### Karla M. Rabusch

President

Wells Fargo Advantage Funds

Entering the period, concerns about the eurozone sovereign debt situation held center stage as investors again focused on economic weakness in southern European economies.

**Dear Valued Shareholder:** 

We are pleased to offer you this semi-annual report for the *Wells Fargo Advantage Utilities and High Income Fund* for the six-month period that ended February 28, 2013. The macroeconomic picture was dominated by continued concerns about the possible effects that the ongoing European sovereign debt crisis would have on the global economy. However, relatively solid economic data in the U.S. and efforts by European authorities to address the sovereign debt issue seemed to alleviate investor fears and supported global stock markets. Utilities stocks posted solid returns but underperformed the broader market. High-yield bonds, however, outperformed the broader bond market on strong demand from yield-hungry investors in a low-yielding environment.

The period was dominated by worries that ongoing debt problems in the eurozone would affect global economic growth.

Entering the period, concerns about the eurozone sovereign debt situation held center stage as investors again focused on economic weakness in southern European economies. Because many eurozone banks owned southern European debt and many U.S. banks had financial ties to eurozone banks, investors worried about the effects of a possible southern European debt default on the global financial system and economy. Ongoing weakness in the Greek economy made it difficult for the country to meet previously agreed upon austerity targets. Toward the end of the reporting period, political risk resurfaced in both Italy and Spain. In Italy, Prime Minister Mario Monti, an economist

who was appointed to implement austerity measures and labor market reforms, had resigned in December 2012. However, Italy s general election in February 2013 resulted in no party winning a clear majority in the Senate, leading to a hung parliament.

European leaders took concerted action to calm investor concerns. In September 2012, the European Central Bank (ECB) announced that it would purchase an unlimited amount of one- to three-year sovereign debt from countries that had applied for a formal bailout through either the European Financial Stability Facility or the European Stability Mechanism. In another positive sign, in late November 2012, finance ministers from the 17-country eurozone and the International Monetary Fund struck a deal aimed at reducing Greece s debt by the year 2020.

#### Central banks continued to provide stimulus.

Major central banks, including the U.S. Federal Reserve (Fed) and the ECB, continued to inject liquidity into the banks and the markets through various quantitative easing policies. Throughout the reporting period, the Federal Open Market Committee (FOMC) kept its key interest rates effectively at zero in order to support the economy and the financial system. The ECB was similarly aggressive, keeping its key rate at a historic low of 0.75%. Just prior to the beginning of the reporting period, the FOMC announced its intention to keep interest rates low until at least mid-2015 in order to support the sluggish economy. The Fed also announced open-ended purchases of \$40 billion per month in mortgage-backed securities in an effort to support the housing market.

Stock markets posted solid gains in an eventful period.

Aggressive central bank actions helped support stock prices, as did relatively solid economic data. For much of the reporting period, the U.S. stock market benefited from favorable gross domestic product (GDP) data. Even though the GDP growth rate moderated from 3.1% (annualized) in the third quarter of 2012 to 0.1% (annualized) in the fourth quarter, many investors attributed the weak number to

Letter to shareholders (unaudited)

Wells Fargo Advantage Utilities and High Income 3 Fund

the aftereffects of Hurricane Sandy on the Eastern Seaboard. Consequently, the U.S. stock market remained resilient. European stocks also posted gains, despite anxiety late in the period about Italy s political situation, as European authorities continued to address the continent s credit crisis. Utilities stocks participated in the general market gain but lagged more economically sensitive sectors such as industrials.

Within the fixed-income market, historically low interest rates continued to support bond prices, leading to generally positive returns across the asset class. High-yield debt further benefited from a continued low rate of credit defaults, as the favorable interest-rate environment allowed companies to reduce interest expense by refinancing higher-coupon debt. High-yield bonds thus outperformed the broad fixed-income market.

We employ a diverse array of investment strategies, even as many variables are at work in the market.

The full effect of the European credit crisis remains unknown. Elevated unemployment and debt defaults continue to pressure consumers and businesses alike. As a whole, *Wells Fargo Advantage Funds* represents investments across a range of asset classes and investment styles, giving you an opportunity to create a diversified investment portfolio. While diversification may not prevent losses in a downturn, we believe it helps manage risk.

