SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR- 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2014

Commission File Number 1-898

AMPCO-PITTSBURGH CORPORATION

Pennsylvania	**25-1117717**
(State of Incorporation)	I.R.S. Employer ID No.

600 Grant Street, Suite 4600 Pittsburgh, PA 15219	**(412) 456-4400**
(Address of principal executive offices)	(Registrant s telephone number)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	**Name of each exchange on which registered**
Common stock, $1 par value	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes____ No__ü__

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes____ No__ü__

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes__ü__ No____

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T(§232.405 of this chapter) during the preceding 12 months (or such shorter period that the registrant was required to submit and post such files). Yes__ü__ No____

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant s knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. [ü]

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer ____ Accelerated Filer __ü__ Non-accelerated Filer____Smaller reporting company____

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes____ No__ü__

The aggregate market value of the voting stock of Ampco-Pittsburgh Corporation held by non-affiliates on June 30, 2014 (based upon the closing price of the Registrant s Common Stock on the New York Stock Exchange on that date) was approximately $191.6 million.

As of March 12, 2015, 10,425,664 common shares were outstanding.

Documents Incorporated by Reference: Part III of this report incorporates by reference certain information from the Proxy Statement for the 2015 Annual Meeting of Shareholders.

FORWARD-LOOKING STATEMENTS

The Private Securities Litigation Reform Act of 1995 (the Act) provides a safe harbor for forward-looking statements made by or on our behalf. Management s Discussion and Analysis of Financial Condition and Results of Operation and other sections of the Annual Report on Form 10-K as well as the consolidated financial statements and notes thereto may contain forward-looking statements that reflect our current views with respect to future events and financial performance.

All statements in this document other than statements of historical fact are statements that are, or could be, deemed forward-looking statements within the meaning of the Act. In this document, statements regarding future financial position, sales, costs, earnings, cash flows, other measures of results of operations, capital expenditures or debt levels and plans, objectives, outlook, targets, guidance or goals are forward-looking statements. Words such as may, intend, believe, expect, anticipate, estimate, project, forecast and other terms of similar meaning th future events and trends are also generally intended to identify forward looking statements. Forward-looking statements speak only as of the date on which such statements are made, are not guarantees of future performance or expectations, and involve risks and uncertainties. For us, these risks and uncertainties include, but are not limited to, those described under Item 1A. Risk Factors of this Annual Report on Form 10-K. In addition, there may be events in the future that we are not able to predict accurately or control which may cause actual results to differ materially from expectations expressed or implied by forward-looking statements. Except as required by applicable law, we assume no obligation, and disclaim any obligation, to update forward-looking statements whether as a result of new information, events or otherwise.

PART I

ITEM 1. BUSINESS

GENERAL DEVELOPMENT OF BUSINESS

Ampco-Pittsburgh Corporation (the Corporation) was incorporated in Pennsylvania in 1929. The Corporation, individually or together with its consolidated subsidiaries, is also referred to herein as the Registrant .

In 2013, the Forged and Cast Rolls segment recognized a need to diversify its product offerings and started producing non-roll products - primarily ingot and open die forged products which are used in the gas and oil industry and the aluminum and plastic extrusion industries. As the demand for the non-roll product has grown, we determined that Forged and Cast Engineered Products is a more appropriate segment name and have reflected that change throughout this Annual Report on Form 10-K.

The Corporation classifies its businesses in two segments: Forged and Cast Engineered Products and Air and Liquid Processing.

FINANCIAL INFORMATION ABOUT SEGMENTS

The sales and operating profit of the Corporation s two segments and the identifiable assets attributable to both segments for the three years ended December 31, 2014 are set forth in Note 19 (Business Segments) on page 53 of this Annual Report on Form 10-K.

NARRATIVE DESCRIPTION OF BUSINESS

Forged and Cast Engineered Products Segment

Union Electric Steel Corporation produces ingot and forged products that service a wide variety of industries globally. It specializes in the production of forged hardened steel rolls used in cold rolling by producers of steel, aluminum and other metals throughout the world. In addition, it produces ingot and open die forged products which are used in the gas and oil industry and the aluminum and plastic extrusion industries. Although currently representing a minor portion of the segment s business activity, sales of ingot and open die forged products are expected to grow and become a more significant portion of our segment s business activity. It is headquartered in Carnegie, Pennsylvania with three manufacturing facilities in Pennsylvania and one in Indiana. Union Electric Steel Corporation is one of the largest producers of forged hardened steel rolls in the world. In addition to a few domestic competitors, several major European, South American and Asian manufacturers also compete in both the domestic and foreign markets. In 2007, a subsidiary became a 49% partner in a joint venture in China to manufacture large forged backup rolls, principally in weights and sizes larger than those which can be made in the subsidiary s facilities in the United States.

Union Electric Steel UK Limited produces cast rolls for hot and cold strip mills, medium/heavy section mills and plate mills in a variety of iron and steel qualities. It is located in Gateshead, England and is a major supplier of cast rolls to the metalworking industry worldwide. It primarily competes with European, Asian and North and South American companies in both the domestic and foreign markets. Union Electric Steel UK Limited is a 25% partner in a Chinese joint venture which produces cast rolls.

Air and Liquid Processing Segment

Aerofin Division of Air & Liquid Systems Corporation produces custom-engineered finned tube heat exchange coils and related heat transfer products for a variety of industries including fossil fuel and nuclear power generation, automotive, industrial process and HVAC, and is located in Lynchburg, Virginia.

Buffalo Air Handling Division of Air & Liquid Systems Corporation produces large custom air handling systems used in commercial, institutional and industrial buildings and is located in Amherst, Virginia.

Buffalo Pumps Division of Air & Liquid Systems Corporation manufactures a line of centrifugal pumps for the refrigeration, power generation and marine defense industries and is located in North Tonawanda, New York.

All three of the divisions in this segment are principally represented by a common independent sales organization and have several major competitors.

In both segments, the products are dependent on engineering, principally custom designed, and are sold to sophisticated commercial and industrial users located throughout the world.

The Forged and Cast Engineered Products segment has two international customers which constituted approximately 29% of its sales in 2014. The loss of both of these customers could have a material adverse effect on the segment.

For additional information on the products produced and financial information about each segment, see Note 19 (Business Segments) on page 53 of this Annual Report on Form 10-K.

Raw Materials

Raw materials used in both segments are generally available from many sources and the Corporation is not dependent upon any single supplier for any raw material. Substantial volumes of raw materials used by the Corporation are subject to significant variations in price. The Corporation generally does not purchase or commit for the purchase of a major portion of raw materials significantly in advance of the time it requires such materials but does make forward commitments for the supply of natural gas.

Patents

While the Corporation holds some patents, trademarks and licenses, in the opinion of management they are not material to either segment of the Corporation s business, other than in protecting the goodwill associated with the names under which products are sold.

Backlog

The backlog of orders at December 31, 2014 was approximately $168 million compared to a backlog of $197 million at year-end 2013. Approximately 15% of the backlog is expected to be released after 2015.

Competition

The Corporation faces considerable competition from a large number of companies in both segments. The Corporation believes, however, that it is a significant factor in each of the niche markets which it serves. Competition in both segments is based on quality, service, price and delivery. For additional information, see Narrative Description of Business on page 1 of this Annual Report on Form 10-K.

Research and Development

As part of an overall strategy to develop new markets and maintain leadership in each of the industry niches served, the Corporation s businesses in both segments incur expenditures for research and development. The activities that are undertaken are designed to

develop new products, improve existing products and processes, enhance product quality, adapt products to meet customer specifications and reduce manufacturing costs. In the aggregate, these expenditures approximated $1.33 million in 2014, $1.41 million in 2013 and $1.48 million in 2012.

Environmental Protection Compliance Costs

Expenditures for environmental control matters were not material to either segment in 2014 and such expenditures are not expected to be material in 2015.

Employees

On December 31, 2014, the Corporation had 1,076 active employees.

FINANCIAL INFORMATION ABOUT GEOGRAPHIC AREAS

The Forged and Cast Engineered Products segment has a manufacturing operation in England and a small European sales and engineering support group in Belgium. For financial information relating to foreign and domestic operations see Note 19 (Business Segments) on page 53 of this Annual Report on Form 10-K.

AVAILABLE INFORMATION

The Corporation files annual, quarterly and current reports, amendments to those reports, proxy statements and other information with the Securities and Exchange Commission (SEC). You may access and read the Corporation s filings without charge through the SEC s website at www.sec.gov. You may also read and copy any document the Corporation files at the SEC s Public Reference Room located at 100 F. Street, N.E., Room 1580, Washington, DC 20549. Please call the SEC at 1-800-SEC-0330 for further information on the Public Reference Room.

The Corporation s Internet address is www.ampcopittsburgh.com. The Corporation makes available, free of charge on its Internet website, access to these reports as soon as reasonably practicable after such material is filed with, or furnished to, the SEC. The information on the Corporation s website is not part of this Annual Report on Form 10-K.

EXECUTIVE OFFICERS

The name, age, position with the Corporation[1] and business experience for the past five years of the Executive Officers of the Corporation are as follows:

John S. Stanik (age 61). Mr. Stanik has served as the Corporation s Chief Executive Officer since January 2015. He previously worked at Calgon Carbon Corporation, an international company specializing in purification products, technologies and services, from 1991 through 2012 when he retired for personal reasons. Mr. Stanik served as President and Chief Executive Officer of Calgon Carbon from 2003 to 2012 and became its Chairman of the Board in 2007.

Rose Hoover (age 59). Ms. Hoover has been employed by the Corporation for more than thirty-five years. She has served as Executive Vice President and Chief Administrative Officer of the Corporation since May 2011; Senior Vice President of the Corporation since April 2009 and prior to that served as Vice President Administration of the Corporation since 2006. She has also served as Secretary of the Corporation for more than five years.

Marliss D. Johnson (age 50). Ms. Johnson has been Chief Financial Officer and Treasurer of the Corporation since May 2013. Prior to that, she was Vice President, Controller and Treasurer of the Corporation for more than ten years. Ms. Johnson is a Certified Public Accountant with fourteen years of experience with a major accounting firm prior to joining the Corporation.

Robert G. Carothers (age 65). Mr. Carothers has been employed by Union Electric Steel, a subsidiary of the Corporation, for more than forty years. He has served as Chairman, Chief Executive Officer, and President of the Corporation s Forged and Cast Engineered Products Segment since April 2009 and prior to that served as President of Union Electric Steel since 1998.

3

Table of Contents

Terrence W. Kenny (age 55). Mr. Kenny has been employed by the Corporation for almost thirty years. He has served as President of the Air and Liquid Processing Group since April 2009 and prior to that served as Group Vice President of the Corporation for more than five years.

(1) *Officers serve at the discretion of the Board of Directors and none of the listed individuals serves as a director of a public company, except that Mr. Stanik is a director of the Corporation.*

ITEM 1A. RISK FACTORS

From time to time, important factors may cause actual results to differ materially from any future expected results based on performance expressed or implied by any forward-looking statements made by us, including known and unknown risks, uncertainties and other factors, many of which are not possible to predict or control. Several of these factors are described from time to time in our filings with the Securities and Exchange Commission, but the factors described in filings are not the only risks that are faced.

Cyclical Demand for Products/Economic Downturns

A significant portion of our sales consists of rolling mill rolls to customers in the global steel industry which can be periodically impacted by economic or cyclical downturns. Such downturns, the timing and length of which are difficult to predict, may reduce the demand for, and sales of, our forged and cast steel rolls both in the United States and the rest of the world. Lower demand for rolls may also adversely impact profitability as other competing roll producers lower selling prices in the market place in order to fill their manufacturing capacity. Cancellation of orders or deferral of delivery of rolls may occur and produce an adverse impact on financial results. In addition, sales of non-roll product, consisting of open die forged product primarily for the gas and oil industries, are impacted by fluctuations in global energy prices.

Steel Industry Consolidation

Globally, the steel industry has undergone structural change by way of consolidation and mergers. In certain markets, the resultant reduction in the number of steel plants and the increased buying power of the enlarged steel producing companies may put pressure on the selling prices and profit margins of rolls.

Export Sales

Exports are a significant proportion of our sales. Historically, changes in foreign exchange rates, particularly in respect of the U.S. dollar and the euro, have impacted the export of our products and may do so again in the future. Other factors which may adversely impact export sales and operating results include political and economic instability, export controls, changes in tax laws and tariffs and new indigenous producers in overseas markets. A reduction in the level of export sales may have an adverse impact on our financial results. In addition, exchange rate changes may allow foreign roll suppliers to compete in our home markets.

Foreign Currency Exchange Rates

Certain of our subsidiaries operate in foreign jurisdictions and, accordingly, earn revenues, pay expenses, own assets and incur liabilities in countries using currencies other than the U.S. dollar. Since our consolidated financial statements are presented in U.S. dollars, we must translate revenues and expenses into U.S. dollars at the average exchange rate during each reporting period, and assets and liabilities into U.S. dollars at the exchange rate in effect at the end of each reporting period. Therefore, increases or decreases in the value of the U.S. dollar against other major currencies will affect the translated value for revenue, expenses and balance sheet items denominated in foreign currencies and could materially affect our financial results expressed in U.S. dollars.

Capital Spending

Each of our businesses is susceptible to the general level of economic activity, particularly as it impacts industrial and construction capital spending. A downturn in capital spending in the United States and elsewhere may reduce demand for and sales of our air handling, power generation and refrigeration equipment, and rolling mill rolls. Lower demand may also reduce profit margins due to our competitors and us striving to maximize manufacturing capacity by lowering prices.

4

Prices and Availability of Commodities

We use certain commodities in the manufacture of our products. These include steel scrap, ferroalloys and energy. Any sudden price increase may cause a reduction in profit margins or losses where fixed-priced contracts have been accepted or increases cannot be obtained in future selling prices. In addition, there may be curtailment in electricity or gas supply which would adversely impact production. Shortage of critical materials while driving up costs may be of such severity as to disrupt production, all of which may impact sales and profitability.

Labor Agreements

We have several key operations which are subject to multi-year collective bargaining agreements with our hourly work force. While we believe we have good relations with our unions, there is the risk of industrial action or work stoppage at the expiration of an agreement if contract negotiations break down, which may disrupt manufacturing and impact results of operations.

Dependence on Certain Equipment

Our principal business relies on certain unique equipment such as an electric arc furnace and a spin cast work roll machine. Although a comprehensive critical spare inventory of key components for this equipment is maintained, if any such unique equipment is out of operation for an extended period, it may result in a significant reduction in our sales and earnings.

Asbestos Litigation

Our subsidiaries, and in some cases, we, are defendants in numerous claims alleging personal injury from exposure to asbestos-containing components historically used in certain products of our subsidiaries. Through year-end 2014, our insurance has covered a substantial majority of our settlement and defense costs. We believe that the estimated costs net of anticipated insurance recoveries of our pending and future asbestos legal proceedings for the next ten years will not have a material adverse effect on our consolidated financial condition or liquidity. However, there can be no assurance that our subsidiaries or we will not be subject to significant additional claims in the future or that our subsidiaries ultimate liability with respect to asbestos claims will not present significantly greater and longer lasting financial exposure than provided for in our consolidated financial statements. Similarly, although the Corporation believes that the assumptions employed in valuing its insurance coverage were reasonable, there are other assumptions that could have been employed that would have resulted in materially lower insurance recovery projections. The ultimate net liability with respect to such pending and any unasserted claims is subject to various uncertainties, including the following:

- the number of claims that are brought in the future;
- the costs of defending and settling these claims;
- insolvencies among our insurance carriers and the risk of future insolvencies;
- the possibility that adverse jury verdicts could require damage payments in amounts greater than the amounts for which we have historically settled claims;
- possible changes in the litigation environment or federal and state law governing the compensation of asbestos claimants;
- the risk that the bankruptcies of other asbestos defendants may increase our costs; and

the risk that our insurance will not cover as much of our asbestos liabilities as anticipated.

Because of the uncertainties related to such claims, it is possible that the ultimate liability could have a material adverse effect on our consolidated financial condition or liquidity in the future.

Environmental Matters

We are subject to various domestic and international environmental laws and regulations that govern the discharge of pollutants and disposal of wastes and which may require that we investigate and remediate the effects of the release or disposal of materials at sites associated with past and present operations. We could incur substantial cleanup costs, fines and civil or criminal sanctions, third party property damage or personal injury claims as a result of violations or liabilities under these laws or non-compliance with environmental permits required at our facilities.

ITEM 1B. UNRESOLVED STAFF COMMENTS

The Corporation has no unresolved staff comments.

Table of Contents

ITEM 2. PROPERTIES

The location and general character of the principal locations in each segment, all of which are owned unless otherwise noted, are as follows:

Company and Location	Principal Use	Approximate Square Footage	Type of Construction
FORGED AND CAST ENGINEERED PRODUCTS SEGMENT			
Union Electric Steel Corporation			
Route 18 Burgettstown, PA 15021	Manufacturing facilities	296,800 on 55 acres	Metal and steel
726 Bell Avenue Carnegie, PA 15106	Manufacturing facilities and offices	165,900 on 8.7 acres	Metal and steel
U.S. Highway 30 Valparaiso, IN 46383	Manufacturing facilities	88,000 on 20 acres	Metal and steel
1712 Greengarden Road Erie, PA 16501	Manufacturing facilities	40,000*	Metal and steel
Bosstraat 54 3560 Lummen Belgium	Sales and engineering	4,500*	Cement block
Union Electric Steel UK Limited			
Coulthards Lane Gateshead, England	Manufacturing facilities and offices	274,000 on 10 acres	Steel framed, metal and brick
AIR AND LIQUID PROCESSING SEGMENT			
Air & Liquid Systems Corporation			
Aerofin Division			
4621 Murray Place Lynchburg, VA 24506	Manufacturing facilities and offices	146,000 on 15.3 acres	Brick, concrete and steel
Buffalo Air Handling Division			
Zane Snead Drive Amherst, VA 24531	Manufacturing facilities and offices	89,000 on 19.5 acres	Metal and steel
Buffalo Pump Division			
874 Oliver Street	Manufacturing facilities and offices	94,000 on 9 acres	Metal, brick and cement block

N. Tonawanda, NY 14120

** Facility is leased.*

The Corporation s office space and the Air & Liquid Systems headquarters office space are leased. All of the owned facilities are adequate and suitable for their respective purposes.

The Forged and Cast Engineered Products segment s facilities were operated within 65% to 75% of their normal capacity during 2014. The facilities of the Air and Liquid Processing segment were operated within 60% to 70% of their normal capacity. Normal capacity is defined as capacity under approximately normal conditions with allowances made for unavoidable interruptions, such as lost time for repairs, maintenance, breakdowns, set-up, failure, supply delays, labor shortages and absences, Sundays, holidays, vacation, inventory taking, etc. The number of work shifts is also taken into consideration.

Table of Contents

ITEM 3. LEGAL PROCEEDINGS

LITIGATION

The Corporation and its subsidiaries are involved in various claims and lawsuits incidental to their businesses. In addition, it is also subject to asbestos litigation as described below.

Asbestos Litigation

Claims have been asserted alleging personal injury from exposure to asbestos-containing components historically used in some products of predecessors of the Corporation s Air & Liquid Systems Corporation subsidiary (Asbestos Liability) and of an inactive subsidiary in dissolution. During 2013, all pending claims against the inactive subsidiary in dissolution were settled, dismissed or barred, and the dissolution court issued a final order thereby concluding the dissolution proceedings. Those subsidiaries, and in some cases the Corporation, are defendants (among a number of defendants, often in excess of 50) in cases filed in various state and federal courts.

Asbestos Claims

The following table reflects approximate information about the claims for Asbestos Liability against the subsidiaries and the Corporation for the two years ended December 31, 2014 and 2013. 2013 includes asbestos claims asserted against the inactive subsidiary in dissolution.

	2014	2013
Total claims pending at the beginning of the period	**8,319**	8,007
New claims served	**1,466**	1,432
Claims dismissed	**(1,094)**	(803)
Claims settled	**(234)**	(317)
Total claims pending at the end of the period [(1)]	**8,457**	8,319
Gross settlement and defense costs (in 000 s)	**$ 20,801**	$ 22,618
Average gross settlement and defense costs per claim resolved (in 000 s)	**$ 15.66**	$ 20.19

(1) Included as open claims are approximately 1,647 and 1,636 claims in 2014 and 2013, respectively, classified in various jurisdictions as inactive or transferred to a state or federal judicial panel on multi-district litigation, commonly referred to as the MDL.

A substantial majority of the settlement and defense costs reflected in the above table was reported and paid by insurers. Because claims are often filed and can be settled or dismissed in large groups, the amount and timing of settlements, as well as the number of open claims, can fluctuate significantly from period to period.

