About Calamos Investments

For over 35 years, we have helped investors like you manage and build wealth to meet their long-term individual objectives by working to capitalize on the opportunities of the evolving global marketplace. We launched our first mutual fund in 1985 and our first closed-end fund in 2002. Today, we manage five closed-end funds. Two are income-oriented total return offerings, which seek current income, with increased emphasis on capital gains potential. Three are enhanced fixed income offerings, which pursue high current income from income and capital gains. Calamos Convertible and High Income Fund (CHY) falls into this latter category. Please see page 5 for a more detailed overview of our closed-end offerings.

We are dedicated to helping our clients build and protect wealth. We understand when you entrust us with your assets, you also entrust us with your achievements, goals and aspirations. We believe we best honor this trust by making investment decisions guided by integrity, by discipline, and by our conscientious research.

We believe an active, risk-conscious approach is essential for wealth creation. In the 1970s, we pioneered strategies that seek to participate in equity market upside and mitigate some of the potential risks of equity market volatility. Our investment process seeks to manage risk at multiple levels and draws upon our experience investing through multiple market cycles.

We have a global perspective. We believe globalization offers tremendous opportunities for countries and companies all over the world. In our view, this creates significant opportunities for investors. In our U.S., global and international portfolios, we are seeking to capitalize on the potential growth of the global economy.

We believe there are opportunities in all markets. Our history traces back to the 1970s, a period of significant volatility and economic concerns. We have invested through multiple market cycles, each with its own challenges. Out of this experience comes our belief that the flipside of volatility is opportunity.

JOHN P. CALAMOS, SR.

CEO and Global Co-CIO

Dear Fellow Shareholder:

Welcome to your annual report for the 12-month period ended October 31, 2014. In this report, you will find commentary from the management team, as well as a listing of portfolio holdings, financial statements and highlights, and detailed information about the Fund s performance and positioning. I invite you to review not only the commentary for this Fund, but also to discuss with your financial advisor if there are other Calamos funds that could be suitable for your asset allocation.

Calamos Convertible and High Income Fund (CHY) is an enhanced fixed income fund. We utilize dynamic asset allocation to pursue high current income with a less rate sensitive approach, while also maintaining a focus on capital gains. We believe the flexibility to invest in high yield corporate bonds and convertible securities is an important differentiator, especially given the reduction in the Federal Reserve s quantitative easing activities and the impact that would have on the fixed income markets.

Distribution Increase

During the period, CHY provided not only a steady monthly distribution but also increased the distribution in April by 18% to \$0.1000 from \$0.0850. The increase is a result of positioning the Fund to optimize returns in both the current and anticipated economic environment. We believe the Fund s current annualized distribution rate, which was 8.29%* on a market price basis as of October 31, 2014, was very competitive, given the low interest rates in many segments of the bond market. In our view, the Fund s distributions illustrate the benefits of a multi-asset class approach and flexible allocation strategy.

We understand that many closed-end fund investors seek steady, predictable distributions instead of distributions that fluctuate. Therefore, this Fund has a level rate distribution policy. As part of this policy, we aim to keep distributions consistent from month to month, and at a level that we believe can be sustained over the long term. In

^{*} Current Annualized Distribution Rate is the Fund s most recent distribution, expressed as an annualized percentage of the Fund s current market price per share. The Fund s 10/15/14 distribution was \$0.1000 per share. Based on our current estimates, we anticipate that approximately \$0.1000 is paid from ordinary income and that approximately \$0.0000 represents a return of capital. Estimates are calculated on a tax basis rather than on a generally accepted accounting principles (GAAP) basis, but should not be used for tax reporting purposes. Distributions are subject to re-characterization for tax purposes after the end of the fiscal year. This information is not legal or tax advice. Consult a professional regarding your specific legal or tax matters. Under the Fund s level rate distribution policy, distributions paid to common shareholders may include net investment income, net realized short-term capital gains and return of capital. In addition, a limited number of distributions per calendar year may include net realized long-term capital gains. Distribution rate may vary.

setting the Fund s distribution rate, the investment management team and the Fund s Board of Trustees consider the interest rate, market and economic environments. We also factor in our assessment of individual securities and asset classes. (For additional information on our level rate distribution policy, please see The Calamos Closed-End Funds: An Overview on page 5 and Level Rate Distribution Policy on page 40.)