Thank you for choosing to invest with *Wells Fargo Advantage Funds*. We appreciate your confidence in us and remain committed to helping you meet your financial needs. Average annual total return<sup>1</sup> (%) as of Feburary 28, 2013

|  |        |        | Since     |
|--|--------|--------|-----------|
|  |        |        | inception |
|  | 1 year | 5 year | 4-28-2004 |
| Based on market value                    | 6.84   | (5.77) | 6.70      |
| Based on net asset value (NAV) per share | 10.50  | 0.55   | 7.68      |

Figures quoted represent past performance, which is no guarantee of future results and do not reflect the deduction of taxes that a shareholder may pay on fund distributions or the sales of fund shares. Investment return and principal value of an investment will fluctuate so that an investor s shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted and assumes the reinvestment of dividends and capital gains. To obtain performance information current to the most recent month-end, please call 1.800.222.8222.

The Fund s annualized expense ratio for the six months ended February 28, 2013, is 1.24% which includes 0.22% of interest expense.

The Fund is leveraged through borrowings and may issue preferred shares. The use of leverage results in certain risks including, among others, the likelihood of greater volatility of net asset value and the market price of common shares. Foreign investments are especially volatile and can rise or fall dramatically due to differences in the political and economic conditions of the host country. These risks are generally intensified in emerging markets. A fund which concentrates its investments in a single industry or sector may face increased risk of price fluctuation over more diversified funds due to adverse developments within that industry or sector. Non-diversified funds may face increased risk of price fluctuation over more diversified funds due to adverse developments within certain sectors. Derivatives involve additional risks including interest rate risk, credit risk, the risk of improper valuation and the risk of non-correlation to the relevant instruments they are designed to hedge or to closely track. High yield, lower-rated bonds may contain more risk due to the increased possibility of default.

- 1. Total returns based on market value are calculated assuming a purchase of common stock at the closing market price prior to the first day s opening market price and a sale at the last day s closing market price for the period reported. Total returns based on NAV are calculated based on the NAV at the beginning of the period and end of period. Dividends and distributions are assumed for the purposes of these calculations to be reinvested at prices obtained under the Fund s Automatic Dividend Reinvestment Plan. Total returns do not reflect brokerage commissions or sales charges. If these charges were included, the returns would be lower.
- 2. This chart does not reflect any brokerage commissions or sales charges.

Wells Fargo Advantage Utilities and High Income 5 Fund

### MANAGER S DISCUSSION

Strategy

In the six-month period that ended February 28, 2013, the Fund s equity portfolio was positioned somewhat defensively, with an above-average cash allocation. The Fund also modestly increased its weighting in utilities and telecommunication services preferred stocks. Short-term industry fundamentals remained mixed. Electricity demand continues to be anemic at best, with higher industrial sales more than offset by weak residential and commercial sales. Among U.S. utilities, the Fund was more focused on fully regulated integrated and network utilities and relatively less exposed to utilities companies with direct or indirect commodity risk. The Fund maintained a modest exposure to European utilities and telecommunication services names in anticipation of a nascent recovery in Europe.

The equity allocation of the Fund continued to be managed with a focus on income generation. The Fund s equity investment process includes a dividend capture strategy, which is used in an attempt to achieve the Fund s primary investment objective of high current income. In employing dividend capture, a fund purchases a stock before an ex-dividend date, becomes entitled to the dividend, and then typically sells the stock on or after the stock s ex-dividend date. This may result in a lack of capital appreciation over time, which may also lead to erosion in the value of the fund. Dividend capture may also increase the portfolio turnover rate and related transaction costs of the fund.