Asbestos Insurance

The Corporation and its Air & Liquid Systems Corporation (Air & Liquid) subsidiary are parties to a series of settlement agreements (Settlement Agreements) with insurers that have coverage obligations for Asbestos Liability (the Settling Insurers). Under the Settlement Agreements, the Settling Insurers accept financial responsibility, subject to the terms and conditions of the respective agreements, including overall coverage limits, for pending and future claims for Asbestos Liability. The Settlement Agreements encompass the substantial majority of insurance policies that provide coverage for claims for Asbestos Liability.

The Settlement Agreements include acknowledgements that Howden North America, Inc. (Howden) is entitled to coverage under policies covering Asbestos Liability for claims arising out of the historical products manufactured or distributed by Buffalo Forge, a former subsidiary of the Corporation (the Products). The Settlement Agreements do not provide for any prioritization on access to the applicable policies or any sublimits of liability as to Howden or the Corporation and Air & Liquid, and, accordingly, Howden may access the coverage afforded by the Settling Insurers for any covered claim arising out of a Product. In general, access by Howden to the coverage afforded by the Settling Insurers for the Products will erode coverage under the Settlement Agreements available to the Corporation and Air & Liquid for Asbestos Liability.

On February 24, 2011, the Corporation and Air & Liquid filed a lawsuit in the United States District Court for the Western District of Pennsylvania against thirteen domestic insurance companies, certain underwriters at Lloyd s, London and certain London market insurance companies, and Howden. The lawsuit seeks a declaratory judgment regarding the respective rights and obligations of the parties under excess insurance policies that were issued to the Corporation from 1981 through 1984 as respects claims against the Corporation and its subsidiary for Asbestos Liability and as respects asbestos bodily-injury claims against Howden arising from the Products. The Corporation and Air & Liquid have reached Settlement Agreements with all but two of the defendant insurers in the coverage action. Those Settlement Agreements specify the terms and conditions upon which the insurer parties are to contribute to defense and indemnity costs for claims for Asbestos Liability. One of the Settlement Agreements entered into by the Corporation and Air & Liquid also provided for the dismissal of claims, without prejudice, regarding two upper-level excess policies issued by one of the insurers. The Court has entered Orders dismissing all claims in the action filed against each other by the Corporation and Air & Liquid, on the one hand, and by the settling insurers, on the other. Howden also reached an agreement with eight domestic insurers addressing asbestos-related bodily injury claims arising from the Products, and claims as to those insurers and Howden have been dismissed. Various counterclaims, cross claims and third party claims have been filed in the litigation and remain pending although only two domestic insurers and Howden remain in the litigation as to the Corporation and Air & Liquid. On September 27, 2013, the Court issued a memorandum opinion and order granting in part and denying in part cross motions for summary judgment filed by the Corporation and Air & Liquid, Howden, and the insurer parties still in the litigation. At a hearing on January 13, 2015, the Court ruled that final judgment in accordance with the Court s prior rulings will be entered in the case. Upon entry of final judgment, the Corporation, Air & Liquid, certain insurers, and Howden may appeal to the United States Court of Appeals for the Third Circuit.

Asbestos Valuations

In 2006, the Corporation retained Hamilton, Rabinovitz & Associates, Inc. (HR&A), a nationally recognized expert in the valuation of asbestos liabilities, to assist the Corporation in estimating the potential liability for pending and unasserted future claims for Asbestos Liability. HR&A was not requested to estimate asbestos claims against the inactive subsidiary in dissolution, which the Corporation believes are immaterial. Based on this analysis, the Corporation recorded a reserve for Asbestos Liability claims pending or projected to be asserted through 2013 as of December 31, 2006. HR&A s analysis has been periodically updated since that time. Most recently, the HR&A analysis was updated in 2014, and additional reserves were established by the Corporation as of December 31, 2014 for Asbestos Liability claims pending or projected to be asserted through 2024. The methodology used by HR&A in its projection in 2014 of the operating subsidiaries liability for pending and unasserted potential future claims for Asbestos Liability, which is substantially the same as the methodology employed by HR&A in prior estimates, relied upon and included the following factors:

- HR&A s interpretation of a widely accepted forecast of the population likely to have been exposed to asbestos;
- epidemiological studies estimating the number of people likely to develop asbestos-related diseases;
- HR&A s analysis of the number of people likely to file an asbestos-related injury claim against the subsidiaries and the Corporation based on such epidemiological data and relevant claims history from January 1, 2012 to December 8, 2014;
- an analysis of pending cases, by type of injury claimed and jurisdiction where the claim is filed;
- an analysis of claims resolution history from January 1, 2012 to December 8, 2014 to determine the average settlement value of claims, by type of injury claimed and jurisdiction of filing; and
- an adjustment for inflation in the future average settlement value of claims, at an annual inflation rate based on the Congressional Budget Office s ten year forecast of inflation.

Using this information, HR&A estimated in 2014 the number of future claims for Asbestos Liability that would be filed through the year 2024, as well as the settlement or indemnity costs that would be incurred to resolve both pending and future unasserted claims through 2024. This methodology has been accepted by numerous courts.

In conjunction with developing the aggregate liability estimate referenced above, the Corporation also developed an estimate of probable insurance recoveries for its Asbestos Liabilities. In developing the estimate, the Corporation considered HR&A s projection for settlement or indemnity costs for Asbestos Liability and management s projection of associated defense costs (based on the current defense to indemnity cost ratio), as well as a number of additional factors. These additional factors included the Settlement Agreements then in effect, policy exclusions, policy limits, policy provisions regarding coverage for defense costs, attachment points, prior impairment of policies and gaps in the coverage, policy exhaustions, insolvencies among certain of the insurance carriers, and

the nature of the underlying claims for Asbestos Liability asserted against the subsidiaries and the Corporation as reflected in the Corporation s asbestos claims database, as well as estimated erosion of insurance limits on account of claims against Howden arising out of the Products. In addition to consulting with the Corporation s outside legal counsel on these insurance matters, the Corporation consulted with a nationally-recognized insurance consulting firm it retained to assist the Corporation with certain policy allocation matters that also are among the several factors considered by the Corporation when analyzing potential recoveries from relevant historical insurance for Asbestos Liabilities. Based upon all of the factors considered by the Corporation, and taking into account the Corporation s analysis of publicly available information regarding the credit-worthiness of various insurers, the Corporation estimated the probable insurance recoveries for Asbestos Liability and defense costs through 2024. Although the Corporation believes that the assumptions employed in the insurance valuation were reasonable and previously consulted with its outside legal counsel and insurance consultant regarding those assumptions, there are other assumptions that could have been employed that would have resulted in materially lower insurance recovery projections.

Based on the analyses described above, the Corporation s reserve at December 31, 2014 for the total costs, including defense costs, for Asbestos Liability claims pending or projected to be asserted through 2024 was $189 million, of which approximately 64% was attributable to settlement costs for unasserted claims projected to be filed through 2024 and future defense costs. While it is reasonably possible that the Corporation will incur additional charges for Asbestos Liability and defense costs in excess of the amounts currently reserved, the Corporation believes that there is too much uncertainty to provide for reasonable estimation of the number of future claims, the nature of such claims and the cost to resolve them beyond 2024. Accordingly, no reserve has been recorded for any costs that may be incurred after 2024.

The Corporation s receivable at December 31, 2014 for insurance recoveries attributable to the claims for which the Corporation s Asbestos Liability reserve has been established, including the portion of incurred defense costs covered by the Settlement Agreements in effect through December 31, 2014, and the probable payments and reimbursements relating to the estimated indemnity and defense costs for pending and unasserted future Asbestos Liability claims, was $141 million.

The following table summarizes activity relating to insurance recoveries for each of the years ended December 31, 2014 and 2013.

	2014	2013
Insurance receivable asbestos, beginning of the year	**$ 110,741**	$ 118,115
Settlement and defense costs paid by insurance carriers	**(17,159)**	(23,714)
Changes in estimated coverage	**47,069**	16,340
Insurance receivable asbestos, end of the year	**$ 140,651**	$ 110,741

The insurance receivable recorded by the Corporation does not assume any recovery from insolvent carriers and a substantial majority of the insurance recoveries deemed probable was from insurance companies rated A (excellent) or better by A.M. Best Corporation. There can be no assurance, however, that there will not be further insolvencies among the relevant insurance carriers, or that the assumed percentage recoveries for certain carriers will prove correct. The difference between insurance recoveries and projected costs is not due to exhaustion of all insurance coverage for Asbestos Liability. The Corporation and the subsidiaries have substantial additional insurance coverage which the Corporation expects to be available for Asbestos Liability claims and defense costs that the subsidiaries and it may incur after 2024. However, this insurance coverage also can be expected to have gaps creating significant shortfalls of insurance recoveries as against claims expense, which could be material in future years.

The amounts recorded by the Corporation for Asbestos Liabilities and insurance receivables rely on assumptions that are based on currently known facts and strategy. The Corporation s actual expenses or insurance recoveries could be significantly higher or lower than those recorded if assumptions used in the Corporation s or HR&A s calculations vary significantly from actual results. Key variables in these assumptions are identified above and include the number and type of new claims to be filed each year, the average cost of disposing of each such new claim, average annual defense costs, compliance by relevant parties with the terms of the Settlement Agreements, the resolution of remaining coverage issues with insurance carriers, and the solvency risk with respect to the relevant insurance carriers. Other factors that may affect the Corporation s Asbestos Liability and ability to recover under its insurance policies include uncertainties surrounding the litigation process from jurisdiction to jurisdiction and from case to case, reforms that may be made by state and federal courts, and the passage of state or federal tort reform legislation.

The Corporation intends to evaluate its estimated Asbestos Liability and related insurance receivables as well as the underlying assumptions on a regular basis to determine whether any adjustments to the estimates are required. Due to the uncertainties

Table of Contents

surrounding asbestos litigation and insurance, these regular reviews may result in the Corporation incurring future charges; however, the Corporation is currently unable to estimate such future charges. Adjustments, if any, to the Corporation s estimate of its recorded Asbestos Liability and/or insurance receivables could be material to operating results for the periods in which the adjustments to the liability or receivable are recorded, and to the Corporation s liquidity and consolidated financial position.

ENVIRONMENTAL

The Corporation is currently performing certain remedial actions in connection with the sale of real estate previously owned and appropriate reserves have been established.

PART II

ITEM 5. MARKET FOR REGISTRANT S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

The shares of common stock of Ampco-Pittsburgh Corporation are traded on the New York Stock Exchange (symbol AP). Cash dividends have been paid on common shares in every year since 1965.

	2014 Per Share			2013 Per Share		
	Common Stock Price			Common Stock Price		
Quarter	**High**	**Low**	**Dividends Declared**	High	Low	Dividends Declared
First	**$ 20.91**	**$ 16.45**	**$ 0.18**	$ 21.00	$ 17.55	$ 0.18
Second	**23.73**	**18.71**	**0.18**	19.31	16.99	0.18
Third	**24.90**	**19.62**	**0.18**	20.69	16.24	0.18
Fourth	**22.28**	**16.75**	**0.18**	19.70	17.10	0.18
Year	**24.90**	**16.45**	**0.72**	21.00	16.24	0.72

The number of registered shareholders at December 31, 2014 and 2013 equaled 400 and 423, respectively.

STOCK PERFORMANCE GRAPH

Comparison of Five Year Cumulative Total Return

Standard & Poors 500, NYSE Composite and Morningstar s Steel Industry

(Performance results through December 31, 2014)

COMPARISON OF CUMULATIVE TOTAL RETURN*

Assumes $100 invested at the close of trading on the last trading day preceding January 1, 2009 in Ampco-Pittsburgh Corporation common stock, Standard & Poors 500 Index, NYSE Composite Index and Morningstar s Steel Industry group.

**Cumulative total return assumes reinvestment of dividends.*

In the above graph, the Corporation has used Morningstar s Steel Industry group for its peer comparison. The diversity of products produced by subsidiaries of the Corporation makes it difficult to match to any one product-based peer group. Although not totally comparable, the Steel Industry group was chosen because the largest percentage of the Corporation s sales is to the global steel industry.

Historical stock price performance shown on the above graph is not necessarily indicative of future price performance.

(1) Net (loss) income includes:

2014 An after-tax charge of $2,916 or $0.28 per common share for estimated costs of asbestos-related litigation through 2024 net of estimated insurance recoveries (see Note 17 to Consolidated Financial Statements).

2013 An after-tax credit of $10,621 or $1.03 per common share for estimated additional insurance recoveries expected to be available to satisfy asbestos liabilities through 2022 resulting from settlement agreements reached with various insurance carriers (see Note 17 to Consolidated Financial Statements) offset by an after-tax charge of $4,165 or $0.40 per common share to recognize an other-than-temporary impairment of our investment in a forged roll joint venture company (see Note 2 to Consolidated Financial Statements) for a net increase to net income of $6,456 or $0.63 per common share.

2010 An after-tax charge of $12,931 or $1.26 per common share for estimated costs of asbestos-related litigation through 2020 net of estimated insurance recoveries (see Note 17 to Consolidated Financial Statements).

ITEM 7. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

(in thousands, except per share amounts)

EXECUTIVE OVERVIEW

Ampco-Pittsburgh Corporation operates in two business segments the Forged and Cast Engineered Products segment and the Air and Liquid Processing segment. The Forged and Cast Engineered Products segment consists of Union Electric Steel Corporation (Union Electric Steel or UES) and Union Electric Steel UK Limited (UES-UK). Union Electric Steel produces ingot and forged products that service a wide variety of industries globally. It specializes in the production of forged hardened steel rolls used in cold rolling by producers of steel, aluminum and other metals throughout the world. In addition, it produces ingot and open die forged products (non-roll products) which are used in the gas and oil industry and the aluminum and plastic extrusion industries. Headquartered in Carnegie, Pennsylvania with three manufacturing facilities in Pennsylvania and one in Indiana, UES is one of the largest producers of forged hardened steel rolls in the world. In addition to a few domestic competitors, several major European, South American and Asian manufacturers also compete in both the domestic and foreign markets. UES-UK produces cast rolls for hot

and cold strip mills, medium/heavy section mills and plate mills in a variety of iron and steel qualities. It is located in Gateshead, England and is a major supplier of cast rolls to the metalworking industry worldwide. It primarily competes with European, Asian and North and South American companies in both the domestic and foreign markets.

The Air and Liquid Processing segment includes Aerofin, Buffalo Air Handling and Buffalo Pumps, all divisions of Air & Liquid Systems Corporation (Air and Liquid), a wholly-owned subsidiary of the Corporation. Aerofin produces custom-engineered finned tube heat exchange coils and related heat transfer products for a variety of industries including fossil fuel and nuclear power generation, automotive, industrial process and HVAC. Buffalo Air Handling produces large custom-designed air handling systems for commercial, institutional and industrial building markets. Buffalo Pumps manufactures centrifugal pumps for the marine defense, refrigeration and power generation industries. The segment has operations in Virginia and New York with headquarters in Pennsylvania. The segment distributes a significant portion of its products through a common independent group of sales offices located throughout the United States and Canada.

The Forged and Cast Engineered Products segment has been operating at levels below capacity due to the worldwide reduction in demand for roll product. Market conditions in the United States and the EU28 countries continue to be difficult. Business opportunities in Asia (particularly China), India and other world regions remain infrequent as a result of indigenous supply enabling purchases to be made domestically at lower pricing than offered by traditional western suppliers. With the global steelmaking industry also operating below capacity and the resulting supply demand imbalance in the market place, pricing has suffered and profit margins have decreased. Asian and Indian roll producers have been offering aggressive pricing to gain market share in Western and Middle Eastern markets. Additionally, cost reduction requirements at most steel and aluminum producers throughout our customer base have led them to mandate severe discounts from suppliers. For 2015, we expect demand for rolls to be weak and pricing pressures to remain. Ongoing efforts to diversify our customer base have resulted in expansion of our non-roll products. Although currently representing a minor portion of the segment s business activity, sales of our non-roll products have outperformed expectations, offsetting some of the effects of constraints currently affecting the roll market, and utilized available production capacity. For 2015, we expect sales of our non-roll products to grow and become a more significant portion of our segment s business activity.

Union Electric Steel MG Roll Co., Ltd (UES-MG), the Chinese joint venture company in which a subsidiary of UES holds a 49% interest, principally manufactures and sells forged backup rolling mill rolls of a size and weight currently not able to be produced by UES. The joint venture has been adversely impacted by the global economy, with significantly depressed pricing, reduced demand and excess roll inventories of its potential customer base in China all hindering profitability. Losses have been incurred since 2009, in which we have recognized our share (49%) in our consolidated statements of operations, and are expected to continue in 2015. Additionally, the overall financial strength of the joint venture continues to deteriorate with a greater reliance on the 51% partner or entities controlled by the 51% partner to provide financing and working capital. In the fourth quarter of 2013, we, with the help of outside consultants and appraisers, concluded that the estimated fair value of our investment in UES-MG was less than our carrying amount and that the decline was other than temporary . Accordingly, we recognized an impairment charge reducing the carrying amount of our investment to its estimated fair value. We will continue to monitor the carrying value of this investment ($2,574 at December 31, 2014) to determine if future charges are necessary.

For the Air and Liquid Processing segment, increases in spending in the industrial replacement market positively impacted our heat exchange coil business and strength in spending in the fossil-fueled power generation market benefited our centrifugal pump business. These improvements, however, were offset by the continuing slowness of new construction for institutional markets which impacted our custom air handling and heat exchange coil businesses. The focus for this segment is to continue to develop new product lines and to strengthen the sales distribution networks.

Table of Contents

CONSOLIDATED RESULTS OF OPERATIONS OVERVIEW

The Corporation

		2014			2013			2012	
Net Sales:									
Forged and Cast Engineered Products	**$**	**179,388**	**66%**	$	187,286	67%	$	189,470	65%
Air and Liquid Processing		**93,470**	**34%**		93,764	33%		103,435	35%
Consolidated	**$**	**272,858**	**100%**	$	281,050	100%	$	292,905	100%
Income (Loss) from Operations:									
Forged and Cast Engineered Products	**$**	**4,380**		$	13,936		$	18,415	
Air and Liquid Processing[(1)]		**4,222**			24,945			7,267	
Corporate costs		**(8,522)**			(9,914)			(9,390)	
Consolidated	**$**	**80**		$	28,967		$	16,292	
Backlog:									
Forged and Cast Engineered Products	**$**	**131,118**	**78%**	$	159,344	81%	$	154,527	79%
Air and Liquid Processing		**36,830**	**22%**		38,117	19%		41,277	21%
Consolidated	**$**	**167,948**	**100%**	$	197,461	100%	$	195,804	100%

(1) *Income (loss) from operations for the Air and Liquid Processing segment for 2014 includes a pre-tax charge of $4,487 for estimated costs of asbestos-related litigation through 2024 net of estimated insurance recoveries whereas 2013 includes a pre-tax credit of $16,340 for estimated additional insurance recoveries expected to be available to satisfy asbestos liabilities through 2022 resulting from settlement agreements reached with various insurance carriers and 2012 includes a pre-tax credit of $540 for estimated costs of asbestos-related litigation through 2022 net of estimated insurance recoveries (see Note 17 to Consolidated Financial Statements).*

Consolidated net sales for 2014 decreased when compared to 2013 primarily due to a lower volume of shipments and weaker pricing for our Forged and Cast Engineered Products group. Consolidated net sales for 2013 decreased when compared to 2012 principally due to a decline in new construction spending by institutional markets for the Air and Liquid Processing group. A discussion of sales and backlog for the Corporation s two segments is included below.

Operating income for 2014 includes a pre-tax charge of $4,487 for estimated additional costs of asbestos-related litigation through 2024 net of estimated insurance recoveries whereas 2013 includes a pre-tax credit of $16,340 for estimated additional insurance recoveries expected to be available to satisfy asbestos liabilities through 2022. Operating income for the current year was further impacted by weak demand and ongoing pricing pressures but benefitted from lower pension and other postretirement costs. For 2013, the improvement to operating income from the $16,340 pre-tax credit for estimated additional insurance recoveries expected to be available to satisfy asbestos liabilities through 2022 was offset primarily by lower margins for our Forged and Cast Engineered Products segment. Corporate expenses are less in the current year due to lower employee-related expenses including pension and other postretirement benefit costs whereas in 2013 such costs were higher than in 2012.

Gross margin, excluding depreciation, as a percentage of net sales, was 19.9%, 22.7% and 22.9% for 2014, 2013 and 2012, respectively. The decrease from earlier years is primarily attributable to our Forged and Cast Engineered Products segment and a lower volume of shipments and level of production and ongoing price discounting to remain competitive. The expected impact to gross margin is somewhat offset by lower pension and other postretirement benefit costs of approximately $3,927.

