This [post-effective] amendment designates a new effective date for a previously filed [post-effective amendment] [registration statement].

This form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act and the Securities Act registration statement number of the earlier effective registration statement for the same offering is .

CALCULATION OF REGISTRATION FEE UNDER THE SECURITIES ACT OF 1933

Title of Securities Being Registered	Amount Being Registered	Proposed Maximum Offering Price Per Share(1)	Aggregate Offering Price(2)	Amount of Registration Fee(3)
Common Shares of Beneficial Interest, no par value	2,000,000	\$13.895	\$27,790,000	\$2,798.45

- (1) Estimated solely for purposes of calculating the registration fee. Calculated on the basis of the average high and low prices of Registrant's common shares, as reported by the New York Stock Exchange on June 21, 2016, in accordance with Rule 457(c) under the Securities Act of 1933, as amended.
- (2) Estimated solely for the purpose of calculating the registration fee pursuant to Rule 457(c) under the Securities Act of 1933, as amended.
- (3) Previously paid.

BASE PROSPECTUS

Invesco High Income Trust II

2,000,000 Common Shares

The Fund. Invesco High Income Trust II (the Fund) is a diversified, closed-end management investment company.

Investment Objective. The Fund's investment objective is to provide to its common shareholders (the Common Shareholders) high current income, while seeking to preserve shareholders' capital, through investment in a professionally managed, diversified portfolio of high-income producing fixed-income securities. The Fund cannot assure investors that it will achieve its investment objective and you could lose some or all of your investment.

Investment Strategy. The Fund will invest primarily in high income producing fixed-income securities rated in the medium and lower categories by established rating agencies, or unrated securities determined by its investment adviser, Invesco Advisers, Inc. (Invesco or the Adviser), to be of comparable quality. Medium and lower grade securities are those rated BB or lower by Standard & Poor's Financial Services LLC, a subsidiary of The McGraw-Hill Companies, Inc. (S&P) or Ba or lower by Moody's Investors Service, Inc. (Moody's), or securities that are not rated by either such rating agency but are believed by the Adviser to be of comparable quality (commonly referred to as junk bonds). No limitation exists as to the rating category in which the Fund may invest.

Offerings. The Fund may offer, from time to time, up to 2,000,000 common shares of beneficial interest, no par value (Common Shares), in one or more offerings in amounts, at prices and on terms set forth in one or more supplements to this Prospectus (each a Prospectus Supplement). You should read this Prospectus and any related Prospectus Supplement carefully before you decide to invest in the Common Shares.

The Fund may offer Common Shares:

- (i) in at-the-market transactions through one or more selling agents that the Fund may designate from time to time and/or through broker-dealers that have entered into a selected dealer agreement with the Fund's selling agent(s); in such transactions, Common Shares will be sold at market prices, which shall be determined with reference to trades on the NYSE, subject to a minimum price to be established each day by the Fund, which minimum price will not be less than the current net asset value per Common Share plus the per Common Share amount of the commission to be paid;
- (ii) otherwise through agents that the Fund may designate from time to time;
- (iii) to or through underwriters or dealers; or
- (iv) directly to one or more purchasers.

The Prospectus Supplement relating to a particular offering of Common Shares will identify any agents, underwriters or dealers involved in the sale of Common Shares, and will set forth any applicable purchase price, fee, commission or discount arrangement between the Fund and agents, underwriters or dealers or among underwriters or the basis upon which such amount may be calculated. The Fund may not sell Common Shares through agents, underwriters or dealers without delivery of this Prospectus and a Prospectus Supplement. See Plan of Distribution.

Investing in Common Shares involves certain risks. An investment in the Fund is subject to investment risk, including the possible loss of the entire principal amount that you invest. The Fund may invest without limitation in securities of below investment grade quality (commonly referred to as junk bonds), which are considered predominantly speculative with respect to the issuer s capacity to pay interest and repay principal when due. See Risks beginning on page 35 of this Prospectus. Certain of these risks are summarized in Prospectus Summary Special Risk Considerations beginning on page 6 of this Prospectus. You should carefully consider these risks together with all of the other information contained in this Prospectus before making a decision to purchase Common Shares.

Neither the Securities and Exchange Commission (SEC) nor any state securities commission has approved or disapproved of these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

June 28, 2018

ii

(continued from previous page)

High income producing fixed-income securities are generally corporate fixed-income securities rated between BB/Ba and C/C by S&P and Moody's and are frequently issued by corporations in the growth stage of their development. Securities which are rated BB, B, CCC, CC and C are regarded by S&P, on balance, as predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation.

In normal market conditions, at least 65% of the Fund's assets will be invested in fixed-income securities. The fixed-income securities in which the Fund will invest will consist primarily of debt securities.

Fixed-income securities which may be acquired by the Fund include all types of debt obligations having varying terms with respect to security or credit support, subordination, purchase price, interest payments and maturity. Such obligations may include, for example, bonds, debentures, notes and obligations issued or guaranteed by the United States government or any of its political subdivisions, agencies or instrumentalities. Most debt securities in which the Fund will invest will bear interest at fixed rates. However, the Fund reserves the right to invest without limitation in fixed-income securities that have variable rates of interest or involve equity features, such as contingent interest or participation based on revenues, sales or profits. Fixed-income securities which may be acquired also include preferred stocks that have cumulative or non-cumulative dividend rights. Fixed-income securities also include convertible securities and zero coupon securities.

The Adviser. Invesco Advisers, Inc. is the Fund's investment adviser. The Adviser is an indirect wholly owned subsidiary of Invesco Ltd. The Adviser is located at 1555 Peachtree Street, N.E., Atlanta, Georgia 30309. The Adviser, a successor in interest to multiple investment advisers, has been an investment adviser since 1976. Invesco has entered into a Sub-Advisory Agreement with certain affiliates to serve as sub-advisers to the Fund, pursuant to which these affiliated sub-advisers may be appointed by Invesco from time to time to provide discretionary investment management services, investment advice, and/or order execution services to the Fund.

Financial Leverage. The Fund may use leverage in an amount of up to 33 1/3% of the Fund's total assets after the use of such leverage in an effort to maximize its returns. The Fund currently utilizes leverage in the form of borrowings. The amount of borrowings outstanding from time to time may vary, depending on the Adviser's analysis of market conditions and interest rate movements. Leverage is a speculative technique and investors should note that there are special risks and costs associated with leverage. There can be no assurance that the Fund's leverage strategy will be successful. The investment advisory fees paid by the Fund will be calculated on the basis of the Fund's Managed Assets (as defined in this Prospectus under the heading "Management of the Fund"), which includes proceeds from leverage, so the dollar amount of the management fee paid by the Fund to the Adviser will be higher (and the Adviser will be benefited to that extent) when leverage is utilized. This may create a conflict of interest between the Fund's investment adviser and holders of common shares. See "Use of Leverage."

Common Shares. The Fund's currently outstanding Common Shares are listed on the New York Stock Exchange (the NYSE) under the symbol "VLT" and the Common Shares offered by this Prospectus, subject to notice of issuance, will also be listed on the NYSE. The net asset value per Common Share at the close of business on June 25, 2018 was \$15.64, and the last reported sale price of the Common Shares on the NYSE on such date was \$13.53, representing a discount to net asset value of 13.49%. See "Market and Net Asset Value Information."

This Prospectus sets forth the information about the Fund that you should know before investing. You should keep it for future reference. More information about the Fund, including a Statement of Additional Information dated June 28, 2018, and the Fund's Annual and Semiannual Reports, has been filed with the SEC. This information is available upon written or oral request without charge from our web site at www.invesco.com/us. You may also get a copy of any of these materials, request other information about the Fund and make other inquiries by calling (800) 959-4246. The Fund's Statement of Additional Information is incorporated herein by reference. A table of contents for the Statement

of Additional Information is on page of this Prospectus. The SEC maintains a web site at www.sec.gov that contains the Fund's Statement of Additional Information, material incorporated by reference and other information about SEC registrants, including the Fund.

Common Shares are not deposits or obligations of, and are not guaranteed or endorsed by, any bank or depository institution. Common Shares are not insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

Forward-Looking Statements

This Prospectus contains or incorporates by reference forward-looking statements, within the meaning of the federal securities laws, that involve risks and uncertainties. These statements describe the Fund's plans, strategies, and goals and the Fund's beliefs and assumptions concerning future economic and other conditions and the outlook for the Fund, based on currently available information. In this Prospectus, words such as anticipates, believes, expects, objectives, goals, future, intends, seeks, will, may, could, should, and similar expressions are used in an effort to identify forward-looking statements, although some forward-looking statements may be expressed differently. The Fund is not entitled to the safe harbor for forward-looking statements pursuant to Section 27A of the Securities Act of 1933, as amended.

You should rely only on the information contained or incorporated by reference in this Prospectus. The Fund has not authorized any other person to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. The Fund is not making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted. You should assume that the information in this Prospectus is accurate only as of the date of this Prospectus. The Fund's business, financial condition and prospects may have changed since that date.

PROSPECTUS SUMMARY

This is only a summary of information contained elsewhere in this Prospectus. This summary does not contain all of the information that you should consider before investing in the Fund's common shares (the Common Shares). You should carefully read the more detailed information contained in this Prospectus and any related Prospectus Supplements, especially the information set forth under the headings Investment Objective and Policies and Risks. You may also wish to request a copy of the Fund's Statement of Additional Information, dated June 28, 2018 (the SAI), which contains additional information about the Fund.

The Fund

Invesco High Income Trust II (the Fund) is a diversified, closed-end management investment company.

The Offering

The Fund may offer, from time to time, up to 2,000,000 Common Shares, on terms to be determined at the time of the offering. The Fund will offer Common Shares at prices and on terms to be set forth in one or more supplements to this Prospectus (each a Prospectus Supplement).

The Fund may offer Common Shares:

- (i) in at-the-market transactions through one or more selling agents that the Fund may designate from time to time and/or through broker-dealers that have entered into a selected dealer agreement with the Fund's selling agent(s); in such transactions, Common Shares will be sold at market prices, which shall be determined with reference to trades on the NYSE, subject to a minimum price to be established each day by the Fund, which minimum price will not be less than the current net asset value per Common Share plus the per Common Share amount of the commission to be paid;
- (ii) otherwise through agents that the Fund may designate from time to time;
- (iii) to or through underwriters or dealers; or
- (iv) directly to one or more purchasers.

The Prospectus Supplement relating to a particular offering of Common Shares will identify any agents, underwriters or dealers involved in the sale of Common Shares, and will set forth any applicable purchase price, fee, commission or discount arrangement between the Fund and agents, underwriters or dealers or among underwriters or the basis upon which such amount may be calculated. The Fund may not sell Common Shares through agents, underwriters or dealers without delivery of this Prospectus and a Prospectus Supplement. See Plan of Distribution.

Use Of Proceeds

Unless otherwise specified in a Prospectus Supplement, the Fund intends to invest the net proceeds of an offering of Common Shares in accordance with its investment objective and policies as stated herein. It is currently anticipated that the Fund will be able to invest substantially all of the net proceeds of an offering of Common Shares in accordance with its investment objective and policies within three to six months after the completion of any such offering or the receipt of such proceeds. Pending such investment, it is anticipated that the proceeds will be invested in cash, cash equivalents or other securities, including U.S. government securities, affiliated money market funds or high quality,

short-term debt securities. The Fund may also use the proceeds for working capital purposes, including the payment of distributions, interest and operating expenses, although the Fund currently has no intent to issue Common Shares primarily for these purposes.

Investment Objective

The Fund's investment objective is to provide to its common shareholders (the Common Shareholders) high current income, while seeking to preserve shareholders' capital, through investment in a professionally managed, diversified portfolio of high-income producing fixed-income securities. The investment objective is fundamental and may not be changed without approval of a majority of the Fund's outstanding voting securities, as defined in the Investment Company Act of 1940, as amended (the 1940 Act). The Fund cannot assure investors that it will achieve its investment objective.

Investment Policies

The Fund will invest primarily in high income producing fixed-income securities rated in the medium and lower categories by established rating agencies, or unrated securities determined by Invesco Advisers, Inc. (Invesco or the Adviser) to be of comparable quality. Medium and lower grade securities are those rated BB or lower by Standard & Poor's Financial Services LLC, a subsidiary of The McGraw-Hill Companies, Inc. (S&P) or Ba or lower by Moody's Investors Service, Inc. (Moody's), or securities that are not rated by either such rating agency but are believed by the Adviser to be of comparable quality (commonly referred to as junk bonds). No limitation exists as to the rating category in which the Fund may invest. High income producing fixed-income securities are generally corporate fixed-income securities rated between BB/Ba and C/C by S&P and Moody's and are frequently issued by corporations in the growth stage of their development. Securities which are rated BB, B, CCC, CC and C are regarded by S&P, on balance, as predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation.

In normal market conditions, at least 65% of the Fund's assets will be invested in fixed-income securities. The fixed-income securities in which the Fund will invest will consist primarily of debt securities. Fixed-income securities which may be acquired by the Fund include all types of debt obligations having varying terms with respect to security or credit support, subordination, purchase price, interest payments and maturity. Such obligations may include, for example, bonds, debentures, notes and obligations issued or guaranteed by the United States government or any of its political subdivisions, agencies or instrumentalities. Most debt securities in which the Fund will invest will bear interest at fixed rates. However, the Fund reserves the right to invest without limitation in fixed-income securities that have variable rates of interest or involve equity features, such as contingent interest or participation based on revenues, sales or profits. Fixed-income securities which may be acquired also include preferred stocks that have cumulative or non-cumulative dividend rights. Fixed-income securities also include convertible securities and zero coupon securities.

The Fund may invest up to 35% of its total assets in securities rated higher than BB by S&P or higher than Ba by Moody's or unrated securities of comparable quality and may invest a higher percentage, up to 100% of its total assets, in such higher rated securities (i) when the difference in yields between quality classifications is relatively narrow, (ii) when, consistent with seeking to maintain the dollar-weighted average maturity of the Fund's portfolio of up to 12 years, high income producing fixed-income securities of appropriate maturities are unavailable or are available only at prices that the Adviser deems are unfavorable or (iii) when the Adviser determines that market conditions warrant a temporary, defensive policy.

The Fund will seek to preserve capital through portfolio diversification and by limiting investments to fixed-income securities which the Adviser believes entail reasonable credit risk. The Fund has a non-fundamental investment policy of maintaining a dollar-weighted average portfolio maturity of up to 12 years, with no limitation on the maturity of individual securities that it may acquire. Subject to the Fund's policy of maintaining a dollar-weighted average portfolio

maturity of up to 12 years, the Adviser may seek to adjust the portfolio's maturity based on its assessment of current and projected market conditions and all factors that the Adviser deems relevant. Any decisions as to the targeted maturity of the Fund's portfolio or any particular category of investments or of the Fund's portfolio generally will be made based on all pertinent market factors at any given time.

Convertible Securities. Fixed-income securities in which the Fund may invest include convertible securities. A convertible security is a bond, debenture, note, preferred stock or other security that may be converted into or exchanged for, or may otherwise entitle the holder to purchase, a prescribed amount of common stock or any equity security of the same or a different issuer within a particular period of time at a specified price or formula. A convertible security entitles the holder to receive interest paid or accrued on debt or the dividend paid on preferred stock until the convertible security matures or is redeemed, converted or exchanged. In selecting convertible securities for the Fund, the following factors, among others, will be considered by the Adviser: (1) the Adviser's own evaluations of the creditworthiness of the issuers of the securities; (2) the interest or dividend income generated by the securities; (3) the potential for capital appreciation of the securities and the underlying common stock; (4) the prices of the securities relative to the underlying common stocks; (5) the prices of the securities relative to other comparable securities; (6) whether the securities are entitled to the benefits of sinking funds or other protective conditions; (7) diversification of the Fund's portfolio as to issuers and industries; and (8) whether the securities are rated by Moody's and/or S&P and, if so, the ratings assigned.

Zero Coupon Securities. Fixed-income securities in which the Fund may invest also include zero coupon securities issued by corporations and other private entities. The Fund is permitted to invest up to 10% of its total assets in zero coupon securities. Zero coupon securities do not entitle the holder to any periodic payments of interest prior to maturity and therefore are issued and trade at a discount from their face or par value.

Loans. Consistent with the Fund's strategy of investing in income securities, the Fund may invest up to 20% of its total assets in fixed and floating rate loans. Loans are typically arranged through private negotiations between the borrower and one or more lenders. Loans generally have a more senior claim in the borrower's capital structure relative to corporate bonds or other subordinated debt. The loans in which the Fund invests are generally in the form of loan assignments and participations of all or a portion of a loan from another lender. In the case of an assignment, the Fund acquires direct rights against the borrower on the loan, however, the Fund's rights and obligations as the purchaser of an assignment may differ from, and be more limited than, those held by the assigning lender. In the case of a participation, the Fund typically has the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the participation and only upon receipt by the lender of the payments from the borrower. In the event of insolvency of the lender selling the participation, the Fund may be treated as a general creditor of the lender and may not benefit from any setoff between the lender and the borrower.

Restricted and Illiquid Securities. The Fund may invest up to 20% of its total assets in fixed-income securities that are not readily marketable, including securities restricted as to resale. No security that is not readily marketable will be acquired unless the Adviser believes such security to be of comparable quality to publicly-traded securities in which the Fund may invest. Certain fixed-income securities are somewhat liquid and may become more liquid as secondary markets for these securities continue to develop. These securities will

be included in, or excluded from, the 20% limitation on a case-by-case basis by the Adviser under the supervision of the Board of Trustees, depending on the perceived liquidity of the security and market involved.

Non-Dollar Denominated Securities. The Fund may invest a portion or all of its total assets in securities issued by foreign governments or foreign corporations; provided, however, that the Fund may not invest more than 30% of its total assets in non-U.S. dollar denominated securities. The same quality levels currently permitted by the Fund for all investments will apply to foreign investments. The Fund may invest in securities of issuers determined by the Adviser to be in developing or emerging market countries. The foregoing percentage and rating limitations apply at the time of acquisition of a security based on the last previous determination of the Fund's net asset value. Any subsequent change in any rating by a rating service or change in percentages resulting from market fluctuations or other changes in the Fund's total assets will not require elimination of any security from the Fund's portfolio. The Fund may purchase and sell foreign currency on a spot (i.e., cash) basis in connection with the settlement of transactions in securities traded in such foreign currency.

Derivatives. The Fund can invest in derivative instruments, including swap contracts (including credit default swaps, total return swaps, interest rate swaps and volatility swaps), options (including interest rate options, credit default swap options and swaptions), futures contracts (including interest rate futures) and forward foreign currency contracts. The Fund can use swap contracts, including interest rate swaps, to hedge or adjust its exposure to interest rates, and credit default swaps to create long or short exposure to corporate or sovereign debt securities. The Fund can further use total return swaps to gain exposure to a reference asset and volatility swaps to adjust the volatility profile of the Fund. The Fund can use options, including credit default swap options, to gain the right to enter into a credit default swap at a specified future date and swaptions (options on swaps) to manage interest rate risk. The Fund can use interest rate futures contracts to increase or reduce its exposure to rate changes. The Fund can engage in forward foreign currency contracts to mitigate the risk of foreign currency exposure.

Money Market Funds. To the extent permitted by applicable law and the Fund's investment objectives, policies, and restrictions, the Fund may invest all or some of its short-term cash investments in money market funds, including money market fund advised or managed by the Adviser or its affiliates. When the Fund purchases shares of another investment company, including an affiliated money market fund, the Fund will indirectly bear its proportionate share of the advisory fees and other operating expenses of such investment company and will be subject to the risks associated with the portfolio investments of the underlying investment company.

Leverage

The Fund may use leverage in an amount of up to 33 1/3% of the Fund's total assets after the use of such leverage in an effort to maximize its returns. The Fund currently utilizes leverage in the form of borrowings. The amount of borrowings outstanding from time to time may vary, depending on the Adviser's analysis of market conditions and interest rate movements.

The Fund has entered into a \$60 million amended and restated revolving credit agreement, dated August 27, 2012, as amended (the Credit Agreement), with State Street Bank and Trust Company, in its capacity as Agent, and other lending institutions party thereto. As of February 28, 2018, the Fund had outstanding borrowings under the Credit Agreement of approximately

\$47.55 million, which represented approximately 26.77% of the Fund's total assets as of such date.

The costs associated with the issuance and use of leverage are borne by the holders of the Common Shares. Because the investment management fee paid to the Adviser is calculated on the basis of the Fund's Managed Assets (as defined herein), which include the proceeds of leverage, the dollar amount of the management fee paid by the Fund to the Adviser will be higher (and the Adviser will be benefited to that extent) when leverage is utilized. There can be no assurance that the Fund's leverage strategy will be successful. See "Use of Leverage and Risks - Borrowings Risk."

Management Of The Fund

Invesco is the Fund's investment adviser. The Adviser is an indirect wholly owned subsidiary of Invesco Ltd. The Adviser is located at 1555 Peachtree Street, N.E., Atlanta, Georgia 30309. The Adviser, a successor in interest to multiple investment advisers, has been an investment adviser since 1976.

Under an investment advisory agreement between the Adviser and the Fund (the Advisory Agreement), the Fund pays the Adviser a monthly advisory fee based on the annual rate of 0.70% of the Fund's average daily Managed Assets.

Managed Assets, for purposes of the advisory fee, means the Fund's net assets, plus assets attributable to outstanding preferred shares and the amount of any borrowings incurred for the purpose of leverage (whether or not such borrowed amounts are reflected in the Fund's financial statements for purposes of GAAP).

Invesco has entered into a Sub-Advisory Agreement with certain affiliates to serve as sub-advisers to the Fund, pursuant to which these affiliated sub-advisers may be appointed by Invesco from time to time to provide discretionary investment management services, investment advice, and/or order execution services to the Fund. These affiliated sub-advisers, each of which is a registered investment adviser under the Investment Advisers Act of 1940 (the Advisers Act) are:

Invesco Asset Management Deutschland GmbH (Invesco Deutschland)

Invesco Asset Management Limited (Invesco Asset Management)

Invesco Asset Management (Japan) Limited (Invesco Japan)

Invesco Hong Kong Limited (Invesco Hong Kong)

Invesco Senior Secured Management, Inc. (Invesco Senior Secured)

Invesco Canada Ltd. (Invesco Canada);

(each a Sub-Adviser and collectively, the Sub-Advisers).

Invesco and each Sub-Adviser is an indirect wholly-owned subsidiary of Invesco Ltd.

The only fees payable to the Sub-Advisers under the Sub-Advisory Agreement are for providing discretionary investment management services. For such

services, Invesco will pay each Sub-Adviser a fee, computed daily and paid monthly, equal to (i) 40% of the monthly compensation that Invesco receives from the Fund, multiplied by (ii) the fraction equal to the net assets of such Fund as to which such Sub-Adviser shall have provided discretionary investment management services for that month divided by the net assets of such Fund for that month. Pursuant to the Sub-Advisory Agreement, this fee is reduced to reflect contractual or voluntary fee waivers or expense limitations by Invesco, if any, in effect from time to time. In no event shall the aggregate monthly fees paid to the Sub-Advisers under the Sub-Advisory Agreement exceed 40% of the monthly compensation that Invesco receives from the Fund pursuant to the Advisory Agreement, as reduced to reflect contractual or voluntary fees waivers or expense limitations by Invesco, if any.

Distributions

The Fund intends to make regular monthly distributions of all or a portion of its net investment income to Common Shareholders. The Fund expects to pay its Common Shareholders annually all or substantially all of its investment company taxable income to avoid the imposition of income and excise taxes on certain undistributed amounts a regulated investment company (RIC) under the Internal Revenue Code of 1986, as amended (the Code). Various factors will affect the level of the Fund s net investment company taxable income. The Fund may from time to time distribute less than the entire amount of income earned in a particular period. The undistributed income would be available to supplement future distributions. As a result, the distributions paid by the Fund for any particular month may be more or less than the amount of income actually earned by the Fund during that period. Undistributed income will add to the Fund s net asset value and, correspondingly, distributions from undistributed income, if any, will reduce the Fund s net asset value.

In addition, the Fund intends to distribute, on an annual basis, all or substantially all of any net capital gains to its Common Shareholders. The Fund may also declare and pay capital gains distributions more frequently, if necessary, in order to reduce or eliminate federal excise or income taxes on the Fund.

The Fund reserves the right to change its distribution policy and the basis for establishing the rate of distributions at any time and may do so without prior notice to Common Shareholders.

Shareholders will automatically have all dividends and distributions reinvested in Common Shares issued by the Fund or Common Shares of the Fund purchased in the open market in accordance with the Fund's dividend reinvestment plan unless an election is made to receive cash. See Distributions and Dividend reinvestment plan.

Listing And Symbol

The Fund's currently outstanding Common Shares are listed on the New York Stock Exchange (the NYSE) under the symbol VLT and the Common Shares offered by this Prospectus, subject to notice of issuance, will also be listed on the NYSE. The net asset value per Common Share at the close of business on June 25, 2018 was \$15.64, and the last reported sale price of the Common Shares on the NYSE on such date was \$13.53, representing a discount to net asset value of 13.49%. See Market and Net Asset Value Information.

Special Risk Considerations

Investment in the Fund involves special risk considerations, which are summarized below. The Fund is designed as a long-term investment and not as a trading vehicle. The Fund is not intended to be a complete investment program. The Fund's performance and the value of its investments will vary in response to changes in interest rates, inflation and other market factors. See Risks for a more complete discussion of the special risk considerations associated with an investment in the Fund.

Market Risk. Market risk is the possibility that the market values of securities owned by the Fund will decline. The net asset value of the Fund will change with changes in the value of its portfolio securities, and the value of the Fund's investments can be expected to fluctuate over time. The financial markets in general are subject to volatility and may at times experience extreme volatility and uncertainty, which may affect all investment securities, including debt securities and derivative instruments. Volatility may be greater during periods of general economic uncertainty.

Credit Risk. Credit risk refers to an issuer's ability to make timely payments of interest and principal when due. Fixed income securities are subject to the credit risk of nonpayment. The ability of issuers of fixed income securities to make timely payments of interest and principal may be adversely affected by, among other things, general economic downturns and economic factors affecting specific issuers. Nonpayment would result in a reduction of income to the Fund. The Adviser continuously monitors the issuers of securities held in the Fund. The Fund will rely on the Adviser's judgment, analysis and experience in evaluating the creditworthiness of an issuer. In its analysis, the Adviser may consider the credit ratings of nationally recognized statistical rating organizations (NRSROs) in evaluating securities, although the Adviser does not rely primarily on these ratings. Credit ratings of NRSROs evaluate only the

safety of principal and interest payments, not the market risk. In addition, ratings are general and not absolute standards of quality, and the creditworthiness of an issuer may decline significantly before an NRSRO lowers the issuer's rating. A rating downgrade does not require the Fund to dispose of a security.

Risk of Investing in Medium and Lower-Grade Securities. Securities that are in the medium and lower-grade categories generally offer higher yields than are offered by higher-grade securities of similar maturities, but they also generally involve greater risks, such as greater credit risk, market risk, volatility and illiquidity risk. Secondary market prices of medium and lower-grade securities generally are less sensitive than higher-grade securities to changes in interest rates and are more sensitive to general adverse economic changes or specific developments with respect to the particular issuers. A significant increase in interest rates or a general economic downturn may significantly affect the ability of issuers of medium and lower-grade securities to pay interest and to repay principal, or to obtain additional financing, any of which could severely disrupt the market for medium and lower-grade securities and adversely affect the market value of such securities. Such events also could lead to a higher incidence of default by issuers of medium and lower-grade securities. In addition, changes in credit risks, interest rates, the credit markets or periods of general economic uncertainty can be expected to result in increased volatility in the price of medium and lower-grade. Adverse publicity and investor perceptions, whether or not based on rational analysis, may affect the value, volatility and liquidity of medium and lower-grade securities. In the event that an issuer of securities held by the Fund experiences difficulties in the timely payment of principal and interest and such issuer seeks to restructure the terms of its borrowings, the Fund may incur additional expenses and may determine to invest additional assets with respect to such issuer or the project or projects to which the Fund's securities relate. Further, the Fund may incur additional expenses to the extent that it is required to seek recovery upon a default in the payment of interest or the repayment of principal on its portfolio holdings and the Fund may be unable to obtain full recovery on such amounts. Investments in debt obligations that are at risk of or in default present special tax issues for the Fund. Federal income tax rules are not entirely clear about issues such as when the Fund may cease to accrue interest, original issue discount or market discount, when and to what extent deductions may be taken for bad debts or worthless securities, how payments received on obligations in default should be allocated between principal and interest and whether certain exchanges of debt obligations in a workout context are taxable. These and other issues will be addressed by the Fund, in the event it invests in or holds such securities, in order to seek to ensure that it distributes sufficient income to preserve its status as a RIC.

Interest Rate Risk. When interest rates decline, the value of a portfolio invested in fixed income securities generally can be expected to rise. Conversely, when interest rates rise, the value of a portfolio invested in fixed income securities generally can be expected to decline. The prices of longer term fixed income securities generally are more volatile with respect to changes in interest rates than the prices of shorter term fixed income securities. **Current market environment because certain interest rates are near historically low levels, which may increase the Fund's exposure to risks associated with rising interest rates.** Rising interest rates could have unpredictable effects on the markets and may expose fixed-income and related markets to heightened volatility. For fixed-income securities, an increase in interest rates may lead to increased redemptions and increased portfolio turnover, which could reduce

liquidity for certain Fund investments, adversely affect values, and increase the Fund's expenses. The interest rates of floating or variable rate instruments only reset periodically. Therefore, such rate adjustments frequently lag the market. Floating or variable rate instruments may also be subject to caps or floors that may prevent rates from adjusting in response to changes in prevailing interest rates.

Income Risk. The income you receive from the Fund is based primarily on prevailing interest rates, which can vary widely over the short and long term. If interest rates decrease, your income from the Fund may decrease as well.

Borrowings Risk. Borrowing money to buy securities exposes the Fund to leverage because the Fund can achieve a return on a capital base larger than the assets that Common Shareholders have contributed to the Fund. Leveraging may cause the Fund to be more volatile because it may exaggerate the effect of any increase or decrease in the value of the Fund's portfolio securities. To the extent that the then current interest rate on and other costs related to the borrowings approaches the net return on the Fund's investment portfolio, the benefit of leverage to the Common Shareholders will be reduced, and if the then current interest rate on and other costs related to the borrowings were to exceed the net return on the Fund's portfolio, the Fund's leveraged capital structure would result in a lower rate of return to the Common Shareholders than if the Fund were not so leveraged. If the Fund's current investment income were not sufficient to meet interest requirements on the borrowings, the Fund might have to liquidate certain of its investments in order to meet required interest payments, thereby reducing the net asset value. These risks may be greater in the current market environment because interest rates are near historically low levels. Interest payments on the Fund's outstanding borrowings are based on variable rate formulas and as a result the Fund's borrowing costs will increase in a rising interest rate environment. Management of the amount of outstanding borrowings places greater reliance on the ability of the Adviser to predict trends in interest rates than if the Fund did not use leverage. Further, reduction and increase of the borrowings outstanding, and any related trading of the Fund's portfolio securities, results in increased transaction costs to the Fund and its Common Shareholders. Lenders have the right to receive interest on and repayment of principal of any borrowings, which right will be senior to those of shareholders. Any such borrowings may contain provisions limiting certain activities of the Fund, including the payment of dividends to shareholders in certain circumstances. Certain types of borrowings subject the Fund to covenants in credit agreements relating to asset coverage and portfolio composition requirements. Certain borrowings issued by the Fund also may subject the Fund to certain restrictions on investments imposed by guidelines of one or more rating agencies, which may issue ratings for such borrowings. Such guidelines may impose asset coverage or portfolio composition requirements that are more stringent than those imposed by the 1940 Act. There can be no assurance that the Fund's leverage strategy will be successful.

Call Risk. If interest rates fall, it is possible that issuers of securities with high interest rates will prepay or call their securities before their maturity dates. In this event, the proceeds from the called securities would likely be reinvested by the Fund in securities bearing the new, lower interest rates, resulting in a possible decline in the Fund's income and distributions to shareholders.

Convertible Securities Risk. The values of convertible securities in which the Fund may invest may be affected by market interest rates. The values of convertible securities also may be affected by the risk of actual issuer default on interest or principal payments and the value of the underlying stock. Additionally, an issuer may retain the right to buy back its convertible securities at a time and price unfavorable to the Fund.

Derivatives Risk. The value of a derivative instrument depends largely on (and is derived from) the value of an underlying security, currency, commodity, interest rate, index or other asset (each referred to as an underlying asset). In addition to risks relating to underlying assets, the use of derivatives may include other, possibly greater, risks, including counterparty, leverage and liquidity risks. Counterparty risk is the risk that the counterparty to the derivative contract will default on its obligation to pay the Fund the amount owed or otherwise perform under the derivative contract. Derivatives create leverage risk because they do not require payment up front equal to the economic exposure created by owning the derivative. As a result, an adverse change in the value of the underlying asset could result in the Fund sustaining a loss that is substantially greater than the amount invested in the derivative, which may make the Fund's returns more volatile and increase the risk of loss. Derivative instruments may also be less liquid than more traditional investments and the Fund may be unable to sell or close out its derivative positions at a desirable time or price. This risk may be more acute under adverse market conditions, during which the Fund may be most in need of liquidating its derivative positions. Derivatives may also be harder to value, less tax efficient and subject to changing government regulation that could impact the Fund's ability to use certain derivatives or their cost. Also, derivatives used for hedging or to gain or limit exposure to a particular market segment may not provide the expected benefits, particularly during adverse market conditions.

Foreign Securities Risk. The dollar value of the Fund's foreign investments may be affected by changes in the exchange rates between the dollar and the currencies in which those investments are traded. The value of the Fund's foreign investments may be adversely affected by political and social instability in their home countries, by changes in economic or taxation policies in those countries, or by the difficulty in enforcing obligations in those countries. Foreign companies generally may be subject to less stringent regulations than U.S. companies, including financial reporting requirements and auditing and accounting controls. As a result, there generally is less publicly available information about foreign companies than about U.S. companies. Trading in many foreign securities may be less liquid and more volatile than U.S. securities due to the size of the market or other factors.

Emerging Markets Risk. The prices of securities issued by foreign companies and governments located in developing countries may be impacted by certain factors more than those in countries with mature economies. For example, developing countries may experience higher rates of inflation or sharply devalue their currencies against the U.S. dollar, thereby causing the value of investments issued by the government or companies located in those countries to decline. Governments in developing markets may be relatively less stable. The introduction of capital controls, withholding taxes, nationalization of private assets, expropriation, social unrest, or war may result in adverse volatility in the prices of securities or currencies. Other factors may include additional transaction costs, delays in settlement procedures, and lack of timely information.

Currency/Exchange Rate Risk. The dollar value of the Fund's foreign investments will be affected by changes in the exchange rates between the dollar

and the currencies in which those investments are traded. The Fund may buy or sell currencies other than the U.S. dollar in order to capitalize on anticipated changes in exchange rates. There is no guarantee that these investments will be successful.

Liquidity Risk. Liquidity relates to the ability of a fund to sell a security in a timely manner at a price which reflects the value of that security. To the extent the Fund owns or may acquire illiquid or restricted securities, these securities may involve special registration requirements, liabilities and costs, and liquidity and valuation difficulties. The markets for lower-grade securities may be less liquid than the markets for higher-grade securities.

Risk of Investing in Loans. Loans are subject to credit risk, market risk, income risk and call risk similar to the corporate bonds in which the Fund invests. To the extent that the loans in which the Fund invests are medium- or lower-grade, such loans are subject to same type of risks generally associated with such medium- and lower-grade securities, as described above. Loans may have less credit risk than corporate bonds because loans generally have a more senior claim in the borrower's capital structure relative to corporate bonds or other subordinated debt. However, loans generally do not have as broad of a secondary market compared to corporate bonds and this may impact the market value of such loans and the Fund's ability to dispose of particular loans when necessary to meet the Fund's liquidity needs or in response to a specific economic event such as a deterioration in the creditworthiness of the borrower. The lack of a broad secondary market for loans may also make it more difficult for the Fund to value these securities and make their market values more volatile.

Risk of Investing in Bank Loans. By investing in a bank loan, the Fund becomes a member of a syndicate of lenders, who are typically represented by one or more lenders agents acting as agent for all the lenders. Certain public bank loans are illiquid, meaning the Fund may not be able to sell them quickly at a fair price, and may also be difficult to value. The secondary market for bank loans may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods. Bank loans are subject to the risk of default, which will increase in the event of an economic downturn or a substantial increase in interest rates. Because public bank loans usually rank lower in priority of payment to senior loans, they present a greater degree of investment risk due to the fact that the cash flow or other property of the borrower securing the bank loan may be insufficient to meet scheduled payments after meeting the payment obligations of the senior secured obligations of the borrower. Bank loans may therefore exhibit greater price volatility. Bank loans that are rated below investment grade share the same risks of other below investment grade securities.

Preferred Securities Risk. There are special risks associated with investing in preferred securities. Preferred securities may include provisions that permit the issuer, in its discretion, to defer or omit distributions for a certain period of time. If the Fund owns a security that is deferring or omitting its distributions, the Fund may be required to report the distribution on its tax returns, even though it may not have received this income. Further, preferred securities may lose substantial value due to the omission or deferment of dividend payments.

Unrated Securities. Many lower-grade securities are not listed for trading on any national securities exchange, and many issuers of lower-grade securities choose not to have a rating assigned to their obligations by any NRSRO. As a result, the Fund's portfolio may consist of a higher portion of unlisted or unrated securities as compared with an investment company that invests solely in higher-grade, listed securities. Unrated securities are usually not as attractive to as many buyers as are rated securities, a factor which may make unrated securities less marketable. These factors may limit the ability of the Fund to sell such securities at their fair value. The Fund may be more reliant on the Adviser's judgment and analysis in evaluating the creditworthiness of an issuer of unrated securities.

U.S. Government Obligations Risk. Obligations issued by U.S. government agencies and instrumentalities may receive varying levels of support from the government, which could affect the Fund's ability to recover should they default.

Zero Coupon/PIK Bond Risk. Prices on non-cash-paying instruments may be more sensitive to changes in the issuer's financial condition, fluctuations in interest rates and market demand/supply imbalances than cash-paying securities with similar credit ratings, and thus may be more speculative than are securities that pay interest periodically in cash. These securities may subject the Fund to greater market risk than a fund that does not own these types of securities. Special tax considerations are associated with investing in non-cash-paying instruments, such as zero coupon or PIK securities. The Adviser will weigh these concerns against the expected total returns from such instruments. For example, the Fund would be required to distribute the income on these instruments as it accrues, even though the Fund may be required to accrue that income before a corresponding receipt of cash from such instruments. Thus, the Fund may have to sell other investments or borrow money, including when it may not be advisable to do so, to make income distributions to the Common Shareholders. PIK securities may have unreliable valuations because their continuing accruals require judgments about the collectability of the deferred payments and the value of any associated collateral. Accruals on such instruments may create uncertainty about the source of distributions Common Shareholders.

Common Stock Risk. Common stock prices fluctuate for a number of reasons, including changes in investors' perceptions of the financial condition of an issuer, the general condition of the relevant stock market and broader domestic and international political and economic events. The prices of common equity securities are also sensitive to general movements in the stock market, so a drop in the stock market may depress the prices of common equity securities to which the Fund has exposure. While broad market measures of common stocks have historically generated higher average returns than debt securities, common stocks have also experienced significantly more volatility in those returns. Common equity securities in which the Fund may invest are structurally subordinated to preferred stock, bonds and other debt instruments in a company's capital structure in terms of priority to corporate income and are therefore inherently more risky than preferred stock or debt instruments of such issuers. Dividends on common equity securities which the Fund may hold are not fixed but are declared at the discretion of an issuer's board of directors. There is no guarantee that the issuers of the common equity securities in which the Fund invests will declare dividends in the future or that, if declared, they will remain at current levels or increase over time.

U.S. Government Securities Risk. U.S. Government securities historically have not involved the credit risks associated with investments in other types of debt securities, although, as a result, the yields available from U.S. Government debt securities are generally lower than the yields available from other securities. Like other debt securities, however, the values of U.S. Government securities change as interest rates fluctuate. On August 5, 2011, S&P lowered its long-term sovereign credit rating on the U.S. to AA+ from AAA. Any further downgrades of the U.S. credit rating could increase volatility in both stock and bond markets, result in higher interest rates and higher Treasury yields and increase the costs of all kinds of debt. These events could have significant adverse effects on the economy generally and could result in significant adverse impacts on securities issuers and the Fund. The Adviser cannot predict the

effects of these or similar events in the future on the U.S. economy and securities markets or on the Fund's portfolio.

Recent Market Developments Risk. Global and domestic financial markets have experienced periods of severe turmoil. The debt and equity capital markets in the United States have been negatively impacted by significant write-offs in the financial services sector relating to sub-prime mortgages and the re-pricing of credit risk, among other things. These events, along with the deterioration of the housing market, the failure of major financial institutions and the resulting United States federal government actions led to worsening general economic conditions, which materially and adversely impacted the broader financial and credit markets and reduced the availability of debt and equity capital for the market as a whole and financial firms in particular. Such market conditions may increase the volatility of the value of securities owned by the Fund, may make it more difficult for the Fund to accurately value its securities or to sell its securities on a timely basis and may adversely affect the ability of the Fund to borrow for investment purposes and increase the cost of such borrowings, which would reduce returns to the holders of Common Shares. These developments adversely affected the broader economy, and may continue to do so, which in turn may adversely affect issuers of securities owned by the Fund. Such developments could, in turn, reduce the value of securities owned by the Fund and adversely affect the net asset value of the Common Shares. Recently markets have witnessed more stabilized economic activity as expectations for an economic recovery increased. However, risks to a robust resumption of growth persist. A return to unfavorable economic conditions or sustained economic slowdown could adversely impact the Fund's portfolio.

Eurozone Risk. The European financial markets have recently experienced volatility and adverse trends due to concerns about economic downturns or rising government debt levels in several European countries, including Greece, Ireland, Italy, Portugal and Spain. Continuing uncertainty as to the status of the Euro and the European Monetary Union (the EMU) has created significant volatility in currency and financial markets generally. Investing in Euro-denominated securities entails risk of being exposed to a currency that may not fully reflect the strengths and weaknesses of the disparate European economies. In addition, it is possible that the Euro could be abandoned in the future by countries that have adopted its use. The effects of the collapse of the Euro, or of the exit of one or more countries from the EMU, on the United States and global economy and securities markets could have a significant adverse impact on the value and risk profile of the Fund's investments. If one or more EMU countries were to stop using the Euro as its primary currency, the Fund's investments in such countries may be redenominated into a different or newly adopted currency. As a result, the value of those investments could decline significantly and unpredictably. In addition, securities or other investments that are redenominated may be subject to foreign currency risk, liquidity risk and valuation risk to a greater extent than similar investments currently denominated in Euros. To the extent a currency used for redenomination purposes is not specified in respect of certain EMU-related investments, or should the Euro cease to be used entirely, the currency in which such investments are denominated may be unclear, making such investments particularly difficult to value or dispose of. The Fund may incur additional expenses to the extent it is required to seek judicial or other clarification of the denomination or value of such securities.

Legislation and Regulation Risk. The Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act), which was signed into law in July 2010, has resulted in a significant revision of the U.S. financial regulatory framework. The Dodd-Frank Act covers a broad range of topics. The regulation of various types of derivative instruments pursuant to the Dodd-Frank Act may adversely affect the Fund or its counterparties. The ultimate impact of the Dodd-Frank Act, and any resulting regulation, is not yet certain and issuers of securities in which the Fund invests may also be affected by the new legislation and regulation in ways that are currently unknown and unforeseeable. On December 11, 2015, the SEC published a proposed rule that, if adopted, would change the regulation of the use of derivative instruments and financial commitment transactions by registered investment companies. The SEC sought public comments on numerous aspects of the proposed rule, and as a result the nature of any final regulations is uncertain at this time. Such regulations could limit the implementation of the Fund's use of derivatives and impose additional compliance costs on the Fund, which could have an adverse impact on the Fund. At any time after the date of this prospectus, legislation may be enacted that could negatively affect the assets of the Fund or the issuers of such assets. Changing approaches to regulation may have a negative impact on the Fund or entities in which the Fund invests. Legislation or regulation may also change the way in which the Fund itself is regulated. There can be no assurance that future legislation, regulation or deregulation will not have a material adverse effect on the Fund or will not impair the ability of the Fund to achieve its investment objectives.

When-Issued and Delayed Delivery Transactions Risk. Securities purchased on a when-issued or delayed delivery basis may expose the Fund to counterparty risk of default as well as the risk that securities may experience fluctuations in value prior to their actual delivery. The Fund generally will not accrue income with respect to a when-issued or delayed delivery security prior to its stated delivery date. Purchasing securities on a when-issued or delayed delivery basis can involve the additional risk that the price or yield available in the market when the delivery takes place may not be as favorable as that obtained in the transaction itself.

Repurchase Agreement Risk. A repurchase agreement exposes the Fund to the risk that the party that sells the security may default on its obligation to repurchase it. The Fund may lose money because it cannot sell the security at the agreed-upon time and price or the security loses value before it can be sold. In the event of the bankruptcy or other default of a seller of a repurchase agreement, the Fund could experience both delays in liquidating the underlying securities and losses. In such an event, the Fund would be subject to risks associated with possible decline in the value of the underlying security during the period in which the Fund seeks to enforce its rights thereto, possible lack of access to income on the underlying security during this period, and expenses of enforcing its rights. In addition, the exercise of the Fund's right to liquidate the collateral underlying the repurchase agreement could involve certain costs or delays and, to the extent that proceeds from any sale upon a default of the obligation to repurchase were less than the repurchase price, the Fund could suffer a loss.

Securities Lending Risk. Securities lending is subject to the risk that loaned securities may not be available to the Fund on a timely basis and the Fund may therefore lose the opportunity to sell the securities at a desirable price. Any loss in the market price of securities loaned by the Fund that occurs during the term of the loan would be borne by the Fund and would adversely affect the Fund's performance. Also, there may be delays in recovery, or no recovery, of securities loaned or even a loss of rights in the collateral should the borrower of the securities fail financially while the loan is outstanding.

Risk of Failure To Qualify as a RIC. To qualify for the favorable U.S. federal income tax treatment generally accorded to RICs, the Fund must, among other things, derive in each taxable year at least 90% of its gross income from certain prescribed sources, meet certain asset diversification tests and distribute for each taxable year at least 90% of its investment company taxable income (generally, ordinary income plus the excess, if any, of net short-term capital gain over net long-term capital loss). If for any taxable year the Fund does not qualify as a RIC, all of its taxable income for that year (including its net capital gain) would be subject to tax at the applicable corporate income tax rate without any deduction for distributions to shareholders, and such distributions would be taxable as ordinary dividends to the extent of the Fund's current and accumulated earnings and profits.

Potential Conflicts Of Interest Risk. The Adviser and its affiliates provide a wide array of portfolio management and other asset management services to a mix of clients and may engage in ordinary course activities in which their interests or those of their clients may compete or conflict with those of the Fund. The Adviser and its affiliates may provide investment management services to other funds that follow investment objectives similar to those of the Fund. In certain circumstances, and subject to its fiduciary obligations under Advisers Act, the Adviser may have to allocate a limited investment opportunity among its clients. For additional information about potential conflicts of interest, and the way in which the Adviser and its affiliates address such conflicts please see "Investment Advisory and Other Services Potential Conflicts of Interest" in the SAI.

Market Discount Risk. Shares of closed-end management investment companies frequently trade at a discount from their net asset value, which is a risk separate and distinct from the risk that the Fund's net asset value could decrease as a result of its investment activities. Costs incurred in connection with an offering of Common Shares will be borne entirely by the Fund, which may reduce the Fund's net asset value per share. The sale of Common Shares by the Fund (or the perception that such sales may occur) may have an adverse effect on prices of Common Shares in the secondary market. An increase in the number of Common Shares available may put downward pressure on the market price for Common Shares. The Fund may, from time to time, seek the consent of Common Shareholders to permit the issuance and sale by the Fund of Common Shares at a price below the Fund's then current net asset value, subject to certain conditions, and such sales of Common Shares at price below net asset value, if any, may increase downward pressure on the market price for Common Shares. These sales, if any, also might make it more difficult for the Fund to sell additional Common Shares in the future at a time and price it deems appropriate.

Maintenance of Leverage Risk. Issuance of additional Common Shares will result in an increase in the assets of the Fund. To the extent that the Fund desires to maintain its level of leverage, as a percentage of the assets of the Fund, the Fund will be required to increase its borrowings or utilize other forms of leverage. The Fund may incur costs in connection with issuing additional leverage, and there can be no assurance that the Fund can obtain additional leverage at favorable rates. An inability by the Fund to maintain its leverage, as a percentage of the assets of the Fund, or to do so at favorable rates, may

negatively impact the Fund's financial performance, including its ability to sustain current levels of distributions on Common Shares.

Dilution Risk. The voting power of current Common Shareholders will be diluted to the extent that current Common Shareholders do not purchase Common Shares in any future offerings of Common Shares or do not purchase sufficient Common Shares to maintain their percentage interest. If the Fund is unable to invest the proceeds of such offering as intended, the Fund's per Common Share distribution may decrease and the Fund may not participate in market advances to the same extent as if such proceeds were fully invested as planned. If the Fund sells Common Shares at a price below net asset value pursuant to the consent of Common Shareholders, shareholders will experience a dilution of the aggregate net asset value per Common Share because the sale price will be less than the Fund's then-current net asset value per Common Share. Similarly, were the expenses of the offering to exceed the amount by which the sale price exceeded the Fund's then-current net asset value per Common Share, shareholders would experience a dilution of the aggregate net asset value per Common Share. This dilution will be experienced by all shareholders, irrespective of whether they purchase Common Shares in any such offering.

Anti-Takeover Provisions

In The Fund's Governing

Documents

The Fund's Certificate of Trust, as amended, the Fund's Second Amended and Restated Agreement and Declaration of Trust (the "Declaration of Trust") and the Fund's Second Amended and Restated By-Laws (collectively, the "Governing Documents") include provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to an open-end fund. These provisions could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over the then-current market price of the Common Shares. See "Anti-Takeover and Other Provisions in the Fund's Governing Documents" and "Risks Anti-Takeover Provisions in the Fund's Governing Documents."

Administrator

The Fund has entered into a master administrative services agreement with the Adviser, pursuant to which the Adviser performs or arranges for the provision of accounting and other administrative services to the Fund that are not required to be performed by the Adviser under the Advisory Agreement.

Custodian, Dividend

The custodian for the Fund is State Street Bank and Trust Company, 225 Franklin Street, Boston, Massachusetts 02110-2801.

Disbursing Agent and

Transfer Agent

The transfer agent and dividend paying agent for the Fund is Computershare Trust Company, N.A., P.O. Box 43078, Providence, Rhode Island 02940-3078.

SUMMARY OF FUND EXPENSES

The following table contains information about the costs and expenses that Common Shareholders will bear directly or indirectly. The table is based on the capital structure of the Fund as of February 28, 2018 (except as noted below). The purpose of the table and the example below is to help you understand the fees and expenses that you, as a holder of Common Shares, would bear directly or indirectly.

Common Shareholder Transaction Expenses

Sales load paid by you (as a percentage of offering price)	(1)
Offering expenses borne by Common Shareholders (as a percentage of offering price)	(1)
Dividend Reinvestment Plan fees ⁽²⁾	None

Percentage of Net Assets Attributable to Common Shares⁽³⁾

Annual Expenses	
Management fees ⁽⁴⁾	0.95%
Interest payments on borrowed funds ⁽⁵⁾	0.80%
Other expenses ⁽⁶⁾	0.20%
Total Annual Expenses	1.95%

- (1) If Common Shares to which this Prospectus relates are sold to or through underwriters, the Prospectus Supplement will set forth any applicable sales load and the estimated offering expenses borne by the Fund.
- (2) Common Shareholders will pay service fee of \$2.50 and brokerage charges if they direct the Plan Agent to sell Common Shares held in a dividend reinvestment account. See Automatic Dividend Reinvestment Plan.
- (3) Based upon average net assets applicable to Common Shares during the fiscal year ended February 28, 2018.
- (4) The Fund pays the Adviser an annual fee, payable monthly, in an amount equal to 0.70% of the Fund's average daily Managed Assets (as defined in this Prospectus under the heading Management of the Fund). The fee shown above is based upon outstanding borrowings of 26.77% of the Fund's total assets. If borrowings of more than 26.77% of the Fund's total assets is used, the management fees shown would be higher.
- (5) Based upon the Fund's outstanding borrowings as of February 28, 2018 of approximately \$47.55 million and the average daily weighted interest rate for the fiscal year ended February 28, 2018 of 2.11%.
- (6) Other expenses are based on estimated amounts for the current fiscal year.

Example

As required by relevant Securities and Exchange Commission regulations, the following example illustrates the expenses that you would pay on a \$1,000 investment in Common Shares, assuming (1) Total annual expenses of 1.95% in year one, and 1.73% in subsequent years, of net assets attributable to Common Shares and (2) a 5% annual return*:

	1 Year	3 Years	5 Years	10 Years
Total Expenses paid by Common Shareholders ⁽¹⁾	\$ 20	\$ 61	\$ 105	\$ 227

* **The Example should not be considered a representation of future expenses or returns. Actual expenses may be higher or lower than those assumed. Moreover, the Fund's actual rate of return may be higher or lower than the hypothetical 5% return shown in the example.** The example assumes that all dividends and distributions are reinvested at net asset value.

⁽¹⁾ The example above does not include sales loads or estimated offering costs. In connection with an offering of Common Shares, the Prospectus Supplement will set forth an Example including sales load and estimated offering costs.

FINANCIAL HIGHLIGHTS

The financial highlights show the Fund's financial history for the past 10 fiscal years. The financial highlights table is intended to help you understand the Fund's financial performance. The information in this table is derived from the Fund's financial statements for the fiscal year ended February 29, 2018, audited by PricewaterhouseCoopers LLP, independent registered public accounting firm for the Fund, whose report on such financial statements, together with the financial statements of the Fund, are included in the Fund's annual report to shareholders for the period ended February 28, 2018, and are incorporated by reference into the SAI. The information for each of the prior fiscal years and periods has also been audited by PricewaterhouseCoopers LLP, except that information prior to May 31, 2010 was audited by other independent registered public accountants.

The following schedule presents financial highlights for a common share of the Trust outstanding throughout the periods indicated.

	Year ended						Year ended	Two months ended	Year ended	
	February 29, 2018	February 28, 2017	February 27, 2016	February 26, 2015	February 25, 2014	February 23, 2013	February 22, 2012	February 21, 2011	December 31, 2010	December 31, 2009*

- (a) Calculated using average shares outstanding.
- (b) Includes adjustments in accordance with accounting principles generally accepted in the United States of America and as such, the net asset value for financial reporting purposes and the returns based upon those net asset values may differ from the net asset value and returns for shareholder transactions. Not annualized for periods less than one year, if applicable.
- (c) Total return assumes an investment at the common share market price at the beginning of the period indicated, reinvestment of all distributions for the period in accordance with the Trust's dividend reinvestment plan, and sale of all shares at the closing common share market price at the end of the period indicated. Not annualized for periods less than one year, if applicable.
- (d) Portfolio turnover is calculated at the fund level and is not annualized for periods less than one year, if applicable. For the year ending February 28, 2013, the portfolio turnover calculation excludes the value of securities purchases of \$94,353,288 and sold of \$25,036,644 in the effort to realign the Trust's portfolio holdings after the reorganization of Invesco High Yield Investments Fund, Inc. into the Trust.
- (e) Ratios are based on average daily net assets applicable to common shares (000's omitted) of \$132,339.
- (f) Annualized.
- (g) Ratios do not reflect the effect of dividend payments to preferred shareholders.
- (h) For the years ended October 31, 2010 and prior, ratio does not exclude facilities and maintenance fees.
- (i) Amount includes the effect of insurance settlement proceeds received related to Auction Rate Preferred Shares previously issued by the Trust. The ratio of net investment income excluding these payments would have been 6.66%.
- (j) Total shares outstanding for the year ended December 31, 2009 was 176.
- (k) Calculated by subtracting the Trust's total liabilities (not including the preferred shares and the borrowings) from the Trust's total assets and dividing this by the total number of senior indebtedness units, where one unit equals \$1,000 of senior indebtedness.
- (l) Calculated by subtracting the Trust's total liabilities (not including preferred shares) from the Trust's total assets and dividing this by preferred shares outstanding.
- N/A = Not Applicable
- * Share amounts, net asset values and common share market prices have been adjusted as a result of the 1-for-5 reverse common share split on May 22, 2009.

SENIOR SECURITIES

The following table sets forth information about the Fund's outstanding senior securities as of the end of each of the last ten fiscal years. This information for the fiscal years ended February 28, 2018, February 28, 2017, February 29, 2016, February 28, 2015, February 28, 2014, February 28, 2013 and February 29, 2012, the two month period ended February 28, 2011 and the fiscal year ended December 31, 2010 has been audited by PricewaterhouseCoopers LLP, independent registered public accounting firm for the Fund. Information prior to May 31, 2010 was audited by other independent registered public accountants.

