#### As of December 31, 2014

Dear Shareholders,

We would like to start by saying thank you for your interest in the Apollo Senior Floating Rate Fund Inc. and the Apollo Tactical Income Fund Inc. (the Funds ). We appreciate the trust and confidence you have placed with us through your investment in the Funds.

The year 2014 was highlighted by a significant disparity between global credit and equity markets, though the path for each was different and tortuous. Equities started the year under pressure due to weakness in global economies, growing geopolitical concerns and a near unanimous view that U.S. interest rates were headed higher. Credit on the other hand started the year strong as many of these same factors (or ultimate lack thereof in the case of higher rates) created demand for certain credit assets including investment grade bonds, high-yield bonds and leveraged loans. Technical conditions in the loan and high-yield markets helped increase demand with strong inflows via retail funds and collateralized loan obligations (CLOS) and relatively light new issuance.

Despite fund flows for leveraged loan mutual funds turning negative for the first time in several years in April 2014, equity and fixed income markets were able to sustain solid returns through the first half of the year, shrugging off increasing tensions between Ukraine and Russia and ongoing debate over the timing of Federal Reserve action on interest rates. Through the second quarter, high-yield bonds and loans returned 5.8% (as measured by the J.P. Morgan High-Yield Default Monitor) and 2.4% (as measured by the J.P. Morgan Leveraged Loan Index), respectively, while equities returned 7.1% (as measured by the S&P 500 Index), emerging market bonds gained 9.1% (as measured by the J.P. Morgan EMBIG Index) and investment-grade bonds gained 5.8% (as measured by the J.P. Morgan JULI Index). As a reference point, high-yield bonds hit their lowest yield of the year on June 23, 2014 at 5.12% (as measured by the J.P. Morgan High-Yield Default Monitor) resulting in part from the combination of spread compression and low U.S. Treasury yields.

The second half of the year began with a sharp reversal of conditions in the credit markets. Negative news, concerns about valuations and ongoing fears regarding the impact rising rates could have on fixed income products initiated a series of weekly outflows from high-yield bond funds that lasted several weeks and totaled nearly \$5.4 billion, representing a material portion of the \$7.9 billion that had flowed into the asset class during the year up to that point. Thus began a see-saw pattern of rallies and selloffs in high-yield bonds and leveraged loans that would last through the end of year, fueled by varying combinations of supply and demand technicals, strength in equities, rate concerns, falling oil and commodity prices and overall weaker risk appetite. High-yield bonds and leveraged loans ended the year with gains of just 2.2% (as measured by the J.P. Morgan High-Yield Default Monitor) and 2.0% (as measured by the J.P. Morgan Leveraged Loan Index), respectively, relying on their attractive income components to produce positive total returns, while the S&P 500 Index mostly shrugged off many of the same concerns to gain an impressive 13.7% return on the year, including dividends. Given the strong bid for U.S. Treasuries, investment grade bonds and emerging market bonds finished the year with gains of 7.8% (as measured by the J.P. Morgan JULI Index) and 5.5% (as measured by the J.P. Morgan EMBIG Index), respectively.

Generally, credit fundamentals in 2014 were strong by historical standards. The default rate for the year ended at 0.34% for loans (as measured by the S&P Capital IQ LCD) (excluding Energy Future Holdings Corp., formerly known as TXU Corp.), and 2.04% for high-yield bonds (as measured by the BofA Merrill Lynch High-Yield Master II Index), which was the lowest level for loans since December 2007, driven by a combination of low interest rates, open capital markets and solid overall economic growth. We currently expect that default rates in 2015 will begin to inch higher as the credit cycle matures and the impact of lower oil and commodity prices takes its toll on issuers in those industries. However, the silver lining of all of the volatility experienced during the second half of 2014 is that as we enter 2015, spreads and terms across loans and high-yield bonds are more attractive now than they were during most of 2014, creating a better relative value trading environment and potentially interesting total return opportunities amongst issuers caught up in the commodity related sell-off. We currently expect continued volatility in 2015 as the credit markets deal with the debate over and potential impact of rising rates (maybe), geopolitical concerns (again) and ongoing concerns about growth outside of the U.S. (again).

We appreciate your interest and support in the Funds. If you have any questions about the Funds, please call 1-888-301-3838, or go to our website at www.agmfunds.com.

Sincerely,

Apollo Credit Management, LLC

(a) Averages based on par value of investment securities, except for the weighted average modified duration, which is based on market value.

(b) Credit quality is calculated as a percentage of fair value of investment securities at December 31, 2014. The quality ratings reflected were issued by Standard & Poor s Ratings Group (S&P), a nationally recognized statistical rating organization. Credit quality ratings reflect the rating agency s opinion of the credit quality of the underlying positions in the Fund s portfolio and not that of the Fund itself. Credit quality ratings are subject to change.

(c) The industry classifications reported are from widely recognized market indexes or rating group indexes, and/or as defined by Fund management, with the primary source being Moody s Investors Service (Moody s), a nationally recognized statistical rating organization.

(d) Holdings are subject to change and are provided for informational purposes only.

(e) Performance reflects total return assuming all distributions were reinvested at the dividend reinvestment rate. Past performance does not necessarily indicate how the Fund will perform in the future. The performance information provided does not reflect the deduction of taxes that a shareholder would pay on distributions received from the Fund.

(f) Annualized.

(g) The S&P/LSTA Leveraged Loan Index is a broad index designed to reflect the performance of the U.S. Dollar facilities in the leveraged loan market.

- (a) Senior Loans are senior, secured loans made to companies whose debt is rated below investment grade and investments with similar characteristics. Senior Loans typically hold a first lien priority and pay interest at rates that are determined periodically on the basis of a floating base lending rate plus a spread. Unless otherwise identified, all Senior Loans carry a variable rate of interest. These base lending rates are primarily the London Interbank Offered Rate (LIBOR) and secondarily the prime rate offered by one or more major U.S. banks and the certificate of deposit rate used by commercial lenders. The rates shown represent the weighted average rate at December 31, 2014. Senior Loans are generally not registered under the Securities Act of 1933 (the 1933 Act) and often contain certain restrictions on resale and cannot be sold publicly. Senior Loans often require prepayments from excess cash flow or permit the borrower to repay at its election. The degree to which borrowers repay, whether as a contractual requirement or at their election, cannot be predicted with accuracy. As a result, the actual maturity may be substantially less than the stated maturity shown.
- (b) Fair Value Level 3 security. All remaining securities are categorized as Level 2.
- (c) All or a portion of this position has not settled. Full contract rates do not take effect until settlement date.
- (d) Fixed rate asset.
- (e) Foreign issuer traded in U.S. dollars.
- (f) Represents a payment-in-kind security which may pay interest in additional principal amount.
- (g) Securities exempt from registration pursuant to Rule 144A under the 1933 Act. These securities may only be resold in transactions exempt from registration to qualified institutional buyers. At December 31, 2014, these securities amounted to \$12,126,313, or 4.3% of net assets.
- (h) Non income-producing asset.
- (i) Senior Loan assets have additional unfunded loan commitments. As of December 31, 2014, the Fund had unfunded loan commitments, which could be extended at the option of the borrower, pursuant to the following loan agreements:

Borrower Charger OpCo B.V. (Oak Tea, Inc.)	Unfunded Loan mmitments 3,646,616
Total Unfunded Loan Commitments	\$ 3,646,616