Selling and administrative expenses totaled $37,380 (13.7% of net sales), $39,682 (14.1% of net sales) and $40,530 (13.8% of net sales) for 2014, 2013 and 2012, respectively. The decrease in 2014 from 2013 is principally related to lower pension and other postretirement costs of $1,216 and commissions of $878. The decrease in 2013 from 2012 is primarily attributable to lower uninsured legal and case management costs and valuation expenses associated with asbestos litigation of $1,088.

The charge for asbestos litigation in 2014 represents an extension of the estimated costs of pending and future asbestos claims, net of additional insurance recoveries, from 2022 to the end of 2024. The credit for asbestos litigation in 2013 represents the estimated

additional insurance recoveries expected to be available to satisfy asbestos liabilities through 2022 resulting from settlement agreements reached with various insurance carriers in 2013. The credit for asbestos litigation in 2012 represents an extension of the estimated costs of pending and future asbestos claims, net of additional insurance recoveries, from 2020 to the end of 2022. The claims result from alleged personal injury from exposure to asbestos-containing components historically used in some products manufactured by certain companies which now operate as divisions of the Air and Liquid Processing segment. See Note 17 to Consolidated Financial Statements.

Other income (expense) fluctuated primarily as a result of changes in foreign exchange gains and losses and charges related to operations discontinued years ago. (Losses) gains on foreign exchange transactions approximated $(488), $(227) and $107 for 2014, 2013 and 2012, respectively, and charges related to operations discontinued years ago equaled $(443), $(1,412) and $(1,054), respectively.

Our statutory income tax rate equals 35% which compares to an effective income tax rate of 85.9%, 21.4% and 34.4% for 2014, 2013 and 2012, respectively. The effective income tax rate for 2014 is greater than the prior year rates due to a reduction in current year earnings, which caused permanent adjustments to have a greater impact on the overall effective income tax rate, and certain favorable permanent differences including our share of losses from our investment in a forged roll joint venture company offset by the revaluation of deferred income tax assets associated with decreases in the statutory income tax rates for New York and Indiana. The effective income tax rate for 2013 was lower than our statutory income tax rate due to beneficial permanent differences for our domestic operations and tax benefit related to the impairment charge recognized on our investment in a forged roll joint venture company.

Equity losses in the Chinese joint venture represent Union Electric Steel s share (49%) of the losses of UES-MG and the impairment charge we recognized in 2013 on our investment in the joint venture company (see Note 2 to Consolidated Financial Statements).

As a result of the above, for 2014, we lost $1,187 or $0.11 per common share which includes an after-tax charge of $2,916 or $0.28 per common share for estimated costs of asbestos-related litigation through 2024 net of estimated insurance recoveries (see Note 17 to Consolidated Financial Statements). For 2013, we earned $12,437 or $1.20 per common share which includes an after-tax credit of $10,621 or $1.03 per common share for estimated additional insurance recoveries expected to be available to satisfy asbestos liabilities through 2022 resulting from settlement agreements reached with various insurance carriers (see Note 17 to Consolidated Financial Statements) offset by an after-tax charge of $4,165 or $0.40 per common share to recognize an other-than-temporary impairment of our investment in a forged roll joint venture company (see Note 2 to Consolidated Financial Statements) for a net increase to net income of $6,456 or $0.63 per common share. For 2012, we earned $8,355 or $0.81 per common share.

Forged and Cast Engineered Products

	2014	2013	2012
Net sales	**$ 179,388**	$ 187,286	$ 189,470
Operating income	**$ 4,380**	$ 13,936	$ 18,415
Backlog	**$ 131,118**	$ 159,344	$ 154,527

For 2014, net sales and operating income for the segment were lower in comparison to a year ago principally due to a worldwide reduction in demand for roll product. Net sales for our cast rolls business in England benefited from a higher level of shipments and sales of our non-roll products have outperformed expectations; however, lower net sales for our forged roll operations in the United States more than offset the expected contribution provided by each of them. The lower volume of shipments negatively impacted earnings by approximately $3,000. Pricing and profit margins also decreased from a year ago due to the supply demand imbalance in the roll industry which further affected operating results by approximately $4,500. While freight and commission costs declined in the current year by approximately $1,850 on lower sales, the prior year included $1,500 of insurance proceeds for lost margin on rolls damaged in 2012.

Net sales for 2013 decreased slightly when compared to 2012 due to a decline in selling prices offset by a higher level of shipments. The lower selling prices adversely impacted operating income by approximately $12,500; however, the additional volume improved operating income by approximately $4,500. Operating income for 2013 also benefited from receipt of $1,500 of insurance proceeds for lost margin on rolls damaged in 2012 and improved quality resulting in a reduction of warranty-related provisions.

Table of Contents

Improvement in the weighted-average exchange rates used to translate sales of UES-UK from the British pound to the U.S. dollar increased sales for 2014 when compared to 2013 and 2012 by approximately $2,900 and $2,200, respectively. The impact to operating income was not significant.

Backlog at the end of 2014 decreased from 2013 and 2012 due to a combination of larger customers placing orders quarter by quarter versus annually and the falloff in demand as roll customers operate below capacity. As of December 31, 2014, approximately $23,284 of the backlog is expected to be released after 2015.

Air and Liquid Processing

	2014	2013	2012
Net sales	**$ 93,470**	$ 93,764	$ 103,435
Operating income	**$ 4,222**	$ 24,945	$ 7,267
Backlog	**$ 36,830**	$ 38,117	$ 41,277

For 2014, sales for the segment were flat. Net sales of pumps grew slightly, at approximately 2%, in 2014 from 2013 with the higher volume of shipments of commercial pumps helping to offset the decline to U.S. Navy shipbuilders and in pump replacement parts. Additionally, revenue for air handlers improved from a year ago due to an increase in the volume of shipments principally to the pharmaceutical market. Net sales of heat exchange coils, however, fell from a year ago, by approximately 8%, primarily due to a lower volume of shipments for the fossil fuel and nuclear power generation market which is being impacted by reduced demand and increased competition. For 2013, sales for the segment decreased when compared to 2012 principally as a result of reduced demand for custom air handling equipment combined with excess capacity in the industry. Additionally, 2012 benefited from completion of a large order for a customer in medical research.

Operating income for 2014 includes a pre-tax charge of $4,487 for estimated costs of asbestos-related litigation through 2024 net of estimated insurance recoveries. By comparison, operating income for 2013 includes a pre-tax credit of $16,340 for the estimated additional insurance recoveries expected to be available to satisfy asbestos liabilities through 2022 resulting from settlement agreements reached with various insurance carriers during the year and 2012 includes a pre-tax credit of $540 representing an adjustment to previously-provided charges for asbestos-related litigation net of estimated insurance recoveries. See Note 17 to Consolidated Financial Statements for further information. Uninsured legal and case management and valuation costs associated with asbestos litigation for each of the years approximated $340, $649 and $1,737, respectively.

The decline in backlog at December 31, 2014 from 2013 and 2012 is primarily attributable to fewer pumps orders from U.S. Navy shipbuilders and a decrease in orders for air handling units offset by a large order for the fossil fuel power generation market. The majority of the year-end backlog is scheduled to ship in 2015.

LIQUIDITY AND CAPITAL RESOURCES

Net cash flows provided by operating activities for 2014 equaled $19,975 compared to $37,774 and $25,444 for 2013 and 2012, respectively. While the charge (credit) for asbestos litigation recorded in each of the years impacted earnings, it did not affect cash flows by the same amount. Instead, the asbestos liability, net of insurance recoveries, will be paid over a number of years and will generate tax benefits. Net asbestos-related payments, including reimbursement of past costs, equaled $3,642, $(985) and $7,932 in 2014, 2013 and 2012, respectively, and are expected to approximate $4,000 in 2015. Contributions to our pension and other postretirement plans approximated $2,500 in 2014, $7,400 in 2013 (of which $5,000 were voluntary contributions) and $2,500 in 2012. As a result of voluntary contributions and relief provided by *Moving Ahead for Progress in the 21st Century* (MAP-21) and subsequently the *Highway and Transportation Funding Act of 2014* (HAFTA), which reduces funding requirements for single-employer defined benefit plans, no minimum contributions are required for 2015. Additional voluntary contributions may be made however. Net cash flows provided by operating activities for 2014 were affected by higher accounts receivable attributable to mix, slower payments by customers and longer payment terms granted to customers. By comparison, net cash flows provided by operating activities for 2013 benefited from a reduction in inventory when compared to 2012.

Table of Contents

Net cash flows used in investing activities were $13,219, $11,926 and $9,369 in 2014, 2013 and 2012, respectively, the majority of which represents capital expenditures for our Forged and Cast Engineered Products group. In 2010, UES-UK was awarded a government grant with a portion of the proceeds received in 2012. As of December 31, 2014, anticipated future capital expenditures approximate $6,288, the majority of which will be spent in 2015.

Net cash outflows from financing activities represent primarily the payment of dividends of $0.72 per common share. Additionally, stock options were exercised resulting in proceeds from the issuance of common stock and excess tax benefits.

The effect of exchange rate changes on cash and cash equivalents is primarily attributable to the fluctuation of the British pound against the U.S. dollar.

As a result of the above, cash and cash equivalents decreased by $812 in 2014 and ended the year at $97,098 (of which $9,479 is held by foreign operations) in comparison to $97,910 and $78,889 at December 31, 2013 and 2012, respectively. Repatriation of foreign funds may result in the Corporation accruing and paying additional income tax; however, the majority of foreign funds is currently deemed to be permanently reinvested and no additional provision for income tax has been made. Funds on hand and funds generated from future operations are expected to be sufficient to finance our operational and capital expenditure requirements. We also maintain short-term lines of credit in excess of the cash needs of our businesses. The total available at December 31, 2014 was approximately $9,200 (including £3,000 in the United Kingdom and 400 in Belgium).

We had the following contractual obligations outstanding as of December 31, 2014:

		Payments Due by Period				
	Total	**<1 year**	**1 3 years**	**3 5 years**	**>5 years**	**Other**
Industrial Revenue Bonds[1]	**$ 13,311**	$ 0	$ 0	$ 0	$ 13,311	$ 0
Operating Lease Obligations	**1,400**	823	471	106	0	0
Capital Expenditures	**6,288**	6,288	0	0	0	0
Pension and Other Postretirement Benefit Obligations[2]	**49,673**	2,619	7,686	20,046	19,322	0
Purchase Obligations[3]	**4,375**	2,828	1,547	0	0	0
Unrecognized Tax Benefits[4]	**52**	0	0	0	0	52
Total	**$ 75,099**	$ 12,558	$ 9,704	$ 20,152	$ 32,633	$ 52

(1) Represents principal only. Interest is not included since it is variable; interest rates averaged less than 1% in the current year. The Industrial Revenue Bonds begin to mature in 2020; however, if the bonds are unable to be remarketed they will be refinanced under a separate facility. See Note 6 to Consolidated Financial Statements.

(2) Represents estimated contributions to our pension and other postretirement plans. Actual required contributions are contingent on a number of variables including future investment performance of the plans assets and may differ from these estimates. See Note 7 to Consolidated Financial Statements. Contributions to the U.S. defined benefit plan are based on the projected funded status of the plan including anticipated normal costs, amortization of unfunded liabilities and an 8% expected return on plan assets. With respect to the U.K. defined benefit plan, the Trustees and UES-UK have agreed to a recovery plan that estimates the amount of employer contributions, based on U.K. regulations, necessary to eliminate the funding deficit of the plan over an agreed period.

(3) Represents primarily commitments by one of our Forged and Cast Engineered Products subsidiaries for the purchase of natural gas through 2017 covering approximately 32% of anticipated needs. See Note 11 to Consolidated Financial Statements.

(4) Represents uncertain tax positions. Amount included as Other represents portion for which the period of cash settlement cannot be reasonably estimated. See Note 13 to Consolidated Financial Statements.

With respect to environmental matters, we are currently performing certain remedial actions in connection with the sale of real estate previously owned. Environmental exposures are difficult to assess and estimate for numerous reasons including lack of reliable data, the multiplicity of possible solutions, the years of remedial and monitoring activity required and the identification of new sites. However, we believe the potential

liability for all environmental proceedings of approximately $325 accrued at December 31, 2014 is considered adequate based on information known to date (see Note 18 to Consolidated Financial Statements).

The nature and scope of our business brings us into regular contact with a variety of persons, businesses and government agencies in the ordinary course of business. Consequently, we and certain of our subsidiaries from time to time are named in various legal actions.

Generally, we do not anticipate that our financial condition or liquidity will be materially affected by the costs of known, pending or threatened litigation. However, claims have been asserted alleging personal injury from exposure to asbestos-containing components historically used in some products and there can be no assurance that future claims will not present significantly greater and longer lasting financial exposure than presently contemplated (see Note 17 to Consolidated Financial Statements).

OFF-BALANCE SHEET ARRANGEMENTS

Our off-balance sheet arrangements include operating leases, capital expenditures and purchase obligations disclosed in the contractual obligations table and the letters of credit unrelated to the Industrial Revenue Bonds as discussed in Note 8 to the Consolidated Financial Statements.

EFFECTS OF INFLATION

While inflationary and market pressures on costs are likely to be experienced, it is anticipated that ongoing improvements in manufacturing efficiencies and cost savings efforts will mitigate the effects of inflation on 2015 operating results. The ability to pass on increases in the price of commodities to the customer is contingent upon current market conditions with us potentially having to absorb some portion of the increase. Product pricing for the Forged and Cast Engineered Products segment is reflective of current costs with a majority of orders subject to a variable-index surcharge program which helps to protect the segment and its customers against the volatility in the cost of certain raw materials. Additionally, long-term labor agreements exist at each of the key locations. Although certain of these agreements expire in 2015, we, as is consistent with past practice, will negotiate with the intent to secure mutually beneficial arrangements covering multiple years (see Note 8 to Consolidated Financial Statements). Finally, commitments have been executed for natural gas usage and certain commodities (copper and aluminum) to cover a portion of orders in the backlog (see Note 11 to Consolidated Financial Statements).

APPLICATION OF CRITICAL ACCOUNTING POLICIES

We have identified critical accounting policies that are important to the presentation of our financial condition, changes in financial condition and results of operations and involve the most complex or subjective assessments. Critical accounting policies relate to accounting for pension and other postretirement benefits, assessing recoverability of long-lived assets, litigation, income taxes and stock-based compensation.

Accounting for pension and other postretirement benefits involves estimating the cost of benefits to be provided well into the future and attributing that cost over the time period each employee works. To accomplish this, input from our actuary is evaluated and extensive use is made of assumptions about inflation, long-term rate of return on plan assets, longevity, rates of increases in compensation, employee turnover and discount rates.

The expected long-term rate of return on plan assets is an estimate of average rates of earnings expected to be earned on funds invested or to be invested to provide for the benefits included in the projected benefit obligation. Since these benefits will be paid over many years, the expected long-term rate of return is reflective of current investment returns and investment returns over a longer period. Also, consideration is given to target and actual asset allocations, inflation and real risk-free return. We believe the expected long-term rate of return of 8% for our domestic plan and 5.40% for our foreign plan to be reasonable. Actual returns on plan assets for 2014 and 2013, respectively, approximated 6.93% and 19.22% for our domestic plan and 12.40% and 12.42% for our foreign plan.

The discount rates used in determining future pension obligations and other postretirement benefits for each of our plans are based on rates of return on high-quality fixed-income investments currently available and expected to be available during the period to maturity of pension and other postretirement benefits. High-quality fixed-income investments are defined as those investments which have received one of the two highest ratings given by a recognized rating agency with maturities of 10+ years. We believe the assumed discount rates of 4.10% for our domestic plan, 4.00% for our other postretirement benefits plan and 3.50% for our foreign plan as of December 31, 2014 to be reasonable.

We believe that the amounts recorded in the accompanying consolidated financial statements related to pension and other postretirement benefits are based on appropriate assumptions although actual outcomes could differ. A percentage point decrease in the expected long-term rate of return would increase annual pension expense by approximately $1,900. A 1/4 percentage point decrease in the discount rate would increase projected and accumulated benefit obligations by approximately $10,000. Conversely, an

increase in the expected long-term rate of return would decrease annual pension expense and an increase in the discount rate would decrease projected and accumulated benefit obligations. The actual decrease in the discount rates at December 31, 2014 from December 31, 2013 (from 5.00% to 4.10% for our domestic plans, 5.00% to 4.00% for our other postretirement benefits plan and 4.50% to 3.50% for our foreign plan) increased projected and accumulated benefit obligations and reduced the funded status of the plans by approximately $39,000 as of December 31, 2014. In addition, longevity assumptions used to estimate the life expectancy of plan participants over which plan benefits will be received were revised in the current year. Based on actuarial studies, life expectancies are longer than previously estimated which had the effect of increasing projected and accumulated benefit obligations and reducing the funded status of the plans by approximately $9,000 as of December 31, 2014. See Note 7 to Consolidated Financial Statements.

Property, plant and equipment are reviewed for recoverability whenever events or circumstances indicate the carrying amount of the long-lived assets may not be recoverable. If the undiscounted cash flows generated from the use and eventual disposition of the assets are less than their carrying value, then the asset value may not be fully recoverable potentially resulting in a write-down of the asset value. Estimates of future cash flows are based on expected market conditions over the remaining useful life of the primary asset(s). Accordingly, assumptions are made about pricing, volume and asset-resale values. Actual results may differ from these assumptions.

We believe the amounts recorded in the accompanying consolidated financial statements for property, plant and equipment are recoverable and are not impaired as of December 31, 2014.

Litigation and loss contingency accruals are made when it is determined that it is probable that a liability has been incurred and the amount can be reasonably estimated. Specifically, we and certain of our subsidiaries are involved in various claims and lawsuits incidental to their businesses. In addition, claims have been asserted alleging personal injury from exposure to asbestos-containing components historically used in some products manufactured by certain companies which now operate as divisions of Air & Liquid Systems. To assist us in determining whether an estimate could be made of the potential liability for pending and unasserted future claims for Asbestos Liability along with applicable insurance coverage, and the amounts of any estimates, we hired a nationally-recognized asbestos-liability expert and insurance consultant. Based on their analyses, reserves for probable and reasonably estimable costs of Asbestos Liabilities including defense costs and receivables for the insurance recoveries that are deemed probable have been established. These amounts relied on assumptions which were based on currently known facts and strategy.

In 2014, we undertook another review of our Asbestos Liability claims, defense costs and the likelihood for insurance recoveries. Key variables in these assumptions are summarized in Note 17 to the Consolidated Financial Statements and include the number and type of new claims to be filed each year, the average cost of disposing of each new claim, average annual defense costs, the resolution of coverage issues with insurance carriers, and the solvency risk with respect to the relevant insurance carriers. Other factors that may affect our Asbestos Liability and ability to recover under our insurance policies include uncertainties surrounding the litigation process from jurisdiction to jurisdiction and from case to case, reforms that may be made by state and federal courts, and the passage of state or federal tort reform legislation. Actual expenses or insurance recoveries could be significantly higher or lower than those recorded if assumptions used in the calculations vary significantly from actual results.

We intend to evaluate our estimated Asbestos Liability and related insurance receivables as well as the underlying assumptions on a regular basis to determine whether any adjustments to the estimates are required. Due to the uncertainties surrounding asbestos litigation and insurance, these regular reviews may result in the incurrence of future charges; however, we are currently unable to estimate such future charges. Adjustments, if any, to our estimate of our recorded Asbestos Liability and/or insurance receivables could be material to our operating results for the periods in which the adjustments to the liability or receivable are recorded, and to our liquidity and consolidated financial position.

Accounting for income taxes includes our evaluation of the underlying accounts, permanent and temporary differences, our tax filing positions and interpretations of existing tax law. A valuation allowance is recorded against deferred income tax assets to reduce them to the amount that is more likely than not to be realized. In doing so, assumptions are made about the future profitability of our operations and the nature of that profitability. Actual results may differ from these assumptions. If we determined we would not be able to realize all or part of the deferred income tax assets in the future, an adjustment to the valuation allowance would be established resulting in a charge to net (loss) income. Likewise, if we determined we would be able to realize deferred income tax assets in excess of the net amount recorded, we would release a portion of the existing valuation allowance resulting in a credit to net (loss) income. As of December 31, 2014, we have deferred income tax assets approximating $61,231 and a valuation allowance of $3,254.

