ANGLOGOLD ASHANTI LIMITED - ANNUAL FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2017

OUR
MISSION

To create value for our shareholders, our employees and our business and social partners through safel y and responsibly exploring, mining and marketing our products. Our primary focus is gold, but we will pursue value creating opportunities in other minerals where we can leverage our existing assets, skills and experience to enhance the delivery of value.

Safety is our first value.

We place people first and correspondingly put the highest priority on safe and healthy practices and systems of work. We are responsible for seeking out new and innovative ways to prevent injury and illness in our business and to ensure that our workplaces are free of occupational injury and illness. We live each day for each other and use our collective commitment, talents, resources and systems to deliver on our most important commitment... to care.

We treat each other with dignity
and respect.

We believe that individuals who are treated with respect and who are entrusted to take responsibility, respond by giving their best. We seek to preserve people's dignity, their sense of self-worth in all our interactions, respecting them for who they are and valuing the unique contribution that they can make to our business success. We are honest with ourselves and others, and we deal ethically with all of our business and social partners.

We value diversity.

We aim to be a global leader with the right people for the right jobs. We promote inclusion and team work, deriving benefit from the rich diversity of the cultures, ideas, experiences and skills that each employee brings to the business.

We are accountable for our actions and undertake to deliver on our commitments.
We are focused on delivering results and we do what we say we will do. We accept responsibility and hold ourselves accountable for our work, our behaviour, our ethics and our actions. We aim to deliver high performance outcomes and undertake to deliver on our commitments to our colleagues, business and social partners, and our investors.
We want the communities and societies in which we operate to be better off for AngloGold Ashanti having been there.
We uphold and promote fundamental human rights where we do business. We contribute to building productive, respectful and mutually beneficial partnerships in the communities in which we operate. We aim to leave a legacy of enduring value.
We respect the environment.
We are committed to continually improving our processes in order to prevent pollution, minimise waste, increase our carbon efficiency and make efficient use of natural resources. We will develop innovative solutions to mitigate environmental and climate risks.

Forward-looking statements
Certain statements contained in this document, other than statements of historical fact, including, without limitation, those concerning the economic outlook for the gold mining industry, expectations regarding gold prices, production, total cash costs, all-in sustaining costs, all-in costs, cost savings and other operating results, productivity improvements, growth prospects and outlook of AngloGold Ashanti's operations, individually or in the aggregate, including the achievement of project milestones, commencement and completion of commercial operations of certain of AngloGold Ashanti's exploration and production projects and the completion of acquisitions, dispositions or joint venture transactions, AngloGold Ashanti's liquidity and capital resources and capital expenditures and the outcome and consequence of any potential or pending litigation or regulatory proceedings or environmental health and safety issues, are forward-looking statements regarding AngloGold Ashanti's operations, economic performance and financial condition. These forward-looking statements or forecasts involve known and unknown risks, uncertainties and other factors that may cause AngloGold Ashanti's actual results, performance or achievements to differ materially from the anticipated results, performance or achievements expressed or implied in these forward-looking statements. Although AngloGold Ashanti believes that the expectations reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements as a result of, among other factors, changes in economic, social and political and market conditions, the success of business and operating initiatives, changes in the regulatory environment and other government actions, including environmental approvals, fluctuations in gold prices and exchange rates, the outcome of pending or future litigation proceedings, and business and operational risk management. For a discussion of such risk factors, refer to AngloGold Ashanti's annual reports on Form 20-F filed with the United States Securities and Exchange Commission. These factors are not necessarily all of the important factors that could cause AngloGold Ashanti's actual results to differ materially from those expressed in any forward-looking statements. Other unknown or unpredictable factors could also have material adverse effects on future results. Consequently, readers are cautioned not to place undue reliance on forward-looking statements. AngloGold Ashanti undertakes no obligation to

update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events, except to the extent required by applicable law. All subsequent written or oral forward-looking statements attributable to AngloGold Ashanti or any person acting on its behalf are qualified by the cautionary statements herein.

Non-GAAP financial measures

This communication may contain certain "Non GAAP" financial measures. AngloGold Ashanti utilises certain Non-GAAP performance measures

-

and ratios in managing its business. Non-GAAP financial measures should be viewed in addition to, and not as an alternative for, the reported operating results or cash flow from operations or any other measures of performance prepared in accordance with IFRS. In addition, the presentation of these measures may not be comparable to similarly titled measures other companies may use. AngloGold Ashanti posts information that is important to investors on the main page of its website at www.anglogoldashanti.com and under the "Investors" tab on the main page. This information is updated regularly. Investors should visit this website to obtain important information about AngloGold Ashanti.

4
AUDIT AND RISK COMMITTEE – CHAIRMAN'S
LETTER

It is my pleasure to present, on behalf of the Audit and Risk Committee, an overview of the activities this committee performed
during the 2017 financial year. This report is presented in accordance with the company's Memorandum of Incorporation (MOI),
the requirements of the Companies Act, No. 71 of 2008, as amended, (the Companies Act), Principle 8, 15 and the
recommended practices contained in the fourth King Report on Governance for South Africa (King IV), as well as the Audit and
Risk Committee's formally approved charter, which is in line with the JSE Listings Requirements and is reviewed and approved
by the board on an annual basis.

ROLE AND FOCUS

The Audit and Risk Committee is an independent statutory committee and all members were appointed by the AngloGold Ashanti
shareholders at the Annual General Meeting (AGM) held on 16 May 2017. The Audit and Risk Committee has decision-making
authority with regards to its statutory duties and is accountable in this regard to both the shareholders and the board of AngloGold
Ashanti.
It is the Audit and Risk Committee's principal regulatory duty to oversee the integrity of the group's internal control environment
and to ensure that financial statements comply with International Financial Reporting Standards (IFRS) and fairly present the
financial position of the group and company and the results of their operations.

Management has established and maintains internal controls and procedures, which are reviewed by the Audit and Risk
Committee and reported on through regular reports to the board. These internal controls and procedures are designed to identify
and manage, rather than eliminate, the risk of control malfunction and aim to provide reasonable but not absolute assurance that
these risks are well managed and that material misstatements and/or loss will not materialise.

The board assumes ultimate responsibility for the functions performed by the Audit and Risk Committee, relating to the
safeguarding of assets, accounting systems and practices, internal control processes and preparation of financial statements in
compliance with all applicable legal and regulatory requirements and accounting standards.

COMPOSITION AND DUTIES

The Audit and Risk Committee comprises six independent non-executive directors who collectively possess the skills and
knowledge to oversee and assess the strategies and processes developed and implemented by management to manage the
business within a continually evolving business environment. I was again elected as chairman of the Audit and Risk

Committee
and fulfilled this role during the 2017 financial year.
The Audit and Risk Committee's duties as required by section 94(2) of the Companies Act, King IV, JSE Listing requirements and
board-approved terms of reference is set out in the Audit and Risk Committees annual work plan. These duties were discharged
as follows:

FINANCIAL REPORTING

reviewed the trading and market updates and the half year and full year results;

confirmed the integrity of the group's Integrated Report, Annual Financial Statements and the Form 20-F;

reviewed the expertise, experience and performance of the finance function and Chief Financial Officer;

RISK MANAGEMENT, INTERNAL CONTROL, INTERNAL AUDIT AND COMBINED ASSURANCE

assessed the scope and effectiveness of the systems to identify, manage and monitor financial and non-financial risks;

reviewed the procedures for detecting, monitoring and managing the risk of fraud;

reviewed the scope, resources, results and effectiveness of the internal audit department;

approved the internal audit plan, monitored the execution of the approved plan and approved subsequent changes to the
approved plan;

ensured that a combined assurance model is applied to provide a co-ordinated approach to all assurance activities;

EXTERNAL AUDITORS

nominated the appointment of independent external auditors by the shareholders;

reviewed and approved the terms of engagement as contained in the engagement letter of the external auditors;

approved the remuneration of the external auditors;

ANNUAL FINANCIAL STATEMENTS
2017
5
EXTERNAL AUDITORS
CONTINUED

approved the integrated audit plan of the external auditors;

pre-approved all non-audit services in line with the formal policy on non-audit services;

after considering the written confirmation of the auditor's independence and the length of tenure assessed that there were
no impediments on the external auditors' independenceand the effectiveness of the group 's external audit function;

approved the appointment of the external auditors to provide independent reasonable and/or limited assurance on certain
sustainability indicators as included in the Sustainable Development Report;

in terms of the JSE listing requirement 3.84(g):

the Committee satisfied itself that the external auditor is accredited on the JSE list of Auditors and Accounting Specialists, and that the individual auditor responsible for performing the functions of the auditor, does not appear on the JSE list of disqualified individual auditors, as set out in Section 22;

considered the results of the most recent IRBA (Independent Regulatory Board of Auditors - South Africa) and PCAOB
(Public Company Accounting Oversight Board - United States of America) review results and concluded that there were no significant matters reported;

consider the decision letter for all other engagement file reviews of the engagement partner; and

consider all legal proceeding outcomes against the external auditor for the past 7 years.

GOVERNANCE

reviewed developments in reporting standards, corporate governance and best practice;

monitored the governance of information technology (IT) and the effectiveness of the group's information systems;

reviewed the adequacy and effectiveness of the group's compliance function; and

evaluated the effectiveness of the committee through an external assessment.

PROCEEDINGS AND PERFORMANCE REVIEW

During 2017, the Audit and Risk Committee formally met 5 times and meetings were attended by all members of the committee.

R Gasant (Chairman) – BCompt (Hons), CA (SA), ACIMA, Executive Development Programme
5/5
Prof LW Nkuhlu - BCom, – CA (SA), MBA – Retired May 2017
3/3
MJ Kirkwood – AB, Economics & Industrial Engineering

5/5
R Ruston – MBA Business, BE (Mining)
5/5
M Richter – BA, Juris Doctor
5/5
A Garner – BSE, Aerospace and Mechanical Sciences
5/5
S Zilwa* – BCompt (Hons), CA (SA), Advanced Diploma in Financial Planning, Advanced Taxation Certificate, Advanced Diploma in Banking – Appointed at the May 2017 AGM
2/2

* *SV Zilwa, although appointed to the board with effect from 1 April 2017, her appointment as The Audit and Risk Committee member was effective from 16 May 2017.*

The Chief Financial Officer, Senior Vice President: Finance, Group General Counsel and Company Secretary, Senior Vice President: Group Internal Audit, Group Tax Manager, Group Risk Manager, Chief Information Officer, Group Compliance Officer, the External Auditors, as well as other assurance providers are invited to attend committee meetings in an ex officio capacity and provide responses to questions raised by committee members during meetings. The full Audit and Risk Committee meets separately during closed sessions with management (including the Chief Executive Officer), internal audit and external audit at every scheduled quarterly meeting.

The Audit and Risk Committee was subjected to an independent external assessment during 2017. The assessment focused on its effectiveness. The results of the assessment were discussed, actions taken and processes put in place to address areas identified for improvement.

ANNUAL FINANCIAL STATEMENTS
2017
6

HIGHLIGHTS OF 2017

In addition to the execution of the Audit and Risk Committee's statutory duties, set out below are some highlights from 2017:

Focus Area
Actions
Financial Reporting

Market updates, half-year
and annual IFRS reports

Reviewed and recommended the trading and market updates, half-year and annual IFRS financial statements to the board for approval and subsequent submission to the JSE, SEC and other stock exchanges as applicable, after:

ensuring that complex accounting areas comply with IFRS;

carefully evaluating significant accounting judgements, including but not limited to environmental rehabilitation provisions, taxation provisions and the valuation of the portfolio of assets (including impairments) and estimates;

discussing the accounting treatment of significant accounting and auditing matters as well as non-routine transactions with management and the external auditors including the accounting for the disposal of certain of the South African assets, the restructuring of some of the South African operations; the provision for the silicosis class action;

reviewing and assessing the disclosure of contingent liabilities, commitments and impact of outstanding litigation in the financial reports;

reviewing, assessing and approving adjusted and unadjusted audit differences reported by the external auditors;

reviewing and assessing management's assessment of impairment indicators and identified impairments;

reviewing the key audit matters communicated by the external auditors in their audit report in terms of International Standard on Auditing 701;

reviewing the dividend proposal, including the solvency and liquidity report submitted by management for recommendation to the Board;

reviewing and approving the filing of the Form 20-F with the SEC;

reviewing the representation letter that management will be required to sign; and

considering and approving management's documented assessment of the company's going concern status including key assumptions.

New accounting standards

The Audit and Risk Committee considers the significance of new standards, interpretations and amendments to standards in issue that are not yet adopted but are likely to affect the financial reporting in future years. During 2017, the following were considered:

IFRS 15 - Revenue recognition, effective date 1 January 2018 - the impact will be limited to the recognition of by-product revenue in Revenue from product sales. Revenue from product sales includes Gold Income and by-product revenue. This change in classification results in a consequential increase in costs of sales, and therefore will not have an impact on previously reported Gross profit.

IFRS 9 -
The Group's financial assets include debt instruments (held to maturity bonds and negotiable certificates of deposit), cash restricted for use and cash and cash equivalents which will be subject to IFRS 9 expected credit loss model as they are to be carried at amortised cost. The accounting policy for listed equity investments will depend on the nature of the listed investment. Listed equity investments which are held to meet rehabilitation liabilities in future will be classified as fair value through profit and loss. Listed equity investments held for other purposes will be classified as fair value through other comprehensive income. Financial liabilities are currently carried at amortised cost with no requirements to change their recognition or presentation under IFRS 9. We have evaluated the possible impact of the adoption of IFRS 9, effective date 1 January 2018, including the expected credit loss model and we do not expect the adoption to have a significant impact on total assets, total liabilities or the results of the group.

IFRS 16 - Leases - with an effective date of 1 January 2019, it is likely to affect future financial reporting and we are still assessing all of the potential consequences. With the removal of the operating lease classification, leases that are within the scope of IFRS 16 will result in increase in assets and liabilities. We expect an increase in depreciation expense and in cash flow from operating activities as the lease payments will now be recorded as financing outflows in our cash flow statement. Management expects that the mining and drilling contracts which are not finance leases under the current accounting standards, will potentially have the most impact on adoption of IFRS 16.

ANNUAL FINANCIAL STATEMENTS
2017
7
Focus Area
Actions
Tax exposure
Tax, tax exposures, effective
tax rate, tax related
judgements
Reviewed and approved the group's tax strategy and tax management policy. Received the quarterly update on the management of the group’s tax exposures (including uncertain tax positions) with specific focus on:

effective tax rates;

impact that pending changes to legislation will have on fiscal duties; and

pending litigation in terms of tax exposure and the appropriate accounting thereof.
Mineral Resource and Ore Reserve Report
Annual Mineral Resource
and Ore Reserve Report
Reviewed and recommended for approval the annual Mineral Resource and Ore Reserve Report prepared in accordance with the minimum standards described by the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the JORC Code, 2012 Edition), and also conform to the standards set out in the South African Code for the Reporting of Exploration Results, Mineral Resources and Mineral Reserves (The SAMREC Code, 2016), after:

discussing the internal control environment associated with the mineral resource and ore reserve estimation process;

receiving confirmation that the Competent Persons appointed approved the mineral resources and ore reserves; and

reviewing and assessing for reasonableness the year-on-year reconciliation of the mineral resources and ore reserves.
Corporate governance
King IV
Monitored the progress of assessing the recommended practices underpinning the 16 Principles of King IV applicable to AngloGold Ashanti ensuring that an ethical culture is created that supports the effective control of the organisation at all levels, measuring the performance of the organisation from an economical, societal and environmental perspective and ensuring a legitimate and sustainable business.
Subsidiary Audit and Risk
Committees
Monitored the proceedings of relevant statutory subsidiary Audit and Risk Committees during each of its meetings.
Risk Management
Reviewed and approved the risk management policies, standards and processes; received and considered reports from the Group Risk Manager in relation to the key strategic and operational risks facing the company; and received presentations on the following emerging

risks and topics to obtain an in-depth analysis and understanding:

Tax risk;

Security and insurance cover for bullion at operations; and

Cyber Security.

IT Governance

The Audit and Risk Committee received and reviewed detailed reports from the Chief Information Officer on the group's information and technology framework and had detailed discussions around cyber security including inherent risks and vulnerabilities within the current AngloGold Ashanti landscape. The Audit and Risk Committee considered the current action plans in place to manage the associated risk exposure. The Audit and Risk Committee also monitored the successful implementation of SAP at Siguiri - Guinea.

Combined Assurance

The Audit and Risk Committee closely monitored the actions implemented by management during 2017 to further enhance the AngloGold Ashanti combined assurance model and to ensure integration between the various in-house assurance providers. The aim of the combined assurance process is to enable an effective integrated internal control environment that supports the integrity of information used for internal decision-making by management, the Board and its committees as well as supporting the integrity of external reports.

The Audit and Risk Committee considers the current model as effective and efficient in that it fully integrates with the risk management function. It will however continue to monitor it in light of the ever changing operational environment.

Sarbanes-Oxley Compliance
(SOX)

The Audit and Risk Committee has overseen the SOX compliance efforts of management through receiving quarterly updates on controls associated with financial reporting and assessed the final conclusion reached by the Chief Executive Officer and Chief Financial Officer on the effectiveness of the internal controls over financial reporting.

ANNUAL FINANCIAL STATEMENTS
2017
8

Focus Area	**Actions**
Compliance	The Audit and Risk Committee continued to monitor the refinement of the global compliance governance framework that allows for a systematic risk-based approach for group, regions and operations to identify and monitor compliance to major laws, regulations, standards and codes. Received formal feedback from the Group Compliance Officer on the outcome of the independent quality assurance review performed on the compliance function during 2017 for which the overall conclusion was satisfactory.
Litigation matters	The Audit and Risk Committee received and considered reports on significant litigation matters and assessed the possible impact thereof on the group financial results.