High-yield bonds continued to benefit from rising stock prices (as high-yield bonds often trade in sympathy with stocks), relatively low volatility, and strong investor interest due to a dearth of attractive income opportunities. In addition, companies that issue high-yield debt were generally successful at cutting costs and at refinancing older, higher-cost debt at lower yields. Although leveraged buyout activity and debt-funded dividends continue to increase, we are still below the levels seen in 2007, and individual high-yield company leverage levels appear to be consistent with historical averages.

| Ten largest holdings <sup>3</sup> (%) as of February 28, 2013 |      |
|---|------|
| Great Plains Energy Incorporated                              | 5.85 |
| ITC Holdings Corporation                                      | 4.55 |
| Nextera Energy Incorporated                                   | 4.51 |
| Deutsche Post AG  | 4.02 |
| Scana Corporation   | 4.01 |
| Northeast Utilities   | 3.77 |
| Duke Energy Corporation                                       | 3.62 |
| The Williams Companies Incorporated                           | 3.11 |
| National Fuel Gas Company                                     | 2.61 |
| Spectra Energy Corporation                                    | 2.60 |

#### Credit quality<sup>4</sup> as of February 28, 2013

**Contributors to performance** 

Within its equity holdings, the Fund s position in Deutsche Post AG was a major contributor to performance. Other significant contributors included ITC Holdings Corporation; Nextera Energy Incorporated; Northeast Utilities; AOL Incorporated; DISH Network Corporation; Comcast Corporation Class A; Sempra Energy; NV Energy Incorporated; and VimpelCom Limited ADR. The Fund also participated in the strong appreciation of the high-yield bond market, and a position in Sprint Nextel Corporation was a significant contributor.

#### **Detractors from performance**

Within the equity portfolio, the Fund s European names generally detracted from performance, with Telecom Italia SpA and France Telecom SA lagging badly while Italian utility Enel SpA lagged slightly. In addition, the Fund s largest position, Great Plains Energy Incorporated, was a modest detractor.

The high-yield component lagged the broader high-yield market because the Fund holds relatively shorter-maturity bonds, which detracted in a market that rewarded more-volatile issues. Holding relatively shorter-maturity bonds detracted in a market that rewarded higher-risk issues.

- 3. The ten largest holdings are calculated based on the value of the securities divided by total net assets of the Fund. Holdings are subject to change and may have changed since the date specified.
- 4. Credit quality is subject to change and is calculated based on the total market value of bonds. The ratings indicated are from Standard & Poor s, Moody s Investors Service, and/or Fitch Ratings Ltd. Credit Quality Ratings: Credit quality ratings apply to underlying holdings of the Fund and not the Fund itself. Standard & Poor s rates the creditworthiness of bonds, ranging from AAA (highest) to D (lowest). Ratings from A to CCC may be modified by the addition of a plus (+) or minus () sign to show relative standing within the rating categories. Standard & Poor s rates the creditworthiness of short-term notes from SP-1 (highest) to SP-3 (lowest). Moody s rates the creditworthiness of bonds, ranging from Aaa (highest) to C (lowest). Ratings Aa to B may be modified by the addition of a number 1 (highest) to 3 (lowest) to show relative standing within the ratings categories. Moody s rates the creditworthiness of short-term U.S. tax-exempt municipal securities from MIG 1/VMIG 1 (highest) to SG (lowest). Fitch rates the creditworthiness of bonds, ranging from AAA (highest) to D (lowest). If a security was rated by all three rating agencies, the middle rating was utilized. If rated by two of three rating agencies, the lower rating was utilized and if rated by one of the agencies that rating was utilized. We generally define higher quality bonds as bonds that have a rating of BBB/Baa and above and lower quality bonds as bonds with a rating below BBB/Baa.

#### 6 Wells Fargo Advantage Utilities and High Income Fund

Performance highlights (unaudited)

#### Country allocation<sup>5</sup> as of February 28, 2013

#### **Management Outlook**

The stock team hopes that what appears to be a modest economic recovery in the U.S. will be sustained in the coming months. While stronger economic growth would be positive for utilities suffering from weak sales, growth will also eventually result in rising interest rates as the Federal Reserve withdraws monetary stimulus. Rising interest rates would be a headwind for dividend-paying utilities stocks. Although the team has substantially reduced the cash position, the stock portfolio remains somewhat defensively positioned. At some point, the team may want to move out of the more defensive fully regulated names currently held in the Fund and into some less defensively-positioned commodity-sensitive utilities.

The high-yield team believes that two scenarios could derail the high-yield market. One would be a meaningful increase in U.S. Treasury yields, which could create a viable alternative to corporate credit. A more likely near-term scenario would be a large and sustained drop in equities, which would likely put fear into market participants and spark outflows from the high-yield market. The factor that has historically tended to cause a high-yield sell-off, a sharply rising default rate, appears to be a ways off at this point unless the economy experiences an unexpected shock. The team believes that the fundamentals of high-yield companies, combined with paltry yield alternatives and a significant risk of rising rates, make high yield a reasonable alternative to other fixed-income assets on a risk-adjusted basis. However, the run-up in high-yield bond prices makes the asset class more subject to price risk, especially if equities should experience heightened volatility.