We do not recognize a tax benefit in the financial statements related to a tax position taken or expected to be taken in a tax return unless it is more likely than not that the tax authorities will sustain the tax position solely on the basis of the position s technical merits. Consideration is given primarily to legislation and statutes, legislative intent, regulations, rulings and case law as well as their applicability to the facts and circumstances of the tax position when assessing the sustainability of the tax position. In the event a tax position no longer meets the more likely than not criteria, we would reverse the tax benefit by recognizing a liability and recording a charge to earnings. Conversely, if we subsequently determined that a tax position meets the more likely than not criteria, we would recognize the tax benefit by reducing the liability and recording a credit to earnings. As of December 31, 2014, based on information known to date, we believe the amount of unrecognized tax benefits of $52 for tax positions taken or expected to be taken in a tax return which may be challenged by the tax authorities is adequate.

See Note 13 to the Consolidated Financial Statements.

Accounting for stock-based compensation is based on the fair value of the stock options on the date of grant. The fair value is affected by our stock price and various assumptions including assumptions about the expected term of the options, forfeitures, volatility, dividends and the risk-free interest rate. If the fair value of granted stock options was re-determined, on a date other than the date of grant, the resulting fair value would differ. Accordingly, the fair value of stock options granted to date is not indicative of the fair value of stock options to be granted in the future (see Note 9 to Consolidated Financial Statements).

RECENTLY IMPLEMENTED ACCOUNTING PRONOUNCEMENTS

In July 2013, the Financial Accounting Standards Board (FASB) issued ASU 2013-11, *Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists*, which requires, under certain circumstances, an unrecognized tax benefit, or a portion of an unrecognized tax benefit, to be presented in the financial statements as a reduction to a deferred income tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. The guidance became effective on January 1, 2014 but did not affect our balance sheet, operating results or liquidity.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers*, which provides a common revenue standard for U.S. GAAP and IFRS. The guidance establishes principles for reporting information about the nature, amount, timing and uncertainty of revenue and cash flows arising from a company s contracts with customers. It requires companies to apply a five-step model when recognizing revenue relating to the transfer of goods or services to customers in an amount that reflects the consideration that the company expects to be entitled to receive for those goods and services. It also requires comprehensive disclosures regarding revenue recognition. The guidance becomes effective January 1, 2017. We are currently evaluating the impact that the guidance will have on our financial position, operating results and liquidity.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We view our primary market risk exposures to be changes in foreign currency exchange rates and commodity prices. To manage certain foreign currency exchange exposures, our policy is to hedge a portion of our foreign currency denominated sales and receivables, primarily U.S. sales denominated in euros and U.K. sales denominated in U.S. dollars and euros. Although strengthening of the U.S. dollar could result in a lower volume of exports from the United States and at reduced margins, exports of our foreign operation may increase and gross margins might improve. Additionally, strengthening of the British pound could result in a lower volume of exports from the United Kingdom and at reduced margins; however, exports for our domestic operations may increase and gross margins might improve. A weakening of the euro, as compared to the U.S. dollar and British pound, could result in a lower volume of exports and at reduced margins.

To reduce the effect of price changes for certain of our raw materials and energy, we enter into contracts for particular commodities (copper and aluminum) and purchase a portion of our energy usage in advance. Based on estimated annual purchases, a 10% fluctuation in commodity prices (including electricity, natural gas, steel scrap and ferroalloys) would have impacted 2014 and 2013 by approximately $7,500 and $8,500, respectively. There is no guarantee that fluctuations in commodity prices will be limited to 10%. The ability to pass on increases in the price of commodities to the customer is contingent upon current market conditions with us

potentially having to absorb some portion of such increase. However, a sales price surcharge mechanism is in place with a majority of the customers of our Forged and Cast Engineered Products segment which helps to protect us against the volatility in the cost of certain raw materials.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(in thousands, except share and per share amounts)

Description of Business

Ampco-Pittsburgh Corporation (the Corporation) operates in two business segments. The *Forged and Cast Engineered Products* segment consists of Union Electric Steel Corporation (Union Electric Steel or UES) and Union Electric Steel UK Limited (UES-UK). Union Electric Steel produces ingot and forged products that service a wide variety of industries globally. It specializes in the production of forged hardened steel rolls used in cold rolling by producers of steel, aluminum and other metals throughout the world. In addition, it produces ingot and open die forged products which are used in the gas and oil industry and the aluminum and plastic extrusion industries. Headquartered in Carnegie, Pennsylvania with three manufacturing facilities in Pennsylvania and one in Indiana, UES is one of the largest producers of forged hardened steel rolls in the world. UES-UK produces cast rolls for hot and cold strip mills, medium/heavy section mills and plate mills in a variety of iron and steel qualities. It is located in Gateshead, England and is a major supplier of cast rolls to the metalworking industry worldwide. The *Air and Liquid Processing* segment includes Aerofin, Buffalo Air Handling and Buffalo Pumps, all divisions of Air & Liquid Systems Corporation (Air and Liquid), a wholly-owned subsidiary of the Corporation. Aerofin produces custom-engineered finned tube heat exchange coils and related heat transfer products for a variety of industries including fossil fuel and nuclear power generation, automotive, industrial process and HVAC. Buffalo Air Handling produces large custom-designed air handling systems for commercial, institutional and industrial building markets. Buffalo Pumps manufactures centrifugal pumps for the marine defense, refrigeration and power generation industries. The segment has operations in Virginia and New York with headquarters in Pennsylvania. The segment distributes a significant portion of its products through a common independent group of sales offices located throughout the United States and Canada.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

The Corporation s accounting policies conform to accounting principles generally accepted in the United States of America. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant items subject to estimates and assumptions include valuing the assets and obligations related to employee benefit plans, assessing the carrying value of long-lived assets, accounting for loss contingencies associated with claims and lawsuits, accounting for income taxes and estimating the fair value of stock options granted. Actual results could differ from those estimates. A summary of the significant accounting policies followed by the Corporation is presented below. Certain amounts for the preceding periods have been reclassified for comparative purposes.

Consolidation

All subsidiaries are wholly owned and are included in the consolidated financial statements of the Corporation. Intercompany accounts and transactions are eliminated. Investments in joint ventures whereby the Corporation owns 20% to 50% of the voting stock and has the ability to exercise significant influence over the operating and financial policies of the joint venture are accounted for using the equity method of accounting. Investments in joint ventures whereby the Corporation does not have the ability to exercise significant influence over the operating and financial policies of the joint venture are accounted for using the cost method of accounting. Investments in joint ventures are reviewed for impairment whenever events or circumstances indicate the carrying amount of the investment may not be recoverable. If the estimated fair value of the investment is less than the carrying amount and such decline is determined to be other than temporary, then the investment may not be fully recoverable potentially resulting in a write-down of the investment value.

Cash and Cash Equivalents

Securities with purchased original maturities of three months or less are considered to be cash equivalents. The Corporation maintains cash and cash equivalents at various financial institutions which may exceed federally insured amounts.

Inventories

Inventories are valued at the lower of cost or market. Cost includes the cost of raw materials, direct labor and overhead for those items manufactured but not yet sold or for which title has not yet transferred. Fixed production overhead is allocated to inventories based on normal capacity of the production facilities. In periods of abnormally high production, the amount of fixed overhead allocated to each unit of production is decreased so that inventories are not measured above cost. The amount of fixed overhead allocated to inventories

is not increased as a consequence of abnormally low production or idle plant. Costs for abnormal amounts of spoilage, handling costs and freight costs are charged to expense when incurred. Cost of domestic raw materials, work-in-process and finished goods inventories is primarily determined by the last-in, first-out (LIFO) method. Cost of domestic supplies and foreign inventories is determined primarily by the first-in, first-out (FIFO) method.

Property, Plant and Equipment

Property, plant and equipment are recorded at cost with depreciation computed using the straight-line method over the following estimated useful lives: land improvements 15 to 20 years, buildings 25 to 50 years and machinery and equipment 3 to 25 years. Expenditures that extend economic useful lives are capitalized. Routine maintenance is charged to expense. Gains or losses are recognized on retirements or disposals. Property, plant and equipment are reviewed for impairment whenever events or circumstances indicate the carrying amount of the asset may not be recoverable. If the undiscounted cash flows generated from the use and eventual disposition of the assets are less than their carrying value, then the asset value may not be fully recoverable potentially resulting in a write-down of the asset value. Estimates of future cash flows are based on expected market conditions over the remaining useful life of the primary asset(s). Proceeds from government grants are recorded as a reduction in the purchase price of the underlying assets and amortized against depreciation over the lives of the related assets.

Product Warranty

Provisions for product warranties are recognized at the time the underlying sale is recorded. The provision is based on historical experience as a percentage of sales adjusted for potential claims when a liability is probable and for known claims.

Employee Benefit Plans

Funded Status

If the fair value of the plan assets exceeds the projected benefit obligation, the over-funded projected benefit obligation is recognized as an asset (prepaid pensions) on the consolidated balance sheet. Conversely, if the projected benefit obligation exceeds the fair value of the plan assets, the under-funded projected benefit obligation is recognized as a liability (employee benefit obligations) on the consolidated balance sheet. Gains and losses arising from the difference between actuarial assumptions and actual experience and unamortized prior service costs are recorded as a separate component of accumulated other comprehensive loss and presented net of income tax.

Net Periodic Pension and Other Postretirement Costs

Net periodic pension and other postretirement costs includes service cost, interest cost, expected rate of return on the market-related value of plan assets, amortization of prior service costs and recognized actuarial gains or losses. When actuarial gains or losses exceed 10% of the greater of the projected benefit obligation or the market-related value of plan assets, they are amortized to net periodic pension and other postretirement costs over the average remaining service period of employees expected to receive benefits under the plan. When the actuarial gains or losses are less than 10% of the greater of the projected benefit obligation or the market-related value of plan assets, they are included in net periodic pension and other postretirement costs indirectly as a result of lower/higher interest costs arising from a decrease/increase in the projected benefit obligation. The market-related value of plan assets is determined using a five-year moving average which recognizes 20% of unrealized gains and losses each year.

Other Comprehensive Income (Loss)

Other comprehensive income (loss) includes changes in assets and liabilities from non-owner sources including foreign currency translation adjustments, unamortized prior service costs and unrecognized actuarial gains and losses associated with employee benefit plans, unrealized holding gains and losses on securities designated as available for sale and changes in the fair value of derivatives designated and effective as cash flow hedges. Certain components of other comprehensive income (loss) are presented net of income tax. Foreign currency translation adjustments exclude the effect of income tax since earnings of non-U.S. subsidiaries are deemed to be reinvested for an indefinite period of time.

Reclassification adjustments are amounts which are realized during the year and, accordingly, are deducted from other comprehensive income (loss) in the period in which they are included in net income (loss) or when a transaction no longer qualifies as a cash flow hedge. Foreign currency translation adjustments are included in net income (loss) upon sale or upon complete or substantially complete liquidation of an investment in a foreign entity. Unamortized prior service costs and unrecognized actuarial gains and losses

associated with employee benefit plans are included in net income (loss) either over the average remaining service period of employees expected to receive benefits under the plans or indirectly as a result of lower/higher interest costs arising from a decrease/increase in the projected benefit obligation. Unrealized holding gains and losses on securities are included in net income (loss) when the underlying security is sold. Changes in the fair value of derivatives are included in net income (loss) when the projected sale occurs or, if a foreign currency purchase contract, over the estimated useful life of the underlying asset.

Revenue Recognition

Revenue from sales is recognized when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable, and collectability is reasonably assured. Persuasive evidence of an arrangement identifies the final understanding between the parties as to the specific nature and terms of the agreed-upon transaction that creates enforceable obligations. It can be in the form of an executed purchase order from the customer, sales agreement issued by the Corporation or a similar arrangement deemed to be normal and customary business practice for that particular customer or class of customer (collectively, a sales agreement).

Delivery and performance is considered to have occurred when the customer has taken title and assumed the risks and rewards of ownership of the product. Typically this occurs when the product is shipped to the customer (i.e., FOB shipping point), delivered to the customer (i.e., FOB destination), or, for foreign sales, in accordance with trading guidelines known as Incoterms. Incoterms are standard trade definitions used in international contracts and are developed, maintained and promoted by the ICC Commission on Commercial Law and Practice.

The sales price required to be paid by the customer is fixed or determinable from the sales agreement. It is not subject to refund or adjustment except for a variable-index surcharge provision which increases or decreases, as applicable, the selling price of a rolling mill roll for corresponding changes in the published index cost of certain raw materials. The variable-index surcharge is recognized as revenue when the corresponding revenue for the inventory is recognized. Likelihood of collectability is assessed prior to acceptance of an order. There are no customer-acceptance provisions other than customer inspection and testing prior to shipment. Post-shipment obligations are insignificant.

Amounts billed to the customer for shipping and handling are recorded within net sales and the related costs are recorded within costs of products sold (excluding depreciation). Amounts billed for taxes assessed by various government authorities (e.g. sales tax, value-added tax, etc.) are excluded from the determination of net income and instead are recorded as a liability until remitted to the government authority.

Foreign Currency Translation

Assets and liabilities of the Corporation s foreign operations are translated at year-end exchange rates and the statements of operations are translated at the average exchange rates for the year. Gains or losses resulting from translating foreign currency financial statements are accumulated as a separate component of accumulated other comprehensive loss until the entity is sold or substantially liquidated.

Derivative Instruments

Derivative instruments which include forward exchange (for foreign currency sales and purchases) and futures contracts are recorded on the consolidated balance sheet as either an asset or a liability measured at their fair value. The accounting for changes in the fair value of a derivative depends on the use of the derivative. To the extent that a derivative is designated and effective as a cash flow hedge of an exposure to future changes in value, the change in the fair value of the derivative is deferred in accumulated other comprehensive loss. Any portion considered to be ineffective, including that arising from the unlikelihood of an anticipated transaction to occur, is reported as a component of earnings (other income/expense) immediately.

Upon occurrence of the anticipated sale, the foreign currency sales contract designated and effective as a cash flow hedge is de-designated as a fair value hedge and the change in fair value previously deferred in accumulated other comprehensive loss is reclassified to earnings (net sales) with subsequent changes in fair value recorded as a component of earnings (other income/expense). Upon occurrence of the anticipated purchase, the foreign currency purchase contract is settled and the change in fair value deferred in accumulated other comprehensive loss is reclassified to earnings (depreciation expense) over the life of the underlying assets. Upon settlement of a futures contract, the change in fair value deferred in accumulated other comprehensive loss is reclassified to earnings

Table of Contents

(costs of products sold, excluding depreciation) when the corresponding inventory is sold and revenue is recognized. To the extent that a derivative is designated and effective as a hedge of an exposure to changes in fair value, the change in the derivative s fair value will be offset in the statement of operations by the change in the fair value of the item being hedged and is recorded as a component of earnings (other income/expense). Cash flows associated with the derivative instruments are recorded as a component of operating activities on the consolidated statement of cash flows.

The Corporation does not enter into derivative transactions for speculative purposes and, therefore, holds no derivative instruments for trading purposes.

Fair Value

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. A hierarchy of inputs is used to determine fair value measurements with three levels. Level 1 inputs are quoted prices in active markets for identical assets or liabilities and are considered the most reliable evidence of fair value. Level 2 inputs are observable prices that are not quoted on active exchanges. Level 3 inputs are unobservable inputs used for measuring the fair value of assets or liabilities.

Stock-Based Compensation

Compensation expense is recognized for stock-based compensation awards over the requisite service period based on the estimated fair value of the award as of the date of grant calculated using the Black-Scholes option-pricing model. Fair value is affected by the Corporation s stock price and various assumptions including assumptions about the expected term of the options, forfeitures, volatility, dividends and the risk-free interest rate. The expected life of the options is estimated by considering the historical exercise experience of the employee group and the vesting period of the awards. The expected forfeiture rate is estimated based on the historical forfeiture rate of the employee group. The expected volatility is based on the historical prices of the Corporation s stock and dividend amounts over the expected life of the stock options. The expected dividend yield is based on a dividend amount giving consideration to the Corporation s past pattern and future expectations of dividends over the expected life of the options. The risk-free interest rate is equal to the yield available on U.S. Treasury zero-coupon issues at the date of grant with a remaining term equal to the expected life of the options.

Legal Costs

Legal costs expected to be incurred in connection with loss contingencies are accrued when such costs are probable and estimable.

Income Taxes

Income taxes are recognized during the year in which transactions enter into the determination of financial statement income. Deferred income tax assets and liabilities are recognized for the future tax consequences of temporary differences between the book carrying amount and the tax basis of assets and liabilities including net operating loss carryforwards. Unremitted earnings of the Corporation s non-U.S. subsidiaries and affiliates are deemed to be permanently reinvested and, accordingly, no deferred income tax liability is recorded. A valuation allowance is provided against a deferred income tax asset when it is more likely than not the asset will not be realized. Similarly, if a determination is made that it is more likely than not the deferred income tax asset will be realized, the related valuation allowance would be reduced and a benefit to earnings would be recorded. Penalties and interest are recognized as a component of the income tax provision.

Tax benefits are recognized in the financial statements for tax positions taken or expected to be taken in a tax return when it is more likely than not that the tax authorities will sustain the tax position solely on the basis of the position s technical merits. Consideration is given primarily to legislation and statutes, legislative intent, regulations, rulings and case law as well as their applicability to the facts and circumstances of the tax position when assessing the sustainability of the tax position. In the event a tax position no longer meets the more likely than not criteria, the tax benefit is reversed by recognizing a liability and recording a charge to earnings. Conversely, if a tax position subsequently meets the more likely than not criteria, a tax benefit would be recognized by reducing the liability and recording a credit to earnings.

Table of Contents

Earnings Per Common Share

Basic earnings per common share is computed by dividing net income (loss) by the weighted average number of common shares outstanding for the period. The computation of diluted earnings per common share is similar to basic earnings per common share except that the denominator is increased to include the dilutive effect of the net additional common shares that would have been outstanding assuming exercise of outstanding stock options, calculated using the treasury stock method. The computation of diluted earnings per share would not assume the exercise of outstanding stock options if the effect on earnings per common share would be antidilutive. Similarly, the computation of diluted earnings per share would not assume the exercise of outstanding stock options if the Corporation incurred a net loss since the effect on earnings per common share would be antidilutive. The weighted average number of common shares outstanding assuming exercise of dilutive stock options was 10,404,744 for 2014, 10,406,478 for 2013 and 10,389,678 for 2012. Weighted-average outstanding stock options excluded from the diluted earnings per common share calculation, since the effect would have been antidilutive, were 1,242,545 for 2014, 781,325 for 2013 and 671,977 for 2012.

Recently Implemented Accounting Pronouncements

In July 2013, the Financial Accounting Standards Board (FASB) issued ASU 2013-11, *Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists,* which requires, under certain circumstances, an unrecognized tax benefit, or a portion of an unrecognized tax benefit, to be presented in the financial statements as a reduction to a deferred income tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. The guidance became effective January 1, 2014 but did not affect the balance sheet, operating results or liquidity of the Corporation.

Recently Issued Accounting Pronouncements

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers*, which provides a common revenue standard for U.S. GAAP and IFRS. The guidance establishes principles for reporting information about the nature, amount, timing and uncertainty of revenue and cash flows arising from a company s contracts with customers. It requires companies to apply a five-step model when recognizing revenue relating to the transfer of goods or services to customers in an amount that reflects the consideration that the company expects to be entitled to receive for those goods and services. It also requires comprehensive disclosures regarding revenue recognition. The guidance becomes effective January 1, 2017. The Corporation is currently evaluating the impact that the guidance will have on its financial position, operating results and liquidity.

NOTE 2 INVESTMENTS IN JOINT VENTURES:

In 2007, a subsidiary of UES entered into an agreement with Maanshan Iron & Steel Company Limited (Maanshan) to form a joint venture company in China. UES owns 49% of the joint venture company and Maanshan owns 51%. Both companies contributed cash for their respective interests (which equated to $14,700 for UES). The joint venture company principally manufactures and sells forged backup rolling mill rolls of a size and weight currently not able to be produced by UES. A significant portion of its sales have been to Maanshan or entities controlled by Maanshan. Additionally, the majority of its raw materials are purchased from Maanshan or entities controlled by Maanshan. UES has not guaranteed any of the obligations of the joint venture; accordingly, its maximum exposure of loss is limited to its investment. Since UES is the minority shareholder and allocation of earnings and voting rights are proportional to ownership interests, UES is not considered the primary beneficiary and, accordingly, accounts for its 49% interest in the joint venture under the equity method of accounting.

