PROSPECTUS SUPPLEMENT NO. 4

Supplement to Prospectus dated  
April 12, 2016

---

GWG HOLDINGS, INC.

---

Maximum of 100,000 Shares of Redeemable Preferred Stock

This “Prospectus Supplement No. 4 — Supplement to Prospectus dated April 12, 2016,” supplements and amends our prospectus dated April 12, 2016, as earlier supplemented by prospectus sticker supplement no. 1 dated April 26, 2016 (referred to simply as our “prospectus”). You should read this supplement together with the prospectus since the information contained herein supplements and amends the information contained in the prospectus. For clarity, this supplement supersedes and replaces prospectus supplement no. 2 dated May 16, 2016 and prospectus supplement no. 3 dated August 12, 2016. Capitalized terms contained in this supplement have the same meanings as in the prospectus unless otherwise stated herein.

RECENT EVENTS

On November 10, 2016, we filed our Quarterly Report on Form 10-Q for the period ended September 30, 2016. This prospectus supplement has been prepared primarily to set forth certain information contained in that report.

NEITHER THE SECURITIES AND EXCHANGE COMMISSION NOR ANY STATE SECURITIES COMMISSION HAS APPROVED OR DISAPPROVED OF THESE SECURITIES OR PASSED UPON THE ACCURACY OR ADEQUACY OF THIS PROSPECTUS SUPPLEMENT. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

This supplement is part of the prospectus and either it or its contents must accompany the prospectus to satisfy the prospectus-delivery requirements under the Securities Act of 1933.

The date of this prospectus supplement is November 10, 2016

## RISK RELATING TO FORWARD-LOOKING STATEMENTS

Certain matters discussed in this prospectus supplement contain forward-looking statements. These forward-looking statements are subject to risks, uncertainties and assumptions about our operations and the investments we make, including, among other things, factors discussed under the heading “Risk Factors” in the prospectus and the following:

- changes in the secondary market for life insurance;
- our limited operating history;
- the valuation of assets reflected on our financial statements;
- the reliability of assumptions underlying our actuarial models, including our life expectancy estimates;
- our reliance on debt financing;
- risks relating to the validity and enforceability of the life insurance policies we purchase;
- our reliance on information provided and obtained by third parties;
- federal, state and FINRA regulatory matters;
- competition in the secondary market of life insurance;
- the relative illiquidity of life insurance policies;
- our ability to satisfy our debt obligations if we were to sell our entire portfolio of life insurance policies;
- life insurance company credit exposure;
- general economic outlook, including prevailing interest rates;
- performance of our investments in life insurance policies;
- financing requirements;
- litigation risks;
- restrictive covenants contained in borrowing agreements;
- increases in the cost of premiums charged by insurers for the policies we own; and
- our ability to make cash distributions in satisfaction of dividend obligations and redemption requests.

Forward-looking statements can be identified by the use of words like “believes,” “could,” “possibly,” “probably,” “anticipates,” “estimates,” “projects,” “expects,” “may,” “will,” “should,” “seek,” “intend,” “plan,” “expect,” or “consider” or the negative of expressions or other variations, or by discussions of strategy that involve risks and uncertainties. All forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual transactions, results, performance or achievements to be materially different from any future transactions, results, performance or achievements expressed or implied by such forward-looking statements.

We base these forward-looking statements on current expectations and projections about future events and the information currently available to us. Although we believe that the assumptions for these forward-looking statements are reasonable, any of the assumptions could prove to be inaccurate. Consequently, no representation or warranty can be given that the estimates, opinions, or assumptions made in or referenced by this prospectus supplement will prove to be accurate. Some of the risks, uncertainties and assumptions are identified in the discussion entitled “Risk Factors” in this prospectus supplement. We caution you that the forward-looking statements in this prospectus supplement are only estimates and predictions, or statements of current intent. Actual results or outcomes, or actions that we ultimately undertake, could differ materially from those anticipated in the forward-looking statements due to risks, uncertainties or actual events differing from the assumptions underlying these statements. These risks, uncertainties and assumptions include, but are not limited to, those discussed in this prospectus supplement.

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Note: The following discussion and analysis of the financial condition and results of operations of the Company are derived from our Quarterly Report on Form 10-Q for the period ended September 30, 2016, filed with the SEC on November 10, 2016. We have not materially updated this discussion in any way, although it may be presented in a different order than in our Quarterly Report. As indicated in that report, this discussion and analysis is based on the beliefs of our management, as well as assumptions made by, and information currently available to, our management. The statements in this discussion and analysis concerning expectations regarding our future performance, liquidity and capital resources, as well as other non-historical statements in this discussion and analysis, are forward-looking statements. See "Risks Relating to Forward-Looking Statements" above and in the prospectus. These forward-looking statements are subject to numerous risks and uncertainties. Our actual results could differ materially from those suggested or implied by any forward-looking statements.

You should read the following discussion in conjunction with our condensed consolidated financial statements and related notes beginning at page F-1 of this prospectus supplement, as well as our consolidated financial statements and related notes contained within the prospectus.

### Overview

GWG Holdings, Inc. is a financial services company participating in the life insurance secondary market. We create opportunities for consumers owning life insurance to obtain significant value for their contracts as compared to the traditional options offered by insurance companies. We also create opportunities for investors to participate in the life insurance alternative investment asset class, not correlated to traditional financial markets. In so doing, we enable investors to take advantage of financial opportunities dominated by banks prior to the 2008 credit crisis.

We seek to build a profitable and large portfolio of life insurance assets that are well diversified in terms of insurance companies and insureds. We believe that diversification is a key risk mitigation strategy to provide consistent cash flows and reliable investment returns from our portfolio. To grow our portfolio and achieve diversification, we offer investors the opportunity to participate in the yield potentially generated by our portfolio of life insurance assets through a variety of financings and securities offerings. We believe we are well positioned to continue providing investors with yield participation opportunities from the life insurance alternative asset class.

### Critical Accounting Policies

#### Critical Accounting Estimates

The preparation of our consolidated financial statements in accordance with the Generally Accepted Accounting Principles (GAAP) requires us to make judgments, estimates, and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. We base our judgments, estimates, and assumptions on historical experience and on various other factors believed to be reasonable under the circumstances. Actual results could differ materially from these estimates. We evaluate our judgments, estimates, and assumptions on a regular basis and make changes accordingly. We believe that the judgments, estimates, and assumptions involved in valuing our investments in life insurance contracts have the greatest potential impact on our consolidated financial statements and accordingly believe these to be our critical accounting estimates. Below we discuss the critical accounting policies associated with these estimates as well as certain other critical accounting policies.

#### Ownership of Life Insurance Contracts — Fair Value Option

We account for the purchase of life insurance contracts in accordance with ASC 325-30, Investments in Insurance Contracts, which requires us to use either the investment method or the fair value method. We have elected to account for all of our life insurance contracts using the fair value method.

The fair value of our life insurance contracts is determined as the net present value of the life insurance portfolio's future expected cash flows (contract benefits received and required premium payments) that incorporates current life expectancy estimates and discount rate assumptions.

We initially record our purchase of life insurance contracts at the transaction price, which is the amount paid for the contract, inclusive of all external fees and costs associated with the acquisition. The fair value of our investment in our portfolio of insurance contracts is evaluated at the end of each subsequent reporting period. Changes in the fair value of our portfolio are based on periodic evaluations and are recorded in our consolidated and combined statement of operations as changes in fair value of life insurance contracts.

