#### NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

### **Note 1: Summary of Accounting Policies**

#### Principles of consolidation and presentation

The Condensed Consolidated Financial Statements include the accounts of Snap-on Incorporated and its wholly-owned and majority-owned subsidiaries (collectively, Snap-on or the company). These financial statements should be read in conjunction with, and have been prepared in conformity with, the accounting principles reflected in the consolidated financial statements and related notes included in Snap-on s 2012 Annual Report on Form 10-K for the fiscal year ended December 29, 2012 (2012 year end). The company s 2013 fiscal second quarter ended on June 29, 2013; the 2012 fiscal second quarter ended on June 30, 2012.

Snap-on accounts for investments in unconsolidated affiliates where Snap-on has a greater than 20% but less than 50% ownership interest under the equity method of accounting. Investments in unconsolidated affiliates of \$13.4 million as of June 29, 2013, and \$13.5 million as of December 29, 2012, are included in Other assets on the accompanying Condensed Consolidated Balance Sheets. No equity investment dividends were received in the first six months of 2013 or 2012. In the normal course of business, the company may purchase products or services from unconsolidated affiliates; purchases from unconsolidated affiliates were \$3.9 million and \$3.6 million in the second quarters of 2013 and 2012, respectively, and were \$7.7 million and \$8.1 million in the first six months of 2013 and 2012, respectively. The Condensed Consolidated Financial Statements do not include the accounts of the company s independent franchisees. Snap-on s Condensed Consolidated Financial Statements are prepared in conformity with generally accepted accounting principles in the United States of America (U.S. GAAP). All significant intercompany accounts and transactions have been eliminated.

In the opinion of management, all adjustments (consisting of normal recurring adjustments) necessary for the fair presentation of the Condensed Consolidated Financial Statements for the three and six month periods ended June 29, 2013, and June 30, 2012, have been made. Interim results of operations are not necessarily indicative of the results to be expected for the full fiscal year.

#### **Use of Estimates**

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

#### **Financial Instruments**

The fair value of the company s derivative financial instruments is generally determined using quoted prices in active markets for similar assets and liabilities. The carrying value of the company s non-derivative financial instruments either approximates fair value, due to their short-term nature, or fair value is based upon a discounted cash flow analysis or quoted market values. See Note 9 for further information on financial instruments.

#### **New Accounting Standards**

Disclosures Relating to Accumulated Other Comprehensive Income

The Financial Accounting Standards Board (FASB) issued authoritative guidance in February 2013 that amends the presentation of accumulated other comprehensive income and clarifies how to report the effect of significant reclassifications out of accumulated other comprehensive income. The guidance, which became effective for Snap-on on a prospective basis at the beginning of its 2013 fiscal year, requires footnote disclosures regarding the changes in accumulated other comprehensive income by component and the line items affected in the statements of earnings. The adoption of this updated authoritative guidance did not have a significant impact on the company s Condensed Consolidated Financial Statements. See Note 16 for additional information.

#### SNAP-ON INCORPORATED

### NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

(Unaudited)

#### Indefinite-lived Intangible Assets

The FASB issued updated authoritative guidance in July 2012 to amend its previous guidance on the annual and interim testing of indefinite-lived intangible assets for impairment; the guidance became effective for Snap-on at the beginning of its 2013 fiscal year. The guidance provides entities with the option of first assessing qualitative factors to determine whether it is more-likely-than-not that the fair value of an indefinite-lived intangible asset is less than its carrying amount. If it is determined, on the basis of qualitative factors, that the fair value of the indefinite-lived intangible asset is more-likely-than-not less than the carrying amount, a quantitative impairment test would still be required. The company did not elect to perform a qualitative assessment in 2013. Annual impairment tests are performed by the company in the second quarter of each fiscal year. The adoption of this updated authoritative guidance had no impact on the company s Condensed Consolidated Financial Statements.

#### **Note 2: Acquisitions**

On May 13, 2013, Snap-on acquired Challenger Lifts, Inc. ( Challenger ) for a preliminary cash purchase price of \$38.2 million. The preliminary purchase price is subject to change upon the finalization of a working capital adjustment, which is expected to be completed in the third quarter of 2013.

Challenger, with 2012 sales of approximately \$45 million, designs, manufactures and distributes a comprehensive line of vehicle lifts and accessories to a diverse customer base in the automotive repair sector. For segment reporting purposes, the results of operations and assets of Challenger have been included in the Repair Systems & Information Group since the date of acquisition. Pro forma financial information has not been presented as the net effects of the Challenger acquisition were neither significant nor material to Snap-on s results of operations or financial position.

#### Note 3: Accounts Receivable

Trade and Other Accounts Receivable

Snap-on s trade and other accounts receivable primarily arise from the sale of tools, diagnostics and equipment to a broad range of industrial and commercial customers and to Snap-on s independent franchise van channel on a non-extended-term basis with payment terms generally ranging from 30 to 120 days.

The components of Snap-on s trade and other accounts receivable as of June 29, 2013, and December 29, 2012, are as follows:

(Amounts in millions)	June 29, 2013	December 29, 2012

#### Finance and Contract Receivables

Snap-on Credit LLC (SOC), the company s financial services operation in the United States, originates extended-term finance and contract receivables on sales of Snap-on product sold through the U.S. franchisee and customer network and to Snap-on s industrial and other customers; Snap-on s foreign finance subsidiaries provide similar financing internationally. Interest income on finance and contract receivables is included in Financial services revenue on the accompanying Condensed Consolidated Statements of Earnings.

Snap-on s finance receivables are comprised of extended-term installment contracts to both technicians and independent shop owners (i.e., franchisees customers) to enable them to purchase tools, diagnostics and equipment on an extended-term payment plan, generally with expected average payment terms of 34 months. Contract receivables, with payment terms of up to 10 years, are comprised of extended-term installment payment contracts to a broad base of industrial and other customers worldwide, including shop owners, both independents and national chains, for their purchase of tools, diagnostics and equipment. Contract receivables also include extended-term installment loans to franchisees to meet a number of financing needs including working capital loans, loans to enable new franchisees to fund the purchase of the franchise and van leases. Finance and contract receivables are generally secured by the underlying tools, diagnostics or equipment financed and, for installment loans to franchisees, other franchisee assets.

During both the six months ended June 29, 2013, and the fiscal year ended December 29, 2012, Snap-on did not purchase or sell any finance or contract receivables.

The components of Snap-on s current finance and contract receivables as of June 29, 2013, and December 29, 2012, are as follows:

(Amounts in millions)	June 29, 2013	December 29, 2012

The components of Snap-on s finance and contract receivables with payment terms beyond one year as of June 29, 2013, and December 29, 2012, are as follows:

(Amounts in millions)	June 29, 2013	December 29, 2012
Finance receivables, net of unearned finance charges of \$8.0 million and \$11.8 million, respectively	\$ 537.2	\$ 512.5
Contract receivables, net of unearned finance charges of \$16.1 million and \$18.1 million, respectively	205.1	196.6
Total	742.3	709.1
Allowances for doubtful accounts:

Total long-term finance and contract receivables net	\$ 723.8	\$ 689.0
Finance receivables net	\$ 520.8	\$ 494.6
Contract receivables net	203.0	194.4
Total long-term finance and contract receivables net	\$ 723.8	\$ 689.0

Delinquency is the primary indicator of credit quality for finance and contract receivables. Receivable balances are considered delinquent when contractual payments become 30 days past due.

Finance receivables are generally placed on nonaccrual status (nonaccrual of interest and other fees) (i) when a customer is placed on repossession status; (ii) upon receipt of notification of bankruptcy; (iii) upon notification of the death of a customer; or (iv) in other instances in which management concludes collectability is not reasonably assured. Finance receivables that are considered nonperforming include receivables that are on nonaccrual status and receivables that are generally more than 90 days past due.

Contract receivables are generally placed on nonaccrual status (i) when a receivable is more than 90 days past due or at the point a customer s account is placed on terminated status regardless of its delinquency status; (ii) upon notification of the death of a customer; or (iii) in other instances in which management concludes collectability is not reasonably assured. Contract receivables that are considered nonperforming include receivables that are on nonaccrual status and receivables that are generally more than 90 days past due.

The accrual of interest and other fees is resumed when the finance or contract receivable becomes contractually current and collection of all remaining contractual amounts due is reasonably assured. Finance and contract receivables are evaluated for impairment on a collective basis; however, in circumstances where the company is aware of a specific customer s inability to meet its financial obligations, a specific reserve is recorded against amounts due to reduce the net recognized receivable to the amount reasonably expected to be collected. A receivable is impaired when it is probable that all amounts related to the receivable will not be collected according to the contractual terms of the applicable agreement. Impaired receivables are covered by the company s finance and contract allowances for doubtful accounts reserves and are charged-off against the reserves when appropriate. As of June 29, 2013, and December 29, 2012, there were \$12.2 million and \$13.4 million,

respectively, of impaired finance receivables, and \$0.8 million and \$0.9 million, respectively, of impaired contract receivables.

It is the general practice of Snap-on s financial services business to not engage in contract or loan modifications. In limited instances, Snap-on s financial services business may modify certain impaired receivables in troubled debt restructurings. The amount and number of restructured finance and contract receivables as of June 29, 2013, and December 29, 2012, were immaterial to both the financial services portfolio and the company s results of operations and financial position.

The aging of finance and contract receivables as of June 29, 2013, and December 29, 2012, is as follows:

Inventories accounted for using the first-in, first-out (FIFO) method as of June 29, 2013, and December 29, 2012, approximated 62% and 60%, respectively, of total inventories. The company accounts for its non-U.S. inventory on the FIFO basis. As of June 29, 2013, approximately 31% of the company s U.S. inventory was accounted for using the FIFO basis and 69% was accounted for using the last-in, first-out (LIFO) basis. There were no LIFO inventory liquidations in the three and six month periods ended June 29, 2013, or June 30, 2012.