THE FUND

Invesco High Income Trust II (the Fund) is a diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended (the 1940 Act) and organized as a statutory trust under the laws of the State of Delaware. The Fund was originally organized as a Massachusetts business trust on February 15, 1989. The Fund commenced operations on April 28, 1989. Effective as of August 27, 2012, the Fund completed a redomestication to a Delaware statutory trust. The Fund's principal office is located at 1555 Peachtree Street, N.E., Atlanta, Georgia 30309 and its phone number is (404) 439-3217.

USE OF PROCEEDS

Unless otherwise specified in a Prospectus Supplement, the Fund intends to invest the net proceeds of an offering of its common shares (the Common Shares) in accordance with its investment objective and policies as stated herein. It is currently anticipated that the Fund will be able to invest substantially all of the net proceeds of an offering of Common Shares in accordance with its investment objective and policies within three to six months after the completion of any such offering or the receipt of such proceeds. Pending such investment, it is anticipated that the proceeds will be invested in cash, cash equivalents or other securities, including U.S. government securities, affiliated money market funds or high quality, short-term debt securities. The Fund may also use the proceeds for working capital purposes, including the payment of distributions, interest and operating expenses, although the Fund currently has no intent to issue Common Shares primarily for this purpose.

MARKET AND NET ASSET VALUE INFORMATION

The Fund's currently outstanding Common Shares are listed on the New York Stock Exchange (the NYSE) under the symbol VLT and the Common Shares offered by this Prospectus, subject to notice of issuance, will also be listed on the NYSE. The Fund's Common Shares commenced trading on the NYSE in April 1989.

Shares of closed-end investment companies frequently trade at a discount from net asset value. The Common Shares have traded both at a premium and at a discount in relation to the Fund's net asset value per share. Shares of closed-end investment companies frequently trade at a discount to net asset value. Costs incurred in connection with an offering of Common Shares will be borne entirely by the Fund, which may reduce the Fund's net asset value per share. The sale of Common Shares by the Fund (or the perception that such sales may occur) may have an adverse effect on prices of Common Shares in the secondary market. An increase in the number of Common Shares available may put downward pressure on the market price for Common Shares. See Risks Risks Associated with Offerings Market Discount Risk.

The following table sets forth, for each of the periods indicated, the high and low closing market prices for the Common Shares on the NYSE, the net asset value per Common Share and the premium or discount to net asset value per Common Share at which the Common Shares were trading. Net asset value is generally determined on each day that the NYSE is open for business. See Net Asset Value for information as to the determination of the Fund's net asset value.

During Quarter Ended	Net Asset Value per Common

(1) Based on the Fund's computations.

(2) Calculated based on the information presented. Percentages are rounded.

The last reported sale price, net asset value per Common Share and percentage discount to net asset value per Common Share on June 25, 2018 was \$13.53, \$15.64 and 13.49%, respectively. The Fund cannot predict whether its Common Shares will trade in the future at a premium to or discount from net asset value, or the level of any premium or discount. As of February 28, 2018, 8,118,429 Common Shares of the Fund were outstanding.

INVESTMENT OBJECTIVE AND POLICIES

Investment Objective

The Fund's investment objective is to provide to its Common Shareholders high current income, while seeking to preserve shareholders' capital, through investment in a professionally managed, diversified portfolio of high-income producing fixed-income securities. There can be no assurance that the Fund will achieve its investment objective or be able to structure its investments as anticipated. The investment objective is fundamental and may not be changed without approval of a majority of the Fund's outstanding voting securities, as defined in the 1940 Act. The Fund cannot assure investors that it will achieve its investment objective.

Investment Policies

The Fund will invest primarily in high income producing fixed-income securities rated in the medium and lower categories by established rating agencies, or unrated securities determined by the Adviser to be of comparable quality. Medium and lower grade securities are those rated BB or lower by Standard & Poor's Financial Services LLC, a subsidiary of The McGraw-Hill Companies, Inc. (S&P) or Ba or lower by Moody's Investors Service, Inc. (Moody's), or securities that are not rated by either such rating agency but are believed by the Adviser to be of comparable quality. No limitation exists as to the rating category in which the Fund may invest. High income producing fixed-income securities are generally corporate fixed-income securities rated between BB/Ba and C/C by S&P and

Moody's and are frequently issued by corporations in the growth stage of their development. Securities which are rated BB, B, CCC, CC and C are regarded by S&P, on balance, as predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation.

In normal market conditions, at least 65% of the Fund's assets will be invested in fixed-income securities. The fixed-income securities in which the Fund will invest will consist primarily of debt securities. Fixed-income securities which may be acquired by the Fund include all types of debt obligations having varying terms with respect to security or credit support, subordination, purchase price, interest payments and maturity. Such obligations may include, for example, bonds, debentures, notes and obligations issued or

guaranteed by the United States government or any of its political subdivisions, agencies or instrumentalities. Most debt securities in which the Fund will invest will bear interest at fixed rates. However, the Fund reserves the right to invest without limitation in fixed-income securities that have variable rates of interest or involve equity features, such as contingent interest or participation based on revenues, sales or profits. Fixed-income securities which may be acquired also include preferred stocks that have cumulative or non-cumulative dividend rights. Fixed-income securities also include convertible securities and zero coupon securities.

The Fund may invest up to 35% of its total assets in securities rated higher than BB by S&P or higher than Ba by Moody's or unrated securities of comparable quality and may invest a higher percentage, up to 100% of its total assets, in such higher rated securities (i) when the difference in yields between quality classifications is relatively narrow, (ii) when, consistent with seeking to maintain the dollar-weighted average maturity of the Fund's portfolio of up to 12 years, high income producing fixed-income securities of appropriate maturities are unavailable or are available only at prices that the Adviser deems are unfavorable or (iii) when the Adviser determines that market conditions warrant a temporary, defensive policy.

The Fund will seek to preserve capital through portfolio diversification and by limiting investments to fixed-income securities which the Adviser believes entail reasonable credit risk. The Fund has a non-fundamental investment policy of maintaining a dollar-weighted average portfolio maturity of up to 12 years, with no limitation on the maturity of individual securities that it may acquire. Subject to the Fund's policy of maintaining a dollar-weighted average portfolio maturity of up to 12 years, the Adviser may seek to adjust the portfolio's maturity based on its assessment of current and projected market conditions and all factors that the Adviser deems relevant. Any decisions as to the targeted maturity of the Fund's portfolio or any particular category of investments or of the Fund's portfolio generally will be made based on all pertinent market factors at any given time.

Convertible Securities. Fixed-income securities in which the Fund may invest include convertible securities. A convertible security is a bond, debenture, note, preferred stock or other security that may be converted into or exchanged for, or may otherwise entitle the holder to purchase, a prescribed amount of common stock or any equity security of the same or a different issuer within a particular period of time at a specified price or formula. A convertible security entitles the holder to receive interest paid or accrued on debt or the dividend paid on preferred stock until the convertible security matures or is redeemed, converted or exchanged. In selecting convertible securities for the Fund, the following factors, among others, will be considered by the Adviser: (1) the Adviser's own evaluations of the creditworthiness of the issuers of the securities; (2) the interest or dividend income generated by the securities; (3) the potential for capital appreciation of the securities and the underlying common stock; (4) the prices of the securities relative to the underlying common stocks; (5) the prices of the securities relative to other comparable securities; (6) whether the securities are entitled to the benefits of sinking funds or other protective conditions; (7) diversification of the Fund's portfolio as to issuers and industries; and (8) whether the securities are rated by Moody's and/or S&P and, if so, the ratings assigned.

Zero Coupon Securities. Fixed-income securities in which the Fund may invest also include zero coupon securities issued by corporations and other private entities. The Fund is permitted to invest up to 10% of its total assets in zero coupon securities. Zero coupon securities do not entitle the holder to any periodic payments of interest prior to maturity and therefore are issued and trade at a discount from their face or par value.

Loans. Consistent with the Fund's strategy of investing in income securities, the Fund may invest up to 20% of its total assets in fixed and floating rate loans. Loans are typically arranged through private negotiations between the borrower and one or more lenders. Loans generally have a more senior claim in the borrower's capital structure relative to corporate bonds or other subordinated debt. The loans in which the Fund invests are generally in the form of loan assignments and participations of all or a portion of a loan from another lender. In the case of an assignment, the Fund acquires direct rights against the borrower on the loan, however, the Fund's rights and obligations as the purchaser of an assignment may differ from, and be more limited than, those held by the assigning lender. In the case of a

participation, the Fund typically has the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the participation and only upon receipt by the lender of the payments from the borrower. In the event of insolvency of the lender selling the participation, the Fund may be treated as a general creditor of the lender and may not benefit from any setoff between the lender and the borrower.

Restricted and Illiquid Securities. The Fund may invest up to 20% of its total assets in fixed-income securities that are not readily marketable, including securities restricted as to resale. No security that is not readily marketable will be acquired unless the Adviser believes such security to be of comparable quality to publicly-traded securities in which the Fund may invest. Certain fixed-income securities are somewhat liquid and may become more liquid as secondary markets for these securities continue to develop. These securities will be included in, or excluded from, the 20% limitation on a case-by-case basis by the Adviser under the supervision of the Board of Trustees, depending on the perceived liquidity of the security and market involved.

Non-Dollar Denominated Securities. The Fund may invest a portion or all of its total assets in securities issued by foreign governments or foreign corporations; provided, however, that the Fund may not invest more than 30% of its total assets in non-U.S. dollar denominated securities. The same quality levels currently permitted by the Fund for all investments will apply to foreign

investments. The Fund may invest in securities of issuers determined by the Adviser to be in developing or emerging market countries. The foregoing percentage and rating limitations apply at the time of acquisition of a security based on the last previous determination of the Fund's net asset value. Any subsequent change in any rating by a rating service or change in percentages resulting from market fluctuations or other changes in the Fund's total assets will not require elimination of any security from the Fund's portfolio. The Fund may purchase and sell foreign currency on a spot (i.e., cash) basis in connection with the settlement of transactions in securities traded in such foreign currency.

Derivatives. The Fund can invest in derivative instruments, including swap contracts (including credit default swaps, total return swaps, interest rate swaps and volatility swaps), options (including interest rate options, credit default swap options and swaptions), futures contracts (including interest rate futures) and forward foreign currency contracts. The Fund can use swap contracts, including interest rate swaps, to hedge or adjust its exposure to interest rates, and credit default swaps to create long or short exposure to corporate or sovereign debt securities. The Fund can further use total return swaps to gain exposure to a reference asset and volatility swaps to adjust the volatility profile of the Fund. The Fund can use options, including credit default swap options, to gain the right to enter into a credit default swap at a specified future date and swaptions (options on swaps) to manage interest rate risk. The Fund can use interest rate futures contracts to increase or reduce its exposure to rate changes. The Fund can engage in forward foreign currency contracts to mitigate the risk of foreign currency exposure.

Money Market Funds. To the extent permitted by applicable law and the Fund's investment objectives, policies, and restrictions, the Fund may invest all or some of its short-term cash investments in money market funds, including money market fund advised or managed by the Adviser or its affiliates. When the Fund purchases shares of another investment company, including an affiliated money market fund, the Fund will indirectly bear its proportionate share of the advisory fees and other operating expenses of such investment company and will be subject to the risks associated with the portfolio investments of the underlying investment company.

THE FUND'S INVESTMENTS

Investment Grade Debt Obligations

Debt obligations include, among others, bonds, notes, debentures and variable rate demand notes. They may be U.S. dollar-denominated debt obligations issued or guaranteed by U.S. corporations or U.S. commercial banks, U.S. dollar-denominated obligations of foreign issuers and debt obligations of foreign issuers denominated in foreign currencies. In choosing corporate debt securities on behalf of the Fund, portfolio managers may consider:

- (i) general economic and financial conditions;
- (ii) the specific issuer's (a) business and management, (b) cash flow, (c) earnings coverage of interest and dividends, (d) ability to operate under adverse economic conditions, (e) fair market value of assets, and (f) in the case of foreign issuers, unique political, economic or social conditions applicable to such issuer's country; and
- (iii) other considerations deemed appropriate.

Debt securities are subject to a variety of risks, such as interest rate risk, income risk, prepayment risk, inflation risk, credit risk, currency risk and default risk.

Non-Investment Grade Debt Obligations (Junk Bonds)

Bonds rated Ba or below by Moody's and/or BB or below by S&P or Fitch Ratings, Ltd. are typically considered non-investment grade or junk bonds. Analysis of the creditworthiness of junk bond issuers is more complex than that of investment-grade issuers and the success of the Adviser in managing these decisions is more dependent upon its own credit analysis than is the case with investment-grade bonds.

The capacity of junk bonds to pay interest and repay principal is considered speculative. While junk bonds may provide an opportunity for greater income and gains, they are subject to greater risks than higher-rated debt securities. The prices of and yields on junk bonds may fluctuate to a greater extent than those of higher-rated debt securities. Junk bonds are generally more sensitive to individual issuer developments, economic conditions and regulatory changes than higher-rated bonds. Issuers of junk bonds are often issued by smaller, less-seasoned companies or companies that are highly leveraged with more traditional methods of financing unavailable to them. Junk bonds are generally at a higher risk of default because such issues are often unsecured or otherwise subordinated to claims of the issuer's other creditors. If a junk bond issuer defaults, the Fund may incur additional expenses to seek recovery. The secondary markets in which junk bonds are traded may be thin and less liquid than the market for higher-rated debt securities and the Fund may have difficulty selling certain junk bonds at the desired time and price. Less liquidity in secondary trading markets could adversely affect the price at which the Fund could sell a particular junk bond, and could cause large fluctuations in the

net asset value of that Fund's shares. The lack of a liquid secondary market may also make it more difficult for the Fund to obtain accurate market quotations in valuing junk bond assets and elements of judgment may play a greater role in the valuation.

U.S. Corporate Debt Obligations

Corporate debt obligations are debt obligations issued or guaranteed by corporations that are denominated in U.S. dollars. Such investments may include, among others, commercial paper, bonds, notes, debentures, variable rate demand notes, master notes, funding agreements and other short-term corporate instruments. Commercial Paper consists of short-term promissory notes issued by corporations. Commercial paper may be traded in the secondary market after its issuance. Variable rate demand notes are securities with a variable interest which is readjusted on pre-established dates. Variable rate demand notes are subject to payment of principal and accrued interest (usually within seven days) on the Fund's demand. Master notes are negotiated notes that permit the investment of fluctuating amounts of money at varying rates of interest pursuant to arrangements with issuers who meet the credit quality criteria of the Fund. The interest rate on a master note may fluctuate based upon changes in specified interest rates or be reset periodically according to a prescribed formula or may be a set rate. Although there is no secondary market in master notes, if such notes have a demand feature, the payee may demand payment of the principal amount of the note upon relatively short notice. Funding agreements are agreements between an insurance company and the Fund covering underlying demand notes. Although there is no secondary market in funding agreements, if the underlying notes have a demand feature, the payee may demand payment of the principal amount of the note upon relatively short notice. Master notes and funding agreements are generally illiquid and therefore subject to any applicable restrictions on investment in illiquid securities.

Loans, Loan Participations and Assignments

Loans and loan participations are interests in amounts owed by a corporate, governmental or other borrowers to another party. They may represent amounts owed to lenders or lending syndicates, to suppliers of goods or services, or to other parties. The Fund will have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the participation and only upon receipt by the lender of the payments from the borrower. In connection with purchasing participations, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loan, nor any rights of set-off against the borrower, and the Fund may not directly benefit from any collateral supporting the loan in which it has purchased the participation. As a result, the Fund will be subject to the credit risk of both the borrower and the lender that is selling the participation. In the event of the insolvency of the lender selling a participation, the Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower.

When the Fund purchases assignments from lenders, it acquires direct rights against the borrower on the loan. However, because assignments are arranged through private negotiations between potential assignees and potential assignors, the rights and obligations acquired by the Fund as the purchaser of an assignment may differ from, and be more limited than, those held by the assigning lender. In addition, if the loan is foreclosed, the Fund could be part owner of any collateral and could bear the costs and liabilities of owning and disposing of the collateral.

Investments in loans, loan participations and assignments present the possibility that the Fund could be held liable as a co-lender under emerging legal theories of lender liability. The Fund anticipates that loans, loan participations and assignments could be sold only to a limited number of institutional investors. If there is no active secondary market for a loan, it may be more difficult to sell the interests in such a loan at a price that is acceptable or to even obtain pricing information. In addition, some loans, loan participations and assignments may not be rated by major rating agencies and may not be protected by the securities laws.

Certain of the loans, loan participations or assignments acquired by the Fund may involve unfunded commitments of the lenders or revolving credit facilities under which a borrower may from time to time borrow and repay amounts up to the maximum amount of the facility. In such cases, the Fund would have an obligation to advance its portion of such additional borrowings upon the terms specified in the loan documentation. Such an obligation may have the effect of requiring the Fund to increase its investment in a company at a time when it might not be desirable to do so (including at a time when the company's financial condition makes it unlikely that such amounts will be repaid). The Fund currently intends to reserve against such contingent obligations by segregating cash or liquid assets to cover such commitments.

Convertible Securities

Convertible securities are generally bonds, debentures, notes, preferred stocks or other securities or investments that may be converted or exchanged (by the holder or by the issuer) into shares of the underlying common stock (or cash or securities of equivalent value) at a stated exchange ratio or predetermined price (the conversion price). A convertible security is designed to provide current income and also the potential for capital appreciation through the conversion feature, which enables the holder to benefit from increases in the market price of the underlying common stock. A convertible security may be called for redemption or conversion by

the issuer after a particular date and under certain circumstances (including a specified price) established upon issue. If a convertible security held by the Fund is called for redemption or conversion, the Fund could be required to tender it for redemption, convert it into the underlying common stock, or sell it to a third party, which may have an adverse effect on the Fund's ability to achieve its investment objectives. Convertible securities have general characteristics similar to both debt and equity securities.

A convertible security generally entitles the holder to receive interest paid or accrued until the convertible security matures or is redeemed, converted or exchanged. Before conversion, convertible securities have characteristics similar to non-convertible debt obligations and are designed to provide for a stable stream of income with generally higher yields than common stocks. However, there can be no assurance of current income because the issuers of the convertible securities may default on their obligations. Convertible securities rank senior to common stock in a corporation's capital structure and, therefore, generally entail less risk than the corporation's common stock. Convertible securities are subordinate in rank to any senior debt obligations of the issuer, and, therefore, an issuer's convertible securities entail more risk than its debt obligations. Moreover, convertible securities are often rated below investment grade or not rated because they fall below debt obligations and just above common stock in order of preference or priority on an issuer's balance sheet. To the extent that the Fund invests in convertible securities with credit ratings below investment grade, such securities may have a higher likelihood of default, although this may be somewhat offset by the convertibility feature.

Convertible securities generally offer lower interest or dividend yields than non-convertible debt securities of similar credit quality because of the potential for capital appreciation. The common stock underlying convertible securities may be issued by a different entity than the issuer of the convertible securities.

The value of convertible securities is influenced by both the yield of non-convertible securities of comparable issuers and by the value of the underlying common stock. The value of a convertible security viewed without regard to its conversion feature (i.e., strictly on the basis of its yield) is sometimes referred to as its investment value. The investment value of the convertible security typically will fluctuate based on the credit quality of the issuer and will fluctuate inversely with changes in prevailing interest rates. However, at the same time, the convertible security will be influenced by its conversion value, which is the market value of the underlying common stock that would be obtained if the convertible security were converted. Conversion value fluctuates directly with the price of the underlying common stock, and will therefore be subject to risks relating to the activities of the issuer and general market and economic conditions. Depending upon the relationship of the conversion price to the market value of the underlying security, a convertible security may trade more like an equity security than a debt instrument.

If, because of a low price of the common stock, the conversion value is substantially below the investment value of the convertible security, the price of the convertible security is governed principally by its investment value. Generally, if the conversion value of a convertible security increases to a point that approximates or exceeds its investment value, the value of the security will be principally influenced by its conversion value. A convertible security will sell at a premium over its conversion value to the extent investors place value on the right to acquire the underlying common stock while holding an income-producing security.

While the Fund uses the same criteria to rate a convertible debt security that it uses to rate a more conventional debt security, a convertible preferred stock is treated like a preferred stock for the Fund's financial reporting, credit rating and investment limitation purposes.

Enhanced Convertible Securities. Enhanced convertible securities are equity-linked hybrid securities that automatically convert to equity securities on a specified date. Enhanced convertibles have been designed with a variety of payoff structures, and are known by a variety of different names. Three features common to enhanced convertible securities are (i) conversion to equity securities at the maturity of the convertible (as opposed to conversion at the option of the security holder in the case of ordinary convertibles); (ii) capped or limited appreciation

potential relative to the underlying common stock; and (iii) dividend yields that are typically higher than that on the underlying common stock. Thus, enhanced convertible securities offer holders the opportunity to obtain higher current income than would be available from a traditional equity security issued by the same company in return for reduced participation in the appreciation potential of the underlying common stock. Other forms of enhanced convertible securities may involve arrangements with no interest or dividend payments made until maturity of the security or an enhanced principal amount received at maturity based on the yield and value of the underlying equity security during the security's term or at maturity.

Preferred Stock

Preferred stock, unlike common stock, often offers a specified dividend rate payable from a company's earnings. Preferred stock also generally has a preference over common stock on the distribution of a company's assets in the event the company is liquidated or declares bankruptcy; however, the rights of preferred stockholders on the distribution of a company's assets in the event of a liquidation or bankruptcy are generally subordinate to the rights of the company's debt holders and general creditors. If interest rates rise, the fixed dividend on preferred stocks may be less attractive, causing the price of preferred stocks to decline.

Some fixed rate preferred stock may have mandatory sinking fund provisions which provide for the stock to be retired or redeemed on a predetermined schedule, as well as call/redemption provisions prior to maturity, which can limit the benefit of any decline in interest rates that might positively affect the price of preferred stocks. Preferred stock dividends may be cumulative, requiring all or a portion of prior unpaid dividends to be paid before dividends are paid on the issuer's common stock. Preferred stock may be participating, which means that it may be entitled to a dividend exceeding the stated dividend in certain cases. In some cases an issuer may offer auction rate preferred stock, which means that the interest to be paid is set by auction and will often be reset at stated intervals.

Common Stock

Common stock is issued by a company principally to raise cash for business purposes and represents an equity or ownership interest in the issuing company. Common stockholders are typically entitled to vote on important matters of the issuing company, including the selection of directors, and may receive dividends on their holdings. The Fund participates in the success or failure of any company in which it holds common stock. In the event a company is liquidated or declares bankruptcy, the claims of bondholders, other debt holders, owners of preferred stock and general creditors take precedence over the claims of those who own common stock.

The prices of common stocks change in response to many factors including the historical and prospective earnings of the issuing company, the value of its assets, general economic conditions, interest rates, investor perceptions and market liquidity.

Foreign Securities

Foreign securities are equity or debt securities issued by issuers outside the United States, and include securities in the form of American Depositary Receipts (ADRs), European Depositary Receipts (EDRs), or other securities representing underlying securities of foreign issuers (foreign securities). ADRs are receipts, issued by U.S. banks, for the shares of foreign corporations, held by the bank issuing the receipt. ADRs are typically issued in registered form, denominated in U.S. dollars and designed for use in the U.S. securities markets. EDRs are similar to ADRs, except they are typically issued by European banks or trust companies, denominated in foreign currencies and designed for use outside the U.S. securities markets. ADRs and EDRs entitle the holder to all dividends and capital gains on the underlying foreign securities, less any fees paid to the bank. Purchasing ADRs or EDRs gives the Fund the ability to purchase the functional equivalent of foreign securities without going to the foreign securities markets to do so. ADRs or EDRs that are sponsored means that the foreign corporation whose shares are represented by the ADR or EDR is actively involved in the issuance of the ADR or EDR, and generally provides material information about the corporation to the U.S. market. An unsponsored ADR or EDR program means that the foreign corporation whose shares are held by the bank is not obligated to disclose material information in the United States, and, therefore, the market value of the ADR or EDR may not reflect important facts known only to the foreign company.

Foreign debt securities include corporate debt securities of foreign issuers, certain foreign bank obligations and U.S. dollar or foreign currency denominated obligations of foreign governments or their subdivisions, agencies and instrumentalities, international agencies and supranational entities.

The Fund considers various factors when determining whether a company is in a particular country, including whether: (1) it is organized under the laws of a country; (2) it has a principal office in a country; (3) it derives 50% or more of its total revenues from businesses in a country; and/or (4) its securities are traded principally on a stock exchange, or in an over-the-counter market, in a particular country.

Foreign Government Obligations

Debt securities issued by foreign governments are often, but not always, supported by the full faith and credit of the foreign governments, or their subdivisions, agencies or instrumentalities, that issue them. These securities involve the risks discussed above under Foreign Securities. Additionally, the issuer of the debt or the governmental authorities that control repayment of the debt may be unwilling or unable to pay interest or repay principal when due. Political or economic changes or the balance of trade may affect a country's willingness or ability to service its debt obligations. Periods of economic uncertainty may result in the volatility of market prices of sovereign debt obligations, especially debt obligations issued by the governments of developing countries. Foreign government obligations of developing countries, and some structures of emerging market debt securities, both of which are generally below investment grade, are sometimes referred to as Brady Bonds.

Foreign Exchange Transactions

The Fund has the authority to purchase and sell foreign currency options, foreign currency futures contracts and related options, and may engage in foreign currency transactions either on a spot (i.e., for prompt delivery and settlement) basis at the rate prevailing

in the currency exchange market at the time or through forward currency contracts. Because forward contracts are privately negotiated transactions, there can be no assurance that a counterparty will honor its obligations.

The Fund will incur any costs in converting assets from one currency to another. Foreign exchange dealers may charge a fee for conversion. In addition, dealers may realize a profit based on the difference between the prices at which they buy and sell various currencies in the spot and forward markets.

The Fund will generally engage in these transactions in order to complete a purchase or sale of foreign currency denominated securities. The Fund may also use foreign currency options and forward contracts to increase or reduce exposure to a foreign currency or to shift exposure from one foreign currency to another in a cross currency hedge. Forward contracts are intended to minimize the risk of loss due to a decline in the value of the hedged currencies; however, at the same time, they tend to limit any potential gain which might result should the value of such currencies increase. The Fund may also engage in foreign exchange transactions, such as forward contracts, for non-hedging purposes to enhance returns. Open positions in forward contracts used for non-hedging purposes will be covered by the segregation of a sufficient amount of liquid assets.

The Fund may purchase and sell currency futures and purchase and write currency options to increase or decrease its exposure to different foreign currencies. The Fund also may purchase and write currency options in connection with currency futures or forward contracts. Currency futures contracts are similar to forward currency exchange contracts, except that they are traded on exchanges and have standard contract sizes and delivery dates. Most currency futures contracts call for payment or delivery in U.S. dollars. The uses and risks of currency futures are similar to those of futures relating to securities or indices. Currency futures values can be expected to correlate with exchange rates but may not reflect other factors that affect the value of the Fund's investments.

Whether or not any hedging strategy will be successful is highly uncertain, and use of hedging strategies may leave the Fund in a less advantageous position than if a hedge had not been established. Moreover, it is impossible to forecast with precision the market value of portfolio securities at the expiration of a foreign currency forward contract. Accordingly, the Fund may be required to buy or sell additional currency on the spot market (and bear the expense of such transaction) if Invesco's or the Sub-Advisers' predictions regarding the movement of foreign currency or securities markets prove inaccurate.

The Fund may hold a portion of its assets in bank deposits denominated in foreign currencies, so as to facilitate investment in foreign securities as well as protect against currency fluctuations and the need to convert such assets into U.S. dollars (thereby also reducing transaction costs). To the extent these monies are converted back into U.S. dollars, the value of the assets so maintained will be affected favorably or unfavorably by changes in foreign currency exchange rates and exchange control regulations. Foreign exchange transactions may involve some of the risks of investments in foreign securities.

Floating Rate Corporate Loans and Corporate Debt Securities of Non-U.S. Borrowers

Floating rate loans are made to and floating rate debt securities are issued by non-U.S. borrowers. Such loans and securities may be U.S. dollar-denominated or otherwise provide for payment in U.S. dollars or may be denominated in foreign currencies. The borrower will meet the credit quality standards established by Invesco and the Sub-Advisers for U.S. borrowers. The Fund similarly may invest in floating rate loans and floating rate debt securities made to U.S. borrowers with significant non-U.S. dollar-denominated revenues. In some cases where the floating rate loans or floating rate debt securities are not denominated in U.S. dollars, provisions may be made for payments to the lenders, including the Fund, in U.S. dollars pursuant to foreign currency swaps.

U.S. Government Obligations

U.S. Government obligations are obligations issued or guaranteed by the U.S. Government, its agencies and instrumentalities, and include, among other obligations, bills, notes and bonds issued by the U.S. Treasury, as well as stripped or zero coupon U.S. Treasury obligations.

U.S. Government obligations may be (i) supported by the full faith and credit of the U.S. Treasury, (ii) supported by the right of the issuer to borrow from the U.S. Treasury, (iii) supported by the discretionary authority of the U.S. Government to purchase the agency's obligations, or (iv) supported only by the credit of the instrumentality. There is a risk that the U.S. Government may choose not to provide financial support to U.S. Government-sponsored agencies or instrumentalities if it is not legally obligated to do so. In that case, if the issuer were to default, a portfolio holding securities of such issuer might not be able to recover its investment from the U.S. Government. For example, while the U.S. Government has recently provided financial support to Federal National Mortgage Association (Fannie Mae) and Federal Home Loan Mortgage Corporation (Freddie Mac), no assurance can be given that the U.S. Government will always do so, since the U.S. Government is not so obligated by law. There also is no guarantee that the government would support Federal Home Loan Banks. Accordingly, securities of Fannie Mae, Freddie Mac and Federal Home Loan Banks, and other agencies, may involve a risk of non-payment of principal and interest.

Other Investment Companies

The Fund may purchase shares of other investment companies, including ETFs. The 1940 Act imposes the following restrictions on investments in other investment companies: (i) the Fund may not purchase more than 3% of the total outstanding voting stock of another investment company; (ii) the Fund may not invest more than 5% of its total assets in securities issued by another investment company; and (iii) the Fund may not invest more than 10% of its total assets in securities issued by other investment companies. The 1940 Act and related rules provide certain exemptions from these restrictions. For example, under certain conditions, a fund may acquire an unlimited amount of shares of mutual funds that are part of the same group of investment companies as the acquiring fund. In addition, these restrictions do not apply to investments by the Fund in investment companies that are money market funds, including money market funds that have Invesco or an affiliate of Invesco as an investment adviser (the *Affiliated Money Market Funds*).

When the Fund purchases shares of another investment company, including an *Affiliated Money Market Fund*, the Fund will indirectly bear its proportionate share of the advisory fees and other operating expenses of such investment company and will be subject to the risks associated with the portfolio investments of the underlying investment company.

Variable or Floating Rate Instruments

Variable or floating rate instruments are securities that provide for a periodic adjustment in the interest rate paid on the obligation. The interest rates for securities with variable interest rates are readjusted on set dates (such as the last day of the month or calendar quarter) and the interest rates for securities with floating rates are reset whenever a specified interest rate change occurs. Variable or floating interest rates generally reduce changes in the market price of securities from their original purchase price because, upon readjustment, such rates approximate market rates. Accordingly, as market interest rates decrease or increase, the potential for capital appreciation or depreciation is less for variable or floating rate securities than for fixed rate obligations. Many securities with variable or floating interest rates have a demand feature allowing the Fund to demand payment of principal and accrued interest prior to its maturity. The terms of such demand instruments require payment of principal and accrued interest by the issuer, a guarantor, and/or a liquidity provider. All variable or floating rate instruments will meet the applicable rating standards of the Fund.

Zero Coupon and Pay-in-Kind Securities

Zero coupon securities do not pay interest or principal until final maturity unlike debt securities that traditionally provide periodic payments of interest (referred to as a coupon payment). Investors must wait until maturity to receive interest and principal, which increases the interest rate and credit risks of a zero coupon security. Pay-in-kind securities are securities that have interest payable by delivery of additional securities. Upon maturity, the holder is entitled to receive the aggregate par value of the securities. Zero coupon and pay-in-kind securities may be subject to greater fluctuation in value and less liquidity in the event of adverse market conditions than comparably rated securities paying cash interest at regular interest payment periods. Investors may purchase zero coupon and pay-in-kind securities at a price below the amount payable at maturity.

The difference between the purchase price and the amount paid at maturity represents *original issue discount* on the security.

Restricted and Illiquid Securities

The Fund may invest up to 20% of its total assets in fixed-income securities that are not readily marketable, including securities restricted as to resale. No security that is not readily marketable will be acquired unless the Adviser believes such security to be of comparable quality to publicly-traded securities in which the Fund may invest. Certain

fixed-income securities are somewhat liquid and may become more liquid as secondary markets for these securities continue to develop. These securities will be included in, or excluded from, the 20% limitation on a case-by-case basis by the Adviser under the supervision of the Board of Trustees, depending on the perceived liquidity of the security and market involved.

Illiquid securities are securities that cannot be disposed of within seven days in the normal course of business at the price at which they are valued. Illiquid securities may include a wide variety of investments, such as: (1) repurchase agreements maturing in more than seven days (unless the agreements have demand/redemption features); (2) over-the-counter (OTC) options contracts and certain other derivatives (including certain swap agreements); (3) fixed time deposits that are not subject to prepayment or that provide for withdrawal penalties upon prepayment (other than overnight deposits); (4) loan interests and other direct debt instruments; (5) municipal lease obligations; (6) commercial paper issued pursuant to Section 4(2) of the 1933 Act; and (7) securities that are unregistered, that can be sold to qualified institutional buyers in accordance with Rule 144A under the 1933 Act, or that are exempt from registration under the 1933 Act or otherwise restricted under the federal securities laws.

Limitations on the resale of restricted securities may have an adverse effect on their marketability, which may prevent the Fund from disposing of them promptly at reasonable prices. The Fund may have to bear the expense of registering such securities for resale, and the risk of substantial delays in effecting such registrations. The Fund's difficulty valuing and selling illiquid securities may result in a loss or be costly to the Fund.

If a substantial market develops for a restricted security or other illiquid investment held by the Fund, it may be treated as a liquid security, in accordance with procedures and guidelines approved by the Board. While Invesco monitors the liquidity of restricted securities on a daily basis, the Board oversees and retains ultimate responsibility for Invesco's liquidity determinations. Invesco considers various factors when determining whether a security is liquid, including the frequency of trades, availability of quotations and number of dealers or qualified institutional buyers in the market.

Temporary Investments

The Fund may invest a portion of its assets in money market funds (including affiliated money market funds affiliated with Invesco) and in the types of money market instruments in which money market funds would invest or other short-term U.S. Government securities for cash management purposes. The Fund may invest up to 100% of its assets in investments that may be inconsistent with the Fund's principal investment strategies for temporary defensive purposes in anticipation of or in response to adverse market, economic, political or other conditions, or other atypical circumstances. As a result, the Fund may not achieve its investment objective.

Other Investment Techniques

Forward Commitments, When-Issued and Delayed Securities. Forward commitments, when-issued or delayed delivery basis means that delivery and payment take place in the future after the date of the commitment to purchase or sell the securities at a pre-determined price and/or yield. Settlement of such transactions normally occurs a month or more after the purchase or sale commitment is made. Typically, no interest accrues to the purchaser until the security is delivered. Forward commitments also include To Be Announced (TBA) mortgage-backed securities, which are contracts for the purchase or sale of mortgage-backed securities to be delivered at a future agreed upon date, whereby the specific mortgage pool numbers or the number of pools that will be delivered to fulfill the trade obligation or terms of the contract are unknown at the time of the trade. The Fund may also enter into buy/sell back transactions (a form of delayed delivery agreement). In a buy/sell back transaction, the Fund enters a trade to sell securities at one price and simultaneously enters a trade to buy the same securities at another price for settlement at a future date. Although the Fund generally intends to acquire or dispose of securities on a forward commitment, when-issued or delayed delivery basis, the Fund may sell these securities or its commitment before the settlement date if deemed advisable.

When purchasing a security on a forward commitment, when-issued or delayed delivery basis, the Fund assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuation, and takes such fluctuations into account when determining its net asset value. Securities purchased on a forward commitment, when-issued or delayed delivery basis are subject to changes in value based upon the public's perception of the creditworthiness of the issuer and changes, real or anticipated, in the level of interest rates. Accordingly, securities acquired on such a basis may expose the Fund to risks because they may experience such fluctuations prior to actual delivery. Purchasing securities on a forward commitment, when-issued or delayed delivery basis may involve the additional risk that the yield available in the market when the delivery takes place actually may be higher than that obtained in the transaction itself.

Investment in these types of securities may increase the possibility that the Fund will incur short-term gains subject to federal taxation or short-term losses if the Fund must engage in portfolio transactions in order to honor its commitment. Until the settlement date, the Fund will segregate liquid assets of a dollar value sufficient at all times to

make payment for the forward commitment, when-issued or delayed delivery transactions. Such segregated liquid assets will be marked-to-market daily, and the amount segregated will be increased if necessary to maintain adequate coverage of the delayed delivery commitments. The delayed delivery securities, which will not begin to accrue interest or dividends until the settlement date, will be recorded as an asset of the Fund and will be subject to the risk of market fluctuation. The purchase price of the delayed delivery securities is a liability of the Fund until settlement.

Lending Portfolio Securities. The Fund may lend its portfolio securities (principally to broker-dealers) to generate additional income. Such loans are callable at any time and are continuously secured by segregated collateral equal to no less than the market value, determined daily, of the loaned securities. Such collateral will be cash, letters of credit, or debt securities issued or guaranteed by the U.S. Government or any of its agencies. The Fund will loan its securities only to parties that Invesco has determined are in good standing and when, in Invesco's judgment, the income earned would justify the risks.

The Fund will not have the right to vote securities while they are on loan, but it can call a loan in anticipation of an important vote. The Fund would receive income in lieu of dividends on loaned securities and may, at the same time, generate income on the loan collateral or on the investment of any cash collateral.

If the borrower defaults on its obligation to return the securities loaned because of insolvency or other reasons, the Fund could experience delays and costs in recovering securities loaned or gaining access to the collateral. If the Fund is not able to recover the securities loaned, the Fund may sell the collateral and purchase a replacement security in the market. Lending securities entails a risk of loss to the Fund if and to the extent that the market value of the loaned securities increases and the collateral is not increased accordingly.

Any cash received as collateral for loaned securities will be invested, in accordance with the Fund's investment guidelines, in short-term money market instruments or funds. Investing this cash subjects that investment to market appreciation or depreciation. For purposes of determining whether the Fund is complying with its investment policies, strategies and restrictions, the Fund will consider the loaned securities as assets of the Fund, but will not consider any collateral received as the Fund asset. The Fund will bear any loss on the investment of cash collateral.

Repurchase Agreements. The Fund may engage in repurchase agreement transactions involving the types of securities in which it is permitted to invest. Repurchase agreements are agreements under which the Fund acquires ownership of a security from a broker-dealer or bank that agrees to repurchase the security at a mutually agreed upon time and price (which is higher than the purchase price), thereby determining the yield during the Fund's holding period. The Fund may enter into a continuing contract or open repurchase agreement under which the seller is under a continuing obligation to repurchase the underlying securities from the Fund on demand and the effective interest rate is negotiated on a daily basis. Repurchase agreements may be viewed as loans made by the Fund which are collateralized by the securities subject to repurchase.

If the seller of a repurchase agreement fails to repurchase the security in accordance with the terms of the agreement, the Fund might incur expenses in enforcing its rights, and could experience a loss on the sale of the underlying security to the extent that the proceeds of the sale including accrued interest are less than the resale price provided in the agreement, including interest. In addition, although the Bankruptcy Code and other insolvency laws may provide certain protections for some types of repurchase agreements, if the seller of a repurchase agreement should be involved in bankruptcy or insolvency proceedings, the Fund may incur delay and costs in selling the underlying security or may suffer a loss of principal and interest if the value of the underlying security declines. The securities underlying a repurchase agreement will be marked-to-market every business day so that the value of such securities is at least equal to the investment value of the repurchase agreement, including any accrued interest thereon.

The Fund may invest its cash balances in joint accounts with other Invesco funds for the purpose of investing in repurchase agreements with maturities not to exceed 60 days, and in certain other money market instruments with remaining maturities not to exceed 90 days. Repurchase agreements are considered loans by the Fund under the 1940 Act.

Reverse Repurchase Agreements. Borrowings may be made by the Fund through reverse repurchase agreements under which the Fund sells portfolio securities to financial institutions such as banks and broker-dealers and agrees to repurchase them at a particular date and price. Such agreements are considered to be borrowings under the 1940 Act. The Fund may utilize reverse repurchase agreements when it is anticipated that the interest income to be earned from the investment of the proceeds of the transaction is greater than the interest expense of the transaction.

Borrowings may be made by the Fund through dollar roll transactions. A dollar roll transaction involves a sale by the Fund of a mortgage-backed or other security concurrently with an agreement by the Fund to repurchase a similar security at a later date at an agreed-upon price. The securities that are repurchased will bear the same interest rate and stated maturity as those sold, but pools of mortgages collateralizing those securities may have different prepayment

histories than those sold. During the period between the sale and repurchase, the Fund will not be entitled to receive interest and principal payments on the securities sold. Proceeds of the sale will be invested in additional instruments for the Fund, and the income from these investments will generate income for the Fund. If such income does not exceed the income, capital appreciation and gain or loss that would have been realized on the securities sold as part of the dollar roll, the use of this technique will diminish the investment performance of the Fund compared with what the performance would have been without the use of dollar rolls.

With respect to any reverse repurchase agreement, dollar roll or similar transaction, the Fund's Managed Assets shall include any proceeds from the sale of an asset of the Fund to a counterparty in such a transaction, in addition to the value of the underlying asset as of the relevant measuring date.

With respect to leverage incurred through investments in reverse repurchase agreements, dollar rolls and economically similar transactions, the Fund intends to earmark or segregate cash or liquid securities in accordance with applicable interpretations of the

staff of the SEC. As a result of such segregation, the Fund's obligations under such transactions will not be considered senior securities representing indebtedness for purposes of the 1940 Act and the Fund's use of leverage through reverse repurchase agreements, dollar rolls and economically similar transactions will not be limited by the 1940 Act. However, the Fund's use of leverage through reverse repurchase agreements, dollar rolls and economically similar transactions will be included when calculating the Fund's leverage and therefore will be limited by the Fund's maximum overall leverage levels and may be further limited by the availability of cash or liquid securities to earmark or segregate in connection with such transactions.

Standby Commitments. The Fund may acquire securities that are subject to standby commitments from banks or other municipal securities dealers. Under a standby commitment, a bank or dealer would agree to purchase, at the Fund's option, specified securities at a specified price. Standby commitments generally increase the cost of the acquisition of the underlying security, thereby reducing the yield. Standby commitments depend upon the issuer's ability to fulfill its obligation upon demand. Although no definitive creditworthiness criteria are used for this purpose, Invesco reviews the creditworthiness of the banks and other municipal securities dealers from which the Fund obtains standby commitments in order to evaluate those risks.

Portfolio Turnover

The Fund will buy and sell securities to seek to accomplish its investment objective. Portfolio turnover generally involves some expense to the Fund, including brokerage commissions or dealer mark-ups and other transaction costs on the sale of securities and reinvestment in other securities. The Fund's portfolio turnover rate may vary greatly from year to year. For the past two fiscal years, the Fund's portfolio turnover rate was as follows.

Fiscal Year Ended	Portfolio Turnover Rate
February 28, 2018	38%
February 28, 2017	91%

Investment Restrictions

The Fund has adopted certain other investment limitations designed to limit investment risk. These limitations are fundamental and may not be changed without the approval of the holders of a majority of the outstanding Common Shares, as defined in the 1940 Act (and preferred shares, if any, voting together as a single class), which is defined by the 1940 Act as the lesser of (i) 67% or more of the Fund's voting securities present at a meeting, if the holders of more than 50% of the Fund's outstanding voting securities are present or represented by proxy; or (ii) more than 50% of the Fund's outstanding voting securities. See "Investment Restrictions" in the SAI for a complete list of the fundamental investment policies of the Fund.

USE OF LEVERAGE

The Fund may use leverage in an amount of up to 33 1/3% of the Fund's total assets after the use of such leverage in an effort to maximize its returns. The Fund currently utilizes leverage in the form of borrowings. The amount of borrowings outstanding from time to time may vary, depending on the Adviser's analysis of market conditions and interest rate movements. There can be no assurance that the Fund's leverage strategy will be successful.

Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks. There can be no assurance that a leveraging strategy will be successful. The costs associated with the issuance and use of leverage are borne by the holders of the Common Shares. The investment advisory fees paid by the Fund will be calculated on the basis of the Fund's Managed Assets (as defined in this Prospectus under the heading "Management of the Fund"), which includes proceeds from leverage, so the dollar amount of the management fee paid by the Fund to the Adviser will be higher (and the Adviser will be benefited to that extent) when leverage is utilized. This may create a conflict of interest between the Fund's investment adviser and holders of common shares. Holders of common shares effectively bear the entire investment advisory fee. Common Shareholders bear the portion of the investment advisory fee attributable to the assets purchased with the proceeds of leverage, which means that Common Shareholders effectively bear the entire advisory fee.

Borrowings

The Fund utilizes borrowings for leverage purposes in an effort to maximize its returns. Borrowings may also be utilized: (i) for temporary or emergency purposes; (ii) in anticipation of or in response to adverse market conditions; or (iii) for cash management purposes.

Under the 1940 Act, the Fund generally is not permitted to engage in borrowings unless, immediately after the borrowing, the Fund would have asset coverage (as defined in the 1940 Act) of at least 300% (i.e., the value of the Fund's total assets less liabilities other than the principal amount represented by the borrowings is at least 300% of such principal amount). In addition, other than with respect to privately arranged borrowings, the Fund is not

permitted to declare any cash dividend or other distribution on the Common Shares unless, at the time of such declaration, the value of the Fund's total assets, less liabilities other than the principal amount represented by borrowings, is at least 300% of such principal amount after deducting the amount of such dividend or other distribution. If the Fund borrows, the Fund intends, to the extent possible, to prepay all or a portion of the principal amount of any outstanding commercial paper, notes or other borrowings to the extent necessary to maintain the required asset coverage.

The terms of any such borrowings may require the Fund to pay a fee to maintain a line of credit, such as a commitment fee, or to maintain minimum average balances with a lender. Any such requirements would increase the cost of such borrowings over the stated interest rate. Such lenders would have the right to receive interest on and repayment of principal of any such borrowings, which right will be senior to those of the Common Shareholders. Any such borrowings may contain provisions limiting certain activities of the Fund, including the payment of dividends to Common Shareholders in certain circumstances.

Certain types of borrowings subject the Fund to covenants in credit agreements relating to asset coverage and portfolio composition requirements. Certain borrowings issued by the Fund also may subject the Fund to certain restrictions on investments imposed by guidelines of one or more rating agencies, which may issue ratings for such borrowings. Such guidelines may impose asset coverage or portfolio composition requirements that are more stringent than those imposed by the 1940 Act. It is not anticipated that these covenants or guidelines will impede Invesco from managing the Fund's portfolio in accordance with the Fund's investment objective and policies.

The 1940 Act grants to the holders of senior securities representing indebtedness issued by the Fund, other than with respect to privately arranged borrowings, certain voting rights in the event of default in the payment of interest on or repayment of principal. Failure to maintain certain asset coverage requirements under the 1940 Act could result in an event of default and entitle the debt holders to elect a majority of the Board of Trustees.

Credit Facility. The Fund has entered into a \$60 million amended and restated revolving credit agreement, dated August 27, 2012, as amended (the "Credit Agreement"), with State Street Bank and Trust Company, in its capacity as Agent, and other lending institutions party thereto. The Credit Agreement, which expires on November 16, 2018, is secured by the assets of the Fund. For certain commitment amounts under the Credit Agreement, the Fund pays monthly interest charges based on a variable rate formula determined based on a stated margin above the higher of the applicable LIBOR rate or the Federal Funds Rate, while certain other commitment amounts under the Credit Agreement are subject to periodic interest charges based on a variable rate formula determined based on a stated margin above the applicable LIBOR rate (each as set forth more fully under the Credit Agreement). The Fund pays quarterly commitment fees to the Agent for the account of each lending institution under the Credit Agreement (on a pro rata basis) equal to eleven basis points times the actual daily amount by which the aggregate commitment amount exceeds the aggregate principal amount of all loans outstanding (in other words, the undrawn portion of the aggregate commitment amount as of such date). If the Fund fails to satisfy certain requirements or maintain certain covenants required under the Credit Agreement, the Agent may terminate the commitments and the Fund may be required to immediately repay the loan balance outstanding (together with any accrued interest thereon). As of February 28, 2018, the Fund had outstanding borrowings under the Credit Agreement of approximately \$47.55 million, which represented approximately 26.77% of the Fund's total assets as of such date. The average daily weighted interest rate for the fiscal year ended February 28, 2018 was 2.11%.

Reverse Repurchase Agreements

Borrowings may be made by the Fund through reverse repurchase agreements under which the Fund sells portfolio securities to financial institutions such as banks and broker-dealers and agrees to repurchase them at a particular date and price. Such agreements are considered to be borrowings under the 1940 Act. The Fund may utilize reverse repurchase agreements when it is anticipated that the interest income to be earned from the investment of the proceeds of the transaction is greater than the interest expense of the transaction.

Borrowings may be made by the Fund through dollar roll transactions. A dollar roll transaction involves a sale by the Fund of a mortgage-backed or other security concurrently with an agreement by the Fund to repurchase a similar security at a later date at an agreed-upon price. The securities that are repurchased will bear the same interest rate and stated maturity as those sold, but pools of mortgages collateralizing those securities may have different prepayment histories than those sold. During the period between the sale and repurchase, the Fund will not be entitled to receive interest and principal payments on the securities sold. Proceeds of the sale will be invested in additional instruments for the Fund, and the income from these investments will generate income for the Fund. If such income does not exceed the income, capital appreciation and gain or loss that would have been realized on the securities sold as part of the dollar roll, the use of this technique will diminish the investment performance of the Fund compared with what the performance would have been without the use of dollar rolls.

With respect to any reverse repurchase agreement, dollar roll or similar transaction, the Fund's Managed Assets shall include any proceeds from the sale of an asset of the Fund to a counterparty in such a transaction, in addition to the value of the underlying asset as of the relevant measuring date.

With respect to leverage incurred through investments in reverse repurchase agreements, dollar rolls and economically similar transactions, the Fund intends to earmark or segregate cash or liquid securities in accordance with applicable interpretations of the staff of the SEC. As a result of such segregation, the Fund's obligations under such transactions will not be considered senior securities representing indebtedness for purposes of the 1940 Act and the Fund's use of leverage through reverse repurchase agreements, dollar rolls and economically similar transactions will not be limited by the 1940 Act. However, the Fund's use of leverage through reverse repurchase agreements, dollar rolls and economically similar transactions will be included when calculating the Fund's leverage and therefore will be limited by the Fund's maximum overall leverage levels and may be further limited by the availability of cash or liquid securities to earmark or segregate in connection with such transactions.

Preferred Shares

The Fund may authorize and issue preferred Shares with rights as determined by the Board of Trustees, by action of the Board of Trustees without prior approval of the holders of the Common Shares. Common Shareholders have no preemptive right to purchase any preferred shares that might be issued. Any such preferred share offering would be subject to the limits imposed by the 1940 Act. Although the Fund has no present intention to issue preferred shares. Under the 1940 Act, the Fund may not issue preferred shares if, immediately after issuance, the Fund would have asset coverage (as defined in the 1940 Act) of less than 200% (i.e., for every dollar of Preferred Shares outstanding, the Fund is required to have at least two dollars of assets). See Description of Capital Structure Preferred Shares.

Effects Of Leverage

Assuming (i) the use by the Fund of leverage representing approximately 26.77% of the Fund's total assets (including the proceeds of such leverage) and (ii) interest costs to the Fund at an average annual rate of 2.11% with respect to such leverage, then the incremental income generated by the Fund's portfolio (net of estimated expenses related to the leverage) must exceed approximately 1.19% to cover such interest expense. Of course, these numbers are merely estimates used for illustration. The amount of leverage used by the Fund as well as actual interest expenses on such leverage may vary frequently and may be significantly higher or lower than the rate estimated above.

The following table is furnished pursuant to requirements of the SEC. It is designed to illustrate the effect of leverage on Common Share total return, assuming investment portfolio total returns (comprised of income, net expenses and changes in the value of investments held in the Fund's portfolio) of -10%, -5%, 0%, 5% and 10%. These assumed investment portfolio returns are hypothetical figures and are not necessarily indicative of what the Fund's investment portfolio returns will be. The table further reflects the issuance of leverage representing approximately 26.77% of the Fund's total assets (including the proceeds of such leverage), based on the Fund's outstanding borrowings as of February 28, 2018 and annual interest rate of 2.11% with respect to such leverage (based on the average daily weighted interest rate for the fiscal year ended February 28, 2018). The table does not reflect any offering costs of Common Shares or leverage.

Assumed portfolio total return (net of expenses)	(10.00)%	(5.00)%	0.00%	5.00%	10.00%
Common Share total return	(13.88)%	(7.55)%	(1.23)%	5.09%	11.41%

Common Share total return is composed of two elements—the Common Share dividends paid by the Fund (the amount of which is largely determined by the Fund's net investment income after paying the carrying cost of leverage) and realized and unrealized gains or losses on the value of the securities the Fund owns. As required by SEC rules, the table assumes that the Fund is more likely to suffer capital loss than to enjoy capital appreciation. For example, to assume a total return of 0%, the Fund must assume that the net investment income it receives on its investments is entirely offset by losses on the value of those investments. This table reflects the hypothetical performance of the Fund's portfolio and not the performance of the Fund's Common Shares, the value of which will be determined by market and other factors.

RISKS

Risks Associated with an Investment in the Fund

Investment in the Fund involves special risk considerations, which are summarized below. The Fund is designed as a long-term investment and not as a trading vehicle. The Fund is not intended to be a complete investment program. The Fund's performance and the value of its investments will vary in response to changes in interest rates, inflation and other market factors.

Market Risk. Market risk is the possibility that the market values of securities owned by the Fund will decline. The net asset value of the Fund will change with changes in the value of its portfolio securities, and the value of the Fund's investments can be expected to fluctuate over time. The financial markets in general are subject to volatility and may at times experience extreme volatility and uncertainty, which may affect all investment securities, including debt securities and derivative instruments. Volatility may be greater during periods of general economic uncertainty.

Credit Risk. Credit risk refers to an issuer's ability to make timely payments of interest and principal when due. Fixed income securities are subject to the credit risk of nonpayment. The ability of issuers of fixed income securities to make timely payments of interest and principal may be adversely affected by, among other things, general economic downturns and economic factors affecting specific issuers. Nonpayment would result in a reduction of income to the Fund. The Adviser continuously monitors the issuers of securities held in the Fund. The Fund will rely on the Adviser's judgment, analysis and experience in evaluating the creditworthiness of an issuer. In its analysis, the Adviser may consider the credit ratings of nationally recognized statistical rating organizations

(NRSROs) in evaluating securities, although the Adviser does not rely primarily on these ratings. Credit ratings of NRSROs evaluate only the safety of principal and interest payments, not the market risk. In addition, ratings are general and not absolute standards of quality, and the creditworthiness of an issuer may decline significantly before an NRSRO lowers the issuer's rating. A rating downgrade does not require the Fund to dispose of a security.

Risk of Investing in Medium and Lower-Grade Securities. Securities that are in the medium and lower-grade categories generally offer higher yields than are offered by higher-grade securities of similar maturities, but they also generally involve greater risks, such as greater credit risk, market risk, volatility and illiquidity risk. Secondary market prices of medium and lower-grade securities generally are less sensitive than higher-grade securities to changes in interest rates and are more sensitive to general adverse economic changes or specific developments with respect to the particular issuers. A significant increase in interest rates or a general economic downturn may significantly affect the ability of issuers of medium and lower-grade securities to pay interest and to repay principal, or to obtain additional financing, any of which could severely disrupt the market for medium and lower-grade securities and adversely affect the market value of such securities. Such events also could lead to a higher incidence of default by issuers of medium and lower-grade securities. In addition, changes in credit risks, interest rates, the credit markets or periods of general economic uncertainty can be expected to result in increased volatility in the price of medium and lower-grade.

Adverse publicity and investor perceptions, whether or not based on rational analysis, may affect the value, volatility and liquidity of medium and lower-grade securities. In the event that an issuer of securities held by the Fund experiences difficulties in the timely payment of principal and interest and such issuer seeks to restructure the terms of its borrowings, the Fund may incur additional expenses and may determine to invest additional assets with respect to such issuer or the project or projects to which the Fund's securities relate. Further, the Fund may incur additional expenses to the extent that it is required to seek recovery upon a default in the payment of interest or the repayment of principal on its portfolio holdings and the Fund may be unable to obtain full recovery on such amounts. Investments in debt obligations that are at risk of or in default present special tax issues for the Fund. Federal income tax rules are not entirely clear about issues such as when the Fund may cease to accrue interest, original issue discount or market discount, when and to what extent deductions may be taken for bad debts or worthless securities, how payments received on obligations in default should be allocated between principal and interest and whether certain exchanges of debt obligations in a workout context are taxable. These and other issues will be addressed by the Fund, in the event it invests in or holds such securities, in order to seek to ensure that it distributes sufficient income to preserve its status as a regulated investment company (RIC).

