doherty, and Widmer. Northfield-Federal is a signatory to each of the agreements for the sole purpose of guaranteeing payments thereunder. Each of these agreements has an initial term of three years. Each year, on the January 1 anniversary date of the agreements for Messrs. Alexander and Widmer and on the July 1 anniversary date of the agreements for Messrs. Klein and Doherty, the employment agreements renew for an additional year so that the remaining term will be three years unless notice of nonrenewal is provided to the executive prior to such anniversary date. The Compensation Committee of the board of directors conducts an annual performance evaluation of each executive for purposes of determining whether to renew the employment agreement. The Compensation Committee also evaluates the terms and conditions of the agreements prior to renewal, in consultation with an independent third party compensation consultant, to determine that such terms and conditions are competitive with the market for the designated positions.

The employment agreements for Messrs. Alexander, Klein, Doherty and Widmer, were revised on their most recent anniversary dates, so that the board of directors of Northfield Bank is required to evaluate the services of the executive for purposes of determining whether to renew the agreement for an additional three-year period. Initially, the Compensation Committee will conduct a performance evaluation and review of the executive for purposes of determining whether to extend the agreements. The Compensation Committee will present its findings to the board of directors and the independent members of the Board, or the full Board will approve the renewal or nonrenewal. If the Board determines not to renew an employment agreement, it must give notice to the executive not less than thirty and not more than sixty days prior to the anniversary date.

Under the employment agreements, base salaries for Messrs. Alexander, Klein, Doherty, and Widmer on December 31, 2011, were \$676,000, \$350,000, \$280,000, and \$250,000, respectively. In addition to base salary, each agreement provides for, among other things, participation in cash incentive programs and other employee retirement benefit and fringe benefit plans applicable to executive employees. Northfield Bank also will pay or reimburse each executive for all reasonable business expenses incurred by the executive in the performance of his obligations. In addition, Northfield Bank will provide Mr. Alexander with a life insurance policy, pay or reimburse Mr. Alexander for the annual dues associated with his membership in a country club, and pay directly or reimburse Mr. Alexander for the expense of leasing an automobile and reasonable expenses associated with the use of such automobile. Each employment agreement may be terminated for cause at any time, in which event the executive would have no right to receive compensation or other benefits under the employment agreement for any period after termination.

Certain events resulting in the executive's termination or resignation entitle the executive to payments of severance benefits following termination of employment. In the event the executive's employment is terminated for reasons other than just cause (as defined in the employment agreements), disability (as defined in the employment agreements), or death, or in the event the executive resigns during the term of the agreement following:

- (i) the failure to elect or reelect or to appoint or reappoint the executive to his executive position, and in the case of Mr. Alexander, the failure to nominate or re-nominate him as a director of Northfield Bank or Northfield-Federal;
- (ii) a material change in the nature or scope of the executive's authority that would cause the executive's position to become one of lesser importance;
- (iii) a relocation of the executive's principal place of employment by more than 30 miles from designated areas;
- (iv) a material reduction in the benefits and perquisites of executive, other than a reduction in pay or benefits of all Northfield Bank employees;

Table of Contents

(v) the liquidation or dissolution of Northfield Bank or Northfield-Federal that would affect the status of the executive; or

(vi) a material breach of the employment agreement by Northfield Bank, the executive would be entitled to a lump sum cash severance payment and the continuation of certain welfare benefits for a period of time after termination of employment, as more fully described under the table Potential Payments to Named Executive Officers.

In the event an executive resigns in connection with or following a change in control (as defined in the employment agreement), due to the occurrence of one of the events described in the immediately preceding paragraph, the executive would also be entitled to a lump sum cash severance payment and the continuation of certain welfare benefits, including health and life insurance benefits for a period of time after termination of employment, as more fully described under the table Potential Payments to Named Executive Officers. Payments will be made in a lump sum within 30 days after the date of termination, or, if necessary to avoid penalties under Section 409A of the Internal Revenue Code, no later than the first day of the seventh month following the date of termination. In addition, the executive and his family would be entitled, at no expense to the executive, to the continuation of life, medical, dental and disability coverage for 36 months following the date of termination. If such benefits cannot be provided, a lump sum cash payment for the value of such benefits will be made to the executive.

Notwithstanding the foregoing, in the event payments to the executive would result in an excess parachute payment as defined in Section 280G of the Internal Revenue Code, payments under the employment agreements would be reduced in order to avoid such a result.

In the event Mr. Alexander becomes disabled, his obligation to perform services under the employment agreement will terminate and he will receive the benefits provided under any disability program sponsored by Northfield-Federal or Northfield Bank. To the extent disability benefits for Mr. Alexander are less than his base salary on the effective date of his termination of employment, and less than 66 2/3% of his base salary after the first year following termination, he will receive a supplemental disability benefit equal to the difference between the benefits provided under any disability program sponsored by Northfield-Federal or Northfield Bank and his base salary for one year following the date of termination, and 66 2/3% of his base salary after the first year following termination, until the earliest to occur of his death, recovery of disability or the date he attains age 65. If disability payments to Mr. Alexander are not taxable to him for federal income tax purposes, such amounts shall be tax adjusted assuming a combined federal, state and city tax rate of 38%, for purposes of determining the reduction in payments under the agreement, to reflect the tax-free nature of the disability payments. In addition, Mr. Alexander and his dependents will continue to be covered, at no cost to them, under all benefit plans, including retirement plans, life insurance plans and non-taxable medical and dental plans in which they participated prior to the occurrence of his disability, until the earliest of his recovery from disability or attaining age 65.

The employment agreements for Messrs. Klein, Doherty, and Widmer provide that in the event of the executive's disability, the executive's obligation to perform services under the employment agreement will terminate, and the executive will continue to receive his then current base salary for one year. Such payment will be reduced by the amount of any short- or long-term disability benefits payable under any disability program sponsored by Northfield-Federal or Northfield Bank. If disability payments to Messrs. Klein, Doherty, or Widmer are not subject to federal income tax, then amounts payable to the executives under the employment agreements shall be tax adjusted in a manner similar to payments to Mr. Alexander. In addition, the executive and his dependents will continue to be provided with certain medical, dental and other health benefits on the same terms as those provided prior to the executive's termination for a period of one year.

In the event of the executive's death, the executive's estate or beneficiaries will be paid the executive's base salary for one year and will receive continued medical, dental, and other health benefits for one year on the same terms as those provided prior to the executive's death. Upon retirement at age 65 or such later date determined by the board of directors, the executive will receive only those benefits to which he is entitled under any retirement plan of Northfield Bank to which he is a party.

Table of Contents

Upon termination of the executive's employment other than in connection with a change in control or for cause, the executive agrees not to compete with Northfield Bank for a period of two years in any city, town or county in which the executive's normal business office is located and Northfield Bank has an office or has filed an application for regulatory approval to establish an office.

Potential Payments to Named Executive Officers

The following table sets forth estimates of the amounts that would be payable to the listed individuals, under their employment agreements and stock option and restricted stock agreements in the event of their termination of employment on December 31, 2011, under designated circumstances. The table does not include vested or accrued benefits under qualified and non-qualified benefit plans or qualified or non-qualified deferred compensation plans that are disclosed elsewhere in this prospectus. The estimates shown are highly dependent on a variety of factors, including but not limited to the date of termination, interest rates, federal, state, and local tax rates, and compensation history. Actual payments due could vary substantially from the estimates shown. For example, the amounts presented in the table below for discharge without cause or resignation with good reason in connection with a change in control have not been reduced to reflect any cut-back required to avoid an excess parachute payment under section 280G of the Internal Revenue Code. We consider each termination scenario listed below to be exclusive of all other scenarios and do not expect that any of our executive officers would be eligible to collect the benefits shown under more than one termination scenario. If an executive officer is terminated for just cause as defined in the employment agreement, Northfield-Federal has no contractual payment or other obligations under the employment agreement.

Ms. Frank retired effective October 5, 2012, and is not included in the table below. Ms. Frank was not a party to an employment agreement. Pursuant to a retirement agreement entered into by Ms. Frank and Northfield Bancorp, MHC, Northfield-Federal and Northfield Bank, Ms. Frank executed a general release and will provide consulting services from October 6, 2012 through October 5, 2013. In consideration for the above, Mr. Frank received a payment of \$300,000. In addition, in accordance with the terms of the 2008 Equity Incentive Plan, as the result of her retirement, Ms. Frank vested in options to purchase 10,600 shares of Northfield-Federal's common stock with an exercise price of \$9.94 per share, and 5,320 shares of restricted common stock of Northfield-Federal.

Total	\$ 5,276,343	\$ 2,602,731	\$ 2,286,441	\$ 1,967,827

- (1) In the case of disability, Mr. Alexander's employment agreement provides for supplemental salary continuation until the earlier of: recovery from such disability, attaining age 65, or death. The reported figure assumes salary continuation until Mr. Alexander attains the age of 65. Mr. Klein, Mr. Doherty, and Mr. Widmer receive salary continuation benefits for one-year following such disability. The employment agreement provides the executive with his base salary in the first year following disability, reduced by any assumed short-term or long-term disability insurance benefits provided under separate insurance plans we maintain. Mr. Alexander's employment agreement provides for second-year benefits and benefits for every year thereafter, equal to 66 2/3% of his base salary. Such amounts due under the employment agreements are reduced by any assumed short-term or long-term disability insurance benefits provided under separate insurance plans on a tax-equivalent basis (assuming a 38% tax rate), if such short-term or long-term disability benefits are excludable for federal income tax purposes. Supplemental salary continuation benefits have been discounted at an annual compounding rate of 2.00% for Mr. Alexander. The figures presented for Mr. Klein, Mr. Doherty, and Mr. Widmer are presented without discount.
- (2) Mr. Alexander's employment agreement provides for medical, dental, and other health benefits to him and his family, at no cost to him, until Mr. Alexander recovers from such disability, or Mr. Alexander attains the age of 65. Mr. Klein's, Mr. Doherty's, and Mr. Widmer's employment agreements provide for one year of medical, dental, and other health benefits on the same terms, including cost sharing by the executive, as provided to the executive prior to his disability. The reported figure for Mr. Alexander reflects the estimated present value of the future premium cost of such benefits, calculated utilizing substantially the same health care cost increase assumptions we use in measuring our liability for such benefits for financial statement purposes. For purposes of this presentation, the estimated future costs were

Edgar Filing: Northfield Bancorp, Inc. - Form 424B3

discounted at a 2.00% annual compounding rate for Mr. Alexander. The figures presented for Mr. Klein, Mr. Doherty, and Mr. Widmer are presented without discount.

- (3) Mr. Alexander's employment agreement provides for life insurance continuation benefits. Mr. Alexander receives an annual reimbursement for a whole-life policy premium through 2014 in the amount of \$35,660. In addition, the employment agreement provides for the continuation of group life insurance for Mr. Alexander until the earlier of: the date he recovers from such disability or attains the age of 65. The reported figure in the table assumes that group term life insurance benefits will continue until Mr. Alexander attains the age of 65, with an assumed annual cost increase of 4.00% and a 2.00% annual discount rate.
- (4) Each of the employment agreements provides for a lump-sum death benefit equal to one-year of base salary for each executive. The employment agreements also provide for the continuation of medical, dental, and other health benefits to the executive's family for a period of one-year at the same terms and cost to the executive immediately prior to his death.
- (5) Each of the employment agreements provides for the lump-sum payment of: three times base salary; three times the average annual bonus/and or incentive award for three years prior to the year of termination; and the retirement contributions or

Table of Contents

- payments that we would have made on the executive's behalf, as if the executive had continued his employment for a 36-month period, based on contributions or payments made (on an annualized basis) at the date of termination.
- (6) Each of the employment agreements provides for medical, dental, and other health benefits to the executive and his family, at no cost to the executive for a period of 36 months from the date of termination. The reported figures reflect the estimated present value of the future premium cost of such benefits, calculated utilizing substantially the same health care cost increase assumptions we used in measuring our liability for such benefits for financial statement purposes. For purposes of this presentation, the estimated future costs were discounted at a 2.00% annual compounding rate.
 - (7) Each of the employment agreements provides for life insurance benefits to the executive and his family, at no cost to the executive for a period of 36 months from the date of termination. Mr. Alexander receives an annual reimbursement of \$35,660 for a whole-life insurance policy. Mr. Alexander, Mr. Klein, Mr. Doherty, and Mr. Widmer also participate in our group life insurance plan. The reported figures in the table assume that the reimbursement to Mr. Alexander for his whole-life insurance policy will continue for a period of three years. The reported figures also include the estimated costs of group term life insurance benefits for Mr. Alexander, Mr. Klein, Mr. Doherty, and Mr. Widmer for a three year period with an assumed annual cost increase of 4% and a discount rate of 2.00% compounded annually.
 - (8) Messrs. Alexander and Widmer are entitled to severance benefits on termination following a Change in Control only if their employment is terminated involuntarily or with Good Reason. Messrs. Klein and Doherty would be entitled to severance benefits even if their termination following a change in control was voluntary without Good Reason. Under each of the employment agreements, amounts payable under a change in control are identical to those payable for Discharge Without Cause or Resignation With Good Reason no Change in Control except that: (i) payments pertaining to bonus and/or incentive awards are based upon the highest annual bonus and/or incentive award earned in any of the three years preceding the year in which the termination occurs and (ii) each of the employment agreements limits the total payments to an executive to an amount that is one dollar less than three times the executive's base amount as defined in Section 280G of the Internal Revenue Code.
 - (9) Amounts represent the value of unvested equity awards at December 31, 2011 calculated as the sum of: (a) unvested restricted stock of 100,800 shares, 46,980 shares, 43,800 shares and 36,000 shares for Mr. Alexander, Mr. Klein, Mr. Doherty and Mr. Widmer, respectively, multiplied by the last reported closing price of Northfield-Federal's common stock as reported on December 31, 2011, of \$14.16 per share; and (b) unvested stock options of 252,750 options, 123,300 options, 115,200 options and 94,650 options for Mr. Alexander, Mr. Klein, Mr. Doherty and Mr. Widmer, respectively, multiplied by \$4.22 per option. The \$4.22 value of each option represents the last reported closing price of Northfield-Federal's stock on December 31, 2011 of \$14.16 per share less the option exercise price of \$9.94 per share.

Say-on-Pay

At the 2011 Annual Meeting, stockholders voted, on an advisory basis, whether to approve the compensation paid to the Named Executive Officers. A majority of the votes were cast in favor of the resolution to approve the executive compensation described in the Proxy Statement. Stockholders also voted on a non-binding proposal to establish whether stockholders should vote on executive compensation every one, two or three years. A majority of the votes were cast in favor of holding the non-binding vote on executive compensation every three years. The board of directors took this vote into account in passing a resolution in which it approved holding a non-binding stockholder vote on executive compensation every three years. The next non-binding stockholder vote on executive compensation will occur in May, 2014.

Benefits to be Considered Following Completion of the Conversion

Following the stock offering, we intend to adopt a new stock-based benefit plan that will provide for grants of stock options and restricted common stock awards. If adopted within 12 months following the completion of the conversion, the number of shares reserved for the exercise of stock options or available for stock awards under the stock-based benefit plan would generally be limited to 10% and 4%, respectively, of the shares sold in the stock offering, subject to adjustment as may be required by federal regulations or policy to reflect shares of common stock or stock options previously granted by Northfield-Federal or Northfield Bank, so that the total shares reserved for stock options and restricted stock awards does not exceed 10% and 4%, respectively, of Northfield-Delaware's outstanding shares immediately after the conversion and offering.

The stock-based benefit plan will not be established sooner than six months after the stock offering and if adopted within one year after the stock offering would require the approval of a majority of the votes eligible to be cast by stockholders. If the stock-based benefit plan is established after one year after the stock offering, it would

Table of Contents

require the approval of our stockholders by a majority of votes cast. The following additional restrictions would apply to our stock-based benefit plan only if the plan is adopted within one year after the stock offering:

non-employee directors in the aggregate may not receive more than 30% of the options and restricted stock awards authorized under the plan;

any one non-employee director may not receive more than 5% of the options and restricted stock awards authorized under the plan;

any officer or employee may not receive more than 25% of the options and restricted stock awards authorized under the plan;

any tax-qualified employee stock benefit plans and management stock benefit plans, in the aggregate, may not hold more than 10% of the shares sold in the offering, unless Northfield Bank has tangible capital of 10% or more, in which case any tax-qualified employee stock benefit plans and management stock benefit plans, may hold up to 12% of the shares sold in the offering;

the options and restricted stock awards may not vest more rapidly than 20% per year, beginning on the first anniversary of stockholder approval of the plan;

accelerated vesting is not permitted except for death, disability or upon a change in control of Northfield Bank or Northfield-Delaware; and

our executive officers or directors must exercise or forfeit their options in the event that Northfield Bank becomes critically undercapitalized, is subject to enforcement action or receives a capital directive.

We have not determined whether we will present the stock-based benefit plan for stockholder approval prior to or more than 12 months after the completion of the conversion. In the event either federal or state regulators change their regulations or policies regarding stock-based benefit plans, including any regulations or policies restricting the size of awards and vesting of benefits as described above, the restrictions described above may not be applicable.

We may obtain the shares needed for our stock-based benefit plans by issuing additional shares of common stock from authorized but unissued shares or through stock repurchases.

Table of Contents

The actual value of the shares awarded under the stock-based benefit plan will be based in part on the price of Northfield-Delaware's common stock at the time the shares are awarded. The stock-based benefit plan is subject to stockholder approval, and cannot be implemented until at least six months after the offering. The following table presents the total value of all shares that would be available for award and issuance under the stock-based benefit plan, assuming the shares are awarded when the market price of our common stock ranges from \$8.00 per share to \$14.00 per share.

Share Price	1,241,000 Shares Awarded at Minimum of Offering Range	1,460,000 Shares Awarded at Midpoint of Offering Range	1,679,000 Shares Awarded at Maximum of Offering Range
	(In thousands, except share price information)		
\$ 8.00	\$ 9,928	\$ 11,680	\$ 13,432
10.00	12,410	14,600	16,790
12.00	14,892	17,520	20,148
14.00	17,374	20,440	23,506

The grant-date fair value of the options granted under the stock-based benefit plan will be based in part on the price of shares of common stock of Northfield-Delaware at the time the options are granted. The value also will depend on the various assumptions utilized in the option pricing model ultimately adopted. The following table presents the total estimated value of the options to be available for grant under the stock-based benefit plan, assuming the market price and exercise price for the stock options are equal and the range of market prices for the shares is \$8.00 per share to \$14.00 per share. The Black-Scholes option pricing model provides an estimate only of the fair value of the options, and the actual value of the options may differ significantly from the value set forth in this table.

Exercise Price	Grant-Date Fair Value Per Option	3,102,500 Options at Minimum of Offering Range	3,650,000 Options at Midpoint of Offering Range	4,197,500 Options at Maximum of Offering Range
	(In thousands, except exercise price and fair value information)			
\$ 8.00	\$ 1.43	\$ 4,437	\$ 5,220	\$ 6,002
10.00	1.79	5,553	6,534	7,514
12.00	2.15	6,670	7,848	9,025
14.00	2.51	7,787	9,162	10,536

The tables presented above are provided for informational purposes only. There can be no assurance that our stock price will not trade below \$10.00 per share. Before you make an investment decision, we urge you to read this prospectus carefully, including, but not limited to, the section entitled **Risk Factors** beginning on page 17.

Table of Contents**BENEFICIAL OWNERSHIP OF COMMON STOCK**

The following table provides the beneficial ownership of shares of common stock of Northfield-Federal held by our directors and executive officers, individually and as a group, and all individuals known to management to own more than 5% of our common stock as of November 8, 2012. Unless otherwise indicated, each of the named individuals has sole voting power and sole investment power with respect to the number of shares shown.

- (12) Includes 10,000 shares held jointly with Mr. Widmer's spouse, 6,700 shares held by Mr. Widmer's spouse, 4,203 shares held in Mr. Widmer's IRA account, 14,921 shares held in Northfield Bank's 401(k) Plan, and 9,609 shares allocated to Mr. Widmer under Northfield Bank's ESOP. Also includes 24,000 shares of unvested stock awards over which Mr. Widmer has voting control and 94,650 shares that may be acquired within 60 days by exercising options.

Table of Contents**SUBSCRIPTIONS BY DIRECTORS AND EXECUTIVE OFFICERS**

The table below sets forth, for each of Northfield-Delaware's directors and executive officers, and for all of these individuals as a group, the following information:

- (i) the number of exchange shares to be held upon completion of the conversion, based upon their beneficial ownership of Northfield-Federal common stock as of November 8, 2012;
- (ii) the proposed purchases of subscription shares, assuming sufficient shares of common stock are available to satisfy their subscriptions; and
- (iii) the total shares of common stock to be held upon completion of the conversion.

In each case, it is assumed that subscription shares are sold at the minimum of the offering range. See "The Conversion and Offering - Additional Limitations on Common Stock Purchases." Federal regulations prohibit our directors and officers from selling the shares they purchase in the offering for one year after the date of purchase. Subscriptions by management through our 401(k) plan are included in the proposed purchases set forth below and will be counted as part of the maximum number of shares such individuals may subscribe for in the stock offering and as part of the maximum number of shares directors and officers may purchase in the stock offering.

Name of Beneficial Owner	Number of Exchange Shares to Be Held (2)	Proposed Purchases of Stock in Offering (1)		Total Common Stock to be Held at Minimum of Offering Range (3)	
		Number of Shares	Amount	Number of Shares	Percentage of Shares Outstanding
John W. Alexander, Chairman of the Board, President and Chief Executive Officer	635,114	50,000	\$ 500,000	685,114	1.3%
John R. Bowen, Director	89,469	2,000	20,000	91,469	*
Annette Catino, Director	136,110	30,000	300,000	166,110	*
Gil Chapman, Director	109,287	4,000	40,000	113,287	*
John P. Connors, Jr., Director	107,546	25,000	250,000	127,546	*
John J. DePierro, Director	96,355	2,000	20,000	98,355	*
Susan Lamberti, Director	119,131	3,000	30,000	122,131	*
Albert J. Regen, Director	146,659	25,000	250,000	171,659	*
Patrick E. Scura, Jr., Director	105,912	5,000	50,000	110,912	*
Kenneth J. Doherty, Executive Vice President, Chief Lending Officer	283,722	10,000	100,000	293,722	*
Steven M. Klein, Executive Vice President, Chief Financial Officer	288,261	30,000	300,000	318,261	*
Michael J. Widmer, Executive Vice President, Operations	229,005	10,000	100,000	239,005	*
Total for Directors and Executive Officers	2,346,571	196,000	\$ 1,960,000	2,542,571	5.0%

* Less than 1%.

(1) Includes proposed subscriptions, if any, by associates.

(2) Based on information presented in "Beneficial Ownership of Common Stock," and assuming an exchange ratio of 1.2240 at the minimum of the offering range.

(3) At the maximum of the offering range, directors and executive officers would own 3,370,967 shares, or 4.9% of our outstanding shares of common stock.

Table of Contents

THE CONVERSION AND OFFERING

The board of directors of Northfield-Federal and the board of trustees of Northfield Bancorp, MHC have approved the plan of conversion and reorganization. The plan of conversion and reorganization must also be approved by the members of Northfield Bancorp, MHC (depositors of Northfield Bank) and the stockholders of Northfield-Federal. A special meeting of members and a special meeting of stockholders have been called for this purpose. The Board of Governors of the Federal Reserve System has conditionally approved the application that includes the plan of conversion and reorganization; however, such approval does not constitute a recommendation or endorsement of the plan of conversion and reorganization by that agency.

General

The board of directors of Northfield-Federal and the board of trustees of Northfield Bancorp, MHC adopted the plan of conversion and reorganization on June 6, 2012. Pursuant to the plan of conversion and reorganization, our organization will convert from the mutual holding company form of organization to the fully stock form. Northfield Bancorp, MHC, the mutual holding company parent of Northfield-Federal, will be merged into Northfield-Federal, and Northfield Bancorp, MHC will no longer exist. Northfield-Federal, which owns 100% of Northfield Bank, will be merged into a new Delaware corporation named Northfield Bancorp, Inc. As part of the conversion, the 61.1% ownership interest of Northfield Bancorp, MHC in Northfield-Federal will be offered for sale in the stock offering. When the conversion is completed, all of the outstanding common stock of Northfield Bank will be owned by Northfield-Delaware, and all of the outstanding common stock of Northfield-Delaware will be owned by public stockholders. Northfield Bancorp, MHC and Northfield-Federal will cease to exist. A diagram of our corporate structure before and after the conversion is set forth in the Summary section of this prospectus.

Under the plan of conversion and reorganization, at the completion of the conversion and offering, each share of Northfield-Federal common stock owned by persons other than Northfield Bancorp, MHC will be converted automatically into the right to receive new shares of Northfield-Delaware common stock determined pursuant to an exchange ratio. The exchange ratio will ensure that immediately after the exchange of existing shares of Northfield-Federal for new shares of Northfield-Delaware, the public stockholders will own the same aggregate percentage of shares of common stock of Northfield-Delaware that they owned in Northfield-Federal immediately prior to the conversion, excluding any shares they purchased in the offering and their receipt of cash paid in lieu of fractional shares.

We intend to retain between \$135.0 million and \$183.0 million of the net proceeds of the offering and to invest between \$147.4 million and \$199.8 million of the net proceeds in Northfield Bank. The conversion will be consummated only upon the issuance of at least the minimum number of shares of our common stock offered pursuant to the plan of conversion and reorganization.

The plan of conversion and reorganization provides that we will offer shares of common stock for sale in the subscription offering to eligible account holders (including eligible depositors of the former First State Bank and the former Flatbush Federal Savings & Loan Association), our tax-qualified employee benefit plans, including our employee stock ownership plan and 401(k) plan, supplemental eligible account holders and other members. In addition, we will offer common stock for sale in a community offering to members of the general public, with a preference given in the following order:

- (i) Natural persons (including trusts of natural persons) residing in the New Jersey Counties of Bergen, Essex, Hudson, Hunterdon, Middlesex, Monmouth, Morris, Ocean, Passaic, Somerset, Sussex and Union, the New York Counties of Bronx, Kings, Nassau, New York, Putnam, Queens, Richmond, Rockland, Suffolk and Westchester, and Pike County, Pennsylvania; and
- (ii) Northfield-Federal's public stockholders as of November 8, 2012.

We have the right to accept or reject, in whole or in part, any orders to purchase shares of the common stock received in the community offering. The community offering will begin at the same time as the subscription

Table of Contents

offering and must be completed within 45 days after the completion of the subscription offering unless otherwise extended by the Federal Reserve Board. See Community Offering.

We also may offer for sale shares of common stock not purchased in the subscription or community offerings through a syndicated or firm commitment underwritten offering to be joint book managed by Sandler O'Neill & Partners, L.P., Jefferies & Company, Inc. and Stifel, Nicolaus & Company, Incorporated. See Syndicated or Firm Commitment Underwritten Offering herein.