Market Environment

During the reporting period, global equities advanced, although there was a wide variation in the performance of individual markets. U.S. stocks drove gains in the developed global markets, with the S&P 500 Index returning 17.27%. The U.S. convertible market captured a large measure of the U.S. stock market s gains, with the BofA Merrill Lynch All U.S. Convertibles Index earning 13.48%.

Fixed income markets also gained, but at a more measured pace. The Barclays U.S. Aggregate Bond Index returned 4.14% for the 12-month period, with stronger performance toward the end of the period as apprehensive investors sought haven in fixed income securities. The Credit Suisse High Yield Index performed more strongly, gaining 5.54%, as investors sought yield in a low interest-rate environment.

Our Use of Leverage**

We have the flexibility to utilize leverage in this Fund. **Over the long term, we believe that the judicious use of leverage provides us with opportunities to enhance total return and support the Fund s distribution rate.** Leverage strategies typically entail borrowing at short-term interest rates and investing the proceeds at higher rates of return. During the reporting period, we believed the prudent use of leverage would be advantageous given the economic environment, and more specifically, the low borrowing costs we were able to secure. Overall, the use of leverage contributed favorably to the returns of the Fund, as the performance of the Fund **s** holdings exceeded the cost of borrowing.

Consistent with our focus on risk management, we have employed techniques to hedge against a rise in interest rates. We have used interest rate swaps to manage the borrowing costs associated with the Fund s use of leverage. Interest rate swaps allow us to lock down an interest rate we believe to be attractive. Although rates are at historically low levels across much of the fixed income market, history has taught us that rates can rise quickly in some cases, in a matter of months. We believe the Fund s use of interest rate swaps is beneficial because it provides a degree of protection should a rise in rates occur. However, we will continue to assess the costs versus benefits of employing swaps as part of our leverage strategy.

** Leverage creates risks that may adversely affect return, including the likelihood of greater volatility of net asset value and market price of common shares, and fluctuations in the variable rates of the leverage financing.

Long-Term Focus

An important take-away from the past year is the benefit of maintaining a long-term focus in regard to asset allocation. Although the U.S. and global stock markets advanced overall, the period was characterized by surges in volatility and changes in market leadership. Investors who tried to time these ups and downs could well have ended up being whipsawed missing the upside but capturing the downside. For example, during the period, there were several sell-offs in growth sectors, as investors allowed anxiety about economic growth to overshadow fundamentals. Yet during the 12-month period, U.S. growth stocks outperformed their value counterparts, with the Russell 3000 Growth Index gaining 16.39% versus the Russell 3000 Value Index, up 15.76%.

We believe that investors should work with their advisors to prepare for an eventual rise in interest rates. U.S. and global interest rates have stayed low for longer than many have anticipated due to a variety of factors, including accommodative policy and investors desire for allocations with a higher degree of perceived safety.

Convertible securities are well suited to this environment. Although we expect markets to advance and the global economy to expand, we believe volatility will likely persist due to a range of factors. Actively managed allocations that include convertibles may prove especially beneficial, because convertibles combine attributes of stocks and bonds. As a result, convertible securities have the potential to provide participation in stock market upside with potential protection if stocks experience periods of downside volatility. Convertibles also have tended to be more resilient to rising interest rates than traditional fixed income securities a key consideration for investors who seek to position their asset allocations ahead of a possible rising interest rate environment. We are also encouraged by issuance trends, as economic growth has historically provided a catalyst for convertible issuance.

In closing, we are honored to serve you. We recognize the trust you have in placed in us to help you achieve your financial goals. If you have any questions or would like additional information, please visit us at www.calamos.com or contact us at 800.582.6959.

Sincerely,

John P. Calamos, Sr.

CEO and Global Co-CIO,

Calamos Advisors LLC

Before investing, carefully consider a fund s investment objectives, risks, charges and expenses. Please see the prospectus containing this and other information or call 800.582.6959. Please read the prospectus carefully. Performance data represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance quoted.