#### Fair Value Components — Medical Underwriting

Unobservable inputs, as discussed below, are a critical component of our estimate for the fair value of our investments in life insurance contracts. We currently use a probabilistic method of estimating and valuing the projected cash flows of our portfolio, which we believe to be the preferred and most prevalent valuation method in the industry. In this regard, the most significant assumptions we make are the life expectancy estimates of the insureds and the discount rate applied to the expected future cash flows to be derived from our portfolio.

The Society of Actuaries recently finalized the 2015 Valuation Basic Table (“2015 VBT”). The 2015 VBT is based on a much larger dataset of insured lives, face amount of contracts and more current information compared to the dataset underlying the 2008 Valuation Basic Table. The new 2015 VBT dataset includes 266 million contracts compared to the 2008 VBT dataset of 75 million. The experience data in the 2015 VBT dataset includes 2.55 million claims on contracts from 51 insurance carriers. Life expectancies implied by the 2015 VBT are generally longer for male and female nonsmokers between the ages of 65 and 80, while smokers and insureds of both genders over the age of 85 have significantly lower life expectancies. We adopted the 2015 VBT in our valuation process in June 2016.

In September 2015, Equitable Life Insurance Company (“AXA”) announced pending cost-of-insurance rate increases for certain universal life contracts which were effected on March 1, 2016. We identified 14 affected contracts in our portfolio. In April 2016, we received updated contract illustrations from AXA and calculated the change in the fair value of our portfolio resulting from the increased premiums to be a reduction of \$2,395,000. This reduction was reflected in our balance sheet as of March 31, 2016. Our review of AXA’s cost-of-insurance rate increases is complete as of September 30, 2016.

We are aware of additional pending cost of insurance increases affecting approximately 1.1% of our portfolio by face amount of benefits. We will adjust our premium schedules and resultant valuation when we have received the required information from the related carriers.

#### Fair Value Components — Required Premium Payments

We must pay the premiums on the life insurance contracts within our portfolio in order to collect the contract benefit. The same probabilistic model and methodologies used to generate expected cash inflows from the life insurance contract benefits over the expected life of the insured are used to estimate cash outflows due to required premium payments. Premiums paid are offset against revenue in the applicable reporting period.

#### Fair Value Components — Discount Rate

A discount rate is used to calculate the net present value of the expected cash flows. The discount rate represents the internal rate of return we expect to earn on investments in a contract or in the portfolio as a whole at the stated fair value. The discount rate used to calculate fair value of our portfolio incorporates the guidance provided by ASC 820, Fair Value Measurements and Disclosures.

The table below provides the discount rate used to estimate the fair value of our portfolio of life insurance contracts for the period ending:

September 30, 2016

December 31, 2015

11.07%

11.09%

The change in the discount rate incorporates current information about discount rates applied by other reporting companies owning portfolios of life insurance contracts, discount rates observed by us in the life insurance secondary market, market interest rates, credit exposure to the issuing insurance companies, and our estimate of the risk premium a purchaser would require to receive the future cash flows derived from our portfolio of life insurance contracts. Because we use the discount rate to arrive at the fair value of our portfolio, the rate we choose necessarily assumes an orderly and arms-length transaction (i.e., a non-distressed transaction in which neither seller nor buyer is compelled to

engage in the transaction). The carrying value of contracts acquired during each quarterly reporting period are adjusted to their current fair value using the fair value discount rate applied to the entire portfolio as of that reporting date.

We engaged Model Actuarial Pricing Systems (“MAPS”), to prepare a calculation of our life insurance portfolio. MAPS owns and maintains the portfolio pricing software we use. MAPS processed contract data, future premium data, life expectancy estimate data, and other actuarial information to calculate a net present value for our portfolio using the specified discount rate of 11.07%. MAPS independently calculated the net present value of our portfolio of 625 contracts to be \$477.6 million and furnished us with a letter documenting its calculation. A copy of such letter is filed as Exhibit 99.1 to this report.

#### Deferred Income Taxes

Under ASC 740, Income Taxes, deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. A valuation allowance is established for deferred tax assets that are not considered more likely than not to be realized. Realization of deferred tax assets depends upon having sufficient past or future taxable income in periods to which the deductible temporary differences are expected to be recovered or within any applicable carryback or carryforward periods. After assessing the realization of the net deferred tax assets, we believe that it is “more likely than not” that we will be able to realize all of our deferred tax assets other than those which are expected to result in a capital loss.

#### Deferred Financing and Issuance Costs

Financing costs incurred under the senior credit facilities were capitalized and are amortized using the straight-line method over the term of the senior credit facilities. The Series I Secured Note obligations are reported net of issuance costs, sales commissions, and other direct expenses, which are amortized using the interest method over the term of each respective borrowing. The L Bonds are reported net of issuance costs, sales commissions, and other direct expenses, which are amortized using the interest method over the term of each respective borrowing. The Series A, as described in Note 9, was reported net of issuance costs, sales commissions, including the fair value of warrants issued, and other direct expenses, which were amortized using the interest method as interest expense over a three-year redemption period. As of December 31, 2015, these costs have been fully amortized. Selling and issuance costs of RPS and MCA Preferred Stock, described in Notes 10 and 11, are netted against additional paid-in-capital.

#### Principal Revenue and Expense Items

We earn revenues from the following three primary sources.

- **Life Insurance Contract Benefits Realized.** We recognize the difference between the face value of the contract benefits and carrying value when an insured’s mortality event occurs. We generally collect the face value of the life insurance contract benefit from the insurance company within 45 days of recognizing the revenue.
- **Change in Fair Value of Life Insurance Contracts.** We value our portfolio investments for each reporting period in accordance with the fair value principles discussed herein, which includes the expected payment of premiums for future periods as shown in our consolidated financial statements net premium costs.
- **Sale of a Life Insurance Contract.** In the event of a sale of a contract, we recognize gain or loss as the difference between the sale price and the carrying value of the contract on the date of the receipt of payment on such sale.

Our main components of expense are summarized below.

- Selling, General and Administrative Expenses. We recognize and record expenses incurred in our business operations, including operations related to the purchasing and servicing of life insurance contracts. These expenses include salaries and benefits, sales, marketing, occupancy and other expenditures.

- **Interest and Dividends.** We recognize and record interest expenses associated with the costs of financing our life insurance portfolio for the current period. These expenses include interest paid to our senior lender under our senior credit facilities, interest paid on our L Bonds and other outstanding indebtedness such as our Series I Secured Notes, and dividends on our Series A and our RPS. When we issue debt, we amortize the issuance costs associated with such indebtedness over the outstanding term of the financing, and classify it as interest expense.

#### Results of Operations — Three and Nine Months Ended September 30, 2016 Compared to the Same Periods in 2015

The following is our analysis of the results of operations for the periods indicated below. This analysis should be read in conjunction with our consolidated financial statements and related notes.

#### Revenue.

|   | Three Months Ended<br>September 30, |              | Nine Months Ended<br>September 30, |               |
|---|-------------------------------------|--------------|------------------------------------|---------------|
|   | 2016                                | 2015         | 2016                               | 2015          |
| Revenue recognized from the receipt of contract benefits  | \$ 4,221,000                        | \$ 277,000   | \$ 26,986,000                      | \$ 25,909,000 |
| Revenue (expense) recognized from the change in fair value of life insurance contracts, net of premiums and carrying costs <sup>(1)</sup> | 9,289,000                           | 7,912,000    | 24,621,000                         | 7,538,000     |
| Gain on life insurance contracts, net   | \$ 13,510,000                       | \$ 8,189,000 | \$ 51,607,000                      | \$ 33,447,000 |
| Number of contracts matured   | 4                                   | 1            | 16                                 | 8             |
| The change in fair value related to new contracts acquired  | \$ 11,668,000                       | \$ 7,423,000 | \$ 29,509,000                      | \$ 12,546,000 |

(1) The discount rate applied to estimate the fair value of the portfolio of life insurance contracts we own was 11.07% as of both September 30, 2016 and September 30, 2015. The carrying value of contracts acquired during each quarterly reporting period is adjusted to current fair value using the fair value discount rate applied to the entire portfolio as of that reporting date (see Note 4 to our condensed consolidated financial statements).