5. Country allocation is subject to change and is calculated based on the total long-term investments of the Fund.

1. Calculated based upon average common shares outstanding

2. Total return is calculated assuming a purchase of common stock on the first day and a sale on the last day of the period reporting. Dividends and distributions are assumed for the purposes of these calculations to be reinvested at prices obtained under the Fund s Automatic Dividend Reinvestment Plan. Total return does not reflect brokerage commissions or sales charges.

3. The net investment income ratio reflects distributions paid to preferred shareholders.

The accompanying notes are an integral part of these financial statements.

Notes to financial statements (unaudited)

Wells Fargo Advantage Utilities and High Income 19 Fund

### **1. ORGANIZATION**

Wells Fargo Advantage Utilities and High Income Fund (the Fund ) was organized as a statutory trust under the laws of the state of Delaware on February 4, 2004 and is registered as a non-diversified closed-end management investment company under the Investment Company Act of 1940, as amended. The primary investment objective of the Fund is to seek a high level of current income and moderate capital growth, with an emphasis on providing tax advantaged dividend income.

### 2. SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies, which are consistently followed in the preparation of the financial statements of the Fund, are in conformity with U.S. generally accepted accounting principles which require management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

## **Securities valuation**

All investments are valued each business day as of the close of regular trading on the New York Stock Exchange (normally 4 p.m. Eastern Time).

Equity securities that are listed on a foreign or domestic exchange, except for The Nasdaq Stock Market, Inc. (Nasdaq), are valued at the official closing price or, if none, the last sales price. Securities listed on Nasdaq are valued at the Nasdaq Official Closing Price (NOCP). If no NOCP is available, securities are valued at the last sales price. If no sales price is shown on the Nasdaq, the bid price will be used. If no sale occurs on the primary exchange or market for the security that day or if no sale occurs and no bid price is shown on Nasdaq, the prior day s price will be deemed stale and fair values will be determined in accordance with the Fund s Valuation Procedures.

Securities denominated in foreign currencies are translated into U.S. dollars using the rates of exchange in effect on the day of valuation at a time specified by the Management Valuation Team of Wells Fargo Funds Management, LLC (Funds Management).

Many securities markets and exchanges outside the U.S. close prior to the close of the New York Stock Exchange and therefore may not fully reflect trading or events that occur after the close of the principal exchange in which the foreign securities are traded, but before the close of the New York Stock Exchange. If such trading or events are expected to materially affect the value of such securities, then fair value pricing procedures approved by the Board of Trustees are applied. These procedures take into account multiple factors including movements in U.S. securities markets after foreign exchanges close. Foreign securities that are fair valued under these procedures are categorized as Level 2 and the application of these procedures may result in transfers between Level 1 and Level 2. Depending on market activity, such fair valuations may be frequent. Such fair value pricing may result in NAVs that are higher or lower than NAVs based on the last reported sales price or latest quoted bid price. On February 28, 2013, fair value pricing was not used in pricing foreign securities.

Fixed income securities acquired with maturities exceeding 60 days are valued based on evaluated bid prices received from an independent pricing service which may utilize both transaction data and market information such as yield, prices of securities of comparable quality, coupon rate, maturity, type of issue, trading characteristics and other market data. If valuations are not available from the independent pricing service or values received are deemed not representative of market value, values will be obtained from a broker-dealer or otherwise determined based on the Fund s Valuation Procedures.

Debt securities of sufficient credit quality acquired with maturities of 60 days or less generally are valued at amortized cost which approximates fair value. The amortized cost method involves valuing a security at its cost, plus accretion of discount or minus amortization of premium over the period until maturity.

Investments in registered open-end investment companies are valued at net asset value.