The S&P 500 Index is an unmanaged index generally considered representative of the U.S. stock market. The BofA Merrill Lynch All U.S. Convertibles Index represents the U.S. convertible securities market. The Barclays Capital U.S. Aggregate Bond Index is considered generally representative of the investment-grade bond market. The Credit Suisse High Yield Index is an unmanaged index of approximately 1,600 issues with an average maturity range of seven to ten years with a minimum capitalization of \$75 million. The index is

considered generally representative of the U.S. market for high yield bonds. The Russell 3000 Growth Index measures the performance of the broad growth segment of the U.S. equity universe. The Russell 3000 Value Index measures the performance of the broad value segment of the U.S. equity universe. Sources: Mellon Analytical Solutions and Lipper.

Unmanaged index returns assume reinvestment of any and all distributions and, unlike fund returns, do not reflect fees, expenses or sales charges. Investors cannot invest directly in an index. Investments in overseas markets pose special risks, including currency fluctuation and political risks. These risks are generally intensified for investments in emerging markets. Countries, regions, and sectors mentioned are presented to illustrate countries, regions, and sectors in which a fund may invest. Fund holdings are subject to change daily. The Fund is actively managed. The information contained herein is based on internal research derived from various sources and does not purport to be statements of all material facts relating to the securities mentioned. The information contained herein, while not guaranteed as to the accuracy or completeness, has been obtained from sources we believe to be reliable. There are certain risks involved with investing in convertible securities in addition to market risk, such as call risk, dividend risk, liquidity risk and default risk, that should be carefully considered prior to investing. This information is being provided for informational purposes only and should not be considered investment advice or an offer to buy or sell any security in the portfolio.

The Calamos Closed-End Funds: An Overview

In our closed-end funds, we draw upon decades of investment experience, including a long history of opportunistically blending asset classes in an attempt to capture upside potential while seeking to manage downside risk. We launched our first closed-end fund in 2002.

Closed-end funds are long-term investments. Most focus on providing monthly distributions, but there are important differences among individual closed-end funds. Calamos closed-end funds can be grouped into multiple categories that seek to produce income while offering exposure to various asset classes and sectors.

Our Level Rate Distribution Policy

Closed-end fund investors often look for a steady stream of income. Recognizing this, Calamos closed-end funds have a level rate distribution policy in which we aim to keep monthly income consistent through the disbursement of net investment income, net realized short-term capital gains and, if necessary, return of capital. We set distributions at levels that we believe are sustainable for the long term. Our team is focused on delivering an attractive monthly distribution, while maintaining a long-term focus on risk management. The level of the funds distributions can be greatly influenced by market conditions, including the interest rate environment. The funds distributions will depend on the individual performance of positions the funds hold, our view of the benefits of retaining leverage, fund tax considerations, and maintaining regulatory requirements.

For more information about any of these funds, we encourage you to contact your financial advisor or Calamos Investments at 800.582.6959 (Monday through Friday from 8:00 a.m. to 6:00 p.m., Central Time). You can also visit us at www.calamos.com.

For more information on our level rate distribution policy, please see page 40.

CONVERTIBLE AND HIGH INCOME FUND (CHY)

INVESTMENT TEAM DISCUSSION

Please discuss the Fund s strategy and portfolio allocation.

Calamos Convertible and High Income Fund (CHY) is an enhanced fixed-income offering that seeks total return through a combination of capital appreciation and current income. It provides an alternative to funds investing exclusively in investment-grade fixed-income instruments, and seeks to be less sensitive to interest rates. Like all five Calamos closed-end funds, the Fund seeks to provide a steady stream of distributions paid out monthly and invests in multiple asset classes.

We invest in a diversified portfolio of convertible securities and high-yield securities. The allocation to each asset class is dynamic and reflects our view of the economic landscape as well as the potential of individual securities. By combining these asset classes, we believe that the Fund is well positioned to generate capital gains as well as income. We believe this broader range of security types also provides increased opportunities to manage the risk and reward characteristics of the portfolio over full market cycles.

How did the Fund perform over the reporting period?

The Fund gained 11.22% on a net asset value (NAV) basis and 22.16% on a market price basis for the 12-month period ended October 31, 2014, versus the 5.54% return of the Credit Suisse High Yield Index and 13.48% return of the BofA ML All U.S. Convertibles Index.

At the end of the reporting period, the Fund s shares traded at a 1.62% premium to net asset value, improving from a 7.49% discount at the beginning of the period.