Snap-on completed its annual impairment testing of goodwill and other indefinite-lived intangible assets in the second quarter of 2013, the results of which did not result in any impairment. Significant and unanticipated changes in circumstances, such as declines in profitability and cash flow due to significant and long-term deterioration in macroeconomic, industry and market conditions, the loss of key customers, changes in technology or markets, significant changes in key personnel or litigation, a significant and sustained decrease in share price and/or other events, including effects from the sale or disposal of a reporting unit, could require a provision for impairment of goodwill and/or other intangible assets in a future period. As of June 29, 2013, the company has no accumulated impairment losses.

The weighted-average amortization periods related to other intangible assets are as follows:

	In Years
Customer relationships	16
Developed technology	5
Internally developed software	3
Patents	11
Trademarks	6
Other	39

Snap-on is amortizing its customer relationships on both an accelerated and straight-line basis over a 16 year weighted-average life; the remaining intangibles are amortized on a straight-line basis. The weighted-average amortization period for all amortizable intangibles on a combined basis is 12 years.

The company s customer relationships generally have contractual terms of three to five years and are typically renewed without significant cost to the company. The weighted-average 16 year life for customer relationships is based on the company s historical renewal experience. Intangible asset renewal costs are expensed as incurred.

The aggregate amortization expense was \$6.5 million and \$12.8 million for the three and six month periods ended June 29, 2013, respectively, and was \$6.6 million and \$13.0 million for the three and six month periods ended June 30, 2012, respectively. Based on current levels of amortizable intangible assets and estimated weighted-average useful lives, estimated annual amortization expense is expected to be \$24.3 million in 2013, \$20.0 million in 2014, \$14.1 million in 2015, \$11.2 million in 2016, \$10.1 million in 2017 and \$8.9 million in 2018.

Of the \$1.8 million and \$4.7 million of costs incurred during the respective three and six month periods ended June 29, 2013, \$1.6 million and \$4.3 million, respectively, qualified for accrual treatment. Costs associated with exit and disposal activities in 2013 primarily related to headcount reductions from the ongoing optimization of the company s cost structure in Europe and various other management and realignment actions. Costs associated with exit and disposal activities in 2012 primarily related to the settlement of a pension plan as a result of the 2011 closure of the company s former Newmarket, Canada, facility, as well as other headcount reductions, largely to improve the company s cost structure in Europe. In the three and six month periods ended June 30, 2012, the Snap-on Tools Group incurred costs of \$6.8 million (included in Cost of goods sold above) related to the Newmarket pension settlement.

The majority of the exit and disposal accrual as of June 29, 2013, is expected to be utilized in 2013.

Snap-on expects to fund the remaining cash requirements of its exit and disposal activities with available cash on hand, cash flows from operations and borrowings under the company s existing credit facilities. The estimated costs for the exit and disposal activities were based on management s best business judgment under prevailing circumstances.

#### **Note 7: Income Taxes**

Snap-on s effective income tax rate on earnings attributable to Snap-on was 32.2% and 33.5% in the first six months of 2013 and 2012, respectively. The lower 2013 effective income tax rate primarily benefited from the retroactive extension of the federal research tax credit and certain other business tax provisions included in the American Taxpayer Relief Act of 2012, which was signed into law on January 2, 2013, and the favorable resolution of a foreign tax audit.

For the six month period ended June 29, 2013, Snap-on s unrecognized tax benefits decreased by \$4.4 million primarily due to the favorable resolution of a foreign tax audit.

Snap-on and its subsidiaries file income tax returns in the United States and in various state, local and foreign jurisdictions. It is reasonably possible that certain unrecognized tax benefits may either be settled with taxing authorities or the statutes of limitations for such items may lapse within the next 12 months, causing Snap-on s gross unrecognized tax benefits to decrease by a range of zero to \$1.0 million. Over the next 12 months, Snap-on anticipates taking certain tax positions on various tax returns for which the related tax benefit does not meet the recognition threshold. Accordingly, Snap-on s gross unrecognized tax benefits may increase by a range of zero to \$0.7 million over the next 12 months for uncertain tax positions expected to be taken in future tax filings.

#### Note 8: Short-term and Long-term Debt

Short-term and long-term debt as of June 29, 2013, and December 29, 2012, consisted of the following:

Less: notes payable and current maturities of long-term debt	(114.9)	(5.2)	
Total long-term debt	\$ 861.4	\$ 970.4	

Notes payable and current maturities of long-term debt of \$114.9 million as of June 29, 2013, includes \$100.0 million of 5.85% unsecured notes that mature on March 1, 2014 (the 2014 Notes), and \$14.9 million of other notes. As of 2012 year end, the 2014 Notes were included in Long-term debt on the accompanying Condensed Consolidated Balance Sheets as their scheduled maturity was in excess of one year of the December 29, 2012 year-end balance sheet date. Notes payable as of 2012 year end totaled \$5.2 million.

Snap-on has a five-year, \$500 million multi-currency revolving credit facility that terminates on December 8, 2016; as of June 29, 2013, no amounts were outstanding under this facility. Borrowings under the \$500 million revolving credit facility bear interest at varying rates based on Snap-on s then-current, long-term debt ratings. The \$500 million revolving credit facility s financial covenant requires that Snap-on maintain, as of each fiscal quarter end, either (i) a ratio of total debt to the sum of total debt plus equity (including noncontrolling interests) of not greater than 0.60 to 1.00; or (ii) a ratio of total debt to the sum of net income plus interest expense, income taxes, depreciation, amortization and other non-cash or extraordinary charges for the preceding four fiscal quarters then ended of not greater than 3.50 to 1.00. As of June 29, 2013, the company s actual ratios of 0.34 and 1.47, respectively, were both within the permitted ranges set forth in this financial covenant.

Snap-on also has a 364-day loan and servicing agreement that allows Snap-on to borrow up to \$200 million (subject to borrowing base requirements) through the pledging of finance receivables under an asset-backed commercial paper conduit facility; the loan and servicing agreement expires on September 27, 2013 (unless earlier terminated or subsequently extended pursuant to the terms of the agreement). As of June 29, 2013, no amounts were outstanding under the loan and servicing agreement.

In addition to the financial covenant required by the \$500 million multi-currency revolving credit facility discussed above, Snap-on s other debt agreements and credit facilities, including the \$200 million loan and servicing agreement, also contain certain usual and customary borrowing, affirmative, negative and maintenance covenants. As of June 29, 2013, Snap-on was in compliance with all covenants of its debt agreements and credit facilities.

# NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

(Unaudited)

#### **Note 9: Financial Instruments**

Derivatives: All derivative instruments are reported in the Condensed Consolidated Financial Statements at fair value. Changes in the fair value of derivatives are recorded each period in earnings or on the accompanying Condensed Consolidated Balance Sheets, depending on whether the derivative is designated and effective as part of a hedged transaction. Gains or losses on derivative instruments recorded in Accumulated other comprehensive income (loss) ( Accumulated OCI ) must be reclassified to earnings in the period in which earnings are affected by the underlying hedged item and the ineffective portion of all hedges must be recognized in earnings in the period that such portion is determined to be ineffective.

The criteria used to determine if hedge accounting treatment is appropriate are (i) the designation of the hedge to an underlying exposure; (ii) whether or not overall risk is being reduced; and (iii) if there is a correlation between the value of the derivative instrument and the underlying hedged item. On the date a derivative contract is entered into, Snap-on designates the derivative as a fair value hedge, a cash flow hedge, a hedge of a net investment in a foreign operation, or a natural hedging instrument whose change in fair value is recognized as an economic hedge against changes in the value of the hedged item. Snap-on does not use derivative instruments for speculative or trading purposes.

The company is exposed to global market risks, including the effects of changes in foreign currency exchange rates and interest rates, and therefore uses derivatives to manage financial exposures that occur in the normal course of business. The primary risks managed by using derivative instruments are foreign currency risk, interest rate risk and stock-based deferred compensation risk.

Foreign Currency Risk Management: Snap-on has significant international operations and is subject to certain risks inherent with foreign operations that include currency fluctuations. Foreign currency exchange risk exists to the extent that Snap-on has payment obligations or receipts denominated in currencies other than the functional currency, including intercompany loans denominated in foreign currencies. To manage these exposures, Snap-on identifies naturally offsetting positions and then purchases hedging instruments to protect the residual net exposures. Snap-on manages most of these exposures on a consolidated basis, which allows for netting of certain exposures to take advantage of natural offsets. Foreign currency forward contracts (foreign currency forwards) are used to hedge the net exposures. Gains or losses on net foreign currency hedges are intended to offset losses or gains on the underlying net exposures in an effort to reduce the earnings volatility resulting from fluctuating foreign currency exchange rates. Snap-on s foreign currency forwards are typically not designated as hedges. The fair value changes of these contracts are reported in earnings as foreign exchange gain or loss, which is included in Other income (expense) net on the accompanying Condensed Consolidated Statements of Earnings.

At June 29, 2013, Snap-on had \$208.8 million of net foreign currency forward buy contracts outstanding comprised of buy contracts including \$94.6 million in euros, \$70.4 million in Swedish kronor, \$34.9 million in Australian dollars, \$20.2 million in British pounds, \$11.9 million in Singapore dollars, \$7.9 million in Hong Kong dollars, \$4.8 million in South Korean won, and \$7.5 million in other currencies, and sell contracts comprised of \$22.6 million in Canadian dollars, \$13.5 million in Japanese yen, \$3.4 million in Argentine pesos, and \$3.9 million in other currencies. At December 29, 2012, Snap-on had \$199.0 million of net foreign currency forward buy contracts outstanding comprised of buy contracts including \$90.0 million in euros, \$74.9 million in Swedish kronor, \$34.7 million in Australian dollars, \$33.0 million in British pounds, \$12.0 million in Singapore dollars, \$7.0 million in Hong Kong dollars, \$5.1 million in South Korean won, \$2.5 million in Chilean pesos, and \$3.5 million in other currencies, and sell contracts including \$41.6 million in Canadian dollars, \$11.1 million in Japanese yen, \$3.5 million in Argentine pesos, \$2.6 million in Turkish lira, and \$4.9 million in other currencies.