Investments which are not valued using any of the methods discussed above are valued at their fair value, as determined by procedures established in good faith and approved by the Board of Trustees. The Board of Trustees has established a Valuation Committee comprised of the Trustees and has delegated to it the authority to take any actions regarding the valuation of portfolio securities that the Valuation Committee deems necessary or appropriate, including determining the fair value of portfolio securities, unless the determination has been delegated to the Management Valuation Team. The Board of Trustees retains the authority to make or ratify any valuation decisions or approve any changes to the Valuation

20 Wells Fargo Advantage Utilities and High Income Fund

Notes to financial statements (unaudited)

Procedures as it deems appropriate. On a quarterly basis, the Board of Trustees receives reports on any valuation actions taken by the Valuation Committee or the Management Valuation Team which may include items for ratification.

Valuations of fair valued securities are compared to the next actual sales price when available, or other appropriate market information to assess the continued appropriateness of the fair valuation methodology used. These securities are fair valued on a day-to-day basis, taking into consideration changes to appropriate market information and any significant changes to the input factors considered in the valuation process until there is a readily available price provided on the exchange or by an independent pricing service. Valuations received from an independent pricing service or broker quotes are periodically validated by comparisons to most recent trades and valuations provided by other independent pricing services in addition to the review of prices by the adviser and/or subadviser. Unobservable inputs used in determining fair valuations are identified based on the type of security, taking into consideration factors utilized by market participants in valuing the investment, knowledge about the issuer and the current market environment.

### **Foreign currency translation**

The accounting records of the Fund are maintained in U.S. dollars. Assets, including investment securities, and liabilities denominated in foreign currency are translated into U.S. dollars at the rates of exchange at a time specified by the Management Valuation Team on the date of valuation. Purchases and sales of securities, and income and expenses are translated at the rate of exchange on the respective dates of such transactions. Reported net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded and the U.S. dollar equivalent of the amounts actually paid or received. Net unrealized foreign exchange gains and losses arise from changes in the fair value of assets and liabilities other than investments in securities resulting in changes in exchange rates.

The changes in net assets arising from changes in exchange rates and the changes in net assets resulting from changes in market prices of securities are not separately presented. Such changes are recorded with net realized and unrealized gains or losses from investments. Gains and losses from certain foreign currency transactions are treated as ordinary income for U.S. federal income tax purposes.

#### When-issued transactions

The Fund may purchase securities on a forward commitment or when-issued basis. The Fund records a when-issued transaction on the trade date and will segregate assets in an amount at least equal in value to the Fund s commitment to purchase when-issued securities. Securities purchased on a when-issued basis are marked-to-market daily and the Fund begins earning interest on the settlement date. Losses may arise due to changes in the market value of the underlying securities or if the counterparty does not perform under the contract.

#### **Term loans**

The Fund may invest in term loans. The Fund begins earning interest when the loans are funded. The loans pay interest at rates which are periodically reset by reference to a base lending rate plus a spread. The Fund assumes the

### Table of Contents

credit risk of the borrower and there could be potential loss to the Fund in the event of default by the borrower.

## **Options**

The Fund may be subject to equity price risk in the normal course of pursuing its investment objectives. The Fund may write covered call options or secured put options on individual securities. When the Fund writes an option, an amount equal to the premium received is recorded as a liability and is subsequently adjusted to the current market value of the written option. Premiums received from written options that expire unexercised are recognized as realized gains from investments on the expiration date. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is treated as a realized gain or loss. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security in calculating the realized gain or loss on the sale. If a put option is exercised, the premium reduces the cost of the security purchased. The Fund, as a writer of an option, bears the market risk of an unfavorable change in the price of the security underlying the written option.

The Fund may also purchase call or put options. The premium is included in the Statement of Assets and Liabilities as an investment, the value of which is subsequently adjusted based on to the current market value of the option. Premiums paid for purchased options that expire are recognized as realized losses from investments on the expiration date. Premiums paid for purchased options that are exercised or closed are added to the amount paid or offset against the proceeds received for the underlying security to determine the realized gain or loss. The risk of loss associated with purchased options is limited to the premium paid.

Notes to financial statements (unaudited) Wells Fargo Advantage Utilities and High Income 21 Fund Options traded on an exchange are regulated and terms of the options are standardized. Options traded over the counter expose the Fund to counterparty risk in the event the counterparty does not perform. This risk is mitigated by having a master netting arrangement between the Fund and the counterparty and by having the counterparty post collateral to cover the Fund s exposure to the counterparty.