SINCE INCEPTION MARKET PRICE AND NAV HISTORY THROUGH 10/31/14

Performance data quoted represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance quoted. The principal value of an investment will fluctuate so that your shares, when sold, may be worth more or less than their original cost. Returns at NAV reflect the deduction of the Fund s management fee, debt leverage costs and all other applicable fees and expenses. You can obtain performance data current to the most recent month end by visiting www.calamos.com.

How do NAV and market price return differ?

Closed-end funds trade on exchanges, where the price of shares may be driven by factors other than the value of the underlying securities. The price of a share in the market is called market value. Market price may be influenced by factors unrelated to the performance of a fund s holdings, such as general market sentiment or future

Investment Team Discussion

expectation. A fund s NAV return measures the actual return of the individual securities in the portfolio, less fund expenses. It also measures how a manager was able to capitalize on market opportunities. Because we believe closed-end funds are best utilized as a long-term holding within asset allocations, we believe that NAV return is the better measure of a fund s performance. However, when managing the Fund, we strongly consider actions and policies that we believe will optimize its overall price performance and returns based on market value.

Please discuss the Fund s distributions during the annual period.

We employ a level rate distribution policy within this Fund with the goal of providing shareholders with a consistent distribution stream. The Fund provided an improved distribution stream over the period. In April, we increased our monthly distribution from \$0.0850 per share to \$0.1000 per share, an 18% increase. The Fund s current annualized distribution rate was 8.29% of market price as of October 31, 2014.

We believe that both the Fund s distribution rate and level remained attractive and competitive, as low interest rates limited yield opportunities in much of the marketplace. For example, as of October 31, 2014, the dividend yield of the S&P 500 Index stocks averaged 2.0%. Yields also remained low within the U.S. government bond market, with the 10-year U.S. Treasury and the 30-year U.S. Treasury yielding 2.35% and 3.07%, respectively. Our yield was even higher than more speculative measures, including the Bank of America High Yield Broad Market Index and the Bank of America Merrill Lynch All U.S. Convertibles Index, which offered yields on October 31, 2014 of 6.95% and 2.88%, respectively.

What factors influenced performance over the reporting period?

Solid returns in both the high-yield and convertible bond markets contributed to the Fund s performance over the course of the year. The high-yield market, as measured by the Credit Suisse High Yield Index, enjoyed a total return of 5.54% for the period. In addition, the convertible bond market, as measured by the Bank of America Merrill Lynch All U.S. Convertibles Index, had a total return of 13.48% during the period.

The Fund benefitted from maintaining its high proportional exposure to convertible securities throughout the course of the period, as the asset class rallied in concert with the overall equity market.

From an economic sector perspective, the Fund benefitted from its security selection in, and overweight to, health care, mainly with respect to biotechnology. In addition, the Fund was helped by both its selection in, and overweight to, information technology, particularly securities in the semiconductors industry.

Although our holdings in materials and consumer discretionary generated positive absolute returns, they lagged their sector peers. Namely, our selection in homebuilding (consumer discretionary) and selection, in and underweight to, the diversified metals and mining (materials) inhibited our performance relative to the benchmark Credit Suisse High Yield Index.

It is also important to note that our increased distributions likely made the Fund more attractive to investors, thereby helping price performance.

ASSET ALLOCATION AS OF 10/31/14

Fund asset allocations are based on total investments and may vary over time.

Investment Team Discussion

How is the Fund positioned?

We continue to lighten our positions in corporate bonds and increase our position in convertible securities, which we believe will provide income and benefit from a rising equity market. We should note that our bullish position in the equity and convertible markets was not deterred by market volatility near period end. Minor corrections are not uncommon in a bull market.

We continue to hold our highest allocations in the BB-credit tier and believe this exposure has the potential to offer investors a better risk/return dynamic while continuing to provide regular income. Our credit process tends to guide us away from the most speculative corporate securities in the high-yield market. We currently view the lowest credit tiers of the market as less attractive based on their pricing and our outlook for a slower-growth global economy. Less than 2% of the Fund s holdings are in the lowest credit tier (CCC credit rating and below). We view the mid-grade credit space as particularly well-priced, offering both attractive levels of income with less exposure to potential inflation and higher interest rates.

From a sector perspective, our heaviest exposures are to the consumer discretionary, information technology, health care, energy and industrials sectors. We believe that these sectors have the potential to outperform in the economic recovery cycle.