INTERNAL AUDIT

Group Internal Audit is a key independent assurance and consulting business partner within AngloGold Ashanti under the leadership of the Senior Vice President: Group Internal Audit who has direct access to the chairmen of both the Audit and Risk Committee and the Board. The Senior Vice President: Group Internal Audit who reports functionally to the Audit and Risk Committee and administratively to the Chief Financial Officer, is not a member of the Executive Committee but has a standing invitation to attend these meetings when required. As part of its mandated responsibilities, the Audit and Risk Committee has assessed the performance of the Senior Vice President: Group Internal Audit in terms of the annually reviewed and approved internal audit charter and is satisfied that the internal audit function is independent and appropriately resourced, and that the Senior Vice President: Group Internal Audit has fulfilled the obligations of the position by performing the following functions and reporting to the Audit and Risk Committee on:

evaluating ethical leadership and corporate citizenship within AngloGold Ashanti;

assessing the governance of risk within AngloGold Ashanti;

reviewing the governance of Information Technology within AngloGold Ashanti;

assessing compliance with laws, rules, codes and standards within AngloGold Ashanti;

evaluating the effectiveness of internal controls over financial reporting and internal controls in general;

reporting findings to management and the Audit and Risk Committee and monitoring the remediation of all significant deficiencies reported; and

implementing a Combined Assurance Framework for the group.

The Audit and Risk Committee considered the internal control heat-map for AngloGold Ashanti as presented by

Group Internal
Audit and monitored the implementation of significant audit recommendations through a formal tracking process.

As Chairman of the Audit and Risk Committee, I meet with the Senior Vice President: Group Internal Audit in private before each
meeting and on an ad-hoc basis throughout the year.

The Audit and Risk Committee is of the opinion, having considered the written assurance statement provided by Group Internal
Audit, that nothing has come to its attention indicating that the group's system of internal financial controls is not effective and
does not provide reasonable assurance that the financial records may be relied upon for the preparation of the annual financial
statements.

EXTERNAL AUDIT

The audit cycle at AngloGold Ashanti is continuous as the External Auditor performs half yearly reviews on the results of the
group. During August 2017, the annual integrated audit plan, the associated fees and the 2017 global engagement letter were
tabled at the committee meeting for consideration and approval.

As Chairman of the Audit and Risk Committee, I meet with the primary engagement team members in private before each
scheduled meeting where I am also briefed on general matters relating to the accounting and auditing profession as it may impact
on AngloGold Ashanti.

As part of its ongoing assessment of the independence and effectiveness of the external auditors, the Audit and Risk Committee
has also considered during its evaluation of the independence of the Ernst & Young factors such as:

the tenure of service;

the quality of planning, delivery and execution of the audit;

quality and knowledge of the audit team, specifically the senior management team, including the lead engagement partner,

the results of the most recent IRBA and PCAOB regulatory reviews and the responses of the firm on observations raised in
these reports;

outcome of the service quality assessment review performed during the first half of 2017; and

the robustness of the audit, including the audit team's ability to challenge management as well as demonstrate professional
scepticism and independence.

To further safeguard auditor independence, a formal policy on the approval of all non-audit related services has been approved and implemented. In terms of the policy the Audit and Risk Committee has established that the sum of the non-audit and tax fees in a year must not exceed 40% of the sum of the audit and audit related fees in the year. The Audit and Risk Committee received an update on the tax and non-audit fees as a percentage of the total audit and audit related fees with each request and is comfortable that the external auditor's independence had not been jeopardized.

During 2017, the external audit fees comprised of audit services ($6.14m), audit related services ($0.73m), non-audit fees ($0.04m) and tax services ($0.16m).

The Audit and Risk Committee did not note any significant findings and considers the service provided by the external auditors to have been independent, effective and robust.

TRANSFORMATION OF THE EXTERNAL AUDIT

In the spirit of AngloGold Ashanti's commitment to transformation, the Audit and Risk Committee closely monitors and guides the transformation within the context of the external audit. The current auditors Ernst & Young Inc. (EY) are level 1 contributors and under the guidance of the Audit and Risk Committee, certain AngloGold Ashanti subsidiaries, such as Mine Waste Solutions and the Rehabilitation Trust, are audited by Nexia SAB&T, a level 1 contributor. In addition, Nexia SAB&T also performs certain audit work of the South African operations under the supervision of EY.

FINANCE FUNCTION AND CHIEF FINANCIAL OFFICER

The Audit and Risk Committee received feedback on an internal assessment conducted on the skills, expertise and resourcing of the finance function and was satisfied with the overall adequacy and appropriateness of the function. The Audit and Risk Committee further reviewed the expertise and experience of the Chief Financial Officer, Christine Ramon and was satisfied with the appropriateness thereof.

As Chairman of the Audit and Risk Committee, I meet with the senior finance team in private before each scheduled meeting where I am also briefed on general matters relating to the administration of the finance function, the effectiveness of the internal control environment associated with financial reporting as well as any transactions that may require additional consideration in terms of accounting.

WHISTLEBLOWING

The Audit and Risk Committee received quarterly updates on AngloGold Ashanti's whistleblowing process. Reports received and investigated did not reveal any malpractice relating to the accounting practices, internal financial controls, internal audit function or the content of the company's and group's financial statements.

During the year 187 reports were received which is consistent with the number of reports received in 2016 (162). We have noted an increase in the number of reports from the Continental Africa Region and as a committee view this as a positive reflection of a greater awareness and understanding of the benefits of the whistle-blowing process. As a committee, we are comfortable that each report received is taken seriously and thoroughly investigated.

TAX GOVERNANCE AND STRATEGY

The Audit and Risk Committee received and reviewed detailed reports from the Chief Financial Officer and Vice President: Global Taxation, jointly, on the group's tax position, including uncertain tax positions, tax provisions, status of the group's tax compliance globally and relevant global fiscal developments impacting the group.

The co
mmittee also approved the group's tax strategy and tax management policy, which together, set out the group's approach to tax in areas such as tax efficiency, tax risk management and tax governance and oversight, which is more fully explained in the Integrated Report.

LOOKING FORWARD

The Audit and Risk Committee realises that its work is increasingly broad and complex and as a committee we are required to stay on top of developments impacting AngloGold Ashanti.

During 2018, the Audit and Risk Committee will continue to monitor:

the refinement of the disclosures provided in terms of the Principles as defined in the King IV code;

the impact of the new leases accounting standard applicable from 1 January 2019 on the existing accounting policies and contracts in place; and

the progress made in the XBRL tagging process for CIPC filing purposes.

In the spirit of continuous refinement and improvement of the group's combined assurance model and changing operational risk profile, the Audit and Risk Committee will continue to monitor the successful integration of the core technical engineering and mining disciplines into the combined assurance review process where so dictated by risk, during 2018.

STATEMENT OF INTERNAL CONTROL

The opinion of the Board on the effectiveness of the internal control environment is informed by the conclusion of the Audit and Risk Committee.

Based on the assessment by the Audit and Risk Committee of the results of the formal documented review conducted by Group Internal Audit and other identified assurance providers in terms of the evolving combined assurance model of the group's system of internal controls and risk management, including the design, implementation and effectiveness of the internal financial controls and considering information and explanations given by management and discussions with both the internal and external auditors on the results of their audits, nothing has come to the attention of the board that caused it to believe that the company's system of internal controls and risk management is not effective and that the internal financial controls do not form a sound basis for the preparation of reliable financial statements.

ANNUAL FINANCIAL STATEMENTS

The Audit and Risk Committee evaluated the consolidated and separate annual financial statements for the year ended 31 December 2017 and concluded that they comply, in all material aspects, with the requirements of the Companies Act, International Financial Reporting Standards, and JSE Listing Requirements. The Audit and Risk Committee therefore recommended the approval of the annual financial statements to the board.

CONCLUSION

The Audit and Risk Committee is satisfied that it has considered and discharged its responsibilities in accordance with its mandate, statutory responsibilities and terms of reference during the year under review.

Rhidwaan Gasant
Chairman: Audit and Risk Committee
19 March 2018

ANNUAL FINANCIAL STATEMENTS
2017
11
CHIEF FINANCIAL OFFICER'S REVIEW

AngloGold Ashanti continued to make considerable enhancements to the quality of its portfolio during the year ended 31 December 2017. The Company advanced the restructuring of its South African portfolio, including some significant asset sales; executed, according to plan, the key self-funded brownfield projects to sustainably improve mine lives and margins; and achieved its annual cost, production and capital guidance for the fifth consecutive year.

Highlights of the year under review include:

Production rises 4% year-on-year to 3.755Moz, above top end of guidance

Total cash costs $792/oz, in line with full year guidance of between $750 to $800/oz
●
All-in sustaining costs of $1,054/oz, at lower end of the guidance range

Free cash flow $125m, before growth capital; impacted by South Africa restructuring costs and VAT lockups in Continental Africa

Dividend of ZAR 70 cents per share (approximately 6 US cents per share) declared, given strong cash flow performance

Adjusted Headline Earnings $9m, after retrenchment costs ($71m) and silicosis provision ($46m)

Brownfield projects to improve life and margins, all remain on schedule

New safety benchmarks set: three, straight fatality-free quarters for first time

Obuasi redevelopment approved on strong return metrics and good government support

SA restructuring progressing well; Moab Khotsong and Kopanang sales closed on 28 February 2018; and TauTona in orderly closure

Strong reserve-replacement performance, declaration of maiden reserve in Colombia

EXECUTIVE SUMMARY
MARKET OVERVIEW

Global stock markets have ended 2017 on record highs, the MSCI all-country world index gained 22% or US$9tn on the year,
reaching an all-time high, all due to a strong global economy. Additionally, President Donald Trump's tax reform policies and
central b
ank's gradual and well messaged approach to easing financial support also contributed to the rising stock market. Even the rival attractions of Bitcoin (up nearly 14 times over the year), concerns about a US lead nuclear war with North Korea, political
upheaval in Europe with the Catalan separatist movement in Spain and an inconclusive German election failed to dampen

sentiment. Surprisingly, the global volatility index is trading at historically low levels.

Given the strength of the global stock markets, it is surprising that the US dollar price of gold was up ~13 % for the year, its biggest annual gain since 2010, outperforming all major asset classes other than stocks. The average US dollar gold price for the year, however, remained stable when compared to the prior year. Supporting gold were, a weakening US dollar, elevated price/earnings ratios and valuations that made many investors nervous of a potential pullback in stocks. Gold was thus seen as a means of managing these risks. The geopolitical instability further heightened investor uncertainty and fuelled flows into gold.

International Monetary policy tightening was implemented across the globe pushing up global short-term bond yields while long-term yields remained relatively flat. Central Banks were also very active in the gold market, Russia increased its holdings particularly in the final two months of the year. For 2017, the official sector remained an important source of demand for gold and net purchases were up 123 tonnes (48%) to 381 tonnes compared to 2016 (258 tonnes).

Jewellery consumption for 2017 was up by ~13% compared to 2016, with all the major physical regions recording year-on-year gains. India's jewellery consumption increased by ~8% in the final quarter, helped by a surge in sales during Dhanteras (1st day of Diwali) and lower prices toward year end. Jewellery fabrication also increased by ~6% in 2017. Chinese demand slipped by 2% year-on-year, with ongoing losses in the pure gold segment as consumer preferences continued to shift towards more fashionable, but lower gold content pieces. Total physical demand increased from 946 tonnes (Q3) to 1,093 tonnes (Q4) or 16% (147 tonnes). On an annual basis, physical demand was up ~11% from ~3,556 tonnes (2016) to ~3,932 tonnes (2017).

Supply was broadly unchanged for the quarter as lower mine production was offset by reduced hedging activity, while scrap volumes remained flat year-on-year.

Investors continued to add gold to their portfolios, with inflows into global gold-backed exchange-traded funds totalling US$8.2bn or 6.72moz. Speculators increased their gold net long position by 7.36moz year-on-year on the Commodity Exchange (Comex) underpinning the positive sentiment in the gold market.

The daily closing price of gold averaged US$1,276.54/oz for the quarter. December was the most volatile month where the price fell to as low as US$1,243.46/oz, but also reached the high of the year of US$1,307.60/oz. The gold price finally closed the year off at US$1,302.45/oz. The gold price averaged US$1,257.89/oz in 2017, US$11 higher than in 2016. The average price received for gold sales for the year was recorded at US$1,258/oz.

GROUP PERFORMANCE

AngloGold Ashanti continues to make progress on its strategic objectives and has delivered a strong financial and operating performance. The financial results for the year have been impacted by some significant once-off charges and impairments, but cash flows and the balance sheet remain robust.

Total cash costs for the full year of $792/oz were 6% higher than the previous year's $744/oz, and within the guidance range of between $750/oz to $800/oz. Costs were negatively impacted by inflation, stronger local currencies and the expensing of certain capital costs at the South African operations as those operations underwent orderly closure. All-in sustaining costs came in at the bottom end of the guidance range at $1,054/oz, 7% higher than the previous year AISC of $986/oz due to higher planned sustaining capital expenditure levels in addition to the stronger local currencies.

Cash flow from operating activities for the year ended 31 December 2017 declined by 16% when compared to 2016, reflecting tighter margins, working capital lockups, and payments in respect of retrenchment costs in South Africa, offsetting a 1% increase in the gold price received and a 5% increase in gold sales. Free cash flow of $1m for the year, compared to $278m in 2016, was supported by a strong second half performance which delivered free cash flow of $162m. This was, however, impacted by the increase in the lockup of VAT receivables at Kibali and Geita, which was approximately $20m and $50m for the year respectivel y, and the higher planned capital expenditure. In line with the reinvestment strategy of AngloGold Ashanti, total self-funded capital expenditure of $953m increased by $142m from the previous year (2016: $811m).

Free cash flow for the year, before taking growth capital into account, was $125m versus $394m a year earlier, impacted by 19% higher planned sustaining capital expenditure of $829m compared to the previous year of $695m, South African retrenchment costs paid of $49m and higher cash costs.

The balance sheet reflects strong liquidity comprising $965m available on the $1bn US dollar syndicated RCF at the end of
December 2017, $85m undrawn on the $100m US dollar RCFs, A$290m undrawn on the A$500m Australian dollar RCF,
approximately R2.95bn available from the South African RCFs and other facilities and cash and cash equivalents of $205m as at
the end of December 2017.

We continue to focus our efforts on reducing our taxation exposures, specifically indirect taxes, in all jurisdictions that we operate
in. Our transparent group tax policy continues to support a low risk approach in dealing with tax matters across the various
jurisdictions in which we operate.

Other pertinent matters include:

At the end of June 2017, AngloGold Ashanti announced that it would restructure its South African Operations to safely return
the business to profitability, whilst mitigating job losses. This included placing TauTona and Savuka into care and
maintenance, to be followed by orderly closure. In October 2017, we announced the sale of the Kopanang Mine and related
infrastructure to Heaven-Sent SA Sunshine Investment Company Limited (Heaven-Sent), with one of the conditions being that
the majority of existing workers continue to work at the operations. Simultaneously, we announced the conclusion of the sale
agreement for the disposal of the Moab Khotsong and Great Noligwa mines and related infrastructure to Harmony Gold
Mining Company Limited (Harmony). All the conditions precedent to these sale contracts were met and the transactions
closed on 28 February 2018.

Agreement has been reached with the Government of Ghana for the redevelopment of Obuasi Gold mine, subject to
ratification by Ghana’s parliament of the relevant fiscal and development agreements. These agreements have been signed
by the Government and ratification is scheduled during the current parliamentary sitting. The redevelopment will establish
Obuasi as a long-life, modern, mechanised underground mining operation, which is a fundamental departure from the
previous operating method used at the mine.

The Democratic Republic of the Congo (DRC) has recently promulgated a new mining code that makes a number of changes
to the operating environment for the DRC’s extractive industries, including those in its mining, and oil and gas sectors. On
8 March 2018, AngloGold Ashanti announced that a meeting had been held between the DRC president and mining industry
representatives to discuss the new mining code prior to its promulgation. The DRC government has agreed to continue
discussions with the mining industry representatives post the promulgation of the new mining code regarding issues existing
in the current agreement and the implementation of the new mining code. AngloGold Ashanti is in full support of Randgold
Resources, our partner and the operator in the Kibali joint venture, in its continued engagement with the DRC government.

The settlement negotiations between the Occupational Lung Disease Working Group and class action legal representatives have reached an advanced stage. The Working Group represents African Rainbow Minerals, Anglo American SA, AngloGold Ashanti, Gold Fields, Harmony and Sibanye-Stillwater. The class members are represented by Richard Spoor Inc, Abrahams Kiewietz Inc and the Legal Resources Centre. On 10 January 2018, in response to a request from all parties involved in the appeal to the Supreme Court of Appeal (SCA) in respect of the silicosis and tuberculosis class action litigation, the Registrar of the SCA postponed the hearing date of the appeal until further notice.

FOCUSING ON MARGINS

We continue to focus our efforts on driving operational excellence and cost efficiency across our business, regardless of the gold price environment in which we operate and over which we have no control.

Despite stronger currencies and inflationary pressures, our continued focus on meeting production targets, strong cost management and stringent capital discipline, has resulted in the AISC margin increasing from 17% in the second half of last year, to 19% in the last six months of 2017. This is especially encouraging given the flat gold price and is illustrated in the graph that follows.

For the full year, the AISC margin decreased from 21% to 16%, mainly the result of currency and inflation pressure on cash costs.
We, however, continue to pursue efficiencies and productivity and attempt to improve margins on a sustainable basis and will be working hard to ensure that these efforts are reflected in the AISC margin in the coming year.

We will continue to work towards widening these margins, by focusing on the controllable factors, including:

stringent cost management;

reinvestment in low capital, high return opportunities within our business; and

continuing to drive our Operational Excellence Programme, i.e. considering innovative ways to improve efficiencies and productivity in our operations.

**World Gold Council standard adjusted to exclude stockpile write-offs*

CONTINUED FINANCIAL FLEXIBILITY

We saw a slight rise in net debt from $1.9bn to $2.0bn, mainly as a result of higher capital expenditure, the funding of the South African retrenchment costs and VAT lockups in Continental Africa, all of which were partially offset by a reduction in interest paid of $34m. The net debt to adjusted EBITDA is 1.35 times, slightly up from 1.24 times at the end of 2016, however, reflecting an improvement from 1.56 times at the end of June 2017. The ratio shows ample headroom compared to our covenant levels of 3.5 times.

Our liquidity position has improved from $1.58bn at the end of December 2016 to $1.72bn at the end of 2017, reflecting the additional facilities put in place to assist with our South African funding requirements. Proceeds from the Moab Khotsong sale transaction that closed on 28 February 2018, have been applied to reduce our South African debt ($218m as at 31 December 2017), which will benefit our South African interest bill going forward by ~$20m.

Our balance sheet remains robust with strong liquidity, sufficient undrawn facilities and no near-term maturities, giving us the flexibility in what remains a volatile market environment. We have demonstrated our ability to self-fund our high-return reinvestment opportunities, whilst sustaining our cash dividend, reflecting our commitment to disciplined capital application.