Security transactions and income recognition

Securities transactions are recorded on a trade date basis. Realized gains or losses are recorded on the basis of identified cost.

Interest income is accrued daily and bond discounts are accreted and premiums are amortized daily based on the effective interest method. To the extent debt obligations are placed on non-accrual status, any related interest income may be reduced by writing off interest receivables when the collection of all or a portion of interest has become doubtful based on consistently applied procedures. If the issuer subsequently resumes interest payments or when the collectability of interest is reasonably assured, the debt obligation is removed from non-accrual status.

Dividend income is recognized on the ex-dividend date, except for certain dividends from foreign securities, which are recorded as soon as the Fund is informed of the ex-dividend date. Dividend income from foreign securities is recorded net of foreign taxes withheld where recovery of such taxes is not assured.

#### **Distributions to shareholders**

Distributions to shareholders from net investment income and net realized gains, if any, are recorded on the ex-dividend date. Such distributions are determined in conformity with federal income tax regulations, which may differ in amount or character from net investment income and realized gains recognized for purposes of U.S. generally accepted accounting principles.

#### Federal and other taxes

The Fund intends to continue to qualify as a regulated investment company by distributing substantially all of its investment company taxable income and any net realized capital gains (after reduction for capital loss carryforwards) sufficient to relieve it from all, or substantially all, federal income taxes. Accordingly, no provision for federal income taxes was required.

The Fund s income and federal excise tax returns and all financial records supporting those returns for the prior three fiscal years are subject to examination by the federal and Delaware revenue authorities. Management has analyzed the Fund s tax positions taken on federal, state, and foreign tax returns for all open tax years and does not believe that there are any uncertain tax positions that require recognition of a tax liability.

At August 31, 2012, net capital loss carryforwards, which were available to offset future net realized capital gains, were as follows:

| Pre-enactmen | t capital loss |                       |            |
|--------------|----------------|-----------------------|------------|
| expira       | tion*          | Post-enactment capita | l losses** |
| 2016         | 2017           | Short-term Lo         | ng-term    |
| \$20,548,693 | \$27,435,579   | \$2,882,575 \$1,      | 372,044    |

\*Losses incurred in taxable years beginning before December 22, 2010.

**\*\***Losses incurred in taxable years which began after December 22, 2010 are carried forward for an unlimited period. **3. FAIR VALUATION MEASUREMENTS** 

Fair value measurements of investments are determined within a framework that has established a fair value hierarchy based upon the various data inputs utilized in determining the value of the Fund s investments. The three-level hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to significant unobservable inputs (Level 3). The Fund s investments are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The inputs are summarized into three broad levels as follows:

- n Level 1 quoted prices in active markets for identical securities
- n Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, use of amortized cost, etc.)

22 Wells Fargo Advantage Utilities and High Income Fund Notes to financial statements (unaudited)

n Level 3 significant unobservable inputs (including the Fund s own assumptions in determining the fair value of investments)

The inputs or methodologies used for valuing investments in securities are not necessarily an indication of the risk associated with investing in those securities.

As of February 28, 2013, the inputs used in valuing investments in securities, which are carried at fair value, were as follows:

|                            |               | Cignificant other                   | Significant         |               |
|----------------------------|---------------|-------------------------------------|---------------------|---------------|
|                            | Quoted prices | Significant other observable Inputs | unobservable inputs |               |
| Investments in securities  | (Level 1)     | (Level 2)                           | (Level 3)           | Total         |
| Equity securities          |               |                                     |                     |               |
| Common stocks              | \$ 70,464,137 | \$ 0                                | \$ 0                | \$ 70,464,137 |
| Preferred stocks           | 14,112,168    | 3,021,942                           | 0                   | 17,134,110    |

| -                          | \$ 91,718,822 | \$ 41,304,574                       | \$ 427,628          | \$133,451,024 |

Further details on the major security types listed above can be found in the Summary Portfolio of Investments.

Transfers in and transfers out are recognized at the end of the reporting period. For the six months ended February 28, 2013, the Fund did not have any transfers into/out of Level 1 or Level 2.