Where the risk/reward is compelling, we are investing in global businesses that possess the ability to seek the best opportunities around the world and diversify their revenue streams. Overall, the portfolio s companies are performing well: earning attractive cash-flow margins, improving their credit profiles, and maintaining reasonable debt levels to fund their operations.

The Fund is currently leveraged at 28% as of the end of the period, which we believe is a moderate amount. We borrow through floating rate bank debt and, given recent low borrowing rates, this has been beneficial to the performance of the Fund. In addition, 17% of our floating rate debt is hedged through interest rate swaps. This is a defensive strategy that we believe mitigates the Fund s overall exposure to a quick rise in short-term interest rates.

Through dynamic asset allocation we are able to optimize the total return of the Fund by adjusting our exposure to take advantage of market opportunities within various sectors and asset classes. For example, our exposure to fixed-income securities allows us to maintain a competitive distribution. However, given the weighting of the asset classes represented in the portfolio and the overall low duration of the Fund, we expect to be well defended against a rising-interest-rate environment.

What are your closing thoughts for Fund shareholders?

We believe that investing in convertibles enables us to participate in equity market upside while providing a degree of downside protection. This strategy proved its mettle when market volatility reared up during the period. We expect markets to remain turbulent, which we see as a positive for convertibles. In this respect, we believe returns are best viewed over a full market cycle. As we maintain an overall cautiously optimistic view of the U.S. economy, we believe a heavier exposure to equity-sensitive convertibles has the potential to allow the Fund to optimize total return. Our dynamic allocation mandate allows us to deploy assets over different asset classes to benefit our shareholders. Accordingly, we believe that active management in convertible and high-yield investments is essential to providing desirable risk-managed results and consistent distributions over time.

NOTES TO SCHEDULE OF INVESTMENTS

- ^ Security, or portion of security, is on loan.
- * Securities issued and sold pursuant to a Rule 144A transaction are excepted from the registration requirement of the Securities Act of 1933, as amended. These securities may only be sold to qualified institutional buyers (QIBs), such as the Fund. Any resale of these securities must generally be effected through a sale that is registered under the Act or otherwise exempted from such registration requirements.
- m Security, or portion of security, is held in a segregated account as collateral for notes payable aggregating a total value of \$841,048,042. \$191,057,339 of the collateral has been re-registered by the counterparty, BNP (see Note 7 Borrowings).

Variable rate or step bond security. The rate shown is the rate in effect at October 31, 2014.

- Securities exchangeable or convertible into securities of one or more entities that are different than the issuer. Each entity is identified in the parenthetical.
- Security, or portion of security, is segregated as collateral (or potential collateral for future transactions) for swaps. The aggregate value of such securities is \$650,076.
- The synthetic convertible securities strategy combines separate securities that together possess the economic characteristics similar to a convertible security.

Non-income producing security. FOREIGN CURRENCY ABBREVIATION

EUR European Monetary Unit

Note: Value for securities denominated in foreign currencies is shown in U.S. dollars. The principal amount for such securities is shown in the respective foreign currency. The date on options represents the expiration date of the option contract. The option contract may be exercised at any date on or before the date shown.

22 CALAMOS CONVERTIBLE AND HIGH INCOME FUND ANNUAL REPORT

See accompanying Notes to Financial Statements

Notes to Financial Statements

Note 1 Organization and Significant Accounting Policies

Organization. Calamos Convertible and High Income Fund (the Fund) was organized as a Delaware statutory trust on March 12, 2003 and is registered under the Investment Company Act of 1940 (the 1940 Act) as a diversified, closed-end management investment company. The Fund commenced operations on May 28, 2003. The Fund s investment objective is to provide total return through a combination of capital appreciation and current income. Under normal circumstances, the Fund will invest at least 80% of its managed assets in a diversified portfolio of convertibles and non-convertible income securities. Managed assets means the Fund s total assets (including any assets attributable to any leverage that may be outstanding) minus total liabilities (other than debt representing financial leverage).

Fund Valuation. The valuation of the Fund s investments is in accordance with policies and procedures adopted by and under the ultimate supervision of the board of trustees.