Losses of the joint venture approximated $(2,165), $(4,203) and $(3,254) for the twelve month period ended September 30, 2014, 2013 and 2012, respectively, of which the Corporation has recognized its share (49%) in its consolidated statements of operations. The joint venture has been adversely impacted by the global economy, with significantly depressed pricing, reduced demand and excess roll inventories of its potential customer base in China - all hindering profitability. Losses have been incurred since 2009, in which we have recognized our share (49%) in our consolidated statements of operations, and are expected to continue in 2015. Additionally, the overall financial strength of the joint venture continues to deteriorate with a greater reliance on the 51% partner or entities controlled by the 51% partner to provide financing and working capital. In the fourth quarter of 2013, the Corporation, with the help of outside consultants and appraisers, concluded that the estimated fair value of its investment was less than its carrying amount and that the decline was other than temporary. Accordingly, the Corporation recognized an impairment charge of $6,407 reducing the carrying amount of its investment to $3,670. The carrying amount of the investment at December 31, 2014 is $2,574. The Corporation will continue to monitor the carrying value of the investment to determine if additional impairment charges are necessary.

Table of Contents

Assets, liabilities and shareholders equity of the joint venture as of September 30, 2014 and 2013 are summarized below. The differences between the carrying amount of the investment and the value of the underlying equity in the net assets of the joint venture relates primarily to the impairment charge recognized in 2013 and elimination of 49% of the profit (intercompany profit) on the sale of technology from UES to the joint venture in earlier years which will be recognized when realized outside of the controlled group.

		2014		2013
Assets:				
Current assets (includes receivables from related parties of $524 and $636, respectively)	**$**	**10,743**	$	9,431
Noncurrent assets		**32,948**		36,840
	$	**43,691**	$	46,271
Liabilities and Shareholders Equity:				
Current liabilities (include liabilities to related parties of $22,039 and $19,278, respectively)	**$**	**22,156**	$	22,498
Shareholders equity		**21,535**		23,773
	$	**43,691**	$	46,271

The Corporation also has a 25% investment in a Chinese cast roll joint venture company which is recorded at cost, or $1,340. The Corporation does not participate in the management or daily operation of the joint venture company, has not guaranteed any of its obligations and has no ongoing responsibilities to it. Dividends may be declared by the Board of Directors of the joint venture company after allocation of after-tax profits to various funds equal to the minimum amount required under Chinese law. No dividends were declared or received in 2014, 2013 or 2012.

NOTE 3 INVENTORIES:

		2014		2013
Raw materials	**$**	**15,076**	$	17,411
Work-in-progress		**20,544**		29,322
Finished goods		**8,201**		5,894
Supplies		**10,892**		11,502
	$	**54,713**	$	64,129

At December 31, 2014 and 2013, approximately 52% and 56%, respectively, of the inventories was valued using the LIFO method. The LIFO reserve approximated $(23,299) and $(26,404) at December 31, 2014 and 2013, respectively. During each of the years, inventory quantities decreased resulting in a liquidation of LIFO layers which were at lower costs. The effect of the liquidations was to decrease costs of products sold (excluding depreciation) by approximately $2,196, $1,803 and $277 for 2014, 2013 and 2012, respectively, which reduced net loss by approximately $1,427 or $0.14 per common share for 2014 and increased net income by approximately $1,172 or $0.11 per common share for 2013 and $180 or $0.02 per common share for 2012.

NOTE 4 PROPERTY, PLANT AND EQUIPMENT:

		2014		2013
Land and land improvements	**$**	**5,209**	$	5,122
Buildings		**44,610**		44,116
Machinery and equipment		**259,406**		250,936
Construction-in-process		**2,374**		5,315
Other		**8,716**		8,711
		320,315		314,200
Accumulated depreciation		**(170,476)**		(162,912)
	$	**149,839**	$	151,288

Land and buildings of UES-UK equal to approximately $3,150 (£2,022) at December 31, 2014 are held as collateral by the trustees of the UES-UK defined benefit pension plan (see Note 7).

Table of Contents

NOTE 5 OTHER CURRENT LIABILITIES:

	2014	2013
Customer-related liabilities	**$ 11,539**	$ 10,610
Income taxes payable	**1,717**	1,063
Accrued sales commissions	**1,623**	1,648
Other	**7,329**	8,399
	$ 22,208	$ 21,720

Customer-related liabilities include liabilities for product warranty claims and deposits received on future orders. The following summarizes changes in the liability for product warranty claims for the year ended December 31:

	2014	2013	2012
Balance at the beginning of the year	**$ 6,899**	$ 6,625	$ 5,498
Satisfaction of warranty claims	**(2,335)**	(1,908)	(2,411)
Provision for warranty claims	**2,300**	2,112	3,399
Other, primarily impact from changes in foreign currency exchange rates	**(192)**	70	139
Balance at the end of the year	**$ 6,672**	$ 6,899	$ 6,625

NOTE 6 BORROWING ARRANGEMENTS:

The Corporation maintains short-term lines of credit of approximately $9,200 (including £3,000 in the United Kingdom and 400 in Belgium). No amounts were outstanding under these lines of credit as of December 31, 2014 and 2013.

As of December 31, 2014, the Corporation had the following Industrial Revenue Bonds (IRBs) outstanding: (1) $4,120 tax-exempt IRB maturing in 2020, interest at a floating rate which averaged 0.10% during the current year; (2) $7,116 taxable IRB maturing in 2027, interest at a floating rate which averaged 0.15% during the current year and (3) $2,075 tax-exempt IRB maturing in 2029, interest at a floating rate which averaged 0.12% during the current year. The IRBs are remarketed periodically at which time interest rates are reset. The IRBs are secured by letters of credit of equivalent amounts. The letter of credit agreements require, among other things, maintenance of a minimum net worth and prohibit a leverage ratio in excess of a stipulated amount. The Corporation was in compliance with the applicable bank covenants as of December 31, 2014.

Despite principal not beginning to become due until 2020, the IRBs can be put back to the Corporation on short notice if, although considered remote by the Corporation and its bankers, the bonds cannot be remarketed. At that time, the bondholders can seek reimbursement from the letters of credit. As provided by a separate agreement with the Corporation s bank, funding of the letters of credit, if so drawn against, would be satisfied with equal and immediate borrowings under a separate IRB Standby Letter of Credit facility (the Facility). The Facility expires on August 1, 2016 and is expected to be renewed annually to provide for a continual term of greater than one year. However, the Facility includes language regarding material adverse change to the Corporation s business which could result in it being called or cancelled at the bank s discretion; accordingly, the IRBs remain classified as a current liability. The availability under the Facility is $13,566, equal to the letters of credit, and as of December 31, 2014 no amounts were outstanding.

NOTE 7 PENSION AND OTHER POSTRETIREMENT BENEFITS:

Pension Plans

The Corporation has a qualified defined benefit pension plan covering substantially all of its U.S. employees. Generally, benefits are based on years of service multiplied by either a fixed amount or a percentage of compensation. During 2014, the plan was amended to permit lump sum distributions to participants, deferred vested participants and deferred beneficiaries with a lump sum value under a prescribed threshold which resulted in lump sum payments totaling $9,304. The defined benefit pension plan is covered by the Employee Retirement Income Security Act of 1974 (ERISA); accordingly, the Corporation s policy is to fund at least the minimum actuarially computed annual contribution required under ERISA. Although no minimum contributions were required for any of the three years, voluntary contributions of $5,000 were made in 2013. Additionally, due to voluntary contributions and relief provided by *Moving Ahead for Progress in the 21st Century* (MAP-21) and, subsequently, the *Highway and Transportation Funding Act of 2014*

33

Table of Contents

(HAFTA), which reduces funding requirements for single-employer defined benefit plans, no minimum contributions are required for 2015; however, voluntary contributions may be made. Estimated benefit payments for subsequent years are $9,019 for 2015, $9,413 for 2016, $9,885 for 2017, $10,264 for 2018, 10,640 for 2019 and $58,457 for 2020 2024. The fair value of the plan s assets as of December 31, 2014 and 2013 approximated $157,048 and $164,085, respectively, in comparison to accumulated benefit obligations of $186,870 and $167,723 for the same periods.

Employees of UES-UK participate in a defined benefit pension plan that was curtailed effective December 31, 2004 and replaced with a defined contribution pension plan. The UES-UK plans are non-U.S. plans and therefore are not covered by ERISA. Instead, the Trustees and UES-UK have agreed to a recovery plan that estimates the amount of employer contributions at £1,123 annually through October 2021, based on U.K. regulations, necessary to eliminate the funding deficit of the plan with such estimates subject to change based on the future investment performance of the plan s assets. The U.S. dollar equivalent of employer contributions to the defined benefit pension plan approximated $1,849, $1,764 and $1,786 in 2014, 2013 and 2012, respectively, and are expected to approximate $1,750 in 2015. The fair value of the plan s assets as of December 31, 2014 and 2013 approximated $50,533 (£32,437) and $48,536 (£29,315), respectively, in comparison to accumulated benefit obligations of $70,523 (£45,268) and $60,830 (£36,740) for the same periods. Estimated benefit payments for subsequent years are $1,622 for 2015, $1,529 for 2016, $2,144 for 2017, $1,638 for 2018, $2,661 for 2019 and $14,407 for 2020 2024. Contributions to the defined contribution pension plan approximated $407, $316 and $311 in 2014, 2013 and 2012, respectively, and are expected to approximate $412 in 2015.

The Corporation also maintains nonqualified defined benefit pension plans for selected executives in addition to the benefits provided under the Corporation s qualified defined benefit pension plan. The objectives of the nonqualified plans are to provide supplemental retirement benefits or restore benefits lost due to limitations set by the Internal Revenue Service. The assets of the nonqualified plans are held in a grantor tax trust known as a Rabbi trust and are subject to claims of the Corporation s creditors, but otherwise must be used only for purposes of providing benefits under the plans. No contributions were made to the trust in 2012 2014 and none are expected in 2015. The fair market value of the trust at December 31, 2014 and 2013, which is included in other noncurrent assets, was $4,280 and $4,092, respectively. Changes in the fair market value of the trust are recorded as a component of other comprehensive income (loss). The plan is treated as a non-funded pension plan for financial reporting purposes. Accumulated benefit obligations approximated $4,294 and $2,794 at December 31, 2014 and 2013, respectively. Estimated benefit payments for subsequent years, which would represent employer contributions, are approximately $74 for 2015, $95 for 2016, $119 for 2017, $418 for 2018, $425 for 2019 and $2,212 for 2020 2024.

Employees at one location participate in a multi-employer plan, *I.A.M. National Pension Fund,* in lieu of the Corporation s defined benefit pension plan. A multi-employer plan generally receives contributions from two or more unrelated employers pursuant to one or more collective bargaining agreements. The assets contributed by one employer may be used to fund the benefits provided to employees of other employers in the plan because the plan assets, once contributed, are not restricted to individual employers. The latest report of summary plan information (for the 2013 plan year) provided by I.A.M. National Pension Fund indicates:

- More than 1,750 employer locations contribute to the plan
- Approximately 275,000 employees participate in the plan
- Assets of nearly $10.5 billion and a funded status in excess of 100%.

Less than 100 of the Corporation s employees participate in the plan and contributions are based on a rate per hour. The Corporation s contributions to the plan equaled $233, $230 and $241 in 2014, 2013 and 2012, respectively, and represent less than five percent of total contributions to the plan by all contributing employers. Contributions are expected to approximate $267 in 2015.

Other Postretirement Benefits

The Corporation provides postretirement health care benefits principally to the bargaining groups of one subsidiary. The plan covers participants and their spouses and/or dependents who retire under the existing pension plan on other than a deferred vested basis and at the time of retirement have also rendered 15 or more years of continuous service irrespective of age. During the year, the plan was modified. Effective January 1, 2015, existing coverage for the bargaining groups will be replaced with monthly reimbursements. The plan change resulted in a remeasurement of the plan liability as of May 1, 2014, reducing the liability by approximately $8,914. Retiree life insurance continues to be provided to substantially all retirees. The Corporation also provides health care and life insurance benefits to former employees of certain discontinued operations. This obligation had been estimated and provided for at the

time of disposal. The Corporation s postretirement health care and life insurance plans are not funded or subject to any minimum regulatory funding requirements. Estimated benefit payments for subsequent years, which would represent employer contributions, are approximately $795 for 2015, $785 for 2016, $788 for 2017, $801 for 2018, $802 for 2019, and $4,402 for 2020 2024.

Reconciliations

The following provides a reconciliation of projected benefit obligations, plan assets, the funded status of the plans and the amounts recognized in the consolidated balance sheets for the Corporation s defined benefit plans calculated using a measurement date as of the end of the respective years.

	U.S. Pension Benefits[a]		Foreign Pension Benefits		Other Postretirement Benefits	
	2014	2013	**2014**	2013	**2014**	2013

(a) Recorded as a current liability in the consolidated balance sheet.
(b) Recorded as a noncurrent liability in the consolidated balance sheet.
(c) Amounts are pre-tax.

Amounts included in accumulated other comprehensive loss as of December 31, 2014 expected to be recognized in net periodic pension and other postretirement costs in 2015 include:

	U.S. Pension Benefits	Foreign Pension Benefits	Other Postretirement Benefits
Net actuarial loss	$ 5,591	$ 911	$ 233
Prior service cost	551	0	(672)
	$ 6,142	**$ 911**	**$ (439)**

Investment Policies and Strategies

The investment policies and strategies are determined and monitored by the Investment Committee of the Board of Directors for the U.S. pension plan and by the Trustees (as appointed by UES-UK and the employees of UES-UK) for the foreign pension plan, each of whom employ their own investment managers to manage the plan s assets in accordance with the policy guidelines. Pension assets are invested with the objective of maximizing long-term returns while minimizing material losses to meet future benefit obligations as they become due. Investments in equity securities are primarily in common stocks of publicly-traded U.S. and international companies across a broad spectrum of industry sectors. Investments in fixed-income securities are principally A-rated or better bonds with maturities of less than ten years, preferred stocks and convertible bonds. The Corporation believes there are no significant concentrations of risk associated with the Plans assets.

Attempts to minimize risk include allowing temporary changes to the allocation mix in response to market conditions, diversifying investments among asset categories (e.g., equity securities, fixed-income securities, alternative investments, cash and cash equivalents) and within these asset categories (e.g., economic sector, industry, geographic distribution, size) and consulting with independent financial and legal counsels to assure that the investments and their expected returns and risks are consistent with the goals of the Investment Committee or Trustees.

With respect to the U.S. pension plan, the following investments are prohibited unless otherwise approved by the Investment Committee: stock of the Corporation, futures and options except for hedging purposes, unregistered or restricted stock, warrants, margin trading, short-selling, real estate excluding public or real estate partnerships, and commodities including art, jewelry and gold. The foreign pension plan invests in specific funds. Any investments other than those specifically identified would be considered prohibited.

Table of Contents

The following summarizes target asset allocations (within +/-5% considered acceptable) and major asset categories. Certain investments are classified differently for target asset allocation purposes and external reporting purposes.

	U.S. Pension Benefits			Foreign Pension Benefits		
	Target Allocation	**Percentage of Plan Assets**		**Target Allocation**	**Percentage of Plan Assets**	
	Dec. 31, 2014	**2014**	2013	**Dec. 31, 2014**	**2014**	2013

Alternative Investments	**15%**	**16%**	15%	**21%**	**21%**	23%
Other (primarily cash and cash equivalents)	**5%**	**2%**	1%	**0%**	**0%**	0%

Fair Value Measurement of Plan Assets

Equity securities and mutual funds are actively traded on exchanges and price quotes for these investments are readily available. Similarly, corporate debt and preferred securities consist of fixed-income securities of U.S. and U.K. corporations and price quotes for these investments are readily available. Common collective trust and commingled funds are not traded publicly, but the underlying assets (such as stocks and bonds) held in these funds are traded on active markets and the prices for the underlying assets are readily observable. For securities not actively traded, the fair value may be based on third-party appraisals, discounted cash flow analysis, benchmark yields and inputs that are currently observable in markets for similar securities.

Investment Strategies

The significant investment strategies of the various funds are summarized below.

Fund	Investment Strategy	Primary Investment Objective
Temporary Investment Funds	Invests primarily in a diversified portfolio of investment grade money market instruments.	Achieve a high level of current income while maintaining stability of principal and liquidity.
Various Equity Funds	Each fund maintains a diversified holding in common stock of applicable companies (e.g. common stock of small capitalization companies if a small-cap fund, common stock of medium capitalization companies if a mid-cap fund, common stock of foreign corporations if an international fund, etc.).	Outperform the fund s related index.
Various Growth and Value Funds Domestic	Invests primarily in common stocks and other equity securities or in common collective funds which invest in common stocks and other equity securities, generally traded on a major U.S. exchange.	Exceed the return of the applicable Russell or S&P Index over a market cycle.
Various Growth and Value Funds International	Invests primarily in common stocks and other equity securities or in common collective funds which invest in common stocks and other equity securities of issuers organized or conducting business in countries other than the United States.	For the U.S. Plan to exceed the return of the corresponding Morgan Stanley Index over a market cycle. For the U.K. Plan to outperform the applicable FTSE index over a market cycle.
Return Funds	Invests primarily in a diversified portfolio of fixed-income securities of varying maturities or in commingled funds which invest in a diversified portfolio of fixed-income securities of varying maturities.	For the U.S. Plan to outperform either the Barclays Capital U.S. Aggregate Index or US Corporate High Yield Index, as applicable, over a prescribed period.

		For the U.K Plan to outperform the applicable FTSE index over a prescribed period.
Alternative Investments Managed Funds	Invests in equities and equity-like asset classes and strategies, (such as public equities, venture capital, private equity, real estate, natural resources and hedged strategies) and fixed-income securities.	Generate a minimum annual inflation adjusted return of 5% and outperform a traditional 70/30 equities/bond portfolio.
Alternative Investments Hedge and Absolute Return Funds	Invests in a diversified portfolio of alternative investment styles and strategies.	Generate long-term capital appreciation while maintaining a low correlation with the traditional global financial markets.

During 2014, the Corporation determined that certain Foreign Pension Benefit Plan assets as of December 31, 2013 previously presented in the Level 1 category should have been presented in the Level 2 category based on the inputs used to value the securities. Accordingly, the 2013 presentation of asset categories has been revised in the table above. The revision had no impact on the Corporation s consolidated balance sheet, statement of operations or statement of cash flows.

The table below sets forth a summary of changes in the fair value of the Level 3 plan assets for U.S. and foreign pension plans for the year ended December 31, 2014.

	Alternative Investments		
	U.S. Pension Benefits		Foreign Pension Benefits
Fair value as of January 1, 2014	$ 8,389	$ 32,433	$ 11,041

Fair value as of December 31, 2013	$ 8,389	$ 32,433	$ 11,041

Net Periodic Pension and Other Postretirement Benefit Costs

The actual return on the fair value of plan assets is included in determining the funded status of the plans. In determining net periodic pension costs, the expected long-term rate of return on the market-related value of plan assets is used. Differences between the actual return on plan assets and the expected long-term rate of return on plan assets are classified as part of unrecognized actuarial gains or losses and are recorded as a component of accumulated other comprehensive loss on the consolidated balance sheet. When these gains or losses exceed 10% of the greater of the projected benefit obligation or the market-related value of plan assets, they are amortized to net periodic pension and other postretirement costs over the average remaining service period of employees expected to receive benefits under the plans. When the gains or losses are less than 10% of the greater of the projected benefit obligation or the market-related value of plan assets, they are included in net periodic pension and other postretirement costs indirectly as a result of lower/higher interest costs arising from a decrease/increase in the projected benefit obligation.

Net periodic pension and other postretirement benefit costs include the following components for the year ended December 31:

	U.S. Pension Benefits			Foreign Pension Benefits			Other Postretirement Benefits		
	2014	2013	2012	**2014**	2013	2012	**2014**	2013	2012
Service cost	**$ 3,683**	$ 4,424	$ 3,943	**$ 0**	$ 0	$ 0	**$ 505**	$ 943	$ 804
Interest cost	**8,762**	8,070	8,514	**2,695**	2,551	2,506	**688**	926	919
Expected return on plan assets	**(10,747)**	(9,368)	(9,556)	**(3,157)**	(2,485)	(2,101)	**0**	0	0
Amortization of prior service cost	**854**	640	668	**0**	0	0	**(441)**	85	85
Amortization of actuarial loss	**4,183**	7,146	6,087	**599**	687	598	**104**	241	71
Net cost	**$ 6,735**	$ 10,912	$ 9,656	**$ 137**	$ 753	$ 1,003	**$ 856**	$ 2,195	$ 1,879

Assumptions

Assumptions are reviewed on an annual basis. The expected long-term rate of return on plan assets is an estimate of average rates of earnings expected to be earned on funds invested or to be invested to provide for the benefits included in the projected benefit obligation. Since these benefits will be paid over many years, the expected long-term rate of return is reflective of current investment returns and investment returns over a longer period. Consideration is also given to target and actual asset allocations, inflation and real risk-free return. The discount rates used in determining future pension obligations and other postretirement benefits for each of the plans are based on rates of return on high-quality fixed-income investments currently available and expected to be available during the period to maturity of the pension and other postretirement benefits. High-quality fixed-income investments are defined as those investments which have received one of the two highest ratings given by a recognized rating agency with maturities of 10+ years.

