### Forward Looking Statements

These slides and the accompanying oral presentation contain forward-looking statements and information. The use of words such as

may,  
might,  
will,  
should,  
expect,  
plan,  
anticipate,  
believe,  
estimate,  
project,  
intend,  
future,  
potential

or continue,

and other similar expressions, are intended to identify forward looking statements. All of these forward-looking statements are based on estimates and assumptions by our management that, although we believe to be reasonable, are inherently uncertain. Forward-looking statements involve risks and uncertainties, including, but not limited to, economic, competitive, governmental and technical factors outside of our control, that may cause our business, industry, strategy or actual results to differ materially from the forward looking statements.

These risks and uncertainties may include those discussed under the heading Risk Factors

in  
the  
Company's

most recent registration statement on Form 10K on file with the Securities and Exchange Commission, and other factors which  
be known to us. Any forward-looking statement speaks only as of its date. We undertake no obligation to publicly update or  
forward-looking statement, whether as a result of new information, future events or otherwise, except as required by law.

**Regulation G Reconciliation**

During the course of this presentation, we may refer to historical and forward-looking non-GAAP financial measures. A recon  
historical non-GAAP financial measures with the most directly comparable GAAP financial measures can be found on our web  
www.entropic.com in the Investor Relations  
section. We have not provided a reconciliation of forward-looking non-GAAP financial  
measures due to the difficulty in forecasting and quantifying the amounts that would be required to be included in the compar  
GAAP measure that are dependent upon future market conditions and valuations.
