2 ANNUAL REPORT AUGUST 31, 2015

## The Markets in Review

Dear Shareholder,

Diverging monetary policies and shifting economic outlooks between regions were the broader themes underlying market conditions during the 12-month period ended August 31, 2015. The period began with investors caught between the forces of low interest rates and an improving U.S. economy, high asset valuations, oil price instability and lingering geopolitical risks in Ukraine and the Middle East. U.S. growth picked up considerably in the fourth quarter of 2014, while the broader global economy showed signs of slowing. Investors favored the stability of U.S. assets despite expectations that the Federal Reserve (Fed) would eventually be inclined to raise short-term interest rates. International markets continued to struggle even as the European Central Bank and the Bank of Japan eased monetary policy. Oil prices plummeted in late 2014 due to a global supply-and-demand imbalance, sparking a sell-off in energy-related assets and emerging markets. Investors piled into U.S. Treasury bonds as their persistently low yields had become attractive as compared to the even lower yields on international sovereign debt.

Equity markets reversed in early 2015, with international markets outperforming the United States as global risks abated. Investors had held high expectations for the U.S. economy, but a harsh winter and west coast port strike brought disappointing first-quarter data and high valuations took their toll on U.S. stocks, while bond yields fell to extreme lows. (Bond prices rise as yields fall.) In contrast, economic reports in Europe and Asia easily beat investors—very low expectations, and accommodative policies from central banks in those regions helped international equities rebound. Oil prices stabilized, providing some relief for emerging market stocks, although a stronger U.S. dollar continued to be a headwind for the asset class.

U.S. economic data regained momentum in the second quarter, helping U.S. stocks resume an upward path; however, the improving data underscored the likelihood that the Fed would raise short-term rates before the end of 2015 and bond yields moved swiftly higher. The month of June brought a sharp, but temporary, sell-off across most asset classes as Greece s long-brewing debt troubles came to an impasse. Although these concerns abated in the later part of July when the Greek parliament passed a series of austerity and reform measures, the calm was short-lived. Chinese equity prices plunged and experienced extreme volatility despite policymakers attempts to stabilize the market. Financial markets broadly were highly volatile during the month of August as evidence of a further deceleration in China s economy stoked worries about global growth. Equity and high yield assets declined, with emerging markets especially hard hit given falling commodity prices and lower growth estimates for many of those economies. High quality fixed income assets such as U.S. Treasury and municipal bonds benefited from investors seeking shelter from global volatility.

At BlackRock, we believe investors need to think globally, extend their scope across a broad array of asset classes and be prepared to move freely as market conditions change over time. We encourage you to talk with your financial advisor and visit blackrock.com for further insight about investing in today s markets.

Sincerely,
Rob Kapito

## Trust Summary as of August 31, 2015

BlackRock Core Bond Trust

#### **Trust Overview**

BlackRock Core Bond Trust s (BHK) (the Trust) investment objective is to provide current income and capital appreciation. The Trust seeks to achieve its investment objective by investing at least 75% of its assets in bonds that are investment grade quality at the time of investment. The Trust s investments will include a broad range of bonds, including corporate bonds, U.S. government and agency securities and mortgage-related securities. The Trust may invest directly in such securities or synthetically through the use of derivatives.

On June 6, 2014, the Boards of the Trust, BlackRock Income Opportunity Trust, Inc. (BNA) and BlackRock Income Trust, Inc. (BKT) approved the reorganizations of BKT and BNA into the Trust, with the Trust continuing as the surviving fund after the reorganizations. At a special meeting of shareholders on September 30, 2014, the shareholders of the Trust and BNA approved the reorganization of BNA into the Trust, which was completed on November 10, 2014. The reorganization of BKT into the Trust was not approved by BKT shareholders.

No assurance can be given that the Trust s investment objective will be achieved.