#### Expenses.

|  | Three Months Ended September 30, |              |                        | Nine Months Ended September 30, |              |              |
|--|----------------------------------|--------------|------------------------|---------------------------------|--------------|--------------|
|  | 2016                             | 2015         | Increase<br>(Decrease) | 2016                            | 2015         | Increase     |
| Employee compensation and benefits <sup>(1)</sup>  | \$ 2,912,000                     | \$ 2,308,000 | \$ 604,000             | \$ 8,450,000                    | \$ 6,181,000 | \$ 2,269,000 |
| Interest expense (including amortization of deferred financing costs and preferred stock dividends) <sup>(2)</sup> | 11,984,000                       | 8,650,000    | 3,334,000              | 32,010,000                      | 23,149,000   | 8,861,000    |
| Legal and professional expenses <sup>(3)</sup>   | 587,000                          | 822,000      | (235,000 )             | 3,097,000                       | 1,988,000    | 1,109,000    |
| Other expenses <sup>(4)</sup>  | 2,863,000                        | 2,232,000    | 631,000                | 7,608,000                       | 5,646,000    | 1,962,000    |

Edgar Filing: GWG Holdings, Inc. - Form 424B3

Total expenses      \$ 18,346,000   \$ 14,012,000   \$ 4,334,000   \$ 51,165,000   \$ 36,964,000   \$ 14,201,000

---

(1) We hired additional members to our sales, marketing, legal and information technology teams. At the end of 2015 we employed approximately 50 employees, and at September 30, 2016 we employed approximately 67 employees.

(2) The increase in the current period was due to the increase in our average debt outstanding.

(3) Increase is due to SEC filings and other costs related to securities offerings and on-going compliance.

(4) Increase is due to increased public relations, sales and marketing costs associated with growing and servicing our network of independent financial advisors.

## Income Tax Expense.

The following table reconciles our income tax expense at the statutory federal tax rate to our actual income tax expense:

|  | Three Months Ended<br>September 30,<br>2016 |         | September 30,<br>2015 |         | Nine Months Ended<br>September 30,<br>2016 |         | September 30,<br>2015 |        |
|--|---|---------|-----------------------|---------|--|---------|-----------------------|--------|
| Statutory federal income tax (benefit)               | \$ (1,561,000)                              | 34.0 %  | \$ (1,948,000)        | 34.0 %  | \$ 489,000                                 | 34.0 %  | \$ 1,117,000          | 34.0 % |
| State income taxes (benefit), net of federal benefit | (227,000 )                                  | 4.9 %   | (334,000 )            | 5.8 %   | 240,000                                    | 16.7 %  | (105,000 )            | 3.2 %  |
| Series A preferred stock dividends                   | 354,000                                     | (7.7 )% | 175,000               | (3.1 )% | 732,000                                    | 51.0 %  | 526,000               | 16.0 % |
| Other permanent differences                          | 15,000                                      | (0.3 )% | 9,000                 | (0.1 )% | 18,000                                     | 1.3 %   | 31,000                | 1.0 %  |
| Total income tax expense (benefit)                   | \$ (1,419,000)                              | 30.9 %  | \$ (2,098,000)        | 36.6 %  | \$ 1,479,000                               | 102.9 % | \$ 665,000            | 20.2 % |

The most significant temporary differences between GAAP net income and taxable net income are the treatment of interest costs with respect to the acquisition of the life insurance contracts and revenue recognition with respect to the fair value of life insurance portfolio.

The primary permanent difference between our effective tax rate and the statutory federal rate are the accrual of preferred stock dividend expense, state income taxes, and other non-deductible expenses. The dividends charged to interest expense were \$1.0 million and \$0.5 million during the three months ended September 30, 2016 and 2015, respectively, and \$2.2 million and \$1.5 million during the nine months ended September 30, 2016 and 2015, respectively.

## Liquidity and Capital Resources

We finance our business through a combination of life insurance contract benefit receipts, origination fees, equity offerings, debt offerings, and our senior credit facilities. We have used our debt offerings and our senior credit facilities primarily for contract acquisition, contract servicing, and portfolio-related financing expenditures including paying principal and interest.

As of September 30, 2016 and December 31, 2015, we had approximately \$117.2 million and \$74.4 million, respectively, in combined available cash, cash equivalents, policy benefits receivable, if any, and available borrowing base surplus capacity, if any, under our senior credit facilities for the purpose of purchasing additional life insurance contracts, paying premiums on existing contracts, paying portfolio servicing expenses, and paying principal and interest on our outstanding financing obligations.

## Debt Financings Summary

We had the following outstanding debt balances as of September 30, 2016 and December 31, 2015:

| Issuer/Borrower  | As of September 30, 2016     |                                |          | As of December 31, 2015      |                                |          |
|--|------------------------------|--------------------------------|----------|------------------------------|--------------------------------|----------|
|  | Principal Amount Outstanding | Weighted Average Interest Rate |          | Principal Amount Outstanding | Weighted Average Interest Rate |          |
| GWG Holdings, Inc. – L Bonds   | \$ 384,586,000               | 7.16                           | %        | \$ 282,171,000               | 7.18                           | %        |
| GWG Life, LLC – Series I Secured Notes   | 17,830,000                   | 8.63                           | %        | 23,578,000                   | 8.47                           | %        |

| Credit Facility – LNV Corporation (See Note 6 to our consolidated financial statements)              | 71,250,000                   | 6.45                           | %        | —                            | —                              |          |
| <b>Total</b>   | <b>\$ 473,666,000</b>        | <b>7.10</b>                    | <b>%</b> | <b>\$ 370,760,000</b>        | <b>6.98</b>                    | <b>%</b> |

Our total senior credit facilities and other indebtedness balance as of September 30, 2016 and December 31, 2015 was \$473.7 million and \$370.8 million, respectively. At September 30, 2016, the total outstanding face amount of our Series I Secured Notes outstanding was \$17.8 million, less unamortized selling costs of \$0.3 million, resulting in a carrying amount of \$17.5 million. At December 31, 2015, the total outstanding face amount of our Series I

Secured Notes outstanding was \$23.6 million, less unamortized selling costs of \$0.3 million, resulting in a carrying amount of \$23.3 million. At September 30, 2016, the total outstanding face amount of L Bonds was \$384.6 million plus \$6.9 million of subscriptions in process, less unamortized selling costs of \$11.6 million resulting in a carrying amount of \$379.9 million. At December 31, 2015, the total outstanding face amount of L Bonds was \$282.2 million plus \$3.0 million of subscriptions in process, less unamortized selling costs of \$8.2 million resulting in a carrying amount of \$277.0 million.

The weighted-average interest rate of our outstanding Series I Secured Notes as of September 30, 2016 and December 31, 2015 was 8.63% and 8.47%, respectively, and the weighted-average maturity at those dates was 1.31 and 1.06 years, respectively. The Series I Secured Notes have renewal features. Since we first issued our Series I Secured Notes, we experienced \$165.1 million in maturities, of which \$125.0 million renewed for an additional term as of September 30, 2016. This provided us with an aggregate renewal rate of approximately 76% for investments in these securities. Effective September 1, 2016, we no longer renew the Series I Secured Notes.

