CBD Energy Launches Renewable Energy Business in the U.S.

Company Introduces Solar, Energy Efficiency and Storage Technologies,
as well as EPC Project Development and Energy Services

Debuting with Westinghouse Solar at Solar Power International

Campbell, CA and Sydney, Australia – September 6, 2012 – CBD Energy Ltd. (ASX: CBD), a global and diversified renewable energy company, today announced its plans to launch its portfolio of renewable energy businesses in the U.S. market. The company, which recently announced a proposed merger with Westinghouse Solar, Inc. (WEST), will debut its technologies and services during the upcoming Solar Power International conference in Orlando, Florida at booth 3501.

“CBD Energy’s pending merger with Westinghouse Solar offers an ideal platform for the expansion of our renewable energy business into the world’s largest market,” said Gerry McGowan, Managing Director and CEO of CBD Energy Ltd. “In addition to building upon Westinghouse Solar’s business in the U.S., CBD Energy plans for U.S. operations built around its core strengths in design, engineering, procurement and construction (EPC) of commercial solar projects; energy efficiency and storage technologies; and energy services.”

“CBD Energy’s merger with Westinghouse Solar and the launch of our renewable energy divisions in the U.S. aligns with our strategy to create a more highly diversified business and to accelerate our access to growth opportunities in renewable energy,” continued McGowan.

A key focus of the company will be in assisting customers with EPC and financing of solar projects in the U.S., an area in which CBD Energy has significant expertise and sees abundant opportunity in the U.S. market. With energy deregulation, CBD Energy also sees the U.S. market as primed for growth in the area of energy services, where it plans to offer utilities and service providers a solar option to add to their service portfolios. CBD Energy also has a range of energy efficiency, capacitor, storage and remote area storage technologies that address various energy management challenges – an area often noted as “the missing link” in renewable technology.

“CBD Energy sees tremendous opportunity in the solar market in the U.S., particularly with their EPC expertise combined with Westinghouse Solar’s success in driving down installed system cost by innovating the design and ease of installation of solar panels,” said Margaret Randazzo, Chief Executive Officer of Westinghouse Solar, Inc. “Expanding the CBD Energy portfolio into the U.S. diversifies our combined business, providing incremental earnings and enabling our continued innovation and expansion.”

Since announcing the merger, CBD Energy and Westinghouse Solar have already demonstrated significant synergies and collaboration, including partnering on an EPC contract to build a 1.4 MW solar project in New Jersey; a joint venture to build 30 MW of EPC commercial projects in Italy; and a joint agreement to begin distributing 5 MW of Westinghouse Solar Instant Connect™ Solar Power Systems to Harvey Norman's Commercial Division, Australia's largest electrical and home improvement retailer.

The companies will be jointly attending and presenting at Solar Power International (Booth # 3501) from September 10 – 13 in Orlando, Florida. Representatives will be on hand to discuss residential, commercial, and utility scale technologies and projects. Interested parties are encouraged to visit the CBD Energy and Westinghouse Solar booth or contact company representatives to set up a meeting.

About Westinghouse Solar: (WEST)

Founded in 2001, Westinghouse Solar is a designer and manufacturer of solar power systems. In 2007, Westinghouse Solar pioneered the concept of integrating the racking, wiring and grounding directly into the solar panel. This revolutionary solar panel, originally branded "Andalay", quickly won industry acclaim. In 2009, the company again broke new ground with the first integrated AC solar panel, reducing the number of components for a rooftop solar installation by approximately 80 percent and lowering labor costs by approximately 50 percent. This AC panel which won the 2009 Popular Mechanics Breakthrough Award, has become the industry's most widely installed AC solar panel. A new generation of products named "Instant Connect" has just been introduced and is expected to achieve even greater market acceptance. Award-winning Westinghouse Solar Power Systems provide the best combination of safety, performance and reliability, while backed by the proven quality of the Westinghouse name. About CBD Energy (ASX: CBD)

CBD is Australia's emerging leader in renewable energy, enabling the efficient use of renewable energy for utilities, businesses and households through operations in wind, solar, energy storage and engineering. It has become one of the largest non-utility suppliers and installers of solar energy generation equipment for both large- and domestic-scale operation in Australia. Utilizing its globally competitive supply chain, CBD is also currently developing and profitably installing solar projects in Europe and Southeast Asia, both directly and through joint ventures.