## 4. TRANSACTIONS WITH AFFILIATES AND OTHER EXPENSES

#### **Advisory fee**

Funds Management, an indirect wholly owned subsidiary of Wells Fargo & Company (Wells Fargo) is the adviser to the Fund and is entitled to receive a fee at an annual rate of 0.60% of the Fund s average daily total assets. Total assets consist of net assets of the Fund plus borrowings or other leverage for investment purposes to the extent excluded in calculating net assets.

Funds Management has retained the services of certain investment subadvisers to provide daily portfolio management to the Fund. The fees for subadvisory services are borne by Funds Management. Wells Capital Management Incorporated (an affiliate of Funds Management) and Crow Point Partners, LLC are each investment subadvisers to

### Table of Contents

the Fund and are each entitled to receive a fee from Funds Management at an annual rate of 0.20% of the Fund s average daily total assets.

## **Administration fee**

Funds Management also serves as the administrator to the Fund providing the Fund with facilities, equipment and personnel. Funds Management is entitled to receive an annual administration fee from the Fund equal to 0.05% of the Fund s average daily total assets.

## 5. CAPITAL SHARE TRANSACTIONS

The Fund has authorized an unlimited number of shares with no par value. For the six months ended February 28, 2013 and year ended August 31, 2012, the Fund issued 5,359 and 18,219 shares, respectively.

## **6. BORROWINGS**

The Fund has borrowed \$22 million through a secured debt financing agreement administered by a major financial institution (the Facility ). The Facility has a commitment amount of \$25 million which expires on February 24, 2014, at which point it may be renegotiated and potentially renewed for another one-year term. At February 28, 2013, the Fund had secured borrowings outstanding in the amount of \$22,002,050 (including accrued interest and usage and commitment fees payable).

Notes to financial statements (unaudited)

Wells Fargo Advantage Utilities and High Income 23 Fund

The Fund s borrowings under the Facility are generally charged interest at a rate determined by the type of loan elected by the Fund. During six months ended February 28, 2013, an effective interest rate of 1.06% was incurred on the borrowings. Interest expense of \$115,639, representing 0.22% of the Fund s average daily net assets, was incurred during the six months ended February 28, 2013.

The Fund has pledged all of its assets to secure the borrowings and pays a commitment fee at an annual rate equal to 0.15% of average daily unutilized amounts of the \$25 million commitment amount. The secured borrowing fees on the Statement of Operations represents structuring fees and commitment fees. Of this amount, \$2,755 represents structuring fees.

### 7. INVESTMENT PORTFOLIO TRANSACTIONS

Purchases and sales of investments, excluding U.S. government obligations (if any) and short-term securities, for the six months ended February 28, 2013 were \$21,675,244 and \$18,207,042, respectively.

As of February 28 2013, the Fund had unfunded term loan commitments of \$270,000.

### 8. CONCENTRATION RISK

The Fund invests a substantial portion of its assets in the utilities industry and, therefore, may be more affected by changes in that industry than would be a fund whose investments are not heavily weighted in any industry.

### 9. INDEMNIFICATION

Under the Fund s organizational documents, the officers and directors are indemnified against certain liabilities that may arise out of performance of their duties to the Fund. Additionally, in the normal course of business, the Fund may enter into contracts with service providers that contain a variety of indemnification clauses. The Fund s maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be estimated.

### **10. NEW ACCOUNTING PRONOUNCEMENT**

In December 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standard Update (ASU) No. 2011-11, *Disclosures about Offsetting Assets and Liabilities*. ASU 2011-11, which amends FASB ASC Topic 210, *Balance Sheet*, creates new disclosure requirements which require entities to disclose both gross and net information for derivatives and other financial instruments that are either offset in the Statement of Assets and Liabilities or subject to an enforceable master netting arrangement or similar agreement. The disclosure requirements are effective for interim and annual reporting periods beginning on or after January 1, 2013. Management is currently assessing the potential impact, in addition to expanded financial statement disclosure, that may result from adopting this ASU.

### **11. SUBSEQUENT DISTRIBUTIONS**

The Fund declared the following distributions to common shareholders:

### Table of Contents

| Declaration date  | Record date    | Payable date  | Net investment income |
|-------------------|----------------|---------------|-----------------------|
| February 21, 2013 | March 14, 2013 | April 1, 2013 | \$0.075               |
| March 28, 2013    | April 16, 2013 | May 1, 2013   | \$0.075               |
| April 26, 2013    | May 15, 2013   | June 3, 2013  | \$0.075               |
| _                 |                |               |                       |

These distributions are not reflected in the accompanying financial statements.