We determined the number of shares of common stock to be offered in the offering based upon an independent valuation appraisal of the estimated pro forma market value of Northfield-Delaware. All shares of common stock to be sold in the offering will be sold at \$10.00 per share. Investors will not be charged a commission to purchase shares of common stock. The independent valuation will be updated and the final number of the shares of common stock to be issued in the offering will be determined at the completion of the offering. See Stock Pricing and Number of Shares to be Issued for more information as to the determination of the estimated pro forma market value of the common stock.

The following is a brief summary of the conversion and is qualified in its entirety by reference to the provisions of the plan of conversion and reorganization. A copy of the plan of conversion and reorganization is available for inspection at each branch office of Northfield Bank. The plan of conversion and reorganization is also filed as an exhibit to Northfield Bancorp, MHC's application to convert from mutual to stock form of which this prospectus is a part, copies of which may be obtained from the Federal Reserve Board. The plan of conversion and reorganization is also filed as an exhibit to the registration statement we have filed with the Securities and Exchange Commission, of which this prospectus is a part, copies of which may be obtained from the Securities and Exchange Commission or online at the Securities and Exchange Commission's website, www.sec.gov. See Where You Can Find Additional Information.

Reasons for the Conversion

Our primary reasons for converting and undertaking the stock offering are to:

eliminate the uncertainties associated with the mutual holding company structure under financial reform legislation. The Dodd-Frank Act has changed our primary bank and holding company regulator, which has resulted in changes in regulations applicable to Northfield Bancorp, MHC and Northfield-Federal. Under the Dodd-Frank Act, the Federal Reserve Board became the federal regulator of all savings and loan holding companies and mutual holding companies, and the Federal Reserve Board historically has not allowed mutual holding companies to waive the receipt of dividends from their mid-tier holding company subsidiaries. Absent approval for Northfield Bancorp, MHC to waive dividends, any dividend declared on Northfield-Federal's common stock would have to be paid to Northfield Bancorp, MHC as well as our public stockholders, resulting in a tax liability for Northfield Bancorp, MHC and a decrease in the exchange ratio for our public stockholders upon conversion to stock form. The Federal Reserve Board currently requires a grandfathered mutual holding company, like Northfield Bancorp, MHC, to obtain member (depositor) approval and comply with other procedural requirements prior to waiving dividends, which would make dividend waivers impracticable. The conversion will eliminate our mutual holding company structure and will enable us to continue paying dividends to our stockholders, subject to the customary legal, regulatory and financial considerations applicable to all financial institutions. See Our Dividend Policy. It will also eliminate the risk that the Federal Reserve Board will amend existing regulations applicable to the conversion process in a manner disadvantageous to our public stockholders or depositors.

transition us to a more familiar and flexible organizational structure. The stock holding company structure is a more familiar form of organization, which we believe will make our common stock more appealing to investors, and will give us greater flexibility to access the capital

Table of Contents

markets through possible future equity and debt offerings, although we have no current plans, agreements or understandings regarding any additional securities offerings.

improve the liquidity of our shares of common stock. The larger number of shares that will be outstanding after completion of the conversion and offering is expected to result in a more liquid and active market than currently exists for Northfield-Federal common stock. A more liquid and active market would make it easier for our stockholders to buy and sell our common stock and would give us greater flexibility in implementing capital management strategies.

facilitate future mergers and acquisitions. Although we do not currently have any understandings or agreements regarding any specific acquisition transaction, the stock holding company structure will give us greater flexibility to structure and make us a more attractive and competitive bidder for, mergers and acquisitions of other financial institutions, as opportunities arise. The additional capital raised in the offering will also enable us to consider larger transactions. In addition, although we intend to remain an independent financial institution, the stock holding company structure may make us a more attractive acquisition candidate for other institutions, although applicable regulations prohibit the acquisition of Northfield-Delaware for three years following completion of the conversion.

Approvals Required

The affirmative vote of a majority of the total votes eligible to be cast by the members of Northfield Bancorp, MHC is required to approve the plan of conversion and reorganization. By their approval of the plan of conversion and reorganization, the members of Northfield Bancorp, MHC will also be approving the merger of Northfield Bancorp, MHC into Northfield-Federal. The affirmative vote of the holders of at least two-thirds of the outstanding shares of common stock of Northfield-Federal and the affirmative vote of the holders of a majority of the outstanding shares of common stock of Northfield-Federal held by the public stockholders of Northfield-Federal (stockholders other than Northfield Bancorp, MHC) are also required to approve the plan of conversion and reorganization. The plan of conversion and reorganization also must be approved by the Federal Reserve Board, which has approved the application that includes the plan of conversion and reorganization.

Share Exchange Ratio for Current Stockholders

Federal regulations provide that in a conversion of a mutual holding company to fully stock form, the public stockholders will be entitled to exchange their shares for common stock of the new holding company, provided that the mutual holding company demonstrates to the satisfaction of the Federal Reserve Board that the basis for the exchange is fair and reasonable. At the completion of the conversion, each publicly held share of Northfield-Federal common stock will be converted automatically into the right to receive a number of shares of Northfield-Delaware common stock. The number of shares of common stock will be determined pursuant to the exchange ratio, which ensures that the public stockholders will own the same percentage of common stock in Northfield-Delaware after the conversion as they held in Northfield-Federal immediately prior to the conversion, exclusive of their purchase of additional shares of common stock in the offering and their receipt of cash in lieu of fractional exchange shares. The exchange ratio will not depend on the market value of Northfield-Federal common stock. The exchange ratio will be based on the percentage of Northfield-Federal common stock held by the public, the independent valuation of Northfield-Delaware prepared by RP Financial, LC., and the number of shares of common stock issued in the offering. The exchange ratio is expected to range from approximately 1.2240 exchange shares for each publicly held share of Northfield-Federal at the minimum of the offering range to 1.6561 exchange shares for each publicly held share of Northfield-Federal at the maximum of the offering range.

Table of Contents

The following table shows how the exchange ratio will adjust, based on the appraised value of Northfield-Delaware as of October 12, 2012, assuming public stockholders of Northfield-Federal, including former stockholders of Flatbush Federal Bancorp, Inc., own 38.9% of Northfield-Federal common stock immediately prior to the completion of the conversion. The table also shows how many shares of Northfield-Delaware a hypothetical owner of Northfield-Federal common stock would receive in the exchange for 100 shares of common stock owned at the completion of the conversion, depending on the number of shares issued in the offering.

	Shares to be Sold in This Offering		Shares of Northfield-Delaware		Total Shares of Common Stock to be Issued in	Exchange and Exchange Offering Ratio	Equivalent Value of Shares Based Upon Offering Price (1)	Equivalent Pro Forma Tangible Book Value Per Exchanged Share (2)	Shares to be Received for 100 Existing Shares (3)
			to be Issued for Shares of Northfield-Federal						
	Amount	Percent	Amount	Percent					
Minimum	31,025,000	61.1%	19,780,217	38.9%	50,805,217	1.2240	\$ 12.24	\$ 15.94	122
Midpoint	36,500,000	61.1	23,270,844	38.9	59,770,844	1.4400	14.40	17.09	144
Maximum	41,975,000	61.1	26,761,470	38.9	68,736,470	1.6561	16.56	18.25	165

- (1) Represents the value of shares of Northfield-Delaware common stock to be received in the conversion by a holder of one share of Northfield-Federal, pursuant to the exchange ratio, based upon the \$10.00 per share offering price.
- (2) Represents the pro forma tangible book value per share at each level of the offering range multiplied by the respective exchange ratio.
- (3) Cash will be paid in lieu of fractional shares.

Options to purchase shares of Northfield-Federal common stock that are outstanding immediately prior to the completion of the conversion will be converted into options to purchase shares of Northfield-Delaware common stock, with the number of shares subject to the option and the exercise price per share to be adjusted based upon the exchange ratio. The aggregate exercise price, term and vesting period of the options will remain unchanged.

Effects of Conversion on Depositors, Borrowers and Members

Continuity. The conversion will not affect the normal business of Northfield Bank of accepting deposits and making loans. Northfield Bank will continue to be a federally chartered savings bank and will continue to be regulated by the Office of the Comptroller of the Currency. After the conversion, Northfield Bank will continue to offer existing services to depositors, borrowers and other customers. The directors serving Northfield-Federal at the time of the conversion will be the directors of Northfield-Delaware after the conversion.

Effect on Deposit Accounts. Pursuant to the plan of conversion and reorganization, each depositor of Northfield Bank at the time of the conversion will automatically continue as a depositor after the conversion, and the deposit balance, interest rate and other terms of such deposit accounts will not change as a result of the conversion. Each such account will be insured by the Federal Deposit Insurance Corporation to the same extent as before the conversion. Depositors will continue to hold their existing certificates, passbooks and other evidences of their accounts.

Effect on Loans. No loan outstanding from Northfield Bank will be affected by the conversion, and the amount, interest rate, maturity and security for each loan will remain as it was contractually fixed prior to the conversion.

Effect on Voting Rights of Members. At present, all depositors of Northfield Bank are members of, and have voting rights in, Northfield Bancorp, MHC as to all matters requiring membership action. Upon completion of the conversion, depositors will cease to be members of Northfield Bancorp, MHC and will no longer have voting rights. Upon completion of the conversion, all voting rights in Northfield Bank will be vested in Northfield-Delaware as the sole stockholder of Northfield Bank. The stockholders of Northfield-Delaware will possess exclusive voting rights with respect to Northfield-Delaware common stock.

Table of Contents

Tax Effects. We have received an opinion of counsel with regard to the federal income tax consequences of the conversion and an opinion of tax advisor with regard to the state income tax consequences of the conversion to the effect that the conversion will not be a taxable transaction for federal or state income tax purposes to Northfield Bancorp, MHC, Northfield-Federal, the public stockholders of Northfield-Federal (except for cash paid for fractional shares), members of Northfield Bancorp, MHC, eligible account holders, supplemental eligible account holders, or Northfield Bank. See Material Income Tax Consequences.

Effect on Liquidation Rights. Each depositor in Northfield Bank has both a deposit account in Northfield Bank and a pro rata ownership interest in the net worth of Northfield Bancorp, MHC based upon the deposit balance in his or her account. This ownership interest is tied to the depositor's account and has no tangible market value separate from the deposit account. This interest may only be realized in the event of a complete liquidation of Northfield Bancorp, MHC and Northfield Bank. Any depositor who opens a deposit account obtains a pro rata ownership interest in Northfield Bancorp, MHC without any additional payment beyond the amount of the deposit. A depositor who reduces or closes his or her account receives a portion or all of the balance in the deposit account but nothing for his or her ownership interest in the net worth of Northfield Bancorp, MHC, which is lost to the extent that the balance in the account is reduced or closed.

Consequently, depositors in a stock subsidiary of a mutual holding company normally have no way of realizing the value of their ownership interest, which has realizable value only in the unlikely event that Northfield Bancorp, MHC and Northfield Bank are liquidated. If this occurs, the depositors of record at that time, as owners, would share pro rata in any residual surplus and reserves of Northfield Bancorp, MHC after other claims, including claims of depositors to the amounts of their deposits, are paid.

Under the plan of conversion, Eligible Account Holders and Supplemental Eligible Account Holders will receive an interest in liquidation accounts maintained by Northfield-Delaware and Northfield Bank in an aggregate amount equal to (i) Northfield Bancorp, MHC's ownership interest in Northfield-Federal's total stockholders' equity as of the date of the latest statement of financial condition used in this prospectus plus (ii) the value of the net assets of Northfield Bancorp, MHC as of the date of the latest statement of financial condition of Northfield Bancorp, MHC prior to the consummation of the conversion (excluding its ownership of Northfield-Federal). Northfield-Delaware and Northfield Bank will hold the liquidation accounts for the benefit of Eligible Account Holders and Supplemental Eligible Account Holders who continue to maintain deposits in Northfield Bank after the conversion. The liquidation accounts would be distributed to Eligible Account Holders and Supplemental Eligible Account Holders who maintain their deposit accounts in Northfield Bank only in the event of a liquidation of (a) Northfield-Delaware and Northfield Bank or (b) Northfield Bank. The liquidation account in Northfield Bank would be used only in the event that Northfield-Delaware does not have sufficient assets to fund its obligations under its liquidation account. The total obligation of Northfield-Delaware and Northfield Bank under their respective liquidation accounts will never exceed the dollar amount of Northfield-Delaware's liquidation account as adjusted from time to time pursuant to the plan of conversion and federal regulations. See Liquidation Rights.

Stock Pricing and Number of Shares to be Issued

The plan of conversion and reorganization and federal regulations require that the aggregate purchase price of the common stock sold in the offering must be based on the appraised pro forma market value of the common stock, as determined by an independent valuation. We have retained RP Financial, LC. to prepare an independent valuation appraisal. For its services in preparing the initial valuation, RP Financial, LC. will receive a fee of \$160,000, as well as payment for reimbursable expenses and an additional \$17,500 for each valuation update, as necessary. We have agreed to indemnify RP Financial, LC. and its employees and affiliates against specified losses, including any losses in connection with claims under the federal securities laws, arising out of its services as independent appraiser, except where such liability results from RP Financial, LC.'s bad faith or negligence.

Table of Contents

The independent valuation was prepared by RP Financial, LC. in reliance upon the information contained in this prospectus, including the consolidated financial statements of Northfield-Federal. RP Financial, LC. also considered the following factors, among others:

the present results and financial condition of Northfield-Federal (assuming the completion of the acquisition of Flatbush Federal Bancorp) and the projected results and financial condition of Northfield-Delaware;

the economic and demographic conditions in Northfield-Federal's existing market area;

certain historical, financial and other information relating to Northfield-Federal;

a comparative evaluation of the operating and financial characteristics of Northfield-Federal with those of other similarly situated publicly traded savings institutions located in the Eastern United States;

the effect of the conversion and offering on Northfield-Delaware's stockholders' equity and earnings potential;

the proposed dividend policy of Northfield-Delaware; and

the trading market for securities of comparable institutions and general conditions in the market for such securities.

The independent valuation appraisal considered the pro forma effect of the offering. Consistent with federal appraisal guidelines, the appraisal applied three primary methodologies: (i) the pro forma price-to-book value approach applied to both reported book value and tangible book value; (ii) the pro forma price-to-earnings approach applied to reported and core earnings; and (iii) the pro forma price-to-assets approach. The market value ratios applied in the three methodologies were based on the current market valuations of the peer group companies. RP Financial, LC. placed the greatest emphasis on the price-to-earnings and price-to-book approaches in estimating pro forma market value. RP Financial, LC. did not consider a pro forma price to assets approach to be meaningful in preparing the appraisal, as this approach is more meaningful when a company has low equity or earnings. The price to assets approach is less meaningful for a company like us, as we have equity in excess of regulatory capital requirements and positive reported and core earnings.

In applying each of the valuation methods, RP Financial, LC. considered adjustments to the pro forma market value based on a comparison of Northfield-Delaware with the peer group. RP Financial, LC. made a slight upward adjustment for asset growth, a slight-to-moderate downward adjustment for profitability, growth and viability of earnings and a slight/moderate downward adjustment for marketing of the issue. RP Financial, LC. made no adjustments for financial condition, primary market area, dividends, liquidity of the shares, management or effect of government regulations and regulatory reform. RP Financial, LC. made a slight upward adjustment for asset growth due to Northfield-Federal's stronger loan growth and pro forma leverage capacity compared to the peer group. The slight-to-moderate downward adjustment for profitability, growth and viability of earnings reflected Northfield-Delaware's lower pro forma return on average assets and return on equity on a core earnings basis and higher implied credit risk exposure. The slight/moderate downward adjustment for marketing of the issue reflected that Northfield Bancorp, MHC was not able to complete its conversion in 2010 and that there has been no conversion offering as large as this offering completed since 2010.

Included in RP Financial, LC.'s independent valuation were certain assumptions as to the pro forma earnings of Northfield-Delaware after the conversion that were utilized in determining the appraised value. These assumptions included estimated expenses, an assumed after-tax rate of return of 0.43% for the twelve months ended June 30, 2012 on the net offering proceeds and purchases in the open market of 4% of the common stock issued in

Table of Contents

the offering by the stock-based benefit plan at the \$10.00 per share purchase price. See Pro Forma Data for additional information concerning these assumptions. The use of different assumptions may yield different results.

The independent valuation states that as of October 12, 2012, the estimated pro forma market value of Northfield-Delaware was \$597.7 million. Based on federal regulations, this market value forms the midpoint of a range with a minimum of \$508.1 million and a maximum of \$687.4 million. The board of directors decided to offer the shares of common stock for a price of \$10.00 per share primarily because it is the price most commonly used in mutual-to-stock conversions of financial institutions. The aggregate offering price of the shares will be equal to the valuation range multiplied by the percentage of Northfield-Federal common stock owned by Northfield Bancorp, MHC. The number of shares offered will be equal to the aggregate offering price of the shares divided by the price per share. Based on the valuation range, the percentage of Northfield-Federal common stock owned by Northfield Bancorp, MHC and the \$10.00 price per share, the minimum of the offering range is 31,025,000 shares, the midpoint of the offering range is 36,500,000 shares and the maximum of the offering range is 41,975,000 shares.

The board of directors of Northfield-Delaware reviewed the independent valuation and, in particular, considered the following:

Northfield-Federal's financial condition and results of operations;

a comparison of financial performance ratios of Northfield-Federal to those of other financial institutions of similar size;

market conditions generally and in particular for financial institutions; and

the historical trading price of the publicly held shares of Northfield-Federal common stock.

All of these factors are set forth in the independent valuation. The board of directors also reviewed the methodology and the assumptions used by RP Financial, LC. in preparing the independent valuation and believes that such assumptions were reasonable. The offering range may be amended with the approval of the Federal Reserve Board, if required, as a result of subsequent developments in the financial condition of Northfield-Federal or Northfield Bank or market conditions generally. In the event the independent valuation is updated to amend the pro forma market value of Northfield-Delaware to less than \$508.1 million or more than \$687.4 million, the appraisal will be filed with the Securities and Exchange Commission by a post-effective amendment to Northfield-Delaware's registration statement.

The following table presents a summary of selected pricing ratios for Northfield-Delaware (on a pro forma basis) and the peer group companies based on earnings and other information as of and for the twelve months ended June 30, 2012, and stock price information for the peer group companies as of October 12, 2012, as reflected in the appraisal report. Compared to the average pricing of the peer group, our pro forma pricing ratios at the midpoint of the offering range indicated a discount of 18.9% on a price-to-book value basis, a discount of 22.3% on a price-to-tangible book value basis and a premium of 154.7% on a price-to-earnings basis. Our board of directors, in reviewing and approving the appraisal, considered the range of price-to-earnings multiples and the range of price-to-book value and price-to-tangible book value ratios at the different amounts of shares to be sold in the offering. The appraisal did not consider one valuation approach to be more important than the other. The estimated appraised value and the resulting premium/discount took into consideration the potential financial effect of the conversion and offering as well as the trading price of Northfield-Federal's common stock. The closing price of the common stock was \$16.22 per share on October 12, 2012, the effective date of the appraisal, and \$13.90 per share on June 5, 2012, the last trading day immediately preceding the announcement of the conversion.

Table of Contents

	Price-to-earnings multiple (1)	Price-to-book value ratio	Price-to-tangible book value ratio
Northfield-Delaware (on a pro forma basis, assuming completion of the conversion)			
Maximum	71.43x	88.65%	90.74%
Midpoint	62.50x	82.17%	84.25%
Minimum	50.00x	74.79%	76.86%
Valuation of peer group companies, all of which are fully converted (on an historical basis)			
Averages	24.54x	101.32%	108.41%
Medians	24.52x	103.70%	113.09%

(1) Price-to-earnings multiples calculated by RP Financial, LC. in the independent appraisal are based on an estimate of core, or recurring, earnings on a trailing twelve-month basis through June 30, 2012. These ratios are different than those presented in Pro Forma Data. **The independent valuation is not intended, and must not be construed, as a recommendation of any kind as to the advisability of purchasing our shares of common stock. RP Financial, LC. did not independently verify our consolidated financial statements and other information that we provided to them, nor did RP Financial, LC. independently value our assets or liabilities. The independent valuation considers Northfield Bank as a going concern and should not be considered as an indication of the liquidation value of Northfield Bank. Moreover, because the valuation is necessarily based upon estimates and projections of a number of matters, all of which may change from time to time, no assurance can be given that persons purchasing our common stock in the offering will thereafter be able to sell their shares at prices at or above the \$10.00 price per share.**

We will not decrease the minimum of the valuation range and the minimum of the offering range without a resolicitation of subscribers. The subscription price of \$10.00 per share will remain fixed. See Additional Limitations on Common Stock Purchases as to the method of distribution of additional shares to be issued in the event of an increase in the offering range of up to 41,975,000 shares.

If the update to the independent valuation at the conclusion of the offering results in an increase in the maximum of the valuation range to more than \$687.4 million and a corresponding increase in the offering range to more than 41,975,000 shares, or a decrease in the minimum of the valuation range to less than \$508.1 million and a corresponding decrease in the offering range to fewer than 31,025,000 shares, then we will promptly return with interest at 0.20% per annum all funds previously delivered to us to purchase shares of common stock in the subscription and community offerings and cancel deposit account withdrawal authorizations and, after consulting with the Federal Reserve Board, we may terminate the plan of conversion and reorganization. Alternatively, we may establish a new offering range, extend the offering period and commence a resolicitation of purchasers or take other actions as permitted by the Federal Reserve Board in order to complete the offering. In the event that we extend the offering and conduct a resolicitation, we will notify subscribers of the extension of time and of the rights of subscribers to place a new stock order for a specified period of time. Any single offering extension will not exceed 90 days; aggregate extensions may not conclude beyond January 3, 2015, which is two years after the special meeting of members to vote on the conversion.

An increase in the number of shares to be issued in the offering would decrease both a subscriber's ownership interest and Northfield-Delaware's pro forma earnings and stockholders' equity on a per share basis while increasing pro forma earnings and stockholders' equity on an aggregate basis. A decrease in the number of shares to be issued in the offering would increase both a subscriber's ownership interest and Northfield-Delaware's pro forma earnings and stockholders' equity on a per share basis, while decreasing pro forma earnings and stockholders' equity on an aggregate basis.

Copies of the independent valuation appraisal report of RP Financial, LC. and the detailed memorandum setting forth the method and assumptions used in the appraisal report are filed as exhibits to the documents specified under Where You Can Find Additional Information.

Table of Contents**Subscription Offering and Subscription Rights**

In accordance with the plan of conversion and reorganization, rights to subscribe for shares of common stock in the subscription offering have been granted in the following descending order of priority. The filling of all subscriptions that we receive will depend on the availability of common stock after satisfaction of all subscriptions of all persons having prior rights in the subscription offering and to the maximum, minimum and overall purchase and ownership limitations set forth in the plan of conversion and reorganization and as described below under **Additional Limitations on Common Stock Purchases**.

Priority 1: Eligible Account Holders. Each depositor of Northfield Bank, the former First State Bank or Flatbush Federal Savings & Loan Association with aggregate deposit account balances of \$50.00 or more (a **Qualifying Deposit**) at the close of business on March 31, 2011 (an **Eligible Account Holder**) will receive, without payment therefor, nontransferable subscription rights to purchase up to \$3.0 million (300,000 shares) of our common stock, subject to the overall purchase limitations. See **Additional Limitations on Common Stock Purchases**. If there are not sufficient shares available to satisfy all subscriptions, shares will first be allocated so as to permit each Eligible Account Holder to purchase a number of shares sufficient to make his or her total allocation equal to the lesser of 100 shares or the number of shares for which he or she subscribed. Thereafter, any remaining shares will be allocated to each Eligible Account Holder whose subscription remains unfilled in the proportion that the amount of his or her Qualifying Deposit bears to the total amount of Qualifying Deposits of all subscribing Eligible Account Holders whose subscriptions remain unfilled. If an amount so allocated exceeds the amount subscribed for by any one or more Eligible Account Holders, the excess shall be reallocated among those Eligible Account Holders whose subscriptions are not fully satisfied until all available shares have been allocated.

To ensure proper allocation of our shares of common stock, each Eligible Account Holder must list on his or her stock order form all deposit accounts in which he or she has an ownership interest on March 31, 2011. In the event of an oversubscription, failure to list an account could result in fewer shares being allocated than if all accounts had been disclosed. In the event of an oversubscription, the subscription rights of Eligible Account Holders who are also directors or executive officers of Northfield-Federal or their associates will be subordinated to the subscription rights of other Eligible Account Holders to the extent attributable to their increased deposits in the 12 months preceding March 31, 2011.

Priority 2: Tax-Qualified Plans. Our tax-qualified employee plans, including our employee stock ownership plan and 401(k) plan, will receive, without payment therefor, nontransferable subscription rights to purchase in the aggregate up to 10% of the shares of common stock sold in the offering, although our employee stock ownership plan intends to purchase 4% of the shares of common stock sold in the offering. We reserve the right to have our employee stock ownership plan purchase more than 4% of the stock sold in the offering to the extent necessary to complete the offering at the minimum of the offering range. If market conditions warrant, in the judgment of its trustees, the employee stock ownership plan may instead elect to purchase shares in the open market following the completion of the conversion, subject to the approval of the Federal Reserve Board. The amount of the subscription requests by the 401(k) plan will be determined by its participants, who will have the right to invest all or a portion of their 401(k) plan accounts in our common stock, subject to the maximum purchase limitations. However, to comply with the limitations applicable to our tax-qualified employee plans, our 401(k) plan may purchase no more than 6% of the shares of common stock sold in the offering.

Priority 3: Supplemental Eligible Account Holders. To the extent that there are sufficient shares of common stock remaining after satisfaction of subscriptions by Eligible Account Holders and our tax-qualified employee stock benefit plans, each depositor of Northfield Bank or the former Flatbush Federal Savings & Loan Association with a Qualifying Deposit at the close of business on September 30, 2012 who is not an Eligible Account Holder (**Supplemental Eligible Account Holder**) will receive, without payment therefor, nontransferable subscription rights to purchase up to \$3.0 million (300,000 shares) of common stock, subject to the overall purchase limitations. See **Additional Limitations on Common Stock Purchases**. If there are not sufficient shares available to satisfy all subscriptions, shares will be allocated so as to permit each Supplemental Eligible Account Holder to purchase a number of shares sufficient to make his or her total allocation equal to the lesser of 100 shares of common stock or the number of shares for which he or she subscribed. Thereafter, any remaining shares will be

Table of Contents

allocated to each Supplemental Eligible Account Holder whose subscription remains unfilled in the proportion that the amount of his or her Qualifying Deposit bears to the total amount of Qualifying Deposits of all Supplemental Eligible Account Holders whose subscriptions remain unfilled. If an amount so allocated exceeds the amount subscribed for by any one or more Supplemental Eligible Account Holders, the excess shall be reallocated among those Supplemental Eligible Account Holders whose subscriptions are not fully satisfied until all available shares have been allocated.

To ensure proper allocation of common stock, each Supplemental Eligible Account Holder must list on the stock order form all deposit accounts in which he or she has an ownership interest at September 30, 2012. In the event of oversubscription, failure to list an account could result in fewer shares being allocated than if all accounts had been disclosed.