Table of Contents

The discount rates and weighted-average wage increases used to determine the benefit obligations as of December 31, 2014 and 2013 are summarized below. The change in discounts rates increased plan benefit obligations and reduced the funded status of the plans by approximately $39,000 as of December 31, 2014 in comparison to December 31, 2013. In addition, longevity assumptions used to estimate the life expectancy of plan participants over which plan benefits will be received were revised during the year. Based on actuarial studies, life expectancies are longer than previously estimated which had the effect of increasing projected and accumulated benefit obligations and reducing the funded status of the plans by approximately $9,000 as of December 31, 2014 in comparison to December 31, 2013.

	U.S. Pension Benefits		**Foreign Pension Benefits**		**Other Postretirement Benefits**	
	2014	2013	**2014**	2013	**2014**	2013
Discount rate	**4.10%**	5.00%	**3.50%**	4.50%	**4.00%**	5.00%
Wage increases	**4.00%**	4.00%	**n/a**	n/a	**n/a**	n/a

In addition, the assumed health care cost trend rate at December 31, 2014 for other postretirement benefits is 6% for 2015 gradually decreasing to 4.75% in 2018. In selecting rates for current and long-term health care assumptions, the Corporation considers known health care cost increases, the design of the benefit programs, the demographics of its active and retiree populations and expectations of inflation rates in the future. A one percentage point increase or decrease in the assumed health care cost trend rate would change the postretirement benefit obligation at December 31, 2014 and the annual benefit expense for 2014 by approximately $40 and $100, respectively.

The following assumptions were used to determine net periodic pension and other postretirement benefit costs for the year ended December 31:

	U.S. Pension Benefits			**Foreign Pension Benefits**			**Other Postretirement Benefits**		
	2014	2013	2012	**2014**	2013	2012	**2014**	2013	2012
Discount rate	**5.00%**	4.25%	5.00%	**4.50%**	4.50%	4.90%	**5.00%**	4.25%	5.00%

NOTE 8 COMMITMENTS AND CONTINGENT LIABILITIES:

Outstanding standby and commercial letters of credit as of December 31, 2014 approximated $18,903, the majority of which serves as collateral for the IRBs.

In 2010, UES-UK was awarded a government grant of approximately $1,083 (£680) toward the purchase and installation of certain machinery and equipment portions of which were received through 2012. Under the agreement, the grant is repayable if certain conditions are not met including achieving and maintaining a targeted level of employment through 2017. UES-UK s level of employment currently exceeds and is expected to continue to exceed the targeted level of employment; accordingly, no liability has been recorded.

Approximately 53% of the Corporation s employees are covered by collective bargaining agreements. Of the six bargaining agreements, one of the agreements, representing approximately 18% of the covered employees, expired in 2012; however, employees continue to work under the expired agreement while negotiations proceed. The remaining agreements have expiration dates ranging from December 2015 to May 2018. Collective bargaining agreements expiring in 2015 (representing approximately 39% of covered employees) will be negotiated with the intent to secure mutually beneficial, long-term arrangements.

See Note 11 regarding derivative instruments.

See Note 17 regarding litigation and Note 18 for environmental matters.

NOTE 9 STOCK-BASED COMPENSATION:

In May 2011, the shareholders of the Corporation approved the adoption of the 2011 Omnibus Incentive Plan (Incentive Plan) which authorizes the issuance of up to 1,000,000 shares of the Corporation s common stock for grants of equity-based compensation. Awards under the Incentive Plan may include incentive non-qualified stock options, stock appreciation rights, restricted shares and restricted stock units, performance awards, other stock-based awards or short-term cash incentive awards. Unexercised portions of terminated or forfeited awards are available for new awards. The Incentive Plan is administered by the Compensation Committee of the Board of Directors who has the authority to determine, within the limits of the express provisions of the Incentive Plan, the individuals to whom the awards will be granted; the nature, amount and terms of such awards; and the objectives and conditions for earning such awards.

The Compensation Committee granted non-qualified stock options in each of the years as outlined below. Options granted under the Incentive Plan have a ten-year life and vest over a three-year period. Options previously granted under earlier incentive plans have a ten-year life with one-third vesting at the date of grant, one-third vesting on the first anniversary date of the date of grant and one-third vesting on the second anniversary date of the date of grant. The exercise prices are equal to the closing prices of the Corporation s common stock on the New York Stock Exchange on the dates of grant.

The Incentive Plan also provides for annual grants of shares of the Corporation s common stock to non-employee directors following the Corporation s annual shareholder meeting. Each annual director award will be for a number of shares having a fair market value equal to $25 and will fully vest as of the grant date. The number of shares of common stock issued to non-employee directors was 12,500 shares in 2014, 11,656 shares in 2013 and 11,320 shares in 2012.

The fair value of the options as of the dates of grant was calculated using the Black-Scholes option-pricing model based on the assumptions outlined below.

	Grant Date		
	2014	2013	2012
Options granted	**176,000**	173,750	164,500
Exercise price	**$ 20.00**	$ 17.16	$ 17.67
Assumptions:			
Expected life in years	**6**	6	6
Risk-free interest rate	**1.98%**	1.26%	0.76%
Expected annual dividend yield	**3.60%**	4.20%	3.01%
Expected forfeiture rate	**8.00%**	5.00%	0%
Expected volatility	**53.02%**	52.68%	53.46%
Grant date fair value	**$ 7.40**	$ 5.82	$ 6.68
Resulting stock-based compensation expense	**$ 1,199**	$ 961	$ 1,099

Stock-based compensation expense, including expense for shares to be issued to non-employee directors, approximated $1,102, $1,196 and $1,258 for 2014, 2013 and 2012, respectively. The related income tax benefit recognized in the consolidated statements of operations was $386, $419 and $440 for the respective years. Unrecognized stock-based compensation expense equaled $1,375 at December 31, 2014 and is expected to be recognized over a weighted-average period of approximately 2 years.

Table of Contents

A summary of stock options outstanding and exercisable and activity for the year ended December 31, 2014 is as follows:

	Shares Under Options	Weighted Average Exercise Price	Remaining Contractual Life In Years	Intrinsic Value
Outstanding at January 1, 2014	1,201,753	$ 24.85	6.5	$ 982
Granted	176,000	20.00		
Exercised	(40,084)	14.50		
Forfeited	(135,500)	26.87		
Outstanding at December 31, 2014	**1,202,169**	**$ 24.25**	**6.0**	**$ 778**
Exercisable at December 31, 2014	**914,752**	**$ 25.97**	**5.2**	**$ 778**
Vested or expected to vest at December 31, 2014	**1,197,365**	**$ 24.27**	**6.0**	**$ 778**

NOTE 10 ACCUMULATED OTHER COMPREHENSIVE LOSS:

Net change and ending balances for the various components of other comprehensive income (loss) and for accumulated other comprehensive loss as of and for the year ended December 31, 2012, 2013 and 2014 are summarized below.

	Foreign Currency Translation Adjustments	Unrecognized Components of Employee Benefit Plans	Unrealized Holding Gains (Losses) on Securities	Derivatives	Accumulated Other Comprehensive Loss
Balance at January 1, 2012	$ (4,736)	$ (75,225)	$ 562	$ 109	$ (79,290)
Net Change	3,193	(6,558)	71	209	(3,085)
Balance at December 31, 2012	(1,543)	(81,783)	633	318	(82,375)
Net Change	1,820	34,321	374	(5)	36,510
Balance at December 31, 2013	277	(47,462)	1,007	313	(45,865)
Net Change	(4,703)	(17,934)	(23)	(228)	(22,888)
Balance at December 31, 2014	**$ (4,426)**	**$ (65,396)**	**$ 984**	**$ 85**	**$ (68,753)**

The following summarizes the line items affected on the consolidated statements of operations for components reclassified from accumulated other comprehensive loss for each of the years ended December 31. Amounts in parentheses represent credits to net income (loss).

	2014	2013	2012
Amortization of unrecognized employee benefit costs:			
Costs of products sold (excluding depreciation)	**$ 3,601**	$ 5,691	$ 4,807
Selling and administrative	**1,524**	2,241	1,939
Other income (expense)	**174**	867	763
Total before income tax	**5,299**	8,799	7,509
Income tax provision	**(1,841)**	(3,156)	(3,547)
Net of income tax	**$ 3,458**	$ 5,643	$ 3,962
Realized gains on sale of marketable securities:			
Selling and administrative	**$ (171)**	$ (87)	$ (120)
Income tax provision	**60**	30	42
Net of income tax	**$ (111)**	$ (57)	$ (78)
Realized gains/losses from settlement of cash flow hedges:			
Net sales (foreign currency sales contracts)	**$ 33**	$ 0	$ (197)
Depreciation (foreign currency purchase contracts)	**(27)**	(27)	(27)

Costs of products sold (excluding depreciation) (futures contracts copper and aluminum)		**146**		419		398
Total before income tax		**152**		392		174
Income tax provision		**(57)**		(146)		(67)
Net of income tax	**$**	**95**	$	246	$	107

Table of Contents

The income tax expense (benefit) associated with the various components of other comprehensive income (loss) for each of the years ended December 31 is summarized below. Foreign currency translation adjustments exclude the effect of income taxes since earnings of non-U.S. subsidiaries are deemed to be reinvested for an indefinite period of time.

	2014	2013	2012
Income tax expense (benefit) associated with changes in:			
Unrecognized employee benefit costs	**$ 10,265**	$ (15,890)	$ 5,256
Unrealized holding gains on marketable securities	**(47)**	(232)	(80)
Fair value of cash flow hedges	**206**	149	(61)
Income tax expense (benefit) associated with reclassification adjustments:			
Amortization of unrecognized employee benefit costs	**(1,841)**	(3,156)	(3,547)
Realized gains from sale of marketable securities	**60**	30	42
Realized gains/losses from settlement of cash flow hedges	**(57)**	(146)	(67)

NOTE 11 DERIVATIVE INSTRUMENTS:

Certain operations of the Corporation are subject to risk from exchange rate fluctuations in connection with sales in foreign currencies. To minimize this risk, foreign currency sales contracts are entered into which are designated as cash flow or fair value hedges. As of December 31, 2014, approximately $16,126 of anticipated foreign-denominated sales has been hedged which are covered by fair value contracts settling at various dates through April 2016. The fair value of assets held as collateral for the fair value contracts as of December 31, 2014 approximated $800.

Additionally, certain of the divisions of the Air and Liquid Processing segment are subject to risk from increases in the price of commodities (copper and aluminum) used in the production of inventory. To minimize this risk, futures contracts are entered into which are designated as cash flow hedges. At December 31, 2014, approximately 57% or $2,700 of anticipated copper purchases over the next nine months and 38% or $500 of anticipated aluminum purchases over the next six months are hedged.

The Corporation previously entered into foreign currency purchase contracts to manage the volatility associated with euro-denominated progress payments to be made for certain machinery and equipment. As of December 31, 2010, all contracts had been settled and the underlying fixed assets were placed in service.

No portion of the existing cash flow or fair value hedges is considered to be ineffective, including any ineffectiveness arising from the unlikelihood of an anticipated transaction to occur. Additionally, no amounts have been excluded from assessing the effectiveness of a hedge.

At December 31, 2014, the Corporation has purchase commitments covering 32% or $2,691 of anticipated natural gas usage through 2017 for one of its subsidiaries. The commitments qualify as normal purchases and, accordingly, are not reflected on the consolidated balance sheet. Purchases of natural gas under previously existing commitments approximated $2,190, $2,694 and $4,314 for 2014, 2013 and 2012, respectively.

The Corporation does not enter into derivative transactions for speculative purposes and, therefore, holds no derivative instruments for trading purposes.

Table of Contents

The following summarizes location and fair value of the foreign currency sales contracts recorded on the consolidated balance sheets as of December 31:

	Location	2014	2013
Cash flow hedge contracts	Other current liabilities	**$ 6**	$ 0
Fair value hedge contracts	Other current assets	**217**	426
	Other noncurrent assets	**15**	17
	Other current liabilities	**399**	0
	Other noncurrent liabilities	**5**	0
Fair value hedged item	Accounts receivable	**69**	(36)
	Other current assets	**327**	0
	Other noncurrent assets	**4**	0
	Other current liabilities	**218**	488
	Other noncurrent liabilities	**35**	40

The change in the fair value of the cash flow contracts is recorded as a component of accumulated other comprehensive loss. Amounts recognized as and reclassified from accumulated other comprehensive loss are recorded as a component of other comprehensive income (loss) and are summarized below. All amounts are after-tax.

For the Year Ended December 31, 2014	**Comprehensive Income (Loss) Beginning of the Year**	**Plus Recognized as Comprehensive Income (Loss)**	**Less Gain (Loss) Reclassified from Accumulated Other Comprehensive Loss**	**Comprehensive Income (Loss) End of the Year**
Foreign currency sales contracts cash flow hedges	$ 0	$ (21)	$ (21)	**$ 0**
Foreign currency purchase contracts	275	0	17	**258**
Future contracts copper and aluminum	38	(302)	(91)	**(173)**
	$ 313	**$ (323)**	**$ (95)**	**$ 85**
For the Year Ended December 31, 2013				
Foreign currency sales contracts cash flow hedges	$ 0	$ 0	$ 0	$ 0
Foreign currency purchase contracts	292	0	17	275
Future contracts copper and aluminum	26	(251)	(263)	38
	$ 318	$ (251)	$ (246)	$ 313
For the Year Ended December 31, 2012				
Foreign currency sales contracts cash flow hedges	$ 114	$ 10	$ 124	$ 0
Foreign currency purchase contracts	309	0	17	292
Future contracts copper and aluminum	(314)	92	(248)	26
	$ 109	$ 102	$ (107)	$ 318

Table of Contents

The change in fair value reclassified or expected to be reclassified from accumulated other comprehensive loss to earnings is summarized below. All amounts are pre-tax.

	Location of Gain (Loss) in Statements of Operations	Estimated to be Reclassified in the Next 12 Months	Year Ended December 31, 2014	2013	2012
Foreign currency sales contracts cash flow hedges	Net sales	**$ 0**	**$ (33)**	$ 0	$ 197
Foreign currency purchase contracts	Depreciation	**27**	**27**	27	27
Futures contracts copper and aluminum	Costs of products sold (excluding depreciation)	**(290)**	**(146)**	(419)	(398)

(Losses) gains on foreign exchange transactions included in other income (expense) approximated $(488), $(227) and $107 for 2014, 2013 and 2012, respectively.

NOTE 12 FAIR VALUE:

The following summarizes financial assets and liabilities reported at fair value on a recurring basis in the accompanying consolidated balance sheets at December 31:

2014	Quoted Prices in Active Markets for Identical Inputs (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Investments				
Other noncurrent assets	$ 4,280	$ 0	$ 0	**$ 4,280**
Foreign currency exchange contracts				
Other current assets	0	544	0	**544**
Other noncurrent assets	0	19	0	**19**
Other current liabilities	0	623	0	**623**
Other noncurrent liabilities	0	40	0	**40**
2013				
Investments				
Other noncurrent assets	$ 4,092	$ 0	$ 0	$ 4,092
Foreign currency exchange contracts				
Other current assets	0	426	0	426
Other noncurrent assets	0	17	0	17
Other current liabilities	0	488	0	488
Other noncurrent liabilities	0	40	0	40

The investments held as other noncurrent assets represent assets held in the Rabbi trust for the purpose of providing benefits under the non-qualified defined benefit pension plan. The fair value of the investments is based on quoted prices of the investments in active markets. The fair value of foreign currency exchange contracts is determined based on the fair value of similar contracts with similar terms and remaining maturities. The fair value of futures contracts is based on market quotations. The fair value of the variable-rate IRB debt approximates its carrying value. Additionally, the fair value of trade receivables and trade payables approximates their carrying value.

During 2013, the Corporation recorded an impairment charge of $6,407 to reduce the carrying amount of its investment in a forged roll joint venture company to its estimated fair value. The investment was measured at fair value on a nonrecurring basis and is considered a Level 3 measurement due to significant inputs that are unobservable. The Corporation considered all relevant valuation approaches including the market, income and asset approaches and selected the asset approach as the most appropriate measure of fair value.

Table of Contents

NOTE 13 INCOME TAXES:

(Loss) income before income taxes and equity losses in Chinese joint venture is comprised of the following:

	2014	2013	2012
Domestic	**$ (1,182)**	$ 25,269	$ 14,754
Foreign	**290**	1,911	413
	$ (892)	$ 27,180	$ 15,167

At December 31, 2014, the Corporation has state net operating loss carryforwards of $20,392, which begin to expire in 2018, foreign net operating loss carryforwards of $18 which begin to expire in 2026 and capital loss carryforwards of $940 which do not expire.

The income tax provision consisted of the following:

	2014	2013	2012
Current:			
Federal	**$ 3,458**	$ 5,535	$ 2,550
State	**210**	139	184
Foreign	**122**	28	(61)
	3,790	5,702	2,673
Deferred:			
Federal	**(4,678)**	(488)	2,142
State	**54**	133	360
Foreign	**101**	622	175
Reversal of valuation allowance	**(33)**	(156)	(132)
	(4,556)	111	2,545
	$ (766)	$ 5,813	$ 5,218

The income tax provision was affected by the reversal of valuation allowances previously provided against deferred income tax assets associated with state net operating loss carryforwards for each of the years.

The difference between statutory U.S. federal income tax and the Corporation s effective income tax was as follows:

	2014	2013	2012
Computed at statutory rate	**$ (312)**	$ 9,513	$ 5,309
Tax differential on non-U.S. earnings	**128**	(340)	(119)
State income taxes	**(227)**	741	619
Manufacturers deduction (I.R.C. Section 199)	**(359)**	(566)	(257)
Meals and entertainment	**224**	205	198
Tax credits	**(12)**	(145)	(64)
Chinese joint venture	**(371)**	(3,125)	(558)
Reversal of valuation allowance	**(33)**	(156)	(132)
Change in tax rates	**301**	(472)	(143)
Change in uncertain tax positions	**(80)**	(172)	87

Other net	**(25)**	330	278
	$ (766)	$ 5,813	$ 5,218

Table of Contents

Deferred income tax assets and liabilities as of December 31, 2014 and 2013 are summarized below. The current portion of net deferred income tax assets is included in other current assets in the consolidated balance sheets. Unremitted earnings of the Corporation s non-U.S. subsidiaries and affiliates are deemed to be permanently reinvested and, accordingly, no deferred income tax liability has been recorded. It is not practical to estimate the income tax effect that might be incurred if cumulative prior year earnings not previously taxed in the United States were remitted to the United States.

	2014	2013
Assets:		
Employment related liabilities	**$ 10,726**	$ 11,946
Pension liability foreign	**4,041**	2,434
Pension liability domestic	**15,849**	5,137
Liabilities related to discontinued operations	**733**	959
Capital loss carryforwards	**253**	273
Asbestos-related liability	**18,252**	18,172
Net operating loss state	**2,029**	1,654
Inventory related	**3,458**	2,644
Impairment charge associated with investment in UES-MG	**2,344**	2,316
Other	**3,546**	3,939
Gross deferred income tax assets	**61,231**	49,474
Valuation allowance	**(3,254)**	(2,639)
	57,977	46,835
Liabilities:		
Depreciation	**(30,429)**	(31,918)
Mark-to-market adjustment derivatives	**(23)**	(73)
Other	**(1,993)**	(2,495)
Gross deferred income tax liabilities	**(32,445)**	(34,486)
Net deferred income tax assets	**$ 25,532**	$ 12,349

The following summarizes changes in unrecognized tax benefits for the year ended December 31:

	2014	2013	2012
Balance at the beginning of the year	**$ 270**	$ 442	$ 311
Gross increases for tax positions taken in the current year	**0**	8	233
Gross increases for tax positions taken in prior years	**2**	12	18
Gross decreases in tax positions due to lapse in statute of limitations	**(61)**	0	(120)
Gross decreases for tax positions taken in prior years	**(17)**	(192)	0
Gross decreases for tax settlements with taxing authorities	**(142)**	0	0
Balance at the end of the year	**$ 52**	$ 270	$ 442

If the unrecognized tax benefits were recognized, $34 would reduce the Corporation s effective income tax rate. The amount of penalties and interest recognized in the consolidated balance sheets as of December 31, 2014 and 2013 and in the consolidated statements of operations for 2014, 2013 and 2012 is insignificant. Unrecognized tax benefits of $22 are to expire due to the lapse in the statute of limitations within the next 12 months.