The weighted-average interest rate of our outstanding L Bonds as of September 30, 2016 and December 31, 2015 was 7.16% and 7.18%, respectively, and the weighted-average maturity at those dates was 2.10 and 2.02 years, respectively. Our L Bonds have renewal features. As of September 30, 2016, \$252.4 million in aggregate principal amount of our L Bonds had matured since issuance, of which \$168.3 million renewed for an additional term. The aggregate renewal rate is approximately 67% for investments in these securities.

Future contractual maturities of Series I Secured Notes and L Bonds at December 31, 2016 are:

| Years Ending December 31, | Series I      |                | Total          |
|---------------------------|---------------|----------------|----------------|
|                           | Secured Notes | L Bonds        |                |
| 2016                      | \$ 1,177,000  | \$ 23,548,000  | \$ 24,725,000  |

| Thereafter                | 941,000       | 49,532,000     | 50,473,000     |
|                           | \$ 17,830,000 | \$ 384,586,000 | \$ 402,416,000 |

The L Bonds and Series I Secured Notes are secured by all of our assets, and are subordinate to our senior credit facilities. The L Bonds and Series I Secured Notes are pari passu with respect to a security interest in our assets pursuant to an intercreditor agreement (see Notes 7 and 8 to our consolidated financial statements).

We maintain a \$105 million revolving senior credit facility with Autobahn/DZ Bank through DLP III. The revolving senior credit facility is used to pay the premium expenses related to our portfolio of life insurance contracts. As of September 30, 2016 and December 31, 2015, we had approximately \$0 million and \$65.0 million, respectively, outstanding under the revolving senior credit facility, and maintained an available borrowing base surplus of \$76.6 million and \$40.0 million, respectively.

On September 14, 2016, we entered into a \$172 million senior secured term loan with LNV Corp. through GWG Funding DLP IV. We intend to use the proceeds from this facility primarily to grow and maintain our portfolio of life insurance contracts, for liquidity and for general corporate purposes. As of September 30, 2016 we had approximately \$71.2 million outstanding under the senior credit facility.

Capital expenditures have historically not been material and we do not anticipate making material capital expenditures in 2016 or beyond.

#### Corporate Financing History

In November 2009, our wholly owned subsidiary GWG Life offered Series I Secured Notes in a private placement to accredited investors only. This offering was closed in November 2011. As of September 30, 2016 and December 31, 2015, we had approximately \$17.8 million and \$23.6 million, respectively, in principal amount of Series I Secured Notes outstanding.

## Edgar Filing: GWG Holdings, Inc. - Form 424B3

In September 2011, we concluded a private placement offering of Series A, having received an aggregate \$24.6 million in subscriptions for our Series A. These subscriptions consisted of \$14.0 million in conversions of outstanding Series I Secured Notes and \$10.6 million of new investments. As of September 30, 2016 and December 31, 2015, respectively, we had approximately \$19.8 million and \$20.8 million stated value of Series A outstanding.

In January 2012, we began publicly offering up to \$250.0 million in debt securities (initially named “Renewable Secured Debentures” and subsequently renamed “L Bonds”) that was completed in January 2015.

In September 2014, we consummated an initial public offering of our common stock resulting in the sale of 800,000 shares of common stock at \$12.50 per share and net proceeds of approximately \$8.6 million after the deduction of underwriting commissions, discounts and expense reimbursements.

In January 2015, we began publicly offering up to \$1.0 billion of L Bonds as a follow-on offering to our earlier \$250.0 million public debt offering. Through September 30, 2016, the total amount of these L Bonds sold, including renewals, was \$637.1 million. As of September 30, 2016 and December 31, 2015, respectively, we had approximately \$384.6 million and \$282.2 million, respectively, in principal amount of L Bonds outstanding.

In October 2015, we began publicly offering up to 100,000 shares of our RPS at a per-share price of \$1,000. As of September 30, 2016 we had issued approximately \$33.2 million stated value of RPS.

### Portfolio Assets and Secured Indebtedness

At September 30, 2016, the fair value of our investments in life insurance contracts of \$477.6 million plus our cash balance of \$18.8 million, our restricted cash balance of \$15.7 million and our life insurance contract benefits receivable of \$6.1 million, totaled \$518.2 million, representing an excess of portfolio assets over secured indebtedness of \$44.5 million. At December 31, 2015, the fair value of our investments in life insurance contracts of \$356.6 million plus our cash balance of \$34.4 million and our restricted cash balance of \$2.3 million, totaled \$393.3 million, representing an excess of portfolio assets over secured indebtedness of \$22.5 million. The L Bonds and Series I Secured Notes are secured by all of our assets and are subordinate to our senior credit facilities. The L Bonds and Series I Secured Notes are pari passu with respect to a security interest in our assets pursuant to an intercreditor agreement.

The following forward-looking table seeks to illustrate the impact of the sale of our portfolio of life insurance assets at various discount rates in order to satisfy our debt obligations as of September 30, 2016. In all cases, the sale of the life insurance assets owned by DLP III and DLP IV will be used first to satisfy all amounts owing under the respective senior credit facilities. The net sale proceeds remaining after satisfying all obligations under the senior credit facilities would be applied to L Bonds and Series I Secured Notes on a pari passu basis.

| Portfolio Discount Rate  | 10%            | 11%            | 12%            | 13%            | 14%            |
|--|----------------|----------------|----------------|----------------|----------------|
| Value of portfolio   | \$ 503,331,000 | \$ 479,200,000 | \$ 456,979,000 | \$ 436,470,000 | \$ 417,501,000 |
| Cash, cash equivalents and life insurance contract benefits receivable | 40,591,000     | 40,591,000     | 40,591,000     | 40,591,000     | 40,591,000     |
| Total assets   | 543,922,000    | 519,791,000    | 497,570,000    | 477,061,000    | 458,092,000    |
| Revolving senior credit facility                                       | 71,250,000     | 71,250,000     | 71,250,000     | 71,250,000     | 71,250,000     |
| Net after revolving senior credit facility                             | 472,672,000    | 448,541,000    | 426,320,000    | 405,811,000    | 386,842,000    |
|  | 402,416,000    | 402,416,000    | 402,416,000    | 402,416,000    | 402,416,000    |

|   |                  |                  |                  |                  |               |
|---|------------------|------------------|------------------|------------------|---------------|
| Series I Secured<br>Notes and L Bonds<br>Net after Series I<br>Secured Notes and<br>L Bonds | 70,256,000       | 46,125,000       | 23,904,000       | 3,395,000        | (15,574,000 ) |
| Impairment to<br>Series I Secured<br>Notes and L Bonds                                      | No<br>impairment | No<br>impairment | No<br>impairment | No<br>impairment | Impairment    |

The table illustrates that our ability to fully satisfy amounts owing under the L Bonds and Series I Secured Notes would likely be impaired upon the sale of all of our life insurance assets at a price equivalent to a discount rate of approximately 13.18% or higher. At December 31, 2015, the impairment occurred at a discount rate of approximately 12.58% or higher. The discount rates used to calculate the fair value of our portfolio were 11.07% and 11.09% as of September 30, 2016 and December 31, 2015, respectively.