Priority 4: Other Members. To the extent that there are shares of common stock remaining after satisfaction of subscriptions by Eligible Account Holders, our tax-qualified employee stock benefit plans, and Supplemental Eligible Account Holders, each depositor of Northfield Bank as of the close of business on November 6, 2012 who is not an Eligible Account Holder or Supplemental Eligible Account Holder (Other Members) will receive, without payment therefor, nontransferable subscription rights to purchase up to \$3.0 million (300,000 shares) of common stock, subject to the overall purchase limitations. See Additional Limitations on Common Stock Purchases. If there are not sufficient shares available to satisfy all subscriptions, shares will be allocated so as to permit each Other Member to purchase a number of shares sufficient to make his or her total allocation equal to the lesser of 100 shares of common stock or the number of shares for which he or she subscribed. Thereafter, any remaining shares will be allocated in the proportion that the amount of the subscription of each Other Member bears to the total amount of the subscriptions of all Other Members whose subscriptions remain unsatisfied.

To ensure proper allocation of common stock, each Other Member must list on the stock order form all deposit accounts in which he or she had an ownership interest at November 6, 2012. In the event of oversubscription, failure to list an account could result in fewer shares being allocated than if all accounts had been disclosed.

Expiration Date. The subscription offering will expire at 4:00 p.m., Eastern Time, on December 17, 2012, unless extended by us for up to 45 days or such additional periods with the approval of the Federal Reserve Board, if necessary. Subscription rights will expire whether or not each eligible depositor can be located. We may decide to extend the expiration date of the subscription offering for any reason, whether or not subscriptions have been received for shares at the minimum, midpoint or maximum of the offering range. Subscription rights which have not been exercised prior to the expiration date will become void.

We will not execute orders until at least the minimum number of shares of common stock have been sold in the offering. If at least 31,025,000 shares have not been sold in the offering by January 31, 2013 and the Federal Reserve Board has not consented to an extension, all funds delivered to us to purchase shares of common stock in the offering will be returned promptly, with interest at 0.20% per annum for funds received in the subscription and community offerings, and all deposit account withdrawal authorizations will be canceled. If an extension beyond January 31, 2013 is granted by the Federal Reserve Board, we will resolicit purchasers in the offering as described under Procedure for Purchasing Shares in Subscription and Community Offerings Expiration Date.

Community Offering

To the extent that shares of common stock remain available for purchase after satisfaction of all subscriptions of Eligible Account Holders, our tax-qualified employee stock benefit plans, Supplemental Eligible Account Holders and Other Members, we will offer shares pursuant to the plan of conversion and reorganization to members of the general public in a community offering. Shares will be offered in the community offering with the following preferences:

- (i) Natural persons (including trusts of natural persons) residing in the New Jersey Counties of Bergen, Essex, Hudson, Hunterdon, Middlesex, Monmouth, Morris, Ocean, Passaic, Somerset,

Table of Contents

Sussex and Union, the New York Counties of Bronx, Kings, Nassau, New York, Putnam, Queens, Richmond, Rockland, Suffolk and Westchester, and Pike County, Pennsylvania;

(ii) Northfield-Federal's public stockholders as of November 8, 2012 (including stockholders of the former Flatbush Federal Bancorp, Inc, who remain stockholders of Northfield-Federal as of November 8, 2012); and

(iii) Other members of the general public.

Subscribers in the community offering may purchase up to \$3.0 million (300,000 shares) of common stock, subject to the overall purchase limitations. See Additional Limitations on Common Stock Purchases. The minimum purchase is 25 shares. **The opportunity to purchase shares of common stock in the community offering category is subject to our right, in our sole discretion, to accept or reject any such orders in whole or in part either at the time of receipt of an order or as soon as practicable following the expiration date of the offering.**

If we do not have sufficient shares of common stock available to fill the orders of natural persons (including trusts of natural persons) residing in the New Jersey Counties of Bergen, Essex, Hudson, Hunterdon, Middlesex, Monmouth, Morris, Ocean, Passaic, Somerset, Sussex and Union, the New York Counties of Bronx, Kings, Nassau, New York, Putnam, Queens, Richmond, Rockland, Suffolk and Westchester, and Pike County, Pennsylvania, we will allocate the available shares among those persons in a manner that permits each of them, to the extent possible, to purchase the lesser of 100 shares or the number of shares subscribed for by such person. Thereafter, unallocated shares will be allocated among natural persons residing in those counties whose orders remain unsatisfied on an equal number of shares basis per order. If an oversubscription occurs due to the orders of public stockholders of Northfield-Federal or members of the general public, the allocation procedures described above will apply to the stock orders of such persons. In connection with the allocation process, orders received for shares of common stock in the community offering will first be filled up to a maximum of 2% of the shares sold in the offering, and thereafter any remaining shares will be allocated on an equal number of shares basis per order until all shares have been allocated.

The term residing or resident as used in this prospectus means any person who occupies a dwelling within the New Jersey Counties of Bergen, Essex, Hudson, Hunterdon, Middlesex, Monmouth, Morris, Ocean, Passaic, Somerset, Sussex and Union, the New York Counties of Bronx, Kings, Nassau, New York, Putnam, Queens, Richmond, Rockland, Suffolk and Westchester, or Pike County, Pennsylvania, has a present intent to remain within this community for a period of time, and manifests the genuineness of that intent by establishing an ongoing physical presence within the community, together with an indication that this presence within the community is something other than merely transitory in nature. We may utilize deposit or loan records or other evidence provided to us to decide whether a person is a resident. In all cases, however, the determination shall be in our sole discretion.

Expiration Date. The community offering will begin concurrently with the subscription offering, and is currently expected to terminate at the same time as the subscription offering, and must terminate no more than 45 days following the subscription offering, unless extended. Northfield-Delaware may decide to extend the community offering for any reason and is not required to give purchasers notice of any such extension unless such period extends beyond January 31, 2013, in which event we will resolicit purchasers.

Syndicated or Firm Commitment Underwritten Offering

If feasible, our board of directors may decide to offer for sale shares of common stock not subscribed for or purchased in the subscription and community offerings in a syndicated or firm commitment underwritten offering, subject to such terms, conditions and procedures as we may determine, in a manner that will achieve a wide distribution of our shares of common stock.

Table of Contents

If a syndicated or firm commitment underwritten offering is held, Sandler O'Neill & Partners, L.P., Jefferies & Company, Inc. and Stifel, Nicolaus & Company, Incorporated will serve as joint book-running managers. In the event that shares of common stock are sold in a syndicated or firm commitment underwritten offering, we will pay fees of 5% of the aggregate amount of common stock sold in the syndicated or firm commitment underwritten offering to the joint book-running managers and any other broker-dealers included in the syndicated or firm commitment underwritten offering. The shares of common stock will be sold at the same price per share (\$10.00 per share) that the shares are sold in the subscription offering and the community offering.

In the event of a syndicated offering, it is currently expected that investors would follow the same general procedures applicable to purchasing shares in the subscription and community offerings (the use of order forms and the submission of funds directly to Northfield-Delaware for the payment of the purchase price of the shares ordered) except that payment must be in immediately available funds (bank checks, money orders, deposit account withdrawals from accounts at Northfield Bank or wire transfers). See Procedure for Purchasing Shares in Subscription and Community Offerings. Sweep arrangements and delivery versus payment settlement will only be used in a syndicated offering to the extent consistent with Rules 10b-9 and 15c2-4 and then-existing guidance and interpretations thereof of the Securities and Exchange Commission regarding the conduct of min/max offerings.

In the event of a firm commitment underwritten offering, the proposed underwriting agreement will not be entered into with Sandler O'Neill & Partners, L.P., Jefferies & Company, Inc., Stifel, Nicolaus & Company, Incorporated and Northfield-Delaware, Northfield Bank, Northfield-Federal and Northfield Bancorp, MHC until immediately prior to the completion of the firm commitment underwritten offering. At that time, Sandler O'Neill & Partners, L.P., Jefferies & Company, Inc., Stifel, Nicolaus & Company, Incorporated and any other broker-dealers included in the firm commitment underwritten offering will represent that they have received sufficient indications of interest to complete the offering. Pursuant to the terms of the underwriting agreement, and subject to certain customary provisions and conditions to closing, upon execution of the underwriting agreement, Sandler O'Neill & Partners, L.P., Jefferies & Company, Inc., Stifel, Nicolaus & Company, Incorporated and any other underwriters will be obligated to purchase all the shares subject to the firm commitment underwritten offering.

If for any reason we cannot affect a syndicated or firm commitment underwritten offering of shares of common stock not purchased in the subscription and community offerings, or in the event that there are an insignificant number of shares remaining unsold after such offerings, we will try to make other arrangements for the sale of unsubscribed shares, if possible. The Federal Reserve Board and the Financial Industry Regulatory Authority must approve any such arrangements.

Additional Limitations on Common Stock Purchases

The plan of conversion and reorganization includes the following additional limitations on the number of shares of common stock that may be purchased in the offering:

- (i) No person may purchase fewer than 25 shares of common stock;
- (ii) Tax qualified employee benefit plans, including our employee stock ownership plan and 401(k) plan, may purchase in the aggregate up to 10% of the shares of common stock issued in the offering;
- (iii) Except for the employee stock ownership plan, as described above, no person or entity, together with associates or persons acting in concert with such person or entity, may purchase more than \$3.0 million (300,000 shares) of common stock in all categories of the offering combined;
- (iv) Current stockholders of Northfield-Federal are subject to an ownership limitation. As previously described, current stockholders of Northfield-Federal will receive shares of Northfield-Delaware common stock in exchange for their existing shares of Northfield-Federal common stock. The number of shares of common stock that a stockholder may purchase in the offering, together with associates or persons acting in concert with such stockholder, when combined with the shares that

Table of Contents

the stockholder and his or her associates will receive in exchange for existing Northfield-Federal common stock, may not exceed 5% of the shares of common stock of Northfield-Delaware to be issued and outstanding at the completion of the conversion; and

- (v) The maximum number of shares of common stock that may be purchased in all categories of the offering by executive officers and directors of Northfield Bank and their associates, in the aggregate, when combined with shares of common stock issued in exchange for existing shares, may not exceed 25% of the total shares issued in the conversion.

Depending upon market or financial conditions, our board of directors, with the approval of the Federal Reserve Board and without further approval of members of Northfield Bancorp, MHC, may decrease or increase the purchase and ownership limitations. If a purchase limitation is increased, subscribers in the subscription offering who ordered the maximum amount will be given the opportunity to increase their orders up to the then applicable limit. The effect of this type of resolicitation will be an increase in the number of shares of common stock owned by persons who choose to increase their orders. In the event that the maximum purchase limitation is increased to 5% of the shares sold in the offering, such limitation may be further increased to 9.99%, provided that orders for shares of common stock exceeding 5% of the shares sold in the offering shall not exceed in the aggregate 10% of the total shares sold in the offering.

The term associate of a person means:

- (i) any corporation or organization, other than Northfield-Federal, Northfield Bank or a majority-owned subsidiary of Northfield Bank, of which the person is a senior officer, partner or 10% beneficial stockholder;
- (ii) any trust or other estate in which the person has a substantial beneficial interest or serves as a trustee or in a similar fiduciary capacity; provided, however, it does not include any employee stock benefit plan in which the person has a substantial beneficial interest or serves as trustee or in a similar fiduciary capacity; and
- (iii) any blood or marriage relative of the person, who either has the same home as the person or who is a director or officer of Northfield-Federal or Northfield Bank.

The term acting in concert means:

- (i) knowing participation in a joint activity or interdependent conscious parallel action towards a common goal whether or not pursuant to an express agreement; or
- (ii) a combination or pooling of voting or other interests in the securities of an issuer for a common purpose pursuant to any contract, understanding, relationship, agreement or other arrangement, whether written or otherwise.

A person or company that acts in concert with another person or company (other party) will also be deemed to be acting in concert with any person or company who is also acting in concert with that other party, except that any tax-qualified employee stock benefit plan will not be deemed to be acting in concert with its trustee or a person who serves in a similar capacity solely for the purpose of determining whether common stock held by the trustee and common stock held by the employee stock benefit plan will be aggregated.

We have the sole discretion to determine whether prospective purchasers are associates or acting in concert. Persons having the same address, and persons exercising subscription rights through qualifying deposits registered at the same address will be deemed to be acting in concert unless we determine otherwise.

Our directors are not treated as associates of each other solely because of their membership on the board of directors. Common stock purchased in the offering will be freely transferable except for shares purchased by

Table of Contents

directors and certain officers of Northfield-Delaware or Northfield Bank and except as described below. Any purchases made by any associate of Northfield-Delaware or Northfield Bank for the explicit purpose of meeting the minimum number of shares of common stock required to be sold in order to complete the offering shall be made for investment purposes only and not with a view toward redistribution. In addition, under Financial Industry Regulatory Authority guidelines, members of the Financial Industry Regulatory Authority and their associates are subject to certain restrictions on transfer of securities purchased in accordance with subscription rights and to certain reporting requirements upon purchase of these securities. For a further discussion of limitations on purchases of our shares of common stock at the time of conversion and thereafter, see **Certain Restrictions on Purchase or Transfer of Our Shares after Conversion** and **Restrictions on Acquisition of Northfield-Delaware**.

Plan of Distribution; Selling Agent and Underwriter Compensation

Subscription and Community Offerings. To assist in the marketing of our shares of common stock in the subscription and community offerings, we have retained Sandler O Neill & Partners, L.P., which is a broker-dealer registered with the Financial Industry Regulatory Authority. Sandler O Neill & Partners, L.P. will assist us on a best efforts basis in the subscription and community offerings by:

- (i) consulting as to the financial and marketing implications of the plan of conversion and reorganization;
- (ii) reviewing with our board of directors the financial effect of the offering on us, based on the independent appraiser's appraisal of the shares of common stock;
- (iii) reviewing all offering documents, including this prospectus and any prospectus related to a syndicated or firm commitment underwritten offering, stock order forms and related offering materials;
- (iv) assisting in the design and implementation of a marketing strategy for the offering;
- (v) assisting management in scheduling and preparing for meetings with potential investors and other broker-dealers in connection with the offering; and
- (vi) providing such other general advice and assistance as may be reasonably necessary to promote the successful completion of the offerings.

For these services, Sandler O Neill & Partners, L.P. will receive a fee of: (i) 1.0% of the dollar amount of all shares of common stock sold in the subscription and community offerings up to the first 10% of shares sold in the offering; and (ii) 3.0% of the aggregate amount of common stock sold in the subscription and community offerings in excess of 10% of the shares sold in the offering. No fee will be payable to Sandler O Neill & Partners, L.P. with respect to shares purchased by officers, directors, employees or their immediate families and shares purchased by our tax-qualified and non-qualified employee benefit plans, and no sales fee will be payable with respect to the exchange shares.

Syndicated or Firm Commitment Underwritten Offering. In the event that shares of common stock are sold in a syndicated or firm commitment underwritten offering, we will pay fees of 5% of the aggregate amount of common stock sold in the syndicated or firm commitment underwritten offering to the joint book-running managers and any other broker-dealers included in the syndicated or firm commitment underwritten offering. If all shares of common stock were sold in the syndicated or firm commitment underwritten offering, the selling agent and underwriters commissions would be approximately \$14.4 million, \$17.0 million and \$19.6 million at the minimum, midpoint and maximum levels of the offering, respectively.

Expenses. If the offering is completed, Sandler O Neill & Partners, L.P., the other joint book-running managers and any other broker-dealers included in the syndicated or firm commitment underwritten offering will not

Table of Contents

be reimbursed separately for expenses. We have separately agreed to pay Sandler O'Neill & Partners, L.P. up to \$100,000 in fees and expenses for records management, as described below.

Records Management

We have also engaged Sandler O'Neill & Partners, L.P. as records management agent in connection with the conversion and the subscription and community offerings. In its role as records management agent, Sandler O'Neill & Partners, L.P., will assist us in the offering in the:

consolidation of deposit accounts and vote calculations;

design and preparation of proxy and stock order forms;

organization and supervision of the Stock Information Center;

proxy solicitation and other services for our special meeting of members; and

preparation and processing of other documents related to the stock offering.

Sandler O'Neill & Partners, L.P. will receive fees and expenses of up to \$100,000 for these services.

Indemnity

We will indemnify Sandler O'Neill & Partners, L.P., Jefferies & Company, Inc. and Stifel, Nicolaus & Company, Incorporated against liabilities and expenses, including legal fees, incurred in connection with certain claims or litigation arising out of or based upon untrue statements or omissions contained in the offering materials for the common stock, including liabilities under the Securities Act of 1933, as amended.

Solicitation of Offers by Officers and Directors

Some of our directors and executive officers may participate in the solicitation of offers to purchase common stock in the subscription and community offerings. These persons will be reimbursed for their reasonable out-of-pocket expenses incurred in connection with the solicitation. Other regular employees of Northfield Bank may assist in the offering, but only in ministerial capacities, and may provide clerical work in effecting a sales transaction. No offers or sales may be made by tellers or at the teller counters. Investment-related questions of prospective purchasers will be directed to executive officers or registered representatives of Sandler O'Neill & Partners, L.P. Our other employees have been instructed not to solicit offers to purchase shares of common stock or provide advice regarding the purchase of common stock. We will rely on Rule 3a4-1 under the Securities Exchange Act of 1934, as amended, and sales of common stock will be conducted within the requirements of Rule 3a4-1, so as to permit officers, directors and employees to participate in the sale of common stock. None of our officers, directors or employees will be compensated in connection with their participation in the offering.

Lock-up Agreements

We, and each of our directors and executive officers have agreed, subject to certain exceptions, that during the period beginning on the date of this prospectus and ending 90 days after the closing of the offering, without the prior written consent of Sandler O'Neill & Partners, L.P., directly or indirectly, we will not (i) offer, pledge, sell, contract to sell, sell any option or contract to purchase, purchase any option or contract to sell, grant any option, right or warrant for the sale of, or otherwise dispose of or transfer any shares of Northfield-Federal or Northfield-Delaware stock or any securities convertible into or exchangeable or exercisable for Northfield-Federal or Northfield-Delaware stock, whether owned on the date of this prospectus or acquired after the date of this prospectus or with respect to which we or any of our directors or executive officers has or after the date of this prospectus acquires the power of disposition, or file any registration statement under the Securities Act of 1933, as amended, with respect to any of the foregoing, or (ii) enter into any swap or any other agreement or any transaction

Table of Contents

that transfers, in whole or in part, directly or indirectly, the economic consequence of ownership of Northfield-Federal or Northfield-Delaware stock, whether any such swap or transaction is to be settled by delivery of stock or other securities, in cash or otherwise. In the event that either (1) during the period that begins on the date that is 15 calendar days plus three business days before the last day of the restricted period and ends on the last day of the restricted period, we issue an earnings release or material news or a material event relating to us occurs, or (2) prior to the expiration of the restricted period, we announce that we will release earnings results during the 16-day period beginning on the last day of the restricted period, the restrictions set forth above will continue to apply until the expiration of the date that is 15 calendar days plus three business days after the date on which the earnings release is issued or the material news or event related to us occurs.

Procedure for Purchasing Shares in Subscription and Community Offerings

Expiration Date. The subscription and community offerings will expire at 4:00 p.m., Eastern Time, on December 17, 2012, unless we extend one or both for up to 45 days, with the approval of the Federal Reserve Board, if required. This extension may be approved by us, in our sole discretion, without notice to purchasers in the offering. Any extension of the subscription and/or community offering beyond January 31, 2013 would require the Federal Reserve Board's approval. If the offering is so extended, or if the offering range is decreased below the minimum of the offering range or is increased above the maximum of the offering range, all subscribers' stock orders will be cancelled, their deposit account withdrawal authorizations will be cancelled, and funds submitted to us will be returned promptly, with interest at 0.20% per annum for funds received in the subscription and community offerings. We will then resolicit the subscribers, giving them an opportunity to place a new stock order for a period of time.

We reserve the right in our sole discretion to terminate the offering at any time and for any reason, in which case we will cancel any deposit account withdrawal authorizations and promptly return all funds submitted, with interest at 0.20% per annum from the date of receipt as described above.

Use of Order Forms in the Subscription and Community Offerings. In order to purchase shares of common stock in the subscription and community offerings, you must properly complete an original stock order form and remit full payment. We are not required to accept orders submitted on photocopied or facsimiled order forms. All order forms must be received (not postmarked) prior to 4:00 p.m., Eastern Time, on December 17, 2012. We are not required to accept order forms that are not received by that time, are not signed or are otherwise executed defectively or are received without full payment or without appropriate deposit account withdrawal instructions. We are not required to notify subscribers of incomplete or improperly executed order forms, and we have the right to waive or permit the correction of incomplete or improperly executed order forms. We do not represent, however, that we will do so and we have no affirmative duty to notify any prospective subscriber of any such defects. You may submit your order form and payment by mail using the stock order return envelope provided, or by overnight delivery to our Stock Information Center at the address noted below. You may hand-deliver stock order forms to the Stock Information Center, which will be located at Northfield Bank's Woodbridge operations center, 581 Main Street, Eighth Floor, Woodbridge, New Jersey. Hand-delivered stock order forms will only be accepted at this location. We will not accept stock order forms at our banking offices. Please do not mail stock order forms to Northfield Bank's offices.

Once tendered, an order form cannot be modified or revoked without our consent. We reserve the absolute right, in our sole discretion, to reject orders received in the community offering, in whole or in part, at the time of receipt or at any time prior to completion of the offering. If you are ordering shares in the subscription offering, you must represent that you are purchasing shares for your own account and that you have no agreement or understanding with any person for the sale or transfer of the shares. We have the right to reject any order submitted in the offering by a person who we believe is making false representations or who we otherwise believe, either alone or acting in concert with others, is violating, evading, circumventing, or intends to violate, evade or circumvent the terms and conditions of the plan of conversion and reorganization. Our interpretation of the terms and conditions of the plan of conversion and reorganization and of the acceptability of the order forms will be final.

Table of Contents

By signing the order form, you will be acknowledging that the common stock is not a deposit or savings account and is not federally insured or otherwise guaranteed by Northfield Bank or the federal government, and that you received a copy of this prospectus. However, signing the order form will not result in you waiving your rights under the Securities Act of 1933 or the Securities Exchange Act of 1934.

Payment for Shares. Payment for all shares of common stock will be required to accompany all completed order forms for the purchase to be valid. Payment for shares in the subscription and community offerings may be made by:

(i) personal check, bank check or money order, made payable to Northfield Bancorp, Inc.; or

(ii) authorization of withdrawal of available funds from the types of Northfield Bank deposit accounts described on the stock order form. Appropriate means for designating withdrawals from deposit accounts at Northfield Bank are provided on the order form. The funds designated must be available in the account(s) at the time the order form is received. A hold will be placed on these funds, making them unavailable to the depositor. Funds authorized for withdrawal will continue to earn interest within the account at the contractual rate until the offering is completed, at which time the designated withdrawal will be made. Interest penalties for early withdrawal applicable to certificate accounts will not apply to withdrawals authorized for the purchase of shares of common stock; however, if a withdrawal results in a certificate account with a balance less than the applicable minimum balance requirement, the certificate will be canceled at the time of withdrawal without penalty and the remaining balance will earn interest at the current passbook rate subsequent to the withdrawal. In the case of payments made by personal check, these funds must be available in the account(s). Checks and money orders received in the subscription and community offerings will be immediately cashed and placed in a segregated account at Northfield Bank and will earn interest at 0.20% per annum from the date payment is processed until the offering is completed or terminated.

You may not remit cash, wire transfers, Northfield Bank line of credit checks or any type of third-party checks (including those payable to you and endorsed over to Northfield-Delaware). You may not designate on your stock order form direct withdrawal from a Northfield Bank retirement account. See Using Individual Retirement Account Funds. Additionally, you may not designate a direct withdrawal from Northfield Bank accounts with check-writing privileges. Please provide a check instead. If you request that we directly withdraw the funds, we reserve the right to interpret that as your authorization to treat those funds as if we had received a check for the designated amount, and we will immediately withdraw the amount from your checking account. If permitted by the Federal Reserve Board, in the event we resolicit large purchasers, as described above in Additional Limitations on Common Stock Purchases, such purchasers who wish to increase their purchases will not be able to use personal checks to pay for the additional shares, but instead must pay for the additional shares using immediately available funds.

Once we receive your executed stock order form, it may not be modified, amended or rescinded without our consent, unless the offering is not completed by January 31, 2013. In such event, funds delivered to us to purchase shares of common stock in the offering will be returned promptly, with interest at 0.20% per annum, for funds received in the subscription and community offerings. Additionally, all deposit account withdrawal authorizations will be canceled. We may resolicit purchasers for a specified period of time.

Regulations prohibit Northfield Bank from lending funds or extending credit to any persons to purchase shares of common stock in the offering.

We shall have the right, in our sole discretion, to permit institutional investors to submit irrevocable orders together with the legally binding commitment for payment and to thereafter pay for the shares of common stock for which they subscribe in the community offering at any time prior to 48 hours before the completion of the conversion. This payment may be made by wire transfer.

Table of Contents

If our employee stock ownership plan purchases shares in the offering, it will not be required to pay for such shares until completion of the offering, provided that there is a loan commitment from an unrelated financial institution or Northfield-Delaware to lend to the employee stock ownership plan the necessary amount to fund the purchase. In addition, if our 401(k) plan purchases shares in the offering, it will not be required to pay for such shares until completion of the offering.

Using Individual Retirement Account Funds. If you are interested in using funds in your individual retirement account or other retirement account to purchase shares of common stock, you must do so through a self-directed retirement account. By regulation, Northfield Bank's retirement accounts are not self-directed, so they cannot be invested in our shares of common stock. Therefore, if you wish to use funds that are currently in a Northfield Bank retirement account, you may not designate on the order form that you wish funds to be withdrawn from the account for the purchase of common stock. The funds you wish to use for the purchase of common stock will instead have to be transferred to an independent trustee or custodian, such as a brokerage firm, offering self-directed retirement accounts. The purchase must be made through that account. If you do not have such an account, you will need to establish one before placing a stock order. An annual administrative fee may be payable to the independent trustee or custodian. There will be no early withdrawal or Internal Revenue Service interest penalties for these transfers. Individuals interested in using funds in an individual retirement account or any other retirement account, whether held at Northfield Bank *or elsewhere*, to purchase shares of common stock should contact our Stock Information Center for guidance as soon as possible, preferably at least two weeks prior to the December 17, 2012 offering deadline. Processing such transactions takes additional time, and whether such funds can be used may depend on limitations imposed by the institutions where such funds are currently held. We cannot guarantee that you will be able to use such funds.

Delivery of Stock Certificates. Certificates representing shares of common stock sold in the subscription offering and community offering will be mailed to the certificate registration address noted by purchasers on the stock order form. Stock certificates will be sent to purchasers by first-class mail as soon as practicable after the completion of the conversion and stock offering. We expect trading in the stock to begin on the day of completion of the conversion and stock offering or the next business day. **It is possible that until certificates for the common stock are delivered to purchasers, purchasers might not be able to sell the shares of common stock that they ordered, even though the shares of common stock will have begun trading.** Your ability to sell the shares of common stock before receiving your stock certificate will depend on arrangements you may make with a brokerage firm.