CONTINUED POSITIVE CASH FLOW MOMENTUM

We continue to follow a balanced approach, i.e. positive free cash flow generation while reinvesting in our portfolio:

We indicated a year ago that our new dividend policy is to return 10% of free cash flow, before growth capital, to shareholders, subject to the board's discretion. Volatility is to be expected in the dividend payout, given the basis used for the calculation coupled with our variable reinvestment needs, as demonstrated with the 19% planned increase in sustaining capital expenditure for 2017 to $829m.

Free cash flow before growth capital was $125m (2016: $394m). The board has exercised its discretion by adjusting the metric of free cash flow before growth capital to take into account the abnormal South African retrenchment payments of $49m, and has approved a dividend of 70 ZAR cents or approximately 6 US cents per share.

The continuation of the dividend is a reflection of our capital discipline and commitment to improving shareholder returns on the back of sustainable free cash flow generation. Importantly, we will maintain adequate balance sheet flexibility and utilise our cash flows and available facilities to fund our ongoing capital and operational requirements.

INWARD FOCUS ON CAPITAL EXPENDITURE AND GROWTH

Total capital expenditure (including equity accounted investments) was $953m, at the lower end of the market guidance of between $950m to $1,050m, and included project capital expenditure of $124m invested in growth projects at Siguiri and Kibali in Continental Africa and Mponeng in South Africa. Sustaining capital increased 19% to $829m, compared to $695m in 2016, reflecting increased investment at Geita in Tanzania and at both of our operations in Australia. This higher level of spend w as largely aimed at improving mine lives and margins across the portfolio. Capital expenditure in Continental Africa increased by $109m (including equity accounted investments), with higher expenditure on underground development at Geita and the cutback at Iduapriem's Teberebie pit, which extends the life of the operation by about a decade. In Australia, expenditure at Tropicana increased to $91m as mine optimisation work and additional stripping costs, geared to improve the medium- and longer-term profitability of the mine, progressed.

Our project pipeline reflects an abundant portfolio being developed and ready for development in the mid-term:

Our primary objective remains margin enhancement, rather than production growth. We continue to strategically position the group to achieve sustainable cash flow, providing us with the balance sheet flexibility to make decisions around our future investments. We use an ore reserve price of $1,100/oz in our estimated life of project models, which is prudent compared to our peers. Our long-term planning assumptions for projects are also conservative and incorporate the financial impact of environmental rehabilitation expenditure over the life of the project.

Our disciplined approach to planning and growth, has assisted us in making proper investment decisions across our portfolio. In general, our AIC remains within close proximity of our current reserve price, leaving us with a significant cushion when compared to the average three-year gold price and current spot price.

We remain firmly in the reinvestment camp, with a pipeline of very good, high-return brownfields opportunities that will improve our production mix as can be seen from the table above. We will continue to look for ways to unlock value by making fundamental and lasting improvements through innovation, rather than only by large capital investments.

In terms of our guidance, we continue to prioritise stay in business capital, ore reserve development and asset integrity capital to
ensure the sustainability of our operations. These types of capital expenditure are anticipated to make up approximately 75% of
our capital expenditure in 2018.
AngloGold Ashanti's approach to growth investments and project approvals is based upon a multi-factor model, primarily founded
in maximising investment returns and value whilst also taking into account all factors that form the five pillars of AngloGold
Ashanti's strategy, in particular how the particular investment/project will improve AngloGold Ashanti's portfolio, financial
flexibility, sustainability considerations and long term optionality. The particular project or investment must generate returns that
meet our required hurdle rates of 15% real in USD terms, which significantly exceeds our cost of capital. Our projects must also
increase cash generation and margins through increased production at reduced operating costs as well as increase AngloGold
Ashanti's long term optionality including extending its Ore Reserve life.

DELIVERY AGAINST 2017 FINANCIAL OBJECTIVES

1.
Maintain our focus on cost and capital discipline to deliver competitive all-in sustaining costs and all-in costs

The group continues to focus on sustainably reducing the cost associated with producing gold. These initiatives have covered a broad spectrum of activities, including a greater focus on capital allocation and project delivery, as well as enhanced recoveries, while internal cost reduction efforts continued simultaneously. AISC for the year ended at $1,054/oz,
a 7% increase from 2016 at $986/oz. AISC came in at the bottom end of the guidance range reflecting the effect of planned
higher sustaining capital expenditure for 2017 (~$26/oz) and stronger local currencies. The South African rand averaged 9%
stronger versus the dollar in 2017 compared with 2016, and the Brazilian real and Australian dollar averaged 8% and 3%
stronger, respectively.

We continued to roll-out our wider-focused Operational Excellence Programme across all our operations, with our restructuring efforts in South Africa assisting us on improving the profitability and sustainability of our remaining assets in
South Africa.

2.
Continue to enhance margins and cash flow through continuing focus on operational efficiencies and productivity

Our margins on total cash costs (37%), AISC (16%), and AIC (10%) came under pressure in 2017 because of stronger local
currencies and higher planned sustaining capital expenditure. This increased expenditure was required to ensure that we
continue to maintain and improve our margins and cash generation ability in future years. We remain committed to keep our

margins at acceptable levels and our performance in the second half of the year is reflecting margins on total cash costs (38%), AISC (19%), and AIC (13%) returning to full year 2016 levels and higher levels than those achieved for second half-year of 2016.

Cash flows remain positive despite funding once-off items such as the South African retrenchment costs. The strengthening of the South African rand and Brazilian real was detrimental to us, given that most of our cost base in those countries is denominated in the local currencies, while our gold is sold in US dollars, contributing to the 21% year-on-year increase in total cash costs in South Africa and 10% increase in the Americas region. In contrast, although the Australian dollar strengthened by 3%, total cash costs declined by 6% in that region.

3. Dividend underpinned by sustainable cash generation

Despite the significant headwinds experienced in 2017 in free cash flow generation, the Company declared a dividend of ZAR 70 cents per share (~6 US cents per share) for the year under review. Free cash flow before growth capital, remained sufficient to maintain the declaration of a dividend since the introduction of the new dividend policy last year.

Our focus with the substantial restructuring of the South African operations, combined with the South African asset sales, as well as the significant planned sustaining capital expenditure in 2017, has been to be appropriately positioned to maintain the dividend in future years underpinned by sustainable cash generation.

4. Move to a sustainable resolution at Obuasi

During 2017, significant positive developments at Obuasi resulted in AngloGold Ashanti announcing in February 2018 the advancement of the redevelopment of the Obuasi project. Some of the beneficial developments in 2017 included the security situation improving with the last enclave of illegal miners being evicted from site in April; the lifting of the Force Majeure; the extension of the Amended Mining Programme entered into with the Government of Ghana until April 2018; and the suspension of the international arbitration initiated by AngloGold Ashanti with the International Centre for Settlement of Investment Disputes (ICSID).

All the above developments paved the way to allow for the successful negotiation with the Ghanaian Government and conclusion of various agreements as listed below:

A Reclamation Security Agreement signed in July 2017;

A Tax Concession Agreement signed in July 2017;

A Development Agreement signed in January 2018;

A Security Agreement (provision of security for the mine against any illegal mining invasion) signed in February 2018;
and

A Settlement Agreement signed in February 2018.
These agreements have been signed by the Government, with the Tax Concession Agreement and the Development Agreement subject to ratification by Ghana's parliament, which is scheduled during the current parliamentary sitting.

Mine production for the first 10 years will be focused on the upper ore bodies and is expected to average 350,000 to 400,000oz at an average head grade of 8.1g/t. Total cash costs are expected to average between $590/oz to $680/oz, while AISC are expected to be between $795/oz to $850/oz. Mine production for the second 10 years increases to 400,000 to 450,000oz per annum, as the mine deepens into higher grade ore. AISC is then expected to improve to between $750/oz to $800/oz. The project delivers internal real rates of return of between 16% and 23% at real gold prices of between $1,100/oz and $1,240/oz, and is highly leveraged to the gold price. Initial project capital expenditure anticipated over the first 2.5 years is expected to be between $450m to $500m, excluding pre-production capital of $64m. The project implementation will be undertaken in two distinct phases and after the completion of phase 2, extended project capital expenditure of $94m will continue through to year six, covering the development of the Obuasi Deeps Decline (ODD) to the lower level of the mine, refurbishment of the KMS shaft, installation of new underground pump stations and construction of the flotation tailings storage facility. The project has a current life of more than 20 years.

The redevelopment will establish Obuasi as a long-life, modern, highly mechanised underground mining operation, replacing the labour intensive, hand-held operating systems previously used at the mine. The redevelopment will deliver a mine that makes use of automation and controls for better safety and improved operational efficiencies and consistency in performance. It envisages a smaller, but more skilled workforce that can operate in a mechanised/automated environment with a strong sense of accountability.

5.
Execute on low capital, high return brownfields projects, while continuing to move long term projects up the value curve

We continue to execute on our robust brownfields exploration programme at most of our operations in the group as described earlier.

There are a number of capital projects that we continued to focus on during the year, including the Obuasi redevelopment
project, discussed in the previous section.

At Kibali, the underground materials handling system and ore hoisting via the shaft were commissioned with ramp up progressing. The paving on the central haulage level was completed during the year, allowing haulage from the ore passes
into the underground crushers to the shaft system. In addition, Kibali completed 2.7km of development from the declines
during the quarter. The construction of the third hydropower station at Azambi and the next phase of tailings storage facility
is scheduled for completion in 2018.

The Mponeng mine life will be extended through access to deeper, higher-grade ore via the development of a decline below
the current secondary shaft, with completion expected around mid-2018. Additional ventilation; water management; and ore
handling infrastructure are in the process of being constructed. A feasibility is being undertaken into deepening the secondary shaft to further extend the mine's life beyond 2026.

The Sadiola Sulphides project which will add sulphide-ore processing capability to the plant, continued to be evaluated.
Discussions with the Government of Mali continue regarding the project.

At Siguiri, we are investing about $115m over approximately two years to add a hard-rock plant to the current processing
infrastructure, providing the ability to develop the significant sulphide-ore potential that exists on the current concession.
The company is also building a new power plant at a cost of $43m, to provide electricity to the new facility. During 2017,
$67m was spent on the project and a total of $145m has been committed to date. The project remains largely on schedule
to be completed and the final costs are currently being reviewed as all major commitments have now been concluded.

Finally, we announced the declaration of the maiden Ore Reserve for the Gramalote project in Colombia of 63.7Mt @ 0.86
g/t gold comprising contained metal content of 1.8Moz, on an attributable basis. Gramalote represents a long-term option
for AngloGold Ashanti, and all avenues to realise value from this important asset remain open. Work will continue to optimise all aspects of the project during its feasibility phase, which is currently under way.

6.
Maintain financial flexibility and further reduction in finance costs

Our net debt to adjusted EBITDA ratio of 1.35 times reflect a marginal increase to 2016 at 1.24 times. This remains well within our debt covenant level of 3.5 times. Coupled with the successful completion of the South African sales transactions of Moab Khotsong and Kopanang at the end of February 2018, the proceeds which will be utilised to further reduce our South African debt, we have successfully maintained financial flexibility and anticipate a further reduction in our finance costs in 2018.

REVIEW OF GROUP'S PROFITABILITY, LIQUIDITY AND STATEMENT OF FINANCIAL POSITION FOR 2017

The key financial and operational metrics for 2017, when compared to 2016 and 2015, are as follows:

		2017	**2016**	**2015**
Profitability and returns				
Adjusted headline earnings (1)	$m	**9**	143	49
	US cents per share	**2**	35	12

PRODUCTION, PROFITABILITY AND RETURNS

Production for the year of 3.755Moz exceeded the top end of guidance and was 4% higher than the previous year's production of 3.628Moz despite the orderly closure of TauTona and Savuka. Stronger year-on-year operating performance across the International Operations helped to more than offset the lower output from South Africa. In Australia, Sunrise Dam and Tropicana saw the benefits of mine optimisation initiatives resulting in solid performances throughout the year. In Continental Africa, higher grades at Geita and Siguiri contributed to the region's 10% increase in production over the previous year. In the Americas, a solid operating performance was bolstered by improved production from AGA Mineração. The strong performance across the portfolio, particularly in the fourth quarter, demonstrated continued cost and operating discipline and improvements through internally-funded, low-capital, high return brownfields investments.

At the South African operations tonnes mined were affected by a poor start up to the year at all operations, whilst the decision to stop the loss-making operations in the third quarter further impacted full-year production. Underground yield dropped 8% to 6.93 g/t as a result of lower feed grades as well as higher dilution year-on-year. This was mainly due to an increase in waste tonnes at Moab Khotsong, mining moving out of higher grade areas at Mponeng, and the reclamation of the tailing storage facilities at the West Wits Surface Sources. The final blast took place at TauTona on 15 September and the Section 189 process continued at Kopanang together with the pending disposal of the mine as announced in October. Both the Moab Khotsong and Kopanang sale transactions were completed on 28 February 2018.

Production from the Continental Africa region increased significantly year-on-year as almost all operations delivered increased production driven mainly by higher recovered grades at Siguiri, Iduapriem and Geita, together with higher tonnages in Mali. At Siguiri, the production improvement was due to a 29% increase in recovered grade as a result of the mining of higher grade areas, which included the new Seguelen pit, while at Iduapriem, production increased due to the 8% higher recovered grade from mining deeper higher grade areas. At both operations, these increases in recovered grade were partly offset by decreases in tonnage treated. At Geita, the increase in production was due to a 13% increase in recovered grade from mining higher grade ore at Nyankanga cut 7 and cut 8, in line with the mining plan. Increased production is also supported by higher underground tonnes in the current period as the underground ramp up continues. These factors were partly offset by a decrease in plant throughput.

Production volumes from the Americas region reflected stronger year-on-year contributions from both Brazil and Argentina, attributable to operational improvements and an increase in tonnes treated. In Brazil, production increased as a result of improved geological modelling at AGA Mineração which assisted the recovery from geotechnical challenges faced at the start of the year at Córrego do Sitio. At Serra Grande, production was driven by higher tonnes treated supported by crushing and milling efficiencies and more efficient leaching following the implementation of the Carbon-In-Leach project, this despite lower feed grades. In Argentina, Cerro Vanguardia achieved its highest production level in 18 years, boosted by operational and metallurgical improvements and an increase in tonnes treated at the plant.

Production from the Australian region improved due to higher mill throughput and feed grade, and a significant increase in metallurgical recovery at Sunrise Dam and higher feed grade and mill throughput at Tropicana. Total cash costs decreased on the back of improved production and favourable inventory movements. Higher head grades and improved metallurgical recovery contributed to a 5% increase in production at Sunrise Dam in 2017. Tropicana's production was 10% higher for the year compared to 2016 due mainly to a 10% increase in mill throughput.

Total cash costs for the full year of $792/oz were 6% higher than the previous year's $744/oz, and within the guidance range of $750/oz-$800/oz. Costs were negatively impacted by inflation, stronger local currencies and the expensing of certain capital costs at the South African operations as they underwent orderly closure. The South African rand averaged 9% stronger versus the dollar in 2017 compared with 2016, and the Brazilian real averaged 8% stronger, contributing to the 21% year-on-year increase in total cash costs in South Africa and 10% increase in the Americas region. In contrast, cash costs remained relatively flat in Continental Africa and declined by 6% in Australia despite a 3% stronger Australian dollar. All-in sustaining costs came in at the bottom end of the guidance range at $1,054/oz, 7% higher than the previous year's AISC of $986/oz due to higher planned sustaining capital expenditure levels in addition to the stronger local currencies.

Basic earnings for the year fell to a loss of $191m and was impacted by large once-off/abnormal items including the impairment and derecognition of certain South African assets and goodwill amounting to $294m (pre-tax) as well as the silicosis

provision of
$46m (post tax) both of which were non-cash in nature. However, the provision for retrenchment costs in South Africa of $71m
(after tax), had a cash impact of $49m for the year with the balance expected to impact on 2018 cash flows.

Moab Khotsong was reclassified as an asset held for sale and the carrying value of these assets had to be impaired to the fair
value of the sale consideration of $300m, less costs to sell. Furthermore, in calculating the impairment, the related deferred tax
assets of ~$81m could not be taken into consideration. This deferred tax benefit will only be recognised on the completion of the
transaction as part of the overall profit on the sale of Moab Khotsong in the first quarter of 2018.

Headline earnings were also significantly impacted by these once off charges, as only the impairments are permitted to be added
back in this calculation. Excluding the abnormal charges relating to the silicosis provision and the South African retrenchments,
headline earnings would have increased from $27m to $144m for the year, which reflects a 30% increase on the prior year on the
back of a strong operational performance.

LIQUIDITY, CASH FLOW AND STATEMENT OF FINANCIAL POSITION

Adjusted earnings before interest, tax, depreciation and amortisation (Adjusted EBITDA) of $1,483m in 2017 decreased by $65m,
or 4% from the previous year, resulting in a 34% Adjusted EBITDA margin. Adjusted EBITDA for the year excludes the impact of
the South African redundancy costs and impairments but includes the impact of the estimated provision in respect of the silicosis
class-action law suit of $46m (pre-tax: $63m). The ratio of net debt to Adjusted EBITDA at the end of December 2017 was 1.35
times compared with 1.56 times at the end of June 2017 and 1.24 times at the end of December 2016. Management has
successfully maintained financial flexibility by remaining at or below targeted leverage levels, and well below the covenant ratio of
3.5 times which applies under our revolving credit agreements.

Net debt increased marginally by 4% to $2.001bn at 31 December 2017, from $1.916bn at the end of 2016. During 2017,
AngloGold Ashanti increased its ZAR RCF facilities from R3.4bn to R5.7bn. The balance sheet remains robust, with liquidity
comprising $1,050m available on the $1.1bn US dollar RCFs at the end of December 2017, A$290m undrawn on the A$500m
Australian dollar RCF, approximately R2.95bn available from the South African RCF and other facilities and cash and cash
equivalents of $205m at the end of December 2017. The nearest bond maturities are in 2020 and 2022.

The dividends declared for the year under review of ~6 US cents per share, will result in an estimated cash outflow in March and
April 2018 of $24m. A dividend of 10 US cents per share were declared and paid in 2017. Our dividend policy is based on 10% of
free cash flow generation pre-growth capital expenditure, subject to the board’s discretion taking into consideration

prevailing
market conditions, the strength of our balance sheet and our future capital commitments.