24 Wells Fargo Advantage Utilities and High Income FundPROXY VOTING INFORMATION

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities is available without charge, upon request, by calling **1-800-222-8222**, visiting our website at **wellsfargoadvantagefunds.com**, or visiting the SEC website at sec.gov. Information regarding how the Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available without charge on the Fund s website at **wellsfargoadvantagefunds.com** or by visiting the SEC website at sec.gov.

### **ANNUAL MEETING OF SHAREHOLDERS**

On December 10, 2012, an Annual Meeting of Shareholders for the Fund was held to consider the following proposal. The results of the proposal are indicated below.

Proposal 1 Election of Trustees:

| Net assets voted  | For      | Judith M. Johnson | \$95,906,017 |
|-------------------|----------|-------------------|--------------|
| Net assets voted  | Withhold |                   | \$ 4,971,223 |
| Net assets voted  | For      | Leroy Keith, Jr.  | \$95,747,502 |
| Net assets voted  | Withhold |                   | \$ 5,129,738 |

### **BOARD OF TRUSTEES AND OFFICERS**

The following table provides basic information about the Board of Trustees (the Trustees ) and Officers of the Fund. Each

of the Trustees and Officers listed below acts in identical capacities for the Wells Fargo Advantage family of funds, which

consists of 135 funds comprising the Wells Fargo Funds Trust, Wells Fargo Variable Trust, Wells Fargo Master Trust, and

four closed-end funds, including the Fund (collectively the Fund Complex ). All of the Trustees are also Members of the

Audit and Governance Committees of each Trust in the Fund Complex. The mailing address of each Trustee and Officer is

525 Market Street, 12th Floor, San Francisco, CA 94105. The Board of Trustees is classified into three classes of which one

is elected annually. Each Trustee serves a three-year term concurrent with the class from which the Trustee is elected.

Each Officer serves an indefinite term.

**Independent Trustees**

Automatic dividend reinvestment plan

Wells Fargo Advantage Utilities and High Income 27 Fund

## AUTOMATIC DIVIDEND REINVESTMENT PLAN

All common shareholders are eligible to participate in the Automatic Dividend Reinvestment Plan (the Plan). Pursuant to the Plan, unless a common shareholder is ineligible or elects otherwise, all cash dividends and capital gains distributions are automatically reinvested by Computershare Trust Company, N.A., as agent for shareholders in administering the Plan ( Plan Agent ), in additional common shares of the Fund. Whenever the Fund declares an ordinary income dividend or a capital gain dividend (collectively referred to as dividends ) payable either in shares or in cash, nonparticipants in the Plan will receive cash, and participants in the Plan will receive the equivalent in shares of common shares. The shares are acquired by the Plan Agent for the participant s account, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized common shares from the Fund ( newly issued common shares ) or (ii) by purchase of outstanding common shares on the open-market (open-market purchases) on the NYSE Amex or elsewhere. If, on the payment date for any dividend or distribution, the net asset value per share of the common shares is equal to or less than the market price per common share plus estimated brokerage commissions (market premium), the Plan Agent will invest the amount of such dividend or distribution in newly issued shares on behalf of the participant. The number of newly issued common shares to be credited to the participant s account will be determined by dividing the dollar amount of the dividend by the net asset value per share on the date the shares are issued, provided that the maximum discount from the then current market price per share on the date of issuance may not exceed 5%. If on the dividend payment date the net asset value per share is greater than the market value or market premium (market discount), the Plan Agent will invest the dividend amount in shares acquired on behalf of the participant in open-market purchases. There will be no brokerage charges with respect to shares issued directly by the Fund as a result of dividends or capital gains distributions payable either in shares or in cash. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent s open-market purchases in connection with the reinvestment of dividends. The automatic reinvestment of dividends and distributions will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such dividends. All correspondence concerning the Plan should be directed to the Plan Agent at P.O. Box 43010, Providence, Rhode Island 02940-3010 or by calling 1-800-730-6001.