Other Restrictions. Notwithstanding any other provision of the plan of conversion and reorganization, no person is entitled to purchase any shares of common stock to the extent the purchase would be illegal under any federal or state law or regulation, including state blue sky regulations, or would violate regulations or policies of the Financial Industry Regulatory Authority, particularly those regarding free riding and withholding. We may ask for an acceptable legal opinion from any purchaser as to the legality of his or her purchase and we may refuse to honor any purchase order if an opinion is not timely furnished. In addition, we are not required to offer shares of common stock to any person who resides in a foreign country, or in a State of the United States with respect to which any of the following apply:

- (i) a small number of persons otherwise eligible to subscribe for shares under the plan of conversion and reorganization reside in such state;
- (ii) the issuance of subscription rights or the offer or sale of shares of common stock to such persons would require us, under the securities laws of such state, to register as a broker, dealer, salesman or agent or to register or otherwise qualify our securities for sale in such state; or
- (iii) such registration or qualification would be impracticable for reasons of cost or otherwise.

Table of Contents

Restrictions on Transfer of Subscription Rights and Shares

Regulations of the Federal Reserve Board prohibit any person with subscription rights, including the Eligible Account Holders, Supplemental Eligible Account Holders and Other Members, from transferring or entering into any agreement or understanding to transfer the legal or beneficial ownership of the subscription rights issued under the plan of conversion and reorganization or the shares of common stock to be issued upon their exercise. These rights may be exercised only by the person to whom they are granted and only for his or her account. When registering your stock purchase on the order form, you should not add the name(s) of persons who do not have subscription rights or who qualify only in a lower purchase priority than you do. Doing so may jeopardize your subscription rights. Each person exercising subscription rights will be required to certify that he or she is purchasing shares solely for his or her own account and that he or she has no agreement or understanding regarding the sale or transfer of such shares. The regulations also prohibit any person from offering or making an announcement of an offer or intent to make an offer to purchase subscription rights or shares of common stock to be issued upon their exercise prior to completion of the offering.

We will pursue any and all legal and equitable remedies in the event we become aware of the transfer of subscription rights, and we will not honor orders that we believe involve the transfer of subscription rights.

Stock Information Center

Our banking office personnel may not, by law, assist with investment-related questions about the offering. If you have any questions regarding the conversion or offering, please call our Stock Information Center. The toll-free phone number is (877) 651-9234. The Stock Information Center is open Monday through Friday between 10:00 a.m. and 4:00 p.m., Eastern Time. The Stock Information Center will be closed on weekends and bank holidays.

Liquidation Rights

Liquidation prior to the conversion. In the unlikely event that Northfield Bancorp, MHC is liquidated prior to the conversion, all claims of creditors of Northfield Bancorp, MHC would be paid first. Thereafter, if there were any assets of Northfield Bancorp, MHC remaining, these assets would first be distributed to certain depositors of Northfield Bank under such depositors' liquidation rights. The amount received by such depositors would be equal to their pro rata interest in the remaining value of Northfield Bancorp, MHC after claims of creditors, based on the relative size of their deposit accounts.

Liquidation following the conversion. The plan of conversion and reorganization provides for the establishment, upon the completion of the conversion, of a liquidation account by Northfield-Delaware for the benefit of Eligible Account Holders and Supplemental Eligible Account Holders in an amount equal to (i) Northfield Bancorp, MHC's ownership interest in Northfield-Federal's total stockholders' equity as of the date of the latest statement of financial condition used in this prospectus plus (ii) the value of the net assets of Northfield Bancorp, MHC as of the date of the latest statement of financial condition of Northfield Bancorp, MHC prior to the consummation of the conversion (excluding its ownership of Northfield-Federal). The plan of conversion also provides for the establishment of a parallel liquidation account in Northfield Bank to support the Northfield-Delaware liquidation account in the event Northfield-Delaware does not have sufficient assets to fund its obligations under the Northfield-Delaware liquidation account.

In the unlikely event that Northfield Bank were to liquidate after the conversion, all claims of creditors, including those of depositors, would be paid first. However, except with respect to the liquidation account to be established in Northfield-Federal, a depositor's claim would be solely for the principal amount of his or her deposit accounts plus accrued interest. Depositors generally would not have an interest in the value of the assets of Northfield Bank or Northfield-Delaware above that amount.

The liquidation account established by Northfield-Delaware is designed to provide qualifying depositors a liquidation interest (exchanged for the liquidation interests such persons had in Northfield Bancorp, MHC) after the

Table of Contents

conversion in the event of a complete liquidation of Northfield-Delaware and Northfield Bank or a liquidation solely of Northfield Bank. Specifically, in the unlikely event that either (i) Northfield Bank or (ii) Northfield-Delaware and Northfield Bank were to liquidate after the conversion, all claims of creditors, including those of depositors, would be paid first, followed by a distribution to depositors as of March 31, 2011 and September 30, 2012 of their interests in the liquidation account maintained by Northfield-Delaware. Also, in a complete liquidation of both entities, or of Northfield Bank only, when Northfield-Delaware has insufficient assets (other than the stock of Northfield Bank) to fund the liquidation account distribution due to Eligible Account Holders and Supplemental Eligible Account Holders and Northfield Bank has positive net worth, Northfield Bank shall immediately make a distribution to fund Northfield-Delaware's remaining obligations under the liquidation account. In no event will any Eligible Account Holder or Supplemental Eligible Account Holder be entitled to a distribution that exceeds such holder's interest in the liquidation account maintained by Northfield-Delaware as adjusted from time to time pursuant to the plan of conversion and federal regulations. If Northfield-Delaware is completely liquidated or sold apart from a sale or liquidation of Northfield Bank, then the Northfield-Delaware liquidation account will cease to exist and Eligible Account Holders and Supplemental Eligible Account Holders will receive an equivalent interest in the Northfield Bank liquidation account, subject to the same rights and terms as the Northfield-Delaware liquidation account.

Pursuant to the plan of conversion and reorganization, after two years from the date of conversion and upon the written request of the Board of Governors of the Federal Reserve System, Northfield-Delaware will eliminate or transfer the liquidation account and the depositors' interests in such account to Northfield Bank and the liquidation account shall thereupon be subsumed into the liquidation account of Northfield Bank.

Under the rules and regulations of the Federal Reserve Board, a post-conversion merger, consolidation, or similar combination or transaction with another depository institution or depository institution holding company in which Northfield-Delaware or Northfield Bank is not the surviving institution, would not be considered a liquidation. In such a transaction, the liquidation account would be assumed by the surviving institution or company.

Each Eligible Account Holder and Supplemental Eligible Account Holder would have an initial pro-rata interest in the liquidation account for each deposit account, including savings accounts, transaction accounts such as negotiable order of withdrawal accounts, money market deposit accounts, and certificates of deposit, with a balance of \$50.00 or more held in Northfield Bank, First State Bank and Flatbush Federal Savings & Loan Association on March 31, 2011 or September 30, 2012 equal to the proportion that the balance of each Eligible Account Holder's and Supplemental Eligible Account Holder's deposit account on March 31, 2011 and September 30, 2012, respectively, bears to the balance of all deposit accounts of Eligible Account Holders and Supplemental Eligible Account Holders in Northfield Bank on such date.

If, however, on any December 31 annual closing date commencing after the effective date of the conversion, the amount in any such deposit account is less than the amount in the deposit account on March 31, 2011 or September 30, 2012, or any other annual closing date, then the interest in the liquidation account relating to such deposit account would be reduced from time to time by the proportion of any such reduction, and such interest will cease to exist if such deposit account is closed. In addition, no interest in the liquidation account would ever be increased despite any subsequent increase in the related deposit account. Payment pursuant to liquidation rights of Eligible Account Holders and Supplemental Eligible Account Holders would be separate and apart from the payment of any insured deposit accounts to such depositor. Any assets remaining after the above liquidation rights of Eligible Account Holders and Supplemental Eligible Account Holders are satisfied would be available for distribution to stockholders.

Material Income Tax Consequences

Completion of the conversion is subject to the prior receipt of an opinion of counsel or tax advisor with respect to federal and state income tax consequences of conversion to Northfield Bancorp, MHC, Northfield-Federal, Northfield Bank, Eligible Account Holders, Supplemental Eligible Account Holders and Other Members of Northfield Bancorp, MHC. Unlike private letter rulings, opinions of counsel or tax advisors are not binding on the

Table of Contents

Internal Revenue Service or any state taxing authority, and such authorities may disagree with such opinions. In the event of such disagreement, there can be no assurance that Northfield-Delaware or Northfield Bank would prevail in a judicial proceeding.

On November 2, 2012, Northfield Bancorp, MHC, Northfield-Federal and Northfield Bank completed their acquisition of Flatbush Federal Bancorp, MHC, Flatbush Federal Bancorp, Inc. and Flatbush Federal Savings & Loan Association. For purposes of discussing the effect of this prior transaction on the tax consequences of the conversion, Flatbush Federal Bancorp, MHC, Flatbush Federal Bancorp, Inc. and Flatbush Federal Savings & Loan Association will be referred to, collectively, as the Flatbush entities and Northfield Bancorp, MHC, Northfield-Federal and Northfield Bank will be referred to, collectively, as the Northfield entities.

When two apparently separate transactions with independent tax consequences occur in short proximity to one another, the Internal Revenue Service or a court could apply the step transaction doctrine to step together the two separate transactions and consider them part of one integrated transaction for tax purposes. If implicated, it can change the character of an overall transaction. It is possible that the Internal Revenue Service could conclude that the judicial step transaction doctrine would apply to cause the acquisition of Flatbush Federal Bancorp, MHC by Northfield Bancorp, MHC and the conversion of Northfield Bancorp, MHC to be considered a part of one integrated plan for tax purposes. If the Internal Revenue Service were to take this position, the Internal Revenue Service may not respect the independent characterization, for tax purposes, of the two transactions and may ascribe a potentially different tax effect to the combined transaction. We believe that the acquisition of Flatbush Federal Bancorp, MHC by Northfield Bancorp, MHC and the merger of Northfield Bancorp, MHC with Northfield-Federal should not be stepped together and considered integrated parts of a single transaction for tax purposes because each of the acquisition of the Flatbush entities and the conversion and stock offering have independent economic significance, neither is dependent on or conditioned on the other in order to be consummated, and the conversion of Northfield Bancorp, MHC was approved by the board of trustees of Northfield Bancorp, MHC almost three months following the execution of the Merger Agreement among the Flatbush entities and the Northfield entities.

If the Internal Revenue Service took the position that the merger of Flatbush Federal Bancorp, MHC with and into Northfield Bancorp, MHC should be considered an integrated part of a single transaction with the conversion of Northfield Bancorp, MHC, we believe that it is more likely than not to conclude that the substance of the transaction is the merger of Flatbush Federal Bancorp, MHC and Northfield Bancorp, MHC with and into Northfield-Delaware in a tax-free transaction under Section 368(a)(1)(A) of the Internal Revenue Code.

Northfield Bancorp, MHC, Northfield-Federal, Northfield Bank and Northfield-Delaware have received an opinion of counsel, Luse Gorman Pomerenk & Schick, P.C., regarding all of the material federal income tax consequences of the conversion, which includes the following:

1. The merger of Northfield Bancorp, MHC with and into Northfield-Federal will qualify as a tax-free reorganization within the meaning of Section 368(a)(1)(A) of the Internal Revenue Code. It is more likely than not that this will be the case even if the merger of Flatbush Federal Bancorp, MHC with Northfield Bancorp, MHC were stepped together with the conversion and considered part of one integrated transaction.
2. The constructive exchange of Eligible Account Holders and Supplemental Eligible Account Holders liquidation interests in Northfield Bancorp, MHC for liquidation interests in Northfield-Federal will satisfy the continuity of interest requirement of Section 1.368-1(b) of the Federal Income Tax Regulations.
3. None of Northfield Bancorp, MHC, Northfield-Federal, Eligible Account Holders nor Supplemental Eligible Account Holders, will recognize any gain or loss on the transfer of the assets of Northfield Bancorp, MHC to Northfield-Federal in constructive exchange for liquidation interests in Northfield-Federal.

Table of Contents

4. The basis of the assets of Northfield Bancorp, MHC and the holding period of such assets to be received by Northfield-Federal will be the same as the basis and holding period of such assets in Northfield Bancorp, MHC immediately before the exchange.
5. The merger of Northfield-Federal with and into Northfield-Delaware will constitute a mere change in identity, form or place of organization within the meaning of Section 368(a)(1)(F) of the Internal Revenue Code and, therefore, will qualify as a tax-free reorganization within the meaning of Section 368(a)(1)(F) of the Internal Revenue Code. Neither Northfield-Federal nor Northfield-Delaware will recognize gain or loss as a result of such merger.
6. The basis of the assets of Northfield-Federal and the holding period of such assets to be received by Northfield-Delaware will be the same as the basis and holding period of such assets in Northfield-Federal immediately before the exchange.
7. Current stockholders of Northfield-Federal will not recognize any gain or loss upon their exchange of Northfield-Federal common stock for Northfield-Delaware common stock.
8. Eligible Account Holders and Supplemental Eligible Account Holders will not recognize any gain or loss upon the constructive exchange of their liquidation interests in Northfield-Federal for interests in the liquidation account in Northfield-Delaware.
9. The exchange by the Eligible Account Holders and Supplemental Eligible Account Holders of the liquidation interests that they constructively received in Northfield-Federal for interests in the liquidation account established in Northfield-Delaware will satisfy the continuity of interest requirement of Section 1.368-1(b) of the Federal Income Tax Regulations.
10. Each stockholder's aggregate basis in shares of Northfield-Delaware common stock (including fractional share interests) received in the exchange will be the same as the aggregate basis of Northfield-Federal common stock surrendered in the exchange.
11. Each stockholder's holding period in his or her Northfield-Delaware common stock received in the exchange will include the period during which the Northfield-Federal common stock surrendered was held, provided that the Northfield-Federal common stock surrendered is a capital asset in the hands of the stockholder on the date of the exchange.
12. Cash received by any current stockholder of Northfield-Federal in lieu of a fractional share interest in shares of Northfield-Delaware common stock will be treated as having been received as a distribution in full payment in exchange for a fractional share interest of Northfield-Delaware common stock, which such stockholder would otherwise be entitled to receive. Accordingly, a stockholder will recognize gain or loss equal to the difference between the cash received and the basis of the fractional share. If the common stock is held by the stockholder as a capital asset, the gain or loss will be capital gain or loss.
13. It is more likely than not that the fair market value of the nontransferable subscription rights to purchase Northfield-Delaware common stock is zero. Accordingly, no gain or loss will be recognized by Eligible Account Holders, Supplemental Eligible Account Holders or Other Members upon distribution to them of nontransferable subscription rights to purchase shares of Northfield-Delaware common stock. Eligible Account Holders, Supplemental Eligible Account Holders and Other Members will not realize any taxable income as the result of the exercise by them of the nontransferable subscriptions rights.
14. It is more likely than not that the fair market value of the benefit provided by the liquidation account of Northfield Bank supporting the payment of the Northfield-Delaware liquidation

Table of Contents

account in the event Northfield-Delaware lacks sufficient net assets is zero. Accordingly, it is more likely than not that no gain or loss will be recognized by Eligible Account Holders and Supplemental Eligible Account Holders upon the constructive distribution to them of such rights in the Northfield Bank liquidation account as of the effective date of the merger of Northfield-Federal with and into Northfield-Delaware.

15. It is more likely than not that the basis of the shares of Northfield-Delaware common stock purchased in the offering by the exercise of nontransferable subscription rights will be the purchase price. The holding period of the Northfield-Delaware common stock purchased pursuant to the exercise of nontransferable subscription rights will commence on the date the right to acquire such stock was exercised.
16. No gain or loss will be recognized by Northfield-Delaware on the receipt of money in exchange for Northfield-Delaware common stock sold in the offering.

We believe that the tax opinions summarized above address all material federal income tax consequences that are generally applicable to Northfield Bancorp, MHC, Northfield-Federal, Northfield Bank, Northfield-Delaware and persons receiving subscription rights and stockholders of Northfield-Federal. With respect to items 13 and 15 above, Luse Gorman Pomerenk & Schick, P.C. noted that the subscription rights will be granted at no cost to the recipients, are legally non-transferable and of short duration, and will provide the recipient with the right only to purchase shares of common stock at the same price to be paid by members of the general public in any community offering. The firm further noted that RP Financial, LC. has issued a letter that the subscription rights have no ascertainable fair market value. The firm also noted that the Internal Revenue Service has not in the past concluded that subscription rights have value. Based on the foregoing, Luse Gorman Pomerenk & Schick, P.C. believes that it is more likely than not that the nontransferable subscription rights to purchase shares of common stock have no value. However, the issue of whether or not the nontransferable subscription rights have value is based on all the facts and circumstances. If the subscription rights granted to Eligible Account Holders, Supplemental Eligible Account Holders and Other Members are deemed to have an ascertainable value, receipt of these rights could result in taxable gain to those Eligible Account Holders, Supplemental Eligible Account Holders and Other Members who exercise the subscription rights in an amount equal to the ascertainable value, and we could recognize gain on a distribution. Eligible Account Holders, Supplemental Eligible Account Holders and Other Members are encouraged to consult with their own tax advisors as to the tax consequences in the event that subscription rights are deemed to have an ascertainable value.

The opinion as to item 14 above is based on the position that: (i) no holder of an interest in a liquidation account has ever received any payment attributable to a liquidation account; (ii) the interests in the liquidation accounts are not transferable; (iii) the amounts due under the liquidation account with respect to each Eligible Account Holder and Supplemental Eligible Account Holder will be reduced as their deposits in Northfield Bank are reduced; and (iv) the Northfield Bank liquidation account payment obligation arises only if Northfield-Delaware lacks sufficient assets to fund the liquidation account.

In addition, we have received a letter from RP Financial, LC. stating its belief that the benefit provided by the Northfield Bank liquidation account supporting the payment of the liquidation account in the event Northfield-Delaware lacks sufficient net assets does not have any economic value at the time of the conversion. Based on the foregoing, Luse Gorman Pomerenk & Schick, P.C. believes it is more likely than not that such rights in the Northfield Bank liquidation account have no value. If such rights are subsequently found to have an economic value, income may be recognized by each Eligible Account Holder or Supplemental Eligible Account Holder in the amount of such fair market value as of the date of the conversion.

The opinion of Luse Gorman Pomerenk & Schick, P.C., unlike a letter ruling issued by the Internal Revenue Service, is not binding on the Internal Revenue Service and the conclusions expressed therein may be challenged at a future date. The Internal Revenue Service has issued favorable rulings for transactions substantially similar to the proposed reorganization and stock offering, but any such ruling may not be cited as precedent by any taxpayer other than the taxpayer to whom the ruling is addressed. We do not plan to apply for a letter ruling concerning the transactions described herein.

Table of Contents

We have also received an opinion from Crowe Horwath LLP that the New Jersey and New York state income tax consequences are consistent with the federal income tax consequences.

The federal and state tax opinions have been filed with the Securities and Exchange Commission as an exhibit to Northfield-Delaware's registration statement.

Certain Restrictions on Purchase or Transfer of Our Shares after Conversion

All shares of common stock purchased in the offering by a director or certain officers of Northfield Bank generally may not be sold for a period of one year following the closing of the conversion, except in the event of the death of the director or executive officer. Each certificate for restricted shares will bear a legend giving notice of this restriction on transfer, and instructions will be issued to the effect that any transfer within this time period of any certificate or record ownership of the shares other than as provided above is a violation of the restriction. Any shares of common stock issued at a later date as a stock dividend, stock split, or otherwise, with respect to the restricted stock will be similarly restricted. The directors and executive officers of Northfield-Delaware also will be restricted by the insider trading rules under the Securities Exchange Act of 1934.

Purchases of shares of our common stock by any of our directors, certain officers and their associates, during the three-year period following the closing of the conversion may be made only through a broker or dealer registered with the Securities and Exchange Commission, except with the prior written approval of the Federal Reserve Board. This restriction does not apply, however, to negotiated transactions involving more than 1% of our outstanding common stock or to purchases of our common stock by our stock option plan or any of our tax-qualified employee stock benefit plans or non-tax-qualified employee stock benefit plans, including any restricted stock plans.

Federal regulations prohibit Northfield-Delaware from repurchasing its shares of common stock during the first year following conversion unless compelling business reasons exist for such repurchases, or to fund management recognition plans that have been ratified by stockholders (with Federal Reserve Board approval) or tax-qualified employee stock benefit plans. In addition, the repurchase of shares of common stock is subject to Federal Reserve Board policy related to repurchases of shares by financial institution holding companies.

COMPARISON OF STOCKHOLDERS' RIGHTS FOR EXISTING STOCKHOLDERS OF NORTHFIELD BANCORP, INC.

General. As a result of the conversion, existing stockholders of Northfield-Federal will become stockholders of Northfield-Delaware. There are differences in the rights of stockholders of Northfield-Federal and stockholders of Northfield-Delaware caused by differences between federal and Delaware law and regulations and differences in Northfield-Federal's federal stock charter and bylaws and Northfield-Delaware's Delaware certificate of incorporation and bylaws.

This discussion is not intended to be a complete statement of the differences affecting the rights of stockholders, but rather summarizes the material differences and similarities affecting the rights of stockholders. See [Where You Can Find Additional Information](#) for procedures for obtaining a copy of Northfield-Delaware's certificate of incorporation and bylaws.

Authorized Capital Stock. The authorized capital stock of Northfield-Federal consists of 90,000,000 shares of common stock, \$0.01 par value per share, and 10,000,000 shares of preferred stock, par value \$0.01 per share.

The authorized capital stock of Northfield-Delaware consists of 150,000,000 shares of common stock, \$0.01 par value per share, and 25,000,000 shares of preferred stock, \$0.01 par value per share.

Northfield-Federal's charter and Northfield-Delaware's certificate of incorporation both authorize the board of directors to establish one or more series of preferred stock and, for any series of preferred stock, to determine the terms and rights of the series, including voting rights, dividend rights, conversion and redemption.

Table of Contents

rights and liquidation preferences. As a result of the ability to fix voting rights for a series of preferred stock, our board of directors has the power, to the extent consistent with its fiduciary duty, to issue a series of preferred stock to persons friendly to management in order to attempt to block a hostile tender offer, merger or other transaction by which a third party seeks control. We currently have no plans for the issuance of additional shares for such purposes.

Issuance of Capital Stock. Pursuant to applicable laws and regulations, Northfield Bancorp, MHC is required to own not less than a majority of the outstanding shares of Northfield-Federal common stock. Northfield Bancorp, MHC will no longer exist following consummation of the conversion.

Northfield-Delaware's certificate of incorporation does not contain restrictions on the issuance of shares of capital stock to directors, officers or controlling persons, whereas Northfield-Federal's stock charter restricts such issuances to general public offerings, or to directors for qualifying shares, unless the share issuance or the plan under which they would generally be issued has been approved by a majority of the total votes eligible to be cast at a legal stockholders' meeting. However, stock-based compensation plans, such as stock option plans and restricted stock plans, would have to be submitted for approval by Northfield-Delaware stockholders due to requirements of the Nasdaq Stock Market and in order to qualify stock options for favorable federal income tax treatment.

Voting Rights. Neither Northfield-Federal's stock charter or bylaws nor Northfield-Delaware's certificate of incorporation or bylaws provide for cumulative voting for the election of directors. For additional information regarding voting rights, see [Limitations on Voting Rights of Greater-than-10% Stockholders](#) below.

Payment of Dividends. Northfield-Federal has no regulatory restriction on its ability to pay dividends. Delaware law generally provides that Northfield-Delaware is limited to paying dividends in an amount equal to its capital surplus over payments that would be owed upon dissolution to stockholders whose preferential rights upon dissolution are superior to those receiving the dividend, and to an amount that would not make it insolvent.

Board of Directors. Northfield-Federal's bylaws and Northfield-Delaware's certificate of incorporation and bylaws require the board of directors to be divided into three classes and that the members of each class shall be elected for a term of three years and until their successors are elected and qualified, with one class being elected annually.

Under Northfield-Federal's bylaws, any vacancies on the board of directors of Northfield-Federal may be filled by the affirmative vote of two-thirds of the remaining directors. Persons elected by the board of directors of Northfield-Federal to fill vacancies may only serve until the next annual meeting of stockholders. Under Northfield-Delaware's bylaws, any vacancy occurring on the board of directors, including any vacancy created by reason of an increase in the number of directors, may be filled only by a majority of the remaining directors, and any director so chosen shall hold office for the remainder of the term to which the director has been elected and until his or her successor is elected and qualified.

Limitations on Liability. The charter and bylaws of Northfield-Federal do not limit the personal liability of directors.

Northfield-Delaware's certificate of incorporation provides that directors will not be personally liable for monetary damages to Northfield-Delaware for certain actions as directors, except for (i) receipt of an improper personal benefit from their positions as directors, (ii) actions or omissions that are determined to have involved active and deliberate dishonesty, or (iii) to the extent allowed by Delaware law. These provisions might, in certain instances, discourage or deter stockholders or management from bringing a lawsuit against directors for a breach of their duties even though such an action, if successful, might benefit Northfield-Delaware.

Indemnification of Directors, Officers, Employees and Agents. As generally allowed under current Federal Reserve Board regulations, Northfield-Federal will indemnify its directors, officers and employees for any reasonable costs incurred in connection with any litigation involving such person's activities as a director, officer or employee if such person obtains a final judgment on the merits in his or her favor. In addition, indemnification is

Table of Contents

permitted in the case of a settlement, a final judgment against such person, or final judgment other than on the merits, if a majority of disinterested directors determines that such person was acting in good faith within the scope of his or her employment as he or she could reasonably have perceived it under the circumstances and for a purpose he or she could reasonably have believed under the circumstances was in the best interests of Northfield-Federal or its stockholders. Northfield-Federal also is permitted to pay ongoing expenses incurred by a director, officer or employee if a majority of disinterested directors concludes that such person may ultimately be entitled to indemnification. Before making any indemnification payment, Northfield-Federal is required to notify the Federal Reserve Board of its intention, and such payment cannot be made if the Federal Reserve Board objects to such payment.

The certificate of incorporation of Northfield-Delaware provides that it shall indemnify its current and former directors and officers to the fullest extent required or permitted by Delaware law, including the advancement of expenses. Delaware law allows Northfield-Delaware to indemnify any person for expenses, liabilities, settlements, judgments and fines in suits in which such person has been made a party by reason of the fact that he or she is or was a director, officer or employee of Northfield-Delaware. No such indemnification may be given if the acts or omissions of the person are adjudged to be in bad faith and material to the matter giving rise to the proceeding, if such person is liable to the corporation for an unlawful distribution, or if such person personally received a benefit to which he or she was not entitled. The right to indemnification includes the right to be paid the expenses incurred in advance of final disposition of a proceeding.

Special Meetings of Stockholders. Northfield-Federal's bylaws provide that special meetings of stockholders may be called by the Chairman, the Chief Executive Officer, the President, two-thirds of the members of the board of directors or the holders of not less than 50% of the outstanding capital stock of Northfield-Federal entitled to vote at the meeting. Northfield-Delaware's bylaws provide that special meetings of the stockholders may be called only by a majority vote of the total authorized directors.