Turning to the financing facilities available, the group's principal US dollar and Australian dollar debt facilities are listed below:

Fully drawn rated bonds – $1.75bn in aggregate – that mature in April 2020 ($700m: 5.375%), August 2022 ($750m: 5.125%) and April 2040 ($300m: 6.5%);

$1bn syndicated revolving credit facility that matures in July 2019, which is currently $35m drawn;

$100m revolving credit facilities in Guinea and Tanzania that mature in August 2019, which are currently $15m drawn;

A$500m base rate plus 2% syndicated revolving credit facility originally earmarked for the construction of the Tropicana project that matures in July 2019, of which A$210m remains drawn at year-end;

R2.5bn JIBAR plus 1.8% South African syndicated revolving credit facility that matures in December 2020, with an option to extend by 2 years; R1.4bn JIBAR plus 1.65% South African syndicated loan facility that matures in July 2020; and R1bn JIBAR plus 1.3% South African syndicated loan facility that matures in November 2020, with an option to extend by 2 years – the three facilities are currently R2.7bn drawn; and

R750m overnight bank lending rate South African demand facility, which is undrawn.

We remain subject to an uncertain tax environment. Across the group, we are due refunds for input tax and fuel duties for an amount of $252m (2016: $199m; 2015: $195m), including attributable amounts of equity accounted joint ventures, which have remained outstanding for periods longer than those provided for in the respective statutes. Considerable effort continues to be made to reduce these outstanding amounts.

The normalised 2017 effective tax rate jumped to 38% compared to 31% in 2016. The increase in the effective tax rate year-on-year is directly attributable to the significant losses incurred in South Africa, mainly due to large retrenchment costs and once-off non-cash adjustments for silicosis and impairments. Furthermore, the impact of deferred tax rates in South Africa together with the deferred tax assets not recognised, all resulted in the increase in the overall tax rate. Excluding the adverse effect of the South African taxes, the normalised tax rate for the group for 2017 is 30%.

More detailed notes and analyses of the group's income statement, statement of financial position and statement of cash flow for 2017 are available in the group financial statements for 2017.

LOOKING AHEAD TO 2018, THE KEY FINANCIAL AND OTHER OBJECTIVES ARE TO:

Maintain our focus and capital discipline to deliver competitive AISC and AIC;

Continue to enhance margins and cash flows with a focus on operational efficiencies and productivity through Operations Excellence;

Maintain the dividend underpinned by sustainable cash generation;

Seek resolutions for the Tanzanian and DRC regulatory uncertainty;
Progress the implementation of the Obuasi project;

Execute on low capital, high return brownfields projects, while continuing to progress long term projects up the value curve;
and

Maintain financial flexibility and further reduce finance costs.

The guidance for 2018 is set out in the table below:

	Guidance	Notes
Production (000oz)	3,325 – 3,450	Includes three months production from Moab and Kopanang at ~30koz per month
Costs		
All-in sustaining costs ($/oz)	990 – 1,060	
Total cash costs ($/oz)	770 - 830	
Overheads		
Corporate costs ($m)	70 - 80	
Expensed exploration and study costs ($m)	115 - 125	Including equity accounted joint ventures

ACKNOWLEDGEMENT

I would like to express my appreciation to our committed and diligent finance team across the group who have been proactive in supporting the business to manage costs and capital as well as dealing with working capital and other business challenges associated with the developing market nature of the jurisdictions that we operate in. In addition, we continue to maintain a high standard of governance and compliance to internal controls across the organisation. The quality financial information prepared for our stakeholders is testament to our high calibre financial team whom I applaud. Finally, I look forward to the year ahead with enthusiasm and absolute focus on our strategic objectives with the aim of improving shareholder returns, on a sustainable basis.

Best regards

Christine Ramon
Chief Financial Officer
19 March 2018

DIRECTORS'
APPROVAL

In accordance with Section 30(3)(c) of the Companies Act, No. 71 of 2008, as amended, the annual financial statements for the year ended 31 December 2017 were approved by the board of directors on 19 March 2018 and are signed on its behalf by:

DIRECTORS

SM Pityana, Chairman

S Venkatakrishnan, Chief Executive Officer

KC Ramon, Chief Financial Officer

R Gasant, Chairman: Audit and Risk Committee

SECRETARY'S CERTIFICATE

In terms of Section 88(2)(e) of the Companies Act, No. 71 of 2008, as amended, I certify that the company has lodged with the Companies and Intellectual Property Commission all such returns and notices as are required of a public company in terms of the Act, and that all such returns and notices are true, correct and up-to-date.

ME Sanz Perez
Company Secretary
Johannesburg
19 March 2018

AFFIRMATION OF FINANCIAL STATEMENTS

In accordance with Section 30(2) and 30(3) of the Companies Act, No. 71 of 2008, as amended, the annual financial statements for AngloGold Ashanti Limited, registration number 1944/017354/06 (AngloGold Ashanti), for the year ended 31 December 2017, have been audited by Ernst & Young Inc., the company's in dependent external auditors, whose unqualified audit opinion can be found under Independent Auditor’s Report, on page 30.

The financial statements have been prepared by the corporate reporting staff of AngloGold Ashanti, headed by Meroonisha Kerber (CA(SA)); the group’s Senior Vice President: Finance. This process was supervised by Kandimathie Christine Ramon (BCompt; BCompt (Hons); CA (SA)) , the group’s Chief Financial Officer and Srinivasan Venkatakrishnan (BCom; ACA (ICAI)), the group’s Chief Executive Officer.

ANNUAL FINANCIAL STATEMENTS
2017
23
DIRECTORS'
REPORT
For the year ended 31 December 2017

NATURE OF BUSINESS

AngloGold Ashanti conducts mining operations in Africa, South America and Australia, and undertakes exploration activities in
some of these jurisdictions. At certain of its operations, AngloGold Ashanti produces uranium, silver and sulphuric acid as by-
products in the course of producing gold.

A review of the unaudited performance of the various operations is available in the operational profiles on AngloGold Ashanti's
annual report website www.aga-reports.com.
SHAREHOLDERS HOLDING 10% OR MORE OF ANGLOGOLD ASHANTI'S ISSUED SHARE CAPITAL
As at 31 December 2017, there were no shareholders holding 10% or more of the company's issued share capital. This does not
take cognisance of the shares held by the Bank of New York Mellon as depositary for the AngloGold Ashanti ADR programme.
SHARE CAPITAL
AUTHORISED

The authorised share capital of AngloGold Ashanti as at 31 December 2017 was made up as follows:
SA Rands
• 600,000,000 ordinary shares of 25 South African cents each
150,000,000
• 2,000,000 A redeemable preference shares of 50 South African cents each
1,000,000
• 5,000,000 B redeemable preference shares of 1 South African cent each
50,000
• 30,000,000 C redeemable preference shares of no par value

ANNUAL FINANCIAL STATEMENTS
2017

24

Redeemable preference shares

The A and B redeemable preference shares, all of which are held by the wholly owned subsidiary, Eastvaal Gold Holdings Limited, may not be transferred. The A, B and C redeemable preference shares terms and conditions carry the right to receive dividends equivalent to the balance of after tax profits arising from income derived from mining the Moab Lease Area. The shares are redeemable from the realisation of the assets relating to the Moab Lease Area after the cessation of mining operations in the area. No further A and B redeemable preference shares will be issued. C redeemable preference shares which may only be issued to AngloGold Ashanti Limited or its subsidiaries, have not been issued at 19 March 2018.

Further details of the authorised and issued shares, as well as the share premium, are given in group financial statements note 24.

At 28 February 2018	**189,873,876**	

ORDINARY SHARES UNDER THE CONTROL OF THE DIRECTORS

Pursuant to the authority granted by shareholders at the Annual General Meeting held on 16 May 2017, 5% of the shares in issue were placed under the control of the directors to allot and issue, for such purposes and on such terms as the directors, in their discretion, may determine. At 19 March 2018, the total number of shares placed under the control of the directors was 20,536,908. No shares were issued during 2017 by the directors in terms of this authority, which will expire at the close of the next Annual General Meeting, unless renewed.

Shareholders will therefore be asked at the Annual General Meeting to be held on 16 May 2018, to renew this authority by placing 5% of the number of shares in issue under the control of the directors to allot and issue, for such purposes and on such

terms as
the directors, at their discretion, may determine.

In terms of the Listings Requirements of the JSE, shareholders may, subject to certain conditions, authorise the directors to issue
the ordinary shares held under their control for cash other than by means of a rights offer to shareholders. To enable the directors
of the company to take advantage of favourable business opportunities which may arise for the issue of such ordinary shares for
cash, without restriction, for the benefit of the company, shareholders will be asked to consider an ordinary resolution to this effect
at the Annual General Meeting to be held on 16 May 2018.

Shareholders will also be asked to approve as a general authority, the acquisition by the company, or a subsidiary of the
company, of its own shares from its issued ordinary share capital for certain specific housekeeping reasons.

DEPOSITARY INTERESTS

American Depositary Shares

At 31 December 2017, the company had in issue, through The Bank of New York Mellon as Depositary and listed on the New
York Stock Exchange (NYSE) 159,347,405 (2016: 176,085,993), American Depositary Shares (ADSs). Each ADS is equal to one
AngloGold Ashanti ordinary share. At 28 February 2018, there were 161,129,684 ADSs in issue and listed on the NYSE.

CHESS Depositary Interests

At 31 December 2017, the company had in issue, through the Clearing House Electronic Sub-register System (CHESS), and
listed on the Australian Securities Exchange (ASX), 90,233,125 (2016: 90,030,840) CHESS Depositary Interests (CDI). At
28 February 2018
there were 90,613,195 CDI’s in issue. Every five CDIs are equivalent to one AngloGold Ashanti ordinary share
and carry the right to one vote.

ANNUAL FINANCIAL STATEMENTS
2017

25

Ghanaian Depositary Shares

At 31 December 2017, the company had in issue, through NTHC Limited as Depositary and listed on the Ghana Stock Exchange
(GhSE), 15,959,100 Ghanaian Depositary Shares (GhDSs) (2016: 16,125,300). The register as at 28 February 2018 remained
unchanged. Every 100 GhDSs are equivalent to one underlying AngloGold Ashanti ordinary share and carry the right to one vote.

ANGLOGOLD ASHANTI SHARE INCENTIVE SCHEME

AngloGold Ashanti operates a share incentive scheme through which Executive Directors, members of the Executive Committee
and other management groups of the company and its subsidiaries are given the opportunity to acquire shares in the company.

The intention of the incentive scheme is to ensure that the medium to long term interests of the executive and shareholders are
aligned, providing rewards to the executives and wealth creation opportunities to the shareholders when the strategic performance drivers are achieved.

Non-Executive Directors are not eligible to participate in the share incentive scheme.

Employees participate in the share incentive scheme to the extent that they are granted options or rights to acquire shares and
accept them. All options or rights which have not been exercised within ten years from the date of grant, automatically expire.

The incentives offered by AngloGold Ashanti are reviewed periodically to ensure that they remain globally competitive, so as to
attract, reward and retain managers of the highest calibre. As a result, several types of incentives, each with their own issue and
vesting criteria, have been granted to employees. These are collectively known as the “AngloGold Ashanti Share Incentive
Scheme” or “Share Incentive Scheme”.

Although the Remuneration and Human Resources Committee has the discretion to incentivise employees through the issue of
shares, only options or awards have so far been granted.

The type and vesting criteria of the options or awards granted are:

BONUS SHARE PLAN (BSP)

The granting of awards in terms of the BSP was approved by shareholders at the Annual General Meeting held on 29 April 2005.

The Scheme has undergone a number of changes, each approved by the shareholders. Currently, each award made in respect
of the BSP entitles the holder to acquire one ordinary share at “nil” cost, provided that the participant remains in the employ of the
company at the date of vesting unless an event, such as death, retirement or redundancy occurs, which may result in a pro-rata
allocation of awards and an earlier vesting date.

The Executive Committee members receive an allocation of 150 percent of their cash bonus while all other participating
employees receive a 120 percent matching. The vesting period runs over two years with 50 percent vesting 12 months after the
date of issue and the remaining 50 percent vesting 24 months after the date of issue.

LONG TERM INCENTIVE PLAN (LTIP)

The granting of awards in terms of the LTIP was approved by shareholders at the Annual General Meeting held on 29 April 2005.

Executive directors and selected senior management are eligible for participation. Each award made in respect of the LTIP entitles the holder to acquire one ordinary share at “nil” cost. Awards granted vest in three years from the date of grant, to the extent that the set company performance targets, under which the awards were made, are met, and provided that the participant remains in the employ of the company at the date of vesting, unless an event, such as death, retirement or redundancy occurs, which may result in a pro-rata allocation of awards and an earlier vesting date. Awards for 2016 and 2017 will be cash settled in lieu of share awards.

The table below reflects the total number of options/awards that are available for issue in terms of the Share Incentive Scheme:

	2017 Options/Awards	**2016 Options/Awards**
At 1 January	**1,252,708**	1,992,078

At 31 December	**1,057,617**	1,252,708

ANNUAL FINANCIAL STATEMENTS
2017

26

CO-INVESTMENT PLAN (CIP)

To assist executives in meeting their Minimum Shareholding Requirements (MSR's) with effect from February 2013, they were given the opportunity, on a voluntary basis, to participate in the Co-Investment Plan (CIP), and this has been adopted based on the following conditions: Executives are allowed to take up to 50% of their after tax cash bonus to participate in a further matching scheme by purchasing shares in AngloGold Ashanti, and the company will match their initial investment into the scheme at 150%, with vesting over a two-year period in equal tranches.

DEFERRED SHARE PLAN (DSP)

On 16 May 2017, the shareholders approved the introduction of the Deferred Share Plan to replace both the BSP and LTIP with effect from 1 January 2018. The DSP, designed with feedback from shareholders in mind, aims to better align the interests of company management with those of shareholders by, among others: rewarding decision-making that promotes the long term health of the business by increasing the maximum vesting period of shares from two years to a maximum vesting period of five years, and introducing a claw-back provision; reducing the impact of uncontrollable factors, like gold price and currency fluctuations, in determining remuneration; providing better incentive for prudent, value-adding capital allocation; capping the number of shares that can be issued under the DSP in any given year to 1% of total shares in issue; and providing greater incentives for excellence in the broad area of sustainability, which covers the safety, environmental, governance, community relations and human capital disciplines.

The first awards under this scheme will be made in the 2019 calendar year for the 2018 performance year.

CHANGES IN OPTIONS AND AWARDS

In accordance with the JSE Listings Requirements and the rules of the AngloGold Ashanti Share Incentive Scheme, the changes in options and awards granted and the ordinary shares issued as a result of the exercise of options and awards during the period 1 January 2017 to 28 February 2018 are disclosed below:

ANNUAL FINANCIAL STATEMENTS
2017
27

DIVIDEND POLICY

Dividends are proposed by, and approved by the board of directors of AngloGold Ashanti, based on the company's financial performance. The dividend policy provides for an annual dividend to be based on 10% of the free cash flow, before growth capital expenditure, generated by the business for that financial year. Furthermore, this is subject to the board exercising its discretion on an annual basis, after taking into consideration the prevailing market conditions, balance sheet flexibility and future capital commitments of the group.

Consequently, the quantum of the dividend payout is expected to be volatile as it is based on a free cash flow metric that is subject to market conditions and is impacted by the level of funding of sustaining capital expenditure. In 2017, due to the significant capital reinvestment that the company made at its existing operations, sustaining capital expenditure increased by 19% to $829m when compared to the prior year. In line with the approved dividend policy, the board has applied its discretion in adjusting the 2017 free cash flow, pre-growth capital expenditure metric for the $49m abnormal South African retrenchment costs paid. For the year ended 31 December 2017, the directors of AngloGold Ashanti declared a gross cash dividend per ordinary share of 70 South African cents (assuming an exchange rate of ZAR 11.6641/$, the gross dividend payable per ADS is equivalent to 6 US cents).

The Board is satisfied that subsequent to the dividend declaration, the Company has adequate balance sheet flexibility and sufficient funding facilities available to withstand market volatility. The continuation of the dividend reflects capital discipline and management's commitment to improving shareholder returns.

Dematerialised shareholders on the South African share register will receive payment of their dividends electronically, as provided for by Strate. Certificated shareholders, who have elected to receive their dividends electronically, will be paid via the company's electronic funds transmission service. Certificated shareholders who have not yet elected to receive dividend payments electronically, are encouraged to mandate this method of payment for all future dividends.

WITHHOLDING TAX

Withholding tax of 20% on dividends and other distributions payable to shareholders are in effect from 1 March 2017.

BORROWINGS

The company's borrowing powers are unlimited pursuant to the company's Memorandum of Incorporation. As at 31 December 2017, the group's gross borrowings totalled $2,268m (2016: $2,178m).

OTHER MATTERS
SIGNIFICANT EVENTS DURING THE YEAR UNDER REVIEW

Arbitration Proceedings against the Government of Tanzania - On 13 July 2017, AngloGold Ashanti announced that its indirect subsidiaries, Samax Resources Limited and Geita Gold Mining Limited, took the precautionary step of safeguarding their interests under the Mine Development Agreement (MDA), by commencing arbitration proceedings under the rules of the United Nations Commission on International Trade Law, as clearly provided for in the MDA.

Disposal of Kopanang Mine, The West Gold Plant and Related Infrastructure – On 19 October 2017, AngloGold Ashanti announced that it had entered into an agreement to dispose of Kopanang Mine, the West Gold Plant and related infrastructure to Heaven-Sent SA Sunshine Investment Company Limited ("Heaven-Sent"), a Chinese capital management company headquartered in Hong Kong.

Sale of Various Assets in the Vaal River Region, including the Moab Khotsong Mine to Harmony– On 19 October 2017, AngloGold Ashanti announced that it had entered into a sale and purchase agreement to dispose of various assets situated in the Vaal River region of South Africa to Harmony Gold Mining Company Limited ("Harmony") for a cash consideration of $300m.

SIGNIFICANT EVENTS SUBSEQUENT TO YEAR-END

On 20 February 2018, the group announced the following updates:

- The declaration of the maiden Ore Reserve at Gramalote; and
- That agreement had been reached with the Government of Ghana for the redevelopment of Obuasi Gold mine in Ghana, subject to ratification by Ghana's parliament of the relevant fiscal and development agreements. These agreements have been signed by the Government and ratification is scheduled during the current parliamentary sitting.