Interest Rate Risk Management: Snap-on aims to control funding costs by managing the exposure created by the differing maturities and interest rate structures of Snap-on s borrowings through the use of interest rate swap agreements. Treasury lock agreements are used from time to manage potential changes in interest rates in anticipation of the issuance or sale of certain financial instruments.

#### **SNAP-ON INCORPORATED**

### NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

(Unaudited)

Interest Rate Swap Agreements: Snap-on enters into interest rate swap agreements ( interest rate swaps ) to manage risks associated with changing interest rates related to the company s fixed rate borrowings. Interest rate swaps are accounted for as fair value hedges. The differentials paid or received on interest rate swaps are recognized as adjustments to Interest expense on the accompanying Condensed Consolidated Statements of Earnings. The effective portion of the change in fair value of the derivative is recorded in Long-term debt on the accompanying Condensed Consolidated Balance Sheets, while any ineffective portion is recorded as an adjustment to Interest expense on the accompanying Condensed Consolidated Statements of Earnings. The notional amount of interest rate swaps outstanding and designated as fair value hedges was \$100.0 million as of both June 29, 2013, and December 29, 2012.

Treasury Lock Agreements: Snap-on enters into treasury lock agreements (treasury locks) from time to time to manage the potential change in interest rates in anticipation of issuing fixed rate debt. Treasury locks are accounted for as cash flow hedges. The effective differentials paid or received on treasury locks related to the anticipated issuance of fixed rate debt are recognized as adjustments to Interest expense on the accompanying Condensed Consolidated Statements of Earnings. There were no treasury locks outstanding as of June 29, 2013, or December 29, 2012, and no treasury locks were settled during either the first six months of 2013 or 2012.

Stock-based Deferred Compensation Risk Management: Snap-on aims to manage market risk associated with the stock-based portion of its deferred compensation plans through the use of prepaid equity forwards (equity forwards). Equity forwards are used to aid in offsetting the potential mark-to-market effect on stock-based deferred compensation from changes in Snap-on s stock price. Since stock-based deferred compensation liabilities increase as the company s stock price increases and decrease as the company s stock price decreases, the equity forwards are intended to mitigate the potential impact on compensation expense that may result from such mark-to-market changes. As of June 29, 2013, Snap-on had equity forwards in place intended to manage market risk with respect to 126,300 shares of Snap-on common stock associated with its deferred compensation plans.

Fair Value Measurements: Snap-on has derivative assets and liabilities related to interest rate swaps, foreign currency forwards and equity forwards that are measured at Level 2 fair value on a recurring basis. The fair value of derivative instruments included within the Condensed Consolidated Balance Sheets as of June 29, 2013, and December 29, 2012, are as follows:

As of June 29, 2013, and December 29, 2012, the fair value adjustment to long-term debt related to the interest rate swaps was \$12.6 million and \$21.4 million, respectively.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between participants at the measurement date. Level 2 fair value measurements for derivative assets and liabilities are measured using quoted prices in active markets for similar assets and liabilities. Interest rate swaps are valued based on the six-month LIBOR swap rate for similar instruments. Foreign currency forwards are valued based on exchange rates quoted by domestic and foreign banks for similar instruments. Equity forwards are valued using a market approach based primarily on the company s stock price at the reporting date. The company did not have any assets or liabilities measured at Level 1 or Level 3, nor did it implement any changes in its valuation techniques as of and for the six month period ended June 29, 2013.

Snap-on s foreign currency forwards are typically not designated as hedges for financial reporting purposes. The fair value changes of foreign currency forwards not designated as hedging instruments are reported in earnings as foreign exchange gain or loss in Other income (expense) net on the accompanying Condensed Consolidated Statements of Earnings. The \$3.9 million derivative loss recognized in the second quarter of 2013 was offset by transaction gains on net exposures of \$2.1 million, resulting in a net foreign exchange loss of \$1.8 million for the quarter. The \$8.8 million derivative loss recognized in the second quarter of 2012 was offset by transaction gains on net exposures of \$8.7 million, resulting in a net foreign exchange loss of \$0.1 million for that quarter. The \$5.9 million derivative loss recognized in the first six months of 2013 was offset by transaction gains on net exposures of \$2.5 million. The \$2.9 million derivative loss recognized in the first six months of 2012 was offset by transaction gains on net exposures of \$2.2 million, resulting in a 2012 year-to-date net foreign exchange loss of \$0.7 million. The resulting net foreign exchange gains and losses are included in Other income (expense) net on the accompanying Condensed Consolidated Statements of Earnings. See Note 15 for additional information on Other income (expense) net.

Snap-on s equity forwards are not designated as hedges for financial reporting purposes. The fair value changes of equity forwards are reported in Operating expenses on the accompanying Condensed Consolidated Statements of Earnings.

As of June 29, 2013, the maximum maturity date of any fair value hedge was nine years. During the next 12 months, Snap-on expects to reclassify into earnings net gains from Accumulated OCI of approximately \$0.2 million after tax at the time the underlying hedge transactions are realized.

See the accompanying Condensed Consolidated Statements of Comprehensive Income for additional information on changes in comprehensive income

Counterparty Risk: Snap-on is exposed to credit losses in the event of non-performance by the counterparties to its various financial agreements, including its foreign currency forward contracts, interest rate swap agreements and equity forward agreements. Snap-on does not obtain collateral or other security to support financial instruments subject to credit risk, but monitors the credit standing of the counterparties and generally enters into agreements with financial institution counterparties with a credit rating of A- or better. Snap-on does not anticipate non-performance by its counterparties, but cannot provide assurances.

Fair Value of Financial Instruments: The fair values of financial instruments that do not approximate the carrying values in the financial statements are as follows:

	June 29, 2013			December 29, 2012			12
	Car	rrying	Fair	Ca	arrying		Fair

Long-term debt and notes payable and current maturities of							
long-term debt		976.3	1,090.6		975.6		1,126.7

The following methods and assumptions were used in estimating the fair value of financial instruments:

Finance and contract receivables include both short-term and long-term receivables. The fair value of finance and contract receivables was estimated, using Level 2 fair value measurements, based on a discounted cash flow analysis that was performed over the average life of the receivables using a current market discount rate of a similar term adjusted for credit quality.

Fair value of long-term debt and current maturities of long-term debt was estimated, using Level 2 fair value measurements, based on quoted market values of Snap-on s publicly traded senior debt. The carrying value of long-term debt and current maturities of long-term debt includes adjustments related to fair value hedges. The fair value of notes payable approximates such instruments carrying value due to their short-term nature.

The fair value of all other financial instruments including cash equivalents, trade and other accounts receivable, accounts payable and other financial instruments approximates such instruments carrying value due to their short-term nature.

#### Note 12: Stock-based Compensation and Other Stock Plans

The 2011 Incentive Stock and Awards Plan (the 2011 Plan ) provides for the grant of stock options, performance awards, stock appreciation rights (SARs) and restricted stock awards (which may be designated as restricted stock units or RSUs). No further grants are being made under its predecessor, the 2001 Incentive Stock and Awards Plan (the 2001 Plan ), although outstanding awards under the 2001 Plan will continue until exercised, vested, forfeited or expired. As of June 29, 2013, the 2011 Plan had 2,840,586 shares available for future grants. The company uses treasury stock to deliver shares under both the 2001 and 2011 Plans.

Net stock-based compensation expense was \$10.0 million and \$19.5 million for the respective three and six month periods ended June 29, 2013, and \$7.4 million and \$16.1 million for the respective three and six month periods ended June 30, 2012. Cash received from option exercises during the three and six month periods ended June 29, 2013, totaled \$18.7 million and \$26.1 million, respectively. Cash received from option exercises during the three and six month periods ended June 30, 2012, totaled \$9.2 million and \$22.5 million, respectively. The tax benefit realized from the exercise of share-based payment arrangements was \$2.4 million and \$10.5 million for the respective three and six month periods ended June 29, 2013, and \$1.4 million and \$5.0 million for the respective three and six month periods ended June 30, 2012.

#### Stock Options

Stock options are granted with an exercise price equal to the market value of a share of Snap-on s common stock on the date of grant and have a contractual term of ten years. Stock option grants vest ratably on the first, second and third anniversaries of the date of grant.

The fair value of each stock option award is estimated on the date of grant using the Black-Scholes valuation model. The company uses historical data regarding stock option exercise behaviors for different participating groups to estimate the period of time that options granted are expected to be outstanding. Expected volatility is based on the historical volatility of the company s stock for the length of time corresponding to the expected term of the option. The expected dividend yield is based on the company s historical dividend payments. The risk-free interest rate is based on the U.S. treasury yield curve on the grant date for the expected term of the option.

<sup>\*</sup> Weighted-average

The weighted-average grant date fair value of options granted during the six month periods ended June 29, 2013, and June 30, 2012, was \$17.36 and \$15.46, respectively. The intrinsic value of options exercised was \$6.5 million and \$11.0 million during the respective three and six month periods ended June 29, 2013, and \$2.0 million and \$8.7 million during the respective three and six month periods ended June 30, 2012. The fair value of stock options vested was \$7.8 million and \$5.7 million during the respective six month periods ended June 29, 2013, and June 30, 2012.

As of June 29, 2013, there was \$16.7 million of unrecognized compensation cost related to non-vested stock option compensation arrangements that is expected to be recognized as a charge to earnings over a weighted-average period of 2.2 years.

#### Performance Awards

Performance awards, which are granted as performance share units and performance-based RSUs, are earned and expensed using the fair value of the award over a contractual term of three years based on the company s performance. Vesting of the performance awards is dependent upon performance relative to pre-defined goals for revenue growth and return on net assets for the applicable performance period. For performance

achieved above a certain level, the recipient may earn additional shares of stock, not to exceed 100% of the number of performance awards initially granted.

The performance share units have a three-year performance period based on the results of the consolidated financial metrics of the company. The performance-based RSUs have a one-year performance period based on the results of the consolidated financial metrics of the company followed by a two-year cliff vesting schedule.

## NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

(Unaudited)

The fair value of performance awards is calculated using the market value of a share of Snap-on s common stock on the date of grant. The weighted-average grant date fair value of performance awards granted during the six month periods ended June 29, 2013, and June 30, 2012, was \$77.31 and \$60.00, respectively. Performance share units of 213,459 shares and 53,990 shares were paid out during the respective six month periods ended June 29, 2013, and June 30, 2012. Earned performance share units are generally paid out following the conclusion of the applicable performance period upon approval by the Organization and Executive Compensation Committee of the company s Board of Directors (the Board ).

Based on the company s 2012 performance, 95,047 RSUs granted in 2012 were earned; assuming continued employment, these RSUs will vest at the end of fiscal 2014. Based on the company s 2011 performance, 159,970 RSUs granted in 2011 were earned; assuming continued employment, these RSUs will vest at the end of fiscal 2013.

The changes to the company s non-vested performance awards during the six month period ended June 29, 2013, are as follows:

	Shares (in thousands)	Fair Value Price per Share (*)
Non-vested performance awards at December 29, 2012	509	\$ 59.36
Granted	172	77.31
Vested		
Cancellations		
Non-vested performance awards at June 29, 2013	681	63.89

As of June 29, 2013, there was \$19.6 million of unrecognized compensation cost related to non-vested performance awards that is expected to be recognized as a charge to earnings over a weighted-average period of 1.9 years.

Stock Appreciation Rights ( SARs )

The company also issues cash-settled and stock-settled SARs to certain key non-U.S. employees. SARs have a contractual term of ten years and vest ratably on the first, second and third anniversaries of the date of grant. SARs are granted with an exercise price equal to the market value of a share of Snap-on s common stock on the date of grant.

Cash-settled SARs provide for the cash payment of the excess of the fair market value of Snap-on s common stock price on the date of exercise over the grant price. Cash-settled SARs have no effect on dilutive shares or shares outstanding as any appreciation of Snap-on s common stock value over the grant price is paid in cash and not in common stock.

In 2013, the company began issuing stock-settled SARs that are accounted for as equity instruments and provide for the issuance of Snap-on common stock equal to the amount by which the company s stock has appreciated over the exercise price. As stock-settled SARs vest, they will have an effect on dilutive shares and shares outstanding as any appreciation of Snap-on s common stock value over the exercise price will be settled in shares of common stock.

<sup>\*</sup> Weighted-average

The fair value of cash-settled SARs is revalued (mark-to-market) each reporting period using the Black-Scholes valuation model based on Snap-on s period-end stock price. The fair value of stock-settled SARs is estimated on the date of grant using the Black-Scholes valuation model. The company uses historical data regarding SARs exercise behaviors for different participating groups to estimate the expected term of the SARs granted based on the period of time that similar instruments granted are expected to be outstanding. Expected volatility is based on the historical volatility of the company s stock for the length of time corresponding to the expected term of the SARs. The expected dividend yield is based on the company s historical dividend payments. The risk-free interest rate is based on the U.S. treasury yield curve in effect as of the reporting date for the length of time corresponding to the expected term of the SARs.

Restricted Stock Awards Non-employee Directors

The company awarded a total of 13,437 shares of restricted stock to non-employee directors in the first six months of 2013. All restrictions will lapse upon the earlier of the first anniversary of the grant date, the recipient s death or disability or in the event of a change in control, as defined in the 2011 Plan. If termination of the recipient s service occurs prior to the first anniversary of the grant date for reasons other than death or disability, the shares of restricted stock would be forfeited, unless otherwise determined by the Board.

Employee Stock Purchase Plan

All Snap-on employees in the United States and Canada are eligible to participate in an employee stock purchase plan. The purchase price of the company's common stock to participants is the lesser of the mean of the high and low price of the stock on the beginning date (May 15) or ending date (the following May 14) of each plan year. For the six months ended June 29, 2013 and June 30, 2012, issuances under this plan totaled 93,442 shares and 33,596 shares, respectively. As of June 29, 2013, shares reserved for issuance under this plan totaled 921,624 shares and Snap-on held participant contributions of approximately \$0.2 million. Participants are able to withdraw from the plan and receive all contributions made during the plan year. Compensation expense for plan participants was \$1.4 million and \$2.3 million for the three and six month periods ended June 29, 2013, respectively, and zero for both the three and six month periods ended June 30, 2012.

Franchisee Stock Purchase Plan

All franchisees in the United States and Canada are eligible to participate in a franchisee stock purchase plan. The purchase price of the company s common stock to participants is the lesser of the mean of the high and low price of the stock on the beginning date (May 15) or ending date (the following May 14) of each plan year. Weighted-average common shares outstanding, assuming dilution	58,964,323	58,813,662	59,104,427	58,793,136

The dilutive effect of the potential exercise of outstanding stock-based instruments to purchase common shares is calculated using the treasury stock method. There were no options outstanding that were anti-dilutive for the three and six month periods ended June 29, 2013. Options to purchase 11,850 shares and 1,186,571 shares of Snap-on common stock for the three and six month periods ended June 30, 2012, respectively, were not included in the computation of diluted earnings per share as the exercise price of the options was greater than the average market price of the common stock for the respective period and the effect on earnings per share would be anti-dilutive.

#### **Note 14: Commitments and Contingencies**

Snap-on provides product warranties for specific product lines and accrues for estimated future warranty cost in the period in which the sale is recorded. Snap-on calculates its accrual requirements based on historic warranty loss experience that is periodically adjusted for recent actual experience, including the timing of claims during the warranty period and actual costs incurred. Snap-on s product warranty accrual activity for the three and six month periods ended June 29, 2013, and June 30, 2012, is as follows:

Snap-on has credit risk exposure for certain SOC-originated contracts with recourse provisions related to franchisee van leases sold by SOC; as of June 29, 2013, and December 29, 2012, \$12.0 million and \$13.3 million, respectively, of franchisee leases contain a recourse provision to Snap-on if the leases become more than 90 days past due. The asset value of the collateral underlying these recourse leases would serve to mitigate Snap-on s loss in the event of default. The estimated fair value of the guarantees for all lease originations with recourse as of June 29, 2013, was not material.

Snap-on is involved in various legal matters that are being litigated and/or settled in the ordinary course of business. Although it is not possible to predict the outcome of these legal matters, management believes that the results of these legal matters will not have a material impact on Snap-on s consolidated financial position, results of operations or cash flows.

#### Note 17: Segments

Snap-on s business segments are based on the organization structure used by management for making operating and investment decisions and for assessing performance. Snap-on s reportable business segments are: (i) the Commercial & Industrial Group; (ii) the Snap-on Tools Group; (iii) the Repair Systems & Information Group; and (iv) Financial Services. The Commercial & Industrial Group consists of business operations serving a broad range of industrial and commercial customers worldwide, primarily through direct and distributor channels. The Snap-on Tools Group consists of business operations primarily serving automotive service technicians through the company s worldwide mobile tool distribution channel. The Repair Systems & Information Group consists of business operations serving other professional vehicle repair customers worldwide, primarily owners and managers of independent repair shops and original equipment manufacturer (OEM) dealership service and repair shops, through direct and distributor channels. Financial Services consists of the business operations of Snap-on s finance subsidiaries.

Snap-on evaluates the performance of its operating segments based on segment revenues, including both external and intersegment net sales, and segment operating earnings. Snap-on accounts for intersegment sales and transfers based primarily on standard costs with reasonable mark-ups

<sup>\*</sup> These Accumulated OCI components are included in the computation of net periodic pension and postretirement cost. See Notes 10 and 11 for more information.

established between the segments. Identifiable assets by segment are those assets used in the respective reportable segment s operations. Corporate assets consist of cash and cash equivalents (excluding cash held at Financial Services), deferred income taxes and certain other assets. All significant intersegment amounts are eliminated to arrive at Snap-on s consolidated financial results.

#### **Caution Regarding Forward-Looking Statements:**

Statements in this document that are not historical facts, including statements that (i) are in the future tense; (ii) include the words expects, plans, targets, estimates, believes, anticipates, or similar words that reference Snap-on Incorporated (Snap-on or the company) or its mana (iii) are specifically identified as forward-looking; or (iv) describe Snap-on s or management s future outlook, plans, estimates, objectives or goals, are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Snap-on cautions the reader that any forward-looking statements included in this document that are based upon assumptions and estimates were developed by management in good faith and are subject to risks, uncertainties or other factors that could cause (and in some cases have caused) actual results to differ materially from those described in any such statement. Accordingly, forward-looking statements should not be relied upon as a prediction of actual results or regarded as a representation by the company or its management that the projected results will be achieved. For those forward-looking statements, Snap-on cautions the reader that numerous important factors, such as those listed below, as well as those factors discussed in its Annual Report on Form 10-K for the fiscal year ended December 29, 2012, which are incorporated herein by reference, could affect the company s actual results and could cause its actual consolidated results to differ materially from those expressed in any forward-looking statement made by, or on behalf of, Snap-on.

These risks and uncertainties include, without limitation, uncertainties related to estimates, statements, assumptions and projections generally, and the timing and progress with which Snap-on can attain value through its Snap-on Value Creation Processes, including its ability to realize efficiencies and savings from its rapid continuous improvement and other cost reduction initiatives, improve workforce productivity, implement reductions in workforce, achieve improvements in the company s manufacturing footprint and greater efficiencies in its supply chain, and enhance machine maintenance, plant productivity and manufacturing line set-up and change-over practices, any or all of which could result in production inefficiencies, higher costs and/or lost revenues. These risks also include uncertainties related to Snap-on s capability to implement future strategies with respect to its existing businesses, its ability to refine its brand and franchise strategies, retain and attract franchisees, further enhance service and value to franchisees and thereby help improve their sales and profitability, introduce successful new products, successfully pursue, complete and integrate acquisitions, as well as its ability to withstand disruption arising from natural disasters, planned facility closures or other labor interruptions, the effects of external negative factors, including continuing uncertainty in world financial markets, weakness in certain areas of the global economy, and significant changes in the current competitive environment, inflation, interest rates and other monetary and market fluctuations, changes in tax rates and regulations, and the impact of energy and raw material supply and pricing, including steel and gasoline, the amount, rate and growth of Snap-on s general and administrative expenses, including health care and postretirement costs (resulting from, among other matters, U.S. health care legislation and reforms), continuing and potentially increasing required contributions to pension and postretirement plans, the impacts of non-strategic business and/or product line rationalizations, and the effects on business as a result of new legislation, regulations or the U.S. government s budget sequestration, risks associated with technological systems and protections, and other world or local events outside Snap-on's control, including terrorist disruptions. Snap-on disclaims any responsibility to update any forward-looking statement provided in this document, except as required by law.