Interest Rate Risk. When interest rates decline, the value of a portfolio invested in fixed income securities generally can be expected to rise. Conversely, when interest rates rise, the value of a portfolio invested in fixed income securities generally can be expected to decline. The prices of longer term fixed income securities generally are more volatile with respect to changes in interest rates than the prices of shorter term fixed income securities. **Current market environment because certain interest rates are near historically low levels, which may increase the Fund's exposure to risks associated with rising interest rates.** Rising interest rates could have unpredictable effects on the markets and may expose fixed-income and related markets to heightened volatility. For fixed-income securities, an increase in interest rates may lead to increased redemptions and increased portfolio turnover, which could reduce liquidity for certain Fund investments, adversely affect values, and increase the Fund's expenses. The interest rates of floating or variable rate instruments only reset periodically. Therefore, such rate adjustments frequently lag the market. Floating or variable rate instruments may also be subject to caps or floors that may prevent rates from adjusting in response to changes in prevailing interest rates.

Income Risk. The income you receive from the Fund is based primarily on prevailing interest rates, which can vary widely over the short and long term. If interest rates decrease, your income from the Fund may decrease as well.

Borrowings Risk. Borrowing money to buy securities exposes the Fund to leverage because the Fund can achieve a return on a capital base larger than the assets that Common Shareholders have contributed to the Fund. Leveraging may cause the Fund to be more volatile because it may exaggerate the effect of any increase or decrease in the value

of the Fund's portfolio securities. To the extent that the then current interest rate on and other costs related to the borrowings approaches the net return on the Fund's investment portfolio, the benefit of leverage to the Common Shareholders will be reduced, and if the then current interest rate on and other costs related to the borrowings were to exceed the net return on the Fund's portfolio, the Fund's leveraged capital structure would result in a lower rate of return to the Common Shareholders than if the Fund were not so leveraged. If the Fund's current investment income were not sufficient to meet interest requirements on the borrowings, the Fund might have to liquidate certain of its investments in order to meet required interest payments, thereby reducing the net asset value. These risks may be greater in the current market environment because interest rates are near historically low levels. Interest payments on the Fund's outstanding borrowings are based on variable rate formulas and as a result the Fund's borrowing costs will increase in a rising interest rate environment. Management of the amount of outstanding borrowings places greater reliance on the ability of the Adviser to predict trends in interest rates than if the Fund did not use leverage. Further, reduction and increase of the borrowings outstanding, and any related trading of the Fund's portfolio securities, results in increased transaction costs to the Fund and its Common Shareholders. Lenders have the right to receive interest on and repayment of principal of any borrowings, which right will be senior to those of shareholders. Any such borrowings may contain provisions limiting certain activities of the Fund, including the payment of dividends to shareholders in certain circumstances. Certain types of borrowings subject the Fund to covenants in credit agreements relating to asset coverage and

portfolio composition requirements. Certain borrowings issued by the Fund also may subject the Fund to certain restrictions on investments imposed by guidelines of one or more rating agencies, which may issue ratings for such borrowings. Such guidelines may impose asset coverage or portfolio composition requirements that are more stringent than those imposed by the 1940 Act. There can be no assurance that the Fund's leverage strategy will be successful.

Call Risk. If interest rates fall, it is possible that issuers of securities with high interest rates will prepay or call their securities before their maturity dates. In this event, the proceeds from the called securities would likely be reinvested by the Fund in securities bearing the new, lower interest rates, resulting in a possible decline in the Fund's income and distributions to shareholders.

Convertible Securities Risk. The values of convertible securities in which the Fund may invest may be affected by market interest rates. The values of convertible securities also may be affected by the risk of actual issuer default on interest or principal payments and the value of the underlying stock. Additionally, an issuer may retain the right to buy back its convertible securities at a time and price unfavorable to the Fund.

Derivatives Risk. The value of a derivative instrument depends largely on (and is derived from) the value of an underlying security, currency, commodity, interest rate, index or other asset (each referred to as an underlying asset). In addition to risks relating to underlying assets, the use of derivatives may include other, possibly greater, risks, including counterparty, leverage and liquidity risks. Counterparty risk is the risk that the counterparty to the derivative contract will default on its obligation to pay the Fund the amount owed or otherwise perform under the derivative contract. Derivatives create leverage risk because they do not require payment up front equal to the economic exposure created by owning the derivative. As a result, an adverse change in the value of the underlying asset could result in the Fund sustaining a loss that is substantially greater than the amount invested in the derivative, which may make the Fund's returns more volatile and increase the risk of loss. Derivative instruments may also be less liquid than more traditional investments and the Fund may be unable to sell or close out its derivative positions at a desirable time or price. This risk may be more acute under adverse market conditions, during which the Fund may be most in need of liquidating its derivative positions. Derivatives may also be harder to value, less tax efficient and subject to changing government regulation that could impact the Fund's ability to use certain derivatives or their cost. Also, derivatives used for hedging or to gain or limit exposure to a particular market segment may not provide the expected benefits, particularly during adverse market conditions.

Foreign Securities Risk. The dollar value of the Fund's foreign investments may be affected by changes in the exchange rates between the dollar and the currencies in which those investments are traded. The value of the Fund's foreign investments may be adversely affected by political and social instability in their home countries, by changes in economic or taxation policies in those countries, or by the difficulty in enforcing obligations in those countries. Foreign companies generally may be subject to less stringent regulations than U.S. companies, including financial reporting requirements and auditing and accounting controls. As a result, there generally is less publicly available information about foreign companies than about U.S. companies. Trading in many foreign securities may be less liquid and more volatile than U.S. securities due to the size of the market or other factors.

Investments by the Fund in foreign securities whether denominated in U.S. dollars or foreign currencies, may entail all of the risks set forth below in addition to those accompanying an investment in issuers in the United States.

Currency Risk. The value in U.S. dollars of any non-dollar-denominated foreign investments will be affected by changes in currency exchange rates. The U.S. dollar value of a foreign security decreases when the value of the U.S. dollar rises against the foreign currency in which the security is denominated and increases when the value of the U.S. dollar falls against such currency.

Political and Economic Risk. The economies of many countries in which the Fund may invest may not be as developed as the United States' economy and may be subject to significantly different forces. Political, economic or

social instability and development, expropriation or confiscatory taxation, and limitations on the removal of funds or other assets could also adversely affect the value of the Fund's investments.

Regulatory Risk. Foreign companies are generally not subject to the regulatory controls imposed on U.S. issuers and, as a consequence, there is generally less publicly available information about foreign securities than is available about domestic securities. Foreign companies may not be subject to uniform accounting, auditing and financial reporting standards, corporate governance practices and requirements comparable to those applicable to domestic companies. Therefore, financial information about foreign companies may be incomplete, or may not be comparable to the information available on U.S. companies. Income from foreign securities owned by the Fund may be reduced by a withholding tax at the source, which tax would reduce dividend income payable to the Fund's shareholders.

There is generally less government supervision and regulation of securities exchanges, brokers, dealers, and listed companies in foreign countries than in the United States, thus increasing the risk of delayed settlements of portfolio transactions or loss of certificates for portfolio securities. Foreign markets may also have different clearance and settlement procedures. If the Fund

experiences settlement problems it may result in temporary periods when a portion of the Fund's assets are uninvested and could cause the Fund to miss attractive investment opportunities or a potential liability to the Fund arising out of the Fund's inability to fulfill a contract to sell such securities.

Market Risk. Investing in foreign markets generally involves certain risks not typically associated with investing in the United States. The securities markets in many foreign countries will have substantially less trading volume than the U.S. markets. As a result, the securities of some foreign companies may be less liquid and experience more price volatility than comparable domestic securities. Obtaining and/or enforcing judgments in foreign countries may be more difficult, which may make it more difficult to enforce contractual obligations. Increased custodian costs as well as administrative costs (such as the need to use foreign custodians) may also be associated with the maintenance of assets in foreign jurisdictions. In addition, transaction costs in foreign securities markets are likely to be higher, since brokerage commission rates in foreign countries are likely to be higher than in the United States.

Emerging Markets Risk. The prices of securities issued by foreign companies and governments located in developing countries may be impacted by certain factors more than those in countries with mature economies. For example, developing countries may experience higher rates of inflation or sharply devalue their currencies against the U.S. dollar, thereby causing the value of investments issued by the government or companies located in those countries to decline. Governments in developing markets may be relatively less stable. The introduction of capital controls, withholding taxes, nationalization of private assets, expropriation, social unrest, or war may result in adverse volatility in the prices of securities or currencies. Other factors may include additional transaction costs, delays in settlement procedures, and lack of timely information.

Investments in developing and emerging market countries present risks in addition to, or greater than, those presented by investments in foreign issuers generally, and may include the following risks: i) restriction, to varying degrees, on foreign investment in stocks; ii) repatriation of investment income, capital, and the proceeds of sales in foreign countries may require foreign governmental registration and/or approval; iii) greater risk of fluctuation in value of foreign investments due to changes in currency exchange rates, currency control regulations or currency devaluation; iv) inflation and rapid fluctuations in inflation rates may have negative effects on the economies and securities markets of certain developing and emerging market countries; v) many of the developing and emerging market countries' securities markets are relatively small or less diverse, have low trading volumes, suffer periods of relative illiquidity, and are characterized by significant price volatility; and vi) there is a risk in developing and emerging market countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, seizure, nationalization, or creation of government monopolies.

Currency/Exchange Rate Risk. The dollar value of the Fund's foreign investments will be affected by changes in the exchange rates between the dollar and the currencies in which those investments are traded. The Fund may buy or sell currencies other than the U.S. dollar in order to capitalize on anticipated changes in exchange rates. There is no guarantee that these investments will be successful.

Liquidity Risk. Liquidity relates to the ability of a fund to sell a security in a timely manner at a price which reflects the value of that security. To the extent the Fund owns or may acquire illiquid or restricted securities, these securities may involve special registration requirements, liabilities and costs, and liquidity and valuation difficulties. The markets for lower-grade securities may be less liquid than the markets for higher-grade securities.

Risk of Investing in Loans. Loans are subject to credit risk, market risk, income risk and call risk similar to the corporate bonds in which the Fund invests. To the extent that the loans in which the Fund invests are medium- or lower-grade, such loans are subject to same type of risks generally associated with such medium- and lower-grade securities, as described above. Loans may have less credit risk than corporate bonds because loans generally have a more senior claim in the borrower's capital structure relative to corporate bonds or other subordinated debt. However, loans generally do not have as broad of a secondary market compared to corporate bonds and this may impact the

market value of such loans and the Fund's ability to dispose of particular loans when necessary to meet the Fund's liquidity needs or in response to a specific economic event such as a deterioration in the creditworthiness of the borrower. The lack of a broad secondary market for loans may also make it more difficult for the Fund to value these securities and make their market values more volatile. Unfunded commitments pursuant to loans, loan participations or assignments in which the Fund invests may have the effect of requiring the Fund to increase its investment in a company at a time when it might not be desirable to do so (including at a time when the company's financial condition makes it unlikely that such amounts will be repaid).

Risk of Investing in Bank Loans. By investing in a bank loan, the Fund becomes a member of a syndicate of lenders, who are typically represented by one or more lenders agents acting as agent for all the lenders. Certain public bank loans are illiquid, meaning the Fund may not be able to sell them quickly at a fair price, and may also be difficult to value. The secondary market for bank loans may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods. Bank loans are subject to the risk of default, which will increase in the event of an economic downturn or a substantial increase in interest rates. Because public bank loans usually rank lower in priority of payment to senior loans, they present a greater degree of investment risk due to the fact

that the cash flow or other property of the borrower securing the bank loan may be insufficient to meet scheduled payments after meeting the payment obligations of the senior secured obligations of the borrower. Bank loans may therefore exhibit greater price volatility. Bank loans that are rated below investment grade share the same risks of other below investment grade securities.

Preferred Securities Risk. There are special risks associated with investing in preferred securities. Preferred securities may include provisions that permit the issuer, in its discretion, to defer or omit distributions for a certain period of time. If the Fund owns a security that is deferring or omitting its distributions, the Fund may be required to report the distribution on its tax returns, even though it may not have received this income. Further, preferred securities may lose substantial value due to the omission or deferment of dividend payments.

Unrated Securities. Many lower-grade securities are not listed for trading on any national securities exchange, and many issuers of lower-grade securities choose not to have a rating assigned to their obligations by any NRSRO. As a result, the Fund's portfolio may consist of a higher portion of unlisted or unrated securities as compared with an investment company that invests solely in higher-grade, listed securities. Unrated securities are usually not as attractive to as many buyers as are rated securities, a factor which may make unrated securities less marketable. These factors may limit the ability of the Fund to sell such securities at their fair value. The Fund may be more reliant on the Adviser's judgment and analysis in evaluating the creditworthiness of an issuer of unrated securities.

U.S. Government Obligations Risk. Obligations issued by U.S. government agencies and instrumentalities may receive varying levels of support from the government, which could affect the Fund's ability to recover should they default.

Zero Coupon/PIK Bond Risk. Prices on non-cash-paying instruments may be more sensitive to changes in the issuer's financial condition, fluctuations in interest rates and market demand/supply imbalances than cash-paying securities with similar credit ratings, and thus may be more speculative than are securities that pay interest periodically in cash. These securities may subject the Fund to greater market risk than a fund that does not own these types of securities. Special tax considerations are associated with investing in non-cash-paying instruments, such as zero coupon or PIK securities. The Adviser will weigh these concerns against the expected total returns from such instruments. For example, the Fund would be required to distribute the income on these instruments as it accrues, even though the Fund may be required to accrue that income before a corresponding receipt of cash from such instruments. Thus, the Fund may have to sell other investments or borrow money, including when it may not be advisable to do so, to make income distributions to the Common Shareholders. PIK securities may have unreliable valuations because their continuing accruals require judgments about the collectability of the deferred payments and the value of any associated collateral. Accruals on such instruments may create uncertainty about the source of distributions Common Shareholders.

Common Stock Risk. Common stock prices fluctuate for a number of reasons, including changes in investors' perceptions of the financial condition of an issuer, the general condition of the relevant stock market and broader domestic and international political and economic events. They may also decline due to factors which affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. The value of a particular common stock held by the Fund may decline for a number of other reasons which directly relate to the issuer, such as management performance, financial leverage, the issuer's historical and prospective earnings, the value of its assets and reduced demand for its goods and services. In addition, common stock prices may be particularly sensitive to rising interest rates, as the cost of capital rises and borrowing costs increase. The prices of common equity securities are also sensitive to general movements in the stock market, so a drop in the stock market may depress the prices of common stocks and other equity securities to which the Fund has exposure. While broad market measures of common stocks have historically generated higher average returns than debt securities, common stocks have also experienced significantly more volatility in those returns. Common equity securities in which the Fund may invest are structurally subordinated to preferred stock, bonds and other debt instruments in a company's capital structure in terms of priority to corporate income and are therefore inherently more

risky than preferred stock or debt instruments of such issuers. Dividends on common equity securities which the Fund may hold are not fixed but are declared at the discretion of an issuer's board of directors. There is no guarantee that the issuers of the common equity securities in which the Fund invests will declare dividends in the future or that, if declared, they will remain at current levels or increase over time.

U.S. Government Securities Risk. U.S. Government securities historically have not involved the credit risks associated with investments in other types of debt securities, although, as a result, the yields available from U.S. Government debt securities are generally lower than the yields available from other securities. Like other debt securities, however, the values of U.S. Government securities change as interest rates fluctuate. On August 5, 2011, S&P lowered its long-term sovereign credit rating on the U.S. to AA+ from AAA. Any further downgrades of the U.S. credit rating could increase volatility in both stock and bond markets, result in higher interest rates and higher Treasury yields and increase the costs of all kinds of debt. These events could have significant adverse effects on the economy generally and could result in significant adverse impacts on securities issuers and the Fund. The Adviser cannot predict the effects of these or similar events in the future on the U.S. economy and securities markets or on the Fund's portfolio.

Recent Market Developments Risk. Global and domestic financial markets have experienced periods of severe turmoil. The debt and equity capital markets in the United States have been negatively impacted by significant write-offs in the financial services sector relating to sub-prime mortgages and the re-pricing of credit risk, among other things. These events, along with the deterioration of the housing market, the failure of major financial institutions and the resulting United States federal government actions led to worsening general economic conditions, which materially and adversely impacted the broader financial and credit markets and reduced the availability of debt and equity capital for the market as a whole and financial firms in particular. Such market conditions may increase the volatility of the value of securities owned by the Fund, may make it more difficult for the Fund to accurately value its securities or to sell its securities on a timely basis and may adversely affect the ability of the Fund to borrow for investment purposes and increase the cost of such borrowings, which would reduce returns to the holders of Common Shares. These developments adversely affected the broader economy, and may continue to do so, which in turn may adversely affect issuers of securities owned by the Fund. Such developments could, in turn, reduce the value of securities owned by the Fund and adversely affect the net asset value of the Common Shares.

Instability in the financial markets led the U.S. Government and other governments around the world to take a number of actions designed to support certain financial institutions and segments of the financial markets that experienced extreme volatility, and in some cases a lack of liquidity. The long-term implications of government ownership and disposition of distressed assets and interests in financial institutions are unclear.

Recently markets have witnessed more stabilized economic activity as expectations for an economic recovery increased. However, risks to a robust resumption of growth persist. A return to unfavorable economic conditions or sustained economic slowdown could adversely impact the Fund's portfolio. Financial market conditions, as well as various social and political tensions in the United States and around the world, have contributed to increased market volatility and may have long-term effects on the U.S. and worldwide financial markets and cause further economic uncertainties or deterioration in the United States and worldwide. The Adviser does not know how long the financial markets will continue to be affected by these events and cannot predict the effects of these or similar events in the future on the U.S. and global economies and securities markets in the Fund's portfolio. The Adviser intends to monitor developments and seek to manage the Fund's portfolio in a manner consistent with achieving the Fund's investment objectives, but there can be no assurance that they will be successful in doing so.

Eurozone Risk. The European financial markets have recently experienced volatility and adverse trends due to concerns about economic downturns or rising government debt levels in several European countries, including Greece, Ireland, Italy, Portugal and Spain. Continuing uncertainty as to the status of the Euro and the European Monetary Union (the EMU) has created significant volatility in currency and financial markets generally. Investing in Euro-denominated securities entails risk of being exposed to a currency that may not fully reflect the strengths and weaknesses of the disparate European economies. In addition, it is possible that the Euro could be abandoned in the future by countries that have adopted its use. The effects of the collapse of the Euro, or of the exit of one or more countries from the EMU, on the United States and global economy and securities markets could have a significant adverse impact on the value and risk profile of the Fund's investments. If one or more EMU countries were to stop using the Euro as its primary currency, the Fund's investments in such countries may be redenominated into a different or newly adopted currency. As a result, the value of those investments could decline significantly and unpredictably. In addition, securities or other investments that are redenominated may be subject to foreign currency risk, liquidity risk and valuation risk to a greater extent than similar investments currently denominated in Euros. To the extent a currency used for redenomination purposes is not specified in respect of certain EMU-related investments, or should the Euro cease to be used entirely, the currency in which such investments are denominated may be unclear, making such investments particularly difficult to value or dispose of. The Fund may incur additional expenses to the extent it is required to seek judicial or other clarification of the denomination or value of such securities.

Legislation and Regulation Risk. The Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act), which was signed into law in July 2010, has resulted in a significant revision of the U.S. financial regulatory

framework. The Dodd-Frank Act covers a broad range of topics, including, among many others: a reorganization of federal financial regulators; the creation of a process designed to ensure financial system stability and the resolution of potentially insolvent financial firms; the enactment of new rules for derivatives trading; the creation of a consumer financial protection watchdog; the registration and regulation of managers of private funds; the regulation of rating agencies; and the enactment of new federal requirements for residential mortgage loans. The regulation of various types of derivative instruments pursuant to the Dodd-Frank Act may adversely affect the Fund or its counterparties. The ultimate impact of the Dodd-Frank Act, and any resulting regulation, is not yet certain and issuers of securities in which the Fund invests may also be affected by the new legislation and regulation in ways that are currently unknown and unforeseeable.

On December 11, 2015, the SEC published a proposed rule that, if adopted, would change the regulation of the use of derivative instruments and financial commitment transactions by registered investment companies. The SEC sought public comments on numerous aspects of the proposed rule, and as a result the nature of any final regulations is uncertain at this time. Such regulations could limit the implementation of the Fund's use of derivatives and impose additional compliance costs on the Fund, which could

have an adverse impact on the Fund. The Adviser cannot predict the effects of these regulations on the Fund's portfolio. The Adviser intends to monitor developments and seek to manage the Fund's portfolio in a manner consistent with achieving the Fund's investment objectives, but there can be no assurance that they will be successful in doing so.

According to various reports, certain financial institutions, commencing as early as 2005 and throughout the global financial crisis, routinely made artificially low submissions in the LIBOR rate setting process. A number of financial institutions have entered into settlements with their regulators and law enforcement agencies, and have been fined significant amounts, in connection with allegations of manipulation of LIBOR. Other proceedings and investigations by regulators and governmental authorities in various jurisdictions are ongoing. These developments may have adversely affected the interest rates on securities whose interest payments were determined by reference to LIBOR. Any future similar developments could, in turn, reduce the value of such securities owned by the Fund.

At any time after the date of this prospectus, legislation may be enacted that could negatively affect the assets of the Fund or the issuers of such assets. Changing approaches to regulation may have a negative impact on the Fund or entities in which the Fund invests. Legislation or regulation may also change the way in which the Fund itself is regulated. There can be no assurance that future legislation, regulation or deregulation will not have a material adverse effect on the Fund or will not impair the ability of the Fund to achieve its investment objectives.

Portfolio Turnover Risk. The Fund's annual portfolio turnover rate may vary greatly from year to year. Portfolio turnover rate is not considered a limiting factor in the execution of investment decisions for the Fund. A higher portfolio turnover rate results in correspondingly greater brokerage commissions and other transactional expenses that are borne by the Fund. High portfolio turnover may result in an increased realization of net short-term capital gains by the Fund which, when distributed to Common Shareholders, will be taxable as ordinary income. Additionally, in a declining market, portfolio turnover may result in realized capital losses.

When-Issued and Delayed Delivery Transactions Risk. Securities purchased on a when-issued or delayed delivery basis may expose the Fund to counterparty risk of default as well as the risk that securities may experience fluctuations in value prior to their actual delivery. The Fund generally will not accrue income with respect to a when-issued or delayed delivery security prior to its stated delivery date. Purchasing securities on a when-issued or delayed delivery basis can involve the additional risk that the price or yield available in the market when the delivery takes place may not be as favorable as that obtained in the transaction itself.

Repurchase Agreement Risk. A repurchase agreement exposes the Fund to the risk that the party that sells the security may default on its obligation to repurchase it. The Fund may lose money because it cannot sell the security at the agreed-upon time and price or the security loses value before it can be sold. In the event of the bankruptcy or other default of a seller of a repurchase agreement, the Fund could experience both delays in liquidating the underlying securities and losses. In such an event, the Fund would be subject to risks associated with possible decline in the value of the underlying security during the period in which the Fund seeks to enforce its rights thereto, possible lack of access to income on the underlying security during this period, and expenses of enforcing its rights. In addition, the exercise of the Fund's right to liquidate the collateral underlying the repurchase agreement could involve certain costs or delays and, to the extent that proceeds from any sale upon a default of the obligation to repurchase were less than the repurchase price, the Fund could suffer a loss.

Securities Lending Risk. Securities lending is subject to the risk that loaned securities may not be available to the Fund on a timely basis and the Fund may therefore lose the opportunity to sell the securities at a desirable price. Any loss in the market price of securities loaned by the Fund that occurs during the term of the loan would be borne by the Fund and would adversely affect the Fund's performance. Also, there may be delays in recovery, or no recovery, of securities loaned or even a loss of rights in the collateral should the borrower of the securities fail financially while the loan is outstanding.

Risk of Failure to Qualify as a RIC. To qualify for the favorable U.S. federal income tax treatment generally accorded to RICs, the Fund must, among other things, derive in each taxable year at least 90% of its gross income from certain prescribed sources, meet certain asset diversification tests and distribute for each taxable year at least 90% of its investment company taxable income (generally, ordinary income plus the excess, if any, of net short-term capital gain over net long-term capital loss). If for any taxable year the Fund does not qualify as a RIC, all of its taxable income for that year (including its net capital gain) would be subject to tax at the applicable corporate income tax rate without any deduction for distributions to shareholders, and such distributions would be taxable as ordinary dividends to the extent of the Fund's current and accumulated earnings and profits. If the Fund fails to qualify as a RIC for any reason and becomes subject to Fund-level tax, the resulting Fund-level income taxes could substantially reduce the Fund's net asset value, the amount of income available for distribution and the amount of the Fund's distributions.

Certain of the Fund's investments will cause the Fund to take into account taxable income in a taxable year in excess of the cash generated on those investments during that year. In particular, the Fund expects to invest in loans and other debt obligations that will

be treated as having market discount and/or original issue discount (OID) for U.S. federal income tax purposes. Because the Fund may be allocated taxable income in respect of these investments before, or without receiving, cash representing such income, the Fund may have difficulty satisfying the annual distribution requirements applicable to RICs and avoiding Fund-level U.S. federal income and/or excise taxes. Accordingly, the Fund may be required to sell assets, including at potentially disadvantageous times or prices, raise additional debt or equity capital or reduce new investments, to obtain the cash needed to make these income distributions. If the Fund liquidates assets to raise cash, the Fund may realize gain or loss on such liquidations. In the event the Fund realizes gains from such liquidation transactions, the Fund and, ultimately, its Common Shareholders, may receive larger taxable distributions than it or they would in the absence of such transactions.

The Fund may invest a portion of its net assets in below investment grade instruments. Investments in these types of instruments may present special tax issues for the Fund. U.S. federal income tax rules are not entirely clear about issues such as when the Fund may cease to accrue interest, OID or market discount, when and to what extent deductions may be taken for bad debts or worthless instruments, how payments received on obligations in default should be allocated between principal and income and whether exchanges of debt obligations in a bankruptcy or workout context are taxable. These and other issues will be addressed by the Fund to the extent necessary in order to seek to ensure that it distributes sufficient income that it does not become subject to U.S. federal income or excise tax.

Potential Conflicts of Interest Risk. The Adviser and its affiliates provide a wide array of portfolio management and other asset management services to a mix of clients and may engage in ordinary course activities in which their interests or those of their clients may compete or conflict with those of the Fund. The Adviser and its affiliates may provide investment management services to other funds that follow investment objectives similar to that of the Fund. In certain circumstances, and subject to its fiduciary obligations under the Investment Advisers Act of 1940 (the Advisers Act), the Adviser may have to allocate a limited investment opportunity among its clients. For additional information about potential conflicts of interest, and the way in which the Adviser and its affiliates address such conflicts please see *Investment Advisory and Other Services Potential Conflicts of Interest* in the SAI.

Anti-Takeover Provisions in the Fund's Governing Documents Risk. The Fund's Certificate of Trust, as amended, the Fund's Second Amended and Restated Agreement and Declaration of Trust (the Declaration of Trust) and the Fund's Second Amended and Restated By-Laws (collectively, the Governing Documents) include provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to an open-end management investment company. See *Anti-Takeover and Other Provisions in the Fund's Governing Documents*.

Risks Associated with Offerings

Market Discount Risk. Costs incurred in connection with an offering of Common Shares will be borne entirely by the Fund, which may reduce the Fund's net asset value per share. The sale of Common Shares by the Fund (or the perception that such sales may occur) may have an adverse effect on prices of Common Shares in the secondary market. An increase in the number of Common Shares available may put downward pressure on the market price for Common Shares. The Fund may, from time to time, seek the consent of Common Shareholders to permit the issuance and sale by the Fund of Common Shares at a price below the Fund's then current net asset value, subject to certain conditions, and such sales of Common Shares at price below net asset value, if any, may increase downward pressure on the market price for Common Shares. These sales, if any, also might make it more difficult for the Fund to sell additional Common Shares in the future at a time and price it deems appropriate. Common Shares of the Fund are designed primarily for long-term investors; investors in Common Shares should not view the Fund as a vehicle for trading purposes.

Maintenance of Leverage Risk. Issuance of additional Common Shares will result in an increase in the assets of the Fund. To the extent that the Fund desires to maintain its level of leverage, as a percentage of the assets of the Fund, the Fund will be required to increase its borrowings or utilize other forms of leverage. The Fund may incur costs in

connection with issuing additional leverage, and there can be no assurance that the Fund can obtain additional leverage at favorable rates. An inability by the Fund to maintain its leverage, as a percentage of the assets of the Fund, or to do so at favorable rates, may negatively impact the Fund's financial performance, including its ability to sustain current levels of distributions on Common Shares. There is no guarantee that the Fund will maintain leverage at the current rate, and the Board reserves the right to raise, decrease, or eliminate the Fund's leverage exposure.

Dilution Risk. The voting power of current Common Shareholders will be diluted to the extent that current Common Shareholders do not purchase Common Shares in any future offerings of Common Shares or do not purchase sufficient Common Shares to maintain their percentage interest. If the Fund is unable to invest the proceeds of such offering as intended, the Fund's per Common Share distribution may decrease and the Fund may not participate in market advances to the same extent as if such proceeds were fully invested as planned. If the Fund sells Common Shares at a price below net asset value pursuant to the consent of Common Shareholders, shareholders will experience a dilution of the aggregate net asset value per Common Share because the sale price will be less than the Fund's then-current net asset value per Common Share. Similarly, were the expenses of the offering to exceed the amount by which the sale price exceeded the Fund's then current net asset value per Common Share, shareholders would experience a

dilution of the aggregate net asset value per Common Share. This dilution will be experienced by all shareholders, irrespective of whether they purchase Common Shares in any such offering. See Description of Capital Structure Issuance of Additional Common Shares.

MANAGEMENT OF THE FUND

Board of Trustees

The management of the Fund, including general supervision of the duties performed by the Adviser, is the responsibility of the Fund's Board of Trustees.

Adviser

Invesco Advisers, Inc. (Invesco or the Adviser) is the Fund's investment adviser. The Adviser is an indirect wholly owned subsidiary of Invesco Ltd. The Adviser is located at 1555 Peachtree Street, N.E., Atlanta, Georgia 30309. The Adviser, a successor in interest to multiple investment advisers, has been an investment adviser since 1976.

Investment Advisory Agreement

The Fund retains the Adviser to manage the investment of its assets and to place orders for the purchase and sale of its portfolio securities. Under an investment advisory agreement between the Adviser and the Fund (the Advisory Agreement), the Fund pays the Adviser a monthly advisory fee computed based on the annual rate of 0.70% of the Fund's average daily Managed Assets. Managed Assets, for purposes of the advisory fee, means the Fund's net assets, plus assets attributable to outstanding preferred shares and the amount of any borrowings incurred for the purpose of leverage (whether or not such borrowed amounts are reflected in the Fund's financial statements for purposes of GAAP).

Such fee is payable for each calendar month as soon as practicable after the end of that month. The Adviser has contractually agreed, through at least June 30, 2019, to waive the advisory fee payable by the Fund in an amount equal to 100% of the net advisory fees the Adviser receives from the affiliated money market funds on investments by the Fund of uninvested cash in such affiliated money market funds.

For the fiscal year ended February 28, 2018, the Adviser waived advisory fees of \$4,873.

The Adviser furnishes offices, necessary facilities and equipment. The Fund pays all charges and expenses of its day-to-day operations, including service fees, distribution fees, custodian fees, legal and independent registered public accounting firm fees, the costs of reports and proxies to shareholders, compensation of trustees of the Fund (other than those who are affiliated persons of the Adviser or Invesco Distributors) and all other ordinary business expenses not specifically assumed by the Adviser.

A discussion regarding the basis for the Board of Trustees' approval of the Advisory Agreement and Sub-Advisory Agreement was available in the Fund's Semiannual Report dated August 31, 2017.

Sub-Adviser

Invesco has entered into a Sub-Advisory Agreement with certain affiliates to serve as sub-advisers to the Fund, pursuant to which these affiliated sub-advisers may be appointed by Invesco from time to time to provide discretionary investment management services, investment advice, and/or order execution services to the Fund. These affiliated sub-advisers, each of which is a registered investment adviser under the Investment Advisers Act of 1940 are:

Invesco Asset Management Deutschland GmbH (Invesco Deutschland)

Invesco Asset Management Limited (Invesco Asset Management)

Invesco Asset Management (Japan) Limited (Invesco Japan)

Invesco Hong Kong Limited (Invesco Hong Kong)

Invesco Senior Secured Management, Inc. (Invesco Senior Secured)

Invesco Canada Ltd. (Invesco Canada);

(each a Sub-Adviser and collectively, the Sub-Advisers).

Invesco and each Sub-Adviser is an indirect wholly-owned subsidiary of Invesco Ltd.

The only fees payable to the Sub-Advisers under the Sub-Advisory Agreement are for providing discretionary investment management services. For such services, Invesco will pay each Sub-Adviser a fee, computed daily and paid monthly, equal to (i) 40% of the monthly compensation that Invesco receives from the Fund, multiplied by (ii) the fraction equal to the net assets of such Fund as to which such Sub-Adviser shall have provided discretionary investment management services for that month divided by the net assets of such Fund for that month. Pursuant to the Sub-Advisory Agreement, this fee is reduced to reflect contractual or voluntary fee waivers or expense limitations by Invesco, if any, in effect from time to time. In no event shall the aggregate monthly fees paid to the Sub-Advisers under the Sub-Advisory Agreement exceed 40% of the monthly compensation that Invesco receives from the Fund pursuant to the Advisory Agreement, as reduced to reflect contractual or voluntary fees waivers or expense limitations by Invesco, if any.

Portfolio Management

Investment decisions for the Fund are made by the Fund's investment management team. The following individuals are primarily responsible for the day-to-day management of the Fund.

Andrew Geryol, Portfolio Manager, who has been responsible for the Trust since 2016 and has been associated with Invesco and/or its affiliates since 2011. From 2002 to 2011, he was employed by Allstate Investments, where he held a high yield analyst position.

Jennifer Hartviksen, Portfolio Manager, who has been responsible for the Trust since 2016 and has been associated with Invesco Canada and/or its affiliates since 2013. From 2011 to 2013, she was employed by Fiera Quantum L.P., where she also served as a Senior Portfolio Manager.

Joseph Portera, Portfolio Manager, who has been responsible for the Trust since 2016 and has been associated with Invesco and/or its affiliates since 2012. From 2009 to 2012, he was a Managing Director and lead Portfolio Manager at Hartford Investment Management.

Scott Roberts, Portfolio Manager, who has been responsible for the Trust since 2010 and has been associated with Invesco and/or its affiliates since 2000.

More information on the portfolio managers may be found at www.invesco.com/us. The web site is not part of the Prospectus.

The Fund's SAI provides additional information about the portfolio managers' investments in the Fund, a description of the compensation structure and information regarding other accounts managed.

Administrator

Invesco Advisers, Inc., the Fund's investment adviser, also serves as the Fund's Administrator. Pursuant to the administration agreement between the Fund and the Administrator (the Administration Agreement), the Administrator (i) arranges for the printing and dissemination of reports to shareholders; (ii) arranges for dissemination of the Fund's proxy and any repurchase offer materials to shareholders, and oversees the tabulation of proxies by the Fund's transfer agent; (iii) negotiates the terms and conditions under which custodian services are provided to the Fund and the fees to

be paid by the Fund in connection therewith; (iv) negotiates the terms and conditions under which dividend disbursing services are provided to the Fund, and the fees to be paid by the Fund in connection therewith, and reviews the provision of such services to the Fund; (v) provides the Fund's dividend disbursing agent and custodian with such information as is required for them to effect payment of dividends and distributions and to implement the Fund's dividend reinvestment plan; (vi) makes such reports and recommendations to the Board of Trustees as the Trustees reasonably request; and (vii) provides shareholder services to holders or potential holders of the Fund's securities.

For the services rendered to the Fund and related expenses borne by the Administrator, the Fund pays the Administrator a fee, accrued daily and paid monthly, at the annualized rate of 0.25% of the Fund's average daily net assets.

NET ASSET VALUE

The net asset value per share of the Fund's Common Shares is determined as of the close of business on each business day by calculating the total value of the Fund's assets, deducting its total liabilities, and dividing the result by the number of common shares outstanding.

Securities, including restricted securities, are valued according to the following policy. A security listed or traded on an exchange (except convertible securities) is valued at its last sales price as of the close of the customary trading session on the exchange where the security is principally traded, or lacking any sales on a particular day, the security may be valued at the closing bid price on that day. Securities traded in the over-the-counter market (but not securities reported on the NASDAQ Stock Exchange) are valued based on the prices furnished by independent pricing services, in which case the securities may be considered fair valued, or by market makers. Each security reported on the NASDAQ Stock Exchange is valued at the NASDAQ Official Closing Price (NOCP) as of the close of the customary trading session on the valuation date or absent a NOCP, at the closing bid price.

Futures contracts are valued at the final settlement price set by an exchange on which they are principally traded. Listed options are valued at the mean between the last bid and the ask prices from the exchange on which they are principally traded. Options not listed on an exchange are valued by an independent source at the mean between the last bid and ask prices. For purposes of determining net asset value per share, futures and option contracts generally are valued 15 minutes after the close of the customary trading session of the New York Stock Exchange (NYSE).

Investments in open-end and closed-end registered investment companies that do not trade on an exchange are valued at the end of day net asset value per share. Investments in open-end and closed-end registered investment companies that trade on an exchange are valued at the last sales price or official closing price as of the close of the customary trading session on the exchange where the security is principally traded.

Debt obligations (including convertible securities) and unlisted equities are fair valued using an evaluated quote provided by an independent pricing service. Evaluated quotes provided by the pricing service may be determined without exclusive reliance on quoted prices, and may reflect appropriate factors such as institution-size trading in similar groups of securities, developments related to specific securities, dividend rate (for unlisted equities), yield (for debt obligations), quality, type of issue, coupon rate (for debt obligations), maturity (for debt obligations), individual trading characteristics and other market data.

Swap agreements are fair valued using an evaluated quote provided by an independent pricing service. Evaluated quotes provided by the pricing service are valued based on a model which may include end of day net present values, spreads, ratings, industry, and company performance.

Foreign securities (including foreign exchange contracts) prices are converted into U.S. dollar amounts using the applicable exchange rates as of the close of the NYSE. If market quotations are available and reliable for foreign exchange-traded equity securities, the securities will be valued at the market quotations. Because trading hours for certain foreign securities end before the close of the NYSE, closing market quotations may become unreliable. If between the time trading ends on a particular security and the close of the customary trading session on the NYSE, events occur that the Adviser determines are significant and make the closing price unreliable, the Fund may fair value the security. If the event is likely to have affected the closing price of the security, the security will be valued at fair value in good faith using procedures approved by the Board of Trustees. Adjustments to closing prices to reflect fair value may also be based on a screening process of an independent pricing service to indicate the degree of certainty, based on historical data, that the closing price in the principal market where a foreign security trades is not the current value as of the close of the NYSE. Foreign securities prices meeting the approved degree of certainty that the price is not reflective of current value will be priced at the indication of fair value from the independent pricing service. Multiple factors may be considered by the independent pricing service in determining adjustments to reflect fair value

and may include information relating to sector indices, American Depositary Receipts and domestic and foreign index futures. Foreign securities may have additional risks including exchange rate changes, potential for sharply devalued currencies and high inflation, political and economic upheaval, the relative lack of issuer information, relatively low market liquidity and the potential lack of strict financial and accounting controls and standards.

Securities for which market prices are not provided by any of the above methods may be valued based upon quotes furnished by independent sources. The last bid price may be used to value equity securities. The mean between the last bid and ask prices is used to value debt obligations, including corporate loans.

Securities for which market quotations are not readily available or became unreliable are valued at fair value as determined in good faith by or under the supervision of the Trust's officers following procedures approved by the Board of Trustees. Issuer specific events, market trends, bid/ask quotes of brokers and information providers and other market data may be reviewed in the course of making a good faith determination of a security's fair value.

DISTRIBUTIONS

The Fund intends to make regular monthly distributions of all or a portion of its net investment income to Common Shareholders. The Fund expects to pay its Common Shareholders annually all or substantially all of its investment company taxable income to avoid the imposition of income and excise taxes on certain undistributed amounts by a RIC under the Code. The investment company taxable income of the Fund will generally consist of all interest and other ordinary income accrued on portfolio investments, short-term capital gain (including short-term gains on options, futures and forward positions and gains on the sale of portfolio investments held for one year or less) in excess of long-term capital loss and income from certain hedging transactions, less all expenses of the Fund. Expenses of the Fund will be accrued each day. Various factors will affect the level of the Fund's net investment company taxable income.

The Fund may from time to time distribute less than the entire amount of income earned in a particular period. The undistributed income would be available to supplement future distributions. As a result, the distributions paid by the Fund for any particular month may be more or less than the amount of income actually earned by the Fund during that period. Undistributed income will add to the Fund's net asset value and, correspondingly, distributions from undistributed income, if any, will reduce the Fund's net asset value.

In addition, the Fund intends to distribute, on an annual basis, all or substantially all of any net capital gains (which is the excess of net long-term capital gain over net short-term capital loss) to its Common Shareholders. The Fund may also declare and pay capital gains distributions more frequently, if necessary, in order to reduce or eliminate federal excise or income taxes on the Fund. To the extent that the Fund's net investment income and net capital gain for any year exceed the total distributions paid during the year, the Fund will make a special distribution at or near year-end of such excess amount as may be required. Under the 1940 Act, for any distribution that includes amounts from sources other than net income, the Fund is required to provide Common Shareholders a written statement regarding the components of such distribution. Such a statement will be provided at the time of any distribution believed to include any such amounts.

If, for any calendar year, the total distributions made exceed the Fund's current and accumulated earnings and profit, the excess will, for U.S. federal income tax purposes, be treated as a tax-deferred return of capital to each Common Shareholder up to the amount of the Common Shareholder's basis in his or her Common Shares, and thereafter as gain from the sale of Common Shares. The amount treated as a tax-deferred return of capital will reduce the Common Shareholder's adjusted basis in his or her Common Shares, thereby increasing his or her potential gain or reducing his or her potential loss on the subsequent sale of his or her Common Shares. To the extent the Fund's distribution policy results in distributions in excess of its net investment income and net capital gain, such distributions will decrease its total assets and increase its expense ratio to a greater extent than would have been the case if distributions were limited to these amounts. Distributions in any year may or may not include a substantial return of capital component.

The Fund reserves the right to change its distribution policy and the basis for establishing the rate of distributions at any time and may do so without prior notice to Common Shareholders.

DIVIDEND REINVESTMENT PLAN

Shareholders will automatically have all dividends and distributions reinvested in Common Shares issued by the Fund or Common Shares of the Fund purchased in the open market in accordance with the Fund's dividend reinvestment plan (the Plan) unless an election is made to receive cash. Computershare Trust Company, N.A. (the Agent) administers the Plan.

If you own Common Shares in your own name, your purchase will automatically enroll you in the Plan. If your Common Shares are held in street name in the name of your brokerage firm, bank, or other financial institution you

must instruct that entity to participate on your behalf. If they are unable to participate on your behalf, you may request that they reregister your Common Shares in your own name so that you may enroll in the Plan.

If you haven't participated in the Plan in the past or chose to opt out, you are still eligible to participate. Enroll by visiting invesco.com/us, by calling toll-free 800 341 2929 or by notifying us in writing at Invesco Closed-End Funds, Computershare Trust Company, N.A., P.O. Box 30170, College Station, TX 77842-3170. If you are writing to us, please include the Fund name and account number and ensure that all Common Shareholders listed on the account sign these written instructions. Your participation in the Plan will begin with the next distribution payable after the Agent receives your authorization, as long as they receive it before the record date, which is generally 10 business days before the distribution is paid. If your authorization arrives after such record date, your participation in the Plan will begin with the following distribution.

If you choose to participate in the Plan, your distributions will be promptly reinvested for you, automatically increasing your Common Shares. If the Common Shares are trading at a price that is equal to net asset value per share, you will pay that amount for your reinvested shares. However, if the Common Shares are trading above or below net asset value, the price is determined by one of two ways:

1. **Premium:** If the Common Shares are trading at a premium — a market price that is higher than net asset value — you will pay either the net asset value or 95 percent of the market price, whichever is greater. When the Common Shares trade at a premium, you may pay less for your reinvested Common Shares than an investor purchasing Common Shares on the stock exchange. Keep in mind, a portion of your price reduction may be taxable because you are receiving Common Shares at less than market price.
2. **Discount:** If the Common Shares are trading at a discount — a market price that is lower than net asset value — you will pay the market price for your reinvested Common Shares.

There is no direct charge to you for reinvesting Distributions because the Plan's fees are paid by the Fund. If the Common Shares are trading at or above net asset value, your new Common Shares are issued directly by the Fund and there are no brokerage charges or fees. However, if the Common Shares are trading at a discount, the Common Shares are purchased on the open market, and you will pay your portion of any per share fees. These per share fees are typically less than the standard brokerage charges for individual transactions because Common Shares are purchased for all participants in blocks, resulting in lower fees for each individual participant. Any service or per share fees are added to the purchase price. Per share fees include any applicable brokerage commissions the Agent is required to pay.

The automatic reinvestment of distributions does not relieve you of any income tax that may be due on distributions. You will receive tax information annually to help you prepare your federal income tax return.

You may withdraw from the Plan at any time by calling (800) 341-2929, by visiting invesco.com/us or by writing to Invesco Closed-End Funds, Computershare Trust Company, N.A., P.O. Box 30170, College Station, TX 77842-3170. Simply indicate that you would like to withdraw from the Plan, and be sure to include your Fund name and account number. Also, ensure that all shareholders listed on the account sign these written instructions. If you withdraw, you have three options with regard to the shares held in the Plan:

1. If you opt to continue to hold your non-certificated whole Common Shares, they will be held by the Agent electronically as Direct Registration Book-Shares and fractional Common Shares will be sold at the then-current market price. Proceeds will be sent via check to your address of record after deducting applicable fees, including per share fees such as any applicable brokerage commissions the Agent is required to pay.
2. If you opt to sell your shares through the Agent, the Agent will sell all full and fractional Common Shares and send the proceeds via check to your address of record after deducting a \$2.50 service fee and per share fees. Per share fees include any applicable brokerage commissions the Agent is required to pay.
3. You may sell your Common Shares through your financial adviser through the Direct Registration System (DRS). DRS is a service within the securities industry that allows Common Shares to be held in your name

Edgar Filing: Invesco High Income Trust II - Form 486BPOS

in electronic format. You retain full ownership of your Common Shares, without having to hold a share certificate. You should contact your financial adviser to learn more about any restrictions or fees that may apply.

The Fund and the Agent may amend or terminate the Plan at any time. Participants will receive at least 30 days written notice before the effective date of any amendment. In the case of termination, participants will receive at least 30 days written notice before the record date for the payment of any such distributions by the Fund. In the case of amendment or termination necessary or appropriate to comply with applicable law or the rules and policies of the SEC or any other regulatory authority, such written notice will not be required.

To obtain a complete copy of the current Plan, please call our Client Services department at (800) 341-2929 or visit invesco.com/us.

DESCRIPTION OF CAPITAL STRUCTURE

The Fund is a statutory trust organized under the laws of Delaware pursuant to a Certificate of Trust, dated as of April 2, 2012. The following is a brief description of the terms of the Common Shares, Borrowings and Preferred Shares which may be issued by the Fund. This description does not purport to be complete and is qualified by reference to the Fund's Governing Documents.

Common Shares

The Declaration of Trust permits the Fund to issue an unlimited number of full and fractional common shares of beneficial interest, no par value. Each Common Share represents an equal proportionate interest in the assets of the Fund with each other Common Share in the Fund. Holders of Common Shares will be entitled to the payment of distributions when, as and if declared by the Board. The 1940 Act or the terms of any borrowings or preferred shares may limit the payment of distributions to the holders of Common Shares. Each whole Common Share shall be entitled to one vote as to matters on which it is entitled to vote pursuant to the terms of the Declaration of Trust on file with the SEC. Upon liquidation of the Fund, after paying or adequately providing for the payment of all liabilities of the Fund and the liquidation preference with respect to any outstanding preferred shares, the Trustees may distribute the remaining assets of the Fund among the holders of the Common Shares.

While there are any borrowings or preferred shares outstanding, the Fund may not be permitted to declare any cash distribution on its Common Shares, unless at the time of such declaration, (i) all accrued distributions on preferred shares or accrued interest on borrowings have been paid and (ii) the value of the Fund's total assets (determined after deducting the amount of such distribution), less all liabilities and indebtedness of the Fund not represented by senior securities, is at least 300% of the aggregate amount of such securities representing indebtedness and at least 200% of the aggregate amount of securities representing indebtedness plus the aggregate liquidation value of the outstanding preferred shares (expected to equal the aggregate original purchase price of the outstanding preferred shares plus the applicable redemption premium, if any, together with any accrued and unpaid distributions thereon, whether or not earned or declared and on a cumulative basis). In addition to the requirements of the 1940 Act, the Fund may be required to comply with other asset coverage requirements as a condition of the Fund obtaining a rating of the preferred shares from a rating agency. These requirements may include an asset coverage test more stringent than under the 1940 Act. This limitation on the Fund's ability to make distributions on its Common Shares could in certain circumstances impair the ability of the Fund to maintain its qualification for taxation as a RIC for federal income tax purposes. The Fund intends, however, to the extent possible to purchase or redeem preferred shares or reduce borrowings from time to time to maintain compliance with such asset coverage requirements and may pay special distributions to the holders of the preferred shares in certain circumstances in connection with any such impairment of the Fund's status as a RIC. Depending on the timing of any such redemption or repayment, the Fund may be required to pay a premium in addition to the liquidation preference of the preferred shares to the holders thereof.

The Common Shares have no preemptive rights.

The Fund will not issue certificates for the Common Shares.

Issuance of Additional Common Shares

Any additional offerings of Common Shares will require approval by the Board of Trustees.

Any additional offering of Common Shares will be subject to the requirements of the 1940 Act. The provisions of the 1940 Act generally require that the public offering price (less underwriting commissions and discounts) of common shares sold by a closed-end investment company must equal or exceed the net asset value of such company's common shares (calculated within 48 hours of the pricing of such offering), unless such sale is made with the consent of a

majority of its common shareholders. The Fund may, from time to time, seek the consent of Common Shareholders to permit the issuance and sale by the Fund of Common Shares at a price below the Fund's then-current net asset value, subject to certain conditions. If such consent is obtained, the Fund may, contemporaneous with and in no event more than one year following the receipt of such consent, sell Common Shares at price below net asset value in accordance with any conditions adopted in connection with the giving of such consent. Additional information regarding any consent of Common Shareholders obtained by the Fund and the applicable conditions imposed on the issuance and sale by the Fund of Common Shares at a price below net asset value will be disclosed in the Prospectus Supplement relating to any such offering of Common Shares at a price below net asset value. Until such consent of Common Shareholders, if any, is obtained, the Fund may not sell Common Shares at a price below net asset value. Because the Fund's advisory fee is based upon average Managed Assets, the Adviser's interests in recommending the issuance and sale of Common Shares at a price below net asset value may conflict with the interests of the Fund and its Common Shareholders.

Repurchase of Common Shares

Because shares of closed-end funds frequently trade at a discount to their net asset values, the Board has determined that from time to time it may be in the interest of holders of Common Shares for the Fund to take corrective actions. The Board, in consultation with the Adviser, will review at least annually the possibility of open market repurchases and/or tender offers for the Common Shares and will consider such factors as the market price of the Common Shares, the net asset value of the Common Shares, the liquidity of the assets of the Fund, effect on the Fund's expenses, whether such transactions would impair the Fund's status as a RIC or result in a failure to comply with applicable asset coverage requirements, general economic conditions and such other events or conditions which may have a material effect on the Fund's ability to consummate such transactions. There are no assurances that the Board will, in fact, decide to undertake either of these actions or if undertaken, that such actions will result in the Fund's Common Shares trading at a price which is equal to or approximates their net asset value. In recognition of the possibility that the Common Shares might trade at a discount to net asset value and that any such discount may not be in the interest of holders of Common Shares, the Board, in consultation with the Adviser, from time to time may review possible actions to reduce any such discount.

Preferred Shares

The Declaration of Trust authorizes the issuance of an unlimited number of shares of beneficial interest with preference rights, including preferred shares, no par value, in one or more series, with rights as determined by the Board, by action of the Board without the approval of the holders of Common Shares.

Under the requirements of the 1940 Act, the Fund must, immediately after the issuance of any preferred shares, have an asset coverage of at least 200%. Asset coverage means the ratio which the value of the total assets of the Fund, less all liability and indebtedness not represented by senior securities (as defined in the 1940 Act), bears to the aggregate amount of senior securities representing indebtedness of the Fund, if any, plus the aggregate liquidation preference of the preferred shares. If the Fund seeks a rating of the preferred shares, asset coverage requirements, in addition to those set forth in the 1940 Act, may be imposed. The liquidation value of the preferred shares is expected to equal their aggregate original purchase price plus the applicable redemption premium, if any, together with any accrued and unpaid distributions thereon (on a cumulative basis), whether or not earned or declared. The terms of the preferred shares, including their distribution rate, voting rights, liquidation preference and redemption provisions, will be determined by the Board (subject to applicable law and the Fund's Declaration of Trust) if and when it authorizes the preferred shares. The Fund may issue preferred shares that provide for the periodic redetermination of the distribution rate at relatively short intervals through an auction or remarketing procedure, although the terms of the preferred shares may also enable the Fund to lengthen such intervals. At times, the distribution rate on the Fund's preferred shares may exceed the Fund's return after expenses on the investment of proceeds from the preferred shares, resulting in a lower rate of return to Common Shareholders than if the preferred shares were not outstanding.

In the event of any voluntary or involuntary liquidation, dissolution or winding up of the Fund, the terms of any preferred shares may entitle the holders of preferred shares to receive a preferential liquidating distribution (expected to equal the original purchase price per share plus the applicable redemption premium, if any, together with accrued and unpaid distributions, whether or not earned or declared and on a cumulative basis) before any distribution of assets is made to holders of Common Shares. After payment of the full amount of the liquidating distribution to which they are entitled, the preferred shareholders would not be entitled to any further participation in any distribution of assets by the Fund.

Holders of preferred shares, voting as a class, shall be entitled to elect two of the Fund's Trustees. Under the 1940 Act, if at any time distributions on the preferred shares are unpaid in an amount equal to two full years' distributions thereon, the holders of all outstanding preferred shares, voting as a class, will be allowed to elect a majority of the Fund's Trustees until all distributions in arrears have been paid or declared and set apart for payment.

In addition, if required by a rating agency rating the preferred shares or if the Board determines it to be in the best interests of the Common Shareholders, issuance of the preferred shares may result in more restrictive provisions than required by the 1940 Act being imposed. In this regard, holders of the preferred shares may be entitled to elect a majority of the Fund's Board in other circumstances, for example, if one payment on the preferred shares is in arrears. The Fund intends that, as long as preferred shares are outstanding, the composition of its portfolio will reflect guidelines established by such rating agency. Although, as of the date hereof, no rating agency has established guidelines relating to the Fund's preferred shares, based on previous guidelines established by Rating Agencies for the securities of other issuers, the Fund anticipates that the guidelines with respect to the preferred shares will establish a set of tests for portfolio composition and asset coverage that supplement (and in some cases are more restrictive than) the applicable requirements under the 1940 Act. Although, at this time, no assurance can be given as to the nature or extent of the guidelines which may be imposed in connection with obtaining a rating of the preferred shares, the Fund currently anticipates that such guidelines will include asset coverage requirements which are more restrictive than those under the 1940 Act, restrictions on certain portfolio investments and investment practices, requirements that the Fund maintain a portion of its assets in short-term, high-quality

investments and certain mandatory redemption requirements relating to the preferred shares. No assurance can be given that the guidelines actually imposed with respect to the preferred shares by a rating agency will be more or less restrictive than anticipated.

Borrowings

The Fund may utilize leverage through borrowings, including through a credit facility, commercial paper program or other borrowing program. Under the 1940 Act, the Fund is not permitted to incur indebtedness, including through the issuance of debt securities, unless immediately thereafter the total asset value of the Fund's portfolio is at least 300% of the liquidation value of the outstanding indebtedness (i.e., such liquidation value may not exceed 33 1/3% of the Fund's total assets). In addition, the Fund is not permitted to declare any cash distribution on its Common Shares unless, at the time of such declaration, the net asset value of the Fund's portfolio (determined after deducting the amount of such distribution) is at least 300% of such liquidation value. If the Fund borrows money, the Fund intends, to the extent possible, to retire outstanding debt, from time to time, to maintain coverage of any outstanding indebtedness of at least 300%.