The table does not include any allowance for transactional fees and expenses associated with a portfolio sale (which expenses and fees could be substantial), and is provided to demonstrate how various discount rates used

to value our portfolio could affect our ability to satisfy amounts owing under our debt obligations in light of our senior secured lender's right to priority payments. You should read the above table in conjunction with the information contained in other sections of this report, including our discussion of discount rates included under the "Critical Accounting Policies — Fair Value Components – Discount Rate" caption above. This discussion and analysis is based on the beliefs of our management, as well as significant assumptions made by, and information currently available to, our management.

#### Cash Flows

The payment of premiums and servicing costs to maintain life insurance contracts represents our most significant requirement for cash disbursement. When a contract is purchased, we are able to calculate the minimum premium payments required to maintain the contract in-force. As the insured ages, premium payments increase (see Note 3 to our consolidated financial statements). Nevertheless, the probability of actually needing to pay the premiums decreases as the probability of mortality increases. These scheduled premiums and associated probabilities are factored into our expected internal rate of return and cash-flow modeling. Beyond premiums, we incur contract servicing costs, including annual trustee, tracking costs, and debt servicing costs, including principal and interest payments, all of which are excluded from our internal rate of return calculations. Until we receive a stable amount of proceeds from the contract benefits, we intend to pay these costs from our senior credit facilities, when permitted, and through the issuance of debt securities, including the L Bonds, and equity securities including our RPS.

The amount of payments for anticipated premiums and servicing costs (excluding debt servicing costs) that we will be required to make over the next five years to maintain our current portfolio, assuming no mortalities, is set forth in the table below.

| Years Ending December 31,             | Premiums       | Servicing    | Premiums and Servicing Fees |
|---------------------------------------|----------------|--------------|-----------------------------|
| Three months ending December 31, 2016 | \$ 10,449,000  | \$ 188,000   | \$ 10,637,000               |
| 2017                                  | 43,155,000     | 750,000      | 43,905,000                  |
| 2018                                  | 46,847,000     | 750,000      | 47,597,000                  |
| 2019                                  | 50,813,000     | 750,000      | 51,563,000                  |
| 2020                                  | 56,633,000     | 750,000      | 57,383,000                  |
| 2021                                  | 63,222,000     | 750,000      | 63,972,000                  |
|                                       | \$ 271,119,000 | \$ 3,938,000 | \$ 275,057,000              |

For the quarter-end dates set forth below, the following table illustrates the total amount of face value of contract benefits owned, and the trailing 12 months of life insurance contract benefits collected and premiums paid on our portfolio. The trailing 12-month benefits/premium coverage ratio indicates the ratio of contract benefits received to premiums paid over the trailing 12-month period from our portfolio of life insurance contracts.

| Quarter End Date   | Portfolio Face Amount | 12-Month Trailing Benefits Collected | 12-Month Trailing Premiums Paid | 12-Month Trailing Benefits/Premium Coverage Ratio |
|--------------------|-----------------------|--------------------------------------|---------------------------------|---|
| December 31, 2013  | 740,648,000           | 16,600,000                           | 21,733,000                      | 76.4 %  |
| March 31, 2014     | 771,940,000           | 12,600,000                           | 21,930,000                      | 57.5 %  |
| June 30, 2014      | 784,652,000           | 6,300,000                            | 22,598,000                      | 27.9 %  |
| September 30, 2014 | 787,964,000           | 4,300,000                            | 23,121,000                      | 18.6 %  |
| December 31, 2014  | 779,099,000           | 18,050,000                           | 23,265,000                      | 77.6 %  |
| March 31, 2015     | 754,942,000           | 46,675,000                           | 23,786,000                      | 196.2 %   |
| June 30, 2015      | 806,274,000           | 47,125,000                           | 24,348,000                      | 193.6 %   |
| September 30, 2015 | 878,882,000           | 44,482,000                           | 25,313,000                      | 175.7 %   |
| December 31, 2015  | 944,844,000           | 31,232,000                           | 26,650,000                      | 117.2 %   |

Edgar Filing: GWG Holdings, Inc. - Form 424B3

|                    |               |            |            |      |   |

| September 30, 2016 | 1,272,078,000 | 35,867,000 | 37,055,000 | 96.8 | % |

9

We believe that the portfolio cash flow results set forth above are consistent with our general investment thesis: that the life insurance contract benefits we receive will continue to increase over time in relation to the premiums we are required to pay on the remaining policies in the portfolio. Nevertheless, we expect that our portfolio cash flow results on a period-to-period basis will remain inconsistent until such time as we achieve our goal of acquiring a larger, more diversified portfolio of life insurance contracts. As our receipt of life insurance contract benefits increases, we expect to increasingly use these cash flows to begin paying down our outstanding indebtedness and purchase additional life insurance contracts.

#### Inflation

Changes in inflation do not necessarily correlate with changes in interest rates. We presently do not foresee any material impact of inflation on our results of operations in the periods presented in our consolidated financial statements.

#### Off-Balance Sheet Arrangements

GWG Holdings is party to an office lease with U.S. Bank National Association as the landlord. Effective September 1, 2015, GWG Holdings entered into a second amendment to the lease with U.S. Bank National Association (Second Amendment to Lease). The Second Amendment to Lease increases the office space area to 17,687 square feet and extends the lease expiration date by approximately ten years (see Note 16 to our consolidated financial statements).

#### Credit Risk

We review the credit risk associated with our portfolio of life insurance contracts when estimating its fair value. In evaluating the contracts' credit risk, we consider insurance company solvency, credit risk indicators, economic conditions, ongoing credit evaluations, and company positions. We attempt to manage our credit risk related to life insurance contracts by generally purchasing life insurance contracts issued only from companies with an investment-grade credit rating by Standard & Poor's, Moody's, or A.M. Best Company. See "Portfolio Credit Risk Management" below.

#### Interest Rate Risk

Our senior credit facilities are floating-rate financing. In addition, our ability to offer interest rates that attract capital (including in our continuous offering of L Bonds) is generally impacted by prevailing interest rates. Furthermore, while our other indebtedness provides us with fixed-rate financing, our debt coverage ratio is calculated in relation to our total cost of financing. Therefore, rising interest rates could materially impact our business by increasing our borrowing costs, and reducing availability under our debt financing arrangements. Furthermore, we calculate our portfolio earnings based upon the spread generated between the return on our life insurance portfolio and the cost of our financing. As a result, increases in interest rates will reduce the earnings we expect to achieve from our investments in life insurance contracts.

#### Non-GAAP Financial Measures

Non-GAAP financial measures disclosed by management are provided as additional information to investors in order to provide an alternative method for assessing our financial condition and operating results. These non-GAAP financial measures are not in accordance with GAAP and may be different from non-GAAP measures used by other companies, including other companies within our industry. This presentation of non-GAAP financial information is not meant to be considered in isolation or as a substitute for comparable amounts prepared in accordance with GAAP. Please see our financial statements and related notes contained herein.

We use non-GAAP financial measures for maintaining compliance with covenants contained in our borrowing agreements and for planning and forecasting purposes. The application of current GAAP standards during a period of significant growth in our business, in which period we are building a large and actuarially diverse portfolio of life insurance, results in current period operating performance that may not be reflective of our long-term earnings potential. Management believes that our non-GAAP financial measures permit investors to better focus on this long-term earnings performance without regard to the volatility in GAAP financial results that can occur during this phase of growth.