The Corporation is subject to taxation in the United States, various states and foreign jurisdictions, and remains subject to examination by tax authorities for tax years 2011-2014. The combined Indiana income tax returns for 2010-2013 are under examination by the Indiana Department of Revenue which started during the first quarter of 2015.

NOTE 14 OPERATING LEASES:

The Corporation leases certain factory and office space and certain office equipment. Operating lease expense was $995 in 2014, $945 in 2013 and $1,013 in 2012. Operating lease payments for subsequent years are $823 for 2015, $287 for 2016, $184 for 2017, $83 for 2018, $23 for 2019 and $0 thereafter.

NOTE 15 RESEARCH AND DEVELOPMENT COSTS:

Expenditures relating to the development of new products, identification of products or process alternatives and modifications and improvements to existing products and processes are expensed as incurred. These expenses approximated $1,328 for 2014, $1,413 for 2013 and $1,476 for 2012.

NOTE 16 RELATED PARTIES:

In the ordinary course of business, the Corporation purchases industrial supplies from a subsidiary of The Louis Berkman Company (LB Co). Certain directors of the Corporation are either officers, directors and/or shareholders of LB Co. Purchases from LB Co approximated $1,358 in 2014, $1,489 in 2013 and $1,538 in 2012. In addition, LB Co paid the Corporation approximately $100 in 2014, $150 in 2013 and $253 in 2012 for certain administrative services. At December 31, 2014 and 2013, the net amount payable to LB Co approximated $28 and $79, respectively.

NOTE 17 LITIGATION:

The Corporation and its subsidiaries are involved in various claims and lawsuits incidental to their businesses. In addition, it is also subject to asbestos litigation as described below.

Asbestos Litigation

Claims have been asserted alleging personal injury from exposure to asbestos-containing components historically used in some products of predecessors of the Corporation s Air & Liquid subsidiary (Asbestos Liability) and of an inactive subsidiary in dissolution. During 2013, all pending claims against the inactive subsidiary in dissolution were settled, dismissed or barred and the dissolution court issued a final order thereby concluding the dissolution proceedings. Those subsidiaries, and in some cases the Corporation, are defendants (among a number of defendants, often in excess of 50) in cases filed in various state and federal courts.

Asbestos Claims

The following table reflects approximate information about the claims for Asbestos Liability against the subsidiaries and the Corporation for the two years ended December 31, 2014 and 2013 (2013 includes asbestos claims asserted against the inactive subsidiary in dissolution):

	2014	2013
Total claims pending at the beginning of the period	**8,319**	8,007
New claims served	**1,466**	1,432
Claims dismissed	**(1,094)**	(803)
Claims settled	**(234)**	(317)
Total claims pending at the end of the period [(1)]	**8,457**	8,319
Gross settlement and defense costs (in 000 s)	**$ 20,801**	$ 22,618
Average gross settlement and defense costs per claim resolved (in 000 s)	**$ 15.66**	$ 20.19

(1) Included as open claims are approximately 1,647 and 1,636 claims in 2014 and 2013, respectively, classified in various jurisdictions as inactive or transferred to a state or federal judicial panel on multi-district litigation, commonly referred to as the MDL.

A substantial majority of the settlement and defense costs reflected in the above table was reported and paid by insurers. Because claims are often filed and can be settled or dismissed in large groups, the amount and timing of settlements, as well as the number of open claims, can fluctuate significantly from period to period.

50

Asbestos Insurance

The Corporation and its Air & Liquid subsidiary are parties to a series of settlement agreements (Settlement Agreements) with insurers that have coverage obligations for Asbestos Liability (the Settling Insurers). Under the Settlement Agreements, the Settling Insurers accept financial responsibility, subject to the terms and conditions of the respective agreements, including overall coverage limits, for pending and future claims for Asbestos Liability. The Settlement Agreements encompass the substantial majority of insurance policies that provide coverage for claims for Asbestos Liability.

The Settlement Agreements include acknowledgements that Howden North America, Inc. (Howden) is entitled to coverage under policies covering Asbestos Liability for claims arising out of the historical products manufactured or distributed by Buffalo Forge, a former subsidiary of the Corporation (the Products). The Settlement Agreements do not provide for any prioritization on access to the applicable policies or any sublimits of liability as to Howden or the Corporation and Air & Liquid, and, accordingly, Howden may access the coverage afforded by the Settling Insurers for any covered claim arising out of a Product. In general, access by Howden to the coverage afforded by the Settling Insurers for the Products will erode coverage under the Settlement Agreements available to the Corporation and Air & Liquid for Asbestos Liability.

On February 24, 2011, the Corporation and Air & Liquid filed a lawsuit in the United States District Court for the Western District of Pennsylvania against thirteen domestic insurance companies, certain underwriters at Lloyd s, London and certain London market insurance companies, and Howden. The lawsuit seeks a declaratory judgment regarding the respective rights and obligations of the parties under excess insurance policies that were issued to the Corporation from 1981 through 1984 as respects claims against the Corporation and its subsidiary for Asbestos Liability and as respects asbestos bodily-injury claims against Howden arising from the Products. The Corporation and Air & Liquid have reached Settlement Agreements with all but two of the defendant insurers in the coverage action. Those Settlement Agreements specify the terms and conditions upon which the insurer parties are to contribute to defense and indemnity costs for claims for Asbestos Liability. One of the Settlement Agreements entered into by the Corporation and Air & Liquid also provided for the dismissal of claims, without prejudice, regarding two upper-level excess policies issued by one of the insurers. The Court has entered Orders dismissing all claims in the action filed against each other by the Corporation and Air & Liquid, on the one hand, and by the settling insurers, on the other. Howden also reached an agreement with eight domestic insurers addressing asbestos-related bodily injury claims arising from the Products, and claims as to those insurers and Howden have been dismissed. Various counterclaims, cross claims and third party claims have been filed in the litigation and remain pending although only two domestic insurers and Howden remain in the litigation as to the Corporation and Air & Liquid. On September 27, 2013, the Court issued a memorandum opinion and order granting in part and denying in part cross motions for summary judgment filed by the Corporation and Air & Liquid, Howden, and the insurer parties still in the litigation. The September 27, 2013 ruling is not a final ruling for appellate purposes, but when final it could be appealed by the parties to the litigation. At a hearing on January 13, 2015, the Court ruled that final judgment in accordance with the Court s prior rulings will be entered in the case. Upon entry of final judgment, the Corporation, Air & Liquid, certain insurers, and Howden may appeal to the United States Court of Appeals for the Third Circuit.

Asbestos Valuations

In 2006, the Corporation retained Hamilton, Rabinovitz & Associates, Inc. (HR&A), a nationally recognized expert in the valuation of asbestos liabilities, to assist the Corporation in estimating the potential liability for pending and unasserted future claims for Asbestos Liability. HR&A was not requested to estimate asbestos claims against the inactive subsidiary in dissolution, which the Corporation believes are immaterial. Based on this analysis, the Corporation recorded a reserve for Asbestos Liability claims pending or projected to be asserted through 2013 as of December 31, 2006. HR&A s analysis has been periodically updated since that time. Most recently, the HR&A analysis was updated in 2014, and additional reserves were established by the Corporation as of December 31, 2014 for Asbestos Liability claims pending or projected to be asserted through 2024. The methodology used by HR&A in its projection in 2014 of the operating subsidiaries liability for pending and unasserted potential future claims for Asbestos Liability, which is substantially the same as the methodology employed by HR&A in prior estimates, relied upon and included the following factors:

¡ HR&A s interpretation of a widely accepted forecast of the population likely to have been exposed to asbestos;

¡ epidemiological studies estimating the number of people likely to develop asbestos-related diseases;

¡ HR&A s analysis of the number of people likely to file an asbestos-related injury claim against the subsidiaries and the Corporation based on such epidemiological data and relevant claims history from January 1, 2012 to December 8, 2014;

- an analysis of pending cases, by type of injury claimed and jurisdiction where the claim is filed;

- an analysis of claims resolution history from January 1, 2012 to December 8, 2014 to determine the average settlement value of claims, by type of injury claimed and jurisdiction of filing; and

- an adjustment for inflation in the future average settlement value of claims, at an annual inflation rate based on the Congressional Budget Office s ten year forecast of inflation.

Using this information, HR&A estimated in 2014 the number of future claims for Asbestos Liability that would be filed through the year 2024, as well as the settlement or indemnity costs that would be incurred to resolve both pending and future unasserted claims through 2024. This methodology has been accepted by numerous courts.

In conjunction with developing the aggregate liability estimate referenced above, the Corporation also developed an estimate of probable insurance recoveries for its Asbestos Liabilities. In developing the estimate, the Corporation considered HR&A s projection for settlement or indemnity costs for Asbestos Liability and management s projection of associated defense costs (based on the current defense to indemnity cost ratio), as well as a number of additional factors. These additional factors included the Settlement Agreements then in effect, policy exclusions, policy limits, policy provisions regarding coverage for defense costs, attachment points, prior impairment of policies and gaps in the coverage, policy exhaustions, insolvencies among certain of the insurance carriers, and the nature of the underlying claims for Asbestos Liability asserted against the subsidiaries and the Corporation as reflected in the Corporation s asbestos claims database, as well as estimated erosion of insurance limits on account of claims against Howden arising out of the Products. In addition to consulting with the Corporation s outside legal counsel on these insurance matters, the Corporation consulted with a nationally-recognized insurance consulting firm it retained to assist the Corporation with certain policy allocation matters that also are among the several factors considered by the Corporation when analyzing potential recoveries from relevant historical insurance for Asbestos Liabilities. Based upon all of the factors considered by the Corporation, and taking into account the Corporation s analysis of publicly available information regarding the credit-worthiness of various insurers, the Corporation estimated the probable insurance recoveries for Asbestos Liability and defense costs through 2024. Although the Corporation believes that the assumptions employed in the insurance valuation were reasonable and previously consulted with its outside legal counsel and insurance consultant regarding those assumptions, there are other assumptions that could have been employed that would have resulted in materially lower insurance recovery projections.

Based on the analyses described above, the Corporation s reserve at December 31, 2014 for the total costs, including defense costs, for Asbestos Liability claims pending or projected to be asserted through 2024 was $189,048 of which approximately 64% was attributable to settlement costs for unasserted claims projected to be filed through 2024 and future defense costs. While it is reasonably possible that the Corporation will incur additional charges for Asbestos Liability and defense costs in excess of the amounts currently reserved, the Corporation believes that there is too much uncertainty to provide for reasonable estimation of the number of future claims, the nature of such claims and the cost to resolve them beyond 2024. Accordingly, no reserve has been recorded for any costs that may be incurred after 2024.

The Corporation s receivable at December 31, 2014 for insurance recoveries attributable to the claims for which the Corporation s Asbestos Liability reserve has been established, including the portion of incurred defense costs covered by the Settlement Agreements in effect through December 31, 2014, and the probable payments and reimbursements relating to the estimated indemnity and defense costs for pending and unasserted future Asbestos Liability claims, was $140,651

The following table summarizes activity relating to insurance recoveries for each of the years ended December 31, 2014 and 2013.

	2014	2013
Insurance receivable asbestos, beginning of the year	**$ 110,741**	$ 118,115
Settlement and defense costs paid by insurance carriers	**(17,159)**	(23,714)
Changes in estimated coverage	**47,069**	16,340
Insurance receivable asbestos, end of the year	**$ 140,651**	$ 110,741

The insurance receivable recorded by the Corporation does not assume any recovery from insolvent carriers and a substantial majority of the insurance recoveries deemed probable was from insurance companies rated A (excellent) or better by A.M. Best Corporation.

Table of Contents

There can be no assurance, however, that there will not be further insolvencies among the relevant insurance carriers, or that the assumed percentage recoveries for certain carriers will prove correct. The difference between insurance recoveries and projected costs is not due to exhaustion of all insurance coverage for Asbestos Liability. The Corporation and the subsidiaries have substantial additional insurance coverage which the Corporation expects to be available for Asbestos Liability claims and defense costs that the subsidiaries and it may incur after 2024. However, this insurance coverage also can be expected to have gaps creating significant shortfalls of insurance recoveries as against claims expense, which could be material in future years.

The amounts recorded by the Corporation for Asbestos Liabilities and insurance receivables rely on assumptions that are based on currently known facts and strategy. The Corporation s actual expenses or insurance recoveries could be significantly higher or lower than those recorded if assumptions used in the Corporation s or HR&A s calculations vary significantly from actual results. Key variables in these assumptions are identified above and include the number and type of new claims to be filed each year, the average cost of disposing of each such new claim, average annual defense costs, compliance by relevant parties with the terms of the Settlement Agreements, the resolution of remaining coverage issues with insurance carriers, and the solvency risk with respect to the relevant insurance carriers. Other factors that may affect the Corporation s Asbestos Liability and ability to recover under its insurance policies include uncertainties surrounding the litigation process from jurisdiction to jurisdiction and from case to case, reforms that may be made by state and federal courts, and the passage of state or federal tort reform legislation.

The Corporation intends to evaluate its estimated Asbestos Liability and related insurance receivables as well as the underlying assumptions on a regular basis to determine whether any adjustments to the estimates are required. Due to the uncertainties surrounding asbestos litigation and insurance, these regular reviews may result in the Corporation incurring future charges; however, the Corporation is currently unable to estimate such future charges. Adjustments, if any, to the Corporation s estimate of its recorded Asbestos Liability and/or insurance receivables could be material to operating results for the periods in which the adjustments to the liability or receivable are recorded, and to the Corporation s liquidity and consolidated financial position.

NOTE 18 ENVIRONMENTAL MATTERS:

The Corporation is currently performing certain remedial actions in connection with the sale of real estate previously owned. Environmental exposures are difficult to assess and estimate for numerous reasons including lack of reliable data, the multiplicity of possible solutions, the years of remedial and monitoring activity required, and identification of new sites. In the opinion of management and in consideration of advice from the Corporation s consultants, the potential liability for all environmental proceedings of approximately $325 at December 31, 2014 is considered adequate based on information known to date.

NOTE 19 BUSINESS SEGMENTS:

The Corporation organizes its business into two operating segments Forged and Cast Engineered Products and Air and Liquid Processing. Summarized financial information concerning the Corporation s reportable segments is shown in the following tables. Corporate assets included under Identifiable Assets represent primarily cash and cash equivalents and other items not allocated to reportable segments. Long-lived assets exclude deferred income tax assets. Corporate costs are comprised of operating costs of the corporate office and other costs not allocated to the segments.

The accounting policies are the same as those described in Note 1.

	$ 272,858	$ 281,050	$ 292,905

(1) *(Loss) income before income taxes and equity losses in Chinese joint venture for 2014 includes a pre-tax charge of $4,487 for estimated costs of asbestos-related litigation through 2024 net of estimated insurance recoveries whereas 2013 includes a pre-tax credit of $16,340 for estimated additional insurance recoveries expected to be available to satisfy asbestos liabilities through 2022 resulting from settlement agreements reached with various insurance carriers and 2012 includes a pre-tax credit of $540 for estimated costs of asbestos-related litigation through 2022 net of estimated insurance recoveries. See Note 17.*

(2) *Identifiable assets for the Forged and Cast Engineered Products segment include investments in joint ventures of $3,914, $5,010 and $13,319 at December 31, 2014, 2013 and 2012, respectively. The change in the identifiable assets of the Air and Liquid Processing segment relates primarily to the movement in asbestos-related insurance receivables, the balances of which equaled $140,651, $110,741 and $118,115 at December 31, 2014, 2013 and 2012, respectively. See Note 17.*

(3) *Net sales are attributed to countries based on location of the customer. Sales to individual countries were less than 10% of consolidated net sales each of the years.*

(4) *Foreign long-lived assets represent primarily investments in joint ventures of $3,914, $5,010 and $13,319 at December 31, 2014, 2013 and 2012, respectively, and assets of the U.K. operations. Long-lived assets of the U.S. include noncurrent asbestos-related insurance receivables of $123,651, $86,241 and, $99,715 for 2014, 2013 and, 2012, respectively.*

(5) *For the Forged and Cast Engineered Products segment, two customers accounted for 29% of its net sales for 2014, 26% of its net sales for 2013 and, 23% of its net sales for 2012.*

NOTE 20 SUBSEQUENT EVENT:

On March 12, 2015, the Executive Committee of the Board of Directors elected to freeze the U.S. Pension Benefits Plan for current and future salary and non-union hourly participants effective July 1, 2015 and replace the U.S. Pension Benefits Plan with a defined contribution plan which will include employer contributions. The Corporation is currently evaluating the financial statement effects of this modification.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Ampco-Pittsburgh Corporation

We have audited the accompanying consolidated balance sheets of Ampco-Pittsburgh Corporation and subsidiaries (the Corporation) as of December 31, 2014 and 2013, and the related consolidated statements of operations, comprehensive income (loss), shareholders equity, and cash flows for each of the three years in the period ended December 31, 2014. These financial statements are the responsibility of the Corporation s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Ampco-Pittsburgh Corporation and subsidiaries as of December 31, 2014 and 2013, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2014, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Corporation s internal control over financial reporting as of December 31, 2014, based on the criteria established in *Internal Control Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 16, 2015 expressed an unqualified opinion on the Corporation s internal control over financial reporting.

Table of Contents

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

The Corporation did not experience any changes in, or disagreements with its accountants on, accounting and financial disclosure during the period covered.

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures. An evaluation of the effectiveness of the Corporation s disclosure controls and procedures as of the end of the period covered by this report was carried out under the supervision, and with the participation, of management, including the principal executive officer and principal financial officer. Disclosure controls and procedures are defined under Securities and Exchange Commission (SEC) rules as controls and other procedures that are designed to ensure that information required to be disclosed by a company in the reports that it files under the Exchange Act is recorded, processed, summarized and reported within required time periods. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer s management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate, to allow timely decisions regarding required disclosure. Based on that evaluation, the Corporation s management, including the principal executive officer and principal financial officer, has concluded that the Corporation s disclosure controls and procedures were effective at the reasonable assurance level as of December 31, 2014.

Management s Annual Report on Internal Control Over Financial Reporting. The Corporation s management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a 15(f) under the Securities Exchange Act of 1934, as amended). Internal control over financial reporting cannot provide absolute assurance of achieving financial reporting objectives because of its inherent limitations. Effective internal control over financial reporting can only provide reasonable assurance that the objectives of the control process are met. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting also can be circumvented by collusion or improper management override. Because of such limitations, there is a risk that material misstatements may not be prevented or detected on a timely basis by internal control over financial reporting. However, these inherent limitations are known features of the financial reporting process. Therefore it is possible to design into the process safeguards to reduce, though not eliminate, this risk. Further, the design of internal control over financial reporting includes the consideration of the benefits of each control relative to the cost of the control.

Management assessed the effectiveness of internal control over financial reporting as of December 31, 2014. In making this assessment, management used the criteria set forth in *Internal Control Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on those criteria and management s assessment, management, including the principal executive officer and principal financial officer, concluded that the Corporation s internal control over financial reporting was effective as of December 31, 2014.

The Corporation s independent registered public accounting firm, Deloitte & Touche LLP, has issued an attestation report on the Corporation s internal control over financial reporting which is included herein.

Changes in Internal Control Over Financial Reporting. There were no changes in the Corporation s internal control over financial reporting during the quarter ended December 31, 2014 that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Ampco-Pittsburgh Corporation

We have audited the internal control over financial reporting of Ampco-Pittsburgh Corporation and subsidiaries (the Corporation) as of December 31, 2014, based on criteria established in *Internal Control Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Corporation s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management s Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Corporation s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company s internal control over financial reporting is a process designed by, or under the supervision of, the company s principal executive and principal financial officers, or persons performing similar functions, and effected by the company s board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company s assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on the criteria established in *Internal Control Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2014 of the Corporation and our report dated March 16, 2015 expressed an unqualified opinion on those financial statements.

ITEM 9B. OTHER INFORMATION

None

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

IDENTIFICATION OF DIRECTORS

Name, Age, Tenure as a Director, Position with the Corporation[1], Principal Occupation, Business Experience Past Five Years, Other Directorships in Public Companies and the qualifications, attributes or skills that led to the conclusion that the individual should serve as a Director of the Corporation.