The Fund may negotiate with commercial banks to arrange a borrowing facility pursuant to which the Fund may borrow an amount equal to approximately one-third of the Fund's total assets (inclusive of the amount borrowed). Any such borrowings would constitute leverage. Such a borrowing facility is not expected to be convertible into any other securities of the Fund, outstanding amounts are expected to be prepayable by the Fund prior to final maturity without significant penalty and there are not expected to be any sinking fund or mandatory retirement provisions. Outstanding amounts would be payable at maturity or such earlier times as required by the agreement. The Fund may be required to prepay outstanding amounts under the borrowing facility or incur a penalty rate of interest upon the occurrence of certain events of default. The Fund would be expected to indemnify the lenders against liabilities they may incur in connection with the borrowing facility.

The terms of any such borrowings may require the Fund to pay a fee to maintain a line of credit, such as a commitment fee, or to maintain minimum average balances with a lender. Any such requirements would increase the cost of such borrowings over the stated interest rate. Such lenders would have the right to receive interest on and repayment of principal of any such borrowings, which right will be senior to those of the Common Shareholders. Any such borrowings may contain provisions limiting certain activities of the Fund, including the payment of dividends to Common Shareholders in certain circumstances.

Certain types of borrowings subject the Fund to covenants in credit agreements relating to asset coverage and portfolio composition requirements. Certain borrowings issued by the Fund also may subject the Fund to certain restrictions on investments imposed by guidelines of one or more rating agencies, which may issue ratings for such borrowings. Such guidelines may impose asset coverage or portfolio composition requirements that are more stringent than those imposed by the 1940 Act. It is not anticipated that these covenants or guidelines will impede Invesco from managing the Fund's portfolio in accordance with the Fund's investment objective and policies.

The 1940 Act grants to the holders of senior securities representing indebtedness issued by the Fund, other than with respect to privately arranged borrowings, certain voting rights in the event of default in the payment of interest on or repayment of principal. Failure to maintain certain asset coverage requirements under the 1940 Act could result in an event of default and entitle the debt holders to elect a majority of the Board of Trustees.

Credit Facility. The Fund has entered into a \$60 million amended and restated revolving credit agreement, dated August 27, 2012, as amended (the "Credit Agreement"), with State Street Bank and Trust Company, in its capacity as Agent, and other lending institutions party thereto. The Credit Agreement, which expires on November 18, 2016, is secured by the assets of the Fund. For certain commitment amounts under the Credit Agreement, the Fund pays monthly interest charges based on a variable rate formula determined based on a stated margin above the higher of the

applicable LIBOR and Federal Funds Rate, while certain other commitment amounts under the Credit Agreement are subject to periodic interest charges based on a variable rate formula determined based on a stated margin above the higher of an adjusted LIBOR rate (each as set forth more fully under the Credit Agreement). The Fund pays quarterly commitment fees to the Agent for the account of each lending institution under the Credit Agreement (on a *pro rata* basis) equal to eleven basis points times the actual daily amount by which the aggregate commitment amount exceeds the aggregate principal amount of all loans outstanding (in other words, the undrawn portion of the aggregate commitment amount as of such date). If the Fund fails to satisfy certain requirements or maintain certain covenants required under the Credit Agreement, the Agent may terminate the commitments and the Fund may be required to immediately repay the loan balance outstanding (together with any accrued interest thereon). As of February 28, 2018, the Fund had outstanding borrowings under the Credit Agreement of approximately \$47.55 million, which represented approximately 26.77% of the Fund's total assets as of such date. The average daily weighted interest rate for the fiscal year ended February 28, 2018 was 2.11%.

Capitalization

The following table provides information about the outstanding securities of the Fund as of February 28, 2018:

Title of Class	Amount Authorized	Amount Held by the	
		Fund or for its Account	Amount Outstanding
Common Shares of Beneficial Interest, no par value	Unlimited		8,118,429
Preferred Shares of Beneficial Interest, no par value	Unlimited		

ANTI-TAKEOVER AND OTHER PROVISIONS IN THE FUND'S GOVERNING DOCUMENTS

The Fund presently has provisions in its Governing Documents which could have the effect of limiting, in each case, (i) the ability of other entities or persons to acquire control of the Fund, (ii) the Fund's freedom to engage in certain transactions or (iii) the ability of the Fund's Board of Trustees or shareholders to amend the Governing Documents or effectuate changes in the Fund's management. These provisions of the Governing Documents of the Fund may be regarded as "anti-takeover" provisions.

The Board of Trustees is divided into three classes, with the terms of one class expiring at each annual meeting of shareholders. At each annual meeting, one class of Trustees is elected to a three-year term. This provision could delay for up to two years the replacement of a majority of the Board of Trustees. Any amendment to declassify the Board of Trustees requires the affirmative vote of a majority of the Board of Trustees followed by the affirmative vote of the holders of at least 75% of the outstanding shares of the Fund, unless the transaction has been approved by at least 66 2/3% of the Board of Trustees, in which case a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund shall be required.

A Trustee may be removed from office, with or without cause, by written instrument signed by at least 75% of the number of Trustees prior to such removal.

In addition, the Declaration of Trust requires the affirmative vote of a majority of the Board of Trustees followed by the affirmative vote of the holders of at least 75% of the outstanding shares of the Fund, to approve, adopt or authorize certain transactions, unless the transaction has been approved by at least 66 2/3% of the Board of Trustees, in which case the affirmative vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund shall be required. Transactions subject to this voting requirement include:

The dissolution of the Fund; provided that if the affirmative vote of at least seventy-five percent (75%) of the Board approves the dissolution, no vote of shareholders shall be required to dissolve the Fund

A merger or consolidation of the Fund with one or more other entities.

The sale, conveyance and transfer of all or substantially all of the assets of the another entity.

The reclassification of the Fund from a closed-end company to an open-end company (as defined in the 1940 Act).

The following transactions with any person or group (a Principal Shareholder) that is the beneficial owner, directly or indirectly, of five percent (5%) or more of the shares of the Fund. For purposes of these provisions, a Principal Shareholder shall be deemed to be the beneficial owner of any Shares which the Principal Shareholder owns directly, has the right to acquire pursuant to any agreement or which are beneficially owned, directly or indirectly by any affiliate or associate or any other person with which the Principal Shareholder has any agreement, arrangement, or understanding for the purpose of acquiring, holding, voting, or disposing of shares.

The issuance of any securities to any Principal Shareholder for cash (other than pursuant to the Plan.

The sale, lease or exchange of all or any substantial part of the assets of the Fund or any subsidiary of the Fund to any Principal Shareholder (except assets having an aggregate fair market value of less than two percent (2%) of the total assets of the Fund or any subsidiary of the Fund, aggregating for the purpose of such computation all assets sold, leased or exchanged in any series of similar transactions within a twelve-month period).

The sale, lease, or exchange to the Fund or any subsidiary of the Fund, in exchange for securities of the Fund or any of its subsidiary of the Fund, of any assets of any Principal Shareholder (except assets having an aggregate fair market value of less than two percent (2%) of the total assets of the Fund or any of

subsidiary of the Fund, aggregating for the purpose of such computation, all assets sold, leased or exchanged in any series of similar transactions within a twelve-month period).

In addition, any additional matter for which the Declaration of Trust or the 1940 Act does not expressly require a vote of shareholders, but with respect to which the Trustees determine the shareholders shall have power to vote, shall require the affirmative vote or consent of holders of at least 75% of the outstanding shares of the Fund, unless such matter has been previously approved, adopted or authorized by the affirmative vote of at least 66 2/3% of the Board of Trustees, in which case the affirmative vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund shall be required.

The Board of Trustees has determined that provisions with respect to the Board of Trustees and the shareholder voting requirements described above, which voting requirements are greater than the minimum requirements under Delaware law or the 1940 Act, are in the best interest of shareholders generally. Reference should be made to the Declaration of Trust on file with the SEC for the full text of these provisions. See Additional Information.

CONVERSION TO OPEN-END FUND

The Fund may be converted to an open-end management investment company if approved by an affirmative vote of a majority of the Board of Trustees followed by the affirmative vote of the holders of at least 75% of the outstanding shares of the Fund, unless the conversion has been approved by at least 66 2/3% of the Board of Trustees, in which case the affirmative vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund shall be required. If approved in the foregoing manner, conversion of the Fund could not occur until 90 days after the shareholders meeting at which such conversion was approved and would also require at least 30 days prior notice to all shareholders. The composition of the Fund's portfolio and/or its investment policies could prohibit the Fund from complying with regulations of the SEC applicable to open-end management investment companies unless significant changes in portfolio holdings and investment policies are made. Conversion of the Fund to an open-end management investment company also would require the redemption of any outstanding preferred shares and could require the repayment of borrowings, which would reduce the leveraged capital structure of the Fund with respect to the Common Shares. In the event of conversion, the Common Shares would cease to be listed on the NYSE or other national securities exchange or market system. The Board believes, however, that the closed-end structure is desirable, given the Fund's investment objectives and policies. Investors should assume, therefore, that it is unlikely that the Board would vote to convert the Fund to an open-end management investment company. Common Shareholders of an open-end management investment company can require the company to redeem their shares at any time (except in certain circumstances as authorized by or under the 1940 Act) at their net asset value, less such redemption charge, if any, as might be in effect at the time of a redemption. If converted to an open-end fund, the Fund expects to pay all redemption requests in cash, but intends to reserve the right to pay redemption requests in a combination of cash or securities. If such partial payment in securities were made, investors may incur brokerage costs in converting such securities to cash. If the Fund were converted to an open-end fund, it is likely that new Common Shares would be sold at net asset value plus a sales load.

TAX MATTERS

The following discussion is a brief summary of certain U.S. federal income tax considerations affecting the Fund and the purchase, ownership and disposition of the Fund's Common Shares. A more detailed discussion of the tax rules applicable to the Fund and its Common Shareholders can be found in the SAI that is incorporated by reference into this Prospectus. Except as otherwise noted, this discussion assumes you are a taxable U.S. person (as defined for U.S. federal income tax purposes) and that you hold your Common Shares as capital assets for U.S. federal income tax purposes (generally, assets held for investment). This discussion is based upon current provisions of the Code, the regulations promulgated thereunder and judicial and administrative authorities, all of which are subject to change or differing interpretations by the courts or the Internal Revenue Service (the IRS), possibly with retroactive effect. No attempt is made to present a detailed explanation of all U.S. federal tax concerns affecting the Fund and its Common

Shareholders (including Common Shareholders subject to special treatment under U.S. federal income tax law).

The discussion set forth herein does not constitute tax advice and potential investors are urged to consult their own tax advisers to determine the specific U.S. federal, state, local and foreign tax consequences to them of investing in the Fund.

Taxation Of The Fund

The Fund intends to elect to be treated and to qualify annually as a RIC under Subchapter M of the Code. Accordingly, the Fund must, among other things, meet certain income, asset diversification and distribution requirements:

- (i) The Fund must derive in each taxable year at least 90% of its gross income from the following sources:
 - (a) dividends, interest (including tax-exempt interest), payments with respect to certain securities loans, and gains from the sale or other

disposition of stock, securities or foreign currencies, or other income (including gain from options, futures and forward contracts) derived with respect to its business of investing in such stock, securities or foreign currencies; and (b) net income derived from interests in qualified publicly traded partnerships (as defined in the Code). Generally, a qualified publicly traded partnership includes a partnership the interests of which are traded on an established securities market or readily tradable on a secondary market (or the substantial equivalent thereof) and that derives less than 90% of its gross income from the items described in (a) above.

- (ii) The Fund must diversify its holdings so that, at the end of each quarter of each taxable year, (a) at least 50% of the market value of the Fund's total assets is represented by cash and cash items, including receivables, U.S. Government securities, the securities of other RICs and other securities, with such other securities limited, in respect of any one issuer, to an amount not greater than 5% of the value of the Fund's total assets and not more than 10% of the outstanding voting securities of such issuer and (b) not more than 25% of the market value of the Fund's total assets is invested in the securities (other than U.S. Government securities and the securities of other RICs) of (I) any one issuer, (II) any two or more issuers that the Fund controls and that are determined to be engaged in the same business or similar or related trades or businesses or (III) any one or more qualified publicly traded partnerships (as defined in the Code).

As long as the Fund qualifies as a RIC, the Fund generally will not be subject to U.S. federal income tax on income and gains that the Fund distributes to its shareholders, provided that it distributes each taxable year at least 90% of the sum of (i) the Fund's investment company taxable income (which includes, among other items, dividends, interest, the excess of any net short-term capital gain over net long-term capital loss, and other taxable income, other than any net capital gain (defined below), reduced by deductible expenses) determined without regard to the deduction for dividends paid and (ii) the Fund's net tax-exempt interest (the excess of its gross tax-exempt interest over certain disallowed deductions). The Fund intends to distribute substantially all of such income each year. The Fund will be subject to income tax at the applicable corporate income tax rate on any taxable income or gains that it does not distribute to its shareholders.

The Fund will either distribute or retain for reinvestment all or part of its net capital gain (which consists of the excess of its net long-term capital gain over its net short-term capital loss). If any such gain is retained, the Fund will be subject to corporate income tax on such retained amount. In that event, the Fund expects to report the retained amount as undistributed capital gain in a notice to its shareholders, each of whom, if subject to U.S. federal income tax on long-term capital gains, (i) will be required to include in income for U.S. federal income tax purposes as long-term capital gain its share of such undistributed amounts, (ii) will be entitled to credit its proportionate share of the tax paid by the Fund against its U.S. federal income tax liability and to claim refunds to the extent that the credit exceeds such liability and (iii) will increase its basis in its shares by the amount of undistributed capital gain included in such shareholder's gross income net of the tax deemed paid the shareholder under clause (ii).

The Code imposes a 4% nondeductible excise tax on the Fund to the extent the Fund does not distribute by the end of any calendar year at least the sum of (i) 98% of its ordinary income (not taking into account any capital gain or loss) for the calendar year and (ii) 98.2% of its capital gain in excess of its capital loss (adjusted for certain ordinary losses) for a one-year period generally ending on October 31 of the calendar year (unless an election is made to use the Fund's fiscal year). In addition, the minimum amounts that must be distributed in any year to avoid the excise tax will be increased or decreased to reflect any under-distribution or over-distribution, as the case may be, from the previous year. For purposes of the excise tax, the Fund will be deemed to have distributed any income on which it paid federal income tax. While the Fund intends to distribute any income and capital gain in the manner necessary to minimize imposition of the 4% nondeductible excise tax, there can be no assurance that sufficient amounts of the Fund's taxable income and capital gain will be distributed to entirely avoid the imposition of the excise tax. In that event, the Fund will be liable for the excise tax only on the amount by which it does not meet the foregoing distribution requirement.

Certain of the Fund's investment practices are subject to special and complex U.S. federal income tax provisions that may, among other things, (i) disallow, suspend or otherwise limit the allowance of certain losses or deductions, (ii) convert lower taxed long-term capital gains or qualified dividend income into higher taxed short-term capital gains or ordinary income, (iii) convert an ordinary loss or a deduction into a capital loss (the deductibility of which is more limited), (iv) cause the Fund to recognize income or gain without a corresponding receipt of cash, (v) adversely affect the time as to when a purchase or sale of stock or securities is deemed to occur, (vi) adversely alter the characterization of certain complex financial transactions and (vii) produce income that will not be qualified income for purposes of the 90% gross income requirement described above. These U.S. federal income tax provisions could therefore affect the amount, timing and character of distributions to Common Shareholders. The Fund intends to structure and monitor its transactions and may make certain tax elections and may be required to dispose of securities to mitigate the effect of these provisions and prevent disqualification of the Fund as a RIC (which may adversely affect the net after-tax return to the Fund).

If for any taxable year the Fund were to fail to qualify as a RIC, all of its taxable income (including its net capital gain) would be subject to tax at the applicable corporate income tax rate without any deduction for distributions to its shareholders, and such distributions would be taxable to the Common Shareholders as ordinary dividends to the extent of the Fund's current or

accumulated earnings and profits. Such dividends, however, would be eligible (provided that certain holding period and other requirements are met) (i) to be treated as qualified dividend income in the case of U.S. Common Shareholders taxed as individuals and (ii) for the dividends-received deduction in the case of U.S. Common Shareholders taxed as corporations. The Fund could be required to recognize unrealized gains, pay taxes and make distributions (which could be subject to interest charges) before requalifying for taxation as a RIC.

Taxation Of Common Shareholders

Distributions. Distributions paid to you by the Fund from its net capital gain, which is the excess of net long-term capital gain over net short-term capital loss, if any, that the Fund properly reports as capital gain dividends (capital gain dividends) are taxable as long-term capital gains, regardless of how long you have held your Common Shares. All other dividends paid to you by the Fund (including dividends from short-term capital gains) from its current or accumulated earnings and profits (ordinary income dividends) are generally subject to tax as ordinary income. Provided that certain holding period and other requirements are met, ordinary income dividends (if properly reported by the Fund) may qualify (i) for the dividends-received deduction in the case of corporate shareholders to the extent that the Fund's income consists of dividend income from U.S. corporations, and (ii) in the case of individual shareholders, as qualified dividend income eligible to be taxed at long-term capital gains rates to the extent that the Fund receives qualified dividend income. Qualified dividend income is, in general, dividend income from taxable domestic corporations and certain qualified foreign corporations (e.g., generally, foreign corporations incorporated in a possession of the United States or in certain countries with a qualifying comprehensive tax treaty with the United States, or whose stock with respect to which such dividend is paid is readily tradable on an established securities market in the United States). There can be no assurance as to what portion, if any, of the Fund's distributions will constitute qualified dividend income.

Any distributions you receive that are in excess of the Fund's current and accumulated earnings and profits will be treated as a tax-deferred return of capital to the extent of your adjusted tax basis in your Common Shares, and thereafter as capital gain from the sale of Common Shares. The amount of any Fund distribution that is treated as a tax-deferred return of capital will reduce your adjusted tax basis in your Common Shares, thereby increasing your potential gain, or reducing your potential loss, on any subsequent sale or other disposition of your Common Shares.

Dividends and other taxable distributions are taxable to you even if they are reinvested in additional Common Shares of the Fund. Dividends and other distributions paid by the Fund are generally treated as received by you at the time the dividend or distribution is made. If, however, the Fund pays you a dividend in January that was declared in the previous October, November or December to shareholders of record on a specified date in one of such months, then such dividend will be treated for U.S. federal income tax purposes as being paid by the Fund and received by you on December 31 of the year in which the dividend was declared.

The Fund will send you information after the end of each year setting forth the amount and tax status of any distributions paid to you by the Fund.

Sale of Common Shares. The sale or other disposition of Common Shares of the Fund will generally result in capital gain or loss to you and will be long-term capital gain or loss if you have held such Common Shares for more than one year. Any loss upon the sale or other disposition of Common Shares held for six months or less will be treated as long-term capital loss to the extent of any capital gain dividends received (including amounts credited as an undistributed capital gain) by you with respect to such Common Shares. Any loss you recognize on a sale or other disposition of Common Shares will be disallowed if you acquire other Common Shares (whether through the automatic reinvestment of dividends or otherwise) within a 61-day period beginning 30 days before and ending 30 days after your sale or exchange of the Common Shares. In such case, your tax basis in the Common Shares acquired will be adjusted to reflect the disallowed loss.

Current U.S. federal income tax law taxes both long-term and short-term capital gain of corporations at the rates applicable to ordinary income. For non-corporate taxpayers, short-term capital gain is currently taxed at rates applicable to ordinary income, while long-term capital gain generally is taxed at reduced maximum rates. The deductibility of capital losses is subject to limitations under the Code.

The foregoing is a general and abbreviated summary of the certain of the Code and the Treasury regulations currently in effect as they directly govern the taxation of the Fund and its Common Shareholders. These provisions are subject to change by legislative or administrative action, and any such change may be retroactive. A more detailed discussion of the tax rules applicable to the Fund and its Common Shareholders can be found in the SAI that is incorporated by reference into this Prospectus. Common Shareholders are urged to consult their tax advisers regarding specific questions as to U.S. federal, state, local and foreign income or other taxes.

PLAN OF DISTRIBUTION

The Fund may offer, from time to time, up to 2,000,000 Common Shares, on terms to be determined at the time of the offering. The Fund will offer Common Shares at prices and on terms to be set forth in one or more supplements to this Prospectus (each a Prospectus Supplement).

The Fund may offer Common Shares:

- (i) in at-the-market transactions through one or more selling agents that the Fund may designate from time to time and/or through broker-dealers that have entered into a selected dealer agreement with the Fund's selling agent(s);
- (ii) otherwise through agents that the Fund may designate from time to time;
- (iii) to or through underwriters or dealers; or
- (iv) directly to one or more purchasers.

The Prospectus Supplement relating to a particular offering of Common Shares will state the terms of the offering, including:

the names of any agents, underwriters or dealers;

any sales loads or other items constituting underwriters' compensation or the basis upon which such amount may be calculated;

any discounts, commissions, or fees allowed or paid to dealers or agents or the basis upon which such amount may be calculated;

the public offering or purchase price of the offered Common Shares, or the basis upon which such amount may be calculated, and the net proceeds the Fund will receive from the sale; and

any securities exchange on which the offered Common Shares may be listed.

The Fund may not sell Common Shares through agents, underwriters or dealers without delivery of this Prospectus and a Prospectus Supplement. See Plan of Distribution.

At-The-Market Transactions

The Fund may offer Common Shares in transactions that are deemed to be at the market as defined in Rule 415 under the 1933 Act, including sales made directly on the NYSE or sales made to or through a market maker other than on an exchange, through one or more selling agents that the Fund may designate from time to time and/or through broker-dealers that have entered into a selected dealer agreement with the Fund's selling agent(s) in such transactions. Common Shares will only be sold on such days as shall be agreed to by the Fund and the selling agent(s) and will be sold at market prices, which shall be determined with reference to trades on the NYSE, subject to a minimum price to be established each day by the Fund. The minimum price on any day will not be less than the current net asset value

per Common Share plus the per share amount of the commission to be paid. The Fund will suspend the sale of Common Shares if the per share price of the shares is less than the minimum price. Settlements of sales of Common Shares will occur on the third business day following the date on which any such sales are made.

The Fund will compensate the selling agent(s) with respect to sales of the Common Shares and the selling agent(s) may compensate broker-dealers participating in the offering in connection with the sale of Common Shares sold by that broker-dealer.

Unless otherwise indicated in the Prospectus Supplement, the selling agents will be acting on a best efforts basis for the period of their appointment.

By Agents

The Fund may offer Common Shares through agents that the Fund may designate. The Fund will name any agent involved in the offer and sale and describe any commissions payable by the Fund in the Prospectus Supplement. Unless otherwise indicated in the Prospectus Supplement, the agents will be acting on a best efforts basis for the period of their appointment.

By Underwriters

The Fund may offer and sell Common Shares from time to time to one or more underwriters who would purchase the Common Shares as principal for resale to the public, either on a firm commitment or best efforts basis. If the Fund sells Common Shares to underwriters, the Fund will execute an underwriting agreement with them at the time of the sale and will name them in the Prospectus Supplement. In connection with these sales, the underwriters may be deemed to have received compensation from the Fund in the form of underwriting discounts and commissions. The underwriters also may receive commissions from purchasers of Common Shares for whom they may act as agent. Unless otherwise stated in the Prospectus Supplement, the underwriters will not be obligated to purchase the Common Shares unless the conditions set forth in the underwriting agreement are satisfied, and if the underwriters purchase any of the Common Shares, they will be required to purchase all of the offered Common Shares. The underwriters may sell the offered Common Shares to or through dealers, and those dealers may receive discounts, concessions or commissions from the underwriters as well as from the purchasers for whom they may act as agent. Any public offering price and any discounts or concessions allowed or reallocated or paid to dealers may be changed from time to time.

If a Prospectus Supplement so indicates, the Fund may grant the underwriters an option to purchase additional Common Shares at the public offering price, less the underwriting discounts and commissions, within 45 days from the date of the Prospectus Supplement, to cover any overallotments.

By Dealers

The Fund may offer and sell Common Shares from time to time to one or more dealers who would purchase the securities as principal. The dealers then may resell the offered Common Shares to the public at fixed or varying prices to be determined by those dealers at the time of resale. The Fund will set forth the names of the dealers and the terms of the transaction in the Prospectus Supplement.

Direct Sales

The Fund may sell Common Shares directly to, and solicit offers from, institutional investors or others who may be deemed to be underwriters as defined in the 1933 Act for any resales of the securities. In this case, no underwriters or agents would be involved. The Fund may use electronic media, including the internet, to sell offered securities directly. The terms of such direct sale transactions will be subject to the discretion of the management of the Fund. In determining whether to sell Common Shares through a direct sale transaction, the Fund will consider relevant factors including, but not limited to, the attractiveness of obtaining additional funds through the sale of Common Shares, the purchase price to apply to any such sale of Common Shares and the investor seeking to purchase the Common Shares. The Fund will describe the terms of any of those sales in a Prospectus Supplement.

General Information

Agents, underwriters, or dealers participating in an offering of Common Shares may be deemed to be underwriters, and any discounts and commission received by them and any profit realized by them on resale of the offered Common Shares for whom they act as agent, may be deemed to be underwriting discounts and commissions under the 1933 Act.

The Fund may offer to sell securities either at a fixed price or at prices that may vary, at market prices prevailing at the time of sale, at prices related to prevailing market prices or at negotiated prices.

To facilitate an offering of Common Shares in an underwritten transaction and in accordance with industry practice, the underwriters may engage in transactions that stabilize, maintain, or otherwise affect the market price of the Common Shares or any other security. Those transactions may include overallotment, entering stabilizing bids,

effecting syndicate covering transactions, and reclaiming selling concessions allowed to an underwriter or a dealer.

An overallocation in connection with an offering creates a short position in the common stock for the underwriter's own account.

An underwriter may place a stabilizing bid to purchase the Common Shares for the purpose of pegging, fixing, or maintaining the price of the Common Shares.

Underwriters may engage in syndicate covering transactions to cover overallocations or to stabilize the price of the Common Shares by bidding for, and purchasing, the Common Shares or any other securities in the open market in order to reduce a short position created in connection with the offering.

The managing underwriter may impose a penalty bid on a syndicate member to reclaim a selling concession in connection with an offering when the Common Shares originally sold by the syndicate member is purchased in syndicate covering transactions or otherwise.

Any of these activities may stabilize or maintain the market price of the Common Shares above independent market levels. The underwriters are not required to engage in these activities, and may end any of these activities at any time.

Any underwriters to whom the offered Common Shares are sold for offering and sale may make a market in the offered Common Shares, but the underwriters will not be obligated to do so and may discontinue any market-making at any time without notice. There can be no assurance that there will be a liquid trading market for the offered Common Shares.

Under agreements entered into with the Fund, underwriters and agents may be entitled to indemnification by us against certain civil liabilities, including liabilities under the 1933 Act, or to contribution for payments the underwriters or agents may be required to make.

The underwriters, agents, and their affiliates may engage in financial or other business transactions with the Fund in the ordinary course of business.

Pursuant to a requirement of the Financial Industry Regulatory Authority, or FINRA, the maximum compensation to be received by any FINRA member or independent broker-dealer may not be greater than eight percent (8%) of the gross proceeds received by the Fund for the sale of any securities being registered pursuant to SEC Rule 415 under the Securities Act of 1933, as amended.

The aggregate offering price specified on the cover of this Prospectus relates to the offering of the Common Shares not yet issued as of the date of this Prospectus.

Agents, underwriters or dealers through which the Fund may offer Common Shares may include affiliated persons of the Fund or the Adviser.

To the extent permitted under the 1940 Act and the rules and regulations promulgated thereunder, the underwriters may from time to time act as a broker or dealer and receive fees in connection with the execution of portfolio transactions on behalf of the Fund after the underwriters have ceased to be underwriters and, subject to certain restrictions, each may act as a broker while it is an underwriter.

A Prospectus and accompanying Prospectus Supplement in electronic form may be made available on the websites maintained by underwriters. The underwriters may agree to allocate a number of Common Shares for sale to their online brokerage account holders. Such allocations of Common Shares for internet distributions will be made on the same basis as other allocations. In addition, Common Shares may be sold by the underwriters to securities dealers who resell Common Shares to online brokerage account holders.

CUSTODIAN, DIVIDEND DISBURSING AGENT AND TRANSFER AGENT

Custodian

State Street Bank and Trust Company will serve as custodian for the Fund. The Custodian will hold cash, securities, and other assets of the Fund as required by the 1940 Act. Custody fees are payable monthly based on assets held in custody, investment purchases and sales activity and account maintenance fees, plus reimbursement for certain out-of-pocket expenses. The principal business address of the Custodian is 225 Franklin Street, Boston, Massachusetts 02110-2801.

Dividend Disbursing Agent and Transfer Agent

Computershare Trust Company, N.A. will act as the Fund's dividend paying agent, transfer agent and the registrar for the Fund's Common Shares. Computershare is located at P.O. Box 43078, Providence, Rhode Island 02940-3078.

LEGAL COUNSEL

Counsel to the Fund is Stradley Ronon Stevens & Young, LLP, 2005 Market Street, Suite 2600, Philadelphia, Pennsylvania 19103-7018.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

PricewaterhouseCoopers LLP, 1000 Louisiana Street, Suite 5800, Houston, Texas 77002, is the independent registered public accounting firm of the Fund.

ADDITIONAL INFORMATION

This Prospectus constitutes part of a Registration Statement filed by the Fund with the SEC under the Securities Act, and the 1940 Act. This Prospectus omits certain of the information contained in the Registration Statement, and reference is hereby made to the Registration Statement and related exhibits for further information with respect to the Fund and the Common Shares offered hereby. Any statements contained herein concerning the provisions of any document are not necessarily complete, and, in each instance, reference is made to the copy of such document filed as an exhibit to the Registration Statement or otherwise filed with the SEC. Each such statement is qualified in its entirety by such reference. The complete Registration Statement may be obtained from the SEC upon payment of the fee prescribed by its rules and regulations or free of charge through the SEC's website (www.sec.gov).

PRIVACY POLICY

You share personal and financial information with us that is necessary for your transactions and your account records. We take very seriously the obligation to keep that information confidential and private.

Invesco collects nonpublic personal information about you from account applications or other forms you complete and from your transactions with us or our affiliates. We do not disclose information about you or our former customers to service providers or other third parties except to the extent necessary to service your account and in other limited circumstances as permitted by law. For example, we use this information to facilitate the delivery of transaction confirmations, financial reports, prospectuses and tax forms.

Even within Invesco, only people involved in the servicing of your accounts and compliance monitoring have access to your information. To ensure the highest level of confidentiality and security, Invesco maintains physical, electronic and procedural safeguards that meet or exceed federal standards. Special measures, such as data encryption and authentication, apply to your communications with us on our website. More detail is available to you at invesco.com/privacy.

Invesco High Income Trust II

2,000,000 Common Shares

PROSPECTUS

June 28, 2018

Invesco High Income Trust II

STATEMENT OF ADDITIONAL INFORMATION

Invesco High Income Trust II (the Fund) is a diversified, closed-end management investment company. The Fund's investment objective is to provide to its common shareholders high current income, while seeking to preserve shareholders' capital, through investment in a professionally managed, diversified portfolio of high-income producing fixed-income securities. There can be no assurance that the Fund will achieve its investment objective, and you could lose some or all of your investment.

This Statement of Additional Information relates to the offering, from time to time, of up to 2,000,000 common shares of beneficial interest, no par value (Common Shares) in one or more offerings. This Statement of Additional Information (SAI) is not a prospectus, but should be read in conjunction with the prospectus for the Fund, dated June 28, 2018 (the Prospectus), and any related supplement to the Prospectus (each a Prospectus Supplement). Investors should obtain and read the Prospectus and any related Prospectus Supplement prior to purchasing Common Shares. A copy of the Prospectus and any related Prospectus Supplement may be obtained without charge, by calling the Fund at (800) 345-7999.

The Prospectus and this SAI omit certain of the information contained in the registration statement filed with the Securities and Exchange Commission (the SEC). The registration statement may be obtained from the SEC upon payment of the fee prescribed, or inspected at the SEC's office or via its website (www.sec.gov) at no charge. Capitalized terms used but not defined herein have the meanings ascribed to them in the Prospectus.

THE FUND

The Fund is a diversified, closed-end management investment company organized as a statutory trust under the laws of the State of Delaware. The Fund was originally organized as a Massachusetts business trust on February 15, 1989. The Fund commenced operations on April 28, 1989. Effective as of August 27, 2012, the Fund completed a redomestication to a Delaware statutory trust. Effective June 1, 2010, the Fund's name was changed from Van Kampen High Income Trust II to Invesco Van Kampen High Income Trust II. Effective December 3, 2012, the Fund's name was changed from Invesco Van Kampen High Income Trust II to Invesco High Income Trust II. The Fund's currently outstanding common shares of beneficial interest, no par value (the Common Shares) are listed on the New York Stock Exchange (the NYSE) under the symbol VLT and the Common Shares offered by this Prospectus, subject to notice of issuance, will also be listed on the NYSE.

INVESTMENT OBJECTIVE AND POLICIES

Additional Investment Policies and Portfolio Contents

The following information supplements the discussion of the Fund's investment objective, policies and techniques that are described in the Prospectus. The Fund may make the following investments, among others, some of which are part of its principal investment strategies and some of which are not. The principal risks of the Fund's principal investment strategies are discussed in the Prospectus.

Swap Agreements

Generally, swap agreements are contracts between the Fund and a brokerage firm, bank, or other financial institution (the counterparty) for periods ranging from a few days to multiple years. In a basic swap transaction, the Fund agrees with its counterparty to exchange the returns (or differentials in returns) earned or realized on a particular asset such as an equity or debt security, commodity, currency or interest rate, calculated with respect to a notional amount. The notional amount is the set amount selected by the parties to use as the basis on which to calculate the obligations that the parties to a swap agreement have agreed to exchange. The parties typically do not exchange the notional amount. Instead, they agree to exchange the returns that would be earned or realized if the notional amount were invested in given investments or at given interest rates. Examples of returns that may be exchanged in a swap agreement are those of a particular security, a particular fixed or variable interest rate, a particular foreign currency, or a basket of securities representing a particular index. In some cases, such as cross currency swaps, the swap agreement may require delivery (exchange) of the entire notional value of one designated currency for another designated currency.

Numerous proposals have been made by various regulatory entities and rulemaking bodies to regulate the OTC derivatives markets, including, specifically, credit default swaps. The Fund cannot predict the outcome or final form of any of these proposals or if or when any of them would become effective. However, any additional regulation or limitation on the OTC markets for derivatives could materially and adversely impact the ability of the Fund to buy or sell OTC derivatives, including credit default swaps.

Commonly used swap agreements include:

Credit Default Swaps (CDS). An agreement between two parties where the first party agrees to make one or more payments to the second party, while the second party assumes the risk of certain defaults, generally a failure to pay or bankruptcy of the issuer on a referenced debt obligation. CDS transactions are typically individually negotiated and structured. The Fund may enter into CDS to create long or short exposure to domestic or foreign corporate debt securities, sovereign debt securities or municipal securities.

The Fund may buy a CDS (buy credit protection). In this transaction the Fund makes a stream of payments based on a fixed interest rate (the premium) over the life of the swap in exchange for a counterparty (the seller) taking on the risk of default of a referenced debt obligation (the Reference Obligation). If a credit event occurs for the Reference Obligation, the Fund would cease making premium payments and it would deliver defaulted bonds to the seller. In return, the seller would pay the notional value of the Reference Obligation to the Fund. Alternatively, the two counterparties may agree to cash settlement in which the seller delivers to the Fund (buyer) the difference between the market value and the notional value of the Reference Obligation. If no event of default occurs, the Fund pays the fixed premium to the seller for the life of the contract, and no other exchange occurs.

Alternatively, the Fund may sell a CDS (sell credit protection). In this transaction the Fund will receive premium payments from the buyer in exchange for taking the risk of default of the Reference Obligation. If a credit event occurs for the Reference Obligation, the buyer would cease to make premium payments to the Fund and deliver the Reference Obligation to the Fund. In return, the Fund would pay the notional value of the Reference Obligation to the buyer. Alternatively, the two counterparties may agree to cash settlement in which the Fund would pay the buyer the difference between the market value and the notional value of the Reference

Obligation. If no event of default occurs, the Fund receives the premium payments over the life of the contract, and no other exchange occurs.

Credit Default Index (CDX). A CDX is an index of CDS. CDX allow an investor to manage credit risk or to take a position on a basket of credit entities (such as CDS or commercial mortgage-backed securities (CMBS)) in a more efficient manner than transacting in single name CDS. If a credit event occurs in one of the underlying companies, the protection is paid out via the delivery of the defaulted bond by the buyer of protection in return for payment of the notional value of the defaulted bond by the seller of protection or it may be settled through a cash settlement between the two parties. The underlying company is then removed from the index. New series of CDX are issued on a regular basis. A Commercial Mortgage-Backed Index (CMBX) is a type of CDX made up of 25 tranches of commercial mortgage-backed securities rather than CDS. Unlike other CDX contracts where credit events are intended to capture an event of default CMBX involves a pay-as-you-go (PAUG) settlement process designed to capture non-default events that affect the cash flow of the reference obligation. PAUG involves ongoing, two-way payments over the life of a contract between the buyer and the seller of protection and is designed to closely mirror the cash flow of a portfolio of cash commercial mortgage-backed securities.

Currency Swap. An agreement between two parties pursuant to which the parties exchange a U.S. dollar-denominated payment for a payment denominated in a different currency.

Interest Rate Swap. An agreement between two parties pursuant to which the parties exchange a floating rate payment for a fixed rate payment based on a specified principal or notional amount. In other words, Party A agrees to pay Party B a fixed interest rate and in return Party B agrees to pay Party A a variable interest rate.

Total Return Swap. An agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains.

Inflation Swaps. Inflation swap agreements are contracts in which one party agrees to pay the cumulative percentage increase in a price index, such as the Consumer Price Index, over the term of the swap (with some lag on the referenced inflation index), and the other party pays a compounded fixed rate. Inflation swap agreements may be used to protect the net asset value of the Fund against an unexpected change in the rate of inflation measured by an inflation index. The value of inflation swap agreements is expected to change in response to changes in real interest rates. Real interest rates are tied to the relationship between nominal interest rates and the rate of inflation.

Interest Rate Locks. An interest rate lock is a hedging agreement in which the parties lock in an interest rate at a future maturity date. A cash settlement payment on that date that reflects changes in agreed upon interest rates. This settlement payment is designed to offset changes in the cost of borrowing for the hedged bond transaction. An interest rate lock may be terminated prior to its stated maturity date by calculating the payment due as of the termination date.

Options

An option is a contract that gives the purchaser of the option, in return for the premium paid, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option at the exercise price during the term of the option (for American style options or on a specified date for European style options), the security, currency or other instrument underlying the option (or in the case of an index option the cash value of the index). Options on a CDS or a Futures Contract (defined below) give the purchaser the right to enter into a CDS or assume a position in a Futures Contract.

The Fund may engage in certain strategies involving options to attempt to manage the risk of their investments or, in certain circumstances, for investment (i.e., as a substitute for investing in securities). Option transactions present the

possibility of large amounts of exposure (or leverage), which may result in the Fund's net asset value being more sensitive to changes in the value of the option.

The value of an option position will reflect, among other things, the current market value of the underlying investment, the time remaining until expiration, the relationship of the exercise price to the market price of the underlying investment, the price volatility of the underlying investment and general market and interest rate conditions.

The Fund may effectively terminate its right or obligation under an option by entering into an offsetting closing transaction. For example, the Fund may terminate its obligation under a call or put option that it had written by purchasing an identical call or put option, which is known as a closing purchase transaction. Conversely, the Fund may terminate a position in a put or call option it had

purchased by writing an identical put or call option, which is known as a closing sale transaction. Closing transactions permit the Fund to realize profits or limit losses on an option position prior to its exercise or expiration.

Options may be either listed on an exchange or traded in OTC markets. Listed options are tri-party contracts (i.e., performance of the obligations of the purchaser and seller are guaranteed by the exchange or clearing corporation) and have standardized strike prices and expiration dates. OTC options are two-party contracts with negotiated strike prices and expiration dates and differ from exchange-traded options in that OTC options are transacted with dealers directly and not through a clearing corporation (which guarantees performance). In the case of OTC options, there can be no assurance that a liquid secondary market will exist for any particular option at any specific time; therefore the Fund may be required to treat some or all OTC options as illiquid securities. Although the Fund will enter into OTC options only with dealers that are expected to be capable of entering into closing transactions with it, there is no assurance that the Fund will in fact be able to close out an OTC option position at a favorable price prior to exercise or expiration. In the event of insolvency of the dealer, the Fund might be unable to close out an OTC option position at any time prior to its expiration.

Types of Options include:

Put Options on Securities. A put option gives the purchaser the right to sell, to the writer, the underlying security, contract or foreign currency at the stated exercise price at any time prior to the expiration date of the option for American style options or on a specified date for European style options, regardless of the market price or exchange rate of the security, contract or foreign currency, as the case may be, at the time of exercise. If the purchaser exercises the put option, the writer of a put option is obligated to buy the underlying security, contract or foreign currency for the exercise price.

Call Options on Securities. A call option gives the purchaser the right to buy, from the writer, the underlying security, contract or foreign currency at the stated exercise price at any time prior to the expiration of the option (for American style options) or on a specified date (for European style options), regardless of the market price or exchange rate of the security, contract or foreign currency, as the case may be, at the time of exercise. If the purchaser exercises the call option, the writer of a call option is obligated to sell to and deliver the underlying security, contract or foreign currency to the purchaser of the call option for the exercise price.

Index Options. Index options (or options on securities indices) give the holder the right to receive, upon exercise, cash instead of securities, if the closing level of the securities index upon which the option is based is greater than, in the case of a call, or less than, in the case of a put, the exercise price of the option. The amount of cash is equal to the difference between the closing price of the index and the exercise price of the call or put times a specified multiple (the multiplier), which determines the total dollar value for each point of such difference.

The risks of investment in index options may be greater than options on securities. Because index options are settled in cash, when the Fund writes a call on an index it cannot provide in advance for its potential settlement obligations by acquiring and holding the underlying securities. The Fund can offset some of the risk of writing a call index option by holding a diversified portfolio of securities similar to those on which the underlying index is based. However, the Fund cannot, as a practical matter, acquire and hold a portfolio containing exactly the same securities that underlie the index and, as a result, bears the risk that the value of the securities held will not be perfectly correlated with the value of the index.

CDS Option. A CDS option transaction gives the holder the right to enter into a CDS at a specified future date and under specified terms in exchange for a purchase price or premium. The writer of the option bears the risk of any unfavorable move in the value of the CDS relative to the market value on the exercise date, while the purchaser may allow the option to expire unexercised.

Options on Futures Contracts. Options on Futures Contracts give the holder the right to assume a position in a Futures Contract (to buy the Futures Contract if the option is a call and to sell the Futures Contract if the option is a put) at a specified exercise price at any time during the period of the option.

Swaptions. An option on a swap agreement, also called a swaption, is an option that gives the buyer the right, but not the obligation, to enter into a swap on a future date in exchange for paying a market based premium. A receiver swaption gives the owner the right to receive the total return of a specified asset, reference rate, or index. A payer swaption gives the owner the right to pay the total return of a specified asset, reference rate, or index. Swaptions also include options that allow an existing swap to be terminated or extended by one of the counterparties.

Option Techniques include:

Writing Options. The Fund may write options to generate additional income and to seek to hedge its portfolio against market or exchange rate movements. As the writer of an option, the Fund may have no control over when the underlying instruments must be

sold (in the case of a call option) or purchased (in the case of a put option) because the option purchaser may notify the Fund of exercise at any time prior to the expiration of the option (for American style options). In general, options are rarely exercised prior to expiration. Whether or not an option expires unexercised, the writer retains the amount of the premium.

The Fund would write a put option at an exercise price that, reduced by the premium received on the option, reflects the price it is willing to pay for the underlying security, contract or currency. In return for the premium received for writing a put option, the Fund assumes the risk that the price of the underlying security, contract, or foreign currency will decline below the exercise price, in which case the put would be exercised and the Fund would suffer a loss.

In return for the premium received for writing a call option on a security the Fund holds, the Fund foregoes the opportunity for profit from a price increase in the underlying security, contract, or foreign currency above the exercise price so long as the option remains open, but retains the risk of loss should the price of the security, contract, or foreign currency decline.

If an option that the Fund has written expires, the Fund will realize a gain in the amount of the premium; however, such gain may be offset by a decline in the market value of the underlying security, contract or currency, held by the Fund during the option period. If a call option is exercised, the Fund will realize a gain or loss from the sale of the underlying security, contract or currency, which will be increased or offset by the premium received. The obligation imposed upon the writer of an option is terminated upon the expiration of the option, or such earlier time at which the Fund effects a closing purchase transaction by purchasing an option (put or call as the case may be) identical to that previously sold.

Purchasing Options. The Fund may only purchase a put option on an underlying security, contract or currency owned by the Fund in order to protect against an anticipated decline in the value of the security, contract or currency held by the Fund; or purchase put options on underlying securities, contracts or currencies against which it has written other put options. The premium paid for the put option and any transaction costs would reduce any profit realized when the security, contract or currency is delivered upon the exercise of the put option. Conversely, if the underlying security, contract or currency does not decline in value, the option may expire worthless and the premium paid for the protective put would be lost.

The Fund may purchase a call option for the purpose of acquiring the underlying security, contract or currency for its portfolio, or on underlying securities, contracts or currencies against which it has written other call options. The Fund is not required to own the underlying security in order to purchase a call option. If the Fund does not own the underlying position, the purchase of a call option would enable the Fund to acquire the security, contract or currency at the exercise price of the call option plus the premium paid. So long as it holds a call option, rather than the underlying security, contract or currency itself, the Fund is partially protected from any unexpected increase in the market price of the underlying security, contract or currency. If the market price does not exceed the exercise price, the Fund could purchase the security on the open market and could allow the call option to expire, incurring a loss only to the extent of the premium paid for the option.

Straddles/Spreads/Collars. Spread and straddle options transactions. In spread transactions, the Fund buys and writes a put or buys and writes a call on the same underlying instrument with the options having different exercise prices, expiration dates, or both. In straddles, the Fund purchases a put option and a call option or writes a put option and a call option on the same instrument with the same expiration date and typically the same exercise price. When the Fund engages in spread and straddle transactions, it seeks to profit from differences in the option premiums paid and received and in the market prices of the related options positions when they are closed out or sold. Because these transactions require the Fund to buy and/or write more than one option simultaneously, the Fund's ability to enter into such transactions and to liquidate its positions when necessary or deemed advisable may be more limited than if the Fund were to buy or sell a single option. Similarly, costs incurred by the Fund in connection with these transactions

will in many cases be greater than if the Fund were to buy or sell a single option.

Option Collars. The Fund also may use option collars. A collar position combines a put option purchased by the Fund (the right of the Fund to sell a specific security within a specified period) with a call option that is written by the Fund (the right of the counterparty to buy the same security) in a single instrument. The Fund's right to sell the security is typically set at a price that is below the counterparty's right to buy the security. Thus, the combined position collars the performance of the underlying security, providing protection from depreciation below the price specified in the put option, and allowing for participation in any appreciation up to the price specified by the call option.

Futures Contracts

A Futures Contract is a two-party agreement to buy or sell a specified amount of a specified security or currency (or delivery of a cash settlement price, in the case of certain futures such as an index future or Eurodollar Future) for a specified price at a designated date, time and place (collectively, Futures Contracts). A sale of a Futures Contract means the acquisition of a contractual obligation to deliver the underlying instrument or asset called for by the contract at a specified price on a specified date. A purchase

of a Futures Contract means the acquisition of a contractual obligation to acquire the underlying instrument or asset called for by the contract at a specified price on a specified date.

The Fund will only enter into Futures Contracts that are traded (either domestically or internationally) on futures exchanges and are standardized as to maturity date and underlying financial instrument. Futures exchanges and trading thereon in the United States are regulated under the Commodity Exchange Act and by the Commodity Futures Trading Commission (CFTC). Foreign futures exchanges and trading thereon are not regulated by the CFTC and are not subject to the same regulatory controls. Each Fund has claimed an exclusion from the definition of the term commodity pool operator under the Commodity Exchange Act and, therefore, is not subject to registration or regulation as a pool operator under the act.

Brokerage fees are incurred when a Futures Contract is bought or sold, and margin deposits must be maintained at all times when a Futures Contract is outstanding. Margin for a Futures Contracts is the amount of funds that must be deposited by the Fund in order to initiate Futures Contracts trading and maintain its open positions in Futures Contracts. A margin deposit made when the Futures Contract is entered (initial margin) is intended to ensure the Fund s performance under the Futures Contract. The margin required for a particular Futures Contract is set by the exchange on which the Futures Contract is traded and may be significantly modified from time to time by the exchange during the term of the Futures Contract.

Subsequent payments, called variation margin, received from or paid to the futures commission merchant through which the Fund enters into the Futures Contract will be made on a daily basis as the futures price fluctuates making the Futures Contract more or less valuable, a process known as marking-to-market. When the Futures Contract is closed out, if the Fund has a loss equal to or greater than the margin amount, the margin amount is paid to the futures commission merchant along with any amount in excess of the margin amount; if the Fund has a loss of less than the margin amount, the difference is returned to the Fund; or if the Fund has a gain, the margin amount is paid to the Fund and the futures commission merchant pays the Fund any excess gain over the margin amount.

Closing out an open Futures Contract is affected by entering into an offsetting Futures Contract for the same aggregate amount of the identical financial instrument or currency and the same delivery date. There can be no assurance, however, that the Fund will be able to enter into an offsetting transaction with respect to a particular Futures Contract at a particular time. If the Fund is not able to enter into an offsetting transaction, it will continue to be required to maintain the margin deposits on the Futures Contract.

In addition, if the Fund were unable to liquidate a Futures Contract or an option on a Futures Contract position due to the absence of a liquid secondary market or the imposition of price limits, it could incur substantial losses. The Fund would continue to be subject to market risk with respect to the position. In addition, except in the case of purchased options, the Fund would continue to be required to make daily variation margin payments.

Types of Futures Contracts include:

Currency Futures. A currency Futures Contract is a standardized, exchange-traded contract to buy or sell a particular currency at a specified price at a future date (commonly three months or more). Currency Futures Contracts may be highly volatile and thus result in substantial gains or losses to the Fund.

Index Futures. A stock index Futures Contract is an exchange-traded contract that provides for the delivery, at a designated date, time and place, of an amount of cash equal to a specified dollar amount times the difference between the stock index value at the close of trading on the date specified in the contract and the price agreed upon in the Futures Contract; no physical delivery of stocks comprising the index is made.

Interest Rate Futures. An interest-rate Futures Contract is an exchange-traded contract in which the specified underlying security is either an interest-bearing fixed income security or an inter-bank deposit. Two examples of common interest rate Futures Contracts are U.S. Treasury futures and Eurodollar Futures Contracts. The specified security for U.S. Treasury futures is a U.S. Treasury security. The specified security for Eurodollar futures is the London Interbank Offered Rate (LIBOR) which is a daily reference rate based on the interest rates at which banks offer to lend unsecured funds to other banks in the London wholesale money market.

Security Futures. A security Futures Contract is an exchange-traded contract to purchase or sell, in the future, a specified quantity of a security (other than a Treasury security, or a narrow-based securities index) at a certain price.

Forward Currency Contracts

A forward currency contract is an over-the-counter contract between two parties to buy or sell a particular currency at a specified price at a future date. The parties may exchange currency at the maturity of the forward currency contract, or if the parties

agree prior to maturity, enter into a closing transaction involving the purchase or sale of an offsetting amount of currency. Forward currency contracts are traded over-the-counter, and not on organized commodities or securities exchanges.

The Fund may enter into forward currency contracts with respect to a specific purchase or sale of a security, or with respect to its portfolio positions generally.

The cost to the Fund of engaging in forward currency contracts varies with factors such as the currencies involved, the length of the contract period, interest rate differentials and the prevailing market conditions. Because forward currency contracts are usually entered into on a principal basis, no fees or commissions are involved. The use of forward currency contracts does not eliminate fluctuations in the prices of the underlying securities the Fund owns or intends to acquire, but it does establish a rate of exchange in advance. While forward currency contract sales limit the risk of loss due to a decline in the value of the hedged currencies, they also limit any potential gain that might result should the value of the currencies increase.

Other Investment Practices

In connection with the Fund's investment objective and policies, the Fund may purchase and sell options on fixed-income securities and on indices based on fixed-income securities to the extent a market in any such indices exists or develops and engage in interest rate and other hedging transactions. These investment practices entail risks. The Adviser may use some or all of the following hedging and risk management practices when their use appears appropriate. Although the Adviser believes that these investment practices may further the Fund's investment objective, no assurance can be given that these investment practices will achieve this result. If the Fund issues senior securities and seeks to obtain a rating of the senior securities, the rating service issuing such rating may, as a condition thereof, impose asset coverage or other requirements compliance with which may restrict the Fund's ability to engage in these investment practices. The Fund cannot predict what, if any, additional requirements may be imposed by such rating service in connection with its rating of any senior securities.

Securities Options Transactions. The Fund may invest in options on fixed-income securities. Such options may be traded over-the-counter or on a national securities exchange. In general, the Fund may purchase and sell (write) options on up to 25% of its net assets. The SEC requires that obligations of investment companies such as the Fund, in connection with option sale positions, must comply with certain segregation or coverage requirements which are more fully described below. No limitation exists on the amount of the Fund's assets which can be used to comply with such segregation or cover requirements.

A call option gives the purchaser the right to buy, and obligates the writer to sell, the underlying security at the agreed upon exercise (or strike) price during the option period. A put option gives the purchaser the right to sell, and obligates the writer to buy, the underlying security at the strike price during the option period. Purchasers of options pay an amount, known as a premium, to the option writer in exchange for the right under the option contract. Option contracts may be written with terms which would permit the holder of the option to purchase or sell the underlying security only upon the expiration date of the option.

The Fund may purchase put and call options in hedging transactions to protect against a decline in the market value of the securities in the Fund's portfolio (e.g., by the purchase of a put option) and to protect against an increase in the cost of fixed-income securities that the Fund may seek to purchase in the future (e.g., by the purchase of a call option). In the event the Fund purchases put and call options, paying premiums therefor, and price movements in the underlying securities are such that exercise of the options would not be profitable for the Fund, then to the extent such underlying securities correlate in value to the Fund's portfolio securities, losses of the premiums paid may be offset by an increase in the value of the Fund's portfolio securities (in the case of a purchase of put options) or by a decrease in the cost of acquisition of securities by the Fund (in the case of a purchase of call options).

The Fund may also sell put and call options as a means of increasing the yield on the Fund's portfolio and as a means of providing limited protection against decreases in market value of the Fund's portfolio. When the Fund sells an option, if the underlying securities do not increase (in the case of a call option) or decrease (in the case of a put option) to a price level that would make the exercise of the option profitable to the holder of the option, the option generally will expire without being exercised and the Fund will realize as profit the premium received for such option. When a call option of which the Fund is the writer is exercised, the Fund will be required to sell the underlying securities to the option holder at the strike price; therefore the Fund will not participate in any increase in the price of such securities above the strike price. When a put option of which the Fund is the writer is exercised, the Fund will be required to purchase the underlying securities at the strike price, which may be in excess of the market value of such securities.

Over-the-counter options (OTC options) differ from exchange-traded options in several respects. They are transacted directly with dealers and not with a clearing corporation, and a risk exists of non-performance by the dealer. OTC options are available for a greater variety of securities and for a wider range of expiration dates and exercise prices than are available for exchange-traded

options. Because OTC options are not traded on an exchange, pricing is normally done by reference to information from a market maker, which information is monitored carefully by the Adviser and verified in appropriate cases.

Generally, the Fund's policy, in order to avoid the exercise of an option sold by it, will be to cancel its obligation under the option by entering into a closing purchase transaction, if available, unless selling (in the case of a call option) or purchasing (in the case of a put option) the underlying securities is determined to be in the Fund's interest. A closing purchase transaction consists of the Fund purchasing an option having the same terms as the option sold by the Fund and has the effect of cancelling the Fund's position as a seller. The premium which the Fund will pay in executing a closing purchase transaction may be higher (or lower) than the premium received when the option was sold, depending in large part upon the relative price of the underlying security at the time of each transaction. To the extent options sold by the Fund are exercised and the Fund either delivers portfolio securities to the holder of a call option or liquidates securities in its portfolio as a source of funds to purchase securities put to the Fund, the Fund's portfolio turnover rate will increase, which would cause the Fund to incur additional brokerage expenses.

During the option period the Fund, as a covered call writer, gives up the potential appreciation above the exercise price should the underlying security rise in value, and the Fund, as a secured put writer, retains the risk of loss should the underlying security decline in value. For the covered call writer, substantial appreciation in the value of the underlying security would result in the security being called away at the strike price of the option which may be substantially below the fair market value of such security. For the secured put writer, substantial depreciation in the value of the underlying security would result in the security being put to the writer at the strike price of the option which may be substantially in excess of the fair market value of such security. If a covered call option or a secured put option expires unexercised, the writer realizes a gain, and the buyer a loss, in the amount of the premium.

To the extent that an active market exists or develops, whether on a national securities exchange or over-the-counter, in options on indices based upon fixed-income securities, the Fund may purchase and sell options on such indices, subject to the limitation that the Fund may purchase and sell options on up to 25% of its net assets. Through the writing or purchase of index options, the Fund can achieve many of the same objectives as through the use of options on individual securities. Options on securities indices are similar to options on securities except that, rather than the right to take or make delivery of a security at a specified price, an option on a securities index gives the holder the right to receive, upon exercise of the option, an amount of cash if the closing level of the securities index upon which the option is based is greater than, in the case of a call, or less than, in the case of a put, the strike price of the option.