Stockholder Nominations and Proposals. Northfield-Federal's bylaws generally provide that stockholders may submit nominations for election of directors at an annual meeting of stockholders and may propose any new business to be taken up at such a meeting by filing the proposal in writing with Northfield-Federal at least 30 days before the date of any such meeting.

Northfield-Delaware's bylaws generally provide that any stockholder desiring to make a nomination for the election of directors or a proposal for new business at a meeting of stockholders must submit written notice to Northfield-Delaware at least 90 days prior to the anniversary date of the proxy statement for the prior year's annual meeting. However, if the date of the annual meeting is advanced more than 30 days prior to or delayed by more than 30 days after the anniversary of the preceding year's annual meeting, notice by the stockholder to be timely must be so delivered not later than the close of business on the 10th day following the day on which public announcement of the date of such meeting is first made.

Management believes that it is in the best interests of Northfield-Delaware and its stockholders to provide sufficient time to enable management to disclose to stockholders information about a dissident slate of nominations for directors. This advance notice requirement may also give management time to solicit its own proxies in an attempt to defeat any dissident slate of nominations, should management determine that doing so is in the best interests of stockholders generally. Similarly, adequate advance notice of stockholder proposals will give management time to study such proposals and to determine whether to recommend to the stockholders that such proposals be adopted. In certain instances, such provisions could make it more difficult to oppose management's nominees or proposals, even if stockholders believe such nominees or proposals are in their best interests.

Limitations on Voting Rights of Greater-than-10% Stockholders. Northfield-Delaware's certificate of incorporation provides that no beneficial owner, directly or indirectly, of more than 10% of the outstanding shares of common stock will be permitted to vote any shares in excess of such 10% limit. Northfield-Federal's charter does not provide such a limit on voting common stock.

Table of Contents

In addition, federal regulations provide that for a period of three years following the date of the completion of the offering, no person, acting singly or together with associates in a group of persons acting in concert, may directly or indirectly offer to acquire or acquire the beneficial ownership of more than 10% of a class of Northfield-Delaware's equity securities without the prior written approval of the Federal Reserve Board. Where any person acquires beneficial ownership of more than 10% of a class of Northfield-Delaware's equity securities without the prior written approval of the Federal Reserve Board, the securities beneficially owned by such person in excess of 10% may not be voted by any person or counted as voting shares in connection with any matter submitted to the stockholders for a vote, and will not be counted as outstanding for purposes of determining the affirmative vote necessary to approve any matter submitted to the stockholders for a vote.

Mergers, Consolidations and Sales of Assets. Under Delaware law, business combinations between Northfield-Delaware and an interested stockholder or an affiliate of an interested stockholder are prohibited for three years after the most recent date on which the interested stockholder becomes an interested stockholder. These business combinations include a merger, consolidation or, in circumstances specified in the statute, certain transfers of assets, stock issuances and other transactions involving interested stockholders and their affiliates. Delaware law defines an interested stockholder as: (i) any person who beneficially owns 15% or more of the voting power of Northfield-Delaware's voting stock; or (ii) an affiliate or associate of Northfield-Delaware who, within the three-year period prior to the date in question, was the beneficial owner of 15% or more of the voting power of the then-outstanding voting stock of Northfield-Delaware.

Before the end of the three-year period, any business combination between Northfield-Delaware and an interested stockholder generally must be recommended by the board of directors of Northfield-Delaware and approved by the affirmative vote of at least two-thirds of the votes entitled to be cast by holders of voting stock of Northfield-Delaware other than shares held by the interested stockholder with whom or with whose affiliate the business combination is to be effected or held by an affiliate or associate of the interested stockholder.

Current federal regulations do not provide a vote standard for mergers, consolidations or sales of assets by federal mid-tier stock holding companies.

Evaluation of Offers. The certificate of incorporation of Northfield-Delaware provides that its board of directors, when evaluating an offer to: (i) make a tender or exchange offer for any equity security of Northfield-Delaware; (ii) merge or consolidate Northfield-Delaware with another corporation or entity or (iii) purchase or otherwise acquire all or substantially all of the properties and assets of Northfield-Delaware, may, in connection with the exercise of its judgment in determining what is in the best interest of Northfield-Delaware and its stockholders, give due consideration to all relevant factors, including, without limitation, the social and economic effect of acceptance of such offer on Northfield-Delaware's present and future customers and employees and those of its subsidiaries; on the communities in which Northfield-Delaware and its subsidiaries operate or are located; on the ability of Northfield-Delaware to fulfill its corporate objectives as Northfield Bank's holding company and on the ability of Northfield Bank to fulfill the objectives of a stock savings bank under applicable statutes and regulations.

Northfield-Federal's charter and bylaws do not contain a similar provision.

Dissenters' Rights of Appraisal. Under Delaware law, stockholders of Northfield-Delaware will not have dissenters' appraisal rights in connection with a plan of merger or consolidation to which Northfield-Delaware is a party as long as the common stock of Northfield-Delaware trades on the Nasdaq Global Market. Current federal regulations do not provide for dissenters' appraisal rights in business combinations involving federal mid-tier stock holding companies.

Amendment of Governing Instruments. No amendment of Northfield-Federal's stock charter may be made unless it is first proposed by the board of directors of Northfield-Federal, then preliminarily approved by the Federal Reserve Board, and thereafter approved by the holders of a majority of the total votes eligible to be cast at a legal meeting.

Table of Contents

Northfield-Delaware's certificate of incorporation may be amended, upon the submission of an amendment by the board of directors to a vote of the stockholders, by the affirmative vote of at least two-thirds of the outstanding shares of common stock, or by the affirmative vote of a majority of the outstanding shares of common stock if at least two-thirds of the members of the whole board of directors approves such amendment; provided, however, that approval by at least 85% of the outstanding voting stock is generally required to amend the following provisions:

- (i) The limitation on voting rights of persons who directly or indirectly beneficially own more than 10% of the outstanding shares of common stock;
- (ii) The division of the board of directors into three staggered classes;
- (iii) The ability of the board of directors to fill vacancies on the board;
- (iv) The requirement that at least a majority of the votes eligible to be cast by stockholders must vote to remove directors, and can only remove directors for cause;
- (v) The ability of the board of directors to amend and repeal the bylaws;
- (vi) The number of stockholders constituting a quorum or required for stockholder consent; and
- (vii) The provision of the certificate of incorporation requiring approval of at least 85% of the outstanding voting stock to amend the provisions of the certificate of incorporation provided in (i) through (vi) of this list.

The certificate of incorporation also provides that the bylaws may be amended by the affirmative vote of a majority of our directors or by the stockholders by the affirmative vote of at least 80% of the total votes eligible to be voted at a duly constituted meeting of stockholders. Any amendment of this super-majority requirement for amendment of the bylaws would also require the approval of 80% of the outstanding voting stock.

RESTRICTIONS ON ACQUISITION OF NORTHFIELD-DELAWARE

Although the board of directors of Northfield-Delaware is not aware of any effort that might be made to obtain control of Northfield-Delaware after the conversion, the board of directors believes that it is appropriate to include certain provisions as part of Northfield-Delaware's certificate of incorporation to protect the interests of Northfield-Delaware and its stockholders from takeovers which the board of directors might conclude are not in the best interests of Northfield Bank, Northfield-Delaware or Northfield-Delaware's stockholders.

The following discussion is a general summary of the material provisions of Delaware law, Northfield-Delaware's certificate of incorporation and bylaws, Northfield Bank's charter and bylaws and certain other regulatory provisions that may be deemed to have an "anti-takeover" effect. The following description is necessarily general and is not intended to be a complete description of the document or regulatory provision in question. Northfield-Delaware's certificate of incorporation and bylaws are included as part of Northfield Bancorp, MHC's application for conversion filed with the Federal Reserve Board and Northfield-Delaware's registration statement filed with the Securities and Exchange Commission. See [Where You Can Find Additional Information](#).

Delaware Law and Certificate of Incorporation and Bylaws of Northfield-Delaware

Delaware law, as well as Northfield-Delaware's certificate of incorporation and bylaws, contain a number of provisions relating to corporate governance and rights of stockholders that may discourage future takeover attempts. As a result, stockholders who might desire to participate in such transactions may not have an opportunity to do so. In addition, these provisions will also render the removal of the board of directors or

management of Northfield-Delaware more difficult.

Table of Contents

Directors. The board of directors will be divided into three classes. The members of each class will be elected for a term of three years and only one class of directors will be elected annually. Thus, it would take at least two annual elections to replace a majority of the board of directors. The bylaws establish qualifications for board members, including restrictions on affiliations with competitors of Northfield Bank and restrictions based upon prior legal or regulatory violations. Further, the bylaws impose notice and information requirements in connection with the nomination by stockholders of candidates for election to the board of directors or the proposal by stockholders of business to be acted upon at an annual meeting of stockholders. Such notice and information requirements are applicable to all stockholder business proposals and nominations, and are in addition to any requirements under the federal securities laws.

Restrictions on Call of Special Meetings. The certificate of incorporation and bylaws provide that special meetings of stockholders can be called only by a majority of the board of directors.

Prohibition of Cumulative Voting. The certificate of incorporation prohibits cumulative voting for the election of directors.

Limitation of Voting Rights. The certificate of incorporation provides that in no event will any person who beneficially owns more than 10% of the then-outstanding shares of common stock be entitled or permitted to vote any of the shares of common stock held in excess of the 10% limit.

Restrictions on Removing Directors from Office. The certificate of incorporation provides that directors may be removed only for cause, and only by the affirmative vote of the holders of at least a majority of the voting power of all of our then-outstanding common stock entitled to vote (after giving effect to the limitation on voting rights discussed above in [Limitation of Voting Rights](#)).

Authorized but Unissued Shares. After the conversion, Northfield-Delaware will have authorized but unissued shares of common and preferred stock. See [Description of Capital Stock of Northfield-Delaware Following the Conversion](#). The certificate of incorporation authorizes 25,000,000 shares of serial preferred stock. Northfield-Delaware is authorized to issue preferred stock from time to time in one or more series subject to applicable provisions of law, and the board of directors is authorized to fix the designations, and relative preferences, limitations, voting rights, if any, including without limitation, offering rights of such shares (which could be multiple or as a separate class). In the event of a proposed merger, tender offer or other attempt to gain control of Northfield-Delaware that the board of directors does not approve, it may be possible for the board of directors to authorize the issuance of a series of preferred stock with rights and preferences that would impede the completion of the transaction. An effect of the possible issuance of preferred stock therefore may be to deter a future attempt to gain control of Northfield-Delaware. The board of directors has no present plan or understanding to issue any preferred stock.

Amendments to Certificate of Incorporation and Bylaws. Amendments to the certificate of incorporation must be approved by the board of directors and also by at least a majority of the outstanding shares of the voting stock; provided, however, that approval by at least 85% of the outstanding voting stock is generally required to amend certain provisions. A list of these provisions is provided under [Comparison of Stockholders' Rights For Existing Stockholders of Northfield Bancorp, Inc. Amendment of Governing Instruments](#) above.

The certificate of incorporation also provides that the bylaws may be amended by the affirmative vote of a majority of Northfield-Delaware's directors or by the stockholders by the affirmative vote of at least 80% of the total votes eligible to be voted at a duly constituted meeting of stockholders. Any amendment of this super-majority requirement for amendment of the bylaws would also require the approval of 80% of the outstanding voting shares.

Business Combinations with Interested Stockholders. Delaware law restricts mergers, consolidations, sales of assets and other business combinations between Northfield-Delaware and an interested stockholder . See [Comparison of Stockholder Rights for Existing Stockholders of Northfield Bancorp, Inc. Mergers, Consolidations and Sales of Assets](#) above.

Table of Contents

Evaluation of Offers. The certificate of incorporation of Northfield-Delaware provides that its board of directors, when evaluating a transaction that would or may involve a change in control of Northfield-Delaware (whether by purchases of its securities, merger, consolidation, share exchange, dissolution, liquidation, sale of all or substantially all of its assets, proxy solicitation or otherwise), may, in connection with the exercise of its business judgment in determining what is in the best interests of Northfield-Delaware and its stockholders and in making any recommendation to the stockholders, give due consideration to all relevant factors, including, but not limited to, certain enumerated factors. For a list of these enumerated factors, see *Comparison of Stockholder Rights for Existing Stockholders of Northfield Bancorp, Inc. Evaluation of Offers* above.

Purpose and Anti-Takeover Effects of Northfield-Delaware's Certificate of Incorporation and Bylaws. Our board of directors believes that the provisions described above are prudent and will reduce our vulnerability to takeover attempts and certain other transactions that have not been negotiated with and approved by our board of directors. These provisions also will assist us in the orderly deployment of the offering proceeds into productive assets during the initial period after the conversion. Our board of directors believes these provisions are in the best interests of Northfield-Delaware and its stockholders. Our board of directors believes that it will be in the best position to determine the true value of Northfield-Delaware and to negotiate more effectively for what may be in the best interests of all our stockholders. Accordingly, our board of directors believes that it is in the best interests of Northfield-Delaware and all of our stockholders to encourage potential acquirers to negotiate directly with the board of directors and that these provisions will encourage such negotiations and discourage hostile takeover attempts. It is also the view of our board of directors that these provisions should not discourage persons from proposing a merger or other transaction at a price reflective of the true value of Northfield-Delaware and that is in the best interests of all our stockholders.

Takeover attempts that have not been negotiated with and approved by our board of directors present the risk of a takeover on terms that may be less favorable than might otherwise be available. A transaction that is negotiated and approved by our board of directors, on the other hand, can be carefully planned and undertaken at an opportune time in order to obtain maximum value of Northfield-Delaware for our stockholders, with due consideration given to matters such as the management and business of the acquiring corporation and maximum strategic development of Northfield-Delaware's assets.

Although a tender offer or other takeover attempt may be made at a price substantially above the current market price, such offers are sometimes made for less than all of the outstanding shares of a target company. As a result, stockholders may be presented with the alternative of partially liquidating their investment at a time that may be disadvantageous, or retaining their investment in an enterprise that is under different management and whose objectives may not be similar to those of the remaining stockholders.

Despite our belief as to the benefits to stockholders of these provisions of Northfield-Delaware's certificate of incorporation and bylaws, these provisions may also have the effect of discouraging a future takeover attempt that would not be approved by our board of directors, but pursuant to which stockholders may receive a substantial premium for their shares over then current market prices. As a result, stockholders who might desire to participate in such a transaction may not have any opportunity to do so. Such provisions will also make it more difficult to remove our board of directors and management. Our board of directors, however, has concluded that the potential benefits outweigh the possible disadvantages.

Charter of Northfield Bank

Northfield Bank's charter will provide that for a period of five years from the closing of the conversion and offering, no person other than Northfield-Delaware may offer directly or indirectly to acquire the beneficial ownership of more than 10% of any class of equity security of Northfield Bank. This provision does not apply to any tax-qualified employee benefit plan of Northfield Bank or Northfield-Delaware or to an underwriter or member of an underwriting or selling group involving the public sale or resale of securities of Northfield-Delaware or any of its subsidiaries, so long as after the sale or resale, no underwriter or member of the selling group is a beneficial owner, directly or indirectly, of more than 10% of any class of equity securities of Northfield Bank. In addition,

Table of Contents

during this five-year period, all shares owned over the 10% limit may not be voted on any matter submitted to stockholders for a vote.

Conversion Regulations

Federal Reserve Board regulations prohibit any person from making an offer, announcing an intent to make an offer or participating in any other arrangement to purchase stock or acquire stock or subscription rights in a converting institution or its holding company from another person prior to completion of its conversion. Further, without the prior written approval of the Federal Reserve Board, no person may make an offer or announcement of an offer to purchase shares or actually acquire shares of a converted institution or its holding company for a period of three years from the date of the completion of the conversion if, upon the completion of such offer, announcement or acquisition, the person would become the beneficial owner of more than 10% of the outstanding stock of the institution or its holding company. The Federal Reserve Board has defined person to include any individual, group acting in concert, corporation, partnership, association, joint stock company, trust, unincorporated organization or similar company, a syndicate or any other group formed for the purpose of acquiring, holding or disposing of securities of an insured institution. However, offers made exclusively to a bank or its holding company, or to an underwriter or member of a selling group acting on the converting institution's or its holding company's behalf for resale to the general public, are excepted. The regulation also provides civil penalties for willful violation or assistance in any such violation of the regulation by any person connected with the management of the converting institution or its holding company or who controls more than 10% of the outstanding shares or voting rights of a converted institution or its holding company.

Change in Control Regulations

Under the Change in Bank Control Act, no person may acquire control of an insured savings association or its parent holding company unless the Federal Reserve Board has been given 60 days prior written notice and has not issued a notice disapproving the proposed acquisition. The Federal Reserve Board takes into consideration certain factors, including the financial and managerial resources of the acquirer and the competitive effects of the acquisition. In addition, federal regulations provide that no company may acquire control of a savings association without the prior approval of the Federal Reserve Board. Any company that acquires such control becomes a savings and loan holding company subject to registration, examination and regulation by the Federal Reserve Board.

Control, as defined under federal law, means ownership, control of or holding irrevocable proxies representing more than 25% of any class of voting stock, control in any manner of the election of a majority of the company's directors, or a determination by the Federal Reserve Board that the acquiror has the power to direct, or directly or indirectly to exercise a controlling influence over, the management or policies of the institution. Acquisition of more than 10% of any class of a savings and loan holding company's voting stock constitutes a rebuttable determination of control under the regulations under certain circumstances including where, as will be the case with Northfield-Delaware, the issuer has registered securities under Section 12 of the Securities Exchange Act of 1934. Federal Reserve Board regulations provide that parties seeking to rebut control will be provided an opportunity to do so in writing.

DESCRIPTION OF CAPITAL STOCK OF NORTHFIELD-DELAWARE FOLLOWING THE CONVERSION

General

Northfield-Delaware is authorized to issue 150,000,000 shares of common stock, par value of \$0.01 per share, and 25,000,000 shares of preferred stock, par value \$0.01 per share. Northfield-Delaware currently expects to issue in the offering and exchange up to 68,736,470 shares of common stock. Northfield-Delaware will not issue shares of preferred stock in the conversion. Each share of common stock will have the same relative rights as, and will be identical in all respects to, each other share of common stock. Upon payment of the subscription price for

Table of Contents

the common stock, in accordance with the plan of conversion and reorganization, all of the shares of common stock will be duly authorized, fully paid and nonassessable.

The shares of common stock will represent nonwithdrawable capital, will not be an account of an insurable type, and will not be insured by the Federal Deposit Insurance Corporation or any other government agency.

Common Stock

Dividends. Delaware law generally limits dividends to our capital surplus or, if there is no capital surplus, our net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year. The payment of dividends by Northfield-Delaware is also subject to limitations that are imposed by law and applicable regulation, including restrictions on payments of dividends that would reduce Northfield-Delaware's assets below the then-adjusted balance of its liquidation account. The holders of common stock of Northfield-Delaware will be entitled to receive and share equally in dividends as may be declared by our board of directors out of funds legally available therefor. If Northfield-Delaware issues shares of preferred stock, the holders thereof may have a priority over the holders of the common stock with respect to dividends.

Voting Rights. Upon completion of the conversion, the holders of common stock of Northfield-Delaware will have exclusive voting rights in Northfield-Delaware. They will elect Northfield-Delaware's board of directors and act on other matters as are required to be presented to them under Delaware law or as are otherwise presented to them by the board of directors. Generally, each holder of common stock will be entitled to one vote per share and will not have any right to cumulate votes in the election of directors. Any person who beneficially owns more than 10% of the then-outstanding shares of Northfield-Delaware's common stock, however, will not be entitled or permitted to vote any shares of common stock held in excess of the 10% limit. If Northfield-Delaware issues shares of preferred stock, holders of the preferred stock may also possess voting rights. Certain matters require the approval of 85% of our outstanding common stock.

As a federal stock savings association, corporate powers and control of Northfield Bank are vested in its board of directors, who elect the officers of Northfield Bank and who fill any vacancies on the board of directors. Voting rights of Northfield Bank are vested exclusively in the owners of the shares of capital stock of Northfield Bank, which will be Northfield-Delaware, and voted at the direction of Northfield-Delaware's board of directors. Consequently, the holders of the common stock of Northfield-Delaware will not have direct control of Northfield Bank.

Liquidation. In the event of any liquidation, dissolution or winding up of Northfield Bank, Northfield-Delaware, as the holder of 100% of Northfield Bank's capital stock, would be entitled to receive all assets of Northfield Bank available for distribution, after payment or provision for payment of all debts and liabilities of Northfield Bank, including all deposit accounts and accrued interest thereon, and after distribution of the balance in the liquidation account to Eligible Account Holders and Supplemental Eligible Account Holders. In the event of liquidation, dissolution or winding up of Northfield-Delaware, the holders of its common stock would be entitled to receive, after payment or provision for payment of all its debts and liabilities (including payments with respect to its liquidation account), all of the assets of Northfield-Delaware available for distribution. If preferred stock is issued, the holders thereof may have a priority over the holders of the common stock in the event of liquidation or dissolution.

Preemptive Rights. Holders of the common stock of Northfield-Delaware will not be entitled to preemptive rights with respect to any shares that may be issued. The common stock is not subject to redemption.

Preferred Stock

None of the shares of Northfield-Delaware's authorized preferred stock will be issued as part of the offering or the conversion. Preferred stock may be issued with preferences and designations as our board of directors may from time to time determine. Our board of directors may, without stockholder approval, issue shares of preferred stock with voting, dividend, liquidation and conversion rights that could dilute the voting strength of the

Table of Contents

holders of the common stock and may assist management in impeding an unfriendly takeover or attempted change in control.

TRANSFER AGENT

The transfer agent and registrar for Northfield-Delaware's common stock is Registrar and Transfer Company, Cranford, New Jersey.

EXPERTS

The consolidated financial statements of Northfield-Federal and subsidiaries as of December 31, 2011 and 2010, and for each of the years in the three-year period ended December 31, 2011, and management's assessment of the effectiveness of internal control over financial reporting as of December 31, 2011, have been included herein and in the registration statement in reliance upon the reports of KPMG LLP, independent registered public accounting firm, which are included herein and upon the authority of said firm as experts in accounting and auditing.

RP Financial, L.C. has consented to the publication herein of the summary of its report setting forth its opinion as to the estimated pro forma market value of the shares of common stock upon completion of the conversion and offering and its letters with respect to subscription rights and the liquidation accounts.

LEGAL MATTERS

Luse Gorman Pomerenk & Schick, P.C., Washington, D.C., counsel to Northfield-Delaware, Northfield Bancorp, MHC, Northfield-Federal and Northfield Bank, will issue to Northfield-Delaware its opinion regarding the legality of the common stock and the federal income tax consequences of the conversion. Crowe Horwath LLP has provided opinions to us regarding the New Jersey and New York income tax consequences of the conversion. Certain legal matters will be passed upon for Sandler O'Neill & Partners, L.P. and, in the event of a syndicated or firm commitment underwritten offering, for the other joint book running managers, by Kilpatrick, Townsend & Stockton LLP, Washington, D.C.

WHERE YOU CAN FIND ADDITIONAL INFORMATION

Northfield-Delaware has filed with the Securities and Exchange Commission a registration statement under the Securities Act of 1933 with respect to the shares of common stock offered hereby. As permitted by the rules and regulations of the Securities and Exchange Commission, this prospectus does not contain all the information set forth in the registration statement. Such information, including the appraisal report which is an exhibit to the registration statement, can be examined without charge at the public reference facilities of the Securities and Exchange Commission located at 100 F Street, N.E., Washington, D.C. 20549, and copies of such material can be obtained from the Securities and Exchange Commission at prescribed rates. The Securities and Exchange Commission telephone number is 1-800-SEC-0330. In addition, the Securities and Exchange Commission maintains a web site (<http://www.sec.gov>) that contains reports, proxy and information statements and other information regarding registrants that file electronically with the Securities and Exchange Commission, including Northfield-Delaware. The statements contained in this prospectus as to the contents of any contract or other document filed as an exhibit to the registration statement are, of necessity, brief descriptions of the material terms of, and should be read in conjunction with, such contract or document.

Northfield Bancorp, MHC has filed with the Board of Governors of the Federal Reserve System an Application on Form AC with respect to the conversion, and Northfield-Delaware has filed with the Board of Governors of the Federal Reserve System an Application H-(e)1-s with respect to its acquisition of Northfield Bank. This prospectus omits certain information contained in those applications. To obtain a copy of the applications filed with the Board of Governors of the Federal Reserve System, you may contact H. Robert Tillman, Assistant Vice President of the Federal Reserve Bank of Philadelphia, at (215) 574-4155. The Plan of Conversion and Reorganization is available, upon request, at each of Northfield Bank's offices.

Table of Contents

In connection with the offering, Northfield-Delaware will register its common stock under Section 12(b) of the Securities Exchange Act of 1934 and, upon such registration, Northfield-Delaware and the holders of its common stock will become subject to the proxy solicitation rules, reporting requirements and restrictions on common stock purchases and sales by directors, officers and greater than 10% stockholders, the annual and periodic reporting and certain other requirements of the Securities Exchange Act of 1934. Under the plan of conversion and reorganization, Northfield-Delaware has undertaken that it will not terminate such registration for a period of at least three years following the offering.

Table of Contents**NORTHFIELD BANCORP, INC.****Notes to Unaudited Consolidated Financial Statements****Note 1 Basis of Presentation**

The consolidated financial statements are comprised of the accounts of Northfield Bancorp, Inc., and its wholly-owned subsidiary, Northfield Bank (the Bank), and the Bank's wholly-owned significant subsidiaries, NSB Services Corp. and NSB Realty Trust (collectively, the Company). All significant intercompany accounts and transactions have been eliminated in consolidation.

In the opinion of management, all adjustments (consisting solely of normal and recurring adjustments) necessary for the fair presentation of the consolidated financial condition and the consolidated results of operations for the unaudited periods presented have been included. The results of operations and other data presented for the three and six months ended June 30, 2012, are not necessarily indicative of the results of operations that may be expected for the year ending December 31, 2012. Certain prior year amounts have been reclassified to conform to the current year presentation.

In preparing the unaudited consolidated financial statements in conformity with U.S. generally accepted accounting principles (GAAP); management has made estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the consolidated statements of financial condition and results of operations for the periods indicated. Material estimates that are particularly susceptible to change are: the allowance for loan losses; the evaluation of goodwill and other intangible assets, impairment on investment securities, fair value measurements of assets and liabilities, and income taxes. Estimates and assumptions are reviewed periodically and the effects of revisions are reflected in the consolidated financial statements in the period they are deemed necessary. While management uses its best judgment, actual amounts or results could differ significantly from those estimates. The current economic environment has increased the degree of uncertainty inherent in these material estimates.

Certain information and note disclosures usually included in financial statements prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) for the preparation of interim financial statements. The consolidated financial statements presented should be read in conjunction with the audited consolidated financial statements and notes to consolidated financial statements included in the Annual Report on Form 10-K for the year ended December 31, 2011, of Northfield Bancorp, Inc. as filed with the SEC.