In addition, investors should be aware that generally accepted accounting principles in the United States of America (U.S. GAAP) prescribe when a company should reserve for particular risks, including litigation exposures. Accordingly, results for a given reporting period could be significantly affected if and when a reserve is established for a major contingency. Reported results, therefore, may appear to be volatile in certain accounting periods.

Percentage Disclosure: All income statement line item percentages below Operating earnings from financial services are calculated as a percentage of the sum of Net sales and Financial services revenue.

Net sales of \$764.1 million in the second quarter of 2013 increased \$26.2 million, or 3.6%, from 2012 levels, including \$8.5 million of sales for the seven-week period following the company s May 2013 acquisition of Challenger Lifts, Inc. (Challenger) and an unfavorable impact of \$4.7 million from foreign currency translation. Organic sales (excluding acquisition-related sales and foreign currency translation impacts) in the second quarter of 2013 increased \$22.4 million, or 3.1%, from 2012 levels. Snap-on has significant international operations and is subject to certain risks inherent with foreign operations, including foreign currency translation fluctuations.

Gross profit of \$373.2 million in the second quarter of 2013 increased \$23.3 million as compared to \$349.9 million last year. Gross margin (gross profit as a percentage of net sales) of 48.8% in the second quarter of 2013 improved 140 basis points (100 basis points equals 1.0 percent) from 47.4% last year primarily due to lower restructuring costs, as well as savings from ongoing efficiency and productivity initiatives, including benefits from restructuring actions (collectively, Rapid Continuous Improvement or RCI initiatives). Gross profit in the second quarter of 2013 reflects \$0.8 million of restructuring costs; gross profit in the second quarter of 2012 reflects \$9.5 million of restructuring costs, including \$6.8 million for the settlement of a pension plan following the 2011 closure of the company s former Newmarket, Canada, facility.

## MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(continued)

Operating expenses of \$255.4 million in the second quarter of 2013 increased \$10.1 million as compared to \$245.3 million last year primarily as a result of higher volume-related expenses and \$4.4 million of increased stock-based and mark-to-market expenses. Restructuring costs included in operating expenses totaled \$1.0 million in the second quarter of 2013 as compared to \$0.7 million last year. The second-quarter 2013 operating expense margin (operating expenses as a percentage of net sales) of 33.4% compared to 33.2% last year.

Operating earnings before financial services of \$117.8 million in the second quarter of 2013 increased \$13.2 million, or 12.6%, as compared to \$104.6 million last year. As a percentage of sales, operating earnings before financial services of 15.4% in the quarter improved 120 basis points from 14.2% last year.

Operating earnings from financial services were \$30.6 million on revenue of \$44.5 million in the second quarter of 2013, as compared with operating earnings of \$25.6 million on revenue of \$39.9 million last year. The year-over-year increase in both revenue and operating earnings primarily reflects the growth in the company s on-book finance portfolio.

Operating earnings of \$148.4 million in the second quarter of 2013 increased \$18.2 million, or 14.0%, from \$130.2 million last year. As a percentage of revenues (net sales plus financial services revenue), operating earnings in the second quarter of 2013 improved 170 basis points from 16.7% last year to 18.4% this year.

Interest expense of \$13.8 million in the second quarter of 2013 decreased \$0.1 million from the comparable prior-year period. See Note 8 to the Condensed Consolidated Financial Statements for information on Snap-on s debt and credit facilities.

Other income (expense) net in the second quarters of 2013 and 2012 was expense of \$1.7 million and income of \$0.1 million, respectively, and primarily includes interest income, as well as hedging and currency exchange rate transaction gains and losses. See Note 15 to the Condensed Consolidated Financial Statements for information on other income (expense) net.

Snap-on s effective income tax rate on earnings attributable to Snap-on was 32.5% in the second quarter of 2013 and 33.5% in the second quarter of 2012. The lower 2013 effective income tax rate primarily benefited from the extension of the federal research tax credit and certain other business tax provisions included in the American Taxpayer Relief Act of 2012, which was signed into law on January 2, 2013, and the favorable resolution of a foreign tax audit. See Note 7 to the Condensed Consolidated Financial Statements for information on income taxes.

On May 13, 2013, Snap-on acquired Challenger for a preliminary cash purchase price of \$38.2 million. The preliminary purchase price is subject to change upon the finalization of a working capital adjustment, which is expected to be completed in the third quarter of 2013.

Challenger, with full-year 2012 sales of approximately \$45 million, designs, manufactures and distributes a comprehensive line of vehicle lifts and accessories to a diverse customer base in the automotive repair sector. The acquisition of Challenger is intended to further Snap-on s progress along its coherent growth strategy of expanding with repair shop owners and managers. For segment reporting purposes, the results of operations and assets of Challenger have been included in the Repair Systems & Information Group since the date of acquisition. The net sales and operating earnings impacts of the Challenger acquisition were neither significant nor material to Snap-on s second quarter or year-to-date 2013 results of operations or financial position.

Net earnings attributable to Snap-on in the second quarter of 2013 were \$88.4 million, or \$1.50 per diluted share. Net earnings attributable to Snap-on in the second quarter of 2012 were \$76.4 million, or \$1.30 per diluted share.

Percentage Disclosure: All income statement line item percentages below Operating earnings from financial services are calculated as a percentage of the sum of Net sales and Financial services revenue.

Net sales of \$1,505.8 million in the first six months of 2013 were up \$32.7 million, or 2.2%, from 2012 levels, including \$8.5 million of sales from the company s May 2013 acquisition of Challenger and an unfavorable impact of \$9.0 million from foreign currency translation. Organic sales (excluding acquisition-related sales and foreign currency translation impacts) in the first six months of 2013 increased \$33.2 million, or 2.3%, over prior-year levels.

Gross profit of \$730.1 million in the first six months of 2013 increased \$32.5 million as compared to \$697.6 million last year. Gross margin of 48.5% in the first six months of 2013 improved 110 basis points from 47.4% last year primarily due to benefits from ongoing RCI initiatives, contributions from higher sales volume and lower restructuring costs. Gross profit in the first six months of 2013 reflects \$3.1 million of restructuring costs; restructuring costs in the first six months of 2012 reflects \$9.9 million of restructuring costs, including \$6.8 million for the settlement of the Newmarket pension plan.

Operating expenses of \$504.5 million in the first six months of 2013 increased \$9.0 million as compared to \$495.5 million last year. The operating expense margin of 33.5% in the first six months of 2013 improved 20 basis points from 33.7% last year primarily due to benefits from sales volume leverage, savings from ongoing RCI initiatives and lower restructuring costs, which more than offset the impact of increased stock-based and mark-to-market expenses. Restructuring costs included in operating expenses totaled \$1.5 million in the first six months of 2013 as compared to \$4.3 million last year.

## MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(continued)

Operating earnings before financial services of \$225.6 million in the first six months of 2013 increased \$23.5 million, or 11.6%, as compared to \$202.1 million last year. As a percentage of sales, operating earnings before financial services of 15.0% in the first six months of 2013 improved 130 basis points from 13.7% last year.

Financial services operating earnings of \$61.1 million on revenue of \$88.5 million in the first six months of 2013 compares with operating earnings of \$49.5 million on revenue of \$77.9 million last year. The year-over-year increase in both revenue and operating earnings primarily reflects the growth in the company s on-book finance portfolio.

Operating earnings of \$286.7 million in the first six months of 2013 increased \$35.1 million, or 14.0%, as compared with operating earnings of \$251.6 million last year. As a percentage of revenues (net sales plus financial services revenue), operating earnings of 18.0% in the first six months of 2013 improved 180 basis points from 16.2% last year.

Interest expense of \$27.4 million in the first six months of 2013 decreased \$0.4 million from the comparable prior-year period primarily due to lower average debt levels. See Note 8 to the Condensed Consolidated Financial Statements for information on Snap-on s debt and credit facilities.

Other income (expense) net in the first six months of 2013 and 2012 was expense of \$2.3 million and \$0.3 million, respectively, and primarily includes interest income, as well as hedging and currency exchange rate transaction gains and losses. See Note 15 to the Condensed Consolidated Financial Statements for information on other income (expense) net.

Snap-on s effective income tax rate on earnings attributable to Snap-on was 32.2% in the first six months of 2013 and 33.5% in the first six months of 2012. The lower 2013 effective income tax rate primarily benefited from the retroactive extension of the federal research tax credit and certain other business tax provisions included in the American Taxpayer Relief Act of 2012, which was signed into law on January 2, 2013, and the favorable resolution of a foreign tax audit. See Note 7 to the Condensed Consolidated Financial Statements for information on income taxes.

Net earnings attributable to Snap-on in the first six months of 2013 were \$171.2 million, or \$2.90 per diluted share. Net earnings attributable to Snap-on in the first six months of 2012 were \$147.4 million, or \$2.51 per diluted share.

## MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(continued)

#### **Segment Results**

Snap-on s business segments are based on the organization structure used by management for making operating and investment decisions and for assessing performance. Snap-on s reportable business segments are: (i) the Commercial & Industrial Group; (ii) the Snap-on Tools Group; (iii) the Repair Systems & Information Group; and (iv) Financial Services. The Commercial & Industrial Group consists of business operations serving a broad range of industrial and commercial customers worldwide, primarily through direct and distributor channels. The Snap-on Tools Group consists of business operations primarily serving automotive service technicians through the company s worldwide mobile tool distribution channel. The Repair Systems & Information Group consists of business operations serving other professional vehicle repair customers worldwide, primarily owners and managers of independent repair shops and original equipment manufacturer (OEM) dealership service and repair shops, through direct and distributor channels. Financial Services consists of the business operations of Snap-on s finance subsidiaries.