Initial Offering Date	November 27, 2001
Current Distribution Rate on Closing Market Price as of August 31, 2015 (\$12.63) <sup>1</sup>	7.17%
Current Monthly Distribution per Common Share <sup>2</sup>	\$0.0755
Current Annualized Distribution per Common Share <sup>2</sup>	\$0.9060
Economic Leverage as of August 31, 2015 <sup>3</sup>	28%

- 1 Current distribution rate on closing market price is calculated by dividing the current annualized distribution per share by the closing market price. The current distribution rate may consist of income, net realized gains and/or a tax return of capital. Past performance does not guarantee future results.
- The monthly distribution per Common Share, declared on October 1, 2015, was decreased to \$0.0710 per share. The current distribution rate on closing market price, current monthly distribution per Common Share, and current annualized distribution per Common Share do not reflect the new distribution rate. The new distribution rate is not constant and is subject to change in the future.
- Represents reverse repurchase agreements outstanding as a percentage of total managed assets, which is the total assets of the Trust (including any assets attributable to borrowings) minus the sum of liabilities (other than borrowings representing financial leverage). For a discussion of leveraging techniques utilized by the Trust, please see The Benefits and Risks of Leveraging on page 10.

### Performance and Portfolio Management Commentary

Returns for the 12 months ended August 31, 2015 were as follows:

### **Returns Based On**

	Market Price	$NAV^3$
BHK <sup>1</sup>	0.35%	1.62%
Lipper Corporate BBB-Rated Debt Funds (Leveraged) <sup>2</sup>	(2.76)%	(1.31)%

<sup>1</sup> All returns reflect reinvestment of dividends and/or distributions.

2	Average	return.

The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV.

The following discussion relates to the Trust s absolute performance based on NAV:

### What factors influenced performance?

The main contributor to the Trust s absolute performance was its overweight positions in asset-backed securities (ABS), commercial mortgage-backed securities (CMBS), and other structured products. Other contributors included long U.S. dollar exposure and positions in agency mortgage-backed securities (MBS).

The main detractor from performance was the Trust s positioning with respect to duration (interest rate sensitivity) and the yield curve. The Trust s exposure to emerging market debt also detracted from performance.

Describe recent portfolio activity.

During the 12-month period, the Trust reduced allocations in investment grade and high yield corporate credit, while increasing allocations in ABS, CMBS and other structured products. The Trust favored collateralized loan obligations within its ABS exposure. The Trust slightly increased its allocation to government securities, while remaining underweight in emerging market debt and credit securities.

Describe portfolio positioning at period end.

At period end, the Trust maintained diversified exposure to non-government spread sectors including investment grade credit, high yield credit, CMBS, ABS and non-agency residential MBS. The Trust also held exposure to government-related sectors including U.S. Treasury securities, agency debt and agency MBS. The Trust ended the period with a long duration profile.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

## Performance and Portfolio Management Commentary

Returns for the 12 months ended August 31, 2015 were as follows:

### **Returns Based On**

	Market Price	$NAV^3$
$HYT^1$	(9.96)%	$(2.40)\%^4$
Lipper High Yield Funds (Leveraged) <sup>2</sup>	(12.17)%	(5.11)%

- 1 All returns reflect reinvestment of dividends and/or distributions.
- Average return.

- The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV.
- <sup>4</sup> For financial reporting purposes, the market value of certain total return swaps were adjusted as of report date. Accordingly, the net asset value ( NAV ) per share and total return performance based on net asset value presented herein are different than the information previously published on August 31, 2015. The following discussion relates to the Trust s absolute performance based on NAV:

#### What factors influenced performance?

The high yield market traded lower for the 12-month period, largely a function of weak performance across energy and commodity-linked issues as the supply/demand environment remained challenging. An increase in global macro risks and volatility put additional pressure on the market.

The Trust s exposure to the energy sector was the leading detractor as the price of oil finished the period significantly lower, from about \$100 a barrel at the beginning of the period to below \$50 a barrel at the end of the period. This led to declines in energy-related high-yield issues. Holdings within metals & mining also detracted as those commodities came under pressure in the face of slower growth prospects. The Trust s use of leverage acted to magnify losses in both sectors. Positioning in the transportation services and gaming sectors was an additional detractor from results. Finally, exposure to the equity of high yield companies detracted from returns as well.