Therefore, in contrast to a GAAP fair valuation (mark-to-market), we seek to measure the accrual of the actuarial gain occurring within the portfolio of life insurance contracts at our expected internal rate of return based on statistical mortality probabilities for the insureds (using primarily the insured’s age, sex, health and smoking status). The expected internal rate of return tracks actuarial gain occurring within the contracts according to a mortality table as the insureds’ age increases. By comparing the actuarial gain accruing within our portfolio of life insurance contracts against our adjusted costs during the same period, we can estimate, manage and evaluate the overall financial profitability of our business without regard to mark-to-market volatility. We use this information to balance our life insurance contract purchasing and manage our capital structure, including the issuance of debt and utilization of our other sources of capital, and to monitor our compliance with borrowing covenants. We believe that these non-GAAP financial measures provide information that is useful for investors to understand period-over-period operating results separate and apart from fair value items that could have a disproportionately positive or negative impact on GAAP results in any particular period.

Our senior credit facility with Autobahn/DZ Bank requires us to maintain a “positive net income” and “tangible net worth,” each of which are calculated on an adjusted non-GAAP basis using the method described above, without regard to GAAP-based fair value measures. In addition, our revolving senior credit facility with Autobahn/DZ Bank requires us to maintain an “excess spread,” which is the difference between (i) the weighted average of our expected internal rate of return of our portfolio of life insurance contracts and (ii) the weighted average of our senior credit facility’s interest rate. These calculations are made using non-GAAP measures in the method described below, without regard to GAAP-based fair value measures.

In addition, the Indenture governing our L Bonds and the note issuance and security agreement governing our Series I Secured Notes require us to maintain a “debt coverage ratio” designed to ensure that the expected cash flows from our portfolio of life insurance contracts is able to adequately service our total outstanding indebtedness. This ratio is calculated using non-GAAP measures in the method described below, again without regard to GAAP-based fair value measures.

Adjusted Non-GAAP Net Income. Our senior credit facility with Autobahn/DZ Bank requires us to maintain a positive net income calculated on an adjusted non-GAAP basis. We calculate the adjusted net income by recognizing the actuarial gain accruing within our life insurance contracts at the expected internal rate of return of the contracts we own without regard to fair value. We net this actuarial gain against our adjusted costs during the same period to calculate our net income on a non-GAAP basis.

(1) Reversal of unrealized GAAP fair value gain of life insurance contracts for current period.

(2) Adjusted cost basis is increased to include interest, premiums and servicing fees which are not capitalized under GAAP (non-GAAP cost basis).

- (3) Accrual of actuarial gain at expected internal rate of return based on the non-GAAP cost basis for the period.
- (4) We must maintain an annual positive consolidated net income, calculated on a non-GAAP basis, to maintain compliance with our revolving credit facility with Autobahn/DZ Bank.

Adjusted Non-GAAP Tangible Net Worth. Our revolving senior credit facility with Autobahn/DZ Bank requires us to maintain a tangible net worth in excess of \$45 million calculated on an adjusted non-GAAP basis. We calculate the adjusted tangible net worth by recognizing the actuarial gain accruing within our life insurance contracts at the expected internal rate of return of the contracts we own without regard to fair value. We net this actuarial gain against our adjusted costs during the same period to calculate our tangible net worth on a non-GAAP basis.

|  | As of<br>September 31,<br>2016 | As of<br>December 31, 2015 |
|--|--------------------------------|----------------------------|
| GAAP net worth                             | \$ 46,345,000                  | \$ 16,145,000              |

| GAAP tangible net worth                    | 26,025,000                     | 4,583,000                  |
| Unrealized fair value gain(2)              | (247,889,000 )                 | (194,043,000 )             |
| Adjusted cost basis increase(3)            | 230,532,000                    | 190,645,000                |
| Accrual of unrealized actuarial gain(4)    | 140,693,000                    | 111,355,000                |
| Total adjusted non-GAAP tangible net worth | \$ 149,361,000                 | \$ 112,540,000             |

(1) Unamortized portion of deferred financing costs and pre-paid insurance.

(2) Reversal of cumulative unrealized GAAP fair value gain on life insurance contracts.

(3) Adjusted cost basis is increased to include interest, premiums and servicing fees, which are not capitalized under GAAP.

(4) Accrual of cumulative actuarial gain at expected internal rate of return based the non-GAAP cost basis.

Excess Spread. Our revolving senior credit facility with Autobahn/DZ Bank requires us to maintain a 2.00% “excess spread” between our weighted-average expected internal rate of return of our portfolio of life insurance contracts and the revolving senior credit facility’s interest rate. The expected internal rate of return on the portfolio is the rate of return the portfolio would earn if all future cash flows occurred over time in proportion to the likelihood of their projected occurrence. Expected future cash flows represent the size of each potential payment (premiums and contract benefits), multiplied by the probability of that particular payment occurring. This calculation is known as the “probabilistic expectation” and it is based on actuarial estimations of life expectancy. For instance, a required premium payment of \$10,000 might be projected for a given contract at a date five years from now. If there is a 50% chance of survival for the next five years, then that particular expected cash-outflow is calculated at \$5,000. Similarly, if the contract benefit amount on the same contract is \$1 million, then during the next five years, the probable expected cash-inflow of contract benefits will total \$500,000 with the other \$500,000 projected to occur over the remaining life of the insured. The rate of return generated by the net of all such future expected cash flows for the portfolio is thus the expected IRR for the portfolio.

A presentation of our excess spread and our total excess spread is set forth below. Management uses the “total excess spread” to gauge expected profitability of our investments, and uses the “excess spread” to monitor compliance with our borrowing.

|  | As of<br>September 30,<br>2016 | % | As of<br>December 31,<br>2015 | % |
|--|--------------------------------|---|-------------------------------|---|
| Weighted-average expected IRR(1)                         | 11.65                          | % | 11.11                         | % |
| Weighted-average senior credit facility interest rate(2) | 6.45                           | % | 5.58                          | % |
| Excess spread  | 5.20                           | % | 5.53                          | % |

Edgar Filing: GWG Holdings, Inc. - Form 424B3

|  |      |   |      |   |
|--|------|---|------|---|
| Total weighted-average interest rate on indebtedness for borrowed money(3) | 7.10 | % | 6.98 | % |
| Total excess spread(4)   | 4.55 | % | 4.13 | % |

---

(1) This represents the weighted-average expected internal rate of return of the life insurance contracts as of the measurement date based upon our non-GAAP cost basis of the insurance contracts and the expected cash flows from the life insurance portfolio.

12

| Investment cost basis(C)        | \$ 460,228,000                 | \$ 353,252,000                |

(A) This represents the reversal of cumulative unrealized GAAP fair value gain of life insurance contracts.

(B) Adjusted cost basis is increased to include interest, premiums and servicing fees which are not capitalized under GAAP.

(C) This is the non-GAAP cost basis in life insurance contracts from which our expected internal rate of return is calculated.

(2) This is the weighted-average interest rate for both senior credit facilities as of the measurement date.

(3) Represents the weighted-average interest rate paid on all interest-bearing indebtedness as of the measurement date, determined as follows:

|                          | As of<br>September 30,<br>2016 | As of<br>December 31,<br>2015 |
|--------------------------|--------------------------------|-------------------------------|
| Indebtedness             |                                |                               |
| Senior credit facilities | \$ 71,250,000                  | \$ 65,011,000                 |
| Series I Secured Notes   | 17,830,000                     | 23,578,000                    |
| L Bonds                  | 384,586,000                    | 282,171,000                   |
| Total                    | \$ 473,666,000                 | \$ 370,760,000                |

Interest Rates on Indebtedness

|  |      |   |      |   |
|--|------|---|------|---|
| Senior credit facilities                             | 6.45 | % | 5.58 | % |
| Series I Secured Notes                               | 8.63 | % | 8.47 | % |
| L Bonds  | 7.16 | % | 7.18 | % |
| Weighted-average interest rates paid on indebtedness | 7.10 | % | 6.98 | % |

(4) Calculated as the weighted-average expected IRR (1) minus the weighted-average interest rate on interest-bearing indebtedness (3).