Price movements in securities which the Fund owns or intends to purchase will not correlate perfectly with movements in the level of an index and, therefore, the Fund bears the risk of a loss on an index option which is not offset completely by movements in the price of such securities. Because index options are settled in cash, a call writer cannot determine the amount of its settlement obligations in advance and, unlike call writing on specific securities, cannot provide in advance for, or cover, its potential settlement obligations by acquiring and holding the underlying securities.

Interest Rate and Other Hedging Transactions. In order to seek to protect the value of its portfolio securities against declines resulting from changes in interest rates or other market changes, the Fund may enter into various hedging transactions, such as financial futures contracts and related options contracts.

The Fund may enter into various interest rate hedging transactions using financial instruments with a high degree of correlation to the securities which the Fund may purchase for its portfolio, including interest rate futures contracts in such financial instruments and interest rate related indices, and put and call options on such futures contracts and on such financial instruments. The Fund expects to enter into these transactions to lock in a return or spread on a particular investment or portion of its portfolio, to protect against any increase in the price of securities the Fund anticipates purchasing at a later date, or for other risk management strategies. Financial futures and options contracts and the risks attendant to the Fund's use thereof are described more completely below.

The Fund will not engage in the foregoing transactions for speculative purposes, but only as a means to hedge risks associated with management of the Fund's portfolio. Typically, investment in these contracts requires the Fund to deposit with the applicable exchange or other specified financial intermediary as a good faith deposit for its obligations, known as initial margin, an amount of cash or specified debt securities which initially is 1%-15% of the face amount of the contract and which thereafter fluctuates on a periodic basis as the value of the contract fluctuates. Thereafter, the Fund must make additional deposits equal to any net losses due to unfavorable price movements of the contract and will be credited with an amount equal to any net gains due to favorable price movements. These additional deposits or credits are calculated and required daily and are known as variation margin.

The SEC generally requires that when an investment company, such as the Fund, effects transactions of the foregoing nature, such a fund either must segregate cash or high quality, readily marketable portfolio securities with its custodian in the amount of its obligations under the foregoing transactions or must cover such obligations by maintaining positions in portfolio securities, futures contracts or options that would serve to satisfy or offset the risk of such obligations. When effecting transactions of the foregoing

nature, the Fund will comply with such segregation or cover requirements. No limitation exists as to the percentage of the Fund's assets which may be segregated in connection with such transactions.

The Fund will not enter into a futures contract or related option if, immediately after such investment, the sum of the amount of its initial margin deposits and premiums on open contracts and options would exceed 5% of the Fund's total assets at current value. The Fund, however, may invest more than such amount in the future if it obtains authority to do so from the appropriate regulatory agencies without rendering the Fund a commodity pool operator or adversely affecting its status as an investment company for federal securities law or income tax purposes.

All of the foregoing transactions present certain risks. In particular, the variable degree of correlation between price movements of futures contracts and price movements in the security being hedged creates the possibility that losses on the hedge may be greater than gains in the value of the Fund's securities. In addition, these instruments may not be liquid in all circumstances and are closed out generally by entering into offsetting transactions rather than by disposing of the obligations. As a result, in volatile markets, the Fund may not be able to close out a transaction without incurring losses. Although the contemplated use of those contracts should tend to reduce the risk of loss due to a decline in the value of the hedged security, at the same time the use of these contracts could tend to limit any potential gain which might result from an increase in the value of such security. Finally, the daily deposit requirements for futures contracts create an ongoing greater potential financial risk than do option purchase transactions, where the exposure is limited to the cost of the premium for the option.

Successful use of futures contracts and options thereon by the Fund is subject to the ability of the Adviser to correctly predict movements in the direction of interest rates and other factors affecting markets for securities. If the Adviser's expectations are not met, the Fund would be in a worse position than if a hedging strategy had not been pursued. For example, if the Fund has hedged against the possibility of an increase in interest rates which would adversely affect the price of securities in its portfolio and the price of such securities increases instead, the Fund will lose part or all of the benefit of the increased value of its securities because it will have offsetting losses in its futures positions. In addition, in such situations, if the Fund has insufficient cash to meet daily variation margin requirements, it may have to sell securities to meet such requirements. Such sales of securities may, but will not necessarily, be at increased prices which reflect the rising market. The Fund may have to sell securities at a time when it is disadvantageous to do so.

In addition to engaging in transactions utilizing options on futures contracts, the Fund may purchase put and call options on securities and, as developed from time to time, on interest indices and other instruments. Purchasing options may increase investment flexibility and improve total return, but also risks loss of the option premium if an asset the Fund has the option to buy declines in value or if an asset the Fund has the option to sell increases in value.

The Fund also may enter into various other hedging transactions, such as interest rate swaps and the purchase or sale of interest rate caps and floors. The Fund expects to enter into these transactions primarily to preserve a return or spread on a particular investment or portion of its portfolio or to protect against any increase in the price of securities the Fund anticipates purchasing at a later date. The Fund intends to use these transactions as a hedge and not as a speculative investment. The Fund will not sell interest rate caps or floors that it does not own. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest (e.g., an exchange of floating rate payments for fixed rate payments). The purchase of an interest rate cap entitles the purchaser, to the extent that a specified index exceeds a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling such interest rate cap. The purchase of an interest rate floor entitles the purchaser, to the extent that a specified index falls below a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling such interest rate floor.

The Fund may enter into interest rate swaps, caps and floors on either an asset-based or liability-based basis, depending on whether it is hedging its assets or its liabilities, and will usually enter into interest rate swaps on a net

basis (i.e., the two payment streams are netted out), with the Fund receiving or paying, as the case may be, only the net amount of the two payments. Insomuch as these hedging transactions are entered into for good faith risk management purposes, the Adviser and the Fund believe such obligations do not constitute senior securities and, accordingly, will not treat them as being subject to its investment restrictions on borrowing. The net amount of the excess, if any, of the Fund's obligations over its entitlements with respect to each interest rate swap will be accrued on a daily basis and an amount of cash or liquid securities having an aggregate net asset value at least equal to the accrued excess will be maintained in a segregated account by the Fund's custodian. The creditworthiness of firms with which the Fund enters into interest rate swaps, caps or floors will be monitored on an ongoing basis by the Adviser pursuant to procedures adopted and reviewed, on an ongoing basis, by the Board of Trustees of the Fund. If a default occurs by the other party to such transaction, the Fund will have contractual remedies pursuant to the agreements related to the transaction.

New options and futures contracts and other financial products, and various combinations thereof, continue to be developed and the Fund may invest in any such options, contracts and products as may be developed to the extent consistent with its investment objective and the regulatory requirements applicable to investment companies.

Options and Futures. The Fund may engage in futures and options transactions in accordance with its investment objective and policies. The Fund intends to engage in such transactions if it appears advantageous to the Adviser to do so in order to pursue its investment objective, to hedge against the effects of market conditions and to stabilize the value of its assets. The use of futures and options, and the possible benefits and attendant risks are discussed below, along with information concerning certain other investment policies and techniques.

Financial Futures Contracts. The Fund may enter into financial futures contracts for the future delivery of a financial instrument, such as a security, or the cash value of a securities index. This investment technique is designed primarily to hedge (i.e., protect) against anticipated future changes in market conditions which otherwise might adversely affect the value of securities which the Fund holds or intends to purchase. A sale of a futures contract means the undertaking of a contractual obligation to deliver the securities, or the cash value of an index, called for by the contract at a specified price during a specified delivery period. A purchase of a futures contract means the undertaking of a contractual obligation to acquire the securities, or cash value of an index, at a specified price during a specified delivery period. At the time of delivery in the case of fixed income securities pursuant to the contract, adjustments are made to recognize differences in value arising from the delivery of securities with a different interest rate than that specified in the contract. In some cases, securities called for by a futures contract may not have been issued at the time the contract was written.

Although some financial futures contracts by their terms call for the actual delivery or acquisition of securities, in most cases the contractual commitment is closed out before delivery without having to make or take delivery of the security. The offsetting of a contractual obligation is accomplished by purchasing (or selling, as the case may be) on a commodities exchange an identical futures contract calling for delivery in the same period. Such a transaction cancels the obligation to make or take delivery of the securities. All transactions in the futures market are made, offset or fulfilled through a clearing house associated with the exchange on which the contracts are traded. The Fund will incur brokerage fees when it purchases or sells contracts, and will be required to maintain margin deposits. Futures contracts entail risks. If the Adviser's judgment about the general direction of securities markets or interest rates is wrong, the Fund's overall performance may be poorer than if the Fund had not entered into such contracts.

There may be an imperfect correlation between movements in prices of futures contracts and portfolio securities being hedged. In addition, the market prices of futures contracts may be affected by certain factors. If participants in the futures market elect to close out their contracts through offsetting transactions rather than meet margin requirements, distortions in the normal relationship between the securities and futures markets could result. Price distortions could also result if investors in futures contracts decide to make or take delivery of underlying securities rather than engage in closing transactions due to the resultant reduction in the liquidity of the futures market. In addition, because from the point of view of speculators, the margin requirements in the futures market may be less onerous than margin requirements in the cash market, increased participation by speculators in the futures market could cause temporary price distortions. Due to the possibility of price distortions in the futures market and because of the imperfect correlation between movements in the prices of securities and movements in the prices of futures contracts, a correct forecast of market trends by the Adviser may still not result in a successful hedging transaction. If this should occur, the Fund could lose money on the financial futures contracts and also on the value of its portfolio securities.

Options on Financial Futures Contracts. The Fund may purchase and write call and put options on financial futures contracts. An option on a futures contract gives the purchaser the right, in return for the premium paid, to assume a position in a futures contract at a specified exercise price at any time during the period of the option. Upon exercise, the writer of the option delivers the futures contract to the holder at the exercise price. The Fund would be required to deposit with its custodian initial margin and maintenance margin with respect to put and call options on futures contracts written by it. Options on futures contracts involve risks similar to those risks relating to transactions in financial futures contracts described above. Also, an option purchased by the Fund may expire worthless, in which case the Fund would lose the premium paid therefor.

Options on Securities. The Fund may write covered call options so long as it owns securities which are acceptable for escrow purposes and may write secured put options, which means that so long as the Fund is obligated as a writer of a put option, it will invest an amount, not less than the exercise price of the put option, in eligible securities. A call option gives the purchaser the right to buy, and the writer the obligation to sell, the underlying security at the exercise price during the option period. A put option gives the purchaser the right to sell, and the writer the obligation to buy, the underlying security at the exercise price during the option period. The premium received for writing an option will reflect, among other things, the current market price of the underlying security, the relationship of the exercise price to the market price, the price volatility of the underlying security, the option period, supply and demand and interest rates. The Fund may write or purchase spread options, which are options for which the exercise price may be a fixed dollar spread or yield spread between the security underlying the option and another security that is used as a benchmark. The exercise price of an option may be below, equal to or above the current market value of the underlying security at the time the option is written. The buyer of a put who also owns the related security is protected by ownership of a put option against any decline in that security's price below the exercise price, less the amount paid for the option. At times the Fund may wish to establish a position in a security upon which call options are available. By purchasing a call option on such security the Fund would be able to fix the cost of

acquiring the security, this being the cost of the call plus the exercise price of the option. This procedure also provides some protection from an unexpected downturn in the market, because the Fund is only at risk for the amount of the premium paid for the call option which it can, if it chooses, permit to expire.

Options on Securities Indices. The Fund also may purchase and write call and put options on securities indices. Through the writing or purchase of index options, the Fund can achieve many of the same objectives as through the use of options on individual securities. Options on securities indices are similar to options on a security except that, rather than the right to take or make delivery of a security at a specified price, an option on a securities index gives the holder the right to receive, upon exercise of the option, an amount of cash if the closing level of the securities index upon which the option is based is greater than, in the case of a call, or less than, in the case of a put, the exercise price of the option. This amount of cash is equal to the difference between the closing price of the index and the exercise price of the option. The writer of the option is obligated, in return for the premium received, to make delivery of this amount. Unlike options on securities (which require, upon exercise, delivery of the underlying security), all settlements of options on securities indices, upon exercise thereof, are in cash, and the gain or loss on an option on an index depends on price movements in the market generally (or in a particular industry or segment of the market on which the underlying index base) rather than price movements in individual securities, as is the case with respect to options on securities.

When the Fund writes an option on a securities index, it will be required to deposit with its custodian eligible securities equal in value to 100% of the exercise price in the case of a put, or the contract's value in the case of a call. In addition, where the Fund writes a call option on a securities index at a time when the contract value exceeds the exercise price, the Fund will segregate, until the option expires or is closed out, cash or cash equivalents equal in value to such excess.

Options on futures contracts and index options involve risks similar to those risks relating to transactions in financial futures described above. Also, an option purchased by the Fund may expire worthless, in which case the Fund would lose the premium paid therefor.

Over-the-Counter Options. As previously indicated in this Prospectus (see "The Fund's Investments - Other Investment Practices - Securities Options Transactions"), the Fund may deal in OTC options. As also indicated in this Prospectus, the Fund has adopted procedures for engaging in OTC options for the purpose of reducing any potential adverse impact of such transactions upon the liquidity of the Fund's portfolio.

As part of these procedures the Fund will only engage in OTC options transactions with primary dealers that have been specifically approved by the Board of Trustees of the Fund. The Fund and its Adviser believe that the approved dealers should be agreeable and able to enter into closing transactions if necessary and, therefore, present minimal credit risks to the Fund. The Fund anticipates entering into written agreements with those dealers to whom the Fund may sell OTC options, pursuant to which the Fund would have the absolute right to repurchase the OTC options from such dealers at any time at a price determined pursuant to a formula set forth in certain no action letters published by the SEC staff. The Fund will not engage in OTC options transactions if the amount invested by the Fund in OTC options plus, with respect to OTC options written by the Fund, the amounts required to be treated as illiquid pursuant to the terms of such letters (and the value of the assets used as cover with respect to OTC option sales which are not within the scope of such letters), plus the amount invested by the Fund in illiquid securities, would exceed 20% of the Fund's total assets.

Regulatory Restrictions. To the extent required to comply with applicable SEC releases and staff positions, when purchasing a futures contract or writing a put option, the Fund will maintain, in a segregated account, cash or liquid high-grade securities equal to the value of such contracts.

To the extent required to comply with Commodity Futures Trading Commission Regulations and avoid commodity pool operator status, the Fund will not enter into a futures contract or purchase an option thereon if immediately thereafter the initial margin deposits for futures contracts held by the Fund plus premiums paid by it for open options on futures would exceed 5% of the Fund's total assets. The Fund will not engage in transactions in financial futures contracts or options thereon for speculation, but only to attempt to hedge against changes in market conditions affecting the values of securities which the Fund holds or intends to purchase. When futures contracts or options thereon are purchased to protect against a price increase on securities intended to be purchased later, it is anticipated that at least 75% of such intended purchases will be completed. When other futures contracts or options thereon are purchased, the underlying value of such contracts will at all times not exceed the sum of: (1) accrued profit on such contracts held by the broker; (2) cash or high quality money market instruments set aside in an identifiable manner; and (3) cash proceeds from investments due in 30 days.

S-12

General Risks Associated With Derivatives

The use by the Fund of derivatives may involve certain risks, as described below.

Counterparty Risk. OTC derivatives are generally governed by a single master agreement for each counterparty. Counterparty risk refers to the risk that the counterparty under the agreement will not live up to its obligations. An agreement may not contemplate delivery of collateral to support fully a counterparty's contractual obligation; therefore, the Fund might need to rely on contractual remedies to satisfy the counterparty's full obligation. As with any contractual remedy, there is no guarantee that the Fund will be successful in pursuing such remedies, particularly in the event of the counterparty's bankruptcy. The agreement may allow for netting of the counterparty's obligations on specific transactions, in which case the Fund's obligation or right will be the net amount owed to or by the counterparty. The Fund will not enter into a derivative transaction with any counterparty that Invesco and/or the Sub-Advisers believe does not have the financial resources to honor its obligations under the transaction. Invesco monitors the financial stability of counterparties. Where the obligations of the counterparty are guaranteed, Invesco monitors the financial stability of the guarantor instead of the counterparty.

The Fund will not enter into a transaction with any single counterparty if the net amount owed or to be received under existing transactions under the agreements with that counterparty would exceed 5% of the Fund's net assets determined on the date the transaction is entered into.

Leverage Risk. Leverage exists when the Fund can lose more than it originally invests because it purchases or sells an instrument or enters into a transaction without investing an amount equal to the full economic exposure of the instrument or transaction. The Fund mitigates leverage by segregating or earmarking assets or otherwise covers transactions that may give rise to leverage.

Liquidity Risk. The risk that a particular derivative is difficult to sell or liquidate. If a derivative transaction is particularly large or if the relevant market is illiquid, it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price, which may result in significant losses to the Fund.

Pricing Risk. The risk that the value of a particular derivative does not move in tandem or as otherwise expected relative to the corresponding underlying instruments.

Regulatory Risk. The risk that a change in laws or regulations will materially impact a security or market.

Amended Commodity Futures Trading Commission (CFTC) Rule 4.5 permits investment advisers to registered investment companies to claim an exclusion from the definition of "commodity pool operator" under the Commodity Exchange Act (CEA) with respect to a fund, provided certain requirements are met. In order to permit the Investment Adviser to claim this exclusion with respect to the Fund, the Fund will limit its transactions in futures, options on futures and swaps (excluding transactions entered into for bona fide hedging purposes, as defined under CFTC regulations) such that either: (i) the aggregate initial margin and premiums required to establish its futures, options on futures and swaps do not exceed 5% of the liquidation value of the Fund's portfolio, after taking into account unrealized profits and losses on such positions; or (ii) the aggregate net notional value of its futures, options on futures and swaps does not exceed 100% of the liquidation value of the Fund's portfolio, after taking into account unrealized profits and losses on such positions. Accordingly, the Fund is not subject to regulation under the CEA or otherwise regulated by the CFTC. If the Adviser was unable to claim the exclusion with respect to the Fund, the Adviser would become subject to registration and regulation as a commodity pool operator, which would subject the Adviser and the Fund to additional registration and regulatory requirements and increased operating expenses.

Failure of Futures Commission Merchants and Clearing Organizations. The Fund may deposit funds required to open margin positions in cleared derivative instruments with a clearing broker registered under the U.S. Commodity

Exchange Act of 1936 (CEA) as a futures commission merchant (FCM). The CEA requires an FCM to segregate all funds received from customers with respect to any orders for the purchase or sale of U.S. domestic futures contracts and cleared swaps from the FCM s proprietary assets. Similarly, the CEA requires each FCM to hold in a separate secure account all funds received from customers with respect to any orders for the purchase or sale of foreign futures contracts and segregate any such funds from the funds received with respect to domestic futures contracts. However, all funds and other property received by a clearing broker from its customers are held by the clearing broker on a commingled basis in an omnibus account and may be freely accessed by the clearing broker, which may also invest any such funds in certain instruments permitted under the applicable regulation. There is a risk that assets deposited by the Fund with any swaps or futures clearing broker as margin for futures contracts or cleared swaps may, in certain circumstances, be used to satisfy losses of other clients of the Fund s clearing broker. In addition, the assets of the Fund may not be fully protected in the event

S-13

of the clearing broker's bankruptcy, as the Fund would be limited to recovering only a pro rata share of all available funds segregated on behalf of the clearing broker's combined domestic customer accounts.

Similarly, the CEA requires a clearing organization approved by the CFTC as a derivatives clearing organization to segregate all funds and other property received from a clearing member's clients in connection with domestic futures, swaps and options contracts from any funds held at the clearing organization to support the clearing member's proprietary trading. Nevertheless, with respect to futures and options contracts, a clearing organization may use assets of a non-defaulting customer held in an omnibus account at the clearing organization to satisfy payment obligations of a defaulting customer of the clearing member to the clearing organization. As a result, in the event of a default or the clearing broker's other clients or the clearing broker's failure to extend funds in connection with any such default, the Fund would not be able to recover the full amount of assets deposited by the clearing broker on its behalf with the clearing organization.

Risks Of Hedging Strategies Using Derivatives. The use by the Fund of hedging strategies involves special considerations and risks, as described below. Successful use of hedging transactions depends upon Invesco's and the Sub-Advisers' ability to predict correctly the direction of changes in the value of the applicable markets and securities, contracts and/or currencies. While Invesco and the Sub-Advisers are experienced in the use of derivatives for hedging, there can be no assurance that any particular hedging strategy will succeed. In a hedging transaction, there might be imperfect correlation, or even no correlation, between the price movements of an instrument used for hedging and the price movements of the investments being hedged. Such a lack of correlation might occur due to factors unrelated to the value of the investments being hedged, such as changing interest rates, market liquidity, and speculative or other pressures on the markets in which the hedging instrument is traded. Hedging strategies, if successful, can reduce risk of loss by wholly or partially offsetting the negative effect of unfavorable price movements in the investments being hedged. However, hedging strategies can also reduce opportunity for gain by offsetting the positive effect of favorable price movements in the hedged investments.

INVESTMENT RESTRICTIONS

The following are fundamental investment restrictions of the Fund and may not be changed without the approval of the holders of a majority of the Fund's outstanding voting securities (which for this purpose and under the 1940 Act means the lesser of (i) 67% or more of the Fund's voting securities present at a meeting at which more than 50% of the Fund's outstanding voting securities are present or represented by proxy or (ii) more than 50% of the Fund's outstanding voting securities). Except as otherwise noted, all percentage limitations set forth below apply immediately after a purchase and any subsequent change in any applicable percentage resulting from market fluctuations does not require any action. With respect to the limitations on the issuance of senior securities and in the case of borrowings, the percentage limitations apply at the time of issuance and on an ongoing basis. The Fund may not:

1. With respect to 75% of its total assets, purchase any securities (other than obligations guaranteed by the United States Government or by its agencies or instrumentalities), if as a result more than 5% of the Fund's total assets would then be invested in securities of a single issuer or if as a result the Fund would hold more than 10% of the outstanding voting securities of any single issuer, except that the Fund may purchase securities of other investment companies to the extent permitted by (i) the 1940 Act, as amended from time to time, (ii) the rules and regulations promulgated by the SEC under the 1940 Act, as amended from time to time, or (iii) an exemption or other relief from the provisions of the 1940 Act.
2. Invest more than 25% of its total assets in securities of issuers conducting their principal business activities in the same industry; provided, that this limitation shall not apply with respect to investments in U.S. Government

securities.

3. Issue senior securities, (including borrowing money or entering into reverse repurchase agreements) in excess of 33 1/3% of its total assets (including the amount of senior securities issued but excluding any liabilities and indebtedness not constituting senior securities) except that the Fund may issue senior securities which are stocks (including preferred shares of beneficial interest) subject to the limitations set forth in Section 18 of the 1940 Act and except that the Fund may borrow up to an additional 5% of its total assets for temporary purposes; or pledge its assets other than to secure such issuance or in connection with hedging transactions, when-issued and delayed delivery transactions and similar investment strategies. The Fund's obligations under interest rate swaps are not treated as senior securities.
4. Make loans of money or property to any person, except (i) to the extent the securities the Fund may invest are considered to be loans; (ii) through loans of portfolio securities, (iii) through the acquisition of securities subject to repurchase agreements and (iv) that the Fund may lend money or property in connection with maintenance of the value of, or the Fund's interest with respect to, the securities owned by the Fund.
5. Buy any securities on margin. Neither the deposit of initial or variation margin in connection with hedging transactions nor short-term credits as may be necessary for the clearance of transactions is considered the purchase of a security on margin.

6. Sell any securities short, write, purchase or sell puts, calls or combinations thereof, or purchase or sell financial futures or options, except as described in the Fund's Prospectus.
7. Act as an underwriter of securities, except to the extent the Fund may be deemed to be an underwriter in connection with the sale of securities held in its portfolio.
8. Make investments for the purpose of exercising control or participation in management, except to the extent that exercise by the Fund of its rights under agreements related to securities owned by the Fund would be deemed to constitute such control or participation except that the Fund may purchase securities of other investment companies to the extent permitted by (i) the 1940 Act, as amended from time to time, (ii) the rules and regulations promulgated by the SEC under the 1940 Act, as amended from time to time, or (iii) an exemption or other relief from the provisions of the 1940 Act.
9. Invest in securities issued by other investment companies except as part of a merger, reorganization or other acquisition and except to the extent permitted by (i) the 1940 Act, as amended from time to time, (ii) the rules and regulations promulgated by the SEC under the 1940 Act, as amended from time to time, or (iii) an exemption or other relief from the provisions of the 1940 Act.
10. Buy or sell oil, gas or other mineral leases, rights or royalty contracts, although the Fund may purchase securities of issuers which deal in, represent interests in or are secured by interests in such leases, rights or contracts, except to the extent that the Fund may invest in equity interests generally, as described in the Fund's Prospectus.
11. Purchase or sell real estate, commodities or commodity contracts, except to the extent the securities the Fund may invest in are considered to be interests in real estate, commodities or commodity contracts or to the extent the Fund exercises its rights under agreements relating to such securities (in which case the Fund may liquidate real estate acquired as a result of a default on a mortgage), and except to the extent the hedging and risk management transactions the Fund may engage in are considered to be commodities or commodities contracts.

TRUSTEES AND OFFICERS

The business and affairs of the Fund are managed under the direction of the Fund's Board of Trustees (the Board) and the Fund's officers appointed by the Board. The tables below list the trustees and the executive officers of the Fund and their principal occupations, other directorships held by the trustees and their affiliations, if any, with the Adviser or its affiliates. The Fund Complex includes each of the investment companies advised by the Adviser as of June 4, 2018. Trustees serve until their successors are duly elected and qualified. Officers are annually elected by the Board. The principal business address of each Trustee and Officer is c/o Invesco Senior Loan Fund, 1555 Peachtree Street, N.E., Atlanta, Georgia 30309.

Additional Information about the Trustees

Interested Persons

Martin L. Flanagan, Trustee

Martin L. Flanagan has been a member of the Board of Trustees of the Invesco Funds since 2007. Mr. Flanagan is president and chief executive officer of Invesco Ltd., a position he has held since August 2005. He is also a member of the Board of Directors of Invesco Ltd.

Mr. Flanagan joined Invesco, Ltd. from Franklin Resources, Inc., where he was president and co-chief executive officer from January 2004 to July 2005. Previously he had been Franklin's co-president from May 2003 to January 2004, chief operating officer and chief financial officer from November 1999 to May 2003, and senior vice president and chief financial officer from 1993 until November 1999.

Mr. Flanagan served as director, executive vice president and chief operating officer of Templeton, Galbraith & Hansberger, Ltd. before its acquisition by Franklin in 1992. Before joining Templeton in 1983, he worked with Arthur Andersen & Co.

Mr. Flanagan is a chartered financial analyst and a certified public accountant. He serves as vice chairman of the Investment Company Institute and a member of the executive board at the SMU Cox School of Business.

The Board believes that Mr. Flanagan's long experience as an executive in the investment management area benefits the Fund.

Philip A. Taylor, Trustee

Philip A. Taylor has been a member of the Board of Trustees of the Invesco Funds since 2006. Mr. Taylor has headed Invesco's North American retail business as Senior Managing Director of Invesco Ltd. since April 2006. He previously served as chief executive officer of Invesco Trimark Investments since January 2002.

Mr. Taylor joined Invesco in 1999 as senior vice president of operations and client services and later became executive vice president and chief operating officer.

Mr. Taylor was president of Canadian retail broker Investors Group Securities from 1994 to 1997 and managing partner of Meridian Securities, an execution and clearing broker, from 1989 to 1994. He held various management positions with Royal Trust, now part of Royal Bank of Canada, from 1982 to 1989. He began his career in consumer brand management in the U.S. and Canada with Richardson-Vicks, now part of Procter & Gamble.

The Board believes that Mr. Taylor's long experience in the investment management business benefits the Fund.

Independent Trustees

Bruce L. Crockett, Trustee and Chair

Bruce L. Crockett has been a member of the Board of Trustees of the Invesco Funds since 1978, and has served as Independent Chair of the Board of Trustees and their predecessor funds since 2004.

Mr. Crockett has more than 30 years of experience in finance and general management in the banking, aerospace and telecommunications industries. From 1992 to 1996, he served as president, chief executive officer and a director of

COMSAT Corporation, an international satellite and wireless telecommunications company.

Mr. Crockett has also served, since 1996, as chairman of Crockett Technologies Associates, a strategic consulting firm that provides services to the information technology and communications industries. Mr. Crockett also serves on the Board of ALPS (Attorneys Liability Protection Society) and Ferroglobe PLC. (metallurgical company) and he is a life trustee of the University of Rochester Board of Trustees. He is a member of the Audit Committee of Ferroglobe PLC.

The Board of Trustees elected Mr. Crockett to serve as its Independent Chair because of his extensive experience in managing public companies and familiarity with investment companies.

David C. Arch, Trustee

David C. Arch has been a member of the Board of Trustees of the Invesco Funds and their predecessor funds since 2010. From 1984 to 2010, Mr. Arch served as Director or Trustee of investment companies in the Van Kampen Funds complex.

Mr. Arch is the Chairman of Blistex Inc., a consumer health care products manufacturer. Mr. Arch is a member of the Board of the Illinois Manufacturers Association and a member of the World Presidents Organization.

The Board believes that Mr. Arch's experience as the CEO of a public company and his experience with investment companies benefits the Fund.

Jack M. Fields, Trustee

Jack M. Fields has been a member of the Board of Trustees of the Invesco Funds since 1997.

Mr. Fields served as a member of Congress, representing the 8th Congressional District of Texas from 1980 to 1997. As a member of Congress, Mr. Fields served as Chairman of the House Telecommunications and Finance Subcommittee, which has jurisdiction and oversight of the Federal Communications Commission and the SEC. Mr. Fields co-sponsored the National Securities Markets Improvements Act of 1996, and played a leadership role in enactment of the Securities Litigation Reform Act.

Mr. Fields currently serves as Chief Executive Officer of the Twenty-First Century Group, Inc. in Washington, D.C., a bipartisan Washington consulting firm specializing in Federal government affairs.

Mr. Fields also served as a Director of Insperity, Inc. (formerly known as Administaff), a premier professional employer organization with clients nationwide until 2015. In addition, Mr. Fields serves as Chairman and sits on the Board of Discovery Learning Alliance, a nonprofit organization dedicated to providing educational resources to people in need around the world through the use of technology.

Cynthia Hostetler, Trustee

Cynthia Hostetler has been a member of the Board of Trustees of the Invesco Funds since 2017.

Ms. Hostetler is currently a member of the board of directors of the Vulcan Materials Company, a public company engaged in the production and distribution of construction materials, and Trilinc Global Impact Fund LLC, a publicly registered non-traded limited liability company that invests in a diversified portfolio of private debt instruments. Previously, Ms. Hostetler served as a member of the board of directors/trustees of Aberdeen Investment Funds, a mutual fund complex, and of Edgen Group Inc., a public company that provides products and services to energy and construction companies, from 2012 to 2013, prior to its sale to Sumitomo.

From 2001 to 2009 Ms. Hostetler served as Head of Investment Funds and Private Equity at Overseas Private Investment Corporation (OPIC), a government agency that supports US investment in the emerging markets. Ms. Hostetler oversaw a multi-billion dollar investment portfolio in private equity funds. Prior to joining OPIC, Ms. Hostetler served as President and member of the board of directors of First Manhattan Bancorporation, a bank holding company, and its largest subsidiary, First Savings Bank, from 1991 to 2001.

The Board believes that Ms. Hostetler's knowledge of financial services and investment management, her experience as a director of other companies, including a mutual fund complex, her legal background, and other professional experience gained through her prior employment benefit the Fund.

Dr. Eli Jones, Trustee

Dr. Eli Jones has been a member of the Board of Trustees of the Invesco Funds since 2016.

Dr. Jones is the dean of the Mays Business School at Texas A&M University and holder of the Peggy Pitman Mays Eminent Scholar Chair in Business. Dr. Jones has served as a director of Insperty, Inc. since April 2004 and is chair of the Compensation Committee and a member of the Nominating and Corporate Governance Committee. Prior to his current position, from 2012-2015, Dr. Jones was the dean of the Sam M. Walton College of Business at the University of Arkansas and holder of the Sam M. Walton Leadership Chair in Business. Prior to joining the faculty at the University of Arkansas, he was dean of the E. J. Ourso College of Business and Ourso Distinguished Professor of Business at Louisiana State University from 2008 to 2012; professor of marketing and associate dean at the C.T. Bauer College of Business at the University of Houston from 2007 to 2008; an associate professor of marketing from 2002 to 2007; and an assistant professor from 1997 until 2002. He taught at Texas A&M University for several years before joining the faculty of the University of Houston. Dr. Jones served as the executive director of the Program for Excellence in Selling and the Sales Excellence Institute at the University of Houston from 1997 to 2007. Before becoming a professor, he worked in sales and sales management for three Fortune 100 companies: Quaker Oats, Nabisco, and Frito-Lay. Dr. Jones is a past director of Arvest Bank. He received his Bachelor of Science degree in journalism in 1982, his MBA in 1986 and his Ph.D. in 1997, all from Texas A&M University.

The Board believes that Dr. Jones' experience in academia and his experience in marketing benefits the Fund.

Dr. Prema Mathai-Davis, Trustee

Dr. Prema Mathai-Davis has been a member of the Board of Trustees of the Invesco Funds since 1998.

Prior to her retirement in 2000, Dr. Mathai-Davis served as Chief Executive Officer of the YWCA of the USA. Prior to joining the YWCA, Dr. Mathai-Davis served as the Commissioner of the New York City Department for the Aging. She was a Commissioner of the Metropolitan Transportation Authority of New York, the largest regional transportation network in the U.S. Dr. Mathai-Davis also serves as a Trustee of the YWCA Retirement Fund, the first and oldest pension fund for women, and on the advisory board of the Johns Hopkins Bioethics Institute. Dr. Mathai-Davis was the president and chief executive officer of the Community Agency for Senior Citizens, a non-profit social service agency that she established in 1981. She also directed the Mt. Sinai School of Medicine-Hunter College Long-Term Care Gerontology Center, one of the first of its kind.

The Board believes that Dr. Mathai-Davis' extensive experience in running public and charitable institutions benefits the Fund.

Teresa M. Ressel, Trustee

Teresa M. Ressel has been a member of the Board of Trustees of the Invesco Funds since 2017.

Ms. Ressel has previously served across both the private sector and the U.S. government. Formerly, Ms. Ressel served from 2004 to 2012 in various capacities at UBS AG, including most recently as Chief Executive Officer of UBS Securities LLC, a broker-dealer division of UBS Investment Bank, and Group Chief Operating Officer of the Americas group at UBS AG. In these roles, Ms. Ressel managed a broad array of operational risk controls, supervisory control, regulatory, compliance, and logistics functions covering the United States and Canada, as well as banking activities covering the Americas.

Between 2001 and 2004, Ms. Ressel served at the U.S. Treasury first as Deputy Assistant Secretary for Management and Budget and then as Assistant Secretary for Management and Chief Financial Officer. Ms. Ressel was confirmed by the U.S. Senate and handles a broad array of management duties including finance & accounting, operational risk, audit and performance measurement along with information technology and infrastructure security.

Ms. Ressel currently serves as a member of the board of directors and as a member of the audit committee of ON Semiconductor Corporation, a publicly traded technology company. Ms. Ressel currently chairs their Corporate Governance and Nominating Committee. ON Semiconductor is a leading supplier of semiconductor-based solutions, many of which reduce global energy use. She has served on the ON Semiconductor board since 2012.

From 2014 to 2017, Ms. Ressel also served on the board of directors at Atlantic Power Corporation, a publicly traded company which owns and operates a diverse fleet of power generation across the United States and Canada.

The Board believes that Ms. Ressel's risk management and financial experience in both the private and public sectors benefits the Fund.

Ann Barnett Stern, Trustee

Ann Barnett Stern has been a member of the Board of Trustees of the Invesco Funds since 2017.

Ms. Stern is currently the President and Chief Executive Officer of Houston Endowment Inc., a private philanthropic institution. She has served in this capacity since 2012. Formerly, Ms. Stern served in various capacities at Texas Children's Hospital from 2003 to 2012, including General Counsel and Executive Vice President.

Ms. Stern is also currently a member of the Dallas Board of the Federal Reserve Bank of Dallas, a role she has held since 2013.

The Board believes that Ms. Stern's knowledge of financial services and investment management and her experience as a director, and other professional experience gained through her prior employment benefit the Fund.

Raymond Stickel, Jr., Trustee

Raymond Stickel, Jr. has been a member of the Board of Trustees of the other Invesco Funds since 2005.

Mr. Stickel retired after a 35-year career with Deloitte & Touche. For the last five years of his career, he was the managing partner of the investment management practice for the New York, New Jersey and Connecticut region. In addition to his management role, he directed audit and tax services for several mutual fund clients.

Mr. Stickel began his career with Touche Ross & Co. (the Firm) in Dayton, Ohio, became a partner in 1976 and managing partner of the office in 1985. He also started and developed an investment management practice in the Dayton office that grew to become a significant source of investment management talent for the Firm. In Ohio, he served as the audit partner on numerous mutual funds and on public and privately held companies in other industries. Mr. Stickel has also served on the Firm's Accounting and Auditing Executive Committee.

The Board believes that Mr. Stickel's experience as a partner in a large accounting firm working with investment managers and investment companies benefits the Fund.

Robert C. Troccoli, Trustee

Robert C. Troccoli has been a member of the Board of Trustees of the Invesco Funds since 2016.

Mr. Troccoli retired in 2010 after a 39-year career with KPMG LLP. Since 2013 he has been an adjunct professor at the University of Denver's Daniels College of Business.

Mr. Troccoli's leadership roles during his career with KPMG included managing partner and partner in charge of the Denver office's Financial Services Practice. He served regulated investment companies, investment advisors, private partnerships, private equity funds, sovereign wealth funds, and financial services companies. Toward the end of his career, Mr. Troccoli was a founding member of KPMG's Private Equity Group in New York City, where he served private equity firms and sovereign wealth funds. Mr. Troccoli also served mutual fund clients along with several large private equity firms as Global Lead Partner of KPMG's Private Equity Group.

The Board believes that Mr. Troccoli's experience as a partner in a large accounting firm and his knowledge of investment companies, investment advisors, and private equity firms benefits the Fund.

Christopher L. Wilson, Trustee

Christopher L. Wilson has been a member of the Board of Trustees of the Invesco Funds since 2017.

Mr. Wilson started a career in the investment management business in 1980. From 2004 to 2009, Mr. Wilson served as President and Chief Executive Officer of Columbia Funds, a mutual fund complex with over \$350 billion in assets. From 2009 to 2017, Mr. Wilson served as a Managing Partner of CT2, LLC, an early stage investing and consulting firm for start-up companies.

From 2014 to 2016, Mr. Wilson served as a member of the Board of Directors of the mutual fund company managed by TDAM USA Inc., an affiliate of TD Bank, N.A.

Mr. Wilson also currently serves as a member of the Board of Directors of ISO New England, Inc., the company that establishes the wholesale electricity market and manages the electrical power grid in New England. Mr. Wilson is currently the chair of the Audit and Finance Committee, which also oversees cybersecurity, and a member of the systems planning committee of ISO-NE, Inc. He previously served as chair of the Human Resources and Compensation Committee and was a member of the Markets Committee. He has served on the ISO New England, Inc. board since 2011.

The Board believes that Mr. Wilson's knowledge of financial services and investment management, his experience as a director and audit committee member of other companies, including a mutual fund company, and other professional experience gained through his prior employment benefit the Fund.

Committee Structure

The Trustees have the authority to take all actions that they consider necessary or appropriate in connection with management of the Trust, including, among other things, approving the investment objectives, investment policies and fundamental investment restrictions for the Fund. The Trust has entered into agreements with various service providers, including the Fund's investment adviser, administrator, transfer agent, distributor and custodians, to conduct the day-to-day operations of the Fund. The Trustees are responsible for selecting these service providers, approving the terms of their contracts with the Fund, and exercising general oversight of these arrangements on an ongoing basis.

Certain Trustees and officers of the Trust are affiliated with Invesco and Invesco Ltd., the parent corporation of Invesco. All of the Trust's executive officers hold similar offices with some or all of the other Trusts.

Leadership Structure and the Board of Trustees. The Board is currently composed of thirteen Trustees, including eleven Trustees who are not interested persons of the Funds, as that term is defined in the 1940 Act (collectively, the Independent Trustees and each, an Independent Trustee). In addition to eight regularly scheduled meetings per year, the Board holds special meetings or informal conference calls to discuss specific matters that may require action prior to the next regular meeting. As discussed below, the Board has established five standing committees – the Audit Committee, the Compliance Committee, the Governance Committee, the Investments Committee and the Valuation, Distribution and Proxy Oversight Committee (the Committees), to assist the Board in performing its oversight responsibilities.

The Board has appointed an Independent Trustee to serve in the role of Chairman. The Chairman's primary role is to preside at meetings of the Board and act as a liaison with the Adviser and other service providers, officers, including the Senior Officer of the Trust, attorneys, and other Trustees between meetings. The Chairman also participates in the preparation of the agenda for the meetings of the Board, is active with mutual fund industry organizations, and may perform such other functions as may be requested by the Board from time to time. Except for any duties specified pursuant to the Trust's Declaration of Trust or By-laws, the designation of Chairman does not impose on such Independent Trustee any duties, obligations or liability that is greater than the duties, obligations or liability imposed on such person as a member of the Board generally.

The Board believes that its leadership structure, including having an Independent Trustee as Chairman, allows for effective communication between the Trustees and management, among the Trustees and among the Independent Trustees. The existing Board structure, including its Committee structure, provides the Independent Trustees with effective control over Board governance while also allowing them to receive and benefit from insight from the two interested Trustees who are active officers of the Fund's investment adviser. The Board's leadership structure promotes dialogue and debate, which the Board believes allows for the proper consideration of matters deemed important to the Fund and its shareholders and results in effective decision-making.

Risk Oversight. The Board considers risk management issues as part of its general oversight responsibilities throughout the year at its regular meetings and at regular meetings of its Committees. Invesco prepares regular reports that address certain investment, valuation and compliance matters, and the Board as a whole or the Committees also receive special written reports or presentations on a variety of risk issues at the request of the Board, a Committee or the Senior Officer.

The Audit Committee is apprised by, and discusses with, management its policies on risk assessment and risk management. Such discussion includes a discussion of the guidelines governing the process by which risks are assessed and managed and an identification of each Fund's major financial risk exposures. In addition, the Audit Committee meets regularly with representatives of Invesco Ltd.'s internal audit group to review reports on their examinations of functions and processes within Invesco that affect the Fund.

The Compliance Committee receives regular compliance reports prepared by Invesco's compliance group and meets regularly with the Fund's Chief Compliance Officer (CCO) to discuss compliance issues, including compliance risks. The Compliance Committee has recommended and the Board has adopted compliance policies and procedures for the Fund and for the Fund's service providers. The compliance policies and procedures are designed to detect, prevent and correct violations of the federal securities laws.

The Governance Committee monitors the composition of the Board and each of its Committees and monitors the qualifications of the Trustees to ensure adherence to certain governance undertakings applicable to the Funds. In addition, the Governance Committee oversees an annual self-assessment of the Board and addresses governance risks, including insurance and fidelity bond matters, for the Trust.

The Investments Committee and its sub-committees receive regular written reports describing and analyzing the investment performance of the Fund. In addition, Invesco's Chief Investment Officers and the portfolio managers of the Fund meet regularly with the Investments Committee or its sub-committees to discuss portfolio performance, including investment risk, such as the impact on the Fund of investments in particular types of securities or instruments, such as derivatives. To the extent that the Fund changes a particular investment strategy that could have a material impact on the Fund's risk profile, the Board generally is consulted in advance with respect to such change.

The Valuation, Distribution and Proxy Oversight Committee monitors fair valuation of portfolio securities based on management reports that include explanations of the reasons for the fair valuation and the methodology used to arrive at the fair value. Such reports also include information concerning illiquid securities in Fund portfolios.

Edgar Filing: Invesco High Income Trust II - Form 486BPOS

The members of the Audit Committee are Messrs. Arch, Bunch, Crockett, Stickel (Chair), Troccoli (Vice Chair), Mss. Hostetler and Ressel and Dr. Soll. The Audit Committee performs a number of functions with respect to the oversight of the Fund's accounting and financial reporting, including: (i) assisting the Board with its oversight of the qualifications, independence and performance of the independent registered public accountants; (ii) appointing independent registered public accountants for the Fund; (iii) to the extent required, pre-approving certain audit and permissible non-audit services; (iv) overseeing the financial reporting process for the Fund; and (v) assisting the Board with its oversight of the integrity of the Fund's financial statements and compliance with legal and regulatory requirements. During the fiscal year ended February 28, 2018, the Audit Committee held eight meetings.

The members of the Compliance Committee are Messrs. Arch (Vice Chair), Bunch, Stickel, Troccoli and Wilson, Ms. Ressel and Dr. Soll (Chair). The Compliance Committee performs a number of functions with respect to compliance matters, including: (i) if requested by the Board, reviewing and making recommendations concerning the qualifications, performance and compensation of the Fund's Chief Compliance

Officer and Senior Officer; (ii) reviewing recommendations and reports made by the Chief Compliance Officer or Senior Officer of the Fund regarding compliance matters; (iii) overseeing compliance policies and procedures of the Fund and its service providers; and (iv) overseeing potential conflicts of interest that are reported to the Compliance Committee by Invesco, the Chief Compliance Officer, or the Senior Officer. During the fiscal year ended February 28, 2018, the Compliance Committee held six meetings.

The members of the Governance Committee are Messrs. Crockett and Fields (Chair), Mss. Hostetler and Stern and Drs. Jones and Mathai-Davis (Vice Chair). The Governance Committee performs a number of functions with respect to governance, including: (i) nominating persons to serve as Independent Trustees and as members of each Committee, and nominating the Chair of the Board and the Chair and Vice-Chair of each Committee; (ii) reviewing and making recommendations to the full Board regarding the size and composition of the Board and the compensation payable to the Independent Trustees; and (iii) overseeing the annual self-evaluation of the performance of the Board and its Committees. During the fiscal year ended February 28, 2018, the Governance Committee held six meetings.

The Governance Committee will consider nominees recommended by a shareholder to serve as trustees, provided: (i) that such person is a shareholder of record at the time he or she submits such names and is entitled to vote at the meeting of shareholders at which trustees will be elected; and (ii) that the Governance Committee or the Board, as applicable, shall make the final determination of persons to be nominated. Notice procedures set forth in the Trust's bylaws require that any shareholder of a Fund desiring to nominate a candidate for election at a shareholder meeting must provide certain information about itself and the candidate, and must submit to the Trust's Secretary the nomination in writing not later than the close of business on the later of the 90th day, nor earlier than the close of business on the 120th day, prior to the first anniversary of the preceding year's annual meeting; provided, however, that in the event that the date of the annual meeting is advanced by more than 30 days or delayed by more than 60 days from such anniversary date or if the Trust has not previously held an annual meeting, notice by the Shareholder to be timely must be so delivered not earlier than the close of business on the 120th day prior to such annual meeting and not later than the close of business on the later of the 90th day prior to such annual meeting or the tenth day following the day on which public announcement of the date of such meeting is first made by the Trust.

The members of the Investments Committee are Messrs. Arch (Vice Chair), Bunch (Chair), Crockett, Fields, Flanagan, Stickel, Taylor, Troccoli (Vice Chair) and Wilson, Mss. Hostetler, Ressel and Stern and Drs. Jones (Vice Chair), Mathai-Davis and Soll. The Investments Committee's primary purposes are to assist the Board in its oversight of the investment management services provided by Invesco and the Sub-Advisers and to periodically review Fund performance information. During the fiscal year ended February 28, 2018, the Investments Committee held six meetings.

The Investments Committee has established three Sub-Committees and delegated to the Sub-Committees responsibility for, among other matters: (i) reviewing the performance of the Invesco Funds that have been assigned to a particular Sub-Committee (for each Sub-Committee, the Designated Funds), unless the Investments Committee takes such action directly; and (ii) reviewing with the applicable portfolio managers from time to time the investment objective(s), policies, strategies, risks and limitations of the Designated Funds.

The members of the Valuation, Distribution and Proxy Oversight Committee are Messrs. Fields, and Wilson, Ms. Stern and Drs. Jones (Vice Chair) and Mathai-Davis (Chair). The Valuation, Distribution and Proxy Oversight Committee performs a number of functions with respect to valuation, distribution and proxy voting, including: (i) reviewing reports and making recommendations to the full Board regarding the Fund's valuation and liquidity methods and determinations, and annually approving and making recommendations to the full Board regarding pricing procedures and procedures for determining the liquidity of securities; (ii) reviewing Invesco's annual report evaluating the pricing vendors, and approving and recommending that the full Board approve changes to pricing vendors and pricing methodologies; (iii) reviewing reports and making recommendations to the full Board regarding mutual fund distribution and marketing channels and expenditures; and (iv) reviewing reports and making recommendations to the

full Board regarding proxy voting guidelines, policies and procedures. During the fiscal year ended February 28, 2018, the Valuation, Distribution and Proxy Oversight Committee held four meetings.

Compensation

Each trustee who is not affiliated with Invesco is compensated for his or her services according to a fee schedule that recognizes the fact that such trustee also serves as a trustee of other Invesco Funds. Each such trustee receives a fee, allocated among the Invesco Funds for which he or she serves as a trustee, that consists of an annual retainer component and a meeting fee component. The Chair of the Board and Chairs and Vice Chairs of certain committees receive additional compensation for their services.

Information regarding compensation paid or accrued for each trustee of the Trust who was not affiliated with Invesco during the year ended December 31, 2017, are as follows:

Name	Aggregate Compensation from the Fund(1)(2)	Total Compensation from the Fund Complex(3)
Independent Trustees⁽⁴⁾		
David C. Arch	\$ 1,433	\$ 388,122
Bruce L. Crockett	\$ 2,512	\$ 691,672
Jack M. Fields	\$ 1,455	\$ 398,322
Cynthia Hostetler ⁽⁵⁾	\$ 1,282	\$ 283,775
Eli Jones	\$ 1,363	\$ 372,372
Prema Mathai-Davis	\$ 1,455	\$ 398,322
Teresa M. Ressel ⁽⁵⁾	\$ 1,270	\$ 286,275
Ann Barnett Stern ⁽⁵⁾	\$ 1,254	\$ 276,275
Raymond Stickel, Jr.	\$ 1,538	\$ 427,522
Robert C. Troccoli	\$ 1,391	\$ 386,372
Christopher L. Wilson ⁽⁵⁾	\$ 1,233	\$ 276,275

- (1) Amounts shown are based on the fiscal year ended February 28, 2018. The total amount of compensation deferred by all trustees of the Trust during the fiscal year ended February 28, 2018, including earnings, was \$3,263.
- (2) The Fund does not accrue or pay retirement or pension benefits to the Trustees. Pursuant to the retirement plan of certain funds in the Fund Complex, which was amended as of December 31, 2015 to convert to a defined contribution plan, estimated annual benefits upon retirement payable by such funds to Trustees is as follows: David C. Arch: \$205,000; Bruce L. Crockett: \$205,000; Jack M. Fields: \$205,000; Prema Mathai-Davis: \$205,000; and Raymond Stickel, Jr.: \$205,000. These amounts represent the estimated annual benefits payable by the Invesco Funds upon the trustees' retirement and assumes each trustee serves until his or her normal retirement date. These amounts are payable by other funds in the Fund Complex and not by the Funds. These amounts are not adjusted to reflect deemed investment appreciation or depreciation.
- (3) All trustees currently serve as trustee of 32 registered investment companies advised by Invesco.
- (4) On December 31, 2017, Mr. James T. Bunch and Mr. Larry Soll retired. During the fiscal year ended February 28, 2018 compensation from the Trust for both Messrs. Bunch and Soll was \$2,306.
- (5) Mss. Cynthia Hostetler, Teresa M. Ressel, Ann Barnett Stern and Mr. Christopher L. Wilson were elected as Trustees for all open-end Invesco Funds by shareholders effective March 9, 2017 and for closed-end Invesco Funds effective March 28, 2017.

Trustee Beneficial Ownership of Securities

The dollar range of equity securities beneficially owned by each Trustee (i) in the Fund and (ii) on an aggregate basis, in all registered investment companies overseen by the Trustee within the Invesco Funds complex, as of December 31, 2017, are as follows:

Name	Fund	Aggregate dollar range of equity securities in all registered investment companies overseen by trustee in the Fund Complex
Interested Trustees		
Martin L. Flanagan	None	Over \$100,000
Philip A. Taylor	None	\$1-\$10,000
Independent Trustees		
David C. Arch	\$1-10,000	Over \$100,000
Bruce L. Crockett	None	Over \$100,000 ⁽¹⁾
Jack M. Fields	None	Over \$100,000
Cynthia Hostetler	None	None
Eli Jones	None	Over \$100,000 ⁽¹⁾
Prema Mathai-Davis	None	Over \$100,000 ⁽¹⁾
Teresa M. Ressel	None	None
Ann Barnett Stern	None	Over \$100,000 ⁽¹⁾

Christopher L. Wilson	None	Over \$100,000

- (1) Includes total amount of compensation deferred by the trustee at his or her election pursuant to a deferred compensation plan. Such deferred compensation is placed in a deferral account and deemed to be invested in one or more of the Invesco Funds

Pre-Amendment Retirement Plan for Trustees

The Trustees have adopted a retirement plan for the Trustees who are not affiliated with the Adviser. The Trustees also have adopted a retirement policy that permits each non-Invesco-affiliated Trustee to serve until December 31 of the year in which the Trustee turns 75. A majority of the Trustees may extend from time to time the retirement date of a Trustee.

Annual retirement benefits are available from the Fund and/or the other Invesco Funds for which a Trustee serves (each, a Covered Fund), for each Trustee who is not an employee or officer of the Adviser, who either (a) became a Trustee prior to December 1, 2008, and who has at least five years of credited service as a Trustee (including service to a predecessor fund) of a Covered Fund, or (b) was a member of the Board of Trustees of a Van Kampen Fund immediately prior to June 1, 2010 (Former Van Kampen Trustee), and has at least one year of credited service as a Trustee of a Covered Fund after June 1, 2010.

Edgar Filing: Invesco High Income Trust II - Form 486BPOS

For Trustees other than Former Van Kampen Trustees, effective January 1, 2006, for retirements after December 31, 2005, the retirement benefits will equal 75% of the Trustee's annual retainer paid to or accrued by any Covered Fund with respect to such Trustee during the twelve-month period prior to retirement, including the amount of any retainer deferred under a separate deferred compensation agreement between the Covered Fund and the Trustee. The amount of the annual retirement benefit does not include additional compensation paid for Board meeting fees or compensation paid to the Chair of the Board and the Chairs and Vice Chairs of certain Board committees, whether such amounts are paid directly to the Trustee or deferred. The annual retirement benefit is payable in quarterly installments for a number of years equal to the lesser of (i) sixteen years or (ii) the number of such Trustee's credited years of service. If a Trustee dies prior to receiving the full amount of retirement benefits, the remaining payments will be made to the deceased Trustee's designated beneficiary for the same length of time that the Trustee would have received the payments based on his or her service or, if the Trustee has elected, in a discounted lump sum payment. A Trustee must have attained the age of 65 (60 in the event of disability) to receive any retirement benefit. A Trustee may make an irrevocable election to commence payment

of retirement benefits upon retirement from the Board before age 72; in such a case, the annual retirement benefit is subject to a reduction for early payment.

If the Former Van Kampen Trustee completes at least 10 years of credited service after June 1, 2010, the retirement benefit will equal 75% of the Former Van Kampen Trustee's annual retainer paid to or accrued by any Covered Fund with respect to such Trustee during the twelve-month period prior to retirement, including the amount of any retainer deferred under a separate deferred compensation agreement between the Covered Fund and such Trustee. The amount of the annual retirement benefit does not include additional compensation paid for Board meeting fees or compensation paid to the Chair of the Board and the Chairs and Vice Chairs of certain Board committees, whether such amounts are paid directly to the Trustee or deferred. The annual retirement benefit is payable in quarterly installments for 10 years beginning after the later of the Former Van Kampen Trustee's termination of service or attainment of age 72 (or age 60 in the event of disability or immediately in the event of death). If a Former Van Kampen Trustee dies prior to receiving the full amount of retirement benefits, the remaining payments will be made to the deceased Trustee's designated beneficiary or, if the Trustee has elected, in a discounted lump sum payment.

If the Former Van Kampen Trustee completes less than 10 years of credited service after June 1, 2010, the retirement benefit will be payable at the applicable time described in the preceding paragraph, but will be paid in two components successively. For the period of time equal to the Former Van Kampen Trustee's years of credited service after June 1, 2010, the first component of the annual retirement benefit will equal 75% of the compensation amount described in the preceding paragraph. Thereafter, for the period of time equal to the Former Van Kampen Trustee's years of credited service after June 1, 2010, the second component of the annual retirement benefit will equal the excess of (x) 75% of the compensation amount described in the preceding paragraph, over (y) \$68,041 plus an interest factor of 4% per year compounded annually measured from June 1, 2010 through the first day of each year for which payments under this second component are to be made. In no event, however, will the retirement benefits under the two components be made for a period of time greater than 10 years. For example, if the Former Van Kampen Trustee completes 7 years of credited service after June 1, 2010, he or she will receive 7 years of payments under the first component and thereafter 3 years of payments under the second component, and if the Former Van Kampen Trustee completes 4 years of credited service after June 1, 2010, he or she will receive 4 years of payments under the first component and thereafter 4 years of payments under the second component.