On 28 February 2018, the conditions precedent were fulfilled for the sales of Moab Khotsong and Kopanang mines and the transactions were completed and ownership of Moab Khotsong and Kopanang mines transferred to Harmony and Heaven-Sent respectively.

The Democratic Republic of the Congo (DRC) has recently promulgated a new mining code that makes a number of changes to the operating environment for the DRC's extractive industries, including those in its mining, and oil and gas sectors. On 8 March 2018, AngloGold Ashanti announced that a meeting had been held between the DRC president and mining industry representatives to discuss the new mining code prior to its promulgation. The DRC government has agreed to continue discussions with the mining industry representatives post the promulgation of the new mining code regarding issues existing in the current agreement and the implementation of the new mining code. AngloGold Ashanti is in full support of Randgold Resources, our partner and the operator in the Kibali joint venture, in its continued engagement with the DRC government.

MATERIAL CHANGE

There has been no material change in the financial results or trading position of the AngloGold Ashanti group since the publication of the report for the six months and year ended 31 December 2017 on 20 February 2018 and the date of this report.
The results for the year ended 31 December 2017 were audited by Ernst & Young Inc., who issued an unqualified audit report on 19 March 2018.

ANNUAL GENERAL MEETINGS

At the 73rd Annual General Meeting held on Tuesday, 16 May 2017, shareholders passed resolutions relating to the:

- Re-election of Messrs Pityana and Ruston and Ms Richter as non-Executive Directors;
- Election of Mrs SV Zilwa as a non-Executive Director;
- Reappointment and appointment of the Audit and Risk Committee members being, Messrs Gasant, Kirkwood, Ruston and Garner, Ms Richter and Mrs Zilwa;
- Re-appointment of Ernst & Young Inc. as External Auditors of the company;
- General authority to directors to allot and issue ordinary shares;
- Non-binding advisory endorsement of the AngloGold Ashanti remuneration policy;

- Remuneration of non-executive directors, which remains unchanged from the previous year;
- General authority to acquire the company's own shares;
- Approval of the DSP;
- Authority to issue ordinary shares pursuant to the DSP;
- General authority to directors to issue for cash, those ordinary shares which the directors are authorised to allot and issue;
- General authority to provide financial assistance in terms of sections 44 and 45 of the Companies Act;
- Amendment of the company's Memorandum of Incorporation; and
- Directors' authority to implement special and ordinary resolutions.

Notice of the 74th Annual General Meeting to be held in the Auditorium, 76 Rahima Moosa Street, Newtown, Johannesburg at 11:00 (South African time) on 16 May 2018, is printed as a separate document and distributed to shareholders in accordance with the Companies Act.

DIRECTORATE AND SECRETARY

During the period 1 January 2017 to 31 December 2017, Sindiswa Zilwa was appointed as an Independent Non-Executive Director with effect from 1 April 2017 and Professor Wiseman Nkuhlu retired as a non-executive director from the board on 16 May 2017.

Company Secretary

There was no change to the office of the Company Secretary during 2017. The name, business and postal address of the Company Secretary are set out under Administrative Information on page 136.

Directors' and Prescribed Officers' interests in AngloGold Ashanti shares

The interests of Directors, Prescribed Officers and their associates in the ordinary shares of the company at 31 December 2017, individually did not exceed 1% of the company's issued ordinary share capital and are disclosed in note 32 of the group financial statements.

Details of service contracts of Directors and Prescribed Officers

In accordance with Section 30(4)(e) of the Companies Act the salient features of the service contracts of Directors and Prescribed Officers have been disclosed in the Remuneration Report, which is included in the Integrated Report 2017.

ANNUAL FINANCIAL STATEMENTS

The financial statements set out fully the financial position, results of operations and cash flows of the group and the company for
the financial year ended 31 December 2017.

The directors of AngloGold Ashanti are responsible for the maintenance of adequate accounting records and the preparation of
the annual financial statements and related information in a manner that fairly presents the state of affairs of the company, in
conformity with the Companies Act and in terms of the JSE Listings Requirements.

The directors are also responsible for the maintenance of effective systems of internal control which are based on established
organisational structures and procedures. These systems are designed to provide reasonable assurance as to the reliability of the
annual financial statements, and to prevent and detect material misstatement and loss.

In preparing the annual financial statements, the group has complied with International Financial Reporting Standards (IFRS) and
used appropriate accounting policies supported by pragmatic judgements and estimates.

AngloGold Ashanti, through its Executive Committee, reviews its short-, medium- and long-term funding, treasury and liquidity
requirements and positions monthly. The board of directors also reviews these on a quarterly basis at its meetings.

Cash and cash equivalents, at 31 December 2017 amounted to $205m (2016: $215m), and together with cash budgeted to be
generated from operations in 2018 and the net incremental borrowing facilities available, are in management’s view, adequate to
fund operating, mine development, capital expenditure and financing obligations as they fall due for at least the next 12 months.

Taking these factors into account, the directors of AngloGold Ashanti have formed the judgement that, at the time of approving
the financial statements for the year ended 31 December 2017, it is appropriate to prepare these financial statements on a going
concern basis.
Based on the results of a formal documented review of the company’s system of internal controls and risk management, covering
both the adequacy in design and effectiveness in implementation, performed by the internal audit function during the year 2017:

- information and explanations provided by line management;
- discussions held with the external auditors on the results of the year-end audit; and
- the assessment by the Audit and Risk Committee,

the board has concluded that nothing has come to its attention that caused it to believe that the company's system of internal controls and risk management are not effective and that the internal financial controls do not form a sound basis for the preparation of reliable financial statements.

The directors are of the opinion that these financial statements fairly present the financial position of the company and group at 31 December 2017 and the results of their operations, changes in equity and cash flow information for the year then ended in accordance with IFRS.

The external auditor, Ernst & Young Inc., is responsible for independently auditing and reporting on the financial statements in conformity with International Standards on Auditing and the Companies Act of South Africa. Their unqualified opinion on these financial statements appears in the Independent Auditor's Report, on page 30 of this report.

The company will file a set of financial statements in accordance with IFRS in its annual report on Form 20-F as must be filed with the US Securities and Exchange Commission (SEC) by no later than 30 April 2018. Copies of the annual report on Form 20-F will be made available once the filing has been made, on request, from the Bank of New York Mellon, or from the company's corporate office detailed in the section Administrative Information. The SEC issued guidance in March 2017 that requires foreign private issuers to tag their financial statements in Form 20-F and Form 6-K filings in terms of XBRL.

INVESTMENTS

Particulars of the group's principal subsidiaries and operating entities are presented in this report on page 131.

INDEPENDENT AUDITOR'S REPORT

The Board of Directors and Shareholders of AngloGold Ashanti Limited

REPORT ON THE AUDIT OF THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

OPINION

We have audited the consolidated and separate financial statements of AngloGold Ashanti Limited set out on pages 35 to 132, which comprise the consolidated and separate statements of financial position as at 31 December 2017, and the consolidated and separate income statement, statement of comprehensive income, changes in equity and cash flows for the year then ended, and notes to the consolidated and separate financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated and separate financial statements present fairly, in all material respects, the consolidated and separate financial position of the Company as at 31 December 2017, and its consolidated and separate financial performance and consolidated and separate cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS) and the requirements of the Companies Act of South Africa.

BASIS FOR OPINION

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements* section of our report. We are independent of the Company in accordance with the Independent Regulatory Board for Auditors *Code of Professional Conduct for Registered Auditors (IRBA Code)*, the International Ethics Standards Board for Accountants *Code of Ethics for Professional Accountants (IESBA Code)* and other independence requirements applicable to performing the audit of the Company. We have fulfilled our other ethical responsibilities in accordance with the IRBA Code, IESBA Code, and in accordance with other ethical requirements applicable to performing the audit of the Company. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated
and separate financial statements of the current period. These matters were addressed in the context of our audit of the consolidated and separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate
opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that
context.

We have fulfilled the responsibilities described in the *Auditor's Responsibilities for the Audit of the Consolidated and Separate*
Financial Statements section of our report, including in relation to these matters. Accordingly, our audit included the performance
of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The
results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit
opinion on the accompanying financial statements.

Sale of Moab Khotsong and Kopanang mines
(consolidated and separate KAM)

The disposal of the Moab Khotsong and Kopanang mines, and some other associated assets, represent a significant change to the composition of the Company's South African operations, particularly the Vaal River operations.

We considered the disposal of these mining operations to be a key audit matter because the carrying values of these assets and liabilities are material and the identification and reclassification of these assets and liabilities as held for

Through discussions with management and reviews of minutes of meetings, we assessed management's plans to dispose of the Moab Khotsong and Kopanang mines.

We reviewed the executed sales and purchase agreements with the respective counterparties and verified that these agreements were signed by persons with the necessary authority to do so. We confirmed that the assets and liabilities that were reclassified as held for sale, were consistent with those listed in

sale is complex, particularly since all of the mining operations in South Africa are held within a single legal entity. The disposals will also significantly impact the strategic and operational activities of the remaining South African operations, and the account balances and related disclosures in the Company's consolidated and separate financial statements will be significantly impacted.

At 31 December 2017, the Company classified the disposal groups as held for sale. These assets and liabilities classified as held for sale amounted to $348m and $126m, respectively. An impairment charge of $149m was recorded to reduce the carrying amount of the Moab Khotsong mine's net assets to the lower of fair value less costs to sell and the carrying amount.

The consolidated disclosures are included in Note 23 and 36, and separate disclosures are included in Note 17 and Note 30.

the executed agreements.

For both the Kopanang and Moab Khotsong mines, we obtained management's calculation of fair value less costs to sell, which we compared to the carrying values of the cash generating units. We furthermore compared the inputs to the calculation to the sales and purchase agreement. Since the purchase consideration of the disposal of the Moab Khotsong mine is denominated in US dollars, we also considered the appropriateness of the foreign exchange rates used.

We considered the impact of current and deferred taxes as it relates to the disposal and reclassification of the assets and liabilities.

We considered the recoverability of the remaining cash generating units in the South African operations.

We performed walkthrough and control testing procedures relating to management's processes and controls in place to approve and account for the transactions.

We reviewed the disclosures, including post-balance sheet events, made by management and tested whether these met the requirements of IFRS 5. We assessed whether there were any changes to the plan of sale as at 31 December 2017.

Recoverability of asset carrying values
(Consolidated and Separate KAM)

During the current year, impairment assessments were performed for the cash generating units where indicators of impairment were identified, or where goodwill had been allocated to.

Determining the recoverable amount of mining assets is dependent on a number of assumptions that require estimation and judgement, which include economic mineral reserves and resources, associated life of mine plans, the weighted average cost of capital, inflation forecasts, future gold prices and exchange rates. These areas required additional audit effort and executive involvement due to their technical nature.

The consolidated and separate disclosures are included in the Consolidated Note 14 and Separate Note 9, respectively.

We evaluated the appropriateness of management's processes, and reviewed other supporting information, to identify cash generating units and determine whether impairment indicators existed for the respective cash generating units. We furthermore also reviewed management's methods, processes and controls in place to determine the carrying values, and the associated recoverable amounts, of each cash generating units.

We compared the mine plans, including the mineral reserves and resources quantities to the plans that were approved by the directors
, and performed audit work on management's processes and controls related to the declaration of mineral reserves and resources that were included these business plans.

Our audit procedures included involving experts to critically assess management's assumptions in their valuation models, including weighted average cost of capital, inflation forecasts, future gold prices and exchange rates. We also considered the appropriateness and reasonability of key operational and cash flow assumptions, including production, resultant revenue, capital expenditure and cost movements.

We considered the appropriateness of the related disclosures in the consolidated and separate financial statements.

Tax exposures (Consolidated)

The Company is party to direct and indirect tax exposures from tax authorities in several countries in which it operates. The tax exposures in South America amount to $201m. Management’s assessment of these exposures has been disclosed in the consolidated financial statements in the Contingencies Note 33. In South Africa and Continental Africa the majority of the direct tax exposures are considered remote and are therefore not disclosed. Indirect tax positions have been provided for

We focused our audit effort on the significant direct and indirect tax exposures in South America, South Africa and Continental Africa.

We inspected relevant communications with tax authorities. With the assistance of our tax experts, our audit procedures included assessing the nature and amount of the tax exposures and the reasonableness of management’s and their expert’s conclusions on whether exposures are probable, contingent or remote.

where appropriate.

The tax exposures are subject to judgement both in relation to interpretation of local tax regulations and the recognition and measurement of any potential provision against such exposures. Due to the aforementioned factors greater audit effort and executive involvement was required.

Where exposures are assessed as probable, we evaluated the reasonableness of the amounts provided with respect to those exposures.

We considered the appropriateness of the related disclosure in the consolidated financial statements.

Environment rehabilitation obligations (consolidated and separate KAM)

At 31 December 2017, the environmental rehabilitation provision amounted to $713m ($695m as non-current liabilities and $18m as current liabilities) in the consolidated financial statements, and R803m in the separate financial statements.

We focussed on this area due to the significance of the provision in the consolidated and separate financial statements as well as the judgemental nature of the provision. The determination of the provision is based on, inter alia, judgements and estimates of current damage caused, nature, timing and amount of future costs to be incurred to rehabilitate the mine sites, estimates of future inflation, exchange rates and discount rates. Influenced by ongoing the mining activity and the annual revisions to future mine plans, the significant judgements and estimates relating to these obligations are revised each year.

The consolidated and separate disclosures are included in Consolidated Note 26 and Separate Note 20 Environmental rehabilitation and other provisions, respectively.

We performed walkthrough and control testing procedures relating to management's processes and controls in place to approve and accurately determine the provisions raised.

With the assistance of our environmental and valuation experts, our audit procedures included the assessment of the reasonability of management's macro-economic assumptions in their rehabilitation models. The most significant of these assumptions were the risk free interest rates, expected inflation and exchange rates as these have the largest quantitative effect on the provision balance.

We tested the mathematical accuracy of the valuation models.

We compared the timing of the expected cash flows with reference to the expected life of mine plans at the respective regions. We compared the current year cash flow assumptions to those of prior year, and tested the reasonableness of management's explanations where these have changed or deviated. We tested the reasonableness of the cost rates applied with reference to publicly available information as well as recent rehabilitation activities. We inquired from operational management whether additional environmental disturbance occurred that will require additional rehabilitation in future, and we corroborated this understanding. We also assessed the integrity of the financial rehabilitation models. We read the reports prepared by management's internal experts and external experts, where these had been engaged by management, to support the provision.

We considered the appropriateness of the related disclosure in the consolidated and separate financial statements.

OTHER INFORMATION

The directors are responsible for the other information. The other information comprises the Audit and Risk Committee – Chairman's Letter, the Chief Financial Officer's Review, the Company Secretary's Certificate and the Directors' Report in the Annual Financial Statement as required by the Companies Act of South Africa, as well as the directors' approval and affirmation of financial statements. It also includes the Integrated Report and the Reserve and Resource Statement which we obtained prior to the date of this report. Other information does not include the consolidated and separate financial statements and our auditor's report thereon.

Our opinion on the consolidated and separate financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the consolidated and separate financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information obtained prior to the date of this auditor’s report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

When we read the Annual Financial Statements, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

RESPONSIBILITIES OF THE DIRECTORS FOR THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

The directors are responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the consolidated and separate financial statements. We are responsible for the direction, supervision and performance of the Company audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independenc e, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

In terms of the IRBA Rule published in Government Gazette Number 39475, dated 04 December 2015, we report that Ernst & Young Inc., and its predecessor firm, has been the auditor of AngloGold Ashanti Limited for seventy-four years. Ernst & Young Inc. was appointed as auditor of Vaal Reefs Exploration and Mining Company Limited in 1944. In 1998 all of Anglo American's other individually listed gold mines, which were not audited by Ernst & Young Inc., or its predecessor firm, were merged into Vaal Reefs Exploration and Mining Company Limited. Vaal Reefs Exploration and Mining Company Limited was renamed AngloGold Limited in 1998, and in 2004 to AngloGold Ashanti Limited. Ernst & Young Inc. was retained as auditor of AngloGold Limited (and AngloGold Ashanti Limited) and has been the auditor of the expanded Company for nineteen years. We confirm that we are independent in accordance with the Independent Regulatory Board for Auditors Code of Professional Conduct for Registered Auditors and other independence requirements applicable to the independent audit of AngloGold Ashanti Limited.

(1)
Other capital reserves include a surplus on disposal of company shares held by companies prior to the formation of AngloGold Ashanti Limited of $11m (2016: $10m; 2015: $9m), surplus on equity transaction of joint venture of $36m (2016: $36m; 2015: $36m), equity items for share-based payments of $75m (2016: $68m; 2015: $69m) and other reserves.

(2)
Included in accumulated losses are retained earnings totalling $287m (2016: $250m; 2015: $210m) arising at the equity accounted investments and certain subsidiaries which may not be remitted without third party consent.

(3)
Cash flow hedge reserve represents the effective portion of fair value gains or losses in respect of cash flow hedges that expired in prior periods. The cash flow hedge reserve shall remain in equity and will unwind over the life of Serra Grande mine.

(4)
Available-for-sale reserve represents fair value gains or losses on available-for-sale financial assets.

GROUP – NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December

1 ACCOUNTING POLICIES

STATEMENT OF COMPLIANCE

The consolidated and company financial statements are prepared in compliance with International Financial Reporting Standards (IFRS) and Interpretations of those standards, as issued by the International Accounting Standards Board (IASB) in the English language, the South African Institute of Chartered Accountants Financial Reporting Guides as issued by the Accounting Practices Committee, Financial Reporting Pronouncements as issued by Financial Reporting Standards Council, JSE Listings Requirements and in the manner required by the South African Companies Act, 2008.

NEW STANDARDS AND INTERPRETATIONS ISSUED

The financial statements have been drawn up on the basis of accounting standards, interpretations and amendments effective at the beginning of the accounting period on 1 January 2017. The adoption of the new standards, interpretations and amendments effective from 1 January 2017 had no material impact on the group.

AngloGold Ashanti assesses the significance of new standards, interpretations and amendments to standards in issue that are not yet adopted but are likely to affect the financial reporting in future years. We have identified that IFRS 15 "Revenue from Contracts with Customers" and IFRS 9 "Financial Instruments", both of which have an effective date of 1 January 2018, are likely to affect future financial reporting.