Note 2 Securities

The following is a comparative summary of mortgage-backed securities and other securities available-for-sale at June 30, 2012, and December 31, 2011 (in thousands):

Total securities available-for-sale	\$ 1,069,139	\$ 31,636	\$ 2,050	\$ 1,098,725

The following is a summary of the expected maturity distribution of debt securities available-for-sale, other than mortgage-backed securities, at June 30, 2012 (in thousands):

Available-for-sale	Amortized cost	Estimated fair value
Due in one year or less	\$ 45,748	\$ 45,973
Due after one year through five years	56,441	56,730
	\$ 102,189	\$ 102,703

Expected maturities on mortgage-backed securities may differ from contractual maturities as borrowers may have the right to call or prepay obligations with or without penalties.

For the three and six months ended June 30, 2012, the Company had gross proceeds of \$31.5 million and \$130.3 million, respectively, on sales of securities available-for-sale with gross realized gains of approximately \$66,000 and \$1.8 million, respectively, and no gross realized losses. For the three and six months ended June 30, 2011, the Company had gross proceeds of \$25.9 million and \$114.4 million, respectively, on sales of securities available-for-sale with gross realized gains of approximately \$866,000 and \$2.5 million, respectively, and no gross realized losses. The Company recognized \$(106,000) in losses and \$253,000 in gains on its trading securities portfolio during the three and six months ended June 30, 2012, respectively. The Company recognized \$(47,000) in losses and \$139,000 in gains on its trading securities portfolio during the three and six months ended June 30, 2011, respectively. The Company recognized no other-than-temporary impairment charges during the three and six months ended June 30, 2012. The Company recognized other-than-temporary impairment charges of \$248,000 and \$409,000 against earnings during the three and six months ended June 30, 2011, respectively, related to one equity investment in a mutual fund and two private label mortgage-backed securities.

Activity related to the credit component recognized in earnings on debt securities for which a portion of other-than-temporary impairment was recognized in accumulated other comprehensive income for the three and six months ended June 30, 2012 and 2011, is as follows (in thousands):

Three months ended June 30,	Six months ended June 30,

Total	\$ 190	\$ 117,280	\$ 740	\$ 19,654	\$ 930	\$ 136,934

	Less than 12 months		December 31, 2011 12 months or more		Total	
	Unrealized losses	Estimated fair value	Unrealized losses	Estimated fair value	Unrealized losses	Estimated fair value
Mortgage-backed securities:						
Pass-through certificates:						
Non-GSE	\$ 307	\$ 2,513	\$ 948	\$ 5,002	\$ 1,255	\$ 7,515
Real estate mortgage investment conduits (REMICs):						
GSE	135	54,475			135	54,475
Non-GSE			37	842	37	842
Corporate bonds	113	27,523	510	13,132	623	40,655
Total	\$ 555	\$ 84,511	\$ 1,495	\$ 18,976	\$ 2,050	\$ 103,487

Included in the above available-for-sale security amounts at June 30, 2012 were two pass-through non-GSE mortgage-backed securities issued by private companies (private label) in continuous unrealized loss positions of greater than twelve months that were rated less than investment grade at June 30, 2012. The first security had an estimated fair value of \$5.2 million (amortized cost of \$5.6 million), was rated Caa2, and had the following underlying collateral characteristics: 83% originated in 2004 and 17% originated in 2005. The second security had an estimated fair value of \$2.2 million (amortized cost of \$2.4 million), was rated C, and was supported by collateral which was originated in 2006. The ratings of these securities detailed above represents the lowest rating these securities received from the rating agencies of Moody's, Standard & Poor's, and Fitch. The Company continues to receive principal and interest payments in accordance with the contractual terms of these securities. Management has evaluated, among other things, delinquency status, location of collateral, estimated prepayment speeds, and the estimated default rates and loss severity in liquidating the underlying collateral for these securities. As a result of management's evaluation of these securities, the Company did not recognize any other-than-temporary impairment during the six months ended June 30, 2012. Management does not have the intent to sell these securities and it is more likely than not that the Company will not be required to sell the securities, before their anticipated recovery, which may be maturity.

The Company also one REMIC non-GSE mortgage-backed security and two corporate bonds that were in a continuous unrealized loss position of greater than twelve months at June 30, 2012. There was one pass-through mortgage-backed security issued or guaranteed by GSEs, twelve REMIC mortgage-backed securities issued or guaranteed by GSEs and one corporate bond that were in an unrealized loss position of less than twelve months, and rated investment grade at June 30, 2012. The declines in value relate to the general interest rate environment and are considered temporary. The securities cannot be prepaid in a manner that would result in the Company not receiving substantially all of its amortized cost. The Company neither has an intent to sell, nor is it more likely than not that the Company will be required to sell, the securities before the recovery of their amortized cost basis or, if necessary, maturity.

The fair values of our investment securities could decline in the future if the underlying performance of the collateral for the collateralized mortgage obligations or other securities deteriorates and our credit enhancement levels do not provide sufficient protections to our contractual principal and interest. As a result, there is a risk that significant other-than-temporary impairments may occur in the future given the current economic environment.

Table of Contents**Note 3 Loans**

Net loans held-for-investment are as follows (in thousands):

	June 30, 2012	December 31, 2011
Real estate loans:		
Multifamily	\$ 538,251	\$ 458,370
Commercial mortgage	311,256	327,074
One- to- four family residential mortgage	69,781	72,592
Home equity and lines of credit	28,928	29,666
Construction and land	25,497	23,460
Total real estate loans	973,713	911,162
Commercial and industrial loans	13,369	12,710
Insurance premium loans	454	59,096
Other loans	1,616	1,496
Total commercial and industrial, insurance premium, and other loans	15,439	73,302
Deferred loan cost, net	1,685	1,481
Originated loans held-for-investment, net	990,837	985,945
PCI Loans	82,111	88,522
Loans held for investment, net	1,072,948	1,074,467
Allowance for loan losses	(27,042)	(26,836)
Net loans held-for-investment	\$ 1,045,906	\$ 1,047,631

Loans held-for-sale amounted to \$355,000 and \$3.9 million at June 30, 2012 and December 31, 2011, respectively. Loans held-for-sale are comprised of \$275,000 of one-to-four family residential mortgage loans and \$80,000 of commercial and industrial loans.

PCI loans, acquired as part of a Federal Deposit Insurance Corporation-assisted transaction, totaled \$82.1 million at June 30, 2012 as compared to \$88.5 million at December 31, 2011. The Company accounts for PCI loans utilizing generally accepting accounting principles applicable to loans acquired with deteriorated credit quality. PCI loans consist of approximately 34% commercial real estate and 55% commercial and industrial loans, with the remaining balance in residential and home equity loans. The following details the accretible yield for the three and six months ended June 30, 2012:

	For the Three Months Ended June 30, 2012	For the Six Months Ended June 30, 2012
Balance at the beginning of period	\$ 40,873	\$ 42,493
Accretion into interest income	(1,562)	(3,182)
Balance at end of period	\$ 39,311	\$ 39,311

The Company does not have any lending programs commonly referred to as subprime lending. Subprime lending generally targets borrowers with weakened credit histories typically characterized by payment delinquencies, previous charge-offs, judgments, bankruptcies, or borrowers with questionable repayment capacity as evidenced by low credit scores or high debt-burden ratios.

Edgar Filing: Northfield Bancorp, Inc. - Form 424B3

The Company, through its principal subsidiary, the Bank, serviced \$35.3 million and \$41.3 million of loans at June 30, 2012 and December 31, 2011, respectively, for Freddie Mac. These one- to four-family residential mortgage real estate loans were underwritten to Freddie Mac guidelines and to comply with applicable federal, state, and local laws. At the time of the closing of these loans, the Company owned the loans and subsequently sold them to Freddie Mac providing normal and customary representations and warranties, including representations and warranties related to compliance with Freddie Mac underwriting standards. At the time of sale, the loans were free from encumbrances except for the mortgages filed by the Company which, with other underwriting documents, were subsequently assigned and delivered to Freddie Mac. At June 30, 2012, substantially all of the loans serviced for Freddie Mac were performing in accordance with their contractual terms and management believes that it has no material repurchase obligations associated with these loans. Servicing of loans for others does not have a material effect on our financial position or results of operations.

Activity in the allowance for loan losses is as follows (in thousands):

Table of Contents

The Company monitors the credit quality of its loans by reviewing certain key credit quality indicators. Management has determined that loan-to-value ratios (at period end) and internally assigned credit risk ratings by loan type are the key credit quality indicators that best help management monitor the credit quality of the Company's loans. Loan-to-value (LTV) ratios used by management in monitoring credit quality are based on current period loan balances and original values at time of origination (unless a more current appraisal has been obtained). In calculating the provision for loan losses, management has determined that commercial real estate loans and multifamily loans having loan-to-value ratios of less than 35%, and one- to four-family loans having loan-to-value ratios of less than 60%, require less of a loss factor than those with higher loan-to-value ratios.

The Company maintains a credit risk rating system as part of the risk assessment of its loan portfolio. The Company's lending officers are required to assign a credit risk rating to each loan in their portfolio at origination. When the lending officer learns of important financial developments, the risk rating is reviewed and adjusted if necessary. Periodically, management presents monitored assets to the Board Loan Committee. In addition, the Company engages a third party independent loan reviewer that performs semi-annual reviews of a sample of loans, validating the credit risk ratings assigned to such loans. The credit risk ratings play an important role in the establishment of the loan loss provision and in confirming the adequacy of the allowance for loan losses. After determining the general reserve loss factor for each portfolio segment, the portfolio segment balance collectively evaluated for impairment is multiplied by the general reserve loss factor for the respective portfolio segment in order to determine the general reserve. Loans collectively evaluated for impairment that have an internal credit rating of special mention or substandard are multiplied by a multiple of the general reserve loss factors for each portfolio segment, in order to determine the general reserve.

When assigning a risk rating to a loan, management utilizes the Bank's internal nine-point credit risk rating system.

1. Strong
2. Good
3. Acceptable
4. Adequate
5. Watch
6. Special Mention
7. Substandard
8. Doubtful
9. Loss

Loans rated 1 through 5 are considered pass ratings. An asset is considered substandard if it is inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Substandard assets have well defined weaknesses based on objective evidence, and are characterized by the distinct possibility the Company will sustain some loss if the deficiencies are not corrected. Assets classified as doubtful have all of the weaknesses inherent in those classified substandard with the added characteristic that the weaknesses present make collection or liquidation in full highly questionable and improbable based on current circumstances. Assets classified as loss are those considered uncollectible and of such little value that their continuance as assets is not warranted. Assets which do not currently expose the Company to sufficient risk to warrant classification in one of the aforementioned categories, but possess weaknesses, are designated special mention.

Table of Contents

The following tables detail the recorded investment of originated loans held-for-investment, net of deferred fees and costs, by loan type and credit quality indicator at June 30, 2012, and December 31, 2011 (in thousands).

Included in originated loans receivable (including held-for-sale) are loans for which the accrual of interest income has been discontinued due to deterioration in the financial condition of the borrowers. The recorded investment of these nonaccrual loans was \$34.4 million and \$43.8 million at June 30, 2012 and December 31, 2011, respectively. Generally, loans are placed on non-accruing status when they become 90 days or more delinquent, and remain on non-accrual status until they are brought current, have six months of performance under the loan terms, and factors indicating reasonable doubt about the timely collection of payments no longer exist. Therefore, loans may be current in accordance with their loan terms, or may be less than 90 days delinquent and still be on a non-accruing status.

These non-accrual amounts included loans deemed to be impaired of \$30.6 million and \$36.1 million at June 30, 2012 and December 31, 2011, respectively. Loans on non-accrual status with principal balances less than \$500,000, and therefore not meeting the Company's definition of an impaired loan, amounted to \$3.7 million and \$4.3 million at June 30, 2012 and December 31, 2011, respectively. Non-accrual amounts included in loans held-for-sale were \$80,000 and \$3.4 million at June 30, 2012, and December 31, 2011, respectively. Loans past due 90 days or more and still accruing interest were \$424,000 and \$85,000 at June 30, 2012 and December 31, 2011, respectively, and consisted of loans that are considered well secured and in the process of collection.

Edgar Filing: Northfield Bancorp, Inc. - Form 424B3

The following tables set forth the detail, and delinquency status, of non-performing loans (non-accrual loans and loans past due 90 or more and still accruing), net of deferred fees and costs, at June 30, 2012 and December 31, 2011 (in thousands). The following table excludes PCI loans at June 30, 2012, which have been segregated into pools in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Subtopic 310-30. Each loan pool is accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows. At June 30, 2012, expected future cash flows of each PCI loan pool were consistent with those estimated at its purchase date.

Table of Contents

Included in the table above at June 30, 2012 are loans with carrying balances of \$37.9 million that were not written down by either charge-offs or specific reserves in our allowance for loan losses. Included in the table above at December 31, 2011 are loans with carrying balances of \$27.9 million that were not written down by either charge-offs or specific reserves in our allowance for loan losses. Loans not written down by charge-offs or specific reserves at June 30, 2012 and December 31, 2011, are considered to have sufficient collateral values, less costs to sell, to support the carrying balances of the loans.

The average recorded balance of originated impaired loans for the six months ended June 30, 2012 and 2011 was \$55.9 million and \$62.2 million, respectively. The Company recorded \$577,000 and \$1.3 million of interest income on impaired loans for the three and six months ended June 30, 2012, respectively, as compared to \$735,000 and \$1.6 million of interest income on impaired loans for the three and six months ended June 30, 2011, respectively.

The following table summarizes loans that were modified in troubled debt restructurings during the six months ended June 30, 2012.

	Number of Relationships	Six Months Ended June 30, 2012	
		Pre-Modification Outstanding Recorded Investment (in thousands)	Post-Modification Outstanding Recorded Investment
Troubled Debt Restructurings			
Commercial real estate loans			
Substandard	1	\$ 6,360	\$ 6,360
One -to- four Family			
Substandard	1	257	257
Home equity and lines of credit			
Special Mention	2	364	364
Total Troubled Debt Restructurings	4	\$ 6,981	\$ 6,981

At June 30, 2012 and December 31, 2011, we had troubled debt restructurings of \$47.1 million and \$41.6 million, respectively.

All four of the relationships in the table above were restructured to receive reduced interest rates.

Management classifies all troubled debt restructurings as impaired loans. Impaired loans are individually assessed to determine that the loan's carrying value is not in excess of the estimated fair value of the collateral (less cost to sell), if the loan is collateral dependent, or the present value of the expected future cash flows, if the loan is not collateral dependent. Management performs a detailed evaluation of each impaired loan and generally obtains updated appraisals as part of the evaluation. In addition, management adjusts estimated fair values down to appropriately consider recent market conditions, our willingness to accept a lower sales price to effect a quick sale, and costs to dispose of any supporting collateral. Determining the estimated fair value of underlying collateral (and related costs to sell) can be difficult in illiquid real estate markets and is subject to significant assumptions and estimates. Management employs an independent third party expert in appraisal preparation and review to ascertain the reasonableness of updated appraisals. Projecting the expected cash flows under troubled debt restructurings is inherently subjective and requires, among other things, an evaluation of the borrower's current and projected financial condition. Actual results may be significantly different than our projections and our established allowance for loan losses on these loans, which could have a material effect on our financial results.

One loan that was restructured during the last twelve months has subsequently defaulted. The loan was a one-to-four family loan with a recorded investment of \$257,000 and currently is maintained on non-accrual status as of June 30, 2012.

Table of Contents**Note 4 Deposits**

Deposits are as follows (in thousands):

	June 30, 2012	December 31, 2011

	\$ 2,461	\$ 3,270	\$ 4,985	\$ 6,287

Note 5 Equity Incentive Plan

The following table is a summary of the Company's stock options outstanding as of June 30, 2012 and changes therein during the six months then ended:

	Number of Stock Options	Weighted Average Grant Date Fair Value	Weighted Average Exercise Price	Weighted Average Contractual Life (years)
Outstanding - December 31, 2011	2,056,660	\$ 3.22	\$ 9.95	7.02
Granted				
Forfeited	(3,560)	3.22	9.94	
Exercised				
Outstanding - June 30, 2012	2,053,100	\$ 3.22	\$ 9.95	6.57
Exercisable - June 30, 2012	1,240,040	\$ 3.22	\$ 9.95	6.57

Expected future stock option expense related to the non-vested options outstanding as of June 30, 2012 is \$2.1 million over an average period of 1.6 years.

The following is a summary of the status of the Company's restricted share awards as of June 30, 2012 and changes therein during the six months then ended.

Edgar Filing: Northfield Bancorp, Inc. - Form 424B3

	Number of Shares Awarded	Weighted Average Grant Date Fair Value
Non-vested at December 31, 2011	488,830	\$ 9.97
Granted		
Vested	(162,650)	9.96
Forfeited	(1,240)	9.94
Non-vested at June 30, 2012	324,940	\$ 9.97

F-20

Table of Contents

Expected future stock award expense related to the non-vested restricted share awards as of June 30, 2012 is \$2.6 million over an average period of 1.6 years.

During the three and six months ended June 30, 2012, the Company recorded \$742,000 and \$1.5 million of stock-based compensation related to the above plans, respectively. During the three and six months ended June 30, 2011, the Company recorded \$775,000 and \$1.5 million of stock-based compensation related to the above plans, respectively.

Note 6 Fair Value Measurements

The following table presents the assets reported on the consolidated balance sheet at their estimated fair value as of June 30, 2012, and December 31, 2011, by level within the fair value hierarchy as required by the Fair Value Measurements and Disclosures Topic of the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC). Financial assets and liabilities are classified in their entirety based on the level of input that is significant to the fair value measurement. The fair value hierarchy is as follows:

Level 1 Inputs Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (for example, interest rates, volatilities, prepayment speeds, loss severities, credit risks and default rates) or inputs that are derived principally from or corroborated by observable market data by correlations or other means.

Level 3 Inputs Significant unobservable inputs that reflect the Company's own assumptions that market participants would use in pricing the assets or liabilities.

	Fair Value Measurements at Reporting Date Using:

The following table presents qualitative information for Level 3 assets measured at fair value on a non-recurring basis at June 30, 2012:

	Fair Value (in thousands)	Valuation Methodology	Unobservable Inputs	Range of Inputs
Impaired loans	\$ 35,738	Appraisals	Discount for costs to sell	7.0%
			Discount for quick sale	10.0% - 20.0%
			Discount for dated appraisal utilizing changes in real estate indexes	Varies
Other real estate owned	\$ 2,139	Appraisals	Discount for costs to sell	7.0%
			Discount for dated appraisal utilizing changes in real estate indexes	Varies

Available for Sale Securities: The estimated fair values for mortgage-backed, GSE and corporate securities are obtained from an independent nationally recognized third-party pricing service. The estimated fair values are derived primarily from cash flow models, which include assumptions for interest rates, credit losses, and prepayment speeds. Broker/dealer quotes are utilized as well when such quotes are available and

Edgar Filing: Northfield Bancorp, Inc. - Form 424B3

deemed representative of the market. The significant inputs utilized in the cash flow models are based on market data

F-22

Table of Contents

obtained from sources independent of the Company (Observable Inputs), and are therefore classified as Level 2 within the fair value hierarchy. The estimated fair values of equity securities, classified as Level 1, are derived from quoted market prices in active markets. Equity securities consist of mutual funds. There were no transfers of securities between Level 1 and Level 2 during the six months ended June 30, 2012.

Trading Securities: Fair values are derived from quoted market prices in active markets. The assets consist of publicly traded mutual funds.

In addition, the Company may be required, from time to time, to measure the fair value of certain other financial assets on a nonrecurring basis in accordance with U.S. generally accepted accounting principles. The adjustments to fair value usually result from the application of lower-of-cost-or-market accounting or write downs of individual assets.

Impaired Loans: At June 30, 2012 and December 31, 2011, the Company had originated impaired loans held-for-investment and held-for-sale with outstanding principal balances of \$39.3 million and \$39.1 million, respectively, that were recorded at their estimated fair value of \$35.7 million and \$35.7 million, respectively. The Company recorded net impairment charges of \$604,000 and \$2.4 million for the six months ended June 30, 2012, and 2011, respectively, and charge-offs of \$992,000 and \$1.4 million for the six months ended June 30, 2012 and 2011, respectively, utilizing Level 3 inputs. For purposes of estimating fair value of impaired loans, management utilizes independent appraisals, if the loan is collateral dependent, adjusted downward by management, as necessary, for changes in relevant valuation factors subsequent to the appraisal date, or the present value of expected future cash flows for non-collateral dependent loans and troubled debt restructurings.

Other Real Estate Owned: At June 30, 2012, and December 31, 2011, the Company had assets acquired through foreclosure, or deed in lieu of foreclosure, of \$2.1 million and \$3.4 million, respectively, recorded at estimated fair value, less estimated selling costs when acquired, establishing a new cost basis. Estimated fair value is generally based on independent appraisals. These appraisals include adjustments to comparable assets based on the appraisers' market knowledge and experience, and are considered Level 3 inputs. When an asset is acquired, the excess of the loan balance over fair value, less estimated selling costs, is charged to the allowance for loan losses. If the estimated fair value of the asset declines, a write-down is recorded through non-interest expense. The valuation of foreclosed assets is subjective in nature and may be adjusted in the future because of changes in economic conditions.

There were no subsequent valuation adjustments to other real estate owned (REO) for the three and six months ended June 30, 2012. Operating costs after acquisition are expensed.

Fair Value of Financial Instruments

The FASB ASC Topic for Financial Instruments requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring or non-recurring basis. The methodologies for estimating the fair value of financial assets and financial liabilities that are measured at fair value on a recurring or non-recurring basis are discussed above. The following methods and assumptions were used to estimate the fair value of other financial assets and financial liabilities not already discussed above:

(a) Cash, Cash Equivalents, and Certificates of Deposit

Cash and cash equivalents are short-term in nature with original maturities of six months or less; the carrying amount approximates fair value. Certificates of deposit having original terms of six-months or less; carrying value generally approximates fair value. Certificates of deposit with an original maturity of six months or greater, the fair value is derived from discounted cash flows.

(b) Securities (Held to Maturity)

The estimated fair values for substantially all of our securities are obtained from an independent nationally recognized pricing service. The independent pricing service utilizes market prices of same

Table of Contents

or similar securities whenever such prices are available. Prices involving distressed sellers are not utilized in determining fair value. Where necessary, the independent third-party pricing service estimates fair value using models employing techniques such as discounted cash flow analyses. The assumptions used in these models typically include assumptions for interest rates, credit losses, and prepayments, utilizing market observable data where available.

(c) Federal Home Loan Bank of New York Stock

The fair value for Federal Home Loan Bank of New York (FHLB) stock is its carrying value, since this is the amount for which it could be redeemed and there is no active market for this stock.

(d) Loans (Held-for-Investment)

Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as originated and purchased, and further segregated by residential mortgage, construction, land, multifamily, commercial and consumer. Each loan category is further segmented into amortizing and non-amortizing and fixed and adjustable rate interest terms and by performing and nonperforming categories. The fair value of loans is estimated by discounting the future cash flows using current prepayment assumptions and current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. This method of estimating fair value does not incorporate the exit price concept of fair value prescribed by the FASB ASC Topic for Fair Value Measurements and Disclosures.

(e) Loans (Held-for-Sale)

Held-for-sale loans are carried at the lower of aggregate cost or estimated fair value, less costs to sell, and therefore fair value is equal to carrying value.

(f) Deposits

The fair value of deposits with no stated maturity, such as non-interest bearing demand deposits, savings, NOW and money market accounts, is equal to the amount payable on demand. The fair value of certificates of deposit is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities.

(g) Commitments to Extend Credit and Standby Letters of Credit

The fair value of commitments to extend credit and standby letters of credit is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates.

The fair value of off-balance sheet commitments is insignificant and therefore not included in the following table.

(h) Borrowings

The fair value of borrowings is estimated by discounting future cash flows based on rates currently available for debt with similar terms and remaining maturity.

(i) Advance Payments by Borrowers

Advance payments by borrowers for taxes and insurance have no stated maturity; the fair value is equal to the amount currently payable.

Table of Contents

The estimated fair values of the Company's significant financial instruments at June 30, 2012, and December 31, 2011, are presented in the following tables (in thousands):

	Carrying Value	June 30, 2012 Estimated Fair Value			Total
		Level 1	Level 2	Level 3

Limitations

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Fair value estimates are based on existing on- and off-balance-sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in the estimates.

Table of Contents**Note 7 Earnings Per Share**

Basic earnings per share is computed by dividing net income available to common stockholders by the weighted average number of shares outstanding during the period. For purposes of calculating basic earnings per share, weighted average common shares outstanding excludes unallocated employee stock ownership plan (ESOP) shares that have not been committed for release and unvested restricted stock.

Diluted earnings per share is computed using the same method as basic earnings per share, but reflects the potential dilution that could occur if stock options and unvested shares of restricted stock were exercised and converted into common stock. These potentially dilutive shares are included in the weighted average number of shares outstanding for the period using the treasury stock method. When applying the treasury stock method, we add: (1) the assumed proceeds from option exercises; (2) the tax benefit, if any, that would have been credited to additional paid-in capital assuming exercise of non-qualified stock options and vesting of shares of restricted stock; and (3) the average unamortized compensation costs related to unvested shares of restricted stock and stock options. We then divide this sum by our average stock price for the period to calculate assumed shares repurchased. The excess of the number of shares issuable over the number of shares assumed to be repurchased is added to basic weighted average common shares to calculate diluted earnings per share.

The following is a summary of the Company's earnings per share calculations and reconciliation of basic to diluted earnings per share for the periods indicated (dollars in thousands, except per share data):

	For the three months ended June 30,		For the six months ended June 30,	
	2012	2011	2012	2011
Net income available to common stockholders	\$ 3,948	\$ 4,347	\$ 8,896	\$ 9,317
Weighted average shares outstanding-basic	38,512,169	40,599,400	38,579,475	40,848,467
Effect of non-vested restricted stock and stock options outstanding	451,952	381,291	473,643	411,566
Weighted average shares outstanding-diluted	38,964,121	40,980,691	39,053,118	41,260,033
Earnings per share-basic	\$ 0.10	\$ 0.11	\$ 0.23	\$ 0.23
Earnings per share-diluted	\$ 0.10	\$ 0.11	\$ 0.23	\$ 0.23

Note 8 Stock Repurchase Program

As of June 30, 2012, the Company has repurchased a total of 5,384,510 shares of its common stock under its prior repurchase plans at an average price of \$12.91 per share. The Company announced on June 6, 2012, that it terminated its stock repurchase plan in connection with its adoption of a Plan of Conversion and Reorganization to a fully public company.

Note 9 Recent Accounting Pronouncements

Accounting Standards Update No. 2011-03, Reconsideration of Effective Control for Repurchase Agreements, amends Topic 860 (Transfers and Servicing) where an entity may or may not recognize a sale upon the transfer of financial assets subject to repurchase agreements, based on whether or not the transferor has maintained effective control. In the assessment of effective control, Accounting Standard Update 2011-03 has removed the criteria that requires transferors to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee. Other criteria applicable to the assessment of effective control have not been changed. This guidance is effective for prospective periods beginning on or after December 15, 2011. Early adoption was prohibited. The adoption of this Accounting Standard Update did not result in a material change to the Company's consolidated financial statements.