Amendment of Retirement Plan and Conversion to Defined Contribution Plan

The Trustees approved an amendment to the Retirement Plan to convert it to a defined contribution benefit plan for active Trustees (the Amended Plan). Under the Amended Plan, the benefit amount was amended for each active Trustee to the present value of the Trustee's existing retirement plan benefit as of December 31, 2013 (the Existing Plan Benefit) plus the present value of retirement benefits expected to be earned under the Retirement Plan through the end of the calendar year in which the Trustee attained age 75 (the Expected Future Benefit and, together with the Existing Plan Benefit, the Accrued Benefit). On the conversion date, the Covered Funds established bookkeeping accounts of their pro rata share of the Accrued Benefit, which is deemed to be invested in one or more Invesco Funds selected by the participating Trustees. Each Trustee's Accrued Benefit is not funded and, with respect to the payments of amounts held in the accounts, the participating Trustees have the status of unsecured creditors of the Covered Funds. Trustees will be paid the adjusted account balance under the Amended Plan in quarterly installments for the same period as described above.

Deferred Compensation Agreements

Three retired Trustees, as well as Messrs. Crockett, and Troccoli, Ms. Stern and Drs. Jones and Mathai-Davis (for purposes of this paragraph only, the Deferring Trustees) have each executed a Deferred Compensation Agreement (collectively, the Compensation Agreements). Pursuant to the Compensation Agreements, the Deferring Trustees have the option to elect to defer receipt of up to 100% of their compensation payable by the Funds, and such amounts are

placed into a deferral account and deemed to be invested in one or more Invesco Funds selected by the Deferring Trustees.

Distributions from these deferral accounts will be paid in cash, generally in equal quarterly installments over a period of up to ten (10) years (depending on the Compensation Agreement) beginning on the date selected under the Compensation Agreement. If a Deferring Trustee dies prior to the distribution of amounts in his or her deferral account, the balance of the deferral account will be distributed to his or her designated beneficiary. The Compensation Agreements are not funded and, with respect to the payments of amounts held in the deferral accounts, the Deferring Trustees have the status of unsecured creditors of the Fund and of each other Invesco Fund from which they are deferring compensation.

INVESTMENT ADVISORY AND OTHER SERVICES

Investment Adviser

Invesco serves as the Fund's investment adviser. The Adviser manages the investment operations of the Fund as well as other investment portfolios that encompass a broad range of investment objectives, and has agreed to perform or arrange for the performance of the Fund's day-to-day management. The Adviser, as successor in interest to multiple investment advisers, has been an investment adviser since 1976. Invesco is an indirect, wholly owned subsidiary of Invesco Ltd. Invesco Ltd. and its subsidiaries are an independent global investment management group. Certain of the directors and officers of Invesco are also executive officers of the Fund and their affiliations are shown in this Statement of Additional Information

As investment adviser, Invesco supervises all aspects of the Fund's operations and provides investment advisory services to the Fund. Invesco obtains and evaluates economic, statistical and financial information to formulate and implement investment programs for the Fund. The Fund's Investment Advisory Agreement (the "Advisory Agreement") provides that, in fulfilling its responsibilities, Invesco may engage the services of other investment managers with respect to the Fund. The investment advisory services of Invesco are not exclusive and Invesco is free to render investment advisory services to others, including other investment companies.

Pursuant to an administrative services agreement with the Fund, the Adviser is also responsible for furnishing to the Fund the services of persons believed to be competent to perform supervisory and administrative services required by the Fund and that, in the judgment of the Trustees, are necessary to conduct the business of the Fund effectively, as well as the offices, equipment and other facilities necessary for their operations. Such functions include the maintenance of the Fund's accounts and records, and the preparation of all requisite corporate documents such as tax returns and reports to the SEC and shareholders.

The Advisory Agreement provides that the Fund will pay or cause to be paid all expenses of such Fund not assumed by Invesco, including, without limitation: brokerage commissions, taxes, legal, accounting, auditing, or governmental fees, the cost of preparing share certificates, custodian, transfer and shareholder service agent costs, expenses of issue, sale, redemption and repurchase of shares, expenses of registering and qualifying shares for sale, expenses relating to trustees and shareholder meetings, the cost of preparing and distributing reports and notices to shareholders, the fees and other expenses incurred by the Fund in connection with membership in investment company organizations and the cost of printing copies of prospectuses and statements of additional information distributed to the Fund's shareholders.

Invesco, at its own expense, furnishes to the Fund office space and facilities. Invesco furnishes to the Fund all personnel for managing the affairs of the Fund.

Advisory fees paid (before giving effect to any fee waiver) for the last three fiscal years of the Fund are as follows:

Fiscal Year Ended	Advisory Fees Paid (Before waiver)	
February 28, 2018	\$	1,259,222
February 28, 2017	\$	1,227,453
February 29, 2016	\$	1,259,651

The Adviser has contractually agreed, through at least June 30, 2020, to waive advisory fee payable by the Fund in an amount equal to 100% of the net advisory fees the Adviser receives from the affiliated money market funds on investments by the Fund of uninvested cash in such affiliated money market funds.

Adviser waived advisory fees for the last three fiscal years of the Fund as follows:

Fiscal Year Ended	Advisory Fees Waived
February 28, 2018	\$ 4,873
February 28, 2017	\$ 6,507
February 29, 2016	\$ 4,781

Investment Sub-Advisers

Invesco has entered into a Sub-Advisory Agreement with certain affiliates to serve as sub-advisers to the Fund pursuant to which these affiliated sub-advisers may be appointed by Invesco from time to time to provide discretionary investment management services, investment advice, and/or order execution services to the Fund.

These affiliated sub-advisers, each of which is a registered investment adviser under the Investment Advisers Act of 1940, as amended, are:

Invesco Asset Management Deutschland GmbH (Invesco Deutschland)

Invesco Asset Management Limited (Invesco Asset Management)

Invesco Asset Management (Japan) Limited (Invesco Japan)

Invesco Hong Kong Limited (Invesco Hong Kong)

Invesco Senior Secured Management, Inc. (Invesco Senior Secured)

Invesco Canada Ltd. (Invesco Canada); (each a Sub-Adviser and collectively, the Sub-Advisers).

Invesco and each Sub-Adviser is an indirect wholly-owned subsidiary of Invesco Ltd.

The only fees payable to the Sub-Advisers under the Sub-Advisory Agreement are for providing discretionary investment management services. For such services, Invesco (and not the Fund) pays each Sub-Adviser a fee, computed daily and paid monthly, equal to (i) 40% of the monthly compensation that Invesco receives from the Fund, multiplied by (ii) the fraction equal to the net assets of such Fund as to which such Sub-Adviser shall have provided discretionary investment management services for that month divided by the net assets of such Fund for that month. Pursuant to the Sub-Advisory Agreement, this fee is reduced to reflect contractual or voluntary fee waivers or expense limitations by Invesco, if any, in effect from time to time. In no event shall the aggregate monthly fees paid to the Sub-Advisers under the Sub-Advisory Agreement exceed 40% of the monthly compensation that Invesco receives from the Fund pursuant to its advisory agreement with the Fund, as reduced to reflect contractual or voluntary fees waivers or expense limitations by Invesco, if any.

Invesco did not pay the Sub-Advisers any sub-advisory fees during the last three fiscal years of the Fund.

Securities Lending Arrangements

If the Fund engages in securities lending, Invesco will provide the Fund related investment advisory and administrative services. The Advisory Agreement describes the administrative services to be rendered by Invesco if the Fund engages in securities lending activities, as well as the compensation Invesco may receive for such administrative services. Services to be provided include: (a) overseeing participation in the securities lending program to ensure compliance with all applicable regulatory and investment guidelines; (b) assisting the securities lending agent or principal (the agent) in determining which specific securities are available for loan; (c) monitoring the agent to ensure that securities loans are effected in accordance with Invesco's instructions and with procedures adopted by the Board; (d) preparing appropriate periodic reports for, and seeking appropriate approvals from, the Board with respect to securities lending activities; (e) responding to agent inquiries; and (f) performing such other duties as may be necessary.

Invesco's compensation for advisory services rendered in connection with securities lending is included in the advisory fee schedule. As compensation for the related administrative services Invesco will provide, a lending Fund will pay Invesco a fee equal to 25% of the net monthly interest or fee income retained or paid to the Fund from such activities. Invesco currently waives such fee, and has agreed to seek Board approval prior to its receipt of all or a portion of such fee.

Service Agreements

Administrative Services Agreement. Invesco and the Fund have entered into a Master Administrative Services Agreement (Administrative Services Agreement) pursuant to which Invesco may perform or arrange for the provision of certain accounting and other administrative services to the Fund which are not required to be performed by Invesco under the Advisory Agreement. The Administrative Services Agreement provides that it will remain in effect and continue from year to year only if such continuance is specifically approved at least annually by the Board, including the independent trustees, by votes cast in person at a meeting called for such purpose. Under the Administrative Services Agreement, Invesco is entitled to receive from the Fund reimbursement of its costs or such reasonable compensation as may be approved by the Board. Currently, Invesco is reimbursed for the services of the Fund's principal financial officer and her staff and any expenses related to fund accounting services.

Administrative services fees paid for the last three fiscal years of the Fund are as follows:

Fiscal Year Ended	Administrative Fees Paid
February 28, 2018	\$ 50,000
February 28, 2017	\$ 50,000
February 29, 2016	\$ 50,000

OTHER SERVICE PROVIDERS

Transfer Agent

Computershare Trust Company, N.A. (Computershare), P.O. Box 43078, Providence, RI 02940-3078 is the transfer agent for the Fund.

The Transfer Agency and Service Agreement (the TA Agreement) between the Fund and Computershare provides that Computershare will perform certain services related to the servicing of shareholders of the Fund. Other such services may be delegated or subcontracted to third party intermediaries.

Custodian

State Street Bank and Trust Company (the Custodian), 225 Franklin Street, Boston, Massachusetts 02110, is custodian of all securities and cash of the Fund. The Bank of New York Mellon, 2 Hanson Place, Brooklyn, New York 11217-1431, also serves as sub-custodian to facilitate cash management.

The Custodian is authorized to establish separate accounts in foreign countries and to cause foreign securities owned by the Fund to be held outside the United States in branches of U.S. banks and, to the extent permitted by applicable regulations, in certain foreign banks and securities depositories. Invesco is responsible for selecting eligible foreign securities depositories and for assessing the risks associated with investing in foreign countries, including the risk of using eligible foreign securities depositories in a country. The Custodian is responsible for monitoring eligible foreign securities depositories.

Under its contract with the Fund, the Custodian maintains the portfolio securities of the Fund, administers the purchases and sales of portfolio securities, collects interest and dividends and other distributions made on the securities held in the portfolio of the Fund and performs other ministerial duties. These services do not include any supervisory function over management or provide any protection against any possible depreciation of assets.

Independent Registered Public Accounting Firm

The Fund's independent registered public accounting firm is responsible for auditing the financial statements of the Fund. The Audit Committee of the Fund's Board has appointed, and the Board has ratified and approved, PricewaterhouseCoopers LLP, 1000 Louisiana Street, Suite 5800, Houston, Texas 77002, as the independent registered public accounting firm to audit the financial statements of the Fund. The Fund's audited financial statements incorporated by reference in this SAI and the report of PricewaterhouseCoopers LLP thereon, have been incorporated by reference in this SAI in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

PORTFOLIO MANAGERS

Portfolio Manager Fund Holdings and Information on Other Managed Accounts

Invesco's portfolio managers develop investment models which are used in connection with the management of certain Invesco funds as well as other mutual funds for which Invesco or an affiliate acts as sub-adviser, other pooled investment vehicles that are not registered mutual funds, and other accounts managed for organizations and individuals. The Investments chart reflects the portfolio managers' investments in the Fund. Accounts are grouped into three categories: (i) investments made directly in the Fund, (ii) investments made in an Invesco pooled investment vehicle with the same or similar objectives and strategies as the Fund, and (iii) any investments made in any Invesco fund or Invesco pooled investment vehicle. The Assets Managed chart reflects information regarding accounts other than the Fund for which each portfolio manager has day-to-day management responsibilities. Accounts are grouped into three categories: (i) other registered investment companies, (ii) other pooled investment vehicles and (iii) other accounts. To the extent that any of these accounts pay advisory fees that are based on account performance (performance-based fees),

S-38

information on those accounts is specifically broken out. In addition, any assets denominated in foreign currencies have been converted into U.S. Dollars using the exchange rates as of the applicable date.

Investments

The following information is as of February 28, 2018:

Portfolio Manager	Dollar Range of Investments in the Fund(1)	Dollar Range of Investments in Invesco pooled investment vehicles(2)	Dollar Range of all Investments in the Fund and Invesco pooled investment vehicles(3)	
Andrew Geryol	None	N/A	\$ 500,001	\$1,000,000
Jennifer Hartviksen	None	N/A	\$ 100,001	\$500,000
Joseph Portera	None	N/A	\$ 500,001	\$1,000,000
Scott Roberts	\$100,001 - \$500,000	N/A	Over \$1,000,000	

- (1) This column reflects investments in the Fund's shares beneficially owned by a portfolio manager (as determined in accordance with Rule 16a-1(a) (2) under the Securities Exchange Act of 1934, as amended). Beneficial ownership includes ownership by a portfolio manager's immediate family members sharing the same household.
- (2) This column reflects portfolio managers' investments made either directly or through a deferred compensation or a similar plan in Invesco pooled investment vehicles with the same or similar objectives and strategies as the Fund as of the most recent fiscal year end of the Fund.
- (3) This column reflects the combined holdings from both the Dollar Range of all Investments in Fund and Invesco pooled investment vehicles and the Dollar Range of Investments in the Fund columns.

Assets Managed

The following information is as of February 28, 2018:

Portfolio Manager	Other Registered Investment Companies Managed (assets in millions)		Other Pooled Investment Vehicles Managed (assets in millions)		Other Accounts Managed (assets in millions)(4)	
	Number of Accounts	Assets	Number of Accounts	Assets	Number of Accounts	Assets
	Andrew Geryol	3	\$ 1,434.2	1	\$ 47.2	None
Jennifer Hartviksen	3	\$ 1,434.2	15	\$ 7,248.8	None	None
Joseph Portera	5	\$ 6,108.8	4	\$ 1,093.5	None	None
Scott Roberts	6	\$ 7,291.5	4	\$ 821.7	None	None

- (4) These are accounts of individual investors for which Invesco provides investment advice. Invesco offers separately managed accounts that are managed according to the investment models developed by its portfolio managers and used in connection with the management of certain Invesco funds. These accounts may be invested in accordance with one or more of those investment models and investments held in those accounts are traded in

accordance with the applicable models.

None of the foregoing accounts paid an advisory fee based on the performance of the account.

Potential Conflicts of Interest

Actual or apparent conflicts of interest may arise when a portfolio manager has day-to-day management responsibilities with respect to more than one Fund or other account. More specifically, portfolio managers who manage multiple funds and/or other accounts may be presented with one or more of the following potential conflicts:

The management of multiple funds and/or other accounts may result in a portfolio manager devoting unequal time and attention to the management of the Fund and/or other account. The Adviser and each Sub-Adviser seek to manage such

competing interests for the time and attention of portfolio managers by having portfolio managers focus on a particular investment discipline. Most other accounts managed by a portfolio manager are managed using the same investment models that are used in connection with the management of the funds.

If a portfolio manager identifies a limited investment opportunity which may be suitable for more than one Fund or other account, the Fund may not be able to take full advantage of that opportunity due to an allocation of filled purchase or sale orders across all eligible funds and other accounts. To deal with these situations, the Adviser, each Sub-Adviser and the funds have adopted procedures for allocating portfolio transactions across multiple accounts.

The Adviser and each Sub-Adviser determine which broker to use to execute each order for securities transactions for the funds, consistent with its duty to seek best execution of the transaction. However, for certain other accounts (such as mutual funds for which Invesco or an affiliate acts as sub-adviser, other pooled investment vehicles that are not registered mutual funds, and other accounts managed for organizations and individuals), the Adviser and each Sub-Adviser may be limited by the client with respect to the selection of brokers or may be instructed to direct trades through a particular broker. In these cases, trades for the Fund in a particular security may be placed separately from, rather than aggregated with, such other accounts. Having separate transactions with respect to a security may temporarily affect the market price of the security or the execution of the transaction, or both, to the possible detriment of the Fund or other account(s) involved.

Finally, the appearance of a conflict of interest may arise where the Adviser or Sub-Adviser has an incentive, such as a performance-based management fee, which relates to the management of one Fund or account but not all funds and accounts for which a portfolio manager has day-to-day management responsibilities.

The Adviser, each Sub-Adviser, and the Fund have adopted certain compliance procedures which are designed to address these types of conflicts. However, there is no guarantee that such procedures will detect each and every situation in which a conflict arises.

Description of Compensation Structure

The Adviser and each Sub-Adviser seek to maintain a compensation program that is competitively positioned to attract and retain high-caliber investment professionals. Portfolio managers receive a base salary, an incentive bonus opportunity and an equity compensation opportunity. Portfolio manager compensation is reviewed and may be modified each year as appropriate to reflect changes in the market, as well as to adjust the factors used to determine bonuses to promote competitive Fund performance. The Adviser and each Sub-Adviser evaluate competitive market compensation by reviewing compensation survey results conducted by an independent third party of investment industry compensation. Each portfolio manager's compensation consists of the following three elements:

Base Salary. Each portfolio manager is paid a base salary. In setting the base salary, the Adviser and each Sub-Adviser's intention is to be competitive in light of the particular portfolio manager's experience and responsibilities.

Annual Bonus. The portfolio managers are eligible, along with other employees of the Adviser and each Sub-Adviser, to participate in a discretionary year-end bonus pool. The Compensation Committee of Invesco Ltd. reviews and approves the amount of the bonus pool available considering investment performance and financial results in its review. In addition, while having no direct impact on individual bonuses, assets under management are considered when determining the starting bonus funding levels. Each portfolio manager is eligible to receive an annual cash

Edgar Filing: Invesco High Income Trust II - Form 486BPOS

bonus which is based on quantitative (i.e. investment performance) and non-quantitative factors (which may include, but are not limited to, individual performance, risk management and teamwork).

Each portfolio manager's compensation is linked to the pre-tax investment performance of the Fund/accounts managed by the portfolio manager as described in the table below.

Sub-Adviser	Performance time period(5)
Invesco(6)	One-, Three- and Five-year performance against Fund peer group.
Invesco Deutschland	
Invesco Hong Kong(6)	
Invesco Asset Management	
Invesco- U.S. Real Estate Division (6),(7)	Not applicable
Invesco Senior Secured(6),(8)	
Invesco Canada(6)	One-year performance against Fund peer group. Three- and Five-year performance against entire universe of Canadian funds.
Invesco Japan(9)	One-, Three- and Five-year performance

S-40

- (5) Rolling time periods based on calendar year-end.
- (6) Portfolio Managers may be granted an annual deferral award that vests on a pro-rata basis over a four year period.
- (7) Portfolio Managers for Invesco Global Infrastructure Fund, Invesco Global Real Estate Fund, Invesco MLP Fund, Invesco Real Estate Fund, Invesco Global Real Estate Income Fund and Invesco V.I. Global Real Estate Fund base their bonus on new operating profits of the U.S. Real Estate Division of Invesco.
- (8) Invesco Senior Secured's bonus is based on annual measures of equity return and standard tests of collateralization performance.
- (9) Portfolio Managers for Invesco Pacific Growth Fund's compensation is based on the one-, three- and five-year performance against the appropriate Micropol benchmark.

High investment performance (against applicable peer group and/or benchmarks) would deliver compensation generally associated with top pay in the industry (determined by reference to the third-party provided compensation survey information) and poor investment performance (versus applicable peer group) would result in low bonus compared to the applicable peer group or no bonus at all. The Fund's peer group is a group of funds identified by the Adviser as having investment objectives and policies similar to those of the Fund. These decisions are reviewed and approved collectively by senior leadership which has responsibility for executing the compensation approach across the organization.

Deferred/Long-Term Compensation. Portfolio managers may be granted an annual deferral award that allows them to select receipt of shares of certain Invesco funds with a vesting period as well as common shares and/or restricted shares of Invesco Ltd. stock from pools determined from time to time by the Compensation Committee of Invesco Ltd.'s Board of Directors. Awards of deferred / long-term compensation typically vest over time, so as to create incentives to retain key talent.

Portfolio managers also participate in benefit plans and programs available generally to all employees.

PORTFOLIO TRANSACTIONS AND BROKERAGE ALLOCATION

Invesco has adopted compliance procedures that cover, among other items, brokerage allocation and other trading practices.

As discussed below, Invesco and the Sub-Advisers, unless prohibited by applicable law, may cause a Fund to pay a broker-dealer a commission for effecting a transaction that exceeds the amount another broker-dealer would have charged for effecting the same transaction in recognition of the value of brokerage and research services provided by that broker-dealer. Effective January 3, 2018, under the European Union's Markets in Financial Instruments Directive (MiFID II), European Union investment advisers, including Invesco Deutschland and Invesco Asset Management, which may act as sub-adviser to certain Funds as described in such Funds' prospectuses, must pay for research from broker-dealers directly out of their own resources, rather than through client commissions.

Brokerage Transactions

Placing trades generally involves acting on portfolio manager instructions to buy or sell a specified amount of portfolio securities, including selecting one or more third-party broker-dealers to execute the trades, and negotiating commissions and spreads. Various Invesco Ltd. subsidiaries have created a global equity trading desk. The global equity trading desk has assigned local traders in six primary trading centers to place equity securities trades in their regions. Invesco Advisers' Americas desk, located in Atlanta, Houston and Toronto (the Americas Desk), generally places trades of equity securities trading in North America, Canada and Latin America; the Hong Kong desk of Invesco Hong Kong (the Hong Kong Desk) generally places trades of equity securities in the Asia-Pacific markets, except Japan; the Japan trading desk of Invesco Japan generally places trades of equity securities in the Japanese

markets; the London trading desk of Invesco Global Investment Funds Limited (the London Desk) generally places trades of equity securities in European, Middle Eastern and African countries; the Australia desk, located in Sydney and Melbourne, for the execution of orders of equity securities trading in the Australian and New Zealand markets and the Taipei desk, located in Taipei, for the execution of orders of securities trading in the Chinese market. Invesco, Invesco Canada, Invesco Japan, Invesco Deutschland, Invesco Hong Kong and Invesco Asset Management use the global equity trading desk to place equity trades. Other Sub-Advisers may use the global equity trading desk in the future. The trading procedures for the global trading desks are similar in all material respects.

References in the language below to actions by Invesco or a Sub-Adviser (other than Invesco Canada or Invesco Japan) making determinations or taking actions related to equity trading include these entities delegation of these determinations/actions to the Americas Desk, the Hong Kong Desk, and the London Desk. Even when trading is delegated by Invesco or the Sub-Advisers to the various arms of the global equity trading desk, Invesco or a Sub-Adviser that delegates trading is responsible for oversight of this trading activity.

Invesco or a Sub-Adviser makes decisions to buy and sell securities for the Fund, selects broker-dealers (each, a Broker), effects the Fund's investment portfolio transactions, allocates brokerage fees in such transactions and, where applicable, negotiates commissions and spreads on transactions. Invesco's and the Sub-Adviser's primary consideration in effecting a security transaction is to obtain best execution, which is defined as prompt and efficient execution of the transaction at the best obtainable price with payment of commissions, mark-ups or mark-downs which are reasonable in relation to the value of the brokerage and research services provided by the Broker. While Invesco or the Sub-Advisers seeks reasonably competitive commission rates, the Fund may not pay the lowest commission or spread available. See Broker Selection below.

Some of the securities in which the Fund invests are traded in over-the-counter markets. Portfolio transactions in such markets may be effected on a principal basis at net prices without commissions, but which include compensation to the Broker in the form of a mark-up or mark-down, or on an agency basis, which involves the payment of negotiated brokerage commissions to the Broker, including electronic communication networks. Purchases of underwritten issues, which include initial public offerings and secondary offerings, include a commission or concession paid by the issuer (not the Fund) to the underwriter. Purchases of money market instruments may be made directly from issuers without the payment of commissions.

Historically, Invesco and the Sub-Advisers did not negotiate commission rates on stock markets outside the United States. In recent years many overseas stock markets have adopted a system of negotiated rates; however, a number of markets maintain an established schedule of minimum commission rates.

In some cases, Invesco may decide to place trades on a blind principal bid basis, which involves combining all trades for one or more portfolios into a single basket, and generating a description of the characteristics of the basket for provision to potential executing brokers. Based on the trade characteristics information provided by Invesco, these brokers submit bids for executing all of the required trades at the market close price for a specific commission. Invesco generally selects the broker with the lowest bid to execute these trades.

Commissions

Substantially all of the Fund's trades are effected on a principal basis. There were no brokerage commissions paid during the Fund's last three fiscal years ended February 28, 2018, February 28, 2017 or February 28, 2016.

The Fund does not and will not pay brokerage commissions to Brokers affiliated with the Fund, Invesco, the Sub-Advisers or any affiliates of such entities.

The Fund may purchase or sell a security from or to certain other Invesco funds or other accounts (and may invest in the Affiliated Money Market Funds) provided the Fund follows procedures adopted by the Boards of the various Invesco funds, including the Fund. These inter-fund transactions do not generate brokerage commissions but may result in custodial fees or taxes or other related expenses.

Broker Selection

Invesco's or the Sub-Adviser's primary consideration in selecting Brokers to execute portfolio transactions for an Invesco fund is to obtain best execution. In selecting a Broker to execute a portfolio transaction in equity securities for the Fund, Invesco or the Sub-Advisers consider the full range and quality of a Broker's services, including the value of research and/or brokerage services provided, execution capability, commission rate, and willingness to commit capital, anonymity and responsiveness. Invesco's and the Sub-Adviser's primary consideration when selecting a Broker to execute a portfolio transaction in fixed income securities for the Fund is the Broker's ability to deliver or sell the relevant fixed income securities; however, Invesco and the Sub-Advisers will also consider the various factors listed above. In each case, the determinative factor is not the lowest commission or spread available but whether the

transaction represents the best qualitative execution for the Fund. Invesco and the Sub-Advisers will not select Brokers based upon their promotion or sale of shares of funds advised by Invesco and/or the Sub-Advisers.

In choosing Brokers to execute portfolio transactions for the Fund, Invesco or the Sub-Advisers may select Brokers that provide brokerage and/or research services (Soft Dollar Products) to the Fund and/or the other accounts over which Invesco and its affiliates have investment discretion. Section 28(e) of the Securities Exchange Act of 1934, as amended, provides that Invesco or the Sub-Advisers, under certain circumstances, lawfully may cause an account to pay a higher commission than the lowest available. Under Section 28(e)(1), Invesco or the Sub-Advisers must make a good faith determination that the commissions paid are reasonable in relation to the value of the brokerage and research services provided ... viewed in terms of either that particular transaction or [Invesco s or the Sub-Advisers] overall responsibilities with respect to the accounts as to which [it] exercises investment discretion.

The services provided by the Broker also must lawfully and appropriately assist Invesco or the Sub-Adviser in the performance of its investment decision-making responsibilities. Accordingly, the Fund may pay a Broker commissions higher than those available from another Broker in recognition of the Broker's provision of Soft Dollar Products to Invesco or the Sub-Advisers.

Invesco and the Sub-Advisers face a potential conflict of interest when they use client trades to obtain Soft Dollar Products. This conflict exists because Invesco and the Sub-Advisers are able to use the Soft Dollar Products to manage client accounts without paying cash for the Soft Dollar Products, which reduces Invesco's or the Sub-Adviser's expenses to the extent that Invesco or the Sub-Advisers would have purchased such products had they not been provided by Brokers. Section 28(e) permits Invesco or the Sub-Advisers to use Soft Dollar Products for the benefit of any account it manages. Certain Invesco-managed accounts (or accounts managed by the Sub-Advisers) may generate soft dollars used to purchase Soft Dollar Products that ultimately benefit other Invesco Advisers, Inc.-managed accounts (or Sub-Adviser-managed accounts), effectively cross subsidizing the other Invesco-managed accounts (or the other Sub-Adviser-managed accounts) that benefit directly from the product. Invesco or the Sub-Advisers may not use all of the Soft Dollar Products provided by Brokers through which the Fund effects securities transactions in connection with managing the Fund whose trades generated the soft dollars used to purchase such products.

Invesco presently engages in the following instances of cross-subsidization:

Smaller funds that do not generate significant soft dollar commissions may be cross-subsidized by the larger equity Invesco funds in that the smaller equity funds receive the benefit of Soft Dollar Products for which they do not pay. Certain other accounts managed by Invesco or certain of its affiliates may benefit from Soft Dollar Products services for which they do not pay.

Invesco and the Sub-Advisers attempt to reduce or eliminate the potential conflicts of interest concerning the use of Soft Dollar Products by directing client trades for Soft Dollar Products only if Invesco or the Sub-Adviser concludes that the Broker supplying the product is capable of providing best execution.

Certain Soft Dollar Products may be available directly from a vendor on a hard dollar basis; other Soft Dollar Products are available only through Brokers in exchange for soft dollars. Invesco and the Sub-Adviser use soft dollars to purchase two types of Soft Dollar Products:

proprietary research created by the Broker executing the trade, and

other products created by third parties that are supplied to Invesco or the Sub-Adviser through the Broker executing the trade.

Proprietary research consists primarily of traditional research reports, recommendations and similar materials produced by the in-house research staffs of broker-dealer firms. This research includes evaluations and recommendations of specific companies or industry groups, as well as analyses of general economic and market conditions and trends, market data, contacts and other related information and assistance. Invesco periodically rates the quality of proprietary research produced by various Brokers. Based on the evaluation of the quality of information that Invesco receives from each Broker, Invesco develops an estimate of each Broker's share of Invesco clients' commission dollars and attempts to direct trades to these firms to meet these estimates.

Invesco and the Sub-Advisers also use soft dollars to acquire products from third parties that are supplied to Invesco or the Sub-Advisers through Brokers executing the trades or other Brokers who step in to a transaction and receive a portion of the brokerage commission for the trade. Invesco or the Sub-Advisers may from time to time instruct the

executing Broker to allocate or step out a portion of a transaction to another Broker. The Broker to which Invesco or the Sub-Advisers have stepped out would then settle and complete the designated portion of the transaction, and the executing Broker would settle and complete the remaining portion of the transaction that has not been stepped out. Each Broker may receive a commission or brokerage fee with respect to that portion of the transaction that it settles and completes.

Soft Dollar Products received from Brokers supplement Invesco's and or the Sub-Advisers' own research (and the research of certain of its affiliates), and may include the following types of products and services:

Database Services comprehensive databases containing current and/or historical information on companies and industries and indices. Examples include historical securities prices, earnings estimates and financial data. These services may include software tools that allow the user to search the database or to prepare value-added analyses related to the investment process (such as forecasts and models used in the portfolio management process).

Quotation/Trading/News Systems products that provide real time market data information, such as pricing of individual securities and information on current trading, as well as a variety of news services.

Economic Data/Forecasting Tools various macro-economic forecasting tools, such as economic data or currency and political forecasts for various countries or regions.

Quantitative/Technical Analysis software tools that assist in quantitative and technical analysis of investment data.

Fundamental/Industry Analysis industry specific fundamental investment research.

Other Specialized Tools other specialized products, such as consulting analyses, access to industry experts, and distinct investment expertise such as forensic accounting or custom built investment-analysis software.

If Invesco or the Sub-Advisers determines that any service or product has a mixed use (i.e., it also serves functions that do not assist the investment decision-making or trading process), Invesco or the Sub-Advisers will allocate the costs of such service or product accordingly in its reasonable discretion. Invesco or the Sub-Advisers will allocate brokerage commissions to Brokers only for the portion of the service or product that Invesco or the Sub-Advisers determines assists it in the investment decision-making or trading process and will pay for the remaining value of the product or service in cash.

Outside research assistance is useful to Invesco or the Sub-Advisers because the Brokers used by Invesco or the Sub-Advisers tend to provide more in-depth analysis of a broader universe of securities and other matters than Invesco's or the Sub-Adviser's staff follows. In addition, such services provide Invesco or the Sub-Advisers with a diverse perspective on financial markets. Some Brokers may indicate that the provision of research services is dependent upon the generation of certain specified levels of commissions and underwriting concessions by Invesco's or the Sub-Adviser's clients, including the Fund. However, the Fund is not under any obligation to deal with any Broker in the execution of transactions in portfolio securities. In some cases, Soft Dollar Products are available only from the Broker providing them. In other cases, Soft Dollar Products may be obtainable from alternative sources in return for cash payments. Invesco and the Sub-Advisers believe that because Broker research supplements rather than replaces Invesco's or the Sub-Adviser's research, the receipt of such research tends to improve the quality of Invesco's or the Sub-Adviser's investment advice. The advisory fee paid by the Fund is not reduced because Invesco or the Sub-Advisers receives such services. To the extent the Fund's portfolio transactions are used to obtain Soft Dollar Products, the brokerage commissions obtained by the Fund might exceed those that might otherwise have been paid.

Invesco or the Sub-Advisers may determine target levels of brokerage business with various Brokers on behalf of its clients (including the Fund) over a certain time period. Invesco determines target levels based upon the following factors, among others: (1) the execution services provided by the Broker; and (2) the research services provided by the Broker. Portfolio transactions may be effected through Brokers that recommend the Fund to their clients, or that act as agent in the purchase of the Fund's shares for their clients, provided that Invesco or the Sub-Advisers believes such Brokers provide best execution and such transactions are executed in compliance with Invesco's policy against using directed brokerage to compensate Brokers for promoting or selling Invesco fund shares. Invesco and the Sub-Advisers will not enter into a binding commitment with Brokers to place trades with such Brokers involving brokerage commissions in precise amounts.

Directed Brokerage (Research Services)

The Fund did not pay any directed brokerage (research services) during its most recently completed fiscal year.

Regular Brokers

During its last fiscal year, the Fund did not acquire any securities of regular brokers or dealers, as defined in Rule 10b-1 under the 1940 Act.

Allocation of Portfolio Transactions

Invesco and the Sub-Advisers manage numerous Invesco funds and other accounts. Some of these accounts may have investment objectives similar to the Fund. Occasionally, identical securities will be appropriate for investment by one the Fund and by another fund or one or more other accounts. However, the position of each account in the same security and the length of time that each account may hold its investment in the same security may vary. Invesco and the Sub-Adviser will also determine the timing and amount of purchases for an account based on its cash position. If the purchase or sale of securities is consistent with the investment policies of the Fund(s) and one or more other accounts, and is considered at or about the same time, Invesco or the Sub-Adviser will allocate transactions in such securities among the Fund(s) and these accounts on a pro rata basis based on order size or in such other manner believed by Invesco to be fair and equitable. Invesco or the Sub-Adviser may combine transactions in accordance with applicable laws and regulations to obtain the most favorable execution. Simultaneous transactions could, however, adversely affect the Fund's ability to obtain or dispose of the full amount of a security which it seeks to purchase or sell.

TAX MATTERS

The following discussion is a brief summary of certain U.S. federal income tax considerations affecting the Fund and the purchase, ownership and disposition of the Fund's Common Shares. Except as otherwise noted, this discussion assumes you are a taxable U.S. person (as defined for U.S. federal income tax purposes) and that you hold your Common Shares as capital assets for U.S. federal income tax purposes (generally, assets held for investment). This discussion is based upon current provisions of the Internal Revenue Code of 1986, as amended (the Code), the regulations promulgated thereunder and judicial and administrative authorities, all of which are subject to change or differing interpretations by the courts or the Internal Revenue Service (the IRS), possibly with retroactive effect. No attempt is made to present a detailed explanation of all U.S. federal concerns affecting the Fund and its Common Shareholders (including Common Shareholders subject to special treatment under U.S. federal income tax law). No assurance can be given that the IRS would not assert, or that a court would not sustain, a position contrary to those set forth below. This summary does not discuss any aspects of foreign, state or local tax. **The discussions set forth herein and in the Prospectus do not constitute tax advice and potential investors are urged to consult their own tax advisers to determine the specific U.S. federal, state, local and foreign tax consequences to them of investing in the Fund.**

Taxation of the Fund

The Fund intends to elect to be treated and to qualify each year as a regulated investment company (RIC) under Subchapter M of the Code. Accordingly, the Fund must, among other things, (i) derive in each taxable year at least 90% of its gross income from (a) dividends, interest (including tax-exempt interest), payments with respect to certain securities loans, and gains from the sale or other disposition of stock, securities or foreign currencies, or other income (including gain from options, futures and forward contracts) derived with respect to its business of investing in such stock, securities or foreign currencies and (b) net income derived from interests in qualified publicly traded partnerships (as defined in the Code); and (ii) diversify its holdings so that, at the end of each quarter of each taxable year (a) at least 50% of the market value of the Fund's total assets is represented by cash and cash items, U.S. Government securities, the securities of other RICs and other securities, with such other securities limited, in respect of any one issuer, to an amount not greater than 5% of the value of the Fund's total assets and not more than 10% of the outstanding voting securities of such issuer and (b) not more than 25% of the market value of the Fund's total assets is invested in the securities (other than U.S. Government securities and the securities of other RICs) of (I) any one issuer, (II) any two or more issuers that the Fund controls and that are determined to be engaged in the same business or similar or related trades or businesses or (III) any one or more qualified publicly traded partnerships. Generally, a qualified publicly traded partnership includes a partnership the interests of which are traded on an established securities market or readily tradable on a secondary market (or the substantial equivalent thereof) and that derives less than 90% of its gross income from the items described in (i)(a) above.

As long as the Fund qualifies as a RIC, the Fund generally will not be subject to U.S. federal income tax on income and gains that the Fund distributes to its Common Shareholders, provided that it distributes each taxable year at least 90% of the sum of (i) the Fund's investment company taxable income (which includes, among other items, dividends, interest, the excess of any net short-term capital gain over net long-term capital loss, and other taxable income, other than any net capital gain (defined below), reduced by deductible expenses) determined without regard to the deduction for dividends paid and (ii) the Fund's net tax-exempt interest (the excess of its gross tax-exempt interest over certain disallowed deductions). The Fund intends to distribute substantially all of such income each year. The Fund will be subject to income tax at the applicable corporate income tax rate on any taxable income or gains that it does not distribute to its Common Shareholders.

The Code imposes a 4% nondeductible excise tax on the Fund to the extent the Fund does not distribute by the end of any calendar year at least the sum of (i) 98% of its ordinary income (not taking into account any capital gain or loss) for the calendar year and (ii) 98.2% of its capital gain in excess of its capital loss (adjusted for certain ordinary losses)

for a one-year period generally ending on October 31 of the calendar year (unless an election is made to use the Fund's taxable year). In addition, the minimum amounts that must be distributed in any year to avoid the excise tax will be increased or decreased to reflect any under-distribution or over-distribution, as the case may be, from the previous year. For purposes of the excise tax, the Fund will be deemed to have distributed any income on which it paid U.S. federal income tax. While the Fund intends to distribute any income and capital gain in the manner necessary to minimize imposition of the 4% nondeductible excise tax, there can be no assurance that sufficient amounts of the Fund's taxable income and capital gain will be distributed to avoid entirely the imposition of the excise tax. In that event, the Fund will be liable for the excise tax only on the amount by which it does not meet the foregoing distribution requirement.

If for any taxable year the Fund were to fail to qualify as a RIC, all of its taxable income (including its net capital gain, which consists of the excess of its net long-term capital gain over its net short-term capital loss) would be subject to tax at the applicable corporate income tax rate without any deduction for distributions to Common Shareholders, and such distributions would be taxable to the Common Shareholders as ordinary dividends to the extent of the Fund's current or accumulated earnings and profits. Such dividends, however, would be eligible (i) to be treated as qualified dividend income in the case of Common Shareholders taxed as individuals and (ii) for the dividends-received deduction in the case of corporate Common Shareholders, subject, in each

case, to certain holding period and other requirements. To qualify again to be taxed as a RIC in a subsequent year, the Fund would generally be required to distribute to its Common Shareholders its earnings and profits attributable to non-RIC years. In addition, if the Fund failed to qualify as a RIC for a period greater than two taxable years, the Fund would be required to recognize and pay tax on any net built-in gains with respect to certain of its assets (i.e., the excess of the aggregate gains, including items of income, over aggregate losses that would have been realized with respect to such assets if the Fund had been liquidated) or, alternatively, to elect to be subject to taxation on such built-in gain recognized for a period of ten years, in order to qualify as a RIC in a subsequent year.

The remainder of this discussion assumes that the Trust qualifies for taxation as a RIC.

The Fund's Investments

Certain of the Fund's investment practices are subject to special and complex U.S. federal income tax provisions (including mark-to-market, constructive sale, straddle, wash sale, short sale and other rules) that may, among other things, (i) disallow, suspend or otherwise limit the allowance of certain losses or deductions, including the dividends-received deduction, (ii) convert lower taxed long-term capital gains or qualified dividend income into higher taxed short-term capital gains or ordinary income, (iii) convert ordinary loss or a deduction into capital loss (the deductibility of which is more limited), (iv) cause the Fund to recognize income or gain without a corresponding receipt of cash, (v) adversely affect the time as to when a purchase or sale of stock or securities is deemed to occur, (vi) adversely alter the characterization of certain complex financial transactions and (vii) produce income that will not be qualified income for purposes of the 90% annual gross income requirement described above. These U.S. federal income tax provisions could therefore affect the amount, timing and character of distributions to Common Shareholders. The Fund intends to monitor its transactions and may make certain tax elections and may be required to dispose of securities to mitigate the effect of these provisions and prevent disqualification of the Fund as a RIC. Additionally, the Fund may be required to limit its activities in derivative instruments in order to enable it to maintain its RIC status.

The Fund may invest a portion of its net assets in below investment grade securities, commonly known as junk securities. Investments in these types of securities may present special tax issues for the Fund. U.S. federal income tax rules are not entirely clear about issues such as when the Fund may cease to accrue interest, original issue discount or market discount, when and to what extent deductions may be taken for bad debts or worthless securities, how payments received on obligations in default should be allocated between principal and income and whether modifications or exchanges of debt obligations in a bankruptcy or workout context are taxable. These and other issues could affect the Fund's ability to distribute sufficient income to preserve its status as a RIC or to avoid the imposition of U.S. federal income or excise tax.

Certain debt securities acquired by the Fund may be treated as debt securities that were originally issued at a discount. Generally, the amount of the original issue discount is treated as interest income and is included in taxable income (and required to be distributed by the Fund in order to qualify as a RIC or avoid fund-level income or excise taxes) over the term of the security, even though payment of that amount is not received until a later time, usually when the debt security matures. (2017 legislation commonly known as the Tax Cuts and Jobs Act requires certain taxpayers to recognize items of gross income for tax purposes in the year in which the taxpayer recognizes the income for financial accounting purposes. For financial accounting purposes, market discount must be accrued currently on a constant yield to maturity basis regardless of whether a current inclusion election is made. While the exact scope of this provision is not known at this time, it could cause a fund to recognize income earlier for tax purposes than would otherwise have been the case prior to the enactment of the Tax Cuts and Jobs Act.) If the Fund purchases a debt security on a secondary market at a price lower than its adjusted issue price, the excess of the adjusted issue price over the purchase price is market discount. Unless the Fund makes an election to accrue market discount on a current basis, any gain realized on the disposition of, and any partial payment of principal on, a debt security having market discount is generally treated as ordinary income to the extent the gain, or principal payment, does not exceed the accrued

market discount on the debt security. Market discount generally accrues in equal daily installments. If the Fund ultimately collects less on the debt instrument than its purchase price plus the market discount previously included in income, the Fund may not be able to benefit from any offsetting loss deductions.

The Fund may invest in preferred securities or other securities the U.S. federal income tax treatment of which may not be clear or may be subject to recharacterization by the IRS. To the extent the tax treatment of such securities or the income from such securities differs from the tax treatment expected by the Fund, it could affect the timing or character of income recognized by the Fund, requiring the Fund to purchase or sell securities, or otherwise change its portfolio, in order to comply with the tax rules applicable to RICs under the Code.

Gain or loss on the sale of securities by the Fund will generally be long-term capital gain or loss if the securities have been held by the Fund for more than one year. Gain or loss on the sale of securities held for one year or less will be short-term capital gain or loss.

Because the Fund may invest in foreign securities, its income from such securities may be subject to non-U.S. taxes. The Fund will not be eligible to elect to pass through to Common Shareholders of the Fund the ability to use the foreign tax deduction or foreign tax credit for foreign taxes paid by the Fund with respect to qualifying taxes.

Income from options on individual securities written by the Fund will not be recognized by the Fund for tax purposes until an option is exercised, lapses or is subject to a closing transaction (as defined by applicable regulations) pursuant to which the Fund's obligations with respect to the option are otherwise terminated. If the option lapses without exercise, the premiums received by the Fund from the writing of such options will generally be characterized as short-term capital gain. If the Fund enters into a closing transaction, the difference between the premiums received and the amount paid by the Fund to close out its position will generally be treated as short-term capital gain or loss. If an option written by the Fund is exercised, thereby requiring the Fund to sell the underlying security, the premium will increase the amount realized upon the sale of the security, and the character of any gain on such sale of the underlying security as short-term or long-term capital gain will depend on the holding period of the Fund in the underlying security. Because the Fund will not have control over the exercise of the options it writes, such exercises or other required sales of the underlying securities may cause the Fund to realize gains or losses at inopportune times.

Options on indices of securities and sectors of securities that qualify as section 1256 contracts will generally be marked-to-market for U.S. federal income tax purposes. As a result, the Fund will generally recognize gain or loss on the last day of each taxable year equal to the difference between the value of the option on that date and the adjusted basis of the option. The adjusted basis of the option will consequently be increased by such gain or decreased by such loss. Any gain or loss with respect to options on indices and sectors that qualify as section 1256 contracts will be treated as short-term capital gain or loss to the extent of 40% of such gain or loss and long-term capital gain or loss to the extent of 60% of such gain or loss. Because the mark-to-market rules may cause the Fund to recognize gain in advance of the receipt of cash, the Fund may be required to dispose of investments in order to meet its distribution requirements. Mark-to-market losses may be suspended or otherwise limited if such losses are part of a straddle or similar transaction.

Taxation of Common Shareholders

The Fund will either distribute or retain for reinvestment all or part of its net capital gain. If any such gain is retained, the Fund will be subject to a corporate income tax on such retained amount. In that event, the Fund expects to report the retained amount as undistributed capital gain in a notice to its Common Shareholders, each of whom, if subject to U.S. federal income tax on long-term capital gains, (i) will be required to include in income for U.S. federal income tax purposes as long-term capital gain its share of such undistributed amounts, (ii) will be entitled to credit its proportionate share of the tax paid by the Fund against its U.S. federal income tax liability and to claim refunds to the extent that the credit exceeds such liability and (iii) will increase its basis in its Common Shares by the amount of undistributed capital gain included in such Common Shareholder's gross income net of the tax deemed paid the shareholder under clause (ii).

Distributions paid to you by the Fund from its net capital gain, if any, that the Fund properly reports as capital gain dividends (capital gain dividends) are taxable as long-term capital gains, regardless of how long you have held your Common Shares. All other dividends paid to you by the Fund (including dividends from net short-term capital gains) from its current or accumulated earnings and profits (ordinary income dividends) are generally subject to tax as ordinary income. Provided that certain holding period and other requirements are met, ordinary income dividends (if properly reported by the Fund) may qualify (i) for the dividends-received deduction in the case of corporate shareholders to the extent that the Fund's income consists of dividend income from U.S. corporations, and (ii) in the case of individual shareholders, as qualified dividend income eligible to be taxed at long-term capital gains rates to the extent that the Fund receives qualified dividend income. Qualified dividend income is, in general, dividend income from taxable domestic corporations and certain qualified foreign corporations (e.g., generally, foreign corporations incorporated in a possession of the United States or in certain countries with a qualifying comprehensive tax treaty

with the United States, or whose stock with respect to which such dividend is paid is readily tradable on an established securities market in the United States). Capital gain dividends are not eligible for the dividends-received deduction or for the reduced rates applicable to qualified dividend income. There can be no assurance as to what portion, if any, of the Fund's distributions will constitute qualified dividend income.

Any distributions you receive that are in excess of the Fund's current and accumulated earnings and profits will be treated as a tax-deferred return of capital to the extent of your adjusted tax basis in your Common Shares, and thereafter as capital gain from the sale of Common Shares (assuming the Common Shares are held as a capital asset). The amount of any Fund distribution that is treated as a tax-deferred return of capital will reduce your adjusted tax basis in your Common Shares, thereby increasing your potential gain or reducing your potential loss on any subsequent sale or other disposition of your Common Shares.

Common Shareholders may be entitled to offset their capital gain dividends with capital losses. The Code contains a number of statutory provisions affecting when capital losses may be offset against capital gain, and limiting the use of losses from certain investments and activities. Accordingly, Common Shareholders that have capital losses are urged to consult their tax advisers.

Dividends and other taxable distributions are taxable to you even though they are reinvested in additional Common Shares of the Fund. Dividends and other distributions paid by the Fund are generally treated under the Code as received by you at the time the dividend or distribution is made. If, however, the Fund pays you a dividend in January that was declared in the previous October, November or December to common shareholders of record on a specified date in one of such months, then such dividend will be treated for U.S. federal income tax purposes as being paid by the Fund and received by you on December 31 of the year in which the dividend was declared. In addition, certain other distributions made after the close of the Fund's taxable year may be "spilled back" and treated as paid by the Fund (except for purposes of the 4% nondeductible excise tax) during such taxable year. In such case, you will be treated as having received such dividends in the taxable year in which the distributions were actually made.

The price of Common Shares purchased at any time may reflect the amount of a forthcoming distribution. Those purchasing Common Shares just prior to the record date of a distribution will receive a distribution which will be taxable to them even though it represents, economically, a return of invested capital.

The Fund will send you information after the end of each year setting forth the amount and tax status of any distributions paid to you by the Fund.

The sale or other disposition of Common Shares will generally result in capital gain or loss to you and will be long-term capital gain or loss if you have held such Common Shares for more than one year at the time of sale. Any loss upon the sale or other disposition of Common Shares held for six months or less will be treated as long-term capital loss to the extent of any capital gain dividends received (including amounts credited as an undistributed capital gain dividend) by you with respect to such Common Shares. Any loss you recognize on a sale or other disposition of Common Shares will be disallowed if you acquire other Common Shares (whether through the automatic reinvestment of dividends or otherwise) within a 61-day period beginning 30 days before and ending 30 days after your sale or exchange of the Common Shares. In such case, your tax basis in the Common Shares acquired will be adjusted to reflect the disallowed loss.

Current U.S. federal income tax law taxes both long-term and short-term capital gain of corporations at the rates applicable to ordinary income. For non-corporate taxpayers, short-term capital gain is currently taxed at rates applicable to ordinary income while long-term capital gain generally is taxed at reduced maximum rates. The deductibility of capital losses is subject to limitations under the Code.

Certain U.S. shareholders who are individuals, estates or trusts and whose income exceeds certain thresholds will be required to pay a 3.8% Medicare tax on all or a portion of their "net investment income," which includes dividends received from the Fund and capital gains from the sale or other disposition of the Fund's shares.

A Common Shareholder that is a nonresident alien individual or a foreign corporation (a "foreign investor") generally will be subject to U.S. federal withholding tax at the rate of 30% (or possibly a lower rate provided by an applicable tax treaty) on ordinary income dividends (except as discussed below). In general, U.S. federal withholding tax and U.S. federal income tax will not apply to any gain or income realized by a foreign investor in respect of any distribution of net capital gain (including amounts credited as an undistributed capital gain dividend) or upon the sale or other disposition of Common Shares of the Fund. Different tax consequences may result if the foreign investor is engaged in a trade or business in the United States or, in the case of an individual, is present in the United States for 183 days or more during a taxable year and certain other conditions are met.

Ordinary income dividends properly reported by a RIC are generally exempt from U.S. federal withholding tax where they (i) are paid in respect of the RIC's "qualified net interest income" (generally, its U.S.-source interest income, other than certain contingent interest and interest from obligations of a corporation or partnership in which the RIC is at least a 10% shareholder, reduced by expenses that are allocable to such income) or (ii) are paid in respect of the RIC's "qualified short-term capital gains" (generally, the excess of the RIC's net short-term capital gain over its long-term

capital loss for such taxable year). Depending on its circumstances, the Fund may report all, some or none of its potentially eligible dividends as such qualified net interest income or as qualified short-term capital gains, and/or treat such dividends, in whole or in part, as ineligible for this exemption from withholding. In order to qualify for this exemption from withholding, a foreign investor needs to comply with applicable certification requirements relating to its non-U.S. status (including, in general, furnishing an IRS Form W-8BEN, W-8BEN-E or substitute Form). In the case of shares held through an intermediary, the intermediary may withhold even if the Fund reports the payment as qualified net interest income or qualified short-term capital gain. Foreign investors should contact their intermediaries with respect to the application of these rules to their accounts. There can be no assurance as to what portion of the Fund's distributions will qualify for favorable treatment as qualified net interest income or qualified short-term capital gains.

Under the Foreign Account Tax Compliance Act (FATCA), the Fund will be required to withhold a 30% tax on the following payments or distributions made by the Fund to certain foreign entities, referred to as foreign financial institutions (FFI) or non-financial foreign entities (NFFE): (a) income dividends and (b) after December 31, 2018, certain capital gain distributions, return of capital distributions and the proceeds arising from the sale of Fund shares. The FATCA withholding tax generally can be avoided: (a) by an FFI, if it reports certain direct and indirect ownership of foreign financial accounts held by U.S. persons with the FFI and (b) by an NFFE, if it: (i) certifies that it has no substantial U.S. persons as owners or (ii) if it does have such owners, reporting information relating to them. The U.S. Treasury has negotiated intergovernmental agreements (IGA) with certain countries and is in various stages of negotiations with a number of other foreign countries with respect to one or more alternative approaches to implement FATCA. A Fund may disclose the information that it receives from its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA or similar laws.

Foreign investors should consult their tax advisers regarding the tax consequences of investing in the Fund's Common Shares.

The Fund may be required to withhold (currently at a rate of 24%), for U.S. federal backup withholding tax purposes, a portion of the dividends, distributions and redemption proceeds payable to certain non-exempt Common Shareholders who fail to provide the Fund (or its agent) with their correct taxpayer identification number (in the case of individuals, generally, their social security number) or to make required certifications, or who are otherwise subject to backup withholding. Backup withholding is not an additional tax and any amount withheld may be refunded or credited against your U.S. federal income tax liability, if any, provided that you timely furnish the required information to the IRS.

Ordinary income dividends, capital gain dividends, and gain from the sale or other disposition of Common Shares of the Fund also may be subject to state, local, and/or foreign taxes. Common Shareholders are urged to consult their own tax advisers regarding specific questions about U.S. federal, state, local or foreign tax consequences to them of investing in the Fund.

The foregoing is a general and abbreviated summary of certain provisions of the Code and the Treasury Regulations presently in effect as they directly govern the taxation of the Fund and its shareholders. For complete provisions, reference should be made to the pertinent Code sections and Treasury Regulations. The Code and the Treasury Regulations are subject to change by legislative or administrative action, and any such change may be retroactive with respect to Fund transactions. Prospective shareholders are advised to consult their own tax advisers for more detailed information concerning the tax consequences of an investment in the Fund.

OTHER INFORMATION

Principal Shareholders

As of the date of this Statement of Additional Information, to the knowledge of the Fund, no person beneficially owned more than 5% of the voting securities of any class of equity securities of the Fund, except as provided below

Proxy Voting Policy and Proxy Voting Record

The Board of the Fund has delegated responsibility for decisions regarding proxy voting for securities held by the Fund to Invesco. Invesco will vote such proxies in accordance with its proxy policies and procedures, which have been reviewed and approved by the Board. Invesco's proxy policies and procedures are attached hereto as Appendix B. The Proxy Voting Policy is subject to change over time and investors seeking the most current copy of the Proxy Voting Policy should go to our web site at www.invesco.com/us.

Any material changes to the proxy policies and procedures will be submitted to the Board for approval. The Board will be supplied with a summary quarterly report of the Fund's proxy voting record. Information regarding how the Fund voted proxies related to their portfolio securities during the twelve-months period ended June 30 is available without charge at our Web site, <http://www.invesco.com/us>. This information is also available at the SEC Web site, <http://www.sec.gov>.