Snap-on evaluates the performance of its operating segments based on segment revenues, including both external and intersegment net sales, and segment operating earnings. Snap-on accounts for intersegment sales and transfers based primarily on standard costs with reasonable mark-ups established between the segments. Identifiable assets by segment are those assets used in the respective reportable segment s operations. Corporate assets consist of cash and cash equivalents (excluding cash held at Financial Services), deferred income taxes and certain other assets. All significant intersegment amounts are eliminated to arrive at Snap-on s consolidated financial results.

Segment net sales of \$266.2 million in the second quarter of 2013 decreased \$17.2 million, or 6.1%, from 2012 levels; excluding \$2.1 million of unfavorable currency translation, organic sales decreased \$15.1 million or 5.4%. The lower year-over-year organic sales primarily reflects a double-digit decline in sales to the military and a high single-digit sales decline in the segment s European-based hand tools business as a result of ongoing economic weakness in that region.

Segment gross profit of \$105.4 million in the second quarter of 2013 increased \$1.1 million from 2012 levels. Gross margin of 39.6% in the quarter improved 280 basis points from 36.8% last year primarily due to savings from ongoing RCI initiatives, particularly in Europe, and lower restructuring costs. Gross profit in the second quarter of 2013 reflects \$0.1 million of restructuring costs as compared with \$2.6 million of such costs last year.

Segment operating expenses of \$71.8 million in the second quarter of 2013 increased \$0.3 million from 2012 levels. The operating expense margin of 27.0% in the quarter increased 180 basis points from 25.2% last year primarily as a result of the lower sales. Restructuring costs included in operating expenses were \$0.1 million and \$0.6 million in the second quarters of 2013 and 2012, respectively.

Segment net sales of \$246.2 million in the second quarter of 2013 increased \$18.8 million, or 8.3%, from 2012 levels. Excluding \$8.5 million of sales from the May 2013 acquisition of Challenger and a \$0.8 million impact from unfavorable foreign currency translation, organic sales in the second quarter of 2013 increased \$11.1 million, or 4.9%, from prior-year levels primarily driven by a high single-digit gain in sales to OEM dealerships and a mid single-digit gain in sales of diagnostics and repair information products to repair shop owners and managers.

Segment gross profit of \$114.9 million in the second quarter of 2013 increased \$6.3 million from 2012 levels. Gross margin in the second quarter of 2013 of 46.7% decreased 110 basis points from 47.8% last year primarily due to a shift in sales mix that included higher volumes of lower gross margin products, including higher sales of essential tool and facilitation products to OEM dealerships and sales from the recent acquisition of Challenger. These gross margin decreases were partially offset by continued savings from ongoing RCI initiatives. Gross profit in the second quarter of 2013 also reflects \$0.6 million of restructuring costs; no restructuring costs were included in gross profit in the second quarter of 2012.

Segment operating expenses of \$58.2 million in the second quarter of 2013 increased \$1.8 million from 2012 levels. The operating expense margin of 23.7% in the quarter improved 110 basis points from 24.8% last year primarily due to contributions from sales volume leverage, including the effects from the sales mix shift discussed above, and savings from ongoing RCI initiatives. Restructuring costs included in operating expenses totaled \$0.8 million and \$0.1 million in the second quarters of 2013 and 2012, respectively.

As a result of these factors, segment operating earnings of \$56.7 million in the second quarter of 2013 increased \$4.5 million from 2012 levels, including \$0.6 million of unfavorable foreign currency effects. Segment gross profit of \$228.9 million in the first six months of 2013 increased \$13.6 million from 2012 levels. Gross margin in the first six months of 2013 of 46.5% decreased 100 basis points from 47.5% last year primarily due to a shift in sales mix that included higher volumes of lower gross margin products, including higher sales of essential tool and facilitation products to OEM dealerships and sales from the recent acquisition of Challenger. These gross margin decreases were partially offset by continued savings from ongoing RCI initiatives. Gross profit in the first six months of 2013 reflects \$0.8 million of restructuring costs as compared with \$0.2 million of such costs last year.

Segment operating expenses of \$115.7 million in the first six months of 2013 increased \$1.2 million from 2012 levels. The operating expense margin of 23.5% in the first six months of 2013 improved 180 basis points from 25.3% last year primarily due to contributions from sales volume leverage, including the effects from the sales mix shift discussed above, and savings from ongoing RCI initiatives. Restructuring costs included in operating expenses totaled \$1.2 million and \$0.2 million in the first six months of 2013 and 2012, respectively.

As a result of these factors, segment operating earnings of \$113.2 million in the first six months of 2013 increased \$12.4 million from 2012 levels, including \$1.4 million of unfavorable foreign currency effects. Operating margin for the Repair Systems & Information Group of 23.0% in the first six months of 2013 increased 80 basis points from 22.2% last year.

Financial services operating earnings of \$30.6 million on revenue of \$44.5 million in the second quarter of 2013 compares with operating earnings of \$25.6 million on revenue of \$39.9 million last year. The \$4.6 million year-over-year increase in financial services revenue primarily reflects \$3.7 million of higher revenue as a result of continued growth of the company s on-book finance portfolio and \$0.6 million of increased revenue from higher average yields on finance and contract receivables. In the second quarters of 2013 and 2012, the average yield on finance receivables was 17.4% and 17.1%, respectively, and the average yield on contract receivables was 9.6% and 9.4%, respectively. Originations of \$203.1 million in the second quarter of 2013 increased \$27.5 million, or 15.7%, from comparable prior-year levels.

Financial services expenses of \$13.9 million and \$14.3 million in the second quarters of 2013 and 2012, respectively, primarily include personnel-related and other general and administrative costs necessary to service the portfolio of receivables owned by both Snap-on and CIT Group Inc. (collectively, the serviced portfolio). These expenses are generally more dependent on the change in size of the serviced portfolio than they are on the revenue of this segment. Financial services expenses also include doubtful accounts provisions for the finance and contract receivables owned by Snap-on. As a percentage of the average serviced portfolio, financial services expenses were 1.2% and 1.4% in the second quarters of 2013 and 2012, respectively.

### Corporate

Snap-on s general corporate expenses were \$27.0 million and \$24.9 million in the second quarters of 2013 and 2012, respectively. The year-over-year increase in general corporate expenses primarily reflects \$2.6 million of higher stock-based and mark-to-market expenses, including \$1.4 million associated with the company s employee stock purchase plan. All Snap-on employees in the United States and Canada are eligible to participate in the employee stock purchase plan.

Snap-on s general corporate expenses were \$53.5 million and \$51.3 million in the first six months of 2013 and 2012, respectively. The year-over-year increase in general corporate expenses includes \$2.3 million of higher expense associated with the company s employee stock purchase plan.

## MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

## **Liquidity and Capital Resources**

Snap-on s growth has historically been funded by a combination of cash provided by operating activities and debt financing. Snap-on believes that its cash from operations and collections of finance receivables, coupled with its sources of borrowings and available cash on hand, are sufficient to fund its currently anticipated requirements for payments of interest and dividends, scheduled debt repayments, new receivables originated by our financial services businesses, capital expenditures, working capital, restructuring activities, the funding of pension plans, and funding for additional share repurchases and acquisitions, if any. Due to Snap-on s credit rating over the years, external funds have been available at an acceptable cost. As of the close of business on July 12, 2013, Snap-on s long-term debt and commercial paper were rated, respectively, Baa1 and P-2 by Moody s Investors Service; A- and A-2 by Standard & Poor s; and A- and F2 by Fitch Ratings. Snap-on believes that its current credit arrangements are sound and that the strength of its balance sheet affords the company the financial flexibility to respond to both internal growth opportunities and those available through acquisitions. However, Snap-on cannot provide any assurances of the availability of future financing or the terms on which it might be available, or that its debt ratings may not decrease.

The following discussion focuses on information included in the accompanying Condensed Consolidated Balance Sheets.

As of June 29, 2013, working capital (current assets less current liabilities) of \$990.1 million decreased \$89.7 million from \$1,079.8 million as of December 29, 2012 (fiscal 2012 year end), primarily due to the inclusion of \$100 million of existing indebtedness (included in Notes payable and current maturities of long-term debt ) that matures in March 2014.

The following represents the company s working capital position as of June 29, 2013, and December 29, 2012:

(Amounts in millions)	June 29, 2013	December 29, 2012
Cash and cash equivalents	\$ 174.7	\$ 214.5
Trade and other accounts receivable net	499.9	497.9

Other current liabilities	(423.6)	(441.5)
Total current liabilities	(696.1)	(589.2)
Total working capital	\$ 990.1	\$ 1,079.8

Cash and cash equivalents of \$174.7 million as of June 29, 2013, compared to cash and cash equivalents of \$214.5 million at 2012 year end. The \$39.8 million decrease in cash and cash equivalents was primarily due to (i) the funding of \$321.5 million of new finance receivables; (ii) the repurchase of 725,000 shares of the company s common stock for \$62.1 million; (iii) dividend payments of \$44.4 million; (iv) the acquisition of Challenger for a preliminary cash purchase price of \$38.2 million; and (v) the funding of \$31.4 million of capital expenditures. These decreases in cash and cash equivalents were largely offset by (i) \$185.8 million of cash generated from operations; and (ii) \$247.1 million of cash from collections of finance receivables.

## MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(continued)

Of the \$174.7 million of cash and cash equivalents as of June 29, 2013, \$98.5 million was held outside of the United States. Snap-on considers these non-U.S. funds as permanently invested in its foreign operations to (i) provide adequate working capital; (ii) satisfy various regulatory requirements; and/or (iii) take advantage of business expansion opportunities as they arise; as such, the company does not presently expect to repatriate these funds to fund its U.S. operations or obligations. The repatriation of cash from certain foreign subsidiaries could have adverse net tax consequences on the company should Snap-on be required to pay and record U.S. income taxes and foreign withholding taxes on funds that were previously considered permanently invested. Alternatively, the repatriation of such cash from certain other foreign subsidiaries could result in favorable net tax consequences for the company. Snap-on periodically evaluates opportunities to repatriate certain foreign cash amounts to the extent that it does not incur additional unfavorable net tax consequences.

Trade and other accounts receivable net of \$499.9 million as of June 29, 2013, increased \$2.0 million from 2012 year-end levels; excluding \$9.7 million of currency translation impacts, trade and other accounts receivable net increased \$11.7 million, largely due to higher sales and the May 2013 acquisition of Challenger. Days sales outstanding (trade and other accounts receivable net as of the respective period end, divided by the respective trailing 12 months sales, times 360 days) was 61 days at both June 29, 2013, and 2012 year end.

The current portions of net finance and contract receivables of \$411.5 million as of June 29, 2013, compared to \$385.8 million at 2012 year end. The long-term portions of net finance and contract receivables of \$723.8 million as of June 29, 2013, compared to \$689.0 million at 2012 year end. The combined \$60.5 million increase in net current and long-term finance and contract receivables over 2012 year-end levels is primarily due to continued growth of the company s on-balance-sheet finance portfolio; excluding \$9.9 million of currency translation impacts, the combined increase for these receivables over 2012 year-end levels was \$70.4 million.

Inventories of \$418.1 million as of June 29, 2013, increased \$13.9 million from 2012 year-end levels; excluding currency translation impacts of \$11.1 million, inventories increased \$25.0 million, including inventories as a result of the Challenger acquisition. Inventory turns (trailing 12 months of cost of goods sold, divided by the average of the beginning and ending inventory balance for the trailing 12 months) were 3.8 and 3.9 turns, respectively, as of June 29, 2013, and December 29, 2012. Inventories accounted for using the first-in, first-out (FIFO) method as of June 29, 2013, and December 29, 2012, approximated 62% and 60%, respectively, of total inventories. All other inventories are accounted for using the last-in, first-out (LIFO) method. The company s LIFO reserve was \$72.1 million and \$71.8 million as of June 29, 2013, and December 29, 2012, respectively.

Notes payable and current maturities of long-term debt of \$114.9 million as of June 29, 2013, includes \$100.0 million of 5.85% unsecured notes that mature on March 1, 2014 (the 2014 Notes) and \$14.9 million of other notes. As of 2012 year end, the 2014 Notes were included in Long-term debt on the accompanying Condensed Consolidated Balance Sheets as their scheduled maturity was in excess of one year of the December 29, 2012 year-end balance sheet date. Notes payable as of 2012 year end totaled \$5.2 million.

Accounts payable of \$157.6 million as of June 29, 2013, increased \$15.1 million from 2012 year-end levels primarily due to the timing of payments and accounts payable associated with the Challenger acquisition; excluding \$1.6 million of currency translation impacts, accounts payable increased \$16.7 million.

Other accrued liabilities of \$250.9 million as of June 29, 2013, increased \$3.0 million from 2012 year-end levels; excluding \$7.6 million of currency translation impacts, other accrued liabilities increased \$10.6 million.

Long-term debt of \$861.4 million as of June 29, 2013, consisted of (i) \$150 million of unsecured 5.50% notes that mature in 2017; (ii) \$250 million of unsecured 4.25% notes that mature in 2018; (iii) \$200 million of unsecured 6.70% notes that mature in 2019; (iv) \$250 million of unsecured 6.125% notes that mature in 2021; and (v) \$11.4 million of other long-term debt, including fair value adjustments related to interest rate swaps.

## MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(continued)

Snap-on has a five-year, \$500 million multi-currency revolving credit facility that terminates on December 8, 2016; as of June 29, 2013, no amounts were outstanding under this facility. Borrowings under the \$500 million revolving credit facility bear interest at varying rates based on Snap-on s then-current, long-term debt ratings. The \$500 million revolving credit facility s financial covenant requires that Snap-on maintain, as of each fiscal quarter end, either (i) a ratio of total debt to the sum of total debt plus equity (including noncontrolling interests) of not greater than 0.60 to 1.00; or (ii) a ratio of total debt to the sum of net income plus interest expense, income taxes, depreciation, amortization and other non-cash or extraordinary charges for the preceding four fiscal quarters then ended of not greater than 3.50 to 1.00. As of June 29, 2013, the company s actual ratios of 0.34 and 1.47, respectively, were both within the permitted ranges set forth in this financial covenant.

Snap-on also has a 364-day loan and servicing agreement that allows Snap-on to borrow up to \$200 million (subject to borrowing base requirements) through the pledging of finance receivables under an asset-backed commercial paper conduit facility; the loan and servicing agreement expires on September 27, 2013 (unless earlier terminated or subsequently extended pursuant to the terms of the agreement). As of June 29, 2013, no amounts were outstanding under the loan and servicing agreement.

In addition to the financial covenant required by the \$500 million multi-currency revolving credit facility discussed above, Snap-on s other debt agreements and credit facilities, including the \$200 million loan and servicing agreement, also contain certain usual and customary borrowing, affirmative, negative and maintenance covenants. As of June 29, 2013, Snap-on was in compliance with all covenants of its debt agreements and credit facilities.

Snap-on believes that it has sufficient available cash and access to both committed and uncommitted credit facilities to cover its expected funding needs on both a short-term and long-term basis, including the repayment of the 2014 Notes. Snap-on manages its aggregate short-term borrowings so as not to exceed its availability under its revolving credit facilities. If the need were to arise, Snap-on believes that it could access short-term debt markets, predominantly through commercial paper issuances, securitizations (including its \$200 million loan and servicing agreement discussed above) and existing lines of credit to fund its short-term requirements and to ensure near-term liquidity. Snap-on regularly monitors the credit and financial markets and, in the future, may take advantage of what it believes are favorable market conditions to issue long-term debt to further improve its liquidity and capital resources. Near term liquidity requirements for Snap-on include payments of interest and dividends, scheduled debt repayments, funding to support new receivables originated by our financial services businesses, capital expenditures, working capital, restructuring activities, the funding of pension plans, and funding for additional share repurchases and acquisitions, if any. Snap-on intends to make contributions of \$10.2 million to its foreign pension plans and \$1.6 million to its domestic pension plans in 2013, as required by law. In the first six months of 2013, Snap-on made \$15.7 million of cash contributions to its domestic pension plans that included (i) \$15.0 million of discretionary contributions; and (ii) \$0.7 million of required contributions. Depending on market and other conditions, Snap-on may elect to make additional discretionary cash contributions to its domestic pension plans in 2013.

Snap-on s long-term financing strategy is to maintain continuous access to the debt markets to accommodate its liquidity needs, including the potential use of commercial paper, securitizations and/or additional fixed-term debt.

The following discussion focuses on information included in the accompanying Condensed Consolidated Statements of Cash Flow.

## Operating Activities

Net cash provided by operating activities was \$185.8 million in the first six months of 2013 and \$156.7 million in the first six months of 2012. The \$29.1 million increase in net cash provided by operating activities in 2013 primarily reflects higher year-over-year net earnings and net changes in operating assets and liabilities. In the first six months of 2013, Snap-on made \$15.7 million of cash contributions to its domestic pension plans that included (i) \$15.0 million of discretionary contributions; and (ii) \$0.7 million of required contributions. In the first six months of 2012, Snap-on made \$45.0 million of cash contributions to its domestic pension plans that included (i) \$26.7 million of discretionary contributions; and (ii) \$18.3 million of required contributions.

#### Investing Activities

Net cash used by investing activities of \$154.0 million in the first six months of 2013 included additions to and collections of finance receivables of \$321.5 million and \$247.1 million, respectively. Net cash used by investing activities of \$106.8 million in the first six months of 2012 included additions to, and collections of, finance receivables of \$285.4 million and \$216.2 million, respectively. Finance receivables are comprised of extended-term installment contracts to technicians (i.e. franchisees customers) to enable them to purchase tools, diagnostics and equipment on an extended-term payment plan, generally with average payment terms of 34 months.

Net cash used by investing activities in the first six months of 2013 also included \$38.2 million for the May 13, 2013, acquisition of Challenger. The preliminary purchase price is subject to change upon the finalization of a working capital adjustment, which is expected to be completed in the third quarter of 2013.

Capital expenditures of \$31.4 million in the first six months of 2013 compared to \$39.8 million in the first six months of last year. Capital expenditures in both years included continued investments related to the company s execution of its strategic Value Creation Processes around safety, quality, customer connection, innovation and Rapid Continuous Improvement.

Net cash used by investing activities in the first six months of 2013 also included \$10.2 million related to a prepaid equity forward transaction agreement with Citibank N.A. that is intended to reduce the impact of market risk associated with the stock-based portion of the company s deferred compensation plans. As of June 29, 2013, Snap-on had prepaid equity forwards (equity forwards) in place intended to manage market risk with respect to 126,300 shares of Snap-on common stock associated with its deferred compensation plans. See Note 9 to the Condensed Consolidated Financial Statements for additional information regarding equity forwards.

## Financing Activities

Net cash used by financing activities was \$69.8 million in the first six months of 2013. Net cash used by financing activities was \$60.6 million in the first six months of 2012.

Proceeds from stock purchase plans and stock option exercises totaled \$26.1 million and \$22.5 million in the first six months of 2013 and 2012, respectively. Snap-on has undertaken stock repurchases from time to time to offset dilution created by shares issued for employee and franchisee stock purchase plans, stock options and other corporate purposes. In the first six months of 2013, Snap-on repurchased 725,000 shares of its common stock for \$62.1 million under its previously announced share repurchase programs. In the first six months of 2012, Snap-on repurchased 623,000 shares of its common stock for \$38.1 million under its previously announced share repurchase programs. As of June 29, 2013, Snap-on had remaining availability to repurchase up to an additional \$183.1 million in common stock pursuant to its Board of Directors (Board) authorizations. The purchase of Snap-on common stock is at the company s discretion, subject to prevailing financial and market conditions. Snap-on believes that its cash generated from operations, available cash on hand, and funds available from its credit facilities will be sufficient to fund the company s share repurchases, if any, in 2013.