James J. Abel (age 68, director since 2014; current term expires 2017). Prior to his retirement, Mr. Abel served as Interim President and Chief Executive Officer of CPI Corporation, an operator of portrait studios, from February 2012 to April 2013 and as a director from 2004 to April 2013. CPI Corporation filed a petition under federal bankruptcy laws in May 2013. Mr. Abel previously served as President and Chief Executive Officer of Financial Executives International, a firm representing senior financial executives in dealing with regulatory agencies involved with corporate financial reporting and internal controls, from May 2008 to February 2009. Mr. Abel has served as a director of The LGL Group, Inc. from 2010 to 2014. Mr. Abel s background as a senior executive, his expertise in financial management and his experience with manufacturing operations, as well as his board experience, led the Board to conclude that he should serve as a director.

Leonard M. Carroll (age 72, Director since 1996; current term expires in 2016). Mr. Carroll has been Managing Director of Seneca Capital Management, Inc., a private investment company, for more than five years. The Board concluded that Mr. Carroll should serve as a director because of his broad financial background and investment knowledge. He is a retired Certified Public Accountant and has held various positions in the banking industry including President, Director and Chairman for over 37 years.

Michael I. German (age 64, director since 2014; current term expires 2015). Mr. German has been the Chief Executive Officer and President of Corning Natural Gas Holding Corporation (formerly known as Corning Natural Gas Corporation), a natural gas utility, since 2006. Mr. German also serves as President of Corning Appliance Company and Leatherstocking Gas Company. Mr. German has been a director of Corning Natural Gas Holding Corporation since 2006 and is on the Boards of Directors of Three River Development Corporation and Northeast Gas Association, as well as the Board of Trustees of the Adirondack Park Institute. Mr. German also was a director of Pennichuck Corporation from 2008 until 2011. Mr. German s experience as the chief executive officer of a public company, his many years of service as a director of companies and his broad leadership experience led the Board to conclude that he should serve as a director. [N]

Paul A. Gould (age 69, Director since 2002; current term expires in 2015). Mr. Gould has been with Allen & Co., Inc., an investment banking company, for more than thirty-five years and has been managing director of that company for more than five years. He is currently a director of Liberty Global, Inc. and Discovery Communications, Inc. During the last five years, he has served as a director of Discovery Holding Company and Liberty Media Corporation but he resigned from those Boards in 2009. Mr. Gould s long-term financial and investment background led to the Board s conclusion that he should serve as a director.[N]

William K. Lieberman (age 67, Director since 2004; current term expires in 2017). Mr. Lieberman has been President of The Lieberman Companies, insurance brokerage and consulting company, for more than five years. In addition to more than forty years of management experience in the insurance, benefit and risk management areas, Mr. Lieberman has served as a director or trustee of many organizations including charitable companies, hospital and universities. These qualifications led the Board to conclude that he should serve as a director. [N]

Table of Contents

Laurence E. Paul (age 50, Director since 1998; current term expires in 2016). Mr. Paul has been a managing principal of Laurel Crown Partners, a private investment company, for more than five years and prior to that was an investment banker for ten years. He became a President of The Louis Berkman Investment Company, a private investment company, in 2013. Mr. Paul s experience as a senior investment banker and private equity investor for almost twenty years led the Board to conclude that he possessed skills in financial management and risk assessment that would be beneficial to the Corporation.

Robert A. Paul (age 77, Director since 1970; current term expires in 2015). Mr. Paul has served as the Corporation s non-executive Chairman since January 1, 2015. He previously served as the Corporation s Chairman and Chief Executive Officer of the Corporation for more than five years. He is also the Chairman and a director of The Louis Berkman Investment Company, a private investment company. As a shareholder, officer and director of the Corporation for more than forty years, the Board believes he possesses the experience and knowledge to serve as a director. In addition, the Board considered his many years of service to the community as Trustee and Chairman of the Investment Committees of several major hospitals and universities. [N]

Stephen E. Paul (age 47, Director since 2002; current term expires in 2017). Mr. Paul has been a managing principal of Laurel Crown Partners, a private investment company, for more than five years. He became a President of The Louis Berkman Investment Company, a private investment company, in 2013. Mr. Paul s background in investment banking and private equity investment led the Board to conclude that he should serve as a director.

Carl H. Pforzheimer, III (age 78, Director since 1982; current term expires in 2017). Mr. Pforzheimer has been Managing Partner or Manager of Carl H. Pforzheimer & Co. LLC or its predecessors or related entities for more than five years. In addition to the attendant investment advisory analytical skills gained from such a position, his former role as chairman of the Audit and Risk Management Committees of U. S. Trust Co. led the Board to conclude Mr. Pforzheimer should serve as a director.

Ernest G. Siddons (age 81, Director since 1981; current term expires in 2016). Mr. Siddons was President and Chief Operating Officer of the Corporation for more than five years prior to his retirement as President in April 2009. With more than thirty years of experience with the Corporation in operations and financial management, the Board concluded that Mr. Siddons should serve as a director. Positions held earlier with the Corporation, including those of Chief Financial Officer and Treasurer and President of Union Electric Steel, and his qualification as a Chartered Accountant were also considered.

John S. Stanik (age 61, Director since 2015). Mr. Stanik has served as the Corporation s Chief Executive Officer since January 2015. He previously worked at Calgon Carbon Corporation, an international company specializing in purification products, technologies and services, from 1991 through 2012 when he retired for personal reasons. Mr. Stanik served as President and Chief Executive Officer of Calgon Carbon from 2003 to 2012 and became its Chairman of the Board in 2007. Prior to joining Calgon Carbon, Mr. Stanik worked in various capacities with increasing responsibility for Davy Corporation, an engineering and construction company specializing in the metals (steel and aluminum) markets, ultimately serving as Davy s General Manager of Operations. He is currently a director of FNB Corporation, a financial services corporation, which operates banks under the name First National Bank in Ohio and Pennsylvania. Mr. Stanik s experience as the chief executive officer and director of a public company, his many years of service as a director of companies and his broad leadership experience led the Board to conclude that he should serve as a director. [N]

(N) Nominee for election at the May 5, 2015 Annual Shareholders Meeting.

(1) Officers serve at the discretion of the Board of Directors.

IDENTIFICATION OF EXECUTIVE OFFICERS

The identification of the Executive Officers of the Corporation can be found in Part 1 of this Annual Report on Form 10-K.

FAMILY RELATIONSHIPS

Robert A. Paul is the father of Laurence E. Paul and Stephen E. Paul. There are no other family relationships among the Directors and Executive Officers.

Table of Contents

COMMITTEES

The various committees of the Board of Directors are currently comprised as follows:

Audit Committee: Carl H. Pforzheimer, III (Chairman), Leonard M. Carroll, Michael I German, Paul A. Gould and William K. Lieberman;

Compensation Committee: William K. Lieberman (Chairman), Paul A. Gould and Carl H. Pforzheimer, III;

Executive Committee: Robert A. Paul (Chairman), Leonard M. Carroll, William K. Lieberman, Carl H. Pforzheimer, III, Ernest G. Siddons and John S. Stanik; and

Nominating and Corporate Governance Committee: Paul A. Gould (Chairman), James J. Abel, William K. Lieberman and Carl H. Pforzheimer, III.

The Nominating and Governance Committee Charter, the Compensation Committee Charter, the Audit Committee Charter and the Corporate Governance Guidelines are available on the Corporation s website at www.ampcopittsburgh.com. The Corporation will provide a copy of these documents to any shareholder who makes a request in writing to the Corporate Secretary, Ampco-Pittsburgh Corporation, 600 Grant Street, Suite 4600, Pittsburgh, PA 15219.

AUDIT COMMITTEE FINANCIAL EXPERT

The Board of Directors has determined that Carl H. Pforzheimer, III, Chairman of the Audit Committee, is a financial expert and independent as defined under applicable SEC rules.

SECTION 16(A) BENEFICIAL OWNERSHIP REPORTING COMPLIANCE

Section 16(a) of the Exchange Act requires the Corporation s directors, executive officers and persons who beneficially own more than 10% of the Corporation s common stock, to file reports of holdings and transactions in the Corporation s common stock with the SEC and to furnish the Corporation with copies of all Section 16(a) reports that they file. Based on those records and other information furnished, during 2014, executive officers, directors and persons who beneficially own more than 10% of the Corporation s common stock complied with all filing requirements.

CODE OF ETHICS

The Corporation has adopted a Code of Business Conduct and Ethics that applies to all of its officers, directors and employees, as well as an additional Code of Ethics that applies to the Corporation s principal executive and financial officers. Copies of both Codes are available on the Corporation s website at www.ampcopittsburgh.com. In addition, the Corporation will provide without charge, upon request of any shareholder, a copy of the Codes upon written request to the Corporate Secretary, Ampco-Pittsburgh Corporation, 600 Grant Street, Suite 4600, Pittsburgh, PA 15219. The Corporation will make any required disclosures regarding amendments to, or waivers of, provisions of its Code of Business Conduct and Ethics and its separate Code of Ethics for its principal executive and financial officers by posting such information on its website or by filing a Form 8-K.

ITEM 11. EXECUTIVE COMPENSATION

The information required for this item is hereby incorporated by reference to the Corporation s Proxy Statement dated March 17, 2015.

Table of Contents

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDERS MATTERS

SECURITIES AUTHORIZED FOR ISSUANCE UNDER EQUITY COMPENSATION PLANS

The following table summarizes information, as of the December 31, 2014, with respect to compensation plans under which equity securities of the Corporation are authorized for issuance:

Plan Category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted-average exercise price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders	1,202,169	$24.25	373,830
Equity compensation plans not approved by security holders	N/A	N/A	N/A
Total	1,202,169	$24.25	373,830

SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS

The following table sets forth information, to the extent known by the Corporation, concerning individuals (other than directors or officers of the Corporation) or entities holding more than five percent of the outstanding shares of the Corporation s Common Stock. The percent of class in the table below is calculated based upon 10,425,664 shares outstanding as of March 12, 2015.

Name of beneficial owner	Amount and nature of beneficial ownership	Percent of class
Gabelli Funds, Inc. (and affiliates) Corporate Center Rye, NY 10580	2,233,428(1)	21.42
The Louis Berkman Investment Company P.O. Box 576 Steubenville, OH 43952	1,437,241(2)	13.79
BlackRock, Inc. 40 East 52nd Street New York, NY 10022	544,224(3)	5.22

(1) *Reported as of December 24, 2014 on an amended Schedule 13D filed with the SEC on December 24, 2014 disclosing that the reporting persons had sole voting and dispositive power.*

(2) *Robert A. Paul, non-executive Chairman of the Corporation, is an officer and director of The Louis Berkman Investment Company and disclaims beneficial ownership of the 28.79% of its common stock owned by his wife. Laurence E. Paul and Stephen E. Paul, directors of the Corporation, own 23.33% and 23.94%, respectively, of The Louis Berkman Investment Company s non-voting stock, held in various trusts.*

(3) *Reported as of December 31, 2014 on a Schedule 13G filed with the SEC on February 3, 2015 disclosing that the reporting person had sole voting and dispositive power.*

Table of Contents

The following table sets forth, as of March 12, 2015, information concerning the beneficial ownership of the Corporation s Common Stock by the Directors and Named Executive Officers and all Directors and Executive Officers of the Corporation as a group:

Name of beneficial owner	Amount and nature of beneficial ownership	Percent of class
Robert A. Paul	1,640,163(1)(2)	15.52
Laurence E. Paul	1,443,356(3)	13.84
Stephen E. Paul	1,443,356(4)	13.84
Terrence W. Kenny	91,000(5)	*
Robert G. Carothers	89,500(5)	*
Rose Hoover	88,834(6)	*
Marliss D. Johnson	70,500(5)	*
Ernest G. Siddons	41,122(7)	*
William K. Lieberman	8,115(8)	*
Carl H. Pforzheimer, III	7,848(9)	*
Leonard M. Carroll	6,615(10)	*
Paul A. Gould	6,115(10)	*
Michael I. German	5,250(10)	*
James J. Abel	2,250(10)	*
John S. Stanik	2,000(10)	*
Directors and Executive Officers as a group (14 persons)	2,071,542(11)	18.93

* *Less than1%*

(1) *Includes 42,889 shares owned directly, 145,000 shares he has the right to acquire within sixty days pursuant to stock options and the following shares in which he disclaims beneficial ownership: 1,437,241 shares owned by The Louis Berkman Investment Company, 13,767 shares owned by his wife, and 1,266 shares held by The Louis and Sandra Berkman Foundation, of which he is a trustee.*

(2) *The Louis Berkman Investment Company owns beneficially and of record 1,437,241 shares of the Corporation s Common Stock. Robert A. Paul, an officer and director of The Louis Berkman Investment Company, disclaims beneficial ownership of the 29.28% of its common stock owned by his wife.*

(3) *Represents 6,115 shares owned directly and 1,437,241 shares owned by The Louis Berkman Investment Company. Mr. Paul is a President of The Louis Berkman Investment Company and is a trustee of various trusts which own 23.33% of its non-voting stock.*

(4) *Represents 6,115 shares owned directly and 1,437,241 shares owned by The Louis Berkman Investment Company. Mr. Paul is a President of The Louis Berkman Investment Company and is a trustee of various trusts which own 23.94% of its non-voting stock.*

(5) *Represents shares that he or she has the right to acquire within sixty days pursuant to stock options.*

(6) *Represents 1,000 shares owned directly and 87,834 shares that she has the right to acquire within sixty days pursuant to stock options.*

(7) *Includes 1,007 shares held jointly with his wife, 5,115 shares owned directly and 35,000 shares he has the right to acquire within sixty days pursuant to stock options.*

(8) *Includes 3,000 shares held jointly with his wife and 5,115 shares owned directly.*

(9) *Includes 6,115 shares owned directly, 800 shares held by a trust of which he is a trustee and principal beneficiary, and the following shares in which he disclaims beneficial ownership: 133 shares held by his daughter and 800 shares held by a trust of which he is a trustee.*

(10) *Represents shares owned directly.*

(11) *Excludes double counting of shares deemed to be beneficially owned by more than one director.*

Unless otherwise indicated the individuals named have sole investment and voting power.

CHANGES IN CONTROL

The Corporation knows of no arrangements that may at a subsequent date result in a change in control of the Corporation.

Table of Contents

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The Corporation s policies and procedures for reviewing, approving and ratifying transactions with related persons are set forth in the Corporation s Corporate Governance Guidelines, which are available on the Corporation s website at www.ampcopittsburgh.com. Under these policies and procedures, the Corporation s management is responsible for determining whether a particular transaction should be referred to the Nominating and Governance Committee for consideration. The Nominating and Governance Committee then determines whether to approve, ratify, revise the terms of or reject the transaction or to refer the transaction to the full Board or another appropriate committee of the Board for approval or ratification. The policy and procedures apply to transactions involving an amount in excess of $120,000 in which a related person has a direct or indirect material interest. The policy and procedures generally do not apply to employment matters (except employment of an executive officer who is an immediate family member of another executive officer), director compensation, commercial transactions in the ordinary course of business under ordinary business terms, charitable contributions, transactions such as payment of dividends where all shareholders receive the same proportional benefits and transactions involving competitive bids.

In 2014, the Corporation bought industrial supplies from a subsidiary of The Louis Berkman Company in transactions in the ordinary course of business amounting to $1,357,501. Additionally, The Louis Berkman Company paid the Corporation $100,000 for certain administrative services. Robert A. Paul, Laurence E. Paul and Stephen E. Paul are officers, directors and/or shareholders of that company. These transactions and services were at prices generally available from outside sources. Transactions between the parties will also take place in 2015.

The purchase of industrial supplies from a subsidiary of The Louis Berkman Company follows a competitive bid process which includes several non-related vendors after which annual contract awards are made to the lowest bidder by the purchasing executive at each of the Corporation s subsidiary companies. The administration services are provided under an agreement to provide such services for fees which are subject to annual review.

The Board of Directors has adopted categorical standards to assist it in evaluating the independence of its Directors. The standards are attached to the Corporate Governance Guidelines which are available on the Corporation s website at www.ampcopittsburgh.com. After performing this evaluation in accordance with those guidelines, the Board has determined that James J. Abel, Leonard M. Carroll, Michael I. German, Paul A. Gould, William K. Lieberman and Carl H. Pforzheimer, III do not have material relationships with the Corporation (other than as members of the Board of Directors) and are independent within the meaning of the Corporation s independence standards and those of the NYSE.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The following table summarizes the aggregate fees billed to the Corporation by Deloitte & Touche LLP:

	2014	2013
Audit fees[a]	**$ 791,453**	$ 825,640
Audit-related fees[b]	**17,991**	26,050
Tax fees[c]	**0**	0
All other fees	**0**	0
Total [d]	**$ 809,444**	$ 851,690

(a) *Fees for audit services related primarily to the audit of the Corporation s annual consolidated financial statements and its internal control over financial reporting.*

(b) *Fees for audit-related services related primarily to the audits of the Corporation s employee benefit plans.*

(c) *Fees for services provided in connection with tax planning and advice.*

(d) *The Audit Committee approved all fees in the years reported.*

In considering the nature of the services provided by Deloitte & Touche LLP, the Audit Committee determined that such services are compatible with the provision of independent audit services. The Audit Committee discussed these services with Deloitte & Touche

LLP and the Corporation s management to determine that they are permitted under the rules and regulations concerning auditor independence promulgated by the SEC. All services provided by Deloitte & Touche LLP and reflected in the table above were approved by the Audit Committee in accordance with the policy described below.

The Audit Committee has adopted a Policy for Approval of Audit and Non-Audit Services (the Policy) provided by the Corporation s independent auditor. According to the Policy, the Corporation s independent auditor may not provide the following services to the Corporation:

- maintain or prepare the Corporation s accounting records or prepare the Corporation s financial statements that are either filed with the SEC or form the basis of financial statements filed with the SEC;
- provide appraisal or valuation services when it is reasonably likely that the results of any valuation or appraisal would be material to the Corporation s financial statements, or where the independent auditor would audit the results;
- provide certain management or human resource functions;
- serve as a broker-dealer, promoter or underwriter of the Corporation s securities;
- provide any service in which the person providing the service must be admitted to practice before the courts of a U.S. jurisdiction;
- provide any internal audit services relating to accounting controls, financial systems, or financial statements; or
- design or implement a hardware or software system that aggregates source data underlying the financial statements or generates information that is significant to the Corporation s financial statements, taken as a whole.

In addition, in connection with its adoption of the Policy, the Audit Committee pre-approved certain audit-related and other non-prohibited services. Any services not prohibited or pre-approved by the Policy must be pre-approved by the Audit Committee in accordance with the Policy. The Policy is reviewed and approved annually by the Board of Directors.

PART IV

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Ampco-Pittsburgh Corporation

We have audited the consolidated financial statements of Ampco-Pittsburgh Corporation and subsidiaries (the Corporation) as of December 31, 2014 and 2013, and for each of the three years in the period ended December 31, 2014, and the Corporation s internal control over financial reporting as of December 31, 2014, and have issued our reports thereon dated March 16, 2015; such reports are included elsewhere in this Form 10-K. Our audits also included the consolidated financial statement schedule of the Corporation listed in Item 15. The consolidated financial statement schedule is the responsibility of the Corporation s management. Our responsibility is to express an opinion based on our audits. In our opinion, such consolidated financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

Pittsburgh, Pennsylvania

March 16, 2015

Table of Contents

SCHEDULE II

Valuation and Qualifying Accounts

For the Years Ended December 31, 2014, 2013 and 2012

(in thousands)

		Additions				
Description	Balance at Beginning of Period	Charged to Costs and Expenses	Charged to Other Accounts[1]	Deductions	Other[3]	Balance at End of Period
Year ended December 31, 2014						
Allowance for doubtful accounts	$ 551	$ 1,381	$ 0	$ (531)	$ (27)	$ 1,374
Valuation allowance against gross deferred income tax assets	$ 2,639	$ 0	$ 721	$ (33)[2]	$ (73)	$ 3,254
Year ended December 31, 2013						
Allowance for doubtful accounts	$ 519	$ 33	$ 0	$ (3)	$ 2	$ 551
Valuation allowance against gross deferred income tax assets	$ 2,887	$ 0	$ 35	$ (156)[2]	$ (127)	$ 2,639
Year ended December 31, 2012						
Allowance for doubtful accounts	$ 141	$ 379	$ 0	$ (4)	$ 3	$ 519
Valuation allowance against gross deferred income tax assets	$ 3,042	$ 0	$ 11	$ (132)[2]	$ (34)	$ 2,887

(1) Represents valuation allowances established for deferred income tax assets since it is more likely than not that the assets will not be realized.

(2) Reduction in valuation allowances reflects primarily changes in the amount of deferred income tax assets expected to be realized, resulting in credit to the income tax provision in the consolidated statements of operations.

(3) Represents primarily impact from changes in foreign currency exchange rates and income tax rates.