Code of Ethics

Invesco, the Fund and the Sub-Advisers each have adopted a Code of Ethics under Rule 17j-1 under the 1940 Act that applies to all Invesco fund trustees and officers, and employees of Invesco, the Sub-Advisers and their affiliates, and governs, among other things, the personal trading activities of all such persons. Unless specifically noted, each Sub-Adviser's Code of Ethics does not materially differ from Invesco Code of Ethics discussed below. The Code of

Ethics is intended to address conflicts of interest with the Fund that may arise from personal trading, including personal trading in most of the Invesco funds. Personal trading, including personal trading involving securities that may be purchased or held by an Invesco fund, is permitted under the Code of Ethics subject to certain restrictions; however, employees are required to pre-clear security transactions with the Compliance Officer or a designee and to report transactions on a regular basis.

These Codes of Ethics can be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information on the operation of the Public Reference Room may be obtained by calling the SEC at (202) 551-8090. Copies of the Codes of Ethics may alternatively be obtained, after paying a duplicating fee, by sending an electronic request to publicinfo@sec.gov or by writing the SEC's Public Reference Section, Washington, D.C. 20549-0102. The Codes of Ethics are also available, free of charge, on the EDGAR Database on the SEC's Web site at <http://www.sec.gov>.

FINANCIAL STATEMENTS

The audited financial statements of the Fund are incorporated herein by reference to the Annual Report to shareholders of the Fund dated February 28, 2018. The Annual Report is included as part of the Fund's filing on Form N-CSR as filed with the SEC on May 7, 2018. The Annual Report may be obtained by following the instructions on the cover of this SAI. The Annual and Semi-Annual Reports may be reviewed and copied at the SEC's Public Reference Room in Washington, DC or on the EDGAR database on the SEC's internet site (www.sec.gov). Information on the operation of the SEC's Public Reference Room may be obtained by calling the SEC at (202) 551-8090. You can also request copies of these materials, upon payment of a duplicating fee, by electronic request at the SEC's e-mail address (publicinfo@sec.gov) or by writing the Public Reference Section of the SEC, Washington, DC 20549-0102.

PricewaterhouseCoopers LLP informed the Trust that it has identified an issue related to its independence under Rule 2-01(c)(1)(ii)(A) of Regulation S-X (referred to as the Loan Rule). The Loan Rule prohibits accounting firms, such as PricewaterhouseCoopers LLP, from being deemed independent if they have certain financial relationships with their audit clients or certain affiliates of those clients. The Trust is required under various securities laws to have its financial statements audited by an independent accounting firm.

The Loan Rule specifically provides that an accounting firm would not be independent if it or certain affiliates and covered persons receives a loan from a lender that is a record or beneficial owner of more than ten percent of an audit client's equity securities (referred to as a more than ten percent owner). For purposes of the Loan Rule, audit clients include the Funds as well as all registered investment companies advised by the Adviser and its affiliates, including other subsidiaries of the Adviser's parent company, Invesco Ltd. (collectively, the Invesco Fund Complex). PricewaterhouseCoopers LLP informed the Trust it and certain affiliates and covered persons have relationships with lenders who hold, as record owner, more than ten percent of the shares of certain funds within the Invesco Fund Complex, which may implicate the Loan Rule.

On June 20, 2016, the SEC Staff issued a no-action letter to another mutual fund complex (see Fidelity Management & Research Company et al., No-Action Letter) related to the audit independence issue described above. In that letter, the SEC confirmed that it would not recommend enforcement action against a fund that relied on audit services performed by an audit firm that was not in compliance with the Loan Rule in certain specified circumstances. In connection with prior independence determinations, PricewaterhouseCoopers LLP communicated, as contemplated by the no-action letter, that it believes that it remains objective and impartial and that a reasonable investor possessing all the facts would conclude that PricewaterhouseCoopers LLP is able to exhibit the requisite objectivity and impartiality to report on the Funds' financial statements as the independent registered public accounting firm. PricewaterhouseCoopers LLP also represented that it has complied with PCAOB Rule 3526(b)(1) and (2), which are conditions to the Funds relying on the no action letter, and affirmed that it is an independent accountant within the meaning of PCAOB Rule 3520. Therefore, the Adviser, the Funds and PricewaterhouseCoopers LLP concluded that PricewaterhouseCoopers LLP could continue as the Funds' independent registered public accounting firm. The Invesco Fund Complex relied upon the no-action letter in reaching this conclusion.

If in the future the independence of PricewaterhouseCoopers LLP is called into question under the Loan Rule by circumstances that are not addressed in the SEC's no-action letter, the Funds will need to take other action in order for the Funds' filings with the SEC containing financial statements to be deemed compliant with applicable securities laws. Such additional actions could result in additional costs, impair the ability of the Funds to issue new shares or have other material adverse effects on the Funds. The SEC no-action relief was initially set to expire 18 months from issuance but has been extended by the SEC without an expiration date, except that the no-action letter will be withdrawn upon the effectiveness of any amendments to the Loan Rule designed to address the concerns expressed in the letter.

RATINGS OF DEBT SECURITIES

The following is a description of the factors underlying the debt ratings of Moody's, S&P, and Fitch.

Moody's Long-Term Debt Ratings

Aaa: Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.

Aa: Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

A: Obligations rated A are judged to be upper-medium grade and are subject to low credit risk.

Baa: Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Ba: Obligations rated Ba are judged to be speculative and are subject to substantial credit risk.

B: Obligations rated B are considered speculative and are subject to high credit risk.

Caa: Obligations rated Caa are judged to be speculative of poor standing and are subject to very high credit risk.

Ca: Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

C: Obligations rated C are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Additionally, a (hyb) indicator is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms*.

** By their terms, hybrid securities allow for the omission of scheduled dividends, interest, or principal payments, which can potentially result in impairment if such an omission occurs. Hybrid securities may also be subject to contractually allowable write-downs of principal that could result in impairment. Together with the hybrid indicator, the long-term obligation rating assigned to a hybrid security is an expression of the relative credit risk associated with that security.*

Moody's Short-Term Prime Rating System

P-1: Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

P-2: Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

P-3: Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.

NP (Not Prime):

Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

Moody's MIG/VMIG US Short-Term Ratings

Short-Term Obligation Ratings

While the global short-term prime rating scale is applied to US municipal tax-exempt commercial paper, these programs are typically backed by external letters of credit or liquidity facilities and their short-term prime ratings usually map to the long-term rating of the enhancing bank or financial institution and not to the municipality's rating. Other short-term municipal obligations, which generally have different funding sources for repayment, are rated using two additional short-term rating scales (i.e., the MIG and VMIG scales discussed below).

The Municipal Investment Grade (MIG) scale is used to rate US municipal bond anticipation notes of up to three years maturity. Municipal notes rated on the MIG scale may be secured by either pledged revenues or proceeds of a take-out financing received prior to note maturity. MIG ratings expire at the maturity of the obligation, and the issuer's long-term rating is only one consideration in assigning the MIG rating. MIG ratings are divided into three levels: MIG 1 through MIG 3, while speculative grade short-term obligations are designated SG.

MIG 1: This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

MIG 2: This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

MIG 3: This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

SG: This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Demand Obligation Ratings

In the case of variable rate demand obligations (VRDOs), a two-component rating is assigned: a long or short-term debt rating and a demand obligation rating. The first element represents Moody's evaluation of risk associated with scheduled principal and interest payments. The second element represents Moody's evaluation of risk associated with the ability to receive purchase price upon demand (demand feature). The second element uses a rating from a variation of the MIG scale called the Variable Municipal Investment Grade (VMIG) scale. VMIG ratings of demand obligations with unconditional liquidity support are mapped from the short-term debt rating (or counterparty assessment) of the support provider, or the underlying obligor in the absence of third party liquidity support, with VMIG 1 corresponding to P-1, VMIG 2 to P-2, VMIG 3 to P-3 and SG to not prime. For example, the VMIG rating for an industrial revenue bond with Company XYZ as the underlying obligor would normally have the same numerical modifier as Company XYZ's prime rating. Transitions of VMIG ratings of demand obligations with conditional liquidity support, as shown in the diagram below, differ from transitions on the Prime scale to reflect the risk that external liquidity support will terminate if the issuer's long-term rating drops below investment grade.

VMIG 1: This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 2: This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 3:

This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

SG: This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have an investment grade short-term rating or may lack the structural and/or legal protections necessary to ensure the timely payment of purchase price upon demand.

Standard & Poor's Long-Term Issue Credit Ratings

Issue credit ratings are based, in varying degrees, on S&P Global Ratings' analysis of the following considerations:

The likelihood of payment—the capacity and willingness of the obligor to meet its financial commitment on an obligation in accordance with the terms of the obligation;

The nature and provisions of the financial obligation, and the promise we impute; and

The protection afforded by, and relative position of, the financial obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

Issue ratings are an assessment of default risk but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Junior obligations are typically rated lower than senior obligations, to reflect the lower priority in bankruptcy, as noted above. (Such differentiation may apply when an entity has both senior and subordinated obligations, secured and unsecured obligations, or operating company and holding company obligations.)

AAA: An obligation rated **AAA** has the highest rating assigned by S&P Global Ratings. The obligor's capacity to meet its financial commitments on the obligation is extremely strong.

AA: An obligation rated **AA** differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitments on the obligation is very strong.

A: An obligation rated **A** is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitments on the obligation is still strong.

BBB: An obligation rated **BBB** exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor's capacity to meet its financial commitments on the obligation.

BB, B, CCC, CC and C :

Obligations rated **BB**, **B**, **CCC**, **CC**, and **C** are regarded as having significant speculative characteristics. **BB** is the least degree of speculation and **C** the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposure to adverse conditions.

BB: An obligation rated **BB** is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitments on the obligation.

B: An obligation rated **B** is more vulnerable to nonpayment than obligations rated **BB**, but the obligor currently has the capacity to meet its financial commitments on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitments on the obligation.

CCC: An obligation rated **CCC** is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitments on the obligation.

CC:

Edgar Filing: Invesco High Income Trust II - Form 486BPOS

An obligation rated **CC** is currently highly vulnerable to nonpayment. The **CC** rating is used when a default has not yet occurred but S&P Global Ratings expects default to be a virtual certainty, regardless of the anticipated time to default.

- C:** An obligation rated **C** is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared with obligations that are rated higher.
- D:** An obligation rated **D** is in default or in breach of an imputed promise. For non-hybrid capital instruments, the **D** rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The **D** rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to **D** if it is subject to a distressed exchange offer.

Plus (+) or minus (-):

The ratings from **AA** to **CCC** may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

NR: This indicates that no rating has been requested, or that there is insufficient information on which to base a rating, or that S&P Global Ratings does not rate a particular obligation as a matter of policy.

Standard & Poor's Short-Term Issue Credit Ratings

- A-1: A short-term obligation rated A-1 is rated in the highest category by S&P Global Ratings. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitments on these obligations is extremely strong.
- A-2: A short-term obligation rated A-2 is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.
- A-3: A short-term obligation rated A-3 exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken an obligor's capacity to meet its financial commitments on the obligation.
- B: A short-term obligation rated B is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties that could lead to the obligor's inadequate capacity to meet its financial commitments.
- C: A short-term obligation rated C is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation.
- D: A short-term obligation rated D is in default or in breach of an imputed promise. For non-hybrid capital instruments, the D rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The D rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to D if it is subject to a distressed exchange offer.

Standard & Poor's Municipal Short-Term Note Ratings Definitions

An S&P Global Ratings U.S. municipal note rating reflects S&P Global Ratings' opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, S&P Global Ratings' analysis will review the following considerations:

Amortization schedule – the larger final maturity relative to other maturities, the more likely it will be treated as a note; and

Edgar Filing: Invesco High Income Trust II - Form 486BPOS

Source of payment the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Note rating symbols are as follows:

SP-1: Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

SP-2: Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

SP-3: Speculative capacity to pay principal and interest.

Standard & Poor's Dual Ratings

Dual ratings may be assigned to debt issues that have a put option or demand feature. The first component of the rating addresses the likelihood of repayment of principal and interest as due, and the second component of the rating addresses only the demand feature. The first component of the rating can relate to either a short-term or long-term transaction and accordingly use either short-term or long-term rating symbols. The second component of the rating relates to the put option and is assigned a short-term rating symbol (for example, AAA/A-1+ or A-1+/A-1). With U.S. municipal short-term demand debt, the U.S. municipal short-term note rating symbols are used for the first component of the rating (for example, SP-1+/A-1+).

Fitch Credit Rating Scales

Fitch Ratings publishes opinions on a variety of scales. The most common of these are credit ratings, but the agency also publishes ratings, scores and other relative opinions relating to financial or operational strength. For example, Fitch also provides specialized ratings of servicers of residential and commercial mortgages, asset managers and funds. In each case, users should refer to the definitions of each individual scale for guidance on the dimensions of risk covered in each assessment.

Fitch's credit ratings relating to issuers are an opinion on the relative ability of an entity to meet financial commitments, such as interest, preferred dividends, repayment of principal, insurance claims or counterparty obligations. Credit ratings relating to securities and obligations of an issuer can include a recovery expectation (please see section *Specific Limitations Relating to Credit Rating Scales* for details). Credit ratings are used by investors as indications of the likelihood of receiving the money owed to them in accordance with the terms on which they invested. The agency's credit ratings cover the global spectrum of corporate, sovereign financial, bank, insurance, and public finance entities (including supranational and sub-national entities) and the securities or other obligations they issue, as well as structured finance securities backed by receivables or other financial assets.

The terms *investment grade* and *speculative grade* have established themselves over time as shorthand to describe the categories AAA to BBB (investment grade) and BB to D (speculative grade). The terms *investment grade* and *speculative grade* are market conventions and do not imply any recommendation or endorsement of a specific security for investment purposes. Investment grade categories indicate relatively low to moderate credit risk, while ratings in the speculative categories either signal a higher level of credit risk or that a default has already occurred.

For the convenience of investors, Fitch may also include issues relating to a rated issuer that are not and have not been rated on its web page. Such issues are also denoted as *NR*.

Credit ratings express risk in relative rank order, which is to say they are ordinal measures of credit risk and are not predictive of a specific frequency of default or loss. For information about the historical performance of ratings please refer to Fitch's Ratings Transition and Default studies which detail the historical default rates and their meaning. The European Securities and Markets Authority also maintains a central repository of historical default rates.

Fitch's credit ratings do not directly address any risk other than credit risk. In particular, ratings do not deal with the risk of a market value loss on a rated security due to changes in interest rates, liquidity and other market considerations. However, in terms of payment obligation on the rated liability, market risk may be considered to the extent that it influences the ability of an issuer to pay upon a commitment. Ratings nonetheless do not reflect market risk to the extent that they influence the size or other conditionality of the obligation to pay upon a commitment (for example, in the case of index-linked bonds).

In the default components of ratings assigned to individual obligations or instruments, the agency typically rates to the likelihood of non-payment or default in accordance with the terms of that instrument's documentation. In limited cases, Fitch may include additional considerations (i.e. rate to a higher or lower standard than that implied in the obligation's documentation).

The primary credit rating scales can be used to provide a rating of privately issued obligations or certain note issuance programs or for private ratings. In this case the rating is not published, but only provided to the issuer or its agents in the form of a rating letter.

The primary credit rating scales may also be used to provide ratings for a more narrow scope, including interest strips and return of principal or in other forms of opinions such as Credit Opinions or Rating Assessment Services. Credit Opinions are either a notch- or category-specific view using the primary rating scale and omit one or more

characteristics of a full rating or meet them to a different standard. Credit Opinions will be indicated using a lower case letter symbol combined with either an * (e.g. bbb+*) or (cat) suffix to denote the opinion status. Credit Opinions will be point-in-time typically but may be monitored if the analytical group believes information will be sufficiently available. Rating Assessment Services are a notch-specific view using the primary rating scale of how an existing or potential rating may be changed by a given set of hypothetical circumstances. Rating Assessments are point-in-time opinions. Rating Assessments are not monitored; they are not placed on Watch or assigned an Outlook and are not published.

Fitch Long-Term Rating Scales

Issuer Default Ratings

Rated entities in a number of sectors, including financial and non-financial corporations, sovereigns, insurance companies and certain sectors within public finance, are generally assigned Issuer Default Ratings (IDRs). IDRs are also assigned to certain entities in global infrastructure and project finance. IDRs opine on an entity's relative vulnerability to default on financial obligations. The threshold

default risk addressed by the IDR is generally that of the financial obligations whose non-payment would best reflect the uncured failure of that entity. As such, IDRs also address relative vulnerability to bankruptcy, administrative receivership or similar concepts.

In aggregate, IDRs provide an ordinal ranking of issuers based on the agency's view of their relative vulnerability to default, rather than a prediction of a specific percentage likelihood of default.

Country Ceilings

Country Ceilings are expressed using the symbols of the long-term issuer primary credit rating scale and relate to sovereign jurisdictions also rated by Fitch on the Issuer Default Rating (IDR) scale. They reflect the agency's judgment regarding the risk of capital and exchange controls being imposed by the sovereign authorities that would prevent or materially impede the private sector's ability to convert local currency into foreign currency and transfer to non-resident creditors' transfer and convertibility (T&C) risk. They are not ratings but expressions of a cap for the foreign currency issuer ratings of most, but not all, issuers in a given country. Given the close correlation between sovereign credit and T&C risks, the Country Ceiling may exhibit a greater degree of volatility than would normally be expected when it lies above the sovereign Foreign Currency Rating.

AAA: Highest credit quality.

AAA ratings denote the lowest expectation of default risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA: Very high credit quality.

AA ratings denote expectations of very low default risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A: High credit quality.

A ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

BBB: Good credit quality.

BBB ratings indicate that expectations of default risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

BB: Speculative.

BB ratings indicate an elevated vulnerability to default risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial flexibility exists that supports the servicing of financial commitments.

B: Highly speculative.

B ratings indicate that material default risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is vulnerable to deterioration in the business and economic environment.

CCC: Substantial credit risk.

Default is a real possibility.

CC: Very high levels of credit risk.

Default of some kind appears probable.

C: Near default

A default or default-like process has begun, or the issuer is in standstill, or for a closed funding vehicle, payment capacity is irrevocably impaired. Conditions that are indicative of a C category rating for an issuer include:

- a. the issuer has entered into a grace or cure period following non-payment of a material financial obligation;
- b. the issuer has entered into a temporary negotiated waiver or standstill agreement following a payment default on a material financial obligation; or
- c. the formal announcement by the issuer or their agent of a distressed debt exchange;
- d. a closed financing vehicle where payment capacity is irrevocably impaired such that it is not expected to pay interest and/or principal in full during the life of the transaction, but where no payment default is imminent

RD: Restricted default.

RD ratings indicate an issuer that in Fitch's opinion has experienced:

- a. an uncured payment default on a bond, loan or other material financial obligation, but
- b. has not entered into bankruptcy filings, administration, receivership, liquidation, or other formal winding-up procedure, and
- c. has not otherwise ceased operating.

This would include:

- i. the selective payment default on a specific class or currency of debt;
- ii. the uncured expiry of any applicable grace period, cure period or default forbearance period following a payment default on a bank loan, capital markets security or other material financial obligation;
- iii. the extension of multiple waivers or forbearance periods upon a payment default on one or more material financial obligations, either in series or in parallel; ordinary execution of a distressed debt exchange on one or more material financial obligations.

D: Default.

D ratings indicate an issuer that in Fitch Ratings' opinion has entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure or which has otherwise ceased business.

Default ratings are not assigned prospectively to entities or their obligations; within this context, non-payment on an instrument that contains a deferral feature or grace period will generally not be considered a default until after the expiration of the deferral or grace period, unless a default is otherwise driven by bankruptcy or other similar circumstance, or by a distressed debt exchange.

In all cases, the assignment of a default rating reflects the agency's opinion as to the most appropriate rating category consistent with the rest of its universe of ratings and may differ from the definition of default under the terms of an issuer's financial obligations or local commercial practice.

Notes

The modifiers + or - may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the AAA Long-Term IDR category, or to Long-Term IDR categories below B.

Fitch Short-Term Rating Scales

A short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-term deposit ratings may be adjusted for loss severity. Short-Term Ratings are assigned to obligations whose initial maturity is viewed as short term based on market convention. Typically, this means up to 13 months for corporate, sovereign, and structured obligations and up to 36 months for obligations in U.S. public finance markets.

F1: Highest Short-Term Credit Quality. Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added + to denote any exceptionally strong credit feature.

F2: Good Short-Term Credit Quality. Good intrinsic capacity for timely payment of financial commitments.

F3: Fair Short-Term Credit Quality. The intrinsic capacity for timely payment of financial commitments is adequate.

B: Speculative Short-Term Credit Quality. Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

C: High Short-Term Default Risk. Default is a real possibility.

RD: Restricted Default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically applicable to entity ratings only.

D: Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

APPENDIX B

PROXY POLICIES AND PROCEDURES

Invesco's Policy Statement on Global Corporate

Governance and Proxy Voting

The Adviser and each sub-adviser rely on this policy. In addition, Invesco Advisers, Inc., Invesco Asset Management Limited, Invesco Asset Management Deutschland GmbH, Invesco Canada Ltd. and Invesco Asset Management (Japan) Limited have also adopted operating guidelines and procedures for proxy voting particular to each regional investment center. Such guidelines and procedures are attached hereto.

Invesco's Policy Statement on Global Corporate Governance and Proxy Voting

I. Guiding Principles and Philosophy

Public companies hold shareholder meetings, attended by the company's executives, directors, and shareholders, during which important issues, such as appointments to the company's board of directors, executive compensation, and auditors, are addressed and where applicable, voted on. Proxy voting gives shareholders the opportunity to vote on issues that impact the company's operations and policies without being present at the meetings.

Invesco views proxy voting as an integral part of its investment management responsibilities and believes that the right to vote proxies should be managed with the same high standards of care and fiduciary duty to its clients as all other elements of the investment process. Invesco's proxy voting philosophy, governance structure and process are designed to ensure that proxy votes are cast in accordance with clients' best interests, which Invesco interprets to mean clients' best economic interests, this Policy and the operating guidelines and procedures of Invesco's regional investment centers.

Invesco investment teams vote proxies on behalf of Invesco-sponsored funds and non-fund advisory clients that have explicitly granted Invesco authority in writing to vote proxies on their behalf.

The proxy voting process at Invesco, which is driven by investment professionals, focuses on maximizing long-term value for our clients, protecting clients' rights and promoting governance structures and practices that reinforce the accountability of corporate management and boards of directors to shareholders. Invesco takes a nuanced approach to voting and, therefore, many matters to be voted upon are reviewed on a case by case basis.

Votes in favor of board or management proposals should not be interpreted as an indication of insufficient consideration by Invesco fund managers. Such votes may reflect the outcome of past or ongoing engagement and active ownership by Invesco with representatives of the companies in which we invest.

II. Applicability of this Policy

This Policy sets forth the framework of Invesco's corporate governance approach, broad philosophy and guiding principles that inform the proxy voting practices of Invesco's investment teams around the world. Given the different nature of these teams and their respective investment processes, as well as the significant differences in regulatory regimes and market practices across jurisdictions, not all aspects of this Policy may apply to all Invesco investment teams at all times. In the case of a conflict between this Policy and the operating guidelines and procedures of a regional investment center the latter will control.

III. Proxy Voting for Certain Fixed Income, Money Market Accounts and Index

For proxies held by certain client accounts managed in accordance with fixed income, money market and index strategies (including exchange traded funds), Invesco will typically vote in line with the majority holder of the active-equity shares held by Invesco outside of those strategies (Majority Voting). In this manner Invesco seeks to leverage the active-equity expertise and comprehensive proxy voting reviews conducted by teams employing active-equity strategies, which typically incorporate analysis of proxy issues as a core component of the investment process. Portfolio managers for accounts employing Majority Voting still retain full discretion to override Majority Voting and to vote the shares as they determine to be in the best interest of those accounts, absent certain types of conflicts of interest, which are discussed elsewhere in this Policy.

IV. Conflicts of Interest

There may be occasions where voting proxies may present a real or perceived conflict of interest between Invesco, as investment manager, and one or more of Invesco's clients or vendors. Under Invesco's Code of Conduct, Invesco entities and individuals are strictly prohibited from putting personal benefit, whether tangible or intangible, before the interests of clients. Personal benefit includes any intended benefit for Invesco, oneself or any other individual, company, group or organization of any kind whatsoever, except a benefit for the relevant Invesco client.

Firm-level Conflicts of Interest

A conflict of interest may exist if Invesco has a material business relationship with, or is actively soliciting business from, either the company soliciting a proxy or a third party that has a material interest in the outcome of a proxy vote or that is actively lobbying for a particular outcome of a proxy vote (e.g., issuers that are distributors of Invesco's products, or issuers that employ Invesco to manage portions of their retirement plans or treasury accounts). Invesco's proxy governance team maintains a list of all such issuers for which a conflict of interest exists.

If the proposal that gives rise to the potential conflict is specifically addressed by this Policy or the operating guidelines and procedures of the relevant regional investment center, Invesco generally will vote the proxy in accordance therewith. Otherwise, based on a majority vote of its members, the Global IPAC (as described below) will vote the proxy.

Because this Policy and the operating guidelines and procedures of each regional investment center are pre-determined and crafted to be in the best economic interest of clients, applying them to vote client proxies should, in most instances, adequately resolve any potential conflict of interest. As an additional safeguard, persons from Invesco's marketing, distribution and other customer-facing functions may not serve on the Global IPAC. For the avoidance of doubt, Invesco may not consider Invesco Ltd.'s pecuniary interest when voting proxies on behalf of clients.

Personal Conflicts of Interest

A conflict also may exist where an Invesco employee has a known personal relationship with other proponents of proxy proposals, participants in proxy contests, corporate directors, or candidates for directorships.

All Invesco personnel with proxy voting responsibilities are required to report any known personal conflicts of interest regarding proxy issues with which they are involved. In such instances, the individual(s) with the conflict will be excluded from the decision-making process relating to such issues.

Other Conflicts of Interest

In order to avoid any appearance of a conflict of interest, Invesco will not vote proxies issued by, or related to matters involving, Invesco Ltd. that may be held in client accounts from time to time.¹ Shares of an Invesco-sponsored fund held by other Invesco funds will be voted in the same proportion as the votes of external shareholders of the underlying fund.

V. Use of Third-Party Proxy Advisory Services

Invesco may supplement its internal research with information from third-parties, such as proxy advisory firms. However, Invesco generally retains full and independent discretion with respect to proxy voting decisions.

As part of its fiduciary obligation to clients, Invesco performs extensive initial and ongoing due diligence on the proxy advisory firms it engages. This includes reviews of information regarding the capabilities of their research staffs and internal controls, policies and procedures, including those relating to possible conflicts of interest. In addition, Invesco regularly monitors and communicates with these firms and monitors their compliance with Invesco's performance and policy standards.

VI. Global Proxy Voting Platform and Administration

Guided by its philosophy that investment teams should manage proxy voting, Invesco has created the Global Invesco Proxy Advisory Committee (Global IPAC). The Global IPAC is a global investments-driven committee comprised of representatives from various investment management teams and Invesco's Global Head of Proxy Governance and Responsible Investment (Head of Proxy Governance). The Global IPAC provides a forum for investment teams to monitor, understand and discuss key proxy issues and voting trends within the Invesco complex. Absent a conflict of interest, the Global IPAC representatives, in consultation with the respective investment team, are responsible for voting proxies for the securities the team manages (unless such responsibility is explicitly delegated to the portfolio managers of the securities in question) In addition to the Global IPAC, for some clients, third parties (e.g., U.S. mutual fund boards) provide oversight of the proxy process. The Global IPAC and Invesco's

¹ Generally speaking, Invesco does not invest for its clients in the shares of Invesco Ltd., however, limited exceptions apply in the case of funds or accounts designed to track an index that includes Invesco Ltd. as a component.

proxy administration and governance team, compliance and legal teams regularly communicate and review this Policy and the operating guidelines and procedures of each regional investment center to ensure that they remain consistent with clients' best interests, regulatory requirements, governance trends and industry best practices.

Invesco maintains a proprietary global proxy administration platform, known as the fund manager portal and supported by the Head of Proxy Governance and a dedicated team of internal proxy specialists. The platform streamlines the proxy voting and ballot reconciliation processes, as well as related functions, such as share blocking and managing conflicts of interest issuers. Managing these processes internally, as opposed to relying on third parties, gives Invesco greater quality control, oversight and independence in the proxy administration process.

The platform also includes advanced global reporting and record-keeping capabilities regarding proxy matters that enable Invesco to satisfy client, regulatory and management requirements. Historical proxy voting information, including commentary by investment professionals regarding the votes they cast, where applicable, is stored to build institutional knowledge across the Invesco complex with respect to individual companies and proxy issues. Certain investment teams also use the platform to access third-party proxy research.

VII. Non-Votes

In the great majority of instances, Invesco is able to vote proxies successfully. However, in certain circumstances Invesco may refrain from voting where the economic or other opportunity costs of voting exceeds any anticipated benefits of that proxy proposal. In addition, there may be instances in which Invesco is unable to vote all of its clients' proxies despite using commercially reasonable efforts to do so. For example:

Invesco may not receive proxy materials from the relevant fund or client custodian with sufficient time and information to make an informed independent voting decision. In such cases, Invesco may choose not to vote, to abstain from voting, to vote in line with management or to vote in accordance with proxy advisor recommendations. These matters are left to the discretion of the fund manager.

If the security in question is on loan as part of a securities lending program, Invesco may determine that the benefit to the client of voting a particular proxy is outweighed by the revenue that would be lost by terminating the loan and recalling the securities.

In some countries the exercise of voting rights imposes temporary transfer restrictions on the related securities (share blocking). Invesco generally refrains from voting proxies in share-blocking countries unless Invesco determines that the benefit to the client(s) of voting a specific proxy outweighs the client's temporary inability to sell the security.

Some companies require a representative to attend meetings in person in order to vote a proxy. In such cases, Invesco may determine that the costs of sending a representative or signing a power-of-attorney outweigh the benefit of voting a particular proxy.

VIII. Proxy Voting Guidelines

The following guidelines describe Invesco's general positions on various common proxy voting issues. This list is not intended to be exhaustive or prescriptive. As noted above, Invesco's proxy process is investor-driven, and each fund manager retains ultimate discretion to vote proxies in the manner they deem most appropriate, consistent with Invesco's proxy voting principles and philosophy discussed in Sections I through IV. Individual proxy votes therefore will differ from these guidelines from time to time.

A. Shareholder Access and Treatment of Shareholder Proposals

Invesco reviews on a case by case basis but generally votes in favor of proposals that would increase shareholders' opportunities to express their views to boards of directors, proposals that would lower barriers to shareholder action, and proposals to promote the adoption of generally accepted best practices in corporate governance, provided that such proposals would not require a disproportionate amount of management attention or corporate resources or otherwise that may inappropriately disrupt the company's business and main purpose, usually set out in their reporting disclosures and business model. Likewise, Invesco reviews on a case by case basis but generally votes for shareholder proposals that are designed to protect shareholder rights if a company's corporate governance standards indicate that such additional protections are warranted (for example, where minority shareholders' rights are not adequately protected).

B. Environmental, Social and Corporate Responsibility Issues

Invesco believes that a company's long-term response to environmental, social and corporate responsibility issues can significantly affect its long-term shareholder value. We recognize that to manage a corporation effectively, directors and management may consider not only the interests of shareholders, but also the interests of employees, customers, suppliers, creditors and the local community, among others. While Invesco generally affords management discretion with respect to the operation of a company's business, Invesco will evaluate such proposals on a case by case basis and will vote proposals relating to these issues in a manner intended to maximize long-term shareholder value.

C. Capitalization Structure Issues

i. Stock Issuances

Invesco generally supports a board's decisions about the need for additional capital stock to meet ongoing corporate needs, except where the request could adversely affect Invesco clients' ownership stakes or voting rights. Some capitalization proposals, such as those to authorize common or preferred stock with special voting rights or to issue additional stock in connection with an acquisition, may require additional analysis. Invesco generally opposes proposals to authorize classes of preferred stock with unspecified voting, conversion, dividend or other rights (blank check stock) when they appear to be intended as an anti-takeover mechanism; such issuances may be supported when used for general financing purposes.

ii. Stock Splits

Invesco generally supports a board's proposal to increase common share authorization for a stock split, provided that the increase in authorized shares would not result in excessive dilution given the company's industry and performance in terms of shareholder returns.

iii. Share Repurchases

Invesco generally supports a board's proposal to institute open-market share repurchase plans only if all shareholders participate on an equal basis.

D. Corporate Governance Issues

i. Board of Directors

1. *Director Nominees in Uncontested Elections*

Subject to the other considerations described below, in an uncontested director election for a company without a controlling shareholder, Invesco generally votes in favor of the director slate if it is comprised of at least a majority of independent directors and if the board's key committees are fully independent, effective and balanced. Key committees include the audit, compensation/remuneration and governance/nominating committees. Invesco's standard of independence excludes directors who, in addition to the directorship, have any material business or family relationships with the companies they serve.

2. *Director Nominees in Contested Elections*

Invesco recognizes that short-term investment sentiments influence the corporate governance landscape and may influence companies in Invesco clients' portfolios and more broadly across the market. Invesco recognizes that short-term investment sentiment may conflict with long-term value creation and as such looks at each proxy contest matter on a case by case basis, considering factors such as:

Long-term financial performance of the company relative to its industry,

Management's track record,

Background to the proxy contest,

Qualifications of director nominees (both slates),

Evaluation of what each side is offering shareholders as well as the likelihood that the proposed objectives and goals can be met, and

Stock ownership positions in the company.

3. *Director Accountability*

Invesco generally withholds votes from directors who exhibit a lack of accountability to shareholders. Examples include, without limitation, poor attendance (less than 75%, absent extenuating circumstances) at meetings, failing to implement shareholder proposals that have received a majority of votes and/or by adopting or approving egregious corporate-governance or other policies. In cases of material financial restatements, accounting fraud, habitually late filings, adopting shareholder rights plan (poison pills) without shareholder approval, or other areas of poor performance, Invesco may withhold votes from some or all of a company s directors. In situations where directors performance is a concern, Invesco may also support shareholder proposals to take corrective actions such as so-called clawback provisions.

4. *Director Independence*

Invesco generally supports proposals to require a majority of directors to be independent unless particular circumstances make this not Feasible or in the best interests of shareholders, We generally vote for proposals that would require the board s audit, compensation/remuneration, and/or governance/nominating committees to be composed exclusively of independent directors since this minimizes the potential for conflicts of interest.

5. *Director Indemnification*

Invesco recognizes that individuals may be reluctant to serve as corporate directors if they are personally liable for all related lawsuits and legal costs. As a result, reasonable limitations on directors liability can benefit a company and its shareholders by helping to attract and retain qualified directors while preserving recourse for shareholders in the event of misconduct by directors, Invesco, therefore, generally supports proposals to limit directors liability and provide indemnification and/or exculpation, provided that the arrangements are limited to the director acting honestly and in good faith with a view to the best interests of the company and, in criminal matters, are limited to the director having reasonable grounds for believing the conduct was lawful.

6. *Separate Chairperson and CEO*

Invesco evaluates these proposals on a case by case basis, recognizing that good governance requires either an independent chair or a qualified, proactive, and lead independent director.

Voting decisions may take into account, among other factors, the presence or absence of:

a designated lead director, appointed from the ranks of the independent board members, with an established term of office and clearly delineated powers and duties;

a majority of independent directors;

completely independent key committees;

committee chairpersons nominated by the independent directors;

CEO performance reviewed annually by a committee of independent directors; and

established governance guidelines.

7. Majority/Supermajority/Cumulative Voting for Directors

The right to elect directors is the single most important mechanism shareholders have to promote accountability. Invesco generally votes in favor of proposals to elect directors by a majority vote. Except in cases where required by law in the jurisdiction of incorporation or when a company has adopted formal governance principles that present a meaningful alternative to the majority voting standard, Invesco generally votes against actions that would impose any supermajority voting requirement, and generally supports actions to dismantle existing supermajority requirements.

The practice of cumulative voting can enable minority shareholders to have representation on a company's board. Invesco generally opposes such proposals as unnecessary where the company has adopted a majority voting standard. However, Invesco generally supports proposals to institute the practice of cumulative voting at companies whose overall corporate-governance standards indicate a particular need to protect the interests of minority shareholders.

8. Staggered Boards/Annual Election of Directors

Invesco generally supports proposals to elect each director annually rather than electing directors to staggered multi-year terms because annual elections increase a board's level of accountability to its shareholders.

9. Board Size

Invesco believes that the number of directors is an important factor to consider when evaluating the board's ability to maximize long-term shareholder value. Invesco approaches proxies relating to board size on a case by case basis but generally will defer to the board with respect to determining the optimal number of board members, provided that the proposed board size is sufficiently large to represent shareholder interests and sufficiently limited to remain effective.

10. Term Limits for Directors

Invesco believes it is important for a board of directors to examine its membership regularly with a view to ensuring that the company continues to benefit from a diversity of director viewpoints and experience. We generally believe that an individual board's nominating committee is best positioned to determine whether director term limits would be an appropriate measure to help achieve these goals and, if so, the nature of such limits.

ii. Audit Committees and Auditors

1. *Qualifications of Audit Committee and Auditors*

Invesco believes a company's Audit Committee has a high degree of responsibility to shareholders in matters of financial disclosure, integrity of the financial statements and effectiveness of a company's internal controls. Independence, experience and financial expertise are critical elements of a well-functioning Audit Committee. When electing directors who are members of a company's Audit Committee, or when ratifying a company's auditors, Invesco considers the past performance of the Audit Committee and holds its members accountable for the quality of the company's financial statements and reports.

2. *Auditor Indemnifications*

A company's independent auditors play a critical role in ensuring and attesting to the integrity of the company's financial statements. It is therefore essential that they perform their work in accordance with the highest standards. Invesco generally opposes proposals that would limit the liability of or indemnify auditors because doing so could serve to undermine this obligation.

3. *Adequate Disclosure of Auditor Fees*

Understanding the fees earned by the auditors is important for assessing auditor independence. Invesco's support for the re-appointment of the auditors will take into consideration the availability of adequate disclosure concerning the amount and nature of audit versus non-audit fees. Invesco generally will support proposals that call for this disclosure if it is not already being made.

E. Remuneration and Incentives

Invesco believes properly constructed compensation plans that include equity ownership are effective in creating incentives that induce management and employees of portfolio companies to create greater shareholder wealth. Invesco generally supports equity compensation plans that promote the proper alignment of incentives with shareholders' long-term interests and generally votes against plans that are overly dilutive to existing shareholders, plans that contain objectionable structural features, and plans that appear likely to reduce the value of the client's investment.

i. Independent Compensation/Remuneration Committee

Invesco believes that an independent, experienced and well-informed compensation/remuneration committee is critical to ensuring that a company's remuneration practices align with shareholders' interests and, therefore, generally supports proposals calling for a compensation/remuneration committee to be comprised solely of independent directors.

ii. Advisory Votes on Executive Compensation

Invesco believes that an independent compensation/remuneration committee of the board, with input from management, is generally best positioned to determine the appropriate components and levels of executive compensation, as well as the appropriate frequency of related shareholder advisory votes. This is particularly the case where shareholders have the ability to express their views on remuneration matters through annual votes for or against the election of the individual directors who comprise the compensation/remuneration committee. Invesco, therefore, generally will support management's recommendations with regard to the components and levels of executive compensation and the frequency of shareholder advisory votes on executive compensation. However, Invesco will vote against such recommendations where Invesco determines that a company's executive remuneration policies are not properly aligned with shareholder interests or may create inappropriate incentives for management.

iii. Equity Based Compensation Plans

Invesco generally votes against plans that contain structural features that would impair the alignment of incentives between shareholders and management. Such features include, without limitation, the ability to reprice or reload options without shareholder approval, the ability to issue options below the stock's current market price, or the ability to replenish shares automatically without shareholder approval.

iv. Severance Arrangements

Invesco considers proposed severance arrangements (sometimes known as "golden parachute" arrangements) on a case-by-case basis due to the wide variety among their terms. Invesco acknowledges that in some cases such arrangements, if reasonable, may be in shareholders' best interests as a method of attracting and retaining high quality executive talent. Invesco generally votes in favor of proposals requiring advisory shareholder ratification of senior executives' severance agreements while generally opposing proposals that require such agreements to be ratified by shareholders in advance of their adoption.

v. Claw Back Provisions

Invesco generally supports so called claw back policies intended to recoup remuneration paid to senior executives based upon materially inaccurate financial reporting (as evidenced by later restatements) or fraudulent accounting or business practices.

vi. Employee Stock Purchase Plans

Invesco generally supports employee stock purchase plans that are reasonably designed to provide proper incentives to a broad base of employees, provided that the price at which employees may acquire stock represents a reasonable discount from the market price.

F. Anti-Takeover Defenses; Reincorporation

Measures designed to protect a company from unsolicited bids can adversely affect shareholder value and voting rights, and they have the potential to create conflicts of interests among directors, management and shareholders. Such measures include adopting or renewing shareholder rights plans (poison pills), requiring supermajority voting on certain corporate actions, classifying the election of directors instead of electing each director to an annual term, or creating separate classes of common or preferred stock with special voting rights. In determining whether to support a proposal to add, eliminate or restrict anti-takeover measures, Invesco will examine the particular elements of the proposal to assess the degree to which it would adversely affect shareholder rights of adopted. Invesco generally supports shareholder proposals directing companies to subject their anti-takeover provisions to a shareholder vote. Invesco generally opposes payments by companies to minority shareholders intended to dissuade such shareholders from pursuing a takeover or other changes (sometimes known as greenmail) because these payments result in preferential treatment of some shareholders over others.

Reincorporation involves re-establishing the company in a different legal jurisdiction. Invesco generally will vote for proposals to reincorporate a company provided that the board and management have demonstrated sound financial or business reasons for the move. Invesco generally will oppose proposals to reincorporate if they are solely part of an anti-takeover defense or intended to limit directors liability.

Invesco Advisers, Inc., Invesco Funds Board

Approved/Adopted Date

May 3-4, 2016

The following guidelines apply to all institutional and retail funds and accounts that have explicitly authorized Invesco Advisers, Inc. (Invesco) to vote proxies associated with securities held on their behalf (collectively, Clients).

A. INTRODUCTION

Invesco Ltd. (IVZ), the ultimate parent company of Invesco, has adopted a global policy statement on corporate governance and proxy voting (the Invesco Global Proxy Policy). The policy describes IVZ's views on governance matters and the proxy administration and governance approach. Invesco votes proxies by using the framework and procedures set forth in the Invesco Global Proxy Policy, while maintaining the Invesco-specific guidelines described below.

B. PROXY VOTING OVERSIGHT: THE MUTUAL FUNDS BOARD OF TRUSTEES

In addition to the Global Invesco Proxy Advisory Committee, the Invesco mutual funds board of trustees provides oversight of the proxy process through quarterly reporting and an annual in-person presentation by Invesco's Global Head of Proxy Governance and Responsible Investment.

C. USE OF THIRD PARTY PROXY ADVISORY SERVICES

Invesco has direct access to third-party proxy advisory analyses and recommendations (currently provided by Glass Lewis (GL) and Institutional Shareholder Services, Inc. (ISS)), among other research tools, and uses the information gleaned from those sources to make independent voting decisions.

Invesco's proxy administration team performs extensive initial and ongoing due diligence on the proxy advisory firms that it engages. When deemed appropriate, representatives from the proxy advisory firms are asked to deliver updates directly to the mutual funds' board of trustees. Invesco conducts semi-annual, in-person policy roundtables with key heads of research from ISS and GL to ensure transparency, dialogue and engagement with the firms. These meetings provide Invesco with an opportunity to assess the firms' capabilities, conflicts of interest and service levels, as well as provide investment professionals with direct insight into the advisory firms' stances on key governance and proxy topics and their policy framework/methodologies. Invesco's proxy administration team also reviews the annual SSAE 16 reports for, and the periodic proxy guideline updates published by, each proxy advisory firm to ensure that their guidelines remain consistent with Invesco's policies and procedures. Furthermore, each proxy advisory firm completes an annual due diligence questionnaire submitted by Invesco, and Invesco conducts on-site due diligence at each firm, in part to discuss their responses to the questionnaire.

If Invesco becomes aware of any material inaccuracies in the information provided by ISS or GL, Invesco's proxy administration team will investigate the matter to determine the cause, evaluate the adequacy of the proxy advisory firm's control structure and assess the efficacy of the measures instituted to prevent further errors.

ISS and GL provide updates to previously issued proxy reports when necessary to incorporate newly available information or to correct factual errors. ISS also has a Feedback Review Board, which provides a mechanism for stakeholders to communicate with ISS about issues related to proxy voting and policy formulation, research, and the accuracy of data contained in ISS reports.

D. PROXY VOTING GUIDELINES

The following guidelines describe Invesco's general positions on various common proxy issues. The guidelines are not intended to be exhaustive or prescriptive. Invesco's proxy process is investor-driven, and each portfolio manager retains ultimate discretion to vote proxies in the manner that he or she deems to be the most appropriate, consistent with the proxy voting principles and philosophy discussed in the Invesco Global Proxy Policy. Individual proxy votes therefore will differ from these guidelines from time to time.

I. Corporate Governance

Management teams of companies are accountable to the boards of directors and directors of publicly held companies are accountable to shareholders. Invesco endeavors to vote the proxies of companies in a manner that will reinforce the notion of a board's accountability. Consequently, Invesco generally votes against any actions that would impair the rights of shareholders or would reduce shareholders' influence over the board.

The following are specific voting issues that illustrate how Invesco applies this principle of accountability.

Elections of directors

In uncontested director elections for companies that do not have a controlling shareholder, Invesco generally votes in favor of slates if they are comprised of at least a majority of independent directors and if the board's key committees are fully independent. Key committees include the audit, compensation and governance or nominating Committees. Invesco's standard of independence excludes directors who, in addition to the directorship, have any material business or family relationships with the companies they serve. Contested director elections are evaluated on a case-by-case basis.

Director performance

Invesco generally withholds votes from directors who exhibit a lack of accountability to shareholders, either through their Level of attendance at meetings or by adopting or approving egregious corporate-governance or other policies. In cases of material financial restatements, accounting fraud, habitually late filings, adopting shareholder rights plan ("poison pills") without shareholder approval, or other areas of poor performance, Invesco may withhold votes from some or all of a company's directors. In situations where directors' performance is a concern, Invesco may also support shareholder proposals to take corrective actions, such as so-called "clawback" provisions.

Auditors and Audit Committee members

Invesco believes a company's audit committee has a high degree of responsibility to shareholders in matters of financial disclosure, integrity of the financial statements and effectiveness of a company's internal controls. Independence, experience and financial expertise are critical elements of a well-functioning audit committee. When electing directors who are members of a company's audit committee, or when ratifying a company's auditors, Invesco considers the past performance of the committee and holds its members accountable for the quality of the company's financial statements and reports.

Majority standard in director elections

The right to elect directors is the single most important mechanism shareholders have to promote accountability. Invesco supports the nascent effort to reform the U.S. convention of electing directors, and generally votes in favor of proposals to elect directors by a majority vote.

Staggered Boards/Annual Election of Directors

Invesco generally supports proposals to elect each director annually rather than electing directors to staggered multi-year terms because annual elections increase a board's level of accountability to its shareholders.

Supermajority voting requirements

Unless required by law in the state of incorporation, Invesco generally votes against actions that would impose any supermajority voting requirement, and generally supports actions to dismantle existing supermajority requirements.

Responsiveness of Directors

Invesco generally withholds votes for directors who do not adequately respond to shareholder proposals that were approved by a majority of votes cast the prior year.

Cumulative voting

The practice of cumulative voting can enable minority shareholders to have representation on a company's board, Invesco generally supports proposals to institute the practice of cumulative voting at companies whose overall corporate-governance standards indicate a particular need to protect the interests of minority shareholders.

Proxy access

Invesco generally supports shareholders' nominations of directors in the proxy statement and ballot because it increases the accountability of the board to shareholders. Invesco will generally consider the proposed minimum period of ownership (e.g., three years), minimum ownership percentage (e.g., three percent), limitations on a proponent's ability to aggregate holdings with other shareholders and the maximum percentage of directors who can be nominated when determining how to vote on proxy access proposals.

Shareholder access

On business matters with potential financial consequences, Invesco generally votes in favor of proposals that would increase shareholders' opportunities to express their views to boards of directors, proposals that would lower barriers to shareholder action and proposals to promote the adoption of generally accepted best practices in corporate governance. Furthermore, Invesco generally votes for shareholder proposals that are designed to protect shareholder rights if a company's corporate governance standards indicate that such additional protections are warranted.

Exclusive Forum

Invesco generally supports proposals that would designate a specific jurisdiction in company bylaws as the exclusive venue for certain types of shareholder lawsuits in order to reduce costs arising out of multijurisdictional litigation.

II. Compensation and Incentives

Invesco believes properly constructed compensation plans that include equity ownership are effective in creating incentives that induce management and employees of companies to create greater shareholder wealth. Invesco generally supports equity compensation plans that promote the proper alignment of incentives with shareholders' long-term interests, and generally votes against plans that are overly dilutive to existing shareholders, plans that contain objectionable structural features, and plans that appear likely to reduce the value of the Client's investment.

Following are specific voting issues that illustrate how Invesco evaluates incentive plans.

Executive compensation

Invesco evaluates executive compensation plans within the context of the company's performance under the executives' tenure. Invesco believes independent compensation committees are best positioned to craft executive-compensation plans that are suitable for their company-specific circumstances. Invesco views the election of independent compensation committee members as the appropriate mechanism for shareholders to express their approval or disapproval of a company's compensation practices. Therefore, Invesco generally does not support shareholder proposals to limit or eliminate certain forms of executive compensation. In the interest of reinforcing the notion of a compensation committee's accountability to shareholders, Invesco generally supports proposals requesting that companies subject each year's compensation record to an advisory shareholder vote, or so-called "say on pay" proposals.

Equity-based compensation plans

Invesco generally votes against plans that contain structural features that would impair the alignment of incentives between shareholders and management. Such features include the ability to reprice or reload options without shareholder approval, the ability to issue options below the stock's current market price, or the ability automatically to replenish shares without shareholder approval.

Employee stock-purchase plans

Invesco generally supports employee stock-purchase plans that are reasonably designed to provide proper incentives to a broad base of employees, provided that the price at which employees may acquire stock is at most a 15 percent discount from the market price.

Severance agreements

Invesco generally votes in favor of proposals requiring advisory shareholder ratification of executives' severance agreements. However, Invesco generally opposes proposals requiring such agreements to be ratified by shareholders in advance of their adoption. Given the vast differences that may occur in these agreements, some severance agreements are evaluated on an individual basis.

III. Capitalization

Examples of management proposals related to a company's capital structure include authorizing or issuing additional equity capital, repurchasing outstanding stock, or enacting a stock split or reverse stock split. On requests for additional capital stock, Invesco analyzes the company's stated reasons for the request. Except where the request could adversely affect the Client's ownership stake or voting rights, Invesco generally supports a board's decisions on its needs for additional capital stock. Some capitalization proposals require a case-by-case analysis. Examples of such proposals include authorizing common or preferred stock with special voting rights, or issuing additional stock in connection with an acquisition.

IV. Mergers, Acquisitions and Other Corporate Actions

Issuers occasionally require shareholder approval to engage in certain corporate actions such as mergers, acquisitions, name changes, dissolutions, reorganizations, divestitures and reincorporations and the votes for these types of corporate actions are generally determined on a case-by-case basis.

V. Anti-Takeover Measures

Practices designed to protect a company from unsolicited bids can adversely affect shareholder value and voting rights, and they potentially create conflicts of interests among directors, management and shareholders. Except under special issuer-specific circumstances, Invesco generally votes to reduce or eliminate such measures. These measures include adopting or renewing poison pills, requiring supermajority voting on certain corporate actions, classifying the election of directors instead of electing each director to an annual term, or creating separate classes of common or preferred stock with special voting rights. Invesco generally votes against management proposals to impose these types of measures, and generally votes for shareholder proposals designed to reduce such measures. Invesco generally supports shareholder proposals directing companies to subject their anti-takeover provisions to a shareholder vote.

VI. Environmental, Social and Corporate Responsibility Issues

Invesco believes that a company's response to environmental, social and corporate responsibility issues and the risks attendant to them can have a significant effect on its long-term shareholder value. Invesco recognizes that to manage a corporation effectively, directors and management must consider not only the interest of shareholders, but also the interests of employees, customers, suppliers and creditors, among others. While Invesco generally affords management discretion with respect to the operation of a company's business, Invesco will evaluate such proposals on a case-by-case basis and will vote proposals relating to these issues in a manner intended to maximize long-term shareholder value.

VII. Routine Business Matters

Routine business matters rarely have the potential to have a material effect on the economic prospects of Clients' holdings, so Invesco generally supports a board's discretion on these items. However, Invesco generally votes against proposals where there is insufficient information to make a decision about the nature of the proposal. Similarly, Invesco generally votes against proposals to conduct other unidentified business at shareholder meetings.

D. EXCEPTIONS

Client Maintains Right to Vote Proxies

In the case of institutional or sub-advised Clients, Invesco will vote the proxies in accordance with these guidelines and the Invesco Global Proxy Policy, unless the Client retains in writing the right to vote or the named fiduciary of a Client (e.g., the plan sponsor of an ERISA Client) retains in writing the right to direct the plan trustee or a third party to vote proxies.

Voting for Certain Investment Strategies

For cash sweep investment vehicles selected by a Client but for which Invesco has proxy voting authority over the account and where no other Client holds the same securities, Invesco will vote proxies based on ISS recommendations.

Funds of Funds

Some Invesco Funds offering diversified asset allocation within one investment vehicle own shares in other Invesco Funds. A potential conflict of interest could arise if an underlying Invesco Fund has a shareholder meeting with any proxy issues to be voted on, because Invesco's asset-allocation funds or target-maturity funds may be large shareholders of the underlying fund. In order to avoid any potential for a conflict, the asset-allocation funds and target maturity funds vote their shares in the same proportion as the votes of the external shareholders of the underlying fund.

F. POLICIES AND VOTE DISCLOSURE

A copy of these guidelines, the Invesco Global Proxy Policy and the voting record of each Invesco Retail Fund are available on Invesco's web site, www.invesco.com. In accordance with Securities and Exchange Commission regulations, all Invesco Funds file a record of all proxy-voting activity for the prior 12 months ending June 30th. That filing is made on or before August 31st of each year. In the case of institutional and sub-advised Clients, Clients may contact their client service representative to request information about how Invesco voted proxies on their behalf. Absent specific contractual guidelines, such requests may be made on a semi-annual basis.

Stewardship Policy

Introduction

This paper describes Invesco Perpetual's (IP) approach to stewardship and in particular how our policy and procedures meet the requirements of the Financial Reporting Council's (FRC) UK Stewardship Code (the Code). Its purpose is to increase understanding of the philosophy, beliefs and practices that drive IP's behaviours as a significant institutional investor in markets around the world.

IP has supported the development of good governance in the UK and beyond for many years. We are signatories and supporters of the FRC's Stewardship Code. The Code sets out a number of areas of good practice to which the FRC believes institutional investors should aspire. It also describes steps asset owners can take to protect and enhance the value that accrues to the ultimate beneficiary.

This document is designed to describe how IP approaches our stewardship responsibilities and how this is consistent with and complies with the Code. It also provides useful links to relevant documents, codes and regulation for those who would like to look further at the broader context of our policy and the Code, as well as our commitment to other initiatives in this area, such as the UN supported Principles for Responsible Investment, of which Invesco is a signatory.

Key contact details are available at the end of this document should you have any questions on any aspect of our stewardship activities.

What is the UK Stewardship Code?

The UK Stewardship Code is a set of principles and guidance for institutional investors which represents current best practice on how they should perform their stewardship duties. The purpose of the Code is to improve the quality of engagement between institutional investors and companies to help improve long-term returns to shareholders and the efficient exercise of governance responsibilities. The Code was published by the FRC in July 2010, was updated in September 2012, and will continue to be overseen by the FRC. Commitment to the Code is on a comply or explain basis.

Our compliance with the Stewardship Code

Invesco Perpetual is part of the Invesco Group. Invesco is committed to being a responsible investor. We serve our clients in this space as a trusted partner both on specific responsible investment product strategies as well as part of our commitment to deliver a superior investment experience. Invesco signed the UN sponsored Principles for Responsible Investment (PRI) in 2013 thereby formalising our commitment to responsible investment globally. We achieved an A+ rating in our 2017 PRI assessment for our strategy and governance in responsible investment. This rating demonstrates our extensive efforts in terms of environmental, social and governance (ESG) integration, active ownership, investor collaboration and transparency. The diversity of Invesco means that investment centres and strategies will vary in their approaches to implementation of responsible investment. Global resources both in terms of external research input and a global team of experts underpin and drive this effort alongside our investment centres. IP is a signatory to the UK Stewardship Code. The Code sets out seven principles, which support good practice on engagement with investee companies, and to which the FRC believes institutional investors should aspire.

IP takes its responsibilities for investing its clients' money very seriously. As a core part of the investment process, IP's fund managers will endeavour to establish a dialogue with company management to promote company decision making that is in the best interests of shareholders, and takes into account ESG issues.

Being a major shareholder in a company is more than simply expecting to benefit from its future earnings streams. In IP's view, it is about helping to provide the capital a company needs to grow, about being actively involved in its strategy, when necessary, and helping to ensure that shareholder interests are always at the forefront of management's thoughts.

We recognize that different asset classes will vary in their approach to implementation of stewardship activities. Where relevant, the fixed interest and multi-asset teams consider ESG elements as part of their investment research.