IFRS 15 Revenue

Management has assessed the potential impact of IFRS 15 on the financial statements of the group and concluded that the group does not sell product based on multiple-element arrangements and it does not sell product on a provisional or variable pricing basis and as such the new standard does not have a significant impact on the timing or amount of the group's revenue recognition. However, the adoption of IFRS 15 will result in the presentation of by-product revenue in Revenue from product sales where previously by-product revenue was included in cost of sales. Revenue from product sales includes gold income and by-product revenue. This change in classification results in a corresponding increase in costs of sales, and therefore will not have an impact on previously reported gross profit.

As currently reported:

US dollar millions	**2017**	**2016**	**2015**
Revenue	**4,543**	4,254	4,174
Gold income	**4,356**

By-products revenue for the years ended 2017, 2016 and 2015 ($154m, $138m and $127m respectively) is included in the
Revenue line, but is offset and thus reduces cost of sales in the detailed income statement.

On adoption of IFRS 15, AngloGold Ashanti will disclose revenue from all product sales, including by-products sales in
Revenue from product sales in the detailed income statement. Accordingly, the detailed income statement would be restated for the effects of adopting IFRS 15 as follows:

AngloGold Ashanti intends to apply IFRS 15 retrospectively to each prior reporting period presented in accordance with IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors*.

IFRS 9 Financial Instruments

The group's financial assets include debt instruments (held to maturity bonds and negotiable certificates of deposit), cash restricted for use and cash and cash equivalents which will be subject to IFRS 9 expected credit loss model as they are to be carried at amortised cost. The accounting policy for listed equity investments will depend on the nature of the listed investment. Listed equity investments which are held to meet rehabilitation liabilities in future will be classified as fair value through profit and loss. Listed equity investments held for other purposes will be classified as fair value through other comprehensive income. Financial liabilities are currently carried at amortised cost with no requirements to change their recognition or presentation under IFRS 9. We have evaluated the possible impact of the adoption of IFRS 9 including the expected credit loss model and we do not expect the adoption to have a significant impact on total assets, total liabilities or the results of the group.

IFRS 16 Leases

In addition, IFRS 16 Leases, with an effective date of 1 January 2019, is likely to affect future financial reporting and management is still in the process of assessing all of the potential consequences arising out of the adoption of this standard. With the removal of the operating lease classification, leases that are within the scope of IFRS 16 will result in increases in assets and liabilities. We expect a likely increase in the depreciation expense and also an increase in cash flows from operating activities as the lease payments will be recorded as financing outflows in our cash flow statement.

Management expects that the mining and drilling contracts which are not classified as finance leases under the current accounting standards (IAS 17 and IFRIC 4), will potentially have the most impact on the group's results on adoption of IFRS 16.

The significant accounting principles applied in the presentation of the group and company annual financial statements are set out below. The accounting policies adopted are detailed in Annexure A: "Summary of significant accounting policies".

1.1 BASIS OF PREPARATION

The financial statements are prepared according to the historical cost convention, except for the revaluation of certain financial instruments to fair value. The group's accounting policies as set out below are consistent in all material respects with those applied in the previous year.

The group financial statements are presented in US dollars.

Based on materiality, certain comparatives in the notes have been aggregated and comparatives have been restated to accord with current year disclosures.

The group financial statements incorporate the financial statements of the company, its subsidiaries and its interests in joint ventures and associates. The financial statements of all material subsidiaries, the Environmental Rehabilitation Trust Fund, joint ventures and associates, are prepared for the same reporting period as the holding company, using the same accounting policies.

Subsidiaries are all entities (including structured entities) over which the group has control. The group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Control would generally exist where the group owns more than 50% of the voting rights, unless the group and other investors collectively control the entity where they must act together to direct the relevant activities. In such cases, as no investor individually controls the entity the investment is accounted for as an equity method investment or a joint operation. Subsidiaries are fully consolidated from the date on which control is transferred to the group. They are de-consolidated from the date on which control ceases. The group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control.

Disclosures for non-controlling interests are assessed by reference to consolidated non-controlling interest.

Intra-group transactions, balances and unrealised gains and losses on transactions between group companies, including any resulting tax effect are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

Subsidiaries are accounted for at cost and are adjusted for impairments, where appropriate, in the company financial statements.

1.2 SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES

USE OF ESTIMATES

The preparation of the financial statements requires the group's management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The determination of estimates requires the exercise of judgement based on various assumptions and other factors such as historical experience, current and expected economic conditions, and in some cases actuarial techniques. Actual results could differ from those estimates.

The more significant areas requiring the use of management estimates and assumptions relate to Ore Reserve that are the basis of future cash flow estimates and unit-of-production depreciation, depletion and amortisation calculations; environmental, reclamation and closure obligations; asset impairments/reversals (including impairments of goodwill); and write-downs of inventory to net realisable value. Other estimates include employee benefit liabilities and unrecognised tax positions.

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The judgements that management has applied in the application of accounting policies, and the estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

Carrying value of tangible assets

The majority of mining assets are amortised using the units-of-production method where the mine operating plan calls for production from a well-defined proved and probable Ore Reserve.

For other tangible assets, the straight-line method is applied over the estimated useful life of the asset which does not exceed the estimated mine life based on proved and probable Ore Reserve as the useful lives of these assets are considered to be limited to the life of the relevant mine.

The calculation of the units-of-production rate of amortisation could be impacted to the extent that actual production in the future is different from current forecast production based on proved and probable Ore Reserve. This would generally arise when there are significant changes in any of the factors or assumptions used in estimating Ore Reserve.

These factors could include:

- changes in proved and probable Ore Reserve;
-

- the grade of Ore Reserve may vary significantly from time to time;
- differences between actual commodity prices and commodity price assumptions;
- unforeseen operational issues at mine sites; and
- changes in capital, operating, mining, processing and reclamation costs, discount rates and foreign exchange rates.

Changes in proved and probable Ore Reserve could similarly impact the useful lives of assets amortised on the straight-line method, where those lives are limited to the life of the mine.

The group has a number of surface mining operations that are in the production phase for which production stripping costs are incurred. The benefits that accrue to the group as a result of incurring production stripping costs include (a) ore that can be used to produce inventory and (b) improved access to further quantities of material that will be mined in future periods.

The production stripping costs relating to improved access to further quantities of material in future periods are capitalised as a stripping activity asset, if and only if, all of the following are met:

- It is probable that the future economic benefit (improved access to the orebody) associated with the stripping activity will flow to the group;
- The group can identify the component of the orebody for which access has been improved; and
- The costs relating to the stripping activity associated with that component or components can be measured reliably.

Components of the various orebodies at the operations of the group are determined based on the geological areas identified for each of the orebodies and are reflected in the Ore Reserve reporting of the group. In determining whether any production stripping costs should be capitalised as a stripping activity asset, the group uses three operational guidance measures; two of which relate to production measures, while the third relates to an average stripping ratio measure.

Once determined that any portion of the production stripping costs should be capitalised, the group determines the amount of the production stripping costs that should be capitalised with reference to the average mine costs per tonne of the component and the actual waste tonnes that should be deferred. Stripping activity assets are amortised on the units-of-production method based on the Ore Reserve of the component or components of the orebody to which these assets relate.

This accounting treatment is consistent with that for stripping costs incurred during the development phase of a pit, before production commences, except that stripping costs incurred during the development phase of a pit, before production commences, are amortised on the units-of-production method based on the Ore Reserve of the pit.
Deferred stripping costs are included in 'Mine development costs', within tangible assets. These costs form part of the total investment in the relevant cash-generating unit, which is reviewed for impairment if events or a change in circumstances indicate that the carrying value may not be recoverable. Amortisation of stripping activity assets is included in operating costs.

The group reviews and tests the carrying value of tangible assets when events or changes in circumstances indicate that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets, which is generally at the individual mine level. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of goodwill and tangible assets are inherently uncertain and could materially change over time and impact the recoverable amounts. The cash flows and value in use are significantly affected by a number of factors including published reserves, resources, exploration potential and production estimates, together with economic factors such as spot and future metal prices, discount rates, foreign currency exchange rates, estimates of costs to produce reserves and future capital expenditure. At the reporting date the group assesses whether any of the indicators which gave rise to previously recognised impairments have changed such that the impairment loss no longer exists or may have decreased. The impairment loss is then assessed on the original factors for reversal and if indicated, such reversal is recognised.

The recoverable amount is estimated based on the positive indicators. If an impairment loss has decreased, the carrying amount is recorded at the recoverable amount as limited in terms of IAS 36.

The carrying value of tangible assets at 31 December 2017 was $3,742m (2016: $4,111m; 2015: $4,058m). The impairment and derecognition of tangible assets recognised in the consolidated financial statements for the year ended 31

December
2017 was $288m (2016: $3m; 2015: $5m).

Carrying value of goodwill and intangible assets

Where an investment in a subsidiary, joint venture or an associate is made, any excess of the consideration transferred over the fair value of the attributable Mineral Resource including value beyond proved and probable Ore Reserve, exploration properties and net assets is recognised as goodwill.

Intangible assets that have an indefinite useful life and separately recognised goodwill are not subject to amortisation and are tested annually for impairment and whenever events or changes in circumstance indicate that the carrying amount may not be recoverable. Assets that are subject to amortisation are tested for impairment whenever events or changes in circumstance indicate that the carrying amount may not be recoverable.

An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units).

An individual operating mine is not a typical going-concern business because of the finite life of its reserves. The allocation of goodwill to an individual mine will result in an eventual goodwill impairment due to the wasting nature of the mine reporting unit. In accordance with the provisions of IAS 36 "Impairment of Assets", the group performs its annual impairment review of assigned goodwill during the fourth quarter of each year.

The carrying value of goodwill in the consolidated financial statements at 31 December 2017 was $127m (2016: $126m; 2015: $126m). The impairment of goodwill recognised in the consolidated financial statements for the year ended 31 December 2017 was $9m (2016: nil; 2015: nil).

Income taxes

The group is subject to income taxes in numerous jurisdictions. Significant judgement is required in determining the worldwide provision for income taxes due to the complexity of legislation. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The group recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

The group recognises the net future tax benefit related to deferred income tax assets to the extent that it is probable that the deductible temporary differences will reverse in the foreseeable future. Assessing the recoverability of deferred income tax assets requires the group to make significant estimates related to expectations of future taxable income. Estimates of future taxable income are based on forecast cash flows from operations and the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the group to realise the net deferred tax assets recorded at the reporting date could be impacted.

Additionally, future changes in tax laws in the jurisdictions in which the group operates could limit the ability of the group to obtain tax deductions in future periods.

Carrying values of the group at 31 December 2017:

- deferred tax asset: $4m (2016: $4m; 2015: $1m);
- deferred tax liability: $363m (2016: $496m; 2015: $514m);
- taxation liability: $53m (2016: $111m; 2015: $91m); and
- taxation asset: $3m (2016: $14m; 2015: $27m).

Unrecognised value of deferred tax assets: $470m (2016: $477m; 2015: $452m).

Provision for environmental rehabilitation obligations

The group’s mining and exploration activities are subject to various laws and regulations governing the protection of the environment. The group recognises management’s best estimate for decommissioning and restoration obligations in the period in which they are incurred. Future changes to environmental laws and regulations, life of mine estimates, inflation rates, foreign currency exchange rates and discount rates could affect the carrying amount of this provision.

The carrying amount of the rehabilitation obligations for the group at 31 December 2017 was $724m (2016: $705m; 2015: $683m).

Stockpiles and metals in process

Costs that are incurred in or benefit the production process are accumulated in stockpiles and metals in process values. Net realisable value tests are performed at least annually and represent the estimated future sales price of the product,

based
on prevailing and long-term metals prices, less estimated costs to complete production and bring the product to sale.

Surface and underground stockpiles and metals in process are measured by estimating the number of tonnes added and removed from the stockpile, the number of contained ounces based on assay data, and the estimated recovery percentage
based on the expected processing method. Stockpile ore tonnages are verified by periodic surveys.

Although the quantities of recoverable metal are reconciled by comparing the grades of ore to the quantities of metals actually recovered (metallurgical balancing), the nature of the process inherently limits the ability to precisely monitor recoverability levels. As a result, the metallurgical balancing process is constantly monitored and engineering estimates are
refined based on actual results over time.

Variations between actual and estimated quantities resulting from changes in assumptions and estimates that do not result
in write-downs to net realisable value are accounted for on a prospective basis.

The carrying value of inventories (excluding finished goods and mine operating supplies) for the group at 31 December
2017 was $424m (2016: $397m; 2015: $393m).

Recoverable tax, rebates, levies and duties

In a number of countries, particularly in Continental Africa, AngloGold Ashanti is due refunds of indirect tax which remain
outstanding for periods longer than those provided for in the respective statutes.

In addition, AngloGold Ashanti has unresolved tax disputes in a number of countries, particularly in Continental Africa and in
Brazil. If the outstanding input taxes are not received and the tax disputes are not resolved in a manner favourable to AngloGold Ashanti, it could have a material adverse effect upon the carrying value of these assets.

The net carrying value of recoverable tax, rebates, levies and duties for the group at 31 December 2017 was $174m (2016: $135m; 2015: $94m).

Post-retirement obligations

The determination of AngloGold Ashanti's obligation and expense post - retirement liabilities, depends on the selection of certain assumptions used by actuaries to calculate amounts. These assumptions include, among others, the discount rate, the expected long-term rate of return of plan assets, health care inflation costs, rates of increase in compensation costs and the number of employees who reach retirement age before the mine reaches the end of its life. While AngloGold Ashanti believes that these assumptions are appropriate, significant changes in the assumptions may materially affect post-retirement obligations as well as future expenses, which may result in an impact on earnings in the periods that the changes in these assumptions occur.

The carrying value of the post-retirement plans at 31 December 2017 was $122m (2016: $118m; 2015: $89m).

Ore Reserve estimates

An Ore Reserve estimate is an estimate of the amount of product that can be economically and legally extracted from the group's properties.
In order to calculate the Ore Reserve, estimates and assumptions are required about a range of geological, technical and economic factors, including quantities, grades, production techniques, recovery rates, production costs, transport costs, commodity demand, commodity prices and exchange rates.

Estimating the quantity and/or grade of the Ore Reserve requires the size, shape and depth of orebodies to be determined by analysing geological data such as the logging and assaying of drill samples. This process may require complex and difficult geological judgements and calculations to interpret the data.

The group is required to determine and report its Ore Reserve in accordance with the South African Code for the reporting of Exploration Results, Mineral Resources and Mineral Reserves (The SAMREC Code) 2016 Edition.

Because the economic assumptions used to estimate changes in the Ore Reserve from period to period, and because additional geological data is generated during the course of operations, estimates of the Ore Reserve may change from period to period. Changes in the reported Ore Reserve may affect the group's financial results and financial position in a number of ways, including the following:

- asset carrying values may be affected due to changes in estimated future cash flows;
- depreciation, depletion and amortisation charged in the income statement may change where such charges are determined by the units-of-production method, or where the useful economic lives of assets change;
-

overburden removal costs, including production stripping activities, recorded on the statement of financial position or charged in the income statement may change due to changes in stripping ratios or the units-of-production method of depreciation;

- decommissioning site restoration and environmental provisions may change where changes in the estimated Ore Reserve affect expectations about the timing or cost of these activities; and
- the carrying value of deferred tax assets may change due to changes in estimates of the likely recovery of the tax benefits.

Development expenditure

Development activities commence after project sanctioning by the appropriate level of management. Judgement is applied by management in determining when a project has reached a stage at which economically recoverable reserves exist such that development may be sanctioned. In exercising this judgement, management is required to make certain estimates and assumptions similar to those described in the accounting policy for exploration and evaluation assets. Any such estimates and assumptions may change as new information becomes available. If, after having started the development activity, a judgement is made that a development asset is impaired, the appropriate amount will be written off to the income statement.

Provision for silicosis

Significant judgement is applied in estimating the costs that will be incurred to settle the silicosis class action claims and related expenditure. The final costs may differ from current cost estimates. The provision is based on actuarial assumptions including:

- silicosis prevalence rates;
- estimated settlement per claimant;
- benefit take-up rates;
- disease progression rates;
- timing of cashflows; and
- discount rate.

Management believes the assumptions are appropriate, however changes in the assumptions may materially affect the provision and final costs of settlement. In prior years, a silicosis provision was not raised as a reliable estimate could not be determined.

The carrying value of the silicosis provision at 31 December 2017 was $63m (2016: nil; 2015: nil).

Contingencies

By their nature, contingencies will only be resolved when one or more future events occur or fail to occur. The assessment of such contingencies inherently involves the exercise of significant judgement and estimates of the outcome of future events. Such contingencies include, but are not limited to environmental obligations, litigation, regulatory proceedings, tax matters and losses resulting from other events and developments.

Firstly, when a loss is considered probable and reasonably estimable, a liability is recorded in the amount of the best estimate for the ultimate loss. The likelihood of a loss with respect to a contingency can be difficult to predict and determining a meaningful estimate of the loss or a range of loss may not always be practicable based on the information available at the time and the potential effect of future events and decisions by third parties that will determine the ultimate resolution of the contingency. It is not uncommon for such matters to be resolved over many years, during which time relevant developments and new information is continuously evaluated to determine both the likelihood of any potential loss and whether it is possible to reasonably estimate a range of possible losses. When a loss is probable but a reasonable estimate cannot be made, disclosure is provided.

In determining the threshold for disclosure on a qualitative and quantitative basis, management considers the potential for a disruptive effect on the normal functioning of the group and/or whether the contingency could impact investment decisions.

Such qualitative matters considered are reputational risks, regulatory compliance issues and reasonable investor considerations. For quantitative purposes an amount of $18m, has been considered.

As a global company, the group is exposed to numerous legal risks. The outcome of currently pending and future proceedings cannot be predicted with certainty. Litigation and other judicial proceedings as a rule raise difficult and complex legal issues and are subject to uncertainties and complexities including, but not limited to, the facts and circumstances of each particular case, issues regarding the jurisdiction in which each suit is brought and differences in applicable law. Upon resolution of any pending legal matter, the group may be forced to incur charges in excess of the presently established provisions and related insurance coverage. It is possible that the financial position, results of operations or cash flows of the group could be materially affected by the unfavourable outcome of litigation.