In May 2011, the FASB issued ASU No. 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs. ASU No. 2011-04 results in a consistent definition of fair value and common requirements for measurement of and disclosure about fair value between U.S. GAAP and International Financial Reporting Standards (IFRS). The changes to U.S. GAAP as a result of ASU

Table of Contents

No. 2011-04 are as follows: (1) The concepts of highest and best use and valuation premise are only relevant when measuring the fair value of nonfinancial assets (that is, it does not apply to financial assets or any liabilities); (2) U.S. GAAP currently prohibits application of a blockage factor in valuing financial instruments with quoted prices in active markets. ASU No. 2011-04 extends that prohibition to all fair value measurements; (3) An exception is provided to the basic fair value measurement principles for an entity that holds a group of financial assets and financial liabilities with offsetting positions in market risk or counterparty credit risk that are managed on the basis of the entity's net exposure to either of those risks. This exception allows the entity, if certain criteria are met, to measure the fair value of the net asset or liability position in a manner consistent with how market participants would price the net risk position; (4) Aligns the fair value measurement of instruments classified within an entity's shareholders' equity with the guidance for liabilities; and (5) Disclosure requirements have been enhanced for recurring Level 3 fair value measurements to disclose quantitative information about unobservable inputs and assumptions used, to describe the valuation processes used by the entity, and to describe the sensitivity of fair value measurements to changes in unobservable inputs and interrelationships between those inputs. In addition, entities must report the level in the fair value hierarchy of items that are not measured at fair value in the statement of condition but whose fair value must be disclosed. The provisions of ASU No. 2011-04 are effective for the Company's interim reporting period beginning on or after December 15, 2011. The adoption of ASU No. 2011-04 did not result in a material change to the Company's consolidated financial statements.

In June 2011, the FASB issued ASU No. 2011-05, Presentation of Comprehensive Income. The provisions of ASU No. 2011-05 allow an entity the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. The statement(s) are required to be presented with equal prominence as the other primary financial statements. ASU No. 2011-05 eliminates the option to present the components of other comprehensive income as part of the statement of changes in shareholders' equity but does not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. In December 2011, the FASB issued ASU 2011-12, Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05 which defers the effective date of the requirement to present separate line items on the income statement for reclassification adjustments of items out of accumulated other comprehensive income into net income. All other requirements in ASU 2011-05 are not affected by this Update. For a public entity, the ASUs are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. Early adoption was permitted. The adoption of these pronouncements resulted in a change to the presentation of the Company's financial statements but did not have an impact on the Company's financial condition or results of operations.

In September 2011, the FASB issued ASU No. 2011-08, Testing Goodwill for Impairment. The provisions of ASU No. 2011-08 simplify how entities, both public and nonpublic, test goodwill for impairment. The amendments in the Update permit an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in Topic 350. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. The provisions of ASU No. 2011-05 are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption was permitted, including for annual and interim goodwill impairment tests performed as of a date before September 15, 2011, if an entity's financial statements for the most recent annual or interim period have not yet been issued or, for nonpublic entities, have not yet been made available for issuance. The adoption of ASU No. 2011-08 is not expected to have a material effect on the Company's consolidated financial statements. The Company will perform annual testing for goodwill impairment at December 31, 2012.

Note 10 Other Matters

On June 6, 2012, the Board of Trustees of Northfield Bancorp, MHC (MHC) and the Board of Directors of the Company adopted a Plan of Conversion and Reorganization (the Plan). Pursuant to the Plan, the MHC will convert from the mutual holding company form of organization to the fully public form. The MHC will be merged

Table of Contents

into the Company, and the MHC will no longer exist. The Company will merge into a new Delaware corporation named Northfield Bancorp, Inc. As part of the conversion, the MHC's ownership interest of the Company will be offered for sale in a public offering. The existing publicly held shares of the Company, which represents the remaining ownership interest in the Company, will be exchanged for new shares of common stock of Northfield Bancorp, Inc., the new Delaware Corporation. The exchange ratio will ensure that immediately after the conversion and public offering, the public shareholders of the Company will own the same aggregate percentage of Northfield Bancorp, Inc. common stock that they owned immediately prior to that time (excluding shares purchased in the stock offering and cash received in lieu of fractional shares). When the conversion and public offering are completed, all of the capital stock of Northfield Bank will be owned by Northfield Bancorp, Inc., the Delaware Corporation.

The Plan provides for the establishment, upon the completion of the conversion, of special liquidation accounts for the benefit of certain depositors of Northfield Bank in an amount equal to the greater of the MHC's ownership interest in the retained earnings of the Company as of the date of the latest balance sheet contained in the prospectus or the retained earnings of Northfield Bank at the time it reorganized into the MHC. Following the completion of the conversion, under the rules of the Board of Governors of the Federal Reserve System, Northfield Bank will not be permitted to pay dividends on its capital stock to Northfield Bancorp, Inc., its sole shareholder, if Northfield Bank's shareholder's equity would be reduced below the amount of the liquidation accounts. The liquidation accounts will be reduced annually to the extent that eligible account holders have reduced their qualifying deposits. Subsequent increases will not restore an eligible account holder's interest in the liquidation accounts.

Additionally, due to recent changes in federal regulations applicable to mutual holding companies relating to the waiver of dividends by parent mutual holding companies, the Board of Directors has determined to delay the payment of any further cash dividends on the Company's common stock.

Direct costs of the conversion and public offering will be deferred and reduce the proceeds from the shares sold in the public offering. Costs of \$402,000 have been incurred related to the conversion as of June 30, 2012.

On February 22, 2012, Northfield Bancorp, Inc., Northfield Bancorp, MHC, and Northfield Bank were served with a summons and complaint related to a personal injury matter. The plaintiff was seeking damages of \$40 million. The matter relates to an injury sustained by an individual on a property owned by a borrower of the Bank, which secures a loan to the Bank. The borrower was named as a co-defendant. The Bank does not operate the subject property or have any interest in the property, other than as collateral for its loan. The case was dismissed in federal court on May 23, 2012 due to lack of subject matter jurisdiction and was re-filed in state court on June 21, 2012. Management believes the lawsuit is without merit. The Bank has \$12 million in insurance coverage and the complaint is being defended by the Bank's insurer. No accrual for loss has been established at June 30, 2012.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Northfield Bancorp, Inc. and subsidiaries:

We have audited the accompanying consolidated balance sheets of Northfield Bancorp, Inc. and subsidiaries (the Company) as of December 31, 2011 and 2010, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2011. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Northfield Bancorp, Inc. and subsidiaries as of December 31, 2011 and 2010, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 15, 2012 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Northfield Bancorp, Inc. and subsidiaries:

We have audited Northfield Bancorp, Inc. and subsidiaries' internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Northfield Bancorp, Inc. and subsidiaries' management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on Northfield Bancorp, Inc. and subsidiaries' internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. In addition, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Northfield Bancorp, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Northfield Bancorp, Inc. and subsidiaries as of December 31, 2011 and 2010, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2011, and our report dated March 15, 2012 expressed an unqualified opinion on those consolidated financial statements.

NORTHFIELD BANCORP, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(1) Summary of Significant Accounting Policies

The following significant accounting and reporting policies of Northfield Bancorp, Inc. and subsidiaries (collectively, the Company), conform to U.S. generally accepted accounting principles, or (GAAP), and are used in preparing and presenting these consolidated financial statements.

(a) Basis of Presentation

The consolidated financial statements are comprised of the accounts of Northfield Bancorp, Inc. and its wholly owned subsidiaries, Northfield Investment, Inc. and Northfield Bank (the Bank) and the Bank's wholly-owned significant subsidiaries, NSB Services Corp. and NSB Realty Trust. All significant intercompany accounts and transactions have been eliminated in consolidation.

Effective July 21, 2011, as a result of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act), the Bank began to be regulated and supervised by the Office of the Comptroller of the Currency and Northfield Bancorp, Inc. began to be regulated and supervised by the Board of Governors of the Federal Reserve System.

In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheets and revenues and expenses during the reporting periods. Actual results may differ significantly from those estimates and assumptions. A material estimate that is particularly susceptible to significant change in the near term is the allowance for loan losses. In connection with the determination of this allowance, management generally obtains independent appraisals for significant properties. In addition, judgments related to the amount and timing of expected cash flows from purchased credit-impaired loans, goodwill, securities valuation and impairment, and deferred income taxes, involve a higher degree of complexity and subjectivity and require estimates and assumptions about highly uncertain matters. Actual results may differ from the estimates and assumptions.

Certain prior year balances have been reclassified to conform to the current year presentation.

(b) Business

The Company, through its principal subsidiary, the Bank, provides a full range of banking services primarily to individuals and corporate customers in Richmond and Kings Counties in New York, and Union and Middlesex Counties in New Jersey. The Company is subject to competition from other financial institutions and to the regulations of certain federal and state agencies, and undergoes periodic examinations by those regulatory authorities.

(c) Cash Equivalents

Cash equivalents consist of cash on hand, due from banks, federal funds sold, and interest-bearing deposits in other financial institutions with an original term of three months or less.

(d) Securities

Securities are classified at the time of purchase, based on management's intention, as securities held-to-maturity, securities available-for-sale, or trading account securities. Securities held-to-maturity are those that management has the positive intent and ability to hold until maturity. Securities held-to-maturity are carried at amortized cost, adjusted for amortization of premiums and accretion of discounts using the level-yield method over the contractual term of the securities, adjusted for actual prepayments. Securities available-for-sale represents all securities not classified as either held-to-maturity or trading. Securities available-for-sale are carried at estimated fair value with unrealized holding gains and losses (net of related tax effects) on such securities excluded from earnings, but included as a separate component of stockholders' equity, titled

Edgar Filing: Northfield Bancorp, Inc. - Form 424B3

Accumulated other comprehensive income (loss). The cost of securities sold is determined using the specific-identification method.

F-35

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES**

Notes to Consolidated Financial Statements (Continued)

Security transactions are recorded on a trade-date basis. Trading securities are securities that are bought and may be held for the purpose of selling them in the near term. Trading securities are reported at estimated fair value, with unrealized holding gains and losses reported as a component of gain (loss) on securities transactions, net in non-interest income.

Our evaluation of other-than-temporary impairment considers the duration and severity of the impairment, our intent and ability to hold the securities, and our assessments of the reason for the decline in value and the likelihood of a near-term recovery. If a determination is made that a debt security is other-than-temporarily impaired, the Company will estimate the amount of the unrealized loss that is attributable to credit and all other non-credit related factors. The credit related component will be recognized as an other-than-temporary impairment charge in non-interest income. The non-credit related component will be recorded as an adjustment to accumulated other comprehensive income (loss), net of tax. The estimated fair value of debt securities, including mortgage-backed securities and corporate debt obligations is furnished by an independent third party pricing service. The third party pricing service primarily utilizes pricing models and methodologies that incorporate observable market inputs, including among other things, benchmark yields, reported trades, and projected prepayment and default rates. Management reviews the data and assumptions used in pricing the securities by its third party provider for reasonableness.

(e) Loans

During the fourth quarter of 2011, the Company acquired a loan portfolio, with deteriorated credit quality, from the Federal Deposit Insurance Corporation, herein referred to as purchased credit-impaired loans, and transferred certain loans, previously originated and designated by the Company as held-for-investment, to held-for-sale. The accounting and reporting for these loans differs substantially from those loans originated and classified by the Company as held-for-investment. For purposes of reporting, discussion and analysis, management has classified its loan portfolio into three categories: (1) loans originated by the Company and held-for-sale, which are carried at the lower of aggregate cost or estimated fair value, less costs to sell, and therefore have no associated allowance for loan losses, (2) purchased credit-impaired (PCI) loans, which are held-for-investment, and initially valued at estimated fair value on the date of acquisition, with no initial related allowance for loan losses, and (3) originated loans held-for-investment, which are carried at amortized cost, less net charge-offs and the allowance for loan losses.

Originated net loans held-for-investment are stated at unpaid principal balance, adjusted by unamortized premiums and unearned discounts, deferred origination fees and certain direct origination costs, and the allowance for loan losses. Interest income on loans is accrued and credited to income as earned. Net loan origination fees/costs are deferred and accreted/amortized to interest income over the loan's contractual life using the level-yield method, adjusted for actual prepayments. Generally, loans held-for-sale are designated at time of origination and routinely consist of newly originated fixed rate residential loans and are recorded at the lower of aggregate cost or estimated fair value in the aggregate. In 2011, the Company transferred from held-for-investment to held-for-sale certain impaired loans. Transfers from held-for-investment are infrequent and occur at fair value less costs to sell, with any charge-off to allowance for loan losses. Gains are recognized on a settlement-date basis and are determined by the difference between the net sales proceeds and the carrying value of the loans, including any net deferred fees or costs.

Originated net loans held-for-investment are deemed impaired when it is probable, based on current information, that the Company will not collect all amounts due in accordance with the contractual terms of the loan agreement. The Company has defined the population of originated impaired loans to be all originated non-accrual loans held-for-investment with an outstanding balance of \$500,000 or greater. Originated impaired loans held-for-investment are individually assessed to determine that the loan's carrying value is not in excess of the expected future cash flows, discounted at the loans original effective interest rate, or the underlying collateral (less estimated costs to sell) if the loan is collateral dependent. Impairments are recognized through a charge to the provision for loan losses for the amount that the loan's carrying value exceeds the discounted cash flow analysis or estimated fair value.

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES**

Notes to Consolidated Financial Statements (Continued)

of collateral (less estimated costs to sell) if the loan is collateral dependent. Homogeneous loans with balances less than \$500,000 are collectively evaluated for impairment.

The allowance for loan losses is increased by the provision for loan losses charged against income and is decreased by charge-offs, net of recoveries. Loan losses are charged-off in the period the loans, or portion thereof, are deemed uncollectible. Generally, the Company will record a loan charge-off (including a partial charge-off) to reduce a loan to the estimated fair value of the underlying collateral, less cost to sell, if it is determined that it is probable that recovery will come primarily from the sale of such collateral. The provision for loan losses is based on management's evaluation of the adequacy of the allowance which considers, among other things, originated impaired loans held-for-investment, deterioration in PCI loans subsequent to acquisition, past loan loss experience, known and inherent risks in the portfolio, existing adverse situations that may affect the borrower's ability to repay, and estimated value of any underlying collateral securing loans. Additionally, management evaluates changes, if any, in underwriting standards, collection, charge-off and recovery practices, the nature or volume of the portfolio, lending staff, concentration of loans, as well as current economic conditions, and other relevant factors. Management believes the allowance for loan losses is adequate to provide for probable and reasonably estimable losses at the date of the consolidated balance sheets. The Company also maintains an allowance for estimated losses on off-balance sheet credit risks related to loan commitments and standby letters of credit. Management utilizes a methodology similar to its allowance for loan loss adequacy methodology to estimate losses on these commitments. The allowance for estimated credit losses on off-balance sheet commitments is included in other liabilities and any changes to the allowance are recorded as a component of other non-interest expense.

While management uses available information to recognize probable and reasonably estimable losses on loans, future additions may be necessary based on changes in conditions, including changes in economic conditions, particularly in Richmond and Kings Counties in New York, and Union and Middlesex Counties in New Jersey. Accordingly, as with most financial institutions in the market area, the ultimate collectability of a substantial portion of the Company's loan portfolio is susceptible to changes in conditions in the Company's marketplace. In addition, future changes in laws and regulations could make it more difficult for the Company to collect all contractual amounts due on its loans and mortgage-backed securities.

In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Company's allowance for loan losses. Such agencies may require the Company to recognize additions to the allowance based on their judgments about information available to them at the time of their examination.

Troubled debt restructured loans are those loans whose terms have been modified because of deterioration in the financial condition of the borrower. Modifications could include extension of the terms of the loan, reduced interest rates, and forgiveness of accrued interest and/or principal. Once an obligation has been restructured because of such credit problems, it continues to be considered restructured until paid in full or, if the obligation yields a market rate (a rate equal to the rate the Company was willing to accept at the time of the restructuring for a new loan with comparable risk), until the year subsequent to the year in which the restructuring takes place, provided the borrower has performed under the modified terms for a six-month period. The Company records an impairment charge equal to the difference between the present value of estimated future cash flows under the restructured terms discounted at the original loans effective interest rate, or the underlying collateral value less costs to sell, if the loan is collateral dependent. Changes in present values attributable to the passage of time are recorded as a component of the provision for loan losses.

A loan is considered past due when it is not paid in accordance with its contractual terms. The accrual of income on loans, including originated impaired loans held-for-investment, and other loans in the process of foreclosure, is generally discontinued when a loan becomes 90 days or more delinquent, or when certain factors indicate that the ultimate collection of principal and interest is in doubt. Loans on which the accrual of income has been discontinued are designated as non-accrual loans. All previously accrued interest is reversed against interest income, and income is recognized subsequently only in the

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES**

Notes to Consolidated Financial Statements (Continued)

period that cash is received, provided no principal payments are due and the remaining principal balance outstanding is deemed collectible. A non-accrual loan is not returned to accrual status until both principal and interest payments are brought current and factors indicating doubtful collection no longer exist, including performance by the borrower under the loan terms for a six-month period.

The Company accounts for the PCI loans acquired as a result of the FDIC-assisted transaction in October 2011 based on expected cash flows (Please see Note 2, Business Combinations, for further information regarding the acquisition). This election is in accordance with FASB Accounting Standards Codification (ASC) Topic 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality (ASC 310-30). In accordance with ASC 310-30, the Company will maintain the integrity of a pool of multiple loans accounted for as a single asset and evaluate the pools for impairment, and accrual status, based on variances from the expected cash flows.

(f) Federal Home Loan Bank Stock

The Bank, as a member of the Federal Home Loan Bank of New York (the FHLB), is required to hold shares of capital stock in the FHLB as a condition to both becoming a member and engaging in certain transactions with the FHLB. The minimum investment requirement is determined by a membership investment component and an activity-based investment component. The membership investment component is the greater of 0.20% of the Bank's mortgage-related assets, as defined by the FHLB, or \$1,000. The activity-based investment component is equal to 4.5% of the Bank's outstanding advances with the FHLB. The activity-based investment component also considers other transactions, including assets originated for or sold to the FHLB, and delivery commitments issued by the FHLB. The Company currently does not enter into these other types of transactions with the FHLB.

On a quarterly basis, we perform our other-than-temporary impairment analysis of FHLB stock, we evaluate, among other things, (i) its earnings performance, including the significance of any decline in net assets of the FHLB as compared to the regulatory capital amount of the FHLB, (ii) the commitment by the FHLB to continue dividend payments, and (iii) the liquidity position of the FHLB. We did not consider our investment in FHLB stock to be other-than-temporarily impaired at December 31, 2011.

(g) Premises and Equipment, Net

Premises and equipment, including leasehold improvements, are carried at cost, less accumulated depreciation and amortization. Depreciation and amortization of premises and equipment, including capital leases, are computed on a straight-line basis over the estimated useful lives of the related assets. The estimated useful lives of significant classes of assets are generally as follows: buildings—forty years; furniture and equipment—five to seven years; and purchased computer software—three years. Leasehold improvements are amortized over the shorter of the term of the related lease or the estimated useful lives of the improvements. Major improvements are capitalized, while repairs and maintenance costs are charged to operations as incurred. Upon retirement or sale, any gain or loss is credited or charged to operations.

(h) Bank Owned Life Insurance

The Company has purchased bank owned life insurance contracts to help fund its obligations for certain employee benefit costs. The Company's investment in such insurance contracts has been reported in the consolidated balance sheets at their cash surrender values. Changes in cash surrender values and death benefit proceeds received in excess of the related cash surrender values are recorded as non-interest income.

(i) Goodwill

Goodwill is presumed to have an indefinite useful life and is not amortized, but rather is tested, at least annually, for impairment at the reporting unit level. For purposes of the Company's goodwill impairment testing, management has identified a single reporting unit. The Company uses the quoted market price of its common stock on the impairment testing date as the basis for estimating the fair

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES**

Notes to Consolidated Financial Statements (Continued)

value of the Company's reporting unit. If the fair value of the reporting unit exceeds its carrying amount, further evaluation is not necessary. However, if the fair value of the reporting unit is less than its carrying amount, further evaluation is required to compare the implied fair value of the reporting unit's goodwill to its carrying amount to determine if a write-down of goodwill is required. As of December 31, 2011, the carrying value of goodwill totaled \$16.2 million. The Company performed its annual goodwill impairment test, as of December 31, 2011, and determined the fair value of the Company's single reporting unit to be in excess of its carrying value. Accordingly, as of the annual impairment test date, there was no indication of goodwill impairment. The Company will test goodwill for impairment between annual test dates if an event occurs or circumstances change that would indicate the fair value of the reporting unit is below its carrying amount. No events have occurred and no circumstances have changed since the annual impairment test date that would indicate the fair value of the reporting unit is below its carrying amount.

(j) Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply in the year in which those temporary differences are expected to be recovered or settled. When applicable, deferred tax assets are reduced by a valuation allowance for any portions determined not likely to be realized. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Income tax benefits are recognized and measured based upon a two-step model: 1) a tax position must be more-likely-than-not to be sustained based solely on its technical merits in order to be recognized, and 2) the benefit is measured as the largest dollar amount of that position that is more-likely-than-not to be sustained upon settlement. The difference between the benefit recognized and the tax benefit claimed on a tax return is referred to as an unrecognized tax benefit (UTB). The Corporation records income tax-related interest and penalties, if applicable, within income tax expense.

(k) Impairment of Long-Lived Assets

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future undiscounted (and without interest) net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

(l) Securities Sold Under Agreements to Repurchase and Other Borrowings

The Company enters into sales of securities under agreements to repurchase (Repurchase Agreements) and collateral pledge agreements (Pledge Agreements) with selected dealers and banks. Such agreements are accounted for as secured financing transactions since the Company maintains effective control over the transferred or pledged securities and the transfer meets the other accounting and recognition criteria as required by the transfer and servicing topic of the FASB Accounting Standards. Obligations under these agreements are reflected as a liability in the consolidated balance sheets. Securities underlying the agreements are maintained at selected dealers and banks as collateral for each transaction executed and may be sold or pledged by the counterparty. Collateral underlying Repurchase Agreements which permit the counterparty to sell or pledge the underlying collateral is disclosed on the consolidated balance sheets as encumbered. The Company retains the right under all Repurchase Agreements and Pledge Agreements to substitute acceptable collateral throughout the terms of the agreement.

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES**

Notes to Consolidated Financial Statements (Continued)

(m) Comprehensive Income

Comprehensive income includes net income and the change in unrealized holding gains and losses on securities available-for-sale, change in actuarial gains and losses on other post retirement benefits, and change in service cost on other postretirement benefits, net of taxes. Comprehensive income is presented in the Consolidated Statements of Changes in Stockholders' Equity.

(n) Employee Benefits

The Company sponsors a defined postretirement benefit plan that provides for medical and life insurance coverage to a limited number of retirees, as well as life insurance to all qualifying employees of the Company. The estimated cost of postretirement benefits earned is accrued during an individual's estimated service period to the Company. The Company recognizes in its balance sheet the over-funded or under-funded status of a defined benefit postretirement plan measured as the difference between the fair value of plan assets and the benefit obligation at the end of our calendar year. The actuarial gains and losses and the prior service costs and credits that arise during the period are recognized as a component of other comprehensive income, net of tax.

Funds borrowed by the Employee Stock Ownership Plan (ESOP) from the Company to purchase the Company's common stock are being repaid from the Bank's contributions over a period of up to 30 years. The Company's common stock not yet allocated to participants is recorded as a reduction of stockholders' equity at cost. The Company records compensation expense related to the ESOP at an amount equal to the shares committed to be released by the ESOP multiplied by the average fair value of our common stock during the reporting period.

The Company recognizes the grant-date fair value of stock based awards issued to employees as compensation cost in the consolidated statements of income. The fair value of common stock awards is based on the closing price of our common stock as reported on the NASDAQ Stock Market on the grant date. The expense related to stock options is based on the estimated fair value of the options at the date of the grant using the Black-Scholes pricing model. The awards are fixed in nature and compensation cost related to stock based awards is recognized on a straight-line basis over the requisite service periods.

The Bank has a 401(k) plan covering substantially all employees. Contributions to the plan are expensed as incurred.

(o) Segment Reporting

As a community-focused financial institution, substantially all of the Company's operations involve the delivery of loan and deposit products to customers. Management makes operating decisions and assesses performance based on an ongoing review of these community banking operations, which constitute the Company's only operating segment for financial reporting purposes.

(p) Net Income per Common Share

Net income per common share-basic is computed by dividing the net income available to common stockholders by the weighted average number of common shares outstanding, excluding unallocated ESOP shares and unearned common stock award shares. The weighted average common shares outstanding includes the average number of shares of common stock outstanding, including shares held by Northfield Bancorp, MHC and allocated or committed to be released ESOP shares.

Net income per common share-diluted is computed using the same method as basic earnings per share, but reflects the potential dilution that could occur if stock options and unvested shares of restricted stock were exercised and converted into common stock. These potentially dilutive shares are included in the weighted average number of shares outstanding for the period using the treasury stock method. When applying the treasury stock method, we add: (1) the assumed proceeds from option exercises; (2) the tax benefit, if any, that would have been credited to additional paid-in capital assuming exercise of non-qualified stock options and vesting of shares of restricted stock; and (3) the average unamortized

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES**

Notes to Consolidated Financial Statements (Continued)

compensation costs related to unvested shares of restricted stock and stock options. We then divide this sum by our average stock price for the period to calculate assumed shares repurchased. The excess of the number of shares issuable over the number of shares assumed to be repurchased is added to basic weighted average common shares to calculate diluted earnings per share. At December 31, 2011, 2010, and 2009, there were 446,254, 281,900 and 126,974 dilutive shares outstanding, respectively.

(q) Other Real Estate Owned

Assets acquired through loan foreclosure, or deed-in-lieu of, are held for sale and are initially recorded at estimated fair value less estimated selling costs when acquired, thus establishing a new cost basis. Costs after acquisition are generally expensed. If the estimated fair value of the asset declines, a write-down is recorded through other non-interest expense.

(2) Business Combination

On October 14, 2011, the Bank assumed all of the deposits and acquired essentially all of the assets of a failed New Jersey State-chartered bank, from the Federal Deposit Insurance Corporation (the FDIC) as receiver for the failed bank, pursuant to the terms of the Purchase and Assumption Agreement, dated October 14, 2011, between the Bank and the FDIC.

The application of the acquisition method of accounting resulted in a bargain purchase gain of \$3.6 million, net of tax, which is included in non-interest income in the Company's Consolidated Statement of Income for the year ended December 31, 2011.