Fund securities that are traded on U.S. securities exchanges, except option securities, are valued at the official closing price, which is the last current reported sales price on its principal exchange at the time each Fund determines its net asset value (NAV). Securities traded in the over-the-counter market and quoted on The NASDAQ Stock Market are valued at the NASDAQ Official Closing Price, as determined by NASDAQ, or lacking a NASDAQ Official Closing Price, the last current reported sale price on NASDAQ at the time a Fund determines its NAV. When a last sale or closing price is not available, equity securities, other than option securities, that are traded on a U.S. securities exchange and other equity securities traded in the over-the-counter market are valued at the mean between the most recent bid and asked quotations on its principal exchange in accordance with guidelines adopted by the board of trustees. Each option security traded on a U.S. securities exchange is valued at the mid-point of the consolidated bid/ask quote for the option security, also in accordance with guidelines adopted by the board of trustees. Each over-the-counter option that is not traded through the Options Clearing Corporation is valued based on a quotation provided by the counterparty to such option under the ultimate supervision of the board of trustees.

Fixed income securities, certain convertible preferred securities, and non-exchange traded derivatives are normally valued by independent pricing services or by dealers or brokers who make markets in such securities. Valuations of such fixed income securities, certain convertible preferred securities, and non-exchange traded derivatives consider yield or price of equivalent securities of comparable quality, coupon rate, maturity, type of issue, trading characteristics and other market data and do not rely exclusively upon exchange or over-the-counter prices.

Trading on European and Far Eastern exchanges and over-the-counter markets is typically completed at various times before the close of business on each day on which the New York Stock Exchange (NYSE) is open. Each security trading on these exchanges or over-the-counter markets may be valued utilizing a systematic fair valuation model provided by an independent pricing service approved by the board of trustees. The valuation of each security that meets certain criteria in relation to the valuation model is systematically adjusted to reflect the impact of movement in the U.S. market after the foreign markets close. Securities that do not meet the criteria, or that are principally traded in other foreign markets, are valued as of the last reported sale price at the time the Fund determines its NAV, or when reliable market prices or quotations are not readily available, at the mean between the most recent bid and asked quotations as of the close of the appropriate exchange or other designated time. Trading of foreign securities may not take place on every NYSE business day. In addition, trading may take place in various foreign markets on Saturdays or on other days when the NYSE is not open and on which the Fund s NAV is not calculated.

If the pricing committee determines that the valuation of a security in accordance with the methods described above is not reflective of a fair value for such security, the security is valued at a fair value by the pricing committee, under the ultimate supervision of the board of trustees, following the guidelines and/or procedures adopted by the board of trustees.

The Fund also may use fair value pricing, pursuant to guidelines adopted by the board of trustees and under the ultimate supervision of the board of trustees, if trading in the security is halted or if the value of a security it holds is materially affected by events occurring before the Fund s pricing time but after the close of the primary market or exchange on which the security is listed. Those procedures may utilize valuations furnished by pricing services approved by the board of trustees, which may be based on market transactions for comparable securities and various relationships between securities that are generally recognized by institutional traders, a computerized matrix system, or appraisals derived from information concerning the securities or similar securities received from recognized dealers in those securities.

Notes to Financial Statements

When fair value pricing of securities is employed, the prices of securities used by a Fund to calculate its NAV may differ from market quotations or official closing prices. In light of the judgment involved in fair valuations, there can be no assurance that a fair value assigned to a particular security is accurate.

Investment Transactions. Investment transactions are recorded on a trade date basis as of October 31, 2014. Net realized gains and losses from investment transactions are reported on an identified cost basis. Interest income is recognized using the accrual method and includes accretion of original issue and market discount and amortization of premium. Dividend income is recognized on the ex-dividend date, except that certain dividends from foreign securities are recorded as soon as the information becomes available after the ex-dividend date.

Foreign Currency Translation. Values of investments and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars using a rate quoted by a major bank or dealer in the particular currency market, as reported by a recognized quotation dissemination service.

The Fund does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss from investments.

Reported net realized foreign currency gains or losses arise from disposition of foreign currency, the difference in the foreign exchange rates between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the ex-date or accrual date and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes (due to the changes in the exchange rate) in the value of foreign currency and other assets and liabilities denominated in foreign currencies held at year end.