GROUP
– NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December

ANNUAL FINANCIAL STATEMENTS
2017
48

2 SEGMENTAL INFORMATION

AngloGold Ashanti Limited's operating segments are being reported based on the financial information provided to the Chief Executive Officer and the Executive Committee, collectively identified as the Chief Operating Decision Maker (CODM). The group produces gold as its primary product and does not have distinct divisional segments in terms of principal business activity, but manages its business on the basis of different geographic segments (including equity accounted investments).
Individual members of the Executive Committee are responsible for geographic regions of the business.
Group analysis by origin is as follows:

Gold production (attributable) Ounces (000)	**2017**	**2016**	**2015**
South Africa	**903**	967	1,004
Continental Africa	**1,453**	1,321	1,435
Australasia	**559**	520	560
Americas	**840**	820	831

(1)
Transfers and other movements include amounts from deferred stripping, change in estimates of decommissioning assets, asset reclassifications and derecognition of
assets with a carrying value of nil.
(2)
Included in the amounts for mine infrastructure are assets held under finance leases with a net book value of $56m (2016 :$58m; 2015: $61m).
(3)
Included in the amounts for land and buildings are assets held under finance leases with a net book value of $6m (2016: $7m; 2015: $7m).
(4)
Assets of $11m (2016: $12m; 2015: $8m) have been pledged as security.
(5)
Impairment and derecognition of assets including the following:
Impairment calculation assumptions as at 31 December 2017 – goodwill, tangible and intangible assets

Management assumptions for the value in use of tangible assets and goodwill include:
•
the gold price assumption represents management's best estimate of the future price of gold. A long-term real gold price
of $1,240/oz (2016: $1,212/oz) is based on a range of economic and market conditions that will exist over the remaining
useful life of the assets.

Annual life of mine plans take into account the following:
•
proved and probable Ore Reserve;

- value beyond proved and probable reserves (including exploration potential) determined using the gold price assumption referred to above;
- In determining the impairment for each cash generating unit, the real pre-tax rate was derived from the weighted average cost of capital (WACC) using the Capital Asset Pricing Model ("CAPM") to determine the required return on equity with risk factors consistent with the basis used in 2016. At 31 December 2017, the derived group WACC was 7.50% (real post-tax) which is 20 basis points higher than in 2016 of 7.30%, and is based on the industry average capital structure of the major gold companies considered to be appropriate peers. In determining the WACC for each cash generating unit, sovereign and mining risk factors are considered to determine country specific risks. In certain instances, a specific risk premium was added to large projects being undertaken or the turnaround nature of a specific mine to address uncertainties in the forecast of the cash flows;

14 TANGIBLE ASSETS CONTINUED

foreign currency cash flows translated at estimated forward exchange rates and then discounted using appropriate discount rates for that currency;

cash flows used in impairment calculations are based on life of mine plans which range from 2 years to 42 years; and

variable operating cash flows are increased at local Consumer Price Index rates.

Impairments and derecognitions of tangible assets

For the year ended 31 December 2017, the following impairments and derecognitions of tangible assets were recognised:

US dollar millions	
TauTona	79
Kopanang	35
Surface Operations	9
Moab Khotsong	112
Mponeng	2
First Uranium	13
Other	3
	253

Impairment of cash generating units

The group reviews and tests the carrying value of its mining assets when events or changes in circumstances suggest that the carrying amount may not be recoverable.

During June 2017, due to a change in mine plans to restructure the South African operations, Kopanang mine, TauTona mine including Savuka section and the West Gold Plant section of the Surface operations in South Africa were fully impaired as they were not expected to generate future economic benefits.

On 19 October 2017, AngloGold Ashanti announced the sale of various assets in the Vaal River Region including the Moab Khotsong Mine and related assets (Moab) to Harmony Gold Mining Company Limited for a cash consideration of US$300m.
Moab was accordingly transferred to held for sale and written down to the fair value less cost to sell. Refer note 23 – Non-current assets and liabilities held for sale.

In a separate announcement on 19 October 2017, AngloGold Ashanti announced the sale of its Kopanang Mine, the West
Gold Plant and related infrastructure to Heaven-Sent SA Sunshine Investment Company Limited for a cash consideration of
R100m. Kopanang Mine was accordingly transferred to held for sale and written down to the fair value less cost to sell.
Refer note 23 –Non-current assets and liabilities held for sale.

For the year ended 31 December

GROUP
– NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December

ANNUAL FINANCIAL STATEMENTS
2017
62

15 INTANGIBLE ASSETS CONTINUED

Impairment calculation assumptions for goodwill

Based on an analysis carried out by the group in 2017, the carrying value and value in use of cash generating units (CGUs)
with goodwill that were most sensitive is:

US dollar millions		
2017	**Carrying Value**	**Value in use**
AngloGold Ashanti Australia Limited – Sunrise Dam	**233**	**402**

As at 31 December 2017, the recoverable amount of AngloGold Ashanti Australia Limited – Sunrise Dam exceeded its carrying amount by $169m. The AngloGold Ashanti Australia Limited – Sunrise Dam CGU had $119m goodwill at that date.

It is estimated that a decrease of the long term real gold price of $1,240/oz by 7%, would cause the recoverable amount of
this CGU to equal its carrying amount. The sensitivity analysis has been provided on the basis that the key assumption changes without a change in the other assumptions. However, for a change in each of the assumptions used, it is impracticable to disclose the consequential effect of changes on the other variables used to measure the recoverable amount because these assumptions and others used in impairment testing of goodwill are inextricably linked.

Therefore it is possible that outcomes within the next financial year that are different from the assumptions used in the impairment testing process for goodwill could require a material adjustment to the carrying amounts in future periods.

Net book value of goodwill allocated to each of the CGUs:

US dollar millions	**2017**	**2016**	**2015**
- Sunrise Dam	**119**	110	111
- First Uranium (Pty) Limited (1)	**-**	8	7
- Serra Grande			

8
8
8
(note 2)
127
126
126
Real pre-tax discount rates applied in impairment calculations on CGUs
for which the carrying amount of goodwill is significant are as follows:
- Sunrise Dam
(2)
8.3%
8.8%
7.9%
(1)
Goodwill has been allocated to its respective CGU's where it is tested for impairment as part of the CGU. The group reviews and tests the carrying value of goodwill on an annual basis for impairment. Following the impairment review, goodwill to the value of $9m at First Uranium (Pty) Ltd was impaired utilising a real pre-tax discount rate of 9.23% during 2017. The discount rates for 2017 were determined on a basis consistent with the 2016 and 2015 discount rates. The value in use recoverable amount of First Uranium (Pty) Ltd is $317m (2016: $336m; 2015: $304m).
(2)
The value in use of the CGU is $402m in 2017 (2016: $487m; 2015: $504m).

23 NON-CURRENT ASSETS AND LIABILITIES HELD FOR SALE

Kopanang gold mine, West Gold Plant and related infrastructure (Kopanang Sale Assets)

The Kopanang gold mine is situated approximately 170 kilometres southwest of Johannesburg. It is included in the South
Africa reporting segment. Kopanang gold mine was previously recognised as a combination of tangible assets, current
assets, current and long-term liabilities. On 19 October 2017, AngloGold Ashanti Limited announced that it has entered into
an agreement to dispose of the Kopanang Sale Assets to Heaven-Sent SA Sunshine Investment Company Limited (“HSC”),
a Chinese capital management company headquartered in Hong Kong. The purchase consideration will be settled on the
Closing Date by a payment of R100 million in cash and the transfer of certain gold bearing rock dumps from a subsidiary of
HSC, namely Village Main Reef Limited to AngloGold Ashanti. Kopanang mine is a single shaft system, which produces
gold as its primary output. In 2017, Kopanang mine produced 91,000 ounces of gold (2016: 91,000 ounces).

Moab Khotsong gold mine and related infrastructure, Nufcor and Margaret Water Company (Moab Sale Assets)

The Moab Khotsong gold mine is situated about 180 kilometres southwest of Johannesburg. It is included in the South
Africa reporting segment. Moab Khotsong gold mine was previously recognised as a combination of tangible assets, current
assets, current and long-term liabilities. On 19 October 2017, AngloGold Ashanti Limited announced that it has entered into
a sale and purchase agreement, to dispose of various assets (Moab Sale Assets) situated in the Vaal River area of South
Africa to Harmony Gold Mining Company Limited for a cash consideration of US$300 million.

The assets and related interests to be sold include the following:

- The Moab Khotsong mine (which incorporates the Great Noligwa mine) and related infrastructure;
- AngloGold Ashan
ti’s entire interest in Nuclear Fuels Corporation of South Africa Proprietary Limited; and
- AngloGold Ashanti’s entire interest in Margaret Water Company NPC.

Moab Khotsong is an underground mine which produced 294,000 ounces in 2017 (2016: 280,000 ounces).

Subsequent to year end the conditions precedent were fulfilled. Refer note 36.

(1)
The change in estimates is attributable to changes in discount rates due to changes in global economic assumptions and changes in mine plans resulting in a change in cash flows and changes in design of tailings storage facilities and in methodology following requests from the environmental regulatory authorities. These provisions are expected to unwind beyond the end of the life of mine.
(2)
Other provisions include the following significant item: Chemwes (Pty) Limited, a subsidiary of First Uranium (Pty) Limited acquired by AngloGold Ashanti Limited during 2012, agreed to sell 25% of its production, capped at 312,500oz from 1 January 2012, to Franco-Nevada (Barbados) Corporation. Franco Nevada is required to pay $400/oz which inflates at 1% compounded annually from 2013. These factors were considered in determining the commodity contract obligation. The provision is calculated as the present value of the portion which is deemed onerous in light of the current market conditions using a gold forward for the duration of the contract of $1,303/oz (2016: $1,152/oz; 2015: $1,061/oz). As at 31 December 2017 the remaining production due to Franco Nevada is 170,435oz (2016: 197,528oz; 2015: 220,447oz).
(3)
Other provisions include the provision for the silicosis class action litigation of $63m.
The undiscounted rehabilitation provision based on real cash flows is $991m (2016: $867m; 2015: $831m).

26 ENVIRONMENTAL REHABILITATION AND OTHER PROVISIONS CONTINUED

Provision for silicosis settlement

AngloGold Ashanti Limited together with other mining companies, are named in a class action for silicosis and tuberculosis which was certified by the Johannesburg High Court in May 2016. The companies requested leave to appeal to the Supreme Court of Appeal (SCA), which was granted on 13 September 2016 and was scheduled to be heard from 19 to 23 March 2018. On 10 January 2018, in response to a request from all parties involved in the appeal to the SCA in respect of the silicosis and tuberculosis class action litigation, the Registrar of the SCA postponed the hearing date of the appeal until further notice.

A gold mining industry working group consisting of African Rainbow Minerals Limited, Anglo American South Africa Limited, AngloGold Ashanti Limited, Gold Fields Limited, Sibanye-Stillwater Limited and Harmony Gold Mining Company Limited (collectively the working group) was formed in November 2014 to address issues relating to the compensation and medical care for occupational lung diseases in the gold mining industry in South Africa. Essentially, the working group is seeking a comprehensive and sustainable solution which deals with both legacy compensation issues and future legal frameworks which, while being fair to employees, also ensures the future sustainability of companies in the industry. The working group has engaged all stakeholders on these matters, including government, organised labour, other mining companies and legal representatives of claimants who have filed legal suits against the companies. The working group believes that achieving a comprehensive settlement which is fair to past, present and future employees and sustainable for the sector is preferable to protracted litigation.

The facts of the matter have previously been disclosed as a contingent liability as an amount could not be reliably determined. As a result of the progress made by the working group and the status of negotiations with affected stakeholders, management is now in a position to reasonably estimate AngloGold Ashanti's share of a possible settlement of the class action claims and related costs within an acceptable range.

A pre-tax charge of $63 million has been recognised in special items for the year ended 31 December 2017. Going forward, annual charges in the provision are expected to consist of the time value of money (recognised as a finance cost) and changes in estimates in special items. The expected contributions (cash flows) to the vehicle that will manage the settlement process have been discounted over the expected period of contributions. The contributions are expected to be settled by cash flows from the group's South African operations and will occur over a number of years.

The assumptions that were made in the determination of the provision amount include: silicosis prevalence rates; estimated settlement per claimant; benefit take-up rates and disease progression rates.

A discount rate of 8% was used, based on government bonds with similar terms to the obligation.

27 PROVISION FOR PENSION AND POST-RETIREMENT BENEFITS

US dollar millions	**2017**	**2016**	**2015**
Defined benefit plans			
The group has made provision for pension, provident and medical schemes covering substantially all employees. The retirement schemes consist of the following:

27 PROVISION FOR PENSION AND POST-RETIREMENT BENEFITS CONTINUED			
Post-retirement medical scheme for AngloGold Ashanti Limited South African employees			
The provision for post-retirement medical funding represents the provision for health care benefits for employees and retired employees and their registered dependants.			
The post-retirement benefit costs are assessed in accordance with the advice of independent professionally qualified actuaries. The actuarial method used is the projected unit credit funding method. This scheme is unfunded. The last valuation was performed as at 31 December 2017.			
Information with respect to the defined benefit liability is as follows:

Provision has been made for South African income tax or foreign taxes that may result from future remittances of undistributed earnings of foreign subsidiaries or foreign corporate joint ventures, where the group is able to assert that the undistributed earnings are not permanently reinvested. In all other cases, the foreign subsidiaries reinvest the undistributed earnings into future capital expansion projects, maintenance capital and ongoing working capital funding requirements.

Unrecognised taxable temporary differences pertaining to undistributed earnings totalled $384m (2016: $366m; 2015: $357m).

Rand Refinery (Pty) Limited During the year the loan was converted to preference shares. There are no fixed repayment terms. The loan had accrued interest at JIBAR plus 3.5%.	**-**	20	27
Loans advanced to joint ventures			

Loans advanced to associates and joint ventures are included in the carrying value of investments in associates and joint ventures (note 17).

Executive contracts

All members of the Executive Committee have permanent employment contracts which entitle them to standard group benefits as defined by their specific region and participation in the company's short-term incentive scheme, the Bonus Share Plan (BSP), and the Long Term Incentive Plan (LTIP). All recently updated Executive Committee contracts include details on participation in the Co-Investment Plan (CIP).

South African executives have an off-shore retainer which is detailed under a separate contract. This reflects the percentage of their time focused on offshore business requirements. The offshore pay has been increased to a maximum cap of 40% of base pay due to a review of the amount of time spent outside South Africa on the offshore responsibilities of each executive team member. Where practical the offshore portion is now pensionable.

The executive contracts are reviewed annually and currently continue to include a change of control provision. The change of control is subject to the following triggers:

The acquisition of all or part of AngloGold Ashanti; or

A number of shareholders holding less than 35% of the company's issued share capital consorting to gain a majority of the board and make management decisions; and

The contracts of Executive Committee members are either terminated or their role and employment conditions are curtailed.

In the event of a change of control becoming effective, the executive will in certain circumstances be subject to both the notice period and the change of control contract terms. The notice period applied per category of executive and the change of control periods as at 31 December 2017 were as follows:

Executive Committee member	**Notice Period**	**Change of control**
CEO	12 months	12 months
CFO	6 months	6 months
EXCO	6 months	6 months

GROUP – NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December

ANNUAL FINANCIAL STATEMENTS
2017
91

33 CONTRACTUAL COMMITMENTS AND CONTINGENCIES CONTINUED

Purchase obligations represent contractual obligations for the purchase of mining contract services, power, supplies, consumables, inventories, explosives and activated carbon.

To service these capital commitments, purchase obligations and other operational requirements, the group is dependent on existing cash resources, cash generated from operations and borrowing facilities.

Cash generated from operations is subject to operational, market and other risks. Distributions from operations may be subject to foreign investment, exchange control laws and regulations, and the quantity of foreign exchange available in offshore countries. In addition, distributions from joint ventures are subject to the relevant board approval.

The credit facilities and other finance arrangements contain financial covenants and other similar undertakings. To the extent that external borrowings are required, the group's covenant performance indicates that existing financing facilities will be available to meet the commitments detailed above. To the extent that any of the financing facilities mature in the near future, the group believes that sufficient measures are in place to ensure that these facilities can be refinanced.

Litigation claims
(1)
Litigation - On 11 October 2011, AngloGold Ashanti (Ghana) Limited (AGAG) terminated Mining and Building Contractors
Limited's (MBC) underground development agreement, construction on bulkheads agreement and diamond drilling agreement at
Obuasi mine. The parties reached agreement on the terms of the separation and concluded a separation agreement on 8 November 2012. On 20 February 2014, AGAG was served with a demand issued by MBC claiming a total of $97m. In December
2015, the proceedings were stayed in the High Court pending arbitration. In February 2016, MBC submitted the matter to
arbitration.
(2)
Litigation - AGAG received a summons on 2 April 2013 from Abdul Waliyu and 152 others in which the plaintiffs allege that they
were or are residents of the Obuasi municipality or its suburbs and that their health has been adversely affected by emission
and/or other environmental impacts arising in connection with the current and/or historical operations of the Pompora Treatment
Plant (PTP), which was decommissioned in 2000. The plaintiffs' alleged injuries include respiratory infections, skin diseases and
certain cancers. The plaintiffs subsequently did not timely file their application for directions, but AGAG intends to allow some
time to pass prior to applying to have the matter struck out for want of prosecution. On 24 February 2014, executive members of
the PTP (AGAG) Smoke Effect Association (PASEA), sued AGAG by themselves and on behalf of their members (undisclosed
number) on grounds similar to those discussed above, as well as economic hardships as a result of constant failure of their crops.
This matter has been adjourned indefinitely. AGAG intends to allow some time to pass prior to applying to have the matter struck

out for want of prosecution. In view of the limitation of current information for the accurate estimation of a liability, no reliable
estimate can be made for AGAG's obligation in either matter.
(3)
Litigation - On 19 October 2017, Newmont Mining Co. filed a lawsuit in the United States District Court for the Southern District of
New York against AngloGold Ashanti and certain related parties, alleging that AngloGold Ashanti and such parties did not provide
Newmont with certain information relevant to its purchase of the Cripple Creek & Victor Gold Mining Company in 2015 during the
negotiation- and-sale process. AngloGold Ashanti believes the lawsuit is without merit and intends to vigorously defend against it.
The matter is proceeding. In view of the limitation of current information for the accurate estimation of a liability, no reliable
estimate can be made for the obligation.

GROUP – NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December

ANNUAL FINANCIAL STATEMENTS
2017
92

33 CONTRACTUAL COMMITMENTS AND CONTINGENCIES CONTINUED

Tax claims

(4)
Tax disputes - AngloGold Ashanti Limited's subsidiaries in Brazil are involved in various disputes with tax authorities. These disputes involve federal tax assessments including income tax, royalties, social contributions, VAT and annual property tax. In December 2017, new VAT assessments of $14m were received. Collectively, the possible amount involved is approximately $24m (2016: $15m, 2015: $11m). Management is of the opinion that these taxes are not payable.