The Trust s selection in the health care and building materials sectors added to returns. Further, the Trust s allocation to floating-rate high yield loans contributed positively to performance, as that segment rose modestly.

A derivative strategy commonly used by the Trust is to assume short positions in equity futures in order to reduce overall risk in the portfolio and manage the volatility of its equity holdings. On balance, those positions detracted given the marginally positive performance of the overall equity market during the period. Indexed exposure to high yield credit default swaps also detracted from results.

Describe recent portfolio activity.

The Trust s positioning grew increasingly cautious over the period as sector-specific commodity risks remained elevated and investor uncertainty mounted due to uncertainties around Greece, China s equity markets, the renminbi devaluation, U.S. Federal Reserve policy, and global growth. The Trust increased its exposure to equity derivatives during the period, resulting in a net short position in equities by period end. In addition, the Trust increased its holdings in more liquid high yield positions, such as its allocation to high yield index ETFs. Finally, the Trust selectively added to names in the health care and pharmaceuticals sectors during the period, while reducing exposure to gaming.

Describe portfolio positioning at period end.

At period end, the Trust held the majority of its total portfolio in corporate bonds, with the next significant allocation in floating rate loan interests (bank loans). The Trust also held a modest percentage in common stocks, which was viewed as presenting a better risk/reward profile than CCC-rated bonds, and was hedged with equity futures. Across the rating spectrum, the Trust shighest concentration was to B-rated securities, where the investment advisor sees more value overall. The Trust also invested in catalyst driven CCC and high quality BB rated issues. The Trust was broadly diversified with holdings in more than 450 companies, while the top 25 highest conviction holdings represented about one-third of the overall portfolio. The largest individual positions included HD Supply, Inc. (building materials), Valeant Pharmaceuticals International, Inc., and First Data Corp. (technology).

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

## Trust Summary as of August 31, 2015

BlackRock Income Trust, Inc.

#### **Trust Overview**

BlackRock Income Trust, Inc. s (BKT) (the Trust ) investment objective is to manage a portfolio of high-quality securities to achieve both preservation of capital and high monthly income. The Trust seeks to achieve its investment objective by investing at least 65% of its assets in mortgage-backed securities. The Trust invests at least 80% of its assets in securities that are (i) issued or guaranteed by the U.S. government or one of its agencies or instrumentalities or (ii) rated at the time of investment either AAA by S&P or Aaa by Moody s. The Trust may invest directly in such securities or synthetically through the use of derivatives.

On June 6, 2014, the Boards of the Trust, BlackRock Income Opportunity Trust, Inc. (BNA) and BlackRock Core Bond Trust (BHK) approved the reorganizations of the Trust and BNA into BHK, with BHK continuing as the surviving fund after the reorganizations. At a special meeting of shareholders on September 30, 2014, the reorganization of the Trust into BHK was not approved by BKT shareholders.

No assurance can be given that the Trust s investment objective will be achieved.

ANNUAL REPORT AUGUST 31, 2015

## The Benefits and Risks of Leveraging

The Trusts may utilize leverage to seek to enhance the distribution rate on, and net asset value ( NAV ) of, their common shares ( Common Shares ). However, these objectives cannot be achieved in all interest rate environments.

In general, the concept of leveraging is based on the premise that the financing cost of leverage, which is based on short-term interest rates, is normally lower than the income earned by a Trust on its longer-term portfolio investments purchased with the proceeds from leverage. To the extent that the total assets of the Trusts (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, the Trusts shareholders benefit from the incremental net income. The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV.

To illustrate these concepts, assume a Trust s capitalization is \$100 million and it utilizes leverage for an additional \$30 million, creating a total value of \$130 million available for investment in longer-term income securities. If prevailing short-term interest rates are 3% and longer-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, a Trust s financing costs on the \$30 million of proceeds obtained from leverage are based on the lower short-term interest rates. At the same time, the securities purchased by a Trust with the proceeds from leverage earn income based on longer-term interest rates. In this case, a Trust s financing cost of leverage is significantly lower than the income earned on the Trusts longer-term investments acquired from such leverage proceeds, and therefore the holders of Common Shares (Common Shareholders) are the beneficiaries of the incremental net income.