A summary of the net assets acquired and the estimated fair value adjustments resulting in the net gain follows:

	October 14, 2011 (in thousands)
Transaction cost basis liabilities in excess of assets	\$ (3,692)
Receivable from the FDIC	50,502
Net assets acquired before fair value adjustments	46,810
Fair value adjustments:	
Loans	(40,506)
Other real estate owned	(1,531)
Core deposit intangible	1,160
Pre-tax bargain purchase gain	5,933
Deferred income tax liability	(2,373)
Net after-tax bargain purchase gain	\$ 3,560

Other liabilities	480
Deferred tax liabilities	2,373
Total liabilities assumed	\$ 191,087
Net assets acquired	\$ 3,560

Fair Value of Assets Acquired and Liabilities Assumed

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected cash flows and loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with a high degree of precision. Changes in assumptions could significantly affect the estimates.

The following is a description of valuation methodologies used for assets and liabilities recorded at fair value on the acquisition date. The determination of where an instrument falls in the fair value hierarchy requires significant judgment.

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES**

Notes to Consolidated Financial Statements (Continued)

Cash and Cash Equivalents and Receivable from FDIC

Included in the acquired cash and cash equivalents were cash and due from banks of \$23.9 million and federal funds sold of \$3.0 million. The estimated fair values of cash and cash equivalents and the receivable from the FDIC of \$50.5 million approximate their stated face amounts, as these financial instruments are either due on demand or have short-term maturities.

Investment Securities and Federal Home Loan Bank of New York (FHLB) Stock

Estimated fair values for the securities was derived from observable inputs (Level 2). The estimated fair values were derived primarily from cash flow models, which include assumptions for interest rates, credit losses, and prepayment speeds. Broker/dealer quotes are utilized as well when such quotes are available and deemed representative of the market. The significant inputs utilized in the cash flow models are based on market data obtained from sources independent of the Company (observable inputs).

The redemption value of the FHLB stock approximates fair value.

Loans

The loans are accounted for under FASB ASC Topic 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality, since all of these loans were acquired at a discount attributable, at least in part, to credit quality and are referred to as PCI loans. At the October 14, 2011 acquisition date, we estimated the fair value of the loan portfolio, at \$91.9 million, which represents the expected cash flows from the portfolio discounted at market-based rates with no valuation allowance. In estimating such fair value, we (a) calculated the contractual recorded amount and timing of undiscounted principal and interest payments (the undiscounted contractual cash flows); and (b) estimated the amount and timing of undiscounted expected principal and interest payments (the undiscounted expected cash flows). The difference between the undiscounted cash flows expected at acquisition and the investment in the PCI loans, or the accretable yield, is recognized as interest income utilizing the level yield method over the life of the loans. Contractually required payments for interest and principal that exceed the undiscounted cash flows expected at acquisition, or the non-accretable difference, are not recognized as a yield adjustment or as a loss accrual or a valuation allowance. The nonaccretable difference represents an estimate of the credit risk in the loan portfolio at the acquisition date. We estimated the cash flows expected to be collected by using credit risk, interest rate risk, and prepayment risk models, which incorporate our best estimate of current key assumptions, such as default rates, loss severity rates, collateral values and prepayment speeds. We adopted guidelines under FASB ASC Topic 310-30, whereby the Bank aggregated acquired loans into pools, with common risk characteristics. Each pool of loans is accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows.

The loans acquired in the transaction are, and will continue to be, reviewed for collectability, based on the expectations of cash flows on these loans. Increases in expected cash flows subsequent to the acquisition are recognized prospectively through an adjustment of the yield on the pool over its remaining life, while decreases in expected cash flows are recognized as impairment through a loss provision and an increase in the allowance for loan losses.

The following details the accretable yield for the year ended December 31, 2011 (in thousands):

	For the Year Ended December 31, 2011
Balance at the beginning of year	\$
Accretable yield at purchase date	43,937
Accretion into interest income	(1,444)
Net reclassification from / (to) non-accretable difference	

Edgar Filing: Northfield Bancorp, Inc. - Form 424B3

Balance at end of year	\$	42,493
------------------------	----	--------

F-43

Table of Contents

NORTHFIELD BANCORP, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

Core Deposit Intangible (CDI)

CDI is a measure of the value of the customer relationships in non-maturity deposits. The fair value of the CDI is based on the present value of the expected cost savings attributable to this funding, relative to an alternative source of funding (Level 2). The CDI related to the acquisition will be amortized over an estimated useful life of seven years to approximate the existing deposit relationships acquired. The Company evaluates such identifiable intangibles for impairment when an indication of impairment exists.

Other real estate owned

Other real estate owned (OREO) estimated fair values are based on unobservable inputs (Level 3) such as recent comparable sales, current listings of similar properties, and appraisal reports prepared by qualified independent third party appraisers, less estimated disposition costs, discounted over the estimated holding period.

Deposit Liabilities

The fair values of deposit liabilities with no stated maturity (i.e., NOW and money market accounts, savings accounts, and non-interest-bearing accounts) are equal to the carrying amounts payable on demand. The fair values of certificates of deposit are equal to the carrying amount payable. All rates on certificate of deposits were adjusted in accordance with FDIC rules, regulations, and powers to current market rates based on the remaining maturity of the account, therefore the carrying value approximates fair value.

Deferred Income Taxes

Deferred income taxes relate to the differences between the financial statement and tax bases of assets acquired and liabilities assumed in the transaction. The Company's deferred income taxes were measured using a combined federal and state tax rate of approximately 40%.

(3) Securities Available-for-Sale

The following is a comparative summary of mortgage-backed securities and other securities available-for-sale at December 31 (in thousands):

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES**

Notes to Consolidated Financial Statements (Continued)

	2011			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Mortgage-backed securities:				
Pass-through certificates:				
Government sponsored enterprises (GSE)	\$ 490,184	\$ 24,709	\$	\$ 514,893
Non-GSE	8,770		1,255	7,515
Real estate mortgage investment conduits (REMICs):				
GSE	426,362	4,662	135	430,889
Non-GSE	31,114	1,859	37	32,936
	956,430	31,230	1,427	986,233
Other securities:				
Equity investments-mutual funds	11,787	48		11,835
Corporate bonds	100,922	358	623	100,657
	112,709	406	623	112,492
Total securities available-for-sale	\$ 1,069,139	\$ 31,636	\$ 2,050	\$ 1,098,725

	2010			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Mortgage-backed securities:				
Pass-through certificates:				
Government sponsored enterprises (GSE)	\$ 342,316	\$ 13,479	\$	\$ 355,795
Non-GSE	27,801	814	737	27,878
Real estate mortgage investment conduits (REMICs):				
GSE	622,582	3,020	3,525	622,077
Non-GSE	65,766	3,674	51	69,389
	1,058,465	20,987	4,313	1,075,139
Other securities:				
Equity investments-mutual funds	12,437	31	115	12,353
GSE bonds	34,988	45		35,033
Corporate bonds	119,765	2,146	123	121,788
	167,190	2,222	238	169,174
Total securities available-for-sale	\$ 1,225,655	\$ 23,209	\$ 4,551	\$ 1,244,313

The following is a summary of the expected maturity distribution of debt securities available-for-sale other than mortgage-backed securities at December 31, 2011 (in thousands):

Available-for-sale	Amortized Cost	Estimated Fair Value
Due in one year or less	\$ 30,354	\$ 30,552
Due after one year through five years	70,568	70,105
	\$ 100,922	\$ 100,657

Expected maturities on mortgage-backed securities will differ from contractual maturities as borrowers may have the right to call or prepay obligations with or without penalties.

Certain securities available-for-sale are pledged to secure borrowings under Pledge Agreements and Repurchase Agreements and for other purposes required by law. At December 31, 2011, and December 31, 2010, securities available-for-sale with a carrying value of \$3,992,000 and \$5,725,000, respectively, were pledged to secure deposits. See Note 8 for further discussion regarding securities pledged for borrowings.

For the year ended December 31, 2011, the Company had gross proceeds of \$182.7 million on sales of securities available-for-sale with gross realized gains and gross realized losses of approximately \$2.9 million

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES**

Notes to Consolidated Financial Statements (Continued)

and \$177,000, respectively. For the year ended December 31, 2010, the Company had gross proceeds of \$221.2 million on sales of securities available-for-sale with gross realized gains and gross realized losses of approximately \$1.3 million and \$4,000, respectively. For the year ended December 31, 2009, the Company had gross proceeds of \$3.3 million on sales of securities available-for-sale with gross realized gains and gross realized losses of approximately \$89,000 and \$0, respectively. The Company routinely sells securities when market pricing presents, in management's assessment, an economic benefit that outweighs holding such security, and when smaller balance securities become cost prohibitive to carry.

The Company recognized other-than-temporary impairment charges of \$1.2 million during the year ended December 31, 2011, related to one equity investment in a mutual fund and two private label mortgage-backed securities. The Company recognized the credit component of \$409,000 in earnings and the non-credit component of \$743,000 as a component of accumulated other comprehensive income, net of tax. The Company recognized other-than-temporary impairment charges of \$962,000 during the year ended December 31, 2010, related to one private label mortgage-backed security. The Company recognized the credit component of \$154,000 in earnings and the non-credit component of \$808,000 as a part of accumulated other comprehensive income, net of tax. The Company recognized other-than-temporary impairment charges of \$1.4 million during the year ended December 31, 2009, related to one private label mortgage-backed security. The Company recognized the credit component of \$176,000 in earnings and the non-credit component of \$1.2 million as a part of accumulated other comprehensive income, net of tax.

The following is a rollforward of 2011, 2010, and 2009 activity related to the credit component of other-than-temporary impairment recognized on debt securities in pre-tax earnings, for which a portion of other-than-temporary impairment was recognized in accumulated other comprehensive income (in thousands):

	2011	2010	2009
Balance, beginning of year	\$ 330	\$ 176	\$
Additions to the credit component on debt securities in which other-than-temporary impairment was not previously recognized	248	154	176
Cumulative pre-tax credit losses, end of year	\$ 578	\$ 330	\$ 176

In addition, the Company recorded other-than-temporary impairment of \$161,000 in 2011 on equity securities.

Gross unrealized losses on mortgage-backed securities, equity securities, agency bonds, and corporate bonds available-for-sale, and the estimated fair value of the related securities, aggregated by security category and length of time that individual securities have been in a continuous unrealized loss position, at December 31, 2011 and 2010, were as follows (in thousands):

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES**

Notes to Consolidated Financial Statements (Continued)

	Less than 12 months		December 31, 2011		Total	
	Unrealized losses	Estimated fair value	Unrealized losses	Estimated fair value	Unrealized losses	Estimated fair value
Mortgage-backed securities:						
Pass-through certificates:						
Non-GSE	307	2,513	948	5,002	1,255	7,515
Real estate mortgage investment conduits (REMICs):

Non-GSE			37	842	37	842
Corporate bonds	113	27,523	510	13,132	623	40,655
Total	\$ 555	\$ 84,511	\$ 1,495	\$ 18,976	\$ 2,050	\$ 103,487

	Less than 12 months		December 31, 2010		Total	
	Unrealized losses	Estimated fair value	Unrealized losses	Estimated fair value	Unrealized losses	Estimated fair value
Mortgage-backed securities:						
Pass-through certificates:						
Non-GSE	\$	\$	\$ 737	\$ 10,126	\$ 737	\$ 10,126
Real estate mortgage investment conduits (REMICs):						
GSE	3,525	344,971			3,525	344,971
Non-GSE			51	1,238	51	1,238
Corporate bonds	123	13,880			123	13,880
Equity Investments - mutual funds	115	4,884			115	4,884
Total	\$ 3,763	\$ 363,735	\$ 788	\$ 11,364	\$ 4,551	\$ 375,099

Included in the above available-for-sale security amounts at December 31, 2011, was one pass-through non-GSE mortgage-backed security in a continuous unrealized loss position of greater than twelve months that was rated less than investment grade at December 31, 2011. The security had an estimated fair value of \$5.0 million (amortized cost of \$5.9 million), was rated Caa2, and had the following underlying collateral characteristics: 83% originated in 2004, and 17% originated in 2005. The rating of the security detailed above represents the lowest rating received from the rating agencies of Moody's, Standard & Poor's, and Fitch. The Company continues to receive principal and interest payments in accordance with the contractual terms of this security. Management has evaluated, among other things, delinquency status, location of collateral, estimated prepayment speeds, and the estimated default rates and loss severity in liquidating the underlying collateral of this security. As a result of management's evaluation of this security, the Company recognized, during the year ended December 31, 2011, other-than-temporary impairment of \$593,000. Since management does not have the intent to sell the security, and believes it is more likely than not that the Company will not be required to sell the security, before its anticipated recovery (which may be at maturity), the credit component of \$139,000 was recognized in earnings, and the non-credit component of \$454,000 was recorded as a component of accumulated other comprehensive income, net of tax.

In addition to the one pass-through non-GSE mortgage-backed security discussed above, the Company had one additional private label security that was rated less than investment grade at December 31, 2011. The security had an estimated fair value of \$2.5 million (amortized cost of \$2.8 million), was rated C, and was supported by collateral which was originated in 2006. The rating of the security detailed above represents the lowest rating for the security received from the rating agencies of Moody's, Standard & Poor's, and Fitch. The Company continues to receive principal and interest payments in accordance with the contractual terms of this security. Management has evaluated, among other things, delinquency status, location of collateral, estimated prepayment speeds, and the estimated default rates and loss severity in liquidating the underlying collateral for this security. As a result of management's evaluation of this security, the Company recognized

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES**

Notes to Consolidated Financial Statements (Continued)

during the year ended December 31, 2011, other than temporary impairment of \$398,000. Since management does not have the intent to sell the security and believes it is more likely than not that the Company will not be required to sell the security, before its anticipated recovery (which may be maturity), the credit component of \$109,000 was recognized in earnings, and the non credit component of \$289,000 was recorded as a component of accumulated other comprehensive income, net of tax.

The Company held one REMIC non-GSE mortgage-backed security that was in a continuous unrealized loss position of greater than twelve months, three corporate bonds, two pass-through GSE mortgage-backed securities, and five REMIC mortgage-backed securities issued or guaranteed by GSEs, that were in an unrealized loss position of less than twelve months, and rated investment grade at December 31, 2011. The declines in value relate to the general interest rate environment and are considered temporary. The securities cannot be prepaid in a manner that would result in the Company not receiving substantially all of its amortized cost. The Company neither has an intent to sell, nor is it more likely than not that the Company will be required to sell, the securities before the recovery of their amortized cost basis or, if necessary, maturity.

The fair values of our investment securities could decline in the future if the underlying performance of the collateral for the collateralized mortgage obligations or other securities deteriorates and our credit enhancement levels do not provide sufficient protections to our contractual principal and interest. As a result, there is a risk that significant other-than-temporary impairments may occur in the future given the current economic environment.

(4) Securities Held-to-Maturity

The following is a comparative summary of mortgage-backed securities held-to-maturity at December 31 (in thousands):

	2011			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Mortgage-backed securities:				
Pass-through certificates:				
GSE	\$ 629	\$ 43	\$	\$ 672
Real estate mortgage investment conduits (REMICs):				
GSE	2,988	111		3,099
Total securities held-to-maturity	\$ 3,617	\$ 154	\$	\$ 3,771

	2010			
	Amortized	Gross	Gross	Estimated
Mortgage-backed securities:				
Pass-through certificates:				
GSE	\$ 854	\$ 45	\$	\$ 899
Real estate mortgage investment conduits (REMICs):				
GSE	4,206	168		4,374
Total securities held-to-maturity	\$ 5,060	\$ 213	\$	\$ 5,273

The Company did not sell any held-to-maturity securities during the years ended December 31, 2011, 2010 and 2009.

Edgar Filing: Northfield Bancorp, Inc. - Form 424B3

The fair values of our investment securities could decline in the future if the underlying performance of the collateral for the collateralized mortgage obligation or other securities deteriorates and our credit enhancement levels do not provide sufficient protections to our contractual principal and interest. As a result,

F-48

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES**

Notes to Consolidated Financial Statements (Continued)

there is a risk that significant other-than-temporary impairments may occur in the future given the current economic environment.

(5) Loans

Loans held-for-investment, net, consists of the following at December 31, 2011 and 2010 (in thousands):

	December 31,	
	2011	2010
Originated Loans:		
Real estate loans:		
Multifamily	\$ 458,370	\$ 283,588
Commercial mortgage	327,074	339,321
One-to-four family residential mortgage	72,592	78,032
Home equity and lines of credit	29,666	28,125
Construction and land	23,460	35,054
Total real estate loans	911,162	764,120
Commercial and industrial loans	12,710	17,020
Insurance premium loans	59,096	44,517
Other loans	1,496	1,062
Total commercial and industrial, insurance premium, and other loans	73,302	62,599
Deferred loan cost, net	1,481	872
Originated loans, net	985,945	827,591
PCI loans	88,522	
Loans held-for-investment, net	1,074,467	827,591
Allowance for loan losses	(26,836)	(21,819)
Net loans held-for-investment	\$ 1,047,631	\$ 805,772

The Company had \$3.9 million and \$1.2 million in loans held-for-sale at December 31, 2011 and 2010, respectively. Loans held-for-sale included \$3.4 million and \$0 of non-accrual loans at December 31, 2011 and 2010.

The Company does not have any lending programs commonly referred to as subprime lending. Subprime lending generally targets borrowers with weakened credit histories typically characterized by payment delinquencies, previous charge-offs, judgments, bankruptcies, or borrowers with questionable repayment capacity as evidenced by low credit scores or high debt-burden ratios.

The Company, through its principal subsidiary, the Bank, serviced \$41.3 million and \$52.1 million of loans at December 31, 2011 and 2010, respectively, for Freddie Mac. These one- to four-family residential mortgage real estate loans were underwritten to Freddie Mac guidelines and to comply with applicable federal, state, and local laws. At the time of the closing of these loans the Company owned the loans and subsequently sold them to Freddie Mac providing normal and customary representations and warranties, including representations and warranties related to compliance with Freddie Mac underwriting standards. At the time of sale, the loans were free from encumbrances except for the mortgages filed

Edgar Filing: Northfield Bancorp, Inc. - Form 424B3

for by the Company which, with other underwriting documents, were subsequently assigned and delivered to Freddie Mac. At December 31, 2011, substantially all of the loans serviced for Freddie Mac were performing in accordance with their contractual terms and management believes that it has no material repurchase obligations associated with these loans. Servicing of loans for others does not have a significant effect on our financial position or results of operations.

We provide for loan losses based on the consistent application of our documented allowance for loan loss methodology. Loan losses are charged to the allowance for loans losses and recoveries are credited to it. Additions to the allowance for loan losses are provided by charges against income based on various factors

F-49

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES**

Notes to Consolidated Financial Statements (Continued)

which, in our judgment, deserve current recognition in estimating probable losses. Loan losses are charged-off in the period the loans, or portion thereof, are deemed uncollectible. Generally, the Company will record a loan charge-off (including a partial charge-off) to reduce a loan to the estimated fair value of the underlying collateral, less cost to sell, for collateral dependent loans. We regularly review the loan portfolio and make adjustments for loan losses in order to maintain the allowance for loan losses in accordance with U.S. generally accepted accounting principles (GAAP). At December 31, 2011 management's evaluation of estimated cash flows related to PCI loan pools was consistent with estimates utilized to determine estimated fair values on date of acquisition and therefore no provision for loan losses was deemed necessary in 2011. At December 31, 2011 and 2010, the allowance for loan losses related solely to originated loans held-for-investment and consisted primarily of the following two components:

- (1) Specific allowances are established for originated impaired loans (generally defined by the company as non-accrual loans with an outstanding balance of \$500,000 or greater). The amount of impairment provided for as an allowance is represented by the deficiency, if any, between the present value of expected future cash flows discounted at the original loan's effective interest rate or the underlying collateral value (less estimated costs to sell,) if the loan is collateral dependent, and the carrying value of the loan. Impaired loans that have no impairment losses are not considered for general valuation allowances described below. Generally, the Company charges down a loan to the estimated fair value of the underlying collateral, less costs to sell, and maintains an allowance for loan losses for expected losses related to discounts to facilitate a sale of the property.
- (2) General allowances are established for loan losses on a portfolio basis for originated loans that do not meet the definition of impaired. The portfolio is grouped into similar risk characteristics, primarily loan type, loan-to-value, if collateral dependent, and internal credit risk ratings. We apply an estimated loss rate to each loan group. The loss rates applied are based on our cumulative prior two year loss experience adjusted, as appropriate, for the environmental factors discussed below. This evaluation is inherently subjective, as it requires material estimates that may be susceptible to significant revisions based upon changes in economic and real estate market conditions. Actual loan losses may be significantly more than the allowance for loan losses we have established, which could have a material negative effect on our financial results. Within general allowances is an unallocated reserve established to recognize losses related to the inherent subjective nature of the appraisal process and the internal credit risk rating process.

In underwriting a loan secured by real property, we require an appraisal (or an automated valuation model) of the property by an independent licensed appraiser approved by the Company's board of directors. The appraisal is subject to review by an independent third party hired by the Company. We review and inspect properties before disbursement of funds during the term of a construction loan. Generally, management obtains updated appraisals when a loan is deemed impaired. These appraisals may be more limited than those prepared for the underwriting of a new loan. In addition, when the Company acquires other real estate owned, it generally obtains a current appraisal to substantiate the net carrying value of the asset.

The adjustments to our loss experience are based on our evaluation of several environmental factors, including:

changes in local, regional, national, and international economic and business conditions and developments that affect the collectability of our portfolio, including the condition of various market segments;

changes in the nature and volume of our portfolio and in the terms of our loans;

changes in the experience, ability, and depth of lending management and other relevant staff;

changes in the volume and severity of past due loans, the volume of nonaccrual loans, and the volume and severity of adversely classified or graded loans;

F-50

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES**

Notes to Consolidated Financial Statements (Continued)

changes in the quality of our loan review system;

changes in the value of underlying collateral for collateral-dependent loans;

the existence and effect of any concentrations of credit, and changes in the level of such concentrations; and

the effect of other external factors such as competition and legal and regulatory requirements on the level of estimated credit losses in our existing portfolio.

In evaluating the estimated loss factors to be utilized for each loan group, management also reviews actual loss history over an extended period of time as reported by the FDIC for institutions both in our market area and nationally for periods that are believed to have experienced similar economic conditions.

We evaluate the allowance for loan losses based on the combined total of the impaired and general components for originated loans. Generally when the loan portfolio increases, absent other factors, our allowance for loan loss methodology results in a higher dollar amount of estimated probable losses. Conversely, when the loan portfolio decreases, absent other factors, our allowance for loan loss methodology results in a lower dollar amount of estimated probable losses.

Each quarter we evaluate the allowance for loan losses and adjust the allowance as appropriate through a provision for loan losses. While we use the best information available to make evaluations, future adjustments to the allowance may be necessary if conditions differ substantially from the information used in making the evaluations. In addition, as an integral part of their examination process, the OCC will periodically review the allowance for loan losses. The OCC may require us to adjust the allowance based on their analysis of information available to them at the time of their examination. Our last examination was as of September 30, 2011.

A summary of changes in the allowance for loan losses for the years ended December 31, 2011, 2010, and 2009 follows (in thousands):

	2011	December 31, 2010	2009
Balance at beginning of year	\$ 21,819	\$ 15,414	\$ 8,778
Provision for loan losses	12,589	10,084	9,038
Recoveries	108	20	
Charge-offs	(7,680)	(3,699)	(2,402)
Balance at end of year	\$ 26,836	\$ 21,819	\$ 15,414

Notes to Consolidated Financial Statements (Continued)

The Company monitors the credit quality of its loan receivables on a periodic basis. Credit quality is monitored by reviewing certain credit quality indicators. Management has determined that loan-to-value ratios (at period end) and internally assigned credit risk ratings by loan type are the key credit quality indicators that best management measure the credit quality of the Company's loan receivables. Loan-to-value (LTV) ratios used by management in monitoring credit quality are based on current period loan balances and original values at time of origination (unless a current appraisal has been obtained as a result of the loan being deemed impaired). In calculating the provision for loan losses, management has determined that commercial real estate loans and multifamily loans having loan-to-value ratios of less than 35%, and one-to-four family loans having loan-to-value ratios of less than 60%, require less of a loss factor than those with higher loan to value ratios.

The Company maintains a credit risk rating system as part of the risk assessment of its loan portfolio. The Company's lending officers are required to assign a credit risk rating to each loan in their portfolio at origination. When the lender learns of important financial developments, the risk rating is reviewed accordingly, and adjusted if necessary. Monthly, management presents monitored assets to the loan committee. In addition, the Company engages a third party independent loan reviewer that performs semi-annual reviews of a sample of loans, validating the credit risk ratings assigned to such loans. The credit risk ratings play an important role in the establishment of the loan loss provision and to confirm the adequacy of the allowance for loan losses for originated loans held-for-investment. After determining the general reserve loss factor for each originated portfolio segment held-for-investment, the originated portfolio segment held-for-investment balance collectively evaluated for impairment is multiplied by the general reserve loss factor for the respective portfolio segment in order to determine the general reserve. Loans that have an internal credit rating of special mention or substandard receive a multiple of the general reserve loss factors for each portfolio segment, in order to determine the general reserve.

When assigning a risk rating to a loan, management utilizes the Bank's internal nine-point credit risk rating system.

1. Strong
2. Good
3. Acceptable
4. Adequate
5. Watch
6. Special Mention
7. Substandard
8. Doubtful
9. Loss

Loans rated 1 to 5 are considered pass ratings. An asset is considered substandard if it is inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Substandard assets have well defined weaknesses based on objective evidence, and are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected. Assets classified as doubtful have all of the weaknesses inherent in those classified substandard with the added characteristic that the weaknesses present make collection or liquidation in full highly questionable and improbable based on current circumstances. Assets classified as loss are those considered uncollectible and of such little value that their continuance as assets is not warranted. Assets which do not currently expose the Company to sufficient risk to warrant classification in one of the aforementioned categories, but possess weaknesses, are required to be designated special mention.

Included in originated loans receivable (including held-for-sale) are loans for which the accrual of interest income has been discontinued due to deterioration in the financial condition of the borrowers. The recorded investment of these nonaccrual loans was \$43.8 million and \$59.3 million at December 31, 2011, and December 31, 2010, respectively. Generally, originated loans (both held-for-investment and held-for-sale) are placed on non-accruing status when they become 90 days or more delinquent, and remain on non-accrual status until they are brought current, have six months of performance under the loan terms, and factors indicating reasonable doubt about the timely collection of payments no longer exist. Therefore, loans may be current in accordance with their loan terms, or may be less than 90 days delinquent and still be on a non-accruing status.

Non-accrual amounts included loans deemed to be impaired of \$36.1 million and \$52.0 million at December 31, 2011, and December 31, 2010, respectively. Loans on non-accrual status with principal balances less than \$500,000, and therefore not meeting the Company's definition of an

Edgar Filing: Northfield Bancorp, Inc. - Form 424B3

impaired loan, amounted to \$4.3 million and \$7.3 million at December 31, 2011, and December 31, 2010, respectively. Non-accrual amounts included in loans held-for-sale were \$3.4 million and \$0 at December 31, 2011, and December 31, 2010, respectively. Loans past due ninety days or more and still accruing interest were \$85,000 and \$1.6 million at December 31, 2011, and December 31, 2010, respectively, and consisted of loans that are well secured and in the process of renewal.