(5)
Tax dispute - In January 2013, AngloGold Ashanti Colombia S.A. (AGAC) received notice from the Colombian Tax Office (DIAN) that it disagreed with the Company's tax treatment of certain items in the 2010 and 2011 income and equity tax returns. On 23 October 2013, AGAC received the official assessments from the DIAN which established that an estimated additional tax of $21m (2016: $21m, 2015: $20m) will be payable if the tax returns are amended. Penalties and interest for the additional taxes are expected to be $129m (2016: $120m, 2015: $108m). The Company believes that the DIAN has applied the tax legislation incorrectly. AGAC subsequently challenged the DIAN's ruling by filing lawsuits in March 2015 and April 2015 before the Administrative Tribunal of Cundinamarca (the trial court for tax litigation). Closing arguments on the tax disputes were presented in February and June 2017 and judgement is pending.

(6)
Tax dispute - On 12 July 2013, Cerro Vanguardia S.A. (CVSA) received a notification from the Argentina Tax Authority (AFIP) requesting corrections to the 2007, 2008 and 2009 income tax returns of $6m (2016: $7m, 2015: $8m) relating to the non-deduction of tax losses previously claimed on hedge contracts. The AFIP is of the view that the financial derivatives could not be considered as hedge contracts, as hedge contract losses could only be offset against gains derived from the same kind of hedging contracts. Penalties and interest on the disputed amounts are estimated at a further $21m (2016: $22m, 2015: $24m).
CVSA and AFIP have corresponded on this issue over the past several years and while management is of the opinion that the taxes are not payable, the government continues to assert its position regarding the use of the financial derivatives. CVSA filed an appeal with the Tax Court on 19 June 2015, and the parties submitted their final reports in July 2017. The matter is pending with the Tax Court.

Other

(7)
Groundwater pollution - AngloGold Ashanti has identified groundwater contamination plumes at certain of its operations, which
have occurred primarily as a result of seepage from mine residue stockpiles. Numerous scientific, technical and legal studies
have been undertaken to assist in determining the magnitude of the contamination and to find sustainable remediation solutions.
The group has instituted processes to reduce future potential seepage and it has been demonstrated that Monitored Natural
Attenuation (MNA) by the existing environment will contribute to improvements in some instances. Furthermore, literature
reviews, field trials and base line modelling techniques suggest, but have not yet proven, that the use of phyto-technologies can
address the soil and groundwater contamination. Subject to the completion of trials and the technology being a proven
remediation technique, no reliable estimate can be made for the obligation.
(8)
Deep groundwater pollution - The group has identified potential water ingress and future pollution risk posed by deep
groundwater in certain underground mines in Africa. Various studies have been undertaken by AngloGold Ashanti since 1999 to
understand this potential risk. In South Africa, due to the interconnected nature of mining operations, any proposed solution
needs to be a combined one supported by all the mines located in these gold fields. As a result, the Mineral and Petroleum
Resources Development Act (MPRDA) requires that the affected mining companies develop a Regional Mine Closure Strategy to
be approved by the Department of Mineral Resources. In view of the limitation of current information for the accurate estimation of
a liability, no reliable estimate can be made for the obligation.

34 FINANCIAL RISK MANAGEMENT STATEMENTS

In the normal course of its operations, the group is exposed to gold price, other commodity price, foreign exchange, interest
rate, liquidity, equity price (deemed to be immaterial) and credit risks. In order to manage these risks, the group may enter into
transactions which make use of both on- and off-balance sheet derivatives. The group does not acquire, hold or issue
derivatives for speculative purposes. The group has developed a comprehensive risk management process to facilitate,
control and monitor these risks. The board has approved and monitors this risk management process, inclusive of
documented treasury policies, counterparty limits and controlling and reporting structures.

Managing risk in the group

Risk management activities within the group are the ultimate responsibility of the board of directors. The Chief Financial
Officer is responsible to the board of directors for the design, implementation and monitoring of the risk management plan.
The Audit and Risk Committee is responsible for overseeing risk management plans and systems, as well as financial risks
which include a review of treasury activities and the group’s counterparties.

GROUP – NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December

ANNUAL FINANCIAL STATEMENTS
2017
93

34 FINANCIAL RISK MANAGEMENT STATEMENTS CONTINUED
Managing risk in the group CONTINUED

The financial risk management objectives of the group are defined as follows:

- safeguarding the group's core earnings stream from its major assets through the effective control and management of gold price risk, other commodity risk, foreign exchange risk and interest rate risk;
- effective and efficient usage of credit facilities in both the short and long-term through the adoption of reliable liquidity management planning and procedures;
- ensuring that investment and hedging transactions are undertaken with creditworthy counterparties; and
- ensuring that all contracts and agreements related to risk management activities are co-ordinated, consistent throughout the group and that they comply where necessary with all relevant regulatory and statutory requirements.

Gold price and foreign exchange risk

Gold price risk arises from the risk of an adverse effect on current or future earnings resulting from fluctuations in the price of gold. The group has transactional foreign exchange exposures, which arise from sales or purchases by an operating unit in currencies other than the unit's functional currency. The gold market is predominately priced in US dollars which exposes the group to the risk that fluctuations in the SA rand/US dollar, Brazilian real/US dollar, Argentinean peso/US dollar and Australian dollar/US dollar exchange rates may also have an adverse effect on current or future earnings. The group is also exposed to certain by-product commodity price risk.

Net open hedge position as at 31 December

The group had no outstanding commitments against future production potentially settled in cash.

Interest rate and liquidity risk

The group manages liquidity risk by ensuring that there is sufficient committed borrowing and banking facilities after taking into consideration the actual and forecast cash flows, in order to meet the group's short, medium and long term funding and liquidity management requirements.

In the ordinary course of business, the group receives cash from the proceeds of its gold sales and is required to fund it's working capital and capital expenditure requirements. This cash is managed to ensure surplus funds are invested in a manner to achieve market-related returns whilst minimising risks. The group is able to actively source financing at competitive rates.
The counterparties are financial and banking institutions and their credit ratings are regularly monitored.

The group has sufficient undrawn borrowing facilities available to fund its working capital and capital requirements (notes 25 and 35).

The following are the contractual maturities of financial liabilities, including interest payments

GROUP – NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December

ANNUAL FINANCIAL STATEMENTS
2017
94

34 FINANCIAL RISK MANAGEMENT STATEMENTS CONTINUED

Credit risk

Credit risk arises from the risk that a counterparty may default or not meet its obligations timeously. The group minimises credit risk by ensuring that credit risk is spread over a number of counterparties. These counterparties are financial and banking institutions. Counterparty credit limits and exposures are reviewed by the Audit and Risk Committee. Where possible, management ensures that netting agreements are in place. No set-off is applied to the statement of financial position due to the different maturity profiles of assets and liabilities.

The combined maximum credit risk exposure of the group is as follows:

US dollar millions	**2017**	**2016**	**2015**
Other investments	**58**	79	61
Trade and other receivables	**33**	46	42
Cash restricted for use (note 21)	**65**	55	60
Cash and cash equivalents (note 22)	**205**	215	484
Total financial assets	**361**	395	647

Trade and other receivables, that are past due but not impaired totalled $20m (2016: $9m; 2015: $7m). Other receivables that are impaired totalled nil (2016: nil; 2015: $6m) and other investments that are impaired totalled $3m (2016: nil; 2015: nil).

Trade receivables mainly comprise banking institutions purchasing gold bullion. Normal market settlement terms are two working days.

The group does not generally obtain collateral or other security to support financial instruments subject to credit risk, but monitors the credit standing of counterparties.

Fair value of financial instruments

The estimated fair values of financial instruments are determined at discrete points in time based on relevant market information.

The estimated fair value of the group's other investments and borrowings as at 31 December are as follows:

Type of instrument	**Carrying amount**	**Fair value**	**Carrying amount**	**Fair value**	**Carrying amount**	**Fair value**
US Dollars millions	**2017**		**2016**		**2015**

Borrowings (note 25)	**2,268**	**2,377**	2,178	2,203	2,737	2,425

GROUP – NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December

ANNUAL FINANCIAL STATEMENTS
2017
95

34 FINANCIAL RISK MANAGEMENT STATEMENTS CONTINUED
Fair value of financial instruments CONTINUED

Type of instrument CONTINUED

The following methods and assumptions were used to estimate the fair value of each class of financial instrument:

Cash restricted for use, cash and cash equivalents, trade, other receivables and other assets and trade and other payables

The carrying amounts approximate fair value due to their short-term nature.

Investments and other non-current assets

Listed equity investments classified as available-for-sale are carried at fair value in level 1 of the fair value hierarchy while
fixed income investments and other non-current assets are carried at amortised cost. The fair value of fixed income investments has been calculated using market interest rates at the hierarchy level 2. The unlisted equity investments are
carried at cost or fair value.

Borrowings

The rated bonds are carried at amortised cost and their fair values are their closing market values at the reporting date (fair
value hierarchy – level 1). The interest rate on the remaining borrowings is reset on a short-term floating rate basis, and accordingly the carrying amount is considered to approximate fair value.

Fair value hierarchy

The group uses the following hierarchy for determining and disclosing the fair value of financial instruments:
Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
Level 2: inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); and
Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The following table sets out the group's financial assets measured at fair value by level within the fair value hierarchy as at
31 December:

Type of instrument
Assets measured at fair value on a recurring basis

Environmental obligations

Pursuant to environmental regulations in the countries in which we operate, we are obligated to close our operations and
rehabilitate the lands which we mine in accordance with these regulations. As a consequence, AngloGold Ashanti is required
in some circumstances to provide either reclamations bonds issued by third party entities, establish independent trust funds or
provide guarantees issued by the operation, to the respective environmental protection agency or such other government
department with responsibility for environmental oversight in the respective country to cover the potential environmental
rehabilitation obligation in specified amounts.

In most cases, the environmental obligations will expire on completion of the rehabilitation although in some cases we are
required to potentially post bonds for events unknown that may arise after the rehabilitation has been completed.

GROUP – NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December

ANNUAL FINANCIAL STATEMENTS
2017
96

34 FINANCIAL RISK MANAGEMENT STATEMENTS CONTINUED
Environmental obligations CONTINUED

In South Africa, AngloGold Ashanti has established a trust fund which has assets of ZAR 1.39bn and guarantees of ZAR 1.52bn issued by various banks, for a current carrying value of the liability of ZAR 1.15bn. In Australia, since 2014, the group has paid an amount of AUD $4m into a Mine Rehabilitation Fund for a current carrying value of the liability of AUD $113.2m.
At Iduapriem the group has provided a bond comprising of a cash component of $9.8m with a further bond guarantee amounting to $35.9m issued by Ecobank Ghana Limited and Barclays Ghana Limited for a current carrying value of the liability of $44.3m. At Obuasi the group has provided a bond comprising of a cash component of $20.3m with a further bank guarantee amounting to $30m issued by Nedbank Limited for a current carrying value of the liability of $211m. In some circumstances, the group may be required to post further bonds in future years which will have a consequential income statement charge for the fees charged by the providers of the reclamation bonds.

Sensitivity analysis

Interest rate risk on other financial assets and liabilities (excluding derivatives)

The group also monitors interest rate risk on other financial assets and liabilities.

The following table shows the approximate interest rate sensitivities of other financial assets and liabilities at 31 December (actual changes in the timing and amount of the following variables may differ from the assumed changes below). As the sensitivity is the same (linear) for both increases and decreases in interest rates only absolute numbers are presented.

35 CAPITAL MANAGEMENT

The primary objective of managing the group's capital is to ensure that there is sufficient capital available to support the funding requirements of the group, including capital expenditure, in a way that optimises the cost of capital, maximises shareholders' returns and ensures that the group remains in a sound financial position.

The capital structure of the group consists of net debt (borrowings as detailed in note 25, offset by cash and bank balances detailed in note 22) and equity of the group (comprising share capital and premium and accumulated reserves and non-controlling interests).

The group manages and makes adjustments to the capital structure as opportunities arise in the market place, as and when borrowings mature, or as and when funding is required. This may take the form of raising equity, market or bank debt or hybrids thereof.

GROUP – NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December

ANNUAL FINANCIAL STATEMENTS
2017
98

35 **CAPITAL MANAGEMENT** CONTINUED

The group manages capital using various financial metrics including the ratio of net debt to Adjusted EBITDA (gearing). Both the calculation of net debt and Adjusted EBITDA are based on the formula included in the Revolving Credit Agreements. The loan covenant ratio of net debt to Adjusted EBITDA should not exceed 3.5 times. The facility also makes provision for the ability of the group to have a leverage ratio of greater than 3.5 times but less than 4.5 times, subject to certain conditions, for one measurement period not exceeding six months, during the tenor of the facility.

The group had no major issuance of equity during the year.

AngloGold Ashanti Limited registered a R10bn Domestic Medium Term Note Programme (DMTNP) with the JSE in April 2011. The DMTNP permits the group to access the South African debt capital market for funding required. The group has not utilised the commercial paper under its R10bn DMTNP during the current year, instead it made use of its other facilities, to provide for funding requirements of the South Africa region.

During November 2017, the group entered into a new three-year unsecured revolving credit facility of R1bn ($81m) with Standard Bank which is currently charged at a margin of 1.3% above JIBAR. This facility has the option, on application, to extend the facility by a maximum of two years.

During December 2017, the group entered into a three-year unsecured syndicated revolving credit facility of R2.5bn ($202m) with Nedbank and ABSA Bank which is currently charged at a margin of 1.8% above JIBAR. This facility has the option, on application, to extend the facility by a maximum of two years. This facility replaced the R1.5bn facility which was entered into in December 2013, which had similar conditions to the new revolving credit facility. The R1.5bn facility was cancelled during December 2017.

A full analysis of the borrowings as presented on the statement of financial position in included in note 25. In addition, the following details are also relevant to the borrowings at 31 December 2017:

- The $750m, $700m and $300m rated bonds are fully and unconditionally guaranteed by the group;
-

The interest margin on the five-year unsecured syndicated revolving credit facility of A$500m ($390m) with a group of banks will reduce should the group's credit rating improve from its current BB+/Baa3 status and should increase if its credit rating worsens. This facility will be used to fund the working capital and development costs associated with the group's mining operations within Australia without eroding the group's headroom under its other facilities and exposing the group to foreign exchange gains/losses each quarter.

- The R1bn, R1.4bn and R2.5bn unsecured syndicated revolving credit facilities will be used to fund the working capital and development costs associated with the group's mining operations within South Africa without eroding the group's headroom under its other facilities and exposing the group to foreign exchange gains/losses each quarter.

Amounts are converted to US dollars at year end exchange rates.

36 RECENT DEVELOPMENTS

On 20 February 2018, the directors of AngloGold Ashanti declared a gross cash dividend per ordinary share of 70 South African cents (assuming an exchange rate of ZAR 11.66/$, the gross dividend payable per ADS is equivalent to 6 US cents).

On 28 February 2018, the conditions precedent were fulfilled on the sale of Moab Khotsong and Kopanang Mines and the transactions were completed, with ownership of Moab Khotsong and Kopanang Mines transferring to Harmony and Heaven-Sent, respectively.

9,120
8,467

Refer to group note 32 for details of Directors' and Prescribed Officers' emoluments.

(1)
Details of the equity-settled share-based payment arrangements of the group have been disclosed in group note 10. These arrangements consist of awards by the company to employees of various group companies. The income statement expense of R237m (2016: R276m) for the company is only in respect of awards made to employees of the company.

(1)
The South African statutory tax rates are as follows:
- Non-mining statutory tax rate 28% (2016: 28%); and
- Maximum statutory mining tax rate 34% (2016: 34%).
(2)
The mining operations are taxed on a variable rate that increases as profitability increases. The tax rate used to calculate deferred tax is based on the company's
current estimate of future profitability when temporary differences will reverse. Depending on the profitability of the operations, the tax rate can consequently be
significantly different from year to year.

ANNUAL FINANCIAL STATEMENTS
2017
113

17 NON-CURRENT ASSETS AND LIABILITIES HELD FOR SALE

Kopanang gold mine, West Gold Plant and related infrastructure (Kopanang Sale Assets)

The Kopanang gold mine is situated approximately 170 kilometres southwest of Johannesburg. It is included in the South Africa reporting segment. Kopanang gold mine was previously recognised as a combination of tangible assets, current assets, current and long-term liabilities. Due to the change in mine plans to restructure Kopanang, an impairment of R446m was recognised at 30 June. On 19 October 2017, AngloGold Ashanti Limited announced that it has entered into an agreement to dispose of the Kopanang Sale Assets to Heaven-Sent SA Sunshine Investment Company Limited ("HSC"), a Chinese capital management company headquartered in Hong Kong. The purchase consideration will be settled on the Closing Date by a payment of R100 million in cash and the transfer of certain gold bearing rock dumps from a subsidiary of HSC, namely Village Main Reef Limited to AngloGold Ashanti. Kopanang mine is a single shaft system, which produces gold as its primary output.
In 2017, Kopanang mine produced 91,000 ounces (2016: 91,000 ounces) of gold.

Moab Khotsong gold mine and related infrastructure, Nufcor and Margaret Water Company (Moab Sale Assets)

The Moab Khotsong gold mine is situated about 180 kilometres southwest of Johannesburg. It is included in the South Africa reporting segment. Moab Khotsong gold mine was previously recognised as a combination of tangible assets, current assets, current and long-term liabilities. On 19 October 2017, AngloGold Ashanti Limited announced that it has entered into a sale and purchase agreement, to dispose of various assets situated in the Vaal River region of South Africa to Harmony Gold Mining Company Limited for a cash consideration of US$300 million.

The assets and related interests to be sold include the following:

- The Moab Khotsong mine (which incorporates the Great Noligwa mine) and related infrastructure;
- AngloGold Ashanti's entire interest in Nuclear Fuels Corporation of South Africa Proprietary Limited; and
- AngloGold Ashanti's entire interest in Margaret Water Company NPC.

Moab Khotsong is an underground mine which produced 294,000 ounces of gold in 2017 (2016: 280,000 ounces).

Subsequent to year end, the conditions precedent were fulfilled. Refer group note 36.

The carrying amount of major classes of assets and liabilities include:
2017
