“Sadia S.A had a satisfactory operating performance in the third quarter of 2008. Gross operating revenue grew 28.3% and the volume sold increased by 16.2% over the same period in 2007. In view of the good results, the Company decided to maintain the EBITDA margin guidance of 11% to 12% for 2008, with revenues of US\$12.0 billion. Our projection for the volume performance in both markets is a growth between 12% and 14%. The strengthened cash, the heated demand in the domestic and international markets, the stability of the price of grains and the operational startup of four expansion projects and of two new units signal a promising outlook for the Company's performance for the end of this year and for the beginning of 2009. Out of the total investments in 2008, 92% have already been invested. By December 2008, the Company will have invested R\$ 1.6 billion, the largest investment plan of its history. When fully operational, these investments shall generate an additional income of approximately R\$ 4 billion per year, as from 2010. Pursuant to good corporate governance practices, the Company disclosed, on a timely basis, financial losses resulting from the settlement of certain transactions with foreign exchange derivatives which exceeded the limits established by our internal policy. Eventually, due to the change in the world scenario, the Company will review carefully the investments foreseen for the oncoming years. We continue to be confident in our capacity to grow in a sustainable way, delivering the best results and the best products to our consumers.”

GROSS OPERATING INCOME R\$ million

Gross operating income in the third quarter of 2008 (3Q08) reached R\$ 3.2 billion, 28.3% higher than that reached in the same period in 2007, and, for the nine months of 2008 (9M08), it totaled R\$ 8.7 billion, 25.2% higher when compared with the same period in 2007. The rise in prices charged by the Company in all of its segments, as well as the satisfactory performance of the poultry volume sold in the international market and of the processed products in the domestic market, was fundamental to achieve that result.

Revenues from the domestic market increased by 29.2% in the quarter, representing 53.8% of the total income and exports accounted for 46.2% of total income, corresponding to an increase of 27.3%.

The total volume sold in the quarter was 16.2% higher in relation to the same period in 2007: the domestic market grew 18.5% and the international market grew 14.2%. In the 9M08, Sadia total volume of sales added up to 1.7 million tons, representing a growth of 11.3% over 9M07.

Domestic Market

Sales in the domestic market continue to be strong, with a volume growth of 18.5% in the 3Q08 and of 13.3% in the 9M08 when compared to the same period of 2007. Revenues of R\$ 1.7 billion in the 3Q08 and R\$ 4.6 billion in the 9M08 represented still higher growths, from 29.2% and 24.2%, respectively, in relation to 2007. The average price increased 11.8% and 11.2% in the same periods.

The segment of processed products continues to be the most representative of the domestic market, in which the volume sold was 18.2% higher in the quarter and 14.1% higher in the year-to-date figure, totaling 244.3 thousand in the quarter and 673,4 thousand tons in the year-to-date figure. The continuous growth of this segment reflects the increase in the income of the Brazilian population and consumer preference for processed products. The average price also grew in these periods, 10.4% and 9.8%, respectively, as a result of commercial actions, brand strength and company efforts to pass on the increases in the cost of the main inputs. Income from processed products rose from 30.3% in the 3Q08 and 25.4% in the 9M08, when compared to the 2007 figures, accounting for about 81% of gross income from the domestic market.

Poultry volumes sold totaled 30.5 thousand tons in the 3Q08 and 81.7 thousand tons in the 9M08, higher by 13.8% and lower by 1.5%, respectively, when compared to the same periods in 2007. Income from this segment, on the other hand, had a growth of 30.6% in the quarter and of 10.5% in the year-to-date figures in relation to 2007. This evolution in income resulted from the increase in sales of chicken cuts, the price of which is higher than the price of the whole chicken. The average price increased by 14.9% in the quarter and 12.1% in the year-to-date figures.

The volume sold of the pork segment totaled 13.1 thousand tons in the quarter and 35.0 thousand tons in the year-to-date figures, 25.0% and 12.9% higher than the same periods of 2007. Income from this segment had a still better performance, with a growth of 77.9% in the quarter and of 53.5% in the year-to-date total, as a result of the increase of 42.5% and of 35.9% in the average price of this protein due to low availability of pork in the market.

The sales volume of the beef segment in the domestic market rose 62.6% in the 3Q08 and 136.9% in the 9M08, as a result of the redirecting of volumes to this market due to the continuation of the European embargo on the Brazilian beef. Income from this segment was 56.4% higher than that in the 3Q08 and 127.2% higher than in the 9M08, and totaled R\$ 26.1 million in the quarter and R\$ 77.6 million in the year to date total.

The volume sold totaled 260.6 thousand tons representing a growth of 17.3% in relation to the same period in 2007. The average price charged in the period increased by 12.6% in reais and 23.8% in U.S. dollars. The increased price average in reais in the 9M08 was 17.8%, representing an increase of 35.3% in U.S. dollars.

Edgar Filing: SADIA S.A. - Form 6-K

The segment of processed products accounted for 13.6% of the export revenues in the quarter. Income totaled R\$198.0 million in the 3Q08, a growth of 73.7% in relation to 3Q07, while physical sales of this segment totaled 39.4 thousand tons, a growth of 34.2%. The most representative products of this segment, as to income, were baked, grilled and breaded products. In the quarterly comparison, the average price increased by 29.6% in reais and 42.5% in U.S. dollars. Income from exports in this segment had a growth of 42.8% in the 9M08 when compared to the same period in 2007, a year-to-date figure of R\$ 478,7 million, representing 11.7% of total sales. The volume sold totaled 98.5 thousand tons in the 9M08, an increase of 20.2%. The increase in average prices contributed to the evolution of income, since it was 18.8% higher in reais and 36.4% in U.S. dollars.

The pork segment had an income growth of 15.9% in relation to the 3Q07 totaling R\$ 133.4 million, with a fall in volumes of 20.8% to 22.7 thousand tons and an evolution of 46.3% in the average in reais in the 3Q08, representing an increase in U.S. dollars of 60.8%. In the 9M08, income rose 13.5%, to R\$ 389.8 million, and prices increased 27.2% in reais and 46.0% in U.S. dollars while the volume had a reduction of 10.8%, to 71.3 thousand tons. This fall in volumes, as much in the 3Q08 as in the 9M08, occurred due to the redirecting of this protein to the production of processed products in the domestic market, to take advantage of the heated demand for these products.

Beef exports generated an income of R\$ 41.3 million in the quarter, a reduction of 10.3%; physical sales dropped 22.5%, to 6.2 thousand tons. Beef export prices increased 16.0% in the 3Q08 in reais, representing an increase of 27.5% in U.S. dollars. In the 9M08, revenues totaled R\$168.7 million, a drop of 19.1% and volumes 29.0% lower than those in 9M07. Beef export prices increased by 13.9% in reais, representing an increase of 30.8% in U.S. dollar. Beef sales to the international market continue to be affected by the European embargo on the Brazilian beef. In the 3Q08, those barriers started to be gradually removed.

FINANCIAL RESULT

At September 30, the Company had derivative financial instruments that were traded by the treasury department based on the assumption of the appreciation/maintenance of the Real against the US dollar. These instruments contained intrinsic risks, assumed as a result of the stability and the low probability of devaluation of the Real against the US dollar.

As disclosed in a material fact on September 25, 2008, the treasury department exceeded the limits of the financial policy. As soon as it became aware of this fact the Board of directors determined that the necessary measures to reduce exposure were taken. With the aim of reducing the exposure related to these operations, the Board of Directors decided to settle part of these operations, making a loss in the amount R\$ 544.5 million, recorded under exchange variation on derivative instruments.