Debt Coverage Ratio and Subordination Ratio. Our L Bond and Series I Secured Notes borrowing covenants require us to maintain a “debt coverage ratio” of less than 90%. The “debt coverage ratio” is calculated by dividing the sum of our total interest-bearing indebtedness by the sum of our cash and cash equivalents and the net present value of the life insurance portfolio. The “subordination ratio” for our L Bonds is calculated by dividing the total interest-bearing indebtedness that is senior to L Bonds and Series I Secured Notes by the sum of the company’s cash and cash equivalents and the net present value of the life insurance portfolio. The “subordination ratio” must be less than 50%. For purposes of both ratio calculations, the net present value of the life insurance portfolio is calculated using a discount rate equal to the weighted average interest rate paid on all indebtedness. As of the date of this report, the subordination ratio provisions under the Indenture have expired.

| As of<br>September 30, | As of<br>December 31, |
|------------------------|-----------------------|
|------------------------|-----------------------|

Edgar Filing: GWG Holdings, Inc. - Form 424B3

|   | 2016             |   | 2015           |   |
|---|------------------|---|----------------|---|
| Life insurance portfolio contract benefits                      | \$ 1,272,078,000 |   | \$ 944,844,000 |   |
| Discount rate of future cash flows                              | 7.10             | % | 6.98           | % |
| Net present value of Life insurance portfolio contract benefits | \$ 586,332,000   |   | \$ 435,738,000 |   |
| Cash and cash equivalents                                       | 34,462,000       |   | 36,767,000     |   |
| Life insurance contract benefits receivable                     | 6,129,000        |   | —              |   |
| Total Coverage  | 626,923,000      |   | 472,505,000    |   |
| Senior credit facilities  | 71,250,000       |   | 65,011,000     |   |
| Series I Secured Notes  | 17,830,000       |   | 23,578,000     |   |
| L Bonds   | 384,586,000      |   | 282,171,000    |   |
| Total Indebtedness  | \$ 473,666,000   |   | \$ 370,760,000 |   |
| Debt Coverage Ratio   | 75.55            | % | 78.47          | % |
| Subordination Ratio   | 11.36            | % | 13.76          | % |

As of September 30, 2016, we were in compliance with both the debt coverage ratio and the subordination ratio.

Non-GAAP Expected Portfolio Internal Rate of Return at Purchase. The non-GAAP expected portfolio internal rate of return (IRR) at purchase is calculated as the weighted average (by face amount of contract benefits) of the IRR expected at the time of purchase for all life insurance contracts in the portfolio. This non-GAAP measure isolates our IRR expectation at purchase and utilizes our underwriting life expectancy assumptions at the time. This measure does not change with the passage of time as compared to our non-GAAP cost basis that increases with the payment of premiums, financing costs, and the effective life expectancy which changes over time, both of which are used to calculate our expected portfolio IRR.

|  | As of<br>September 30,<br>2016 | As of<br>December 31,<br>2015 |
|--|--------------------------------|-------------------------------|
| Life insurance portfolio contract benefits | \$ 1,272,078,000               | \$ 944,844,000                |
| Total number of policies                   | 625                            | 396                           |

|   |       |   |       |   |
|---|-------|---|-------|---|
| Non-GAAP Expected Portfolio Internal Rate of Return at Purchase | 15.70 | % | 15.71 | % |
|---|-------|---|-------|---|

We have in the past reported non-GAAP net asset value among our other non-GAAP financial measures. We have determined, however, to cease reporting this measure primarily because we do not believe that it is sufficiently additive to our existing non-GAAP measures in aiding users of our financial statements and disclosures to measure and evaluate our financial condition or operating results. Moreover, we are not aware of other reporting companies in our industry that use this measure to evaluate their financial condition or operating results.

#### Portfolio Information

Our portfolio of life insurance contracts, owned by our subsidiaries as of September 30, 2016, is summarized below:

#### Life Insurance Portfolio Summary

|   |                  |   |
|---|------------------|---|
| Total portfolio face value of contract benefits   | \$ 1,272,078,000 |   |
| Average face value per contract                   | \$ 2,035,000     |   |
| Average face value per insured life               | \$ 2,263,000     |   |
| Weighted average age of insured (yrs.)*           | 81.8             |   |
| Weighted average life expectancy estimate (yrs.)* | 6.8              |   |

We track concentrations of pre-existing medical conditions among insured individuals within our portfolio based on information contained in life expectancy reports. We track these medical conditions within the following ten primary disease categories: (1) cancer, (2) cardiovascular, (3) cerebrovascular, (4) dementia, (5) diabetes, (6) multiple, (7) neurological disorders, (8) no disease, (9) other, and (10) respiratory diseases. Our primary disease categories are summary generalizations based on the ICD-9 codes we track on each insured individuals within our portfolio. ICD-9 codes, published by the World Health Organization, are used worldwide for medical diagnoses and treatment systems, as well as morbidity and mortality statistics. Currently, the only primary disease category within our portfolio that represents a concentration of over 10% is cardiovascular, which constitutes 21.25% of the value of our portfolio.

Portfolio Credit Risk Management

We rely on the payment of life insurance contract benefit claims by life insurance companies as our most significant source of cash flow. The life insurance assets we own represent obligations of third-party life insurance companies to pay face value of the life insurance contract benefits. As a result, we manage this credit risk exposure by generally purchasing contracts issued by insurance companies with investment-grade ratings from Standard & Poor's, and diversifying our portfolio among a number of insurance companies.

As of September 30, 2016, 97.0% of our life insurance contracts, by face value benefits, were issued by insurance companies that maintained an investment-grade rating (BBB- or better) by Standard & Poor's. Our largest life insurance company credit exposures and their respective Standard & Poor's credit rating of their respective financial strength and claims paying ability is set forth below:

| Rank | Contract Benefits | Percentage of Contract Benefit Amount | Insurance Company  | Ins. Co. S&P Rating |
|------|-------------------|---------------------------------------|--|---------------------|
| 1    | \$ 182,494,000    | 14.3 %                                | AXA Equitable Life Insurance Company<br>John Hancock Life Insurance Company (U.S.A.) | A+                  |
| 2    | \$ 165,255,000    | 13.0 %                                | Lincoln National Life Insurance Company  | AA-                 |

|      | \$ 959,002,000    | 75.4 %                                |  |                     |

The yield to maturity on bonds issued by life insurance carriers reflects, among other things, the credit risk (risk of default) of such insurance carrier. We track the yields on certain publicly traded life insurance company bonds as this information is part of the data we consider when valuing our portfolio of life insurance contracts for our financial statements according to GAAP. Also we believe that these yields provide investors a market-based perspective on the financial strength of the largest life insurance companies backing our portfolio.

| Name of Bond                       | Maturity   | YTM    | Duration (Years) | Bond S&P Rating |
|------------------------------------|------------|--------|------------------|-----------------|
| AXA 7.125%                         | 12/15/2020 | 1.54 % | 4.2              | BBB             |
| Manulife Finl 4.15%                | 3/4/2026   | 2.83 % | 9.4              | A               |
| Lincoln National Corp Ind 3.35%    | 3/9/2025   | 3.05 % | 8.7              | A-              |
| Amer Intl Grp 4.875%               | 6/1/2022   | 2.48 % | 5.7              | A-              |
| Protective Life 7.375%             | 10/15/2019 | 2.18 % | 3.0              | A-              |
| Metro Life Gbl Fd1 4.75%           | 9/17/2021  | 3.01 % | 5.0              | AA-             |
| Prudential Finl Inc Mtns Book 4.5% | 5/15/2024  | 2.97 % | 7.9              | A               |
| Average yield on insurance bonds   |            | 2.58 % | 6.3              |                 |

The table above indicates the current yields to maturity (YTM) for the senior bonds of selected life insurance carriers with durations, on average, that are similar to our life insurance portfolio. The average yield to maturity of these bonds was 3.02%, which, we believe, reflects in part the financial market's judgement that credit risk is low with regard to these carriers' financial obligations. It should be noted that the obligations of life insurance carriers to pay life insurance contract benefits is senior in rank to any other obligation. This "super senior" priority is not reflected in the yield to maturity in the table and, if considered, would result in a lower yield to maturity all else being equal. As such, as long as the respective premium payments have been made, it is highly likely that the owner of the life insurance contract will collect the insurance contract benefit upon the mortality of the insured.