IP primarily defines stewardship as representing the best interests of clients in its fiduciary role as a discretionary asset manager (not asset owner) and as an institutional shareholder. This is considered more appropriate than undertaking the direct management of investee companies, which we believe should always remain the responsibility of the directors and executives of those companies.

Edgar Filing: Invesco High Income Trust II - Form 486BPOS

IP may at times seek to influence strategies of investee companies, where appropriate, on behalf of its clients, but IP will never seek to be involved in the day to day running of any investee companies. IP considers that being an active shareholder is fundamental to good Corporate Governance. Although this does not entail intervening in daily management decisions, it does involve supporting general standards for corporate activity and, where necessary, taking the initiative to ensure those standards are met, with a view to protecting and enhancing value for investors in our portfolios.

Engagement will also be proportionate and will reflect the size of holdings, length of holding period and liquidity of the underlying company shares. Given that the majority of IP's investments are part of a very active asset management culture, engagement with those companies in which it chooses to invest its clients' money is very important. Encouraging high standards of corporate governance within those companies that it invests is key to achieving successful outcomes for its clients.

IP sets out below how it complies with each principle of the FRC's Stewardship code, or details why we have chosen to take a different approach, where relevant.

Stewardship Policy

Scope

The scope of this policy covers all portfolios that are managed by the Invesco Perpetual (IP) investment teams located in Henley on Thames, United Kingdom and specifically excludes portfolios that are managed by other investment teams within the wider Invesco group that have their own voting, corporate governance and stewardship policies, all falling under the broader global policy. As an example, within IP's ICVC range the following funds are excluded: IP US Enhanced Index, IP Balanced Risk 8 and 10 funds, IP European ex UK Enhanced Index, IP Global Balanced Index, IP Global ex-UK Core Equity Index, IP Global ex-UK Enhanced Index, IP Hong Kong & China, IP Japanese Smaller Companies, IP UK Enhanced Index.

Introduction to the principles of the Stewardship Code

There are 7 principles under the Stewardship Code. Each principle is accompanied by guidance to help investors focus on how to meet it.

The principles are as follows:

- **Principle 1:** Institutional investors should publicly disclose their policy on how they will discharge their stewardship responsibilities.
- **Principle 2:** Institutional investors should have a robust policy on managing conflicts of interest in relation to stewardship and this policy should be publicly disclosed.
- **Principle 3:** Institutional investors should monitor their investee companies.
- **Principle 4:** Institutional investors should establish clear guidelines on when and how they will escalate their activities as a method of protecting and enhancing shareholder value.
- **Principle 5:** Institutional investors should be willing to act collectively with other investors where appropriate.
- **Principle 6:** Institutional investors should have a clear policy on voting and disclosure of voting activity.
- **Principle 7:** Institutional investors should report periodically on their stewardship and voting activities.

Stewardship Policy

Principle 1

Institutional investors should publicly disclose their policy on how they will discharge their stewardship responsibilities.

Guidance

Stewardship activities include monitoring and engaging with companies on matters such as strategy, performance, risk, capital structure and corporate governance, including culture and remuneration.

Engagement is purposeful dialogue with companies on those matters as well as on issues that are the immediate subject of votes at general meetings.

The policy should disclose how the institutional investor applies stewardship with the aim of enhancing and protecting the value for the ultimate beneficiary or client.

The statement should reflect the institutional investor's activities within the investment chain, as well as the responsibilities that arise from those activities. In particular, the stewardship responsibilities of those whose primary activities are related to asset ownership may be different from those whose primary activities are related to asset management or other investment related services.

Where activities are outsourced, the statement should explain how this is compatible with the proper exercise of the institutional investor's stewardship responsibilities and what steps the investor has taken to ensure that they are carried out in a manner consistent with the approach to stewardship set out in the statement.

The disclosure should describe arrangements for integrating stewardship within the wider investment process.

Invesco Perpetual's Investors' approach:

IP complies with Principle 1 by publishing Invesco's Global Policy Statement on Corporate Governance and Proxy Voting and this document around the specific application to Invesco on its website.

In this document we explain our philosophy on stewardship, our proxy voting policy and how we deal with conflicts of interest. In addition, this statement of compliance with the UK Stewardship Code indicates how IP addresses engagement, monitoring, and incorporates environmental, social and governance (ESG) activities within our investment process. All of our activities are aimed at enhancing and protecting the value of our investments for our clients.

These documents are reviewed and updated on an annual basis.

Integration of stewardship activities as part of the wider investment process

The investment process and philosophy at IP is rooted in a culture of long term, valuation led, active management. IP fundamental research of companies includes a holistic set of factors.

When analysing companies' prospects for future profitability and hence returns to shareholders, IP will take many variables into account, including but not limited to, the following:

- Nomination and audit committees
- Remuneration policies, reporting and directors' remuneration

- Board balance and structure

- Financial reporting principles

- Internal control system and annual review of its effectiveness

- Dividend and Capital Management policies

- ESG activities

Frequent dialogue with companies on these topics is an essential part of our fundamental research process and we will regularly support companies to improve and develop overtime. As such, stewardship is core to our wider investment process.

Dialogue with companies

IP will endeavour, where practicable and in accordance with its investment approach, to enter into a dialogue with companies management based on the mutual understanding of objectives. This dialogue is likely to include regular meetings with company representatives to explore any concerns about ESG issues where these may impact on the best interests of clients. In discussion with company boards and senior non-Executive Directors, IP will endeavour to cover any matters of particular relevance to investee company shareholder value.

Those people on the inside of a company, most obviously its executives, know their businesses much more intimately. Therefore, it is usually appropriate to leave strategic matters in their hands. However, if that strategy is not working, or alternatives need exploring, IP will seek to influence the direction of that company where practicable. In IP's view, this is part of its responsibility to clients.

Ultimately the business performance will have an impact on the returns generated by IP's portfolios, whether it is in terms of share price performance or dividends, and IP wants to seek to ensure that the capital invested on behalf of its clients is being used as effectively as possible. In the majority of cases IP is broadly in agreement with the direction of a company that it has invested in, as its initial decision to invest will have taken these factors into account. Corporate engagement provides an opportunity for regular reviews of these issues.

Stewardship Policy

The building of this relationship facilitates frank and open discussion, and on-going interaction is an integral part of the fund manager's role. The fact that IP has been a major shareholder in a number of companies for a long time, reflects both the fact that IP's original investments were based on a joint understanding of where the businesses were going and the ability of the companies' management to execute that plan. It adds depth to the sophistication of our understanding of the firm, its clients and markets. Inevitably there are times when IP's views diverge from those of the companies' executives but, where possible, we attempt to work with companies towards a practical solution. However, IP believes that its status as part-owner of companies means that it has both the right and the responsibility to make its views known. The option of selling out of those businesses is always open, but normally IP prefers to push for change, (i.e. we believe that we are more influential as an owner of equity) even if this can be a slow process.

Specifically when considering resolutions put to shareholders, IP will pay attention to the companies' compliance with the relevant local requirements.

Non-routine resolutions and other topics

These will be considered on a case-by-case basis and where proposals are put to a vote will require proper explanation and justification by (in most instances) the Board. Examples of such proposals would be all political donations and any proposal made by a shareholder or body of shareholders (typically a pressure group).

Other considerations that IP might apply to non-routine proposals will include:

- The degree to which the company's stated position on the issue could affect its reputation and/or sales, or leave it vulnerable to boycott or selective purchasing
- Peer group response to the issue in question
- Whether implementation would achieve the objectives sought in the proposal
- Whether the matter is best left to the Board's discretion

Principle 2

Institutional investors should have a robust policy on managing conflicts of interest in relation to stewardship and this policy should be publicly disclosed.

Guidance

An institutional investor's duty is to act in the interests of its clients and/or beneficiaries.

Conflicts of interest will inevitably arise from time to time, which may include when voting on matters affecting a parent company or client.

Institutional investors should put in place, maintain and publicly disclose a policy for identifying and managing conflicts of interest with the aim of taking all reasonable steps to put the interests of their client or beneficiary first. The policy should also address how matters are handled when the interests of clients or beneficiaries diverge from each other.

Invesco Perpetual's Investors' approach:

Edgar Filing: Invesco High Income Trust II - Form 486BPOS

Invesco is required to take all appropriate steps to identify, manage, record and, where relevant, disclose actual or potential conflicts of interest between ourselves (including our managers and employees and any person directly or indirectly linked) and our clients and between one client and another. Invesco has a UK Conflicts of Interest Policy which lists the types of potential conflicts of interest which may arise through the normal course of business whose existence may damage the interests of clients and details the administrative arrangements taken to prevent and manage these. A copy of the UK Conflicts of Interest Policy is provided to investors on request.

Invesco has a UK Code of Ethics for its employees which covers expectations around our principles and obligations as a fiduciary, material non-public information, personal account dealing, outside business activity, and other potential conflicts of interest. All employees are required to provide an annual attestation that they have read the Code of Ethics and will comply with its provisions.

Invesco maintains policies and procedures that deal with conflicts of interest in all of its business dealings. In particular in relation to conflicts of interest that exist in its stewardship and proxy voting activities, these policies can be found in the Global Policy Statement on Corporate Governance and Proxy Voting found on our website.

There may be occasions where voting proxies may present a real or perceived conflict of interest between Invesco, as investment manager, and one or more of Invesco's clients or vendors. Under Invesco's Code of Conduct, Invesco entities and individuals are strictly prohibited from putting personal benefit, whether tangible or intangible, before the interests of clients. Personal benefit includes any intended benefit for Invesco, oneself or any other individual, company, group or organization of any kind whatsoever, except a benefit for the relevant Invesco client.

Firm-level Conflicts of Interest

A conflict of interest may exist if Invesco has a material business relationship with, or is actively soliciting business from, either the company soliciting a proxy vote or a third party that has a material interest in the outcome of a proxy vote or that is actively lobbying for a particular outcome of a proxy vote (e.g., issuers that are distributors of Invesco's products, or issuers that employ Invesco to manage portions of their retirement plans or treasury accounts). Invesco's proxy administration team maintains a list of all such issuers for which a conflict of interest actually exists.

If the proposal that gives rise to the potential conflict is specifically addressed by this Policy or the operating guidelines and procedures of the relevant regional investment centre, Invesco generally will vote the proxy in accordance therewith. Where this is not the case, Invesco operates a global Invesco proxy advisory committee (IPAC) who will vote the proxy based on the majority vote of its members (see full description of IPAC in the section on Principle 6).

Stewardship Policy

Because this Policy and the operating guidelines and procedures of each regional investment centre are pre-determined and crafted to be in the best economic interest of clients, applying them to vote client proxies should, in most instances, adequately resolve any potential conflict of interest. As an additional safeguard, persons from Invesco's marketing, distribution and other customer-facing functions may not serve on the IPAC.

Personal Conflicts of Interest

A conflict also may exist where an Invesco employee has a known personal relationship with other proponents of proxy proposals, participants in proxy contests, corporate directors or candidates for directorships.

All Invesco personnel with proxy voting responsibilities are required to report any known personal conflicts of interest regarding proxy issues with which they are involved. In such instances, the individual(s) with the conflict will be excluded from the decision making process relating to such issues.

Other Conflicts of Interest

In order to avoid any appearance of a conflict of interest, Invesco will not vote proxies issued by, or related to matters involving, Invesco Ltd. that may be held in client accounts from time to time.

Principle 3

Institutional investors should monitor their investee companies.

Guidance

Effective monitoring is an essential component of stewardship. It should take place regularly and be checked periodically for effectiveness.

When monitoring companies, institutional investors should seek to:

- Keep abreast of the company's performance;
- Keep abreast of developments, both internal and external to the company, that drive the company's value and risks;
- Satisfy themselves that the company's leadership is effective;
- Satisfy themselves that the company's board and committees adhere to the spirit of the UK Corporate Governance Code, including through meetings with the chairman and other board members;
- Consider the quality of the company's reporting; and

- Attend the General Meetings of companies in which they have a major holding, where appropriate and practicable
Institutional investors should consider carefully explanations given for departure from the UK Corporate Governance Code and make reasoned judgements in each case. They should give a timely explanation to the company, in writing where appropriate, and be prepared to enter a

Edgar Filing: Invesco High Income Trust II - Form 486BPOS

dialogue if they do not accept the company's position.

Institutional investors should endeavour to identify at an early stage issues that may result in a significant loss in investment value. If they have concerns, they should seek to ensure that the appropriate members of the investee company's board or management are made aware.

Institutional investors may or may not wish to be made insiders. An institutional investor who may be willing to become an insider should indicate in its stewardship statement the willingness to do so, and the mechanism by which this could be done.

Institutional investors will expect investee companies and their advisers to ensure that information that could affect their ability to deal in the shares of the company concerned is not conveyed to them without their prior agreement.

Invesco Perpetual's Investors' approach:

Through IP's active investment process, fund managers endeavour to establish on a proportionate basis, on-going dialogue with company management and this includes regular meetings. IP will also engage with companies on particular ESG related matters.

Meeting investee companies is a core part of IP's investment process and IP is committed to keeping records of all key engagement activities.

However, meeting company management is not the only method of corporate engagement.

- Our investment teams regularly review company filings and publicly available information to gain a fuller understanding of the relevant company.
- We also attend public meetings that companies call in order to hear from company boards and to discuss topics with other company shareholders on an informal basis.
- Our investment teams also utilise research provided by market participants on the companies that we invest in. This allows us to understand what other participants in the capital markets think about those companies, and helps us develop a more rounded view. IP expenses research costs.
- Our investment teams have access to external corporate governance research that flags corporate non-compliance with best practice corporate governance standards. While we believe this is a helpful guide, we consider each company on a case by case basis and may well support management where we believe this is in our clients' best interest.

This approach, and these methods of gaining information allows us to review the performance of our investee companies on a regular basis, and ask questions and raise concerns promptly.

Invesco Perpetual's approach to the receipt of inside information

Invesco has a global and interconnected asset management business without internal information barriers, which means that the receipt of inside information by one area of Invesco's global business results in all of Invesco's global business being deemed to be in receipt of inside information.

IP acknowledges that the receipt of inside information has the potential to negatively impact other investment teams, our clients and more generally the efficient and fair operation of capital markets.

Stewardship Policy

For these reasons and as a matter of general policy IP does not want to receive inside information.

However, it is acknowledged that as part of the IP investment approach and duty to act in the best interests of our clients, there are circumstances in which IP may receive inside information which are detailed further in relevant procedures and policies.

The IP investment approach is about forming strong, long term relationships with the companies IP invests in. We do this by maintaining regular and direct contact with corporate brokers and the management of companies that they invest in so that we can build real insight into and a deep understanding of such companies, as well as the markets and industry in which they operate.

This, along with the corporate governance responsibilities of being long term asset managers, means participating in meaningful conversations about our investee companies with the company itself and its advisors. This approach provides us with the opportunity to engage in discussions regarding the direction of the strategy of those companies before decisions by the companies have been made. Such engagement is an important aspect of the exercise of our responsibilities as asset manager owners.

Fund managers individually have a key fiduciary responsibility in assessing information received and managing it effectively. In accepting that fund managers may be exposed to receiving inside information, IP have in place policies and procedures to effectively manage this risk. Anyone in receipt of inside information should only disclose to colleagues where necessary or required through the normal course of business and on a need to know basis. As soon as an individual has received inside information and been made an insider, compliance will be notified together with the names of those known to also be in receipt of the information. Compliance will update the Invesco insider list and ensure trading systems are updated to prevent any further trading until the information becomes public. Further details are available upon request.

Principle 4

Institutional investors should establish clear guidelines on when and how they will escalate their activities as a method of protecting and enhancing shareholder value.

Guidance

Institutional investors should set out the circumstances in which they will actively intervene and regularly assess the outcomes of doing so. Intervention should be considered regardless of whether an active or passive investment policy is followed. In addition, being underweight is not, of itself, a reason for not intervening. Instances when institutional investors may want to intervene include, but are not limited to, when they have concerns about the company's strategy, performance, governance, remuneration or approach to risks, including those that may arise from social and environmental matters.

Initial discussions should take place on a confidential basis. However, if companies do not respond constructively when institutional investors intervene, then institutional investors should consider whether to escalate their action, for example, by:

- Holding additional meetings with management specifically to discuss concerns;
- Expressing concerns through the company's advisers;
- Meeting with the chairman or other board members;
- Intervening jointly with other institutions on particular issues;

Edgar Filing: Invesco High Income Trust II - Form 486BPOS

- Making a public statement in advance of General Meetings;
- Submitting resolutions and speaking at General Meetings; and
- Requisitioning a General Meeting, in some cases proposing to change board membership

Invesco Perpetual s Investors approach:

IP s fund managers escalate stewardship activities in several stages. Initially any issues/ concerns would be raised by its fund managers through IP s process of on-going dialogue and company meetings. We may then take a number of actions to escalate our concerns along the lines of a broad escalation hierarchy, via a number of different approaches including (but not limited to) as follows:

- Meeting with non-executive members of company boards to discuss our concerns
- Attendance and active participation at company annual general meetings (AGMs)
- Writing of letters to company boards expressing our concerns and requiring action to be taken
- Votes against management through the use of proxy voting on company resolutions

On occasions where a fund manager believes an issue is significant enough to be escalated, we will ensure the relevant internal resources are made available to support the fund manager in securing the most appropriate outcome for IP s clients.

Stewardship Policy

Examples of issues that would prompt us to escalate our concerns may include:

- Poor examples of corporate governance practice within companies for example where management structures are created that increase conflicts of interest, or leave management control in the hands of dominant shareholders.
- Concerns over remuneration policies at companies where those policies do not align with the ongoing positive growth of the company. This may include us exercising our proxy votes against the reappointment of chairs of the remuneration committees in order to express our concerns.
- Where the strategic direction of companies that we invest in changes significantly, and does not match with the original investment rationale that attracted us to the company in the first place, and where we believe that the new strategy will no longer return the best value to shareholders, and ultimately to our clients.
- Where Board structure or individual composition at an investee company does not meet our standards in terms of the qualifications and expertise required.

We believe that our approach to escalation is consistent with the intent of the Code. However, because we approach each engagement individually we do not see this as a mechanistic process, and therefore our approach will vary based on the individual situations. Through regular and frank meetings with management, we try as much as possible to raise queries and issues before they become areas of concern that require more direct intervention such as votes against management or disinvestment of positions.

Our preference is to engage privately as we believe it better serves the long-term interests of our clients to establish relationships, and a reputation with companies that enhances rather than hinders dialogue.

Principle 5**Institutional investors should be willing to act collectively with other investors where appropriate****Guidance**

At times collaboration with other investors may be the most effective manner in which to engage.

Collective engagement may be most appropriate at times of significant corporate or wider economic stress, or when the risks posed threaten to destroy significant value.

Institutional investors should disclose their policy on collective engagement, which should indicate their readiness to work with other investors through formal and informal groups when this is necessary to achieve their objectives and ensure companies are aware of concerns. The disclosure should also indicate the kinds of circumstances in which the institutional investor would consider participating in collective engagement.

Invesco Perpetual's Investors' approach:

IP is supportive of collective engagement in cases where objectives between parties are mutually agreeable and there are no conflicts of interest.

In taking collaborative action we are cognisant of legal and regulatory requirements, including on market abuse, insider dealing and concert party regulations.

Edgar Filing: Invesco High Income Trust II - Form 486BPOS

The Investment Association (IA), the UK Sustainable Investment and Finance Association (UKSIF) and the UN backed Principles for Responsible Investment (PRI) coordinate and support collective shareholder meetings which can be very effective as they are carried out in a neutral environment. Where we have an interest, we are regular participants in such meetings.

IP are also members of the UK Investor Forum, an organisation set up to create an effective model for collective engagement with UK companies.

All of our engagement activities are undertaken in the best interests of our clients.

Principle 6

Institutional investors should have a clear policy on voting and disclosure of voting activity

Guidance

Institutional investors should seek to vote on all shares held. They should not automatically support the board.

If they have been unable to reach a satisfactory outcome through active dialogue then they should register an abstention or vote against the resolution. In both instances, it is good practice to inform the company in advance of their intention and the reasons why.

Institutional investors should disclose publicly voting records.

Institutional investors should disclose the use made, if any, of proxy voting or other voting advisory services. They should describe the scope of such services, identify the providers and disclose the extent to which they follow, rely upon or use recommendations made by such services.

Institutional investors should disclose their approach to stock lending and recalling lent stock.

Invesco Perpetual s Investors approach:

Invesco views proxy voting as an integral part of its investment management responsibilities and believes that the right to vote proxies should be managed with the same high standards of care and fiduciary duty to its clients as all other elements of the investment process. Invesco s proxy voting philosophy, governance structure and process are designed to ensure that proxy votes are cast in accordance with clients best interests, which Invesco interprets to mean clients best economic interests.

Invesco investment teams vote proxies on behalf of Invesco-sponsored funds and non-fund advisory clients that have explicitly granted Invesco authority in writing to vote proxies on their behalf.

Stewardship Policy

The proxy voting process at Invesco, which is driven by investment professionals, focuses on maximizing long-term value for our clients, protecting clients' rights and promoting governance structures and practices that reinforce the accountability of corporate management and boards of directors to shareholders. Invesco takes a nuanced approach to voting and, therefore, many matters to be voted upon are reviewed on a case by case basis. IP buys research from several providers to make an informed voting decision. Globally we use ISS and Glass Lewis and we use the Investment Association IVIS service for research for UK securities.

IP reports our investment teams' proxy voting records through an easily accessible portal on our website. This allows our clients to see votes that have been cast by our investment professionals on each of our ICVC funds managed by IAML, by company that we are shareholders of, and by resolution, and to easily search for the records that they are interested in. This can be viewed on our website at: www.invescoperpetual.co.uk/proxy-voting-records This data will be updated on an annual basis.

Global Proxy Voting Platform and Administration

Guided by its philosophy that investment teams should manage proxy voting, Invesco has created the Global Invesco Proxy Advisory Committee (Global IPAC). The Global IPAC is a global investments-driven committee which comprises representatives from various investment management teams and Invesco's Head of Global Governance, Policy and Responsible Investment (Head of Global Governance). The Global IPAC provides a forum for investment teams to monitor, understand and discuss key proxy issues and voting trends within the Invesco group. In addition to the Global IPAC, for some clients, third parties (e.g., U.S. mutual fund boards) provide oversight of the proxy process.

The Global IPAC and Invesco's proxy administration and governance team, compliance and legal teams regularly communicate and review this Policy and the operating guidelines and procedures of each regional investment centre to ensure that they remain consistent with clients' best interests, regulatory requirements, governance trends and industry best practices.

Invesco maintains a proprietary global proxy administration platform, supported by the Global Head of Responsible Investment and a dedicated team of internal proxy specialists. This proprietary portal is supported by Institutional Shareholder Services (ISS) to process the underlying voting ballots. The platform streamlines the proxy voting and ballot reconciliation processes, as well as related functions, such as share blocking and managing conflicts of interest issuers. Managing these processes internally, as opposed to relying on third parties, gives Invesco greater quality control, oversight and independence in the proxy administration process.

The platform also includes advanced global reporting and record-keeping capabilities regarding proxy matters that enable Invesco to satisfy client, regulatory and management requirements. Certain investment teams also use the platform to access third-party proxy research.

Non-Votes

In the vast majority of instances, Invesco is able to vote proxies successfully. However, in certain circumstances Invesco may refrain from voting where the economic or other opportunity costs of voting exceeds any anticipated benefits of that proxy proposal. In addition, there may be instances in which Invesco is unable to vote all of its clients' proxies despite using commercially reasonable efforts to do so. For example:

- Invesco may not receive proxy materials from the relevant fund or client custodian with sufficient time and information to make an informed independent voting decision. In such cases, Invesco may choose not to vote, to abstain from voting or to vote in accordance with proxy advisor recommendations
- If the security in question is on loan as part of a securities lending program, Invesco may determine that the benefit to the client of voting a particular proxy is outweighed by the revenue that would be lost by terminating the loan and recalling the securities
- In some countries the exercise of voting rights imposes temporary transfer restrictions on the related securities (share blocking). Invesco generally refrains from voting proxies in share-blocking countries unless Invesco determines that the benefit to the clients of voting a specific proxy outweighs the clients' temporary inability to sell the security

- Some companies require a representative to attend meetings in person in order to vote a proxy. In such cases, Invesco may determine that the costs of sending a representative or signing a power-of-attorney outweigh the benefit of voting a particular proxy

Approach to Stock Lending

IP does not enter into stock lending arrangements.

Stewardship Policy

Principle 7

Institutional investors should report periodically on their stewardship and voting activities

Guidance

Institutional investors should maintain a clear record of their stewardship activities.

Asset managers should regularly account to their clients or beneficiaries as to how they have discharged their responsibilities. Such reports will be likely to comprise qualitative as well as quantitative information. The particular information reported and the format used, should be a matter for agreement between agents and their principals.

Asset owners should report at least annually to those to whom they are accountable on their stewardship policy and its execution.

Transparency is an important feature of effective stewardship. Institutional investors should not, however, be expected to make disclosures that might be counterproductive. Confidentiality in specific situations may well be crucial to achieving a positive outcome.

Asset managers that sign up to this Code should obtain an independent opinion on their engagement and voting processes having regard to an international standard or a UK framework such as AAF 01/062. The existence of such assurance reporting should be publicly disclosed. If requested, clients should be provided access to such assurance reports.

Invesco Perpetual's Investors' approach:

Invesco produces an annual stewardship report which highlights our activities at a global level in terms of ESG activity and in various investment centres.

IP reports our investment teams' proxy voting records through an easily accessible portal on our website. This allows our clients to see votes that have been cast by our investment professionals on each of our ICVC funds managed by IAML, by company that we are shareholders of, and by resolution, and to easily search for the records that they are interested in. This can be viewed on our website at: www.invescoperpetual.co.uk/proxy-voting-results

This data will be updated on an annual basis.

The processes relating to our corporate governance activities are subject to audit by our internal audit function. This function is independent from the front office, and the rest of the business, and provides an independent assessment of business practises directly to Board level.

We believe that this level of scrutiny and oversight provides our clients with the assurance that our policies and practises meet and exceed current industry standards.

We will continue to assess this approach.

Proxy Voting Guidelines

for

Invesco Canada, Ltd.

INVESCO CANADA

PROXY VOTING GUIDELINES

Purpose

The purpose of this document is to describe Invesco Canada Ltd.'s (Invesco Canada) general guidelines for voting proxies received from companies held in the accounts (Accounts) for which it acts as investment fund manager and/or adviser including:

Investment fund manager, including investment funds offered in Canada (the Canadian Funds),

Adviser, including separately managed portfolios (SMPs),

Sub-adviser, including investment funds registered under and governed by the US Investment Company Act of 1940, as amended (the US Funds).

The Accounts referred to above, exclude Accounts that are sub-advised (Sub-Advised Accounts) by affiliated or third party advisers (Sub-Advisers). Proxies for Sub-Advised Accounts will be voted in accordance with the Sub-Adviser's proxy voting policy (which may contain different voting recommendations), provided the policy as a whole is designed with the intention of voting securities in the best interest of the Account; unless the sub-advisory agreement provides otherwise.

Voting rights will not be exercised in accordance with this policy or the Sub-Adviser's proxy policy if the investment management agreement between the client and Invesco Canada governing the SMP provides otherwise.

Compliance will review the proxy voting policies and procedures of any new sub-advisors as part of its due diligence.

Introduction

Invesco Canada has a fiduciary obligation to act in the best long-term economic interest of the Accounts when voting proxies of portfolio companies.

The default is to vote with the recommendation of the company's management.

As a general rule, portfolio managers shall vote against any actions that would:

Reduce the rights or options of shareholders,

Reduce shareholder influence over the board of directors and management,

Reduce the alignment of interests between company management and the shareholders; or

Reduce the value of shareholders investments.

Since Invesco Canada's portfolio managers follow an investment discipline that includes investing in companies that are believed to have strong management teams, the portfolio managers will generally support the management of companies in which they invest, and will accord proper weight to the recommendations of company management. Therefore, in most circumstances, votes will be cast in accordance with the recommendations of company management.

While Invesco Canada's proxy voting guidelines are stated below, the portfolio managers will take into consideration all relevant facts and circumstances (including country specific considerations), and retain the right to vote proxies as deemed appropriate.

These guidelines may be amended from time to time.

Voting rights may not be exercised in situations where:

The securities have been sold subsequent to record date;

Administrative issues prevent voting, or;

Invesco Canada is sub-advising for an unaffiliated third-party and either: (a) the sub-advisory agreement with the unaffiliated third-party does not permit Invesco Canada to vote the securities; or (b) the securities to be voted have been lent out by the unaffiliated third-party.

Conflicts of Interest

When voting proxies, Invesco Canada's portfolio managers assess whether there are material conflicts of interest between Invesco Canada's interests and those of the Account. A potential conflict of interest situation may include where Invesco Canada or an affiliate manages assets for, provides other financial services to, or otherwise has a material business relationship with, a company whose management is soliciting proxies, and failure to vote in favour of management of the company may harm Invesco Canada's relationship with the company. In all situations, the portfolio managers will not take Invesco Canada's relationship with the company into account, and will vote the proxies in the best interest of the Account. To the extent that a portfolio manager has any personal conflict of interest with respect to a company or an issue presented, that portfolio manager should abstain from voting on that company or issue. Portfolio managers are required to report in writing to the relevant Investment Head or CIO any such conflicts of interest and/or attempts by outside parties to improperly influence the voting process. If the portfolio manager in question is the CIO, such conflicts of interest

As of January, 2017

Page 2 of 11

and/or attempts by outside parties to improperly influence the voting process shall be presented in writing to the Chief Compliance Officer. The Global Investments Director (or designate) will report any conflicts of interest to the Independent Review Committee on an annual basis.

I. BOARDS OF DIRECTORS

We believe that a board that has at least a majority of independent directors is integral to good corporate governance. Unless there are restrictions specific to a company's home jurisdiction, key board committees, including audit and compensation committees, should be completely independent.

Voting on Director Nominees in Uncontested Elections

Votes in an uncontested election of directors are evaluated on a case-by-case basis, considering factors that may include:

Long-term financial company performance relative to a market index,

Composition of the board and key board committees,

Nominee's attendance at board meetings,

Nominee's time commitments as a result of serving on other company boards,

Nominee's stock ownership position in the company,

Whether the chairman is also serving as CEO, and

Whether a retired CEO sits on the board.

Voting on Director Nominees in Contested Elections

Votes in a contested election of directors are evaluated on a **case-by-case** basis, considering factors that may include:

Long-term financial performance of the company relative to its industry,

Management's track record,

Background to the proxy contest,

Qualifications of director nominees (both slates),

As of January, 2017

Page 3 of 11

Evaluation of what each side is offering shareholders as well as the likelihood that the proposed objectives and goals can be met, and

Stock ownership positions in the company.

Majority Threshold Voting for Director Elections

We will generally vote **for** proposals that require directors to be elected with an affirmative majority of votes cast unless the relevant portfolio manager believes that the company has adopted formal corporate governance principles that present a meaningful alternative to the majority voting standard.

Separating Chairman and CEO

Shareholder proposals to separate the chairman and CEO positions should be evaluated on a **case-by-case** basis.

While we generally support these proposals, some companies have governance structures in place that can satisfactorily counterbalance a combined position. Voting decisions will take into account factors such as:

Designated lead director, appointed from the ranks of the independent board members with clearly delineated duties;

Majority of independent directors;

All-independent key committees;

Committee chairpersons nominated by the independent directors;

CEO performance is reviewed annually by a committee of independent directors; and

Established governance guidelines.

Majority of Independent Directors

While we generally support proposals asking that a majority of directors be independent, each proposal should be evaluated on a case-by-case basis.

We generally vote for proposals that the board's audit, compensation, and/or nominating committees be composed exclusively of independent directors.

Stock Ownership Requirements

As of January, 2017

Page 4 of 11

We believe that individual directors should be appropriately compensated and motivated to act in the best interests of shareholders. Share ownership by directors better aligns their interests with those of other shareholders. Therefore, we believe that meaningful share ownership by directors is in the best interest of the company.

We generally vote **for** proposals that require a certain percentage of a director's compensation to be in the form of common stock.

Size of Boards of Directors

We believe that the number of directors is important to ensuring the board's effectiveness in maximizing long-term shareholder value. The board must be large enough to allow it to adequately discharge its responsibilities, without being so large that it becomes cumbersome.

While we will prefer a board of no fewer than 5 and no more than 16 members, each situation will be considered on a **case-by-case** basis taking into consideration the specific company circumstances.

Classified or Staggered Boards

In a classified or staggered board, directors are typically elected in two or more classes, serving terms greater than one year.

We prefer the annual election of all directors and will generally **not support** proposals that provide for staggered terms for board members. We recognize that there may be jurisdictions where staggered terms for board members is common practice and, in such situations, we will review the proposals on a **case-by-case** basis.

Director Indemnification and Liability Protection

We recognize that many individuals may be reluctant to serve as corporate directors if they are personally liable for all lawsuits and legal costs. As a result, limitations on directors' liability can benefit the corporation and its shareholders by helping to attract and retain qualified directors while providing recourse to shareholders on areas of misconduct by directors.

We generally vote **for** proposals that limit directors' liability and provide indemnification as long as the arrangements are limited to the director acting honestly and in good faith with a view to the best interests of the company and, in criminal matters, are limited to the director having reasonable grounds for believing the conduct was lawful.

II. AUDITORS

A strong audit process is a requirement for good corporate governance. A significant aspect of the audit process is a strong relationship with a knowledgeable and independent set of auditors.

Ratification of Auditors

We believe a company should limit its relationship with its auditors to the audit engagement, and certain closely related activities that do not, in the aggregate, raise an appearance of impaired independence.

We generally vote **for** the reappointment of the company's auditors unless:

It is not clear that the auditors will be able to fulfill their function;

There is reason to believe the auditors have rendered an opinion that is neither accurate nor indicative of the company's financial position; or

The auditors have a significant professional or personal relationship with the issuer that compromises their independence.

Disclosure of Audit vs. Non-Audit Fees

Understanding the fees earned by the auditors is important for assessing auditor independence. Our support for the re-appointment of the auditors will take into consideration whether the management information circular contains adequate disclosure about the amount and nature of audit vs. non-audit fees.

There may be certain jurisdictions that do not currently require disclosure of audit vs. non-audit fees. In these circumstances, we will generally **support** proposals that call for this disclosure.

III. COMPENSATION PROGRAMS

Appropriately designed equity-based compensation plans, approved by shareholders, can be an effective way to align the interests of long-term shareholders and the interests of management, employees and directors. Plans should not substantially dilute shareholders' ownership interests in the company, provide participants with excessive awards or have objectionable structural features. We will consider each compensation plan in its entirety (including all incentives, awards and other compensation) to determine if the plan provides the right incentives to managers, employees and directors and is reasonable on the whole.

While we generally encourage companies to provide more transparent disclosure related to their compensation programs, the following are specific guidelines dealing with some

of the more common features of these programs (features not specifically itemized below will be considered on a **case-by-case** basis taking into consideration the general principles described above):

Cash Compensation and Severance Packages

We will generally **support** the board's discretion to determine and grant appropriate cash compensation and severance packages.

Executive Compensation (say on pay)

Proposals requesting that companies subject each year's compensation record to a non binding advisory shareholder vote, or so-called say on pay proposals will be evaluated on a **case-by-case** basis.

Equity Based Plans Dilution

Equity compensation plans can increase the number of shares of a company and therefore dilute the value of existing shares. While such plans can be an effective compensation tool in moderation, they can be a concern to shareholders and their cost needs to be closely watched. We assess proposed equity compensation plans on a **case-by-case** basis.

Employee Stock Purchase Plans

We will generally vote **for** the use of employee stock purchase plans to increase company stock ownership by employees, provided that shares purchased under the plan are acquired for no less than 85% of their market value. It is recognized that country specific circumstances may exist (e.g. tax issues) that require proposals to be reviewed on a **case-by-case** basis.

Loans to Employees

We will vote **against** the corporation making loans to employees to allow employees to pay for stock or stock options. It is recognized that country specific circumstances may exist that require proposals to be reviewed on a **case-by-case** basis.

Stock Option Plans Board Discretion

We will vote **against** stock option plans that give the board broad discretion in setting the terms and conditions of the programs. Such programs should be submitted with detail and be reasonable in the circumstances regarding their cost, scope, frequency and schedule for exercising the options.

As of January, 2017

Page 7 of 11

Stock Option Plans Inappropriate Features

We will generally vote **against** plans that have any of the following structural features:

ability to re-price underwater options without shareholder approval,

ability to issue options with an exercise price below the stock's current market price,

ability to issue reload options, or

automatic share replenishment (evergreen) features.

Stock Option Plans Director Eligibility

While we prefer stock ownership by directors, we will **support** stock option plans for directors as long as the terms and conditions of director options are clearly defined

Stock Option Plans Repricing

We will vote **for** proposals to re-price options if there is a value-for-value (rather than a share-for-share) exchange.

Stock Option Plans Vesting

We will vote **against** stock option plans that are 100% vested when granted.

Stock Option Plans Authorized Allocations

We will generally vote **against** stock option plans that authorize allocation of 25% or more of the available options to any one individual.

Stock Option Plans Change in Control Provisions

We will vote **against** stock option plans with change in control provisions that allow option holders to receive more for their options than shareholders would receive for their shares.

IV. CORPORATE MATTERS

We will review proposals relating to changes to capital structure and restructuring on a case-by-case basis, taking into consideration the impact of the changes on corporate governance and shareholder rights, anticipated financial and operating benefits, portfolio manager views, level of dilution, and a company's industry and performance in terms of shareholder returns.

Common Stock Authorization

We will review proposals to increase the number of shares of common stock authorized for issue on a **case-by-case** basis.

Dual Class Share Structures

Dual class share structures involve a second class of common stock with either superior or inferior voting rights to those of another class of stock.

We will generally vote **against** proposals to create or extend dual class share structures where classes have different voting rights.

Stock Splits

We will vote **for** proposals to increase common share authorization for a stock split, provided that the increase in authorized shares would not result in excessive dilution given a company's industry and performance in terms of shareholder returns.

Reverse Stock Splits

We will vote **for** proposals to implement a reverse stock split.

Share Repurchase Programs

We will vote **against** proposals to institute open-market share repurchase plans if all shareholders do not participate on an equal basis.

Reincorporation

Reincorporation involves re-establishing the company in a different legal jurisdiction.

We will generally vote **for** proposals to reincorporate the company provided that the board and management have demonstrated sound financial or business reasons for the move. Proposals to reincorporate will generally **not be supported** if solely as part of an anti-takeover defense or as a way to limit directors' liability.

Mergers & Acquisitions

We will vote **for** merger & acquisition proposals that the relevant portfolio managers believe, based on their review of the materials:

will result in financial and operating benefits,

have a fair offer price,

As of January, 2017

Page 9 of 11

have favourable prospects for the combined companies, and

will not have a negative impact on corporate governance or shareholder rights.

V. SOCIAL RESPONSIBILITY

We recognize that to effectively manage a corporation, directors and management must consider not only the interests of shareholders, but the interests of employees, customers, suppliers, and creditors, among others.

We believe that companies and their boards must give careful consideration to social responsibility issues in order to enhance long-term shareholder value.

We **support** efforts by companies to develop policies and practices that consider social responsibility issues related to their businesses.

VI. SHAREHOLDER PROPOSALS

Shareholder proposals can be extremely complex, and the impact on the interests of all stakeholders can rarely be anticipated with a high degree of confidence. As a result, shareholder proposals will be reviewed on a **case-by-case** basis with consideration of factors such as:

the proposal's impact on the company's short-term and long-term share value,

its effect on the company's reputation,

the economic effect of the proposal,

industry and regional norms in which the company operates,

the company's overall corporate governance provisions, and

the reasonableness of the request.

We will generally **support** shareholder proposals that require additional disclosure regarding corporate responsibility issues where the relevant portfolio manager believes:

Edgar Filing: Invesco High Income Trust II - Form 486BPOS

the company has failed to adequately address these issues with shareholders,

there is information to suggest that a company follows procedures that are not in compliance with applicable regulations, or

As of January, 2017

Page 10 of 11

the company fails to provide a level of disclosure that is comparable to industry peers or generally accepted standards. We will generally **not support** shareholder proposals that place arbitrary or artificial constraints on the board, management or the company.

Ordinary Business Practices

We will generally **support** the board's discretion regarding shareholder proposals that involve ordinary business practices.

Protection of Shareholder Rights

We will generally vote **for** shareholder proposals that are designed to protect shareholder rights if the company's corporate governance standards indicate that such additional protections are warranted.

Barriers to Shareholder Action

We will generally vote **for** proposals to lower barriers to shareholder action.

Shareholder Rights Plans

We will generally vote **for** proposals to subject shareholder rights plans to a shareholder vote.

VII. OTHER

We will vote **against** or **abstain** on proposals that may authorize the company to conduct any other business that is not described in the proxy statement or where the proxy materials lack sufficient information upon which to base an informed decision.

Reimbursement of Proxy Solicitation Expenses

Decisions to provide reimbursement for dissidents waging a proxy contest are made on a **case-by-case** basis.

As of January, 2017

Page 11 of 11

Proxy Voting Guidelines

for

Invesco Asset Management (Japan) Limited

Basic Policy on Proxy Voting

We vote proxies for the purpose of seeking to maximize the interests of our clients (investors) and beneficiaries over time, acknowledging the importance of corporate governance, based on fiduciary duties to our clients (investors) and beneficiaries. We do not vote proxies for the interests of ourselves and any third party other than clients (investors) and beneficiaries. The interests of clients (investors) and beneficiaries is to expand the corporate value or the economic interest of shareholders or the preventing of damage thereto. Proxy voting is an integral part of our stewardship activities and we make voting decisions considering whether or not the proposal would contribute to the corporate value expansion and sustainable growth.

In order to vote proxies adequately we have established the Corporate Governance Committee and developed these Proxy Voting Guidelines to oversee control of the decision making process concerning proxy voting. While we may seek advice from an external service provider based on our own guidelines, our investment professionals make voting decisions in principle, based on our proxy voting guidelines, taking into account whether or not they contribute to shareholder value enhancement of the subject company.

Responsible proxy voting and constructive dialogue with investee companies are important components of stewardship activities. While the proxy voting guidelines are principles for our making voting decisions, depending on the proposals, we may make special decisions to maximize the interests of clients (investors) and beneficiaries, through the establishment of constructive dialogue with the investee companies. In such case, approval of the Corporate Governance Committee shall be obtained.

The Corporate Governance Committee is consisted of members including Director in charge of the Investment Division as the chair, Head of Compliance, Corporate Governance Officer, investment professionals nominated by the chair and persons in charge at the Operations Department.

We have developed the Conflict of Interest Control Policy and, even in the situation where any conflict of interest is likely to arise, we work to control conflict of interest to protect the interests of clients (investors) and beneficiaries. The Compliance Department is responsible for overseeing company-wide control of conflict of interest. The Compliance Department is independent from investment and marketing divisions, and shall not receive any command or order with respect to the matters concerning compliance with the laws and regulations including the matters concerning conflict of interest from investment and marketing divisions.

Proxy Voting Guidelines

1. Profit Allocation and Dividends

We decide how to vote on the proposals seeking approval for profit allocation and dividends, taking into account the financial conditions and business performance of the subject company, and the economic interest of shareholders, etc.

Taking into account the status of capital adequacy and business strategies, etc. of the subject company, if the total payout ratio including dividends and share buybacks is significantly low, we consider to vote against the proposals, unless reasonable explanation is given by the company.

With respect to the company where profit allocation is determined by the board of directors, taking into account the status of capital adequacy and business strategies, etc. of the subject company, if the total payout ratio including dividends and share buybacks is significantly low, we consider to vote against reelection of directors, unless reasonable explanation is given by the company.

Taking into account the status of capital adequacy and business strategies, etc. of the subject company, if the total payout ratio including dividends and share buybacks is significantly low, we consider to vote for the shareholder proposals that require more payout to shareholders.

2. Election of Directors

We decide how to vote on the proposals concerning election of directors, taking into account independence, competence and existence of anti-social acts of director candidates, etc. We decide how to vote on reelection of director candidates, taking into account their approach to corporate governance and accountability during their tenure, business performance of the company and existence of anti-social acts of the company, etc. in addition to the above factors.

Directors should make efforts to continuously gain knowledge and skills from time to time to fulfill the important role and responsibilities in governance of the subject company. Companies are also required to provide sufficient opportunities of such training.

Independent outside directors are expected to play a significant role such as to secure the interest of minority shareholders through activities based on their insights to increase the corporate value of the subject company. It is desirable to enhance the board's governance function with independent outside directors accounting for the majority of the board. However,

As of April 30, 2017

given the challenge to secure competent candidates, we also recognize that, under the current conditions, it is difficult for all the companies, irrespective of their size, to deploy a majority of the board with independent outside directors.

(1) Independence

We generally vote for election of outside directors; provided, however, that we vote against the candidate who is not regarded as independent from the subject company. With respect to independence, it is desirable that the subject company discloses numerical standard which should support our decision.

We judge independence based on the independence criteria stipulated by the stock exchange, with focus on whether independence is substantially secured.

We regard the outside director with significantly long tenure as non-independent, and vote against reelection of such outside director.

In the case where the subject company is the company with a three committee board structure or the company with a board with audit committee structure, we judge independence of outside director candidates who become members of the audit committee or the similar committee based on the same independence criteria for election of statutory auditors in principle.

In the case where the subject company is the company with a three committee board structure or the company with a board with audit committee structure, we generally consider to vote against the director candidates who are top executives of the subject company, if independent outside directors of the subject company account for less than 1/3 of the board after the shareholders meeting.

In the case where the subject company is the company with a statutory auditor structure, we generally vote against the director candidates who are top executives, unless there are at least two outside directors who are independent from the subject company after the shareholders meeting.

In the case where the subject company has a parent company, we generally consider to vote against the director candidates who are top executives of the subject company, if outside directors who are independent from the subject company account for less than half of the board after the shareholders meeting.

(2) Attendance rate

All members are expected to attend the board meetings and each committees in principle, and companies are generally obligated to facilitate all members to attend meetings. We generally vote against reelection of the director candidate who attended less than 75% of

the board meetings or the respective committee.

We take into account not only the number of attendance but reasons for nomination and substantial contribution, if disclosed.

(3) Business performance of the company

We consider voting against reelection of director candidates, if the subject company made a loss for the three consecutive year during their tenure.

We consider voting against reelection of director candidates, if it is judged that the business performance of the subject company is significantly behind peers in the same industry during their tenure.

We consider voting against the directors who are top executives, if business strategies that enable the corporate value enhancement and sustainable growth are not demonstrated and no constructive dialogue is conducted, with respect to capital efficiency including return on capital.

(4) Anti-social acts of the company

If it is judged that there has been any corporate scandal that has significant social effects and has impaired, or is likely to impair, the shareholder value during the tenure, we shall conduct sufficient dialogue with the subject company on the background and subsequent resolutions of the scandal. Based on the dialogue and taking into account impact on the shareholder value, we decide how to vote on reelection of the director candidates who are top executives, directors in charge of those cases and members of the audit committee or the similar committee.

With respect to domestic scandals, if the company has received administrative disposition on cartel or bid-rigging, we consider to vote against reelection of the director candidates who are top executives, directors in charge and members of the audit committee or the similar committee, at the time when the disposition is determined by the Fair Trade Commission, etc. If the final disposition is subsequently determined on appeal or complaint, we do not vote against reelection again at such time. We decide case-by-case with respect to an order for compensation in a civil case or disposition by the Consumer Affairs Agency and administrative disposition imposed overseas.

With respect to administrative disposition imposed on a subsidiary or affiliate, if the subsidiary or affiliate is unlisted, we consider to vote against reelection of the director candidates who are top executives, directors in charge and members of the audit committee or the similar committee of the holding company or the parent company. If the subsidiary or affiliate is listed, we consider to vote against reelection of the

As of April 30, 2017

director candidates who are top executives, directors in charge and members of the audit committee or the similar committee of the subsidiary or affiliate and the parent company; provided, however, that we decide case-by-case depending on importance of the disposition on the subsidiary or affiliate, its impact on business performance of the holding company or parent company.

With respect to a scandal of an individual employee, if such scandal has impaired, or is likely to impair the shareholder value, and it is judged that the subject company should assume responsibility as a manager, we consider to vote against reelection of the director candidates who are top executives, directors in charge and members of the audit committee or the similar committee.

We consider to vote against reelection of director candidates, if the subject company has committed window-dressing and inadequate accounting activities during their tenure.

(5) Acts against the interest of shareholders

If the company has increased capital through a third-party allotment that is excessively dilutive without resolution by the shareholders meeting, we consider to vote against reelection of director candidates, particularly the director candidates who are top executives.

If the company has increased capital through a large-scale public offering without reasonable explanation, we consider to vote against reelection of director candidates, particularly the director candidates who are top executives.

If the shareholder proposal that is judged desirable for minority shareholders has received the majority support but the company does not implement such proposal or make the similar proposal as the company proposal at the shareholders meeting in the following year, we consider voting against the director candidates who are top executives.

(6) Other

If information of a director candidate is not fully disclosed, we generally vote against such director candidate.

3. Composition of Board of Directors, etc.

Depending on the size of companies, etc., we believe that a three committee board structure is desirable to achieve better governance as a listed company. Even for a company with a statutory auditor structure or a company with a board with audit committee, it is also desirable to voluntarily deploy the nomination committee, compensation committee and other necessary committees. It is also desirable that the chair of the board of directors is an independent outside director. We believe that composition of the highly transparent board of directors secures

As of April 30, 2017

transparency of the management and contributes to a persistent increase in the enterprise value. It is also desirable that the third-party assessment of the board of directors is disclosed.

We are concerned about the retired director assuming a consulting, advisory or other similar position which is likely to have negative impact on greater transparency and decision making of the board of directors. If such position or a person assuming such position exists, it is desirable that its existence, expected role and effects or compensation and other treatment for such position are fully disclosed.

(1) Number of members and change in constituents of the board of directors

We decide how to vote on the proposals concerning the number of members and change in constituents of the board of directors, by comparing with the current structure and taking into account impact on the subject company and the economic interest of shareholders.

We favorably consider a decrease in the number of directors other than outside directors, but in the case of an increase in the number of directors other than outside directors, unless reasons are clearly and reasonably stated, we consider to vote against reelection of the director candidates who are top executives.

If there are too many board members and we are concerned that swift decision making may be hindered, we vote against the director candidates who are top executives.

We favorably consider an increase in the number of outside directors, but in the case of a decrease in the number of outside directors, unless reasons are clearly and reasonably stated, we consider to vote against reelection of the director candidates who are top executives.

(2) Procedures for election of directors, scope of responsibilities of directors, etc.

We decide how to vote on the proposals concerning a change in procedures for election of directors, by comparing with the current procedures and taking into account reasonableness of such change, etc.

We generally vote against the proposals that reduce responsibility of directors for monetary damages due to their breach of duty of care of a prudent manager.

Responsibilities of the board of directors include proper supervision over the succession plan for top executives. The nomination committee at the company with a three-committee board structure, or the nomination committee that should be voluntarily deployed by the company with a different structure, should provide proper supervision over fostering and

election of successors with secured transparency. It is desirable that an independent outside director serves as the chair of the nomination committee. If the process is judged to significantly lack transparency and reasonableness, we consider to vote against the director candidates who are top executives.

4. Election of Statutory Auditors

We decide how to vote on the proposals concerning election of statutory auditors, taking into account independence, competence and existence of anti-social acts of auditor candidates, etc. We decide how to vote on reelection of statutory auditor candidates, taking into account their approach to corporate governance and accountability during their tenure, existence of anti-social acts of the company, etc. in addition to the above factors.

Statutory auditors and directors who are members of the audit committee or the similar committee are required to have deep specialized knowledge of accounting and laws and regulations, and should make efforts to continuously gain knowledge and skills from time to time to fulfill the important role and responsibilities in governance of the subject company. Companies are also required to provide sufficient opportunities of such training.

(1) Independence

We generally vote against non-independent outside statutory auditors.

The person who has no relationship with the subject company other than being elected as a statutory auditor is regarded as independent.

We regard the outside statutory auditor with significantly long tenure as non-independent, and vote against reelection of such outside statutory auditor.

(2) Attendance rate

All statutory auditors are expected to attend meetings of the board of directors or the board of statutory auditors in principle, and companies are generally obligated to facilitate all statutory auditors to attend meetings. We generally vote against reelection of the statutory auditor candidate who attended less than 75% of meetings of the board of directors or the board of statutory auditors.

We take into account not only the number of attendance but reasons for nomination and substantial contribution, if disclosed.

(3) Accountability

If there are material concerns about the provided auditor report or auditing procedures, or if

the matters to be disclosed are not fully disclosed, we vote against reelection of statutory auditor candidates.

(4) Anti-social acts of the company

If it is judged that there has been any corporate scandal that has significant social effects and has impaired, or is likely to impair, the shareholder value during the tenure, we shall conduct sufficient engagement with the subject company on the background and subsequent resolutions of the scandal. Based on the engagement and taking into account impact on the shareholder value, we decide how to vote on reelection of statutory auditor candidates.

With respect to domestic scandals, if the company has received administrative disposition on cartel or bid-rigging, we consider to vote against reelection of statutory auditor candidates, at the time when the disposition is determined by the Fair Trade Commission, etc. If the final disposition is subsequently determined on appeal or complaint, we do not vote against reelection again at such time. We decide case-by-case with respect to an order for compensation in a civil case or disposition by the Consumer Affairs Agency and administrative disposition imposed overseas.

With respect to administrative disposition imposed on a subsidiary or affiliate, if the subsidiary or affiliate is unlisted, we consider to vote against reelection of statutory auditor candidates of the holding company or the parent company. If the subsidiary or affiliate is listed, we consider to vote against reelection of statutory auditor candidates of the subsidiary or affiliate and the holding company; provided, however, that we decide case-by-case depending on importance of the disposition on the subsidiary or affiliate, its impact on business performance of the holding company or parent company.

With respect to a scandal of an individual employee, if such scandal has impaired, or is likely to impair the shareholder value, and it is judged that the subject company should assume responsibility as a manager, we consider to vote against reelection of statutory auditor candidates.

We consider voting against reelection of statutory auditor candidates, if the subject company has committed window-dressing and inadequate accounting activities during their tenure.

5. Composition of Board of Statutory Auditors

We decide how to vote on the proposals concerning the number of members and change in constituents of the board of statutory auditors, by comparing with the current structure and taking into account impact on the subject company and the economic interest of shareholders.

We favorably consider an increase in the number of statutory auditors, but in the case of a decrease in the number of statutory auditors, unless reasons are clearly and reasonably stated, we consider to vote against reelection of the director candidates who are top executives.

6. Election and Removal of Accounting Auditors

We decide how to vote on the proposals concerning election and removal of accounting auditors, taking into account competence of candidates and the level of costs for the accounting audit, etc.

If it is judged that there are following problems with the accounting audit services in the subject company, and the accounting auditor in question is not removed but reelected, we generally vote against reelection of the statutory auditor candidates and the director candidates who are members of the audit committee or the similar committee:

It is judged that the accounting auditor has expressed incorrect opinions on financial conditions;

In the case where there are concerns on the financial statements, the matters to be disclosed are not fully disclosed;

In the case where the accounting auditor has a contract of non-accounting audit services with the subject company, it is judged that such non-accounting audit services are recognized to have conflict of interest with accounting audit services;

In the case where excessive accounting audit costs are paid;

It is judged that gross fraudulence or negligence of the accounting auditor is recognized.

If it is judged that there are problems with accounting audit services in another company, and the accounting auditor in question becomes a candidate for election or is not removed but reelected, we decide how to vote, giving full consideration to impact on the enterprise value of the subject company.

We generally vote against the proposals concerning a change in accounting auditors, if difference in views about the accounting principles between the previous accounting auditor and the subject company is judged to be the reason for such change.

7. Compensation and Bonuses for Directors, Statutory Auditors and Employees

(1) Compensation and bonuses for Directors

In determining compensation and bonuses for directors, it is desirable to increase the

As of April 30, 2017

proportion of stocks in compensation and bonuses, taking into account whether the performance-based compensation structure is developed, whether transparency is fully secured such as disclosure of an index or formula as a basis for calculation, and impact on shareholders such as dilution. The compensation committee at the company with a three-committee board structure, or the compensation committee that should be voluntarily deployed by the company with a different structure, should ensure the compensation structure with secured transparency. It is desirable that an independent outside director serves as the chair of the compensation committee.

We consider to vote against the proposals seeking approval for compensation and bonuses in the following cases:

where negative correlation is seen between the business performance of the subject company and compensation and bonuses;

where there exist problematic system and practices;

where the aggregate amount of compensation and bonuses is not disclosed;

where mismanagement is clear as shown by share price erosion or and significant deterioration in profit;

where the person who is judged to be responsible for acts against the interest of shareholders is among recipients of compensation and bonuses.

We generally vote for the proposals requesting disclosure of compensation and bonuses of individual directors.

If any measures are implemented to secure transparency of the system other than individual disclosure, such measures are taken into account.

If there is no proposal seeking approval for compensation and bonuses and the system is not clear, we consider to vote against election of the director candidates who are top executives,

We generally vote against bonuses for statutory auditors.