However, in order to benefit shareholders, the return on assets purchased with leverage proceeds must exceed the ongoing costs associated with the leverage. If interest and other costs of leverage exceed a Trust s return on assets purchased with leverage proceeds, income to shareholders is lower than if the Trust had not used leverage. Furthermore, the value of a Trust s portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the value of a Trust s obligations under their respective leverage arrangement generally does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence a Trust s NAVs positively or negatively. Changes in the future direction of interest rates are very difficult to predict accurately, and there is no assurance that a Trust s intended leveraging strategy will be successful.

Leverage also generally causes greater changes in the Trusts NAVs, market prices and dividend rates than comparable portfolios without leverage. In a declining market, leverage is likely to cause a greater decline in the net asset value and market price of a Trusts—shares than if the Trusts were not leveraged. In addition, the Trusts may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause the Trusts to incur losses. The use of leverage may limit the Trusts—ability to invest in certain types of securities or use certain types of hedging strategies. The Trusts incur expenses in connection with the use of leverage, all of which are borne by common shareholders and may reduce income to common shareholders. Moreover, to the extent the calculation of the Trusts—investment advisory fees includes assets purchased with the proceeds of leverage, the investment advisory fees payable to the Trusts—investment advisor will be higher than if the Trusts did not use leverage.

Each Trust may utilize leverage through a credit facility or reverse repurchase agreements as described in the Notes to Financial Statements.

Under the Investment Company Act of 1940, as amended (the 1940 Act ), the Trusts are permitted to issue debt up to 33 1/3% of their total managed assets. A Trust may voluntarily elect to limit its leverage to less than the maximum amount permitted under the 1940 Act. In addition, a Trust may also be subject to certain asset coverage, leverage or portfolio composition requirements imposed by its credit facility, which may be more stringent than those imposed by the 1940 Act.

If a Trust segregates or designates on its books and records cash or liquid assets having values not less than the value of the Trust s obligations under the reverse repurchase agreement (including accrued interest), then such transaction is not considered a senior security and is not subject to the foregoing limitations and requirements under the 1940 Act.

## **Derivative Financial Instruments**

The Trusts may invest in various derivative financial instruments. Derivative financial instruments are used to obtain exposure to a security, index and/or market without owning or taking physical custody of securities or to manage market, equity, credit, interest rate, foreign currency exchange rate, commodity and/or other risks. Derivative financial instruments may give rise to a form of economic leverage. Derivative financial

instruments also involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative financial instrument. The Trusts ability to use a derivative financial instrument successfully depends on the investment advisor s ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative financial instruments may result in losses greater than if they had not been used, may limit the amount of appreciation a Trust can realize on an investment and/or may result in lower distributions paid to shareholders. The Trusts investments in these instruments are discussed in detail in the Notes to Financial Statements.

ANNUAL REPORT AUGUST 31, 2015 19

#### Schedule of Investments (continued)

BlackRock Core Bond Trust (BHK)

#### Notes to Schedule of Investments

- (a) Variable rate security. Rate shown is as of report date.
- (b) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (c) All or a portion of security has been pledged as collateral in connection with outstanding reverse repurchase agreements.
- (d) Security is perpetual in nature and has no stated maturity date.
- (e) Zero-coupon bond.
- (f) Amount is less than \$500.
- (g) During the year ended August 31, 2015, investments in issuers considered to be an affiliate of the Trust for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

	Shares Held		Shares Held	
	at August 31,	Net	at August 31,	
Affiliate	2014	Activity	2015	Income
BlackRock Liquidity Funds, TempFund, Institutional Class	742,474	9,177,891	9,920,365	\$ 3,031

(h) Represents the current yield as of report date.

For Trust compliance purposes, the Trust sindustry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by investment advisor. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

As of August 31, 2015, reverse repurchase agreements outstanding were as follows:

Counterparty	Interest Rate	Trade Date	Maturity Date <sup>1</sup>	Face Value	Face Value Including Accrued Interest