Edgar Filing: GWG Holdings, Inc. - Form 424B3

The complete detail of our portfolio of life insurance contracts, owned by our wholly owned subsidiaries as of September 30, 2016, organized by the current age of the insured and the associated contract benefits, sex, estimated life expectancy, issuing insurance carrier, and the credit rating of the issuing insurance carrier, is set forth below.

---

(1) Person's age on last birthday (ALB)

(2) The insured's life expectancy estimate, other than for a small face value insurance contract (i.e., a contract with \$1 million in face value benefits or less), is the average of two life expectancy estimates provided by independent third-party medical-actuarial underwriting firms at the time of purchase, actuarially adjusted through the measurement date. Numbers in this column represent months.

## **OTHER INFORMATION**

### **Origination, Underwriting and Technology**

We focus on purchasing high quality life insurance assets through our origination practices and underwriting procedures. In general, these practices and procedures strive to meet published guidelines for rated securitizations of life insurance portfolios. At the same time, we seek innovative value-added tools, services, and methodologies to improve both the accuracy and efficiency with which we evaluate and acquire life insurance assets.

Since 2013, we have focused on developing our direct origination channels through which we may purchase life insurance policies without the involvement of a life settlement broker, thereby eliminating commission costs and timing delays in the acquisition. We expect to continue allocating considerable resources towards developing our direct origination channels, primarily by outreach and relationship building with financial advisors (who may also sell our investment securities), life insurance agents, and consumers.

Our success in direct origination has presented us with the opportunity to purchase a greater number of “small face” life insurance policies with a face value benefit of \$1,000,000 or less. We believe this opportunity is meaningful since the majority of life insurance policies outstanding are small face policies, and policy diversification is critical in obtaining normalized actuarial performance. Historically, however, small face policies have not been available to purchasers of life insurance contracts because the secondary market industry participants have significantly relied on life settlement brokers who are paid a commission determined as a percentage of the face value benefit of the purchased policy, to present purchase opportunities. Not surprisingly, because larger commissions are associated with larger face value life insurance contracts, brokers have focused on larger contracts and the industry has developed origination practices and underwriting procedures to accommodate such practices. As a result, the industry’s traditional approaches to underwriting and purchasing life insurance assets are ill suited for small face policies. For example, procuring complete medical records, two separate life expectancy reports, and engaging in related activities, can be time consuming and expensive, and these same costs cannot be justified when purchasing smaller life insurance assets.

To more fully realize the potential of the direct origination channel we have built, we have developed what we believe to be an efficient, cost-effective, and reliable method of underwriting and purchasing small face policies. In sum, our method is focused on obtaining enough medical information to generate reliable life expectancy estimates, and thereby make informed purchase decisions. We expect to refine this process over time and, to the extent possible, use new technologies to enhance this process and our overall business.

To that end, we have recently announced the execution of our option to exclusively license “DNA Methylation Based Predictor of Mortality” technology from the University of California, Los Angeles (UCLA) and discovered by Dr. Steven Horvath. In 2013, Dr. Horvath reported that human cells have a mechanism that records “biological age” progression, based on DNA methylation that is independent from “chronological age.” In 2016, Dr. Horvath discovered a specific set of DNA methylation-based bio-markers that are highly predictive of all-cause mortality. The discovery

was made through a statistical analysis of bio-markers found in DNA samples from over 13,000 individuals whose health was studied for decades. The implications of Dr. Horvath's discovery are simple and profound: Individual lifespans can now be estimated with significantly greater precision. We intend to implement aspects of this technology in our underwriting protocols and to explore how this technology may have commercial value to the primary life insurance, long-term care, and annuity businesses.

## **RISK FACTOR UPDATE**

*The following risk factors are hereby added to the prospectus. You should read these risk factors carefully and in conjunction with the other risk factors disclosed in the prospectus.*

***Accuracy of the life expectancy estimates and mortality curves we use for small face contracts could have a material and adverse effect on our results of operation and financial condition.***

As of September 30, 2016, we owned 306 “small face” life insurance policies (i.e., a contract with \$1 million in face value benefits or less) having \$164 million in face value of insurance benefits. The underwriting processes and mortality curves we use to evaluate, price and purchase small face contracts may be different from, and, as a result, may not be as reliable as, the processes we use for life insurance contracts with larger face values of benefits. While we obtain life expectancy reports from third-party evaluators based on medical evidence, the processes used to develop these life expectancy reports are less extensive than traditional methods. Although we have professional actuarial guidance in the use and application of mortality curves to price and value small face contracts, the application of these mortality curves may not be as reliable as or more subject to adjustment than the processes we use for larger face value of benefits. As the face value of our small face contracts increases relative to the size of our total portfolio, the accuracy with which we have estimated life expectancies and mortality curves for these contracts will become increasingly material to our business. Any shortcomings in the processes we have used to evaluate, price, purchase and value the small face contracts we own could have a material and adverse effect on our results of operation and financial condition. Any such outcomes would likely have a negative and possibly material effect on the price of our common stock and our ability to satisfy our debts.

***We may in the future rely, in part, on new and unproven technology as part of our underwriting processes. If the mortality predictions we obtain through use of this technology proves inaccurate, our results of operation and financial condition could be materially and adversely affected.***

We recently exercised our option to license, on an exclusive basis, new technology that we believe may be applied to assist us with the mortality predictions in the course of underwriting and valuing life insurance contracts. This technology, however, has not yet been commercially applied in the manner we envision, and it possible that we will be unable to elicit more accurate mortality predictions through its use. It is also possible that the mortality predictions we obtain through the use of this technology will prove inaccurate, and perhaps materially so. In such a case, our failure to accurately forecast mortalities could have a material and adverse effect on our results of operation and financial condition, which could in turn materially and negatively affect the price of our common stock and our ability to satisfy our debts.

***The technology we license may subject us to claims of infringement or invalidity from third parties, and the magnitude of this risk to our business generally rises if and as we become more successful in employing and relying on the technology. Any such claims would be complex and costly, and adverse outcomes could undermine***

*the competitive advantages we seek.*

Our reliance on technology will subject us to the risk that other parties may assert, rightly or wrongly, that our intellectual property rights are invalid or violate the rights of those parties, as well as the risk that our intellectual property rights will be infringed upon by third parties. Any outcome that invalidates our intellectual property rights or that otherwise diminishes the competitive advantages obtained, at least in part, through the use of those rights could have a material and adverse effect on our competitive position and our prospects.