Allocation of Expenses Among Funds. Expenses directly attributable to the Fund are charged to the Fund; certain other common expenses of Calamos Advisors Trust, Calamos Investment Trust, Calamos ETF Trust, Calamos Convertible Opportunities and Income Fund, Calamos Convertible and High Income Fund, Calamos Strategic Total Return Fund, Calamos Global Total Return Fund and Calamos Global Dynamic Income Fund are allocated proportionately among each Fund to which the expenses relate in relation to the net assets of each Fund or on another reasonable basis.

Use of Estimates. The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results may differ from those estimates.

Income Taxes. No provision has been made for U.S. income taxes because the Fund s policy is to continue to qualify as a regulated investment company under the Internal Revenue Code of 1986, as amended, and distribute to shareholders substantially all of the Fund s taxable income and net realized gains.

Dividends and distributions paid to shareholders are recorded on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains is determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles. To the extent these book/tax differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal tax-basis treatment. These differences are primarily due to differing treatments for foreign currency transactions, contingent payment debt instruments and methods of amortizing and accreting for fixed income securities. The financial statements are not adjusted for temporary differences.

The Fund recognized no liability for uncertain tax positions. A reconciliation is not provided as the beginning and ending amounts of unrecognized benefits are zero, with no interim additions, reductions or settlements. Tax years 2010 - 2013 remain subject to examination by the U.S. and the State of Illinois tax jurisdictions.

Indemnifications. Under the Fund's organizational documents, the Fund is obligated to indemnify its officers and trustees against certain liabilities incurred by them by reason of having been an officer or trustee of the Fund. In addition, in the normal course of business, the Fund may enter into contracts that provide general indemnifications to other parties. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. Currently, the Fund's management expects the risk of material loss in connection to a potential claim to be remote.

Notes to Financial Statements

Note 2 Investment Adviser and Transactions With Affiliates Or Certain Other Parties

Pursuant to an investment advisory agreement with Calamos Advisors LLC (Calamos Advisors), the Fund pays an annual fee, payable monthly, equal to 0.80% based on the average weekly managed assets.

Pursuant to a financial accounting services agreement, during the period the Fund paid Calamos Advisors a fee for financial accounting services payable monthly at the annual rate of 0.0175% on the first \$1 billion of combined assets, 0.0150% on the next \$1 billion of combined assets and 0.0110% on combined assets above \$2 billion (for purposes of this calculation combined assets means the sum of the total average daily net assets of Calamos Advisors Trust, Calamos Investment Trust, Calamos ETF Trust and the total average weekly managed assets of Calamos Convertible and High Income Fund, Calamos Strategic Total Return Fund, Calamos Convertible Opportunities and Income Fund, Calamos Global Dynamic Income Fund). Financial accounting services include, but are not limited to, the following: managing expenses and expense payment processing; monitoring the calculation of expense accrual amounts; calculating, tracking and reporting tax adjustments on all assets; and monitoring trustee deferred compensation plan accruals and valuations. The Fund pays its pro rata share of the financial accounting services fee payable to Calamos Advisors based on its relative portion of combined assets used in calculating the fee.

The Fund reimburses Calamos Advisors for a portion of compensation paid to the Fund s Chief Compliance Officer. This compensation is reported as part of the Trustees fees and officer compensation expense on the Statement of Operations.

A trustee and certain officers of the Fund are also officers and directors of Calamos Advisors. Such trustee and officers serve without direct compensation from the Fund.

The Fund has adopted a deferred compensation plan (the Plan). Under the Plan, a trustee who is not an interested person (as defined in the 1940 Act) and has elected to participate in the Plan (a participating trustee) may defer receipt of all or a portion of their compensation from the Fund. The deferred compensation payable to the participating trustee is credited to the trustee s deferral account as of the business day such compensation would have been paid to the participating trustee. The value of amounts deferred for a participating trustee is determined by reference to the change in value of Class I shares of one or more funds of Calamos Investment Trust designated by the participant. The value of the account increases with contributions to the account or with increases in the value of the measuring shares, and the value of the account decreases with withdrawals from the account or with declines in the value of the measuring shares. Deferred compensation of \$198,920 is included in Other assets on the Statement of Assets and Liabilities at October 31, 2014. The Fund s obligation to make payments under the Plan is a general obligation of the Fund and is included in Payable for deferred compensation to trustees on the Statement of Assets and Liabilities at October 31, 2014.

Note 3 Investments

The cost of purchases and proceeds from sale of long-term investments for the year ended October 31, 2014 were as follows:
