The exact stock prices and effective dates may not be set forth in the table above, in which case:

if the stock price is between two stock prices in the table or the effective date is between two effective dates in the table, the number of additional shares by which the conversion rate will be increased will be determined by a straight-line interpolation between the number of additional shares set forth for the higher and lower stock prices and the earlier and later effective dates, as applicable, based on a 365- or 366-day year, as applicable;

Edgar Filing: Apollo Commercial Real Estate Finance, Inc. - Form FWP

if the stock price is greater than \$22.00 per share (subject to adjustment in the same manner as the stock prices set forth in the column headings of the table above), no additional shares will be added to the conversion rate; and

if the stock price is less than \$16.42 per share (subject to adjustment in the same manner as the stock prices set forth in the column headings of the table above), no additional shares will be added to the conversion rate

Notwithstanding the foregoing, in no event will the conversion rate be increased pursuant to the provisions described in the Preliminary Prospectus Supplement under the caption Description of Notes Conversion Rights Increase

in Conversion Rate Upon Conversion Upon a Make-whole Fundamental Change to exceed 60.9013 shares of common stock per \$1,000 principal amount of notes, subject to adjustment in the same manner as the conversion rate as set forth in the Preliminary Prospectus Supplement under the caption Description of Notes Conversion Rights Conversion Rate Adjustments.

The disclosure in the Preliminary Prospectus Supplement under the heading Ratios of Earnings to Fixed Charges and Earnings to Combined Fixed Charges and Preferred Stock Dividends is supplemented by the following:

	For the year ended December 31, 2013
Pro forma ratio of earnings to fixed charges ⁽¹⁾	4.85
Pro forma ratio of earnings to combined fixed charges and preferred stock dividends ⁽¹⁾	3.36

- (1) In calculating the pro forma ratios of earnings to fixed charges and earnings to combined fixed charges and preferred stock dividends, we have assumed that the notes were issued on the first day of the applicable period. For purposes of these pro forma calculations, we have also assumed the repayment of all of our outstanding borrowings under the JPMorgan Facility (approximately \$20.4 million as of December 31, 2013) with the net proceeds from this offering; therefore, the pro forma ratio excludes the effect of the amount of the related interest expense under the JPMorgan Facility for the period. In addition, we have calculated these pro forma ratios incorporating the amortization of the underwriting discount and deferred financing costs as well as cash interest payments that we would have paid on the notes, assuming they were issued on the first day of the applicable period. Accordingly, these pro forma ratios do not reflect the additional interest expense we would incur for accounting purposes as a result of separating the notes into a liability and an equity component and amortizing the deemed debt discount into interest expense over the term of the notes in accordance with ASC 470-20.