Snap-on has paid consecutive quarterly cash dividends, without interruption or reduction, since 1939. Cash dividends totaled \$44.4 million and \$39.6 million in the first six months of 2013 and 2012, respectively. On November 1, 2012, the Board increased the quarterly cash dividend by 11.8% to \$0.38 per share (\$1.52 per share per year). Snap-on believes that its cash generated from operations, available cash on hand, and funds available from its credit facilities will be sufficient to pay dividends in 2013.

### **Off-Balance Sheet Arrangements**

The company had no off-balance sheet arrangements as of June 29, 2013.

## **Critical Accounting Policies and Estimates**

Snap-on s disclosures of its critical accounting policies, which are contained in its Annual Report on Form 10-K for the year ended December 29, 2012, have not materially changed since that report was filed.

#### Outlook

In 2013, Snap-on expects to continue with the advancement of its strategic framework designed to enhance its mobile tool distribution network, expand in the vehicle repair garage, extend to critical industries and build in emerging markets. In pursuit of these initiatives, Snap-on continues to anticipate that capital expenditures in 2013 will be in a range of \$70 million to \$80 million. Snap-on also expects that its full year 2013 effective income tax rate will be comparable to its 2012 rate.

### Item 3: Quantitative and Qualitative Disclosures About Market Risk

### Market, Credit and Economic Risks

Market risk is the potential economic loss that may result from adverse changes in the fair value of financial instruments. Snap-on is exposed to market risk from changes in foreign currency exchange rates and interest rates. Snap-on is also exposed to market risk associated with the stock-based portion of its deferred compensation plans. Snap-on monitors its exposure to these risks and attempts to manage the underlying economic exposures through the use of financial instruments such as foreign currency forward contracts, interest rate swap agreements, treasury lock agreements and equity forwards. Snap-on does not use derivative instruments for speculative or trading purposes. Snap-on s broad-based business activities help to reduce the impact that volatility in any particular area or related areas may have on its operating earnings as a whole. Snap-on s management takes an active role in the risk management process and has developed policies and procedures that require specific administrative and business functions to assist in the identification, assessment and control of various risks.

### **Foreign Currency Risk Management**

Snap-on has significant international operations and is subject to certain risks inherent with foreign operations that include currency fluctuations. Foreign exchange risk exists to the extent that Snap-on has payment obligations or receipts denominated in currencies other than the functional currency, including intercompany loans denominated in foreign currencies. To manage these exposures, Snap-on identifies naturally offsetting positions and then purchases hedging instruments to protect the residual net exposures. See Note 9 to the Condensed Consolidated Financial Statements for information on foreign currency risk management.

### **Interest Rate Risk Management**

Snap-on aims to control funding costs by managing the exposure created by the differing maturities and interest rate structures of Snap-on s assets and liabilities through the use of interest rate swap agreements. Treasury lock agreements are used from time to time to manage potential changes in interest rates in anticipation of the issuance or sale of certain financial instruments. See Note 9 to the Condensed Consolidated Financial Statements for information on interest rate risk management.

Snap-on utilizes a Value-at-Risk (VAR) model to determine the potential one-day loss in the fair value of its interest rate and foreign exchange-sensitive financial instruments from adverse changes in market factors. The VAR model estimates were made assuming normal market conditions and a 95% confidence level. Snap-on s computations are based on the inter-relationships among movements in various currencies and interest rates (variance/co-variance technique). These inter-relationships were determined by observing interest rate and foreign currency market changes over the preceding quarter.

The estimated maximum potential one-day loss in fair value, calculated using the VAR model, as of June 29, 2013, was \$2.4 million on interest rate-sensitive financial instruments and \$0.7 million on foreign currency-sensitive financial instruments. The VAR model is a risk management tool and does not purport to represent actual losses in fair value that will be incurred by Snap-on, nor does it consider the potential effect of favorable changes in market factors.

## Stock-based Deferred Compensation Risk Management

Snap-on aims to manage market risk associated with the stock-based portion of its deferred compensation plans through the use of equity forwards. Equity forwards are used to aid in offsetting the potential mark-to-market effect on stock-based deferred compensation from changes in Snap-on s stock price. Since stock-based deferred compensation liabilities increase as the company s stock price increases and decrease as the company s stock price decreases, the equity forwards are intended to mitigate the potential impact on compensation expense that may result from such mark-to-market changes. See Note 9 to the Condensed Consolidated Financial Statements for additional information on stock-based deferred compensation risk management.

#### Credit Risk

Credit risk is the possibility of loss from a customer s failure to make payments according to contract terms. Prior to granting credit, each customer is evaluated, taking into consideration the borrower s financial condition, collateral, debt-servicing capacity, past payment experience, credit bureau information, and other financial and qualitative factors that may affect the borrower s ability to repay. Credit risk is also monitored regularly through the use of internal proprietary, custom scoring models used to evaluate each transaction at the time of the application for credit and by periodically updating those credit scores for ongoing monitoring purposes. Snap-on evaluates credit quality through the use of an internal proprietary measuring system that provides a framework to analyze finance and contract receivables on the basis of risk factors of the individual obligor as well as transaction specific risk. The finance and contract receivables are typically monitored through an asset quality review process that closely monitors past due accounts and initiates a progressive collection action process when appropriate. In addition to its direct credit risk exposure, Snap-on also has credit risk exposure for certain SOC-originated contracts with recourse provisions related to franchisee van leases sold by SOC; as of June 29, 2013, and December 29, 2012, \$12.0 million and \$13.3 million, respectively, of franchisee van leases contain a recourse provision to Snap-on if the leases become more than 90 days past due.

## **Counterparty Risk**

Snap-on is exposed to credit losses in the event of non-performance by the counterparties to its various financial agreements, including its foreign currency forward contracts, interest rate swap agreements and equity forwards. Snap-on does not obtain collateral or other security to support financial instruments subject to credit risk, but monitors the credit standing of the counterparties and generally enters into agreements with financial institution counterparties with a credit rating of A- or better. Snap-on does not anticipate non-performance by its counterparties, but cannot provide assurances.

#### **Economic Risk**

Economic risk is the possibility of loss resulting from economic instability in certain areas of the world. Snap-on continually monitors its exposure in these markets.

As a result of the above market, credit and economic risks, net income and revenues in any particular period may not be representative of full-year results and may vary significantly from year to year. Inflation has not had a significant impact on the company.

#### **Item 4: Controls and Procedures**

### **Evaluation of Disclosure Controls and Procedures**

Snap-on maintains a system of disclosure controls and procedures that is designed to provide reasonable assurance that material information relating to the company and its consolidated subsidiaries is timely communicated to the officers who certify Snap-on s financial reports and to other members of senior management and the Board, as appropriate.

In accordance with Rule 13a-15(b) of the Securities Exchange Act of 1934 (the Exchange Act ), the company s management evaluated, with the participation of the Chief Executive Officer and Chief Financial Officer, the effectiveness of the design and operation of the company s disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of June 29, 2013. Based upon their evaluation of these disclosure controls and procedures, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective as of June 29, 2013, to ensure that information required to be disclosed by the company in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time period specified in the Securities and Exchange Commission rules and forms, and to ensure that information required to be disclosed by the company in the reports it files or submits under the Exchange Act is accumulated and communicated to the company s management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate, to allow timely decisions regarding required disclosure.

### **Changes in Internal Control**

There has not been any change in the company s internal control over financial reporting during the quarter ended June 29, 2013, that has materially affected, or is reasonably likely to materially affect, the company s internal control over financial reporting (as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f)).

#### PART II. OTHER INFORMATION

### Item 2: Unregistered Sales of Equity Securities and Use of Proceeds

The following chart discloses information regarding the shares of Snap-on s common stock repurchased by the company during the second quarter of fiscal 2013, all of which were purchased pursuant to the Board s authorizations that the company has publicly announced. Snap-on has undertaken stock repurchases from time to time to offset dilution created by shares issued for employee and franchisee stock purchase plans, stock options and other corporate purposes, as well as to repurchase shares when the company believes market conditions are favorable. The repurchase of Snap-on common stock is at the company s discretion, subject to prevailing financial and market conditions.

N/A: Not applicable

In 1996, the Board authorized the company to repurchase shares of the company s common stock from time to time in the open market or in privately negotiated transactions (the 1996 Authorization). The 1996 Authorization allows the repurchase of up to the number of shares issued or delivered from treasury from time to time under the various plans the company has in place that call for the issuance of the company s common stock. Because the number of shares that are purchased pursuant to the 1996 Authorization will change from time to time as (i) the company issues shares under its various plans; and (ii) shares are repurchased pursuant to this authorization, the number of shares authorized to be repurchased will vary from time to time. The 1996 Authorization will expire when terminated by the Board. When calculating the approximate value of shares that the company may yet purchase under the 1996 Authorization, the company assumed a price of \$84.51, \$90.23 and \$89.38 per share of common stock as of the end of the fiscal 2013 months ended April 27, 2013, May 25, 2013, and June 29, 2013, respectively.

In 1998, the Board authorized the repurchase of an aggregate of \$100 million of the company s common stock (the 1998 Authorization). The 1998 Authorization will expire when the aggregate repurchase price limit is met, unless terminated earlier by the Board.

<sup>\*</sup>Subject to further adjustment pursuant to the 1996 Authorization described below, as of June 29, 2013, the approximate value of shares that may yet be purchased pursuant to the three outstanding Board authorizations discussed below is \$183.1 million.

In 1999, the Board authorized the repurchase of an aggregate of \$50 million of the company s common stock (the 1999 Authorization). The 1999 Authorization will expire when the aggregate repurchase price limit is met, unless terminated earlier by the Board.
